A. The traffic engineer is authorized to determine and designate those heavily traveled streets upon which shall be prohibited the use of the roadway by motor-driven cycles, bicycles, horse drawn vehicles, or other nonmotorized traffic and shall erect appropriate signs giving notice thereof.

B. When signs are so erected giving notice thereof, no person shall disobey the restrictions stated on such signs. (Prior code § 20-130)

12.40.020 Establishment and revision of truck routes.

The traffic engineer is authorized and required to establish truck routes and make periodic reviews of established truck routes within the city limits. The traffic engineer shall submit written recommendations to the city council for all establishment, changes, alterations, elimination and improvements of truck routes based on changing conditions and factors affecting the need for such routes in such places and in such number as may be determined to be of the greatest benefit and convenience to the public. The city council shall approve the truck routes by amendments to Section 12.88 (Schedules). (Ord. 13152 § 100, 1997; prior code § 20-131.1)
(Ord. No. 17364, § 1, 7-27-2010)

12.40.030 Large vehicles—Permit—Required.

A. Vehicles, with or without trailers, exceeding forty-five feet in length, or eight feet in width, or thirteen feet six inches in height shall not be operated within the central traffic district; however, such vehicles may be operated within such district upon issuance of a written permit from the chief of police or his designated agent.

B. Vehicles, with or without trailers, exceeding twenty-six feet in length, eight feet in width, or thirteen feet six inches in height shall not be operated on any of the streets listed in Schedule VII, Section 12.88.070; provided, however, such vehicles will be allowed to operate upon such street if such vehicle is making a pickup or delivery on

such streets or must use such streets to gain the only available access to a destination where the vehicle will be making a pickup or delivery.

C. Trucks, with or without trailers, including pickup trucks, exceeding an overall length of eighteen feet shall not be operated on any street or part of any street listed in Schedule VIIA, Section 12.88.071; provided, however, such trucks will be allowed to operate upon such streets if such a truck is making a pickup or delivery on such streets, or must use such streets to gain the only available access to the destination where the truck will be making a pick-up or delivery, has a point of origin or destination on that street, or must use such street to gain the only available access to that point of destination or from that point of origin.

D. Vehicles with or without trailers, exceeding twenty-six feet in length, eight feet in width, or thirteen feet six inches in height shall not be operated on any of the streets listed in Schedule VIIB, Section 12.88.072, between the hours of eight p.m. and six a.m.

E. Provided, further, that this section shall not apply to vehicles of a political subdivision of the state performing a function of their entity.

F. Vehicles with or without trailers, exceeding forty-five feet in length, or eight feet in width, or thirteen feet six inches in height shall not be operated within the following districts; provided, however, such vehicles may be operated within such district upon issuance of a written permit from the chief of police or his designated agent:

1. South El Paso district;

2. Piedras-Alameda district. (Ord. 11071 § 2, 1992; Ord. 19057 § 2, 1992; Ord. 9559 § 1, 1988: Ord. 8207 § 1, 1984; Ord. 8148 § 1, 1984; prior code § 20-132)

12.40.040 Large vehicles—Maximum length.

A. No person shall operate any motor vehicle, truck-tractor, trailer or semitrailer on any street or alley within the city if the length thereof exceeds the maximum length of sixty-five feet.

B. Nothing herein shall abrogate the limitations on the size of vehicles operated within the central traffic district or on certain streets as provided in Section 12.40.030. (Prior code § 20-133)

12.40.050 Large vehicles—Maximum width and height.

A. No person shall operate any motor vehicle, truck-tractor, trailer or semitrailer on any street or alley within the city if the width or height exceeds eight feet wide, thirteen feet six inches high as provided for by state law and with the exceptions therein.

B. Nothing herein shall abrogate the limitation on the size of vehicles operated within the central traffic district or on certain streets as provided in Section 12.40.030. (Prior code § 20-134)

12.40.060 Large vehicles—Maximum weight.

A. No person shall operate any motor vehicle, truck-tractor, trailer or semitrailer on any street or alley within the city if the weight thereof exceeds the maximum weight established by state law.

B. Nothing herein shall abrogate the limitations on the size of vehicles operated within the central traffic district or on certain streets as provided in Section 12.40.030.

C. The police department shall have the authority to weigh trucks which are traveling within the confines of the city which may exceed the legal load limit established by state law for roads and bridges. (Prior code § 20-134.1)

12.40.070 Maximum vehicle weights allowed on certain bridges and streets.

No person shall drive any vehicle on that part of the following described bridges or streets if such vehicle, with its load and any trailer or attachment, has a gross weight in excess of the amounts hereinafter set forth:

A. The bridge immediately south of the Southern Pacific Railroad bridge across the Rio Grande, extending from Paisano Drive, across the river, to the property of the El Paso Brick Company and McNutt Road in New Mexico, with a load limit of eighteen thousand pounds gross vehicle weight;

B. Courchesne Bridge across the Rio Grande with a load limit of twenty-one thousand pounds tandem axle weight;

C. Borderland Bridge across the Rio Grande with a load limit of seventeen thousand pounds tandem axle weight;

D. Country Club Road (FM 260) between Doniphan Drive and the city limits with a roadway load limit of fifty-eight thousand four hundred twenty pounds gross vehicle weight;

E. Westside Drive (FM 260) between Country Club Road and the city limits with a roadway load of fifty-eight thousand four hundred twenty pounds gross vehicle weight;

F. Gibson Veck Road between Frontera Road and the city limits with a roadway load limit of seven thousand pounds gross vehicle weight;

G. First Avenue bridge over the Franklin Canal between Coles Street and Cypress Street with a load limit of twelve thousand five hundred pounds gross vehicle weight. (Ord. 15696 § 1, 2004; Ord. 11758 §§ 1, 2, 1994: prior code § 20-135)

12.40.080 Large vehicles—Permit—Considerations in refusing permit.

Whenever in the traffic ordinances a permit from the chief of police is required for the operation of a vehicle on any street or alley or in any district, such permit shall be given or refused by the chief of police according to whether he considers such operation will be reasonably consistent with the public safety, considering the following: the size, nature and condition of the vehicle, the length of the route, the amount and character of traffic to be expected upon the route on the date and during the hours when the vehicle is to be operated on the route, the necessity for such operation, and any other factor reasonably bearing on the safety of the operation. (Prior code § 20-131)

12.40.090 Vehicles restricted to truck routes—Exceptions.

A. Vehicles whose origin or destination lies outside the city limits, which dimensions exceed those stated in Section 12.40.030 B., shall use the streets and parts of streets listed in Schedule VIII, Section 12.88.080 and no others.

B. Any operator of such vehicle may deviate from such truck routes as provided in subsection (A) of this section provided that he or she utilizes the most direct route to and from the truck routes, and does so for the purpose of making a pick-up and/or delivery in the course of business. Any operator found deviating from the truck routes as provided for herein is presumed to not be in compliance with the truck route ordinance. The presumption is rebuttable and proof of compliance is a defense to a citation under this code section.

C. Provided further that this section shall not apply to vehicles of a political subdivision of the state performing a function of their entity.

D. Any operator of a vehicle whose dimensions exceed those stated in Section 12.40.030(B) who is required by Texas state law to take a test conducted by the Department of Public Safety, may deviate from the truck routes as provided in subsections A and B of this section for the purpose of traveling to and from a Texas Department of Public Safety testing office and for the purpose of taking a driving test conducted by a Texas Department of Public Safety officer. No vehicle exempt under this section shall transport any hazardous materials or flammable liquids while deviating from truck routes.

E. 1. Vehicles with or without trailers exceeding twenty-six feet in length, eight feet in width or thirteen feet six inches in height shall not be operated on Country Club Drive within the city limits of El Paso, Texas.

2. No such vehicle shall be operated on the road heretofore a section of State Farm-to-Market Road 260 from State Highway 20 to its intersection of State Highway 178 (Artcraft Road) at Farm-to-Market Road 260, a distance of approximately 4.5 miles.

3. The prohibition of this subsection shall not apply to city, county, state or federal governmental vehicles or any vehicle of a political subdi-

vision of the state. (Ord. 13739 § 1, 1998; Ord. 13561 § 2, 1998; Ord. 10103 § 1, 1990; prior code § 20-136)
(Ord. No. 17364, § 2, 7-27-2010)

12.40.100 Vehicles transporting hazardous materials—Restriction to certain routes.

Vehicles, with or without trailers, transporting hazardous materials, as defined in 49 C.F.R. Section 171.8, or any amendments thereto, shall be operated upon those streets and parts of streets listed in Schedule IX, Section 12.88.110. (Ord. 11701 § 1, 1993)

12.40.110 Vehicles transporting hazardous materials—Authority to leave special truck routes.

Vehicles, with or without trailers, carrying hazardous materials, as defined in Section 12.40.100, may leave the routes defined in Section IX, Section 12.88.110, only by the shortest route to pick up and deliver any hazardous material. Vehicles carrying flammable liquids that are hazardous materials, as defined in Section 12.40.100, that leave the routes to deliver to any retail or bulk oil station any flammable liquid, other than petroleum gases, shall be equipped with inside valves as described in provisions of this code regulating the installation and operation of refineries and wholesale or bulk oil stations handling flammable liquids and the construction and operation of tank trucks handling such flammable liquids within the limits of the city, and provided further, such vehicle shall meet any requirement set forth in this title or any other ordinance regulating or pertaining to the transportation of flammable liquids, unless inconsistent with the provisions of federal or state law. (Ord. 11701 § 2, 1993)

12.40.120 Vehicles transporting flammable liquids—Inside valves and safety devices required.

No vehicle, with or without trailer, shall be permitted to unload flammable liquids in classes 1, 2 or 3 as provided in the provisions referred to in Section 12.40.100 hereof within the limits of the city unless such vehicle and/or trailer is equipped with inside valves and other safety devices as required in any ordinance of this city. (Prior code § 20-139)

12.40.130 Vehicles operated with unsecured loads.

No person shall operate, or cause to be operated, on any public street or public alley, any vehicle loaded in such a manner with any article or articles, that when said vehicle is in motion, any article or articles are likely to fall upon any public street or public alley. (Ord. 9168, 1987: prior code § 20-140)

12.40.140 Vehicles laden with sand—Restricted to use of certain streets—Exception.

A. All vehicles with or without trailers, exceeding a total gross weight of twenty thousand pounds and which transport sand, gravel, rock, earth, quarried materials or other particles in bulk shall use the streets and parts of streets listed in Schedule VIII, Section 12.88.080, and no others; provided, however, they may leave such routes only by the nearest route to make pickups or deliveries from the above described vehicles, and shall return to such prescribed route by the shortest route possible.

B. Verification of pickups or deliveries shall be made by the vehicle operator, upon the request of any law enforcement officer for the city by presenting for inspection to the officer, a shipping order, bill of lading, contract or other instrument specifying the date, address and name of the company or individual requesting or directing the pickup or delivery.

C. For the purpose of this section the gross vehicle weight may be determined by the law enforcement officer from a visual inspection of the vehicle registration receipt which is required by Article 6701d-11, Section 5(a), Vernon's Annotated Texas Statutes, to be carried at all times on

any such vehicle. (Prior code § 20-140.1)

12.40.150 Vehicles laden with sand—Removal of spilled materials.

Every person operating any vehicle from which any particles or materials described in Section 12.40.130 having knowledge or notice that such particles or materials have fallen or are thrown upon any paved public street or paved public alley, shall immediately remove, or cause to be removed, such particles or material from the street or alley. (Prior code § 20-141)

Chapter 12.42

RESTRICTIONS FOR TRUCKS UPON A PORTION OF INTERSTATE HIGHWAY 10

Sections:

12.42.010 Definitions.

12.42.020 Restrictions.

12.42.030 Enforcement.

12.42.010 Definitions.

"Authorized lane" means the lanes to the right of the left most lane.

"Designated portion of affected highway" means that part of Interstate Highway 10 from 0.2 miles east of the apex of the State Highway 20 (Mesa Street) overpass structure on the west to a point 0.7 miles west of the apex of the Farm-to-Market Highway 659 (Zaragoza Road) overpass structure on the east for eastbound vehicles and 0.3 miles west of the apex of the Farm-to-Market Highway 659 (Zaragoza Road) overpass structure on the east to point 0.2 miles east of the apex of the State Highway 20 (Mesa Street) overpass structure on the west for westbound vehicles.

"Truck" means a "truck" as defined in Section 541.201 of the Texas Transportation Code that has three or more axels or a "truck tractor" as defined by Section 541.201 of the Texas Transportation Code, regardless of whether the truck tractor is drawing another vehicle or trailer.
(Ord. 17156, § 1, 8-4-2009)

12.42.020 Restrictions.

Any person driving or operating a truck on the designated portion of affected highway shall not utilize any control access lane other than the authorized lanes, except that a restricted vehicle may use any lane of the highway to pass another vehicle and to enter and exit the highway.
(Ord. 17156, § 1, 8-4-2009)

12.42.030 Enforcement.

A. Enforcement of this ordinance will commence upon the placement of the appropriate traffic control devices as specified under Texas Transportation Code Section 545.0651.

B. A violation of this provision is a misdemeanor and shall be punished by a fine not exceeding five hundred dollars.

C. This restriction may be suspended by the Texas Department of Transportation Executive Director or his designee, for any reasons stated under Texas Transportation Code Section 545.0651(f).
(Ord. 17156, § 1, 8-4-2009)

Chapter 12.44

STOPPING, STANDING AND PARKING GENERALLY

Sections:

12.44.010 Where signs required.

12.44.020 Where no signs required.

12.44.030 Proximity to curb.

12.44.040 Angle parking—Placing signs and markings.

12.44.050 Angle parking—Offset parking.

12.44.060 Angle parking—Obedience to signs and markings.

12.44.070 Back-in angled parking only zone.

12.44.080 Traffic obstruction prohibited.

12.44.090 Parking prohibited for certain purposes.

12.44.100 Parking prohibited for certain vehicles.

12.44.110 Parking adjacent to schools—Sign erection—Authority to have vehicles towed.

12.44.120 Parking adjacent to schools—Sign erection authority.

12.44.130 Parking on narrow streets.

12.44.140 Parking on one-way streets.

12.44.150 Standing or parking on one-way roadways.

12.44.160 Parking in alleys.

12.44.170 Parking on city-owned property.

12.44.180 Regulations pertaining to certain special situations.

12.44.190 Off-street parking requirements for foreign consulates and appurtenant exhibition halls.

12.44.200 Disabled parking on private property.

12.44.210 Hazardous or congested places.

12.44.220 Street cleaning or construction—Sign placement.

12.44.230 Pickup and discharge of agricultural workers.

12.44.240 Temporary no parking zones.

12.44.250 Sign erection required—Violation.

12.44.260 Stealing space.

12.44.270 Moving another's vehicle into or out of spaces.

12.44.280 Restrictions on parking in residential parking districts.

12.44.290 Restrictions on parking in downtown parking districts.

12.44.300 Educational parking districts.

12.44.010 Where signs required.

No person shall stop, stand or park a vehicle, except when necessary to avoid conflict with other traffic, or in compliance with law or the directions of a police officer or traffic-control device, in any of the following places when signs are erected giving notice thereof:

A. Within thirty feet upon the approach to any flashing beacon or traffic-control signal locate at the side of a roadway.

B. Between a safety zone and the adjacent curb or within thirty feet of points on the curb immediately opposite the ends of a safety zone, unless the traffic engineer has indicated a different length by signs or markings;

C. Within fifty feet of the nearest rail of a railroad crossing;

D. Within twenty feet of the driveway entrance to any fire station and on the side of a street opposite the entrance to any fire station within seventy-five feet of such entrance;

E. In alleys designated by the traffic engineer as waste collection locations under Title 9.04.100 on designated days and times. (Ord. 12391, 1995; prior code § 20-76)

(Ord. No. 17690, § 5, 12-6-2011; Ord. No. 17813, § 1, 6-5-2012; Ord. No. 019666, § 1, 8-27-2024)

12.44.020 Where no signs required.

No person shall stop, stand, or park a vehicle, except when necessary to avoid conflict with other

traffic or in compliance with law or the directions of a police officer or traffic-control device, in any of the following places:

A. On a sidewalk;

B. In front of a public or private driveway;

C. Within an intersection;

D. Within fifteen feet of a fire hydrant;

E. Within twenty feet of a crosswalk;

F. Alongside or opposite any street excavation or obstruction when stopping, standing or parking would obstruct traffic;

G. On the roadway side of any vehicle stopped or parked at the edge or curb of a street;

H. Upon any bridge or other elevated structure upon a highway or within a highway tunnel;

I. At any place where official signs prohibit stopping. Provided, however, that the driver of a vehicle may stop temporarily at such place for a period not exceeding five minutes for the purpose of assisting in the loading or unloading of disabled persons as defined by state law;

J. On a median strip;

K. On the area between the curb line, or the lateral lines of the roadway, and the adjacent property line;

L. On city-owned property that is not held open or provided for vehicular traffic or public parking;

M. Adjacent to a curb that has yellow curb markings. For the purposes of this section, a presumption shall exist that yellow markings have been placed on a curb pursuant to appropriate authorization. Any person charged with an offense under this subsection shall be entitled, at a hearing in accordance with Chapter 12.85 of this title, to assert as an affirmative defense that the yellow curb markings were not duly authorized.

It shall be an offense for any person to create yellow curb markings without the appropriate authorization granted in accordance with the provisions of this code.

N. Designated bike lanes, unless official signs allow such parking during specific times.

O. Within thirty feet upon the approach to a stop sign. (Ord. 11486 § 1, 1993; Ord. 10964 § 2, 1992; prior code § 20-75)
(Ord. No. 17366, § 1, 7-27-2010; Ord. No. 17813, § 2, 6-5-2012)

12.44.030 Proximity to curb.

No person shall stand or park a vehicle in a roadway other than parallel with the edge of the roadway headed in the direction of lawful traffic movement and with the right-hand wheels of the vehicle within eighteen inches of the curb or edge of the roadway, except that motorcycles shall be parked with at least one wheel or fender touching the right-hand curb; provided, on one-way streets (if parking or standing on the left side of street is not otherwise prohibited) vehicles standing or parked on the left side of the street shall have their left-hand wheels within eighteen inches of the curb or edge of the roadway, except that motorcycles shall be parked with at least one wheel or fender touching the left-hand curb, and provided further, these requirements for parallel parking shall not apply to a location at which angle or offset parking or standing is permitted under this title. (Prior code § 20-68)
(Ord. 17037, § 1, 12-9-2008)

12.44.040 Angle parking—Placing signs and markings.

A. The traffic engineer shall determine upon what streets angle parking shall be permitted and shall mark or sign such streets, but such angle parking shall not be indicated upon any federal-aid or state highway within this city unless the state highway commission has determined by resolution or order entered in its minutes that the roadway is of sufficient width to permit angle parking without interfering with the free movement of traffic.

B. Angle parking shall not be indicated or permitted at any place where passing traffic would thereby be caused or required to drive upon the left side of the street or upon any streetcar tracks. (Prior code § 20-69)

12.44.050 Angle parking—Offset parking.

A. That the city council may determine by resolution what streets may be designated by curb setbacks within the right-of-way to accommodate angled parking; provided however, that no such curb setbacks shall be provided within the right-of-way of any street which carries more than four thousand vehicles per average day, nor upon any street which carries more than five hundred vehicles per hour for any consecutive three hours of an average day.

B. When such curb setbacks are permitted, adequate provision shall be made for the free and unobstructed passage of pedestrian traffic. (Prior code § 20-70)
(Ord. No. 17549, § 1, 5-3-2011)

12.44.060 Angle parking—Obedience to signs and markings.

Upon those streets which have been signed or marked by the traffic engineer for angle parking, it shall be a violation for a person to stop, park or stand a vehicle other than at the angle to the curb or edge of the roadway indicated by such signs or markings. (Prior code § 20-71)
(Ord. No. 17690, § 6, 12-6-2011)

12.44.070 Back-in angled parking only zone.

An operator who stops or parks in a back-in angled parking only space must stop or park the vehicle with the rear wheels of the vehicle at an angle to the curb or edge of the roadway. No portion of the vehicle shall extend into the roadway so as to obstruct traffic flow.
(Ord. No. 17812, § 1, 6-5-2012)

12.44.080 Traffic obstruction prohibited.

A. No person shall park any vehicle upon any street or alley in such a manner or under such conditions as to leave available less than ten feet of the width of the roadway for free movement of vehicular traffic, and no person shall stop, stand or park a vehicle within any street or alley in such position as to block the driveway entrance to any abutting property.

B. No person shall park a vehicle in any alley within the central traffic district or within the five points traffic district except temporarily for the purpose of loading or unloading goods or merchandise.

C. The traffic engineer is authorized to erect signs indicating no parking within any alley when such parking would create a hazard or obstruction to traffic.

D. The traffic engineer is authorized to erect signs indicating no parking within any alley when such parking would impede the movement of a waste collection vehicle on collection days or certain times. (Prior code § 20-73)
(Ord. No. 019666, § 2, 8-27-2024)

12.44.090 Parking prohibited for certain purposes.

No person shall park a vehicle upon any public right-of-way as defined in Section 19.50.030 of this Code, for the purpose of washing, greasing or repairing such vehicle except repairs necessitated by an emergency. (Ord. 14845 § 1, 2001: Prior code § 20-80)
(Ord. No. 17690, § 8, 12-6-2011)

12.44.100 Parking prohibited for certain vehicles.

A. No vehicle with or without trailers, and no trailers, exceeding nine feet in height, twenty-six feet in length or seven feet, eight inches in width, shall be parked for any period of time on any public street, alley, sidewalk, median, or any area between the curb line or the lateral lines of any roadway and the adjacent property line; except that said vehicles may be parked for a period not exceeding two hours, whether consecutive or not, during any eight-hour period for the purpose of loading or unloading goods or merchandise. This subsection does not apply to the area described in subsection B below.

B. No vehicle with or without trailers, and no trailers, exceeding nine feet in height, twenty-six feet in length or seven feet, eight inches in width, shall be parked for any period of time on any

public street, alley, sidewalk, median, or any area between the curb line or the lateral lines of any roadway and the adjacent property line, within the confines of Cotton St. to the west; Paisano St. to the south; Texas Ave. to the north; and Piedras St. to the east. (Ord. 16890 § 1, 2008: Ord. 14634 § 1, 2000: Ord. 13827 § 1, 1998; Ord. 12390, 1995: Ord. 12288 (Exh. A), 1995: prior code § 20-80.1)

12.44.110 Parking adjacent to schools—Sign erection—Authority to have vehicles towed.

A. The traffic engineer is hereby authorized to erect signs reading "No Parking or Standing, Tow-Away Zone" upon either side or both sides of any street abutting school property when such parking or standing would interfere with traffic or create a hazardous situation.

B. The police department is authorized to cause to be towed away any vehicle found parked or standing in violation of subsection A of this section; and the owner of such vehicle shall be civilly liable to the person doing such towing for the reasonable cost thereof. (Prior code § 20-81)

12.44.120 Parking adjacent to schools—Sign erection authority.

The traffic engineer is authorized to erect signs indicating no parking upon either side or both sides of any street abutting school property when such parking would interfere with traffic or create a hazardous situation. (Prior code § 20-81.1)

12.44.130 Parking on narrow streets.

The traffic engineer is authorized to erect signs indicating no parking upon any street when the width of the roadway does not exceed twenty feet, or upon one side of a street as indicated by such signs when the width of the roadway does not exceed thirty feet. (Prior code § 20-82)

12.44.140 Parking on one-way streets.

The traffic engineer is authorized to erect signs upon the left-hand side of any one-way street to prohibit the standing or parking of vehicles. (Prior code § 20-83)

12.44.150 Standing or parking on one-way roadways.

In the event a highway includes two or more separate roadways and traffic is restricted to one direction upon any such roadway, no person shall stand or park a vehicle upon the left-hand side of such one-way roadway unless signs are erected to permit such standing or parking. The traffic engineer is authorized to determine when standing or parking may be permitted upon the left-hand side of any such one-way roadway and to erect signs giving notice thereof. (Prior code § 20-84)

12.44.160 Parking in alleys.

A. Parking in alleys shall be governed by the following parking regulations:

1. One side of the alley may be designated "no stopping or standing, tow-away zone" by the traffic engineer. No person shall park, stop or stand any vehicle on this side of the alley when signs have been erected in the locations reading substantially "No Stopping or Standing, Tow-Away Zone." The police department is directed to cause to be towed away any vehicle found parked, stopped or standing in violation of this section. The owner of such vehicle shall be civilly liable to the person doing such towing for the reasonable cost thereof.

2. The opposite side of the alley may restrict parking to commercial vehicles or other vehicles actively engaged in the process of loading or unloading. Those alleys with signs erected reading substantially "No Parking, Loading Zone Commercial Vehicles Only" shall be restricted to parking by commercial vehicles only. Those alleys with signs erected reading substantially "No Parking Except For Loading" shall be restricted to commercial vehicles and other vehicles actively engaged in the process of loading or unloading.

B. The traffic engineer shall have the authority to designate which side of the alley shall be

used as a commercial loading zone and which side of the alley parking, stopping and standing will be prohibited.

C. The traffic engineer shall have the authority to designate which alleys shall be used as locations for solid waste collection pursuant to Section 9.04.100.

D. To the extent that the language in this chapter conflicts with the that of Chapter 9.04, the latter shall prevail. (Prior code § 20-195)
(Ord. No. 17078, § 1, 3-3-2009; Ord. No. 17690, § 10, 12-6-2011; Ord. No. 019666, § 3, 8-27-2024)

12.44.170 Parking on city-owned property.

A. Authority of the traffic engineer. The traffic engineer is authorized and directed, subject to approval of the city council, to establish loading zones, parking time limit zones, no parking zones, reserved parking zones, parking meter zones and such other parking regulations as may be necessary to properly control and regulate the parking of vehicles on city-owned properties outside the right-of-way of any dedicated public street which is intended for parking.

B. Based on studies. The traffic engineer shall establish such parking zones or other parking regulations on the basis of traffic and engineering studies determining the needs of the city with respect to the land, the public convenience and necessity, and public safety.

C. Placing signs and markings. The director of the department of transportation is authorized to place and maintain signs and markings as may be necessary to adequately inform the public of such regulations.

D. It shall be a violation for any person to park on city owned property contrary to the signs or markings placed by authority of this section.

E. A vehicle, which displays license plates issued under the applicable Texas Transportation Code sections noted below, is exempt from the payment of a parking fee at any city facility where a parking fee is collected, provided that the vehicle is being operated at the time of accrual of such parking fee by or for the transportation of the person that registered the vehicle under such Texas Transportation Code provisions:

1. Section 504.202—Veterans with Disabilities;

2. Section 504.315(c)—Former Prisoners of War;

3. Section 504.315(d)—Pearl Harbor Survivors;

4. Section 504.315(e)—Congressional Medal of Honor recipients; and

5. Section 504.315(g)—Purple Heart recipients.

This section does not permit a vehicle to be parked at a time when or a place where parking is prohibited.

F. A vehicle, which displays license plates issued under the applicable Texas Transportation Code section noted below, is exempt from the payment of a parking fee at the El Paso International Airport, provided that the vehicle is being operated at the time of accrual of such parking fee by or for the transportation of the person that registered the vehicle under such Texas Transportation Code provisions:

1. Section 504.317—Surviving Spouse of Disabled Veterans.

This section does not permit a vehicle to be parked at a time when or a place where parking is prohibited. (Ord. 16373 § 1, 2006; Ord. 14421, 2000; Ord. 13152 § 101, 1997; Ord. 13076 § 1, 1997; Ord. 13062 § 5, 1997; Ord. 11546, 1193; Ord. 10964 § 3, 1992; Ord. 10046 § 1, 1990: prior code § 20-99)
(Ord. No. 17394, § 8, 8-24-2010, eff. 9-1-2010; Ord. No. 17690, § 10, 12-6-2011; Ord. No. 18859, § 1, 10-16-2018)

12.44.180 Regulations pertaining to certain special situations.

A. The traffic engineer is authorized to designate zones in which stopping, standing and parking shall be regulated or prohibited as herein set forth, and violations of the regulations established as provided in this section shall constitute a civil

offense as provided in Section 12.84.010 A. Notice of such zones shall be given by signs or by marking on the street, stating the type of zone, and when notice is so given no person shall stop, stand or park in such zone in violation of the applicable regulations. In designating any such zone the traffic engineer shall base his determination upon such of these factors, guides or standards as are applicable: the safety of persons and vehicles, the prompt movement of traffic, the convenience of the public, and the need for the zone at the particular location.

B. The regulations applicable to each such zone are as follows:

1. Passenger loading zone: Vehicle may stop for not more than three minutes and only for the purpose of picking up or discharging passengers; and the driver must remain with the vehicle the entire time;

2. Funeral zone: Must be adjacent to a mortuary, funeral home, or church. Vehicles of the mortuary or funeral home, while used in its business, may use the zone at any time; other vehicles may not park or stand in the zone except when part of a funeral procession;

3. Ballpark zone: Upon approval by the city manager, no more than fifty angled parking spaces on the south side of Franklin Avenue between Durango Street and Interstate 10 East exit ramp to the west, shall be set aside for use by the ballpark tenant. When a sign is erected at such locations reading substantially, "No Parking or Standing Anytime, Reserved for Permit Holder-Tow-Away Zone", no vehicle shall stand or park in these spaces except vehicles with a permit issued by the ballpark tenant. The police department is directed to cause to be towed away any vehicle found parked or standing in violation of this subsection, and the owner of such vehicle shall be civilly liable to the person doing such towing for the reasonable cost thereof. On days when there are no ballpark events, the ballpark tenant shall make thirty spaces available for use by the general public by covering said signs.

4. Police zone: Parking, standing and stopping prohibited, except vehicles (whether marked or unmarked) of the police department, the sheriff's office, and other law enforcement agencies having authority to make arrests;

5. Airport limousine zone: Parking and standing prohibited, except vehicles carrying passengers to or from the El Paso International Airport, and operating under a concession from the city;

6. Inspection zone: Parking and standing prohibited, except vehicles undergoing inspection by the police department in connection with license plates or certificates of title;

7. Police motorcycle zone: Parking and standing prohibited, except motorcycles of the police department;

8. Reserved for mayor and aldermen: A total of seven parking spaces as near as practicable to the mayor's office for the use of the mayor and aldermen. When a sign is erected at such location reading substantially "No Parking or Standing, Reserved for Mayor and Aldermen, Tow-Away Zone," no vehicle shall stand or park in these spaces except the automobiles of the mayor and aldermen. The police department is directed to cause to be towed away any vehicle found parked or standing in violation of this subsection, and the owner of such vehicle shall be civilly liable to the person doing such towing for the reasonable cost thereof;

9. Reserved for Mexican Consul and consular employees: Twenty-five parking spaces, convenient to the Mexican Consulate. No vehicles shall be parked in these spaces except the official car of the Consul General of Mexico and the cars of employees of the Mexican Consulate designated by the consul;

10. News media zone:

a. Parking and standing prohibited, except vehicles in official use by news media representatives of newspapers, magazines, online news publications, or radio and television stations. Parking in the news media zones shall be on a first come first served basis. No vehicle shall be parked in the news media zones (which may be together or at

different locations) except vehicles identified by a metal news media plate placed inside the vehicle on the driver's side of the dashboard so as to be visible at all times. The news media plate shall only be used by a news media representative in connection with his or her official duties,

b. The news media plate shall be issued by the city communications and public affairs manager. Upon verification of credentials by the city communications and public affairs manager and payment of the established fee by applicant, the city communications and public affairs manager shall issue the news media plates. Applicants shall be required to pay the established fee for replacement of the news media plate for any lost or stolen plates. The city communications and public affairs manager may revoke a news media plate and require such plate to be returned to him or her when such plate has been used in violation of the terms of section 12.44.180(B)(10)(a). The media outlet may challenge the city communications and public affairs manager's decision to the city manager,

c. Effective January 1, 2015, all news media plates will expire on January 1 of the year after their issuance. News media plates issued prior to January 1, 2015, will expire on February 1, 2015;

11. Reserved for the temporarily and permanently disabled:

a. Parking, stopping or standing is prohibited and constitutes a violation except for vehicles displaying special license plates issued under Section 504.201, Texas Transportation Code or a disabled parking placard issued under Section 681.002, Texas Transportation Code, or is compliance with the requirements under Section 681.007, Texas Transportation Code,

b. Parking, stopping or standing is prohibited and constitutes a violation if the vehicle blocks an architectural improvement designed to aid persons with disabilities, including an access aisle or curb ramp.

c. A parking space shall be considered to be "reserved for the temporarily and permanently disabled" if it conforms to the rules promulgated by the statutorily-designated agency of the State of Texas pursuant to statutory authority, relating to the identification and dimensions of parking spaces for persons with disabilities,

d. A parking space reserved for the temporarily and permanently disabled shall be identified and reserved for the disabled by a sign incorporating the symbol of accessibility and placed so that it will not be obscured by parked vehicles. The signage shall be of such size that it is legible from a distance that would be reasonable for the condition. Where conditions exist that preclude the use of vertical signage, suitable phrases or symbols sufficient in size, permanency, meaning and location so as to adequately serve the intent of this subparagraph may be accepted,

e. Nothing herein shall be construed to affect any ordinance or regulation governing hours of parking, length of time vehicles are permitted to park, or parking meter requirements;

12. Reserved for U.S. Marshal's Service: All parking spaces on the west side of Ochoa Street between Myrtle Avenue and Magoffin Avenue. No vehicle shall be parked in these spaces except vehicles of the U.S. Marshal's Service.

13. Reserved for emergency medical vehicles: Six spaces on Florence Street between First Street and Overland Avenue. No vehicle shall be parked in these spaces except for emergency medical vehicles;

14. Reserved for U.S. Immigration Service: One parking space as near as practicable to the Myrtle Street entrance to the U.S. Federal Courthouse. No vehicle shall be parked in this space, except vehicles of the U.S. Immigration Service.

15.—17. Reserved.

18. Reserved for Emergency Medical Services vehicles: Two spaces on the west side of the 200 block of South Campbell Street. No vehicles shall park in these spaces except Emergency Medical Services vehicles;

19., 20. Reserved.

21. Reserved for law enforcement vehicles loading and unloading prisoners only:

a. All spaces on the east side of Campbell Street between Overland Avenue and San Antonio Avenue,

b. All spaces on the west side of Florence Street between Overland Avenue and San Antonio Avenue,

c. Three spaces within the curb setback on the north side of Overland between Campbell and Florence,

No vehicle shall be parked in these spaces except for law enforcement vehicles loading and unloading prisoners at the El Paso County downtown detention facility;

22. Reserved for city police department, officially marked vehicles:

a. 100 block of South Campbell Street, west side, four spaces;

b. Kansas Street between San Antonio Avenue and Overland Avenue, west side all spaces;

c. Overland Avenue, from Kansas Street to a point approximately 80 feet east, nor side, four spaces;

d. Campbell Street, from San Antonio Avenue to a point approximately 100 feet south, Westside, 6 spaces; and

e. San Antonio Avenue, between Campbell Street and Florence Street, south side, eight spaces.

23. Reserved.

24. Reserved for Border Patrol prisoner unloading: Two spaces on the north side of the 500 block of East San Antonio Avenue. No vehicles shall park in these spaces except Border Patrol vehicles while loading and unloading prisoners.

25.—27. Reserved.

28. a. No parking at any time, fire lane (tow away) on access roadways as described under Chapter 19.16, Improvement Standards and Design Principles,

b. No parking at any time, fire lane (tow away) at designated zones prohibiting parking. Notice of such zones shall be given by signs stating "No Parking At Any Time, Fire Lane,"

c. Parking, stopping and standing is prohibited in any parking meter space where the meter has been covered with a red, orange or yellow parking meter cover by an agent or employee of the city, except that:

i. In a meter space where the meter is covered by a red or orange cover, vehicles authorized by the department of transportation will be allowed to park and such authorization will be evidenced by a written document displayed in the window of the vehicle.

ii. In a meter space where the meter is covered with a yellow cover, vehicles belonging to election judges will be allowed to park. Evidence of same to be a written document displayed in the window of the vehicle.

iii. Fees for renting parking meters: When permitted, the established fees for renting parking meters shall be paid for renting parking meters. The fee for renting parking meters is not applicable to those permits for which the City of El Paso, or Destination El Paso, in connection with a City activity or event, applies for said permit.

29., 30. Reserved.

31. Reserved for Library Vehicles Only.

a. Three spaces within the curb setback on the west side of Oregon Street, between Franklin Avenue and Missouri Avenue; and

b. Two spaces on the north side of Franklin Avenue between Oregon Street and El Paso Street.

No vehicle shall be parked in these spaces except for library vehicles.

32. Reserved for Federal Law Enforcement Vehicles only:

a. All spaces on the south side of Myrtle Avenue from Kansas Street to Campbell Street.

b. All spaces on the north side of East San Antonio Avenue from Kansas Street to Campbell Street.

c. All spaces on the east side of Florence Street from East San Antonio Avenue to East Overland Avenue.

d. All spaces on the south side of East San Antonio Avenue from Florence Street to Ochoa Street.

No vehicle shall be parked in these spaces, except Federal Law Enforcement vehicles.

33. Reserved for Consul General of El Salvador visitors:

a. Two parking spaces on the West side of 298 Leon St., convenient to the Consulate of El Salvador.

No vehicles shall be parked in these spaces except the official vehicles of the Consul General of El Salvador and the vehicles of visitors designated by the consul. (Ord. 16741 § 1, 2007; Ord. 16592 § 1, 2007; Ord. 16481 § 1, 2006; Ord. 16201, 2005; Ord. 15653, 2004; Ord. 15353 §§ 1, 2, 2003; Ord. 15230 § 1, 2002; Ord. 15143 §§ 1, 2, 2002; Ord. 15039 § 1, 2002; Ord. 14955 § 1, 2001; Ord. 14478 § 1, 2000; Ord. 14297 § 1, 1999; Ord. 13540, 1998; Ord. 13278 § 1, 1997; Ord. 13098 § 1, 1997; Ord. 13062 § 6, 1997; Ord. 12464, 1995; Ord. 10468 § 1, 1991; Ord. 10042 § 1, 1990; Ord. 9578 §§ 1, 2, 1989; Ord. 9330 § 1, 1988; Ord. 9220 §§ 1, 2, 3, 1987; Ord. 9111 § 1, 1987; prior code § 20-99.1)
(Ord. No. 17690, § 13, 12-6-2011; Ord. No. 17734, §§ 1—3, 2-21-2012; Ord. No. 17814, §§ 1—3, 6-5-2012; Ord. No. 17946, § 1, 2-5-2013; Ord. No. 17957, § 1, 2-19-2013; Ord. No. 18161, § 1, 4-15-2014; Ord. No. 18226, § 1, 8-19-2014; Ord. No. 18410, § 1, 9-8-2015; Ord. No. 019602, § 1, 3-12-2024)

12.44.190 Off-street parking requirements for foreign consulates and appurtenant exhibition halls.

A. Notwithstanding the provisions of any city code or ordinance to the contrary, the minimum number of required off-street parking spaces for the consulate of any foreign government, and for any appurtenant exhibition halls, shall be computed and provided in accordance with the following requirements:

1. Parking spaces for the use of customers, patrons and visitors: One off-street parking space for each one hundred fifty square feet of net floor area used or intended to be used for service to the public as customers, patrons and clients.

2. Parking spaces for the use of employees and occupants: One off-street parking space for each five hundred square feet of net floor area.

B. The term "off-street parking space" as used in this section shall include any on-street spaces designated for exclusive use by the consulate under Section 12.44.180, and any such spaces shall be included in determining the minimum number of parking spaces required under this section.

C. When written assurance is provided to the traffic engineer or his designee by the consul of a foreign government that the consulate and any appurtenant exhibition halls will not be in operation at the same time, the required number of off-street parking spaces shall be determined as follows: The traffic engineer or his designee shall compute the number of spaces required for the use of customers, patrons and visitors under subsection (A)(1) of this section, and shall also compute the number of spaces required for the use of employees and occupants under subsection (A)(2) of this section, and whichever of the two numbers is greater shall be the required number of spaces. If, however, the consulate and exhibition halls are ever operated at the same time, the off-street parking requirements for customers, patrons and visitors and for employees and occupants must then be satisfied.

D. Except as provided above, off-street parking spaces for consulates and appurtenant exhibition halls shall comply with provisions of the zoning ordinance of the city. (Ord. 16981 § 1, 2008; Ord. 13152 § 102, 1997; prior code § 20-99.02)
(Ord. No. 17394, § 9, 8-24-2010, eff. 9-1-2010)

12.44.200 Disabled parking on private property.

A. No person shall stop, stand, or park a vehicle in a parking space or parking area on private property that has been properly marked, signed, and designated as a parking space for the disabled in compliance with State law, without displaying either a special license plates issued pursuant to Texas Transportation Code Section 504.201, or a disabled parking placard issued pursuant to Texas Transportation Code 681.002,or a license plate or placard issued pursuant to Texas Transportation Code 681.007. Such stopping, standing, or parking is contrary to this section and constitutes a violation.

B. No person shall stop, stand, or park a vehicle so that the vehicle blocks an architectural improvement designed to aid persons with disabilities, including an access aisle or curb ramp. Such stopping, standing, or parking is contrary to this section and constitutes a violation.

C. A parking space reserved for the temporarily and permanently disabled shall be identified and reserved for the handicapped by a sign incorporating the symbol of accessibility and placed so that it will not be obscured by parked vehicles. The signage shall be of such size that it is legible from a distance that would be reasonable for the condition. Where conditions exist that preclude the use of vertical signage, suitable phrases or symbols sufficient in size, permanency, meaning and location so as to adequately serve the intent of this subparagraph may be accepted. (Ord. 9220 §§ 4, 5, 1987; Ord. 8355, 1985: prior code § 20-99.2)
(Ord. No. 17690, § 14, 12-6-2011; Ord. No. 17946, § 2, 2-5-2013)

12.44.210 Hazardous or congested places.

The traffic engineer is authorized to determine and designate by proper signs, places not exceed-

ing one hundred feet in length in which the stopping, standing, or parking of vehicles would create an especially hazardous condition or would cause unusual delay to traffic. (Prior code § 20-78)

12.44.220 Street cleaning or construction—Sign placement.

A. Placing by department of transportation. Before cleaning any street the department of transportation may erect movable signs giving notice that parking on such street or block is prohibited after a stated hour of a designated day of the week.

B. Placing during construction. When any street is being or about to be paved or resurfaced, or when construction work is being or about to be done in the street, and in the opinion of the traffic engineer the parking of vehicles will interfere with traffic or with construction work, or will constitute a hazard, the traffic engineer may erect movable signs prohibiting parking in such street or part thereof, during the work, or after a day or time stated.

C. Obedience to signs. When such signs have been erected no person shall park any vehicle in violation of the prohibition indicated by the sign.

D. Removing vehicle upon demand. If a vehicle was parked before the sign was erected and remains parked after the prohibition indicated by the sign becomes effective, any person having control of such vehicle shall remove it from the prohibited area upon demand of the person in charge of the work to be done on the street, or upon demand of any police officer.

E. Removal of vehicle without demand. If the signs authorized by this section were erected at least twenty-four hours before the prohibition is to become effective, it is a violation for any person in control of a vehicle to allow it to remain parked in violation of the prohibition indicated by the sign, notwithstanding the vehicle was legally parked in the first instance; and in such cases no demand for removal shall be necessary. (Prior code § 20-77)
(Ord. No. 17690, § 15, 12-6-2011)

12.44.230 Pickup and discharge of agricultural workers.

It shall be a violation to park, stop or stand on any street or alley for the purpose of the pickup and discharge of agricultural workers except as provided herein and in compliance with all other applicable laws.

A. Pickup or discharge of agricultural workers shall be accomplished only by persons, firms, organizations or others who are in full compliance with all applicable federal, state and local laws. No pickup or discharge on the public streets in the city, at any place other than the workers' residence, of agricultural workers who have been or are being recruited to be transported to and from work in the fields on a day-to-day basis, whether within or outside the state shall be permitted, except under the following conditions:

1. There shall be no pickup between the hours of 10:00 p.m. and 4:00 a.m. on any night. Vehicles picking up agricultural workers shall not depart the pickup area prior to 4:30 a.m.

2. Pickup shall be made only on Ninth Avenue, Between Oregon and Mesa Streets, El Paso, Texas.

3. The number of passengers carried in a vehicle shall not exceed the seating capacity of the vehicle.

4. Workers being returned to El Paso shall not be discharged from vehicles in which they are transported later than 10:00 p.m. on any day.

5. Returning workers shall not be discharged from vehicles at any location other than on Ninth Avenue between Oregon and Mesa Streets. (Ord. 12322 §§ 1, 2, 1995; Ord. 8180, 1984: prior code § 20-99.3)
(Ord. No. 17690, § 16, 12-6-2011)

12.44.240 Temporary no parking zones.

A. The traffic engineer is authorized to establish temporary no parking zones, not to exceed thirty feet in length, in the vicinity of any place of mechanical traffic counting equipment. Such zones,

when established, shall be marked by appropriate signs mounted on portable bases, and installed within the roadway area.

B. Whenever any such zone has been established as provided in subsection A. of this section, it is a violation for any person to park a vehicle within such zone. (Prior code § 20-85)
(Ord. No. 17690, § 17, 12-6-2011)

12.44.250 Sign creation required—Violation.

A. Whenever by this title or any other ordinance of this city any parking time limits are imposed or parking is prohibited on designated streets or alleys, or the traffic engineer is authorized to create or designate no parking zones or erect signs prohibiting parking, it shall be the duty of the traffic engineer to erect appropriate signs or markings giving notice thereof and no such regulations shall be effective unless said signs or markings are in place at the time of any alleged offense.

B. It shall be a violation for any person to park a vehicle in violation of such no parking zones or parking prohibitions created or designated by the traffic engineer by provided in this title which are signed or marked as may be required by this title. (Prior code § 20-98)
(Ord. No. 17690, § 18, 12-6-2011)

12.44.260 Stealing space.

No person shall drive or attempt to drive a vehicle into a parking space when the driver of another vehicle is backing or attempting to back into such space, or when the other driver has stopped in a position of readiness to back into such space and signifies his intention to do so. (Prior code § 20-74)

12.44.270 Moving another's vehicle into or out of spaces.

No person shall move a vehicle not lawfully under his control into any such prohibited area or away from a curb such distance as is unlawful. (Prior code § 20-79)

12.44.280 Restrictions on parking in residential parking districts.

A. Policy. It is the policy of the city to reduce hazardous traffic conditions and congested parking conditions resulting from the use of streets within areas zoned for residential uses for the parking of vehicles by persons using commercial, industrial, governmental, education, recreational and entertainment facilities to protect the residents of designated residential districts from unreasonable burdens in gaining access to their residences; to preserve the character of designated residential districts as residential districts; to preserve historic districts and allow parking for tenants due to the restrictions placed in historic districts; to promote efficiency in the maintenance of those streets in a clean and safe condition; to preserve the safety of motorists, children and other pedestrians; and to the peace, order, comfort, convenience and welfare of the inhabitants of the city.

B. Definitions. The following definitions shall apply to this section:

"Applicant" means the individuals), entity, organization, group, or designee.

"Block" means a continuous area adjacent to a street between street intersections on one or both sides of such street or, in the instance of a dead-end street, the contiguous area from the last intersection of that street with another street to the end of such street on one or both sides of such street.

"Light density residential district" and/or "medium density residential district" with the exception of "A-O apartment/office district" shall have the same meaning as defined in City Code Section 20.06.010.A. table insert.

"Owner" means an owner of record in the El Paso County clerk's records of a property within a residential parking district.

"Property" means a parcel of land containing at least one residential dwelling unit and has a property or parcel identification number issued by the central appraisal district.

"Resident" means the owner or tenant who occupies a residential property in a "light density

residential district" and/or "medium density residential district" with the exception of "A-O apartment/office district."

"Residential property" means premises containing one or more dwelling units in a light density or medium residential district, such as single-family homes, duplexes, condominiums and apartment complexes with four or fewer units that contain habitable rooms for non transient occupancy and are designed primarily for living, sleeping, cooking and eating therein, unless such premises are actually occupied and used exclusively for other purposes. Apartment complexes with five or more dwelling units that are within a designated historical district shall be considered residential. Dormitories, boardinghouses with five or more units, and hotels, hotel suites, motels, and day care centers shall not be considered residential.

C. Creation of residential parking districts.

1. Creation. Residential parking districts shall be created and dissolved by ordinance. Residential parking districts established in Section 12.88.200 shall continue in existence until removed by amendment to that section.

a. Districts initiated by city council. City representatives may propose to create or dissolve a residential parking district by submitting a proposal to the city traffic engineer. When the proposal is to create a district, the city traffic engineer shall evaluate the need for the district using the criteria set forth in this section, evaluate the appropriate boundaries for such district and submit his findings and recommendations to the city council. The city council by ordinance shall determine whether to create or dissolve residential parking districts.

b. Districts initiated by property owners. To initiate the creation of a residential parking district, one or more property owners shall submit an application to create a residential parking district. No fee shall be charged for the application for the creation of a residential parking district. The application shall identify the block or blocks that are proposed to be in the residential parking district. All applicants shall own property in at least one of the blocks identified in the application. The city traffic engineer shall evaluate the need for residential parking restrictions in the block or blocks identified in the application and the area surrounding such block or blocks, following the criteria set forth in this section. If the criteria are met, the city traffic engineer shall recommend appropriate boundaries for the district. The city traffic engineer shall include in his evaluation the reasons why the block or blocks meet or do not meet the criteria. All applications, evaluations and recommendations of the city traffic engineer shall be submitted to the city council for approval or denial of creating the residential parking district. After a residential parking district is created, owners may petition, as described in this section, for residential parking restrictions in one or more blocks within the district.

2. Criteria. The following conditions shall exist in order to create a residential parking district:

a. Vehicles registered to people who are not residents of the block or blocks that are proposed to be in a residential parking district are parked in such block or blocks, utilizing more than sixty percent of the available curbside parking at the same times and days throughout a week or portion of a week; and

b. Commercial, governmental, industrial or educational facilities exist close enough to the block or blocks in the proposed district that users of nonresidential vehicles parked on the street in the block could readily use such facilities; and

c. That unreasonable burdens exist for the residents of the block or blocks in the proposed district in securing adequate on street parking and gaining access to their places of residence because of street parking of nonresidential vehicles; and

d. An inadequate number of parking spaces exist for residents and nonresidents to park their vehicles in the block or blocks in the proposed district; and

e. There is a need for the residents of the block or blocks in the proposed district to obtain on street parking adjacent to or close by their place of residence; and

f. A safety issue has been identified because of congested street parking block or blocks in the proposed district; and

g. The city traffic engineer determines that a parking permit system would alleviate the lack of parking for residents of the block or blocks in the proposed district.

h. The blocks in the proposed district are zoned as a light or medium density residential district.

3. Application for petition. After a residential parking district is established, owners of property in the district who want residential parking restrictions placed on one or more blocks within the district shall follow the following procedures:

a. Application. One or more owners of property in a block must complete, sign and submit to the city traffic engineer an application for residential parking restrictions in one or more blocks within a residential parking district. The application shall be on a form approved by the city traffic engineer. The applicant shall state the location of the block or blocks that the applicant is requesting to be subject to the residential parking restrictions and the factual information concerning parking conditions in the area identified in the application, including information concerning the conditions described in Section 12.44.280 C.2.b. through f.

b. Application fee. There shall be a nonrefundable application fee in the established amount.

c. Petition requirements. Once a completed application with accompanying application fee has been received by the city traffic engineer, the city traffic engineer will verify the existence of commercial, industrial, governmental or education facilities as described in this section. If the city traffic engineer makes such verification, they shall provide a petition to the applicant, which, when returned must meet the following criteria to be considered valid.

1) The petition must be signed by the owners of seventy-five percent of the property in the block or blocks identified in the petition. If a property has multiple owners, only one of the owners is required to sign the petition.

2) Petitions shall be on a form approved by the city traffic engineer. Petitions shall contain (1) the signature of the owner, (2) the name of the owner in print, (3) the property or properties in the block owned by the owner, (4) the date the petition was issued by the city traffic engineer to the applicant, (5) a precise statement that the purpose of the petition is to request that residential parking restrictions be put in place and (6) a description of the block or blocks in which the restrictions would be placed. The owner's name and property address shall be clearly printed or typed. The city traffic engineer shall not consider illegible addresses or printed names when qualifying the petition.

3) The petition shall be returned to the city traffic engineer within thirty days from the time the city traffic engineer provides the petition to the applicant, as shown by the date on the petition.

4) Upon submission of the completed petition to the city traffic engineer, the applicant shall sign a certificate on a form approved by the city traffic engineer declaring that to the best of his knowledge and belief, each signature was that of an owner of property in the block or blocks proposed for residential parking restrictions.

4. City traffic engineer's evaluation. Upon receipt of a petition meeting the requirements of this section, the city traffic engineer shall evaluate the nature and extent of the problems, if any, caused by nonresidential parking in each block using the criteria set forth in Section 12.44.280 C.2.a. through h. If deemed necessary by the city traffic engineer, more detailed studies shall be conducted including, but not limited to an inventory of legal curbside parking spaces available.

5. Notice. The city traffic engineer shall notify the applicant within thirty days of the day the petition is submitted to the office of the city traffic engineer whether the applicant has met the requirements for the implementation of residential parking restrictions, citing any requirements that have not been met.

6. Designation of date. If the city traffic engineer determines that the requirements of this

section have been met, they shall designate a date on which the parking requirements of the block or blocks begin and notify the applicant.

7. Appeal. When the city traffic engineer does not find that the applicant has met the requirements to impose residential parking restrictions, the city traffic engineer shall send the applicant notice of his decision. The applicant may appeal the decision to the city council by submitting an appeal to the city traffic engineer on a form approved by the city traffic engineer. The appeal must be submitted within fifteen consecutive calendar days after the date of applicant's receipt of the notice of the city traffic engineer's decision. The appeal shall state the basis for the appeal specifying any findings by the city traffic engineer that the appellant asserts are in error.

D. Amendment of parking restriction and boundary.

1. Right to apply. An owner of property in a residential parking district may petition to have the residential parking district restrictions modified. The owner of property within one thousand feet of a residential parking district may petition to amend the boundaries of the residential parking district. All petitions must conform to the requirements of this subsection.

2. Application. A person eligible to apply for an amendment to a residential parking district restriction or boundary modification must pay the fee established by city council in the annual budget process and complete, sign, and submit an application to the city traffic engineer. Application fees are not refundable and no application will be considered without payment of the established fee. The application shall be on a form approved by the city traffic engineer, provided that the form must require at a minimum the following:

a. The application must clearly state that the owners of properties signing the application agree with the modification of the residential parking district.

b. If the application is to amend any restrictions of the residential parking district, then the application must be signed by the owners of at least seventy-five percent of the properties within the residential parking district. If the application is to amend the boundaries of a residential parking district, then the application must be signed by the owners of at least seventy-five percent of the new properties proposed to be included in the residential parking district.

c. Application shall contain (1) the signature of each owner, (2) the name of each owner in print (3) the subject area properties, (4) phone number, and (5) a precise statement that the purpose of the petition is to amend the parking restrictions of an existing residential parking district or amend the boundaries of the district to include a block(s) directly adjacent to the existing residential parking district. The owner's name and property address shall be clearly printed or typed. The city traffic engineer shall not consider properties that are not contiguous to other proposed properties in the district, illegible addresses, and/or printed names without signatures when evaluating the application.

d. Upon submission of the completed application to the city traffic engineer, the applicant shall sign a certificate on a form approved by the city traffic engineer declaring that to the best of the applicant's knowledge and belief, each signature was signed by an owner of property within the district or within the new area proposed to be added to the district.

3. City traffic engineer's evaluation. Within thirty calendar days of receipt of an application and payment of the established fee, the city traffic engineer shall verify that the contents of the application are accurate and complete and notify the applicant of the findings. If the city traffic engineer determines that the application is not accurate or complete, then the city traffic engineer will return the application to the applicant to be completed or corrected. If the application is not corrected within thirty calendar days, then the application will expire and a new application and fee will be required if applicant wishes to continue with the process. If the city traffic engineer determines that the application is accurate and com-

plete, then the city traffic engineer will proceed to evaluate whether a parking restriction modification or boundary is appropriate. In making the determination, the traffic engineer may require studies at the expense of the applicant. The fees for the studies will be as established by city council in the annual budget process. Failure to pay the fees for the studies within thirty calendar days of the traffic engineer informing the applicant of the need for a study will result in the expiration of the application and a new application and fee will be required if applicant wishes to continue with the process. If the city traffic engineer determines that an amendment to the residential parking district restrictions or boundaries is not appropriate, then the city traffic engineer will inform the applicant and no amendment of the residential parking district restrictions or boundaries will be made and the application process will be completed at that point. If the city traffic engineer determines that an amendment to the residential parking district is appropriate, then the city traffic engineer shall designate a date on which the proposed amendment to the residential parking district restrictions or boundaries will be presented to city council for consideration. If the amendment is approved by city council, then the city traffic engineer will designate a date to install the new parking restriction, instruct the appropriate city departments to replace all signage and revoke and replace all previous permits and notify the applicant. If the proposed amendment is denied by city council, then the process will end with city council's denial. All amendment approvals or denials are at city council's discretion.

4. Appeal. The applicant may appeal to city council a determination by the city traffic engineer that an amendment to the residential parking district restrictions or boundaries is not appropriate. An applicant wishing to appeal such decision must submit the request for an appeal to the city traffic engineer on the form approved by the city traffic engineer. The appeal must be submitted within fifteen calendar days after the date of applicant's receipt of the notice of the city traffic engineer's decision. The appeal shall state the basis for the appeal specifying any findings by the city traffic engineer that the appellant asserts are in error. The city council may uphold the decision of the city traffic engineer, remand the matter to the city traffic engineer for further consideration, or allow the amendment of parking restrictions or boundaries within the residential parking district.

5. One-year waiting period to modify or submit new applications. The city traffic engineer will not accept any applications to modify any residential parking district restrictions or boundaries that are submitted within one year of a denial or approval of a previous application to modify the restrictions or boundaries of the same residential parking district. In the instance that an application is barred by a previous denial, the one year waiting period will commence on the date that city council denied an appeal or if no appeal was made, then one year from the date the city traffic engineer determined that an amendment to the restrictions or boundaries is not appropriate. The one year waiting period does not apply if the previous application barring a current application expired or was withdrawn by an applicant prior to a determination by the city traffic engineer regarding the appropriateness of an amendment to the restriction or boundaries of a residential parking district.

6. Health and safety related modifications. Notwithstanding anything to the contrary, the city traffic engineer is authorized to modify any residential parking district restrictions or boundaries at any time if the city traffic engineer determines that such modification is warranted for health or safety reasons.

E. Removal of parking restrictions, dissolution of residential traffic parking districts.

1. Right to apply. Except as provided in this section, an owner of property in a residential parking district may petition to have the parking restrictions of such district removed as to the block in which such person owns property or petition to have the entire residential parking district be dissolved.

2. Application for petition.

a. Application. One or more owners of property in a block within a residential parking district shall complete, sign and submit to the city traffic engineer an application to remove the parking restrictions of a residential traffic parking district from one or more blocks within the district or to dissolve the entire district. The application shall be on a form approved by the city traffic engineer. The applicant shall state the location of the block or blocks that are the subject of the application or the location of the residential parking district if the dissolution of the district is sought.

b. Application fee. There shall be a nonrefundable application fee in the established amount which shall be paid at the time the application is filed.

c. Petition requirements. The city traffic engineer shall verify the location of the block or district upon receipt of an application. A petition will be given to the applicant, which, when returned must meet the following criteria to be considered valid.

1) The petition must be signed by at least one of the owners of seventy-five percent of the property in the block, blocks or district identified in the petition.

2) Petitions shall be on a form approved by the city traffic engineer. Petition shall contain (1) the signature of the owner, (2) the name of the owner in print (3) the property or properties in the block owned by the owner, (4) the date the petition was issued by the city traffic engineer to the applicant, (5) a precise statement that the purpose of the petition is to remove the traffic parking restrictions of the residential parking district for the block or blocks identified in the petition or that the purpose is to dissolve a residential parking district (6) the boundaries of the district or block(s) that are the subject of the petition. The owner's name and property address shall be clearly printed or typed. The city traffic engineer shall not consider illegible addresses or printed names when qualifying the petition.

3) The petition shall be returned to the city traffic engineer within thirty days from the time the city traffic engineer provides the petition to the applicant as shown by the date on the petition.

4) Upon submission of the completed petition to the city traffic engineer, the applicant shall sign a certificate on a form approved by the city traffic engineer declaring that to the best of his knowledge and belief, each signature was signed by an owner of property in the block or blocks or district identified in the petition.

3. City traffic engineer's evaluation. Upon receipt of a petition meeting the requirements of this section, the city traffic engineer shall verify that the required signatures were provided in the petition and that the remaining requirements of this section have been met.

4. Notice. The city traffic engineer shall notify the applicant within thirty days of the day the petition is submitted to the office of the city traffic engineer whether the applicant has met the requirements of this section, citing any requirements that have not been met.

5. Designation of date. If the city traffic engineer determines that the requirements of this section have been met, they shall designate a date on which the parking requirements of that district shall end in the block or blocks identified in the petition and instruct the appropriate city departments to remove all signage and revoke all permits and notify the applicant.

6. Dissolution of district. If the city traffic engineer determines that the requirements of this section have been met when the petition is submitted to dissolve the residential parking district, they shall submit the petition and his findings and recommendations to the city council for consideration and notify the applicants of his findings and recommendations. The city council shall determine by ordinance whether or not the residential parking district should be dissolved.

7. Appeal. When the city traffic engineer finds that the applicant has not met the requirements to remove parking restrictions from one or more blocks or to dissolve a residential parking district,

the city traffic engineer shall send the applicant notice of his decision. The applicant may appeal the decision to the city council by submitting an appeal to the city traffic engineer on a form approved by the city traffic engineer. The appeal must be submitted within fifteen consecutive calendar days after the date of applicant's receipt of the notice of the city traffic engineer's decision. The appeal shall state the basis for the appeal specifying any findings by the city traffic engineer that the appellant asserts are in error. The city council may uphold the decision of the city traffic engineer, remand the matter to the city traffic engineer for further consideration, or allow the removal of parking restrictions from one or more blocks or dissolve the residential parking district.

8. One-year waiting period. The city traffic engineer shall not accept applications for a petition to remove the parking restrictions of a residential parking district from one or more blocks that are within such district or to dissolve a residential parking district within one year from the date of designation of such district by the city council except as provided in this section.

9. Six-month waiting period. Property owners who meet the requirements of this section to remove the parking restrictions of a block or blocks within a residential parking district may have such parking restrictions rescinded between six months and one-year after the designation of the restrictions on parking in such block or blocks by the city traffic engineer, provided they pay to the city the cost of labor and materials to remove the parking restriction signs in the block, blocks or district. Property owners who meet the requirements of this section to dissolve the residential parking district may have such parking restrictions rescinded between six months and one-year after the designation of such district, provided they pay to the city the cost of labor and materials to remove the parking restriction signs in the block, blocks or district, provided that the city council has approved dissolving the district.

F. Petitions for reinstatement of residential parking district. The city traffic engineer shall not accept an application for the establishment of residential parking restrictions in one or more blocks within a district when the application includes a block in which residential parking restrictions previously existed and were eliminated within one year of the date of the application.

G. Parking permits.

1. Permit required. It shall be a violation for any person to park a motor vehicle on a city street in a curbside parking space on any day or during any hours in a residential parking district without the display, as required in this section, of a parking permit issued by the city traffic engineer pursuant to this chapter ("parking permit") allowing the motor vehicle to be parked in the district and during the times specified on residential parking district signs posted in such district by the city.

2. Effect of issuance of permit. A parking permit shall not guarantee or reserve to the holder a curbside parking space within a residential parking district. A parking permit shall not authorize the holder to cause to stand or park a motor vehicle at such places where parking is prohibited or during such times as when the stopping, standing or parking of motor vehicles is set aside for specified types of vehicles, nor exempt the holder from observance of any traffic regulation including, but not limited to, vehicle abandonment laws, towing laws or parking meter payment.

3. Temporary suspension of permit. The city traffic engineer may temporarily suspend the parking allowed pursuant to a parking permit for emergency or construction purposes within the residential parking district.

4. Limitations on the issuance of parking permits.

a. The city traffic engineer may limit the parking permit to certain hours of the day and certain days of the week in any residential parking district or a block within the district.

b. Only one permit shall be issued for each vehicle.

c. Permits may only be used in the residential parking district for which they are issued.

d. The number of residential parking permits that may be issued is limited to two residential parking permits for each household on each block or blocks within a residential parking district. At the discretion of the city traffic engineer additional residential parking permits maybe granted for each household on each block or blocks within a residential parking district.

e. No permit shall be issued if the applicant has pending parking tickets issued in the city.

5. Prohibitions regarding the use of parking permits.

a. The side of the permit showing the residential parking district for which the permit was issued shall be displayed in the vehicle at all times the vehicle is parked in the district for which it was issued in a manner that allows the entire permit to be viewed from outside the vehicle through the front windshield.

b. Expired permits shall not be displayed in parked vehicles.

c. Permits shall be returned to the city traffic engineer when the permit expires, the person to whom the permit was issued no longer resides in the residential parking district, and when the vehicle to which the permit was issued is loaned (for more than thirty days) or is stolen, sold or traded.

d. Permits shall not be transferred, provided that owners who obtain visitor permits from the city traffic engineer may provide such visitor permits to their tenants.

e. Permits shall not be displayed in a vehicle for which the permit was not issued.

6. Requesting parking permits.

a. All parking permits under this section may be issued by the city traffic engineer or his designee upon receipt of a completed application which provides the information required under this section.

b. All applicants must present a valid driver's license or other government-issued identification showing the applicant's photograph.

c. All applications shall be accompanied by the established fee for the parking permit(s) requested in the manner established in Section 12.44.280 M.

H. Residential parking permits. The following requirements must be met before a residential parking permit may be issued.

1. Residents. Each applicant must demonstrate that they are a current resident of the residential parking district for which the permit is to be issued by providing one of the following documents which shows that the applicant resides in the residential parking district:

a. A current electric, gas, telephone or water bill for service at the resident's address within the district that is dated within thirty days of the application for a permit;

b. A lease of premises or contract for sale of a residence that lists the applicant's residence within the district; or

c. Any other current valid document issued by a government agency that shows that the applicant resides within the district.

2. Armed Forces. Members of the Armed Forces whose home of record is outside El Paso County and currently reside in a residential parking district are eligible to apply for a residential parking permit provided they show a valid military identification card and one of the following which shows that the applicant resides in the residential parking district:

a. A current electric, gas, telephone or water bill or application for service at the resident's address within the district that is dated within thirty days of the application for a permit;

b. A lease of premises or contract for sale of a residence that lists the applicant's residence within the district; or

c. Any other current valid document issued by a government agency that shows that the applicant resides within the district.

I. Visitor parking permits.

1. Eligibility. Visitor parking permits may be issued by the city traffic engineer for each property in the residential parking district. Two visitor permits may be issued at no additional cost to owners and residents of a residential parking district who have purchased at least one residential parking permit.

2. Limitations. Visitor parking permits shall be subject to all the requirements and limitations for a residential parking permit.

J. New resident temporary parking permit. A new resident temporary parking permit may be obtained from the city traffic engineer by submitting an application in the same manner as is required in this section for applying for residential parking permits except that no document shall be required that contains the address located within the residential parking district. The new resident temporary parking permit shall expire at the end of the ninetieth day after its issuance and shall be subject to all other requirements and limitations of a residential parking permit. No residential parking permit shall be issued to the holder of new resident temporary parking permits until all new resident temporary parking permits issued to the applicant are returned to the city traffic engineer.

K. Temporary one day parking permits. Any person who is eighteen years of age or older and a resident of a residential parking district may apply for one or more temporary one day parking permits. Such permits shall be for no more than fours on the day specified in the permits. The application shall state the hours for which the permits are to be issued, the number of permits requested and that without the temporary permits, visitors to the applicant's residence would not be able to park their vehicles without violating parking ordinances. If the city traffic engineer finds adequate parking is not available during the hours for which a temporary permit is requested and that the issuance of the permits will not unduly impair traffic and safety during the time of their validity, then they shall issue the appropriate number of permits. The city traffic engineer may limit the streets or portions of streets on which temporary one day parking permits shall be valid. The city traffic engineer may issue the requested number of temporary parking permits or less than the requested amount based on traffic and safety determinations made by the city traffic engineer. The number of such permits shall not at any time exceed fifty percent of the number of parking spaces located within the residential parking district in which the temporary permits are valid.

L. Owner's parking permit. Subject to the limitations in this section, each owner of property within a residential parking district may obtain an annual owner's parking permit, provided that such owner shall not be required to show current residency at the property they own in the district but shall be required to provide proof of ownership.

M. Exemptions. Any emergency vehicle, including, but not limited to, an ambulance, fire engine or police vehicle, which is under the control of an individual providing service to a property located on a street in a residential parking district shall be permitted to stand or be parked on a street in the area without being limited by the residential parking district prohibitions or restrictions. Additionally, any vehicle, including, but not limited to, a delivery, utility, or service vehicle which is under the control of an individual providing service to a property or infrastructure within the district located on a street in the residential parking district shall be permitted to stand or be parked on a street in the area without being limited by the residential parking district prohibitions or restrictions.

N. Residential parking permit, visitor parking permit, owner's parking permit and temporary one-day permit fees. The following fees are established and shall be charged: (1) a residential parking permit fee, (2) a visitor parking permit fee, (3) an owner's parking permit fee, (4) a new resident temporary permit fee, and (5) a temporary one-day permit fee. The residential parking permit fee, new resident temporary permit fee, and the owner's parking permit fee shall be charged for each authorized vehicle. The visitor parking permit fee shall be charged for each visitor parking permit issued. The visitor parking permit fee shall be charged only when a residential or owner's parking permit has not been purchased. Temporary one-day permit fees shall be charged for each permit issued.

O. Permit term. Residential parking permits, owner's parking permits and visitor parking per-

mits shall be valid for a consecutive twelve-month period from the day they are issued by the city traffic engineer and shall be renewable annually provided that the applicant provides evidence that they are still eligible for the permit. The permit may be renewed by mail provided that proof of eligibility and fee payment are also included with the renewal application.

P. Revocation of permits. A residential parking permit, owner's parking permit or visitor parking permit may be revoked for the following reasons:

1. The transfer or assignment of a permit.

2. The applicant for the permit falsely represented himself as being eligible for a permit, submits false documentation, or otherwise makes a false statement of a material fact on an application for a permit.

3. The permittee loses his status as a resident or other qualification to apply for a permit.

Q. Lost or stolen permits. The city traffic engineer may replace a lost, stolen or destroyed residential parking permit, owner's parking permit or visitor parking permit. To be eligible to receive a replacement permit, the permit holder must submit a signed affidavit stating the permit was lost, stolen or destroyed and pay the established permit replacement fee. The remaining part of a damaged permit shall be submitted to the city traffic engineer before receiving a replacement permit.

R. Signs. The city shall cause appropriate signs to be placed in residential parking districts that provide notice of the parking restrictions that apply in the district. The signs shall be posted on those streets restricting all parking except parking by the holders of permits that are granted pursuant to this section. The signs placed in these areas shall be of such character as to readily inform an ordinarily observant person of the existence of the parking restrictions.

S. Violations. Any person who violates any provision of this chapter shall be subject to the penalties set forth in Section 12.84.010 B., except that a violation of the provisions of this section related to the parking, standing or stopping of vehicles shall be a civil offense and violation of Section 12.84.010 A. and subject to the administrative procedures provided in Chapter 12.85 (Parking Violations). Fines shall be in accordance with the schedule of standard fines adopted by resolution of city council.

(Ord. No. 17710, § 1, 1-17-2012; Ord. No. 18431, § 1, 10-27-2015; Ord. No. 19154, § 1, 3-16-2021; Ord. No. 019705, § 1, 1-7-2025)

12.44.290 Restrictions on parking in downtown parking districts.

A. Policy. It is the policy of the city to reduce hazardous traffic conditions and congested parking conditions within designated downtown districts resulting from the parking of vehicles by persons using commercial, industrial, governmental and education facilities and to protect the residents of designated downtown districts from unreasonable burdens in gaining access to their residences; to preserve the value of the property in those districts; to preserve the safety of pedestrians and motorists; for the peace, order, comfort, convenience and welfare of the inhabitants of the city.

B. Definitions. The following definitions shall apply to this section:

"Block" means a continuous area adjacent to a street between street intersections on one or both sides of such street or, in the instance of a dead end street, the contiguous area from the last intersection of that street with another street to the end of such street on one or both sides of such street.

"Downtown parking district" means a contiguous area designated by the city in which a downtown parking district parking permit issued for said area is effective. Downtown parking districts are identified in Section 12.88.220 (Schedule XIX) of this code.

"Owner" means an owner of record in the El Paso county clerk's records of a property within a downtown parking district.

"Parking permit" means a parking permit authorizing a motor vehicle to park in a curbside metered parking space free of charge in a downtown parking district or in a non-metered curbside parking space in a downtown parking district where such parking is prohibited except with a parking permit.

"Property" means a parcel of land containing at least one residential dwelling unit and has a property or parcel identification number issued by the central appraisal district.

"Resident" means the owner or tenant who occupies a residential property in a downtown parking district.

"Residential property" means premises containing one or more dwelling units in a downtown parking district, such as duplexes, condominiums, apartment complexes and dormitories that contain habitable rooms for nontransient occupancy and are designed primarily for living, sleeping, cooking and eating therein, unless such premises are actually occupied and used exclusively for other purposes.

C. Establishment of downtown parking districts.

1. Establishment: Downtown parking district boundary lines shall be created, adjusted and dissolved by ordinance. Downtown parking districts established in Section 12.88.290 (Schedule XIX) of this code shall continue in existence until removed by amendment to that section.

a. Districts initiated by city council. City representatives may propose to create or dissolve a downtown parking district by submitting a proposal to the traffic engineer. When the proposal is to create a district, the traffic engineer shall evaluate the need for the district, identify the appropriate boundaries for such district and submit his findings and recommendations to the city council. The city council by ordinance shall determine whether to create, adjust, or dissolve downtown parking district boundary lines.

D. Parking permits.

1. Permit required.

a. It shall be a violation for any person to park a motor vehicle on a city street in a curbside metered parking space on any day or during any hours in a downtown parking district unless a coin or coins of United States currency, tokens, a parking meter debit card, or other approved payment method as provided in Section 12.56.040 and of the appropriate denominations shall have been deposited therein, or shall have been previously deposited therein for an unexpired interval of time, and such meter has been placed in operation, without the display, as required in this section, of a parking permit issued by the City of El Paso pursuant to this chapter allowing the motor vehicle to be parked in the downtown parking district.

b. It shall be a violation for any person to park a motor vehicle in a curbside parking space along West Missouri Avenue from Durango Street to Coldwell Street and Coldwell Street from West Missouri Avenue to West Franklin Avenue in zone A during the days or times specified on the posted signs, without the display of a parking permit issued by the City of El Paso pursuant to this chapter allowing the motor vehicle to be parked in the downtown parking district.

2. Effect on issuance of permit. A parking permit shall not guarantee or reserve to the holder a curbside parking space within a downtown parking district. A parking permit shall not authorize the holder to cause to stand or park a motor vehicle at such places where parking is prohibited or during such times as when the stopping, standing or parking of motor vehicles is set aside for specified types of vehicles, nor exempt the holder from observance of any traffic regulation including, but not limited to, vehicle abandonment laws or towing laws.

3. Temporary suspension of permit. The traffic engineer may temporarily suspend the parking allowed pursuant to a parking permit for emergency or construction purposes within the downtown parking district.

4. Limitations on the issuance of parking permits.

a. The traffic engineer may limit the parking permit to certain hours of the day and certain days of the week in any downtown parking district or a block within a district.

b. Only one permit shall be issued for each vehicle.

c. Permits may only be used in the downtown parking district for which they are issued.

d. The traffic engineer may limit the number of vehicles that may be issued a permit for each household on each block or blocks within a downtown parking district when such limitation is appropriate to accommodate the parking needs within the block or blocks in the downtown parking district.

e. No parking permit shall be issued if the applicant has pending parking tickets issued in the city.

5. Prohibitions regarding the use of downtown parking district parking permits.

a. The side of the permit showing the downtown parking district for which the permit was issued shall be displayed in the vehicle at all times the vehicle is parked in the downtown parking district for which it was issued in a manner that allows the entire permit to be viewed from outside the vehicle through the lower passenger side of the front windshield.

b. Expired parking permits shall not be displayed in parked vehicles.

c. Parking permits shall be returned to the City of El Paso when said permit expires, the person to whom the parking permit was issued no longer resides in the downtown parking district, and when the vehicle to which the parking permit was issued is loaned (for more than thirty days) or is stolen, sold or traded.

d. Parking permits shall not be transferred.

e. Parking permits shall not be displayed in a vehicle for which said permit was not issued.

6. Requesting parking permits.

a. All parking permits under this section may be issued by the City of El Paso upon receipt of a completed application which provides the information required under this section.

b. All applicants must present a valid driver's license or other government-issued identification showing the applicant's photograph.

c. All applications shall be accompanied by the established fee for the parking permit(s) requested in the manner established in Section 12.44.290.G.

E. Downtown parking district parking permit application requirements: The following requirements must be met before a downtown parking district parking permit may be issued.

1. Residents: Each applicant must demonstrate that he/she is a current resident of the downtown parking district for which the parking permit is to be issued by providing one of the following documents which shows that the applicant resides in the downtown parking district:

a. A current electric, gas, telephone or water bill for service at the residents address within the downtown parking district that is dated within thirty days of the application for a permit;

b. A lease of premises or contract for sale of a residence that lists the applicant's residence as within the downtown parking district; or

c. Any other current valid document issued by a government agency that shows that the applicant resides within the downtown parking district.

2. Armed forces: Members of the armed forces whose home of record is outside El Paso County and currently reside in a downtown parking district are eligible to apply for a downtown parking permit provided they show a valid military identification card and one of the following which shows that the applicant resides in the downtown parking district:

a. A current electric, gas, telephone or water bill for service at the resident's address within the district that is dated within thirty days of the application for a parking permit;

b. A lease of premises or contract for sale of a residence that lists the applicant's residence as within the downtown parking district; or

c. Any other current valid document issued by a government agency that shows that the applicant resides within the downtown parking district.

2. Armed forces: Members of the armed forces whose home of record is outside El Paso County and currently reside in a downtown parking district are eligible to apply for a downtown parking permit provided they show a valid military identification card and one of the following which shows that the applicant resides in the downtown parking district:

a. A current electric, gas, telephone or water bill for service at the resident's address within the district that is dated within thirty days of the application for a parking permit;

b. A lease of premises or contract for sale of a residence that lists the applicant's residence as within the downtown parking district; or

c. Any other current valid document issued by a government agency that shows that the applicant resides within the downtown parking district.

F. New resident temporary parking permit. A new resident temporary parking permit may be obtained from the City of El Paso by submitting an application in the same manner as is required in this section for applying for downtown parking permits except that no document shall be required that contains the address located within the downtown parking district. The new resident temporary parking permit shall expire at the end of the ninetieth day after its issuance and shall be subject to all other requirements and limitations of a downtown parking permit. No parking permit described under Subsection D of this chapter shall be issued to the holder of new resident temporary parking permits until all new resident temporary parking permits issued to the applicant are returned to the City of El Paso.

G. Downtown parking district parking permit and new resident parking permit fees. The following fees are established and shall be charged: (1) a downtown parking district parking permit fee, assessed exclusively to the first permit issued to a residence, (2) a downtown parking district parking permit fee, assessed for each subsequent permit issued to a residence after the first, (3) a new resident temporary parking permit fee, and (4) a replacement downtown parking district parking permit fee. The downtown parking district parking permit fee and new resident temporary permit fee shall be charged for each authorized vehicle.

H. Parking permit term. Parking permits shall be valid for a consecutive twelve-month period from the day they are issued by the City of El Paso and shall be renewable annually provided that the applicant provides evidence that he/she is still eligible for the permit. The permit may be renewed by mail provided that proof of eligibility and fee payment are also included with the renewal application.

I. Revocation of parking permits. A parking permit may be revoked for the following reasons:

1. The transfer or assignment of a parking permit.

2. The applicant for the parking permit falsely represented himself as being eligible for a parking permit, submits false documentation, or otherwise makes a false statement of a material fact on an application for a parking permit.

3. The parking permit holder loses his status as a resident or other qualification to apply for a parking permit.

J. Lost or stolen parking permits. The City of El Paso may replace a lost, stolen or destroyed downtown parking permit. To be eligible to receive a replacement parking permit, the permit holder must submit a signed affidavit stating that the parking permit was lost, stolen or destroyed and pay the established parking permit replacement fee. The remaining part of a damaged parking permit shall be submitted to the traffic engineer before receiving a replacement parking permit.

K. Signs. The city shall cause appropriate signs to be placed in downtown parking districts that provide notice of the extent of each district. The signs placed in these areas shall be of such char-

acter as to readily inform an ordinarily observant person of the existence of the downtown parking district.

L. Violations. Any person who violates any provision of this chapter shall be subject to the penalties set forth in Section 12.84.010 B., except that a violation of the provisions of this section related to the parking, standing or stopping of vehicles shall be a civil offense and violation of section 12.84.010 A. and subject to the administrative procedures provided in Chapter 12.85 (Parking Violations). Fines shall be in accordance with the schedule of standard fines adopted by resolution of city council.

(Ord. No. 17942, § 1, 2-5-2013; Ord. No. 18154, § 1, 4-1-2014)

12.44.300 Educational parking districts.

A. Policy. It is the policy of the city to reduce hazardous traffic conditions and congested parking conditions resulting from the use of streets within areas zoned for residential uses resulting from the parking of vehicles by persons using commercial, industrial, governmental and education facilities; to protect the residents of designated residential districts from unreasonable burdens in gaining access to their residences; to preserve the character of designated residential districts as residential districts; to preserve the safety of students attending elementary and secondary schools in an area where parking is limited and restricted; to preserve the safety of motorists, children and other pedestrians; and for the peace, order, comfort, convenience and welfare of the inhabitants of the city.

B. Definitions. The following definitions shall apply to this section:

"Block" means a continuous area adjacent to a street between street intersections on one or both sides of such street or, in the instance of a dead end street, the contiguous area from the last intersection of that street with another street to the end of such street on one or both sides of such street.

"Educational facility" means an elementary or secondary school as defined by Sections 20.02.840 and 20.02.841, of the El Paso City Code, located within an established residential parking district.

"Parent/legal guardian" means the parent or legal guardian of one or more students enrolled in an educational facility.

C. Creation of educational parking districts.

1. Creation: Educational parking districts shall be created, adjusted and dissolved by ordinance. Educational parking districts established in Section 12.88.200 shall continue in existence until removed by amendment to that section.

a. To initiate the creation of an educational parking district, a representative of the educational facility shall submit an application to create an educational parking district.

b. No fee shall be charged for the application for the creation of an educational parking district. The application shall identify the block or blocks that are proposed to be in the educational parking district. The requested educational parking district must be within an existing residential parking district as defined by Section 12.88.200 of the El Paso City Code. The traffic engineer shall evaluate the need for educational parking restrictions in the block or blocks identified in the application and the area surrounding such block or blocks, based upon the availability of parking spaces that exist, safety issues that may exist because of congested street parking in the proposed district, and any other criteria that will promote the safety, health, and welfare of the public. If the criteria are met, the Traffic Engineer shall recommend appropriate boundaries for the district. The traffic engineer shall include in his evaluation the reasons why the block or blocks meet or do not meet the criteria. All applications, evaluations and recommendations of the traffic engineer shall be submitted to the city council for approval or denial of creating the educational parking district.

2. Criteria. The following conditions shall exist in order to create an educational parking district:

a. The proposed district shall be within an existing residential parking district as defined by Section 12.88.200 of the El Paso City Code; and

b. An educational facility exists within the block or blocks in the proposed district that users

of nonresidential vehicles parked on the street in the block will have access to the educational facility; and

c. An inadequate number of parking spaces exist for residents and nonresidents to park their vehicles in the block or blocks in the proposed district; and

d. A safety issue has been identified because of congested street parking block or blocks in the proposed district; and

e. The traffic engineer determines that a parking permit system would alleviate the lack of parking for residents and non-residents of the block or blocks in the proposed district.

f. The blocks in the proposed district are zoned as a light density residential district.

3. Traffic engineer's evaluation. Upon receipt of an application meeting the requirements of this section, the traffic engineer shall evaluate the nature and extent of the problems, if any, caused by availability of nonresidential parking in each block using the criteria set forth in Section 12.44.300.C.2.a. through f. If deemed necessary by the traffic engineer, more detailed studies shall be conducted including, but not limited to an inventory of legal curbside parking spaces available.

4. Notice. The traffic engineer shall notify the applicant within thirty city business days of the day the application is submitted to the office of the traffic engineer whether the applicant has met the requirements for the implementation of educational parking restrictions, citing any requirements that have not been met.

5. Appeal. When the traffic engineer does not find that the applicant has met the requirements to impose educational parking restrictions, the traffic engineer shall send the applicant notice of his decision. The applicant may appeal the decision to the city council by submitting an appeal to the traffic engineer on a form approved by the traffic engineer. The appeal must be submitted within fifteen consecutive calendar days after the date of applicant's receipt of the notice of the traffic engineer's decision. The appeal shall state the basis for the appeal specifying any findings by the traffic engineer that the appellant asserts are in error.

D. Removal of parking restrictions, dissolution of educational parking districts.

1. The representative of the educational facility in an educational parking district may request to have the parking restrictions of such district removed as to the block or blocks in which the representative requests or to have the entire educational parking district dissolved.

2. The city council reserves the right to dissolve an educational parking district upon 90 days advance written notice to the representative of the educational facility.

E. Parking permits.

1. Permit required. It shall be a violation for any person to park a motor vehicle on a city street in a curbside parking space on any day or during any hours in an educational parking district without the display, as required in this section, of a parking permit issued pursuant to this chapter ("parking permit") allowing the motor vehicle to be parked in the district and during the times specified on educational parking district signs posted in such district by the city.

2. Effect of issuance of permit. A parking permit shall not guarantee or reserve to the holder a curbside parking space within an educational parking district. A parking permit shall not authorize the holder to cause to stand or park a motor vehicle at such places where parking is prohibited or during such times as when the stopping, standing or parking of motor vehicles is set aside for specified types of vehicles, nor exempt the holder from observance of any traffic regulation including, but not limited to, vehicle abandonment laws, towing laws or parking meter payment.

3. Educational parking permit. No educational parking permits shall be issued until the city and the educational facility have entered into an agreement which addresses the distribution, revocation and replacement of the permits. Subject to the limitations in this section, an educational parking permit will only be issued to a parent, legal

guardian, and/or other auxiliary personnel, such as interns, volunteers, and tutors associated with or working at the educational facility within the identified educational parking district. An educational parking permit shall not be given to residents or members of the existing residential parking district that have an existing parking permit or members of the educational facility's teaching or administrative staff. Permits shall be valid for one year from the date of issuance.

4. Notwithstanding any other provision of this chapter limiting or restricting the parking or standing of vehicles on certain streets or highways, or portions thereof, during all or certain hours of the day, vehicles displaying the appropriate educational parking permit as hereafter provided may park on streets or portions thereof designated as an educational parking district and shall not be subject to the otherwise applicable parking limitation or restrictions; provided, however, such exemption shall not be effective unless signs or markings giving notice thereof are installed and in place; and further provided, such exemption shall not be permitted at loading zones or when or where parking or stopping is prohibited as posted.

F. Exemptions. Any emergency vehicle, including, but not limited to, an ambulance, fire engine or police vehicle, which is under the control of an individual providing service to a property located on a street in an educational parking district shall be permitted to stand or be parked on a street in the area without being limited by the educational parking district prohibitions or restrictions. Additionally, any vehicle, including, but not limited to, a delivery, utility, or service vehicle which is under the control of an individual providing service to a property or infrastructure within the district located on a street in the educational parking district shall be permitted to stand or be parked on a street in the area without being limited by the educational parking district prohibitions or restrictions.

G. Signs. The city shall cause appropriate signs to be placed in educational parking districts that provide notice of the parking restrictions that apply in the district. The signs shall be posted on those streets restricting all parking except parking by the holders of permits that are granted pursuant to this section. The signs placed in these areas shall be of such character as to readily inform an ordinarily observant person of the existence of the parking restrictions.

H. Conflict. Where a conflict or overlap of boundaries or parking restrictions exist between an educational parking district and any other parking district, the educational parking district times and restrictions shall control.

I. Violations. Any person who violates any provision of this chapter shall be subject to the penalties set forth in Section 12.84.010.B, except that a violation of the provisions of this Section related to the parking, standing or stopping of vehicles shall be a civil offense and violation of Section 12.84.010.A and subject to the administrative procedures provided in Chapter 12.85 (Parking Violations). Fines shall be in accordance with the schedule of standard fines adopted by resolution of city council.

(Ord. No. 18407, § 1, 8-18-2015)

Chapter 12.46

MOBILE FOOD VENDORS

Sections:

12.46.010 Definitions.

12.46.020 Mobile food vending regulations.

12.46.030 Vehicle requirements and inspections.

12.46.010 Definitions.

For the purposes of this chapter, the following words and terms shall have the following meanings, unless the context clearly indicates otherwise:

"Downtown area" means the area bounded by Yandell Street, Kansas Street, Cesar Chavez/Border Highway and Santa Fe Street, and including the entire width of the public rights-of-way within said area.

"Mobile food establishment" means a vehicle-mounted food establishment designed to be readily movable.

"Mobile food vendor" means a food establishment contained within or mounted on a motor vehicle designed to be driven along the streets for the purpose of stopping briefly for the purpose of selling food or other edible or potable substances directly from the vehicle to customers who come to the vehicle. (Ord. 14847 § 1 (part), 2001)

12.46.020 Mobile food vending regulations.

It shall be unlawful for the operator of any motorized mobile food establishment to stop, stand or park such vehicle on any public street or thoroughfare when ice cream, frozen desserts, candy or other edible or potable substances are sold or offered for sale, from such vehicle, unless such operator before making any such sale and at the time of such sale shall operate his or her vehicle in the following manner:

A. Such vehicle shall stop, stand or park at the right curb on a two-way street and at either curb on a one-way street, within eighteen inches of such curb before any sale or offering of sale shall be made;

B. Such vehicle shall not stop, stand or park in the downtown area, unless a special privilege is granted by city council. For purposes of this section, the downtown area shall be defined as the area bounded by Yandell Street, Kansas Street, Cesar Chavez/Border Highway and Santa Fe Street, and including the entire width of the public rights-of-way within said area.

C. Such vehicle shall be allowed to stop, stand or park on any public street or right-of-way, provided this area is not within twenty feet of an intersection, such vehicle does not obstruct a pedestrian crosswalk and the area is not prohibited to the stopping, standing or parking of such vehicles;

D. Such vehicle shall not obstruct vehicular or pedestrian traffic;

E. Reserved;

F. Vendors shall only serve customers when the mobile vending vehicle is parked, and at such stops the vehicle's motor shall be cut off, unless its operation is essential to producing or maintaining the product sold. Vendors whose vehicles require the continuous operation of the motor to produce or maintain the product must either apply the parking brake if the vehicle is equipped with a manual transmission or place the vehicle's automatic transmission in the "park" position while conducting sales;

G. Reserved;

H. No sale or offering to sell shall be made from any mobile vending vehicle on city right-of-way within two blocks of any school;

I. No sale or offering to sell shall be made on any street or thoroughfare where the lawful speed limit exceeds thirty miles per hour;

J. On and after June 15, 2001, the operator of such vehicle shall illuminate the blinking or flashing lights required under Section 12.46.030 immediately upon stopping, standing or parking the vehicle for the purpose of making a sale and the lights shall remain illuminated until such time as the vehicle resumes travel. It shall be unlawful for a mobile food vendor to illuminate the blinking or flashing lights required under Section 12.46.030 while the vehicle is moving;

K. Any person violating any provision of this section shall be guilty of a misdemeanor and punished by a fine not exceeding five hundred dollars pursuant to Section 12.84.010. (Ord. 14847 § 1 (part), 2001)
(Ord. No. 17545, § 1, 4-26-2011)

12.46.030 Vehicle requirements and inspections.

A. On and after June 15, 2001, mobile food vending vehicles shall be equipped with front and rear blinking or flashing caution signals in addition to the standard vehicle flashers. The front signals shall be mounted above the headlights and as high on the vehicle as practicable. The front signals shall be as widely spaced laterally as practicable and shall display simultaneously blinking or flashing amber lights. The rear signals shall be at least six inches in diameter, visible from five hundred feet away in daylight, mounted above the turn signals and as high on the vehicle as practicable, as widely spaced laterally as practicable and shall display simultaneously blinking or flashing amber or red lights.

B. On and after June 15, 2001, police officers may inspect mobile food vending vehicles operating on the streets or thoroughfares of the city for the purpose of determining whether the vehicles comply with this chapter and if the signals required under this section are present and operational.

C. The operator of a mobile food vending vehicle commits an offense if on or after June 15, 2001, he or she refuses to illuminate the lights on their vehicle required under this section, at the request of a police officer during an inspection conducted in accordance with this section. (Ord. 14847 § 1 (part), 2001)

Chapter 12.48

LOADING ZONES, BUS, TAXI STANDS, AND RIDESHARE ZONES

Sections:

12.48.010 Loading zone—Authority to designate.

12.48.020 Loading zone—Prohibited uses.

12.48.030 Loading zone—Pick-up and discharge of passengers.

12.48.040 Public carrier stops, stands and routes—Authority to designate.

12.48.050 Use of stands by buses, taxicabs, and rideshare vehicles.

12.48.060 Use of stands by other than those designated for.

12.48.070 Reserved.

12.48.010 Loading zone—Authority to designate.

The traffic engineer is authorized to designate, in locations appropriate to the needs of traffic and the convenience of the public, loading zones for either of two types of use:

A. Zones for Commercial Vehicles Only. In a loading zone designated for commercial vehicles only, loading and unloading will be restricted between the hours of seven a.m. to seven p.m., unless otherwise specified on posted signs. A "commercial vehicle" means any motor vehicle (other than a motorcycle or passenger car) designed and used primarily for the transportation of property; or any motorcycle or passenger car which has been reconstructed so as to be used primarily for the transportation of property and is being so used; or any motorcycle or passenger car which has been reconstructed so as to be used primarily for the transportation of property and is being so used; or any motorcycle or passenger car which is being used primarily for the transportation of property and which has permanently displayed (not by magnetic or other removable signs) legible words identifying the business concern by which the vehicle is used.

B. Zones for General Use. In a loading zone designated for general use, loading and unloading will be restricted between the hours of seven a.m. to seven p.m., unless otherwise specified on posted signs.

C. Zones for Rideshare Use. In a loading zone designated for rideshare use, loading and unloading of passengers will be permissible twenty-four hours per day, unless otherwise specified on posted signs. (Ord. 13062 § 8, 1997: Ord. 8311 §§ 1, 2, 1985; prior code § 20-86)
(Ord. No. 019738, § 2, 5-28-2025)

12.48.020 Loading zone—Prohibited uses.

A. In a loading zone designated for commercial vehicles only, no person shall stop, stand or park any vehicle during the prohibited hours, except that the driver of a commercial vehicle as defined in Section 12.48.010 may use the zone, for not more than thirty minutes consecutively, for the expeditious unloading and delivery or pick-up and loading of merchandise or materials, unless otherwise specified on posted signs.

B. In a loading zone designated for general use, no person shall stop, stand or park any vehicle during the prohibited hours, except for the expeditious unloading and delivery or pick-up and loading of merchandise or materials during not more than thirty minutes consecutively, unless otherwise specified on posted signs.

C. Loading zones are not for the exclusive use of any particular business. (Ord. 13099 § 1, 1997; prior code § 20-87)

12.48.030 Loading zone—Pick-up and discharge of passengers.

The driver of a rideshare or taxi vehicle may stop temporarily at a loading zone for a maximum of five minutes, even during the restricted hours, for the purpose of and while actually engaged in loading or unloading passengers, but only when such stopping does not interfere with any other vehicle lawfully in or about to enter such zone for loading or unloading merchandise or materials. (Prior code § 20-88)
(Ord. No. 019738, § 3, 5-28-2025)

12.48.040 Public carrier stops, stands and routes—Authority to designate.

A. The traffic engineer is authorized and required to establish bus stops, bus stands, rideshare zones and stands for passenger common-carrier motor vehicles on such public streets in such places and in such number as may be determined to be of the greatest benefit and convenience to the public. Each such bus stop, bus stand, rideshare zone, or other stand shall be designated by appropriate signs or markings approved by the traffic engineer and installed by the city. When a passenger common-carrier company requests such designated stop areas for the loading and/or unloading of its passengers in the city right-of-way, such company shall pay the city for all costs related to the design and installation of the requested stop areas.

B. The traffic engineer is authorized and required to establish reasonably direct routes on city streets from state and federal roadways to destinations within the city and back to such state and federal roadways for those passenger common-carrier motor vehicles that operate under authority of permits issued by the surface transportation board or its successor agency. To become effective, the routes established by the traffic engineer and any amendments thereto shall require city council approval by resolution. Common-carrier passenger motor vehicles operating under permits issued by the surface transportation board or its successor agency shall not operate over city streets except on such routes as established by the traffic engineer and approved by the city council. The description of the routes established pursuant to this section shall be available to the public from the office of the traffic engineer and made available to the public electronically. Any passenger common carrier company may make a request to the traffic engineer to amend the routes to accommodate its access to facilities used by such common-carrier or to load and/or unload its passengers. The traffic engineer shall follow the procedures of this section in developing a route and presenting an amendment to the city council for its consideration (Ord. 8275 § 1, 1985; prior code § 20-89)
(Ord. 17290, § 1, 3-16-2010; Ord. No. 019738, § 4, 5-28-2025)

12.48.050 Use of stands by buses, taxicabs, and rideshare vehicles.

A. The operator of a bus shall not stand or park such vehicle upon any street at any place other than a bus stand so designated as provided herein.

B. The operator of a bus shall not stop such vehicle upon any street at any place for the purpose of loading or unloading passengers or their baggage other than at a bus stop, or bus stand, so designated as provided herein, except in case of an emergency.

C. The operator of a bus shall enter a bus stop, or bus stand, on a public street in such a manner that the bus when stopped to load or unload passengers or baggage shall be in a position with the right front wheel of such vehicle not further than eighteen inches from the curb and the bus approximately parallel to the curb so as not to unduly impede the movement of other vehicular traffic.

D. The operator of a taxicab shall not stand or park such vehicle upon any street at any place other than in a taxicab stand so designated as provided herein. This provision shall not prevent the operator of a taxicab from temporarily stopping in accordance with other stopping or parking regulations at any place for the purpose of and while actually engaged in the expeditious loading or unloading of passengers.

E. The operator of a taxicab and rideshare vehicle may stand or park such vehicle in a designated rideshare zone not to exceed a maximum of five minutes for the purpose of loading/unloading passengers. (Prior code § 20-90)
(Ord. No. 019738, § 5, 5-28-2025)

12.48.060 Use of stands by other than those designated for.

No person shall stop, stand or park a vehicle other than a bus in a bus stop, a taxicab in a

taxicab stand, or other than a rideshare vehicle in a rideshare zone when any such stop or stand has been officially designated and appropriately signed, except that the driver of a passenger vehicle may temporarily stop therein for the purpose of and while actually engaged in loading or unloading passengers when such stopping does not interfere with any bus or taxicab waiting to enter or about to enter such zone. (Prior code § 20-91)
(Ord. No. 019738, § 6, 5-28-2025)

12.48.070 Reserved.

Editor's note—Ord. No. 17690, § 19, adopted December 6, 2011, repealed § 12.48.070, which pertained to violation of Section 12.48.050 or 12.48.060—Penalty and derived from prior code § 20-91.1.

Chapter 12.52

PARKING RESTRICTIONS ON CERTAIN STREETS

Sections:

12.52.010 Applicability.

12.52.020 Parking prohibited at all times.

12.52.030 Parking prohibited during certain hours.

12.52.040 Stopping, standing and parking prohibited during certain hours.

12.52.050 Parking time limited.

12.52.060 Stopping, standing or parking prohibited during certain hours on any day.

12.52.070 Regulations not exclusive.

12.52.010 Applicability.

The provisions of this chapter prohibiting the standing or parking of a vehicle shall apply at all times or at those times herein specified, or as specified on official signs, except when it is necessary to stop a vehicle to avoid conflict with other traffic or in compliance with the directions of a police officer or official traffic-control device. (Prior code § 20-92)

12.52.020 Parking prohibited at all times.

When signs are erected or the curb is painted yellow giving notice thereof, no person shall park a vehicle at any time upon any of the streets as described in Schedule III, Section 12.88.030.
(Prior code § 20-94; Ord. No. 18573, § 1, 9-20-2016)

12.52.030 Parking prohibited during certain hours.

When signs are erected in each block giving notice thereof, no person shall park a vehicle between the hours specified in Schedule IV, Section 12.88.040, any day except Sundays and legal holidays within the district or upon any of the streets described in such schedule. (Prior code § 20-95)

12.52.040 Stopping, standing and parking prohibited during certain hours.

When signs are erected in each block giving notice thereof, no person shall stop, stand or park a vehicle between the hours specified in Schedule V, Section 12.88.050, of any day except Sundays and legal holidays within the district or upon any of the streets described in such schedule. (Prior code § 20-96)

12.52.050 Parking time limited.

When signs are erected in each block giving notice thereof, no person shall park a vehicle for longer than the times shown in Schedule VI, Section 12.88.060, within the district or upon any of the streets described in such schedule. (Ord. 11643 § 1, 1993: prior code § 20-97)

12.52.060 Stopping, standing or parking prohibited during certain hours on any day.

When signs are erected in each block giving notice thereof, no person shall stop, stand or park a vehicle between the hours specified in Schedule XVI, Section 12.88.170, of any day, including Sundays and legal holidays, within the districts, or upon any of the streets described in said schedule. (Prior code § 20-97.1)
(Ord. No. 17338, § 5, 6-1-2010)

12.52.070 Regulations not exclusive.

The provisions of this chapter imposing a time limit on parking shall not relieve any person from the duty to observe other and more restrictive provisions prohibiting or limiting the stopping, standing or parking of vehicles in specified places or at specified times. (Prior code § 20-93)

Chapter 12.54

TOWING REGULATIONS AND FEES

Sections:

12.54.010 Definitions.
12.54.020 Maximum fee schedule.
12.54.030 Removal of debris.
12.54.040 Penalty.
12.54.050 Towing fee studies.
12.54.060 Fees for police ordered towing services—Impoundment.

12.54.010 Definitions.

The following definitions shall apply in this section:

"Consent tow" has the same meaning as defined by V.T.C.A. Occupations Code § 2308.002.

"Incident management tow" has the same meaning as defined by V.T.C.A. Occupations Code § 2308.002.

"Nonconsent tow" has the same meaning as defined by V.T.C.A. Occupations Code § 2308.002, including an incident management tow.

"Police ordered tow" means any tow initiated or requested at the direction of a police officer who orders the removal of a vehicle that is unlawfully stopped in accordance with V.T.C.A. Transportation Code § 545.305 or incident management tow.

"Tow truck" has the same meaning as defined by V.T.C.A. Occupations Code § 2308.002.

"Tow company" has the same meaning as defined by V.T.C.A. Occupations Code § 2308.002.

"Vehicle owner or operator" has the same meaning as defined by V.T.C.A. Occupations Code § 2308.002. (Ord. 16957 § 1, 2008: Ord. 15076 § 2, 2002)
(Ord. No. 18137, § 1, 3-4-2014)

12.54.020 Maximum fee schedule.

A. The maximum fee that a tow company may charge for nonconsent tow service including the cost of the clean-up of debris left by the vehicle, regardless of the type of truck used is:

1. Light duty tows—$100.00 for towage of a vehicle with a manufacturer's gross vehicle weight rating of not more than 10,000 pounds and the clean-up of debris and cargos; or

2. Medium duty tows—$350.00 for towage of a vehicle with a manufacturer's gross vehicle weight rating of more than ten thousand pounds but less than twenty-five thousand pounds and the clean-up of debris and cargos.

3. Heavy duty tows—$450.00 for towage of a vehicle with a manufacturer's gross vehicle weight rating of more than twenty-five thousand pounds and the clean-up of debris and cargos.

B. An additional fee in an amount not to exceed twenty-five dollars may be charged for the use of dollies or go-jacks in connection with the tow.

C. If a tow truck operator tows a vehicle with a manufacturer's gross vehicle weight rating of more than ten thousand pounds and the tow takes longer than two hours, beginning from the time when the tow truck reports to the scene to the time when the actual towing, lifting or transporting job is completed, the tow truck operator may charge an additional fee in an amount not to exceed fifty-five dollars per hour for each hour over two hours. If the tow truck operator is required to manually move cargo from such a vehicle, the tow truck operator may charge an additional fee not to exceed the operator's actual cost for such manual cargo movement.

D. If the vehicle owner or operator is at or comes upon the scene where a tow company is attempting to tow a vehicle, and the vehicle owner or operator does not desire the vehicle to be towed, no charge shall be made and the vehicle owner or operator shall be allowed to take possession of the vehicle if the vehicle has not been hooked up by the tow truck. If the vehicle has been hooked up to the tow truck, but not towed from the scene, the

vehicle shall be released to the vehicle owner or operator upon payment of one-half the regular tow fee established in Section 12.54.020(A). (Ord. 15076 § 3, 2002)
(Ord. No. 18137, § 2, 3-4-2014; Ord. No. 18669, § 2, 5-2-2017; Ord. No. 18774, § 2, 4-17-2018)

12.54.030 Removal of debris.

A. Any tow company who tows a vehicle as a nonconsent tow shall completely remove from and near the site of the towed vehicle any and all wreckage or debris left from the vehicle, including all broken glass, debris and truck and vehicle cargos before leaving the site of the vehicle, as part of the fee to be charged for the nonconsent tow.

B. Any person whose vehicle becomes damaged, disabled or otherwise reaches a condition of dilapidation so as to drop debris while upon any street or roadway or upon the property of another shall remove or cause to be removed all debris left from the vehicle, including all broken glass, debris and truck and vehicle cargos, at the time that the vehicle is moved from the location where it was operated, damaged, disabled or otherwise parked.

C. It shall be an affirmative defense to prosecution under this section that the debris was located in or upon a lane of travel of a roadway at such time as when traffic was present on the roadway and no law enforcement officer was at the site to provide traffic direction and control to allow for the safe removal of the debris or that the debris was located upon property posted as no trespassing. (Ord. 15076 § 4, 2002)
(Ord. No. 18137, § 3, 3-4-2014)

12.54.040 Penalty.

Any person violating any provision of Sections 12.54.020 and 12.54.030 of this chapter commits an offense punishable by a fine not to exceed five hundred dollars pursuant to Section 12.84.010. (Ord. 16957 § 2, 2008: Ord. 15076 § 5, 2002)

12.54.050 Towing fee studies.

A. In the event that a towing company desires to request that the city conduct a study of the towing fees established under this chapter, the towing company shall send a written request to the chief of police, with a copy to the city attorney.

B. The towing company shall include with their request copies of pertinent information relating to the costs associated with performing the tows addressed by this chapter including but not limited to an explanation as to how the current fees do not adequately allow the towing company to cover their costs and a reasonable profit.

C. Upon receipt of the request for a towing fee study, the chief of police shall direct his department to gather information as may be available regarding the costs for performing various types of tows addressed by this chapter and survey Texas cities regarding any maximum fees that they have imposed for nonconsensual tows.

D. Not less than thirty days nor more than sixty days after the receipt of the towing company request, related information from a towing company as provided in Subsection A, and considering the information gathered by the police department, the chief of police or designee shall make a recommendation to city council regarding the appropriate fees for tows performed under this chapter. City council may act as deemed appropriate.

E. Towing fee studies may not be requested more than once every three years, unless the towing fee company assumes all costs associated with the study. (Ord. 15528 § 1, 2003)
(Ord. No. 18137, § 4, 3-4-2014; Ord. No. 18774, § 2, 4-17-2018)

12.54.060 Fees for police ordered towing services—Impoundment.

The following definitions shall apply in this section.

A. In any case where a vehicle other than a vehicle owned by the City of El Paso is released from a licensed vehicle storage facility or a vehicle storage facility owned by the city after being towed to the facility pursuant to a police ordered tow, and fees are collected from the vehicle owner, an additional twenty-dollar fee shall be collected and

remitted to the police department on behalf of the city to defray the costs associated with the police ordered towing of the vehicle.

B. In any case where a vehicle other than a vehicle owned by the City of El Paso is towed to a vehicle storage facility owned by the city, an impoundment fee of twenty dollars shall be collected from the vehicle owner prior to release.

C. The fees collected by a licensed vehicle storage facility shall be remitted on a quarterly basis, on or before the fifteenth day of months of January, April, July and September of each year and provide the vehicle identification number (VIN) of each vehicle for which the fee required under this section is being remitted.

D. Each licensed vehicle storage facility shall include the documentation required under this section for the collection and remittance of the city's fee with the documentation required to be made available to a police officer in the city under Title 43, Chapter 18 of the Texas Administrative Code. (Ord. 16957 § 3, 2008)
(Ord. No. 17700, § 1, 12-20-2011)

Chapter 12.56

PARKING METERS

Sections:

12.56.010 Designation—Use.

12.56.020 Installation.

12.56.030 Parking space designation—Use.

12.56.040 Operation—Time limits.

12.56.050 Use of slugs unlawful.

12.56.051 Use of altered United States coins unlawful.

12.56.060 Tampering with prohibited.

12.56.070 Applicability of proceeds.

12.56.080 Key—Custody—Duplicates.

12.56.090 Parking meter rates.

12.56.100 Designation of authority.

12.56.110 Proof of parking meter location and time limit.

12.56.010 Designation—Use.

A. The traffic engineer is hereby authorized to establish the location of metered parking spaces upon any street or portion of any street where it is determined, upon the basis of an engineering and traffic investigation, that the installation of parking meters shall be necessary to aid in the regulation, control, or inspection of the parking of vehicles. The parking of vehicles in such metered parking spaces shall be controlled and regulated by parking meters, installed and maintained by the International Bridges Director, and located upon the curb immediately adjacent to the individual parking spaces. The International Bridges Director shall designate the maximum parking time for each parking meter, basing this designation on the investigation above set forth.

B. The traffic engineer is hereby authorized to designate any portion or section of any drive, roadway or area within any public ground or lands owned or controlled by the city, as a public parking area within which parking shall be controlled by parking meters, whenever the International Bridges Director shall find and determine that the use of public property or any public building, structure or activity situated thereon or adjacent thereto will be benefited by the control of such parking, or access to such ground, buildings or activity will be made more readily available to a larger number of citizens or congested traffic and parking conditions will be thereby eliminated. In the areas so designated, the International Bridges Director shall designate the maximum parking time for each parking meter, basing his designation on the fact finding above set forth. Prior to making changes or designation the International Bridges Director will meet with representatives of the El Paso Downtown Management District in order to be able to fairly consider any impacts to affected downtown businesses and patrons. (Ord. 15157 § 2, 2002: Ord. 13062 § 9, 1997; Ord. 10399 § 1, 1991; Ord. 10046 § 2, 1990: Ord. 9497 § 1, 1988; prior code § 20-100)
(Ord. 17043, 12-23-2008)

12.56.020 Installation.

A. The International Bridges Director shall install or remove parking meters in the metered parking spaces established as provided by this chapter. Such meters shall be capable of being operated, either automatically or mechanically, upon the deposit therein of an appropriate coin, or coins, of United States currency, authorized tokens or a parking meter fee debit card or other approved payment method for the full period of time for which parking is lawfully permitted in any metered parking space.

B. A parking meter fee debit card means a card to be used as a substitute for coins to obtain time on a parking meter.

C. Reserved.

D. Each parking meter shall be so designed, constructed, installed and set that upon the expiration of the time period registered, by the deposit an approved payment method, it will indicate by an appropriate signal that the lawful parking meter period has expired, and during said period of

time and prior to the expiration thereof, will indicate the interval of time which remains of such period.

E. Each parking meter shall bear thereon a legend indicating the days and hours when the requirements to deposit an approved payment method therein shall apply, the value of the money to be deposited and the lawful period of time permitted for parking by meter actuation in the metered parking space in which such meter is located.

F. Parking meter fees shall apply in all areas between the hours of 8:00 a.m. and 6:00 p.m. of every day except on officially designated city holidays and Sundays. The International Bridges Director shall make recommendations to city council for exceptions to the days and times when parking meter fees shall apply.

Exceptions:

1. Parking meter fees shall not apply during the hours of the day when the fee is specifically exempted for special downtown events or events permitted with a special privilege license and event permit.

2. Reserved.

3. Parking meter fees shall not apply on Mills Avenue north side, between Campbell Street and Virginia Avenue on Tuesdays during scheduled city council meetings.

4. Parking meter fees shall apply within the uptown parking benefit district, bounded as described in Section 12.88.230 of the City Code, as amended, between the hours of 8:00 a.m. and 12:00 a.m. of every day except on officially designated city holidays and Sundays.

5. Without affecting the provisions of Section 12.56.020 F.3., parking meter fees shall not apply for the first hour during which a vehicle is parked at a parking meter on the north side of East Mills Street between North Campbell Street and North Virginia Avenue. If a vehicle is parked for more than one hour at that location, the established parking meter rates shall apply.

6. Parking meter fees shall not apply for the first hour during which a vehicle is parked at a parking meter on the north side of Texas Avenue between North Virginia Avenue and North Saint Vrain Street. If a vehicle is parked for more than one hour at that location, the established parking meter rates shall apply.

7. Parking meter fees shall apply on the portion of North Coldwell Street within "Zone A" of the downtown parking district for a 24-hour period of every day except on officially designated holidays.

8. Parking meter fees shall not apply for the first 15 minutes during which a vehicle is parked at a parking meter along Cincinnati Avenue between Mesa Street to the west and Stanton Street to the east. If a vehicle is parked for more than 15 minutes at that location, the established parking meter rates shall apply.

G. Parking at a space with a meter may be prohibited as indicated by street sign for designated days or hours of the day. Penalties for parking during the prohibited times shall apply regardless of whether the payment of the parking meter fee was made. (Ord. 15157 § 3, 2002: Prior code § 20-101)

(Ord. 17043, 12-23-2008; Ord. No. 17265, § 1, 1-12-2010; Ord. No. 17847, § 1, 8-7-2012, eff. 9-1-2012; Ord. No. 17982, § 1, 4-2-2013; Ord. No. 18066, § 1, 8-20-2013; Ord. No. 18122, § 1, 2-4-2014; Ord. No. 18228, § 1, 8-19-2014; Ord. No. 18411, § 1, 9-8-2015; Ord. No. 18528, § 1, 6-14-2016; Ord. No. 18565, § 1, 9-6-2016; Ord. No. 18763, § 1, 3-6-2018)

12.56.030 Parking space designation—Use.

A. The traffic engineer shall designate the parking space next to each parking meter for which such meter is to be used by appropriate markings upon the curb or pavement of the street. Parking spaces shall be not less than eighteen feet in length.

B. When double meters are installed on a single post, the front vehicle shall park with its rear bumper aligned with the meter post and the rear vehicle shall park with its front bumper aligned with such post so that the meter post is in the center between both vehicles. In such locations an

additional maneuvering area of eight feet painted with a white "X" shall be provided at the front and back of the double parking space to facilitate ingress and egress. The additional maneuvering area will not be provided where the parking space immediately joins a loading zone or yellow zone which can be used for ingress and egress.

C. The parking space at single meters shall also be eighteen feet in length with space for ingress and egress as outlined above.

D. No person shall park a vehicle in any such designated parking meter space during the restricted and regulated time applicable to the metered parking space in which such meter is located so that any part of such vehicle occupies more than one such space or protrudes beyond the markings designating such space, or so that any part of such vehicle occupies or protrudes into the maneuvering area at the front or back of such space, except that a vehicle which is of a size too large to be parked within a single designated parking meter space shall be permitted to occupy two adjoining parking meter spaces when coins, a parking meter fee debit card, or other approved payment method shall have been deposited in the parking meter for each space so occupied as is required in this chapter for the parking of other vehicles in such space.

E. A vehicle displaying special license plates issued by the Texas State Department of Highways and Public Transportation to former prisoners of war as provided in Section 502.257, Texas Transportation Code, is exempt from the payment of parking fees, including those collected through parking meters, charged by the city. This exemption does not permit parking at a space in excess of the time allowed or permit parking a vehicle at a place or time that parking is prohibited.

F. A vehicle displaying special license plates issued by the Texas State Department of Highways and Public Transportation to Pearl Harbor survivors as provided in Section 502.259, Texas Transportation Code, is exempt from the payment of private automobile parking fees at the El Paso International Airport if the vehicle is owned by a military veteran. This exemption does not permit parking at a space in excess of the time allowed or permit parking a vehicle at a place or time that parking is prohibited.

G. A vehicle displaying a city-issued placard issued to persons appointed to city boards, commissions and committees on the vehicle's dashboard is exempt from the payment of parking fees, including those collected through parking meters, charged by the City. This exemption applies only for parking meters located along East Mills Avenue's north side, between North Campbell Street and North Virginia Street during scheduled City board, commission and committee meetings. (Ord. 17043, 12-23-2008; Ord. 15157 § 4, 2002: Ord. 10990, 1992; Ord. 8175, 1984; prior code § 20-102) (Ord. No. 17690, § 20, 12-6-2011; Ord. No. 18484, § 1, 3-22-2016; Ord. No. 18763, § 2, 3-6-2018)

12.56.040 Operation—Time limits.

A. Except as provided in subsection G. of this section, it shall be a violation for a person to park a vehicle in any parking space upon a street alongside of and next to which a parking meter has been installed during the restricted and regulated time applicable to the metered parking space in which such meter is located unless a coin or coins of United States currency, a parking meter fee debit card, or other approved payment method of the appropriate denominations as provided in this chapter shall have been deposited therein, or shall have been previously deposited therein for an unexpired interval of time, and such meter has been placed in operation.

B. No person shall permit a vehicle within his control to be parked in any such parking meter space during the restricted and regulated time applicable to the metered parking space in which such meter is located when the parking meter for such space indicates by signal that the lawful parking time in such space has expired. This provision shall not apply to the act of parking or the necessary time which is required to deposit immediately thereafter a coin or coins, parking meter fee debit card, or other approved payment method in such meter.

C. Except as provided in subsections D., E., and G. of this section, it shall be a violation for a person to park a vehicle in any parking meter space for a consecutive period of time longer than that permitted in the metered parking space in which such meter is located irrespective of the number or amounts of the coins, parking meter fee debit card, or other approved payment method that are deposited for such meter. Each parking meter shall reflect the specific time limitation for that meter.

D. Placing of additional coins, parking meter fee debit card, or other approved payment method in parking meters located on city-owned properties outside the right-of-way of city streets beyond the prescribed maximum time limit shall be permitted.

E. Parking of a vehicle in any parking meter space for a consecutive period of time longer than that permitted in the metered parking space shall be permitted in the metered parking space when authorized through the grant of a special privilege by the city council or as otherwise authorized by ordinance or permit for use of the metered space pursuant to the requirements of the City Charter and any other applicable city ordinances.

F. When any vehicle is found parked in violation of any parking provision contained in this title, such fact shall be prima facie evidence that the person in whose name it is registered, is guilty of a violation of the parking provision contained in this title.

G. The provisions of this section shall not relieve any person from the duty to observe other and more restrictive provisions of this division and the state vehicle code prohibiting or limiting the stopping, standing or parking of vehicles in specified places or at specified times.

H. Except as provided in subsection 1. of this subsection, a vehicle may be parked at no charge in any parking meter space when the vehicle is being operated by or for the transportation of a person with a disability and there are special license plates issued under Texas Transportation Code Section 504.201 displayed on the vehicle or a valid disabled parking placard is placed on the rearview mirror of the vehicle's front windshield.

1. This subsection does not permit a vehicle to be parked at a time when or a place where parking is prohibited. (Ord. 15157 § 5, 2002: Ord. 10399 §§ 2, 3, 1991; prior code § 20-103)
(Ord. No. 17690, § 21, 12-6-2011; Ord. No. 18478, §§ 1—3, 3-22-2016; Ord. No. 18763, § 3, 3-6-2018)

12.56.050 Use of slugs unlawful.

It is unlawful for any person to deposit in any parking meter anything other than the required United States coin or coins or parking meter fee debit card. (Ord. 15157 § 6, 2002: Prior code § 20-104)
(Ord. No. 18763, § 4, 3-6-2018)

12.56.051 Use of altered United States coins unlawful.

It is unlawful for any person to deposit in any parking meter a United States coin which has had its size altered in any manner. (Ord. 9194, 1987)

12.56.060 Tampering with prohibited.

No person shall deface, injure, tamper with, open, or willfully break, destroy or impair the usefulness of any parking meter. (Ord. 15157 § 7, 2002: Prior code § 20-105)

12.56.070 Applicability of proceeds.

A. Revenue collected under this section from parking meters may be used for any lawful purpose.

B. The coins deposited in parking meters shall be collected by the duly authorized agents of the International Bridges Director. It shall be the duty of such persons so designated to collect the coins as deposited in the meters and deliver such coins in a sealed or locked container to a bank for deposit to the account of the city. The city comptroller shall receive an accounting of such deposits daily. (Ord. 15157 § 8, 2002: Prior code § 20-106)
(Ord. 17043, 12-23-2008; Ord. No. 18565, § 2, 9-6-2016; Ord. No. 18763, § 5, 3-6-2018; Ord. No. 019660, § 3, 8-13-2024)

12.56.080 Key—Custody—Duplicates.

The International Bridges Director shall have custody of all parking meter keys. He may issue such keys to any city employee whose duties require the use of such keys, and such employee shall return the keys to the International Bridges Director upon completion of the work for which their use was needed, or at any other time as directed by the International Bridges Director to return them. Any person who shall have in his custody or possession a parking meter key belonging to the city except as authorized hereunder, or who shall make or cause to be made any duplicate of a traffic meter key belonging to the city without being authorized by the International Bridges Director to do so, shall be deemed guilty of a misdemeanor as provided in Section 12.84.010 B. (Ord. 15157 § 9, 2002: Prior code § 20-107)
(Ord. 17043, 12-23-2008; Ord. No. 17690, § 22, 12-6-2011)

12.56.090 Parking meter rates.

The international bridges director is hereby authorized to establish parking meter fees upon any drive, roadway, city-owned or controlled parking lot or parking facility, or any other area where the parking space is subject to a parking meter. The following fees are hereby established for public parking at any parking meter that is governed by this section:

A. A rate to be established by the international bridges director in an amount set forth in the city's budget, which includes any applicable sales tax. The maximum duration of parking at any meter shall be established by the international bridges director and shall not exceed ten hours.

B. In establishing the foregoing rates, the International Bridges Director shall consider the cost of providing the service, the prevailing private market parking rates in the immediate vicinity of the meter, the needs of patrons of nearby businesses and other premises to have access to the use of meter parking, and shall also consider relevant traffic mobility and engineering issues as applicable.

C. The International Bridges Director is authorized to increase the rate established in subsection 12.56.090 A. to at least eighty cents and no more than one dollar in order to include the third party transaction actual cost for the provision of credit or debit card processing services for any time up to the first hour of each transaction for parking at parking meters. For any subsequent time beyond the first hour of the same transaction, the rate established in subsection 12.56.090 A. will apply. (Ord. 15157 § 10, 2002)
(Ord. 17043, 12-23-2008; Ord. No. 17690, § 23, 12-6-2011; Ord. No. 17847, § 2, 8-7-2012, eff. 9-1-2012; Ord. No. 18228, § 2, 8-19-2014)

12.56.100 Designation of authority.

Those duties of the traffic engineer under this article that do not require the exercise of professional engineering judgment shall be performed by the International Bridges Director. (Ord. 15157 § 11, 2002)
(Ord. 17043, 12-23-2008)

12.56.110 Proof of parking meter location and time limit.

When any person is charged with having committed an offense under this article, proof that a parking meter was located at the parking space in connection with which the offense was committed shall constitute prima facie evidence that the parking meter was installed and the space laid out by order of the traffic engineer, and that the location was designated by the traffic engineer and maximum parking time was designated by the International Bridges Director. (Ord. 15157 § 12, 2002)
(Ord. 17043, 12-23-2008)

Chapter 12.58

PARKING BENEFIT DISTRICTS

Sections:

12.58.010 Definitions.

12.58.020 Purpose of a parking benefit district.

12.58.030 Parking benefit district requirements.

12.58.040 Application to create or modify a district.

12.58.050 Pre-application requirements.

12.58.060 Application requirements.

12.58.070 Application review.

12.58.080 Parking benefit district advisory committee.

12.58.010 Definitions.

For the purposes of this chapter, the following terms, and phrases shall have the meaning given herein, unless more specifically defined within a specific section or paragraph of this chapter. When not inconsistent with the context, words used in the present tense include the future tense, words in the plural number include the singular number, and words in the singular number include the plural number. The words "shall" and "will" are mandatory and "may" is permissive. Words not defined shall be given their common and ordinary meanings.

"Administrative costs" means the costs incurred by the city for enforcing parking restrictions and operating and maintaining parking and street infrastructure.

"Business owner" means a person who holds title to or leases property for the purpose of operating or engaging in a trade, occupation, profession or other lawful commercial activity.

"City parking facility" means property that is owned or controlled by the city and that is used, wholly or partially, for off-street motor vehicle parking, including, but not limited to, a parking lot, a surface lot, or a parking garage.

"Curbside parking space" means an on-street parking space located adjacent to the curb on the public right-of-way, excluding those portions of the right-of-way where the parking of any motor vehicle is prohibited. Here, public right-of-way refers to the area on, below, or above a public roadway, highway, street, or utility easement in which the city has an interest.

"District" means parking benefit district.

"Improvements" means, but is not limited to, public amenities and beautification that enhance the quality of life and public safety in the parking benefit district, such as: increased security, sidewalk and pedestrian walkway improvements, street furniture, street maintenance, street lights, landscaping, parking studies, parking facilities, improvements that promote walking, cycling, and the use of public transportation, wayfinding, and costs associated with the administration of the district.

"Parking benefit district" means an area designated as such pursuant to this chapter in which a percentage of funds collected from paid curbside parking spaces or parking spaces in a city parking facility within the district are used to fund improvements within the district. Each particular parking benefit district is identified in Section 12.88.230 (Schedule XX) of this Code.

"Recognized neighborhood association" means a neighborhood association or civic association that is registered with the city pursuant to Chapter 2.102 of this Code.

"Record owner of real property" means the owner of real property as shown on the records of the tax appraisal district in the county in which the property is located.

"Resident" means the owner or tenant of residential property.

(Ord. No. 18761, § 1, 3-6-2018; Ord. No. 019770, § 1, 8-19-2025)

12.58.020 Purpose of a parking benefit district.

A parking benefit district is an area designated pursuant to this chapter in which a percentage of funds collected from paid curbside parking spaces

or parking spaces in a city parking facility within the district are used to fund improvements within the district.
(Ord. No. 18761, § 1, 3-6-2018)

12.58.030 Parking benefit district requirements.

A. A parking benefit district shall be created or dissolved by ordinance.

B. Any modification to the boundaries of a district shall be by ordinance.

C. Up to seventy-five percent of the funds from the paid curbside parking spaces within the district shall be set aside to pay for improvements and administrative costs within the district, with the remaining twenty-five percent reserved for parking meter maintenance, connectivity fees, and equipment upgrades. The ordinance creating the district shall specify the percentage of funds from the paid parking spaces to be allocated to improvements within the district.

D. Funds from the paid parking spaces may be used in conjunction with other city funds available for improvements within the district. Authorized improvements shall be determined by ordinance by the El Paso City Council.
(Ord. No. 18761, § 1, 3-6-2018; Ord. No. 019770, § 2, 8-19-2025)

12.58.040 Application to create or modify a district.

An application for the creation of a district may be initiated by:

A. A representative of a Recognized Neighborhood Association whose boundaries are completely or partially located within the proposed district;

B. A business owner, resident or property owner whose business, residence or property is located within the proposed district;

C. A city council representative or a majority of city council; or

D. The city manager or designee.
(Ord. No. 18761, § 1, 3-6-2018)

12.58.050 Pre-application requirements.

A. Prior to submittal of an application for the creation of a district or modification to the boundaries of an existing district, a pre-application meeting with the city manager or designee shall be required.

B. Following the pre-application meeting with the city manager or designee, a pre-application community meeting shall be required.

1. The applicant shall convene a community meeting before an application for the creation of district or modification to the boundaries of an existing district is submitted to the city manager or designee.

2. Prior to the community meeting, the applicant shall coordinate with the city manager or designee to send notification of the meeting by:

a. Electronic or regular mail to all recognized neighborhood associations whose boundaries are located:

i. Completely or partially within the proposed district; and

ii. Within 1,500 feet of the proposed district; and

b. Regular mail to all:

i. Record owners of real property located:

1. Completely or partially within the proposed district; and

2. Within 500 feet of the proposed district; and

ii. Physical property addresses that are located:

1. Completely or partially within the proposed district; and

2. Within 500 feet of the proposed district.

3. A notice provided under subsection B.2. shall include the community meeting time, date, location, subject matter, and applicant contact information.
(Ord. No. 18761, § 1, 3-6-2018)

12.58.060 Application requirements.

A. The city manager or designee shall establish fees and submittal requirements for an application for the creation of a district and for the

modification to the boundaries of an existing district. At a minimum, the application shall include:

1. The boundaries of the proposed district or modification to the boundaries of an existing district identified by streets;

2. An explanation of the need for the proposed district or modification to the boundaries of an existing district;

3. A visual representation of the proposed block faces that have paid parking spaces or that are proposed to have paid parking spaces;

4. Identification of other parking management tools that have been requested, if any;

5. Proposed improvements, in priority order, to be funded by parking space revenue;

6. A copy of the sign-in sheets from the pre-application community meeting; and

7. If a vote on the application occurred at the pre-application community meeting, the results of the vote.

B. The city manager or designee shall not accept an application unless the application is complete and the application fee has been paid.

(Ord. No. 18761, § 1, 3-6-2018; Ord. No. 019770, § 3, 8-19-2025)

12.58.070 Application review.

A. The city manager or designee shall review each application for the creation of a district or the modification to the boundaries of an existing district submitted under Section 12.58.060.

B. If the proposed district is located within the boundaries of a parking management district, a redevelopment authority, a tax increment reinvestment zone, or similar entity, the city manager or designee shall submit the application for comment by the entity.

C. The city council shall consider an ordinance for the creation of the proposed district or modification to the boundaries to an existing district after a complete application is filed and comment by applicable entities as referenced in subsection B. has been received.

(Ord. No. 18761, § 1, 3-6-2018)

12.58.080 Parking benefit district advisory committee.

A. If an advisory committee is created, it shall be created by ordinance at the time the parking benefit district is created or any time thereafter.

B. For each district, a parking benefit district advisory committee may be appointed to make recommendations to the city council on issues relating to the district, including: potential projects to be funded with revenue generated from the district and the timing and order of such projects. The El Paso City Council shall have final approval authority over all recommendations made by the committee.

C. If created, the committee shall adopt the uniform bylaws enumerated for all committees, in addition to any specific duties listed in the ordinance.

D. Members and chair. The committee shall consist of five regular members.

1. The members shall consist of business owners, property owners and residents whose business, property, or residence is located within the district or within 1,500 feet of the district; or a representative of a recognized neighborhood association registered pursuant to Chapter 2.102 of the El Paso City Code whose boundaries are completely or partially located within the proposed district or is within 1,500 feet of the proposed district; and are at least 18 years of age.

2. The members shall be appointed by the mayor and confirmed by the city council.

3. The mayor shall designate the committee chair from among the regular members of the committee.

4. At the first meeting of the committee, the regular members shall elect a vice chair who shall perform duties of the chair when the chair is absent or unable to perform such duties.

E. Meetings. The committee shall be limited to quarterly meetings.

(Ord. No. 18761, § 1, 3-6-2018; Ord. No. 019770, § 4, 8-19-2025)

Chapter 12.60

THROUGH STREETS, STOP AND YIELD INTERSECTIONS

Sections:

12.60.010 Designated.
12.60.020 Authority to designate stop intersections.
12.60.030 Stop signs—Authority to erect.
12.60.040 Word "stop" to be on signs.
12.60.050 Stop signs—required.
12.60.060 Emerging from alley, driveway or building.
12.60.070 Stopping when traffic obstructed.
12.60.080 Yield right-of-way signs.
12.60.090 Railroad crossing signals—Obedience to required.

12.60.010 Designated.

Those streets and parts of streets described in Schedule II, Section 12.88.020, are declared to be through streets for the purpose of this section. (Prior code § 20-59)

12.60.020 Authority to designate stop intersections.

The traffic engineer is authorized to determine and designate intersections where particular hazard exists upon other than through streets and to determine whether vehicles shall stop at one or more entrances to any such stop intersection, and shall erect a stop sign at every such place where a stop is required. (Prior code § 20-61)

12.60.030 Stop signs—Authority to erect.

Whenever any ordinance of this city designates and describes a through street it shall be the duty of the traffic engineer to place and maintain a stop sign on each and every street intersecting such through street or intersecting that portion thereof described and designated as such by any ordinance of this city unless traffic at any such intersection is controlled at all times by traffic-control signals; provided, however, at the intersection of two such through streets or at the intersection of a through street and a heavy traffic street not so designated, stop signs shall be erected at the approaches of either of the streets as may be determined by the traffic engineer upon the basis of an engineering and traffic study. (Prior code § 20-60)

12.60.040 Word "stop" to be on signs.

Every sign erected pursuant to this chapter and Chapters 12.44, 12.48, 12.52 and 12.56 shall bear the word "Stop" in letters not less than eight inches in height and such sign shall at nighttime be rendered luminous by steady or flashing internal illumination, or by a fixed floodlight projected on the face of the sign, or by efficient reflecting elements on the face of the sign. Every stop sign shall be located as near as practicable at the nearest line of the crosswalk on the near side of the intersection or, if none, at the nearest line of the roadway. However, nothing in this section shall be construed as to invalidate any existing stop sign heretofore erected on the public streets of the city, which are by this action hereby adopted as official stop signs. (Prior code § 20-62)

12.60.050 Stop signs—required.

When stop signs are erected as herein authorized at or near the entrance to any intersection, every driver of a vehicle and every motorman of a streetcar approaching a stop sign shall stop before entering the crosswalk on the near side of the intersection or in the event there is no crosswalk shall stop at a clearly marked stop line, but if none, then at the point nearest the intersecting roadway where the driver has a view of approaching traffic on the intersecting roadway before entering the intersection except when directed to proceed by a police officer or traffic-control signal. (Prior code § 20-63)

12.60.060 Emerging from alley, driveway or building.

The driver of a vehicle emerging from an alley,

driveway or building shall stop such vehicle immediately prior to driving onto a sidewalk or onto the sidewalk area extending across any alleyway, yielding the right-of-way to any pedestrian as may be necessary to avoid collision, and upon entering the roadway shall yield the right-of-way to all vehicles approaching on the roadway. (Prior code § 20-64)

12.60.070 Stopping when traffic obstructed.

No driver shall enter an intersection or a marked crosswalk unless there is sufficient space on the other side of the intersection or crosswalk to accommodate the vehicle he is operating without obstructing the passage of other vehicles or pedestrians, notwithstanding any traffic-control signal indication to proceed. (Prior code § 20-65)

12.60.080 Yield right-of-way signs.

A. The traffic engineer is authorized to erect "yield" signs at intersections where he finds that traffic conditions justify requiring drivers to yield the right-of-way to traffic on the intersecting street, but do not require a traffic light or stop sign.

B. Every such sign shall bear the word "Yield," either alone or with additional words indicating what traffic is to be yielded to, and shall be illuminated or reflectorized.

C. When yield signs are erected as herein provided at or near the entrance to any intersection, every driver of a vehicle upon approaching such sign shall yield the right-of-way to all vehicles approaching from the right or left on the intersecting street which are so close as to constitute an immediate hazard.

D. If a driver is involved in a collision at an intersection or interferes with the movement of other vehicles after driving past a yield sign, such collision or interference shall be deemed prima facie evidence of such driver's failure to yield the right-of-way. (Prior code § 20-67)

12.60.090 Railroad crossing signals—Obedience to required.

A. Whenever any person driving a vehicle approaches a railroad grade crossing under any of the circumstances stated in this section, the driver of such vehicle shall stop within fifty feet but not less than fifteen feet from the nearest rail of such railroad, and shall not proceed until he can do so safely.

The foregoing requirements shall apply when:

1. A clearly visible electric or mechanical signal device gives warning of the immediate approach of a railroad train;

2. A crossing gate is lowered or when a flagman gives or continues to give a signal of the approach or passage of a railroad train;

3. A railroad train approaching within approximately fifteen hundred feet of the highway crossing emits a signal audible from such distance and such railroad train, by reason of its speed or nearness to such crossing, is an immediate hazard;

4. An approaching railroad train is plainly visible and is in hazardous proximity to such crossing.

B. No person shall drive any vehicle through, around or under any crossing gate or barrier at a railroad grade crossing while such gate or barrier is closed or is being opened or closed. (Prior code § 20-66)

Chapter 12.64

TRAFFIC PROHIBITED ON CERTAIN STREETS

Sections:

12.64.010 Airway Boulevard.
12.64.020 Findley Avenue.
12.64.030 Controlled access highways.
12.64.040 Sahara Lane.
12.64.050 Seventh Avenue.

12.64.010 Airway Boulevard.

A. The department of transportation is authorized to construct a barrier across the alley located at the west end of Avalon Drive, at its intersection with Airway Boulevard, so as to prevent vehicular travel from the alley into Airway Boulevard, and to erect appropriate warning signs of the dead end.

B. When such barrier is erected no person shall operate a vehicle from the alley into Airway Boulevard or from Airway Boulevard into the alley.

C. Any person violating subsection B of this section shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030. (Ord. 13062 § 10, 1997; prior code § 20-176.4)
(Ord. No. 17394, § 10, 8-24-2010)

12.64.020 Findley Avenue.

A. No person shall operate any vehicle on that part of Findley Avenue lying between the northerly right-of-way line of Paisano Drive and the following described line lying across Findley Avenue:

A straight line, perpendicular to the northerly right-of-way line of Findley Avenue, and extending from a point in said northerly right-of-way line of Findley Avenue (which point is approximately 218 feet along said right-of-way line, westerly from the westerly right-of-way line of Stevens Street) to the northerly right-of-way line of Paisano Drive.

B. The department of transportation is authorized to erect a barrier against vehicular traffic along the above-described line across Findley Avenue, and the department of transportation is authorized to erect such sign or signs as may be appropriate to give notice of the dead end of Findley Avenue at such line.

C. Any person violating subsection A of this section shall be punished as provided in Section 12.84.010. (Ord 13062 § 11, 1997; prior code § 20-176.5)
(Ord. No. 17394, § 10, 8-24-2010, eff. 9-1-2010)

12.64.030 Controlled access highways.

No person shall operate any bicycle, motor scooter, motorcycle of less than five brake horsepower, or vehicle drawn by any animal, on any controlled access highway within the city; or go thereon as a pedestrian; or ride any animal thereon. (Ord. 8221, 1984: prior code § 20-176.1)

12.64.040 Sahara Lane.

A. No person shall operate any vehicle on that part of Sahara Lane lying between the Dyer Street-Loop 375 curbline and the following described line lying across Sahara Lane:

A straight line joining the southwest corner of Lot 15, Block 1, Sahara Subdivision, and a point in the south right-of-way line of Sahara Lane which is 35 feet westerly from the northeast corner of Lot 16, Block 2, Sahara Subdivision.

B. The department of transportation is authorized to erect a barrier against vehicular traffic along the above-described line lying across Sahara Lane, and the department of transportation is authorized to erect such warning sign or signs as may be appropriate to give notice of the dead end of Sahara Lane at such line.

C. Any person violating subsection A of this section shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030. (Ord. 13062 § 12, 1997; prior code § 20-176.2)
(Ord. No. 17394, § 10, 8-24-2010, eff. 9-1-2010)

12.64.050 Seventh Avenue.

A. The international boundary and water commission is authorized to construct suitable barricades and appropriate warning signs at the following locations, the design of such barricades and signs to be subject to approval by the traffic engineer:

1. Across the alley in Block E of the Santa Fe Addition, along the line at which part of the alley was vacated by Ordinance No. 3630, passed and approved October 6, 1966;

2. Across Seventh Avenue along each side of the area in which the Atchison, Topeka and Santa Fe Railway Company and the Rio Grande, El Paso and Santa Fe Railroad Company are authorized to operate across Seventh Avenue by Ordinance No. 3704, passed and approved March 16, 1967.

B. When the barricades at the locations described in subsection A1 of this section or either of such locations, are erected, such barricaded area shall be deemed closed to traffic; and it shall be unlawful to drive any vehicle, ride any animal, or go on foot from the open part of the alley into the vacated and barricaded part of the alley, or to drive any vehicle, ride any animal, or go on foot from the open part of Seventh Avenue into the barricaded railroad crossing, or to drive, ride or go on foot across the railroad crossing.

C. Any person violating subsection A2 of this section shall be deemed guilty of a misdemeanor and punished as provided in Section 1.08.010 through 1.08.030. (Ord. 13062 § 13, 1997; prior code § 20-176.3)

Chapter 12.68

VISIBILITY OBSTRUCTIONS

Sections:

12.68.010 Definitions.

12.68.020 Plants, objects, vehicles over three feet.

12.68.030 Trees and other objects—Trimming by lot owners required.

12.68.040 Notice of violation—Correction period—Complaint.

12.68.050 Trimming and removal by city.

12.68.060 Planting in arterial and local street medians.

12.68.070 Violation—Penalty.

12.68.010 Definitions.

For the purposes of this chapter the following terms shall have the meaning ascribed herein:

A. "Curbline" means the boundary of that portion of any street which is improved, designed or ordinarily used for vehicular travel.

B. "Object" means every sign, advertisement, container or display item of any type or form, portable or fixed, which is not authorized by state law or city ordinance. "Object" shall also include buildings and structures of all types, trailers not otherwise classified as vehicles, and any form of outside storage.

C. "Plants" means any hedge, bush, shrub, vine, palm or other vegetation except trees.

D. "Property line" means the boundary line of a parcel of land defined by metes and bounds in a recorded deed or by boundary lines on a recorded map, which line marks the division between the area for a public street and the property abutting upon the street.

E. "Street" means the entire width between the boundary lines of every way open to the use of the public for the purpose of traffic.

F. "Traffic" means the use of any street for the purpose of travel by pedestrians, riders of animals, vehicles and other conveyances. (Prior code § 20-157.1)

12.68.020 Plants, objects, vehicles over three feet.

A. Street Corners. It is unlawful for any person to place or maintain or cause to be placed or maintained, any plant, object or vehicle having a height greater than three feet above the level of the center line of the nearest abutting street on or in that area of a triangle formed by the intersecting property lines and a diagonal line joining the property line at points twenty feet from their intersection of any corner lot on which a front yard is required by Title 20 of this code.

B. Sidewalk Areas. It is unlawful for any person to place, maintain or cause to be placed or maintained any plant, object or vehicle having a height greater than three feet above the level of the center line of the nearest abutting street on or in that area which lies between the property lines of any corner lot and curb lines of any street in the city.

C. Fences. No person shall construct or reconstruct, or cause to be constructed or reconstructed, any fence or wall on a corner lot if the top of such fence or wall is more than three feet above the level of the centerline of the nearest abutting street, and such fence or wall is within a triangle formed by the intersecting property lines and a line joining the property lines at points twenty feet from their point of intersection. Provided, this subsection shall not apply to a retaining wall necessary for the support of the lot, nor to a wall of a building when the building legally extends into such triangle.

D. Variance Authorized by Traffic Engineer. Where special conditions exist, or where practical difficulties in the development and adequate use of land would result from the literal enforcement of the terms of this section, the traffic engineer is hereby authorized to issue a permit to vary the requirements herein set forth, provided that any such variances granted shall be in harmony with the general intent of this section, and consistent

with the public interest, safety and general welfare. Any substantial variances shall be in writing and shall be specifically set forth in the permit issued. (Prior code § 20-157.2)

12.68.030 Trees and other objects—Trimming by lot owners required.

A. Street Corners. It shall be the duty of every owner or occupant of any corner lot in the city to keep any and all trees trimmed and pruned of limbs, branches and foliage to a minimum clearance of ten feet above the street level at the nearest curb line in that area of a triangle formed by the intersecting property lines and a diagonal line joining the property lines at points twenty feet from their intersection on such corner lot.

B. Sidewalk Areas. It shall be the duty of every owner or occupant of any property in the city to keep any and all trees trimmed and pruned of limbs, branches and foliage to a minimum clearance of eight feet above the sidewalk level in that area between his property line and the curbline of any abutting street.

C. Keeping Free Passage in Sidewalk Area. It shall be unlawful for any person to place, maintain or permit, or cause to be placed or maintained, any tree, plant or object on or in the area between the property line of any lot and the curb line of any street abutting such lot in any way that obstructs the free passage and use of that area by the public.

D. Clearance Near Fire Hydrants. It is unlawful for any person to place, maintain or permit, or cause to be placed or maintained any tree, plant or object within five feet of any fire hydrant in the city.

E. Notwithstanding the provisions of any other section in this chapter it is unlawful for any person to place, plant or maintain any plant, tree, or other object in such a manner as to obstruct from view any traffic-control device. (Prior code § 20-157.3)

12.68.040 Notice of violation—Correction period—Complaint.

The traffic engineer shall have a written notice served upon the owner or occupant of any property upon which any violation of any section in this chapter exists to correct the condition which constitutes a violation herein within ten days after service of this notice. Service of the notice may be accomplished by sending same to the owner or occupant by certified mail or by personal service upon the owner or occupant. If such condition is not corrected by the end of such ten-day period, the code enforcement division or other designees of the city manager shall file a complaint in corporation court against such owner or occupant. (Prior code § 20-157.4)
(Ord. No. 17690, § 24, 12-6-2011)

12.68.050 Trimming and removal by city.

The traffic engineer is authorized to remove, or cause to be removed, any tree, plant or object found between the opposite curblines in any street in the city, and to trim branches, limbs or foliage of any tree or plant which overhangs or grows above the area which lies between the opposite curblines of any street to a minimum clearance of ten feet above the street level at the curbline and graduated toward the center line of the street to a clearance of twelve feet above such centerline. The traffic engineer is further authorized to trim or remove any tree or plant which obstructs any traffic control device in the city. (Prior code § 20-157.5)

12.68.060 Planting in arterial and local street medians.

A. Policy.

1. Landscaping in both arterial and local street medians is required in new medians. Landscaping in both existing arterial and local street medians is encouraged provided that the provisions specified in this chapter are adhered to.

2. Safety shall be the foremost consideration in the selection of and placement of landscaping materials in both arterial and local street medians.

3. The traffic engineer will publish planting guidelines for arterial and local street medians. Such guidelines will contain, but not be limited to, suggested plant materials, water harvesting and planting procedures.

4. Desert and drought tolerant landscaping is encouraged.

B. Criteria.

1. Subject to sight distance requirements, landscaped areas in arterial medians will be divided into three zones as specified in the city guidelines.

2. Pedestrian crossing areas shall be surfaced with hard paving suitable for foot and wheel-chair traffic.

3. Vegetation will not be allowed:

a. If the slope of the median is not conducive to irrigating and has a slope of five to one or greater.

b. In portions of the median where the minimum width of the median is five feet or less.

4. Landscaped areas in medians which will not contain vegetation shall:

a. Have a natural topping, including, but not limited to, granite, river rock or chat;

b. Have a weed barrier mat beneath the natural topping;

c. Have surfaces which shall be two inches below the top of the curbline for all areas within twenty-four inches of the back of the curbline. Swales and berms are permitted to allow natural water harvesting.

5. Landscaped areas in medians which will contain vegetation:

a. An irrigation system shall be installed if the minimum width of the median is five feet or more. The irrigation system shall be a low water demand system, with a subterranean system being the most desirable type of system. If sprayheads are installed, the sprayheads shall be designated so as not to spray into the adjacent roadways. The installation of the irrigation system shall be done by a registered irrigator or by any other person authorized under state law to perform the installation.

b. Landscaped surfaces shall be two inches below the top of the curbline for all areas within twenty-four inches of the back of the curbline. Swales and berms are permitted to allow natural water harvesting.

c. Trees and shrubs are permitted in medians if they are planted in locations which do not obstruct sight distance and where low-hanging tree or shrub branches do not hinder traffic movement.

d. All low lying plants must be kept pruned a minimum of two feet from the back of the curbline.

e. Plant wells shall be constructed by means of swales rather than through the use of berms.

C. Procedures.

1. The landscape plan and the irrigation plan, where applicable, as well as all specifications, shall conform to all applicable codes.

2. Landscaped areas in arterial and local street medians shall be subject to the approval of the traffic engineer.

3. Landscaping plans for new development shall be submitted with subdivision improvement plans.

4. For landscaping plans on existing medians, an application shall be submitted to the traffic engineer.

5. After approval of the plans by the traffic engineer, as provided for above, landscaping projects proposed by private groups or individuals shall be submitted to the city council for authorization to proceed with the project. Such authorization, if granted, shall be subject to a contract between the city and the private group or individual, setting forth the responsibilities of the group or individual. The proposed contract as approved by city council may provide that the traffic engineer will be authorized to approve additional landscaping projects proposed by the named private group or individual. (Ord. 13062 § 14, 1997; Ord. 13030, 1996: Ord. 8132, 1984: prior code § 20-157.5.1)

12.68.070 Violation—Penalty.

Any person violating this article shall be deemed guilty of a misdemeanor and punished as provided in Section 12.84.010. (Prior code § 20-157.6)

Chapter 12.72

RAILROAD TRAINS

Sections:

12.72.010 Headlight and signal requirements.

12.72.020 Operation within designated areas restricted.

12.72.030 Operation on approach of emergency vehicles.

12.72.010 Headlight and signal requirements.

No person shall cause, permit or suffer any railroad locomotive or train to run or move in the nighttime within the city without having a headlight, or cause, permit or suffer any railroad locomotive or train to run at any time without causing the proper signals to be given. (Prior code § 20-155)

12.72.020 Operation within designated areas restricted.

A. No person shall operate any railroad car or locomotive in or across Sunset Drive or Country Club Road, where the streets intersect the right-of-way of the Atchison, Topeka and Santa Fe Railroad, at a speed greater than thirty miles per hour.

B. No person shall operate any railroad car or locomotive on any part of the right-of-way of said railroad between Sunset Drive and Country Club Road at a speed greater than thirty miles per hour.

C. No person shall operate any railroad car or locomotive in or across Doniphan Drive on the spur track authorized by Ordinance No. 3439 at a speed greater than ten miles an hour.

D. No person shall operate any railroad car or locomotive in or across Doniphan Drive on said spur track between the hours of seven-thirty a.m. and eight-thirty a.m., nor between the hours of two-thirty p.m. and four p.m., on any week day, Monday through Friday.

E. Any person violating this section shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030. (Prior code § 20-148)

12.72.030 Operation on approach of emergency vehicles.

All persons in charge of railroad trains, shall immediately upon the sounding of a fire alarm, or upon the approach of an authorized emergency vehicle cause such trains to leave all street crossings clear, and to keep such street crossings clear of such trains until such emergency vehicle shall have cleared such crossings. (Prior code § 20-147)

Chapter 12.76

BICYCLES

Sections:

12.76.010 Applicability of traffic laws.

12.76.020 Applicability of traffic laws to pedal cars and unicycles.

12.76.030 Obedience to traffic-control devices.

12.76.040 Equipment.

12.76.050 Speed.

12.76.060 Carrying articles.

12.76.070 Riding on right side of street.

12.76.090 Leaving on sidewalk.

12.76.100 Riding abreast.

12.76.110 Number of persons riding.

12.76.120 Use of parking meters.

12.76.130 Taking without owner's permission.

12.76.140 Seizure of bicycles.

12.76.150 Purpose of seizure.

12.76.160 Effect of regulations.

12.76.170 Violation—Penalty.

12.76.010 Applicability of traffic laws.

Every person riding a bicycle upon a roadway shall be granted all of the rights and shall be subject to all of the duties applicable to the driver of a vehicle, except as to special regulations in this chapter and except as to those provisions of laws and ordinances which by their nature can have no application. (Prior code § 20-115)

12.76.020 Applicability of traffic laws to pedal cars and unicycles.

Every person riding in, upon, or transported by any device having one wheel and propelled by human power, or any device having three or more wheels and propelled by human power through a belt, chain or gears, is subject to all of the duties applicable to the driver of a vehicle or operator of a bicycle, except as to those provisions of laws and ordinances which by their nature can have no application. (Prior code § 20-115.2)

12.76.030 Obedience to traffic-control devices.

Any person operating a bicycle shall obey the instructions of official traffic-control signals, signs or other traffic-control devices applicable to vehicles, unless otherwise directed by a police officer. (Prior code § 20-116)

12.76.040 Equipment.

A. Every bicycle when in use at nighttime shall be equipped with a lamp on the front which shall emit a white light visible from a distance of at least five hundred feet to the front and with a red reflector on the rear of a type which shall be visible from all distances from fifty feet to three hundred feet to the rear when directly in front of lawful upper beams of headlamps on a motor vehicle. A lamp emitting a red light visible from a distance of five hundred feet to the rear may be used in lieu of the red reflector.

B. No bicycle shall be equipped with a red lamp or a red reflector which is visible from directly in front of the bicycle. No bicycle shall be equipped with, nor shall any person use upon a bicycle, any siren or whistle.

C. Every bicycle shall be equipped with a brake which will enable the operator to make the braked wheel skid on dry, level, clean pavement. (Prior code § 20-117)

12.76.050 Speed.

No person shall operate a bicycle at a greater rate of speed than that speed limit which is established for motor vehicles traveling on the same street or highway, and in no case shall any person operate a bicycle at a greater rate of speed than that at which a person of ordinary prudence would operate such bicycle under the same or similar circumstances. (Prior code § 20-118)

12.76.060 Carrying articles.

No person operating a bicycle shall carry any package, bundle or article which prevents the driver

from keeping at least one hand upon the handlebars. (Prior code § 20-118.1)

12.76.070 Riding on right side of street.

Every person operating a bicycle upon a street or highway shall ride as near to the right side of the roadway as practical, exercising due care when passing a standing vehicle or one proceeding in the same direction. (Prior code § 20-119)

12.76.090 Leaving on sidewalk.

No person shall leave a bicycle upon any public sidewalk unless such bicycle is securely supported in an erect position and so placed as not to obstruct the sidewalk or constitute a hazard to persons using the sidewalk; and no person shall leave a bicycle unattended in front of any theater. Any bicycle parked in violation of this section shall be deemed a nuisance, which may be abated by impounding the bicycle by the police department pending trial. (Prior code § 20-123)

12.76.100 Riding abreast.

A. Persons riding bicycles upon a street or highway shall not ride more than two abreast except on paths or parts of a roadway set aside for the exclusive use of bicycles.

B. Wherever a usable path for bicycles has been provided adjacent to a street or highway, bicycle riders shall use such path and shall not use the street or highway. (Prior code § 20-120)

12.76.110 Number of persons riding.

A. A person propelling a bicycle shall not ride other than upon or astride a permanent and regular seat attached thereto.

B. No bicycle shall be used to carry more persons at one time than the number for which it is designed and equipped. (Prior code § 20-121)

12.76.120 Use of parking meters.

Any person leaving a bicycle off the sidewalk and in a parking meter space shall pay the fee required of motor vehicles for the use of such space. (Prior code § 20-124)

12.76.130 Taking without owner's permission.

Any person taking a bicycle for the purpose of riding the same without the consent of the owner or person entitled to possession, thereof, under circumstances not constituting the crime of theft, shall be deemed guilty of a misdemeanor and punished as provided in Section 12.84.010. (Prior code § 20-125)

12.76.140 Seizure of bicycles.

Any bicycle found in the possession of any person who fails or refuses to show a right to be in possession thereof, may be seized by any police officer without warrant and delivered to the police department, to be held until the person lawfully entitled to possession of the same can be ascertained. The municipal court, in connection with any proceeding pending before it and within its jurisdiction, may make such orders as may be just with reference to the possession of any bicycle or bicycle part or accessory which may have been seized hereunder. (Prior code § 20-127)

12.76.150 Purpose of seizure.

The purpose of Section 12.76.140 is to prevent thefts of bicycles and bicycle parts and accessories and to facilitate the recovery of the same when lost or stolen, and such section shall be liberally construed to effectuate such purpose. (Prior code § 20-128)

12.76.160 Effect of regulations.

A. It is a misdemeanor for any person to do any act forbidden or fail to perform any act required in this chapter.

B. The parent of any child and the guardian of any ward shall not authorize or knowingly permit any such child or ward to violate any of the provisions of this chapter.

C. These regulations applicable to bicycles shall apply whenever a bicycle is operated upon any street or highway or upon any path set aside for the exclusive use of bicycles subject to those exceptions stated herein. (Prior code § 20-115.1)

12.76.170 Violation—Penalty.

Any person who shall operate or ride a bicycle on any street, alley, highway, public square, or public park in the city in violation of this chapter, or who shall otherwise violate this chapter within the city, shall be deemed guilty of a misdemeanor and punished as provided in this section. In lieu of imposing a fine the judge may, in his discretion, if the owner of the bicycle consents thereto, impound the bicycle for any definite period of time. If the owner of the bicycle is a minor the bicycle shall not be impounded without the consent of his parent, guardian, or person standing in loco parentis. (Prior code § 20-129)

Chapter 12.77

GOLF CARTS FOR HOLIDAY PARCEL DELIVERY

Sections:

12.77.010 Definitions.

12.77.020 Operation of a golf cart.

12.77.030 Liability.

12.77.040 Offense.

12.77.010 Definitions.

For purposes of this chapter, the following terms have these defined meanings.

A. "Authorized operator" means a person that uses a golf cart for the purpose of delivering parcels while in the course of employment with an entity whose primary business is the delivery of parcels.

B. "Golf cart" means a motor vehicle that has no less than three wheels, has a maximum speed between fifteen and twenty-five mph, and may be modified for parcel delivery.

C. "Motor vehicle" means a vehicle that is self-propelled.

D. "Public highway" means a road, street, way, thoroughfare, or bridge:

1. That is in the State;

2. That is for the use of vehicles;

3. That is not privately owned or controlled; and

4. Over which the State has legislative jurisdiction under its police power.

E. "Slow moving emblem" shall have the meaning assigned by Section 547.001(8) of the Texas Transportation Code and shall mean:

1. A triangular emblem that has a reflective surface designed to be clearly visible during daytime at a distance of at least five hundred feet; and

2. Is displayed in accordance with Section 547.703 of the Texas Transportation Code, requiring that such emblem be mounted base down on the rear of the motor vehicle at a height from three to five feet above the road surface.

F. "Winter holiday season" shall mean the period of time starting November first (1st) and ending January fifth (5th) of each year.

(Ord. No. 18099, § 1, 12-3-2013)

12.77.020 Operation of a golf cart.

During the winter holiday season, an authorized driver may operate a golf cart on a public highway, in the corporate boundaries of the City, for which the posted speed limit is not more than thirty-five miles per hour, if each of the following requirements are met:

A. A golf cart operated must have the following equipment:

1. Headlamps;

2. Taillamps;

3. Reflectors;

4. Parking brake;

5. Mirrors; and

B. A golf cart is required to display a slow-moving-vehicle emblem when it is operated on a public highway, as required by Sections 547.703(a) and (d) of the Texas Transportation Code; and

C. The authorized operator of a golf cart must:

1. Possess a valid driver's license that authorizes operation of a motor vehicle on public highways;

2. Carry evidence of financial responsibility consistent with Section 601.051 of the Texas Transportation Code, as amended, for operation of motor vehicles; and

3. Obey all state and local traffic laws.

(Ord. No. 18099, § 1, 12-3-2013)

12.77.030 Liability.

Nothing in this chapter shall be construed as an assumption of liability by the city for any damages (personal injury, property damage or otherwise) which may result from the operation of a golf cart authorized by this chapter. The authorized operator of a golf cart is responsible for the safe operation of a golf cart allowed under this chapter.

(Ord. No. 18099, § 1, 12-3-2013)

12.77.040 Offense.

Any person who operates a golf cart in violation of any provision or requirements of this chapter shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a fine of not less than $50.00 or more than $500.00. Each violation of this chapter is a separate offense.
(Ord. No. 18099, § 1, 12-3-2013)

Chapter 12.78

INTERNATIONAL BRIDGES

Sections:

12.78.010 Tolls for international bridges.

12.78.020 Toll collection for pickup trucks or any other vehicle.

12.78.030 No fee days.

12.78.010 Tolls for international bridges.

The following tolls shall apply to southbound traffic on Santa Fe (Paso del Norte) International Bridge, Stanton Street (Friendship) International Bridge and Zaragoza International Bridges, in the amounts identified in the adopted budget resolution for the current fiscal year or by other appropriately adopted resolution by the city council:

A. Pedestrians, three years and older;

B. Bicycles;

C. Motorcycles;

D. Automobiles, pickup trucks (up to one-ton carrying capacity), panel trucks, vans, recreational trailers, in the amount set per vehicle;

E. Commercial trucks, buses (a motor vehicle used to transport persons and designed to accommodate more than ten passengers, including the operator), motor homes, tractors, commercial towed trailers, in the amount set per axle.

F. Currency exchange rate adjustment. Notwithstanding anything in this section to the contrary, the rate of exchange of all bridge tolls shall be adjusted monthly to the next highest, whole denomination of currency of the country of Mexico, the peso, so as to equal, at the minimum: for subsection A. of this section, the amount set per person; subsection B. of this section, the amount set per bicycle; subsection C. of this section, the amount set per motorcycle; subsection D. of this section, the amount set per vehicle; and subsection E. of this section, the amount set per axle.

G. Currency exchange. On a regular basis, but not less than weekly, the total foreign currency held by the City of El Paso in its international bridges department shall be exchanged for United States currency with one of the exchange businesses in El Paso at the best available rate based on bids received. (Ord. 16970 § 1, 2008; Ord. 15656 § 1, 2003: Ord. 13791 § 1, 1998; Ord. 12108, 1994: Ord. 11166 § 1, 1992; Ord. 10821 § 1, 1991: Ord. 10193 § 3, 1990)

(Ord. 17176, § 1, 8-18-2009; Ord. No. 019546, § 1, 10-10-2023)

12.78.020 Toll collection for pickup trucks or any other vehicle.

A. The driver of a pickup truck with a maximum carrying capacity of one ton shall pay the pickup truck toll.

B. The driver of a pickup truck with a maximum carrying capacity exceeding one ton shall pay the commercial truck toll.

C. The driver of any pickup truck, or any other vehicle using the Zaragoza Commercial Bridge shall pay the commercial truck toll. The driver of any pickup truck, or any other vehicle rejected by Mexico shall not be entitled to a refund of the toll that was paid. (Ord. 10821 § 2, 1991; Ord. 10193 § 5, 1990)

(Ord. No. 019546, § 2, 10-10-2023)

12.78.030 No fee days.

A. Fees. Fees for use of the international bridges shall be in the amounts set forth in the budget resolution of the city council or as established by the director, except that the city council is authorizing up to seven no fee days per calendar year for pedestrians with the specific dates to be determined by the director of the international bridges department after consultation with the El Paso Downtown Management District. Such determination by the director shall comply with the following guidelines and criteria:

1. To promote increased attendance at events, programs and activities in the city;

2. To honor recognized holidays;

3. To enhance commercial opportunities; or

4. When otherwise appropriate to create good will in the community.

(Ord. 17176, § 2, 8-18-2009)

Chapter 12.80

MISCELLANEOUS TRAFFIC REGULATIONS

Sections:

12.80.010 Special restrictions on lamps.

12.80.020 Dim lights required.

12.80.030 Coasters, roller skates and similar devices—Use restrictions.

12.80.040 Following fire apparatus.

12.80.050 Crossing fire hose.

12.80.060 Processions—Driving through.

12.80.070 Funeral processions—Identification.

12.80.080 Funeral processions—Driving in.

12.80.090 Driving on sidewalks.

12.80.100 Backing—Limitations.

12.80.110 Riding on motorcycle.

12.80.120 Clinging to vehicles.

12.80.130 Controlled-access roadways—Use of exits and entrances.

12.80.140 Opening vehicle doors into streets.

12.80.150 Storing vehicles in streets.

12.80.160 Negligent collision.

12.80.170 Signalling change of course of direction or stopping.

12.80.180 Boarding or alighting while streetcar or vehicle in motion.

12.80.190 Unlawful riding.

12.80.200 Blocking streets by streetcars and railroad trains.

12.80.210 Streetcar stops.

12.80.220 Vulnerable road users.

12.80.230 Removing or defacing signs.

12.80.010 Special restrictions on lamps.

Unless otherwise provided by law, the color of lamps, illumination devices and reflectors upon any vehicle, equipment or any device moved by human power upon the streets or highways within the city limits shall be as follows:

A. Front clearance lamps, identification lamps and those marker lamps and reflectors mounted on the front or on the side near the front of a vehicle shall display or reflect an amber color. No lamp, illumination device, or reflector, whether lighted or unlighted, which is visible from the front of any vehicle, equipment or device moved by human power shall be red in color unless expressly authorized or required by law.

B. Rear clearance lamps, identification lamps and those marker lamps and reflectors mounted on the rear or the sides near the rear of a vehicle shall display or reflect a red color.

C. All illumination devices and reflectors mounted on the rear of any vehicle shall display or reflect a red color, except the stop light or other signal device, which may be red, amber, or yellow, and except that light illuminating the license plate which shall be white and the light emitted by a backup lamp which shall be white or amber.

D. Subsections A, B and C of this section apply to the color of the lamp whether lighted or unlighted, and to any reflector exhibiting or reflecting perceptible light, except the stop light or other signal device, and the turn signal lamp visible to the rear which may be white, when unlighted. (Prior code § 20-16.1)

12.80.020 Dim lights required.

A. No person shall drive a motor vehicle on any street or alley in the city with a light or lights of such intensity and direction as to impair the vision for driving purposes of another person driving a vehicle.

B. When a motor vehicle is equipped with a device for raising and lowering or for dimming the headlight beams, no person shall drive such vehicle on any street or alley in the city without lowering or dimming the headlight beams. (Prior code § 20-176)

12.80.030 Coasters, roller skates and similar devices—Use restrictions.

A. No person upon roller skates, skateboard, or riding in or by means of any coaster, toy vehicle, razor scooters, or similar roller devices, shall go upon any roadway, except while crossing a street on a crosswalk, subject to the duties applicable to pedestrians, and in compliance with all laws that apply to pedestrians.

B. Any person may ride any roller device including, but not limited to, the sidewalks, public rights-of-way, parking lots, walkways and ramps, provided that such device is ridden when used to provide transportation and with due regard to the safety of pedestrians. When in close proximity to pedestrians, riders must yield to or stop for pedestrians, and walk and carry, or otherwise maintain possession of, the devices without using them for transportation purposes.

C. Riders are specifically prohibited from riding, or attempting to ride, the devices on any structure or surface not intended for pedestrian or vehicular traffic. Riders of said devices are prohibited from riding or attempting to ride on handrails, guardrails, planters, decorative structures, fountains, walls, windows, buildings, or any other structure or surface that is not intended for pedestrian or vehicular traffic.

D. This section shall not apply to any person using roller skates, skateboards, or riding in or by means of any coaster, toy vehicle, or similar device with the permission of the property owner.

E. Any person violating any provision of this section shall be deemed guilty of a Class C misdemeanor and shall be punished in accordance with Chapter 1.08 of the Code. (Prior code § 20-18; Ord. 13787 § 1, 1998; Ord. No. 18567, § 1, 9-6-2016)

12.80.040 Following fire apparatus.

The driver of any vehicle other than one on official business shall not follow any fire apparatus traveling in response to a fire alarm closer than five hundred feet or drive into or park such vehicle within the block where fire apparatus has stopped in answer to a fire alarm. (Prior code § 20-158)

12.80.050 Crossing fire hose.

No streetcar or vehicle shall be driven over any unprotected hose of a fire department when laid down on any street, private driveway or streetcar track, to be used at any fire or alarm of fire, without the consent of the fire department official in command, or duly authorized police officer. (Prior code 20-159)

12.80.060 Processions—Driving through.

No driver of a vehicle or motorman of a streetcar shall drive between the vehicles comprising a funeral or other authorized procession while such processions are in motion and when such vehicles are conspicuously designated as required in this title. This provision shall not apply at intersections where traffic is controlled by traffic-control signals or police officers. (Prior code § 20-160)

12.80.070 Funeral processions—Identification.

Every vehicle in a funeral procession shall be identified by displaying lighted headlamps throughout the entire period of such procession. (Prior code § 20-161)

12.80.080 Funeral processions—Driving in.

Each driver in a funeral or other procession shall drive as near to the right-hand edge of the roadway as practical and shall follow the vehicle ahead as close as is practical and safe. (Prior code § 20-162)

12.80.090 Driving on sidewalks.

The driver of a vehicle shall not drive within any sidewalk area except at a permanent or temporary driveway. This prohibition does not apply to the driving of a motor assisted scooter as defined in this Title. (Prior code § 20-163)
(Ord. No. 18898, § 2, 1-8-2019)

12.80.100 Backing—Limitations.

The driver of a vehicle shall not back the same unless such movement can be made with reason-

able safety and without interfering with other traffic. (Prior code § 20-164)

12.80.110 Riding on motorcycle.

A person operating a motorcycle shall ride only upon the permanent and regular seat attached thereto, and such operator shall not carry any other person nor shall any other person ride on a motorcycle unless such motorcycle is designed to carry more than one person, in which event a passenger may ride upon the permanent and regular seat if designed for two persons, or upon another seat firmly attached to the rear or side of the operator. (Prior code § 20-165)

12.80.120 Clinging to vehicles.

No person riding upon any bicycle, coaster, roller skates, sled or toy vehicle shall attach the same or himself to any streetcar or vehicle upon a roadway. (Prior code § 20-166)

12.80.130 Controlled-access roadways—Use of exits and entrances.

No person shall drive a vehicle onto or from any controlled access roadway except at such entrances and exits as are established by the city. (Prior code § 20-167)

12.80.140 Opening vehicle doors into streets.

It is unlawful for any person to open the door of any vehicle so that the door projects into the street, unless the same can be done in safety and without interfering with traffic thereon. (Prior code § 20-168)

12.80.150 Storing vehicles in streets.

A. It is unlawful for the person in charge of any vehicle to store such vehicle upon the streets, alleys or other rights-of-way of the city. A vehicle is presumed stored if it has remained parked upon any street, alley or other right-of-way at or near the same location for a continuous period of time in excess of five days. Members of the police department and authorized employees operating city towing equipment are authorized to remove and impound any vehicle stored in violation of this section.

B. When a vehicle is removed or impounded under the authority of this section, the vehicle shall be removed or impounded in accordance with the provisions of Section 12.08.220 of this code. A person whose vehicle has been removed or impounded under authority of this section may request a hearing as provided in Section 12.08.220 of this code. (Ord. 12330 § 1, 1995: Ord 8438, 1985: prior code § 20-169)

12.80.160 Negligent collision.

A. No person while driving or in charge of any vehicle shall wilfully or with negligence cause or permit such vehicle to come into collision with any other vehicle or with any animal, person or property on any public street.

B. Proof of a collision shall be prima facie evidence of the driver's negligence, and proof of no intent to injure shall be no defense to a charge of negligent collision. (Prior code § 20-170)

12.80.170 Signalling change of course of direction or stopping.

The driver of any vehicle upon any public highway before turning, stopping or changing course of direction of such vehicle shall give a plainly visible signal of his intentions so to turn, stop or change such course, and shall not then so turn, stop, or change such course unless such movement can be made in safety. The change of course mentioned in this section shall include any driver leaving the curb from a parked position. (Prior code § 20-171)

12.80.180 Boarding or alighting while streetcar or vehicle in motion.

No person shall board or alight from any streetcar or vehicle while such streetcar or vehicle is in motion. (Prior code § 20-172)

12.80.190 Unlawful riding.

No person shall ride on any streetcar or vehicle upon any portion thereof not designated or

intended for the use of passengers. This provision shall not apply to any employee engaged in the necessary discharge of a duty, or to persons riding within truck bodies in space intended for merchandise. (Prior code § 20-173)

12.80.200 Blocking streets by streetcars and railroad trains.

A. It is unlawful for the operator of any railroad train or streetcar to operate or to direct the operation of the same in such a manner as to prevent the use of any street for purposes of travel for a period of time longer than five minutes, except that this provision shall not apply to trains or cars in motion other than those engaged in switching.

B. It is unlawful for any streetcar to stop within an intersection or on a crosswalk for the purpose of receiving or discharging passengers. (Prior code § 20-174)

12.80.210 Streetcar stops.

A. Authority is vested in the traffic engineer to designate streetcar stops at such locations and in such number as may be necessary for public safety and convenience. Every such streetcar stop shall be designated by appropriate signs.

B. The operator of a streetcar shall not stop such streetcar at any place for the purpose of taking on or discharging passengers other than at a streetcar stop so designated as provided herein, except in case of emergency.

C. No person shall stop, stand or park a vehicle at an authorized streetcar stop so designated as provided herein, or between the right curb and any such stop, except that the operator of a passenger vehicle may temporarily stop thereat for the purpose of and while actually engaged in the discharge of passengers or the pickup of passengers then in readiness at the curb. (Prior code § 20-175)

12.80.220 Vulnerable road users.

A. In this section, a vulnerable road user means:

1. A pedestrian, including a runner, physically disabled person, highway construction and maintenance worker, tow truck operator, utility worker, other worker with legitimate business in or near the road or right-of-way, or stranded motorist or passenger;

2. A person on horseback; or

3. A person operating equipment other than a motor vehicle, including, but not limited to, a bicycle, handcycle, horse-driven conveyance, or unprotected farm equipment.

B. An operator of a motor vehicle passing a vulnerable road user operating on a highway or street shall:

1. Vacate the lane in which the vulnerable road user is located if the highway or street has two or more marked lanes running in the same direction; or

2. Pass the vulnerable road user at a safe distance.

C. For the purpose of subsection B.2., when road conditions allow, safe distance is at least:

1. Three feet if the operator's vehicle is a passenger car or light truck; or

2. Six feet if the operator's vehicle is a truck, other than a light truck, or a commercial motor vehicle as defined by Texas Transportation Code Section 522.003.

D. An operator of a motor vehicle that is making a left turn at an intersection, including an intersection with an alley or private road or driveway, shall yield the right-of-way to a vulnerable road user who is approaching from the opposite direction and is in the intersection, or is in such proximity to the intersection as to be an immediate hazard.

E. An operator of a motor vehicle may not overtake a vulnerable road user traveling in the same direction and subsequently make a right-hand turn in front of the vulnerable road user unless the operator is safely clear of the vulnerable road user, taking into account the speed at which the vulnerable road user is traveling and the braking requirements of the motor vehicle making the right-hand turn.

F. An operator of a motor vehicle may not maneuver the vehicle in a manner that:

1. Is intended to cause intimidation or harassment to a vulnerable road user; or

2. Threatens a vulnerable road user.

G. An operator of a motor vehicle shall exercise due care to avoid colliding with any vulnerable road user on a roadway or in an intersection of roadways.

H. It is an affirmative defense to prosecution under this section that at the time of the offense the vulnerable road user was acting in violation of the law.

(Ord. No. 17466, § 1, 12-7-2010)

12.80.230 Removing or defacing signs.

A. It shall be unlawful to remove or deface any sign erected or installed for the regulation of stopping, standing and parking as are required or authorized under Titles 12 and 14 of this Code.

B. It shall be unlawful to move, alter or relocate any portable sign or parking meter cover placed in accordance with Titles 12 and 14 of this Code.

C. This section shall not apply to the city manager and his designees in the performance of their official duties to install, remove and repair signs, and to persons authorized by the city to install or remove parking meter covers.

(Ord. No. 17690, § 25, 12-6-2011)

Chapter 12.84

PENALTY

Sections:

12.84.010 Violation—Penalty.

12.84.010 Violation—Penalty.

A. A violation of a provision of Chapters 12.44, except for Sections 12.44.260 and 12.44.270, 12.48, 12.52 and Sections 12.56.030 and 12.56.040 of this Code governing the stopping, standing or parking of a vehicle, or a violation of any stopping, standing or parking designation, regulation or restriction established as authorized by said chapters, is a civil offense; provided that the penalties for a violation of Section 12.44.280 shall be as set forth in subsection 12.44.280 R. Such civil violations are subject to the administrative adjudication process as provided in Chapter 12.85 of this Code.

B. Any person violating any provision of this title, other than a provision of Chapters 12.44, except for Sections 12.44.260 and 12.44.270, 12.48, 12.52 and Sections 12.56.030 and 12.56.040 of this Code governing the stopping, standing or parking of a vehicle, shall be deemed guilty of a misdemeanor and be punished by a fine not exceeding five hundred dollars; provided, if any provision of this title is substantially the same as one set forth in any statute of this state, and a different penalty therefor is provided by state law, the penalty provided by this title for violation of such provision shall be the same as that provided by the state law; and provided further that the penalties for a violation of Section 12.44.280 shall be as set forth in subsection 12.44.280 R.

C. For violations under this title that are of a continuing nature, each day that the violation shall continue shall constitute a separate offense, except that continuing violations of Section 12.56.040 relating to time limits for parking in metered parking spaces, and continuing violations of Section 12.52.050 relating to time limits for parking as established by code schedule when signs are erected, shall constitute a separate offense for each segment of maximum parking time as allowed and stated on the meter or sign. (Ord. 11051 (part), 1992; Ord. 10971 § 7, 1992; Ord. 9430 § 6, 1988: prior code § 20-26)
(Ord. No. 17690, § 26, 12-6-2011)

Chapter 12.85

PARKING VIOLATIONS BUREAU

Sections:

12.85.010 Parking violations division established.
12.85.020 Hearing officers.
12.85.030 Parking citations.
12.85.040 Presumption of ownership.
12.85.050 Hearings.
12.85.055 Defense.
12.85.060 Appeal.
12.85.065 Final judgments.
12.85.070 Enforcement.
12.85.080 Procedures for immobilization or impoundment.
12.85.090 Boot removal.
12.85.100 Boot hearing.
12.85.110 Fines and fees.
12.85.120 Certain conduct unlawful.

12.85.010 Parking violations division established.

There is created a parking violations division within the El Paso Municipal Courts of Record, hereinafter referred to as the municipal courts, which shall have original jurisdiction over cases involving violations of city ordinances and regulations and restrictions established pursuant thereto relating to the stopping, standing or parking of vehicles as contained in Titles 12 and 14 of this Code. The administrative adjudication of violations under this chapter is civil in nature. (Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)
(Ord. No. 17690, § 27, 12-6-2011; Ord. No. 019532, § 1, 8-15-2023)

12.85.020 Hearing officers.

A. The parking violations division shall have one or more municipal associate judges who are employed in the position of municipal court hearing officer or are otherwise assigned the duties and responsibilities of such position. A substitute associate municipal judge may substitute as a hearing officer when needed.

B. Municipal associate judges shall have the authority to administer oaths and to issue orders compelling the attendance of witnesses and the production of documents.

C. An order compelling the attendance of witnesses or the production of documents may be enforced by the municipal courts. (Ord. 16872 § 1, 2008; Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)
(Ord. No. 019532, § 2, 8-15-2023; Ord. No. 019644, § 1, 6-11-2024)

12.85.030 Parking citations.

A. The administrative adjudication process for parking, standing and stopping violations shall be initiated by the issuance of a parking citation which may be issued by a peace officer or other authorized parking enforcement agent.

B. Authorized parking enforcement agents are designated as follows:

1. The city employees designated by the city manager or the chief of police to include but not be limited to the city's parking and traffic controllers, parking enforcement controllers, and the employees assigned to the code enforcement division.

2. Security guards employed under contract with the city to provide security at the El Paso Zoo only for stopping, standing and parking violations that occur on:

a. The premises and perimeter of the El Paso Zoo, including parking lots within the boundary of East Paisano Street, Gateway North Boulevard and Franklin Canal, and the parking lot accessed from Dunne Street;

b. North side of East Paisano Street from Washington Street to Gateway North Boulevard; and

c. East side of Gateway North Boulevard from East Paisano Street to Franklin Canal.

3. The head of security and his security supervisors of University Medical Center only for

stopping, standing and parking violations that occur on the premises of University Medical Center.

4. Disabled-parking enforcement volunteers as provided in Section 12.08.230 of this Code.

5. The director of the convention and visitor's division (civic center) and his designees only for stopping, standing and parking violations that occur on the parking lots and facilities located at the Civic Center Plaza.

6. The director of the mass transit department and his designees, to include but not be limited to security guards employed under contract with the city, only for stopping, standing and parking violations that occur on the parking lots and facilities operated by the mass transit department, and for violations of Sections 12.48.050 and 12.48.060 of this Code.

7. The commissioned law enforcement personnel hired by independent school districts that have schools within the El Paso city limit, who agree to abide by the requirements of this chapter and any other relevant obligations through an interlocal agreement. Citations must be issued within the city limit.

C. The citation shall provide that the person charged with a parking, standing or stopping offense shall have the right to an instanter hearing for the purpose of determining the issue of liability for the charged offense. Such right to a hearing shall be exercised by appearing in person before a municipal associate judge within fourteen days from the date of the citation on a day of the week established by the municipal court for the routine operation of the courts. During such times that Monday through Thursday are established as the court's operation days and the court is open, hearings will be held between the hours of 7:30 a.m. to 12:45 p.m. and 2:00 p.m. to 5:45 p.m. During such times that Monday through Friday are established as the court's operation days and the court is open, hearings will be held between the hours of 8:30 a.m. to 12:45 p.m. and 2:00 p.m. to 5:15 p.m. The municipal clerk shall post the schedule of days of operation at the court and on the city's website.

D. The original or any copy of the citation is a record kept in the ordinary course of business in the city and is rebuttable proof of the facts it contains. (Ord. 11821 § 1, 1994; Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)
(Ord. No. 17690, § 28, 12-6-2011; Ord. No. 019532, § 3, 8-15-2023; Ord. No. 019644, § 2, 6-11-2024)

12.85.040 Presumption of ownership.

A. It is presumed that the registered owner of the motor vehicle that is the subject of the administrative hearing is the person who parked or stopped the vehicle at the time and place of the offense charged.

B. The Texas Department of Transportation computer-generated record of the registered vehicle is prima facie evidence of its contents in any administrative adjudication hearing under this chapter. (Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)

12.85.050 Hearings.

A. At the hearing before the municipal associate judge, the defendant may either admit, admit with explanation, or deny the alleged infraction.

B. The issuing peace officer or other authorized parking enforcement agent shall not be required to attend the hearing.

C. It is not required that the city be represented by counsel at the hearing; provided, however, that if the defendant is represented by counsel at the hearing, the municipal associate judge shall notify the municipal court clerk, who shall have the right to arrange for the city to be represented by an assistant city attorney.

D. Neither a complaint nor any other charging instrument is required. The municipal associate judge shall examine the contents of the citation and the evidence related to ownership of the vehicle in question, and shall hear and review the testimony and evidence presented by the defendant. The formal rule of evidence do not apply to a hearing under this section, and the municipal associate judge shall make his decision based upon a preponderance of the evidence presented at the

hearing, after giving due weight to all presumptions and prima facie evidence established by this chapter or other applicable law.

E. At the conclusion of the hearing, the municipal associate judge shall issue an order stating whether or not the person charged is liable for violation of the parking or stopping ordinance and the amount of the fine, costs or fees assessed against him. The order shall be filed with the municipal court clerk. All such orders shall be kept in a separate index or file by the municipal court clerk using appropriate data processing techniques.

F. Failure of a person charged with the offense to appear at a hearing within the aforesaid fourteen-day period shall be considered an admission of liability for the charged offense.

G. In accordance with Article 102.014(b), Texas Code of Criminal Procedure, a municipal associate judge shall impose a court cost of two dollars on each parking violation in which a fine, costs or fee is paid or assessed. This court cost may be enforced in the manner set forth in Section 12.85.070. (Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)
(Ord. No. 019644, § 3, 6-11-2024)

12.85.055 Defense.

It is a defense to a stopping and parking violation if the registered owner of the vehicle (that is the subject of a administrative hearing) establishes by a preponderance of the evidence that an unauthorized person stopped or parked said vehicle at the time and place of the offense charged. (Ord. 11821 § 2, 1994)

12.85.060 Appeal.

A. A person determined by the municipal associate judge to be in violation of a parking or stopping ordinance may appeal this determination to the El Paso Municipal Court of Appeals.

B. The appeal is initiated by filing, not later than the thirtieth day after the filing of the municipal associate judge's order, a petition with the clerk of the court along with payment of the costs required by law for the municipal court. Additionally, a filing fee in the amount of ten dollars must be paid at the time the petition is filed. This ten-dollar filing fee will be refunded in the event the municipal associate judge's order is reversed by the El Paso Municipal Court of Appeals.

C. After filing a petition of appeal, the municipal court clerk shall schedule a hearing and notify all parties of the date, time and place of the hearing.

D. The appeal hearing must be before the El Paso Municipal Court of Appeals and is a civil proceeding for the purpose of affirming or reversing the municipal associate judge's order based upon a review of a record of the evidence presented to the municipal associate judge. The El Paso Municipal Court of Appeals shall affirm the municipal associate judge's order if there is substantial evidence in the record to support the order. The decision of the El Paso Municipal Court of Appeals is final.

E. The filing of an appeal under this section does not stay the enforcement and collection of the judgment unless the person who files the appeal posts a cash bond before filing notice of appeal with the municipal court clerk. The cash bond shall be in the amount of all fines, costs and fees assessed by the municipal associate judge. (Ord. 11821 § 3, 1994; Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)
(Ord. No. 019644, § 4, 6-11-2024)

12.85.065 Final judgments.

A. Any of the following shall constitute a final judgment for purposes of this chapter:

1. A citation for a violation regarding the stopping, standing or parking of a vehicle as set forth in Section 12.84.010 A. of this Code, upon the passage of thirty days from the time of issuance of the citation, without the person charged having exercised the right to a hearing under Section 12.85.030 C. and without said fine having been paid;

2. A municipal associate judge's order finding a person to be in violation of a provision of

this code regarding the stopping, standing or parking of a vehicle as set forth in Section 12.84.010.A of this Code, upon the passage of thirty days from the filing of the municipal associate judge's order, without that person filing a petition of appeal together with all required costs and fees and without said fine having been paid; or

3. The decision of the municipal judge pursuant to Section 12.85.060 D., without said fine having been paid.

B. A final judgment under this section shall also constitute an order or constitute the imposition of a fine, cost or fee within the meaning of Section 682.010 of the Texas Transportation Code, and shall be additionally be enforceable as provided under that section.
(Ord. No. 17766, § 1, 4-10-2012; Ord. No. 019644, § 5, 6-11-2024)

12.85.070 Enforcement.

A. Any final judgment, as defined in Section 12.85.065, may be enforced by:

1. Impounding the vehicle;

2. Placing a device ("boot") that prohibits the movement of a motor vehicle on the vehicle that is the subject of the order filed;

3. An additional fine if not paid within the specified time. An additional fine of ten dollars will be assessed every thirty days until paid; provided, however, that said "additional fine" will not exceed sixty dollars. Should the city declare an amnesty period for outstanding citations, the city council, by resolution, may reduce the amount of the fine for violators who pay voluntarily within the amnesty period;

4. Denial of parking permits;

5. In the event that a vehicle has been towed to a City of El Paso impound lot, holding the vehicle until any outstanding fines, fees and costs have been paid; or

6. Refusing to allow the registration of the vehicle as provided by applicable state law.

B. Provided, however, that no vehicle shall be impounded under subsection A.1. or 6. or immobilized under subsection A.2. under this chapter unless the offender has three or more final judgments as defined in Section 12.85.065 in any calendar year. (Ord. 11821 § 4, 1994; Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)
(Ord. No. 17766, § 2, 4-10-2012)

12.85.080 Procedures for immobilization or impoundment.

A. When a vehicle is found parked, whether legally or illegally, or stopped at any time upon a public street or public property in the city, and such vehicle has met the criteria for immobilization or impoundment as provided in Section 12.85.070, any authorized parking enforcement agent of the city may immobilize the vehicle by the installation on or attachment to the vehicle of a device, or boot, designed to restrict the normal movement of the vehicle. In the alternative, or when a police officer has found a stopped vehicle meeting the criteria for immobilization or impoundment as provided in Section 12.85.070, such vehicle may be towed and impounded; provided, that the towing and impoundment is authorized at the direction of a peace officer.

B. At the time of immobilization, the authorized parking enforcement agent shall also conspicuously attach to the vehicle a written notice on a form provided by the city, the notice to contain the following information:

1. Notice that the vehicle has been immobilized pursuant to this chapter, and that attempted movement may cause damage to the vehicle;

2. That the release of the vehicle may be obtained at a designated place;

3. That there is a right to a hearing regarding the immobilization; and

4. That the vehicle may be towed and impounded after a designated period of time.

C. In the event that a vehicle is towed and impounded, the registered owner of the vehicle thereof shall be responsible for payment of all applicable fees for towing, impoundment and storage, in additions to the fines, costs and fees provided for herein. A police officer may summon a taxi or other public transportation for a person

when the vehicle he was driving or riding in has been impounded pursuant to this section. Such person shall be responsible for payment of the costs of such transportation. Any costs incurred by the city to transport such persons shall become a cost assessed on the registered owner, who shall be responsible for payment of these transportation costs. Towed vehicles that are not redeemed within the time allowed under the Texas Abandoned Motor Vehicle Act will be disposed of in accordance with that Act.

D. This section is to be cumulative of existing law, and nothing herein shall be construed to restrict or limit the right to tow and impound vehicles under other applicable law. (Ord. 12170 § 1, 1994: Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)

12.85.090 Boot removal.

The registered owner of an immobilized or impounded vehicle, or other authorized person, may secure the release of the vehicle by paying the amount of the fine, any late fees for each delinquent parking citation, the applicable boot fee, transportation costs incurred by the city, towing and storage fees. Failure to request hearing within fourteen days of such payment is an admission of liability of the citations that resulted in the vehicle being booted or impounded and constitutes a waiver of the right to contest such fines and fees. (Ord. 12170 § 2, 1994: Ord. 11821 § 5, 1994: Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)

12.85.100 Boot hearing.

A. The registered owner of an immobilized or impounded vehicle shall have the right to a prompt post-immobilization hearing ("boot hearing") before the municipal associate judge.

B. The request for a boot hearing shall be made in writing on a form supplied by the city.

C. The boot hearing shall be held within twenty-four hours following the written request therefor, excluding Saturdays, Sundays, and city holidays, at the municipal courts building, or at such other convenient and reasonable place as the municipal associate judge may direct.

D. The issue to be determined at the boot hearing is whether the immobilization was authorized by law.

E. The immobilization of a vehicle is valid if it complies with the requirements of this chapter, unless the owner of the subject vehicle can establish by a preponderance of the evidence that an unauthorized person operated such vehicle at the time and place in question.

F. The determination of the municipal associate judge at the boot hearing is final and shall not be subject to appeal. (Ord. 11821 § 6, 1994; Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)
(Ord. No. 019644, § 6, 6-11-2024)

12.85.110 Fines and fees.

A. The city council shall, by resolution, adopt a schedule of standard fines for various parking, standing and stopping offenses. Such standard fines shall be in the amount to be paid and accepted by those persons who do not desire a hearing and wish to pay the fines by mail or otherwise.

B. Any person, firm or corporation who violates any provision of this title or Title 14 of this Code related to the parking, standing or stopping of vehicles shall be fined in accordance with the schedule of standard fines adopted by resolution of city council.

C. The boot fee shall be charged in the established amount. Charges for towing or storage of impounded vehicles shall be as provided by the law applicable to abandoned vehicles.

D. All fines, costs and fees shall be deposited in the proper account of the general fund of the city, unless otherwise directed by resolution of the city council. (Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)

12.85.120 Certain conduct unlawful.

A. It is unlawful for any person, other than an officer or employee of the city acting in the

course scope of his duties under this chapter, to remove or attempt to remove or to tamper in any manner an immobilization device (boot) installed on any vehicle pursuant to this chapter.

B. It is unlawful for any person, except under the direction of a peace officer, to tow or move or cause to be towed or moved any vehicle on which a boot is then installed pursuant to this chapter from the place where it was booted.

C. It is unlawful for any person, other than an officer or employee of the city acting in the course and scope of his duties or the owner or operator of a booted vehicle, to remove or relocate any notice placed upon a booted vehicle under Section 12.85.070(A)(2).

D. Any offense under this section shall be a criminal offense punishable upon conviction by a fine not to exceed five hundred dollars. To the extent that any conduct declared to be unlawful under this section also constitutes a violation of any valid and applicable state law, then it shall be punishable as provided by state law. (Ord. 11051 (part), 1992; Ord. 10971 § 1 (part), 1992)

Chapter 12.88

SCHEDULES

Sections:

12.88.010 Schedule I—One-way streets.

12.88.020 Schedule II—Through streets.

12.88.030 Schedule III—Parking prohibited at all times on certain streets.

12.88.040 Schedule IV—Parking prohibited during certain hours on certain streets.

12.88.041 Schedule IVA—Parking prohibited during certain hours—School days only.

12.88.050 Schedule V—Stopping, standing or parking prohibited during certain hours on certain streets.

12.88.060 Schedule VI—Parking time limited on certain streets.

12.88.070 Schedule VII—Heavy hauling prohibited.

12.88.071 Schedule VIIA—Truck traffic prohibited.

12.88.072 Schedule VIIB—Heavy hauling prohibited between eight p.m. and six a.m.

12.88.080 Schedule VIII—Truck routes—General.

12.88.081 Reserved.

12.88.110 Schedule IX—Special truck routes for hazardous material-carrying vehicles.

12.88.130 Schedule XI—Parking meter zones.

12.88.140 Schedule XII—Location of traffic-control signs, signals and devices.

12.88.150 Schedule XIV—Speed limits.

12.88.160 Schedule XV—City taxicab zone.

12.88.170 Schedule XVI—Parking limited on certain streets on all days.

12.88.180 No stopping or standing—Tow-away zone.

12.88.190 No stopping or standing at any time.

12.88.200 Schedule XVII—Restrictions on parking in residential districts.

12.88.210 Schedule XVIII—Restrictions on commercial vehicle parking on residential streets.

12.88.220 Schedule XIX—Restrictions on parking in downtown parking districts.

12.88.230 Schedule XX—Parking benefit districts.

12.88.010 Schedule I—One-way streets.

In accordance with Section 12.36.020 and when properly signposted traffic shall move only in the direction indicated upon the following streets:

Name of Street	Direction of Traffic Movement
1. Kansas Street	Southbound between Schuster Avenue and East Seventh Avenue.
2. Campbell Street	Northbound between East Seventh Avenue and Schuster Avenue.
9. Myrtle Avenue	Westbound from Alameda Avenue to Stanton Street.
10. Magoffin Avenue	Eastbound from San Antonio Avenue to Alameda Avenue.
11. Rio Grande Avenue	East from Mesa Street to Cotton Street.
12. Grant Avenue	East between Cotton Street and Piedras Street.
13. Arizona Avenue	Westbound between Alabama Street and Oregon Street.

Name of Street	Direction of Traffic Movement
14. Alley west of Stanton Street	Southbound between Mills Avenue and San Antonio Avenue.
15. Alley north of Texas Street	West between Campbell Street and Kansas Street.
17. Alley north of Tularosa Avenue	East between Piedras Street and Raynor Street.
18. Alley north of Wyoming Avenue	West between Piedras Street and Birch Street.
19. Third Avenue	West between El Paso Street and Santa Fe Street.
20. Yandell Drive	West from Birch Street to Santa Fe Street.
21. Birch Street	South from Yandell Drive to Wyoming Avenue.
22. Reserved	
23. Alabama Street	North between Grant Avenue and Arizona Avenue.
24. The alley between Oregon Street and El Paso Street	Northbound between San Antonio Avenue and Sheldon Court.
25. Federal Avenue	West between Grant Avenue and Luna Street.
26. The alley west of McRae Boulevard	Northbound between Bellis and Album.
29. Gateway Boulevard East	Eastbound.
30. Gateway Boulevard West	Westbound.
31. The alley one-half block east of Campbell Street between Yandell Drive and Montana Avenue	Southbound.
33. Reserved	
34. Missouri Avenue	Westbound from Piedras Street to Coldwell Street.
35. Franklin Avenue	Eastbound from Oregon Street to Campbell Street.
36. Stanton Street	Northbound from San Antonio Avenue to Montana Avenue.
37. The alley between Myrtle Avenue and Texas Avenue and Stanton Street and Kansas Street	Northbound from Myrtle to Texas.
38. Reserved	
39. El Paso Street	Northbound from Sixth Avenue to the intersection of San Antonio Avenue.
40. Olive Street	Westbound from Palm Street to Eucalyptus Street.
41. San Antonio Avenue	Eastbound, that portion of San Antonio Avenue which lies north of the Franklin Canal between Palm Street and Eucalyptus Street.
42. Wyoming Avenue	East between Santa Fe Street and Kansas Street.
44. Raynor Street	Northbound from Gateway Boulevard East to Pershing Drive.
45. Service Road on east side of Piedras Street	Northbound from Almeda Avenue to Rosa Avenue.

Name of Street	Direction of Traffic Movement
46. Service Road on north side of Texas Avenue	Westbound from a point 22 feet west of the Piedras Street overpass structure to Poplar Street.
47. Service Road on south side of Texas Avenue	Eastbound from Poplar Street to a point 22 feet west of the Piedras overpass structure.
48. Durango Street Service Road, east	North between San Antonio Avenue and San Francisco Avenue.
49. Durango Street, service road, west	South between San Francisco Avenue and San Antonio Avenue.
50. Gateway Boulevard South	Southbound.
51. Gateway Boulevard North	Northbound.
52. Monroe Avenue	Eastbound between Piedras Street and the easternmost intersection of Monroe Avenue with Pollard Street.
53. Van Buren Avenue	Westbound between Pollard Street and Piedras Street.
54. Sheridan Road	Northbound between Apollo Avenue and the north city limits.
55. Reserved	
56. Jupiter Street	Southbound between Dyer Street and the north city limits.
57. Detour Road	Southbound on the extension of Jupiter Street between Dyer Street and its intersection with Sheridan Road near Apollo Avenue.
58. Overland Street Service Road	Eastbound from its intersection with Overland Street just east of Tornillo Street to the Cotton Street Service Road.
59. Cotton Street Service Road	Northbound from Overland Street Service Road to San Antonio Avenue.
60. Alley west of Santa Fe Street	North between Overland Avenue and San Antonio Avenue.
61. Main Drive	Westbound between Los Angeles Drive and Yandell Drive.
62. Alley between Mesa Street and Oregon Street	Southbound from Missouri Avenue to Franklin Avenue.
63. Lamar Street	Southbound between Bliss Avenue and Hueco Avenue.
64. Glenwood Street	Northbound between Webster Avenue and Gateway Boulevard East.
65. Flower Drive	Westbound between Glenwood Street and Buena Vista Street.
66. Alley west of Stanton Street	Northbound between Mills Avenue and Main Drive.
67. Estrella Street	Northbound from Alameda Avenue to Durazno Avenue.
68. San Marcial Street	Southbound between Gateway East Boulevard and Alameda Avenue.
69. Hernandez Street	Southbound between Abdou Street and Blanco Avenue.
70. Alley between North Mesa Street and North Oregon Street	Southbound between Robinson Avenue and Boston Avenue.
71. Sandoval Court	Eastbound from Candelaria Street to San Fernando Court.

Name of Street	Direction of Traffic Movement
72. The alley between Mesa Street and Stanton Street	Southbound between Texas Avenue and San Antonio Avenue.
73. The alley between Kansas Street and Campbell Street	Southbound between Overland Street and First Street.
74. Teodoso Drive	Westbound between Pendale Drive and a point 200 feet east thereof.
75. Reserved	
76. Central Avenue	Westbound between Piedras Street and Paisano Drive.
77. The alley between Harris Street and Zaragoza Road north of Alameda Avenue	Eastbound from Harris Street to Zaragoza Road.
78. Depot Street between Alameda Avenue and alley	Northbound from Alameda Avenue to alley.
79. Schutz Drive	Northbound between Alameda Avenue and Teodoso Drive.
80. Laurel Street	Southbound between Montana Avenue and Cotton Street.
81. Reserved	
82. Reserved	
83. Coldwell Street	Southbound between West Missouri Avenue and Franklin Street.
84. Dorbandt Circle	Northbound from Irwin Avenue to Davis Drive.
85. San Francisco Avenue	Eastbound from Coldwell Street to Durango Street.
86. Anthony Street	Northbound from Paisano Drive to San Francisco Avenue.
87. Reserved	
88. Rosa Avenue	Westbound from Luna Street to Cebada Street.
89. Laurel Street	North Bound between Yandell Avenue and Wyoming Avenue.
90. Cincinnati Avenue	Westbound from Stanton Street to Mesa Street.
91. Boston Avenue	Westbound from Campbell Street to Kansas Street.
92. Ladrillo Avenue	Eastbound from Hudspeth Place to Lee Street.
93. North Desert Boulevard	Northbound between Mesa Street and the north city limits.
94. South Desert Boulevard	Southbound between Mesa Street and the north city limits.
95. Alley north of Yandell Avenue	West between Piedras Street and Birch Street.
96. East First Avenue	Eastbound From Coles Street to its terminus.
97. West Main Drive	Westbound From El Paso Street to North Santa Fe Street.

(Ord. 16869 § 1, 2008; Ord. 16204 § 1, 2005; Ord. 16106 § 1, 2005; Ord. 15858 § 1, 2004; Ord. 15704 § 1, 2004; Ord. 14964 § 1, 2001; Ord. 14877 § 1, 2001; Ord. 14868 § 1, 2001; Ord. 14803 § 1, 2001; Ord. 14078 § 1, 1999; Ord. 13686 § 1, 1998; Ord. 12849 § 1, 1996; Ord. 12295, 1995; Ord. 12259, 1995; Ord. 11327 § 1, 1993; Ord. 11091 § 1, 1992; Ord. 11072 § 1, 1992; Ord. 10489 § 1, 1991; Ord. 10486 § 1, 1991; Ord. 10307 § 1, 1990; Ord.

No. 019675, § 1, 9-24-2024)

12.88.020 Schedule II—Through streets.

In accordance with the provisions of Section 12.60.010, and when signs are erected giving notice thereof, drivers of vehicles shall stop at every intersection before entering any of the following streets or parts of streets:

Airport Road;

Airway Boulevard—between Interstate Highway 10 and Montana Avenue;

Alabama Street;

Alameda Street;

Alcan Street;

Altura Avenue—from the east line of Alabama Street to the west line of Pershing Drive;

Arizona Avenue;

Balboa Road;

Bassett Avenue;

Brown Street — from the south line of Rim Road to the north line of Arizona Avenue;

Byron Street — from the north line of Jackson Avenue to the south line of Hayes Avenue;

Cadiz Street;

Campbell Street — between North Avenue and Schuster Avenue;

Carolina Drive;

Chelsea Street;

Cielo Vista Drive;

Cincinnati Avenue — from the east line of Oregon Street to the west line of Ochoa Street;

Clark Drive — from the north line of Delta Drive to the west line of Geronimo Drive;

Copia Street — between Alameda Avenue and Jefferson Avenue;

Cotton Street — from the north line of Seventh Avenue to the south line of San Diego Avenue;

Country Club Road;

Crestmont Drive;

Dale Road;

Delta Drive — from the east line of Hammett Street to the south line of Alameda Ave;

Diana Drive;

Doniphan Drive;

Durazno Avenue — from the east line of Boone Street to the west line of Raynolds Street;

Durrill Road;

Dyer Street;

Edgemere Boulevard;

El Paso Drive;

El Paso Street — from the International Boundary line to the south line of San Francisco Avenue;

Emerson Street;

Fairbanks Drive;

Fifth Avenue — from the east line of El Paso Street to the west line of Cotton Street;

Fort Boulevard — from the east line of Alabama Street to the west line of Dyer Street;

Fred Wilson Road, except at its intersection with Alabama Street, at which intersection Alabama Street shall be the through street;

Gateway Boulevard;

George Orr Road;

Geronimo Drive — from the north line of Trowbridge Drive to the south line of Clark Drive;

Giles Road;

Grant Avenue — from the east line of Cotton Street to the west line of Raynor Street;

Hammett Street — between Delta Drive and Alameda Avenue;

Hastings Drive — from the east line of Pershing Drive to the west line of Raynolds Street;

Hawkins Boulevard;

Hayes Avenue;

Hercules Drive;

Honda Pass Drive;

Hunter Drive;

Joe Herrera Drive;

Kansas Street — from the north line of Paisano Drive to the south line of Schuster Avenue;

Lomaland Drive;

Magnetic Street;

Magoffin Avenue;

Main Drive — from the west line of Campbell Street to the south line of West Yandell Drive;

McCombs Street;

McRae Boulevard;

Mesa Street — from the north line of Paisano Drive to the east line of Doniphan Drive;

Mesita Drive — from the east line of Mesa Street to the west line of Stanton Street;

Missouri Avenue — from the east line of Campbell Street to the west line of Stevens Street;

Montana Avenue;

Montwood Drive;

Myrtle Avenue;

North Loop Drive;

O'Keefe Drive;

Oregon Street — from the north line of Paisano Drive to the south line of Robison Street;

Overland Avenue;

Paisano Drive;

Pendale Road — from the north line of Whitney Road to the south line of North Loop Road;

Pershing Drive;

Piedras Street;

Phoenix Avenue;

Radford Street — from the north line of Yandell Drive to the south line of Pershing Drive;

Railroad Drive;

Raynolds Street;

Richmond Avenue — from the east line of Kentucky Street to the west line of Piedras Street;

Rio Grande Avenue;

River Bend Drive;

Riverside Drive;

Roosevelt Street — from the north line of Montana Avenue to the south line of Nashville Avenue;

40. North Loop Drive from a point 450 feet northwest of the centerline of Yarbrough Drive to a point 400 feet southeast of the centerline of Yarbrough Drive, both sides;

41. The south side of Gateway Boulevard East, from the east curbline of Piedras Street to a point 180 feet east;

42. On the north side of Will Ruth Avenue extending approximately 827 feet east from Dyer Street;

43. The north side of Third Avenue from Cotton Street to a point 258 feet east of the east curbline of Cotton Street;

44. The east side of Scenic Crest;

45. The south side of Zion Drive from Alabama Street to Old Spanish Trail and the north side of Zion Drive from Alabama Street to a point 270 feet west thereof;

46. Sioux Drive between Edgemere Boulevard and Cheyenne Trail, both sides, and between Montana Avenue and a point 250 feet south thereof, east side;

47. The east side of Cotton Street from the south curbline of Myrtle Avenue to a point 240 feet south thereof;

48. The north side of Yandell Drive extending 125 feet west of Palm Street;

49. Both sides of Concepcion Street from Rosa Avenue to Alameda Avenue;

50. Reserved.

51. The south side of Rosa Avenue between Raynolds Street and Concepcion Street;

52. On the following described parts of Geronimo Drive:

a. East side of Geronimo Drive from Montana Avenue to a point 100 feet north thereof,

b. Both sides of Geronimo Drive from Montana Avenue to Gateway Boulevard West,

c. The west side of Geronimo Drive from Clark Drive to Gateway Boulevard East;

53. Both sides of Murchison Road from the east curbline of Brown Street to a point 372 feet east thereof. The prohibition in this paragraph shall not apply on Sundays;

54. Murchison Road from Georgia Place to Cotton Street, both sides;

55. Both sides of Arizona Avenue from the east curbline of Magnolia Street to the west curbline of Rosewood Street;

56. The north side of Grant Avenue from the west curbline of Magnolia Street to a point 81 feet west thereof;

57. The north side of Industrial Avenue from a point 212 feet east of the east curbline of Hawkins Road to a point 888 feet east thereof, except however a yellow zone beginning at a point 420 feet east of the east curbline of Hawkins Road and extending east a distance of 300 feet, which zone is designated as a passenger loading zone for use as provided in Section 12.48.010

58. The south side of Industrial Avenue from Hawkins Road to Tony Lama Street;

59. Both sides of North Loop Drive from Delta Drive to Emerson Street;

60. Both sides of Bermuda Avenue from the east curbline of McRae Boulevard to a point 40 feet east thereof;

61. On the following described portions of Magruder Street:

a. The west side of Magruder Street between Montana Avenue and Gateway West Boulevard,

b. The east side of Magruder Street from a point 200 feet north of Gateway West Boulevard to Montana Avenue,

c. The east side of Magruder Street from Montana Avenue to a point 620 feet north thereof;

62. The south side of Welch Avenue from the east curbline of Clark Drive to a point 75 feet east thereof;

63. Viscount Boulevard from Interstate Highway 10 to Bellrose Drive;

64. Copia Street on the west side from Paisano Drive to San Antonio Avenue;

65. Copia Street on the east side from the north curbline of Paisano Drive to a point 190 feet north thereof;

66. Sunset Drive on the east side from the south curbline of Riverbend Drive to a point 100 feet south thereof;

67. The south side of Durazno Avenue from Piedras Street to Raynor Street;

68. The north side of Durazno Avenue from a point 125 feet east of the east curbline of Piedras Street to Raynor Street;

69. The west side of Elm Street from the west curbline of Piedras to the alley just east thereof;

70. Mesa Street from Main Drive to Doniphan Drive, both sides;

71. Pebble Beach Drive from Shadow Mountain Drive east on both sides to a point 128 feet west of the west curbline of Burning Tree Drive;

72. The east side of Hadlock Street form Alameda Avenue to a point 72 feet south thereof;

73. The west side of Hadlock Street from Alameda Avenue to a point 50 feet south thereof;

74. Shadow Mountain Drive on the east side between Mesa Street and a point 500 feet north thereof;

75. Shadow Mountain Drive on the west side between Mesa Street and Enterprise Court;

76. Shadow Mountain Drive on the east side between Pebble Beach Drive and a point 175 feet south thereof;

77. West side Piedras Street from Alameda Avenue to Magoffin Avenue;

78. East side Piedras Street from Alameda Avenue to a point 200 feet south thereof;

79. West side only of the service road on the east side of Piedras Street from Alameda Avenue to a point 100 feet north of Rosa Avenue;

80. Both sides Texas Avenue and the Texas Avenue service roads from Poplar Street to the service road on the east side of Piedras Street;

81. North side Texas Avenue from Poplar Street to a point 110 feet west thereof;

82. South side Texas Avenue from Poplar Street to a point 100 feet west thereof;

83. Both sides Rosa Avenue from the service road on the east side of Piedras Street to a point 160 feet east thereof;

84. Both sides Raynor Street from Gateway Boulevard East to Montana Avenue;

85. On the following described portions of Piedras Street:

a. Both sides from Grant Avenue to Montana Avenue,

b. Both sides from Yandell Drive to Gateway Boulevard East;

86. Both sides service road on the east side of Piedras Street from Gateway Boulevard East to Durazno Avenue;

87. Both sides of Carolina Drive from Yarbrough Drive to Franklin Road/Stiles Drive;

88. Both sides Yermoland Drive from Yarbrough Drive to Tarrant Road;

89. Pera Avenue from the west curbline of Copia Street to a point one hundred feet west thereof, on the north side;

90. Wyoming Avenue on the north side between Willow Street and Cotton Street;

91. Wyoming Avenue on the south side between a point 295 feet west of the west curbline of Willow Street and Williams Street;

92. Dallas Street, both sides, between Gateway Boulevard East and Missouri Avenue;

93. Magnetic Street, the west side between the north curbline of Titanic Avenue and a point 100 feet north thereof;

94. Alameda Avenue between Malaga Place and Snelson Drive, both sides;

95. The north side of Alameda Avenue from Snelson Drive east of Old Country Road;

96. Alameda Avenue on the south side between Snelson Drive and a point seventy-five feet east of Gibbs Street;

97. Will Ruth Avenue from Rutledge Drive to a point 336 feet west thereof, the south side;

98. The west side of Humble Place from a point three hundred feet south of Gateway Boulevard East to a point eight hundred feet south of Gateway Boulevard East;

99. McKellingon Drive, the south side, from Stanton Street to a point 82 feet west thereof;

100. Nashville Avenue, the south side, from Alabama Street to a point 60 feet west thereof;

101. Bataan Circle, both sides, from Raynolds Street to a point 80 feet west thereof;

102. Delta Drive between Boone Street and Nino Aguilera Street, both sides;

103. Lomaland Drive from North Loop Road to a point 200 feet north of the centerline of Highland Drive, both sides;

104. Cypress Avenue between Piedras Street and a point 408 feet west thereof, north side only;

105. Douglas Avenue between Stevens Street and a point two hundred feet west thereof, south side only;

106. On the following described parts of Gateway Boulevard East, both sides:

a. Between a point 1,800 feet west of the center line of Zaragosa Road and the east city limits,

b. Between a point 1,200 feet east of Lomaland Drive and Stanley Street,

c. Between Corral Drive and Benson Drive,

d. Between Hunter Road and a point 1800 feet west of the centerline of Hunter Road,

e. Between points 1,000 feet east and 2,000 feet west of the centerline of Hawkins Boulevard,

f. Between a point 1,100 feet east of the center line of Airway Boulevard and the Southern Pacific Railroad (Fort Bliss Spur);

g. Between Southern Pacific Railroad (Fort Bliss Spur) and Romany Street,

h. Between a point 150 feet east of Chelsea Drive and Ledo Street,

i. Between Copia Street and a point 200 feet west of Grama Street,

j. Between Cebada Street and San Marcial Street,

k. Between Piedras Street and Eucalyptus Street,

l. Between Mesa Street and Graphite Street;

107. On the following described parts of Gateway Boulevard West, both sides:

a. Between points 1,500 feet east and 800 feet west of the centerline of Lomaland Drive,

b. Between Sumac Drive and a point 1,200 feet west of the centerline of McRae Boulevard,

c. Between points 2,000 feet east and 1,100 feet west of the centerline of Hawkins Boulevard,

d. Between points 2,000 feet east of the center line of Airway Boulevard and Robert E. Lee Road,

e. Between a point 1500 feet east of the center line of Geronimo Drive and Chelsea Drive,

f. Between Regan Street and Reynolds Boulevard,

g. Between a point 100 feet east of Copia Street to Copia Street,

h. Between Grama Street and Raynor Street;

108. West Main Drive, both sides, between Fewel Street and Porfirio Diaz Street;

109. Sun Bowl Drive, both sides between West Yandell Drive and the University of Texas at El Paso property line just north and west of Schuster Avenue;

110. San Paulo Drive between Lafayette Drive and Yarbrough Drive, north side only;

111. Both sides of Rim Road from a point 60 feet west of North El Paso Street to a point 60 feet east of North El Paso Street;

112. North Stanton Street, between Buckingham Drive and a point 80 feet north thereof, east side only;

113. Van Buren Avenue between Pollard Street and a point 100 feet west of Dyer Street, south side

only, and all sides of the raised island constructed in Van Buren Avenue at its intersection with Pollard Street;

114. Monroe Avenue between Cranfill Street and Dyer Street, south side only; between Dyer Street and the Westernmost intersection of Monroe Avenue with Pollard Street, north side only; between the two intersections of Monroe Avenue with Pollard Street, both sides; and all sides of the raised island constructed in Monroe Avenue at its intersection with Pollard Street;

115. On the following described parts of Surety Drive:

a. Between Gateway Boulevard East and a point 50 feet south thereof, west side only,

b. Between Gateway Boulevard East and Clark Street on the east and north sides only;

116. McCombs Street between Dyer Street and Railroad Drive;

117. Industrial Avenue between Humble Place and Hawkins Boulevard, both sides;

118. On the following described parts of Hercules Avenue:

a. Between Neptune Street and Dyer Street, both sides,

b. Between Dyer Street and Howard Street, south side only,

c. Between Dyer Street and a point 500 feet east thereof, north side only;

119. Montana Avenue between Grama Street and Marr Street, both sides;

120. Altura Avenue from Happer Way to a point 480 feet east of Pershing Drive;

121. Hondo Pass Drive between a point 550 feet east of Dyer Street and a point 570 feet west of Dyer Street, both sides, and between Gateway Boulevard north and a point 500 feet east of Norton Street, both sides;

122. McRae Boulevard between Gateway Boulevard West and Wedgewood Drive, east side only;

123. Balboa Drive between Dew Drive and Pinta Avenue, both sides;

124. Airway Boulevard, both sides;

125. Cliff Drive between Golden Hill Terrace and a point 100 feet west of Utah Street, both sides;

126. Raynolds Street from Alameda Avenue to Gateway Boulevard East, both sides;

127. Valverde Street between Alameda Avenue and a point 350 feet south of Paisano Drive, both sides;

128. Magnetic Street between Olympia Avenue and Hercules Avenue, east side only;

129. Deleted;

130. Edgemere Boulevard between Catalina Way and Geronimo Drive, both sides;

131. Edgemere Boulevard frontage roads between Airway Boulevard and Robert E. Lee Road, both sides;

132. Tetons Drive between Dyer Street and Guadalupe Drive, both sides;

133. Carnegie Avenue, from east end of Empire Avenue to Killarney Street, both sides;

134. Rutherglen Street, between Montana Avenue and Carnegie Avenue, both sides;

135. McRae Boulevard between Montana Avenue and Carnegie Avenue, both sides;

136. Derrick Road between Montana Avenue and Carnegie Avenue, both sides;

137. Killarney Street between Montana Avenue and Carnegie Avenue, both sides;

138. Wedgewood Drive between Montana Avenue and Carnegie Avenue, both sides;

139. Both sides of Railroad Drive from Fred Wilson Road to Woodrow Bean Trans Mountain Drive;

140. Pershing Drive from Grama Street to the Fort Bliss entrance just east of Marr Street, both sides;

141. Dyer Street from Pershing Drive to the north city limits, both sides;

142. West side of Cotton Street from Arizona Avenue to the first alley north of Arizona;

143. East side of Cotton Street from Arizona Avenue north to Atlanta Avenue;

144. Cloudview Drive from a point 350 feet west of Northwind Drive to a point 800 feet west thereof, north side;

145. Copia Street between Memphis Avenue and Gateway Boulevard East, both sides;

146. Both sides of Confetti Drive from Mesa Street to a point 200 feet north of Carousel Drive;

147. Campbell Street between the north right-of-way line of Ninth Avenue and Loop 375 (Border Highway), both sides;

148. Kansas Street between Ninth Avenue and Loop 375 (Border Highway), both sides;

149. Mesa Street between Ninth Avenue and Loop 375 (Border Highway), both sides;

150. Oregon Street between the north right-of-way line of Ninth Avenue and Loop 375 (Border Highway), both sides;

151. Park Street between Ninth Avenue and Loop 375 (Border Highway), both sides;

152. Sims Drive between Ray Watt Drive and McRae Boulevard, both sides;

153. South side of Van Buren Avenue from the west line of Dyer Street to a point 270 feet west of Dyer Street;

154. Both sides of Resler Drive from Mesa Street to a point 350 feet south of Alto Ray Avenue;

155. Both sides of Resler Drive from Mesa Street to a point 500 feet south of Mesa Street;

156. Both sides of Escondido Drive from the west property line of Dawn Street to a point 900 feet east of Westwind Drive;

157. Both sides of Hunter Drive between North Loop Drive and a point 450 feet north of Phoenix Drive;

9. Castner from Pendale to Zaragoza;
10. Clark from Trowbridge to El Paso;
11. Copia from Paisano to Montana;
12. Delta from Trowbridge to Alameda;
13. Desert North from Mesa to Transmountain;
14. Desert South from Transmountain to Mesa;
15. Doniphan from Transmountain to Racetrack (S);
16. Dyer from Fred Wilson to city limits;
17. El Paso Drive from Alameda (W) to Clark;
18. Executive Center from Paisano to Mesa;
19. Fonseca from Border Highway to Alameda;
20. Fred Wilson from Alabama to Airport Road;
21. Gateway East from Dallas to city limits;
22. Gateway North from Delta to Paisano and from;
23. Fred Wilson to city limits;
24. Gateway South from city limits to Fred Wilson;
25. Gateway West from city limits to Missouri;
26. Hawkins from Viscount to North Loop;
27. IH-10 from west city limits to east city limits;
28. IH-10 from IH-10 to Paisano;
29. Joe Battle from IH-10 to Railroad;
30. Lee Trevino from IH-10 to Montwood;
31. Lomaland from Rojas to IH-10;
32. Marshall from Fred Wilson to Railroad;
33. Martin Luther King, Jr. from Stan Roberts, Sr., to city limits;
34. McCombs from Dyer to Stan Roberts, Sr.;
35. McKelligon Canyon from quarry to Alabama;
36. McRae from IH-10 to Montana;
37. Mesa from Doniphan to Executive Center;
38. Montana from Piedras to city limits;
39. Montwood from McRae to Lee Trevino;
40. North Loop from Trowbridge to city limits;
41. Paisano from Sunland Park to Montana;
42. Pendale from IH-10 to Castner;
43. Piedras from Paisano to Montana;
44. Railroad from Fred Wilson to Dyer;
45. Resler from IH-10 to Mesa;
46. Rojas from Lomaland to Joe Battle;
47. Santa Fe from Yandell to Border Highway;
48. Socorro from Alameda to city limits;
49. Stan Roberts from Dyer to Martin Luther King, Jr;
50. Sunland Park from Doniphan to Mesa;
51. Tony Lama from Hawkins to IH-10;
52. Transmountain from Railroad to Doniphan;
53. Trowbridge from Montana to North Loop;
54. US-54 from Border Highway to city limit;
55. Zaragoza from the international bridge to;

56. Americas and from North Loop to Montana. (Ord. 13561 § 3, 1998)

12.88.081 Reserved.

Editor's note—Ord. No. 17290, § 2, adopted March 16, 2010, repealed § 12.88.081, which pertained to Schedule VIIIA—Common carrier passenger route established and derived from Ord. 16149, § 1, 2005.

12.88.110 Schedule IX—Special truck routes for hazardous material-carrying vehicles.

In accordance with Section 12.40.100 and when signs are erected giving notice thereof, the type of vehicle described in Section 12.40.100 shall be permitted to use the following named streets or parts of streets and no others, except as allowed in Section 12.40.110 of this code:

1. Interstate Highway 10 between east city limits and north city limits (New Mexico State Line);

2. Interstate Highway 110 between Interstate 10 and south city limits (International Boundary at Cordova Port-of-Entry: Bridge of the Americas);

3. Patriot Freeway (U.S. 54) between Border Highway (Loop 375) and north city limits (New Mexico State Line);

4. Loop 375 between U.S. 54 (Patriot Freeway) and Railroad Drive.

5. Americas Avenue (Loop 375 Frontage) between Zaragoza Road and Interstate Highway 10.

6. Joe Battle Boulevard (Loop 375 Frontage) between Interstate Highway 10 and Montana Avenue (U.S. 62/180).

7. Zaragoza Road (FM 659) between Border Highway (Loop 375) and south city limits (International Boundary at Ysleta Port-of-Entry: Zaragoza Bridge);

8. Zaragoza Road (FM 659) between east city limits and its north intersection with Joe Battle Boulevard (Loop 375 Frontage).

9. Montana Avenue (U.S. 62/180) between Airway Boulevard and east city limits;

10. Airway Boulevard between Montana Avenue (U.S. 62/180) and Interstate Highway 10;

11. Trowbridge Drive between Interstate Highway 10 and Delta Drive;

12. Delta Drive between Trowbridge Drive and Fonseca Drive;

13. Fonseca Drive between Delta Drive and Border Highway (Loop 375);

14. Fred Wilson Road between Airport Road and Patriot Freeway (U.S. 54);

15. Marshall Road between Fred Wilson Road and Railroad Drive;

16. Railroad Drive between Fred Wilson Road and Dyer Street;

17. Dyer Street between Railroad Drive and its north intersection with Patriot Freeway (U.S. 54);

18. Artcraft/Ord Gary Highway (SH 178) from West City Limits (New Mexico State Line) to Interstate Highway 10.

19. SPUR 601 between Patriot Freeway (U.S. 54) and Loop 375 (Purple Heart Highway). (Ord. 14779 § 1, 2001; Ord. 11701 § 3, 1993)
(Ord. No. 17237, § 1, 11-10-2009)

12.88.130 Schedule XI—Parking meter zones.

A. It shall be a defense to any complaint under this section that the party so charged was serving or, called to serve, at the time of the offense charged, as a juror in any local, state or federal court located within the city.

B. It shall also be a defense to any complaint under this section that the party so charged was a witness in a criminal proceeding in any local, state or federal court located within the city; it is understood that the criminal proceeding includes not only the main trial of any criminal cause but also includes any pretrial hearing wherein the presence of witnesses is mandated or requested by either the prosecution or the defense counsel. In the case of these defenses, any person desiring to utilize the defenses may prove either one of these defenses in one of two ways:

1. By presenting, in open court, a statement signed by the presiding judge, the clerk of such court, or the district attorney or any authorized assistant district attorney, expressly stating that

such party was sitting as a juror or a witness in a criminal proceeding on the date and at the time of the parking violation in question; or

2. By pursuing the same procedure as outlined above, but instead of presenting the statement in open court, present the violation along with the statement from the above-designated authorities to a clerk in the traffic violation bond office, who will make the appropriate notation and attach the statement to the ticket and thereafter, dismissal procedures will be informally pursued upon recommendation by the city prosecutor. (Ord. 15249 §§ 1, 2, 3, 2002; Ord. 13062 § 15, 1997; Ord. 10769 §§ 1—3, 1991; Ord. 10681 §§ 1, 2, 1991; Ord. 10398 §§ 1, 2, 1991; Ord. 10046 § 3, 1990; Ord. 9497 § 2, 1988; Ord. 9434 § 1, 1988; Ord. 8270 §§ 1, 3, 4, 1985; prior code § 20-187)

12.88.140 Schedule XII—Location of traffic-control signs, signals and devices.

In accordance with Section 12.20.040, traffic-control signals and devices shall be located at the following places:

12.88.150 Schedule XIV—Speed limits.

In accordance with Section 12.28.010, the city council determines and declares, upon the basis of engineering and traffic investigations as set forth for such purposes by state law, that the maximum reasonable, prudent and safe speed upon the following highways and streets, or portions thereof, is the number of miles per hour hereinafter set forth:

A. Ten miles per hour:

1. On Edgar Park Avenue from Echo Street to the Streets;

B. Fifteen miles per hour:

1. On all streets and roads in city parks,

2. In all school crossing zones when so designated and signed as provided in Sections 12.28.010 and 12.28.020; provided, on all streets which have a route number assigned by the state, the speed limit in a school crossing zone shall be twenty miles an hour less than the regular posted speed for that part of the street, but in no case less than fifteen miles an hour,

3. Convair Road in front of the El Paso International Airport, from a point approximately 300 feet north of its intersection with Terminal Drive North to its intersection with Terminal Drive South,

4. On Marcena Drive from Bluff Trail Drive to De Leon Drive;

C. Twenty miles per hour:

1. On Edgar Park Avenue from Echo Street to the west city limits,

2. Normandy Drive from Airport Road to Cherbourg Avenue,

3. Candelaria Street,

4. Concepcion Street from Alameda Avenue to Rosa Street,

5. Concepcion Street from Blanco Avenue to Delta Drive,

6. Hughes Circle,

7. Webbers Way,

8. Prieto Way,

9. Caufield Place,

10. Hernandez Street,

11. Fox Street,

12. Sue Hall Avenue,

13. Blanco Avenue between Hernandez Street and Francis Street,

14. Troy Avenue,

15. On Wenda Way between the south right-of-way line of North Loop Drive and the north right-of-way line of San Jose Avenue,

16. Snelson Drive between Alameda Avenue and the Franklin Canal,

17. Lone Star Place between Socorro Drive South right-of-way line and Padilla Drive north right-of-way line,

18. Scenic Drive between Robinson Avenue and the entrance to Murchison Park,

19. Dunne Avenue from Fullan Street to Washington Street,

20. Cincinnati Avenue from Piedmont Drive to Ochoa,

21. Ellerthorpe Road between Dyer Street and the west end of Fort Bliss Boundary line,

22. Audubon Street between Fairbanks Drive and Woodrow Bean Trans Mountain Drive,

23. Estrella Street, between San Antonio Avenue and Rivera Avenue,

24. New Haven Drive,

25. Pebble Beach Drive from Burning Tree Drive East to Bonneville Lane,

26. Eucalyptus Street from Cypress Street to Olive Avenue,

27. Raynor Street from Findley Avenue to the southerly intersection of Rivera Avenue and Raynor Street,

28. Canal Street from Seventh Avenue to where Canal Street ends northwest of Bandera Avenue,

29. Jordan Lane from Love Road to Silverwood Way,

30. Old Pueblo Road from Alameda Avenue to Zaragoza Road,

31. Eighth Avenue between Campbell Street and Park Street,

32. Alfredo Subia Place, Bandera Way, Charles Road and Zikio Chacon Place;

D. Twenty-five miles per hour:

1. Scenic Drive between the entrance to Murchison Park and Louisville Avenue,

2. Belvidere Street from Via Montes Street to where Belvidere Streets ends northeast of Via De La Paz Drive,

3. Bandolero Drive from Cerrito Feliz Lane to where Bandolero Drive ends northeast of Via De La Paz Drive,

4. Rosemont Drive, from Love Road to the end of Rosemont Drive,

5. Rojas Drive, between Pendale Road and Trudy Elaine Drive;

E. Thirty miles per hour:

1. Fonseca Drive from a point 250 feet north of Mainzer Avenue to Loop 375 (Border Highway),

2. Railroad Drive from Dyer Street to a point 0.38 miles south of Dyer Street,

3. Schuster Avenue from Sun Bowl Drive to Brown Street,

4. Westwind Drive from Stardust Drive to Thunderbird Drive,

5. Desert Pass St. from S. Resler Dr. to a point 300 feet past Desert Trail Dr;

F. Thirty-five miles per hour:

1. Alabama Street from Federal Avenue to Jefferson Avenue,

3. Airport Road from Montana Avenue to Airway Boulevard,

4. Trowbridge Drive from Raynolds Street to Interstate Highway 10, and from Texaco Road to North Loop Road,

5. Yandell Drive from Campbell Street to Gateway Boulevard West,

6. Myrtle Avenue from Alameda Avenue to Cotton Street,

7. Deleted,

8. Deleted,

9. Lee Trevino Drive from Rojas Drive to Burnham Drive,

10. Rio Grande Avenue from Campbell Street to Cotton Street,

11. Grant Avenue from Cotton Street to Piedras Street,

12. Arizona Avenue from Alabama Street to Cotton Street,

13. McCombs Street from Railroad Drive to Dyer Street,

14. Hercules Drive from Magnetic Street to Railroad Drive,

15. River Bend Drive,

16. Wedgewood Drive from Springwood Drive to Bantry Avenue,

17. Arizona Avenue between Brown Street and Campbell Street,

18. Wyoming Avenue between Maple Street and Cotton Street,

19. Deleted,

20. Hawkins Boulevard from Montana Avenue to Market Avenue,

21. Airway Boulevard from Gateway Boulevard West to Montana Avenue,

22. Reserved,

23. Sunland Park Drive from Mesa Street to a point 400 feet west of Mesa Street,

24. Diana Drive from Railroad Drive to Dyer Street,

25. Shadow Mountain Drive between Mesa Street and Thunderbird Drive,

26. Lomaland Drive from Gateway East Boulevard to North Loop Road,

27. Viscount Boulevard between Airway Boulevard and Gateway Boulevard West,

28. Fairbanks Drive between Dyer Street and Gateway Boulevard North,

29. North Loop Drive from a point 350 feet west of Carolina Drive to Emerson Street,

30. Deleted,

31. Lomaland Drive from Vista del Sol Drive to Trawood Street,

12.88.160 Schedule XV—City taxicab zone.

A. The traffic engineer is authorized and directed to establish a city taxicab zone at the following location:

1. The Paso Del Norte Bridge Taxicab Zone-located on the north side of Sixth Avenue from the northeast corner of El Paso Street east to the northwest corner of the alley west of Oregon and east of Mesa Street.

2. Anthony Street, two spaces between a point one hundred thirty feet and one hundred seventy feet north of the San Antonio Avenue, west side. Hours in effect between 6:00 p.m.—2:30 a.m.

3. Durango Drive, first two parking spaces south of San Antonio Avenue west side. Hours in effect between 6:00 p.m.—2:30 a.m.

B. When such zones are established the traffic engineer shall erect appropriate signs and/or markings to designate the city taxicab zone limits and operation of each zone.

C. Taxicabs may stop or stand in such zones for the purpose of discharging or taking on passengers as stated on the signs to be erected. The driver shall remain in, or in the vicinity of his taxicab while it is in the zone.

D. A taxicab shall not stop or remain in the area of a designated zone if there are other taxicabs already operating under a duly authorized special permit under Title 6 of this Code and there is not sufficient room left for a taxicab operating under another special permit and desiring to use the zone.

E. The taxicab inspector, or in his absence any police officer, may direct taxicab drivers in the use of such zones, so as to avoid congestion and give all taxicabs reasonably equal opportunity for use of the zones; and every taxicab driver shall obey the direction of such inspector or officer.

F. When any such zone is designated by signs or markings as herein provided, no person shall

stop, stand or park any vehicle therein, except that a taxi driver may stop in such zone in accordance with the regulations herein set forth, and not otherwise.

G. In addition to the penalty provided in Sections 1.08.010 through 1.08.030 of this Code, violation of this section by a taxi driver shall be grounds for revocation or suspension of the issued taxicab zone permit, in accordance with the procedure provided in Title 6 of the City Code. (Ord. 16410 § 1, 2006; prior code § 20-191)
(Ord. No. 17919, § 1, 12-18-2012; Ord. No. 18549, § 1, 8-9-2016)

12.88.170 Schedule XVI—Parking limited on certain streets on all days.

In accordance with Section 12.52.060 and when signs are erected giving notice thereof, no person shall stop, stand or park a vehicle between the hours specified herein on any day, including Sundays and legal holidays, within the districts or upon the street or parts of streets as follows:

A. No parking, 11:00 p.m. to 5:30 a.m.:

1. Grant Avenue between Raynor Street and Copia Street, on either side,

2. Copper Avenue between Luna Street and Copia Street, on either side,

3. Federal Avenue between Luna Street and Copper Avenue, on either side;

B. No parking, 6:00 p.m. to 6:00 a.m.:

1. Belfast Avenue south side between the east right-of-way line of Cork Drive to west, the end of cul-de-sac,

2. Belfast Avenue north side, between the east property line of 10011 Belfast Avenue to west, the end of cul-de-sac,

3. Killarney Road, west side, between the north right-of-way to Falkirk Avenue to a point 300 feet north of the north right-of-way line of Belfast Avenue,

4. Killarney Road, east side, between the south property line of 3326 Killarney Road to the south right-of-way line of Montana Avenue (U.S. Highway 62). (Prior code § 20-192)
(Ord. No. 17338, § 6, 6-1-2010)

12.88.180 No stopping or standing—Tow-away zone.

A. When signs are erected in the following locations reading substantially, "No parking or standing, tow-away zone," no person shall park or stand any vehicle on the following parts of streets at any time, including, but not limited to Sundays and holidays:

1. Both sides of Montana Avenue from Piedras Street to Cedar Street;

2. North side of Montana Avenue from Cedar Street to Birch Street;

3. Both sides of Montana Avenue from Eucalyptus Street to Laurel Street;

4. North side of Montana Avenue between Laurel Street and Williams Street;

5. Yandell Drive, north side between Florence Street and a point 415 feet west of El Paso Street;

6. Yandell Drive, south side, between Campbell Street and Santa Fe Street;

7. East side of Virginia Street between the north curbline of Wyoming Avenue and a point 50 feet north thereof;

8. Yandell Drive, southwest side, between the north curbline of the Interstate Highway 10 entrance ramp at the intersection of Santa Fe Street and Yandell Drive and a point 272 feet northwest thereof; and Yandell Drive, northeast side, between the intersection of Yandell Drive with Santa Fe Street and a point 285 feet northwest thereof;

9. Both side of Cotton Street from Third Avenue to Olive Avenue;

10. East side of Cotton Street from Olive Avenue to Magoffin Avenue;

11. Both sides of the Cotton Street Service Road from Overland Street Service Road to San Antonio Avenue;

12. South side of Overland Street from the west right-of-way line of Tornillo Street to Cotton Street;

13. Both sides of the Overland Street Service Road from its intersection with Overland Street just east of Tornillo Street to the Cotton Street Service Road;

Thence in a northeasterly direction along the centerline of the Interstate Highway 10 eastbound Exit 19 off-ramp to the point of beginning.

Zone B: Beginning at the intersection of the centerlines of East San Antonio Avenue and North Campbell Street,

Thence in a northwesterly direction along the centerline of North Campbell Street to its intersection with the centerline of East Mills Avenue,

Thence northeast along the northern boundary of East Mills Avenue until it meets the east curb line of North Virginia Street,

Thence southeast along the east curb line of North Virginia Street to the nearby alley's southern boundary,

Thence northeast along the southern boundary of the alley to its intersection with the centerline of Octavia Street,

Thence southeast along the centerline of Octavia Street to its intersection with the alley of Block 1, Franklin Heights Addition,

Thence southwest along said alley to its intersection with the boundary line between Lots 21 and 22 of Block 1, Franklin Heights Addition,

Thence southeast along said boundary to its intersection with the centerline of Magoffin Avenue,

Thence southwest along the centerline of Magoffin Avenue to its intersection with the centerline of Saint Vrain Street,

Thence southeast along the centerline of Saint Vrain Street to its intersection with the centerline of Olive Avenue,

Thence northeast along the centerline of Olive Avenue to its intersection with the west boundary line of the property with legal description "East 80 feet of Block O, Campbell Addition",

Thence southeast along said boundary to its intersection with the centerline of East San Antonio Avenue,

Thence southwest along the centerline of East San Antonio Avenue to the point of beginning.

Zone C: Beginning at the intersection of the centerlines of East San Antonio Avenue and South Campbell Street,

Thence northeast along the centerline of East San Antonio Avenue until it reaches its closest point to the western boundary of the lot with the legal description "East 80 feet of Block O, Campbell Addition",

Thence northeast along the north side of East San Antonio Avenue until it is directly across from the boundary line between Lots 19 and 20, Block 80, Magoffin Addition,

Thence southeast following said boundary line to the centerline of the alley of Block 80, Magoffin Addition,

Thence northeast along said alley to the east boundary line of Block 80, Magoffin Addition,

Thence southeast along Block 80 to the centerline of East Overland Avenue,

Thence southwest along the centerline of East Overland Avenue to its intersection with the centerline of South Saint Vrain Street,

Thence southeast along the centerline of South Saint Vrain Street to its intersection with the centerline of Paisano Drive,

Thence in a southwesterly direction along the centerline of Paisano Drive to its intersection with the centerline of South Campbell Street,

Thence northwest along the centerline of South Campbell Street to the point of beginning.

Zone D: Beginning at the intersection of the centerlines of East San Antonio Avenue and South Campbell Street,

Thence southeast along the centerline of South Campbell Street to its intersection with the centerline of Paisano Drive,

Thence in a westerly direction along the centerline of Paisano Drive to its intersection with the centerline of South Santa Fe Street,

Thence northwest along the centerline of South Santa Fe Street to its intersection with the centerline of West San Antonio Avenue,

Thence northeast along the centerline of West San Antonio Avenue to its intersection with the centerline of South El Paso Street,

Thence northwest along the centerline of South El Paso Street to its intersection with the centerline of East San Antonio Avenue,

Thence northeast along the centerline of East San Antonio Avenue to the point of beginning.

Zone E: Beginning at the intersection of the centerlines of West San Antonio Avenue and South Santa Fe Street,

Thence southeast along the centerline of South Santa Fe Street to its intersection with the centerline of Paisano Drive,

Thence in a northwesterly direction along the centerline of Paisano Drive to its intersection with the centerline of West San Francisco Street,

Thence north and east along the centerline of West San Francisco Street to its intersection with the centerline of South Durango Street,

Thence northwest along the centerline of North Durango Street to its intersection with the centerline of railroad ROW,

Thence northeast along railroad ROW to its intersection with the centerline of North Santa Fe Street,

Thence southeast along the centerline of North Santa Fe Street to the point of beginning.

Zone F: Beginning at the intersection of the centerlines of East Main Street and North Campbell Street,

Thence in a southeasterly direction along the centerline of North Campbell Street to its intersection with the centerline of East San Antonio Avenue,

Thence southwest along the centerline of East San Antonio Avenue to its intersection with the centerline of South El Paso Street,

Thence southeast along the centerline of South El Paso Street to its intersection with the centerline of West San Antonio Avenue,

Thence southwest along the centerline of West San Antonio Avenue to its intersection with the centerline of North Santa Fe Street,

Thence in a northwesterly direction along the centerline of North Santa Fe Street to its intersection with the centerline of West Main Street,

Thence northeast along the centerline of West Main Street/East Main Street to the point of beginning.

Zone G: Beginning at the intersection of the centerlines of East Father Rahm Avenue and South Kansas Street,

Thence southeast along the centerline of South Kansas Street to its intersection with the centerline of Cesar Chavez Memorial Highway,

Thence southwest along the centerline of Cesar Chavez Memorial Highway to its intersection with the centerline of South Oregon Street,

Thence northwest along centerline of South Oregon Street to its intersection with the centerline of East Father Rahm Avenue,

Thence northeast along the centerline of East Father Rahm Avenue to the point of beginning.

Zone H: Beginning at the intersection of the centerlines of Paisano Drive and South Kansas Street,

Thence southeast along the centerline of South Kansas Street to its intersection with the centerline of East Father Rahm Avenue,

Thence southwest along the centerline of East Father Rahm Avenue to its intersection with the centerline of South Oregon Street,

Thence southeast along the centerline of South Oregon Street to its intersection with the centerline of East Sixth Avenue,

Thence southwest along the centerline of East Sixth Avenue until it meets the west curb line of South El Paso Street,

Thence northwest along the west curb line of South El Paso Street to its intersection with the south curb line of Father Rahm Avenue,

Thence southwest along the south curb line of Father Rahm Avenue until it meets with the centerline of South Santa Fe Street,

Thence northwest along the centerline of South Santa Fe to its intersection with the centerline of Paisano Drive,

Thence northeast along the centerline of Paisano Drive to the point of beginning.

(Ord. No. 18154, § 2, 4-1-2014)

12.88.230 Schedule XX—Parking benefit districts.

In accordance with Chapter 12.58 of this Code, a parking benefit district is an area in which a percentage of funds collected from paid curbside parking spaces or parking spaces in a city parking facility within the district are used to fund improvements within the district. The following are hereby designated parking benefit districts.

Uptown parking benefit district

Beginning at the southwest comer of Oregon Street and Rim Road,

Thence north along the western boundary of Oregon Street to its intersection with the northern boundary of Glory Road,

Thence east along the northern boundary of Glory Road to its intersection with the eastern boundary of North Mesa Street,

Thence north along the eastern boundary of North Mesa Street to its intersection with the southern boundary of Gregory Avenue,

Thence east along the southern boundary of Gregory Avenue to its intersection with the western boundary of Stanton Street,

Thence south along the western boundary of Stanton Street to its intersection with the northern boundary of Coffin Avenue,

Thence east along the northern boundary of Coffin Avenue to its intersection with the eastern boundary of Florence Street.

Thence south along the eastern boundary of Florence Street to its intersection with the southern boundary of Robinson Avenue,

Thence west along the southern boundary of Robinson Avenue to its intersection with the eastern boundary of Campbell Street,

Thence south along the eastern boundary of Campbell Street to its intersection with the northern boundary of New York Avenue,

Thence east along the northern boundary of New York Avenue to its intersection with the eastern boundary of North Saint Vrain St,

Thence east along the southern boundary of Arroyo Park to its intersection with the eastern boundary of Rim Road,

Thence west along the southern boundary of Rim Road to the point of beginning.

(Ord. No. 18761, § 2, 3-6-2018; Ord. No. 18762, § 5, 3-6-2018; Ord. No. 019771, § 1, 8-19-2025)

Chapter 12.90

PARKING RESTRICTIONS ALONG STREETCAR ROUTE

Sections:

12.90.010 Definitions.

12.90.030 No stopping, standing, or parking—Tow-away zone.

12.90.050 Designated parking areas along streetcar route.

12.90.070 Enforcement.

12.90.090 Penalty.

12.90.010 Definitions.

A. "Designated parking area(s)" means areas along the streetcar route that are marked by a sign and pavement markings to designate the specific location where a person is allowed to park a vehicle.

B. "Streetcar" means the rail mass transit system, including infrastructure and railcars, owned and operated by the City of El Paso.

C. "Streetcar route" means the following streets on which the streetcar is located: Santa Fe Street from Father Rahm to Franklin Avenue; Franklin Avenue from Santa Fe Street to Kansas Street; Stanton Street from Franklin Avenue to Baltimore Avenue; Baltimore Avenue from Stanton Street to Oregon Street; Oregon Street from Baltimore Avenue to Franklin Avenue; and Kansas Street from Franklin Avenue to Father Rahm.

D. "Traffic engineer" means the employee designated by the city manager who is trained and qualified to perform the duties of the traffic engineer as set forth within this code.

(Ord. No. 18872, § 1, 11-13-2018)

12.90.030 No stopping, standing, or parking—Tow-away zone.

A. Except as provided in Section 12.90.050 below, when signs are erected and/or the curb is painted yellow giving notice thereof, no person shall at any time stop, stand, or park a vehicle on any side of a street within the streetcar route.

(Ord. No. 18872, § 1, 11-13-2018)

12.90.050 Designated parking areas along streetcar route.

A. A person may park a vehicle within the streetcar route in a designated parking area.

B. A person parking a vehicle in a designated parking area shall not park the vehicle in a manner in which any part of the vehicle is outside of the boundaries of the designated parking area.

C. If a parking meter is installed next to a designated parking area, then a person parking a vehicle in a designated parking area shall pay the fee required by the parking meter for use of the designated parking area.

(Ord. No. 18872, § 1, 11-13-2018)

12.90.070 Enforcement.

A. The traffic engineer is authorized to install, remove, and modify all signs and markings necessary to carry out the provisions of this chapter. The traffic engineer is also authorized to establish and modify the locations of designated parking areas.

B. The police department is authorized to issue citations and to cause to be towed away any vehicle found stopping, standing, or parking in violation of this chapter.

(Ord. No. 18872, § 1, 11-13-2018)

12.90.090 Penalty.

A. An owner of a vehicle that is found stopping, standing, or parking in violation of this chapter shall be civilly liable to the towing company performing the towing of the vehicle pursuant to a request from the police department as provided under this chapter.

B. In addition to the civil liability above, any person violating any provision of this chapter shall be deemed guilty of a misdemeanor and be punished by a fine not to exceed five hundred dollars. For violations under this chapter that are of a continuing nature, each day that the violation continues shall constitute a separate offense.

(Ord. No. 18872, § 1, 11-13-2018)

Chapter 13.02

STREET AND INTERNATIONAL BRIDGES DEPARTMENTS

Sections:

13.02.010 Creation and purpose of the department of transportation.

13.02.020 Staffing of the department of transportation.

13.02.030—13.02.040 Reserved.

13.02.050 Creation and purpose of the international bridges department.

13.02.060 Staffing of the international bridges department.

13.02.010. Creation and purpose of the department of transportation.

A. There is established in the City of El Paso, the Department of Transportation, which shall generally provide for the planning, management, oversight and administration of maintenance and program improvements for the city's multi-modal transportation network.

B. The primary function of the department shall be the planning, development, management, oversight and administration of maintenance and program improvements for the city's multi-modal transportation network and traffic control infrastructure; staff, maintain and operate the traffic management center; conduct street sweeping and maintenance operations for city owned street infrastructure, traffic control infrastructure, street medians, shoulders, and alleys, to include the aesthetic improvements, and other city owned rights-of-way; oversight of capital improvement projects relating to the multi-modal transportation network; management of a city-wide pavement management system; maintain and manage the city's major thoroughfare plan; administration of street maintenance and restoration practices such as resurfacing, patching, sealing, and paving; installation and operational maintenance of traffic signalization infrastructure; installation and maintenance of street signage and pavement markings; management of the city's graffiti removal program; and to generally perform duties and services relating to planning, management, maintenance and liaison relating to the city's multi-modal transportation network as to be determined by the city manager.
(Ord. 16969 § 2, 2008)
(Ord. No. 17385, § 2, 8-24-2010, eff. 9-1-2010)

13.02.020. Staffing of the department of transportation.

A. The department shall be staffed by a department director and such other appropriate positions as are authorized by the council.

B. The department director shall be responsible for the performance of duties as assigned by other ordinances of the city including but not limited to the duties of the traffic engineer, provided however, that the city manager may reassign such duties to other departments and staff, as he deems appropriate.
(Ord. No. 17385, § 3, 8-24-2010, eff. 9-1-2010)

13.02.030—13.02.040 Reserved.

13.02.050 Creation and purpose of the international bridges department.

A. There is established the international bridges department in the City of El Paso, which shall generally provide for the capital and fiscal management and operation of city-owned international bridge crossings and parking meters.

B. The primary function of the department shall be the capital and fiscal management and operation of city-owned international bridge crossings and parking meters, including the maintenance and upgrade of assets and facilities; facilitation of efficient and reliable cross border mobility and international commerce; the provision of convenient, efficient and reliable cross border mobility at an appropriate cost while facilitating international commerce; the expansion of facilities, assets and services where appropriate; the provision of collection and payment services for bridge tolls and parking meter fees, and the efficient management of parking meters; and to generally per-

form duties and services relating to areas of international crossings and parking meter concerns as to be determined by the city manager. (Ord. 16969 § 5, 2008)

13.02.060 Staffing of the international bridges department.

A. The department shall be staffed by a department director and such other appropriate positions as are authorized by the council or established in accordance with a process established by a city budget resolution.

B. The department director shall be responsible for the performance of duties as assigned by other ordinances of the city, provided however, that the city manager may reassign such duties to other departments and staff, as he deems appropriate. (Ord. 16969 § 6, 2008)

Chapter 13.04

STREET AND SIDEWALK CONSTRUCTION AND MAINTENANCE

Sections:

13.04.010 Sidewalk and curb permit required.

13.04.015 Sidewalk permits and fees.

13.04.020 Sidewalk specifications.

13.04.045 Sidewalks in new development.

13.04.050 Maintenance of sidewalks, curbs and gutters—Abutting property owner's duty.

13.04.060 Maintenance of streets and drainage by streetcar and railroad companies.

13.04.070 Installation of sidewalk on property on which building permit issued.

13.04.080 Recording paving proceedings and ordinances.

13.04.010 Sidewalk and curb permit required.

A. Except as otherwise provided in this Code, no person shall construct, alter or repair any sidewalk or curb or change the grade thereof within the city's right-of-way without a permit. A permit under this chapter shall not be required for sidewalk and/or curb construction, alteration or repair that is included in a permit issued pursuant to Chapter 13.08. Permits under this section shall be issued only by the permit official. The permit official shall not issue any permit under this section without receiving the approval of the traffic engineer. In granting or refusing such permit the traffic engineer shall consider and be guided by the need for the proposed cut or alteration, the amount and pattern of traffic at the location in question, safety factors and the hazards likely to be created. The permit official may suspend a permit for noncompliance with the requirements of this chapter. The permit official shall provide notice of suspension of the permit to the permittee, at which time the permittee shall cease the work allowed under the permit and shall not resume work until authorized to do so by the permit official. Any person aggrieved by the decision concerning the issuance, denial, revocation or suspension of a permit issued under this chapter may appeal such decision to the appeals officer in accordance with the requirements and procedures of Chapter 2.30.

B. No person shall cut or alter any sidewalk or curb, whether for the purpose of vehicular access to property or otherwise without permission of the traffic engineer, and in accordance with specifications prescribed by him. In granting or refusing such permission the traffic engineer shall consider and be guided by the need for the proposed cut or alteration, the amount of traffic at the location in question, and the hazards likely to be created. Any person aggrieved by the decision of the traffic engineer may appeal to the city council.

C. The permit official will issue sidewalk permits and will enforce the requirements of this chapter for all properties. The city manager and his designees, including but not limited to the code enforcement division and the director of the city development department and his designees, will enforce the requirements of this chapter for streets, alleys and other paved portions of street rights-of-way. (Ord. 16982 § 1, 2008: Ord. 13956 §§ 1, 2, 1999; Ord. 13152 § 103, 1997; Ord. 12248 (part), 1995: prior code § 19-13)
(Ord. No. 17391, § 1, 8-24-2010, eff. 9-1-2010; Ord. No. 17487, § 2, 1-18-2011; Ord. No. 17803, § 1, 6-5-2012, eff. 6-11-2012; Ord. No. 019759, § 1, 7-22-2025)

13.04.015 Sidewalk permits and fees.

A. No person shall construct a sidewalk within the city limits without first obtaining a sidewalk construction permit issued in accordance with this title. No permit is required if the sidewalk is covered by a valid building permit or is part of a street improvement plan.

B. Permits issued pursuant to this chapter shall be valid for six months from the date of issuance.

C. An applicant requesting a sidewalk construction permit shall be responsible for contacting a "one call" notification system servicing the area and will be required to furnish written verification confirming that such a "one call" has been made as part of the application for permit. A sidewalk construction permit issued under this chapter may be denied for the failure of the applicant to contact a "one call" notification system servicing the area and to provide a verification number confirming that such a "one call" notification system has been contacted by the applicant. This requirement however, shall create no duty, express or implied, on the part of the city to verify that such a "one call" has been made by the applicant.

D. The standard fee for a sidewalk permit shall be as established in the annual budget resolution adopted by city council. The fee for a permit to construct a sidewalk, as required through order of the city following a determination by the traffic engineer as provided in Section 13.04.040, shall be waived. (Ord. 16982 § 2, 2008; Ord. 15750 § 1, 2004: Ord. 13956 § 3, 1999; Ord. 13152 § 104, 1997; Ord. 13062 § 16, 1997; Ord. 12846 § 2, 1996; Ord. 12248 (part), 1995: Ord. 12111 § 1, 1994; Ord. 11709, 1993: Ord. 10905 § 1, 1992)
(Ord. No. 17391, § 2, 8-24-2010, eff. 9-1-2010; Ord. No. 19077, § 1, 8-4-2020)

13.04.020 Sidewalk specifications.

A. All sidewalks hereafter constructed shall conform to the following specifications, except as otherwise authorized under subsection B of this section:

1. Sidewalks shall be carried out neatly to the required line and grade established by the city manager's designee;

2. Prior to the construction of the subgrade, all stones, roots, vegetation and other deleterious material shall be removed from the job site;

3. The subgrade shall be thoroughly compacted to a compaction which is not less than ninety percent for noncohesive soils and eighty-five percent for cohesive soils as determined by ASTM D 1557. Tests may be ordered by the city manager's designee;

4. Class A concrete shall be a minimum of three thousand psi comprehensive strength. Subgrade shall be thoroughly wetted before placing concrete;

5. Cement shall be type I Portland cement ASTM C 150 and shall conform to the standard specification. Water used for mixing shall be suitable for drinking purposes and fine and coarse aggregates shall be well graded, clean and shall conform to the standard specifications of the city;

6. Sidewalks shall have a minimum nominal thickness of four inches;

7. Sidewalks shall rise from the elevation of the top of the curb with a minimum slope of one-fourth inch per foot across the sidewalk;

8. Concrete shall be placed and tamped to a dense mass in such a way that all materials will remain well distributed;

9. Contraction joints shall be placed at five-foot intervals and may be struck when concrete is uncured or saw cut after setting;

10. Sidewalks adjacent to buildings, curbs, driveway aprons, ADA ramps, or other concrete structures shall be separated from existing structures with a one-half inch expansion joint to the full depth of slab;

11. The finished surface of the sidewalk shall be floated and wire brushed or broomed to provide a nonskid wearing surface, or other finish as approved by the city engineer;

12. All concrete sidewalks shall be properly cured;

13. Sidewalks shall be a minimum of five feet wide within a public street right-of-way unless a subdivision is platted using the hierarchy of residential streets as allowed under Chapter 19.36 of this code, four-foot wide sidewalks shall be allowed.

B. The city engineer may authorize different specifications which conform to good engineering practices.

C. No person shall construct or employ any other person to construct any sidewalk or driveway within the right-of-way of any city street or alley except in accordance with the specifications set forth in this section or other specifications authorized pursuant to Section 13.04.020(B).

D. Requirements of this section are appealable to the city council for final action.

E. Contractor stamps may be allowed provided that the stamp imprints comply with the following requirements and specifications:

1. Individual imprints from the stamps shall cover an area no larger than one-half square foot. The imprint shall not penetrate the concrete by more than one-quarter of an inch at the imprint's deepest point. If a logo is included, the size of the entire imprint, including the name and date, cannot exceed one-half square foot and must conform to the requirements stated above. There shall be no vertical or sharp edges that would allow any object to be caught, causing tripping or other potential hazards. All stamps must be approved by the city engineer or designee, solely at their discretion, for content and form before use.

2. No more than four stamp imprints per normal block shall be placed and the exact locations must be approved in advance by the city engineer or designee. The stamp shall display the contractor's name or initials and shall show the month and year of the imprint. (Ord. 16856 §§ 1—3, 2008; Ord. 13956 §§ 4, 5, 6, 1999; Ord. 13152 § 105, 1997; Ord. 10905 § 2, 1992: Ord. 10600 § 3, 1991: prior code § 19-13.1)

13.04.045 Sidewalks in new development.

A. Where required. Sidewalks shall be required within all public and private street rights-of-way within new development as follows:

1. Local Residential Streets.

a. Sidewalks shall be required on all local residential street classifications, except on:

i. Mountain residential streets within the mountain development area and within an approved subdivision; or

ii. Alleys within an approved subdivision; or

iii. Local residential streets within an approved subdivision where all the lots provide a minimum one-half acre lot area, and the adjoining properties have no sidewalks; or

iv. Local residential streets within an approved subdivision where a determination has been made by the director of the city development department that the sidewalks will impede drainage; or

v. Local residential streets within an approved subdivision where a street construction project, whether local, state or federal, has been awarded and the project includes construction of the sidewalks; or

vi. Local residential streets within an approved subdivision which meet all of the following criteria as determined by the city plan commission:

(A) A characteristic of the neighborhood is that no sidewalks have been required to date, and

(B) The subdivision adjoins or lies within a neighborhood in which buildings or structures have been constructed on at least fifty percent of the lots within the neighborhood, and

(C) The type of subdivision and intensity of land use is compatible with the character of the neighborhood; or

vii. Reserved.

viii. Local residential streets within an approved planned unit development where pedestrian access is provided within the approved subdivision through an alternative sidewalk design not installed within the street right-of-way.

b. Where required, sidewalks shall be installed on both sides of the local residential street right-of-way and shall be located adjacent to the property line and parallel to the curbline.

c. Required sidewalks may be located adjacent to and parallel with the curbline only under the following circumstances:

i. On the turnaround portion of a cul-de-sac street; or

ii. On the rear side of a double-front lot when all of the following apply:

(A) The subdivision design provides for single-loaded streets, and

(B) Both street frontages are local residential streets, and

(C) The sidewalk is flared to a minimum width of seven feet along the curb radius at a street intersection, and

(D) The sidewalk is wide enough to provide a minimum clear width of three feet at encroachments, including street lights, traffic signs, neighborhood delivery collection box units, utility installations, or other facilities; or

iii. On a local residential street where an existing sidewalk on an adjoining property is located adjacent to and parallel to the curbline, and the city plan commission determines that a public benefit would result from permitting the new sidewalk to be similarly designed and constructed.

d. Where a sidewalk is installed adjacent to the curbline, it shall be allowed to meander between the property line and the curbline to avoid encroachments, such as street lights, traffic signs, neighborhood delivery collection box units, utility installations or other facilities.

2. Arterial Streets.

a. Sidewalks shall be required on all arterial street classifications, except on arterial streets which meet the following criteria as determined by the city plan commission:

i. Arterial streets within an approved subdivision where a street construction project, whether local, state or federal, has been awarded and the project includes construction of the sidewalks; or

ii. Arterial streets within an approved subdivision that is on property zoned C-4, M-1, M-2, M-3 or P-I, and all of the following apply:

(A) No sidewalks exist on the adjoining properties, and

(B) A determination is made by the city plan commission that the development is within an area in which there is no foreseeable need to provide sidewalks for pedestrian traffic, or

iii. Arterial streets within an approved subdivision that is on property zoned C-4, M-1, M-2, M-3 or P-I, and all of the following apply:

(A) The total arterial street right-of-way width is seventy feet or less, and

(B) The arterial street provides access to only one development, and functions as internal circulation within the development, or

iv. Arterial streets where the location of sidewalks would be so unsafe for pedestrians that the risk to the public outweighs the benefits to the public; or

v. Arterial streets where the installation of sidewalks is expressly prohibited by ordinance.

b. Where required, sidewalks shall be installed on both sides of the arterial street right-of-way and shall be located adjacent to the property line and parallel to the curbline. A sidewalk shall be allowed to meander between the curbline and the property line to avoid encroachments, such as street lights, traffic signs, neighborhood delivery collection box units, utility installations, or other facilities.

c. Required sidewalks may be located adjacent to and parallel with the curbline when all of the following apply:

i. The sidewalk is a minimum of seven feet wide; and ii. The sidewalk is wide enough to provide a minimum clear width of three feet at encroachments, including street lights, traffic signs, traffic control devices, utility installations, or other facilities.

B. Sidewalk Construction.

1. Local Residential Streets. Sidewalks required within an approved subdivision shall be installed as soon as reasonably possible after the first building permit is issued for each lot, or portion thereof, within the subdivision. The property owner of the lot, or portion thereof, for which a building permit has been issued shall be responsible for construction of the sidewalk. No certificate of occupancy shall be issued until the sidewalk has been inspected and approved by the director of the city development department or his designee

2. Arterial Streets.

a. Where sidewalks are required within an approved subdivision, the construction may be deferred until ordered by the city as provided in Section 13.04.040. The city plan commission may, as part of the subdivision approval, approve a

deferral of the construction of sidewalks when the arterial street is designed to serve residential double-front lots; and the residential double-front lots are provided primary access through a fully improved local residential street; and the arterial street for which a sidewalk deferral is to be authorized provides frontage to the rear side of the residential double-front lots; and the improvement of the arterial street is delayed due to a partial dedication of the arterial street right-of-way within the approved subdivision.

b. Sidewalks required within an approved subdivision shall be installed as soon as reasonably possible, after the first building permit is issued for each lot, or portion thereof, within the subdivision; except where a sidewalk deferral was approved by the city plan commission as part of the subdivision approval. The property owner of the lot, or portion thereof, for which a building permit has been issued shall be responsible for construction of the sidewalk. No certificate of occupancy shall be issued until the sidewalk has been inspected and approved by the director of the city development department or his designee.

c. Where a sidewalk deferral is approved by the city plan commission as part of an approved subdivision, the property owner of the lot, or portion thereof, for which the deferral was granted, shall be required to deposit the funds necessary to pay the cost for the future installation of the sidewalk by the city or an agent of the city.

i. The amount of the deposit shall be the future value of the sidewalk construction, determined as follows: Three dollars and thirty cents per square foot factored for ten years at an inflation rate of five percent, multiplied by the total lot frontage on the street, multiplied by the width of the sidewalk.

ii. The funds shall be deposited in full with the city prior to the issuance of any building permit. A deposit made pursuant to this subsection shall be tendered in the form of a cash payment, or cashier's check made payable to the City of El Paso. Funds received shall be reserved for sidewalk construction with reference to the individual subdivision involved.

iii. After having deposited funds with the city in accordance with this provision, the owner of the property for which the funds were deposited may at any time, but not more often than once in any twelve-month period, request the city council to determine whether it has become practical for the city to install the sidewalks. From the date of receipt of such a request, the city council shall have ninety days to render its determination. If the city council fails to do so, it shall be deemed practical for the city to install the sidewalk. Construction of a deferred sidewalk within a subdivision shall be completed within one year from the date the city council, after having obtained recommendations from the city manager or designee and the city plan commission, determines that it is practical for the city to install the sidewalks. The recommendation shall include an opinion from the city attorney as to whether the city has the legal authority to install the sidewalks under the circumstances. The term "practical," as used in this subsection, does not include consideration of whether the city has funds available to supplement the cost of installing the sidewalks. If it is determined by the city council that it is practical to install the sidewalks, and if the deferred sidewalk is not installed by the city as herein required, the property owner who deposited the funds shall, upon written request, be entitled to a full refund of monies paid within thirty days of receipt by the city of the request for the refund. (Ord. 16982 § 3 (part), 2008; Ord. 13956 §§ 13, 14, 15, 1999; Ord. 13152 § 107, 1997; Ord. 12835 § 1, 1996: Ord. 12248 (part), 1995: Ord. 10600 § 4, 1991)
(Ord. No. 17391, § 3, 8-24-2010, eff. 9-1-2010; Ord. No. 17741, § 1, 3-6-2012; Ord. No. 17803, § 2, 6-5-2012, eff. 6-11-2012)

13.04.050 Maintenance of sidewalks, curbs and gutters—Abutting property owner's duty.

A. It shall be the duty of the owner of property abutting on any public street containing a sidewalk, curb or gutter to keep such sidewalk, curb or gutter in repair.

B. When the director of the environmental services department or his designee or member of the code enforcement division finds that any such sidewalk, curb or gutter is in hazardous condition because of need of repairs or faulty construction, he may notify the owner of the abutting property to make such repairs or changes as may be necessary to put the sidewalk, curb or gutter in safe condition. If the owner fails to make such repairs or changes within a reasonable time given in the notice, he shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030.

C. If the owner fails to comply with the notice, the city council may authorize the work to be done by city forces or by contract, and may, after notice and an opportunity to be heard, assess the actual cost of the repairs against the abutting property and its owner. The ordinance of the city council making the assessment shall be recorded in the county clerk's office and the assessment shall then constitute a first and prior lien against the property from the date the improvements are ordered, and shall be a personal liability and charge against the owner of the property.

D. Notice to the owner may be given in person or by mail, or may be given to any agent authorized by the owner to collect the rents or make repairs on the property.

E. The owner of property abutting on any public street containing a sidewalk, curb or gutter that has become defective and has resulted in causing damage or injury as a result of such defective condition shall be primarily liable in damages for any loss or damage sustained as a result of such defective condition. The city shall not be held as assuming any such liability by reason of inspection or reinspection authorized herein or by reason of the approval or disapproval of any construction made or not made in accordance with standards or specifications of this chapter or other applicable provisions of this code. (Ord. 16982 § 3 (part), 2008; Ord. 13956 § 16, 1999; Ord. 13152 § 108, 1997; Ord. 12248 (part), 1995: prior code § 19-14.1)

(Ord. No. 17391, § 4, 8-24-2010, eff. 9-1-2010)

13.04.060 Maintenance of streets and drainage by streetcar and railroad companies.

Every streetcar or railroad company shall maintain in good condition all parts of streets occupied by its tracks, and the drainage facilities necessary to the tracks in the streets. (Prior code § 19-14)

13.04.070 Installation of sidewalk on property on which building permit issued.

A. The director of city development or his designee shall inspect each piece of property on which a building permit has been issued or for which a building permit has been applied for to determine whether the property owner shall be required to construct sidewalks. If there is no sidewalk on the part of the street or streets abutting the property, the director of city development or his designee shall proceed to order such sidewalk installed, unless the director or his designee authorizes that such sidewalk may be waived because of one or more of the conditions listed below. Such finding shall not deprive the city of its authority to order the installation of sidewalks at any subsequent time, as provided in this title.

1. In existing single-family residential neighborhoods where sidewalks are not present and have not historically been provided or comply;

2. On local streets within an approved subdivision where all the lots provide a minimum one-half acre lot area and the adjoining properties have no sidewalks;

3. On mountain residential and divided mountain residential streets within an approved mountain development subdivision;

4. On local streets within an approved planned unit development where pedestrian access is provided within the approved subdivision through an alternative sidewalk design not installed within the street right-of-way; provided, however, that an easement may be required by the city manager or designee to provide for the installation of traffic signage and signalization, utility services, neighborhood delivery and collection box units, or other similar facilities;

5. On local streets within an approved subdivision which meet all of the following criteria as determined by the director of city development or designee:

a. A characteristic of the neighborhood is that no sidewalks have been required to date,

b. The subdivision adjoins or lies within a neighborhood in which buildings or structures have been constructed on at least fifty percent of the lots within the neighborhood, and

c. The type of subdivision and intensity of land use is compatible with the character of the neighborhood;

6. On streets within neighborhoods that meet the criteria in Title 20 for infill development, where a street construction project, whether local, state or federal, has been awarded and the project includes construction of the sidewalks; and

7. In areas with severe topography or other natural constraints that will constrain proper implementation of this title. (Ord. 16982 § 3 (part), 2008; Ord. 13956 § 17, 1999; Ord. 13152 § 109, 1997: Ord. 12248 (part), 1995: Ord. 9292 § 1, 1988: prior code § 19-14.2)
(Ord. No. 17391, § 5, 8-24-2010, eff. 9-1-2010; Ord. No. 17803, § 3, 6-5-2012, eff. 6-11-2012; Ord. No. 17922, § 1, 1-2-2013)

Editor's note—Section 3 of Ord. No. 17922 states: "These requirements shall apply to both public and private streets.

13.04.080 Recording paving proceedings and ordinances.

A. All paving proceedings under Article 1105b of Vernon's Texas Civil Statutes shall be recorded and permanently kept in a separate book to be designated "Paving Proceedings." All other ordinances shall be recorded and permanently kept in a separate book to be designated "Ordinances."

B. The regular minute books shall show the action taken by the council on all paving proceedings and ordinances, identified by caption and number, if any; but not the text of such proceedings and ordinances.

C. The recording of paving proceedings and ordinances as herein provided shall have like effect as if the text thereof were recorded in the regular minute books. (Prior code § 19-11)

Chapter 13.06

ENGINEERING AND CONSTRUCTION MANAGEMENT DEPARTMENT

Sections:

13.06.010. Creation and purpose of the engineering and construction management department.

13.06.020 Staffing of the engineering and construction management department.

13.06.010. Creation and purpose of the engineering and construction management department.

A. There is hereby established the Engineering and Construction Management Department in the City of El Paso, which shall generally provide oversight for the capital and construction projects authorized by the city council.

B. The primary functions of the department shall be to:

1. Provide scoping, planning, and estimating support, right-of-way and other property acquisition, and procurement services for current and future capital improvement programs and authorized construction projects; provide fiscal oversight, design, program management, project management, construction management, inspection, and commissioning services and contract and reporting compliance for the city's capital projects;

2. When designated by the city manager, provide floodplain administration to the citizens of the City of El Paso as the official administrator of the National Flood Insurance Program; and

3. Generally perform duties and services relating to engineering and construction management services as assigned by the city manager and his designees, to include but not be limited to all duties and responsibilities assigned and set forth in the El Paso City Code for the department and the city engineer as may be designated by the city manager.

(Ord. No. 17386, § 2, 8-24-2010, eff. 9-1-2010; Ord. No. 17807, § 1, 6-5-2012, eff. 6-11-2012)

13.06.020. Staffing of the engineering and construction management department.

A. The department shall be staffed by a department director and such other appropriate positions as are authorized by city council.

B. The department director shall be responsible for the performance of duties as assigned by the ordinances of the city and as determined and directed by the city manager, including but not limited to the duties of the city engineer, provided however, that the city manager may reassign duties to other departments and staff, as he deems appropriate, as provided by the El Paso City Code.

(Ord. No. 17386, § 3, 8-24-2010, eff. 9-1-2010; Ord. No. 17807, § 2, 6-5-2012, eff. 6-11-2012)

Chapter 13.08

EXCAVATIONS*

Sections:

13.08.010 Definitions.

13.08.020 Permit required.

13.08.030 Permit—Application and requirements.

13.08.040 Fees, bonds and insurance.

13.08.050 One-year warranty and maintenance requirement.

13.08.060 Permit—Limitations.

13.08.070 Excavation and cut location limitations.

13.08.080 Protective measures.

13.08.090 Specifications.

13.08.100 Responsibility of permittee.

13.08.110 Monitoring wells.

13.08.120 Appeal.

13.08.130 Authority to issue citations.

13.08.140 Violation—Penalty.

13.08.010 Definitions.

A. "Design standards for construction" ("DSC") means the most recent edition of the regulations of the city engineer providing design standards for the construction of restoration of any cut or excavation in the city right-of-way.

B. "Normal city work hours" means city workdays from 8:00 a.m. to 3:00 p.m. Saturday, Sunday and official city holidays are not included in city workdays.

C. "Parkway" means the area of the city right-of-way from the back of the curb to the right-of way line.

D. "Permittee" means the governmental entity, person or business entity that has received a permit pursuant to this chapter.

E. "Property" means a parcel of land having a property or parcel identification number issued by the Central Appraisal District.

F. "Temporary traffic control plan" means a plan required pursuant to Chapter 18.30 describing temporary traffic control measures to be used for facilitating users through a work zone in a public right-of-way.

G. "Work" means any cut or excavation in the public right-of-way and/or any construction activities within the public right-of-way, including but not limited to public works projects by governmental entities, but shall not include El Paso Department of Transportation repair and maintenance. (Ord. No. 17487, § 1, 1-18-2011)

13.08.020 Permit required.

A. No person shall perform any work, make or cause to be made any cut or excavation in or under any street, alley, sidewalk, parkway or driveway within the city right of way without having first obtained a permit as required in this chapter. Permits are not required for the following activities in the Parkway: (1) utility service installations and repairs that require excavation depth of four feet or less than four feet and (2) utility pole installation or removal. Permittees who obtain a permit issued pursuant to this chapter that includes sidewalk cuts will not be required to obtain an additional separate sidewalk permit pursuant to the requirements of Chapter 13.04.

B. When an emergency occurs that requires an excavation, no permit shall be required prior to beginning work needed to respond to the emergency. All other work shall not proceed until a permit has been issued. The permit official shall be notified of the emergency as soon as possible. Limitations on hours of work in this Code shall not apply to work required in response to an emer-

---

***Editor's note—**Ord. No. 17487, § 1, adopted January 18, 2011, repealed the former Ch. 13.08, §§ 13.08.010—13.08.180, and enacted a new Ch. 13.08 as set out herein. The former Ch. 13.08 pertained to similar subject matter and derived from prior code § 19-15—19-23, 19-25, 19-26; Ord. 8229 §§ 1—9, 1984; Ord. 9430 § 9, 1988; Ord. 10780 § 1, 1991; Ord. 10909 § 1, 1992; Ord. 11044 § 1, 1992; Ord. 11705 §§ 1, 2, 1993; Ord. 11846, 1994; Ord. 12757 § 1, 1996; Ord. 13062 § 18, 1997; Ord. 13135 § 1, 1997; Ord. 13152 §§ 110—114, 116—118, 1997; Ord. 13956 §§ 18, 19, 1999; Ord. 15188 § 1 (part), 2002; Ord. 15189 § 1 (part), 2002; Ord. 15662, § 1, 2004; Ord. 15663 § 1, 2004; Ord. 16819 §§ 1—3, 2008; Ord. 16982 § 4, 2008; Ord. No. 17391, §§ 6—8, 8-24-2010.

gency. Emergencies exist only when there is a present danger to life, health or property, including but not limited to utility service outage. A permit shall be submitted as soon as possible but no later than noon of the city business day following the day the emergency occurred.
(Ord. No. 17487, § 1, 1-18-2011)

13.08.030 Permit—Application and requirements.

A. Application. The application for the permit required by this chapter shall be made in writing on a form supplied by the permit official and shall be signed by the applicant or an individual who is authorized in writing to act as the agent of the applicant. The application and accompanying documentation shall be submitted to the permit official and shall include the following:

1. The name, address, telephone numbers and e-mail address of the applicant and the person or people in charge of the work related to the permit, and

2. Location where the work will be performed including the street address of the property or adjacent property and the parcel identification number of the Central Appraisal District given to such property, and

3. The duration and schedule of the work, and

4. The description of the work, including but not limited to drawings showing the dimensions and characteristics of the proposed cut/excavation and restoration, a plan view of the work area, cross-sections of the backfill requirements and such other design information as may be required by the permit official, and

5. A traffic control plan, and

6. Certificates of insurance and permit bond, and

7. The one call system verification number (DIG TESS) for the work related to the permit, and

8. The name of the barricade company responsible for traffic set up, if applicable.

B. An applicant requesting a permit under this chapter shall be responsible for contacting a "one call" notification system servicing the area and will be required to furnish a verification number confirming that such a "one call" has been made as part of the application for permit. A permit issued under this chapter shall be denied for the failure of the applicant to contact a "one call" notification system servicing the area, and to provide a verification number confirming that such a "one call" notification system has been contacted by the applicant. This requirement, however, shall create no duty, express or implied, on the part of the city to verify that the applicant notified the one call system and received a verification number.

C. Public utility companies having permanent installations in or under streets, alleys or any other city right-of-way or city owned property by franchise or by special privilege license from the city shall obtain permits as required in this chapter.

D. Term. Permits shall be for a fixed term not to exceed thirty consecutive calendar days. The permit shall clearly identify the expiration date of the permit. If a permittee does not complete the work by the permit expiration date, the permittee must apply for and may be granted a permit extension for an additional thirty consecutive calendar days. An application for the extension of the term of the permit must be submitted to the permit official prior to the expiration date.

E. Traffic control permits are required pursuant to Chapter 18.30 and are in addition to the permit required in this chapter. Applicants for a permit under this chapter must also apply for a traffic control permit from the traffic engineer when such permit is required pursuant to Chapter 18.30. Failure to obtain a traffic control permit for the work that is subject of a permit issued under this chapter shall result in the revocation of a permit issued pursuant to this chapter.

F. Permittees shall request appointments for inspections by city inspectors for backfill, two sack, asphalt or concrete placement by calling the

permit official. Requests shall be made on or before the city work day prior to the day the permittee wishes the inspection to take place. Appointments shall be made subject to the availability of the city inspectors. Inspections not performed during normal city work hours shall be subject to the after hours inspection fee in Section 13.08.040. (Ord. No. 17487, § 1, 1-18-2011)

13.08.040 Fees, bonds and insurance.

A. Fees: The established fees shall be as follows:

1. Permit fee: The permit fee shall be charged for each permit issued. The permit fee shall be paid when the permit is issued, and shall not be refunded. Permit fees shall not include the costs related to occupancy that prevents the use of parking meters and permittees shall be subject to parking meter fees pursuant to Title 18. Permittees obtaining a permit under this chapter shall not be required to pay the sidewalk, street or alley space rental or storage fees that are required in Title 18. No permit fee will be charged to public utility companies operating under a franchise from the city or state or to city agencies, provided that city agencies are required to pay for inspection costs incurred by the permit official. Contractors applying for a permit to perform work on behalf of a public utility that is operating under a franchise with the city or the state shall not have to pay the permit fee when the public utility has provided verification to the city that such contractor is working on behalf of the public utility for the work authorized under the permit.

2. Permit extension fee: The permit extension fee shall be one-third of the original permit fee and shall be charged for each thirty-day extension of the permit. Permit extension fees shall be paid prior to issuance of each extension. No permit extension fee will be charged to public utility companies operating under a franchise from the city or state or to city agencies, provided that city agencies are required to pay for inspection costs incurred by the permit official.

3. Initial inspection fee: The initial inspection fee shall be included in the permit fee and includes the city's cost of up to two hours of inspection of the work during normal city work hours by city employees.

4. Additional inspection fee. Permittees shall pay an additional inspection fee that shall be charged for each additional hour or part of an hour of inspection by the City that is in addition to the first two hours of inspection.

5. After hours inspection fee. An inspection fee for inspection performed by the city during hours other than normal city work hours shall be charged for each hour or portion of an hour inspection is provided.

B. Bond requirements. No permit shall be issued under this chapter to any person, firm or corporation applying for a permit until such applicant has filed with the permit official a bond in the minimum amount of ten thousand dollars, signed by a surety company authorized to do business in Texas. The permit official may require a bond in an amount in excess of ten thousand dollars in the event the permit application is for work in excess of ten thousand dollars. The city shall be named as the obligee under such bond. The bond shall provide that the principal and its agents, employees, and subcontractors shall comply with all provisions of this chapter, that the principal shall pay all damages which are sustained by the city and which are caused by failure of the principal, its agents, employees or subcontractors to comply with the provisions of this chapter, and that the principal shall indemnify the city against claims arising out of such failure to comply, including but not limited to the one-warrant period required in this chapter. Bonds shall be issued for a duration sufficient to cover the one-year warranty period. The surety shall be acceptable to the city as to solvency and such surety shall be listed on the current Department of the Treasury's Listing of Approved Sureties, Department Circular 570, United States Department of the Treasury or its successor publication, ("Circular 570"). If the City becomes dissatisfied that the

surety is solvent or the surety is no longer included in Circular 570, the permit official may require a bond from a surety listed in Circular 570. Permit applicants that have provided a bond to the city in the amount required by the permit official for a permit pursuant to the requirements of a chapter of the City Code other than this chapter that meets all of the requirements established in this Chapter shall not be required to obtain an additional bond but are required to provide a copy of such bond, provided that such bond specifically includes coverage for the permit or permits issued pursuant to this chapter. Permittees who have multiple permits issued pursuant to this chapter are required to provide only one current valid bond for all such permits but may be required to provide a copy of the current bond with each application for a permit. Contractors under contract with a government agency shall provide the bond required in this section. No bond is required when all of the work performed pursuant to a permit issued under this chapter to a government agency is performed entirely by the employees of that government agency. Public utility companies operating under a state or city franchise shall not be required to provide the bond required in this section when the work authorized in a permit will be performed solely by employees of such public utility. Any person or entity that is not an employee of the public utility performing work under a permit on behalf of a public utility shall provide the bond required under this section.

C. Insurance requirements. No permit applicant shall be issued a permit until the applicant presents evidence satisfactory to the permit official that the applicant meets the following minimum insurance requirements:

1. The applicant shall procure and shall maintain during the term of the permit such commercial general liability, property damage liability and vehicle liability insurance, naming the permittee and any subcontractor performing work associated with the permit as insured, co-insured or additional insured for claims for damages for personal injury, including accidental death, as well as from claims for property damage that may arise from work associated with the permit.

2. Minimum limits of liability and coverage shall be two hundred fifty thousand dollars for bodily injury liability, including death, for each person and five hundred thousand dollars in the aggregate and one hundred thousand dollars for property damage for each occurrence and one hundred thousand dollars in the aggregate.

3. Such insurance shall be written by an accredited insurance company under the supervision of the Board of Insurance Commissioners of the State of Texas. Evidence of compliance with these insurance requirements shall be considered as having been met when copy of the insurance policy or a certificate of insurance has been filed with and approved by the permit official. Such policy shall include an endorsement that the city is named as an additional insured to the full amount of the policy limits and that permit official shall be notified at least thirty days in advance in the event the policy or policies are canceled and ten days in advance for non-payment of policy premiums. The required endorsement shall be provided to the permit official. The permittee shall maintain said insurance with a solvent insurance company authorized to do business in Texas. The policy shall provide that the insurer will defend against all claims and lawsuits which arise and will pay any final judgment of a court of competent jurisdiction against the city, its officers, agents, servants or employees and permittee, his officers, agents, servants or employees. Failure by permittee to keep the policy in full force and effect throughout the term of the permit shall be grounds for cancellation of the permit by the permit official. The permit official shall provide notice of cancellation of the permit to the permittee, at which time the permittee shall cease the work allowed under the permit.

4. Permit applicants who have provided certificates of insurance to the city pursuant to the requirements of a chapter of the City Code other than this chapter that meet all of the requirements

established in this chapter shall not be required to obtain an additional insurance but are required to provide such certificates of insurance showing present coverage as required in this chapter.

Permits shall be required in connection with all city (including but not limited to El Paso Public Service Board/El Paso Water Utilities), county, state or federal public works projects provided that no permit fee shall be required for such projects. When the work permitted under this chapter is performed by the employees of a governmental agency, the insurance requirements of this section may be met by providing certification that government agency obtaining the permit is self-insured. Work permitted under this chapter performed by those contracting with a governmental agency shall provide the insurance required herein.

5. Self-insurance. A permittee may satisfy the vehicle insurance requirements of this section by providing the city with a current "Self-insurance Certificate" issued by the Texas Department of Public Safety or its successor agency. A permittee may satisfy the worker's compensation insurance requirements of this section by providing the city with a current "Certificate of Authority to Self-insure" issued by the Texas Department of Insurance, Division of Worker's Compensation or its successor agency.

(Ord. No. 17487, § 1, 1-18-2011; Ord. No. 17772, § 1, 4-17-2012)

13.08.050 One-year warranty and maintenance requirement.

Any person issued a permit shall agree and warrant to maintain the excavated area for a period of one year after the completion of the restoration of the right of way, as approved by the city. Maintenance of the excavated area shall include the repair of any type of failure, including, but not limited to, the area permittee was required to repave. Repairs during the warranty period shall meet the standards of the DSC. The city may conduct inspections of the restored area throughout the one-year warranty period and require maintenance and correction of the work by the permittee. Failure of the permittee to correct the work shall constitute a violation of this chapter.

(Ord. No. 17487, § 1, 1-18-2011)

13.08.060 Permit—Limitations.

A. Each permit shall specify the location of each cut or excavation allowed in the permit and the dates during which the city right-of-way or any portion thereof may be cut or excavated as to each such location. The time for each cut or excavation allowed in the permit shall not exceed thirty consecutive calendar days, provided that if the work for a cut or excavation is not completed within the time allowed in the permit, the permittee shall obtain a permit extension. A work schedule for each such location not completed as required in the original permit shall be submitted with the application for the permit extension. Each permit extension shall not be issued for more than thirty consecutive calendar days.

B. Master permits may be issued for multiple cuts or excavations in the city right-of-way provided that they pertain to the same project scope of work, adequate documentation is provided to the permit official and the requested master permit does not create conflicts with street closures and property access.

C. Permits shall not be assignable. No person shall use the name of another in obtaining a permit, and no person shall allow his name to be used by another in obtaining a permit, except in the case of an authorized agent acting for his principal.

(Ord. No. 17487, § 1, 1-18-2011)

13.08.070 Excavation and cut location limitations.

The permit official may restrict the area in which a cut or excavation may occur. In granting permission for a cut or excavation, the permit official shall consider the need for the proposed cut or excavation, amount of traffic at the location in question and safety factors, including but not limited to the hazards likely to be created by such

cut or excavation. The permit official shall have the authority to require a location of the cut or excavation other than the location requested by the applicant when one or more alternative locations are available to the applicant. The permit official's determination of required location shall be based on the following information that shall be provided by the traffic engineer to the permit official: the amount and pattern of traffic, nature and condition of the right of way and safety factors, including but not limited to reduced risk to the traveling public.
(Ord. No. 17487, § 1, 1-18-2011)

13.08.080 Protective measures.

A. While the cut or any part thereof is open, and while any part of the street, sidewalk or public place is obstructed by rubbish or material, the permittee shall erect and maintain traffic control devices as required by the traffic control permit and shall maintain safe passage for pedestrian and vehicular traffic.

B. If substantially the full width of any street, alley, sidewalk or public place is excavated, the permittee shall maintain a driveway or walkway across the excavation until it is refilled. The driveway or walkway, as applicable, shall be specified in the plans submitted with the application for the permit and such driveway and/or walkway shall meet specifications approved by the permit official.

C. If the permittee fails to take any protective measures herein required, the permit official may, in his discretion, authorize the work to be done by city forces or by contract. Permittee shall pay the city for its costs of protective measures within ten city working days of receiving an itemized statement for such costs.

D. Steel plates. Requirements for providing and maintaining steel plates are contained in the DSC.
(Ord. No. 17487, § 1, 1-18-2011)

13.08.090 Specifications.

A. All work, including but not limited to cutting of paving, excavation, backfill, bedding, base course and placement and compaction of pavement shall be done pursuant to the standards and specifications in the city's Design Standards for Construction, Addendum 1, or successor standards for construction in effect at the time of the issuance of the permit or as specified in the permit by the permit official. The DSC governs the construction and restoration of the streets, sidewalks, parkways, driveways, and related infrastructure within the city's right-of-way and does not apply to the construction related to public utility infrastructure within the city's right-of-way.

B. Minimum patching requirements. The minimum area that shall be patched pursuant to the standards in the DSC and any provision specified in the permit, includes:

FOR EXCAVATIONS OR CUTS ACROSS THE STREET RIGHT-OF-WAY: (1) patching the excavated or cut area; and (2) patching two feet from each side of the excavation or cut area, and (3) patching no more than eight feet in each direction from the areas patched pursuant to (1) and (2) of this paragraph, provided that patching need not extend across a median when the excavation did not extend across the median and providing that if the area patched under (1), (2) and (3) of this paragraph extends into an area that was patched prior to the excavation, such patching shall be extended to include all of the area of the prior patch, as shown in the illustrations in the DSC.

FOR EXCAVATIONS OR CUTS ALONG THE LENGTH OF THE STREET RIGHT-OF-WAY:

a. In traffic lanes:

(1) Restoration width.

(a) Where the excavated area or cut is not more than fifty percent of the width of the right-of-way the excavated area shall be patched (restored and resurfaced) and the patching shall extend to the next existing original paving joint, provided that patching shall always be no less than to the center of the wheel path in all lanes in which the excavation occurs.

(b) Where the excavated area or cut is more than fifty percent of the width of the right-of-way the excavated area shall be patched (restored and resurfaced) and the patching shall extend from curb to curb.

(2) All patching (restoration and resurfacing) shall include the application of an asphalt based sealer consisting of a blend of asphalt, selected mineral fillers and/or acrylics, designed specially to increase the life expectancy of asphalt pavements. The sealer shall be applied in accordance with the specifications in the Design Standards for Construction (Pavement Cut Trench Repair, Addendum 1).

b. In parking and other lanes such as bike lanes. Patching (restored and resurfaced) two feet from each side of the length of the excavation area or cut and patching to the curb or original paving joint, whichever is the greater distance, provided that patching shall always be not less than to the center of such lane, as shown in the illustrations in the DSC.

FOR EXCAVATIONS OR CUTS OF OTHER AREAS: The requirements for patching (restoration and resurfacing) other areas within the city parkway, including but not limited to sidewalk and curb repair, are set forth in the DSC. (Ord. No. 17487, § 1, 1-18-2011; Ord. No. 17863, § 1, 8-28-2012)

13.08.100 Responsibility of permittee.

A. The permittee shall be responsible for, and shall hold the city harmless against, all damages to persons or property resulting from the making or repair of the cut or excavation, whether done by himself or by the city; and the taking out of the permit shall be deemed a contractual acceptance of this obligation by the permittee in a condition of the issuance of the permit. The person making the cut or excavation shall continue to protect it and be responsible for its condition until the work allowed in the permit is completed as required in the permit.

B. If the permittee fails to complete any work required of him hereunder as promptly as reasonably possible consistently with good construction practice, or if the permittee fails to take any protective measure required of him by this chapter, the work may, in the discretion of the permit official, be done by city forces or by contract whether requested or not; and the proper charge shall be made against the permittee in accordance with this section.
(Ord. No. 17487, § 1, 1-18-2011)

13.08.110 Monitoring wells.

A. Permit required. Where drilling of a monitoring well is proposed on public right-of-way or city-owned property, a monitoring well permit shall be required. A permit application may cover one or more monitoring wells for a single property. If additional wells are required on the same property subsequent to a permit having been issued, a new monitoring well permit shall be required for the additional wells. Separate monitoring well permits shall be required for wells on property not included in an existing monitoring well permit. A monitoring well permit shall expire at the end of one year from of the date of issuance of the permit, at which time the permit will become void and a new permit, obtained through the filling of a new application with the permit official, shall be required.

B. Monitoring well permit fees. A permit application shall be accompanied with the established permit fee. The permit fee shall not be refundable. The permit fee shall include the cost of inspecting the capping of the monitoring wells that are allowed under the permit. If any person commences construction work on public right-of-way or city-owned property prior to the issuance of a permit, such person shall submit an application for a permit and pay the established permit fee for an application submitted after work begins, provided, however, that such additional fee shall not be required in cases of an emergency, as emergency is described in Section 13.08.015 B. For purposes of this subsection, the Texas Commission on Environmental Quality or the director of the department of environmental services may

declare an emergency; provided, that the city is properly notified by written notice to the permit official. Permit fees shall not include the costs related to occupancy that prevents the use of parking meters and permittees shall be subject to parking meter fees pursuant to Title 18. Permittees shall not be required to pay sidewalk, street or alley space rental under Title 18 or for sidewalk, street or alley storage fees pursuant to Title 18.

C. Permit contents. The monitoring well permit application shall be on a form approved by the permit official that shall be submitted to the permit official and include the information required in Section 13.08.030 A.1. through 8. and the following information:

1. A site map of the proposed monitoring well(s);

2. A narrative describing the need for the well(s), the extent of interruption of traffic, and the proposed drilling schedule of the monitoring well(s);

3. When issued by the Texas Commission on Environmental Quality (TCEQ), a copy of the demand letter requesting corrective action on delineation of ground contamination, which shall contain the LPST identification number if available;

4. The applicant shall be required to provide copies of the permit application and accompanying information to the engineering services manager of the El Paso Water Utilities and the Permit Official.

D. Other requirements. The requirements of Section 13.08.20 B. shall apply to all monitoring well permits. The permit shall require that the Permittee shall meet all TCEQ requirements for capping the monitoring well.

E. Permit issuance. Upon verification by the applicant that the previously described information has been provided to all indicated departments, the application shall be accepted for processing. The permit official shall, within five city working days after acceptance of the application, issue or deny the permit based on the information provided. It shall be the responsibility of the applicant to obtain clearance from all affected utility agencies and the engineering services manager of the El Paso Water Utilities and submit such clearances with the permit application. The applicant shall meet the insurance and the bond requirements of Section 13.08.030.

F. Notification to director of the department of environmental services. Whether the monitoring well is on public right-of-way, city-owned property or private property, copies of the well driller's log submitted to the Texas Commission on Environmental Quality shall be provided to the director of the city's department of environmental services. If at any time during the construction, operation or monitoring of a well, suspected hazardous or toxic substance is encountered, the director of the department of environmental services shall be immediately notified by the permittee.
(Ord. No. 17487, § 1, 1-18-2011)

13.08.120 Appeal.

Any applicant or permittee aggrieved by the decision of the permit official concerning the issuance, denial, revocation or suspension of a permit may appeal such decision to the appeals officer in accordance with the requirements and procedures of Chapter 2.30.
(Ord. No. 17487, § 1, 1-18-2011; Ord. No. 019759, § 2, 7-22-2025)

13.08.130 Authority to issue citations.

The permit official is authorized to enforce the provisions of this chapter and shall have the power to issue misdemeanor citations to any persons violating the provisions of this chapter.
(Ord. No. 17487, § 1, 1-18-2011)

13.08.140 Violation—Penalty.

Any person who shall violate any provision of this chapter shall, upon conviction, be guilty of a misdemeanor and punished by a fine not exceeding five hundred dollars. Each day the violation occurs shall constitute a separate offense.
(Ord. No. 17487, § 1, 1-18-2011)

13.12.010 Definitions.

A. Words and Phrases Generally. Whenever any word or phrase used herein is not defined herein, but is defined in any other ordinance or state law, such definition shall be deemed to apply to such word or phrase used herein.

B. Abandoned or Abandoned Driveway. For the purpose of this chapter a driveway shall be considered to be abandoned when either one or both of the following conditions exist:

1. When the adjacent property has been vacant and unused for any apparent purpose for a period of not less than six months; or

2. When buildings or other structures have been situated on the adjacent property in such manner as to prevent a vehicle from passing completely on to such property.

C. "Commercial driveway" means any passageway designed or intended for vehicular movements between the roadway and any point outside the street right-of-way, when such passageway leads to any public or private area outside the street which is designed or intended for the parking of any commercial vehicle, or for the parking of more than three passenger vehicles.

D. "Curb return" means that part of the curbing at an intersection or at a driveway which is rounded to form the connection between intersecting curblines.

E. "Freeway or expressway" means any fully controlled access highway which is constructed in such manner as to prohibit any traffic intersections, with cross streets being built either under or over or terminating before entering such highway.

F. "Frontage" means that portion of adjacent property contiguous to a street property line. For the purpose of this chapter, frontage shall be measured as the total distance over which the street right-of-way line and the lot or property lines are congruent, and shall include all lots or properties under the legal control of the applicant.

G. "Frontage road" means any roadway parallel and adjacent to any freeway, the principal purpose of which is to provide for the transfer of vehicle traffic between the freeway and other streets.

H. "Limited access or controlled access highway" means every street or roadway in respect to which owners or occupants of abutting lands and

other persons have no legal right of access to or from the same, except at such points only and in such manner as may be determined by the city council.

I. For the purposes of this chapter, the term "ramp" means any roadway providing a connection between a freeway and a frontage road, irrespective of any difference in grade or elevation between such freeway and frontage road.

J. "Residential driveway" means any passageway designed or intended for vehicular movements between the roadway and any point outside the street right-of-way, when such passageway leads to any public or private area designed or intended for the parking of not more than three passenger vehicles; provided, however, that driveways to gasoline service stations shall be considered as commercial driveways.

K. "Safety zone" means that portion of the right-of-way between any two driveways. (Prior code § 19-30)

13.12.020 Permit—Required.

A. Except as otherwise provided in this code, no person shall construct a driveway within the city limits without first obtaining a driveway construction permit from the permit official as hereinafter provided.

B. No such permit shall be required for the construction of any driveways installed as a part of the paving or widening of any street in accordance with plans approved by the traffic engineer, and no permit shall be required for driveways when such driveways are included as a part of a building or construction plan.

C. The permit official will issue driveway permits and will enforce the requirements of this chapter for all properties.

D. Permits issued pursuant to this chapter shall be valid for six months from the date of issuance. (Ord. 16982 § 5 (part), 2008; Ord. 13956 §§ 20, 21, 1999; Ord. 13062 § 19, 1997; Ord. 12247 (part), 1995: Ord. 11707 § 1, 1993; prior code § 19-31)
(Ord. No. 17391, § 9, 8-24-2010, eff. 9-1-2010)

13.12.030 Permit—Application—Generally.

Applications for driveway permits shall be made by the owner or lessee of the abutting property, or by a contractor representing the owner or lessee. Application by a contractor shall state the name of the owner or lessee whom he represents. (Prior code § 19-33)

13.12.040 Permit—Application—Contents.

A. Application for such permit shall be made to the permit official as provided in Section 13.12.020(C) on forms provided by the city. Each such application shall show the address of the property where the driveway is to be located, the width of the driveway requested, the location of the driveway requested with respect to street intersections and private property lines, the location of any other existing driveways serving the same property, if any, and such other information as may be requested by the city. Additionally, an applicant requesting a driveway permit shall be responsible for contacting a "one call" notification system servicing the area, and will be required to furnish a verification number confirming that such a "one call" has been made a part of the application for permit. This requirement, however shall create no duty, express or implied, on the part of the city to verify that such a "one call" has been made by the applicant.

B. No such permit shall be issued by the permit official until the location and design of the proposed construction has been approved by the traffic engineer, nor until curb and driveway grades and elevations have been approved by the permit official. (Ord. 16982 § 5 (part), 2008; Ord. 13956 §§ 22, 23, 1999; Ord. 13062 § 20, 1997; Ord. 12247 (part), 1995: Ord. 11707 § 2, 1993; prior code § 19-32)
(Ord. No. 17391, § 9, 8-24-2010, eff. 9-1-2010)

13.12.050 Permit—Fee.

A. The standard fee for a driveway permit shall be sixty dollars per curb cut.

B. The total number of curb cuts on public property of all driveways proposed to serve any one property shall determine the required fee.

C. Reinspection Fee. A fee of fifty dollars shall be required to be paid for each reinspection due to work failing to comply with this chapter or other applicable ordinances of the city, or the work was not ready for inspection when requested. A reinspection fee shall not be required to be paid when a reinspection may not be completed due to weather or other conditions not created by the applicant. (Ord. 15751 § 1, 2004: Ord. 12247 (part), 1995: Ord. 12111 § 2, 1994; Ord. 10800 § 1, 1991: prior code § 19-34)

13.12.060 Indemnification.

The grantee of any driveway permit shall hold harmless the city and its agents and employees against any action for personal injury or property damage sustained by reason of the exercise of his permit. (Prior code § 19-53)

13.12.070 Permit—Relocation or alteration.

No driveway shall hereafter be relocated or structurally altered, nor any dimensions altered without a duly executed permit as set forth herein. (Prior code § 19-35)

13.12.080 Materials.

A. The grantee of any driveway permit shall furnish all materials necessary for the construction of the driveways authorized in the permit.

B. All materials shall meet city specifications and shall be subject to approval by the permit official. (Ord. 16982 § 6 (part), 2008; Ord. 13956 § 24, 1999; Ord. 13152 § 119, 1997; Ord. 12247 (part), 1995: prior code § 19-39)
(Ord. No. 17391, § 9, 8-24-2010, eff. 9-1-2010)

13.12.090 Location.

A. When measured at the curbline of the roadway, and perpendicular to the centerline thereof, no commercial driveway shall be located nearer than two and one-half feet to any property line; provided, that upon approval of the traffic engineer, driveways may be so situated as to serve more than one property if the total width of such driveway does not exceed thirty-five feet when measured as provided in Section 13.12.120.

B. When measured at the curbline of the roadway and perpendicular to the centerline thereof, no driveway shall be located nearer than ten feet to any property line adjacent to or parallel to any intersecting street; provided, that when street property lines are described by curves, no driveway shall be located nearer than five feet to the end of such curved property line.

C. When the street abutting the property to be served by any driveway is a frontage road to any freeway, no commercial driveway shall be located so that the centerline thereof is nearer than seventy-five feet to the intersection of the centerline of any ramp with the curbline of said frontage road. (Prior code § 19-40)

13.12.095 Slopes.

All driveways shall extend from any public or private street, alley pavement or curbline to any garage, carport or parking space. A minimum parking space length of twenty feet measured from the property line to a garage, carport or parking space shall be provided. The slope of a driveway from the face of the curb at the gutter to any garage, carport or parking space shall be no greater than ten percent for the first twelve feet, and not greater than fourteen percent thereafter. The vertical transition of the driveway shall be designed to prevent contact of any vehicle undercarriage or bumper with the surface. Provided, however, that any provision within this section may be modified upon approval of the permit official. (Ord. 16982 § 6 (part), 2008; Ord. 13956 § 25, 1999: Ord. 13152 § 120, 1997: Ord. 12247 (part), 1995: Ord. 10800 § 2, 1991)
(Ord. No. 17391, § 9, 8-24-2010, eff. 9-1-2010)

13.12.100 Angle of intersection of roadway.

The interior angle formed by the intersection of the centerline of the roadway and the centerline of the driveway shall be not more than ninety degrees and not less than forty-five degrees. (Prior code § 19-41)

13.12.110 Flaring at intersection of roadway.

Where the driveway and the roadway pavement meet, flaring of the driveway shall be permit-

ted to allow safe easy turning of the vehicle either into or out of the property. The radius of the flare shall be as long as practical to provide free and safe turning movements, but shall in no case be less than two and one-half feet. For the purpose of this chapter, flares may be provided either by sloping the street curb, or by providing curb returns. (Prior code § 19-43)

13.12.120 Width.

A. The width of a commercial driveway where it crosses the property line shall be not less than fifteen feet nor more than thirty-five feet measured at right angles to the centerline of the driveway; provided, however, the minimum width of a two-way driveway shall be twenty-five feet.

B. The width of a residential driveway where it crosses the property line shall be not less than twelve feet nor more than twenty-four feet when measured at right angles to the centerline of the driveway; provided, that the driveway width may be decreased to ten feet at the property line. The width of a residential driveway may be increased to a maximum of thirty feet when it is proposed to serve a three-car garage or when the overwidth is needed to store a recreation vehicle, trailer, boat, etc. off the public street and on private property; provided, that such storage of a recreation vehicle, trailer, boat, etc., will not constitute a visual obstruction to the driving public. (Ord. 8746 § 1, 1986: prior code § 19-42)

13.12.130 Municipal facilities.

No driveway shall be permitted to encompass or encroach upon any municipal facility. The relocation of the municipal facilities may be authorized, however, if the construction of a driveway as authorized herein shall encroach thereon, and such relocation shall be completed by and at the expense of the owner or lessee of the adjacent property. Any work done in such relocation shall be done in accordance with the specifications of the city department or public utility having control of the facility to be relocated. (Prior code § 19-44)

13.12.140 Intermediate island.

Between any two driveways serving the same property there shall be an intermediate island within the right-of-way. Such islands shall measure not less than six feet along the property line, and not less than fifteen feet along the curbline or edge of pavement of the street. (Prior code § 19-45)

13.12.150 Service stations for motor vehicles.

No service pump island, vendor stand, tank or water hydrant, or any other device or structure designed or intended to be used to service motor vehicles shall be erected within twelve feet of the street right-of-way; provided, that in instances where the lot size, shape or other physical characteristic makes this requirement impractical, the traffic engineer may reduce this requirement, but in no case shall this requirement be reduced to less than ten feet. Any such authorization shall be obtained from the traffic engineer in writing before any permit is issued. (Prior code § 19-46)

13.12.160 Parking areas.

Where the area immediately behind and adjacent to the street right-of-way is to be used as a vehicle parking area, curbs or other barriers shall be installed as may be required by the traffic engineer to prohibit such parked vehicles from extending into the right-of-way. Curbs or other barriers so required not less than six inches high, and shall be located not less than three feet from the right-of-way line on the adjacent property, except that walls or fences over twenty-four inches high may be situated on the property line. (Prior code § 19-47)

13.12.170 Drainage structures.

Drainage in gutters or side ditches shall not be altered or impeded. When drainage structures are required, the size of opening and other design features shall be approved by the permit official before any permit is issued. (Ord. 16982 § 6 (part), 2008; Ord. 13956 § 26, 1999: Ord. 13152 § 121, 1997: prior code § 19-48)
(Ord. No. 17391, § 9, 8-24-2010, eff. 9-1-2010)

13.12.180 Access by handicapped.

Driveways shall be designed and constructed in such a manner that the safe and convenient movement across the driveways by physically handicapped persons, including those in wheelchairs, shall not be impeded. (Prior code § 19-48.1)

13.12.190 Driveway abandonment.

A. When a driveway has been abandoned within the meaning of Section 13.12.010, the traffic engineer may order the replacement of curbing and/or sidewalk so as to effectively close such driveways.

B. When any such driveway is to be closed for the reasons set forth in subsection A of this section, the traffic engineer shall notify the property owner in writing of the work to be done. Upon notification thereof, the property owner shall proceed to perform such work at his own cost.

C. If within thirty days from such notification work has not been started on the installation of the curb and/or sidewalk as set forth in the notification, such work may be done by the city and all costs thereof assessed to the property. (Prior code § 19-49)

13.12.200 Curbing required.

A. No building permit shall hereafter be issued for the construction of any building designed or intended to be used for commercial purposes unless the construction plans for such structure indicate the installation of curbing where such is not already in place, and of driveways, if any are required, in accordance with the regulations set forth herein.

B. In those cases where the grade and/or location of the permanent street curb cannot be established because of existing conditions, the curbs required to be shown on the plans need not be installed until such time as such curb is constructed by or at the instance of the city; provided, that construction of temporary curbs may be authorized pending establishment of grades and locations of permanent curbs.

C. Where required, sidewalks shall extend to the street curbline of the intersecting street. Sidewalks may be required on both the side and front streets when the need thereof exists in the opinion of the city council. (Prior code § 19-50)

13.12.210 Variances.

Where special conditions exist, or where practical difficulties in the development and adequate use of land would result from the literal enforcement of the terms of this chapter, the traffic engineer is hereby authorized to vary the requirements herein set forth, provided that any such variances granted shall be in harmony with the general intent of this chapter, and consistent with the public interest, safety and general welfare. Any substantial variances shall be in writing and shall be specifically set forth in the permit issued. (Prior code § 19-51)

13.12.220 Maintenance.

The maintenance of any driveway shall be the responsibility of the adjacent property owner. (Prior code § 19-36)

13.12.230 Clarification regulations.

For more ready understanding of the requirements set forth in this chapter there is attached hereto, and by this reference made a part hereof, a drawing entitled "DRIVEWAY REGULATIONS," copies of which shall be made available to any interested party by the traffic engineer. (Prior code § 19-54)

13.12.240 Inspections.

The city reserves the right to inspect driveways at the time of construction and to require such changes as may be necessary to make the construction conform to city requirements. At any time after the construction of any driveway, the city reserves the right to inspect such driveway and require such repairs or maintenance as may be necessary to protect the public. The cost of any such repair or maintenance shall be borne by the adjacent property owner. (Prior code § 19-37)

13.12.250 Appeals.

In the event that any application is rejected under the provisions of this chapter, the applicant therefor may appeal such decision to the city council. All such appeals shall be made in writing, and shall be submitted to the city clerk within ten days of notification that his original application has been denied. (Prior code § 19-52)

13.12.260 Violation—Penalty.

Any person who shall violate any provision of this chapter shall be deemed guilty of a misdemeanor and punished by a fine not exceeding five hundred dollars; and if such violation shall be continuing, each day's violation shall constitute a separate offense. (Ord. 9430 § 10, 1988: prior code § 19-55)

Chapter 13.16

INSURANCE REQUIREMENTS FOR WORK WITHIN RIGHT-OF-WAY OF PUBLIC STREETS AND ALLEYS

Sections:

13.16.010 Required.

13.16.020 Exceptions.

13.16.030 Violation—Penalty.

13.16.010 Required.

A. No permit required by this title shall be issued by the city for any work within the right-of-way of any public street or alley, including but not limited to street and alley cuts and excavations, or the installation, construction, alteration, repair or removal of paving, sidewalks, curbs, gutters or driveways, unless the permittee has filed with the city clerk of the city at the office of the city clerk, 2 Civic Center Plaza, Second Floor, El Paso, Texas, a certificate of liability insurance accompanied by a copy of the policy of insurance as hereinafter set forth. If such policy shall not be kept in full force and effect, the permit shall thereupon automatically become void.

B. Such policy shall be issued by an insurance company duly authorized to do business in the state of Texas and shall be subject to approval of the city after review by the city attorney as to form and the city engineer as to sufficiency. Such policy shall provide in substance that the insurer will defend against all claims and lawsuits which arise and to pay any final judgment of a court of competent jurisdiction against the city, the permittee, or the agents, servants, officers or employees of either, for damages or injuries resulting from the performance of work by the permittee, his agents, servants or employees while performing the work on the right-of-way of any public street or alley in the city. The maximum amount recoverable under such policy shall be not less than two hundred fifty thousand dollars for death of or injury to any person in any one accident, five hundred thousand dollars for death of or injury to two or more persons in any one accident, and one hundred thousand dollars for property damage. The policy of insurance shall name the permittee and the city as insureds to the full amount of the policy limits. Such policy shall inure to the benefit of any person in whose favor such judgment may be rendered, but may contain a provision that suit against the insurer may not be brought until the permittee has failed to pay the final judgment of a court of competent jurisdiction against him.

C. The policy shall contain a provision that it may not be canceled, revoked or annulled by the insurer without giving ten days' prior written notice thereof to the city clerk. The permittee shall not surrender or release such policy without filing in lieu thereof another policy complying with the requirements of this section, or surrendering his permit.

D. If the city, after review of such insurance policy by the city attorney, shall determine that the policy has become impaired so as to fail to afford the protection to the public contemplated by this section, he shall require new or additional insurance by giving written notice to the permittee, who shall within five days after receiving such notice, provide such new or additional insurance.

E. All releases executed by or on behalf of persons suffering damage because of work done in a street or alley by the permittee shall be filed with the city clerk by the person in whose favor such release is executed within ten days of such execution.

F. Neither the city nor any officer or employee thereof shall be liable for the financial responsibility of any insurer, or in any manner become liable for any claim, or act, or omission, relating to the work done under any such permit or the insurance thereon. (Ord. 13152 § 122, 1997; Ord. 12792 § 1, 1996; Ord. 8580, 1986; Ord. 8579, 1986; prior code § 19-10.1(a))
(Ord. No. 17391, § 10, 8-24-2010, eff. 9-1-2010)

13.16.020 Exceptions.

The insurance requirements of Section 13.16.010 shall not apply to:

A. The department of water utilities of the city or any other city department engaged in work performed as part of a public work or where work is being performed by city forces;

B. Work performed by a public utility company operating under a valid franchise from the city.

C. Driveway, curb or sidewalk work performed by a property owner in front of a building owned or occupied by him as his home. (Prior code § 19-10.1(b))

13.16.030 Violation—Penalty.

Any person who fails to provide insurance or to keep insurance in force when required to do so by this chapter shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030. (Prior code § 19-10.1(c))

Chapter 13.20

MISCELLANEOUS STREET AND SIDEWALK USE REGULATIONS

Sections:

13.20.010 Fires in streets unlawful.

13.20.020 Mixing mortar on paved streets.

13.20.030 Boxes, barrels, etc. on sidewalks.

13.20.040 Selling merchandise prohibited on and near public right-of-way.

13.20.060 Receiving and forwarding goods on sidewalks.

13.20.070 Poles and posts not to be placed in sidewalks—Generally.

13.20.080 Poles and posts not to be placed in sidewalks—Exception.

13.20.090 Builders excepted from restrictions.

13.20.100 Basketball backboards prohibited.

13.20.110 Bus bench franchises.

13.20.120 Waste container franchises.

13.20.010 Fires in streets unlawful.

No person shall build, kindle or maintain any fire of any nature or of any material whatever in any street, square or alley in the city. (Prior code § 19-1)

13.20.020 Mixing mortar on paved streets.

No person shall mix any lime, mortar or cement upon any of the paved streets, squares or alleys of the city. (Prior code § 19-2)

13.20.030 Boxes, barrels, etc. on sidewalks.

No person shall place any barrel, box or other article or substance on any sidewalk in the city so as to obstruct the passage along such sidewalk or any part thereof. (Prior code § 19-3)

13.20.040 Selling merchandise prohibited on and near public right-of-way.

A. Definitions. The following definitions shall apply in this section:

1. "Arterial" means a "street, arterial" as defined under "street" in Section 19.50.030 this Code.

2. "Business day" means a Monday, Tuesday, Wednesday, Thursday or Friday excluding any holiday observed by the City of El Paso where city administrative offices are closed.

3. Reserved.

4. "The downtown area" means the area bounded by Yandell Street, Kansas Street, Cesar Chavez/Border Highway and Santa Fe Street, and including the entire width of the public rights-of-way.

5. "Obstruct" means to render impassable or to render passage unreasonably inconvenient or hazardous.

6. "Public right-of-way" shall have the meaning set forth in Section 19.50.030 of this Code.

7. "Stand" means any structure, machine, box, table, container, vessel, vehicle, utility post or pole, traffic control signs or signals, building or any other thing located, placed, stopped or allowed to remain upon, over or along any street, sidewalk, alley, square, park, or public right-of-way or any portion thereof within the city.

8. "Vehicle" means any vehicle, motorized or nonmotorized, bicycle, cart, boat or other watercraft, trailer, recreational vehicle or camper.

B. Except as provided below or permitted elsewhere in this Code, it is unlawful to:

1. Have, keep, maintain, run or conduct a stand in or upon or over or along any street, sidewalk, alley, square, park or other public right-of-way, or any portion thereof within the city.

2. Sell, offer for sale, or expose to sale any commodity, goods, wares, merchandise, produce, other farm products, candy, sodas and other like refreshments, new or used vehicles, or any other articles or things of value of any kind in, from, out of or affixed to a stand, or by placement of such

items directly upon the ground over or along any street, sidewalk, alley, square, park or other public right-of-way.

3. Have, keep, maintain, run or conduct a stand in or upon public or private property along an arterial or on any portion of a vacant lot that abuts an arterial.

4. Sell, offer for sale or expose to sale any commodity, goods, wares, merchandise, produce, other farm products, candy, sodas and other edible or potable substances, new or used vehicles, or any other articles or things of value outside of a permanent building in, from, or out of a stand, or by placement of such items directly upon the ground upon public or private property along an arterial or on any portion of a vacant lot that abuts an arterial.

5. Knowingly allow any person, firm or corporation to have, keep, maintain, run or conduct a stand or sell, offer for sale or expose to sale any commodity, goods, wares, merchandise, produce, other farm products, candy, sodas and other edible or potable substances, new or used vehicles, or any other things of value outside of a permanent building in, from, or out of or affixed to a stand, or by placement of such items directly upon the ground on property along an arterial or on any portion of a vacant lot that abuts an arterial unless such sale is permitted under this section.

C. The prohibitions contained in subsection B. shall not apply to the following types of sales, including offers for sale or exposures to sale, provided that the requirements of all other applicable city code provisions are met, including but not limited to zoning regulations, licensing requirements and health regulations:

1. A sale of newspapers, pamphlets, handbills or other written or printed matter or merchandise held and sold by a person, provided that no materials or items to be offered for sale by the person are placed or stored on the public right-of-way prior to the time of sale.

2. The distribution or delivery of newspapers from a vehicle.

3. A sale from a stand of newspapers, pamphlets, handbills or other written or printed matter or merchandise sold or distributed for the purpose of disseminating news, information or religious materials, provided that such stand complies with the requirements imposed under Chapter 12.68 of this Code, does not obstruct any street, sidewalk, alley or any other public right-of-way or any elevator, aisle, hallway, entrance, or exit to which the public or a substantial group of the public has access or any parking lot or area or the exit from a parked vehicle.

4. A sale authorized through the grant of a special privilege by the city council or another sale authorized by ordinance or permit for use of the sidewalk area within public right-of-way pursuant to the requirements of the City Charter and any other applicable city ordinances within the downtown area.

5. A sale authorized through the grant by city council of a special privilege for use of the public right-of-way in compliance with the requirements of Section 15.08.120 of this Code.

6. A person, firm or corporation who is an authorized and duly licensed dealer of motor vehicles and the person, firm or corporation is selling or offering such vehicles for sale at the location named in the license issued to the person, firm or corporation under Chapter 5.72 of this Code.

7. The owner of a vehicle who offers a vehicle titled in his or her name for sale at the owner's place of residence, in accordance with the Texas Transportation Code, as amended, regarding the sale and transfer of used motor vehicles.

8. The sale of food by a licensed food establishment, including a temporary or recurrent food establishment, operating in accordance with the requirements of Chapter 9.12 of this Code and applicable zoning requirements, provided that no sales or offers of sales take place on land located within the public right-of-way unless such sale is also authorized in accordance with subsection C.4. or 5. of this section.

9. A sale by a licensed mobile food vendor operating in compliance with Chapters 9.12 and 12.46 of this Code.

10. A yard, garage, or rummage sale conducted as permitted under Title 20 of this Code.

11. A temporary sale of merchandise of the same kind normally sold by a business in a location outside of the permanent structure provided that the location on which the merchandise is sold, offered or exposed for sale is immediately adjacent to the front or side of the structure normally occupied by the business and it is on land that is owned or leased by the business and not part of the public right-of-way unless such sale is also authorized in accordance with subsection C.5. of this section, and the time period for such sale does not exceed fourteen consecutive days during any thirty-day period.

12. The storage of supplies, merchandise, equipment or goods normally carried in stock, used, produced or sold by a business in conformity with a permitted accessory use authorized under Title 20 of this Code.

13. A sale of merchandise such as ice, firewood and filled propane tanks sold by a business from display units specially constructed for such purpose and located immediately adjacent to the permanent structure of the business.

14. The sale of propane and motor vehicle fuels.

15. The sale of items from a vending machine or machine primarily serving as an automated teller machine.

16. The sale of items under a tent or temporary structure for which a permit has been issued under and in accordance with Chapter 18.02 of this Code, provided that no items are sold, offered for sale or exposed for sale at a location within one hundred feet of the closest edge of the paved portion of an arterial.

17. The sale of items at a flea market for which a permit has been issued under and in accordance with Chapter 20.08 of this Code.

18. The sale of items at an outdoor market as defined in and for which a permit has been issued under and in accordance with Chapter 9.12 of this Code, provided that no items are sold, offered for sale or exposed for sale at a location within one hundred feet of the closest edge of the paved portion of an arterial.

19. The sale of items in conjunction with a circus, show or carnival for which a permit has been issued under and in accordance with Chapter 5.20 of this Code, provided that no items are sold, offered for sale or exposed for sale at a location within one hundred feet of the closest edge of the paved portion of an arterial.

D. Members of the police department, members of the code enforcement division, the director of the department of public health, and the director of the environmental services department, and their designees may enter upon any vacant land or premises that are open to the public for business or other public purposes to inspect, enforce or to perform any function permitted under this section.

E. Members of the police department are authorized to cause any goods, wares, merchandise, produce, other farm products, candy, sodas and other edible or potable substances, new or used vehicles, or any other articles, or things of value being sold or offered or exposed for sale in violation of this section, or a stand used in connection with the sale of such items, to be removed and stored at the owner's, seller's or operator of a vehicle's expense if:

1. The owner, seller or operator of a vehicle has been given actual notice that the items being sold or offered or exposed for sale are in violation of this section; or

2. A conspicuous notice on a form developed by the city has been conspicuously attached to the vehicle or to any one of the goods or other items of merchandise or things of value stating:

a. That the vehicle or other items will be removed and stored at the expense of the owner or vehicle operator if they are not removed from the area by a specified time and date, such time and date not being sooner than twelve hours after the notice is attached to the vehicle or other items, and

b. A telephone number that is answered twenty-four hours a day to enable the vehicle or other items to be located.

F. In addition to the requirements of subsection E of this section, when a vehicle is removed, a notice must be mailed no later than the second business day after a vehicle was removed for a vehicle registered in the state of Texas and no later than the tenth business day after a vehicle was removed for a vehicle registered outside the state of Texas, to the last address shown for the owner and lienholder of record, if any, according to vehicle registration records available to the police department, or if the vehicle is registered in another state or country and the name or address of the owner or lienholder cannot be determined, to the appropriate agency of that state or country, stating:

1. A description of the vehicle;

2. That the vehicle was parked in violation of this section with a description of the location where it was parked;

3. That the vehicle was removed and stored at the expense of the owner or operator of the vehicle; and

4. A telephone number that is answered twenty-four hours a day to enable the owner or operator to locate the vehicle.

G. When a vehicle or any other item was removed pursuant to this section, and the vehicle or other items are not claimed by the owner or operator within fourteen days, the following provisions shall apply to the disposition of the vehicle or other item.

1. The provisions of the Texas Transportation Code, as amended, regarding motor vehicles abandoned in a vehicle storage facility shall apply to the disposition of a vehicle other than a bicycle.

2. For all other unclaimed items, a notice must be published in a newspaper of general circulation in the city stating:

a. A description of the items;

b. That the items were offered for sale in violation of this section with a description of the location where they were located;

c. That the items were removed and stored at the expense of the owner of the items; and

d. A telephone number that is answered twenty-four hours a day to enable the owner to locate the items.

3. Any items other than motor vehicles remaining unclaimed after thirty days after the date notice is given or published under this subsection shall be disposed of in accordance with the provisions of Article 18.17, Texas Code of Criminal Procedure, as amended.

H. If the items to be stored are edible or potable and they are contained in an open, exposed container, they are readily perishable in their present condition, or they are in need of refrigerated storage to avert spoilage, and the member of the police department has a reasonable belief that the storage of such items may constitute an imminent health hazard, the member of the police department may notify the director of the department of public health or designee who may take action in accordance with Chapter 9.12 of this Code.

I. The city council, by resolution, shall adopt a fee schedule for the charges to be imposed for the removal and storage of items under this section. Such charges shall be based on the city's costs for such removal and storage and the charges for the removal and storage of vehicles established in Section 12.08.220 of this Code.

J. An owner or operator of a vehicle other than a bicycle removed and stored under this section shall be entitled to the rights of owners of stored vehicles as set forth in Chapter 685, Texas Transportation Code, as amended, and to a post-deprivation hearing as provided in Section 12.08.220 of this code. An owner of any other item removed and stored under this section shall be entitled to a post-deprivation hearing to be conducted in the same manner as provided in Section 12.08.220 of this Code.

K. Any person violating any provision of this section shall be guilty of a misdemeanor and punished by a fine of not less than one hundred dol-

lars nor more than five hundred dollars. (Ord. 16982 § 7, 2008; Ord. 16819 §§ 4, 5, 2008; Ord. 14841 § 1, 2001: Ord. 11410 § 1, 1993: Ord. 11146 § 1, 1992: prior code § 19-7)
(Ord. No. 17391, § 11, 8-24-2010, eff. 9-1-2010; Ord. No. 17361, § 1, 7-20-2010; Ord. No. 17582, § 1, 6-14-2011)

13.20.060 Receiving and forwarding goods on sidewalks.

Nothing in this chapter shall be so construed as to prevent any merchant from occupying not to exceed one-half of any sidewalk in front or rear of his place of business in receiving and forwarding goods, wares or merchandise; provided, such articles shall not occupy such sidewalk even while thus engaged for a longer period than six hours. (Prior code § 19-8)

13.20.070 Poles and posts not to be placed in sidewalks—Generally.

No person shall erect, maintain or set any post or pole of any kind or material in any sidewalk of the city. (Prior code § 19-9)

13.20.080 Poles and posts not to be placed in sidewalks—Exception.

Section 13.20.070 shall not apply to any telephone poles, lampposts, electric light posts, telephone posts and posts for the receiving department of the United States Post Office when the same have been or may hereafter be erected by authority of the city council on the outside of such sidewalks in the manner prescribed thereby. (Prior code § 19-10)

13.20.090 Builders excepted from restrictions.

No contractor, mechanic, artisan or other person engaged in repairing or erecting any building who shall otherwise comply with the City Charter and with ordinances and regulations concerning buildings and improvements, and shall take out the requisite permits therefor, shall thereby become liable for the obstruction of the sidewalk. (Ord. 8578, 1986; prior code § 19-5)

13.20.100 Basketball backboards prohibited.

No person shall erect, maintain or set any basketball backboard of any kind or material that encroaches into any public right-of-way. (Ord. 12517 § 1, 1995)

13.20.110 Bus bench franchises.

A. This section shall be applicable to any and all bus bench franchises issued, approved or extended by the city council of the City of El Paso. The rights granted for the installation and maintenance of bus benches pursuant to such a franchise may include the right to install and maintain advertising on existing city-owned bus shelters.

B. Each franchise, unless otherwise indicated by this section, shall be governed by the terms of its franchise agreement, pursuant to those rules and regulations related to the installation and maintenance of bus benches and shelters as may be instituted and amended from time to time by the mass transit department board. Enforcement of the franchise agreements and their rules shall be the responsibility of the director of the mass transit department, or designee.

C. Terms of Each Franchise.

1. Each franchise shall be limited to a period of not more than ten years in length. If grantee is not in default of the terms hereof, the city, at its sole option, may extend the franchise for a period determined solely by the city, but in no event shall such extension exceed ten additional years. Any such extension shall be granted upon such additional terms and conditions as required by the city. Grantee must request such extension by delivering written request not later than ninety days before the original term of the franchise expires, and in the manner required by the franchise.

2. An initial franchise fee of one hundred dollars shall be required of an applicant for a franchise. The annual franchise fee required of each approved grantee shall be one hundred dollars. Payment shall be made to the comptroller of the City of El Paso on or before January 1 of each year.

3. An additional fee of two dollars per approved bench, per month, shall be paid to the comptroller of the City of El Paso. This fee shall be paid quarterly and without regard to the grantee's ability to place revenue-generating ads upon any approved benches.

4. One bench shall be offered or made available to the city, for advertising, for each twenty benches placed or maintained by a franchisee.

5. All remaining terms and conditions of a franchise shall be enumerated within each franchise agreement and those rules adopted by the mass transit department.

D. Enforcement.

1. All rules as identified within, and attached to, each franchise agreement as well as those rules implemented by the mass transit department shall be adhered to by the franchisees.

2. The director of the mass transit department shall be charged with the enforcement duties related to compliance with franchise agreements and all rules referenced herein.

3. In addition to any applicable removal, storage and disposal fees, a civil penalty of three hundred dollars shall be imposed for each illegally placed bench that is disposed of by the mass transit department director in accordance with the rules established by the mass transit department board.

4. Upon written notice to the franchisee and a forty-eight hour period for the franchisee to remedy, the director of the mass transit department may require the removal of any illegally placed benches. Upon written notice to the franchisee and a seven-calendar day period for the franchisee to remedy, the director of the mass transit department may require the repair, removal and/or replacement of any unsafe benches or other benches found to be in violation of the rules or any applicable franchise. All expenses related to such removal, including, but not limited to, storage and disposal, shall be reimbursed by the bench owner.

5. Nonpayment of any civil penalties noted within this enforcement section may result in the revocation of the franchise agreement.

E. Where a bus bench or shelter location involves a proposed use of a public right-of-way designated as a state or federal highway or road, written approval from the appropriate state or federal agency shall be required prior to approval of the location by the city. (Ord. 16792 § 1, 2007)

13.20.120 Waste container franchises.

A. This section shall be applicable to any and all waste container franchises issued, approved or whose term is extended by the city council of the City of El Paso. The rights granted for the installation and maintenance of waste containers pursuant to such a franchise include the right to install and maintain advertising on the four sides of said containers.

B. Each franchise, unless otherwise indicated by this section, shall be governed by the terms of its franchise agreement.

C. Terms of Each Franchise.

1. Each franchise shall be limited to a period of not more than five years in length. If grantee is not in default of the terms hereof, the city, at its sole option, may extend the franchise for a period determined solely by the city, but in no event shall such extension exceed one additional year. Any such extension shall be granted upon such additional terms and conditions as required by the city. Grantee must request such extension by delivering a written request to the city not later than ninety days before the original term of the franchise expires, and in the manner required by the franchise.

2. The franchise term shall begin on the date on which the franchise is approved by city council. An annual franchise fee in the amount authorized by city council through the budget process shall be required of an applicant for a waste container franchise. Payment shall be made to the Comptroller of the City of El Paso, on or before the fifteenth day following the granting of the franchise.

3. An additional fee in an amount authorized by city council through the budget process per approved waste container, per month, shall be paid to the Comptroller of the City of El Paso.

This fee shall be paid quarterly on the following dates: March 31, June 30, September 30, and December 31 and without regard to the grantee's ability to place revenue-generating ads upon any approved waste containers.

4. Ten percent of the franchisee's total waste containers shall be offered or made available to the city, for advertising of city events and public service announcements.

5. Additional terms and conditions of a franchise shall be enumerated within each franchise agreement.

D. Enforcement.

1. All rules as identified within, and attached to, the franchise agreement shall be adhered to by the franchisee.

2. The director of the department of environmental services or designee shall be charged with the enforcement duties related to compliance with franchise agreements.

3. The director of the department of environmental services shall provide the franchisee with written notice of illegally placed or unsafe waste containers. In the case of an imminent public health or safety hazard, after twenty-four hours have passed and the illegally placed or unsafe waste containers have not been removed by the franchisee, the director of the department may require the repair, removal and/or replacement of the illegally placed or any unsafe waste containers or other waste containers found to be in violation of any applicable franchise. All expenses related to such removal, including, but not limited to, storage and disposal, shall be reimbursed by the franchisee.

E. Where a waste container location involves a proposed use of a public right-of-way designated as a state or federal highway or road, written approval from the appropriate state or federal agency shall be required prior to approval of the location by the city.

(Ord. No. 18251, § 1, 9-30-2014; Ord. No. 18952, § 1, 7-23-2019)

Chapter 13.24

CITY PARKS AND RECREATION AREAS*

Sections:

13.24.010 Creation and purpose of parks and recreation department; definitions; and sale of goods and services.

13.24.020 Renting vehicles or animals—Amusement devices—Installations.

13.24.030 Authority to grant permits, licenses, leases, concessions or contracts—Permittee responsibilities; appeals.

13.24.040 Hours of closure.

13.24.050 Use of athletic fields.

13.24.060 Camping.

13.24.070 Dangerous amusements.

13.24.080 Horses.

13.24.090 Motor vehicles.

13.24.100 Closed areas.

13.24.110 Play areas for young children.

13.24.120 Dog parks.

13.24.130 Alcoholic beverages.

13.24.140 Wildlife, plants, and natural resources.

13.24.150 Fires and grills.

13.24.160 Adherence to park rules and signs.

13.24.170 Use of city parks.

13.24.180 Shared use pathways and trails.

13.24.190 Glass beverage bottles or containers.

13.24.200 Park and recreation facility use and fee authorization.

13.24.210 Enforcement.

13.24.220 Violation of Sections 13.24.010 through 13.24.150 and 13.24.170 through 13.24.190—Penalty.

*__Editor's note__—Ord. No. 17845, § 1, passed July 31, 2012, repealed the former Ch. 13.24, §§ 13.24.010—13.24.210, and enacted a new Ch. 13.24 as set out herein. The former Ch. 13.24 pertained to similar subject matter. See Code Comparative Table and Disposition List for history.

13.24.010 Creation and purpose of parks and recreation department; definitions; and sale of goods and services.

A. Creation and purpose of the parks and recreation department.

1. There is established the Parks and Recreation Department in the City of El Paso, which shall generally provide administration of the various city parks, city-operated land used for parks or recreational purposes, city open space, and parks and recreation facilities.

2. The primary function of the department shall be the performance of duties relating to the administration and utilization of city parks that are under the administration of the department; and to generally perform duties relating to city parks as to be determined by the city manager.

B. Definitions. The following definitions apply to these terms as used in this chapter.

1. "Alcoholic beverage" means alcohol or any beverage containing alcohol that is capable of being used for beverage purposes, either alone or when diluted, including but not limited to beer, wine, distilled spirits and mixed beverages containing alcohol.

2. "Amusement device" means any item that is temporarily installed for the purpose of playing on, including but not limited to climbing walls, dunking booths or inflatable items such as jumping balloons, slides, castles and similar items and temporary playground equipment.

3. "Appeals official" means the city manager or a deputy city manager as designated by the city manager.

4. "City park" means any property in the city that is designated, set aside or operated by the city for public recreational purposes, whether dedicated or developed as a park or not, or that is located in any street right-of-way and is maintained as public open space, including all build-

ings, recreation facilities, playgrounds, parking lots, driveways, pathways, trails and other areas within a park, to include Scenic Drive. Designation of property as a city park pursuant to this subsection is solely for the purposes of identifying areas governed by this chapter and shall not be construed to be a dedication of any property as a park.

5. "Department" means the parks and recreation department.

6. "Director" means the director of the parks and recreation department or a designee.

7. "Facility" shall have the meaning as defined in Section 13.24.200.

8. "Identifiable area" means a building, a shelter, a fenced athletic field, or other area subject to controlled ingress and egress as determined by the director.

9. "Roadway" means the portion of a street, alley or highway designed or ordinarily used for vehicular travel.

10. "Security guard or officer" means a uniformed private security guard who is duly licensed as provided in the Texas Occupations Code, or a uniformed peace officer.

11. "Sidewalk" means all portions of a street, alley or highway between the curblines, or the lateral lines of the roadway and the adjacent boundary lines, whether or not the same have been improved for pedestrian travel

12. "Stand" means any structure, machine, box, table, container, vessel, vehicle, utility, post or pole, traffic control signs or signals, building or any other thing located, placed, stopped or allowed to remain upon, over or along any city park or street, sidewalk, alley, square, or public right of way abutting a city park or Scenic Drive.

13. "Street," "alley," or "highway" means the entire width between the boundary lines of every publicly maintained way when any part thereof is open to the use of the public for purposes of vehicular or pedestrian travel, to include but not be limited to the roadway and the sidewalk.

C. Sale of goods and services. Except as provided herein or in Section 13.24.030, it shall be unlawful for any person to:

1. Have, keep, maintain, run or conduct a stand in or upon or over or along any city park.

2. Sell, offer for sale, or expose to sale any commodity, stock of goods, wares, merchandise, produce, other farm products, candy, sodas and other like refreshments, new or used vehicles, animals or any other articles or things of value of any kind in, from, out of or affixed to a stand, or by placement of such items directly upon the ground over or along any city park.

3. Sell, offer for sale or expose to sale any commodity, stock of goods, wares, merchandise, foodstuffs, refreshments or other edible or potable substances from any vehicle, cart or wagon, or any basket, tray, box or other receptacle driven or taken into any city park, provided that this section shall not prohibit the direct and through passage of licensed motor vehicles traveling upon dedicated public streets that pass through a city park.

4. Conduct or provide activities, lessons, instruction or other services that requires the payment of a fee for participation.

D. The prohibitions contained in subsection C. do not apply to the following types of sale or other services including offers for sale or exposures to sale, provided that the requirements of all other applicable city code provisions are met, including but not limited to licensing requirements and health regulations:

1. A sale of newspapers, pamphlets, handbills or other written or printed matter held and sold by a person, provided that no materials to be offered for sale by the person are placed on the ground or stored in the park prior to the time of sale.

2. A sale held inside a city facility located in a city park, provided that appropriate authorization for the sale has been granted upon such conditions as do not unlawfully surrender the city's right of supervision, regulation and control, are consistent with park purposes, and do not unreasonably interfere with the rights of the public to the enjoyment of the park facility.

3. A sale authorized by a permit, license, lease, concession or other contract in accordance with the city code and department procedures, granted under such conditions as to not unlawfully surren-

der the city's right of supervision, regulation and control and which is consistent with park purposes.

4. A mobile food vendor selling edible and potable substances on a public street, thoroughfare, parking lot or other paved surface located within or adjacent to a city park in accordance with the requirements established in Chapter 12.46 of this Code.

5. A sale conducted pursuant to a department-produced activity and event as authorized herein and under Section 13.24.200 of this Code.

6. An activity, lesson, instruction or other service that is authorized by a permit, license, lease, concession or other contract in accordance with the city code and department procedures granted under such conditions as to not unlawfully surrender the city's right of supervision, regulation and control and which is consistent with park purposes.

E. The prohibitions contained in subsection C do not apply to any activity that the city council has permitted or licensed in accordance with the provisions of this chapter or that is authorized by the terms of a lease, concession or contract.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.020 Renting vehicles or animals—Amusement devices—Installations.

A. No person shall rent or offer to rent to another in any city park, any bicycle, motorcycle, scooter, or other vehicle, or any animal, or maintain and exhibit therein any amusement device, except as provided in this chapter.

B. No person shall set up, build or install a tent, stage or structure upon or over any city park except as provided in this chapter.

C. No person shall stake or tie items to existing landscape, flower beds, trees or other city park property except as provided in this chapter.

D. Owners of amusement devices must present a certificate of liability insurance with the city named as additional insured.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.030 Authority to grant permits, licenses, leases, concessions or contracts—Permittee responsibilities; appeals.

A. The city council may grant permits, licenses, leases, concessions or contracts for any of the acts mentioned in Sections 13.24.010, 13.24.020 and 13.24.060 in city parks, upon such conditions as do not unlawfully surrender the city's right of supervision, regulation and control, are consistent with park purposes, and do not unreasonably interfere with the rights of the public to the enjoyment of the park.

B. The director of the department may issue temporary permits for temporary use of city parks, facilities and identifiable areas within city parks upon such conditions as do not unlawfully surrender the city's right of supervision, regulation and control, are consistent with park purposes, and do not unreasonably interfere with the rights of the public to the enjoyment of the park, as follows:

1. To conduct any of the acts or activities specified in Sections 13.24.010, 13.24.020, 13.24.050, or amplification under 13.28.010;

2. To allow temporary concessions in city parks that do not have an existing concessionaire contract;

3. For temporary use of identifiable portions of city parks.

C. All temporary permits issued by the director shall be in conformity with such procedures as are established by the director and on file with the department. Such procedures shall provide that in granting or refusing such permission, the director shall be guided by the following standards: whether the park, facility, or other identifiable portion of a city park has already been reserved or applied for by someone else for approximately the same time, whether the proposed use and the hours requested are such that other users of the park or residents of the neighborhood would not be subjected to undue inconvenience, whether the use is exclusive or compatible with other uses of the park, whether the proposed use is consistent with park purposes and any other factor that may reasonably bear upon the matter.

D. When issuing a permit under this chapter, the director may impose reasonable conditions concerning time, place and manner of the use to ensure compliance with this chapter and departmental policies.

E. A person applying for a permit must be eighteen years of age, or twenty-one years of age if the applicant is also applying for an alcohol permit.

F. A permittee shall comply with all permit requirements, conditions, and with all applicable laws and ordinances and the responsible party must carry the permit during the conduct of the event or use and must show the permit to any person upon request. The permittee is responsible for the conduct and behavior of their guests and participants. The permit is not transferrable. If the permittee fails to fulfill any of the conditions stated in the permit, the director may terminate the permit immediately and such termination may result in ineligibility for future permits, removal, fine, arrest, and/or forfeiture of fees. The permittee shall be responsible for cleaning and removing all litter and debris left on the city park, facility or identifiable area immediately upon the conclusion of the event. If the permittee fails to clean and remove all such litter and debris upon conclusion of the event, the city may perform such cleaning and the permittee will be responsible for the costs of the city cleaning. Payment of any city cleaning costs will be due and payable within ten days of receipt of the bill from the city comptroller.

G. The fee for the permits and uses authorized by this section shall be in the established amounts.

H. If other requirements of the city code are applicable to a permit issued under this section, it shall also be a condition of the permit granted by the director that the permittee obtain the appropriate permits, licenses, privileges or contracts including but not limited to health regulations and business licenses.

I. Appeals.

1. An applicant may appeal the denial of an application for a permit under this section in writing within ten days after notice of the denial has been received by submitting a written request to the appeals official. Within five business days, or such longer time period agreed to by the applicant, the appeals official shall hold a hearing on whether to issue the permit or uphold the denial. The applicant shall have the right to present evidence at said hearing and to question the appropriate city officials. The decision to issue the permit or uphold the denial shall be based solely on the approval criteria set forth in this chapter. The appeals official shall render a decision on the appeal within five business days after the date of the hearing.

2. The decision of the appeals official is subject to review by the city council. The applicant may appeal the decision of the appeals official to the city council by submitting a written appeal request to the appeals official, who shall forward the request for placement on the agenda of the next available regular city council meeting in compliance with all ordinances, policies and statutes relating to the placement of items on the council agenda and the posting of the agenda. The decision to issue or uphold the denial shall be based solely on the approval criteria set forth in this chapter.

(Ord. No. 17845, § 1, 7-31-2012)

13.24.040 Hours of closure.

A. All city parks, except as provided herein, shall be closed to the public every night from October 1 through April 30 each year between 10:00 p.m. and 6:00 a.m. and every night from May 1 through September 30 each year between 11:00 p.m. and 6:00 a.m. unless otherwise posted in accordance with department policies. Parks in the downtown management district, however, shall remain open until 1:00 a.m. Any request that a city park remain open past 10:00 p.m. from October 1 through April 30 or past 11:00 p.m. from May 1 through September 30, or a city park within the downtown management district remain open past 1:00 a.m. shall require a temporary permit issued by the director in accordance with Section

13.24.030. In granting such permit, the director may impose whatever conditions he deems necessary to protect the health, safety and welfare of the general public.

B. Recreational centers, senior citizen centers, athletic fields, meeting halls, McKelligon Amphitheatre, reserves, and park shelters may be allowed to remain open until 1:00 a.m., as department of parks and recreation policies may prescribe. Any request that the aforementioned facilities remain open past 1:00 a.m. shall require a temporary permit issued by the director in accordance with Section 13.24.030. In granting such permit, the director my impose whatever conditions he deems necessary to protect the health, safety and welfare of the general public.

C. This section shall not apply to the following persons if in the park or facility in the performances of their duties: peace officers, physicians, ambulance operators or attendants, employees of the city, and employees of public utility companies.

D. In the case of parks through which there are dedicated streets used for general travel (that is, not merely for access to the interior of the park), this section shall not apply to persons traveling through the park on such dedicated streets.

E. A person may appeal the director's decision in accordance with the procedure set forth in Section 13.24.030.

(Ord. No. 17845, § 1, 7-31-2012; Ord. No. 18369, § 1, 6-9-2015)

13.24.050 Use of athletic fields.

A. No person shall play any game on, or otherwise make use of, any athletic field belonging to the city that is designated as a game "only" field for which fees are assessed by listing its use on schedule C of the city's annual budget resolution or by other applicable resolution of city council and being posted with one or more signs giving notice of the restricted use, unless written permission for using the field at the designated time is first obtained from the director of the department. Athletic fields in this category can only be used for games and not for practice.

B. No person shall play any game on, or otherwise make use of, any athletic field belonging to the city that is designated as a "permit required" field for which fees are assessed by listing its use on schedule C of the city's annual budget resolution or by other applicable resolution of city council and being posted with one or more signs giving notice of the restricted use, unless written permission for using the field at the designated time is first obtained from the director of the department. Athletic fields in this category can be used for practice or for games.

C. This section shall not apply to persons using an athletic field under a lease, concession, or other contract authorized by the city council.

(Ord. No. 17845, § 1, 7-31-2012; Ord. No. 18654, §§ 1—3, 3-21-2017)

13.24.060 Camping.

A. No person shall camp in any city park, or set up any tent, shack, or other shelter, or lay out any bedroll or other sleeping equipment therein, except upon approval of the city council by resolution. This section does not apply to camping in permanent cabins or structures provided by the city for that purpose or to department produced activities or events.

B. A person may make a request to the city council to camp. The written request shall be submitted to the director who shall forward the request for placement on the city council agenda in compliance with all ordinances, statutes and the council's rules of order relating to the placement of items on the agenda and posting of the agenda. The decision of whether to approve the request to camp shall be made by resolution of the council. In granting such approval, council may impose whatever conditions it deems necessary to protect the health, safety and welfare of the general public.

(Ord. No. 17845, § 1, 7-31-2012)

13.24.070 Dangerous amusements.

A. No person shall have within any city park any air rifle, pellet or b.b. gun, spring gun, bows and arrows, instruments capable of throwing a projectile, or possess any firearm, or throw or launch any stone, hard ball, remote control airplane, or other object likely to inflict injury; or drive any golf ball. No person may use rollerskates, inline skates, bicycle, skateboard or any similar device in areas in which the director has posted a sign prohibiting such activities. This section does not apply to acts done in an area designated by the city for such purpose or to a person who is licensed to carry and lawfully carrying a concealed handgun under Subchapter H, Chapter 411, Government Code and Chapter 46, Penal Code.

B. No person shall possess a handgun except as provided in City Code Section 10.12.020.
(Ord. No. 17845, § 1, 7-31-2012; Ord. No. 19226, § 1, 8-31-2021)

13.24.080 Horses.

No person shall ride or have in any city park any horse or other bridled animal, except on a bridle trail or trailhead designated by the city for that purpose and where permitted, the animal shall be thoroughly broken, properly restrained, ridden with due care, not allowed to graze or go unattended, and not hitched to any furnishing, rock, tree, or shrub other than a hitching post at a trailhead provided for that purpose.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.090 Motor vehicles.

No person shall drive, or ride in or on, any motor vehicle, four-wheeler, all terrain vehicle, motorcycle, go cart, dirt bike, or any other similar motorized device except for a motorized wheelchair, in any city park or trail, except licensed vehicles may drive or travel on streets that are graded or surfaced for vehicular travel and of sufficient width for use by the vehicle. Provided this section shall not apply to the following persons when engaged in the performance of their duties: Peace officers, ambulance operators or attendants, physicians, employees of the city, employees of a public utility company, or persons under contract with the city performing construction, maintenance, or other necessary work in city park or a trail.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.100 Closed areas.

A. The director of the department may temporarily close city parks or identifiable areas to the public entry for maintenance, construction, health, safety and welfare, or otherwise restrict use until such time as the area or facility can be made available for public use.

B. Except in emergency circumstances, notice of closure shall be posted and no person shall enter closed or restricted areas.

C. No person shall enter areas closed due to flooding or areas that are the subject of a flood ban.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.110 Play areas for young children.

A. Playground areas and equipment shall be used only as intended, and shall be used by persons of appropriate age. The director may designate playground areas where the equipment may be exclusively used by children twelve years of age and under. Areas so designated shall be posted with one or more signs giving notice of the restricted use.

B. When an area is so designated no person except children twelve years of age and under shall play on the equipment; provided however such children may be assisted in their play by their parents, guardians, or persons whom a parent or guardian has placed in charge of the children.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.120 Dog parks.

A. A person may allow dogs to be without a leash in areas designated and constructed for such purposes ("dog parks" or "off-leash area") provided that each dog remains under immediate per-

sonal supervision and command of the person, the person has a leash in their possession at all times, and posted rules are followed.

B. No person shall allow a child under the age of seven years in the off-leash dog area. Children ages seven to twelve must be accompanied by an adult. Children may not run with, or chase after dogs in the off-leash area.

C. No person shall allow a puppy less than four months of age nor female dogs that are in heat into the off-leash dog area.

D. No person shall take more than three dogs into the off-leash area.

E. If a dog exhibits dangerous or aggressive behavior towards other dogs or person, the person responsible for such dog shall remove the dog from the dog park immediately.

F. Dogs must be on-leash when entering and exiting. No person shall bring a dog to the off-leash area with a spike collar.

G. No person shall bring any other animals to the dog park except for dogs.

H. No person shall smoke or bring food or alcohol into the off-leash area.

I. Persons are responsible for the actions of any dog they bring into the off-leash dog area.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.130 Alcoholic beverages.

A. No person shall possess or consume an alcoholic beverage in any city park, facility or identifiable area, except as provided in this chapter.

B. The city may, by ordinance and lease agreement leasing a city park or portion of a city park, exempt portions of such park from the prohibitions of this section.

C. The director may grant permission to possess and consume alcoholic beverages in a city park or identifiable area of a city park if the following conditions are met:

1. The applicant has executed a rental agreement for the use of the city park or identifiable area pursuant to the guidelines of the department;

2. The applicant has paid the fee for the use of the city park or identifiable area;

3. The applicant, as part of the agreement, will restrict alcohol consumption to persons twenty-one years of age or older;

4. The applicant, as part of the agreement, has agreed to provide a minimum of one security guard per one hundred persons expected at the event in order to protect the health, safety and welfare of participants, other park users and the general public. In addition to any other authority, the security guard shall be entitled to summon the appropriate peace officer in the event of violation of this chapter or any other chapter, rule, regulation or statute; and

5. The applicant has agreed to provide portable toilets for outdoors events, control of ingress and egress, trash disposal, and any other reasonable conditions imposed to protect the health, safety and welfare of the general public.

6. If not indoor or fenced, the applicant has agreed to erect event site perimeter fencing consisting of chain link preformed free standing panels, no less than six feet high with vertical support no further than ten feet apart.

D. The director of the department may grant permission for the possession and consumption of alcoholic beverages for an adult event sponsored by the department, supervised by a city employee and taking place within a city park or identifiable area in a city park.

E. Permission granted pursuant to Section 13.24.130 C. or D. shall include the right to transport alcoholic beverages to and from the identifiable area.

F. It shall be a defense to prosecution under Section 13.24.130 if at the time of the offense, the person charged was in an identifiable area for which the director of the department or the city council had granted permission to possess and consume alcoholic beverages pursuant to this section, or was transporting alcoholic beverages to or from such an identifiable area.

G. Denial of permission by the director of the department may be appealed within ten days of denial after notice of the denial has been received by submitting a written request to the appeals official. Within five business days, or such longer time period agreed to by the applicant, the appeals official shall hold a hearing on whether to issue the permit or uphold the denial. The applicant shall have the right to present evidence at said hearing and to question the appropriate city officials. The decision to issue the permit or uphold the denial shall be based solely on the approval

criteria set forth in this chapter. The appeals official shall render a decision on the appeal within five business days after the date of the hearing.

H. The city council in its discretion may grant permission to possess and consume alcoholic beverages in open park areas for special or ad hoc events; provided, however, in granting such permission the city council shall impose whatever conditions it deems necessary to protect the health, safety and welfare of the general public.

I. Section 13.24.130 does not repeal or modify Chapter 5.02 (alcoholic beverages), which shall remain in effect.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.140 Wildlife, plants, and natural resources.

A. All wildlife within the boundaries of a city park is protected. No person may harm, harass, hunt, trap or remove any animal including mammals, fish, insects, birds, reptiles, or other living creature from any city park except upon written approval of the director of the department. The prohibition pertaining to fish shall not apply where fishing is permitted by an individual in possession of a valid Texas fishing license.

B. All plantlife within the boundaries of a city park is protected. No person shall willfully mutilate, injure, burn, destroy, thrash, or remove any live tree, shrub, vine, wildflower, grass, sedge, fern, moss, lichen, fungus or any other member of the plant kingdom or portion thereof, except upon written approval of the director of the department. No person shall collect or harvest dead wood or plants, or portions thereof, except upon written approval. The collecting of nuts, seeds and pods on the ground is allowed; the thrashing of trees and shrubs is prohibited.

C. All sites, objects, buildings, artifacts, implements, and locations of historical, archaeological, geologic, scientific or educational interest of every character located in, on or under the surface of any city park are protected. No person may remove excavate, take, dig into, or destroy any site, object, building, artifact, implement or location of archaeological, geological, scientific or historical interest without having permits as required by the State of Texas Natural Resources Codes, and without having written permission of the director of the department.

D. No person may cut, gather, or collect wood or other combustible material at any city park for use as firewood or fuel except for material designated for this purpose by the director of the department.

E. This section does not apply to city employees performing their assigned duties.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.150 Fires and grills.

A. No person may light, build or maintain a fire on or in a city park except in a device provided or designated for such purpose.

B. Portable barbecue grills of metal construction may be brought into city parks by persons for use in picnic areas and shall be attended at all times by a person eighteen years of age or older. At no time may barbecue grills be placed upon pathways, sport courts, parking lots and the like or otherwise impede the use of such areas for their intended purpose. Barbecue grills must have a minimum twelve-inch clearance from the ground or surface it is placed on.

C. Charcoal must be fully extinguished and removed from the city park by the user.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.160 Adherence to park rules and signs.

A. The director is authorized to create reasonable rules regarding use of city parks. Such rules shall be posted on signage at applicable city parks. All persons shall comply with the signs and markers installed in city parks by the department. Department staff is authorized to revoke a person's privilege to participate in department activities or to direct a person to leave a city park for failure to comply with such signs.

B. Rules and conditions of use that address situations specific to a park facility may be developed and posted by the director. Persons shall comply with such rules.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.170 Use of city parks.

A. Outdoor city parks are generally available for public use on a first come, first served basis except for areas that require entrance or other fees, or that have previously been issued permits granting priority or exclusive use.

B. No person shall use or occupy a facility or identifiable area when such use conflicts with the use by persons holding a permit.

C. Persons engaged in disruptive, destructive or hazardous conduct may be warned and asked to stop such conduct immediately by any department employee or official under Section 13.24.210. In circumstances where a patron's conduct is unlawful, or poses an imminent threat of injury or prevents the public enjoyment of the city park, department employees or officials under Section 13.24.210 may eject such persons by verbally demanding that the person leave the city park.

D. Persons may casually perform as artists or entertainers in a city park provided that they do not block sidewalks, roadways, or other recreational amenities, and they maintain a minimum one hundred feet of distance from existing park concessions or persons using a city park under a permit issued by the department. No amplified sound, or juggling of potentially hazardous materials or items is allowed. Any money exchanged must be on a "tips" basis only.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.180 Shared use pathways and trails.

On pathways and trails, bicyclist shall yield to jogger, and jogger to walker. Users shall not be two or more abreast when this action will impede other users on the pathway or trail.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.190 Glass beverage bottles or containers.

A. No person shall use or possess any glass beverage bottle or other glass beverage container in any city park or outdoor facility.

B. This section shall not apply to sealed glass beverage bottles or other sealed glass beverage containers carried to and from, or kept within an indoor facility located within a city park by a person who has obtained a use agreement or permission from the director of the department for the use of such building.
(Ord. No. 17845, § 1, 7-31-2012)

13.24.200 Park and recreation facility use and fee authorization.

A. Facility uses. The City Council of El Paso authorizes the department director to establish programs, activities, classes, events, and other general services as are specifically offered and listed in the fee schedule at any and all city parks and recreational facilities managed by the department. The city council establishes priorities for the use of all city parks and recreational facilities as follows: (1) programs, activities, classes, events, and general services conducted by the parks and recreation department, which includes scheduling time or allowing uses, as appropriate within the facilities, for casual, unregimented recreational activities or uses commonly referred to as drop-in uses; (2) school activities, programs or events scheduled pursuant to an inter-governmental agreement; (3) other official activities, programs or events of the city; (4) revenue producing facility rentals; and (5) no charge uses by persons and entities as permitted under this subsection B.2.a.iii. of this section. All uses, other than drop-in uses, will require an application, permit or written contract.

B. Fees. The City Council of El Paso authorizes the department director to charge a fee for facility rental and use as well as a fee for programs, activities, classes, events, and other general services as are specifically offered and listed in the fee schedule provided at any and all city parks and recreational facilities managed by the department.

Such fees may include entry fees for participation in department-produced activities and events. General or flat fees shall be established, as well as other fees which may deviate from the standard fee based upon non-resident, commercial or non-profit status and shall be in the amounts as set by the city council through its budget resolution or other duly adopted resolution ("fee schedule"), in accordance with the following guidelines and criteria, as well as the criteria specified with the definitions for such terms:

1. Rental authorization. The City Council of El Paso authorizes the parks and recreation department ("department") director or designee to rent city-owned park and recreational facilities to the citizens of El Paso for recreational, educational, or leisure-time activities, programs, or events. Said rental will be permitted when such does not conflict with activities, programs, or events officially sponsored by the City of El Paso; scheduled school activities, programs, or events pursuant to inter-governmental agreements; or other activities, programs, or events previously approved by the City Council of El Paso or the department director.

2. Facility rental and use fees. The fees for a paid rental or use of a facility shall include the fee as set forth in the fee schedule and the administration fee, which is a non-refundable processing charge to compensate the department for reserving the facility or park area for use by the renter and processing the associated contracts. If alcohol is to be served during a rental under this section, an additional fee, based on one security guard per one hundred participants, and as set forth in the fee schedule, shall be charged to the renter. If the rental is for the purpose of conducting a party or other event where food, beverages or other activities will take place where litter or debris may be left behind, a cleaning charge shall be made in the amount set forth in the fee schedule. If the rental includes the use of catered food services or any other commercial use that is incidental to the rental, an additional fee shall be charged in the amount set forth in the fee schedule for such use.

a. Room rentals. Room rentals include any and all rooms or portions therein in all recreation, senior, sports, multipurpose and arts/cultural facilities that are designated by the director for use by the public. Rates shall be applied and fees charged in the amount set forth in the fee schedule.

i. Other city departments, to include city elected officials, may use rooms in all parks and recreation facilities for official business at no charge, on a space-available basis, during normal hours. Normal operating hours may vary among facilities. Use of rooms by other city departments, for official business during non- operating hours will be charged at the standard rate. Any city elected official desiring to use a room during non-operating hours for the conduct of his official business, such as holding a public meeting to inform constituents of issues affecting the community, may do so at no charge provided that no other city facility is reasonably available for the meeting, such use is timely scheduled, such use is not within ninety days preceding any city election, and such use is a special, occasional use and is not a standing or regularly scheduled meeting.

Any city elected official submitting a request for use of a room during non-operating hours shall submit such request in writing to the director not less than seven days in advance of the requested use, and if necessary, the city council may take appropriate action to resolve any issue as to whether a requested use is in conformity with and appropriate under the requirements set forth in this section; provided however, in no event shall a use of a room without charge by a city elected official be permitted for a personal or political use, nor shall a city elected official reserve a room under this section for a meeting, activity, function, or event that will not be attended by the elected official.

ii. County, state, federal agencies and other governmental entities may use rooms in all park and recreation facilities for official business at no charge, on a space-available basis, during normal operating hours. Normal operating hours may vary among facilities. Use of rooms by county, state, and federal agencies for official business during non-operating hours will be charged at the standard rate.

iii. The city council has established that meeting rooms that are appropriate for public use may be used by any person or entity, other than a for-profit entity or individual conducting for-profit business/commercial speech activities, during normal operating hours on a first come, first serve basis as space is available, as the city council has found that such uses are appropriate. Normal operating hours may vary among facilities. Use of such rooms during non-operating hours will be charged the appropriate rate as set forth in the fee schedule.

b. Shelters, reserve areas, rose garden, downtown plazas. Fees will be assessed and paid at the time that a renter reserves a shelter, reserve area, rose garden, pavilion, skate park, park area, or the San Jacinto or other downtown Plazas. Additional charges shall be assessed for the use of electricity at the downtown plazas for which electricity use is established by the director as an optional use and a separate electricity charge is set forth in the fee schedule.

c. Gymnasium rental. The facility rental for gymnasiums shall be based on the size of the given facility (i.e., small, medium, large and extra large, and full court or half court), and the purpose for which the gymnasium will be used. An additional fee shall be charged as set forth in the fee schedule for each use that is not an athletics sports use. The department director shall determine and designate the appropriate size for each gymnasium for purposes of assessing a rental fee for the same.

d. Sports and athletic venues. Field practice, sports, and athletic venue fees, game permit fees, and tournament fees shall be applied, when applicable. Charges shall be made for the use of the various sports fields as set forth in the fee schedule to include the costs of field preparation and for lighting the field, which may be charged as included or separate fees, as may be appropriate. Field practice rentals shall not include the additional administration fee.

i. All players participating in any independent league utilizing a department facility will be charged a per season player fee. If a season exceeds four months, the player will be assessed a fee for two seasons.

ii. One security guard per one hundred participants will be charged per tournament rental. Additional security guard(s) may be required as deemed necessary by department staff at renter's expense.

e. Multi use or long term use not to exceed one year. The fee for a permit issued under this chapter for repeated uses or long term uses, shall be in the amounts set forth in the fee schedule and shall be based upon the type of use, and length of time of the use.

3. Activities, programs, classes, and general services fees. The fees for activities, programs, classes, and general services will additionally be based on anticipated enrollment and use, class frequency, cost of instructor(s), if any, supplies, materials, and staff. Such fees shall be charged in the amounts set forth in the fee schedule or specifically calculated according to the formula set forth in the fee schedule. When a stated formula includes an administrative fee charge as part of the fee calculation, that portion of the fee shall be as set forth in the fee schedule as the administrative fee charge.

a. Sports league and tournament fees shall be based on anticipated registration, equipment, supplies, materials, staffing, and awards.

b. The department is authorized to conduct background checks for all coaches participating in city leagues and tournaments, issue identification cards for all participants, and charge the appropriate fees for such services as set forth in the fee schedule.

4. Department-produced activities and events. The parks and recreation department director shall be authorized to create community special events and activities for the public including the establishment of appropriate outdoor sales at city parks and recreational areas and rummage sales at the senior centers in accordance with requirements established in Title 20 of this Code, which may include allowing members of the public to make

limited commercial uses of the department's facilities and parks in conjunction with such events and sales, for the purpose of providing entertainment, food service, or other amusement for the public in conjunction with the event or sale, in accordance with the policies and guidelines that are approved by a resolution of the city council. Special events and activities occurring in or using locations other than the city parks and recreational facilities managed by the department shall be authorized by the city council or may be conducted in accordance with the policies and guidelines for such events and activities that are approved by a resolution of the city council. For purposes of this section, a special event or activity shall not include field trips, programs, or activities occurring outside of a city parks and recreational facility that are incidental to an activity, program or class conducted primarily within a facility or which are part of the department's day care services or youth development programs. The fees charged for such events shall be in the amounts set forth in the fee schedule for the activities and events identified and listed therein or as set by the council by other appropriate resolution.

C. Use of parks and facilities for displays and advertising—Fees. The parks and recreation department director shall be authorized to designate portions of sports fields and facilities in which it is appropriate to allow rentals of the space for the purpose of temporarily hanging banners for display, to include but not be limited to advertising. Such uses shall be permitted in accordance with the policies and guidelines that are approved by a resolution of the city council. A fee for displaying such banners shall be charged as set forth in the fee schedule.

D. For the purposes of these fees, including the listing of such fees as set forth in the budget resolution or other appropriate resolution of the city council, the following definitions apply:

1. "Facility" means any building, structure, designated area or enclosed area that is in a city park or other area managed by the department, to include but not be limited to shelters, reserve areas, rose gardens, pavilions, skate parks, recreational facilities, community centers, senior centers, sports centers, aquatics venues, athletic venues and downtown plazas.

2. "Prime time" means Monday through Friday from 5:00 p.m. through 1:00 a.m. of the following day; and during all operating hours on Saturday, Sunday and city recognized holidays.

3. "Class," "program" or "activity" means a structured or organized event, designed to meet a recreational or educational need, under the specific supervision of facility staff, instructor, trainer or contractor.

4. "Leisure interest class or workshop" means a program, class or activity that is taught by an independent contractor.

5. "Senior discount" means the discount available as set forth in the fee schedule for a person who is age sixty or older and who is enrolling in a leisure interest class or workshop or who is using a weight room, boxing room or billiard room on a monthly or yearly fee basis.

6. "Multiple child discount" means the discount available as set forth in the fee schedule for families (household) with more than one child enrolling during the same transaction in any leisure interest class, mini sports program or other program, class or activity that requires individual registration prior to participation. This discount does not include day care and after school programs.

7. "General admission or flat rate" means the fee that is charged for facility uses and services for which it is appropriate to charge a single, uniform rate, rather than establishing separate fees based on the type of user. Such fees, when established, shall be listed on the fee schedule as a single, uniformly charged fee.

8. "Standard rental rate" means the base rate and fee from which the commercial, non-profit and non-resident rates are determined, and which is charged to persons when those rates are not applicable.

9. "Commercial rate" is the rate charged to persons, organizations or groups who charge a fee

or require a donation for admission to the event or program in question, with the exception of those eligible for the non-profit rate.

10. "Non-profit rate" means the rate that is charged to an individual, organization or group that is recognized as a non-profit organization under the laws of the State of Texas, or who has been given tax-exempt status under the United States Internal Revenue Code, or both.

11. "Non-resident Rate" means the rate that is charged to those persons who do not reside within the city limits of the City of El Paso. Non-resident fees may be established so as to cover a portion of the costs of a program, activity, etc., for which the user fee established for a city resident includes a subsidy from the city's general fund. The department shall establish written procedures for the verification of residency of persons, when necessary.

E. Needs assessment scholarship program. The department director is authorized to establish a needs assessment scholarship program, enabling the waiver of fees, in whole or in part, for children who are participating in leisure interest classes, mini sports programs or other programs, classes or activities that require individual registration prior to participation, and who reside the majority of the time in a household in which the gross income, within the previous twelve months, is at or below eighty percent of the area median income, as established annually by U.S. Department of Housing and Urban Development (HUD) income limits, subject to income verification. Income eligibility shall be determined by the sum of the gross income of all family members residing in the household. Verifiable eligibility documentation for each participant served under this program must be maintained, updated at least every twelve months. City council shall establish the maximum annual program funding amount and the maximum benefit per participant in the annual budget resolution. Fee waivers will be applied on a first come, first served basis. Once the maximum annual total program funding amount is reached during the fiscal year, the Needs Assessment Scholarship Program will be discontinued for the remainder of the fiscal year, subject to additional appropriation of funds to support the program. The Needs Assessment Scholarship Program does not include day care.

(Ord. No. 17845, § 1, 7-31-2012; Ord. No. 018867, § 1, 10-30-2018; Ord. No. 18966, § 1, 8-20-2019)

13.24.210 Enforcement.

The employees assigned to the code enforcement division are authorized to enforce the provisions of this chapter and shall have the power to issue misdemeanor citations to any persons violating the provisions of this chapter.

(Ord. No. 17845, § 1, 7-31-2012)

13.24.220 Violation of Sections 13.24.010 through 13.24.150 and 13.24.170 through 13.24.190—Penalty.

Any person violating Sections 13.24.010 through 13.24.150 and 13.24.170 through 13.24.190 shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a fine not to exceed five hundred dollars.

(Ord. No. 17845, § 1, 7-31-2012)

Chapter 13.25

EL PASO ZOO

Sections:

13.25.010 El Paso Zoo fee authorization.

13.25.020 El Paso Zoo parking lot use and fees.

13.25.030 El Paso Zoo greenhouse—Authority to sell plants and trees.

13.25.010 El Paso Zoo fee authorization.

A. Fees. Fees for admission to the El Paso Zoo (zoo), admission to zoo designated signature events, zoo designated promotional admission discounts, participation in zoo education, adventure and group programs and facility service or equipment rental shall be in the amounts set forth in the fee schedule and administered in accordance with adopted policies.

B. Admission fees for reserved school groups may be discounted as set forth in the fee schedule. An advance reservation and completed application will be required of any school group prior to entrance at the zoo. School groups shall agree to comply with zoo policy concerning the conduct of school group members while at the zoo to be eligible for the school group admission fee discount. The director may accept reservations and the payment for food items provided to school groups by the zoo's concessionaire, as may be provided for in the effective contract between the city and the zoo's concessionaire. School groups are defined to include any public or private licensed child daycare, head-start, pre-kindergarten, kindergarten, primary, secondary, high school, home-school groups, and higher education entities. Minimum number of students may apply per school group.

C. Bulk ticket discount rate. The director of the El Paso Zoo (director) is authorized to provide a discount as set in the fee schedule for advanced purchase of bulk admission to the zoo in blocks of fifty or more tickets.

D. The director is authorized to offer discounted admission to the zoo up to fifty percent of an established fee.

E. No fee admissions.

1. General admission fees will not be charged to members or employees of the El Paso Zoological Society (EPZS) and the zoo concessionaire, pursuant to the terms of their respective contracts wit hthe City of El Paso. Proof of association with such groups will be required prior to waiver of the general admission fee. Members of other zoological societies that have a reciprocal admission agreement with the EPZS shall be admitted according to the respective reciprocating agreement provisions.

2. General admission fees will not be charged for employees of the zoo.

3. General admission fees will not be charged to members of the Association of Zoos and Aquariums, zoo activity volunteers and individuals conducting official business at the zoo. Proof of association with such groups will be required prior to waiver of the regular admission fee.

F. Fees for city employees. General admission fees for city employees displaying a valid city ID will be discounted as set in the annual fee schedule. Admission fees for family members of a city employees will be discounted as set in the annual fee schedule, provided that the family members are accompanied by the city employee.

G. Fees for the use of zoo amenities. Fees for the use of any zoo amenities will be established as set in the annual fee schedule. Discounts for members of the El Paso Zoological Society are allowed as established in the annual fee schedule. (Ord. 16989 § 1, 2008: Ord. 16441 § 1, 2006: Ord. 15710 § 1, 2004; Ord. 15557 § 1, 2003: Ord. 15485 § 1, 2003; Ord. 14503 § 1, 2000; Ord. 12908 §§ 1, 4, 1996: Ord. 12617 § 1, 1995: Ord. 11640 § 2, 1993) (Ord. No. 17166, § 1, 8-11-2009; Ord. No. 18068, § 1, 8-20-2013, eff. 9-1-2013; Ord. No. 18828, § 1, 8-7-2018)

13.25.020 El Paso Zoo parking lot use and fees.

A. The parking fee for zoo patrons, if any, is as set forth in council resolution. This fee shall not apply to any individual or group otherwise exempt from admission fees pursuant to this chapter.

B. The parking fee for non-zoo patrons is as set forth in council resolution. In lieu of charging the required fee, the zoo director is authorized to enter into reciprocal use agreements not to exceed one year in duration with other area venues which allow the city to gain necessary access to overflow parking without significantly restricting or impeding necessary zoo patron parking. (Ord. 16441 § 3, 2006: Ord. 12908 § 3, 1996; Ord. 11640 § 3, 1993)

13.25.030 El Paso Zoo greenhouse—Authority to sell plants and trees.

A. From time to time, there is a desire to sell certain plants and trees from the greenhouse located on the El Paso Zoo grounds.

B. Through the passage of this section, the city council authorizes the director of the El Paso Zoo to sell such plants and trees.

C. The Director of the El Paso Zoo is authorized to sell plants and trees from the greenhouse at the approximate fair market value of said plants and trees. The fair market value shall be determined by the Director of the El Paso Zoo, or his/her designee by:

1. Surveying no less than four commercial entities and obtaining the price at which the entities sell the plants and trees to the public; and

2. Ascertaining the average of the prices charged by the commercial entities. The survey shall be conducted by the Director of the El Paso Zoo, or his/her designee, at six-month intervals. (Ord. 11665, 1993)

Chapter 13.28

SOUND AMPLIFYING DEVICES*

Sections:

13.28.010 Definitions.

13.28.020 Permit required.

13.28.030 Permit application.

13.28.040 Permitting criteria and process.

13.28.050 Approval or denial of application.

13.28.060 Waiver of fee.

13.28.070 Appeals.

13.28.080 Violation—Penalty.

13.28.010 Definitions.

For the purposes of this chapter, the following words and phrases shall have the meanings respectively ascribed to them by this section:

"Appeals official" means the city manager or a deputy city manager as designated by the city manager.

"Business days" means the weekdays excluding legal holidays.

"Downtown government/business area" means the area bounded by Yandell Street to Campbell Street; proceeding south on Campbell Street to Mills Street; proceeding east to Ochoa Street; proceeding south to Paisano Street; proceeding west on Paisano Street to Durango Street; proceeding north on Durango Street to Missouri Street; proceeding east on Missouri Street to Santa Fe Street; proceeding north on Santa Fe Street to Yandell Street; and proceeding east on Yandell Street to Campbell Street; and including the entire width of the public rights-of-way used for vehicular traffic within said area.

"Permit official" means the person or persons designated by the city manager as being responsible for issuing permits under this article. The city manager may designate different persons as the permit official for different categories of permitted events and for different facilities or locations.

"Sound amplifying device" means a loudspeaker, amplifier, public address system or any other artificial sound system that amplifies and plays sound for the purpose of publicly projecting or broadcasting the sound. (Ord. 16318 § 1, 2006) (Ord. No. 17338, § 9, 6-1-2010)

13.28.020 Permit required.

A. A person or an organization desiring to use a sound amplifying device on a street, sidewalk, city park or other place held by the city for public use shall apply for and obtain a permit for such use in accordance with the requirements of this chapter.

B. A person or an organization applying for a special privilege license, permit, or temporary or special event permit is exempt from having to pay the established fee for a permit in accordance with the requirements of this chapter. (Ord. 16318 § 2, 2006)
(Ord. No. 17983, § 1, 4-2-2013; Ord. No. 18381, § 2a), 7-7-2015)

13.28.030 Permit application.

A. Filing Application. An application for an amplification permit shall be made in writing on a form prescribed by the permit official at least five business days before the commencement of the use of amplification.

B. Late Application. Notwithstanding the preceding subsection, the permit official may consider an application that is filed at least three business days but not less than five business days before the commencement of the proposed use where the purpose of such event is a spontaneous response to a current event, or where other good and compelling causes are shown and the short notice does not unreasonably hinder or prejudice the city in any necessary preparation.

C. Application Form.

1. The application must contain the following:

a. The name, address, and telephone number for the person in charge of the proposed event and

** **Prior history:** Prior code §§ 15-26(1)—15-26(8) as amended by Ords. 9176, 12116, 12117, 12171, 12388, 12912, 15261.

the name of the organization with which that person is affiliated or on whose behalf the person is applying (collectively "applicant");

b. The date, time and place of the proposed use of amplification, including the hours at which the use of amplification will begin and end;

c. The number of and sound amplifying capacity of the microphones, amplifiers and speakers or other sound amplifying devices proposed to be used;

d. A statement of the purpose of the use and whether or not the purpose of the use is advertising any goods, property, services, or entertainment, the primary purpose of which advertising is the making of a profit for a business; and

e. Such other information, attachments, and submissions that are requested on the application form.

2. The application must be signed and when submitted not in connection with or simultaneous to an application for a parade, temporary, or special event permit be accompanied by payment of a nonrefundable application fee in the amount of fifteen dollars. Effective September 1, 2006, the application fee shall be in the amount set by the budget or other appropriate resolution of the city council, provided however, that if such fee is not contained in such a resolution as of September 1, 2006, the fee set herein in the amount of fifteen dollars shall continue until such time as the fee is established in the budget or other appropriate resolution of the city council. The fee shall not apply to an application submitted by a governmental entity.

3. Any person submitting a late application that is accepted pursuant to subsection B of this section shall be charged an additional fee in the amount of fifteen dollars. (Ord. 16318 § 3, 2006) (Ord. No. 18381, § 2b), 7-7-2015)

13.28.040 Permitting criteria and process.

An application may be denied for any of the following reasons:

1. The application is not fully completed and executed;

2. The applicant has not tendered the required application fee or submitted a request for a waiver of the fees in conformity with Section 13.28.060 of this chapter within times prescribed;

3. The application contains a material falsehood or misrepresentation;

4. The applicant is legally incompetent to contract or to sue and be sued;

5. The applicant has on prior occasions made material misrepresentations regarding the nature or scope of an event involving amplification;

6. The applicant has previously permitted a violation or has violated the terms of an amplification permit issued to or on behalf of the applicant;

7. The amplification will take place at a time, in a place or in a manner not in accordance with this chapter;

8. The amplification will be for the purpose of advertising goods, property, services, or entertainment, the primary purpose of which advertising is the making of a profit for a business;

9. The amplification will take place in the downtown government/business area for more than thirty minutes for every two hours of time between the hours of eight a.m. and five p.m., Monday through Friday, except legal holidays;

10. The amplification will require the use of a portion of San Jacinto Plaza other than the stage, or be within a city parking lot, the civic center plaza other than the patio area on the westerly side of city hall, on the sidewalks abutting the zoo, or at a location directed, focused or targeted at a hospital, a particular residence, or a facility for the performing arts or motion pictures during such times as events are taking place; or

11. The sound emanating from the sound amplifying devices:

a. Will be of such volume or duration and will occur at such time and place that it will unreasonably interfere with the safe and orderly movement of traffic or pedestrians;

b. Will cause such noise as to unreasonably discomfort persons of ordinary sensibilities living or working nearby;

c. Will be or is expected to be at a decibel level not permitted under the city's noise ordinance, Chapter 9.40 of this code;

d. Is primarily for the purpose of advertising goods, property, services, or entertainment, the primary purpose of which advertising is the making of a profit for a business; or

e. Will be audible within residential real property or at an institution, business or facility with sleeping facilities between the hours of ten p.m. and seven a.m. (Ord. 16318 § 4, 2006)

13.28.050 Approval or denial of application.

A. The permit official shall approve or deny an application within three business days of receipt in accordance with the standards set forth in this chapter. A notice of denial shall clearly set forth the grounds upon which the permit was denied and, where feasible, shall contain a proposal for measures by which the applicant may cure any defects in the application or otherwise procure a permit.

B. A permit, when issued, shall state the number of and sound amplifying capacity of the sound amplifying devices permitted, and the place, date and hours during which their use is permitted, provided however, that the issuance of a permit does not authorize the use of the sound amplifying devices in violation of the city's noise ordinance.

C. A permit, when issued for San Jacinto Plaza, shall restrict the use of sound amplifying devices to the stage located in the plaza and the permit shall state such restriction.

D. Where an application will be denied because the proposed use of amplification would conflict with another event that has or will be approved, the permit official may propose and issue an alternative permit for an alternative place, if available for the same time, or an alternative time, if available for the same place.

E. Where the applicant proposes to use amplification during hours not permitted under this chapter or Chapter 9.40 of this code, the permit official may unilaterally adjust the hours to the times permitted under this chapter and issue the permit accordingly.

F. Nothing in this chapter shall authorize the permit official to deny a permit based upon political, social, or religious grounds or reasons, or based upon the content of the views expressed.

G. The permit official may attach reasonable conditions to any permit approval as may be appropriate within the spirit and intent of this chapter. (Ord. 16318 § 5, 2006)

13.28.060 Waiver of fee.

A. If the applicant is indigent and unable to pay the application fee required under this chapter or the fee for the stage rental at the San Jacinto Plaza provided for in Chapter 13.24 of this code when the request is for the use of amplification at the San Jacinto Plaza, the fee shall be waived provided the applicant submits a sworn affidavit containing the following information:

1. A statement that the applicant and the group or organization on whose behalf the application is made, if applicable, is indigent and unable to pay the full amount of the permit fee;

2. Information about the financial status of the applicant and, if applicable, the group or organization on whose behalf the application is made and the nature of the existence of such a group or organization;

3. If an organization, a statement that the organization has made diligent efforts to raise money to pay the fee but have been unable to raise the funds; and

4. Any other information and documentation that the permit official determines is necessary to discern the financial status of the applicant or the group or the applicant's or organization's ability or efforts to raise funds to pay the fees.

B. If the applicant demonstrates through his affidavit or other submissions that he, and if applicable, the group or organization is indigent and unable to pay the application fee, the permit official shall waive the fee. (Ord. 16318 § 6, 2006)

13.28.070 Appeals.

A. An applicant may appeal the denial of an application or the denial of a waiver of the fees in writing within ten days after notice of the denial has been received by submitting a written request to the permit official. Within five business days, or such longer period of time agreed to by the applicant, the appeals official shall hold a hearing on whether to issue the permit or uphold the denial or to waive the fees or uphold the denial. The applicant shall have the right to present evidence at said hearing and to question appropriate city officials. The decision to issue the permit or waive the fees or to uphold the denial shall be based solely on the approval criteria set forth in this chapter. The appeals official shall render a decision on the appeal within five business days after the date of the hearing. In the event that the purpose of the proposed event is a spontaneous response to a current event, or where other good and compelling causes are shown, the appeals official shall reasonably attempt to conduct the hearing and render a decision on the appeal as expeditiously as is practicable.

B. Except as provided in subsections D and E, the decision of the appeals official is subject to review by the city council. Prior to the filing of any petition for declaratory judgment or other judicial determination pursuant to subsection C, the applicant shall appeal the decision of the appeals official to the city council. The applicant shall submit a written appeal request to the permit official, who shall forward the request for placement on the agenda of the next available regular city council meeting in compliance with all ordinances and statutes relating to the placement of items on the council agenda and the posting of the agenda. The decision to issue the permit or uphold the denial shall be based solely on the approval criteria set forth in this chapter.

C. The decision of the city council is subject to review in the district courts of El Paso County. Any petition for a declaratory judgment or other judicial determination as to whether the permit should be granted shall be filed with the clerk of district court within thirty days after the applicant has received notice of the decision. The city shall transmit the record to the court no later than five business days after filing its answer. The city shall in all matters before the court, seek prompt judicial action and promptly file and respond to all pleadings, discovery and other matters before the court.

D. The decision of the appeals official to waive the fees or to uphold the denial of a request for waiver of fees is final.

E. The decision of the permit official to refuse to accept a late application is not appealable. (Ord. 16318 § 7, 2006)

13.28.080 Violation—Penalty.

A. A person who uses a sound amplification device on a street, sidewalk, city park or other place held by the city for public use, without a permit for such use having been issued shall be deemed guilty of a misdemeanor and shall be punished as provided in Sections 1.08.010 through 1.08.030 of this code.

B. A person to whom a permit has been issued who intentionally violates the terms of the permit, or knowingly permits others to use sound amplifying devices in violation of the terms of the permit, shall be deemed guilty of a misdemeanor and shall be punished as provided in Sections 1.08.010 through l.08.030 of this code. (Ord. 16318 § 8, 2006)

Chapter 13.30

FILM-MAKING EVENTS

Sections:

13.30.010 Definitions.

13.30.020 Permit required.

13.30.030 Obedience to other laws required.

13.30.040 Permit application.

13.30.050 Permit consideration and issuance.

13.30.060 On-site location amendments and event date amendments.

13.30.070 Appeal from denial.

13.30.080 Duties of permittee.

13.30.090 Duties of participants.

13.30.100 Costs of city police and fire traffic control or oversight assistance.

13.30.110 Permit revocation.

13.30.120 Rental of city equipment.

13.30.130 Violation.

13.30.010 Definitions.

For purposes of this chapter, the following words and phrases shall have the meanings respectively ascribed to them by this section:

"City equipment" means fire, police, street, machinery or other mechanical devices owned and used by the city.

"City facility" means any city-owned real property and any improvements made thereto, other than a facility for which rental or user fees have been authorized by any ordinance of the city.

"Commissioner" means the El Paso Film Commissioner.

"Film-making event" means any filming or photography session done for commercial purposes in connection with the making of a film, movie, television production, commercial or like endeavor, which requires the closing of the street or a portion thereof to normal vehicular traffic or the use of a city building or facility for a period of time not to exceed forty-eight hours.

"Location" means any street, alley, other city right-of-way or city facility proposed to be utilized for a film-making event.

"Non-public portion" means the portion of any city facility not designated for public use that is currently utilized by city staff for city business.

"Permittee" means the individual to whom a film-making permit has been issued.

"Predesignated department representative" means one of three employees within a given department authorized to review film-making permit applications. Such employees shall be the department head and two designees or three designees designated by a department head. The names of these individuals shall be provided to and kept on file with the El Paso Film Commission as a primary and secondary contact for each department requiring review of a film-making permit application. Each predesignated department representative shall be authorized to provide approval on behalf of the respective department.

"Right-of-way" means the entire area of a street or alley owned by the city in easement or by fee simple interest, including the driving surface of the street and any improved or unimproved abutting land not used for vehicle traffic.

"Street" means that portion of public right-of-way improved, designed or ordinarily used for vehicular traffic to include alleys when applicable.

"Traffic engineer" means the Traffic Engineer for the City of El Paso as defined in Section 12.04.190 or that person's designee. (Ord. 15885 § 2, 2004)
(Ord. No. 17321, § 1, 5-11-2010)

Section 13.30.020 Permit required.

A person or organization conducting a film-making event involving the proposed use of a city right-of-way or city facility shall apply for a permit for such use from the commissioner in accordance with this chapter. The traffic engineer is authorized to issue a permit for a period not to

exceed forty-eight consecutive hours to any person or organization in compliance with all requirements enumerated herein that has submitted an application. The traffic engineer may extend a film-making event permit for a period up to an additional forty-eight consecutive hours up on receipt of an application for extension of a film-making event permit. Any person requesting the use or closure of a right-of-way or a city facility for more than the forty-eight hours allowed by a film-making event permit or the extension thereof, or the use of a city facility when the city manager determines that the use would interfere with the conduct of work performed by the city or would inappropriately interfere with the public's use of city facilities available for such uses shall submit the request in accordance with the provisions in Chapter 15.08 of this Code, or obtain a lease or licensing agreement for the use of a city facility, as applicable. (Ord. 15885 § 3, 2004)
(Ord. No. 17321, § 2, 5-11-2010)

13.30.030 Obedience to other laws required.

This chapter shall not be construed to authorize the use of city facilities or rights-of-way for film-making events except in exact compliance with the laws of the state and other ordinances of the city applicable thereto, and persons who violate such other laws and ordinances shall be subject to the penalties provided in the other applicable laws and ordinances. (Ord. 15885 § 4, 2004)

13.30.040 Permit application.

An application for a film-making event permit must be made for each film-making event project (including but not limited to, a motion picture, commercial or documentary) on a form provided by the city and filed with the commissioner. Permits issued for a film-making event may include multiple locations. A location information form must be filed for each location proposed on the permit application. The traffic engineer's approval of locations may provide for the use of city rights-of-way or facilities for periods not to exceed forty-eight consecutive hours for each location or an extension thereof not to exceed and additional forty-eight hours. Request for use or closure of rights-of-way or a city facility for more than 48 consecutive hours or the extension thereof at a particular location shall require a special privilege permit or license as provided for in Chapter 15.08.

A. Application filing and review. An application shall be filed with the commissioner. No materially incomplete application shall be accepted. Upon receipt of a materially complete application, the commissioner shall timestamp and assign an application number to the project together with a separate location number for each proposed film-making event location. The applicant, or the commissioner on behalf of the applicant, shall then be responsible for obtaining a recommendation for each proposed location from all affected departments as outlined below:

1. The commissioner shall immediately forward the application to all the departments for which application review is required and shall additionally inform the director of the city development department and council members of any locations proposed within their district. The commissioner or applicant shall work with a pre-designated departmental representative to facilitate timely review. A pre-designated department representative for film-making events permitting shall provide a recommendation for approval, approval with modification, or denial for each proposed location along with applicable departmental comments. A pre-designated department representative shall make every effort to provide a recommendation within one business day.

2. Review of the application shall be required from the following departments: fire, police, Sun Metro, environmental services, and transportation. Other departments may be requested to review the application, as determined to be appropriate by the commissioner. Review by and approval by the director of aviation or designee shall be required for any proposed filming on City of El Paso airport property. The use of any police or fire facility shall require approval of the police or fire chief respectively. The traffic engineer shall ap-

prove all applications. The city manager or designee shall review and approve all applications for the use in or at non-public areas of city facilities. A pre-designated department representative shall provide written acknowledgment of receipt of the application. Any department required or requested to review the application shall make recommendation and provide comments by no later than the close of business on the third City Hall business day, after receipt of the application. Upon completion of distribution to all departments making a review, the applicant or commissioner, as the case may be, shall forward application and department recommendations to the traffic engineer. The traffic engineer shall begin his review on the city business day he receives the application and department recommendations and shall approve or deny the permit as required in Section 13.30.050.

B. Application content. The application for a film-making event permit shall set forth the following information:

1. The name, address and telephone number(s) of the person and organization seeking to conduct the event, as well as at least one alternate contact and the contact's telephone number;

2. The proposed title and description of the project;

3. The location or locations of the event;

4. Any additional information requested by the traffic engineer or commissioner reasonably necessary for a fair determination as to whether the permit should be issued.

5. All information required on the standard application form.

6. All supplementary documentation required.

7. Proposed location content. For each proposed location submitted as part of an application, the applicant shall provide the following information:

a. The physical address or description of the location, and rights-of-way affected by filming, proposed closures or intermittent traffic control and traffic control plan as required by Section 13.30.040.B.9.b.

b. The dates and times for set-up, filming and tear-down/clean-up.

c. The number of cast and crew expected to be present for set-up, filming and tear-down/clean-up.

d. The type of filming action expected to take place at the location.

8. Any additional information requested on the location information form, or by the traffic engineer or commissioner, reasonably necessary for a fair determination as to whether the location should be approved.

9. Required supplementary documentation. The applicant shall provide all documentation required under this subsection, unless otherwise stated herein, at the time an application is filed.

a. Applicant authorization. If the film-making event is designed to be conducted by, and on behalf of or for, any person other than the applicant, the applicant for such permit shall also file a communication in writing from the person proposing to hold the film-making event, authorizing the applicant to apply for the permit on his behalf.

b. Traffic control plan. For each proposed location on city right-of-way, a traffic control plan showing the proposed location of all barricades, signs and devices to be used for redirecting traffic around the closure area shall be provided by the applicant and shall comply with the following:

i. The traffic control plan shall provide for the closing of the street to include any intersections and rerouting of traffic, use of appropriate manned barricades, signs, and peace officers who have jurisdiction within the city, and shall also designate on the plan, the location of adequate and appropriate parking areas for filming crews and equipment.

ii. Such traffic control plan shall be in conformity with the most recent edition of the Texas Manual on Uniform Traffic Control Devices, shall be drawn on a map, and be timely submitted to the traffic engineer pursuant to the requirements set forth herein. In considering the appropriateness of a traffic control plan, the traffic engineer may approve with modification or otherwise incorpo-

rate any recommendations made by other predesignated departmental review representatives or department heads, which may require the use of peace officers.

iii. The traffic control plan shall provide that an unobstructed width of not less than 20 feet and an unobstructed vertical clearance of not less than 13 feet 6 inches for emergency vehicle access on all temporarily closed streets be retained. Fire hydrant locations shall be identified and no structure shall be located within 15 feet of any such fire hydrant.

iv. As part of a submitted traffic control plan, the permittee agrees to be responsible for the following:

a) Obtaining and placing barricades and signs in conformity with the traffic control plan.

b) Costs associated with the placement of such barricades and signs.

c) Costs for city police assistance, traffic control or otherwise, as provided in Section 13.30.100 of this Code if a determination is made by the traffic engineer that police traffic control assistance is also necessary.

d) To remove all barricades and signs and reopen streets immediately after the film-making event and subsequent tear-down/clean-up has ended.

e) To pay all parking meter fees for the time utilized.

f) Ensuring that access to property abutting an event location to be held on a street is not denied.

C. Certificate of insurance. A certificate of liability insurance naming the city as an additional insured. When applicable, the applicant must provide insurance pursuant to the following conditions and in the following amounts:

1. Worker's compensation with statutory limits;

2. Employer's Liability with minimum limits for bodily injury: a) by accident, two hundred fifty thousand dollars each accident, b) by disease, two hundred fifty thousand dollars for each employee with a policy aggregate of five hundred thousand dollars.

3. Business automobile liability insurance covering owned, hired, and nonowned vehicles, with a minimum combined bodily injury (including death) and property damage limit of five hundred thousand dollars per occurrence and in the aggregate. If filming involves stunts or extended car chases, then the minimum limit of coverage shall be three million dollars per occurrence and in the aggregate.

4. If the filming involves the use of aircraft then aircraft liability insurance for owned, hired, and nonowned aircraft with a minimum limit of five million dollars per occurrence and in the aggregate.

5. Commercial general liability insurance including, but not limited to, premises/operations, personal and advertising injury, products/completed operations, independent contractors and contractual liability with minimum combined bodily injury (including death) coverage of two hundred fifty thousand dollars per person and one million dollars in the aggregate, and property damage limits of one million dollars per occurrence and one million dollars in the aggregate. If filming in a city facility or premises, then, minimum limits of one million dollars per occurrence and two million dollars in the aggregate is required. If filming involves use of pyrotechnics, explosives or fireworks, then three million dollars per occurrence and three million dollars in the aggregate is required.

6. If alcoholic beverages are sold, served, or otherwise made available, then liquor liability insurance with minimum limits of one million dollars for each claim and in the aggregate.

7. With respect to the above required insurance, all insurance contracts and certificate(s) of insurance shall contain and state in writing, the following required provisions: a) name the city and its officers, employees, and elected representatives as additional insureds; b) state that coverage shall not be cancelled, non-renewed or mate-

rially changed except after thirty days' written notice by certified mail to: Film Commissioner, 1 Civic Center Plaza, El Paso, TX 79901; and c) waive subrogation against the City of El Paso, its officers, employees, for bodily injury (including death) property damage or any other loss.

a. Proof of notice to abutting owners and occupants. A statement from the applicant for a film-making event that every owner or occupant of real property abutting the boundaries of the area in which the film-making event will be conducted has been notified. Notification shall additionally be provided in writing in both English and Spanish to each common address abutting the location. In addition, a statement showing which owners or occupants have given consent for the film-making event, have not consented, or have not responded. Inability to obtain consent from at least seventy-five percent of the affected owners or occupants may be grounds for permit denial or revocation.

b. Application fees. An application fee for each proposed filming location shall be paid by the person applying for the permit at the time of the filing of the application. The application fee shall be established by the current budget resolution or other appropriate resolution passed by the city council. (Ord. 15919 § 1, 2004; Ord. 15885 § 5, 2004)

(Ord. No. 17321, § 3, 5-11-2010; Ord. No. 17391, § 12, 8-24-2010, eff. 9-1-2010; Ord. No. 17803, § 4, 6-5-2012, eff. 6-11-2012)

13.30.050 Permit consideration and issuance.

A. Traffic engineer review. The traffic engineer shall review an application and each proposed event location together with departmental recommendations and comments in order to ensure that the proposed film-making event complies with the provisions of this chapter and is an appropriate use under subsection B. The traffic engineer shall approve, approve with modifications consistent with departmental recommendations, or disapprove an application, or specific event location no later than two city business days after the date he receives the application and departmental recommendations. The traffic engineer's failure to issue an approval, approval with modifications, or disapproval of the application within the time period provided herein shall constitute a denial for purposes of section 13.30.070 of this code. The traffic engineer shall immediately notify the applicant of his determination, and if the application is denied, of the reasons therefore.

B. Application and event location considerations. The traffic engineer shall consider the following criteria, as may be applicable, to determine whether the applicant's proposals adequately and appropriately address public health, safety and welfare issues and whether police or other city personnel assistance shall be required as part of approval and can be provided:

1. The expected general flow of traffic upon the street or streets affected at the time proposed for the film-making event;

2. Whether any owners or occupants of real property abutting the boundaries of the area in which a film-making event will be conducted have not consented to the conduct of the event, and if objections have been filed, whether allowing the event will significantly impair the access to the affected property;

3. The existence, if any, of alternate routes for public transit vehicles and private vehicles;

4. Whether the event will significantly affect the city's ability to deliver police, fire and medical emergency services in the vicinity;

5. The extent, if any, of disruption to the use and enjoyment of residential, business, industrial and governmental facilities located in the vicinity of the proposed event.

6. Whether and to what extent police or other traffic control assistance reasonably will be required under this subsection, the traffic engineer, upon recommendation of the chief of police or his designees, shall consider such factors as the proposed size, proposed length, potential need to reroute traffic, close streets and control traffic at

intersections, anticipated amount of traffic to be controlled, number of intersections involved, as well as the time of day and date of the film-making event.

7. Prior similar events. The traffic engineer may review records, if any, from prior similar events conducted at or near the proposed site to determine whether there has been a history of traffic control problems, noise or other disruptions associated with the conduct of other events and whether the applicant presently demonstrates the steps to be taken to resolve any prior problems or disruptions.

C. Mandatory application denial. The traffic engineer shall not approve an application or specific proposed event location, as the case may be, when:

1. The applicant has not furnished all information and documentation required by Section 13.30.040.

2. The traffic control plan and submitted maps do not adequately address security and traffic control issues or does not otherwise adequately address the criteria and requirements of this section. However, the traffic engineer may approve a modification of the applicant's submittal when such modification adequately addresses security and traffic control issues.

3. The film-making event is proposed to be held on any state or federal highway or road and the appropriate governmental agency has not affirmatively authorized the proposed use in writing. However, the traffic engineer may approve a film-making permit application "subject to" approval from the appropriate state or federal governmental agency. In such event, the applicant is not authorized to conduct the film-making event until he receives the approval and provides a copy of the approval to the traffic engineer. Further, the traffic engineer is authorized to submit an application to any federal or state agency to obtain authorization for use of their rights-of-way on behalf of the applicant when such authorization is required and such agency requires that application only be filed by a governmental entity.

4. The applicant requests a use not permitted under this chapter.

5. The applicant fails to pay any outstanding fees assessed under this chapter for the application or has failed to pay any outstanding fees for any past event.

6. The police chief, fire chief, or their designees have determined that the conduct of the film-making event would pose a serious threat to the public health, safety or welfare.

7. The proposed use conflicts with a permit already granted and filed or with the terms of an ordinance granting a special privilege for the use of the street that has either been introduced or approved by the city council.

8. A specific location is proposed for use of more than 48 hours and a special privilege permit or license has not been issued.

9. The director of aviation for the city airport has not approved the specific event location on airport property.

10. Applicant has failed to meet all requirements of the Federal Aviation Administration for use of aircraft. However, the traffic engineer is authorized to approve subject to receipt of such requirements prior to the event time.

11. Applicant has failed to obtain required permits for the use of fire, pyrotechnics or explosives at his sole cost. However, the traffic engineer is authorized to approve subject to receipt of such required permits prior to the event time or may authorize the use of the location without the use of pyrotechnics or explosives.

12. Written approval from the city manager when use of a non-public portion of a city facility has not been obtained.

D. Permit modifications when abutting owners object. In the event that a permit is issued for any film-making event for which consent has not been given by an owner or occupant of any real property adjacent to the area of closure, the traffic engineer, when issuing the permit, may modify the time or impose additional requirements, such as requiring barricades for lawns or other properties, within the closure area that may assist with the

protection or enjoyment of or access to the property of those persons who have indicated their objection to the event.

E. Estimated costs assessed. At the time that the permit is issued, the traffic engineer shall provide the permittee with a copy of the city's estimate of any required costs assessed to the permittee under this chapter. The permit shall provide that the permittee acknowledges that such estimate is subject to change and promises to pay all amounts due including those in addition to the estimate provided.

F. Time to clean up. The traffic engineer shall designate in the permit the time period that the applicant shall have for all clean-up and site restoration required under this chapter.

G. Permittee's agreements in consideration of permit issuance. A permittee receiving a film-making event permit shall, at the time the permittee appears to receive the permit:

1. Agree in writing to reimburse the city for the cost of city personnel and equipment used to support the film-making activity, as determined by the traffic engineer.

2. Return any location utilized to its pre-event condition at no cost to the city.

3. Provide the names and cellular telephone numbers or pager numbers of one or more persons who will be at the scene and in charge of the scene during the film-making event.

H. The city manager, in approval of any event location utilizing city buildings or facilities not open to the public, may require additional consideration, restrictions, or conditions as necessary under the circumstances. (Ord. 15919 §§ 2, 3, 2004; Ord. 15885 § 6, 2004)
(Ord. No. 17321, § 4, 5-11-2010)

Section 13.30.060 On-site location amendments and event date amendments.

A. On-site location amendments. The traffic engineer may approve a request to expand or otherwise modify an approved location at the time of the event. The traffic engineer shall only be required to consult with and obtain the approval of departments that made recommendations on the permit application and the primary police officer assigned to the event location prior to approval of such modification. The traffic engineer may deny the requested expansion of the location or modify the expansion area based on traffic and pedestrian control, noise and access considerations.

B. Event date amendments. The traffic engineer may approve a request to change the event date for an approved location. The traffic engineer shall consult with the predesignated police department and obtain their consent prior to approval. The traffic engineer shall immediately notify all departments initially responsible for review of such change immediately upon approval. (Ord. 15885 § 7, 2004)
(Ord. No. 17321, § 5, 5-11-2010)

Sec. 13.30.070 Review of denial of permit.

If the traffic engineer denies an application for a permit, the action is final unless, within en consecutive calendar days following the date of receiving notice of the action, the applicant files with the traffic engineer, a written request that the city council issue the permit. The city council shall make the final determination on the matter. The city council shall, as soon as practical, hear such request after reasonable notice to the applicant. The applicant shall have an opportunity to present information on his behalf that supports the applicant's needs to close or use city streets and/or facilities for the filmmaking event and to show that the event is permitted under this chapter and that the application and submitted documentation comport to the requirements of this chapter. If the city council fails to render a decision within thirty days after the date the request is filed with the traffic engineer the request is denied, unless city council, by specific motion, extends the time period for the consideration of the request. (Ord. 15885 § 8, 2004)
(Ord. No. 17321, § 6, 5-11-2010)

Sec. 13.30.080 Duties of permittee.

A permittee shall comply with all permit directions and conditions, with all applicable laws

and ordinances, and obtain all other city permits that may be required in conjunction with the film-making event.

A. The person conducting the film-making event shall carry the permit upon his person during the conduct of the film-making event.

B. The permittee shall comply with all obligations imposed under Section 13.30.040 regarding the implementation of the security and traffic control plan and shall not permit a film-making event to proceed or continue until such time as the applicable traffic control plan or method is set up and functioning.

C. The permittee shall, immediately upon the conclusion of the film-making event, clean and remove all litter and debris left on the streets, sidewalks and other public rights-of-way by participants, and with the permission of the property owner, all litter and debris left on private property by event participants.

D. In the event that the permittee fails to clean and remove all such litter and debris on the streets, sidewalks and other city right-of-ways within four hours of the end of the film-making event, or other time period as otherwise determined by the traffic engineer as part of application approval, the city may perform such cleaning and the permittee shall be responsible for the costs of the city cleaning. Payment of any city cleaning costs shall be due and payable upon receipt of the bill from the city comptroller. (Ord. 15885 § 9, 2004)
(Ord. No. 17321, § 7, 5-11-2010)

13.30.090 Duties of participants.

A. During the course of a film-making event, each participant who is operating a vehicle of any type shall obey the directions of any peace officer who is providing traffic control. All participants shall be licensed to drive the vehicle they are operating.

B. Each participant shall remain responsible for the payment of any bridge-crossing tolls, should the location include the use of a toll area.

C. All participants at a location that is an area under the control, direction or supervision of the United States Bureau of Customs and Border Protection shall comply with all laws, regulations and other requirements pertaining to the entry into and exit from such area. (Ord. 15885 § 10, 2004)

13.30.100 Costs of city police and fire traffic control or oversight assistance.

A. Permittee shall be responsible for all costs of city police and fire traffic control or oversight assistance including additional costs associated with delays or modifications to submitted applications.

B. Payment of the costs shall be due and payable upon receipt of the bill from the city comptroller. (Ord. 15885 § 11, 2004)

13.30.110 Permit revocation.

A. The traffic engineer shall revoke a film-making event permit if:

1. The permittee fails to comply with or the film-making event is in violation of any provision of the permit, a city ordinance, or other applicable law, or

2. The police chief, fire chief, traffic engineer or their designees have determined that the conduct of the special event is posing a serious threat to the public health, safety or welfare.

B. Applicant herein is obligated to immediately restore and vacate the location immediately upon receipt of permit revocation. (Ord. 15885 § 12, 2004)
(Ord. No. 17321, § 8, 5-11-2010)

13.30.120 Rental of city equipment.

A film-making event applicant requesting the temporary rental of city equipment shall submit written request to the traffic engineer. The traffic engineer shall immediately forward the request to a predesignated departmental representative within the department responsible for such equipment. The predesignated representative shall recommend approval, approval with modifications, or

denial of the request within three City Hall business days following the date of receipt of the request. If the request is approved, the traffic engineer shall forward the recommendation for approval or approval with modifications and proposed rental agreement to the city manager or designee for approval and signature. Such rental agreement shall include all terms agreed to by the traffic engineer and deemed necessary to protect the city's interest, including but not limited to insurance-coverage and reimbursement for any damage or destruction of such equipment. (Ord. 15885 § 13, 2004)
(Ord. No. 17321, § 9, 5-11-2010)

Section 13.30.130 Violation

A. A person commits an offense if he promotes or sponsors a film-making event for which a permit has not been issued or has been revoked.

B. A person to whom a person has been issued commits an offense if he intentionally violates the terms of the permit.

C. A person participating in a film-making event for which a permit has been issued commits an offense if he intentionally violates the terms of the permit.

D. A person commits an offense if he participates in a film-making event for which a permit is required without a permit having been issued, or if issued, subsequently revoked. (Ord. 15885 § 14, 2004)
(Ord. No. 17321, § 10, 5-11-2010)

Chapter 13.32

TEMPORARY EVENTS*

Sections:

13.32.010 Definitions.

13.32.020 Permit required.

13.32.030 Permit application.

13.32.040 Permitting criteria and process.

13.32.050 Costs and fees.

13.32.060 Approval or denial of application.

13.32.070 Appeals.

13.32.080 Duties of permittee.

13.32.090 Violation—Penalty.

13.32.010 Definitions.

For purposes of this chapter, the following words and phrases shall have the meanings respectively ascribed to them by this section:

"Appeals official" means the city manager or a deputy city manager as designated by the city manager.

"Noise disturbance" means the causation or existence of noise of such volume or duration as to unreasonably interfere with the safe and orderly movement of traffic or pedestrians or so as to unreasonably discomfort persons of ordinary sensibilities living nearby, or noise at a decibel level not permitted under the city's noise ordinance, Chapter 9.40 of this code.

"Permit official" means the person or persons designated by the city manager as being responsible for issuing permits under this article. The city manager may designate different persons as the permit official for different categories of permitted events and for different facilities or locations.

"Street" means that portion of public right-of-way improved, designed or ordinarily used for vehicular traffic.

"Temporary event" means any bazaar, block party, street dance, sidewalk sale, show exhibition, local special event, festival, celebration or any similar occurrence to last twenty-four hours or less that will be conducted on a street or alley within an area not exceeding one city block or one intersection, at least two-thirds of which area is residentially zoned and which is sponsored solely by the owners, residents or tenants in the area or their organization, or an event to last twenty hours or less that will be conducted on all or a portion of scenic drive. (Ord. 16315 § 1, 2006)

** **Prior history:** Prior code § 15-25 as amended by Ords. 9177, 10364, 11783, 12370, 12501, 12910, 12949, 13152, 14279, 15261.

13.32.020 Permit required.

No temporary event upon a residential public street or alley is permitted unless a permit allowing such activity has been obtained pursuant to this chapter. (Ord. 16315 § 2, 2006)

13.32.030 Permit application.

A. Filing Application. An application for a temporary event permit shall be made in writing on a form prescribed by the permit official at least thirty days before the commencement of the event.

B. Late Application. Notwithstanding the preceding subsection, the permit official may consider an application that is filed more than seven but less than thirty days before the commencement of the proposed event where the purpose of such event is a spontaneous response to a current event or where other good and compelling causes are shown, and the short notice does not unreasonably hinder or prejudice the city in preparing for the temporary event.

C. Application Form.

1. The application must contain the following:

a. The name, address, and telephone number for the person in charge of the proposed event and the name of the organization with which that person is affiliated or on whose behalf the person is applying (collectively "applicant");

b. The name, address, and telephone number for an individual who shall be designated as the responsible planner and on-site manager for the event;

c. The date, time and place of the proposed event, including the time that the event will begin and end;

d. The anticipated number of persons, and the basis on which this estimate is made;

e. The availability of parking, restroom facilities and trash receptacles in the vicinity where the event will be conducted to accommodate the number of persons that are expected to attend the event; and

f. Such other information, attachments, and submissions that are requested on the application form.

2. If the applicant desires to use amplification in connection with the temporary event, the applicant shall so indicate on the application form and provide the information requested on the application form.

3. The application must be signed and be accompanied by a nonrefundable payment of the established fee.

4. Within two business days after the receipt of the application or the documentation required under subsection D., whichever occurs later, the permit official may reject any application or other documentation that does not contain an accurate and legible depiction of the location of the event and require the applicant to resubmit a corrected application or documentation with an accurate and legible depiction of the location. The resubmission is subject to all of the deadlines set forth in this section.

D. Documentation Required. The applicant shall provide all documentation required under this subsection no later than two business days after the day the application is filed.

1. A traffic control plan showing the location of all barricades, signs and devices to be used for redirecting traffic around the closure area. The applicant may request the assistance of the permit official or other designated city employees with the development of the traffic control plan.

a. The applicant shall develop and submit a traffic control plan for closing the street or alley to include any intersections and rerouting the traffic, using appropriate manned barricades and signs or peace officers other than El Paso police officers authorized by law to direct traffic on city streets, and shall also designate on the plan, the location of adequate and appropriate parking areas for those persons attending the event.

b. Such traffic control plan shall be in conformity with the most recent edition of the Texas Manual on Uniform Traffic Control Devices and shall be in writing, be drawn on a map, and be timely submitted to the permit official pursuant to the requirement set forth herein. In considering the appropriateness of a traffic control plan, the permit official may incorporate any recommendations made by the chief of police, the traffic engineer, or their designees into the plan, which may include the use of some El Paso police officers.

c. The function must be conducted in such a manner that at least one lane of the street to be utilized will be capable of being opened at all times for access by persons requiring emergency access to properties abutting the function and by police, fire and other emergency vehicles, and the traffic control plan shall depict the location of this lane.

2. A map of the area to be closed or used showing all fire lanes, booths, stages, portable toilets, trash containers, any other important features for the event, and any other materials the applicant intends to place within the area.

3. A notice of proposed closure on a form prescribed by the permit official containing the name and address of each owner or occupant of real property abutting the boundaries of the area in which a temporary event will be conducted and a signed statement from one individual representing or constituting the owner or occupant of each property stating whether they consent to or object to the proposed event. A neighborhood association may state its support or opposition through the signature of any officer so authorized by the neighborhood association. (Ord. 16315 § 3, 2006) (Ord. No. 17983, § 2, 4-2-2013)

13.32.040 Permitting criteria and process.

An application may be denied for any of the following reasons:

1. The application is not fully completed and executed or all information and documentation required by Section 13.32.030 has not been timely submitted;

2. The applicant has not tendered the required application fee or has not tendered other required user fees within times prescribed;

3. The application contains a material falsehood or misrepresentation;

4. The applicant is legally incompetent to contract or to sue and be sued;

5. The applicant has on prior occasions made material misrepresentations regarding the nature or scope of an event;

6. The applicant has previously permitted a violation or has violated the terms of a temporary event permit issued to or on behalf of the applicant;

7. The applicant has on prior occasions damaged city property and has not paid in full for such damage;

8. A fully executed prior application for a use at the same time and place has been received, and a permit has been or will be granted to a prior applicant authorizing uses or activities which do not reasonably permit multiple simultaneous events;

9. The applicant requests a use not permitted under this chapter;

10. The proposed event would present an unreasonable danger to the public health or safety;

11. The traffic control plan and submitted maps does not adequately address security and traffic control issues or does not otherwise adequately address the criteria and requirements of this chapter including but not limited to significantly affecting the city's ability to deliver police, fire and medical emergency services to the function site and in the vicinity of the function site;

12. Closing a street or alley for a temporary event would deny or restrict access to adjacent properties and ten percent or more of the affected owners or occupants have objected to the conduct of the event. The calculation under this subsection shall be based on the number of different properties or occupied units, not the total number of individuals occupying or using all properties;

13. Appropriate alternate routes for public transit vehicles and private vehicles are not available;

14. Inadequate arrangements have been made for anticipated parking needs and for restroom facilities and trash receptacles; or

15. The event will include amplified or nonamplified music or other sound sources that may be expected to create a noise disturbance which cannot be appropriately abated or controlled by the applicant. (Ord. 16315 § 4, 2006)

13.32.050 Costs and fees.

A. The applicant shall be responsible for obtaining and placing barricades and signs in conformity with the traffic control plan, for the costs associated with the placement of such barricades and signs, and for any costs for city police traffic control assistance, including the hiring and paying the cost of law enforcement officers, vehicles and equipment that are used for traffic control. When calculating the costs for the police department's portion of a traffic control plan under this chapter, the police department shall prepare an estimated cost for the event and shall furnish the estimate to the permit official and the applicant. A representative of the police department shall, when necessary confer with the applicant and explain the estimated costs.

B. The police department shall prepare and maintain a schedule of fees, based on its actual costs including overtime costs as appropriate, for its law enforcement officers, vehicles and equipment that are used for event traffic control. The schedule shall be on file with the permit official and the city comptroller and shall be made available to all applicants.

C. If the traffic control will be provided by peace officers other than El Paso Police Officers,

the permittee shall be responsible for any and all costs associated with the hiring and use of those peace officers.

D. The applicant shall be responsible for all costs of litter and debris removal in accordance with Section 13.32.080 of this chapter.

E. The applicant shall pay the established fee upon submittal of the application for permit. Prior to the issuance of the permit, the applicant shall pay the full amount of all costs for services, permits and licenses that will be provided by the city. If the applicant cancels the event and notifies the permit official within three hours or less of the commencement of the event, the application fee will not be refunded. (Ord. 16315 § 5, 2006)
(Ord. No. 17983, § 3, 4-2-2013)

13.32.060 Approval or denial of application.

A. The permit official shall approve or deny an application within twenty days of receipt in accordance with the standards set forth in this chapter. A notice of denial shall clearly set forth the grounds upon which the permit was denied and, where feasible, shall contain a proposal for measures by which the applicant may cure any defects in the application or otherwise procure a permit.

B. If the applicant has requested the issuance of an amplification permit at the time of the submission of the application for a temporary event permit, the permit official shall proceed to make a separate determination regarding the issuance of the amplification permit and may issue an amplification permit in conjunction with the temporary event permit as permitted by and in accordance with the requirements established under Chapter 13.28 of this code.

C. In the event that a permit is issued for any temporary event for which any objection has been filed by an owner or occupant of any real property adjacent to the area of closure, the permit official, when issuing the permit, may modify the time for the event to a period not to exceed twelve hours, restrict or modify the use of amplification, if any, or impose additional requirements such as requiring barricades for lawns or other properties within the closure area that may assist with the protection or enjoyment of or access to the property of those persons who have indicated their objection to the event.

D. The permit official may attach reasonable conditions to any permit approval as may be appropriate within the spirit and intent of this chapter. (Ord. 16315 § 6, 2006)

13.32.070 Appeals.

A. An applicant may appeal the denial of an application in writing within ten days after notice of the denial has been received by submitting a written request to the permit official. Within five business days, or such longer period of time agreed to by the applicant, the appeals official shall hold a hearing on whether to issue the permit or uphold the denial. The applicant shall have the right to present evidence at said hearing and to question appropriate city officials. The decision to issue or uphold the denial shall be based solely on the approval criteria set forth in this chapter. The appeals official shall render a decision on the appeal within five business days after the date of the hearing. In the event that the purpose of the proposed event is a spontaneous response to a current event, or where other good and compelling causes are shown, the appeals official shall reasonably attempt to conduct the hearing and render a decision on the appeal as expeditiously as is practicable.

B. Except as provided in subsections D and E, the decision of the appeals official is subject to review by the city council. Prior to the filing of any petition for declaratory judgment or other judicial determination pursuant to subsection C, the applicant shall appeal the decision of the appeals official to the city council. The applicant shall submit a written appeal request to the permit official, who shall forward the request for placement on the agenda of the next available regular city council meeting in compliance with all ordinances and statutes relating to the placement of items on the council agenda and the posting of the

agenda. The decision to issue or uphold the denial shall be based solely on the approval criteria set forth in this chapter.

C. The decision of the city council is subject to review in the district courts of El Paso County. Any petition for a declaratory judgment or other judicial determination as to whether the permit should be granted shall be filed with the clerk of district court within thirty days after the applicant has received notice of the decision. The city shall transmit the record to the court no later than five business days after filing its answer. The city shall in all matters before the court, seek prompt judicial action and promptly file and respond to all pleadings, discovery and other matters before the court.

D. The decision of the permit official to refuse to accept a late application is not appealable.

E. The decision as to the amount of traffic control or clean up necessary in conjunction with an event, and the costs resulting therefrom, are not appealable, provided that the costs of traffic control are based on schedule of fees required in Section 13.32.050(B) of this chapter. (Ord. 16315 § 7, 2006)

13.32.080 Duties of permittee.

A. The permittee shall comply with all permit requirements and conditions and with all applicable laws and ordinances, including but not limited to the city's noise ordinance, Chapter 9.40 of this code.

B. The person conducting the event shall carry the permit upon his person during the conduct of the event.

C. The permittee shall comply with all aspects of the approved traffic control plan.

D. All barricades and signs must be removed and streets must be reopened immediately after the event and subsequent street cleaning has ended.

E. The permittee shall, immediately upon the conclusion of the event, clean and remove all litter and debris left on the streets, sidewalks, alleys and other public rights-of-way by participants at the event, and with the permission of and at the request of an adjacent property owner, all litter and debris left on private property by event participants.

F. In the event that the permittee fails to clean and remove all such litter and debris on the streets, sidewalks, alleys and other public rights-of-way within four hours of the end of the street function, the city may perform such cleaning and the permittee shall be responsible for the costs of the city cleaning and shall reimburse the city for such costs.

G. Payment of all costs for costs of providing on-duty law enforcement officers and any other traffic control costs, less the amount of deposit made under Section 13.32.050(E) of this chapter, shall be due and payable within ten days of receipt of the bill from the city comptroller.

H. Payment of any city cleaning costs shall be due and payable upon receipt of the bill from the city comptroller. (Ord. 16315 § 8, 2006)

13.32.090 Violation—Penalty.

A. A person who promotes or sponsors a temporary event for which a permit is required without a permit having been issued shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this code.

B. A person to whom a permit has been issued who intentionally violates the terms of the permit or who violates any of the duties set forth in Section 13.32.080 shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this code.

C. A person participating in a temporary event for which a permit has been issued who intentionally violates the terms of the permit shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this code.

D. A person who participates in a temporary event for which a permit is required without a permit having been issued shall, upon conviction,

be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this code.

E. This chapter shall not be construed to authorize the closure and use of the public streets or alleys except in strict compliance with the laws of the state and other ordinances of the city applicable thereto, and persons who violate such other laws and ordinances shall be punished according to the provisions of the other applicable laws and ordinances.

F. Nothing in this chapter prohibits a law enforcement officer or firefighter from issuing a command to move or disperse in accordance with Texas Penal Code Section 42.04 in the event of a riot, unreasonable noise or obstructing passageway. (Ord. 16315 § 9, 2006)

Chapter 13.34

PICKETING

Sections:

13.34.010 Definitions.

13.34.020 Notice of intent to picket—Exceptions.

13.34.030 Reserved.

13.34.040 Picketing regulations.

13.34.050 Reserved.

13.34.010 Definitions.

The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

"Median" means a strip that separates the opposing flows of traffic on a roadway, with level or depressed areas within the median.

"Picket or picketing" means to make a public display or demonstration by one or more persons of sentiment for or against a person or cause, including protesting which may include the distribution of leaflets or handbills, the display of signs and any oral communication or speech, which may involve an effort to persuade or influence, including all expressive and symbolic conduct, whether active or passive.

"Roadway" means the paved area of a street between the face of the curb lines, including the driving and parking lanes, which is provided for the movement of vehicles.

"Sidewalk" means that portion of the public right-of-way which is designated for the use and movement of pedestrians.

"Street" means that portion of public right-of-way improved, designed or ordinarily used for vehicular traffic. (Ord. 16316 § 2, 2006)

13.34.020 Notice of intent to picket—Exceptions.

A. It shall not be an offense to picket on a city street, sidewalk, or other public way, or in a city park, without having provided notice.

B. The organizer of a picket that the organizer knows, or should reasonably know, will be attended by a group of fifty or more individuals are encouraged to give notice of intent to picket to the chief of police or his designee at least seventy-two hours before the beginning of the picket. The notice of intent to picket shall include the following information:

1. The name, address and contact telephone number for the organizer of the picket;

2. The name, address and contact telephone number of the person giving notice of intent to picket if different from the organizer;

3. The name of the organization or group sponsoring the picket;

4. The location where the picket is to take place;

5. The date and time the picket will begin and end; and

6. The anticipated number of participants, and the basis on which this estimate is made.

C. The chief of police shall develop a procedure by which individuals can give notice of intent to picket under this chapter, to include instructions as to where such notices are filed. Such policy shall be on file at police department headquarters and at the offices of the city clerk and the permit official designated to issue permits under Chapters 13.28, 13.32 and 13.36 of this Code, and shall be made available to the public.

D. A notice of intent to picket is not required to be given for picketing by a group of less than fifty individuals.

E. A notice of intent to picket is not required for a spontaneous event for which an attendee or event organizer cannot provide the level of advance notice required by this chapter, such as an event occasioned by recent news or current affairs, that is conducted solely on city right-of-way or parkland. A spontaneous event is subject to other laws. To help ensure public safety, an organizer of a spontaneous event is not required to, but is encouraged to, notify the El Paso Police Department of the date, time, place, and an estimate of the approximate number of persons who will be

participating. This section is applicable regardless of the number of individuals in attendance. (Ord. 16316 § 3, 2006)
(Ord. No. 019409, § 1, 12-6-2022)

13.34.030 Reserved.

Editor's note—Ord. No. 019409, § 2, adopted Dec. 6, 2022, repealed § 13.34.030, which pertained to receipt of notification and derived from Ord. No. 16316, § 3, adopted 2006.

13.34.040 Picketing regulations.

A. Picketing may be conducted on public sidewalks, any city park, or other city-owned areas normally used or reserved for pedestrian movement, including easements and rights-of-way, and shall not be conducted on the portion of a public roadway.

B. Picketing shall not disrupt, block, obstruct or interfere with pedestrian or vehicular traffic or the free passage of pedestrian or vehicular traffic into any driveway, pedestrian entrance, or other access to buildings, which abut the public sidewalks.

C. If more than one group of picketers desire to picket at the same time at or near the same location, law enforcement officers may, without regard to the purpose or content of the message, assign each group a place to picket in order to preserve the public peace. Members of a group shall not enter an area assigned to another group. Priority of location shall be based upon which group of picketers arrived first.

D. Spectators of pickets shall not physically interfere with individuals engaged in picketing. Picketers and spectators of pickets shall not speak fighting words or threats that would tend to provoke a reasonable person to a breach of the peace.

E. Picketers and picketing shall be subject to all applicable local, state and federal laws including, but not limited to the city's noise ordinance, amplification ordinance, and when crossing or using any roadway, picketers shall comply with all laws applicable to pedestrians.

F. Nothing in this chapter prohibits a law enforcement officer or firefighter from issuing a command to move or disperse in accordance with Texas Penal Code Section 42.04 in the event of a riot, unreasonable noise or obstructing passageway. (Ord. 16316 § 5, 2006)

13.34.050 Reserved.

Editor's note—Ord. No. 019409, § 3, adopted Dec. 6, 2022, repealed § 13.34.050, which pertained to violation and derived from Ord. No. 16316, § 6, adopted 2006.

Chapter 13.36

PARADES AND PUBLIC ASSEMBLIES

Sections:

13.36.010 Definitions.

13.36.020 Permit required.

13.36.030 Permit application.

13.36.040 Permitting criteria and process.

13.36.050 Costs and fees.

13.36.060 Approval or denial of application.

13.36.070 Appeals.

13.36.080 Duties of permittee.

13.36.090 Duties of participants.

13.36.100 Violation—Penalty.

13.36.010 Definitions.

The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

"Appeals official" means the city manager or a deputy city manager as designated by the city manager.

"Arterial" means a public right-of-way designated on the city's official major thoroughfare plan that has a minimum right-of-way width of seventy feet for the purpose of carrying more traffic volume than a local street.

"Event" means the collective reference to a parade, demonstration or public assembly.

"Parade" means an athletic event, march, pageant, procession or other similar activity consisting of persons, animals, vehicles or things, or any combination thereof, that disrupts the normal flow of traffic upon any public roadways or utilizes the appropriate areas within a city-controlled park. The length and route of a parade shall be as approved in accordance with the requirements of this chapter, provided however, a parade consisting solely of moving vehicles may not utilize more than six miles of city roadways, excluding any staging, pre-parade assembly or disbanding areas. A funeral procession is not a parade.

"Peak traffic hours" means between the hours of seven a.m. and nine a.m. and four p.m. and six p.m. on Monday through Friday, except legal holidays.

"Permit official" means the person or persons designated by the city manager as being responsible for issuing permits under this chapter. The city manager may designate different persons as the permit official for different categories of permitted events and for different facilities or locations.

"Roadway" means the paved area of a street between the face of the curb lines, including the driving and parking lanes, which is provided for the movement of vehicles.

"Sidewalk" means that portion of the public right-of-way which is designated for the use and movement of pedestrians.

"Street" means that portion of public right-of-way improved, designed or ordinarily used for vehicular traffic. (Ord. 16488 § 1, 2006; Ord. 16317 § 2, 2006)
(Ord. No. 17338, § 10, 6-1-2010; Ord. No. 019409, § 4, 12-6-2022

13.36.020 Permit required.

A. No parade is permitted unless a permit allowing such activity has been obtained pursuant to this chapter.

B. A permit is not required if the parade is a spontaneous event for which an attendee or event organizer cannot provide the level of advance notice required by this chapter, such as an event occasioned by recent news or current affairs. A spontaneous event is subject to other laws. To help ensure public safety, an organizer of a spontaneous event is not required to, but is encouraged to, notify the permit official and the El Paso Police Department of the date, time, place, and an estimate of the approximate number of persons who will be participating. (Ord. 16317 § 3, 2006)
(Ord. No. 019409, § 5, 12-6-2022)

13.36.030 Permit application.

A. Filing Application. An application for a parade or public assembly permit shall be made in

writing on a form prescribed by the permit official at least thirty days before the commencement of the event, but not more than one year in advance of the event.

B. Late Application. Notwithstanding the preceding subsection, the permit official may consider an application that is filed less than thirty days before the commencement of the proposed event where the purpose of such event is a spontaneous response to a current event of interest to the city as a whole or where filed more than seven days but less than thirty days where other good and compelling causes are shown, and the short notice does not unreasonably hinder or prejudice the city in preparing for the event.

C. Application Form.

1. The application must contain the following:

a. The name, address, and telephone number for the person in charge of the proposed event and the name of the organization with which that person is affiliated or on whose behalf the person is applying (collectively "applicant");

b. The name, address, and telephone number for an individual who shall be designated as the responsible planner and on-site manager for the event;

c. The date, time, place, and route of the proposed event, including the location and time that the event will begin to assemble and disband, and any requested roadway closings;

d. The anticipated number of persons and vehicles, and the basis on which this estimate is made;

e. A list of the number and type of animals that will be at the event;

f. Such other information, attachments, and submissions that are requested on the application form as reasonably necessary for a fair determination as to whether the permit should be issued; and

g. A notice to the applicant that if he will be due a refund from the city in an amount over twenty-five dollars, the refund will be automatically processed and sent to the applicant, but if the amount is twenty-five dollars or less, the applicant must submit a request to receive such refund within ninety days after the conclusion of the event before the refund will be processed and paid.

2. If the event is designed to be held by, and on behalf of or for, any person other than the applicant, the applicant shall also file a communication in writing from the person proposing to hold the event authorizing the applicant to apply for the permit on his behalf.

3. If the applicant desires to use amplification in connection with the event, the applicant shall so indicate on the application form and provide the information requested on the application form.

4. The application must be signed and be accompanied by payment of a nonrefundable application fee as established in the annual budget resolution adopted by city council.

5. Within two business days after the receipt of the application, the permit official may reject any application that does not contain an accurate and legible depiction of the route and require the applicant to resubmit a corrected application with an accurate and legible depiction of the route. The resubmission is subject to the application deadlines set forth in this section.

6. Any person submitting a late application that is accepted pursuant to subsection B shall be charged an additional fee as established in the annual budget resolution adopted by city council.

7. For any application submitted by the city for a city created event to be conducted by the city, the city manager or her designee is authorized to determine the appropriate funding sources to cover the city's costs for all services under this chapter and make any necessary budget transfers in lieu of payment of the fees set forth herein. (Ord. 16987 § 1, 2008; Ord. 16317 § 4, 2006)
(Ord. No. 19077, §§ 2, 3, 8-4-2020)

13.36.040 Permitting criteria and process.

A. An application may be denied for any of the following reasons:

1. The application is not fully completed and executed;

2. The applicant has not tendered the required application fee or has not tendered other required user fees or costs within times prescribed;

3. The application contains a material falsehood or misrepresentation;

4. The applicant is legally incompetent to contract or to sue and be sued;

5. The applicant has on prior occasions made material misrepresentations regarding the nature or scope of an event;

6. The applicant has previously permitted a violation or has violated the terms of a parade or public assembly permit issued to or on behalf of the applicant;

7. The applicant has on prior occasions damaged city property and has not paid in full for such damage;

8. A fully executed prior application for the same time and place has been received, and a permit has been or will be granted to a prior applicant authorizing uses or activities which do not reasonably permit multiple simultaneous events;

9. The applicant requests a use not permitted under this chapter;

10. The proposed event would conflict with previously planned programs organized, conducted, or sponsored by the city and previously scheduled at or near the same time and place;

11. The proposed event would present an unreasonable danger to the public health or safety;

12. The proposed event would substantially or unnecessarily interfere with traffic;

13. The proposed route for an event consisting solely of moving vehicles exceeds six miles in length;

14. The event would likely interfere with the movement of emergency equipment and police protection in areas contiguous or in the vicinity of the event;

15. There would not, at the time of the event, be sufficient law enforcement and traffic control officers to adequately protect participants and non-participants from traffic related hazards in light of the other demands for police protection at the time of the proposed event;

16. The proposed event would take place on an arterial roadway during peak traffic hours;

17. The proposed event would take place at a location that cannot reasonably accommodate all of the expected participants;

18. The proposed event would take place on a state or federal highway or road and the appropriate governmental agency has not authorized the proposed use of the highway or road in writing.

B. Traffic Control Plan. The permit official, in consultation with the El Paso police department and the traffic engineer, shall determine the number of officers needed to appropriately police roadway closures and the time when such services shall commence and end, taking into consideration the following:

1. The proposed location of the public assembly or route of the parade;

2. The time of day that the event is to take place;

3. The date and day of the week proposed;

4. The nature, composition, format and configuration of the event;

5. The general traffic conditions in the area requested, both vehicular and pedestrian, with special attention given to the rerouting of the vehicles or pedestrians normally using the requested area;

6. The number of marked and unmarked intersections along the route requested, together with the traffic control devices present;

7. If traffic must be completely rerouted from the area, then the number of marked and unmarked intersections and the traffic control devices are to be taken into consideration;

8. The estimated number of participants; and

9. The estimated number of viewers. (Ord. 16488 § 2, 2006; Ord. 16317 § 5, 2006)

13.36.050 Costs and fees.

A. The applicant shall be responsible for hiring and paying the fees established herein for the

cost of law enforcement officers, vehicles and equipment to appropriately control traffic and to police roadway closures only during the entirety of each event to include the staging and disbanding of the event, as follows:

Assistance Required	Costs Paid by Applicant
First two or fewer officers;	None
First two or fewer vehicles;	
Maximum of three hours.	
Next three to seven officers;	50% of costs
Next three to five vehicles;	
Maximum of three hours.	
Next eight or more officers;	100% of costs
Next six or more vehicles;	
Maximum of three hours.	

In developing the traffic control plan under Section 13.36.040(B) of this chapter, the police department shall prepare estimated costs for the city and for the applicant for the event and shall furnish the estimate to the permit official and the applicant. The estimate of the city's costs shall include, where applicable, any personnel costs associated with paying overtime costs to police officers which are not chargeable to the applicant. A representative of the police department shall, when necessary, confer with the applicant and explain the estimated costs.

B. The police department shall prepare and maintain a schedule of fees to be charged under this section, based on its actual costs for payment of salaries and benefits, not to include overtime costs, for its law enforcement officers and equipment that are used for event traffic control. The schedule shall be on file with the permit official and the city comptroller and shall be made available to all applicants. Vehicles shall be charged at a rate of twelve dollars or as otherwise set by resolution of the city council.

C. Prior to the issuance of the permit, the applicant shall deposit with the city, an amount that is equal to half of the estimated amount of the applicant's portion of the costs of providing law enforcement officers and any other traffic control costs. The remainder of the applicant's portion of these costs will be due and paid in accordance with Section 13.36.080(H) of this chapter. If the applicant cancels the event and notifies the permit official at least twenty-four hours in advance of the commencement of the event, the amount deposited with the city under this section shall be refunded, provided, however, the applicant will be charged a thirty-dollar administrative fee for the city's costs related to the cancellation of the event and issuing the refund. If for reason other than cancellation of the event, the applicant deposits funds that exceed the applicant's total costs and such amount is over twenty-five dollars, the city will automatically process a refund and sent it to the applicant. However, if such amount is twenty-five dollars or less, the applicant must submit a request to receive such refund within ninety days after the conclusion of the event before such refund will be processed and paid.

D. The applicant shall reimburse the city for the costs of providing roadway and sidewalk cleaning accordance with Section 13.36.080(G) of this chapter. (Ord. 16987 § 2, 2008; Ord. 16535 § 1, 2007: Ord. 16317 § 6, 2006)
(Ord. No. 17493, 2-1-2011; Ord. No. 18394, § 1, 7-28-2015)

13.36.060 Approval or denial of application.

A. The permit official shall approve or deny an application within twenty days of receipt in accordance with the standards set forth in this chapter. A notice of denial shall clearly set forth the grounds upon which the permit was denied and, where feasible, shall contain a proposal for measures by which the applicant may cure any defects in the application or otherwise procure a permit.

B. Where an application is denied because the proposed event would conflict with another event that has or will be approved, the permit official shall propose an alternative place, if available for the same time, or an alternative time, if available for the same place.

C. Where an application is denied because the proposed event would take place at a location that cannot reasonably accommodate all of the expected participants, the permit official shall propose an alternative place, if available for the same time, or request that the applicant appropriately reduce the number of participants.

D. Where the police department has determined that all or a portion of the proposed route of a parade consisting of an athletic event such as a walk or foot or bicycle race creates significant inefficiencies in the use of law enforcement officers for traffic control purposes, the permit official in consultation with the police department may develop an alternate route to be used with the applicant's approval.

E. Where the police department determines that the length of an event anticipated to be more than three hours, will result in the substantial interruption of the movement of traffic, the permit official when issuing the permit, may modify and change the starting time of the event as appropriate to a time not earlier than seven a.m. to reduce the impact of the event on traffic movement.

F. If the applicant has requested the issuance of an amplification permit at the time of the submission of the application for a parade or public assembly permit, the permit official shall proceed to make a separate determination regarding the issuance of the amplification permit and may issue an amplification permit in conjunction with the parade or public assembly permit as permitted by and in accordance with the requirements established under Chapter 13.28 of this code.

G. Nothing in this chapter shall authorize the permit official to deny a permit based upon political, social, or religious grounds or reasons, or based upon the content of the views expressed.

H. The permit official may attach reasonable conditions to any permit approval as may be appropriate within the spirit and intent of this chapter. (Ord. 16317 § 7, 2006)

13.36.070 Appeals.

A. An applicant may appeal the denial of an application in writing within ten days after notice of the denial has been received by submitting a written request to the permit official. Within five business days, or such longer period of time agreed to by the applicant, the appeals official shall hold a hearing on whether to issue the permit or uphold the denial. The applicant shall have the right to present evidence at said hearing and to question appropriate city officials. The decision to issue the permit or uphold the denial shall be based solely on the approval criteria set forth in this chapter. The appeals official shall render a decision on the appeal within five business days after the date of the hearing. In the event that the purpose of the proposed event is a spontaneous response to a current event, or where other good and compelling causes are shown, the appeals official shall reasonably attempt to conduct the hearing and render a decision on the appeal as expeditiously as is practicable.

B. Except as provided in subsections D and E of this section, the decision of the appeals official is subject to review by the city council. Prior to the filing of any petition for declaratory judgment or other judicial determination pursuant to subsection C of this section, the applicant shall appeal the decision of the appeals official to the city council. The applicant shall submit a written appeal request to the permit official, who shall forward the request for placement on the agenda of the next available regular city council meeting in compliance with all ordinances and statutes relating to the placement of items on the council agenda and the posting of the agenda. The decision to issue or uphold the denial shall be based solely on the approval criteria set forth in this chapter.

C. The decision of the city council is subject to review in the district courts of El Paso County. Any petition for a declaratory judgment or other judicial determination as to whether the permit should be granted shall be filed with the clerk of district court within thirty days after the applicant has received notice of the decision. The city shall transmit the record to the court no later than five business days after filing its answer. The city shall in all matters before the court, seek prompt judi-

cial action and promptly file and respond to all pleadings, discovery and other matters before the court.

D. The decision of the permit official to refuse to accept a late application is not appealable.

E. The decision as to the amount of traffic control or clean up necessary in conjunction with an event, and the costs resulting therefrom, are not appealable, provided that the costs of traffic control are based on the schedules of fees required in Sections 13.36.050(A) and (B) of this chapter. (Ord. 16535 § 2, 2007: Ord. 16317 § 8, 2006)

13.36.080 Duties of permittee.

A. A permittee shall comply with all permit directions and conditions and with all applicable laws and ordinances.

B. The person heading or leading the parade shall carry the permit upon his person during the conduct of the parade and a permittee shall have the permit in his possession at all times during a public assembly.

C. The permittee shall not allow the parade to begin, proceed or continue until such time as the applicable traffic control plan or method is set up and functioning.

D. The permittee shall not make an exclusive use of any city-controlled park or park facility for a demonstration except in compliance with Section 13.24.200 of this code.

E. The permittee shall take all steps reasonably necessary to keep the area for the public assembly clean or the parade route clean and free of animal excrement during the parade.

F. The permittee shall, immediately upon the conclusion of the event, clean and remove all litter and debris left on the roadways, sidewalks, and other public rights-of-way by participants, animals, floats, and vehicles used in the event and by spectators to the event.

G. The permittee may, no later than fourteen business days prior to the day of the event, request the assistance of the city with such cleaning and if provided the permittee shall be responsible for the costs of the city cleaning. Such request shall be made on a form provided by the city and filed with the permit official.

H. In the event that the permittee does not request and receive the assistance of the city with such cleaning and the permittee fails to clean and remove all such litter and debris within four hours of the end of the event, the city may perform such cleaning and the permittee shall be responsible for the costs of the city cleaning.

I. Payment of all of the permittee's portion of the costs of providing on-duty law enforcement officers and any other traffic control costs, less the amount of deposit made under Section 13.36.050(C) of this chapter, shall be due and payable within ten days of receipt of the bill from the city comptroller.

J. Payment of any city cleaning costs shall be due and payable within ten days of receipt of the bill from the city comptroller. (Ord. 16535 § 3, 2007: Ord. 16317 § 9, 2006)

13.36.090 Duties of participants.

A. Upon the request of a peace officer, each participant who is operating a motor vehicle on a roadway pursuant to the laws of the State of Texas shall exhibit proof of financial responsibility as required under Chapter 601 of the Texas Transportation Code. A peace officer shall have the authority to prohibit the participation in a parade of any motor vehicle for which its operator cannot provide the required proof of financial responsibility.

B. During the course of the parade, each participant shall obey the directions of any peace officer who is directing or otherwise providing traffic control for that parade. A peace officer shall have the authority to prohibit the continued participation in a parade of any person who fails on more than one occasion to obey the directions of a peace officer.

C. Each participant shall remain responsible for the payment of any bridge-crossing tolls, should the parade route pass through a toll area.

D. All participants who enter or pass through an area under the control, direction or supervision of the United States Bureau of Customs and Border Protection shall comply with all laws, regulations and other requirements pertaining to the entry into and exit from such area. (Ord. 16317 § 10, 2006)

13.36.100 Violation—Penalty.

A. It shall be unlawful to unreasonably hamper, obstruct, impede, or interfere with a parade, or with any person, vehicle, or animal participating or used in the parade, and any person violating any provision in this chapter shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this Code.

B. It shall be unlawful for the operator of a motor vehicle to drive between vehicles or persons comprising a parade when such vehicles or persons are in motion and are conspicuously designated as a parade and any person violating this chapter shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this code.

C. A person who promotes or sponsors a parade for which a permit is required without a permit having been issued shall be deemed guilty of a misdemeanor and shall be punished as provided in Sections 1.08.010 through 1.08.030 of this code.

D. A person to whom a permit has been issued who intentionally violates the terms of the permit or who violates any of the duties set forth in Section 13.36.080 of this chapter shall be deemed guilty of a misdemeanor and shall be punished as provided in Sections 1.08.010 through 1.08.030 of this code.

E. A person participating in a parade for which a permit has been issued who intentionally violates the terms of the permit shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this code.

F. A person who participates in a parade for which a permit is required without a permit having been issued shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this code.

G. This chapter shall not be construed to authorize the use of the public roadways except in exact compliance with the laws of the state and other ordinances of the city applicable thereto, and persons who violate such other laws and ordinances shall be punished according to the provisions of the other applicable laws and ordinances.

H. Nothing in this chapter prohibits a law enforcement officer or firefighter from issuing a command to move or disperse in accordance with Texas Penal Code Section 42.04 in the event of a riot, unreasonable noise or obstructing passageway. (Ord. 16317 § 11, 2006)
(Ord. No. 019409, § 6, 12-6-2022)

Chapter 13.38

SPECIAL EVENTS

Sections:

13.38.010 Findings and purpose.

13.38.020 Definitions.

13.38.030 Permit Required.

13.38.040 Permit application.

13.38.050 Permitting criteria.

13.38.060 Costs and fees.

13.38.070 Approval, conditional approval, or denial of an application.

13.38.080 Duties of the permittee.

13.38.090 Revocation of a permit.

13.38.100 Appeals procedure.

13.38.110 Violation—Penalty.

13.38.010 Findings and purpose.

A. The City Council of the City of El Paso recognizes that special events are essential for a vibrant community and provide a distinct benefit to the local culture and economy.

B. The purpose of this Chapter is to create a uniform and fair process for the safe and orderly implementation of special events which utilize city infrastructure, assets, and personnel. This Chapter balances the needs of special events while protecting the public health, safety, and welfare.
(Ord. No. 18381, § 1, 7-7-2015)

13.38.020 Definitions.

For the purpose of this chapter, the words and phrases defined in the sections below shall have the meanings therein respectively ascribed to them by this section:

A. "Affected person" means the property owner, property manager or tenant of each property abutting the portion of a public right-of-way to be closed.

B. "Appeals official" means the city manager or the person designated by the city manager as being responsible for hearing appeals to decisions made by the permit official.

C. "Applicant" means any person, group, organization, or entity who seeks a special event permit from the permit official to conduct or sponsor a special event governed by this chapter. An applicant must be eighteen years of age or older.

D. "Permit application fee" means the fee to be paid by the applicant at the time the application is filed with the permit official, pursuant to the fee schedule established by resolution of the city council.

E. "Permit official" means the person or persons designated by the city manager as being responsible for issuing permits under this chapter.

F. "Permittee" means any person or organization issued a special event permit by the permit official.

G. "Private property event" means events conducted solely on private property and not requiring the use of any public right-of-way.

H. "Public right-of-way" means any street, sidewalk, alley and/or easement dedicated to the public use, as further defined by Chapter 19.50 of this Code.

I. "Site map" means a map or diagram approximately to scale depicting the area to be closed or used in conjunction with the special event showing all fire lanes, booths, stages, portable toilets, trash containers, any other important features for the event, and any other materials the applicant intends to place within the area.

J. "Special event" means any bazaar, block party, street dance, sidewalk sale, show, exhibition, festival, concert, celebration, or other event that requires the full or partial closure or occupation of a public right-of-way and is not classified as a film-making event, temporary event, or private property event as defined by other chapters of this title.

K. "Special event permit" means a permit issued under this chapter authorizing the conduct of a special event in accordance with its terms and conditions. A special event permit may be issued for a single event or for multiple dates of the same recurring event provided no changes are made to the site plan and all dates occur within twelve months of permit issuance.

L. "Temporary traffic control plan" means a plan describing temporary traffic control measures through and around the special event site to be used for facilitating pedestrian and vehicular users during the event.
(Ord. No. 18381, § 1, 7-7-2015; Ord. No. 019409, § 7, 12-6-2022)

13.38.030 Permit Required.

A. No special event, as defined herein, shall be conducted upon a public right-of-way unless a special event permit allowing such activity has been obtained pursuant to this Chapter.

B. A special event permit may be issued for a single event or for multiple dates of the same recurring event provided no changes are made to the site plan and all dates occur within twelve (12) months of permit issuance.

C. The special event permit required by this Chapter is in addition to any and all other permits and or licenses that may be required for the event or event activities pursuant to any other provision of the El Paso Municipal Code, any other city regulation, or any other county, state or federal law or regulation, including but not limited to permits related to health, food, alcohol, safety, and sound amplification.

D. This chapter shall not apply to the following events and activities, which are governed by other provisions of the El Paso Municipal Code:

1. An event which occurs exclusively within a city park or facility (Section 13.24.030);

2. A film-making event (Chapter 13.30);

3. A temporary event (Chapter 13.32);

4. A parade (Chapter 13.36);

5. A private property event.
(Ord. No. 18381, § 1, 7-7-2015; Ord. No. 019409, § 8, 12-6-2022)

13.38.040 Permit application.

A. Filing Application. An application for a special event permit shall be made in writing on a form prescribed by the permit official at least thirty (30) calendar days and not more than twelve (12) months prior to the date the special event is scheduled to begin.

B. Late Application. Notwithstanding the preceding subsection, the permit official may consider an application that is filed more than seven (7) business days but less than thirty (30) calendar days prior to the date the special event is scheduled to begin if the purpose of such event is a spontaneous response to a current event or where other good and compelling causes are shown, and the short notice does not unreasonably hinder or prejudice the City in preparing for the special event.

C. Application Form.

1. The application must include:

a. The name, address, and telephone number for the person in charge of the proposed event and the name of the organization with which that person is affiliated or on whose behalf the person is applying;

b. The name, address, and telephone number for an individual who shall be designated as the responsible planner and on-site manager for the event;

c. The date, time and place of the proposed event, including the time that the event will begin and end, and times for event setup and takedown;

d. The anticipated number of persons expected to participate in the event, and the basis on which this estimate is made;

e. The plan for ensuring that adequate parking, restroom facilities and trash receptacles are available in the vicinity of the event to accommodate the number of persons that are expected to attend the event; and

f. Such other information as requested by the permit official that may be reasonably necessary to determine compliance with this Chapter and other City policies or sections of the El Paso Municipal Code.

2. The application must be signed by the applicant and accompanied by the established application fee.

D. Documentation Required. The application shall be supplemented by the documentation

required under this subsection. The following documentation shall be submitted to the Permit Official no later than five (5) business days after the application is submitted unless otherwise authorized by the permit official.

1. Temporary Traffic Control Plan. The applicant shall develop and submit a temporary traffic control plan for closing the street, alley or other public right-of-way to include any intersections and rerouting the traffic, using appropriate manned barricades and signs or peace officers authorized by law to direct traffic on city streets, and shall also designate on the plan, the location of adequate and appropriate parking areas for those persons attending the event.

a. Such traffic control plan shall be in conformity with the most recent edition of the Texas Manual on Uniform Traffic Control Devices and shall be submitted to the permit official in writing, drawn on a map. In considering the appropriateness of a traffic control plan, the permit official may incorporate into the plan any recommendations made by the chief of police, the traffic engineer, or their designees, which may include the use of El Paso police officers.

b. The event must be conducted in such a manner that at least one lane of the street to be utilized will be capable of being reopened at all times for access by police, fire and other emergency vehicles and by persons requiring emergency access to properties abutting the function. The temporary traffic control plan shall depict the location of this lane.

2. Site Map. The applicant shall submit a map or diagram drawn approximately to scale depicting the area to be closed or used. Such map must show all fire lanes, booths, stages, portable toilets, trash containers, other important features for the event, and any other materials the applicant intends to place within the area.

3. Notice of Proposed Closure. The applicant must provide proof that notice of the proposed closure has been issued to each affected person and neighborhood association, if applicable, whose boundaries are included within, either wholly or partially, or whose property abuts the proposed closure area. Such notice shall be provided on a form prescribed by the Permit Official containing the name and address of each affected person, and a space in which the affected person or authorized representative of the neighborhood association may indicate with an original signature whether the affected person or neighborhood association opposes the closure.

E. Insurance and Indemnification Agreement. In addition, prior to permit issuance, the following documentation shall be submitted to the Permit Official no later than three (3) business days prior to the date the special event is scheduled to begin.

1. Indemnification Agreement. An applicant, by accepting and signing permit, agrees to indemnify, defend and hold harmless the City, its officers, agents, servants, and employees for and against all claims, causes of action, liability, damages, or expenses (including, but not limited to attorney fees and costs) for any damage or loss of property, illness, injury, physical, or mental impairment, loss of service, or death to any person arising out of or in connection with the special event. The indemnity specifically covers the City's own negligence, whether joint or sole. Entities that may not lawfully grant indemnities or may not lawfully be required to do so by the City need not grant the indemnity provided for in this subsection.

2. Insurance. A certificate of liability insurance shall be required naming the City as an additional insured in the amount and type of coverage required by the City's Risk Management Office. If such policy shall not be kept in full force and effect, the permit shall thereupon automatically become void.

F. If, prior to the event, any of the information required by Section 13.38.040 is changed and would require additional City services or review from any City department, the applicant must

submit an amended application to the permit official within the time requirements specified by Section 13.38.040.
(Ord. No. 18381, § 1, 7-7-2015)

13.38.050 Permitting criteria.

A. Grounds for Denial. An application, or permitted specific date of a recurring special event, may be denied for any of the following reasons:

1. The application is not fully completed and executed;

2. The applicant has not tendered the required application fee or has not tendered other required user fees within times prescribed;

3. The application contains a material falsehood or misrepresentation;

4. The applicant is legally incompetent to contract or to sue and be sued;

5. The applicant has, on prior occasions, made material misrepresentations regarding the nature or scope of an event;

6. The applicant has previously enabled a violation or has violated the terms of a special event permit issued to or on behalf of the applicant;

7. The applicant has, on prior occasions, damaged city property and has not paid in full for such damage;

8. A fully executed prior application for a use at the same time and place has been received, and a permit has been or will be granted to a prior applicant authorizing uses or activities that do not reasonably permit multiple simultaneous events;

9. The proposed event would conflict with previously planned programs organized, conducted, or sponsored by the City and previously scheduled at or near the same time and place;

10. The applicant requests a use not permitted under this chapter;

11. The proposed event would present an unreasonable danger to the public health or safety;

12. The proposed event would substantially or unnecessarily interfere with traffic, including but not limited to the unavailability of appropriate alternate routes for public transit vehicles and private vehicles;

13. The temporary traffic control plan and submitted site map do not adequately address security and traffic control issues or do not adequately address the criteria and requirements of this Chapter including, but not limited to the City's ability to deliver police, fire and emergency services to the event site and in the vicinity of the event site;

14. There would not, at the time of the event, be sufficient law enforcement and traffic control officers to adequately protect participants and non-participants from traffic related hazards in light of the other demands for police protection at the time of the proposed event;

15. The proposed event would take place on an arterial roadway during peak traffic hours;

16. The proposed event would take place at a location that cannot reasonably accommodate all of the expected participants;

17. The proposed event would take place on a state or federal highway or road and the appropriate governmental agency has not authorized the proposed use of the highway or road in writing;

18. Inadequate arrangements have been made for anticipated parking needs and for restroom facilities and trash receptacles;

19. The event will include amplified or non-amplified music or other sound sources that are expected to create a noise disturbance that cannot be appropriately abated or controlled by the applicant; or

20. The right-of-way closure for the event would deny or restrict access to abutting properties and substantial opposition to the closure has been received through the public notification process.
(Ord. No. 18381, § 1, 7-7-2015)

13.38.060 Costs and fees.

A. Permit Application Fee. The applicant shall pay the established non-refundable application fee upon submittal of the application for permit to the permit official. The application fee shall be in addition to costs for any other services, permits and licenses that will be provided by the City as

may be required for the event or event activities pursuant to any other provision of the El Paso Municipal Code and any other City regulation.

B. Late Permit Application Fee. Any person submitting a late application pursuant to Section 13.38.040(B) shall be charged an established additional non-refundable application fee for expedited service.

C. Temporary Street Closure. The established temporary street closure fee shall be paid prior to permit issuance.

D. Parking Meter Rentals. Applicants desiring to reserve and utilize metered parking spaces adjacent to the permit area, as identified on the site map, shall pay the established rental fee for the duration of the event, to include staging and disbanding of the event. Applicants shall not be required to pay the established rental fee for any metered parking spaces located within the permit area.

E. Other Permit, License, or Service Fees. Prior to Issuance. The applicant shall pay the full costs for services, permits and licenses that will be provided by the City as may be required for the event or event activities pursuant to any other provision of the El Paso Municipal Code and any other City regulation, with the exception of City Police traffic control assistance and event clean up assistance, for which shall be paid in accordance with subsection (E) below.

F. Traffic Control and Peace Officers. The applicant shall be responsible for obtaining and placing barricades and signs in conformity with the temporary traffic control plan, and shall pay the costs associated with the placement of such barricades and signs, and any costs for City police traffic control assistance, including the hiring and paying required law enforcement officers, vehicles and equipment that are used for traffic control which shall be calculated and invoiced within 10 days following the event.

1. When calculating the costs for the Police Department's portion of traffic control assistance under this Chapter, the Police Department shall prepare an estimated cost for the event and shall furnish the estimate to the Permit Official and the applicant not later than fourteen (14) calendar days after the application has been received for department review or three (3) days before the proposed event, whichever occurs first. When requested, a representative of the Police Department shall explain the estimated costs to the applicant.

2. The Police Department shall prepare and maintain a schedule of fees, based on its actual costs for its law enforcement officers, including overtime costs, as appropriate, vehicles, and equipment that are used for event traffic control. The schedule shall be on file with the Permit Official and the City Comptroller and shall be made available to all applicants.

3. Prior to the issuance of the permit, the applicant shall deposit with the City an amount that is equal to half of the estimated amount of the costs for the Police Department's portion of traffic control assistance.

4. If the traffic control will be provided by peace officers other than El Paso Police Officers, the permittee shall be responsible for any and all costs associated with the hiring and use of those peace officers.

G. Event Cleanup. The applicant shall be responsible for all costs of litter and debris removal in accordance with Section 13.38.080 of this Chapter.

H. Specific to Permits for a Recurring Event. Amendments to special event permits for the same recurring event to add dates in accordance with subsection 13.38.070(H) shall require payment of the established temporary street closure fee prior to amended permit issuance.

I. Exemptions. Where the applicant is a City department, the applicant shall be exempt from paying the permit application, late permit application, and temporary street closure fees required in this section.

(Ord. No. 18381, § 1, 7-7-2015)

13.38.070 Approval, conditional approval, or denial of an application.

A. Deadline for Approval, Conditional Approval, or Denial. The permit official shall ap-

prove, conditionally approve, or deny an application within thirty (30) days of receipt of an application submitted in accordance with the standards set forth in this Chapter, or for late applications, within three (3) business days of the proposed event. A notice of conditional approval or denial shall clearly set forth the grounds for which the permit was conditionally approved or denied and, where feasible, shall contain a proposal for measures by which the applicant may cure any defects in the application or otherwise procure a permit.

B. Conflict with Another Event. If an application is denied because the proposed event would conflict with another event that has or will be approved, the permit official shall propose an alternative place if available for the same time, or an alternative time if available for the same place.

C. Inadequate Location. If an application is denied because the proposed event would take place at a location that cannot reasonably accommodate all of the expected participants, the permit official shall propose an alternative place if available for the same time, or request that the applicant appropriately reduce the number of participants.

D. Amplification Permit. If the applicant has requested an amplification permit at the time of application, the permit official shall proceed to make a separate determination regarding the amplification permit and may issue an amplification permit in conjunction with the special event permit as permitted by and in accordance with the requirements established under Chapter 13.28 of this Code.

E. First Amendment Rights. Nothing in this chapter shall authorize the permit official to deny a permit based upon political, social, or religious grounds, or based upon the content of the views expressed.

F. Permit Conditions. The permit official may attach reasonable conditions to any permit approval as may be appropriate within the spirit and intent of this chapter.

G. Appeals. An applicant may appeal the denial or conditions attached to the approval of an application through the process outlined in Section 13.38.100 of this Chapter.

H. Specific to Permits for a Recurring Event. A permittee may request, on a form prescribed by the permit official, to add dates to an approved special event permit for the same recurring event provided no changes are made to the site plan and all dates occur within twelve (12) months of permit issuance, and provided that such request is made at least fourteen (14) calendar days prior to the date the recurring event is scheduled to begin.

1. Approval of the request is subject to the permitting criteria outlined in Section 13.38.050.

2. The Permit Official shall approve, conditionally approve, or deny such request within fourteen (14) calendars days of receipt of request or seven (7) days prior to the proposed event date, whichever occurs first.

(Ord. No. 18381, § 1, 7-7-2015)

13.38.080 Duties of the permittee.

A. The permittee shall comply with all permit directions and conditions and with all applicable laws and ordinances.

B. The permittee shall comply with all requirements of the Texas Alcoholic Beverage Commission, if alcoholic beverages are to be sold, served or consumed at a special event.

C. The permittee shall carry the permit upon his person at all times during the conduct of the event.

D. The permittee shall comply with all aspects of the approved traffic control plan.

E. The permittee shall not make an exclusive use of any city-controlled park or park facility for a demonstration except in compliance with Section 13.24.200 of this Code.

F. All barricades and signs must be removed and streets must be reopened immediately after the event and subsequent street cleaning has ended.

G. The permittee shall, immediately upon the conclusion of the event, clean and remove all litter and debris on the roadways, sidewalks, and other public rights-of-way.

H. In the event that the permittee does not request and receive the assistance of the city with such cleaning and the permittee fails to clean and remove all such litter and debris within four hours of the end of the event, the city may perform such cleaning and the permittee shall be responsible for the costs of the city cleaning. This does not waive the permittee's obligations under Section 13.38.080(H).

I. Payment of all of the permittee's portion of the costs of providing on-duty law enforcement officers and any other traffic control costs, less the amount of deposit made under Section 13.38.060(F) of this chapter, shall be due and payable within ten (10) business days of receipt of the bill from the City Comptroller.

J. Payment of any city cleaning costs shall be due and payable within ten (10) business days of receipt of the bill from the City Comptroller.
(Ord. No. 18381, § 1, 7-7-2015)

13.38.090 Revocation of a permit.

A. Any special event permit issued under the terms of this article may be revoked by the City Manager or designee, the Police Chief or designee, and the Fire Marshal or designee for grounds, including but not limited to the following:

1. Fraud, misrepresentation or any false statement contained in the application for the permit;

2. The permittee conducts the event in an unlawful manner or in such a manner as to constitute a breach of the peace;

3. The conduct of the event has caused, will cause, or will have the effect of an imminent threat to the public health, safety and/or general welfare; and/or

4. The permittee has failed to comply with all the terms and conditions of the special event permit or any and all other permits and or licenses that may be required for the event or event activities pursuant to any other provision of the El Paso Municipal Code, any other city regulation, or any other county, state, or federal law or regulation.

B. Upon revocation of the permit, the permittee shall immediately terminate the conduct of the event, and dismantle and remove any improvements and/or obstructions located in any public rights-of-way and the event site, and return the public rights-of-way to the condition as it was before the event.

C. Revocation for cause shall constitute grounds for denial of subsequent permit requests.
(Ord. No. 18381, § 1, 7-7-2015)

13.38.100 Appeals procedure.

A. Appeals Official. Except as provided in subsection (D), an applicant may appeal (i) the denial of a permit, (ii) a permit condition, (iii) a determination that good cause to consider a late application does not exist, or (iv) revocation of a permit within ten (10) days after notice of the denial, conditional approval, determination, or revocation has been received by submitting a written request to the permit official. Within ten (10) days of receipt of the written appeals request, the appeals official shall conduct a hearing on whether to issue the permit or uphold the denial, conditional approval, determination, or revocation of the permit. The applicant shall have the right to present evidence at said hearing and to question appropriate City officials. The decision of the appeals official shall be based solely on the approval criteria set forth in this Chapter. The appeals official shall render a decision on the appeal within five (5) days of the date of the hearing. In the event that the purpose of the proposed event is a spontaneous response to a current event, or where other good and compelling causes are shown, the appeals official shall reasonably attempt to conduct the hearing and render a decision on the appeal as expeditiously as is practicable.

B. The decision as to the amount of traffic control or clean up necessary in conjunction with an event and the costs resulting there from, are not appealable, provided that the costs are based on the schedule of fees required in Section 13.38.060 of this chapter.

C. City Council. The decision of the appeals official is subject to review by the City Council. Prior to the filing of any petition for declaratory

judgment or other judicial determination pursuant to subsection C, the applicant shall appeal the decision of the appeals official to the City Council. The applicant shall submit a written appeal request to the permit official, who shall forward the request for placement on the agenda of the next available regular City Council meeting in compliance with all ordinances, statutes and policies relating to the placement of items on the Council agenda and the posting of the agenda. The decision to issue or uphold the denial, conditional approval, determination, or revocation of the permit shall be based solely on the approval criteria set forth in this Chapter.

D. District Courts of El Paso County. The decision of the City Council is subject to review in the district courts of El Paso County. Any petition for a declaratory judgment or other judicial determination as to whether the permit should be granted shall be filed with the clerk of the District Court within thirty (30) days after the applicant has received notice of the decision. The parties shall comply with all laws and rules governing such matter before the court.
(Ord. No. 18381, § 1, 7-7-2015)

13.38.110 Violation—Penalty.

A. A person who promotes or sponsors a special event for which a permit is required without a permit having been issued shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this Code.

B. A permittee who intentionally violates the terms of the permit or who violates any of the duties set forth in Section 13.38.080 shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this Code.

C. A person participating in a special event for which a permit has been issued who intentionally violates the terms of the permit shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this Code.

D. A person who participates in a special event for which a permit is required without a permit having been issued shall, upon conviction, be guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this Code.

E. This Chapter shall not be construed to authorize the use of the public right-of-way except in strict compliance with the laws of the state and other ordinances of the city applicable thereto, and persons who violate such other laws and ordinances shall be punished according to the provisions of the other applicable laws and ordinances.

F. Nothing in this Chapter prohibits a law enforcement officer or firefighter from issuing a command to move or disperse in accordance with Texas Penal Code Section 42.04 in the event of a riot, unreasonable noise, or obstructed passageway.
(Ord. No. 18381, § 1, 7-7-2015)

13.40.010 Definitions.

As used in this chapter:

"Aerosol container of paint" means any aerosol container, regardless of the material from which it is made, which is adapted or made for the purpose of spraying paint or other fluid which is not water soluble and which is capable of defacing property.

"Marker" means any marker containing a fluid which is not water soluble and has a point, brush, applicator or other writing surface of three-eights of an inch or greater.

"Minor" means a person who is under the age of eighteen years of age.

"Public building" means any building, or part thereof, owned, controlled or used by the United States of America, the state of Texas, or any agency or political subdivision thereof.

"Public facility" means any park, plaza, playground, picnic area, stadium, ball park, swimming pool, or amphitheater which is designed or held for use by the public. (Ord. 12965 § 2, 1996)

13.40.020 Furnishing a marker to a minor.

A. It is unlawful for any person to sell, give, donate or otherwise furnish a marker to a minor.

B. It shall be an affirmative defense to prosecution under this section that the minor was furnished with the marker by his or her parent or guardian or by another person for use in the minor's employment or in connection with a school, civic or religious activity; provided, that such parent, guardian or other person supervised the minor in his or her use of the marker, and such parent, guardian or other person regained or attempted to regain the marker from the minor immediately upon completion of the minor's use of the marker. (Ord. 12965 § 3, 1996)

13.40.030 Possession of a marker by a minor.

A. It is unlawful for a minor to possess a marker.

B. It shall be an affirmative defense to prosecution under this section that the minor was furnished with the marker by his or her parent or guardian or by another person for use in the minor's employment or in connection with a school, civic or religious activity, and the minor was supervised by such parent, guardian, or other person who regained the marker from the minor immediately upon completion of the minor's use of the marker. (Ord. 12965 § 4, 1996)

13.40.040 Possession of aerosol containers of paint by minors.

A. It is unlawful for a minor to possess an aerosol container of paint.

B. It shall be an affirmative defense to prosecution under subsection A of this section that:

1. The minor possessed the aerosol container of paint in connection with a use in accordance with its intended purpose;

2. An adult having supervisory responsibility over the minor provided the minor with the aerosol container of paint;

3. The minor's possession and use of the aerosol container of paint took place under such adult's direct supervision and in such adult's presence; and

4. The adult regained the aerosol container of paint from the minor immediately upon completion of the minor's use of the aerosol container of paint. (Ord. 12965 § 5 (part), 1996)

13.40.050 Possession of aerosol containers of paint and markers in public areas.

A. It is unlawful for any person age eighteen or older to possess an aerosol container of paint or a marker on the property of another or in any public building or upon any public facility, other than on the premises of the person's employer.

B. It shall be an affirmative defense to prosecution under subsection A of this section that the owner, manager, or other person having administrative or other control of the property, building, or facility consented to the presence of the aerosol container of paint or marker. (Ord. 12965 § 6, 1996)

13.40.100 Graffiti abatement—Purpose and intent.

A. It is the purpose and intent of Sections 13.40.100 through 13.40.120 of this code to provide a procedure for removal of graffiti from walls and structures on property next to or visible from the rights-of-way within the city in order to reduce blight and deterioration within the city, to reduce crime and lawlessness, and to protect the public health and safety.

B. The city finds and determines that graffiti is an impure and unwholesome matter and its existence on property next to and visible from the rights-of-way in the city constitutes a public nuisance; the prompt abatement of which is a public necessity to avoid the detrimental impact of such graffiti on the city and its residents, to prevent the further spread of graffiti and other criminal acts, and to protect the health, safety and welfare of the residents of the city. (Ord. 13326 § 1, 1997)

13.40.110 Graffiti abatement—Removal of graffiti.

The chief of police and his designees are authorized to develop, use and accept on behalf of the city, the signatures of property owners and authorized agents of property owners on the consent to entry and release of liability agreement required under Section 13.40.120 of this code. The chief of police and his designees are also authorized to accept, on behalf of the city, all donations given for graffiti removal purposes, including supplies and equipment which the chief or his designees determine are appropriate for use in graffiti removal. (Ord. 13326 § 2, 1997)

13.40.120 Graffiti abatement—Obligations of property owner.

A. Any property owner, any authorized agent of a property owner of property lying within the city limits may request and receive as may be available the assistance of the city with the removal of graffiti from their property which is next to or visible from the rights-of-way in the city. Such property owner or authorized agent of a property owner shall first sign a consent to entry and release of liability agreement as may be prepared and used by the city before the city may remove or clean any such graffiti from their property.

B. Any community, governmental or nonprofit organization that provides free graffiti removal services within the city, may also request and receive supplies as may be available or transportation for supplies that will be used for the removal of graffiti from property which is next to or visible from the rights-of-way in the city, provided that such removal is done with the consent of the property owner. Any organization that receives any city assistance under this section shall provide proof of compliance with this section upon the request of the chief of police or his designees.

C. Any property owner or any authorized agent who signs a consent to entry and release of liability agreement and who sells the property or becomes no longer authorized by the property owner to consent to the removal of graffiti from property during the time period in which a consent to entry and waiver and release of liability

agreement is in effect regarding the property, shall immediately notify the city of such sale or removal of authorization. Procedures for the making of such notice shall be contained in the consent to entry and release of liability agreement. (Ord. 13326 § 2, 1997)

Chapter 13.42

STREETCAR TRACK ACCESS PROGRAM PROCEDURE

Sections:

13.42.010 Definitions.

13.42.020 General.

13.42.030 Violation—Penalty.

13.42.010 Definitions.

A. "Activity" means the following:

1. Any construction, demolition, event, moving event, excavation, use of right-of-way, cleaning, painting, repairing, or installation of traffic control devices, regardless of whether any of the previous requires approval of the city under the El Paso City Code; or

2. Any activity under the El Paso City Code that requires a permit, license, permission, or review from the city.

B. "Streetcar safety officer" means the person designated by the city manager to oversee the safety of all streetcar infrastructure and streetcar operations.

C. "Streetcar" means the rail mass transit system owned and operated by the City of El Paso.

D. "Streetcar infrastructure" means any component or item used for the operation of the streetcar, including but not limited to, the railcars, track works, traction power substations, overhead contact systems, overhead contact system poles, train wayside communications systems, and/or the streetcar maintenance facility.

(Ord. No. 18824, § 1, 7-24-2018)

13.42.020 General.

A. Any person or entity performing any activity under any streetcar infrastructure or within ten feet of any streetcar infrastructure must comply with the track access program procedure as adopted and amended by the streetcar safety officer from time to time.

B. The streetcar safety officer has authority to create and revise the track access program procedure for purposes of safeguarding the public health and safety in accordance with best practices as well as the protection of the streetcar infrastructure. The streetcar safety officer shall make the track access program procedure available to the public.

C. The city council may establish any fees for administrative costs, track access training, system reconfiguration, and personnel time needed to reconfigure the system. city council may establish the fees through the annual budget resolution, amendment to the annual budget resolution, or other resolution, ordinance or act of the city council.

D. For purposes of protecting the health, safety, and welfare of all citizens, the streetcar safety officer is authorized to issue a stop work order to any activity that does not comply with this chapter and/or the track access program procedure.

(Ord. No. 18824, § 1, 7-24-2018)

13.42.030 Violation—Penalty.

A. Any person who shall violate any provision of this chapter shall, upon conviction, be guilty of a misdemeanor and punished by a fine not exceeding five hundred dollars. Each day the violation occurs shall constitute a separate offense.

B. The streetcar safety officer, the permit official, and any code enforcement officer of the City of El Paso are authorized to enforce the provisions of this chapter and shall have the power to issue misdemeanor citations to any person violating the provisions of this chapter.

(Ord. No. 18824, § 1, 7-24-2018)

***Editor's note—**Ord. No. 19007, § 1, adopted Dec. 17, 2019, repealed the former Tit. 14, Ch. 14.04, §§ 14.04.010—14.04.040, Ch. 14.08, §§ 14.08.010—14.08.130, Ch. 14.12, §§ 14.12.010—14.12.220, Ch. 14.16, §§ 14.16.010—14.16.407, Ch. 14.20, §§ 14.20.010—14.20.250, Ch. 14.24, §§ 14.24.010—14.24.140, and App. A, and enacted a new Tit. 14 as set out herein. The former Tit. 14 pertained to similar subject matter and derived from prior code §§ 3-1, 3-2, 3-7—3-30, 3-36, 3-38—3-85, 20-142—20-146; Ords. 8301 and 8521, adopted in 1985; Ord. 8571 §§ 1, 2, adopted in 1986; Ord. 8637, adopted in 1986; Ord. 8638 § 1, adopted in 1986; Ord. 8677, adopted in 1986; Ord. 8728(part), adopted in 1986; Ord. 8808(part), adopted in 1986; Ord. 8920, adopted in 1987; Ord. 9042(part), adopted in 1987; Ord. 9151, adopted in 1987; Ord. 9152, adopted in 1987; Ord. 9577, adopted in 1988; Ord. 9707(part), adopted in 1989; Ord. 10280(part), adopted in 1990; Ord. 11137, §§ 1-8, adopted in 1992; Ord. 12157, adopted in 1994; Ord. 12549 §§ 1, 2, 4, adopted in 1995; Ord. 12549 § 2, 1995 3(A), 3(B), 3(C)(1)—(C)(9), 4, 1995; Ord. 12989, adopted in 1996; Ord. 13752, adopted in 1998; Ord. 14601, adopted in 2000; Ord. 14712, § 1, adopted in 2000; Ord. 15007, adopted in 2001; Ord. 15220 § 1, adopted in 2002; Ord. 15411 § 1, adopted in 2003; Ord. 15416 §§ 1, 2, adopted in 2003; Ord. 15728 § 1(part), adopted in 2004; Ord. 15729 § 1, adopted in 2004; Ord. 15730 § 1, adopted in 2004; Ord. 15911 § 1, adopted in 2004; Ord. 15943 § 1, adopted in 2004; Ord. 15944 § 1, adopted in 2004; Ord. 16193 § 1, adopted in 2005; Ord. 16194 §§ 1, 2, adopted in 2005; Ord. 16820 § 1, adopted in 2008; Ord. No. 17689, § 1, adopted in 12-6-2011; Ord. No. 17699, § 1, adopted in 12-20-2011; Ord. No. 18489, § 1, adopted April 19, 2016; and Ord. No. 18550, § 1, Aug. 9, 2016.

Chapter 14.02

PURPOSE

Sections:

14.02.010 Purpose.

14.02.010 Purpose.

The following provisions will govern the conduct of all persons engaged in activities, aeronautical or other, at the El Paso International Airport, unless otherwise specifically provided for in Federal Aviation Regulations or by separate agreement with the City of El Paso. In those instances where there may be a conflict between these rules and the provisions, conditions and terms of such an agreement, the specific written agreement shall govern.

(Ord. No. 19007, § 1, 12-17-2019)

Chapter 14.04

GENERAL PROVISIONS AND DEFINITIONS

Sections:

14.04.010 Definitions.

14.04.020 Applicability of provisions.

14.04.030 Accidents—Reporting required.

14.04.040 Violation—Penalty.

14.04.060 Fees.

14.04.010 Definitions.

A. Words not specifically defined in this regulation which relate to aeronautical practices, and equipment, will be construed according to their general usage in the aviation industry.

B. Terms Defined.

"Aerobatic flying" means any intentional airplane maneuver or stunt not necessary to air navigation, or operation of aircraft in such manner as to endanger human life or safety by the performance of unusual or dangerous maneuvers.

"Aircraft" means by aeroplane, airplane, gas bag, flying machine, balloon, or any contrivance now known or hereafter invented, used or designed for navigation of or flight in the air, except a parachute or other contrivance used primarily as safety equipment.

"Airport," unless otherwise stated or required by the context, means the area shown on the El Paso International Airport, most recently approved airport layout plan which is on file in the El Paso International Airport and which is made part of this title.

"Airworthy aircraft" means an aircraft that is in a condition that is suitable for flight.

"City" shall mean the City of El Paso, Texas.

"Code" means the El Paso, Texas City Code and any amendments thereto.

"Director" means the director of aviation of the El Paso International Airport or his/her authorized designees.

"Person" means any individual, group of individuals, partnership, association or corporation, or other legal entity.

"TSA" means the Transportation Security Administration.

"Unmanned aircraft" means an aircraft operated without the possibility of direct human intervention from within or on the aircraft, or as more currently defined by 14 CFR Part 107.
(Ord. No. 19007, § 1, 12-17-2019)

14.04.020 Applicability of provisions.

The provisions of Sections 14.04.010, and 14.12.010 through 14.12.110 shall not apply to public aircraft of the federal government, or of a state or territory, or of a political subdivision of a state or territory, or to aircraft licensed by a foreign country with which the United States has a reciprocal agreement covering operation of such aircraft.
(Ord. No. 19007, § 1, 12-17-2019)

14.04.030 Accidents—Reporting required.

The operator of any ground vehicle or aircraft involved in an accident or incident on the airport shall promptly report such accident or incident to the director or authorized designee.
(Ord. No. 19007, § 1, 12-17-2019)

14.04.040 Violation—Penalty.

A. Any person violating any provision of Sections 14.12.100, 14.16.010 through 14.16.100, 14.16.120 through 14.16.150, 14.20.250 or 14.20.010 through 14.20.180 shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010, 1.08.020 and 1.08.030.

B. The director or authorized designee may request any person violating Sections 14.12.120 through 14.12.220, 14.16.010 through 14.16.100, 14.16.120 through 14.16.150, 14.20.010 through 14.20.180, or 14.16.406 to leave the airport, and may eject any person who fails to comply with such request, or may direct any peace officer to eject such person.

C. A violation of Section 14.20.240 of this Code is a civil offense. Such civil violations are subject to the administrative adjudication process as provided in Chapter 12.85 of this Code.
(Ord. No. 19007, § 1, 12-17-2019)

14.04.060 Fees.

A. City council may set fees referenced in this title by the following methods:

1. Through the annual budget resolution;

2. Through a contract validly executed under federal or state law; and/or

3. Through a contract validly executed under a city ordinance.

(Ord. No. 19007, § 1, 12-17-2019)

Chapter 14.08

AIRPORT ZONING

Sections:

14.08.010 Definitions.

14.08.020 Airport zone map.

14.08.030 Height limits.

14.08.040 Use restrictions.

14.08.050 Nonconforming uses and structures.

14.08.060 Variances.

14.08.070 Hazard marking and lighting.

14.08.080 Board of adjustment—Powers and duties.

14.08.090 Appeals to board of adjustment.

14.08.100 Appeals to district court.

14.08.110 Administrative officer designated.

14.08.120 Enforcement and remedies.

14.08.130 Conflicting regulations.

14.08.010 Definitions.

As used in this chapter, unless the context otherwise requires:

"Airport hazard" is any temporary or permanent structure, including all appurtenances, that pose a hazard as defined by FAA AC 70/7460-1L or successor regulations.

"Movement area" means the runways, taxiways, and other areas of an airport that are used for taxiing, takeoff, and landing of aircraft, exclusive of loading ramps and parking areas.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.020 Airport zone map.

In order to carry out the purposes of this chapter, the area referenced herewith covers all the land within five miles of the landing area of the airport and within the territory of the United States of America.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.030 Height limits.

Except as otherwise provided in this chapter, no structure or tree shall be erected, altered, allowed to grow, or maintained within the airport zone map to a height in excess of the applicable elevations (elevation above mean sea level as established by the United States Coast and Geodetic Survey) shown on the Part 77 Surfaces map as approved by the FAA within the El Paso International Airport. Height and clearance shall be determined in accordance with FAA Part 77 rule adherence. Proposed construction of objects shall follow all required notification (Form 7460-1, or most current, submittal) and lighting in accordance with the FAA.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.040 Use restrictions.

Notwithstanding any other provisions of this chapter, no use may be made of land within the airport zone map, in such a manner as to create electrical or other interference with radio or other (including cyber) communication between the airport and aircraft, make it difficult for flyers to distinguish between airport lights and others, result in glare in the eyes of flyers using the airport, impair visibility in the vicinity of the airport, or otherwise endanger the landing, taking-off or maneuvering of aircraft or other vehicles that utilize the airport. Land use shall be restricted within the vicinity of the airport in accordance with federal, state, and local rules and regulations to ensure compatible land use surrounding the airport. The purpose of the use restrictions is to prevent interference with the state and efficient operations of the airport to provide air service.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.050 Nonconforming uses and structures.

Nonconforming uses and structures shall not be permitted within the vicinity of the airport unless prior approval is received in accordance with federal, state, and local rules and regulations. The regulations prescribed in Sections 14.08.030 and 14.08.040 shall not be construed to require the

removal, lowering or other change or alteration of any structure, including all phases or elements of a multiphase structure, regardless of whether actual construction has commenced, or object of natural growth not conforming to the regulations on the date of the adoption of the regulations herein, or otherwise interfere with the continuance of any registered nonconforming use. Nothing herein contained shall require any change in the construction, alteration or intended use of any structure the construction or alteration of which was begun prior to the effective date of the regulations herein, and is diligently prosecuted and completed within two years thereof and any exclusion authorized by the FAA or authorized designee. However, lighting may be required as deemed necessary by the FAA or the airport pursuant to Section 14.08.070.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.060 Variances.

Any person desiring to erect any structure or increase the height of any structure, or permit the growth of any tree, or use his property, not in accordance with the regulations prescribed in this chapter, may apply for a variance to the board of adjustment as provided in this chapter. Such variance shall be allowed where a literal application or enforcement of the regulations would result in practical difficulty or unnecessary hardship and the relief granted would not be contrary to the public interest but do substantial justice and be in accordance with the spirit of this chapter. Variances can be considered provided that deviations from this article do not impact air navigation. As part of the variance application process, the FAA airspace analysis must be completed.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.070 Hazard marking and lighting.

Any variance granted under Section 14.08.060 may, if such action is deemed advisable to effectuate the purposes of this chapter and reasonable in the circumstances, be so conditioned as to require the owner of the structure or tree in question at his own expense, or permit the city at its own expense, to install, operate and maintain thereof such markers and lights as may be necessary to indicate to flyers the presence of an airport hazard. Hazard marking and lighting shall be in accordance with Federal Aviation Administration Advisory Circular 70/7460-1L, or its successor, as determined by the Federal Aviation during the filing of the FAA Form 7460-1.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.080 Board of adjustment—Powers and duties.

A. The board of adjustment shall have the powers as outlined in Article 2.16 in addition to:

1. To hear and decide appeals from any order, requirements, decision or determination made by the zoning administrator in the enforcement of this chapter;

2. To hear and decide variances to the terms of this chapter.

B. The board of adjustment for the City, created pursuant to Chapter 2.16 of this Code, shall act as the airport board of adjustment and shall, when acting as the airport board of adjustment, follow the same procedures and guidelines for the conduct of its meetings as when it functions as the board of adjustment for the city.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.090 Appeals to board of adjustment.

Appeals to this title shall follow those more particularly described in Section 2.16.040, and shall be in accordance with the provisions of Section 241.036 of the Texas Local Government Code.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.100 Appeals to district court.

Any person aggrieved, or taxpayer affected, by any decision of the board of adjustment may appeal to the district court of the judicial district wherein the airport is located, as provided by statute.
(Ord. No. 19007, § 1, 12-17-2019)

14.08.110 Administrative officer designated.

The zoning administrator is designated the administrative officer charged with the duty of administering and enforcing the regulations herein prescribed. The duties of the zoning administrator shall include processing all applications for variances under Section 14.08.060, but the zoning administrator shall not have or exercise any of the powers or duties herein delegated to the board of adjustment.

(Ord. No. 19007, § 1, 12-17-2019)

14.08.120 Enforcement and remedies.

The city, separately, or in conjunction with the county, may institute in the district court of the judicial district wherein the airport is located, an action to prevent, restrain, correct or abate any violation of this chapter, or any regulations, orders, ordinances, resolutions or rulings promulgated or made pursuant to this chapter, and the court shall adjudge to the plaintiff such relief, by way of injunction (which may be mandatory) or otherwise as may be proper under all the facts and circumstances of the case, in order to effectuate the purposes of this chapter and of the regulations adopted and orders, resolutions and rulings made pursuant hereto.

(Ord. No. 19007, § 1, 12-17-2019)

14.08.130 Conflicting regulations.

Where this chapter imposes a greater or more stringent restriction upon the use of land than is imposed or required by any other ordinance or regulation under this El Paso City Code, the provisions of this chapter shall govern, pursuant to FAA regulations.

(Ord. No. 19007, § 1, 12-17-2019)

Chapter 14.12

AIRCRAFT USE REGULATIONS

Sections:

14.12.010 Airspace defined.

14.12.020 Aircraft position lights—Use required when.

14.12.030 Radio receiver required—Operation of required when.

14.12.040 Minimum altitude.

14.12.050 Airman certificate and aircraft certificate of airworthiness required.

14.12.060 Compliance with federal rules required.

14.12.070 Aerobatic flying prohibited.

14.12.080 Landing to be only at established landing places.

14.12.090 Parachute jumping prohibited.

14.12.100 Dropping objects from aircraft prohibited.

14.12.105 Objects delivered or released from aircraft—Application required.

14.12.110 Advertising from aircraft.

14.12.120 Suspension or restriction of aircraft operations—Authority of director or designee.

14.12.130 Disabled aircraft.

14.12.140 Damage to airport property—Reporting required.

14.12.150 Starting and/or running of aircraft engines.

14.12.160 Taxiing.

14.12.170 Take-offs and landings.

14.12.180 Motorless aircraft.

14.12.190 Parking of aircraft.

14.12.200 Unattended aircraft.

14.12.210 Use of T-hangars.

14.12.220 Unmanned aircraft systems (UAS).

14.12.010 Airspace defined.

The term "airspace" as used in Sections 14.12.020 and 14.12.030 means the Class C airspace which includes an area within a circle the radius of which is five nautical miles and the center of which is the airport reference point, as established and marked on the ground by the United States Coast and Geodetic Survey, except such part of the area as lies within the Republic of Mexico. The circle extends from the surface to a height of one thousand two hundred feet above ground level at which point the circle extends to a ten nautical miles radius up to a height of four thousand feet above ground level.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.020 Aircraft position lights—Use required when.

From thirty minutes before sunset to thirty minutes after sunrise, or at any other time when flight visibility is less than three miles, no person shall operate any aircraft within the airspace of the El Paso International Airport without showing the standard position lights required by regulations of the Federal Aviation Administration.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.030 Radio receiver required—Operation of required when.

No person shall make a take-off within the Class C airspace with any aircraft not equipped with a radio receiver and transponder with altitude encoding capability which enables the pilot to obtain instructions from the air traffic control tower of the El Paso International Airport; and the pilot or person in command of the aircraft shall maintain continuous communication with the appropriate radio frequency for such instructions while the aircraft is within the airspace; provided, the air traffic control tower or designee may permit such take-off during daylight when in their opinion an emergency exists and such take-off can be made with reasonable safety.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.040 Minimum altitude.

A. Except while taking off or landing at an established landing field or airport, no person shall fly or permit any aircraft to be flown within the city limits except at a height sufficient to permit a reasonably safe emergency landing, which shall be at least one thousand feet when outside the landing pattern of the International Airport and five hundred feet when inside the landing pattern. The landing pattern is the area within a radius of one mile from the airport reference point as defined in Section 14.12.010.

B. The provisions of this section may be deviated from when necessary because of immediate danger, stress of weather conditions or other unavoidable cause.

C. The provisions of this section may be waived by the city council when it permits the landing of an aircraft within the city other than upon a regularly established airport field or landing place pursuant to Section 14.12.080 of this chapter or the delivery and release of equipment, construction material or any other object or material from an aircraft pursuant to Section 14.12.105 of this chapter.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.050 Airman certificate and aircraft certificate of airworthiness required.

No person shall operate any aircraft or unmanned aircraft within or over the corporate limits of the city unless such person has first been issued an airman certificate, if required, by the Federal Aviation Administration and unless such aircraft, if required, shall have first received a certificate of airworthiness from such agency.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.060 Compliance with federal rules required.

No person shall operate any aircraft or unmanned aerial vehicle over or within the city in violation of any valid air traffic or other rule or regulation established by the Federal Aviation Administration.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.070 Aerobatic flying prohibited.

Aerobatic flying by any person flying over any portion of the city is prohibited, unless authorized by air traffic control and the director of aviation or their designee.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.080 Landing to be only at established landing places.

A. Except in case of emergency, no person shall land any aircraft within the city except upon a regularly established airport field, heliport, helipad, helistop, or landing place. This prohibition shall not be applicable to aircraft owned or operated by agencies of federal, state, or local governments.

B. The provisions of this section may be waived on a case by case or regular basis by resolution of the city council with respect to the landing or landings of an aircraft outside the airspace (as that term is defined in Section 14.12.010 of this chapter) of any airport, field or landing place, upon the application of any person who presents evidence satisfactory to the city council of the following:

1. That the proposed landing or landings are not in violation of any rule or regulation of the Federal Aviation Administration;

2. The purpose of the landing or landings;

3. The number and type of aircraft to be utilized in the proposed landing or landings;

4. That the operator or operators of the aircraft to be utilized and the aircraft to be utilized are properly and currently certified by the Federal Aviation Administration, or by some other authorized agency;

5. The time, place and date of the proposed landing or landings and the estimated time of departure;

6. The reason why the proposed landing or landings should be permitted;

7. An insurance policy shall be maintained by the operator of the aircraft to insure against third party liability as well as passenger bodily injury liability that meets the minimum amounts

and requirements specified in a written agreement with city. This requirement shall not be applicable in the case of aircraft owned and operated by agencies of the federal government or the state.

8. A statement signed by the applicant that the applicant will, in consideration of permission from the city council to conduct the landing or landings requested, indemnify and hold the city harmless from any and all claims for death, personal injury, property damage or otherwise, arising out of or incidental to the landing, landings or takeoffs of aircraft for which waiver of this section is granted. This requirement shall not be applicable in the case of aircraft owned and operated by agencies of the federal government or the state.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.090 Parachute jumping prohibited.

No person shall make a parachute jump within the city limits except in case of actual emergency or approved in writing by the director of aviation or designee. This prohibition shall not be applicable to parachute jumps by agencies of federal, state, or local governments.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.100 Dropping objects from aircraft prohibited.

No person in any aircraft shall cause or permit to be thrown out, discharged or dropped within the city any object or thing, except loose water or loose sand ballast when absolutely essential to the safety of the occupants of the aircraft and except as provided in Section 14.12.105.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.105 Objects delivered or released from aircraft—Application required.

A. No person shall deliver or release from any airborne aircraft any equipment, construction material or any other object, or any persons, within the city, except for activities which have been preempted by federal or state law, without first obtaining a permit from the city council which may be granted on a case by case or regular basis upon submission of an application that provides at a minimum the following information:

1. The identity and credentials of the applicant;

2. The time, location and duration of the operation;

3. A description of equipment, construction material or other objects to be delivered or released from the aircraft, together with a description of the method to be used in the delivery or release and the flight approach path to the site involved;

4. Evidence that the applicant has been certified by the Federal Aviation Administration pursuant to 14 Code of Federal Regulations Part 133 in the case of rotocraft external load operation; that applicant's air delivery or air drop will be in compliance with any and all applicable regulations of the Federal Aviation Administration and any other applicable federal or state laws or regulations. The requirement set forth in this section for compliance with 14 CFR Part 133 apply only to rotary wing aircraft; all other requirements of this section apply only to both rotary and fixed wing aircraft;

5. Evidence that the operator or operators of the aircraft to be utilized and the aircraft are properly and currently certified by the Federal Aviation Administration, or by some other authorized federal agency;

6. Whether the proposed location of the air drop or air delivery and the approach to such location or locations are within a noise sensitive zone as defined in Section 9.40.070 of this Code;

7. Evidence that the applicant has made satisfactory arrangements with law enforcement agencies to exclude, where necessary, unauthorized persons from the area of the proposed operation;

8. The reason that the project is in the best interests of the city;

9. Evidence of general liability combined insurance coverage issued by an insurance company authorized to do business within the state, applicable to the proposed operation, in a minimum

amount of five hundred thousand dollars. This requirement shall not be applicable in the case of the aircraft owned and operated by agencies of the federal government or the state; and

10. A statement signed by the applicant that the applicant will, in consideration of permission from the city council to conduct the air delivery or release requested, indemnify and hold the city harmless from any and all claims for death, personal injury, property damage or otherwise, arising out of or incidental to the landing, landings or takeoffs of aircraft for which waiver of this section is granted. This requirement shall not be applicable in the case of aircraft owned and operated by agencies of the federal government or the state.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.110 Advertising from aircraft.

No person shall make an exhibition flight by carrying banners on, distributing circulars or advertising matter from, or operating loud speaking device from any aircraft flying within the city limits, without first obtaining a permit from the city council. Such permit will not be granted if in the opinion of the city council the proposed operation will endanger persons or property or cause discomfort or annoyance to the public; nor in any case unless the aircraft and the person operating it are properly licensed by the Federal Aviation Administration.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.120 Suspension or restriction of aircraft operations—Authority of director or designee.

The director or designee may suspend or restrict any or all aircraft operations on, from, or to, the airport whenever such action, in their discretion, is deemed necessary in the interest of safety.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.130 Disabled aircraft.

Aircraft owners and their pilots and agents shall be responsible for the prompt disposal of disabled aircraft and parts thereof unless otherwise directed by proper federal authorities, after proper inspections and clearances have been obtained from proper federal authorities. All disabled aircraft shall be placed in a hangar or covered, such that the aircraft is out of the public view. If such screening in not possible, the aircraft's responsible party shall coordinate with the airport. Should the owners, their pilots or agents, fail to comply, the director or designee is authorized, in order to restore flight services, to remove damaged aircraft, parts or FOD from the landing area, ramp and apron areas, or the airport, at the expense of the aircraft owners, their pilots or agents, without liability for damage which may result in the course of such removal.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.140 Damage to airport property—Reporting required.

Any person observing damage, injury or destruction of airport property shall so report to the director or designee or the control tower operator immediately.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.150 Starting and/or running of aircraft engines.

A. Aircraft engines shall be started and run-up only in places designated by signs or as specifically authorized by the director or designee or control tower as published in the current chart supplement.

B. No aircraft engine shall be started or operated in any manner unless a licensed pilot or mechanic is at the controls.

C. Any aircraft not equipped with locking brakes shall have the wheels adequately chocked before starting any engine.

D. No aircraft engine shall be powered in any hangar.

E. Engines are to be no higher than idle at the terminal gates.
(Ord. No. 19007, § 1, 12-17-2019)

14.12.160 Taxiing.

A. No aircraft shall be taxied in the movement area without prior clearance from the air traffic control tower, and then only at speeds that shall assure complete control at all times.

B. While awaiting take-off clearance, aircraft shall not be taxied past the "mandatory hold" lines painted on the taxiways.

C. Aircraft shall not be taxied into or out of any hangar.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.170 Take-offs and landings.

A. All take-offs and landings shall be made on the paved runways except in emergencies, unless otherwise directed by the air traffic control tower.

B. Aircraft, after landing, shall turn off the runway at the first practicable taxiway or runway intersection or as specifically instructed by the air traffic control tower.

C. All aircraft shall be operated on the airport by a pilot, or other persons aboard controlling any part of the operation thereof, in a physical and mental condition compliant with federal regulations for the operation of aircraft.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.180 Motorless aircraft.

No motorless aircraft may land or take off from the airport without prior permission of the director.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.190 Parking of aircraft.

A. Aircraft shall not be parked in any area other than those so designated by the director.

B. Aircraft shall not be parked at the passenger terminal building except for the purpose of loading or unloading passengers, mail, air express or air freight and the aircraft is designated as a commercial passenger aircraft. Air freight aircraft shall park in designated cargo parking areas only.

C. Upon direction of the director, the operator of any aircraft parked or stored on the airport in such a way as to impair airport safety and serviceability, shall move such aircraft from the place where it is parked or stored to any other designated place or off the airport property. Should the operator refuse or fail to comply with such direction, the director may have the aircraft moved to such designated place or off the airport property at the operator's expense, and without liability for damage which may result in the course of such moving.

D. Airworthy aircraft that is not parked overnight in its preferentially assigned gate (as defined the in signatory agreement between the airline and the city) will be assessed an overnight parking fee as set forth in Schedule C of the annual budget resolution.

E. Unairworthy aircraft, wrecks, "junkers," or parts thereof, shall not be stored on the public areas of the airport used for parking aircraft unless awaiting scheduled repairs by fixed base operators or maintenance facilities. Any non-flyable aircraft or aircraft parts which remain on public airport parking facilities for an excess of ninety calendar days shall be classified as "dead storage" and the applicable fee for such storage shall apply. Any aircraft stored in excess of six months shall be removed from the airport or may be removed by the director or designee at their discretion. All applicable costs for removal shall be recoverable by the airport.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.200 Unattended aircraft.

No aircraft shall be left unattended on the airport unless it is adequately secured and chocked or is parked within a hangar.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.210 Use of T-hangars.

A. No person shall utilize these hangars for any commercial use not specifically authorized in a lease agreement by the director.

B. Short-term vehicle is parking is allowed with T-hangars while the aircraft is out. Vehicles may be parked on the pavement adjacent to the

T-hangars only when the tenant is present, provided that the taxiway is not blocked. Vehicles may not be left unattended outside the T-hangars at any time.

C. The electrical system of each T-hangar is for light service only. All such devices should be properly grounded. No electrical motor or appliance is to be located within eighteen inches of the hangar floor.

D. Aircraft are not to be fueled in a T-hangar.

E. Aircraft batteries are not to be changed while any portion of the aircraft is in the T-hangar.

F. Area heaters, regardless of type, are not permitted in the T-hangars. Open flame operations of any kind are strictly prohibited. No smoking or use of electronic cigarettes are permitted in the T-hangars.

G. Lessees of T-hangar facilities shall comply with all applicable federal, state, local and airport rules, regulations, statutes and ordinances.

H. Modification of any T-hangar is prohibited unless the written approval of the director is granted.

I. Locks for T-hangars shall be provided by the governance of the El Paso International Airport.

J. Waste oil or fuel is not to be disposed of in a drain or on the ground. It must be disposed of in a container approved by the governance of the El Paso International Airport.

K. After first attending an airport sponsored driving class and obtaining the requisite ramp pass, T-hangar tenants are permitted to use the T-hangar taxilane for ground vehicular access to their hangar, subject to the exercise of due caution and the philosophy that aircraft have the right-of-way at all times. Vehicles utilized for driving to and from the airport may be parked inside the T-hangar leased to the tenant provided tenant has driving privileges.

L. All hangars and T-hangars can be inspected by the governance of the El Paso International Airport assigned management team in order to ensure that prohibited items are not present or to determine if there are other safety, security or health violations.

(Ord. No. 19007, § 1, 12-17-2019)

14.12.220 Unmanned aircraft systems (UAS).

Unmanned aircraft systems ("UAS"), or "drones," shall be regulated according to the purposes for which the UAS is operated according to applicable federal and state regulations.

(Ord. No. 19007, § 1, 12-17-2019)

Chapter 14.16

AIRPORT USE REGULATIONS

Sections:

Article I General Rules and Regulations

14.16.005 Definitions.

14.16.010 Application of provisions.

14.16.020 Restricted areas—Persons allowed to enter.

14.16.021 Air operations area—Responsibilities.

14.16.022 Badging.

14.16.030 Traffic areas—Use.

14.16.040 Animals prohibited in terminal building and landing areas—Exception.

14.16.050 Abandoned or lost property.

14.16.060 Smoking prohibited.

14.16.070 Sanitary regulations.

14.16.080 Firearms prohibited—Exception.

14.16.090 Alcoholic beverages—Consumption restricted to designated areas.

14.16.100 Commercial picture taking.

14.16.110 Distribution of literature and solicitation of donations.

14.16.120 Construction, alteration work, electrical wiring.

14.16.130 Fuel flowage fees.

14.16.135 Fueling of aircraft.

14.16.140 Gasoline and damaging liquid spills on pavement—Responsibility for removal.

14.16.150 Removal of disabled, abandoned, illegally parked vehicles and aircraft.

14.16.155 Computer non-corruption and information technology.

Article II Business Activities At Airport

14.16.160 Concessions—Lease or specific permission required—Regulation of driverless automobiles.

14.16.161 Customer facility charge.

14.16.162 Third party service agencies.

14.16.163 Violation—Penalty.

Article III Off-Airport Rental Car Businesses

14.16.300 Definitions.

14.16.301 Permit required—Procedures.

14.16.302 Courtesy service pickup.

14.16.303 Service limited.

14.16.304 Permit, charges and reporting requirements.

14.16.305 Nontransferability.

14.16.306 Amendment of permit.

14.16.307 Issuance and denial of permit.

14.16.308 Renewal of permit.

14.16.309 Revocation or suspension of permit.

14.16.310 Notice.

14.16.311 Emergency suspension.

14.16.312 Hearing.

14.16.313 Appeals.

14.16.314 Violation—Penalty.

Article IV Ground Transportation Services

14.16.401 Statement of policy.

14.16.402 Definitions.

14.16.403 General authority for enforcement.

14.16.404 Defenses.

14.16.405 Ground transportation service requirements.

14.16.406 Registration of ground transportation service at the airport.

14.16.407 Fees.

Article I General Rules and Regulations

14.16.005 Definitions.

Definitions. Notwithstanding anything to the contrary set forth elsewhere in this title, the following definitions shall apply for the purposes of this chapter:

"Permittee" means a person or organization conducting regulated activities pursuant to a permit duly issued under this chapter.

"Public areas" means those portions of the terminal building which permit generally unrestricted and unscreened access.

"Regulated activities" means those activities within the airport by persons or organizations desiring to exercise constitutionally protected rights of free speech and expression and freedom of religion, for which a permit is required under this chapter, namely:

1. Religious or other proselytism;
2. Solicitation and acceptance of donations;
3. Distribution of handbills, tracts and other literature.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.010 Application of provisions.

The rules and regulations in Sections 14.16.010 through 14.16.100, 14.16.120 through 14.16.150 and 14.20.250 apply to all persons on the airport, except premises which are outside the airline terminal building and are leased to and in the exclusive possession of others. Entry of any person into the airport shall be conditioned upon compliance with Sections 14.16.010 through 14.16.100, 14.16.120 through 14.16.150 and 14.20.250, and the entry shall be deemed an agreement by the person entering to comply therewith.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.020 Restricted areas—Persons allowed to enter.

All areas of the airport except those areas open to the public are restricted except to those persons who are authorized to be therein and who display the proper EPIA-issued badge for the appropriate area(s), or are properly escorted and no person shall enter upon the movement and non-movement areas of the airport including the security identification display area and the sterile areas except:

A. Persons assigned to duty therein having appropriate EPIA issued badge media and access privileges;

B. Authorized representatives of the Federal Aviation Administration or the Transportation Security Administration displaying agency identification in line with official duties;

C. Passengers escorted by authorized personnel entering the sterile area or ramp areas for the purpose of enplaning and deplaning;

D. Persons engaged, or about to be engaged, or having been engaged, in the operation of any aircraft;

E. Persons authorized under contractual agreements with the city; and

F. Persons with official airport issued identification as required by CFR 1542.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.021 Air operations area—Responsibilities.

A. All persons, including, but not limited to, certificated airline carriers, air cargo operators, fixed base operators, and others engaging in activities at the El Paso International Airport, having control by lease or otherwise, over areas within the air operations area or over areas which permit access to the air operations area, shall be responsible for the following:

1. Controlling access to the air operations area, including methods for preventing the entry of unauthorized persons and ground vehicles, through any area over which such person has control, except as provided in subsection B.1 of this section; and

2. Promptly detecting the intrusion or attempted intrusion of unauthorized persons and ground vehicles through controlled areas into the

air operations area and promptly notifying airport operations of such intrusion or attempted intrusion.

B. Authorized persons—Responsibilities.

1. Any person who has authority to enter the air operations area and who permits an unauthorized person to accompany him or her shall be responsible for ensuring that such unauthorized person remains under escort by an authorized person at all times while in the air operations area.

2. Any person entering the air operations area shall ensure that any gate through which entry is gained is properly closed and secure after the entry and to notify airport security promptly if such gate does not close properly.

C. Penalty. Any person who willfully, recklessly or negligently fails to discharge the responsibilities set forth in subsection A or B of this section shall be guilty of a misdemeanor and shall be liable to a fine not to exceed one thousand dollars and each day such violation shall be permitted to exist shall constitute a separate offense and may lose access privileges temporarily or permanently.

D. TSA Violation—Responsibility. In any case in which the Transportation Security Administration assesses a civil penalty against the El Paso International Airport for a violation of Transportation Security Administration regulation Part 1540, Section 105, occurring on or through any area under the control of a person at the El Paso International Airport or as a result of a violation of subsection B.1 and B.2 of this section, the El Paso International Airport shall be reimbursed by the person whose act or failure to act caused the violation resulting in the civil penalty or by the person, as defined in Section 1.04.030(F) of this Code, whose employee, agent, servant or independent contractor caused the violation resulting in the civil penalty.

E. For the purpose of this section, the air operations area is defined as that part of the El Paso International Airport which is designed and used for landing, taking off or surface maneuvering of airplanes, including taxiways, runways, aprons and adjacent field areas.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.022 Badging.

The airport shall issue badges to those persons authorized to access restricted areas as required by TSA and may charge fees necessary to recover costs to include but not limited to criminal history background checks, fingerprinting, and materials at the time of issuance and renewal and for lost badges and badges not returned. Fees will be set forth in the budget resolution approved by city council for each fiscal year.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.030 Traffic areas—Use.

No person shall travel on the airport other than on the roads, walks or places provided for the use of traffic. No person shall use the roads or walks in such manner as to hinder or obstruct their proper use by others. All persons shall adhere to posted traffic control signs and marking unless the individual is responding to an emergency on the airport.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.040 Animals prohibited in terminal building and landing areas—Exception.

No person shall enter the terminal building or landing area of the airport with an animal, except that service animals, as defined in the Americans with Disabilities Act (1990) or Air Carrier Access Act (1986), may be permitted in the terminal building. This does not apply where animals are being shipped on air carriers and are restrained by leash or properly contained. This section shall not apply to animals controlled or approved by a government agency.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.050 Abandoned or lost property.

A. All property, other than freight or baggage delivered to the airport by a common carrier,

which is lost or abandoned by its owner on the airport shall be reported to or deposited with the members of the El Paso Police Department ("EPPD") assigned to the El Paso International Airport to be placed in the custody of the EPPD with a police report regarding the circumstances under which the property was found.

B. The EPPD shall surrender the property to a claimant who presents satisfactory evidence of ownership, or right to possession. Under circumstances which could result in conflicting claims, the EPPD may require the claimant to give reasonable security for the return of the property or request the city's legal department to file an interpleader suit.

C. All property, other than freight or baggage delivered to the airport by a common carrier, which is lost or abandoned by its owner at the TSA security checkpoint, shall remain in the custody of the Transportation Security Administration and not be turned over to the custody of the El Paso International Airport.

D. All weapons, lost and confiscated, shall promptly be turned into the EPPD property office to be stored and disposed of pursuant to Section 3.32.040 of this Code.

E. All other lost, mislaid or abandoned property found on the airport which is not disposed of pursuant to subsection B or C of this section and which remains in the custody of the EPPD for thirty days shall be delivered to the property office to be stored and disposed of pursuant to Section 3.32.040 of this Code.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.060 Smoking prohibited.

Smoking or the use of electronic cigarettes shall be prohibited in the terminal and terminal ramp ConRAC facilities, public and commercial parking lots, security identification display areas (SIDA), and where fuel is dispended in accordance with National Fire Protection Association (NFPA) 407. Exceptions to this shall only be permitted as indicated by signage, and as more particularly described in Chapter 9.50 of the El Paso Municipal Code.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.070 Sanitary regulations.

No person shall place, dispose or deposit in any manner trash, garbage or refuse in or upon the airport property except at such places and under such conditions as the director may from time to time prescribe. No person shall use a toilet other than in a clean and sanitary manner, nor expectorate on the floors, walls or any surfaces of any airport building.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.080 Firearms prohibited—Exception.

The open or concealed carry of a handgun shall only be permitted by the holder of a valid Texas license to carry a handgun, or equivalent out-of-state license for which the State of Texas recognizes or has a reciprocal agreement. The open or concealed carry of a handgun shall be limited only to those public, non-secured areas of the airport. The open carry of a long arm shall be permitted by any person legally permitted to own a long arm, except that this shall be limited only to those public, non-secured areas of the airport. Only duly authorized persons, police officers, federal employees authorized to carry firearms in the performance of their duties, law enforcement officers on duty or members of the Armed Forces of the United States on official duty shall carry any firearms on the airport except as otherwise permitted. Unloaded, cased firearms may be carried as checked baggage. All firearms intended to be carried as baggage are required to be declared at the appropriate ticket counter.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.090 Alcoholic beverages—Consumption restricted to designated areas.

No person shall drink any alcoholic beverage upon any portion of the airport open to the public, except in such restaurant or other place as shall

be properly designated and licensed for dispensing alcoholic beverages, except as otherwise permitted in Concourse A or B.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.100 Commercial picture taking.

No person, except duly accredited representatives of the news media, shall take still, motion or sound pictures for commercial purposes on the airport without permission of the director.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.110 Distribution of literature and solicitation of donations.

A. Purpose. It shall be the purpose of this section:

1. To assure the fair use of the public area at the airport by persons seeking to exercise constitutional freedom of expression and for religious organizations to proselytize;

2. To permit equitable access among persons and groups desiring to exercise such constitutional freedoms;

3. To restrict such activities to public areas of airport buildings and premises, excluding concourse areas beyond screening checkpoints;

4. To prevent interference with passengers and other users of the airport; to allow free access to airport travel facilities and free passage among those facilities and to ensure the free and orderly flow of pedestrian traffic through the airport premises;

5. To discourage interference with persons who are required to wait in lines; and

6. To prevent interference with anti-hijack and other security measures.

B. Conduct of Regulated Activities. The conduct of regulated activities pursuant to this section will be permitted in the following manner in the public areas of the airport, such areas as more particularly depicted in a diagram which is available from the airport. The director shall have the authority from time to time to temporarily relocate permittees for reasons relating to security, safety or construction.

1. No individual shall be approached by more than one distributor or solicitor at a time;

2. No distributor or solicitor shall make noise or create any disturbance which will interfere with the ability of the public to hear public address announcements nor shall any distributor or solicitor shout at any person. The use of sound or voice amplification apparatus is prohibited;

3. To ensure the efficient and orderly use of the airport for its primary purpose and to assure equal opportunity for freedom of expression the following restrictions shall apply:

a. Not more than a total of four persons shall be permitted to engage in regulated activities in the terminal building at the same time, and regulated activities permitted inside the terminal building shall not include solicitation and acceptance of donations;

b. Not more than a total of four persons shall be permitted to engage in regulated activities in areas designated by the director on the sidewalk area outside the terminal building at the same time, and such activities shall not include the solicitation and acceptance of donations.

4. No regulated activity shall interfere with the free passage of the public within the terminal building;

5. No signs, placards or other materials shall be affixed to the terminal building;

6. No leaflets or other written materials shall be distributed by leaving them unattended in the terminal building;

7. No person shall engage in regulated activities under this section except in one of the designated areas indicated on the aforementioned diagram and no more than two persons shall be in a designated area at any given time;

8. No person engaging in regulated activities under this section shall, by word or gesture or otherwise, harass or threaten any other persons or in any way obstruct, delay or interfere with the free movement of any other person or seek to coerce or

physically disturb or touch any other person without that person's permission; or hamper or impede or interfere with the conduct of any authorized business at the airport; and

9. Engaging in regulated activities under this section in any location other than one assigned in a permit issued by the director in accordance with Section 14.16.110(E) is prohibited.

C. Permit Requirement. It shall be unlawful for any person or organization to engage in any regulated activities under this section without first obtaining a written permit from the director. For the purposes of obtaining such a permit a written application on a form prescribed by and provided by the city must be filed with the director. The filing of such application is required in order that adequate precautions may be taken by the director of aviation to protect the public health, safety and order and to ensure the efficient and orderly use of airport property for its primary purpose and to ensure equal opportunity for freedom of expression.

D. Issuance of Permits.

1. A maximum of four permits will be issued for a total of four persons, inclusive of all permits. Where more than one applicant requests a permit, permits will be granted to ensure that each applicant is authorized to have at least one person authorized to engage in regulated activities for the applicant, subject to the overall maximum of eight persons during any permit period.

2. The number of persons authorized to engage in regulated activities under a permit will be allocated as follows:

a. Inside the terminal building at the designated spaces.

i. One applicant, any number up to a maximum of four;

ii. Two applicants, a maximum of two per permit;

iii. Three applicants, one per permit. An additional person will be authorized, if requested; provided, however, that if more than one applicant requests an additional person, those applicants who make such a request will draw lots to determine which applicant is authorized an additional person;

iv. Four applicants, one for each permit;

v. More than four applicants, all applicants present at the time and place assigned for issuance of permits will draw lots in a manner to be determined by the director or authorized designee. A permit will be issued to each of the four successful applicants authorizing one person per permit.

b. Outside on sidewalk area.

i. One applicant, any number up to a maximum of four;

ii. Two applicants, a maximum of two permits;

iii. Three applicants, one per permit. An additional person will be authorized, if requested; provided, however, that if more than one applicant requests an additional person, those applicants who make such a request will draw lots to determine which applicant is authorized an additional person;

iv. Four applicants, one for each permit;

v. More than four applicants, all applicants present at the time and place assigned for issuance of permits will draw lots in a manner to be determined by the director or designee. A permit will be issued to each of the four successful applicants authorizing one person per permit.

3. All persons engaging in regulated activities under this section must be authorized representatives of a permittee and such persons must register in advance with the director or authorized designee and must wear airport provided identification badges, readily visible at all times.

E. Denial of Permit.

1. A permit applicant denied a permit by the director or designee shall be furnished a written statement at the time of denial, indicating the reason or reasons the permit was denied. The director may deny an application under this chapter if the director finds:

a. That the applicant has supplied false or incorrect information on any application for a permit;

b. That the applicant has failed to supply all information required on the application form; or

c. That the applicant has failed to pay the application fee.

2. In the event that applicant's current or prior permit is under suspension, no new permit shall be issued until the term of such suspension has expired.

3. In the event that an applicant's current or prior permit is revoked, no new permit shall be issued until the term of such revocation has expired.

4. The director shall issue written notice of denial to the applicant which shall contain, at a minimum, the following:

a. The name of the applicant;

b. A statement that the permit is denied; and

c. Reason(s) for the denial.

5. The applicant has five business days after receipt of the notice of denial to file with the city manager a written protest to the denial. A copy of the written protest shall also be sent to the director.

F. Suspension or Revocation.

1. The director may issue a written notice of intent to suspend for not more than sixty days or a written notice of intent to revoke a permit subject to this chapter if the director determines that any of the following is true:

a. The permit holder supplied false or misleading information on any application for a permit;

b. The permit holder is found, after notice and opportunity for hearing, to be in violation of a provision of this chapter;

c. The permit holder is indebted to the city for fees or payment of penalties imposed by this chapter or by rule adopted under this chapter; or

d. The director may issue written notice of intent to revoke a permit if the holder violates this chapter on two or more occasions within a twelve-month period.

2. A permit holder that has had their permit suspended or revoked shall be required to surrender the permit to the director within seven calendar days of receiving notice from the director or designee of suspension or revocation, regardless of whether the permit holder requests an appeal in accordance with this chapter. In the case of suspension, failure to surrender the permit within seven days of notice shall cause the director to revoke the permit. In the case of revocation, the period of revocation shall be eighteen months before the permit holder can apply for a new permit.

3. A permit holder shall not commence activities addressed under the permit after the term of suspension has ended without first retrieving their permit from the director or designee.

4. It shall be a violation of this chapter for a permit holder to continue the activities addressed under the permit during the period of suspension or revocation of the permit.

5. Notice. The director or designee shall issue a written notice of suspension or revocation of a permit to the permit holder, with the following information:

a. Name and address of the permit holder;

b. Statement of whether the permit is suspended or revoked;

c. Reason(s) for the suspension or revocation;

d. Recommendation of corrective measures to bring the permit holder into compliance with the requirements of this chapter;

e. Statement that the permit be surrendered to the director or designee within seven days of receipt of notice;

f. Statement that the permit, if suspended, is subject to revocation for failure to surrender the permit within the allotted time; and

g. Statement that the suspension or revocation may be appealed under the provisions set forth in this chapter.

6. A permit holder may not apply for a new permit for a period of twelve months after said permit has been revoked.

G. Permit—Appeal of Denial, Suspension or Revocation.

1. Any applicant or permit holder may appeal the denial, suspension or revocation of a license or permit required by this chapter of the City Code to the city manager as provided in this section.

2. Within ten business days of denial, suspension or revocation, the director or designee shall prepare a report indicating the reasons for the denial, suspension or revocation and shall provide a copy to the applicant or permit holder. The director or designee's decision is final unless within ten business days from the date of receiving such report, the applicant or permit holder files with the city clerks a written appeal to the city manager specifying the reasons for the appeal. Said appeal shall also include a written rebuttal to the report.

3. The city manager or designee shall review the report and the appellant's rebuttal. The city manager or designee may allow the appellant to make an oral presentation or submit additional rebuttal. The city manager or designee shall make a ruling on the appeal within a reasonable period of time after the appeal has been filed.

4. The city manager or designee shall sustain, reverse or modify the action of the director or designee and shall notify the appellant of the decision in writing. The decision of the city manager or designee is final.

H. Not Applicable. This section shall not apply to business or commercial activities at the airport which shall be governed by the provisions of Article II of this chapter.

I. Penalty. Any person who violates any provision of this section or who intentionally violates the terms of a permit issued to engage in regulated activities at the airport shall be guilty of a misdemeanor and is punishable as provided in Section 1.08.010 of this Code.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.120 Construction, alteration work, electrical wiring.

No person shall do any construction, alteration work or electrical wiring in or about any existing hangar or building at the airport without first securing written permission from the director.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.130 Fuel flowage fees.

A fuel flowage fee per gallon per the currently adopted Schedule C of the city's annual budget resolution shall be payable to the city for all aircraft fuel sold or delivered into an aircraft at the airport, except: (1) where a different fee is established by any lease or airline operating agreement with the city in force and effect at the time this section is approved by the city council and provided that the exception for fees established by existing lease or airline operating agreements shall not apply after the expiration, termination or cancellation of any such lease or airline operating agreement; or (2) if the aircraft fueled is being used in connection with operations of a tenant leasing space in cargo buildings owned by the city.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.135 Fueling of aircraft.

No aircraft shall be fueled except at the site of a fixed base operator, a tenant-provided fueling facility, at a self-fueling station, or designated ramp areas. Fueling at general aviation T-hangars is prohibited.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.140 Gasoline and damaging liquid spills on pavement—Responsibility for removal.

Spillage or dripping of gasoline, oil, jet fuel, kerosene, grease or any other material which may be unsightly or detrimental to the pavement in any area at the airport, shall be removed immediately in accordance with the applicable stormwater pollution prevention plan (SWPPP) procedures. The responsibility for removal shall be assumed by the operator of the equipment causing the spillage or by the tenant or concessionaire responsible for the deposit thereof on the pavement. Airport operations should be notified immediately upon spillage

or dripping to evaluate the situation and determine if an aircraft rescue and firefighting (ARFF) response is required. The airport shall be authorized to collect compensation for the cost of damage and clean-up to its property from the operator, tenant, and or concessionaire responsible for the deposit on the pavement.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.150 Removal of disabled, abandoned, illegally parked vehicles and aircraft.

A. The director or designee may remove, or cause to be removed, from any area of the airport any vehicle, aircraft or property which is disabled, abandoned, parked in violation of these rules and regulations, or which presents an operational problem, or interferes with the safe and efficient operation of the airport, at the operator's or owner's expense and without liability for damage which may result in the course of such movement. The director or designee may remove, or cause to be removed, any vehicle which is parked more than sixty consecutive days in any parking lot, regardless of the location parked, operated by the airport, unless written permission to do so has been obtained from the director or designee.

B. No person shall, unless authorized by the director or designee, park a vehicle in any area of the airport which has been designated by signs or other means as reserved for certain persons or vehicles or restricted for certain purposes.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.155 Computer non-corruption and information technology.

A. No person shall have any access to the computer and other information technology of the airport (collectively the "systems") unless authorized in writing by the director or designee and the person executes a written agreement to indemnify and hold harmless the city and airport from any and all claims whatsoever arising out of any breach (as defined below) and to follow any protocols required under any federal, state or local rules or regulations, all at its sole cost and expense in connection with the systems and/or a breach.

B. No person with access shall permit a third party to obtain access to the systems without the director or designee's prior written permission.

C. Should any person have access at any time for any reason, he or she shall ensure that such access does not compromise, adversely affect or permit unauthorized access, either directly or indirectly to, the systems (a "breach") in any way and for any reason. If the director or designee, in his or her sole good faith judgment, determines that such access either is adversely affecting the systems or has the potential to adversely affect the systems, then notwithstanding any other provision of an agreement to the contrary, the director or designee shall have the right to suspend and/or terminate immediately such access. The director or designee shall endeavor to give notice of such suspension and/or termination as expeditiously as possible.

D. The director or designee shall be immediately notified should a breach occur and provided with any and all information regarding the breach.
(Ord. No. 19007, § 1, 12-17-2019)

Article II Business Activities at Airport

14.16.160 Concessions—Lease or specific permission required—Regulation of driverless automobiles.

A. Except in the case of persons or firms doing business with tenants or subtenants of the city located on airport property or as otherwise permitted or regulated in this Code, no person who does not have a concession agreement, lease agreement or other specific permission in writing from the director or designee shall on the airport peddle sell, or rent any goods, wares, merchandise or services, or furnish taxicab or limousine service or hotel courtesy cars to any person who has not called from the airport for such service, or carry from the airport any passenger for hire in any aircraft, or conduct any student pilot training or demonstrate or sell any new or used aircraft, or

perform aircraft maintenance or any other aeronautical service such as is normally performed on airport property under lease or concession from the city; or offer to do any act prohibited in this chapter to be done.

B. No person who does not have such a concession, lease or specific permission in writing for engaging at the airport in the business of furnishing driverless automobiles, as that term is defined in Section 6.36.010, shall on the airport:

1. Use any loudspeaker or public address system for or in connection with the renting or delivery of any driverless automobile; or

2. Post, distribute or display signs, advertisements, circulars or any other printed or written matter denoting such business activity except signs painted on the motor vehicle used to pick up and drop off passengers at the front of the terminal building; or

3. Enter for the purpose of assisting customers in the terminal building or any building occupied by a commercial aviation operator as tenant.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.161 Customer facility charge.

A. A customer facility charge ("CFC") as set forth in Schedule C of the city's annual budget resolution per transaction day (as defined below) on each customer renting a motor vehicle from an on-airport or off-airport vehicle rental concessionaire shall be charged. The amount of the CFC may be adjusted from time to time by the city in its annual budget resolution approved by the city council.

B. "Motor vehicle" means a driverless automobile as that term is defined in Section 6.36.010 of the El Paso City Code.

C. "Transaction day" means, with respect to rentals of motor vehicles, up to twenty-five-hour period or fraction thereof for the first transaction day and successive twenty-four-hour periods (or fractions thereof) for each successive transaction day.

D. The on-airport vehicle rental concessionaires shall collect the CFC from their customers on behalf of the city. The vehicle rental concession agreement approved by the city council will govern how the on-airport vehicle concessionaire must so identify the CFC. Each on-airport vehicle rental concessionaire must charge each customer the total amount of CFCs due under the customer's contract at the time the final number of transaction days are determined under the contract, and must remit such total amount of the CFCs pursuant to the terms and conditions of its vehicle rental concession agreement.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.162 Third party service agencies.

All third party service agencies shall obtain a license agreement prior to commencing activity at the airport. Such license shall be renewed annually. Such fees are as established as outlined in Schedule C of the annual budget resolution.

For the purpose of this section "third party service agencies" means any consultant, agent, business, advisor, or independent contractor who renders services to the airport and is not otherwise defined under these minimum standards.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.163 Violation—Penalty.

Any person violating this article shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030.
(Ord. No. 19007, § 1, 12-17-2019)

Article III Off-Airport Rental Car Businesses

14.16.300 Definitions.

As used in this title:

"Gross receipts" means all moneys or other consideration paid or payable to an off-airport rental car business, whether for cash or credit and without any deduction for credit card discounts and whether the same shall be paid or unpaid. "Gross receipts" shall include the following: Net time and mileage charges by the business for the rental of automobiles, or any other vehicles, regardless of the ownership, area, fleet or location

assignment of said automobiles or vehicles and regardless of where said automobile or vehicle is returned. When a vehicle originally rented to a customer by the business is exchanged for another vehicle at another location of the business, as part of the same or continuous transaction, the transaction shall be considered includable in gross receipts; and charges to customers for supplies, merchandise or services. Excluded from "gross receipts" are the following: One-way drop-off charges; and amounts of any sales or similar taxes imposed by federal, state, county or City laws which are separately stated to and paid by the business, whether currently levied or hereinafter levied or imposed, and directly payable to the taxing authority by the business. No deduction shall be allowed from gross receipts for the payment of franchise taxes or taxes levied on the activities, facilities, equipment or property of the business, either real or personal; and sums received from the sale of used vehicles from the fleet of the business; and amounts of gratuities paid or given by customers to the employees of the business; and sums paid by customers to the business for its elimination of customer's liability to the business for damages to the rental vehicle, provided that said sum is separately stated to and paid by the customer (the aforementioned being commonly referred to as collision damage waiver (CDW) charge or loss damage waiver (LDW) charge); and sums received from customers or insurance carriers for the damage, loss or conversion of the vehicles of the business; provided, however, that any sums received representing reimbursements to the business in lieu of rentals for said vehicle shall not be so excluded; and sums received from the sale of Mexico trip insurance; and sums paid by customers to the business which represent an amount the customer is obligated to pay when the customer does not return the vehicle with the required amount of fuel. Said sum to be excluded must be separately stated to and paid by the customer; the fuel for which the customer may be charged shall be of the grade recommended for use in said vehicle by the manufacturer; and the charges for said fuel shall be at the prevailing rate charged by the business at its other locations; and sums received from transactions in which a customer places a reservation with the business for a vehicle where delivery is to occur outside the city limits of the city; and sums received from the leasing of any one vehicle to any one person or entity for a term of six consecutive months or more.

"Off-airport rental car business(es)" means a business or person which is engaged in the commercial activity of renting vehicles to the public for compensation and which does not have an in-terminal vehicle rental concession agreement with the city.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.301 Permit required—Procedures.

A. Any person conducting an off-airport rental car business desiring access to the airport for the purpose of conducting such rental car business operation, shall first obtain from the city, through its director or designee, an off-airport rental car business permit, prior to conducting any such business on airport property. A copy of the application form for such permit shall be available in the administrative offices, El Paso International Airport.

B. An off-airport rental car business permit shall not permit such business to rent motor vehicles on airport property, to have an office or station on airport property for the rental of vehicles, to park rental cars on airport property, or to operate rental cars on airport property; and all of these actions and activities are expressly prohibited, unless specifically authorized in writing by the director.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.302 Courtesy service pickup.

All off-airport rental car businesses required to operate under a permit, as provided in this chapter, shall, while on the airport, pick up and discharge passengers or baggage only in a courtesy vehicle zone designated by the director or

designee. Courtesy vehicles shall occupy said zone only for active loading and unloading, as established by the director or designee.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.303 Service limited.

Off-airport rental car businesses are permitted to utilize the airport facilities and provide service to persons at the airport only through operation of a courtesy vehicle system. Transportation onto airport property of rental cars by off-airport rental car businesses will be permitted only if specifically authorized in writing by the director.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.304 Permit, charges and reporting requirements.

There are established the following charges and requirements for off-airport rental car businesses:

A. An annual permit shall be a prerequisite to operation of an off-airport rental car business at the airport. City council may establish a fee for off-airport rental car business permit in the city's annual budget resolution.

B. In addition to the permit required by subsection A of this section, permittee shall pay the city a monthly charge, as defined in this chapter, derived during each month from rentals to customers picked up from the airport by off-airport rental car businesses during the month, such charge to be for the privilege of use of the airport. The charge shall be payable, not later than the twentieth day of each month, for the preceding month's receipts. The permittee shall furnish to the director of aviation or authorized designee, not later than thirty days following the end of the permit year, a report, properly certified by a certified public accountant, showing the month-to-month gross receipts derived from providing off-airport rental car services to passengers of the airport. In addition, authorized representatives of the city may, at all reasonable times and places within the city, examine or audit the permittee's books and accounts to verify that the correct monthly charges have been paid, or to require the permittee to furnish written proof of all gross receipts derived from airport-related car rental service during any month. The city retains at all times the right to require an independent audit, and if such audit shows permittee has underreported its gross receipts by two percent or more, permittee shall be responsible for paying the difference between the audited figures and what was reported by permittee, as well as the full cost of the audit.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.305 Nontransferability.

The off-airport rental car business permit shall not be transferable.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.306 Amendment of permit.

An annual permit is amendable at any time by the director or designee.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.307 Issuance and denial of permit.

A. Within a reasonable time after submission of the application, the director or designee shall approve or deny issuance of an off-airport rental car business permit. Upon approval of an application for an annual permit by the director or designee, the director or designee shall, within a reasonable time thereafter, issue the annual permit and incorporate therein such conditions as he deems necessary. The holder shall then be authorized to operate the off-airport rental car business upon the conditions of this chapter and the permit, as may be amended.

B. The director or designee may deny issuance of an off-airport rental car business permit for good cause, which includes a finding that:

1. The applicant has failed to comply with the requirements of this Chapter or permit application;

2. The applicant has, on more than one occasion, violated the provisions of Section 14.16.160(B); or

3. The applicant has failed to provide or materially altered or omitted pertinent information in any governmental record, including an application for a permit or permit renewal; or

4. The applicant has been finally convicted of a criminal violation of any local, state or federal law, which directly relates to the duties and responsibilities of providing an off-airport car rental business or which would indicate a lack of fitness of the applicant to provide this service at the airport.

C. If the director or authorized designee denies the issuance of a permit, he shall notify the rejected applicant pursuant to the notification procedure set forth in Section 14.16.310.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.308 Renewal of permit.

To obtain renewal of an annual permit, a holder shall file with the director, at least forty-five days prior to the expiration date of the annual permit, a written, sworn application for permit renewal. City council may establish a permit renewal fee in the city's annual budget resolution. Upon payment of the permit renewal fee, if any is established, the annual permit will then be renewed, subject to approval of the application by the director, unless the director determines that good cause exists for the permit renewal to be denied. For purposes of this provision "good cause" includes the items described in Section 14.16.307 above and Section 14.16.309 below.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.309 Revocation or suspension of permit.

A. The director may revoke or suspend a permit, if he determines that a permit holder:

1. Has been finally convicted of a criminal violation of any state or federal law, which directly relates to the duties and responsibilities of providing an off-airport car rental business and which would indicate a lack of fitness of the applicant to provide this service at the airport; or

2. Has falsified or materially altered or omitted pertinent information in any governmental record, including an application for a permit or permit renewal; or

3. Has failed to comply with the provisions of this chapter, including the payment of the gross receipts charge, or any provision of this Code related to the conduct of rental car businesses, including any provisions pertaining to the regulation of driverless vehicles; or

4. Has failed to comply with the provisions of a permit or written agreement required by this chapter; or

5. Has failed to allow examination or audit of records required by this chapter and which are necessary to determine compliance with the provisions of this chapter, or to furnish to the airport written proof, as required by Section 14.16.304(B); or

6. Has operated the business on airport property while on suspension for a violation of this chapter.

B. The director or designee may, after compliance with the procedures set out in Section 14.16.310, regarding notice, and Section 14.16.312, regarding hearings, revoke or suspend a permit for one or more of the causes enumerated in subsections A.1 through A.6 of this section; or, if the permit holder has engaged in misconduct or any improper or wrongful behavior of a substantial nature, which is dangerous to the safety and welfare of the public, and if such misconduct or wrongful behavior directly relates to the capacity of the permit holder to provide adequate and safe services to the public or of the airport to effectively regulate its operations.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.310 Notice.

If the director, or designee, denies an application for a permit, fails to approve renewal of a permit, or suspends or revokes a permit, he shall provide notice of his decision to the applicant or permit holder, within ten days of the action. Notice shall be in writing, by certified mail, return receipt requested, or by hand delivery, to the applicant or permit holder.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.311 Emergency suspension.

Notwithstanding any of the procedures set out in this chapter, the director or designee may immediately and without notice:

A. Suspend a permit at any time that insurance, or proof of self-insurance, if self-insurance is permitted by state law, required under this chapter lapses, terminates or is otherwise not in force. Such suspension shall remain in effect until satisfactory evidence is presented to the director or designee that the required insurance coverage is again in force or effect;

B. Suspend a permit at any time that the transportation for hire operating authority (THOA) expires or is renewed in time; or

C. Suspend, pending notification and a hearing, a particular vehicle from operating on airport property, in any situation in which the vehicle is in such condition as to pose an immediate threat to the health or safety of any person riding in said vehicle or any person using the airport. The suspension shall remain in effect until the unsafe or unhealthy condition has been corrected to the reasonable satisfaction of the director or designee.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.312 Hearing.

Any applicant or permit holder which receives notice pursuant to Section 14.16.310 or Section 14.16.311 of this chapter and wishes a hearing before the director or designee for reconsideration of his decision, shall forward a written request to the director or designee within ten days of notification of a decision adverse to the applicant or holder.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.313 Appeals.

Any applicant or permit holder may appeal the denial, suspension, or revocation of a permit after a hearing with the director of designee under this Article III, to the city manager as provided in this section.

1. Within ten business days of a hearing for reconsideration of a denial, suspension, or revocation under Section 14.16.312 above, the director, or designee, shall prepare a report indicating the reasons for the denial, suspension, or revocation and shall provide a copy to the applicant or permit holder. The director or designee's decision is final unless within ten business days from the date of receiving such report, the applicant or permit holder files with the city clerks a written appeal to the city manager specifying the reasons for the appeal. Said appeal shall also include a written rebuttal to the director's report.

2. The city manager or designee shall review the report and the appellant's rebuttal. The city manager or designee may allow the appellant to make an oral presentation or submit additional rebuttal. The city manager or designee shall make a ruling on the appeal within a reasonable period of time after the appeal has been filed.

3. The city manager or designee shall sustain, reverse or modify the action of the director or designee and shall notify the appellant of the decision in writing. The decision of the city manager or designee is final.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.314 Violation—Penalty.

A. A person commits an offense hereunder, if he:

1. Operates an off-airport car rental business or courtesy vehicle of such business at the airport without a permit; or

2. Forges, alters or counterfeits an off-airport rental car business permit; or

3. Possesses a forged, altered or counterfeit off-airport rental car business permit.

B. Any person committing an offense under this subsection shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030 of this Code.

C. Prosecution for an offense under this chapter does not prevent the use of other enforcement remedies or procedures, including injunctive relief, applicable to the person charged with the conduct involved in the offense.

D. If any provision of this chapter is held insufficient as the basis of criminal prosecution, as provided for herein, the same shall nevertheless be a ground for denial of an application, denial of renewal of a permit, or revocation or suspension of any license, permit or privilege issued under this chapter.
(Ord. No. 19007, § 1, 12-17-2019)

Article IV Ground Transportation Services

14.16.401 Statement of policy.

It is the policy of the city to provide and promote adequate and efficient ground transportation services at El Paso International Airport for the convenience of the public. To this end, the city has established a ground transportation system at the airport designed to control traffic congestion, protect the public health and safety, preserve the airport infrastructure, and provide beneficial and convenient ground transportation services to air carrier passengers and other users at the airport.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.402 Definitions.

In this article:

"Certificate of registration" or "registration" means a certificate of registration issued by the director under Section 14.16.405 of this article that authorizes the operation of a courtesy vehicle or transportation-for-hire vehicle at the airport.

"Concession contract" means a contractual agreement between the city and another person for the provision of car rental and parking services at the airport, under which the city receives a minimum monthly payment or percentage of the gross revenues received by the contractor for such services.

"Courtesy vehicle" means any vehicle used to offer or provide courtesy vehicle services.

"Courtesy vehicle service" means the provision of free transportation to customers by or for a business as an accessory to the main activities of the business.

"Decal" means a decal issued by the director under Section 14.16.406 of this article authorizing a courtesy vehicle or transportation-for-hire vehicle to be operated at the airport.

"Director" means the city's director of aviation or the director's designated representative, including the transportation coordinator.

"Driver" means an individual who drives or otherwise controls the physical movements of a courtesy vehicle or transportation-for-hire vehicle.

"Fixed-based operator" means a person who provides full-service aircraft maintenance, aircraft rental, passenger charter flight service, or fuel operations for compensation at the airport.

"Ground transportation service" means the business of operating a courtesy vehicle or transportation-for-hire vehicle at the airport for the purpose of dropping off or picking up passengers at the airport's terminal building or other areas of the airport.

"Ground transportation vehicle" means a courtesy vehicle or transportation-for-hire vehicle that is used for performing ground transportation service at the airport.

"Holder" means a person who is granted operating authority to perform ground transportation service at the airport, and includes any person with an ownership interest in the ground transportation service.

"Lawful order" means a verbal or written directive issued by the director in the performance of official duties in the enforcement of this article and any rules and regulations promulgated under this article.

"Operate" means:

1. To own, drive, or be in control of a ground transportation vehicle at the airport; or

2. To own or be in control of a ground transportation service provided at the airport.

"Operating authority" has the definition given that term in Title 6 of this Code.

"Operator" means:

1. The owner or driver of a ground transportation vehicle; or

2. The holder of operating authority to perform ground transportation service at the airport.

"Owner" means the person:

1. Who is the legal owner of a motor vehicle;

2. To whom a motor vehicle is registered by the state; or

3. Who is leasing a motor vehicle.

"Person" means an individual; corporation; government or governmental subdivision; or agency, trust, partnership, or two or more persons having a joint or common economic interest.

"Transportation coordinator" means the person designated by the director to oversee and manage the ground transportation service operations at the airport.

"Transportation-for-hire service" has the definition given that term in Title 6 of this Code.

"Transportation-for-hire vehicle" has the definition given that term in Title 6 of this Code.

"Transportation network company ("TNC") service" means transportation pre-arranged through a TNC's digital network between points chosen by the passenger. TNC service commences when a TNC driver accepts a transportation request via the digital network and concludes when the passenger exits the TNC vehicle. TNC service is not a taxicab service or available via street hail.

"Trip" means each time passengers are picked up at the airport by a ground transportation vehicle.

"Trip fee" means the monetary amount charged per trip to the owner or operator of a ground transportation vehicle in accordance with Section 14.16.407 of this article.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.403 General authority for enforcement.

A. The director shall implement and enforce this article and may promulgate and enforce written rules and regulations, not inconsistent with this article, governing the operation of ground transportation vehicles and ground transportation services at the airport as the director determines necessary to provide for the orderly, efficient, and convenient flow of traffic, to protect the public health and safety, and to manage the ground transportation system at the airport.

B. The director may issue lawful orders, not inconsistent with this article, as the director determines necessary to carry out duties under, or to affect the policy of, this article.

C. The transportation coordinator is authorized to enforce this article and all rules, regulations, and lawful orders promulgated or issued by the director under this article.

D. The director may use the director's full authority under federal, state, and local law, as well as TSA security directives, to direct, remove, or cause to be removed at the owner's expense from any restricted or reserved area, any roadway or right-of-way or other area on the airport premises, any vehicle which is: disabled, abandoned, illegally or improperly parked, or creating an airport operational issue. Any such vehicle may be removed or caused to be removed to an official vehicle impound area designated by the city. The city shall not be liable for damage to any vehicle or loss of personal property which might result from the act of removal.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.404 Defenses.

It is a defense to prosecution under this article that:

A. The motor vehicle was owned, operated, or leased by:

1. A nonprofit organization and being used to carry only passengers associated with that organization, if no compensation is received from any other person for carrying the passengers;

2. An employer or employee association and being used to transport employees between the employee's homes and the employer's place of business or between work stations;

3. An air freight or cargo company utilizing air cargo terminals at the airport;

4. A fixed-based operator and being used to transport employees or customers at the airport;

5. The federal or state government or a political subdivision of the state; or

6. A school, university, organ donor company, medical service provider, or ambulance service; or

7. The ground transportation vehicle was licensed by another governmental entity and was transporting a passenger from a point outside the city to a destination inside the airport, if the ground transportation vehicle leaves the airport without receiving a passenger inside the airport.
(Ord. No. 19007, § 1, 12-17-2019)

14.16.405 Ground transportation service requirements.

A. A person commits an offense if he:

1. Performs ground transportation service at the airport without being authorized under a current, valid certificate of registration issued under Section 14.16.406 of this article; or

2. Performs transportation-for-hire service at the airport or operates a transportation-for-hire vehicle at the airport without current, valid transportation for hire operating authority under Title 6 of this Code; or

3. Violates the requirements of this Section 14.16.405.

B. All vehicles shall be no more than ten model years old. Further, the vehicle while in service shall be kept in a clean condition, free of foreign matter and of offensive odors. There shall be no litter in the vehicle or trunk or on floor mats and the upholstery and floor mats shall be kept clean and without holes or large wear spots. The vehicle shall be free from damaged fenders and body, defective paint and other conditions. All vehicles shall comply with airport, local, state and federal motor vehicle codes ordinances, regulations, statutes, standards and/or directives with respect to inspection, safety and operation of vehicles.

C. While on duty driver shall:

1. Conduct himself in a reasonable, prudent and courteous manner;

2. Maintain a sanitary and well-groomed appearance;

3. Not consume alcoholic beverages, controlled substances, or other substances which could adversely affect his ability to drive a motor vehicle;

4. Not "cruise" the airport roadways for the purpose of advertising its services or soliciting fares or passengers;

5. Obey the lawful orders and directions of all airport law enforcement personnel, any state or local law enforcement officer, and all airport officials who display proper identification;

6. Comply with posted speed limits and traffic control signs;

7. Not engage in any criminal activity; and

8. Have a valid driver's license.

D. Drivers of ground transportation vehicle shall remain in (or with) their vehicles and shall not park or leave a vehicle unattended at any curb. Unattended vehicles may be cited and removed. If drivers must park or leave their vehicles unattended, they shall park in the public parking lot or garage subject to the posted rates.

E. A driver, representative, employee, agent or operator shall not deceive or attempt to deceive the public through false or misleading representations concerning its prices or services or those of other operators.

F. Operators and drivers shall not offer or give tips, gratuities or payments of any kind to employees or agents of the city, airlines or any other business entity operating at the airport.

G. Operators and drivers shall not interfere with airport operations or activities, nor shall operators and drivers interfere with the city, or airline employees or agents in the performance of their duties.

H. Operators and drivers shall only pick up passengers in locations specifically designated for such purposes. Designated pick-up, drop-off, cueing, loading and unloading areas are subject to change from time to time, as necessary in the judgment of the director to advance the safety, security and/or convenience of airport operations.

I. Operators and drivers shall procure and maintain insurance coverage by financially responsible and qualified companies eligible to do business in the State of Texas in an amount and form that is satisfactory to the city.

J. Operators and drivers shall not perform any maintenance or repairs to their vehicles on airport property, except in an emergency to make the vehicle immediately operable. Operators and/or drivers shall pay or reimburse the city upon demand for any cleanup costs incurred by the city, caused by or relating to the operator's or driver's conduct or omission.

(Ord. No. 19007, § 1, 12-17-2019)

14.16.406 Registration of ground transportation service at the airport.

A. Registration Required; Application. To obtain a ground transportation service certificate of registration, a person must submit an application to the director on a form provided for that purpose. The applicant must be the person who will own or operate the proposed ground transportation service. The registration application must include or be accompanied by:

1. For transportation-for-hire vehicles, proof of current, valid transportation for hire operating authority permit issued by the city under Title 6 of this Code;

2. An annual registration fee in the amount specified in the City of El Paso Annual Approved Budget—Schedule C of the current fiscal year; and

3. Any other information requested by the director that is reasonably necessary to determine the qualifications of the applicant to perform ground transportation service at the airport.

B. Issuance and Denial of Registration.

1. The director shall issue a certificate of registration to the applicant, unless the director determines that the applicant:

a. Failed to comply with the requirements for receiving a certificate of registration;

b. Failed to submit a complete registration application;

c. Made a false statement as to a material matter on or in connection with the registration application;

d. Had a ground transportation service certificate of registration revoked within the twenty-four months preceding the date of application; or

e. Owes the city money relating to the operation of ground transportation service at the airport.

2. If the director approves the registration application, the applicant will receive a ground transportation service certificate of registration for each vehicle authorized to be operated in the ground transportation service. A certificate of registration and all accompanying decals must be renewed in accordance with the application procedures set forth in this section.

3. If the director determines that a certificate of registration should be denied, the director shall notify the applicant in writing that the application is denied and include in the notice the reason for the denial and a statement informing the applicant of the right of appeal.

C. Suspension or Revocation of Registration.

1. The director may suspend or revoke a certificate of registration if the director determines that:

a. The holder made a false statement as to a material matter on or in connection with the registration application;

b. The holder, or any operator of a courtesy vehicle or transportation-for-hire vehicle authorized under the holder's registration, failed to pay any fee required by this article at the time or in the manner required by this article or approved by the director;

c. The holder, or any operator of a courtesy vehicle or transportation-for-hire vehicle authorized under the holder's registration, failed to comply with any provision of this article or any rule, regulation, or lawful order promulgated or issued by the director under this article, including without limitation the requirements in Section 14.16.405.

2. The director may suspend the certificate of registration of a ground transportation service for a period not to exceed sixty days. The director may apply the suspension to all of the holder's courtesy vehicle or transportation-for-hire vehicle operations at the airport or limit the suspension to the particular courtesy vehicle or transportation-for-hire vehicle operator listed on the holder's certificate of registration who is responsible for creating the grounds for the suspension. At the end of the suspension period, the holder or the courtesy vehicle or transportation-for-hire vehicle operator, whichever applies, may resume providing courtesy vehicle or transportation-for-hire vehicle service at the airport after providing verification to the director that any deficiency for which the suspension was given has been corrected within the suspension period. Failure to correct a deficiency within the time period established by the director may result in revocation of the holder's certificate of registration.

3. The director shall notify the holder in writing of any suspension or revocation under this section. The director shall include in the notice the reason for the suspension or revocation, the scope of the suspension, the date the director orders the suspension or revocation to begin, the duration of any suspension, and a statement informing the holder and any suspended courtesy vehicle or transportation-for-hire vehicle operator of the right of appeal. The period of suspension or revocation begins on the date specified by the director or, in the case of an appeal, on the date ordered by the permit and license appeal board.

4. If the director denies issuance or renewal of a ground transportation service certificate of registration, suspends or revokes a holder's certificate of registration, or suspends the authority of a courtesy vehicle or transportation-for-hire vehicle operator to operate at the airport under a holder's certificate of registration, the applicant, holder, or courtesy vehicle or transportation-for-hire vehicle operator, whichever applies, shall immediately cease any ground transportation service at the airport and shall promptly surrender and remove any registration decal from any motor vehicle used to perform ground transportation service at the airport.

5. A holder whose certificate of registration has been revoked is not eligible to reapply for another ground transportation service certificate of registration before the expiration of twenty-four months after the date of revocation or, in the case of an appeal, the date the permit and license appeal board affirms the revocation.

D. Appeal of Denial, Suspension, or Revocation. Any person whose application for issuance or renewal of a ground transportation service certificate of registration is denied by the director, any holder whose certificate of registration has been revoked or suspended by the director, or any courtesy vehicle or transportation-for-hire vehicle operator whose authority to operate at the airport under a holder's certificate of registration has been suspended by the director may file an appeal in accordance with Section 6.04.320 of this Code. (Ord. No. 19007, § 1, 12-17-2019)

14.16.407 Fees.

A. A person performing ground transportation service at the airport shall adhere to the following regulations:

1. No vehicle may be used to provide transportation-for-hire services without a valid certificate of registration under this article.

2. A vehicle registration expires one year from the date it is issued.

3. Annual registration fee. The annual registration fee for ground transportation service is listed in the City of El Paso Annual Approved Budget—Schedule C of the current fiscal year.

4. An airport trip fee for transportation network companies (TNC) listed in the City of El Paso Annual Approved Budget—Schedule C of the current fiscal year.

B. The director shall establish rules and regulations governing the time and manner in which the fees required by this section must be paid.

C. All revenues arising out of ground transportation services at the airport shall be retained by the airport enterprise fund for airport use only. (Ord. No. 19007, § 1, 12-17-2019)

Chapter 14.20

AIRPORT VEHICULAR TRAFFIC REGULATIONS

Sections:

Article I Operation of Vehicles on Landing and Apron Areas

14.20.010 Application of provisions—Definitions.

14.20.020 Licenses required for vehicle and driver.

14.20.030 Movement area permission required.

14.20.040 Obedience to traffic regulations.

14.20.050 Prohibitions.

14.20.060 Airport ground control light signals.

14.20.070 Radio and other required equipment.

14.20.080 Vehicles transporting explosives.

14.20.090 Ground vehicles to yield right-of-way to aircraft—Exception.

14.20.100 Vehicles to yield right-of-way to pedestrians and aircraft.

14.20.110 Operation, parking, stopping of vehicles—Director's authority.

14.20.120 Parking in a T-hangar or adjacent paved areas.

14.20.130 Parking of apron vehicles and equipment.

14.20.140 Parking of fueling vehicles.

14.20.150 Exclusion of vehicles by director or designee.

Article II Operation of Vehicles Outside Landing and Apron Areas

14.20.160 Application of provisions.

14.20.170 Operation of ground vehicles in designated areas.

14.20.180 Manner of operation of ground vehicles.

Article III Air Operations Area (AOA)

14.20.190 Defined.

14.20.200 Traffic signs—Placement.

14.20.210 Traffic signs—Obedience required.

14.20.220 Speed limit.

14.20.230 Exclusions from application of article.

Article IV Parking

14.20.240 Regulations.

Article I Operation of Vehicles on Landing and Apron Areas

14.20.010 Application of provisions—Definitions.

A. The rules and regulations of this article shall apply to the operation of ground vehicles, other than aircraft, on the landing and apron areas of the airport.

B. "Movement area" means the runways and taxiways for aircraft and the areas between and adjacent to the runways and taxiways.

C. "Apron" means the area used for the loading or unloading of aircraft passengers or cargo and the fueling or servicing of aircraft.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.020 Licenses required for vehicle and driver.

No person shall operate any ground vehicle on the movement or apron areas unless such person is licensed to operate such ground vehicle and passed the requisite training for ramp and/or movement area driving privileges, or unless such ground vehicle is licensed for operation or is specially authorized for operation on airport property only.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.030 Movement area permission required.

No person shall operate any ground vehicle on the movement areas without first obtaining permission from the director or designee, and without having a properly equipped vehicle, demonstrated need, and driving competency evaluation as determined by the director or designee. All persons shall additionally obtain permission from the air traffic control tower before entering the movement area.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.040 Obedience to traffic regulations.

Every person operating a ground vehicle on the movement area or apron areas shall obey the lawful order, signal or direction, by voice, hand or otherwise, of the air traffic control tower and operations personnel or of any airport guard or policeman.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.050 Prohibitions.

A. No person shall operate any ground vehicle on the air operations area, as defined in Section 14.20.190, unless authorized to do so by the director or designee. No person shall operate any ground vehicle on the landing field except in accordance with rules and regulations promulgated by the director or designee.

B. No person shall operate any ground vehicle on any part of the landing field, in a negligent manner or while the operator is under the influence of alcoholic beverages, legal, illegal or over-the-counter medications, or when the vehicle is in an unsafe condition or equipped or loaded so as to endanger persons or property or in a manner unsafe for weather or ground surface conditions.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.060 Airport ground control light signals.

All persons on the movement area shall obey the following air traffic control tower light gun signals if/when issued in the absence of positive communication with a properly-functioning radio.

Color and/or Pattern of Light Gun Signal	Meaning
Red	Stop
Flashing red	Clear runway immediately
Green or flashing green	Proceed
Alternating red and green	Use extra caution
Flashing white	Return to apron

(Ord. No. 19007, § 1, 12-17-2019)

14.20.070 Radio and other required equipment.

No person shall operate any ground vehicle on the movement area unless such ground vehicle is equipped with two-way radio in operating condition, displays in daylight hours a checked flag at least three feet square with checks on each side at least one foot square and colored international orange and white, and during hours of darkness, displays an amber overhead light of the design designated by the city for emergency vehicles.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.080 Vehicles transporting explosives.

No person shall operate, stop or park on the movement area or apron any ground vehicle transporting any explosives or hazardous materials, nitroglycerin, black powder, fireworks, blasting caps or other explosives, gasoline, alcohol, ether, liquid shellac, kerosene, turpentine, formaldehyde or other flammable or combustible liquids, ammonium nitrate, sodium chlorate, wet hemp, powdered metallic magnesium, nitrocellulose film, peroxides or other flammable solids or oxidizing materials, hydrochloric acid, sulfuric acid or other corrosive liquids, prussic acid, phosgene, arsenic, carbolic acid, potassium cyanide, tear gas, lewisite, or any other poisonous substance, liquid or gas or any compressed gases, or any radioactive article, substance or material, at such time or place or in such manner or condition as to endanger unreasonably or as to be likely to endanger unreasonably persons or property.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.090 Ground vehicles to yield right-of-way to aircraft—Exception.

All ground vehicles, including emergency response vehicles, responding to an emergency/alert shall yield the right-of-way to any aircraft in motion. All aircraft shall hold their positions during an emergency unless otherwise directed by the air traffic control tower.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.100 Vehicles to yield right-of-way to pedestrians and aircraft.

Pedestrians and aircraft shall at all times have right-of-way over vehicular traffic. All ground vehicles shall pass to the rear of taxiing aircraft or under tow. When passengers are boarding or debarking from aircraft at the terminal, no ground vehicle shall be driven on the apron areas between the aircraft and its loading gate.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.110 Operation, parking, stopping of vehicles—Director's authority.

No person shall operate, park or stop any ground vehicle in any aircraft parking area, landing area or apron area, except as authorized by the director or designee.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.120 Parking in a T-hangar or adjacent paved areas.

Short-term vehicle parking is allowed within T-hangars while the aircraft is out. Ground vehicles may be parked on the pavement adjacent to the T-hangar only when the tenant is present, provided taxiway access is not blocked. A ground vehicle may not be left unattended outside the T-hangar at any time.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.130 Parking of apron vehicles and equipment.

Apron ground vehicles and equipment when not in use shall be parked in the areas designated by the director or designee for such use.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.140 Parking of fueling vehicles.

No person shall park any ground vehicle designed for fueling within fifty feet of any building. Fueling ground vehicles should be parked no closer than ten feet to each other.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.150 Exclusion of vehicles by director or designee.

The director or designee is authorized to exclude from the airport, permanently or for a limited time, any ground vehicle violating this article, or unsafe ground vehicle, and any other ground vehicle belonging to the same owner or operated by the same operator.
(Ord. No. 19007, § 1, 12-17-2019)

Article II Operation of Vehicles Outside Landing and Apron Areas

14.20.160 Application of provisions.

This article applies to the operation of ground vehicles on parts of the airport that are not public streets or highways.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.170 Operation of ground vehicles in designated areas.

No person shall operate any ground vehicle on the area described in Section 14.20.160 without permission of the director or designee, except on such driveways, parking areas or other areas as are designated by signs or markings for such operation, in which case the operator shall comply with any directions, instructions or limitations given by such signs or markings.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.180 Manner of operation of ground vehicles.

No person shall operate any ground vehicle on the area described in Section 14.20.160 negligently, or in such manner as to collide with or damage any structure, fixture, vehicle or other property.
(Ord. No. 19007, § 1, 12-17-2019)

Article III Air Operations Area (AOA)

14.20.190 Defined.

The term "air operations area" or "AOA" as used in this article is as defined in 49 CFR Part 1540, and as more particularly described in the most current airport security program.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.200 Traffic signs—Placement.

The director or designee is authorized to designate such areas and roads within the AOA as are suitable for the movement or parking of ground vehicles, considering the convenience and safety of aircraft and ground vehicles and of the public, and to mark such areas and roads with appropriate traffic signs.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.210 Traffic signs—Obedience required.

No person shall operate or park any vehicle, other than aircraft, upon any part of the airfield or AOA not designated and marked for the use of ground vehicles, as provided in Section 14.20.200.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.220 Speed limit.

A. No person shall operate any ground vehicle (except an emergency response ground vehicle when responding to an emergency/alert), other than aircraft, at a speed greater than fifteen miles per hour while within the parking and loading areas, five miles per hour when within twenty feet of an aircraft, or thirty miles per hour while in the AOA. Additionally, aircraft shall not be towed at more than five miles per hour.

B. Emergency ground vehicles while on emergency runs and official airport ground vehicles being used in the performance of official duties are excluded from this section; however, such ground vehicles shall at all times be operated in accordance with the provisions of Section 14.20.050(A).

C. For the purpose of this section, the FAA movement area is defined as runways, taxiways and other areas of the airport that are used for taxiing, takeoff and landing of aircraft, exclusive of loading aprons and aircraft parking areas; and the air operation area is defined as all areas not open to the public, including landing areas, apron areas, aircraft parking and storage areas and hangars, except to the extent that any part of the air operation area, as defined in this subsection, is within the FAA movement area.
(Ord. No. 19007, § 1, 12-17-2019)

14.20.230 Exclusions from application of article.

This article does not apply to police ground vehicles, firefighting equipment, and ambulances operating under permits of the Texas Department of State Health Services, ambulances operated by the United States government or its agencies, or ground vehicles of the airport, while operated in the performance of duty.
(Ord. No. 19007, § 1, 12-17-2019)

Article IV Parking

14.20.240 Regulations.

A. No person shall stop or park a motor vehicle at the airport except in the areas specifically established for stopping or parking by signs or markings.

B. No person shall stop or park a motor vehicle in front of the terminal building except for the loading and unloading of passengers and baggage for a period of no longer than three minutes; and no person shall leave his vehicle unattended.

C. Each vehicle parking within either the short-term or long-term parking lots shall pay a fee for such use. The fee shall be calculated according to the length of time that the vehicle has occupied the lot. No fee shall be assessed to veterans with disabilities, Purple Heart recipients, Pearl Harbor survivors, former prisoners-of-war, Congressional Medal of Honor recipients, or surviving spouses of disabled veterans for up to five consecutive days in the short-term parking lot. No fee shall be assessed to veterans with disabilities,

Purple Heart recipients, Pearl Harbor survivors, former prisoners-of-war, Congressional Medal of Honor recipients, or surviving spouses of disabled veterans in the long-term parking lot. The exemption from payment is granted at the time of the charge only by or for the transportation of such person who registered the vehicle and while displaying the applicable license plate as issued by the State of Texas or New Mexico.

D. Cell phone lots are established for the temporary parking of vehicles. The driver of the vehicle must remain with the vehicle while it is parked within a cell phone lot. Vehicles shall not occupy the cell-phone lots in excess of two hours, and shall obey all posted signage.

E. All vehicles operating for TNCs shall park only in the designated cell phone lot.

(Ord. No. 19007, § 1, 12-17-2019; Ord. No. 019552, § 1, 11-7-2023)

Chapter 14.24

COMMERCIAL AIR CARRIERS RATES AND CHARGES

Sections:

14.24.020 Applicability—Compliance required.

14.24.030 Landing fees, fuel flowage, and airline reporting procedures.

14.24.040 Terminal rentals.

14.24.050 Equipment parking rentals.

14.24.060 Security screening fee.

14.24.070 Apron use fee.

14.24.080 Parking facilities.

14.24.090 Airline equipment charges.

14.24.100 Gate use fee per turnaround.

14.24.110 International arrivals areas charges.

14.24.120 Other charges and fees, including non-signatory air carrier—Parking fee, remain overnight.

14.24.130 Daily cargo parking and building use fee.

14.24.140 Delinquent payments.

14.24.020 Applicability—Compliance required.

A. The provisions of this chapter do not apply to commercial air carriers that are signatory to an airline operating or terminal building lease agreement (collectively a "signatory agreement") with the city.

B. As a condition precedent to the right of any commercial air carrier to use the airport, the carrier shall comply with all rules and regulations promulgated by the director or designee and all ordinances of the city. Any provision in the permit, lease, or agreement inconsistent with any general provision of this title shall control over that provision of this title. Each such carrier shall be deemed to have consented to giving the director or designee access to the carrier's books, at all reasonable times, in person or by agent, to examine the records of the carrier for purposes of validating information required to be reported by the carrier to the airport under this chapter.

C. If a commercial airline carrier does not have a signatory agreement with the city, then the commercial airline carrier will be charged one hundred twenty-five percent of the most recent fees in the most recent rates and charges document prepared as per the current signatory agreement. (Ord. No. 19007, § 1, 12-17-2019)

14.24.030 Landing fees, fuel flowage, and airline reporting procedures.

A. Each aircraft operating under F.A.R. Parts 121 and 135 shall pay airport landing fees as set forth in the respective airline agreement ("signatory agreement"), or if not a party to a signatory agreement, one hundred twenty-five percent of the rates charged within the most recent signatory agreement. Such fees do not apply to flights which depart from the airport and return for emergencies, weather, or other reasons without landing at another airport.

B. In tabulating weights, the weights of each aircraft shall be the certified maximum gross landing weight as computed by the manufacturer and the Federal Aviation Administration. If the exact certified maximum gross landing weight cannot be determined, the air carrier may refer to the Burns & McDonnell Aircraft Characteristics book to report landing weight.

C. An air carrier operator that does not have a signatory agreement on file with the El Paso International Airport shall pay a non-signatory premium of one hundred twenty-five percent of terminal and landing fees as set forth in the most current annual airlines rates and charges.

D. Any person, corporation, partnership, association, or business entity of any kind who brought fuel to a fuel storage tank or who brought fuel obtained from a source not on the airport directly into any aircraft on the airport must pay the fuel flowage charge as established in Schedule C of the city's annual budget resolution, as

amended, unless otherwise determined in any respective, executed lease agreement with the city. Military aircraft conducting operations which require fueling from U.S. Government facilities and aircraft that operate under F.A.R. Parts 121 and 135 and were assessed a landing fee are exempt from fuel flowage fees.

E. As a condition precedent to the right to use and occupy the airport, each commercial air carrier shall furnish to the director or designee a report, duly certified as true and correct by the person delegated by the carrier as its official representative having custody of its records, containing the number of its flights which have landed at the airport during the preceding month, together with the manufacturer, type and landing weight of each of its aircraft landing at the airport; the volume of cargo, mail and express carried; and the number of enplaning and deplaning passengers on its flights during said month by the tenth day of each next subsequent month unless otherwise outlined in a signatory agreement. The director or designee shall have the right to prescribe and furnish forms for the making of all reports required to be made by this subsection. Any carrier under reporting or failing to report is subject to reimbursing the airport any amounts due, including interest and administrative costs.

F. After receipt of the report specified in subsection E of this section or as soon thereafter as practicable, the director or designee shall send an invoice to each commercial air carrier making a report. Payment by the carrier shall be made within thirty days of the date of the invoice unless otherwise outlined in a signatory agreement.

G. It is unlawful and a violation of this chapter for any person to operate an aircraft of a commercial air carrier unless it provides assurance satisfactory to the director or designee that the fees prescribed in this section have been or will be paid.

(Ord. No. 19007, § 1, 12-17-2019)

14.24.040 Terminal rentals.

A. Any regularly scheduled service airline (Part 121 and Part 135) operating from the terminal must sign a signatory or non-signatory agreement. Terminal rental fees shall be determined per the rates and charges document for that fiscal year or on a per diem basis.

B. Non-signatory operators, or airline operators with irregular or seasonal operations, within the terminal shall pay the non-signatory rate as determined by the rates and charges document for that fiscal year.

(Ord. No. 19007, § 1, 12-17-2019)

14.24.050 Equipment parking rentals.

Commercial air carriers shall pay the city as rent for its preferentially assigned equipment parking areas per square foot per year as determined by the rates and charges listed in Schedule C of the city's annual budget resolution, as amended.

(Ord. No. 19007, § 1, 12-17-2019)

14.24.060 Security screening fee.

Commercial air carriers shall pay the city amounts sufficient to reimburse the city for its appropriate share of the city's actual cost, plus an allowance for administrative overhead, of providing armed law enforcement support for the security screening operation as required by 49 CFR, Part 1540, 1542, and 1544. The cost of such services shall be apportioned among airlines using the secured passenger boarding areas on the basis of the share which each airline's enplaned passengers bears to the total enplaned passengers of all such airlines for such month. City shall invoice commercial air carriers monthly for such fee.

(Ord. No. 19007, § 1, 12-17-2019)

14.24.070 Apron use fee.

Commercial air carriers shall pay an apron use fee in equal monthly installments for the use of each aircraft parking position preferentially assigned to each commercial air carrier (at the passenger terminal or in cargo areas). An annual fee shall apply for each preferentially assigned aircraft parking position. Commercial air carriers shall pay a gate use fee on a per use basis for the use of common use aircraft parking positions.

(Ord. No. 19007, § 1, 12-17-2019)

14.24.080 Parking facilities.

Employees working for a tenant in the airport terminal will be provided access to vehicular parking facilities, if available, in common with other employees. Such facilities shall be located in an area designated by the director or designee. The airport reserves the right to assess a reasonable charge to tenants or its employees for such employee parking facilities.

(Ord. No. 19007, § 1, 12-17-2019)

14.24.090 Airline equipment charges.

Commercial air carriers shall pay amounts sufficient to amortize their appropriate share of the cost of equipment and tenant finishes financed by the city, including applicable maintenance and operating expenses. city shall invoice commercial air carriers for such charges.

(Ord. No. 19007, § 1, 12-17-2019)

14.24.100 Gate use fee per turnaround.

Commercial air carriers that are not parties to a signatory agreement must pay the airport a passenger gate use fee for each use of a city airport gate to any loading bridge per turnaround in the amount set by Schedule C of the city's annual budget resolution, as amended or other duly authorized resolution of city council.

(Ord. No. 19007, § 1, 12-17-2019; Ord. No. 19083, § 1, 8-18-2020)

Editor's note—Ord. No. 19083, § 1, adopted Aug. 18, 2020, changed the caption of Sec. 14.24.100 from "Loading bridge charge" to "Gate use fee per turnaround."

14.24.110 International arrivals areas charges.

Commercial air carriers shall pay a charge per deplaning passenger for the use of the common-use international arrivals area as outlined in Schedule C of the city's annual budget resolution, as amended.

(Ord. No. 19007, § 1, 12-17-2019)

14.24.120 Other charges and fees, including non-signatory air carrier—Parking fee, remain overnight.

Commercial air carriers that are not parties to a signatory agreement must pay to the airport the fees set by Schedule C of the city's annual budget resolution, as amended, or other duly authorized resolution of city council to include a parking fee for each aircraft that is parked and remains overnight at the airport.

(Ord. No. 19007, § 1, 12-17-2019; Ord. No. 19083, § 2, 8-18-2020)

Editor's note—Ord. No. 19083, § 2, adopted Aug. 18, 2020, changed the caption of Sec. 14.24.120 from "Other charges and fees" to "Other charges and fees, including non-signatory air carrier—Parking fee, remain overnight."

14.24.130 Daily cargo parking and building use fee.

Commercial air carriers that are not parties to a signatory agreement must pay to the airport the daily fee for use of any airport cargo building, and a parking fee per turnaround for aircraft parking on the cargo ramp in the amounts set by Schedule C of the city's annual budget resolution, as amended, or other duly authorized resolution of city council.

(Ord. No. 19132, § 1, 1-14-2021)

14.24.140 Delinquent payments.

Any fee, charge, rate, rental or other payment, whether due under written agreement, the provisions of this chapter or otherwise, shall be paid as of the established due date. Rentals for the exclusive use of terminal space and for preferentially assigned gate use fees shall be paid monthly in advance on the first day of each month. Payment for all other rentals, fees and charges shall be due within thirty days of the date of the invoice. Any portion of such fee, charge, rate, rental or other payment which remains unpaid after the established due date shall bear interest at either eighteen percent, or the highest rate available by law, whichever is greater, per calendar month or fraction thereof during which the payment remains unpaid. Failure to pay any past due amounts will result in loss of privilege in addition to any other remedies available at law.

(Ord. No. 19007, § 1, 12-17-2019)

PUBLIC UTILITIES GENERALLY

Sections:

15.04.010 Facts and evidence at hearings—Tendering sufficiently to support fact findings.
15.04.020 Facts and evidence at hearings—Tendering sufficiently to support claims relevant to rates.
15.04.030 Facts and evidence at hearings—Tendering prior to tendering to court.
15.04.040 Facts and evidence at hearings—Failure to tender.
15.04.050 Facts and evidence at hearings—Rate order binding with or without.
15.04.060 Facts and evidence at hearings—Rate order effective regardless of petition to tender.
15.04.070 Cost of investigation—Utilities responsibility to pay.
15.04.080 Cost of investigation—Submission of statements required—Notice of filing and hearing.
15.04.090 Cost of investigation—Examining statement at hearing—Time for payment.
15.04.100 Cost of investigation—Maximum annual amount.
15.04.110 Cost of investigation—Interest on unpaid amount.
15.04.120 Use of ducts—Permitting city to use those existing.
15.04.130 Use of ducts—Constructing for city.
15.04.140 Books, records and accounts—Maintenance of required.
15.04.150 Books, records and accounts—Refusal to maintain—Forfeiture of franchise.
15.04.160 Books, records and accounts—Refusal to maintain—Penalty.
15.04.170 Meter reading to be furnished customer.
15.04.180 Permit to turn utility on required.
15.04.190 Consent required to attach telephone apparatus to poles.
15.04.200 Permit to interfere with pipes required.

15.04.010 Facts and evidence at hearings—Tendering sufficiently to support fact findings.

Public utilities, after due notice, and on hearing before the city council in matters of regulation, including the setting of rates or charges for public utility service, shall tender in evidence data, facts and information necessary to the determination of fact findings supporting such rate or regulatory order. (Prior code § 21-1)

15.04.020 Facts and evidence at hearings—Tendering sufficiently to support claims relevant to rates.

Public utilities shall tender at hearings on rate matters, evidence on the reasonableness of all claims relied upon by them in connection with the rate base, expenses, revenues depreciation, rate of return, all appropriate allocations thereof, inter-related corporate transactions, and other necessary factors and elements constituting the basis of a rate order. (Prior code § 21-2)

15.04.030 Facts and evidence at hearings—Tendering prior to tendering to court.

Public utilities shall first exhaust the administrative remedy afforded them and assist the city council to exhaust the administrative function involved, by first tendering, on hearing before the city council, such evidence prior to tendering it to any court on appeal in contesting the validity of any rate or regulatory order promulgated pursuant to the hearing. (Prior code § 21-3)

15.04.040 Facts and evidence at hearings—Failure to tender.

Upon failure of any public utility to make available evidence as provided herein, the administrative function shall not have been exhausted, and it shall be precluded from thereafter submitting such evidence to the city council in the same cause at any extended or subsequent hearing, except pursuant to good cause shown, as, for the introduction of newly discovered evidence not initially introduced through no fault of the utility. (Prior code § 21-4)

15.04.050 Facts and evidence at hearings—Rate order binding with or without.

A rate order of the city council, which without regard to evidence the public utility failed to tender on hearing, is reasonable, shall be conclusively binding on the public utility. (Prior code § 21-5)

15.04.060 Facts and evidence at hearings—Rate order effective regardless of petition to tender.

A rate order of city council shall be operative as of the date of its passage, and its effectiveness shall not be suspended by extended or subsequent hearings held on petition of the public utility for the purpose of tendering evidence which it theretofore failed to tender, notwithstanding an opportunity to do so. Such order shall continue operative until it shall have been duly amended pursuant to additional or amended findings of the city council. (Prior code § 21-6)

15.04.070 Cost of investigation—Utilities responsibility to pay.

Whenever the city council, in a proceeding upon its own motion, upon complaint, or upon application to it, shall deem it necessary and proper, in order to carry out the powers and duties granted and imposed upon it by the laws of the state and Charter and ordinances of the city, to investigate the operations, service, practices, accounting records, rates, charges and regulations of a public utility, or to make valuations or revaluation of the property of any public utility, and when such finding of necessity and propriety by the city council shall be reasonable and warranted by existing facts and conditions, such public utility shall be charged with and pay to the city the actual cost of such investigation, valuation or regulation, including the compensation of persons temporarily employed for such purposes, as are reasonably attributable to such investigation, valuation or regulation. (Prior code § 21-7)

15.04.080 Cost of investigation—Submission of statements required—Notice of filing and hearing.

The city comptroller shall prepare and submit to the city council an itemized statement of such actual cost of such investigation, valuation or regulation. The city council shall, either at the conclusion of the investigation, valuation or regulation, or from time to time during its progress, cause notices to be served upon such public utility of the submission and filing of such itemized statement, and of a hearing to be held thereon, which such notice shall state the time and place of such hearing. (Prior code § 21-8)

15.04.090 Cost of investigation—Examining statement at hearing—Time for payment.

At such hearing the city council shall examine the itemized statement filed and submitted by the city comptroller, shall accord the representatives of such utility a full and fair hearing concerning the accuracy and reasonableness of such itemized statement, and shall determine and fix by resolution the actual costs of such investigation, valuation or regulation to be paid by such public utility for each calendar year. Such public utility shall pay the amount of such actual costs within thirty days from the date of such resolution. (Prior code § 21-9)

15.04.100 Cost of investigation—Maximum annual amount.

The total amount which may be charged by the city to any public utility under authority of Sections 15.04.070, 15.04.080, 15.04.090 and 15.04.110 in any calendar year shall not exceed two percent of such public utility's gross operating revenues derived from local, intrastate utility operations in the last preceding calendar year. (Prior code § 21-10)

15.04.110 Cost of investigation—Interest on unpaid amount.

The amount assessed against a public utility under Sections 15.04.070 through 15.04.100 not paid within thirty days from the date of the resolution fixing such assessment shall draw interest at the rate of six percent per annum until paid. (Prior code § 21-11)

15.04.120 Use of ducts—Permitting city to use those existing.

All public utilities operating within the city shall permit the city to use, free of charge, any existing ducts constructed under the streets and sidewalks of the city not now used by the utility, and shall likewise permit the city to use, free of charge, any ducts of such utility where same does not interfere with the use now made of such ducts by utilities. (Prior code § 21-12)

15.04.130 Use of ducts—Constructing for city.

Hereafter any utility operating within the city which constructs underground ducts for conducting wires, shall at the same time construct for the use of the city, and without any charge whatsoever to the city, one additional duct of the same dimension as those used by the utility; and for such duct so constructed for the city, the city shall be required to pay no charge or rental, and such duct shall be maintained by the utility without any cost to the city. (Prior code § 21-13)

15.04.140 Books, records and accounts—Maintenance of required.

In order to aid and assist the city council in the performance of its duty in regulating public utilities which operate within the city and the rates charged by them, every person engaged in business as a public utility within the city shall keep and maintain at all times within the city, either the original or true copies of all books, records and accounts kept by such utility in anywise relating to the properties, operation and annual revenues and expenses of such utility in the city, and necessary or proper for consideration in fixing valuations for determining rates and the amount of return on utilities' investments serving the city. (Prior code § 21-14)

15.04.150 Books, records and accounts—Refusal to maintain—Forfeiture of franchise.

Refusal of any person engaged in business as a public utility, to keep and maintain in the city books, records and accounts as required in Section 15.04.140 shall constitute a ground of forfeiture of the franchise granted such person by the city and all rights and privileges acquired thereunder, and the city council shall have the power upon such refusal to declare by resolution or ordinance such forfeiture and suit may be instituted by the city in a court of competent jurisdiction for the purpose of having such forfeiture judicially declared. (Prior code § 21-15)

15.04.160 Books, records and accounts—Refusal to maintain—Penalty.

In addition to the refusal to comply with the terms of Sections 15.04.140 and 15.04.150 constituting a ground for forfeiture of the franchise as aforesaid, any person or corporation violating any provision of Sections 15.04.140 and 15.04.150 shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not less than one hundred fifty dollars and not more than two hundred dollars for each violation, and each day that such person refuses to

keep and maintain the books, records and accounts required in Section 15.04.140 shall constitute a separate offense. (Prior code § 21-16)

15.04.170 Meter reading to be furnished customer.

Every person supplying gas or electric light or power within the city shall, when the customer is furnished through a meter and at a meter rate, give to the consumer on monthly bills rendered, a true statement of the reading of the meter at the beginning of the period which the bill covers, as well as at the end thereof, in plain and intelligible words and figures. (Prior code § 21-18)

15.04.180 Permit to turn utility on required.

No person shall turn on the water, gas or electricity supply for any person from whom the supply has been turned off by the supplier without first obtaining a permit to do so from the supplier. (Prior code § 21-19)

15.04.190 Consent required to attach telephone apparatus to poles.

No person shall attach any wireless telephone or telegraph apparatus, wire, metal, wood or other substance to any telegraph, telephone, electric light, electric railway or power wire, crossarm or pole or its attachments belonging to another person, without the consent of such person given in writing. (Prior code § 21-17)

15.04.200 Permit to interfere with pipes required.

No person, not duly authorized by the city, shall in any way interfere with any main or service pipes of a person supplying water or gas, without first obtaining a permit from the supplier. (Prior code § 21-20)

Chapter 15.08

STREET RENTALS

Sections:

15.08.010 Purpose.

15.08.011 Definitions.

15.08.012 Application for franchise.

15.08.013 Assignment of franchise.

15.08.014 Falsification of information.

15.08.015 Payments by operators of cable television systems.

15.08.020 Gross receipts—Reporting requirement.

15.08.030 Authority to examine records.

15.08.040 Penalty for refusal to make report.

15.08.050 Payment—Dates—Amount.

15.08.060 Payment—Receipt.

15.08.070 Penalty for nonpayment.

15.08.080 Examination and inspection of installations.

15.08.090 Enactment of additional regulations.

15.08.100 Requirements not a grant of franchise.

15.08.110 Compliance with other provisions.

15.08.120 Special privilege licenses and permits.

15.08.125 Violation and penalty.

15.08.130 Right-of-way used by certificated telecommunications providers.

15.08.140 City wayfinding program.

15.08.150 Shared mobility devices.

15.08.160 Mobile billboards.

15.08.010 Purpose.

The rental for the privilege of using the streets, alleys, highways, easements and public places of the city provided for in this chapter is not charged as a tax but is made for the privilege now enjoyed and to be enjoyed by such persons of using the streets, easements, alleys and other public ways of the city in the conduct of their respective businesses; and such charges are additional to all ad valorem and franchise taxes and to all taxes of every nature whatsoever against the persons mentioned herein, and are additional to any payments provided for in the franchise of any such persons, and to any payments or free service now being supplied to the city by any such persons, whether provided for by franchise or by contract or agreement, express or implied, or by the provisions of any law or ordinance requiring the same; but such charges are not additional to any occupation tax paid to the city based on a percentage of the gross receipts of any such persons, nor additional to any gross receipts tax now being paid to the city by any such persons, whether by ordinance, contract or agreement, but the amount of the rental charge herein provided for shall be such that when added to the amount of any such occupation tax measured by a percentage of gross receipts or by gross receipts tax or charge being paid by any such persons shall amount to a total of two percent of the gross receipts received by such person from its business conducted in the city for the preceding year. (Prior code § 21-25)

15.08.011 Definitions.

These definitions apply throughout this chapter.

A. "Appeals official" means the city manager or a deputy city manager as designated by the city manager.

B. "Downtown improvement area" means any area that lies within the boundaries of the downtown plan area as described in the Downtown 2015 Plan adopted by city council on October 31, 2006. A map of the downtown plan area is on file with the city clerk and is also available through the office of the downtown management district.

C. "Permit official" means the person or person designated by the city manager as being re-

sponsible for issuing permits, licenses or making any other authorization provided for under this article.

D. "Cincinnati commercial district" means the commercial district on Cincinnati Avenue bounded by N. Mesa Street and N. Stanton Street.
(Ord. No. 17676, § 1, 11-15-2011; Ord. No. 18382, §§ 1a), b), 7-7-2015; Ord. No. 18785, § 1, 5-1-2018)

15.08.012 Application for franchise.

A. All persons who desire to obtain a franchise for long term use of the city rights-of-way for conducting business within the city shall apply for a franchise. An application packet may be obtained from the city clerk. The application shall be verified by oath of the applicant or the duly authorized representative of the applicant, filed with two complete copies of the application and exhibits, filed with the city clerk and shall, among other requirements, identify the nature of the proposed use of city rights-of-way, the nature of the applicant's business and organization, and the applicant's authorized representative. The applicant shall also submit with the application a description of the project and the proposed encumbrances. The city clerk shall forward one copy of the application to the city manager and one copy of the application to the office of the city attorney.

B. Appropriate representatives of the city attorney's office and the designees of the city manager will schedule a preliminary meeting with the applicant's authorized representative.

C. After the preliminary meeting, and before the application shall be processed further, the applicant shall be required to pay by certified check a nonrefundable application fee of five thousand dollars for the city's costs of reviewing the franchise application, conducting appropriate investigations and other associated administrative costs. Payment of the nonrefundable application fee does not guarantee that the applicant will be granted a franchise.

D. The city shall schedule a public hearing at which the city council shall receive evidence concerning, but not limited to, the following:

1. The applicant's qualifications to render its proposed services;

2. The applicant's qualifications to adequately and safely maintain the public rights-of-way;

3. The effect which applicant's proposed use of the rights-of-way will have upon the public's use of the rights-of-way;

4. The applicant's financial responsibility and ability to meet the proposed terms of the franchise; and

5. Any other relevant facts.

E. The city council shall hear relevant testimony and receive relevant evidence from the city departments and the public.

F. At all times, the burden of proof shall be upon the applicant to establish that the proposed use of public rights-of-way is in the public interest and that the applicant is a responsible business entity.

G. The city council may grant the franchise and determine the terms and conditions by which it will be granted, or may refuse to grant it based upon the evidence presented at the public hearing.

H. Where the applicant is currently providing the proposed service under a franchise previously granted by city council, and city council finds that all relevant facts about the applicant are known to city council, city council may waive the requirements of this section. (Ord. 15856 § 1, 2004; Ord. 12538 § 1, 1995; Ord. 12241 § 1 (part), 1995)
(Ord. No. 17393, § 4, 8-24-2010, eff. 9-1-2010)

15.08.013 Assignment of franchise.

A. Whenever a franchise by its terms requires the city council to approve assignment of a franchise to a third party, a franchisee and proposed assignee who wish to effectuate the assignment of a city-issued franchise shall submit to the city a written application requesting approval of the assignment of the franchise. The application packet may be obtained from the city clerk. The application shall be completed in its entirety prior to acceptance and consideration by the city. The franchise assignment application shall be verified by oath by both the franchisee, or the duly authorized representative of the franchisee, and the proposed assignee, or the duly authorized representative of

the franchisee, and filed with two complete copies of the franchise assignment application and exhibits with the city clerk. The applicant shall, among other requirements, identify the nature of the proposed use of city rights-of-way, the nature of the applicant's business and organization, and the applicant's authorized representative. The city clerk

shall forward one copy of the application to the office of the city attorney and one copy of the application to the city manager.

B. Any person who applies for city council approval of assignment of a franchise or any rights thereunder shall pay a nonrefundable franchise assignment application fee of five thousand dollars. Payment of the nonrefundable franchise assignment application fee does not guarantee that the application for assignment of the franchise will be approved by city council.

C. The city shall schedule a public hearing at which the city council shall receive evidence concerning, but not limited to, the following:

1. The proposed assignee's qualifications to render its proposed services;

2. The proposed assignee's qualifications to maintain the public rights-of-way adequately and safely;

3. The proposed assignee's financial responsibility and ability to meet the terms of the franchise; and

4. Any other relevant facts.

D. At all times, the burden of proof shall be upon the proposed assignee to establish that the continued use of public rights-of-way is in the public interest, that the proposed assignee is a responsible business entity and that the proposed assignee is willing and capable of assuming the duties and responsibilities of the franchisee.

E. The city council may approve the assignment and determine the terms and conditions by which it will be approved, or may refuse to approve the assignment based upon the evidence presented at the public hearing. (Ord. 15856 § 2, 2004; Ord. 12241 § 1 (part), 1995)

15.08.014 Falsification of information.

A. It is unlawful for an applicant, franchisee or proposed assignee to provide false information to the city in its attempt to secure from the city a franchise or the approval of a franchise assignment.

B. Information presented to the city by the applicant, franchisee or proposed assignee which is false shall constitute grounds by which the city may deny the grant of a franchise or the approval of a franchise assignment.

C. A franchise which is granted or a franchise assignment which is approved by the city based upon information contained in an application or which is otherwise presented to the city by the applicant, franchisee or proposed assignee which is false of which the city had no knowledge at the time a franchise was granted or a franchise assignment was approved may be terminated by the city. (Ord. 12241 § 1 (part), 1995)

15.08.015 Payments by operators of cable television systems.

The provisions of this chapter apply to any person who enjoys the privilege of using the streets, alleys, highways, easements and public places of the city for the installation, operation and maintenance of a cable television system, except that the amount of payment and dates for payment and reporting shall be as required by franchise agreement between the city and such person. (Ord. 8836, 1986)

15.08.020 Gross receipts—Reporting requirement.

All persons using or maintaining any telegraph, telephone, electric light or other poles, gas pipelines, pipes and other fixtures in any of the streets, highways, easements, alleys, parks or other places within the city shall on the first day of August of each year file with the city clerk a sworn report showing the gross receipts from the business conducted by such persons within the city for the preceding year ending on the thirtieth day of June. (Prior code § 21-21)

15.08.030 Authority to examine records.

The city council may when it may see fit have the books and records of the person rendering the statement required in this chapter examined by a representative of the city to ascertain whether such statement is accurate, but nothing in this chapter shall be construed to prevent the city from ascer-

taining the facts by any other method. (Prior code § 21-22)

15.08.040 Penalty for refusal to make report.

Every person and the local manager or agent of every such person or corporation failing or refusing to make the report required by Section 15.08.020, or failing or refusing to allow the examination provided for in Section 15.08.030, shall upon conviction in the corporation court of the city be fined in any sum not to exceed one hundred dollars and every day's failure or refusal, as mentioned in this section shall be deemed a separate offense. (Prior code § 21-31)

15.08.050 Payment—Dates—Amount.

Upon the first day of August of each year every person occupying or using streets, highways, easements, alleys, parks or other public places in the city with poles, pipes and for other fixtures shall as a condition to such further occupancy pay to the city annually for such privileges a rental equal to two percent of the gross receipts received by such person from its business conducted in the city for the preceding year, which sums shall be paid to the city. To the gas and electric utilities, the two percent rental charge shall apply only to the gross receipts from the sales of gas and electricity to customers within the city. As to telephone utilities, the two percent rental charge shall apply only to the gross receipts from the sale of local exchange service to customers within the city. Such payment shall be made by electronic funds transfer to the city depository account if the city comptroller so directs on or before July 1st. (Ord. 12538 § 2, 1995; prior code § 21-23)

15.08.060 Payment—Receipt.

Upon receipt of the above rental by the city, the city clerk shall deliver to the person paying the same a receipt for such rental, which receipt shall authorize such person to use and occupy the streets and highways, easements, alleys, parks and other public ways of the city in carrying on its business for twelve months from the first day of August of such year. (Prior code § 21-24)

15.08.070 Penalty for nonpayment.

Every person who shall operate any business without the payment of the rentals provided for herein shall also pay a late fee for each day that such business shall conduct such business using and occupying the streets, easements, alleys or other public ways of the city without the payment of the rentals. This fee shall be calculated at the prime rate (the rate that the nation's largest banks charge their most creditworthy customers) times the amount of street rentals due and owing to the city times the number of days that the street rentals are late, and shall be paid in addition to the rentals provided for herein. (Ord. 12538 § 3, 1995: prior code § 21-30)

15.08.080 Examination and inspection of installations.

The city fire marshal, building inspector, electrical inspector, police officers and such other persons designated by the city, shall have power and it shall be their duty to examine and inspect from time to time all telegraph, telephone, electric light or other poles, gas pipelines, pipes and other fixtures in the public places within the city for the purpose of seeing that all of same are in a safe and suitable condition, and whenever any such item is found to be unsafe or unsuitable for the purpose for which it is used, the person using, possessing or maintaining same shall be notified and required to place same in a safe and suitable condition. (Prior code § 21-29)

15.08.090 Enactment of additional regulations.

The city reserves the right to put into effect at any time other restrictions and regulations as to the erection and maintenance of poles, wires, pipes and other appurtenances in the streets, easements, alleys and other public ways of the city and from time to time to require such poles, pipes, wires and other property equipment and fixtures as it may deem proper to be removed and to require wires to

be run in conduits on such terms as the city may deem proper. (Prior code § 21-28)

15.08.100 Requirements not a grant of franchise.

This chapter does not grant a franchise to any utility or person to use the streets, easements, alleys and other public ways and shall never be so construed by the courts or otherwise, and the city reserves the right to cancel the privileges granted hereunder and refund the unearned rentals paid to the city; and the payment of the charges herein provided for shall not be construed as a waiver of any rights granted any such utility under the constitution and laws of the state or of the United States, nor to prejudice any claim thereof. (Prior code § 21-27)

15.08.110 Compliance with other provisions.

Nothing in this chapter is intended to relieve any person of any condition, restriction or requirement imposed by any law or ordinance of the city. (Prior code § 21-26)

15.08.120 Special privilege licenses and permits.

A. Where applicable. The city may grant a special privilege license or permit for use of public right-of-way for specified uses. For purposes of this section, the term "public right-of-way" means the area within a public street or alley, including the sidewalk, parkway and roadway surface, whether paved or unpaved, and areas within public easements or rights-of-way for drainage or other purposes. Where a use is proposed on public right-of-way designated as a state or federal highway or road, approval from the Texas Department of Transportation (TXDOT) shall be required prior to approval by the permit official. Permanent encroachments on state highways shall be prohibited.

1. General authority.

a. City council has final authority over special privilege licenses (hereinafter called "licenses") under this section. Assignments and renewals may be granted administratively by the city manager.

b. The permit official as defined in Section 15.08.011 (Definitions) has final authority over special privilege permits and renewals (hereinafter called "permits") under this section.

2. The permit official shall require recording of instruments granting rights under this chapter in the official public records of real property of the county in which the land is situated. Applicant shall pay the recording cost.

3. Terms. Licenses and temporary permits have stated durations and are terminable according to the terms specified within the license or permit granting the use.

4. Grantees of licenses or permits under this section must maintain any structure, covering or appurtenance and the accompanying structural members extending over, under, or on public right-of-way, or other city property in good repair and condition and shall not create a nuisance or safety hazard therefrom. All such encroachments, when constructed, repaired or renovated, shall comply with all applicable codes of the City of El Paso as adopted and as may be amended. The city reserves the right to remove structures not properly maintained within the public right-of-way at grantee's expense.

5. Grantees of licenses or permits under this section shall indemnify, defend and hold harmless the city, its officers, agents, servants and employees for and against all claims, causes of action, liability, damages or expenses (including but not limited to attorney fees and costs) for any damage or loss of property, illness, injury, physical or mental impairment, loss of service, or death to any person arising out of or related to the license or permit. This section controls even if the agreement provides otherwise, unless an ordinance expressly states that city council intends to override this section as to the particular use by the particular applicant. The indemnity specifically covers the city's own negligence, whether joint or sole. Entities that may not lawfully grant indemnities or may not lawfully be required to do so by the city need not grant the indemnity provided for in this section.

6. Licenses and permits granted under this section shall not relieve the applicant of complying with any other approvals, permits, or licenses required by the city or other governmental agencies. No permit or license shall be granted if the use impairs the primary public purpose of the public rights-of-way.

7. Terms and conditions—Right of termination reserved by city.

a. The permit official retains the right to terminate a license or permit whenever in its judgment revocation is necessary to secure efficiency of public service at reasonable rates or to assure that the property is maintained in good order throughout the term of the license.

b. Upon termination of the license or permit, at the option of the city, Grantee(s) shall remove any improvements and return the right-of-way to its original condition, or the city shall have the option of accepting the improvements, such improvements shall become the property of the city.

c. Breach by grantee(s). If grantee(s) fails to fulfill any of the conditions stated in the license ordinance, city council may terminate the license or permit after reasonable notice and hearing.

8. No structures shall be placed on any El Paso Water Utilities water meters, water valves, sanitary sewer manhole covers nor within a five-foot radius of any existing fire appurtenance.

B. Application required. To acquire licenses or permits under this chapter, an applicant shall submit the following to the permit official, and follow the procedures prescribed by this section.

1. One application for a license or permit shall be made in writing or submitted electronically on a form prescribed by the permit official, which must be completed in accordance with the instructions provided on/with the application;

2. One location map, accurately outlining the public rights-of-way or easement(s) upon which an encroachment is proposed.

3. A digital copy of the proposed plan of the public right-of-way or public easement, drawn to scale, showing the following:

a. Size, location, arrangements of existing structures and improvements on the public rights-of-way or easements;

b. Size, location, arrangements and dimensions of proposed improvements to be located on the public rights-of-way or easements;

c. Elevations or perspective of the buildings showing all existing and proposed encroachments;

4. Proof of ownership (warranty deed, title commitment, etc.).

5. A sealed written metes and bounds description and survey, of the public rights-of-way or easements if permanent structures are proposed.

6. A transmittal letter including specific information, special circumstances or conditions, which apply to the request.

7. A certificate of liability insurance or self-insured affidavit in accordance with subsection G (insurance required) of this chapter.

8. Upon review for completeness and acceptance of the application by the permit official, the applicant shall pay the established processing fee for the special privilege license or permit as prescribed in subsection F.1 of this chapter. The processing fee is non-refundable.

C. Procedure for a license. The application and related materials are distributed to the affected city departments, which will make recommendations for approval or denial of the request within two weeks of the date of distribution.

1. Upon an approval recommendation by the departments, the permit official shall prepare an ordinance containing the terms and conditions of the license. Once signed by the applicant(s), the ordinance will be introduced and scheduled for public hearing for city council consideration.

2. Upon denial recommendation of the departments, no ordinance will be prepared, and a written notice of denial of the license request will be provided to the applicant

3. Appeals process.

a. An applicant may appeal the denial of an application in writing within ten calendar days after notice of the denial has been received, by submitting a written request to the permit official. The notice of appeal must contain a written statement of the reasons the final decision is erroneous or any other documents supporting the position of the appellant.

b. Within thirty calendar days of receipt of the appeal, the permit official shall present the appeal to city council. All documents submitted by the appellant shall be provided to city council along with any documentation the permit official deems relevant for rendering a decision. The applicant shall have the right to be present and address the city at said city council meeting.

c. The city council may deny the appeal for a license or may direct the preparation of the ordinance. City council's decision to grant a license or deny the appeal shall be based solely on the standards set forth in this chapter. The decision of the city council is final.

4. Approval by city council. If, in the judgment of city council, the requested use is not inconsistent with and does not unreasonably impair the public use of the right-of-way, city council may, by ordinance, approve the license. As an express condition of the license, city council may impose development standards to mitigate the encroachment onto public right-of-way, to improve safety and aesthetics, and/or to insure compatibility with adjacent structures and uses.

D. Procedure for a permit.

1. Permit applications and related materials will be forwarded to the affected departments, which will make a recommendation for approval or denial of the request within 7 days of the date of distribution.

2. Upon approval recommendation by the affected departments, the permit official may issue the permit provided the use meets the development standards enumerated in this section. Each of the development standards for specified uses ensures the specified requested use is not inconsistent with and does not unreasonably impair public use of right-of-way and mitigates the encroachment onto public right-of-way, provides safety and aesthetics to adjacent uses, and insures compatibility with adjacent structures and uses.

3. Upon denial recommendation by the affected departments, the permit official shall deny issuance of the permit.

4. Appeals process.

a. An applicant may appeal the denial of an application in writing within ten calendar days after notice of the denial has been received, by submitting a written request to the permit official. Within ten business days, the appeals official, as described in Section 15.08.011 (Definitions) shall hold a hearing on whether to issue the permit or uphold the denial. The applicant shall have the right to present evidence at said hearing and to question appropriate city officials. The decision to issue the permit or uphold the denial shall be based solely on the approval criteria set forth in this chapter. The appeals official shall render a decision on the appeal within five business days after the date of the hearing. In the event that the purpose of the proposed event is a spontaneous response to a current event, or where other good and compelling causes are shown, the appeals official shall reasonably attempt to conduct the hearing and render a decision on the appeal as expeditiously as is practicable.

b. The decision of the appeals official is subject to review by city council. The applicant shall submit a written request to the permit official, who shall forward the request for placement on the agenda of the next available regular city council meeting in compliance with all ordinances and statutes relating to the placement of items on the city council agenda and the posting of the agenda. The decision to issue or uphold the denial shall be based solely on the approval criteria set forth in this chapter. The decision of the city council is final.

E. Types of encroachments. Any one or more of the activities, improvements, facilities or uses on public right-of-way in Table 1-1 may be granted a license or a permit:

Table 1-1

Type of Encroachment	Authorizing Instrument	Term	Additional Requirements
1. Aerial encroachments			
a. Awnings, canopies, galleries and arcades	Permit	One—five years	See Section I
c. Temporary street displays	Permit	One Week—Six Months	See Section K
d. Banner program	Permit	Six months—five years	See Section L
e. A pedestrian sky-walk	License	License denotes term	Meets all applicable city, state and federal requirements.
f. Signs	Permit	One—five years	See Section M
g. Pipelines, transmission lines or cables	License	License denotes term	Meets all applicable city, state and federal requirements
h. Other overhead encroachments not specified herein	License	License denotes term	Meets all applicable city, state and federal requirements
2. Surface encroachments			
a. Sidewalk Cafe	Permit	One—ten years	See Section N
b. Street furniture (includes but is not limited to, benches, bollards, waste containers, lighting, shelters, outdoor pavilions, and other streetscape components providing convenience, safety and access to activities, amenities and location information)	Permit	One—ten years	See Section J
c. Ornamental gates, columns or other ornamental works of iron, wood, masonry, earth or other materials denoting the entrance to a neighborhood or subdivision	Permit	One time no renewal required	Improvements may display the name of the subdivision or neighborhood but shall contain no commercial advertising or other signage.
d. Façades, ornamental gates, columns or other works of iron, wood, masonry, earth or other materials	Permit	One time no renewal required	Improvements shall not impede pedestrian paths of travel and shall be ADA/TAS Compliant. Improvements shall not impede the visibility triangle of the property

Type of Encroachment	Authorizing Instrument	Term	Additional Requirements
e. Taxi-stand	License	One year. Annual renewal required	See standards in Title 6, Chapter 6.16 (Taxicabs) of the City Code
f. Supportive or decorative columns, arches, or other structural or decorative features of any historically significant building or structure	Permit	One time no renewal required	Historic preservation officer/HLC shall approve all applications prior to issuance of a permit.
g. Reserved.			
h. Building or other structural encroachment when vacation of the public right-of-way is not in the best interest of the public	Permit	Maximum fifteen years	See Section P.
i. Food vending concessions within the downtown area	License	License denotes term	See Section Q.
j. Accessibility ramps required by the City building code	Permit	One time no renewal required	Shall comply with the Americans with Disabilities Act (ADA) and Texas Accessibility Standards (TAS).
k. Pipelines, transmission lines or cables	License	License denotes term	Does not unreasonably impair the public use of the right-of-way and meets all applicable city, state and federal requirements.
l. Outdoor pay telephones	License	License denotes term	Renewals of existing licenses and new non-certificated, franchised telephone companies only.
m. Stairways	Permit	One time no renewal Required	Construction, installation and maintenance shall comply with all applicable City, State, and Federal requirements.
n. Signs	Permit	One—five years	See Section M.
o. Sidewalk retail vending	Permit or license	One-five years	See Section R.
p. Other surface encroachments not specified herein	License	License denotes term	Does not unreasonably impair the public use of the right-of-way and meets all applicable city, state and federal requirements.

Type of Encroachment	Authorizing Instrument	Term	Additional Requirements
q. Parking Parklet	Permit	One year	See Section O.
3. Subsurface encroachments			
a. Underground storage vault or basement structure	Permit	One time no renewal required	Does not unreasonably impair the public use of the right-of-way and meets all applicable building code standards.
b. Pipelines, transmission lines, cables or storage tank	License	License denotes term	Does not unreasonably impair the public use of the right-of-way and meets all applicable city, state and federal requirements.
c. Other subsurface encroachments not specified herein	License	License denotes term	Does not unreasonably impair the public use of the right-of-way and meets all applicable city, state and federal requirements.

F. Fees.

1. The established application processing fee shall accompany all applications for a license or permit. This fee shall be nonrefundable, regardless of ultimate action by the city council or the permit official, and shall be in addition to other charges for a particular licensed or permitted use.

a. Applicants shall pay the established annual fee for each license or permit.

(1) The established fee for the first year of the license or permit shall be paid prior to consideration of the license request by city council or issuance of the permit by the permit official. This fee shall be refunded within fifteen days if the request is denied.

(2) When the term of the license or permit exceeds one year, the established annual fee shall be paid each year on or before the anniversary date of approval.

(3) For licenses or permits exceeding one year, applicants shall have the option of paying the established fee for the entire term of the license or permit at a three percent discount, if paid in full prior to the time of approval. Applicants exercising the option to pre pay the established fee for the entire term of the license or permit shall be entitled to a refund of the total amount paid for the entire term of the license if the license or permit is denied. However, applicants shall not be entitled to a refund if after the license or permit is granted, it is later terminated prior to expiration.

2. Fees within areas designated in this section shall have a separate established fee. Payments shall be made as stated in subsection F.1. of this section.

a. Reserved.

b. Rapid transit system (RTS) corridors adopted by city council in 2009 and as amended in 2010.

c. Properties municipally zoned Smart Code (SCZ), designated as transit oriented development (TOD) overlays, or any additional specially designated overlay districts which specifically establish separate fees for special privilege licenses or permits.

3. For any special privilege license or permit not listed in Table 1-1 of this section, applicants

shall pay the established fee for "other special privileges" which shall be no less than one thousand dollars per year.

a. In the event the city and applicant find the established fee for a special privilege not listed in Table 1-1 unreasonable, an alternative fee as agreed to by the parties may be permitted upon approval by city council.

4. The annual fees shall remain the same for a period of one year from the date the license or permit is granted and are subject to change after each one year period the license or permit remains in effect. Whether or not stated in this section, the city council retains the right to increase or decrease the annual fee specified in this section.

5. The established annual fee for any special privilege license or permit located in a Tax Increment Reinvestment Zone of the City of El Paso, Texas may be reduced or waived as determined by city council.

G. Insurance required. As a condition of the license or permit, the grantees shall agree to indemnify, defend and hold harmless the city, its officers, agents, servants and employees from any and all claims, loss, damages, causes of action, suits and liability of every kind, including all expenses of litigation for injury or death of any person, or for damages to any property arising out of or in connection with grantee's use of the public right-of-way regardless of whether such injuries, death or damages are caused in whole or in part by the negligence of the city.

1. No license or permit shall be granted by the city unless grantee files a copy with the planning and inspections department and financial services a certificate of liability insurance accompanied by a copy of the policy of insurance as prescribed by the risk management of the City of El Paso.

2. Grantee(s) shall maintain said insurance with a solvent insurance company authorized to do business in Texas. The policy shall provide that the insurer will defend against all claims and lawsuits which arise and pay any judgment of a court of competent jurisdiction against the city, its officers, agents, servants or employees and grantee(s) their officers, agents, servants or employees as additional insureds to the full amount of the policy limits. The policy of insurance shall name the grantee and the city as insureds to the full amount of the policy limits.

3. Such policy or certificate shall provide that the insurance cannot be cancelled, or the amount of coverage changed without thirty days prior written notice to the city's planning and inspections department and financial services, or ten days prior written notice for cancellation based on non-payment of insurance premiums.

4. Failure to keep the policy in full force and effect throughout the term of the license shall be grounds for cancellation. Certificates of insurance that state the insurer shall endeavor to give notice and/or that there shall be no liability for failure to give notice required therein shall not meet the minimum requirements of this section.

H. Exceptions. The following activities, improvements, facilities, or uses on public right-of-way shall not require a license or permit as herein provided:

1. City owned and maintained transit bus shelters and other related amenities for the convenience of the public;

2. Decorative landscaping as defined in Chapter 18.46.050 (Definitions), under the following circumstances:

a. Median as defined in Chapter 19.50.030 (Definitions). Landscaping complying with the provisions of Section 12.68.060 (Planting in arterial and local street medians), Chapter 21.50.110 (Landscape Standards) and Chapter 13.16 (Insurance requirements for work within right-of-way of public streets and alleys).

b. Parkway as defined in Chapter 19.50.030 (Definitions).

(1) Abutting a local or arterial street as defined in Title 19 (Subdivisions), and not subject to the provisions of Chapter 18.46 (Landscape standards) or Chapter 21.50.110 (Landscape Standards).

(2) Abutting a local or arterial street as defined in Title 19 (Subdivisions), and subject to the provisions of Chapter 18.46 (Landscape) or Section 21.50.110 (Landscape Standards).

c. Installation and maintenance. Landscaping of medians and parkways is encouraged; however, nothing in this section shall be deemed to require such landscaping. In all instances where a property owner or other entity landscapes a parkway or median, such property owner or other entity shall be responsible for furnishing, installing and maintaining all such landscaping, including costs for irrigation systems, water meters, and associated water consumption;

3. A temporary street closure or use of right-of-way for activities such as, but not limited to, parades, public assemblies, block parties, marches, and athletic events, provided the City has issued a permit for such use as authorized under Chapters 13.32 (Temporary Events), Chapter 13.36 (Parades and Public Assemblies), and Chapter 13.38 (Special Events).

4. Temporary commercial filmmaking activities for a period of forty-eight hours or less, provided that the city has issued a permit for such activity as authorized under Chapter 13.30 (Film Making Events).

5. Encroachments such as, but not limited to, newspaper racks, benches, waste containers, and public utility facilities where the city has granted a franchise or lease permitting such use of the public right-of-way provided they comply with subsection J. (Street Furniture) of this chapter.

6. Bicycle racks installed to meet the requirements of off-street parking and loadings standards of Section 20.14 Article II (Bicycle Parking) complying with subsection J. (Street Furniture) of this chapter.

7. The temporary use of streets or public property for the storage or handling of materials or of equipment required for construction or demolition complying with Chapter 18.08 (Building Code).

8. Encroachments such as, but not limited to, bay windows, fire escapes, and cornices that comply with Chapter 18.08 (Building Code).

9. The temporary use of public right-of-way or public property for the drilling of monitoring wells complying with Chapter 13.08 (Excavations).

10. City sponsored temporary street displays, kiosks, or banner programs;

11. Memorial markers, provided that the placement of such markers are approved by the city and comply with the policies and procedures established by the director of transportation.

12. Signs may be located in the public right-of-way without the requirement of a sign permit or a special privilege, which meet the following criteria:

a. The sign is a framed, portable two-sided (message on both sides), single panel style or two connected single panels ("A-frame" or "tent style");

b. The frame of the sign is constructed entirely of wood and/or metal enclosing the sign panel(s), except that non-commercial signs as defined in Section 20.18.050 (Definitions) shall be exempt from this requirement;

c. The face of the sign is constructed of wood, metal, plastic or hardboard material;

d. The face of the sign is no larger than five square feet;

e. The sign area is no greater than nine square feet, and does not exceed thirty-six inches in height in any direction;

f. The sign is located within the parkway and is not permitted in the median;

g. The sign is freestanding, without requiring staking into the ground;

h. The sign does not include any lighting;

i. The sign is located within the parkway within the hours of 6:00 a.m. and 8:00 p.m.; and

j. The sign owner shall be responsible for all claims, causes of action, liability, damages and/or expenses for any damage to or loss of any property, or any injury to any person, resulting from use of city right-of-way.

k. The sign may not be placed closer than twenty feet to a waste container placed in the right-of-way pursuant to a franchise agreement issued by the city.

l. The sign may not be placed in that area of a triangle formed by the intersecting property lines and a diagonal line joining the property line at points twenty feet from their intersection of any corner lot.

13. For properties with zero-lot lines, wall signs that are flush mounted on a facade that project less than eighteen inches and meet the standards of Chapter 20.18 (Signs).

14. Arcades and galleries as defined in Chapter 21.70.010 (Definitions), awnings and canopies constructed pursuant to Chapter 21.50.070 (Building Configuration).

15. Arcades, awnings, canopies and galleries that comply with subsection I. (Awnings, Canopies, Galleries and Arcades) of this chapter.

16. Open porches, balconies and bay windows pursuant to Chapter 21.50.070 (Building Configuration).

17. Wayfinding signs approved by the City of El Paso in accordance with Section 15.08.140.

18. Stairways and handicap ramps that comply with Chapter 18.08 (Building Code) and/or are required to provide TAS/ADA access to a building legally existing for forty years or longer.

19. Bicycle racks installed pursuant to the terms of an interlocal agreement provided that the interlocal agreement allows for the installation of bicycle racks on the public right-of-way and the bicycle racks and the installation of the bicycle racks comply with the terms of the interlocal agreement and all other applicable ordinance requirements.

I. Arcades, awnings, canopies and galleries.

1. Definitions.

a. Arcade: A private frontage conventional for retail use wherein the façade is colonnade that overlaps the sidewalk, where the façade at the sidewalk level remains at the frontage line.

b. Awning: A rooflike shelter of canvas or other material extending over a doorway, from the top of the doorway, from the top of a window.

c. Canopy: An overhanging projection or covering, as a long awning stretching from the doorway of a building to the curb.

d. Gallery: A private frontage conventional for retail use wherein the façade is aligned close to the frontage line with an attached cantilevered shed or lightweight colonnade overlapping the sidewalk.

2. Application.

a. Scaled architectural drawing(s) showing front and side elevations must be in keeping with the original architectural design of the structure involved for historical correctness.

b. An engineering certification on the structural design and wind loading capability based on the current edition of the adopted Building Code.

3. Location.

a. Protection of healthy, mature street trees shall take precedence over providing awnings, canopies, galleries or arcades.

b. Awnings and canopies shall be placed within window bays and must not cover piers or other architectural details of the principle building.

c. A minimum distance of eight feet between the sidewalk and the lowest portion of the structure of the awning, canopy, gallery or arcade.

d. A minimum distance of seven feet between the sidewalk and the bottom edge of an awning's valence.

e. A minimum setback of two feet between the face of the curb and the closest portion of the awning, canopy gallery or arcade.

f. A minimum distance of three feet between the face of the building and the closest portion of the outside of the awning or canopy.

g. A minimum clear area of two feet measured perpendicular to the curb face and five feet measured parallel to the curb face between the closest portion of a street element over seven feet in height, including tree branches, and the closest portion of the awning, canopy, gallery or arcade.

h. Ten feet minimum between the interior walls of the gallery which shall be open at both ends and connected to the adjacent sidewalks.

i. Twelve feet minimum between the interior walls of the arcade which shall be open at both ends and connected to the adjacent sidewalks.

4. Other standards.

a. Awnings and canopies shall be constructed of durable materials such as canvas, metal and/or glass and shall be anchored in a manner to preserve the architectural integrity of the façade (anchoring into mortar joints).

b. Galleries and arcades shall be constructed of materials similar to those used on the principal building.

c. Lighting placed within the awnings, canopies, galleries and arcades shall be placed in a manner so as to be screened from view at the street.

J. Street furniture. For purposes of this section, street furniture shall include benches, seat walls, planters, bicycle racks, newspaper racks, waste and recycling receptacles.

1. Street furniture shall compliment the building's architecture, shall not encroach into the pedestrian pathway and shall be maintained by the property owners.

2. Benches.

a. Benches parallel to the curb face shall face towards the pedestrian pathway.

b. Benches perpendicular to the curb face shall face another bench in a social arrangement with a distance of five and one-half feet between benches.

c. A minimum of two feet between the face of curb and the closest portion of the bench is required.

d. A minimum width of six feet between the curbline or the closest portion of the street-side bench or other streetscape element (if present) and the building face or the closest portion of the building side bench or other streetscape element (if present).

e. A minimum distance of five feet measured between the base of a street element and the closest portion of a bench.

f. Benches shall be designed in such a manner to discourage sleeping by including additional arms within the bench seating area.

3. Seat walls and planters.

a. Seat walls shall be located between the face of the curb and the pedestrian pathway and/or between the pedestrian pathway and the face of the building; however, the sum of the width of all seat wall/planter areas shall not exceed twenty-five percent of the total sidewalk width.

b. A maximum distance of twenty feet measured parallel to the curb face for a seat wall or planter is required before a break of three feet be provided.

c. A minimum setback of two feet between the face of the curb and the closest portion of the seat wall or planter.

d. A minimum width of six feet between the curbline or the closest portion of the street-side seat wall or planter or other streetscape element (if present) and the building face or the closest portion of the building-side seat wall or planter or other streetscape element (if present).

e. A minimum of three feet measured between the closest portion of the seat wall or planter and another seat wall or planter and the base of a street element.

f. A minimum height of eighteen inches with a maximum height of twenty-four inches to the top of a planter which may be incorporated for a seating area on a seat wall.

g. A minimum depth of fifteen inches shall be required for a seating area on a seat wall.

h. Seat walls shall be designed to deter skateboard use by installing metal deterrents or providing grooves in the surface at appropriate intervals.

4. Newspaper racks.

a. Newspaper racks shall be located between the face of the curb and the pedestrian pathway and shall face toward the pedestrian pathway and the building.

b. A minimum setback of two feet between the face of the curb and the closest portion of the newspaper rack.

c. A minimum width of six feet between the closest portion of the newspaper rack and the building face or other streetscape element.

d. A minimum distance of three feet measured between the base of a street element and the closest portion of the newspaper rack except that two newspaper racks may be placed side-by-side.

5. Waste and recycling containers.

a. Waste and recycling containers shall be located between the face of the curb and the pedestrian pathway.

b. Waste and recycling containers may be combined into one unit or placed side-by-side adjacent to each other; however, they shall be placed so that the longest dimension is parallel to the curb face.

c. A minimum distance of three feet measured between the base of a street element and the closest portion of the waste or recycling container except that one waste container and one recycling container may be placed side-by-side.

d. A minimum setback of two feet between the face of the curb and the closest portion of the waste or recycling container.

e. A minimum width of six feet between the closest portion of the waste or recycling container and the building face or other streetscape element.

6. Bicycle racks.

a. A minimum setback of three feet shall be required between the bicycle rack and the building face or other streetscape elements, such as but not limited to parking meters, trees, street furniture, fire hydrants, and utility vaults (Figure 1).

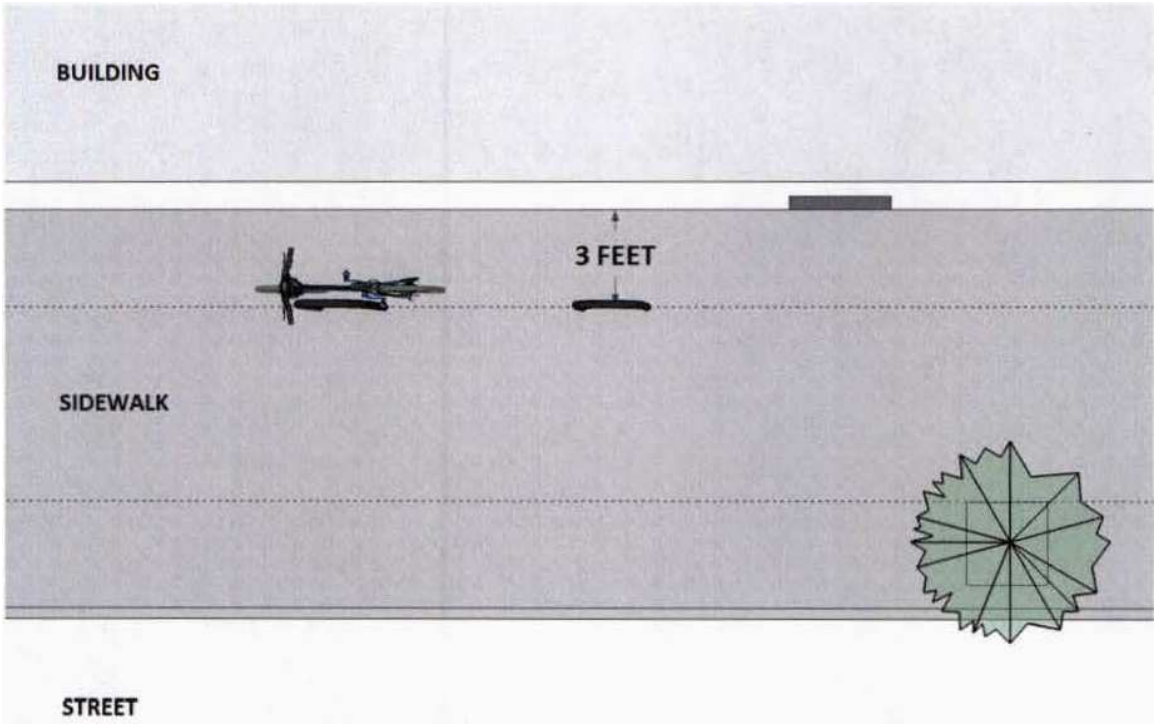

Figure 1. Bicycle rack and the building face.

b. A minimum setback of five feet shall be required between the bicycle rack and a curb cut or accessibility ramp.

c. For bicycle racks oriented perpendicularly or diagonally to a sidewalk or walkway: a minimum setback of three feet shall be required between the bicycle rack and the face of the curb; a minimum width of three feet shall be required between each bicycle rack; and a minimum width of eight feet shall remain unobstructed for the pedestrian path of travel when a bicycle is not attached to the bicycle rack (Figure 2).

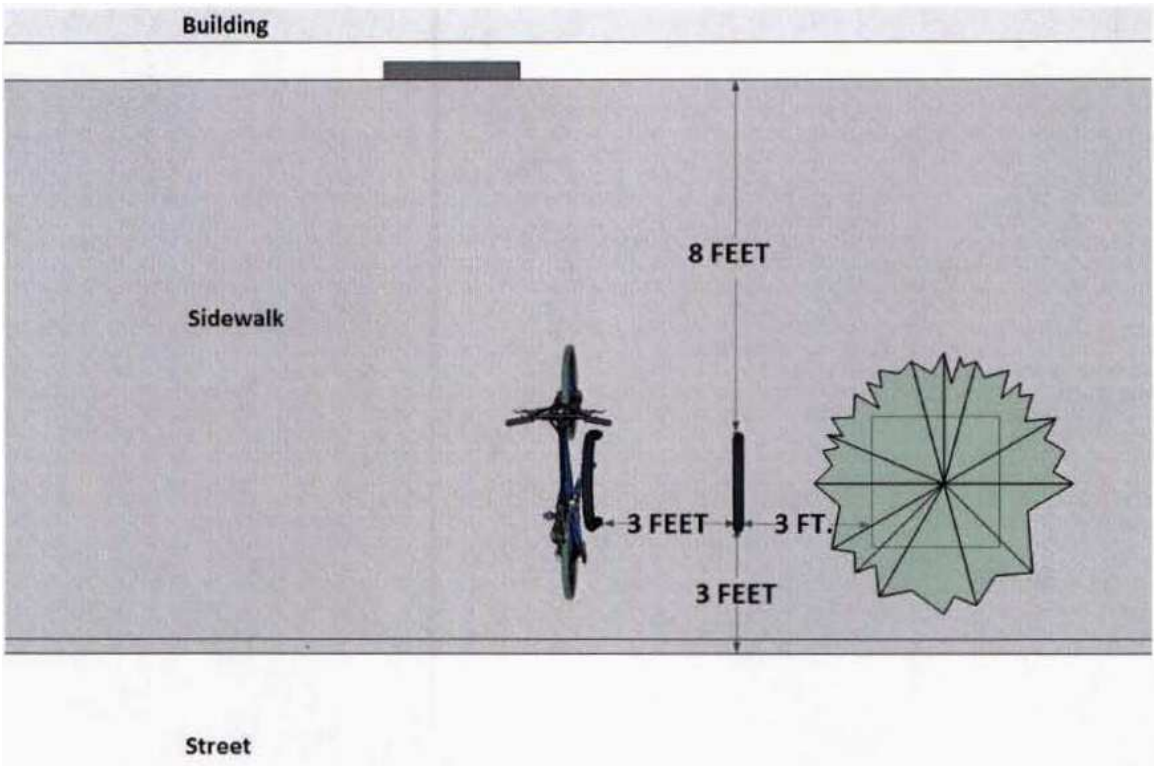

Figure 2. Perpendicular Bike Racks.

d. For bicycle racks oriented parallel to a sidewalk or walkway: a minimum setback of three feet shall be required between the bicycle rack and the face of the curb; a minimum setback of six feet shall be required between each bicycle rack; and a minimum width of six feet shall remain unobstructed for the pedestrian path of travel when a bicycle is not attached to the bicycle rack (Figure 3).

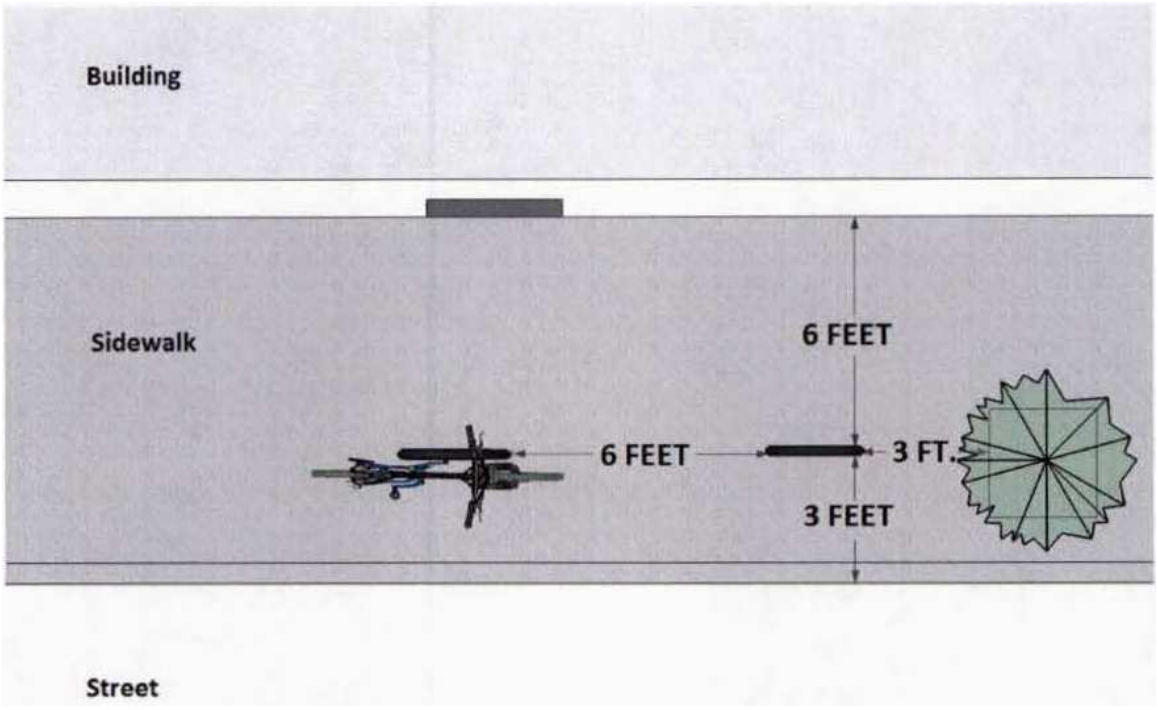

Figure 3. Parallel Bike Racks.

e. Wherever possible, bicycle racks shall be located in the parkway, aligned to not interfere with parked car doors or bus stops, and aligned parallel to the street in constrained areas.

f. For bicycle racks located in on-street parking spaces: a minimum of two breakaway bollards or posts located six inches from the parking delineation line shall be required; physical or visual barriers, dependent on traffic speeds, shall be installed between the travel lane and bicycle parking; a minimum setback three feet shall be required between the bicycle rack and the face of the curb; a minimum setback of three feet shall be required between each bicycle rack; and white reflective tape shall be attached to each bicycle rack leg adjacent to travel lane (Figure 4).

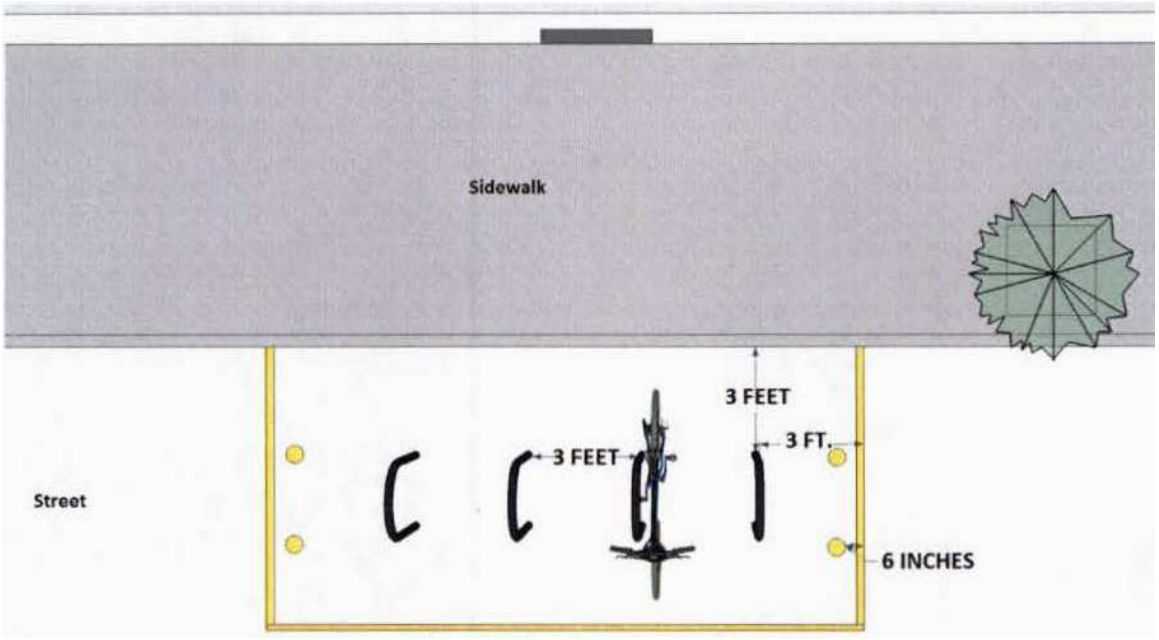

Figure 4. On-Street Bike Racks.

g. Bicycle rack construction requirements.

(1) Bicycle racks shall be of the standard "inverted-U" shape, and shall be made of steel tubing resistant to cutting, rusting, bending or deformation.

(2) Alternative bicycle rack styles may be approved by the permit official on a case-by-case basis. Alternative bicycle racks shall support the bicycle's frame at two or more points on a horizontal plane, or support the frame at one point while preventing the front wheel from turning. Alternative bicycle racks shall allow the frame and one wheel to be locked to the rack, regardless of whether the front wheel is removed or not. Alternative bicycle racks shall accommodate a wide variety of sizes and types of bicycles, including those with water bottles, without kick stands, without a diamond-shaped frame, or without a horizontal top tube.

(3) The design of alternative bicycle rack style, including the installation details shall be reviewed and approved by the permit official.

(4) All bicycle racks shall be securely anchored to the ground.

K. Temporary street displays.

1. Temporary street displays permitted.

a. Aerial displays including, but not limited to pennants, flags, valances, or other displays constructed of cloth, canvas, vinyl, light fabric, wallboard or other light materials.

b. Temporary wayfinding and/or directional signs located on existing city infrastructure within portions of city right-of-way.

2. Location.

a. In no case shall individual displays be permitted on any city traffic control device.

b. The display locations create no possible obstructions to pedestrian and vehicular traffic.

c. The display at the proposed location is feasible considering the placement of city fixtures or utility poles, or other city infrastructure.

d. The display location shall be limited to a utility pole or city light fixture that has been previously approved and fitted with bracket infrastructure by the department of transportation.

e. Surface temporary displays bust be free standing without "staking" or mounting to city infrastructure.

f. The display is of approved material, will not be permanently installed or attached, and will allow for wind cuts to reduce tendency of material to billow or sail.

g. The display material is properly maintained in a safe condition at all times,

h. The display is authorized subject to reasonable conditions regulating the location, mounting, duration, or manner of display.

3. Size.

a. The maximum area of each aerial temporary street display shall be two and one-half feet by five feet, or thirteen total square feet.

b. The maximum area of each surface temporary street display shall be four feet by four feet or sixteen total square feet.

4. Other requirements.

a. A display may provide for a business or organization sponsor name.

b. The display shall provide the following information, name of the sponsor(s) for the activity, event, or route as described in this section, name of the activity, event or route, time and place of the activity, event, or route, and slogan if applicable, unless determined that due to the design of the display such language cannot be added.

c. Temporary street displays are intended to display:

(1) Educational, scholastic, or artistic event;

(2) Community or public interest activity;

(3) Designated or recognized civic route or trail;

(4) Scenic roadway;

(5) Works of art;

(6) Other civic and cultural programs;

d. No display for an event or activity shall be maintained for a period exceeding one year, except as otherwise recommended by the permit official; provided, however, that no display shall be maintained for more than ninety days prior to or thirty days after an event or activity.

e. For any temporary street display sign which qualifies for a special privilege license or permit under this section, the sign permit required by City Code 20.18, shall be waived.

f. The city shall not be responsible for the cost of replacing temporary displays resulting from damage incurred during installation/removal or when replacement is deemed necessary by the city in order to maintain a safe condition.

(1) If the city must remove or replace the temporary display in order to maintain a safe condition, then the owner shall be responsible for all cost of removal.

L. Banner programs. A banner program is a group of decorative outdoor informational displays created by an eligible entity that are typically placed, erected, or fastened to street lights and used to enhance the streetscape.

1. Each individual display made part of a banner program ("individual display") shall be constructed of cloth, canvas, vinyl, light fabric, wallboard or other light materials.

2. Displays. Each banner program individual display shall relate to the public purpose of the eligible entity and promote activities relating to a municipal purpose and benefit.

a. An individual display may provide for a business or organization sponsor name in an area not to exceed twenty percent of the total display area.

b. The display shall not contain language or depictions that may disparage the city.

c. Individual displays made part of a banner program are intended to provide notification of the following:

(1) Educational, scholastic, or artistic events;

(2) Community or public interest activities or destinations;

(3) Designated or recognized civic routes or trails;

(4) Areas of historical or archeological significance;

(5) Directional assistance to other areas in near proximity;

(6) Other civic and cultural programs or facilities;

(7) Trade shows, events, and festivals.

3. Location.

a. In no case shall individual displays be permitted on any city traffic control device.

b. Individual display locations do not obstruct pedestrian and vehicular traffic.

c. Minimum clearance of fifteen feet measured from the bottom of the display is required for displays located adjacent to vehicular traffic.

d. Minimum clearance of eleven feet measured from the bottom of the display is required for displays located adjacent to pedestrian traffic.

e. Individual displays at each proposed location are feasible considering the placement of city fixtures or utility poles, installation of street mounting brackets, or other necessary fixtures.

f. When individual displays are propose for placement on a utility pole, written authorization from the utility company allowing installation and placement shall be provided.

g. Utility pole locations have been inspected by the utility company and found to have no technical, logistical, or safety problems and city fixture locations have been inspected by the director of transportation and/or the director of parks and recreations as applicable and found to have no technical, logistical, or safety problems.

4. Other requirements.

a. Individual displays are of approved material, will not be permanently installed or attached, and will allow for wind cuts, when necessary to reduce tendency of material to billow or sail.

b. Individual displays shall be maintained in a safe condition at all times.

c. The display is authorized subject to reasonable conditions regulating the location, mounting, duration, or manner of display to include provisions for approval of the method of affixing individual displays on city property by the director of transportation and removal of individual banners, upon request by the permit official, should same become worn, broken, or otherwise of no further aesthetic benefit to the area.

d. Banner displays located on Texas Department of Transportation right-of-way may only be authorized with approval from the State of Texas.

e. Eligible entities.

(1) Any municipal management district created pursuant to Chapter 375 of the Texas Local Government Code;

(2) The El Paso Empowerment Zone;

(3) The City of El Paso; and

(4) An institution of higher education as that term is defined by Section 61.003 of the Texas Education Code.

(5) A civic or neighborhood association created pursuant to Chapter 2.102 (Neighborhood Association Recognition) of the El Paso City Code.

(6) Historic districts established under the provisions of Chapter 20.20.040 (Procedure for designation of historic landmarks and districts).

f. The design of individual banners located within a banner district shall not require a certificate of appropriateness from the historic landmark commission yet shall be reviewed by the historic preservation officer, as defined in Chapter 2.24.040 (Historic Preservation Officer), as to compatibility with adjacent properties with historic zoning. Upon completion of review, reviewer shall provide a recommendation to the permit official regarding such compatibility.

g. Applicants shall pay the city's cost for installation, inspection, removal and bracket rental fees. Payment of installation and removal costs shall be done prior to installation of the banners.

h. All installation and removal of banner hardware shall be done by the city.

i. The city shall not be responsible for the cost of replacing banners resulting from damage incurred during the installation, removal of the banner(s) or when replacement is deemed necessary by the city in order to maintain a safe condition or a banner free of ripping, tearing and other damage; if the city must remove or replace the banner in order to maintain a safe condition, then the owner shall be responsible for all cost of removal.

j. Banners shall be delivered to the city no later than two weeks prior to the scheduled installation and picked up no later than two weeks after notice from the city of removal. Banners left after two weeks shall be subject to storage costs.

M. Signs.

1. Signs.

a. Signs are as defined in Section 20.18.050 (Sign Definitions).

b. All signs located within city right-of-way shall comply with Section 20.18 (Signs).

c. Directional signs permitted under this section shall be designed and installed by the department of transportation. Applicants are required to pay all costs of the design and installation of the directional signs.

N. Sidewalk cafes.

1. Filing application.

a. A letter from the property owner, if different from the food and/or beverage service establishment operator, indicating their authorization to obtain a sidewalk cafe permit; and acknowledging responsibility for any encroachments installed by tenant on city right-of-way.

b. The permittee shall be required to comply with all applicable codes, rules, regulations, and laws.

2. Compliance with design guidelines required.

a. Sidewalk cafes shall comply with all guidelines in the "Right-of-way Cafe Design Guidelines" available on the city's website or on file with the planning and inspections department.

b. The sidewalk cafe shall not prevent access to El Paso Water Utilities, El Paso Natural Gas, or El Paso Electric Company easements, meters, valves, manholes, or structures for maintenance and/or repair. The sidewalk cafe shall not prevent access to the El Paso Fire Department connections (FDC), fire hydrants, or fire escapes.

c. The sidewalk cafe shall not impede access to City of El Paso light fixtures, benches, bicycle racks, etc. for maintenance and repair. Trees planted by the City of El Paso and irrigation systems that are located within the sidewalk cafe area shall be maintained by the permittee and may not have objects attached to them that would impede or affect the life of the trees. The city shall have the right to enter and inspect the property at any time to ensure proper maintenance of city property.

3. Construction.

a. All construction shall comply with any applicable historic district design standards and guidelines. Applicants shall receive approval from the historic preservation officer or the historic landmark commission (if applicable) prior to approval of the permit. All proposed improvements within city right-of-way shall be included in the permit application.

b. A pavement cut permit in accordance with Chapter 13.08 (Excavations) shall be required for any work on city right-of-way.

c. Sidewalk cafes shall be reviewed for ADA compliance prior to permit approval. Sidewalk cafes shall not impede ADA accessibility.

4. Boundaries and fencing.

a. A sidewalk cafe shall not be enclosed by permanent structure(s).

i. If fencing is provided, fencing shall be continuous around the perimeter of the sidewalk cafe except for one opening/entry point. Fences shall have a durable professional finish and shall comply with applicable historic district guidelines. Fenc-

ing shall include sleeves at the base of the poles to allow for removal from city rights-of-way if necessary.

ii. The boundaries of a sidewalk cafe on a city sidewalk may also be defined by planters, trees, benches or other structure as approved by the permit official. If the applicant is permitted by TABC to sell and/or serve alcoholic beverages within the sidewalk cafe, the perimeter of sales shall be adequately delineated to note control of the premises and the following shall apply:

(a) Street furniture, benches, planters and seat wells shall comply with the provisions of subsection J. (additional requirements for street furniture) of this chapter.

(b) A minimum service area of two feet adjacent to each table that does not encroach into the pedestrian pathway is required for unenclosed cafe areas.

(c) A minimum distance of five feet shall be provided for a table and two chairs placed directly opposite each other is required for unenclosed sidewalk cafe areas.

5. Alcohol.

a. A license issued by the Texas Alcoholic Beverage Commission (TABC) is required for the sale and service of alcoholic beverages within the sidewalk cafe area.

b. City approval of an application for a sidewalk cafe on city right-of-way does not guarantee, warrant or assure that the Texas Alcoholic Beverage Commission will allow the sale and service of alcoholic beverages within the sidewalk cafe area.

c. The permittee must comply with any standards established by the Texas Alcoholic Beverage Commission.

6. Fire department requirements.

a. The location of any proposed outdoor serving stations requires fire marshal approval for their proximity to points of ingress and egress to the property. The area for the sidewalk cafe shall meet the current fire code requirements as determined by the fire marshal regarding sidewalk cafe areas and ingress and egress points of access. The fire marshal through plan review shall determine fire code compliance.

b. The fire marshal shall also require that occupancy capacities as defined in the International Building Code for the sidewalk cafe area and the building remain distinct and separate.

c. The sidewalk cafe must be open to the air, except that a canopy or awning conforming to requirements established by this chapter for aerial encroachments may be constructed over the sidewalk cafe and may be included in the same special privilege application. Canopies within the sidewalk cafe area shall meet current fire code definition and specifications. Proposed canopies shall comply with subection I. (additional requirements for awnings, canopies, arcades and galleries) of this chapter.

d. Acceptable auxiliary outdoor heating devices shall meet the requirements of the current fire code.

7. Other requirements.

a. Planters within the sidewalk cafe limit line shall be shown on the site plan submitted with the application and shall comply with subsection J. (additional requirements for street furniture) of this chapter.

b. Each sidewalk cafe shall have no less than one trash receptacle within the cafe limit line.

c. Overhead lighting located within public right-of-way shall be included in the permit application and shall meet all applicable historic district architectural and design standards. All electrical work shall be designed and installed in compliance with the Chapter 18.16 (Electrical Code).

i. Lighting on fencing may be permitted to add a decorative element but shall not be designed to attract attention. Flashing lights are not permitted.

ii. Lighting shall be clear or white.

iii. Light strands shall be maintained in good repair and burned-out bulbs shall be replaced promptly.

d. All relocation, removal, disposition and/or salvage of any city property shall be coordinated with the streets and maintenance department. The streets and maintenance department shall follow the city's establish policy and procedure for disposal or salvage of such property.

8. Cincinnati commercial district sidewalk cafe requirements. In addition to all other applicable provisions of subsection 15.08.120 (Special privilege licenses and permits) of this Code, the following provisions shall be applicable to this district:

a. Boundaries. The sidewalk cafes shall be defined as the terraced areas immediately adjacent to the storefront. For purposes of this subsection, retail and/or office space establishments, in addition to food and/or beverage service establishments may obtain a sidewalk cafe permit to use the terraced area immediately adjacent to the storefront. Boundaries of the sidewalk cafes shall be limited to the City of El Paso's constructed terraces as referenced in the university pedestrian improvements streetscape construction documents. Sidewalk cafes are limited to the use of seated only food and/or beverage service or retail and/or office space use.

b. Fencing. All fencing shall comply with design and height specifications found in the furnishing details of the City of El Paso's university pedestrian improvements streetscape construction documents.

c. Seating. For food and/or beverage service only. Seated-only capacity shall be required. Standing-only capacity shall not be permitted.

i. Tables and chairs shall not exceed thirty inches in height.

ii. Tables and chairs must be moveable to accommodate wheelchair access.

d. Smoking. Smoking shall not be permitted within the boundaries of the sidewalk cafe.

e. Limits on use of the sidewalk cafe. The use of the sidewalk cafe (as defined in Section 15.08.120.N.8.a) must cease between the hours of 1:00 a.m. to 7:00 a.m. However, the use of the sidewalk cafe during special events will be governed by the terms of the special event permit.

O. Parking parklets.

1. General.

a. "Parking parklet" means the use and occupation of a portion of the public right-of-way that is currently used as on-street parking for additional outdoor public space.

b. Application.

i. Application for parking parklet permit shall be filed with the city. The applicant shall pay the established fee. Such application shall include the following information:

ii. The name and address of the applicant.

iii. The legal address of the real property adjacent to the site proposed for the parking parklet.

iv. If alcoholic beverages are served within the designated parking parklet area, the permittee must provide proof that a valid license under all applicable laws for alcohol sales has been obtained.

v. A site plan of sufficient detail to demonstrate compliance with the requirements of this section.

c. Traffic control plan.

i. A traffic control plan in compliance with Chapter 12.30 is required for all applications for permit under this section during construction. Traffic control plan templates are available from the city traffic engineer and included in the right-of-way design guidelines.

ii. The traffic control plan and any required traffic control devices will be at the sole discretion of the traffic engineer.

iii. A traffic control permit is not required after construction activities have ceased.

d. Compliance with design guidelines.

i. All proposed parking parklets shall comply with all guidelines in the "Right-of-way Cafe Design Guidelines" available on the city's website or on file with the planning and inspections department.

e. In the event that the city determines that the location of any parking parklet constitutes an immediate physical danger, the encroachment into the right-of-way must be removed immediately.

f. Operational standards.

i. A parking parklet must occupy only parking spaces directly in front of the applicant's business or establishment.

ii. Occupancy within the parking parklet is limited to tables and chairs.

iii. The permittee must maintain the sidewalk and parking area in a good and safe condition.

iv. No amplified music, speakers, microphones, televisions, or other audio/visual devices will be permitted within the parking parklet area.

v. Operating hours of the parking parklet shall be restricted to the operating hours of the adjacent business or businesses.

vi. The parking parklet elements must be removed from the public right-of-way except during normal business hours. The storage of parking parklet elements within the public right-of-way is prohibited.

vii. The parking parklet must have a two-foot buffer zone between it and adjacent parking spaces and vehicular travel lanes. Additionally, wheel stops or posts should be included, as determined by the city manager or their designee.

viii. The parking parklet shall include a flush transition at the curb to permit easy access for wheelchair users or others with mobility issues and to avoid any tripping hazards.

ix. Additional occupancy provided by the parking parklet may not exceed fifty percent of the establishment's permitted maximum occupancy.

P. Buildings or other structural surface encroachment.

1. If a structural encroachment has existed thirty years or longer and is less than fifty square feet in area, the abutting property owner(s) shall apply for a permit and pay the established fee to continue the encroachment.

2. Applicants shall provide evidence of the structural nature of the encroachments such as certification from a structural engineer at the time of application.

3. Grantees shall submit a request to vacate the portion of city right-of-way within the initial term of the permit.

a. Upon approval of the right-of-way vacation, the permit shall terminate.

b. Upon denial of the right-of-way vacation, grantees shall have the option to renew the permit.

Q. Additional requirements for food vending concessions in the downtown improvement area.

1. Carts and kiosks.

a. Locations.

(1) Vendors within the downtown improvement area are limited to locations approved by the department of transportation based on vehicular sight visibility, available pedestrian access area and location and arrangement of street furniture, street lighting, utility meters, manholes, fire hydrants and fire appurtenances.

(2) Vendor locations shall not interfere with pedestrian traffic on the sidewalk between the vendor area and the adjacent buildings and between the vendor area and the adjacent street.

(3) Vendor locations shall not impede entrances, exits, and/or driveways of adjacent businesses.

(4) Vendor units shall be limited to free-standing carts within the parkway area. Vendor units shall not be permitted to be located on the street.

(5) Vendor units shall not be anchored or tied to any portion of the public rights-of-way, street furniture, city light standards, traffic control devices, utility boxes and meters, or fire hydrants and appurtenances.

(6) Vendor units shall be removed from city right-of-way when not in operation.

(7) Vendor locations shall comply with the provisions of Chapter 12.46 (Mobile Food Vendors).

b. Size and dimensions.

(1) Vendor carts shall be four feet by five feet or eight feet by ten feet based on the available vending area as prescribed in subsection a. (locations).

(6) Generators and propane use shall require approval of the fire department.

2. Food tucks.

a. Locations.

(1) Food trucks shall be located within areas that provide adequate vehicle sight visibility at intersections and shall not impede ADA/TAS accessible ramps and sidewalks.

(2) Food trucks shall comply with Section 12.46 (Mobile Food Vendors).

(3) Food trucks shall comply with Section 12.44 (Stopping, Standing and Parking Generally), Chapter 12.48 (Loading Zone, Bus and Taxi Stands) and Chapter 12.56 (Parking Meters).

b. Operations.

(1) Mobile food trucks shall comply with the provisions of Section 9.12 (Food and Food Handling Establishments).

(2) Vendors are responsible for obtaining all licenses and permits as required by law for the legal operation of food vending concessions. All applicable permits and licenses shall be affixed to the vending unit at all times.

(3) Sound amplifying devises including, but not limited to loud speakers, public address systems, radios, televisions and strobe lights or similar devices are prohibited.

(4) Vendors shall provide for trash and/or grease disposal. All trash and/or grease disposal receptacles shall not be placed within the pedestrian path of travel.

(5) Generators and propane use shall require approval of the fire department.

(6) Tables and chairs are permitted provided they do not impede the pedestrian path of travel.

R. Sidewalk Retail Vending.

1. General Provisions:

a. "Sidewalk Retail Vending" is the selling of merchandise on the sidewalk area adjacent to a commercial building with a zero lot line and is an accessory use in a zoning district where a retail establishment is lawfully operating on the first floor premises by the same entity operating such retail establishment.

b. "Vending Area" is the public right of way immediately adjacent to the Permittee's property, measuring no more than fifty-percent (50%) of the sidewalk area abutting the Permitted property, except that in the area designated as downtown in the City of El Paso Comprehensive Plan, "Vending Area" shall measure no more than three 3 foot by 9 foot areas abutting the Permitted property.

2. Application documentation. Application for a permit or license to conduct sidewalk retail vending shall be filed with the City. The applicant shall pay the established fee. Such application shall include the following information:

a. The name and address of the applicant.

b. The legal address of the real property adjacent to the site proposed for the sidewalk retail vending.

c. Proof of ownership of the real property adjacent to the site proposed for sidewalk retail vending.

d. One Year Term Permit or license - will require an operational permit issued by the El Paso Fire Department. Permits or licenses for more than a one year term with a maximum of a five year term - will require an operational permit and a valid Certificate of Occupancy issued in accordance with Title 18.02.108 of the El Paso City Code, for the first floor of the building adjacent to the site proposed for sidewalk retail vending and any storage areas above the first floor.

e. A dimensioned, detailed site plan showing the proposed layout of the proposed Vending Area. The site plan shall include any City or utility infrastructure located within the proposed Vending Area. If applicant proposes to use an awning to hang merchandise, a structural drawing of such awning is required.

f. Two color pictures (front and side) of the proposed Vending Area.

g. A description of the merchandise to be sold in the Vending Area.

h. A statement of the hours of operation of the retail establishment(s) lawfully operating on the first floor of the real property adjacent to the Vending Area.

i. The name of the retail establishment(s) lawfully operating on the first floor of the real property adjacent to the Vending Area, and a description of the merchandise sold in the establishment.

3. The Permit or license may be issued for a term between one to five years from the date of issuance, depending on the application documentation. Permittee is responsible for renewing his/her permit or license by submitting a request for renewal to the City and paying the required fee. Failure to do so in accordance with all the terms and conditions of this Section may result in the loss of the ability to renew.

4. Standards for sidewalk retail vending.

a. Only the types of retail merchandise sold in the adjacent building can be displayed in the Vending Area.

b. The majority of merchandise shall be inside of the retail establishment(s) in the adjacent building and all financial transactions must occur inside such retail establishment.

c. Sidewalk retail vending shall only operate when the entity that it is associated with it is open to the public in accordance with the normal business operating days and hours posted.

d. No permanent structure may be affixed to the sidewalk or the exterior of any building. The Permittee shall be responsible for the costs to repair any damage caused to any sidewalk or public property as a result of the Permittee's operations under this chapter.

e. A minimum of four feet of unobstructed pedestrian sidewalk access is required between the outer edge of the Vending Area and the curb, and the Vending Area shall comply with all Americans with Disabilities Act requirements, the Texas Accessibility Standards, and other applicable regulation, ordinance or law.

f. Building access and egress shall be maintained in accordance with Title 9.52 of the El Paso City Code. A minimum of three feet of unobstructed access shall be maintained at all times at the entrances and/or exits of the abutting real property and/or any adjacent business or real property.

g. Vending displays shall not completely cover the windows of the real property, and shall allow pedestrians a view of the inside retail spaces.

h. No equipment, including but not limited to tables, booths, chairs, or electrical lines utilized in conjunction with the Vending Area may be located within fifteen feet of any sprinkler system, fire hydrant and fire appurtenances, water supply shutoff valve, streetlight power boxes or traffic signal cabinets.

i. No equipment, including but not limited to tables, booths, chairs, or electrical lines utilized in conjunction with the Vending Area may be located within five feet of any connections to gas meters, sanitary sewer manholes and/or other utility equipment.

j. Display racks, tables and shelving used in conjunction with the Vending Area shall be finished or painted. Tables and shelving shall be skirted or otherwise adorned to cover the view of the under structures/legs.

k. Display of merchandise shall not exceed five feet in height from the ground, or seven feet if located in an area designated as downtown in the City of El Paso Comprehensive Plan, and is not permitted outside of the Vending Area.

l. Hanging of merchandise from the roof or awning of the primary retail structure is permitted within the Vending Area, provided a minimum seven foot clearance is maintained between the lowest portion of the merchandise and the finished grade of the sidewalk unless such hanging is above other merchandise displayed on items affixed to the ground.

m. No advertising signs are permitted within the Vending Area, except for pricing signs and each sign shall measure no more than one (1) square foot in size.

n. No stocking of merchandise is permitted in the Vending Area unless it is hidden from public view.

o. Packing or shipping cardboard is prohibited, except for containers in which merchandise is packaged for sale (i.e. shoe boxes).

(2) Vendor kiosks shall be limited to eighteen feet by twenty feet based on the available vending area as prescribed in subsection a. (locations).

c. Operations.

(1) Vendors shall comply with all provisions of Chapter 9.12 (Food and Food Handling Locations).

(2) Vendors are responsible for obtaining all licenses and permits as required by law for the legal operation of food vending concessions. All applicable permits and licenses shall be affixed to the vending unit at all times.

(3) Vendors are permitted between the hours of 8:00 a.m. and 8:00 p.m. daily; except that vendors are permitted during special events outside the daily hours upon approval of the department of public health and event coordinators.

(4) Sound amplifying devices including, but not limited to loud speakers, public address systems, radios, televisions and strobe lights or similar devices are prohibited.

(5) Vendors shall provide for trash and/or grease disposal. A maximum of a thirty-gallon covered garbage container is permitted at the vendor location provided that the container is not placed within the pedestrian path of travel.

(6) Generators and propane use shall require approval of the fire department.

2. Food tucks.

a. Locations.

(1) Food trucks shall be located within areas that provide adequate vehicle sight visibility at intersections and shall not impede ADA/TAS accessible ramps and sidewalks.

(2) Food trucks shall comply with Section 12.46 (Mobile Food Vendors).

(3) Food trucks shall comply with Section 12.44 (Stopping, Standing and Parking Generally), Chapter 12.48 (Loading Zone, Bus and Taxi Stands) and Chapter 12.56 (Parking Meters).

b. Operations.

(1) Mobile food trucks shall comply with the provisions of Section 9.12 (Food and Food Handling Establishments).

(2) Vendors are responsible for obtaining all licenses and permits as required by law for the legal operation of food vending concessions. All applicable permits and licenses shall be affixed to the vending unit at all times.

(3) Sound amplifying devises including, but not limited to loud speakers, public address systems, radios, televisions and strobe lights or similar devices are prohibited.

(4) Vendors shall provide for trash and/or grease disposal. All trash and/or grease disposal receptacles shall not be placed within the pedestrian path of travel.

(5) Generators and propane use shall require approval of the fire department.

(6) Tables and chairs are permitted provided they do not impede the pedestrian path of travel.

R. Sidewalk Retail Vending.

1. General Provisions:

a. "Sidewalk retail vending" is the selling of merchandise on the sidewalk area adjacent to a commercial building with a zero lot line and is an accessory use in a zoning district where a retail establishment is lawfully operating on the first floor premises by the same entity operating such retail establishment.

b. "Vending area" is the public right-of-way immediately adjacent to the permittee's property, measuring no more than fifty-percent (50%) of the sidewalk area abutting the permitted property, except that in the area designated as downtown in the City of El Paso Comprehensive Plan, "vending area" shall measure no more than three three-foot by nine-foot areas abutting the permitted property.

2. Application documentation. Application for a permit or license to conduct sidewalk retail vending shall be filed with the city. The applicant shall pay the established fee. Such application shall include the following information:

a. The name and address of the applicant.

b. The legal address of the real property adjacent to the site proposed for the sidewalk retail vending.

c. Proof of ownership of the real property adjacent to the site proposed for sidewalk retail vending.

d. One Year Term Permit or license—will require an operational permit issued by the El Paso Fire Department. Permits or licenses for more than a one-year term with a maximum of a five-year term—will require an operational permit and a valid certificate of occupancy issued in accordance with Title 18.02.108 of the El Paso City Code, for the first floor of the building adjacent to the site proposed for sidewalk retail vending and any storage areas above the first floor.

e. A dimensioned, detailed site plan showing the proposed layout of the proposed vending area. The site plan shall include any city or utility infrastructure located within the proposed vending area. If applicant proposes to use an awning to hang merchandise, a structural drawing of such awning is required.

f. Two color pictures (front and side) of the proposed vending area.

g. A description of the merchandise to be sold in the vending area.

h. A statement of the hours of operation of the retail establishment(s) lawfully operating on the first floor of the real property adjacent to the vending area.

i. The name of the retail establishment(s) lawfully operating on the first floor of the real property adjacent to the vending area, and a description of the merchandise sold in the establishment.

3. The permit or license may be issued for a term between one to five years from the date of issuance, depending on the application documentation. Permittee is responsible for renewing his/her permit or license by submitting a request for renewal to the city and paying the required fee. Failure to do so in accordance with all the terms and conditions of this section may result in the loss of the ability to renew.

4. Standards for sidewalk retail vending.

a. Only the types of retail merchandise sold in the adjacent building can be displayed in the vending area.

b. The majority of merchandise shall be inside of the retail establishment(s) in the adjacent building and all financial transactions must occur inside such retail establishment.

c. Sidewalk retail vending shall only operate when the entity that it is associated with it is open to the public in accordance with the normal business operating days and hours posted.

d. No permanent structure may be affixed to the sidewalk or the exterior of any building. The permittee shall be responsible for the costs to repair any damage caused to any sidewalk or public property as a result of the permittee's operations under this chapter.

e. A minimum of four feet of unobstructed pedestrian sidewalk access is required between the outer edge of the vending area and the curb, and the vending area shall comply with all Americans with Disabilities Act requirements, the Texas Accessibility Standards, and other applicable regulation, ordinance or law.

f. Building access and egress shall be maintained in accordance with Title 9.52 of the El Paso City Code. A minimum of three feet of unobstructed access shall be maintained at all times at the entrances and/or exits of the abutting real property and/or any adjacent business or real property.

g. Vending displays shall not completely cover the windows of the real property, and shall allow pedestrians a view of the inside retail spaces.

h. No equipment, including but not limited to tables, booths, chairs, or electrical lines utilized in conjunction with the vending area may be located within fifteen feet of any sprinkler system, fire hydrant and fire appurtenances, water supply shutoff valve, streetlight power boxes or traffic signal cabinets.

i. No equipment, including but not limited to tables, booths, chairs, or electrical lines utilized in conjunction with the vending area may be located within five feet of any connections to gas meters, sanitary sewer manholes and/or other utility equipment.

j. Display racks, tables and shelving used in conjunction with the vending area shall be finished or painted. Tables and shelving shall be skirted or otherwise adorned to cover the view of the under structures/legs.

k. Display of merchandise shall not exceed five feet in height from the ground, or seven feet if located in an area designated as downtown in the City of El Paso Comprehensive Plan, and is not permitted outside of the vending area.

l. Hanging of merchandise from the roof or awning of the primary retail structure is permitted within the vending area, provided a minimum seven foot clearance is maintained between the lowest portion of the merchandise and the finished grade of the sidewalk unless such hanging is above other merchandise displayed on items affixed to the ground.

m. No advertising signs are permitted within the vending area, except for pricing signs and each sign shall measure no more than one square foot in size.

n. No stocking of merchandise is permitted in the vending area unless it is hidden from public view.

o. Packing or shipping cardboard is prohibited, except for containers in which merchandise is packaged for sale (i.e., shoe boxes).

5. Permittee responsibilities.

a. Permittee shall keep the vending area free and clear of litter, debris, and any substance that may damage the sidewalk or cause pedestrian injury at all times.

b. Permittee shall be responsible for all maintenance of the vending area and shall repair any damage caused to the right-of-way by the vending activity.

c. Permittee shall not construct, or allow to be constructed, any improvements or structures in the vending area, or allow any alterations to be made to the vending area without prior written consent of the city.

d. Permittee shall, at its own expense, provide for the repair of all water lines, storm and sanitary sewer lines, service lines and water meters owned by the city that permittee, its employees, contractors, agents or assigns damage so that such repair complies with all City Code requirements.

e. The city shall have the power at any time to order and require permittee to immediately remove and abate any portion of the vending area that is dangerous to life or property by written notice. Should permittee, after written notice, fail or refuse to comply within a reasonable time, the city shall have the power to remove or abate the same, at the expense of permittee. In the event city removes or abates the vending area as provided herein, permittee shall not be compensated for any loss associated with such removal or abatement of the vending area, or associated revenue, nor shall the city be liable to the permittee for any direct, indirect or consequential damages due to the removal or abatement of the vending area.

f. Permittee shall not assign the designated vending area, nor allow the same to be assigned by operation of law or otherwise, or sublet or sell the designated vending area or any part thereof.

6. City Rights and Authority.

a. Throughout the term of the permit, the city expressly reserves the right to install, repair, or reconstruct the city right-of-way used or occupied by permittee, any streets or alleys and all ancillary public uses, usual and customary in connection with streets and alleys, expressly including but not limited to, drainage facilities and structures.

b. The city reserves the right to lay and permit to be laid, utility lines including, but not limited to, storm and sanitary sewer, gas, water, and other pipelines or cables, and to do and permit to be done, any underground and overhead installation or improvement that may be deemed necessary or proper by the city in, across, along, over or under the vending area occupied by permittee, and to change any curb or sidewalk or the street grade of any street. The city shall notify permittee of work to be performed as herein described 30 days prior to the start of such work. The city shall not be liable to permittee for any damage resulting there from, nor shall the city be liable to permittee for any damages arising out of the performance of

any work by the city, its contractors or subcontractors, not willfully and unnecessarily occasioned; provided, however, nothing herein shall relieve any other persons or entities from liability for damage to the vending area. If the city requires permittee to alter, change, adapt, remove, or relocate the vending area due to imminent public safety concerns, or because of changes in the grade of the vending area or in the location or manner of constructing a water pipe, sewer pipe or other underground or aboveground pipes owned by the city, permittee shall make the alterations or changes as soon as practicable when ordered in writing by the city without claim for reimbursement or damages against the city. If these requirements impose a financial hardship upon permittee, permittee shall have the right to present alternative proposals for the city's consideration.

c. The city reserves the right to use the surface, subsurface and airspace within the vending area for any public purposes allowed by law and deemed necessary by the city and to do or permit to be done any work in connection therewith that may be deemed necessary and proper by the city on, across, along, under or over said vending area occupied by permittee, provided such use does not interfere with permittee' s use of the vending area. Whenever, because of such work, it is deemed necessary by the city to alter, change, adapt, conform or relocate portions of the vending area, such alteration or change or relocation shall be made by permittee when ordered in writing by the city without any claim for reimbursement or damages against the city.

d. City is not responsible for any theft, damages or destruction of goods or property of permittee both during the term of the permit after permittee vacates the designated vending area. If said goods and any other property placed by permittee in the vending area are not removed after hours of operation, the city may remove the same without further notice or liability.

7. License.

a. An entity, organization or group of businesses may apply for a license to create a designated district where such group will administer a program for intake of applications and issuance of authorization to operate sidewalk retail vending for individual property owners within the designated district. The city shall charge a license fee based upon the estimate of the number of authorizations contemplated within the license, and shall be adjusted according to the number of actual authorizations provided at each reporting period.

b. All sidewalk retail vending authorized thereunder shall comply with all terms and conditions of this section, and such group shall provide quarterly reporting of all vendors participating in their program, including the name, address, and proof of insurance.

c. Such group may provide services such as the required insurance to cover each entity authorized, administrative support, and may act as a liaison to the city.

d. Such group may charge a fee for participation in the licensed program that shall not exceed 150 percent of the annual fee charged by the city.

e. Any license issued hereunder does not restrict the rights of any other person from acquiring a permit directly from the city under this section. (Ord. 16983 §§ 1—3, 2008; Ord. 16855 § 1, 2008; Ord. 16697 § 1, 2007; Ord. 16612 § 1, 2007; Ord. 16477 § 1, 2006; Ord. 16319 § 1, 2005; Ord. 15971 §§ 1—3, 2004; Ord. 15884 § 1, 2004; Ord. 15222 § 1, 2002; Ord. 15018, 2002; Ord. 14871 §§ 1—3, 2001; Ord. 13342 §§ 1, 2, 1997; Ord. 13317 §§ 1—3, 1997; Ord. 13152 § 124, 1997; Ord. 13031 § 1, 1996; Ord. 12817 § 1, 1996; Ord. 12516 § 1, 1995; Ord. 12315 § 1, 1995; Ord. 12172 § 1, 1993; Ord. 12106 §§ 1—4, 1994; Ord. 11653 §§ 1—4, 1993; Ord. 11572 § 1, 1993; Ord. 11482 §§ 1—3, 1993; Ord. 10910 § 1, 1992; Ord. 10658 § 1, 1991; Ord. 10363 § 1, 1991)
(Ord. No. 17154, § 2, 7-28-2009, eff. 9-1-2009; Ord. 17181, § 1, 8-25-2009, eff. 9-1-2009; Ord. No. 17321, § 11, 5-11-2010; Ord. No. 17362, § 1, 7-27-2010; Ord. No. 18255, §§ 1—3, 10-8-2014; Ord. No. 18382, §§ 2a)—2g), 7-7-2015; Ord. No. 18246, §§ 1, 2, 9-16-2014; Ord. No. 18480, § 1, 3-22-2016; Ord. No. 18690, § 1, 6-13-2017; Ord. No. 18740, § 1, 11-14-2017; Ord. No. 18785, § 2, 5-1-2018; Ord. No. 18819, § 1, 7-24-2018; Ord. No. 19164, § 1, 4-13-2021; Ord. No. 019613, §§ 2—8, 4-23-2024)

15.08.125 Violation and penalty.

A. A person commits an offense if he violates or attempts to violate a provision of this chapter applicable to the person. A separate offense is committed each day during which an offense occurs. A person who commits an offense under this chapter is subject to the penalties set forth in Chapter 1.08 of this Code.

B. Prosecution for an offense under this chapter does not prevent the use of other enforcement remedies or procedures by the city against a person charged with the offense. (Ord. 12241 § 1 (part), 1995)

15.08.130 Right-of-way used by certificated telecommunications providers.

A. This section regulates the use of city right-of-way by certificated telecommunications providers. This section shall be construed under and in accordance with the laws and regulations of the State of Texas and the City Charter and City Code to the extent that such Charter and City Code are not in conflict with or in violation of the Constitution and laws of the United States or the State of Texas.

B. Definitions. For the purpose of this section, the following definitions apply to the following terms:

1. "Certificated telecommunications provider," hereinafter "Provider," means a person who has been issued a certificate of convenience and necessity, certificate of operating authority, or service provider certificate of operating authority by the commission to offer local exchange telephone service.

2. "Commission" means the public utility commission.

3. Facilities.

4. "Street", or "public way" or "public right-of-way" or "public rights-of-way" or "rights-of-way" or "right-of-way" means the surface of, and the space above and below a public street, road, highway, freeway, land, path, public way or place, alley, court, boulevard, parkway, drive, or other easement now or hereafter held by or under the control of the city, to which the city holds the property rights in regards to the use of utilities.

5. "U.S.C." means United States Code.

C. Purpose. No provider shall commence or continue with the construction, installation or operation of facilities within the right-of-way in the city except as provided by the ordinances of the city and the directives of the public works department.

D. Registration and Construction Permits.

1. Registration. In order to protect the public health, safety and welfare, all providers using the right-of-way will register with the City of El Paso Public Works Department. Registration and permits will be issued in the name of the person who will own the facilities. Registration with the city must be renewed annually during January. If a registration is not renewed, the facilities of the user will be deemed to have been abandoned. When any information provided for the registration changes, the user will inform the City of El Paso no more than thirty (30) commission days after the date the change is made. Registration information submitted to the city shall include:

a. The name of the provider;

b. The name, address and telephone number of people who will be contact person(s) for the provider;

c. A copy of the certificate issued by the commission;

d. The name, address and telephone number of any contractor or subcontractor who will be working in the right-of-way on behalf of the provider;

e. The name(s) and telephone number of an emergency contact who shall be available twenty-four hours a day;

f. Proof of insurance and bonds:

i. Provider must submit a certificate of liability insurance in the amount of six million dollars; one million dollars ($1,000,000.00) primary plus five million dollars ($5,000,000.00) umbrella or other securities as acceptable to the director of public works or his/her designee for the city. The city shall be named as additional insured on such certificate,

ii. The coverage must be on an "occurrence" basis and must include coverage for personal injury, contractual liability, premises liability, medical damages, underground, explosion and collapse hazards,

iii. Each policy must include a cancellation provision in which the insurance company is required to notify the city in writing not fewer than thirty days before canceling, failing to renew, or reducing policy limits,

iv. The provider shall file with the public works department the required original certificate of insurance prior to any commencement of work. The certificate shall state the policy number; name of insurance company; name and address of the agent or authorized representative of the insurance company; name, address and telephone number of insured; policy expiration date; and specific coverage amounts;

g. Provider shall file a surety bond which will be valid prior to the commencement of any construction through one full year after the completion of the construction from a surety company authorized to do business in the State of Texas in the amount of the estimated amount of the value of the work to be performed that year to guarantee that the restoration of the right-of-way in the event the applicant leaves a job site in the right-of-way unfinished, incomplete or unsafe.

2. Construction Permits.

a. No provider shall perform any construction or installation of facilities in the right-of-way without first obtaining a construction permit, except as provided herein. The permit will be in the name of the person who will own the facilities to be constructed. The permit application must be completed and signed by a representative of the provider.

b. Emergency responses related to existing facilities may be undertaken without first obtaining a permit; however the public works department must be notified in writing by the next business day of any construction related to an emergency response; including a reasonably detailed description of the work performed in the right-of-way and an updated map of any facilities that were moved.

c. The phrase "construction or installation of facilities" does not include repair or maintenance of existing facilities unless such repair or maintenance requires the breaking of pavement or the closure of a nonresidential traffic lane; or the installation of facilities necessary to initiate service to a customer's property or excavation or boring.

d. The construction permit shall state to whom it is issued, location of work, location of facilities, dates and times work is to take place and any other conditions set out by the director of public works or his/her designee.

e. The person requesting a permit will provide the director of public works or his/her designee with documentation in the format specified by the public works department describing:

i. The proposed, approximate location and route of all facilities to be constructed or installed and the provider's plan for right-of-way construction;

ii. Engineering plans which will be on a scale of one inch (1″) equals fifty feet (50′) unless otherwise approved by the public works department;

iii. Detail of the location of all right-of-way and utility easements which provider plans to use;

iv. Detail of all existing utility facilities, horizontally and vertically, in relationship to provider's proposed route;

v. Detail of what provider proposes to install, such as pipe size, number of interducts, valves, etc;

vi. Detail of plans to remove and replace asphalt, concrete in street in accordance with city standards;

vii. Drawings of any bores, trenches, handholes, manholes, switch gear, transformers, pedestals, etc. including depth notation;

viii. Handhole and/or manhole typicals of type of manholes and/or handholes provider plans to use or access;

ix. Complete legend of drawings submitted by provider;

x. Five sets of engineering plans must be submitted with permit application;

xi. The name, address and phone numbers of the contractor or subcontractor who will perform the actual construction, including the name and telephone number of an individual with the contractor who will be available at all times during construction;

xii. The construction and installation methods and materials to be employed for the protection of existing structures, fixtures, and facilities within or adjacent to the right-of-way, and the dates and times work will occur, all of which (methods, dates, times, etc.) are subject to approval of the Director of Public Works or his/her designee;

xiii. A statement that proof of insurance, bond or other required financial information is current and on file.

f. All construction and installation in the right-of-way shall be in accordance with the construction permit for the facilities. The director of public works or his/her designee shall be provided access to the work and to such further information as he or she may reasonably require to assure compliance with the permit.

g. A copy of the construction permit and approved engineering plans shall be maintained at the construction site and made available for inspection by the director of public works or his/her designee at all times when construction or installation work is occurring.

h. All construction or installation work authorized by permit must be completed in the time specified in the construction permit. If the work cannot be completed in the specified time periods, the provider may request an extension from the director of public works or his/her designee.

i. A copy of any permit or approval issued by federal or state authorities for work in federal or state right-of-way located in the City of El Paso will be posted at work site.

j. A request for a permit must be submitted at least fifteen working days before the commencement of work proposed in the request, unless waived by the director of public works or his/her designee.

k. Requests for permits will be approved or disapproved by the director of public works or his/her designee within a reasonable time of receiving all the necessary information. The director of public works or his/her designee will use his/her best efforts to approve or disapprove a request for permit as soon as possible.

l. The public works department can request a pre-construction meeting with the provider and his construction contractor.

m. Permit applications are required for construction on new, replacement or upgrading of the provider's facilities in the right-of-way either aerial or underground.

E. Construction Standards.

1. Department of Public Works must be notified twenty four hours in advance that construction is ready to proceed by either the provider, his contractor or representative.

2. All construction shall be in conformance with city codes and applicable local, state and federal laws. The following shall be done and not by way of limitations:

a. Three by three feet information signs stating the identity of the person doing the work, telephone number and provider's identity and telephone number shall be placed at the location where construction is to occur not less than forty-eight

hours prior to the beginning of work in the right-of-way and shall continue to be posted at the location during the entire time the work is occurring.

b. Erosion control measures (i.e. silt fence) and advance warning signs, markers, cones and barricades must be in place before work begins.

c. Provider must show proof of EPA approved plans relating to storm water and erosion when applicable or a letter stating they are not required to obtain such plans.

d. Lane closures on major thoroughfares are permitted between 8:30 a.m. and 4:00 p.m. only, unless the public works department grants prior approval. Arrow boards will be required on lane closures, with all barricades, advance warning signs and 36 inch reflector cones placed according to the specifications of the public works department.

e. Provider is responsible for the workmanship and any damages by a contractor or subcontractor. A responsible representative of the provider will be available to public works at all times during construction.

f. permittee shall be responsible for storm water management erosion control that complies with city, state and federal guidelines. Requirements shall include, but not be limited to, silt fencing around any excavation that will be left overnight, silt fencing in erosion areas until a reasonable amount of vegetation is established as determined by the department of public works, barricade fencing around open holes, and high erosion areas will require wire backed silt fencing.

g. Provider or contractor or subcontractor will notify the public works department immediately of any damage to other utilities, either city or privately owned.

h. When a street or sidewalk cut is required, prior approval must be obtained from the public works department and all requirements of the public works department shall be followed. Repair of all street and sidewalk removals must be made promptly to avoid safety hazards to vehicle and pedestrian traffic.

i. Installed facilities must not interfere in any manner with city or other utilities or facilities.

j. New nonmunicipal utilities must be installed at a minimum of six feet depth, unless a lesser depth is approved by the public works department.

k. All directional boring shall have locator place bore marks and depths while bore is in progress. Locator shall place mark at each stem with paint dot and depth at least every other stem.

l. The working hours in the rights-of-way are 7:00 a.m. to 6:00 p.m., Monday through Friday. Work that needs to be performed after 6:00 p.m. Monday through Friday must be approved in advance by the public works department. Any work performed on Saturday must be approved twenty-four hours in advance by the public works department. Directional boring is permitted only Monday through Friday, 7:00 a.m. to 6:00 p.m., unless approved in advance. No work will be done, except for emergencies, on city holidays.

m. Contractors working for provider are responsible for obtaining line locates from all affected utilities prior to any excavation.

n. Provider will be responsible for verifying the location both horizontal and vertical of all affected facilities whether by potholing or hand digging prior to any excavation or boring with the exception of work involving lane closures, as discussed above.

o. Placement of all manholes and/or handholes must be approved in advance by the public works department.

F. "Plans of Record" Plans.

Providers will provide the public works director or his/her designee with "plans of record" (also called "as built" plans) within ten days of completion of facilities in the right-of-way and annually thereafter. Providers who have facilities in the right-of-way existing as of the date of this ordinance and who have not provided "plans of record" plans, shall do so not later than thirty days after the passage of this ordinance. The plans shall be provided to the city in the format specified by the public works director or his/her designee and with

as much detail and accuracy as required by the public works director. All the criteria specified for plans submitted for the initial permit will be required for the plans of record. Submittal of "plans of record" shall be in digital formatting as well as written or in any other format requested by the public works department.

G. Conformance with Public Improvements.

Whenever by reasons of widening or straightening of streets, water or sewer line projects, or any other public works projects (e.g. install or improve storm drains, water lines, sewer lines, etc.) it shall be deemed necessary by the governing body of the city to remove, alter, change, adapt or conform the underground or overhead facilities of a right-of-way user, such alterations shall be made by the owner of the facilities at their expense within thirty days from receipt of notice to make the alterations, unless a different schedule has been approved by the public works director or his/her designee. Facilities not moved after thirty days or within the approved schedule shall be deemed abandoned.

H. Improperly Installed Facilities.

1. Any person doing work in the city right-of-way shall properly install, repair, upgrade and maintain facilities.

2. Facilities shall be considered to be improperly installed, repaired, upgraded or maintained if:

a. The installation, repairs, upgrade or maintenance endangers people;

b. The facilities do not meet the applicable city codes;

c. The facilities are not capable of being located using standard industry practices;

d. The facilities are not located in the proper place in accordance with the directions provided by the public works department; or

e. The facilities are placed in an area that interferes with city owned facilities such as water or sewer lines or streets. Privately owned facilities shall be considered to interfere with city owned facilities if the privately owned facility is within three feet horizontally. Public works may direct permittees to be additional distance or separation from city utilities. Nothing in this section shall diminish the authority of public works to direct specific placement of specific lines.

I. Type of Facilities.

1. The public works director may require or approve the location of facilities underground.

2. When poles are used, the type of poles, location, depth, upgrades, etc. shall be subject to the approval of the public works department.

3. Public works director or his/her designee may approve size of facilities to be installed or require proof of need to install the size of system requesting to be permitted.

J. Restoration of Property.

1. Providers shall restore property affected by construction of facilities to a condition that is equal to or better than the condition of the property prior to the performance of the work. Restoration must be approved by the public works department.

2. Restoration must be to the reasonable satisfaction of the public works department. The restoration shall include, but not be limited to:

a. Replacing all ground cover with equal to the type of ground cover damaged during work or better either by sodding or seeding, as directed by public works;

b. Installation of all manholes and handholes, as required;

c. Backfilling all bore pits, potholes, trenches or any other holes shall be done daily, unless other safety requirements are approved by public works;

d. Leveling of all trenches and backhoe lines;

e. Restoration of excavation site to city specifications;

f. Restoration of all landscaping, ground cover, and sprinkler systems.

3. All locate flags shall be removed during the clean up process by the permittee or his/her contractor at the completion of the work.

4. Restoration must be made in a timely manner as specified by approved public works schedules and to the satisfaction of the public works director or his/her designee. If restoration is not satisfactory and performed in a timely manner all

work in progress, except that related to the problem, including all work previously permitted but not complete will be halted and a hold on any permits not approved until all restoration is complete.

K. Revocation or Denial of Permit.

If any of the provisions of this ordinance are not followed, a permit may be revoked by the public works director or his/her designee. If a person has not followed the terms and conditions of this ordinance in work done pursuant to a prior permit, no new permits may be issued until corrective action has been completed.

L. Penalties.

1. Criminal Penalties.

a. Any violation or failure by the provider or person in control of the work to abide by, and comply with, any provision or requirement of this section shall be violation of city ordinance, and shall be punished as a Class C Misdemeanor, subject to a fine up to five hundred dollars ($500.00) per occurrence, unless otherwise provided by state law.

b. Each day upon which there exists a violation of this chapter, or a failure to abide by, or comply with, any provision or requirement of this chapter, shall constitute a separate occurrence, and may subject the offender to separate criminal penalties.

c. Prosecution pursuant to this section is in addition to and does not supplant other remedies.

2. Civil Penalties.

a. Civil penalties may be imposed for the violation of any provision of this chapter, as follows:

i. Up to one thousand dollars ($1,000.00) for each violation, and each day of a continuing violation may be considered a new violation; and/or

ii. If applicable, default and revocation of any or all permits granted to allow work in the rights-of-way, subject to the procedural guidelines noted in this chapter and any agreement which applies to the right-of-way user, and farther subject to any limitations imposed by federal or state law.

b. In imposing the penalties and the amount the city may weigh all applicable factors, such as damages caused by the violation, reasons for the violation, the seriousness of the violation, and all other factors.

c. Monetary civil penalties may be imposed in the manner prescribed by either local or state law.

d. In addition, the city council may order specific performance of any actions required by this chapter or required by a franchise, license, or permit, including the permit authorizing work to be performed in the right-of-way, or any other agreement or authorization. (Ord. 14202 § 1, 1999)

15.08.140 City wayfinding program.

A. Purpose. The purpose of these provisions is to establish a city wayfinding program that will provide information to the public on key areas of interest within the city and enable the public to safely and efficiently arrive at and maneuver within those areas of interest. Establishment of the city wayfinding program will help to achieve the following goals:

1. Develop a system that will assist the public identify the location of areas of interest within the city.

2. Identify pathways for vehicular and pedestrian traffic into and out of the areas of interest.

3. Identify and direct vehicular traffic to parking areas.

4. Identify pedestrian pathways from parking areas to amenities and events within the areas of interest.

5. Create an awareness of destinations and promote those areas thereby creating a safer and more user friendly environment that will enhance the visitor's experience and encourage more pedestrian and/or bicycle traffic.

6. Reinforce community identity and promote tourism.

B. Definition. "Wayfinding sign" means a sign, map, or marker designed, constructed, installed and managed by the city located on city property or right-of-way placed by the city that guides the

traveling public to key civic, cultural, visitor, and recreational destinations; educational, scholastic or artistic events; community or public interest activities or destinations; designated or recognized civic routes or trails; areas of historical or archaeological significance; or trade shows, events and festivals. Any sponsorship information contained on a wayfinding sign shall be limited to twenty percent of the sign and shall only contain the name of the sponsor.

C. Design standards. To insure quality and consistency, the city development department shall establish design standards for the wayfinding signs to include the following:

1. A standard template for graphical design and presentation of content.

2. All signs shall contain the City of El Paso logo. Upon approval of the city manager, other sponsorship logos may also be placed on the sign, but the sponsorship must be a person, business or entity within the informational area of the wayfinding sign.

3. Size of the sign and method of construction.

D. Location. The city development department shall establish a location system for wayfinding signs. By resolution, the city council may establish areas of interest for purposes of determining where wayfinding signs are placed.

E. The city may contract out with a third party for management of the city's wayfinding program, provided that the design, construction and installation is in accordance with the provisions of this section, to include the standards established by the city development department.
(Ord. No. 17855, § 1, 8-21-2012)

15.08.150 Shared mobility devices.

A. Definitions. For purposes of this section, the following terms have the following definitions.

1. "Director" means the person designated by the city manager in charge of overseeing the enforcement of this section.

2. "Electric personal assistive mobility device" means a two non-tandem wheeled device designed for transporting one person that is self-balancing and propelled by an electric propulsion system with an average power of seven hundred fifty watts or one horsepower.

3. "Non-personally identifiable information" or "non-PII" means data or information that is anonymous.

4. "Person" means a natural person as well as any entity or organization formed under the laws of any state in the United States or abroad.

5. "Permit" means a permit issued by the director under this section.

6. "Public right-of-way" means any portion of a street or sidewalk dedicated to the City of El Paso for the use of the public.

7. "Risk manager" means the person designated by the city manager as such.

8. "Shared use mobility device(s)" means a motor driven, or non-motor driven, bicycle, scooter, electric personal assistive mobility device, or other similar device made available by a person to the public for rent regardless of whether a fee is charged for the rental of such device. The definition applies regardless of whether the shared use mobility device is dock less or must be returned to a docking station.

B. Prohibition. A person shall not place a shared use mobility device on the public right-of-way without obtaining a permit under this section of the El Paso City Code. A person who obtains a permit under this section shall abide by all requirements prescribed under this section as well as all regulations adopted by the director under the authority granted to the director under this section.

C. Permit. A person who wants to place a shared use mobility device on the public right-of-way shall apply for a permit on an application form as required by the director. The director shall issue a permit to a person that complies with requirements of this section and any regulations adopted by the director pursuant to this section. The director shall not issue a permit to a person that does not comply with the requirements of this section or any regulations adopted by the director pursuant to this section. A person is not eligible to

apply for a permit for one year following a revocation of a permit under this section. Unless terminated earlier as provided under this section, all permits issued under this section expire after twelve months of issuance regardless of the date such permit is issued. No permit shall be issued to a person owing ad valorem taxes to the city or who has defaulted on an agreement with the city within five years preceding the application for a permit under this section. Notwithstanding anything to the contrary, a permit may only be issued to a person who owns the shared use mobility devices for which the permit is requested. All application forms and documents under this section must be executed by the owner of the shared use mobility devices. Nothing in the section prohibits city council from amending this section to change the expiration date of all permits.

D. Regulations and Authority of Director. The director is authorized to perform the following:

1. Adopt, amend, and repeal regulations for the use, deployment, operation, hours of operation, maintenance, disposal of batteries, customer service, terms of use, public education, identification, contact information, personnel, equipment, speed limits, placement and parking, proof of ownership, timeframes for compliance, advertisement, redistribution, and removal of shared use mobility devices. The director is also authorized to adopt, amend, and repeal regulations regarding the collection of non-personally identifiable information data including, but not limited to, the use and sharing of data with the City of El Paso. The city shall only use this information for the purposes of evaluating public transportation improvements, other public improvements, and public services. The city may release such non-PII pursuant to any request made under the Texas Public Information Act.

2. Establish an application form to ensure that all requirements of this section, and any regulations adopted by the director pursuant to this section, are met.

3. Establish and modify boundaries within the City of El Paso for placement of shared use mobility devices.

4. Establish limits on the number and deployment of shared use mobility devices allowed within the boundaries established by the director. The director shall consider all factors, including but not limited to, the need or demand of shared use mobility devices within the boundaries established by the director. The director may request in the application form any relevant data necessary to allow the director to evaluate requests to increase the number of shared use mobility devices allowed under a permit.

5. Require applicants to show proof of compliance with provisions of this section or regulations adopted by the director.

6. Prohibit the placement, or require the immediate removal, of shared use mobility devices in certain areas of the city to accommodate any events or construction taking place on the public right-of-way or address any emergencies that require emergency traffic control.

7. Deny a permit for failure to comply with this section or the regulations adopted by the director under this section. The director may deny a permit for up to one year following a person's failure to comply with this section or the regulations adopted by the director under this section.

8. Revoke a permit after three violations by a person of any requirements under this section or the regulations adopted by the director under this section. Notwithstanding anything to the contrary, the director shall revoke a permit after the first failure by a person to comply with the requirements of subsections P. and G. below.

9. Deny or revoke a permit upon discovery of any false information submitted by a person under this section.

10. Remove any shared use mobility devices placed on the public right-of-way in violation of this section or any regulation adopted by the director under this section. The director shall assess all costs incurred by the city to the owner of the shared use mobility device.

E. Proof of Ownership. A person shall submit proof of ownership for all shared use mobility devices under a permit.

F. Insurance Requirements. The risk manager shall establish the coverages and amounts of insurance that will be required to obtain a permit under this section. A person applying for a permit shall submit, with the application, a copy of the following documents showing proof of compliance with the coverages and amounts established by the risk manager: a certificate of insurance and a complete insurance policy with all endorsements. A person shall maintain the coverages and amounts of insurance as established by the risk manager for the duration of the permit. A person shall add the City of El Paso as an additional insured to all insurance policies under this section.

G. Indemnification and Release Requirements. Prior to obtaining a permit, a person applying for a permit shall agree in writing to an indemnification and release agreement in the form approved by the city's risk manager after review by the city attorney's office. Refusal to indemnify the city, as required under the indemnification and release agreement, will result in a revocation of a permit and future denial of a permit under this section.

H. Bond Requirements. The risk manager shall establish bond or irrevocable letter of credit requirements to cover the following: any damages by the public right-of-way caused by a shared use mobility device, costs of removing from the public right-of-way a shared use mobility device, and costs of storing and disposing of any shared use mobility devices. A person shall comply with the bond requirements or irrevocable letter of credit requirements established in this section for the duration of a permit.

I. Fees Charged to Customers. A person holding a permit under this section shall clearly communicate rates to customers prior to the use of a device by any person.

J. Maintenance and Charging. A person shall not perform maintenance on any shared use mobility device or charge any shared use mobility device on a public right-of-way.

K. Non-Transferability. Permits issued under this section are not transferable.

L. No Property Rights. A permit does not grant any person an exclusive right to any portion of the right-of-way.

M. Enforcement. The director, a code enforcement officer, and/or a City of El Paso police officer are authorized to enforce the provisions of this section and the regulations adopted by the director under this section. A person authorized to enforce this section is authorized to remove/relocate shared use mobility devices that are left unattended in a manner that threatens the public safety or welfare. A person authorized to enforce this section is also authorized to require a person using a shared use mobility device to remove/relocate a shared use mobility device that is left in a manner that threatens the public safety or welfare.

N. Termination. Any permits issued under this section may be terminated by city council for a public purpose as determined by city council. This provision does not limit the authority of the director under this section.

O. Fees and Costs. City council may establish fees related to this section in the annual budget resolution, including but not limited to fees for the use of the public right-of-way, fees for processing claims, and fees for impoundment of a shared use mobility device, as may be permitted by law. In addition, the city council may establish fees sufficient to cover the costs of processing claims related to shared use mobility devices received by the city. A person applying for a permit, holding a permit, or appealing a denial or revocation of a permit under this section shall pay the fees in the amounts provided in the annual budget resolution adopted by city council.

P. Damages by Shared Use Mobility Device. A person shall be responsible for the costs incurred by the city in repairing any damages to the public right-of-way or any other property owned by the City of El Paso caused by a shared use mobility device owned by the person or by the use of a shared use mobility device owned by the person regardless of who the user of the shared

use mobility device is at the time the damage was caused. The city, at its sole discretion, may elect to repair any damage caused by a shared use mobility device and asses the costs to the owner of the shared use mobility device. The owner of a shared use mobility who receives an invoice from the city under this section shall pay the invoice within thirty calendar days of receiving the invoice. The director shall revoke the permit of a person who fails to comply with the requirements of this provision.

Q. Appeal. A person may appeal the denial or revocation of a permit under this section by submitting an appeal request in writing to the city manager, or designee, and paying the required appeal fee within fifteen calendar days of an action to deny or revoke a permit. The city manager, or designee, shall hold a hearing within thirty calendar days of receiving an appeal request and appeal fee. The city manager, or designee, shall review the denial of a permit or revocation of a permit for compliance with the requirements of this section and the regulations adopted by the director under this section. A decision by the city manager, or designee, is final. A person may also appeal the assessment of any damages under subsection P. above in the same manner as described herein provided that prior to the appeal hearing the person pays the invoice assessed under subsection P.

R. Headings. All headings in this section are for reference purposes only and do not control the meaning of any provision under this section.

S. Penalty. A person who violates a provision under this section may be subject to any and all of the following:

1. A person who violates any provision under this section shall be found guilty of a Class C misdemeanor and punished by a fine not to exceed five hundred dollars. Each day a person fails to comply with the provisions of this section constitutes a separate offense.

2. A person that violates any provision under this section may have a permit denied or revoked.

3. A person that violates any provision under this section may have the person's share use mobility devices removed by the city from the public right-of-way. Such removal shall be at the sole expense of the person owning the shared use mobility device and the city may employ any methods allowed under law to recover the expenses of removing from the public right-of-way and storing a removed shared use mobility device. A person shall pay all expenses incurred by the city in the removal of a shared use mobility device before the city releases the shared use mobility device to the person. Any shared use mobility devices that remain unclaimed for a period of thirty calendar days following removal from the public right-of-way shall be disposed of in accordance to applicable law.

T. Abatement. Nothing in this section limits the City of El Paso's right to abate an unlawful obstruction or use of a public right-of-way. The city may remove from the public right-of-way any items unlawfully placed on the public right-of-way and dispose of such item, including by sale, after thirty calendar days of notification to the owner or following a reasonable, but unsuccessful, attempt to locate the owner of such item. The city is entitled to retain any proceeds of a sale disposing of an item in order to cover the costs incurred by the city for removal and storage of such item.

U. Not Applicable. This section does not apply to the following: a person, or government entity, placing a shared use mobility device on the public right-of-way pursuant to a valid permit or authorization issued under any other section of the El Paso City Code; or a government entity placing a shared use mobility device on the public right-of-way pursuant to an interlocal or other similar agreement with the City of El Paso. A permit under this section does not authorize a person to place or operate a shared use mobility device on private property or property owned or controlled by any other governmental entity, school

district, or institution of higher education, including but not limited to the University of Texas at El Paso.

(Ord. No. 18899, § 1, 1-8-2019; Ord. No. 19012, § 1, 1-21-2020; Ord. No. 19134, § 1, 1-19-2021; Ord. No. 19281, § 1, 1-19-2022; Ord. No. 019433, § 1, 1-31-2023; Ord. No. 019451, § 1, 3-28-2023)

15.08.160 Mobile billboards.

A. Definitions. For purposes of this section, the following terms have the following definitions.

1. "Mobile billboard" means a motor vehicle or trailer, which is used for the display of general advertising for hire.

2. "Director" means the individual designated by the city manager in charge of overseeing the enforcement of this section.

3. "Applicant" means a natural person as well as any entity or organization authorized to do business in the State of Texas and County of El Paso.

4. "Permit" means a permit issued by the director under this section.

5. "Public right-of-way" means any portion of a street or sidewalk dedicated to the City of El Paso for the use of the public.

6. "Changeable electronic variable message sign (CEVM)" means a sign which uses electronic technology that is capable of displaying changeable or intermittent images, such as by turning on or off various lighting elements. The term includes any illuminated sign on which such illumination is not kept stationary or constant in intensity and color at all times when such sign is in use, or which changes the visual image more than one time per twenty-four-hour period. The term includes display technology such as LED (light emitting diode) or digital displays which can vary in color or intensity, or any system which is functionally equivalent even if the message is static. The term also includes any display, or device, which changes the "static" message or copy on the sign, in "slide show" fashion, by electronic means.

B. Prohibition. An applicant shall not operate a mobile billboard on the public right-of-way without obtaining a permit under this section of the El Paso City Code. An applicant who obtains a permit under this section shall abide by all requirements prescribed under this section as well as all regulations adopted by the director under the authority granted to the director under this section.

C. Permit. An applicant who wants to operate a mobile billboard on the public right-of-way shall apply for a permit on an application form as required by the director. The director shall issue no more than three permits to three applicants that comply with requirements of this section and any regulations adopted by the director pursuant to this section. The director shall not issue a permit to an applicant that does not comply with the requirements of this section or any regulations adopted by the director pursuant to this section. An applicant is not eligible to apply for a permit for one year following a revocation of a permit under this section. Unless terminated earlier as provided under this section, all permits issued under this section expire one year from date of permit issuance. A permit may be renewed by submitting updated documents and providing payment of the annual fee, in accordance with the approved special privilege development agreement. An applicant shall apply for renewal at least sixty days before the expiration of the registration. No permit shall be issued to an applicant owing ad valorem taxes to the city or who has defaulted on an agreement with the city within five years preceding the application for a permit under this section. Notwithstanding anything to the contrary, a permit may only be issued to an applicant who owns the mobile billboard for which the permit is requested. All application forms and documents under this section must be executed by the owner of the mobile billboard. Nothing in the section prohibits city council from amending this section to change the expiration date of all permits.

D. Regulations. Mobile billboards shall comply with the following:

1. Each applicant who has been issued a permit shall be limited to no more than three mobile billboard vehicles operating on city streets at one time.

2. Mobile billboards shall not contain sound.

3. CEVM mobile billboards are prohibited.

4. Any illumination shall comply with the city's dark sky ordinance.

5. Mobile billboards shall operate only on designated arterials, operating on local streets and freeways is prohibited.

6. Mobile billboards shall be prohibited from operating during the hours between 12:00 a.m. and 8:00 a.m.

7. Mobile billboards shall comply with the following dimensions:

a. The mobile billboard sign face area shall not exceed fourteen feet in height measured from the ground.

b. The mobile billboard sign face area shall not exceed twenty-two feet in length.

c. The mobile billboard sign face area shall not exceed two hundred twenty square feet in size.

8. The operation of mobile billboards shall be prohibited when sustained winds in excess of thirty-five miles per hour exist within the immediate vicinity of the mobile billboard or its proposed route.

9. The issued permit shall be displayed at all times in an open and conspicuous place on the premises of the permitted mobile billboard.

E. A permit may be denied for failure to comply with this section or the regulations adopted by the director under this section. The director may deny a permit for up to one year following a applicant's failure to comply with this section or the regulations adopted by the director under this section. A permit may be denied or revoked upon discovery of any false information submitted by an applicant under this section. The director may remove any mobile billboard placed on the public right-of-way in violation of this section or any regulation adopted by the director under this section.

F. Proof of Ownership and Insurance. An applicant shall submit proof of ownership and insurance for all mobile billboards under a permit and shall comply with all other applicable traffic laws and regulations.

G. Maintenance. Applicants shall ensure every mobile billboard is maintained in a condition to be operated safely upon city public rights-of-way. An applicant shall not perform maintenance on any mobile billboard on a public right-of-way.

H. Non-Transferability. Permits issued under this section are not transferable.

I. No Property Rights. A permit does not grant any applicant an exclusive right to any portion of the right-of-way.

J. Enforcement. The director, a city code enforcement officer, and/or a City of El Paso police officer are authorized to enforce the provisions of this section and the regulations adopted by the director under this section. An applicant authorized to enforce this section is authorized to remove mobile billboards that threaten the public safety or welfare. An applicant authorized to enforce this section is also authorized to require an applicant operating a mobile billboard to remove/relocate a mobile billboard that threatens the public safety or welfare.

K. Termination. Any permits issued under this section may be terminated by city council as determined by city council, at its sole and absolute discretion. This provision does not limit the authority of the director under this section.

L. Fees and Costs. City council may establish fees related to this section in the annual budget resolution, including but not limited to fees for the use of the public right-of-way, and fees for impoundment of a mobile billboard, as may be permitted by law.

M. Headings. All headings in this section are for reference purposes only and do not control the meaning of any provision under this section.

N. Penalty. An applicant who violates a provision under this section may have a permit denied or revoked.

O. Not Applicable. This section does not apply to the following: an applicant, or government entity, operating a mobile billboard on the public right-of-way pursuant to a valid permit or authorization issued under any other section of the El Paso City Code; or a government entity operating a mobile billboard on the public right-of-way pursuant to an interlocal or other similar agreement with the City of El Paso.

(Ord. No. 19301, § 1, 2-15-2022; Ord. No. 019435, § 1, 2-7-2023; Ord. No. 019608, § 1, 3-26-2024)

Chapter 15.10

DEPLOYMENT OF NETWORK NODES IN THE RIGHT-OF-WAY

Sections:

Article I. General

15.10.010 Purpose.
15.10.020 Applicability.
15.10.030 Definitions.

Article II. Applications and Permitting

15.10.040 Access to public right-of-way.
15.10.050 Fees and charges.

Article III. Design Manual

15.10.060 Applicability.
15.10.070 General requirements.
15.10.080 Placement preference.
15.10.090 Historic landmark and historic district.
15.10.100 School zone lights.
15.10.110 Sun Metro facilities.
15.10.120 Pedestrian impacts.
15.10.130 Airport proximity.
15.10.140 Scenic area or scenic corridor.
15.10.150 Decorative poles.
15.10.160 Residential areas and municipal parks.
15.10.170 Undergrounding requirements.
15.10.180 Electrical supply.
15.10.190 Traffic signals and street signage.
15.10.200 Generators.
15.10.210 Ground equipment.
15.10.220 Equipment dimensions.
15.10.230 Non-interference.
15.10.240 Tree maintenance.
15.10.250 Signage.
15.10.260 Repair.
15.10.270 Damage to service pole.
15.10.280 Access by provider.
15.10.290 Graffiti abatement.

Article IV. Private and Regulatory Compliance

15.10.300 Necessary approvals.

Article V. Permit Application Procedures

15.10.310 Permit required.
15.10.320 License agreement required.
15.10.330 Permit not required.
15.10.340 Permit application requirements.
15.10.350 Termination of permits.

Article VI. Removal of Wireless Facilities and Ground Equipment

15.10.360 Removal upon notice from city for city project.
15.10.370 Removal required by city for safety and imminent danger reasons.
15.10.380 Repair by provider.

Article VII. Abandonment or Removal

15.10.390 Abandonment by city.
15.10.400 Removal by provider.

Article VIII. Inspection of Facilities

15.10.410 Right to inspect.
15.10.420 Failure to inspect.
15.10.430 Written notice.

Article IX. Unauthorized Occupancy or Access

15.10.440 Notification.
15.10.450 Premature attachment.
15.10.460 Responsibility for unauthorized occupancy or access.

Article X. Liability and Indemnification

15.10.470 City's access to public rights-of-way.

15.10.480 Indemnification.

15.10.490 Waiver of liability.

Article XI. Duties and Responsibilities

15.10.500 Condition of public rights-of-way.

15.10.510 Facilities, difficulties, and restrictions of work.

15.10.520 Warranties.

15.10.530 Interruption of Service.

Article XII. Security

15.10.540 Security required.

15.10.550 Amount of security.

15.10.560 Form of bond.

15.10.570 Security not renewed.

15.10.580 Replenish security.

15.10.590 Return of security.

Article XIII. Insurance

15.10.600 Insurance required.

15.10.610 Certificate of insurance.

Article XIV. Non-Assignments of Rights

15.10.620 Transfer of the rights and obligations of permit.

15.10.630 Obligations of provider.

15.10.640 Lease of rights under a permit prohibited.

Article XV. Failure to Enforce

15.10.650 Failure to enforce.

Article XVI. Termination of Permits

15.10.660 Failure to comply with terms.

15.10.670 Notification of default condition(s).

15.10.680 Requirements at termination of a permit.

15.10.690 Provider liable for fees and charges.

15.10.700 Provider's responsibility and obligations at termination.

15.10.710 Effect of Chapter 284 of the Local Government Code.

Article XVII. Emergency Contact

15.10.720 Emergency contact.

ARTICLE I. GENERAL

15.10.010 Purpose.

A. The city has been delegated by the State of Texas the fiduciary duty to manage the public rights-of-way for the benefit of the health, safety, and welfare of the citizens of the city. As proprietor and manager of the public rights-of-way, the city enacts these guidelines, procedures, and design manual, as expressly allowed by Texas Local Government Code, Chapter 284.

B. The guidelines, procedures, and the design manual codified within this chapter, are adopted in furtherance of the city's authority to manage the public right-of-way to ensure the health, safety, and welfare of the public, and to require from network providers fair and reasonable compensation for use of the public right-of-way and for collocation on service poles.

C. Any and all facilities selected for the installation of provider's wireless facilities shall not be considered "personal wireless service facilities" as that term is defined at 47 U.S.C. § 332(c)(7)(C)(ii), or a "base station" as that term is defined at 47 CFR § 24.5. The limitations applicable to local governments with regard to the placement, construction, and modification of

"base stations" apply to the city with regard to wireless facilities located in the public right-of-way.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.020 Applicability.

The provisions of this chapter apply to any sitings, installations, and collocations in, on, over, or under the public rights-of-way of network nodes, node support poles, micro network nodes, distributed antenna systems, transport facilities, microwave communications, or other wireless facilities, by whatever nomenclature, whether they are installed pursuant to Texas Local Government Code Chapter 284, or pursuant to an agreement with the city, or installed as may otherwise be allowed by law.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.030 Definitions.

For the purposes of this chapter, the following terms, phrases, words, and their derivations, shall have the meaning given herein, unless more specifically defined within a specific article or paragraph of this chapter. When not inconsistent with the context, words used in the present tense include the future tense, words in the plural number include the singular number, and words in the singular number include the plural number. The words "shall" and "will" are mandatory and "may" is permissive. Words not defined shall be given their common and ordinary meanings.

"Abandon" and its derivatives means, with regard to wireless facilities and transport facilities, and all supporting equipment installed in the public right-of-way (including by way of example but not limited to: poles, wires, conduits, manholes, handholes, cuts, network nodes, node support poles, ground equipment, or any portion thereof) that have been left by a provider in an unused or nonfunctioning condition for more than one hundred eighty consecutive days unless, after notice to provider, provider has established to the reasonable satisfaction of city that the applicable facility, or portion thereof, is still in active use.

"Affiliate" means each person or entity that falls into one or more of the following categories: (a) a person or entity having, directly or indirectly, a controlling interest in a provider; (b) a person or entity in which provider has, directly or indirectly, a controlling interest; or (c) a person or entity that directly or indirectly is controlled by a third party that also directly or indirectly controls a provider.

"Antenna" means communications equipment that transmits or receives electromagnetic radio frequency signals used in the provision of wireless services.

"Applicable codes" means: (i) all applicable City Code provisions, policies, and guidelines; (ii) all applicable engineering and safety standards governing the installation, maintenance and operation of facilities and the performance of all work in or around public right-of-way and includes the most current versions of the National Electric Safety Code ("NESC"), the National Electrical Code ("NEC"), the Texas Health and Safety Code, Chapter 752, the rules and regulations of the Occupational Safety and Health Act ("OSHA"); and (iii) any applicable lawful rules, requirements or orders now in effect or hereafter issued by city or other authority having jurisdiction.

"Chapter 284" means Texas Local Government Code, Chapter 284.

"Collocate" and "collocation" mean the installation, mounting, maintenance, modification, operation, or replacement of network nodes in a public right-of-way on or adjacent to a pole.

"Concealment" or "camouflage" means any wireless facility or pole that is covered, blended, painted, disguised, camouflaged, or otherwise concealed such that it blends into the surrounding environment and is visually unobtrusive. A concealed or camouflaged wireless facility or pole includes any wireless facility or pole approved by the city as conforming to the surrounding area in which the wireless facility or pole is located and may include, but is not limited to, a wireless facility or pole that is hidden beneath a facade blended

with surrounding area design, painted to match the supporting area, or disguised with artificial tree branches.

"Days" means calendar days unless otherwise specified.

"Decorative pole" means any streetlight pole specially designed and placed for aesthetic purposes and on which no appurtenances or attachments, other than specially designed informational or directional signage or temporary holiday or special event attachments, have been placed or are permitted to be placed according to nondiscriminatory city ordinances.

"Design district" means an area that is zoned or otherwise designated by the city, and for which the city maintains and enforces unique design and aesthetic standards on a reasonable, uniform and nondiscriminatory basis. Design districts within the city are: Union Plaza, Rim Neighborhood Conservation Overlay, Smart Code Zoned properties, the Downtown District. Additional areas may be designated as design districts by the city at any time.

"Disaster emergency," or "disaster," or "emergency" means an imminent, impending, or actual natural or human-induced situation wherein the health, safety, or welfare of the residents of the city is threatened, and includes, but is not limited to, any declaration of emergency by city, state, or federal governmental authorities.

"Distributed antenna system" or "DAS" means a type of network node.

"Easement" means and shall include any public easement or other compatible use created by dedication, or by other means, to the city for public utility purposes, or any other purpose whatsoever. Easement shall include a private easement used for the provision of utilities.

"Excavation permit" means a permit required under Chapter 13.08, El Paso Code of Ordinances, for cuts or excavations in the public right-of-way and/or any construction activities in the public right-of-way.

"Ground equipment" means any part of a wireless facility or associated equipment that is located on the surface of the ground and, if included in an approved permit application or otherwise approved by the city in writing, an incidental structure to support the wireless facility.

"Highway right-of-way" means right-of-way adjacent to a state or federal highway.

"Historic district" means "historic district" as defined in Section 20.20.020 of the City Code, now or hereafter in effect and areas designated as historic under state or federal law. Historic districts within the city are Austin Terrace, Chihuahuita, Downtown, Magoffin, Manhattan Heights, Mission Trail, Old San Francisco, Sunset Heights, Ysleta, and the several National Register Districts Rio Grande National Register District and the Montana Avenue National Register District. Additional areas may be designated as historic districts by the city at any time.

"Historic landmark" means "historic landmark" as defined in Section 20.20.020 of the City Code, now or hereafter in effect.

"Location" means the city-approved and lawfully permitted location for the network node or node support pole.

"Macro tower" means a guyed or self-supported pole or monopole greater than the height parameters prescribed by Chapter 284 and that supports or is capable of supporting antennas.

"Micro network node" means a network node that is not larger in dimension than twenty-four inches in length, fifteen inches in width, and twelve inches in height, and that has an exterior antenna, if any, not longer than eleven inches.

"Modification" or "modify" means any work in the public right-of-way, or alteration of a wireless facility that is not substantially similar in size or is a change in the wireless facility's location in the public right-of-way or its physical position on the pole, except those alterations or changes set forth in Section 15.10.330 that are excepted from requiring a permit under Chapter 284, which do not constitute modifications hereunder.

"Municipal park" means an area that is zoned or otherwise designated by city ordinance or has been dedicated to the city for use as a public park for the purpose of recreational activity.

"Municipally-owned utility pole" means a utility pole owned or operated by a municipally-owned electric utility, as defined by Texas Utilities Code, § 11.003, and located in a public right-of-way.

"Network node" means equipment at a fixed location that enables wireless communications between user equipment and a communications network. The term:

A. Includes:

1. Equipment associated with wireless communications;

2. A radio transceiver, an antenna, a battery-only backup power supply, and comparable equipment, regardless of technological configuration; and

3. Coaxial or fiber-optic cable that is immediately adjacent to and directly associated with a particular collocation; and

B. Does not include:

1. An electric generator;

2. A pole; or

3. A macro tower.

"Network provider" means:

A. A wireless service provider; or

B. A person that does not provide wireless services and that is not an electric utility but builds or installs on behalf of a wireless service provider:

1. Network nodes; or

2. Node support poles or any other structure that supports or is capable of supporting a network node.

"Node support pole" means a pole installed by a network provider for the primary purpose of supporting a network node.

"Permit" means the city's written authorization for the use of public right-of-way or collocation on a service pole for a network provider to perform an action or initiate, continue, or complete a project pursuant to the requirements of this chapter. A permit shall not include an excavation permit.

"Pole" means a service pole, municipally-owned utility pole, node support pole, or utility pole.

"Pre-permit survey" means all work or operations required by applicable codes or the city to determine whether the proposed location of a network node has the structural and spatial ability to accommodate network nodes and related equipment. Such work includes, but is not limited to, field inspection, loading calculations, and administrative processing. The pre-permit survey shall be coordinated with city and include the provider's professional engineer.

"Private easement" means an easement or other real property right that is only for the benefit of the grantor and grantee and their successors and assigns.

"Provider" has the same meaning as "network provider."

"Public right-of-way" or "right-of-way" means the area on, below, or above a public roadway, highway, street, public sidewalk, alley, waterway, or utility easement in which the city has an interest. The term does not include:

A. A private easement; or

B. The airwaves above a public right-of-way with regard to wireless telecommunications.

"Scenic area" means "scenic area" as defined in Section 20.02.836 of the City Code, now or hereafter in effect. "Scenic areas" within the city are also designated as "design districts."

"Scenic corridor" means "scenic corridor" as defined in Section 20.02.838 of the City Code, now or hereafter in effect. "Scenic corridors" within the city are also designated as "design districts."

"School" means an educational institution that offers a course of instruction for students in one or more grades from kindergarten through grade twelve.

"Service pole" means a pole, other than a municipally-owned utility pole, owned or operated by the city and located in a public right-of-way, including:

A. A pole that supports traffic control functions;

B. A structure for signage;

C. A pole that supports lighting, other than a decorative pole; and

D. A pole or similar structure owned or operated by the city and supporting only network nodes.

"Small cell" is included as a type of network node.

"Street" means only the paved portion of the public right-of-way used for vehicular travel, being the area between the inside of the curb to the inside of the opposite curb, or the area between the two parallel edges of the paved roadway for vehicular travel where there is no curb. A street is generally part of, but smaller in width than the width of, the entire right-of-way. A right-of-way may include sidewalks and utility easements, but a street does not. A street does not include the curb or the sidewalk, if either are present at the time of a permit application or if added later.

"Streetlight pole" means any standard-design concrete, fiberglass, metal, or wooden pole used for street lighting purposes, owned or operated by city, that is capable of supporting network nodes.

"TAS" means Texas Accessibility Standards.

"Traffic control device" means all signs, signals, markings, or devices placed or erected by the city or a public body having jurisdiction for the purpose of regulating, warning, or guiding traffic.

"Traffic signal" means any device, whether manually, electrically, or mechanically operated by which traffic is alternately directed to stop and to proceed.

"Transport facility" means each transmission path physically within a public right-of-way, extending with a physical line from a network node directly to the network, for the purpose of providing backhaul for network nodes.

"Underground utility district" means an area where poles, overhead wires, and associated overhead or above-ground structures have been removed and buried, or have been approved for burial underground pursuant to city ordinances, zoning regulations, state law, private deed restrictions, and other public or private restrictions, that prohibit installing above-ground structures in a public right-of-way.

"Utility pole" means a pole that provides:

A. Electric distribution with a voltage rating of not more than thirty-four and one-half kilovolts; or

B. Services of a telecommunications provider, as defined by Section 51.002, Utilities Code.

"Wireless facilities" means micro network nodes, network nodes, and node support poles, as defined herein and in Chapter 284.

"Wireless service" means any service, using licensed or unlicensed wireless spectrum, including the use of Wi-Fi, whether at a fixed location or mobile, provided to the public using a network node.

"Wireless service provider" means a person or entity that provides wireless service to the public. (Ord. No. 18717, § 1, 8-22-2017)

ARTICLE II. APPLICATIONS AND PERMITTING

15.10.040 Access to public right-of-way.

A. Subject to the provisions of this chapter, city will issue permits to providers authorizing providers to install and maintain wireless facilities and transport facilities in or on public right-of-way in accordance with Chapter 284. The locations at which provider's wireless facilities and transport facilities may be permitted, and the size and appearance of such wireless facilities, shall be determined in accordance with this chapter. Providers must also obtain an excavation permit in accordance with Chapter 13.08, City Code of Ordinances, if the installation of wireless facilities, transport facilities, or ground equipment involves excavation of the public right-of-way. If the requested location is to collocate a network node on a service pole, provider must also, prior to making application for such location, enter into a license agreement with the city for such collocation.

B. City will issue a permit(s) to provider only when city reasonably determines, in its sole judgment, that (i) provider meets all requirements set forth in this chapter, and (ii) such permit(s) comply with all applicable codes.

C. No use, however lengthy, of any public right-of-way, and no payment of any fees or charges required under this chapter, shall create or vest in provider any easement or other ownership or property right of any nature in any portion of the public right-of-way. After issuance of any permit, provider shall be and remain a mere licensee. Neither this chapter, nor any permit granted under this chapter, shall constitute an assignment of any of city's rights to the public right-of-way.

D. No part of provider's wireless facilities or transport facilities or other equipment constructed, modified, or erected, or placed on public right-of-way will become, or be considered by the city as being affixed to or a part of, the public right-of-way. All portions of provider's wireless facilities and transport facilities and other equipment constructed, modified, erected, or placed by provider on public right-of-way will be and remain the property of provider and may be removed by provider at any time.

E. Nothing in this chapter or in a permit granted hereunder shall be construed as granting provider any right to attach provider's wireless facilities or transport facilities at any specific location or facility or to compel city to grant provider the right to attach at any specific location or facility.

F. Subject to the provisions in Articles VI through VIII, this chapter does not in any way limit city's right to locate, operate, maintain or remove service poles or other city equipment or property in the manner that the city deems appropriate.

G. Provider is obligated to obtain all necessary certification, permitting, and franchising from federal, state and local authorities prior to making any installations of wireless facilities or transport facilities.

H. Subject to the provisions in Articles VI through VIII, nothing in this chapter shall be construed to require city to install, retain, extend, or maintain any service poles or other city equipment or property for use by the provider when such service poles or other city equipment or property are not needed for city's own requirements.

I. Subject to the provisions in Articles VI through VIII, nothing in this chapter shall limit, restrict, or prohibit city from fulfilling any agreement or arrangement regarding a service pole or other city equipment or property into which city has previously entered, or may enter in the future, with other entities, including, but not limited to, agreements or arrangements for the removal of wireless facilities.

J. Nothing in this chapter or in any permit granted hereunder shall be construed to grant provider the authority to lease, grant, or otherwise assign any rights under its permit to any other party without the written consent of the city.

K. In the event the city determines to deny the use by provider of any particular service poles or other city equipment or property or any particular location in the public right-of-way, such denial shall not be construed to be a prohibition on, or to have the effect of prohibiting, the provision of wireless services. Any such denial by the city shall be undertaken in its capacity as proprietor of the public right-of-way, and not in its regulatory capacity.

L. Any permit granted under this chapter is limited to the uses specifically authorized in the permit and any other use shall be considered a material breach of this chapter. Nothing in this chapter or in any permit granted hereunder shall be construed to require city to allow provider to use the public right-of-way after the termination of the applicable permit.

(Ord. No. 18717, § 1, 8-22-2017)

15.10.050 Fees and charges.

A. Provider shall pay the established fee for the following facilities:

1. Network nodes.
2. Node support poles.
3. Transport facility.

B. Provider shall pay the established recurring fees for the following facilities:

1. Network nodes.
2. Transport facility.

3. Collocation of network nodes on service poles.

C. All recurring fees are payable in advance and are due upon approval of the permit(s) by the city; no permit shall become effective until the fee has been paid. Initial amounts shall be pro-rated, based upon an annual due date of January 1 of each year.

1. For example, a network node permit approved by the city in August shall be effective upon payment in advance by the provider of 5/12 of the annual rental rate, or one hundred four dollars and seventeen cents. Thereafter, all payments of annually-recurring fees are due to the city by January 1 for the following calendar year.

2. For example, a transport facility permit approved by the city in August shall be effective upon payment by the provider of five months of the monthly rental amount, or one hundred forty dollars. Thereafter, payments for twelve months at a time are due to the city by January 1 for the following twelve months.

D. Provider shall maintain and submit annually to the city with each payment to the city, an inventory of provider's network nodes, node support poles, node support poles connected by transport facilities, and collocated network nodes. This information shall include complete and accurate GIS location information, maps, plans, equipment inventories, and other records related to provider's facilities. An inventory shall be effective from January 1 of each year. City reserves the right to compare the information contained on the inventory to any actual field inspection or survey conducted mutually. In the event that provider fails to submit an inventory, provider shall pay city, in addition to the monthly- or annually-recurring fees, all actual costs associated with city's performance of an inventory of provider's facilities.

1. If either provider or city subsequently discovers that provider has failed to pay the entire or correct amount of compensation due, the correct amount shall be paid by provider within thirty calendar days of such determination. Any overpayment to the city through error or otherwise will, at the sole option of the city, either be refunded to provider by the city within thirty days of such determination or offset against the next payment due from provider. Acceptance by either provider or city of any payment due under this section shall not be deemed to be a waiver by either of any claim of violation of this chapter, nor shall the acceptance by either of any such payments preclude either from later establishing that a larger amount was actually due or from collecting any balance due. Nothing in this section shall be deemed a waiver by either provider or city of its rights under law or equity.

2. Interest on late payments shall be calculated in accordance with the interest rate for customer deposits established by the Public Utility Commission of Texas in accordance with the Texas Utilities Code, Section 183.003, as amended for the time period involved.

3. The compensation payable to the city hereunder shall not be offset by any payment by provider to the city relating to ad valorem taxes.

E. The network node site rental rate set forth herein shall be adjusted on an annual basis, by an amount equal to one-half of the annual change, if any, in the Consumer Price Index. For purposes of this section, Consumer Price Index shall mean the annual revised Consumer Price Index for All Urban Consumers for Texas, as published by the Federal Bureau of Labor Statistics. The adjusted rate will be effective sixty days after the city provides written notice to providers of the new rate.

F. The recurring fees set forth herein shall be exclusive of, and in addition to, all ad valorem taxes, special assessment for municipal improvements, and other lawful obligations of the provider to the city.

G. When the city at its own expense has removed or remediated provider's wireless facilities or transport facilities pursuant to Articles VI and VII or provider is otherwise required to reimburse the city hereunder, the provider shall remit payment to the city within thirty days of the date of the invoice.

H. Upon provider's termination of the use of any service pole or public right-of-way in accordance with the terms of a permit and this chapter, and provider peaceably surrendering the service pole or public right-of-way to the city in the same condition it was in on the date the permit(s) was granted, excepting ordinary wear and tear, there will be no compensation due to the city by provider for such location.

I. The city shall not disclose any confidential information reproduced for documentation of the inventory unless required by law. If the city receives a request to review or copy confidential information under the Texas Public Information Act or related law (the "Act"), the city shall comply with the requirements for handling third party information under the Act, including notifying the provider that a request to review or copy confidential information has been submitted to the city. Confidential information deemed subject to disclosure under the Act by the Attorney General of the State of Texas shall be disclosed.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE III. DESIGN MANUAL

15.10.060 Applicability.

The provisions of this Article III, Design Manual, establish guidelines and requirements for the installation and construction of network nodes, new node support poles, transport facilities, and ground equipment in the public right-of-way. In addition, provider shall comply with all generally applicable ordinances of the city pertaining to the occupancy and use of public right-of-way, unless such provisions conflict with this chapter, in which case this chapter prevails. This Article III also governs the installation, construction, and modification of collocated network nodes on service poles.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.070 General requirements.

A. Wireless facilities shall be concealed or enclosed as much as possible in an equipment box, cabinet, or other unit that may include ventilation openings. External cables and wires hanging off a pole shall be sheathed or enclosed in a conduit, so that wires are protected and not visible or are visually minimized to the extent possible.

B. Wireless facilities must conform to the city's aesthetic or design standards for the proposed location, if any, unless otherwise approved by the city.

C. In order to minimize negative visual impact to the surrounding area, the hazard of poles adjacent to roadways, and the effect on property values, the city may deny a permit for a new node support pole if the requested location for new node support poles is not spaced apart from existing utility poles or node support poles at the same spacing as the spacing between utility poles in the immediate proximity, however when no other facilities are present in the location, but no less than at a minimum three hundred feet from a utility pole or another node support pole to minimize the hazard of poles adjacent to road ways and to minimize effect on property values and aesthetics on the area.

D. Provider shall comply with and observe all applicable city, state, and federal historic preservation laws and requirements.

E. When a permit is issued provider shall install and maintain its wireless facilities and transport facilities, and all ground equipment, in accordance with the city's requirements and specifications. All of provider's wireless facilities, transport facilities, and ground equipment must comply with all applicable codes.

F. Provider shall be responsible for the installation and maintenance of its wireless facilities, transport facilities, and related ground equipment. Provider shall install such facilities in a good and workmanlike manner and in accordance with the requirements promulgated by the city, as such may be amended from time to time. Provider's work shall be subject to the regulation, control, and direction of the city. All work done in connection with the installation, operation, maintenance, repair, modification, and/or replacement

of the wireless facilities, transport facilities, and related ground equipment shall be in compliance with all applicable city, state, and federal laws, ordinances, codes, rules, and regulations.

G. Primary use. The city shall not grant permits to locate wireless facilities on service poles or other city facilities or equipment that, in the city's sole determination, will adversely impact the primary use of the service pole or other city facility or equipment.

H. Visual clutter. The city may not grant permits to wireless facilities that, in the city's sole determination, will contribute to visual clutter, taking into account the proximity of existing wireless facilities and the surrounding land use. The provider is required to submit a photo simulation of the proposed facilities with the permit application.

I. Wireless facilities and ground equipment shall not impede pedestrian or vehicular traffic or render the public right-of-way non-compliant with applicable codes, including the Americans with Disabilities Act and Texas Accessibility Standards.

(Ord. No. 18717, § 1, 8-22-2017)

15.10.080 Placement preference.

A. General guidelines on placement. In accordance with Chapter 284, a network provider shall construct and maintain network nodes and node support poles in a manner that does not:

1. Obstruct, impede, or hinder the usual travel or public safety on a public right-of-way.

2. Obstruct the legal use of a public right-of-way by other utility providers.

3. Violate nondiscriminatory applicable codes.

4. Violate or conflict with the city's publicly disclosed ordinances regulating the use and occupancy of public rights-of-way or this design manual.

5. Violate the Federal Americans with Disabilities Act of 1990 (42 U.S.C. Section 12101 et seq.).

B. Order of preference. The city's order of preference for installation of network node attachments to existing facilities and new node support poles is as follows:

1. Existing telephone or electric lines between existing utility poles. Micro network nodes shall only be lashed on existing telephone or electrical lines between existing utility poles (electric poles or telephone poles), with notice to the pole owner as required by the Federal Pole Attachment Act, and not placed on utility poles, node support poles, or service poles.

2. Existing utility poles (electric poles or telephone poles) shall be the preferred support facility for network nodes and related ground equipment.

3. Service poles:

a. Non-decorative poles with a height of more than twenty feet, outside of historic district, scenic area, or scenic corridor.

b. Wireless facilities shall not be placed on service poles supporting traffic control devices, traffic signals, or any structure supporting a traffic control device or traffic signal, unless city determines that such installation will not interfere with the integrity of the facility or the safety of the public. Any such installation allowed by the city will be in accordance with a separate agreement with the city.

c. Attachment to service poles used for street signage is discouraged.

4. New node support poles shall be the least preferred type of allowed facility for attachment of network nodes.

5. Ground equipment shall be minimal and the least intrusive design and placement as possible.

(Ord. No. 18717, § 1, 8-22-2017)

15.10.090 Historic landmark and historic district.

A. Areas within the city that have been, or shall be in the future, designated by zoning or other ordinance as historic landmarks or historic districts are also designated as design districts, in which unique design and aesthetic standards are

maintained and enforced by the city. Providers shall comply with and observe all applicable city, state, and federal historic preservation laws and requirements.

B. Providers are discouraged from installing a network node or node support pole within three hundred feet of a historic landmark or within a historic district.

C. Wireless facilities proposed within three hundred feet of a historic landmark or within a historic district shall be subject to review by the city's historic preservation officer in order to satisfy that the installations are compatible with the regulations applicable to the historic landmark or historic district.

1. Subject to Section 105 of Chapter 284, as a condition for approval of permits for network nodes or node support poles in historic districts, the city shall require reasonable design or concealment measures for such facilities. Therefore, with any request for installations in these areas, provider shall include proposed concealment measures in the permit application. Thereafter, provider shall implement the city-approved design concepts, and the use of camouflage or stealth materials as necessary in order to achieve compliance with historic preservation review, including following the design guidelines for the city's historic districts, historic landmarks, and other applicable regulations.

2. Prior to submitting an application for a permit for a wireless facility in a historic district or within three hundred feet of a historic landmark, provider shall meet with the office of historic preservation to discuss any potential design modifications appropriate for the installation.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.100 School zone lights.

Wireless facilities will not be allowed at locations that interfere with school zone flashing lights. The interference to be avoided is structural, radio frequency, and visual.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.110 Sun Metro facilities.

If the permit application is for service poles or other city facilities or equipment or utility poles serving Sun Metro (the city-owned transit system), the permit will not be issued by the city without provider providing documentation that all federal siting permissions have been obtained.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.120 Pedestrian impacts.

A. The city shall not grant permits for wireless facilities that, in the city's sole determination, will adversely impact pedestrian movement or will be in violation of the Americans with Disabilities Act.

B. A minimum of a five-foot path of travel and a six-foot clear path of travel in the downtown plan area will be provided at all times.

C. Network nodes on new or existing poles must be installed at least eight feet above the ground.

D. If the network node attachment is projecting toward the street, it must be installed no less than eight feet above the ground for the safety and protection of the public and vehicular traffic.

E. No protrusion from the outer circumference of the existing structure or pole shall be more than two feet.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.130 Airport proximity.

All permit applications in or within three miles of the landing area of the airport, the boundaries of which are shown on the latest FAA approved airport layout plan on file at the El Paso International Airport, must be approved by the city manager or designee.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.140 Scenic area or scenic corridor.

A. Areas within the city that have been, or are in the future, designated by zoning or other ordinance as scenic areas or scenic corridors, are also designated as design districts in which unique design and aesthetic standards are maintained and enforced by the city.

B. Subject to Section 105 of Chapter 284, all wireless facilities proposed in or within a scenic area or scenic corridor must be camouflaged so as to be unobtrusive and to blend in to the natural surroundings as much as possible.

C. Prior to submitting an application for a permit for a wireless facility in a scenic area or scenic corridor, provider shall meet with the city manager or designee to discuss any potential design modifications appropriate for the installation.

(Ord. No. 18717, § 1, 8-22-2017)

15.10.150 Decorative poles.

A. Subject to Section 105 of Chapter 284, wireless facilities proposed for decorative poles must be camouflaged so as to not adversely affect the appearance of such poles and comply with the design manual.

B. Prior to submitting an application for a wireless facility on a decorative pole, provider shall meet with the city manager or designee to discuss any potential design modifications appropriate for the installation.

(Ord. No. 18717, § 1, 8-22-2017)

15.10.160 Residential areas and municipal parks.

A. Subject to Section 104 of Chapter 284, providers are discouraged from installing a network node on an existing pole in a public right-of-way located in or adjacent to a street or thoroughfare that is:

1. Not more than fifty feet wide, and

2. Adjacent to single-family residential lots or other multifamily residences or undeveloped land that is designated for residential use by the city's zoning ordinance or private deed restrictions.

B. As a general rule, subject to Section 104 of Chapter 284, new node support poles will not be permitted in a public right-of-way that is in a municipal park or that is adjacent to a street or thoroughfare that is described in subsection A., above.

C. The city may, but is not required to, issue a permit for the installation of a network node or node support pole in areas described in this section on terms that are discretionary and nondiscriminatory, and that have the effect of minimizing interference with the aesthetic qualities of such areas, and that are in keeping with the general guidelines of this design manual.

D. If the city approves a permit for the installation of network nodes or node support poles in the areas described in this section, provider remains under an obligation to determine whether any private deed restrictions or other private restrictions are in place in the area, and to comply with same.

(Ord. No. 18717, § 1, 8-22-2017)

15.10.170 Undergrounding requirements.

A. Areas within the city may be designated from time to time by the city as underground utility districts in accordance with filed plats, and/or in connection with the conversion of overhead to underground areas, as may be allowed by law.

B. Provider will comply with nondiscriminatory undergrounding requirements, including municipal ordinances, zoning regulations, state law, private deed restrictions, and other public or private restrictions, that prohibit installing aboveground structures in a public right-of-way without first obtaining zoning or land use approval.

C. In underground utility districts as established by the city, provider shall neither allow nor install transport facilities or any other overhead facilities serving to connect provider's network nodes. In all areas where overhead telecommunications or utility lines are, or are planned to be, buried below ground as part of a city project, all transport facilities or any other wireless facilities serving to connect provider's network nodes, including ground equipment, shall also be buried below ground.

D. If a permitted location subsequently becomes part of an underground utility district, provider's permit will be automatically revoked within

ninety days after such designation, with removal of provider's micro network node, network node, node support pole, and related ground equipment at such location within ninety days of such designation, or as otherwise reasonably allowed by city for the transition of overhead facilities.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.180 Electrical supply.

Provider shall be responsible for obtaining any required electrical power service to the wireless facility. The city shall not be liable to the provider for stoppages or shortages of electrical power furnished to the wireless facility, including, without limitation, stoppages or shortages caused by any act, omission, or requirement of the utility serving the wireless facility or the act or omission of any other tenant or licensee of the city facility, or for any other cause beyond the control of the city. Provider shall not be entitled to any abatement of the rental fee for any such stoppage or shortage of electrical power.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.190 Traffic signals and street signage.

If allowed by city, installations on traffic signals or street signage must not interfere with the integrity of the facility or the safety of the public. Any installation allowed by the city will be in accordance with a separate agreement with the city. Network nodes installed on any traffic signal or street signage structures shall be encased in a conduit separate from the traffic light or street signage elements, have an electric power connection separate from the traffic signal or street signage structure, and have an access point separate from the traffic signal or street signage structure.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.200 Generators.

Generators or back-up generators shall not be installed in the public right-of-way. Permits granted to provider for network nodes or transport facilities do not include authorization for the installation of generators or back-up generators in the public right-of-way.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.210 Ground equipment.

A. In addition to the size restrictions provided in Chapter 284, Section 284.003(a)(4), ground equipment near street corners and intersections should be minimal and the least intrusive. Ground equipment at or near street corner or street intersections must comply with Chapter 12.68 of this Code. This set-back is for the purposes of minimizing any obstruction, impediment, or hindrance to vehicular traffic and public safety, maximizing line-of-sight in order to protect the safety of vehicular and pedestrian traffic at street corners and intersections, and thereby minimizing hazards at those locations.

B. Ground equipment near municipal parks. For the safety of municipal park patrons, particularly small children, and to allow full line-of-sight near municipal park property, the network provider shall not install ground equipment in a public right-of-way that is within a municipal park or within two hundred fifty feet of the boundary line of a municipal park, unless approved by the city in writing.

C. Ground equipment density. In order to enhance the safety requirements of line-of-sight of pedestrians, particularly small children, the city may deny a request for a proposed location for ground equipment where existing ground equipment within three hundred feet of the proposed location, already occupies a footprint of twenty-five square feet, or more.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.220 Equipment dimensions.

With each application and with each request for a permit, and for each requested location, provider shall provide detailed drawings with calculations to show strict conformity to the size

limitations as set forth in Chapter 284 for micro network nodes, network nodes, ground equipment, and maximum pole height.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.230 Non-interference.

A. To the extent not inconsistent with Chapter 284, provider's network nodes shall not cause harmful interference to the city's public service radio frequency, wireless network, or communications operations ("city operations"), or to third-parties' network nodes or similar third-party equipment in the public right-of-way or adjacent city property ("protected equipment"). If provider's network node interferes with city operations, the city shall contact provider's emergency service contact to provide notice of any interference with city operations pursuant to Section 15.10.720. The provider shall immediately cease operation of the network node causing said interference upon receiving notice from the city and refrain from operating until provider has eliminated the interference. If after notice provider continues to operate a network node that causes interference with city operations, such network node may be deemed unauthorized and subject to the remediation and termination provisions of this chapter. If provider's network node interferes with protected equipment, then provider shall take the steps necessary to correct and eliminate such interference within twenty-four hours of receipt of notice from the city. If provider is unable to resolve the interference issue within this timeframe, it will voluntarily power down the network node causing the interference, except for intermittent testing until such time as the interference is remedied.

B. Following installation or modification of a network node, the city may require provider to test the network node's radio frequency and other functions to confirm that it does not interfere with city operations or protected equipment. If, after notice, provider continues to operate a wireless facility that causes interference with city operations, such wireless facility may be deemed unauthorized and subject to the provisions of Article XI of this chapter.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.240 Tree maintenance.

Provider and its contractors and agents shall obtain written permission from the city before trimming trees hanging over its wireless facilities and transport facilities to prevent branches of such trees from contacting same. When directed by the city, provider shall trim under the supervision and direction of the city manager or designee. The city shall not be liable for any damages, injuries, or claims arising from the provider's actions under this section.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.250 Signage.

Provider shall post its name, location identifying information, and emergency telephone number in an area on the wireless facility or ground equipment that is visible to the public. Signage required under this section shall not exceed four inches by six inches, unless otherwise required by law (e.g., RF ground notification signs), or the city. Except as required by law, provider shall not post any other signage or advertising on the pole, the wireless facility, or any ground equipment cabinet or back-up battery.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.260 Repair.

Whenever the installation, placement, attachment, repair, modification, removal, operation, use, or relocation of the wireless facility or transport facility, or any portion thereof is required or permitted under this chapter, and such installation, placement, attachment, repair, modification, removal, operation, use, or relocation causes any service pole, and city facility or equipment, or any portion of the public right-of-way, to be damaged or to have been altered in such a manner as to make it unusable, unsafe, or in violation of any laws, provider, at its sole cost and expense, shall

promptly repair and return such service pole, city facility or equipment, or public right-of-way to its original condition. If provider does not perform such work as described in this paragraph, then the city shall have the option, upon fifteen days' prior written notice to provider or immediately if there is an imminent danger to the public, to perform or cause to be performed such reasonable and necessary work on behalf of provider and to charge provider for the reasonable and actual costs incurred by the city. Provider shall reimburse the city for the costs in accordance with Article XI of this chapter.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.270 Damage to service pole.

Whenever a service pole or other city facility or equipment supporting a network node is damaged or knocked down, city shall provide prompt notice to provider through provider's emergency service contact in Section 15.10.720 of the need to remove or repair provider's network node. Upon receipt of notification from city of such damage, provider shall promptly respond and shall within one hour of such notification take such measures as are necessary to make the area safe, such as disconnection of the power source to the network node and removing damaged equipment from the public right-of-way, if applicable. If the provider does not promptly respond, the city may take sure measures as are necessary to make the area safe.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.280 Access by provider.

Provider's access to public right-of-way shall be coordinated with the city to schedule such access at times that are least disruptive to the traveling public. The time of day and duration of provider's access shall be as determined by city, except for emergency circumstances which shall be coordinated with the city to allow the provider immediate access to the public right-of-way. For all activities that impact traffic, provider's access shall be conditioned upon city approval of provider's traffic control plan. Provider shall maintain written logs of each instance when provider has accessed the public right-of-way; such log shall be made available to city upon reasonable request by city.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.290 Graffiti abatement.

As soon as practical, but not later than seven days from the date provider receives notice thereof, provider shall remove all graffiti on any of its wireless facilities, or ground equipment. The foregoing shall not relieve provider from complying with any city graffiti or visual blight ordinance or regulation.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE IV. PRIVATE AND REGULATORY COMPLIANCE

15.10.300 Necessary approvals.

Provider shall be responsible for obtaining from the appropriate public and/or private authority or other appropriate persons any required authorization to construct, operate and/or maintain its wireless facilities or transport facilities on public property before it occupies any portion of the public right-of-way. City retains the right to require evidence that appropriate authorization has been obtained before any permit is issued to provider. Provider's obligations under this article include, but are not limited to, the obligation to obtain all necessary approvals to occupy public/private rights-of-way and to pay all associated costs.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE V. PERMIT APPLICATION PROCEDURES

15.10.310 Permit required.

Provider shall not install any wireless facility or transport facility in any portion of the public right-of-way, or materially modify the wireless facility or transport facility, without first applying for and obtaining a permit in compliance with city's permit application process.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.320 License agreement required.

As a precondition to receiving a permit to collocate a network node on a service pole, provider shall enter into a license agreement with the city.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.330 Permit not required.

A. Notwithstanding any other provision of this chapter, a permit is not required for:

1. Routine maintenance that does not require excavation or closing of sidewalks or vehicular lanes in a public right-of-way;

2. Replacing or upgrading a network node or node support pole with a node or pole that is substantially similar in size or smaller and that does not require excavation or closing of sidewalks or vehicular lanes in a public right-of-way; or

3. The installation, placement, maintenance, operation, or replacement of micro network nodes that are strung on cables between existing poles or node support poles, in compliance with the National Electrical Safety Code.

B. For purposes of this section:

1. A network node or node support pole is considered to be "substantially similar" if:

a. The new or upgraded network node, including the antenna or other equipment element, will not be more than ten percent larger than the existing network node, provided that the increase may not result in the network node exceeding the size limitations provided by Chapter 284; and

b. The new or upgraded pole will not be more than ten percent higher than the existing pole, provided that the increase may not result in the pole exceeding the applicable height limitations prescribed by Chapter 284;

2. The replacement or upgrade does not include replacement of an existing node support pole; and

3. The replacement or upgrade does not defeat existing concealment elements of a node support pole.

C. The determination under this section of whether a replacement or upgrade is substantially similar is made by measuring from the dimensions of the network node or node support pole as approved by the city.

D. Notwithstanding the above, for activities that do not require a permit:

1. The provider shall give the city thirty days advance notice of the work described above;

2. A network provider may replace or upgrade a pole only with the approval of the pole's owner; and

3. The size limitations may not in any event exceed the parameters prescribed by Chapter 284 without the city's approval.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.340 Permit application requirements.

A. For each location, provider shall complete and submit to the city an application to locate a wireless facility or transport facility, using the application form provided by the city. The following items shall accompany the completed application form:

1. A one-time, nonrefundable application fee for review of the application in the amount provided in Section 15.10.050.

2. Documents necessary for the review or as requested by the city, including but not limited to:

a. A map showing:

(i) The location of the proposed installation, including GIS or street address information;

(ii) The proximity of the proposed installation to special districts of the city, including but not limited to arts district, historic district, scenic areas and corridors, and airport zoning district;

(iii) The proximity to schools, the El Paso Airport, and municipal parks;

(iv) The proximity to historic landmarks;

(v) The proximity to utility poles, node support poles, and other network nodes on a service pole, if any, and depicting the sidewalks, and ramps onto sidewalks required by applicable codes, TAS,

or other law, including the Americans with Disabilities Act, and paved street surface and utility easements; and

b. Disclosure if the proposed installation is:

(i) In a residential area as described in Section 15.10.160;

(ii) In an underground utility district or other area with undergrounding requirements; and

(iii) On any facilities serving Sun Metro.

c. A pre-permit survey completed by a qualified and experienced professional engineer in accordance with city's requirements, certifying that provider's wireless facilities or transport facilities can be installed on the identified structure in compliance with the applicable codes. The professional engineer's qualifications must include experience performing work for similar attachments on similar facilities.

d. A photo simulation of the proposed facility(ies) along the right-of-way.

e. Detailed plans for each wireless facility, transport facility, and ground equipment, including representative drawings or pictures of the intended network node and other equipment, and proposed dimensions of same. Such plans shall show strict compliance with the city's design manual, with the size limitations set forth in Chapter 284, with maximum pole height limitations set forth in Chapter 284, and with all applicable codes.

f. Certification that the proposed wireless facility complies with applicable regulations of the Federal Communications Commission and that the proposed wireless facility shall not cause any interference with city's public safety radio system, traffic light system, or other city safety communications components.

g. Certification that the proposed network node will be placed into active commercial service by or for a provider not later than the sixtieth day after the date the construction and final testing of the network node is completed.

h. If the proposed location is on a service pole, provider shall have in place an executed license agreement with the city for the use of the service pole.

(i) The permit application will be denied if this license agreement is not in place at the time the application is submitted.

(ii) Representative drawings or pictures of the intended network node as intended to be collocated on the service pole shall be provided.

(iii) Engineering and construction plans and drawings related to the collocation of the network node on the service pole, including where the proposed transport facilities will be connected to the network node as electrical power connections, shall also be provided.

(iv) If the applicant is not the same as the licensee identified in the license agreement, the licensee shall sign the permit application or provide a letter of agency satisfactory to the city. The licensee in such license agreement shall be presumed to be the owner of the network node and ground equipment, and shall be fully responsible for them and the rental fees payable to the city thereunder.

(v) If the requested location has already been approved for collocation by other entities, the application for the service pole shall be denied.

i. If the proposed location lies within a highway right-of-way, the provider must provide evidence of a permit from the state or federal government.

3. City's acceptance of the submitted design documents does not relieve provider and its engineer of full responsibility and liability for any errors and/or omissions in the engineering analysis.

B. The city will review applications for the installation of new node support poles to determine if the proposed location is in an area where a new streetlight is needed. If city determines that a new streetlight is needed at the proposed location, it will notify the provider and request the provider's assistance and cooperation in including the design and construction elements that will enable

the city to attach a streetlight on the node support pole. If provider and city reach agreement on the streetlight attachment, reasonable incremental costs incurred by provider shall be reimbursed by city.

C. The city shall review the permit application for completeness and notify the provider in writing if provider needs to submit additional or missing information. Such written notice will be provided within thirty days after receipt of a permit application for a network node or node support pole, or within ten days for a permit for a transport facility. The notice shall specifically identify the missing information. If provider does not submit the missing or additional information within one hundred eighty days of the notice, the provider's permit application for the requested location shall be deemed withdrawn.

D. The city shall review the permit application to determine if the requested location and proposed installation complies with all applicable codes.

1. If the city denies the permit application, it will notify provider by electronic mail on the date the city denies the permit application, stating the basis for the denial.

2. Provider may cure the deficiencies identified by the city within thirty days by resubmitting the application, along with payment to the city for city's actual costs incurred in reviewing the resubmitted application. Such costs will be identified by city at provider's request.

3. The city's review of the revised application is limited to the deficiencies cited in the denial documentation.

E. The city must approve or deny applications under this title in the following timeframes:

1. An application for a node support pole not later than the one hundred fiftieth day after the date the municipality receives the complete application.

2. An application for a network node not later than the sixtieth day after the date the municipality receives the complete application.

3. An application for a transport facility not later than the twenty-first day after the date the municipality receives a complete application.

4. An application for a permit for a node support pole, network node, or transport facility shall be deemed approved if the application is not approved or denied on or before the applicable date for approval or denial prescribed in this subsection.

F. The city shall approve or deny the revised completed application after denial not later than ninety days after the date the city receives the completed revised application.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.350 Termination of permits.

A. Unless the city grants an extension of time upon provider's request, a permit shall expire six months after approval by the city if installation pursuant to the permit has not begun by that date.

B. Any permit shall automatically terminate when provider ceases to have authority to construct and operate its wireless facilities or transport facilities on public right-of-way at the location covered by the permit. Provider shall, at its sole expense, remove the wireless facility or transport facility from the public right-of-way within thirty days. If provider fails to remove the wireless facility or transport facility within thirty days, city shall have the right to remove the facilities at provider's expense.

C. Any permit shall automatically terminate for a wireless facility or transport facility that becomes nonfunctional and no longer fit for service ("nonfunctional attachment"). Provider shall, at its sole expense, remove any nonfunctional attachment, or part of a nonfunctional attachment, within thirty days of the wireless facility or transport facility becoming nonfunctional. If provider fails to remove a nonfunctional attachment within thirty days, city shall have the right to remove the nonfunctional attachment at provider's expense.

D. Provider may at any time surrender any permit. Provider shall, at its sole expense, remove the wireless facility, transport facility, and related

ground equipment from the public right-of-way within thirty days of provider's notice of surrender of a permit. If provider fails to remove the wireless facility, transport facility, or related ground equipment, or any part thereof from the public right-of-way within thirty days, city shall have the right to remove same at provider's expense.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE VI. REMOVAL OF WIRELESS FACILITIES AND GROUND EQUIPMENT

15.10.360 Removal upon notice from city for city project.

A. The city may determine that it is necessary for provider to remove or relocate its micro network node, network node, node support pole, transport facilities, and related ground equipment, or any portion thereof, from the public right-of-way or a service pole for city projects. Whenever the city reasonably determines that relocation or removal is needed for the construction, completion, repair, widening, relocation, or maintenance of, or use in connection with, any city construction or maintenance project of a street or public right-of-way, or service pole, provider shall remove or relocate its facilities at its sole cost and expense, except as otherwise provided in existing state or federal law.

B. Provider shall complete the removal or relocation within thirty days after receiving written notice from city, provided city or a third party has not prevented provider from completing such work. Provider shall notify city in writing within ten days after the removal or relocation has been completed.

C. If provider fails to remove or relocate the micro network node, network node, node support pole or related ground equipment, or portion thereof as requested by the city within thirty days after receiving written notice from city, city shall have the right to remove, or to have removed, the micro network node, network node, node support pole or related ground equipment, or portion thereof, at provider's expense.

D. City shall not be responsible or liable for damage to provider's wireless facilities, transport facilities, or related ground equipment except to the extent provided in this chapter.

E. Network provider shall reimburse city for the city's actual cost of removal of wireless facilities, transport facilities, and related ground equipment within thirty days of receiving the invoice from the city.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.370 Removal required by city for safety and imminent danger reasons.

A. Network provider shall, at its sole cost and expense, promptly disconnect, remove, or relocate the applicable wireless facility, transport facility, and related ground equipment within the time frame and in the manner required by the city if the city reasonably determines that the disconnection, removal, or relocation of any part of a wireless facility, transport facility, or related ground equipment:

1. Is necessary to protect the public health, safety, welfare, or public property;

2. If such wireless facility, transport facility, or related ground equipment, or portion thereof, is adversely affecting proper operation of service poles or other city facilities or equipment; or

3. If provider fails to obtain all applicable licenses, permits, and certifications required by law for its wireless facilities, transport facilities, and related ground equipment, or for the use of any location under applicable codes, except to the extent not consistent with Chapter 284.

B. If the city reasonably determines that there is imminent danger to the public, then the city may, after attempting to contact provider's emergency service contact under Section 15.10.720, immediately disconnect, remove, or relocate the applicable wireless facilities, transport facilities, or related ground equipment at the provider's sole cost and expense in strict accordance with the city's ordinances, except to the extent not consistent with Chapter 284.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.380 Repair by provider.

Provider shall repair any damage to any service pole, public right-of-way, city facility or equipment, and the property of any third party resulting from provider's removal or relocation activities (or any other of provider's activities hereunder) within ten days following the date of such removal or relocation, at provider's sole cost and expense, including restoration of the service pole or other city facility or equipment and any portion of the public right-of-way to substantially the same condition as it was immediately before the date provider was granted a permit, including restoration or replacement of any damaged trees, shrubs, or other vegetation. Such repair, restoration and replacement shall be subject to the sole, reasonable approval of the city.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE VII. ABANDONMENT OR REMOVAL

15.10.390 Abandonment by city.

A. If city desires at any time to abandon or remove any service pole or other city facility or equipment to which provider's wireless facilities or transport facilities are attached, city shall give provider notice in writing at least sixty days prior to the date on which city intends to abandon or remove such service pole or other city facility or equipment. If, following the expiration of the sixty-day period, provider has not removed all of provider's wireless facilities or transport facilities, shall have the right to remove same at provider's expense.

B. If any service pole or other city facility or equipment must be removed by reason of any federal, state, county, municipal or other governmental requirement, including, but not limited, to underground conversion, or the requirement of a property owner, provider shall remove its wireless facilities or transport facilities from the affected location, at provider's expense, within sixty days of receipt of written notice from city. If provider does not remove its wireless facilities or transport facilities within the sixty-day period, city shall have the right to remove same at provider's expense.

C. Unless requested by city, provider shall not abandon in place any wireless facilities, transport facilities, or related ground equipment, or any portion thereof. Any wireless facility abandoned in place at city's request shall become the property of city, and provider will provide appropriate documentation to the city as evidence of the abandonment in favor of the city.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.400 Removal by provider.

If provider removes or relocates a wireless facility, transport facility, or ground equipment at its own discretion, it shall notify the city engineer in writing not less than ten business days prior to removal or relocation. Provider shall obtain all permits required for relocation or removal of its wireless facilities, transport facilities, or ground equipment prior to relocation or removal. In the event a streetlight has been installed on a node support pole, as provided in Section 15.10.340.B. above, provider will not remove or relocate the node support pole without the city's permission.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE VIII. INSPECTION OF FACILITIES

15.10.410 Right to inspect.

City reserves the right to inspect wireless facilities, transport facilities, and related ground equipment at any time. The city may perform visual inspections of any wireless facilities located in the public right-of-way as the city deems appropriate without notice. If the inspection requires physical contact with any wireless facilities, the city shall provide written notice to the provider within five business days of the planned inspection. Provider may have a representative present during such inspection. Provider shall reimburse city for the actual cost of an inspection of each individual

wireless facility or ground equipment for each inspection that reveals that provider is in violation of the provisions of this chapter or its permit.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.420 Failure to inspect.

City's inspections, or the failure to do so, shall not operate to impose upon city any liability of any kind whatsoever or relieve provider of any responsibility, obligations or liability for provider's wireless facilities, transport facilities, or related ground equipment, whether assumed under provider's permit or otherwise existing.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.430 Written notice.

City shall provide written notice to provider if an inspection reveals that all, or any part, of provider's wireless facilities, transport facilities, or related ground equipment are installed, used, or maintained in violation of this chapter or provider's permit. Provider agrees to bring its wireless facilities, transport facilities, and related ground equipment into full compliance with this chapter and its permit within thirty days of receipt of notice from city. If provider does not correct the violation(s) within thirty days as required, city may correct the conditions at provider's expense. When city reasonably believes that the violation(s) poses an immediate threat to the safety of any person, interferes with the performance of city's obligations, or poses an immediate threat to the physical integrity of service poles or other city facilities or the public right-of-way, city may perform work and/or take action as reasonably necessary to eliminate such immediate threat without first giving written notice to provider. City will advise provider in writing of the work performed or the action taken, including photographic evidence substantiating the violation and its cause. Provider shall pay city for all costs city incurs in performing the work or taking the action.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE IX. UNAUTHORIZED OCCUPANCY OR ACCESS

15.10.440 Notification.

If any of provider's wireless facilities, transport facilities, or related ground equipment are found occupying any portion of the public right-of-way for which no permit has been issued and is in effect, city, without prejudice to its other rights or remedies, shall notify provider of such finding. It will be presumed, subject to provider providing reasonable evidence otherwise, that such non-permitted facilities have been in place for six months. In such case, provider shall pay the city for six months of the appropriate fee, as provided in Section 15.10.050. At city's discretion, city may require the immediate removal of the unpermitted facilities and equipment. However, the applicable fees shall continue to accrue, and provider shall remain responsible for payment of same, until the unpermitted facilities and equipment are removed.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.450 Premature attachment.

If provider attaches wireless facilities, transport facilities, or ground equipment after submittal of a permit application but prior to city's final determination on the permit, such premature attachment shall be deemed to be unauthorized. The appropriate fees will immediately become due to the city. If the city determines to deny the permit application for such premature attachment, the premature attachments shall be removed; however, the applicable fees shall continue to accrue, and provider shall remain responsible for payment of same, until the unpermitted facilities and equipment are removed.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.460 Responsibility for unauthorized occupancy or access.

No act or failure to act by city with regard to unauthorized occupancy or access shall be deemed as ratification of the unauthorized occupancy or access. If any permit should be subsequently is-

sued, said permit shall not operate retroactively or constitute a waiver by city of any of its rights or remedies. Provider shall be subject to all liabilities, obligations and responsibilities for the unauthorized occupancy or access from inception.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE X. LIABILITY AND INDEMNIFICATION

15.10.470 City's access to public rights-of-way.

City reserves the right to maintain and operate public rights-of-way in the manner it deems best. Provider agrees to use public rights-of-way at provider's sole risk except for inconvenience, annoyance, or injury to provider's wireless facilities caused by the city's negligence or willful misconduct. City shall exercise reasonable care to avoid damaging provider's wireless facilities and city shall report to provider the occurrence of any such damage caused by city's employees, agents or contractors.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.480 Indemnification.

Provider shall indemnify city as provided in Chapter 283, Section 283.057(A) and (B), Texas Local Government Code; except, however, where a claim or damage results from the negligence or willful misconduct of the city.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.490 Waiver of liability.

No provision of this agreement is intended, or shall be construed, to be a waiver for any purpose by city of governmental immunity or other provisions of Texas law limiting municipal liability. No indemnification provision contained in this chapter under which provider indemnifies city shall be construed in any way to limit any other indemnification provision contained in this chapter or Texas law.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE XI. DUTIES AND RESPONSIBILITIES

15.10.500 Condition of public rights-of-way.

City does not warrant the condition or safety of public rights-of-way or service poles. Any provider issued a permit to occupy public rights-of-way or service poles has an obligation to inspect public rights-of-way or service poles, prior to commencing any work. By accepting a permit from the city for occupancy of public right-of-way, provider assumes all risks of any damage, injury, or loss of any nature whatsoever caused by or in connection with the use of public rights-of-way.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.510 Facilities, difficulties, and restrictions of work.

By accepting a permit, provider warrants that it has acquainted, or will fully acquaint, itself and its employees and/or contractors and agents with the conditions relating to the work that provider will undertake under the permit and that it fully understands or will acquaint itself with the facilities, difficulties, and restrictions attending the execution of such work.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.520 Warranties.

City makes no express or implied warranties with regard to public rights-of-way, service poles, or other city facilities or equipment, all of which warranties are hereby disclaimed. City expressly disclaims all other warranties, express or implied including, but not limited to, implied warranties of merchantability or fitness for a particular purpose.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.530 Interruption of service.

In the event that provider shall cause an interruption of service by damaging or interfering with any equipment of city, provider at its expense shall immediately do all things reasonable to avoid injury or damages, direct and incidental, resulting

from the interruption and shall notify city immediately. To the extent permitted by Texas law, provider shall be liable for all direct costs resulting from such damage and any necessary repairs.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE XII. SECURITY

15.10.540 Security required.

Within thirty days of the approval of provider's initial permit under this chapter, provider shall maintain and furnish to the city a security in favor of the city. "Security" means an executed performance bond acceptable to the city, for the purpose of protecting the city from the costs and expenses associated with provider's failure to comply with its material obligations under and throughout the time of provider's occupancy of public right-of-way, including but not limited to:

1. The city's restoration of the public right-of-way;

2. The city's removal of any of provider's attachments that are abandoned or not properly maintained or that need to be removed to protect public health, safety, welfare, or city property;

3. The city's recoupment of rental fees that have not been paid by provider in over twelve months, after provider receives reasonable notice from the city of any of the non-compliance listed above and opportunity to cure.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.550 Amount of security.

The amount of security shall be at least twenty-five thousand dollars for each multiple of five attachments. The security amount shall be prorated based on the number of attachments.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.560 Form of bond.

The bond, if any, must be in a form approved by the city attorney and issued by a corporate surety authorized and admitted to write surety bonds in Texas. The surety must be listed on the current list of accepted sureties on federal bonds published by the United States Treasury Department or reinsured for any liability up to one hundred thousand dollars by a reinsurer listed on the U.S. Treasury list.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.570 Security not renewed.

In the event the surety or party issuing the security cancels or decides not to renew or extend the security, provider shall obtain, and provide to the city attorney for approval, a replacement security with another surety, authorized to do business in Texas, within thirty days of the date the security has been cancelled or non-renewed. If provider fails to provide the replacement security within the thirty-day period, the city may immediately suspend licensee from any further performance under this agreement and begin procedures to terminate for default pursuant to the terms of Article XVI.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.580 Replenish security.

In the event the city draws upon the security, provider must replenish the amount of the security within thirty days. The city will notify provider in writing as a precondition to drawing on, seeking payment under, or executing against the security.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.590 Return of security.

In the event that provider shall relinquish its permits and remove its attachments from city facilities or public right-of-way, the city shall return the security to provider, or a portion thereof, within sixty days of the removal of the attachments.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE XIII. INSURANCE

15.10.600 Insurance required.

At all times during provider's use and occupancy of city facilities or public right-of-way, provider shall keep in force and effect the same insur-

ance coverage as required for certificated telecommunications providers, as set forth in Section 15.08.130.D., City Code.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.610 Certificate of insurance.

Prior to the effective date of any permit issued hereunder, and upon renewal of each insurance policy during the time of provider's occupancy of the public right-of-way, provider will furnish city with a certificate of insurance evidencing the insurance coverage required by this chapter.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE XIV. NON-ASSIGNMENTS OF RIGHTS

15.10.620 Transfer of the rights and obligations of permit.

Permits granted to provider may not be assigned, transferred, sold, or disposed of by provider without the prior written consent of city. Notwithstanding the foregoing, the transfer of the rights and obligations of provider to an affiliate or to any entity that acquires all or substantially all of provider's assets in the market defined by the Federal Communications Commission in which city is located by reason of a merger, acquisition, or other business reorganization ("exempted transfers") shall not require the consent of city.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.630 Obligations of provider.

No assignment or transfer, including exempted transfers, shall be allowed unless and until the assignee or transferee assumes all obligations of provider arising under the permit. Notwithstanding any assignment or transfer, provider shall remain fully liable under its permit and shall not be released from performing any of the terms, covenants or conditions of the permit or this chapter without the written consent to the release of provider by city.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.640 Lease of rights under a permit prohibited.

Provider shall not lease its rights under a permit to an unaffiliated third party, including but not limited to allowing third parties to place wireless facilities, transport facilities, or ground equipment on public right-of-way, or by placing wireless facilities on service poles or other city facilities for the benefit of such third parties, without city's prior written consent. Any such action shall constitute a material violation of this chapter.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE XV. FAILURE TO ENFORCE

15.10.650 Failure to enforce.

Failure of city to take action to enforce compliance with any of the terms or conditions of a permit or this chapter, or to give notice, or to declare a permit terminated, shall not constitute a waiver or relinquishment of any term or condition of the permit or this chapter.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE XVI. TERMINATION OF PERMITS

15.10.660 Failure to comply with terms.

Provider shall be in default of its permit(s) when provider fails to comply with any term or condition of this chapter or its permit(s), including but not limited to the following circumstances:

1. Construction, operation or maintenance of provider's wireless facilities in violation of law or in aid of any unlawful act or undertaking; or

2. Construction, operation or maintenance of provider's wireless facilities after any authorization required of provider has lawfully been denied or revoked by any governmental or private authority; or

3. Construction, operation or maintenance of provider's wireless facilities without the required insurance coverage; or

4. Provider's wireless facilities, transport facilities, or ground equipment are found occupying any portion of any of public right-of-way for which no permit has been issued and is in effect; or

5. Failure of provider to timely cure a violation of any applicable standard or provision of this chapter; or

6. Nonpayment of any undisputed amount due under this chapter.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.670 Notification of default condition(s).

City will notify provider in writing of any default condition(s) pursuant to Section 15.10.660 above. Provider shall take immediate corrective action to eliminate any such condition(s) within thirty days of receipt of notice and shall confirm in writing to city when the noticed condition(s) has ceased or been corrected. If the nature of the violation is such that it cannot be fully cured within thirty days due to circumstances not under provider's control, the period of time in which provider must cure the violation will be extended for such additional time reasonably necessary to complete the cure, provided that: (1) provider has promptly begun to cure; and (2) provider is diligently pursuing its efforts to cure. If provider fails to discontinue or correct such condition(s) and/or fails to give the required confirmation within the foregoing time periods, city may take any remedy available under the law, including immediately terminating any permit.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.680 Requirements at termination of a permit.

Upon termination of a permit pursuant to this article, provider shall remove the affected wireless facilities, transport facilities, or ground equipment within sixty days after termination, at provider's sole expense, and shall surrender the public right-of-way to city in the same condition it was in on the date the permit was granted for same, excepting ordinary wear and tear. If provider fails to remove the equipment within sixty days of termination of the permit, city shall have the right to remove the equipment at provider's expense.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.690 Provider liable for fees and charges.

Provider shall be liable for and pay all fees and charges pursuant to this chapter to city until provider's wireless facilities, transport facilities, or ground equipment are actually removed.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.700 Provider's responsibility and obligations at termination.

After the termination of all permits, provider's responsibility and indemnity obligations shall continue with respect to any claims or demands related to provider's wireless facilities, transport facilities, or ground equipment attachments as provided for in this chapter or applicable law.
(Ord. No. 18717, § 1, 8-22-2017)

15.10.710 Effect of Chapter 284 of the Local Government Code.

If Chapter 284 of the Local Government Code, or any part thereof is at any time, in full or in part, revoked, found to be unconstitutional, struck down, preempted or otherwise becomes void or invalid, then permits granted under this chapter shall automatically terminate, unless an extension is granted by the city. This section shall constitute notice that in such case, all network nodes are to be removed within ninety days from the event that affects Chapter 284. The parties agree they will negotiate in good faith to assure an ease of transitions as to those parts of Chapter 284 that have been adjudicated as unenforceable, as well as continued compliance with those parts that may remain enforceable, if any.
(Ord. No. 18717, § 1, 8-22-2017)

ARTICLE XVII. EMERGENCY CONTACT

15.10.720 Emergency contact.

Provider shall maintain a staffed twenty-four-hour emergency telephone number, not available to the general public, where city can contact provider to report damage to provider's wireless facilities, transport facilities, or ground equipment or other situations requiring immediate communica-

tions between the parties. Such contact person shall be qualified and able to respond to city's concerns and requests. Failure to maintain an emergency contact as required shall subject provider to a penalty of one hundred dollars per incident, and shall eliminate city's liability to provider for any actions that city deems reasonably necessary given the specific circumstances.
(Ord. No. 18717, § 1, 8-22-2017)

Chapter 15.12

WATER AND SEWER SYSTEM

Sections:

15.12.005 Definitions.

15.12.010 Rules and regulations.

15.12.015 Franchise fee.

15.12.020 Unauthorized interference with mains.

15.12.030 Storm drain work—Permit required.

15.12.040 Storm drain construction—Permit required.

15.12.050 Storm drain work or construction permit—Application—Contents—Fee—Issuance.

15.12.055 Discharge to storm sewer system from treatment of petroleum fuel contaminated waters.

15.12.060 Ordering removal or alteration of unauthorized work.

15.12.070 Water contamination in vicinity of water treatment plant.

15.12.075 Permitting flow of water onto public rights-of-way unlawful.

15.12.120 Penalty.

15.12.120-1 Civil penalty.

15.12.120-2 Enforcement by public service board.

15.12.130 Issuance of citations.

15.12.005 Definitions.

For the purpose of this chapter, and Chapter 15.13, the following definitions apply:

A. "Produced water" means any water that is supplied by a public or private water system or that is pumped from the ground or diverted from the flows of the Rio Grande.

B. "Public right-of-way" means a paved or unpaved street, alley or other public easement, including the sidewalk, parkway, curb, gutter or ditch of any street, alley or other public easement.

C. "Responsible party" means the owner, manager, supervisor, person whose name is on the water bill, person whose signature is on the water service contract, person who receives the water bill, or person in charge of the property, facility or operation during the period of time the violation is observed.

D. "Water flowing" from a property means and includes:

1. Water applied for irrigation of landscaping when the application of the water or the device used for applying the water is such that allows a portion of the water to leave the property and enter a public right-of-way;

2. When water used for washing of hard surfaces, vehicles or other objects is used in such a manner that all or a portion of the water so used flows from the property into such public right-of-way; and

3. When water is used on a property for any other purpose in such a manner that a portion or all of the water leaves the property and enters a public right-of-way.

E. "Public service board rules and regulations" means rules and regulations promulgated by the public service board pursuant to Section 15.12.010, a certified copy of which shall be authenticated by the signature of the mayor and the city clerk and made a public record by resolution of city council and on file in the city clerk's office as provided for in Section 3.13 of the city charter.

F. "Shut-off nozzle" means a device attached to the end of a hose that completely shuts off the flow of water, even if left unattended.

G. "Fugitive water" means the pumping, flow, release, escape or leakage of any water from any pipe, valve, faucet, connection, diversion, well or any facility for the purposes of water supply, transport, storage, disposal or delivery onto adjacent property or the public right-of-way.

H. "Turf grass" means a surface of earth containing mowed grass with its roots. Examples are: Annual bluegrass, Kentucky bluegrass, Perennial rye grass, Red fescue, and Tall fescue are cool-season grasses. Common Bermuda grass, Ber-

muda Hybrids, St. Augustine grass, Zoysia grass and Buffalo grass warm-season grasses. (Ord. 14805 (part), 2001: Ord. 10240 § 1, 1990; Ord. 8391 (part), 1985: prior code § 23-32)

15.12.010 Rules and regulations.

The public service board is authorized to promulgate rules and regulations on all subjects relevant to the operation of the city's water and sewer systems, which rules and regulations shall have like effect as if adopted by ordinance. (Ord. 14805 (part), 2001: prior code § 23-1)

15.12.015 Franchise fee.

The recitals described in Ordinance No. 019011 are found to be true and correct legislative and factual findings of the city council, and are hereby approved and incorporated into this ordinance by reference.

The City of El Paso grants the El Paso Water Utilities Public Service Board (PSB) a franchise to use the city streets as necessary to manage and operate the water and sewer system. The city establishes a franchise fee ("PSB infrastructure franchise fee") to be paid by the PSB in the amount of up to six million five hundred fifty thousand dollars. The PSB will pay the city the PSB infrastructure franchise fee on a monthly basis.
(Ord. No. 19011, § 1, 12-17-2019)

15.12.020 Unauthorized interference with mains.

Any person, except an employee or agent of the department of water and sewerage of the city, who shall cut, damage or make any connection with any city water main or sewer main shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030. (Ord. 14805 (part), 2001: prior code § 23-2)

15.12.030 Storm drain work—Permit required.

No person shall fill, improve or create any obstruction to, or interference with, any ditch or natural drainage channel that will in any manner obstruct the flow of water or change the direction, volume or force of water discharged through such ditch or drainage channel carrying stormwater, except upon the issuance of a permit from the city engineer or other designee of the city manager. (Ord. 14805 (part), 2001: Ord. 13152 § 125, 1997: prior code § 23-3)
(Ord. No. 17393, § 7, 8-24-2010, eff. 9-1-2010; Ord. No. 17808, § 8, 6-5-2012, eff. 6-11-2012)

15.12.040 Storm drain construction—Permit required.

No person shall construct, reconstruct, alter, repair or install any drainage structure in any ditch or natural drainage channel carrying stormwaters except on the issuance of a permit by the city engineer or other designee of the cuty manager. (Ord. 14805 (part), 2001: prior code § 23-4)
(Ord. No. 17393, § 7, 8-24-2010, eff. 9-1-2010; Ord. No. 17808, § 8, 6-5-2012, eff. 6-11-2012)

15.12.050 Storm drain work or construction permit—Application—Contents—Fee—Issuance.

A. Any person desiring to obtain a permit required under Sections 15.12.030 or 15.12.040 shall file with the city engineer or other designee of the city manager a written application containing the following information:

1. The name and address of the applicant;

2. The place where such construction, reconstruction, repair, alteration or installation of a structure is to take place; or where a drainage course is to be obstructed, filled, improved or changed;

3. The type of construction and materials to be used in such construction, reconstruction, repair, alteration or installation of the proposed drainage structure, or the manner in which the drainage channel or ditch is to be filled, obstructed or improved;

4. A plan of the proposed work prepared by a professional engineer registered in the state;

5. A verification number confirming that the applicant has contacted a "one call" notification system servicing the area as required by this chapter. Applicant shall pay a filing fee of twenty dollars, which is assessed to pay part of the cost of enforcing Sections 15.12.030 through 15.12.060.

B. If the city engineer or other designee of the city manager finds that the proposed structure, fill, obstruction, alteration or improvement will not interfere with the natural flow of stormwaters so as to damage other property, and will not create or increase any hazard thereto, he shall issue a permit to do the proposed work in the manner specified in the application and plan, or amendments thereto which he may require in the interest of safety; otherwise he shall refuse the permit. A permit may be denied for the failure of the applicant to contact a "one call" notification system servicing the area and to provide a verification number confirming that such a "one call" notification system has been contacted by the applicant. This requirement however, shall create no duty, express or implied, on the part of the city to verify that such a "one call" has been made by the applicant. (Ord. 15654 § 1, 2004; Ord. 14805 (part), 2001: Ord. 13152 § 126, 1997; Ord. 11708 § 1, 1993: prior code § 23-5)
(Ord. No. 17393, § 7, 8-24-2010, eff. 9-1-2010; Ord. No. 17808, § 8, 6-5-2012, eff. 6-11-2012)

15.12.055 Discharge to storm sewer system from treatment of petroleum fuel contaminated waters.

A. Permit required. Where discharge of petroleum-contaminated water to the city storm sewer system is proposed, a petroleum-contaminated water discharge permit (discharge permit) shall be required. A petroleum-contaminated water discharge permit shall be required for each discharge location. If additional discharges are requested for the same location subsequent to a permit having been issued, a new discharge permit application shall be required.

B. Period of validity of permit. A discharge permit issued under the provisions of this section shall expire within twelve months of the date of issuance of the permit. Two twelve-month extensions for completion of the work may be granted by the city engineer or other designee of the city manager, provided that a written request for extension is submitted no later than thirty days before the expiration of the permit. The permit shall become void and a new permit application shall be required after expiration of the permit or permit extension.

C. Permit fee.

1. A petroleum-contaminated water discharge permit application shall be accompanied by a one hundred twenty-five dollar application fee. Such fee shall be to defray the costs of processing such applications and shall be nonrefundable. The application fee shall be paid to the city cashier through the city engineering department.

2. If any person discharges petroleum-fuel contaminated waters into the city storm sewer system without first having obtained a discharge permit, a discharge permit shall be required subject to a late application fee of two thousand seventy-five dollars. In cases where an emergency is declared by a competent authority, and where the city is properly notified through the emergency 911 system or through a facsimile to the city engineer or other designee of the city manager, a late application fee shall not be assessed for work commenced prior to issuance of a discharge permit.

D. Permit contents. The discharge permit application shall be submitted to the city engineer and shall include the following information:

1. A copy of the discharge approval by the Texas Commission on Environmental Quality;

2. A site map of the proposed discharge location;

3. A narrative to include the following:

a. Description of the need for the discharge,

b. Rate of discharge in cubic feet per second, and

c. Duration of discharge;

4. A detailed construction plan to include splash pads;

5. Effluence limitations and water analysis, to include the minimum monitoring requirements as specified in Title 31 Texas Administrative Code Section 321.135. The applicant shall be required to provide copies of the discharge permit application and accompanying information to the director of the department of environmental services.

E. Permit issuance.

1. Upon verification by the applicant that the above-described information has been provided to the director of the department of environmental services, the application shall be accepted for processing.

2. When the discharge requires construction, it shall be the responsibility of the applicant to obtain clearance from all affected utility agencies prior to start of construction. When construction is to be within public right-of-way, the applicant shall meet the insurance requirements of Section 13.16.010 and the bond requirements of Section 13.08.030 of this code.

F. Exception to permit requirement. A petroleum-contaminated water discharge permit shall not be required where discharges of petroleum-contaminated water into the city storm sewer system is associated with a city public works project under the direction of the director of public works. Provided, however, that all other requirements of this section and of other city, state and federal regulations shall be observed, expressly including the notification procedures to the Texas Commission on Environmental Quality and the city-county health district. (Ord. 16822 §§ 1 (part), 2, 2008; Ord. 15657, 2004; Ord. 14805 (part), 2001: Ord. 13152 § 127, 1997; Ord. 11144 § 1, 1992) (Ord. No. 17393, § 8, 8-24-2010, eff. 9-1-2010; Ord. No. 17808, § 9, 6-5-2012, eff. 6-11-2012)

15.12.060 Ordering removal or alteration of unauthorized work.

If any work for which a permit is required under Sections 15.12.030, 15.12.040 and 15.12.050 is done without such permit, and is of such design or nature that a permit would have been refused under Section 15.12.050, the city council may, after five days' notice to the owner and opportunity to be heard, order such work removed, or so altered as to avoid damage or hazard to other property. The city council shall fix a reasonable time for compliance with such order and give the owner written notice thereof. (Ord. 14805 (part), 2001: prior code § 23-6)

15.12.070 Water contamination in vicinity of water treatment plant.

Within the area between a line directly across the irrigation canal and the Rio Grande at the downstream end of the intakes into the city water treatment plant and a line directly across the canal and the river one-half mile upstream therefrom, no person shall:

A. Bathe, swim or wade in the river or canal; or

B. Throw or place in the river or the canal any waste or refuse, or any substance or thing which may contaminate the water; or

C. Throw or place such waste, refuse, substance or thing within one hundred fifty feet of the banks of the canal or within one hundred fifty feet of the normal high water mark of the river; or

D. Keep or bring any animal within such distance from the banks of the canal or the normal high water mark of the river (except animals passing over a public road or in transit on any railroad), or wash or clean within such distance thereof any vehicle which has been used for the transportation of any animal. (Ord. 14805 (part), 2001: prior code § 23-7)

15.12.075 Permitting flow of water onto public rights-of-way unlawful.

It is unlawful for any party responsible for any property within the corporate limits of the city to permit or cause water to flow, spray or otherwise move or be discharged from the premises of such responsible party to or upon any street, alley, gutter or ditch, or other public right-of-way, or into a stormwater drainage system or facility. (Ord. 14805 (part), 2001: Ord. 8391 (part), 1985: prior code § 23-31)

15.12.120 Penalty.

Any person violating any provisions of this chapter or any provision of the public service board rules and regulations shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not to exceed two thousand dollars per violation, and if such violation is a continuous one, each day's violation shall constitute a separate offense. In addition to any penalty provided for in this section, this chapter and the public service board rules and regulations are enforceable by injunction or any other legally available means. (Ord. 14805 (part), 2001: Ord. 10240 § 2, 1990: Ord. 9975 § 1, 1990: Ord. 8391 (part), 1985: prior code § 23-34)

15.12.120-1 Civil penalty.

Any person who violates any provision of the public service board rules and regulations shall be subject to a civil penalty up to a maximum of two thousand dollars per violation. Provided, however, if a different penalty is specifically provided for, such penalty shall apply. Any person who violates a provision of public service board rules and regulations the relating to point source effluent limitations or the discharge of a pollutant, other than from a nonpoint source, into a sewer system, including a sanitary or stormwater sewer system, owned or controlled by the city, shall be subject to a civil penalty up to a maximum of five thousand dollars per violation. If the violation is a continuous one, each day's violation shall constitute a separate offense. (Ord. 14805 (part), 2001: Ord. 11531 § 1, 1993: Ord. 10240 § 3, 1990)

15.12.120-2 Enforcement by public service board.

Whenever it appears there is a violation of any of the public service board rules and regulations, the public service board may institute suit, through its own attorney, for the recovery of civil penalties, as provided for in this chapter, or injunctive relief, or the public service board may pursue any other legally available remedy or any combination of the foregoing. (Ord. 14805 (part), 2001: Ord. 10240 § 4, 1990)

15.12.130 Issuance of citations.

Any water and sewerage inspector or any other personnel authorized to issue class C misdemeanor citations is authorized to issue citations for violations of this chapter. (Ord. 14805 (part), 2001: Ord. 13152 § 128, 1997: Ord. 9975 § 2, 1990: Ord. 8429, 1985: prior code § 23-35)

Chapter 15.13

WATER CONSERVATION

Sections:

15.13.005 Definitions.

15.13.010 Water conservation compliance.

15.13.020 Mandatory compliance—Lawn and landscape watering.

15.13.080 Penalty.

15.13.090 Other enforcement action.

15.13.100 Exceptions to enforcement.

15.13.110 Issuance of citations.

15.13.120 Water emergency—Restriction of water use.

15.13.130 Turf grass prohibited.

15.13.140 Drought and water emergency management response plan.

15.13.005 Definitions.

All definitions contained in Section 15.12.005, Definitions, of Chapter 15.12 "Water and Sewer System" are incorporated into this chapter by reference. (Ord. 14805 (part), 2001)

15.13.010 Water conservation compliance.

No person who uses water from the city water supply system, the management and control of which the city council delegated to the El Paso water utilities public service board (public service board) by Ordinance No. 752, shall make, cause, use or permit the use of water received from the public service board for residential, commercial, industrial, agricultural, governmental or any other purposes in a manner contrary to any provisions of this chapter. Provided further, that no person shall make, cause, use or permit the use of water in a manner contrary to Section 15.12.075 of the city code or Section 15.13.040 of this chapter, regardless of whether that water is received from the El Paso water utilities public service board. When used in this chapter, the terms "commercial," "industrial," and "residential" shall have the meaning and usage consistent with the usage of those terms under Title 20, Zoning, of the city code. (Ord. 14805 (part), 2001: Ord. 10503 § 2 (part), 1991)

15.13.020 Mandatory compliance—Lawn and landscape watering.

The following mandatory restrictions shall apply to all customers of, or persons who use or receive water from the public service board:

A. All outdoor irrigation of grass, trees, plants or other vegetation on residential and commercial property on the side of the street on which building addresses are even numbered, may be done only Tuesdays, Thursdays and Saturdays; and on the side of the street on which buildings are odd numbered, such vegetation may be irrigated only on Wednesdays, Fridays and Sundays. In case of corner buildings having both odd and even numbers, the number carried on the books of the public service board shall control.

B. All outdoor irrigation of grass, trees, plants or other vegetation on industrial properties, parks, golf courses, schools and cemeteries may be permitted only on Mondays, Wednesdays and Fridays. All other properties, not falling within the industrial classifications described in this subsection, shall be considered residential and shall be watered in accordance with the requirements of subsection A of this section.

C. Outdoor irrigation of grass, trees, plants or other vegetation on City of El Paso parks (with such meter/account under the control and management of the City of El Paso Parks and Recreation Department) may be permitted for more than three days, subject to the submission and approval of an annual Conservation Plan. Time-of-day restrictions apply all year for City parks, with irrigation prohibited from ten a.m. to six p.m.

The City of El Paso Parks and Recreation Department will submit the annual conservation plan to the conservation manager by end-of-January each year. The plan will consist of:

• Conservation goals and targets; total annual water consumption, volume per developed acre, and any other agreed upon metric;

• Conservation improvements implemented in prior year; improvements planned for year ahead, consistent with the Texas Water Development Board municipal parks best management practices;

• Policy statement that any new city parks have been designed to irrigation standards established by the Texas Commission on Environmental Quality; and

• Special variances needed for the year (watering days, new parks, turf renovation, seeding, etc.).

The plan will be considered and approved on an annual basis with previous year compliance taken into account as part of the approval process. All outdoor irrigation shall be subject to the drought and water emergency management response plans adopted by the public service board.

D. From April 1st to September 30th, all outdoor irrigation of vegetation is prohibited between the hours of ten a.m. and six p.m.

E. The review board of the public service board shall have the authority to review special situations and hardship cases upon application of any person in accordance with the procedures set forth in Section 15.13.060 of this chapter. (Ord. 14805 (part), 2001: Ord. 10942 § 2, 1992; Ord. 10503 § 2 (part), 1991)
(Ord. No. 18842, § 1, 9-4-2018)

15.13.030 Nonessential water use restrictions.

The following restrictions shall apply to all customers of or persons who use or receive water from the public service board:

A. 1. The washing of automobiles, trucks, trailers, boats, airplanes and other types of mobile equipment shall be done only with a hand-held bucket or a hand-held hose equipped with a shut-off nozzle that completely shuts off the flow of water, even if left unattended. This restriction does not apply to the washing of the above-listed vehicles or mobile equipment when conducted on the premises of a commercial car wash or a commercial service station. When used in this chapter, "bucket" means a bucket or other container holding five gallons or less;

2. The washing of automobiles, trucks, trailers, boats, and other types of mobile equipment for fund-raising purposes must be conducted at a commercial car wash.

3. Prior to connection of water service to any commercial car wash issued building permits for construction after June 1, 2002, a certification shall be provided to the El Paso Water Utilities that the car wash uses no more than fifty gallons of water per vehicle washed. Absent such certification, no water service will be provided.

B. The following uses of water are defined as "wasting water" and are absolutely prohibited:

1. Irrigating any turf grass, tree, plant, or other vegetation, or otherwise utilizing the city water supply system to permit or cause water to pond, or to flow, spray or otherwise move or be discharged from the premises of any person responsible for any property within the corporate limits of the city, or which receives water from the public service board to or upon any street, alley, gutter or ditch, or other public right-of-way, or into a storm water drainage system or facility;

2. Failing to repair a leak within five working days of the discovery of same;

3. Washing sidewalks, driveways, parking areas, tennis courts, patios or other impervious surface areas with a hose, except in emergencies to remove spills of hazardous materials or to eliminate dangerous conditions which threaten the public health, safety, or welfare. "Impervious surface area" means any structure, street, driveway, sidewalk, patio or other surface area covered with brick, paving, tile or other impervious or nonporous material.

C. When referred to in this subsection, "swimming pool" shall mean any portable or permanent

structure containing a body of water twenty-four inches or more in depth and containing one thousand one hundred twenty-two gallons or more of water and intended for recreational purposes, including a wading pool and as more fully defined under Sections 20.02.1064 and 20.02.1066 of the City Code. All swimming pools, which are constructed after the effective date of the ordinance codified in this chapter, must be equipped with filtration, pumping and recirculation systems. All existing swimming pools not equipped with such shall, within five years of April 1, 1991, be converted to filtration, pumping and recirculation systems, unless the review board, upon application of the pool owner or operator for a variance under Section 15.13.060 of this chapter, grants such a variance or extension of time. It is unlawful to drain swimming pools into the street, alley, gutter or other public right-of-way, ditch, or storm water drainage system or facility. Swimming pools may be drained into the sanitary sewer system only in coordination with El Paso Water Utilities' Wastewater System Division Manager.

D. New or replacement bleeder lines from evaporative coolers shall not be larger than one eighth-inch inside diameter. Bleeder lines shall be conducted outside and discharged so that the effluent can be used for water landscaping and other outdoor vegetation, except where this would be impractical or unfeasible.

E. No person shall use water for non-residential single pass cooling or heating purposes unless the water is reused for other purposes. "Single pass

cooling or heating" means the use of water without recirculation to increase or decrease the temperature of equipment, a stored liquid or a confined airspace. (Ord. 15106 § 1, 2002; Ord. 14805 (part), 2001: Ord. 10505 § 2 (part), 1991)
(Ord. No. 17393, § 9, 8-24-2010, eff. 9-1-2010)

15.13.040 Declaring of nuisance of exist.

The flow of produced water from property into streets, alleys, gutters, and other public rights-of-way, ditches, or into a stormwater drainage system or facility is contrary to the public health, safety and welfare of the citizens of El Paso and is therefore declared to be a nuisance. "Produced water" shall have the same meaning as set forth in Section 15.12.005 (A) of the City Code. Both the city attorney's office and the attorney for the public service board are authorized to take legal action to abate such a nuisance, including but not limited to seeking injunctive relief. This authorization to seek injunctive relief, or other legal action to abate such a nuisance shall not preclude prosecution for a violation of this chapter. (Ord. 14805 (part), 2001: Ord. 10503 § 2 (part), 1991)
(Ord. No. 17393, § 10, 8-24-2010, eff. 9-1-2010)

15.13.050 Large and very large users.

A. For the purpose of this section, a large water user is defined as "any person who uses an average of ten thousand gallons per day or more from the water supply system under the management and control of the public service board." A very large water user is defined as "any person who uses an average of one hundred thousand gallons per day or more from the water supply system under the management and control of the public service board."

B. All new very large water users, or existing very large water users, who apply for new service or an expansion of an existing service shall obtain approval from the public service board before being permitted to connect to the system or to expand within the system. Such large water users shall submit a water conservation plan to the Water Conservation Manager which contains a water use justification report that relates the water consumption to recycling potential and meets the requirements of subsection C of this section. The water conservation manager shall submit a recommendation, based upon this submittal to the public service board which shall render its decision within thirty days of the receipt of the recommendation from the water conservation manager. The water conservation manager shall review all water conservation plans submitted to determine whether the plan meets the requirements of this section. The public service board may approve the application for service with or without conditions, deny the application, or take any other action consistent with the policies expressed in this chapter.

C. All large water users who use more than an average of twenty-five thousand gallons per day shall prepare and submit to the water conservation manager, within six months of April 1, 1991, a water conservation plan, in accordance with this section as a condition for continued use or new service. All large water users, who use more than an average of ten thousand gallons per day but less than twenty-five thousand gallons per day, shall prepare and submit to the water conservation manager, within one year of April 1, 1991, a water conservation plan, in accordance with this section as a condition for continued use or new service. The water conservation plan must demonstrate that reasonable diligence will be used to avoid waste and achieve water conservation. The water conservation plan shall include techniques and technologies that will reduce the consumption of water, reduce the loss or waste of water, improve the efficiency in the use of water, or increase the recycling and reuse of water. All conversion to recycling and reuse of water, if required, shall be accomplished within five years from the date of submittal of the water conservation plan. The water conservation manager may require additional information to be submitted which he/she deems necessary. If the water conservation plan demonstrates that the large water user will use reasonable diligence to avoid waste and achieve water conservation, the water conservation man-

ager shall approve the plan. All approved water conservation plans shall be revised every five years. A fee of twenty-five dollars per plan submittal shall be assessed to defray administrative costs.

D. In considering approval of a water conservation plan, the water conservation manager and the public service board shall consider the climatic conditions, best management practices, best available techniques and technologies, the financial capacity of the applicant, and any other such factors which affect the policy of the city as expressed in the water resource management plan or the conservation policy of the State of Texas, as expressed in Section 1.003 of the Texas Water Code or applicable water conservation regulations providing for the conservation and development of the state's water resources adopted by the Texas Commission on Environmental Quality.

E. Any person whose water conservation plan is disapproved by the water conservation manager may appeal the decision to the review board, the public service board and the city council in accordance with the procedure set forth in Sections 15.13.060 and 15.13.070 of this chapter. (Ord. 16822 § 1 (part), 2008; Ord. 14805 (part), 2001: Ord. 10503 § 2 (part), 1991)

15.13.060 Variances and permits.

A. Owners of newly seeded or sodded turf grass and landscaping and new residential and commercial developments may receive a landscape watering permit upon application and approval by the water conservation manager allowing for daily watering of the same until the turf grass and landscaping are established, which shall not exceed thirty days.

B. The planning and development manager, water supply manager and general manager of the public service board, or his designee, shall be immediately established as a review board to review hardship and special cases which cannot fully comply with the provisions of this chapter after recommendation by the water conservation manager. The review board will review hardship or special cases to determine whether a particular case warrants a variance or permit and shall hear appeals from any person whose water conservation plan is rejected by the water conservation manager. The review board shall consider the facts of each case separately and decide whether to grant a variance or permit within ten working days of the receipt of a properly completed "Application for Variance/Permit" form which shall be developed by the water conservation manager. A variance shall be granted only for reasons of economic hardship, medical hardship, or if there is a legitimate public health or safety concern that will be promoted or fulfilled as a result of granting the permit or variance. An "economic hardship" is defined as a threat to an individual's or business' primary source of income, and where not granting the variance would result in material structural damage to the person's property. A "medical hardship" is defined as a situation where it is determined that a person's ill health or medical condition requires a dependency upon others to water or irrigate. Under no circumstances shall inconvenience or the potential for damages of landscaping be considered an economic hardship or significant damage to property which justifies a variance. The review board shall authorize only the implementation of equitable water use restrictions which further the intent of the public service board's water conservation plan. Any special water use restrictions authorized by the review board in each hardship or special case shall be set forth on the face of the variance or the permit. A fee of twenty-five dollars shall be assessed per application to defray administrative costs. The fee may be waived upon the execution of an affidavit stating that applicant for the variance is unable to pay the fee and such affidavit shall be sworn before a notary public. Final determination of an applicant's inability to pay shall be made by the water conservation manager.

C. A variance or permit issued under this section expires under its own terms and conditions, but in no event shall a variance or permit be issued for a period of more than five years from the date of issuance. Any person issued a variance

or permit must fully comply with all the provisions of this chapter as an express condition of that person's variance or permit.

D. Any person who is issued a variance or permit and uses water supplied or delivered by the public service board shall provide proof of such variance or permit upon demand by any person authorized to enforce this chapter. Upon conviction of violating any provision of this chapter, the review board may revoke or suspend any permit or variance previously granted. Provided, however, the review board shall notify the permittee of the proposed revocation five working days before taking such action, and if within that time the permittee requests a hearing in writing, the permittee shall be given an opportunity to be heard by the review board prior to taking such action.

E. No prosecution for a violation of any provision of this chapter may be suspended for the sole purpose of allowing a person to obtain a variance or permit. (Ord. 14805 (part), 2001: Ord. 10942 § 3, 1992; Ord. 10503 § 2 (part), 1991)

15.13.070 Appeal to public service board and city council.

A. Any person who applies for a permit or variance under Section 15.13.060 and is denied such permit or variance by the review board, or whose permit or variance is revoked or suspended by the review board, or whose water conservation plan is disapproved by the review board, may appeal the decision of the review board by filing an intention to appeal in writing with the general manager of the public service board within five working days of the review board's decision. If a proper appeal is timely filed, the public service board will hear the appeal within thirty days of the time the appeal is filed with the general manager. The public service board may take any action it deems necessary with regard to the appeal including denying same, granting same, or granting the requested permit or variance with conditions, or approving the water conservation plan. The decision of the review board shall be final and binding if there is no timely filing of an appeal in accordance with this section.

B. Any person, whose appeal to the public service board is denied, may appeal the decision of the public service board by filing an intention to appeal in writing with the city clerk within five working days of the public service board's decision. If a proper appeal is timely filed, the city council will hear the appeal within thirty days of the time the appeal is filed with the city clerk. The city council may take any action it deems necessary with regard to the appeal including denying same, granting same or granting the requested permit or variance with conditions, or approving the water conservation plan. The decision of the city council shall be final and binding. The decision of the public service board shall be final and binding if there is no timely filing of an appeal in accordance with this section. (Ord. 14805 (part), 2001: Ord. 10503 § 2 (part), 1991)

15.13.080 Penalty.

Any person who violates any of the provisions of this chapter shall be deemed guilty of a misdemeanor and upon conviction, shall be punished by a fine not less than fifty dollars and not to exceed five hundred dollars. The violation of each provision of this chapter, and each separate violation thereof, shall be deemed a separate offense and shall be punished accordingly. (Ord. 14805 (part), 2001: Ord. 10503 § 2 (part), 1991)

15.13.090 Other enforcement action.

Nothing contained in Section 15.13.080, or any other provision of this chapter, shall prevent either the public service board or the city from seeking compliance with or enforcement of this chapter, from seeking injunctive relief in a court of competent jurisdiction, or from utilizing any other civil or equitable remedy to enforce the provisions of this chapter. Both the city attorney's office and the public service board's attorney are authorized to institute injunctive relief or any other civil action deemed necessary to enforce compliance with the provisions of this chapter. The public service board's attorney has no authority for criminal enforcement under this chapter. (Ord. 14805 (part), 2001: Ord. 10503 § 2 (part), 1991)

15.13.100 Exceptions to enforcement.

The following shall constitute exceptions from compliance with the provisions of this chapter:

A. The water is a result of natural events such as rain or snow;

B. The flow is a result of temporary failures or malfunctions of the water supply system;

C. The flow is a result of water used for firefighting purposes including the inspection and pressure testing of fire hydrants or the use of water for firefighting training activities;

D. The use of water is required for the control of dust or the compaction of soil as may be required by this code;

E. The water is used to wash down areas where flammable or otherwise hazardous material has been spilled and creates a dangerous condition;

F. The water is used to prevent or abate public health, safety or accident hazards when alternate methods are not available;

G. The water is used for routine inspection or maintenance of the water supply system;

H. The water is used to facilitate construction within public right-of-way in accordance with the requirements of the city and good construction practices;

I. The use of water is permitted under the terms of a variance, permit or compliance agreement granted by the review board or the public service board;

J. The water that is used for street sweeping, sewer maintenance or other established utility and public works practices;

K. Watering contrary to the even/odd watering requirements, under Sections 15.13.020(A) and 15.13.020(B), and from the time of day watering requirements under Section 15.13.020(C), may be permissible for one day only where application of chemicals requires immediate watering to preserve an existing lawn. In cases of commercial application, a receipt from a commercial lawn treatment company indicating the date of treatment, the address of the property treated, the name and address of the commercial contractor, and the chemical treatment required shall constitute evidence that the owner or person responsible for the property is entitled to this exception. Where treatment with a noncommercial application of chemicals requires immediate watering to preserve an existing lawn, the owner or person responsible for the property must contact the water conservation department prior to the application of chemicals and provide evidence satisfactory to the water conservation manager for approval of this exception;

L. Outdoor irrigation necessary for the establishment of newly seeded or sodded turf grass and landscaping in new residential and commercial developments;

M. Plants which cannot be kept alive without daily watering may be permitted to be watered from a bucket but not from the use of a hose on the days when watering is prohibited. (Ord. 14085 (part), 2001: Ord. 10942 § 4, 1992; Ord. 10503 § 2 (part), 1991)

15.13.110 Issuance of citations.

The water conservation manager or designee, or any other personnel authorized to issue class C misdemeanor citations are authorized to issue citations for violations of this chapter. (Ord. 14805 (part), 2001: Ord. 13152 § 129, 1997: Ord. 10503 § 2 (part), 1991)

15.13.120 Water emergency—Restriction of water use.

The general manager may implement the following additional restrictions and regulations curtailing water use upon the declaration of a water emergency by the mayor upon recommendation of the public service board:

A. Prohibit all restaurants from serving water to their customers except when specifically requested by the customer;

B. Prohibit the operation of any ornamental fountain or similar structure;

C. Suspend the issuance of all variances or permits hereunder;

D. Prohibit the filling, refilling or adding of water to all swimming pools;

E. Prohibit the washing of all vehicles and equipment except upon the premises of a commercial car wash;

F. Require that the washing of motor vehicles, airplanes, boats or other types of mobile equipment, upon the immediate premises of a commercial car wash or a commercial service station, shall occur only between the hours of twelve noon and five p.m.

The mayor may declare a water emergency in case of a severe drought, in the event of any condition which interrupts the ability of the public service board to supply water, where curtailment of the use of water is necessary due to war, a natural disaster, to protect the public health, safety or welfare, or to preserve the water supply. In the event such water emergency is to continue for more than five days, such measures must be passed by resolution by majority of city council in order for the declaration of emergency to continue beyond the initial five day period. During such a water emergency, the general manager may impose any additional restrictions on the use of water from the city's water supply system in all or in any part of the city as the city council may authorize. (Ord. 15106 § 3, 2002: Ord. 14805 (part), 2001: Ord. 10503 § 2 (part), 1991)

15.13.130 Turf grass prohibited.

A. Turf grass is prohibited in all parkways, narrow strips of land and sloped areas within new residential or commercial sites for which a building permit is issued after June 1, 2002, unless irrigated with sub-surface irrigation. For purposes of this section, "sloped areas" means an area with a slope ratio of one to three or greater from the horizontal. "Sub-surface irrigation" means a low pressure irrigation system installed below the surface of the ground or mulch, consisting of a water distribution system equipped with pre-installed water emitters that are rated by gallons per hour, and that is suitable for turf grass irrigation.

B. Turf grass for residential sites after June 1, 2002, shall not be used for more than fifty percent of the total area to be landscaped (front and back yard).

C. Turf grass for commercial sites after June 1, 2002, shall not be used for more than thirty-three and one-third of the total area to be landscaped (front and back yard). (Ord. 15106 § 2, 2002: Ord. 14805 (part), 2001)

15.13.140 Drought and water emergency management response plan.

It shall be unlawful to violate the imposed provisions of the drought and water emergency management response plan, dated November, 2002, after the declaration of a drought or water emergency and imposition of restrictions in accordance with the plan. (Ord. 15375, 2003: Ord. 14805 (part), 2001)

Chapter 15.16

DISCHARGES TO STORM SEWERS AND OTHER PUBLIC RIGHTS-OF-WAY

Sections:

15.16.010 Prohibition.

15.16.020 Penalty.

15.16.020-1 Civil penalty.

15.16.030 Issuance of citations.

15.16.010 Prohibition.

Any discharge into any street, gutter, ditch, channel, watercourse, drain, stormwater inlet or storm sewer of any wastewater, including but not limited to sand/grit trap sludges and restaurant grease trap sludges, or liquid waste containing cement, concrete, building materials, oil, chemicals, wastewater or other liquid industrial waste, such as all waterborne solids, liquids or gaseous waste containing toxic or poisonous substances in amounts prohibited by any federal or state regulation or any substance which can block or interfere with the flow in any of the previously named storm sewers and other public rights-of-way is prohibited. Any discharge of process water into the city's stormwater collection system, which is in accordance with city-issued permit, which may be based upon a National Pollutant Discharge Elimination System (NPDES) permit and applicable state permits, shall be an exception to this prohibition. (Ord. 11225 § 1, 1992: Ord. 10661 § 1 (part), 1991)

15.16.020 Penalty.

Any person violating any provision of this chapter shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not to exceed two thousand dollars per violation, and if such violation is a continuous one, each day's violation shall constitute a separate offense. (Ord. 10661 § 1 (part), 1991)

15.16.020-1 Civil penalty.

Any person who violates a provision of the city code relating to point source effluent limitations or the discharge of a pollutant, other than from a nonpoint source, into a sanitary or stormwater sewer system owned or controlled by the city shall be subject to a civil penalty up to a maximum of five thousand dollars per violation. If the violation is a continuous one, each day's violation shall constitute a separate offense. (Ord. 11545 § 2, 1993)

15.16.030 Issuance of citations.

Any environmental enforcement supervisor, environmental enforcement inspector, civil works inspector or any other personnel authorized to issue Class C misdemeanor citations is authorized to issue citations for violations of this chapter. (Ord. 10661 § 1 (part), 1991)

Chapter 15.17

CABLE TELEVISION RATE REGULATIONS

Sections:

15.17.010 Definitions.

15.17.020 Initial review of basic cable rates.

15.17.030 Review of request for increase in basic cable rates.

15.17.040 Cable operator information.

15.17.050 Automatic rate adjustments.

15.17.060 Enforcement.

15.17.070 Construction of laws—FCC regulations.

15.17.010 Definitions.

"Basic cable rates" means the monthly charges for a subscription to the basic service tier and associated equipment.

"Basic service tier" means a separately available service tier to which subscription is required for access to any other tier of service, including as a minimum, but not limited to, all must-carry signals, all PEG channels, and all domestic television signals other than superstations.

"Benchmark" means a per channel rate of charge for cable service and associated equipment which the FCC has determined is reasonable.

"Cable Act of 1992" means the Cable Television Consumer Protection and Competition Act of 1992.

"Cable operator" means any person or group of persons:

1. Who provide cable service over a cable system and directly or through one or more affiliates owns a significant interest in such a cable system; or

2. Who otherwise controls or is responsible for, through any arrangement, the management and operation of such a cable system.

"Channel" means a unit of cable service identified and selected by a channel number or similar designation.

"Cost of service showing" means a filing in which the cable operator attempts to show that the benchmark rate or the price cap is not sufficient to allow the cable operator to fully recover the costs of providing the basic service tier and to continue to attract capital.

"FCC" means the Federal Communications Commission.

"Initial basic cable rates" means the rates that the cable operator is charging for the basic service tier, including charges for associated equipment, at the time the city notifies the cable operator of the city's qualification and intent to regulate basic cable rates.

"Must-carry signal" means the signal of any local broadcast station (except superstations which is required to be carried on the basic service tier).

"Peg channel" means the channel capacity designated for public, educational, or governmental use, and facilities and equipment for the use of that channel capacity.

"Price cap" means the ceiling set by the FCC on future increases in basic cable rates regulated by the city, based on a formula using the GNP fixed weight price index, reflecting general increases in the cost of doing business and changes in overall inflation.

"Reasonable rate standard" means a per channel rate that is at, or below, the benchmark or price cap level.

"Superstation" means any nonlocal broadcast signal secondarily transmitted by satellite. (Ord. 11635 § 1 (part), 1993)

15.17.020 Initial review of basic cable rates.

A. Notice. Upon the adoption of the ordinance codified in this chapter and the certification of the city by the FCC, the city shall immediately notify all cable operators in the city, by certified mail, return receipt requested, that the city intends to regulate subscriber rates charged for the basic service tier and associated equipment as authorized by the Cable Act of 1992.

B. Cable Operator Response. Within thirty days of receiving notice from the city, a cable

operator shall file with the city, its current rates for the basic service tier and associated equipment and any supporting material concerning the reasonableness of its rates.

C. Expedited Determination and Public Hearing.

1. If the city council is able to expeditiously determine that the cable operator's rates for the basic service tier and associated equipment are within the FCC's reasonable rate standard, as determined by the applicable benchmark, the city council shall:

a. Hold a public hearing at which interested persons may express their views; and

b. Act to approve the rates within thirty days from the date the cable operator filed its basic cable rates with the city.

2. If the city council takes no action within thirty days from the date the cable operator filed its basic cable rates with the city, the proposed rates will continue in effect.

D. Extended Review Period.

1. If the city council is unable to determine whether the rates in issue are within the FCC's reasonable rate standard based on the material before it, or if the cable operator submits a cost-of-service showing, the city council shall, within thirty days from the date the cable operator filed its basic cable rates with the city and by adoption of a formal resolution, invoke the following additional periods of time, as applicable, to make a final determination:

a. Ninety days if the city council needs more time to ensure that a rate is within the FCC's reasonable rate standards; or

b. One hundred fifty days if the cable operator has submitted a cost-of-service showing seeking to justify a rate above the applicable benchmark.

2. If the city council has not made a decision within the ninety or one hundred fifty day period, the city council shall issue a brief written order at the end of the period requesting the cable operator to keep accurate account of all amounts received by reason of the proposed rate and on whose behalf the amounts are paid.

E. Public Hearing. During the extended review period and before taking action on the proposed rate, the city council shall hold at least one public hearing at which interested persons may express their views and record objections.

F. Objections. An interested person who wishes to make an objection to the proposed initial basic rate may request the city clerk to record the objection during the public hearing or may submit the objection in writing anytime before the decision resolution is adopted. In order for an objection to be made part of the record, the objector must provide the city clerk with the objector's name and address.

G. Benchmark Analysis. If a cable operator submits its current basic cable rate schedule as being in compliance with the FCC's reasonable rate standard, the city council shall review the rates using the benchmark analysis in accordance with the standard form authorized by the FCC. Based on the city council's findings, the initial basic cable rates shall be established as follows:

1. If the current basic cable rates are below the benchmark, those rates shall become the initial basic cable rates and the cable operator's rates will be capped at that level.

2. If the current basic cable rates exceed the benchmark, the rates shall be the greater of the cable operator's per channel rate on September 30, 1992, reduced by ten percent, or the applicable benchmark, adjusted for inflation and any change in the number of channels occurring between the September 30, 1992, and the initial date of regulation.

3. If the current basic cable rates exceed the benchmark, but the cable operator's per channel rate was below the benchmark on September 30, 1992, the initial basic cable rate shall be the benchmark, adjusted for inflation.

H. Cost-of-Service Showings. If a cable operator does not wish to reduce the rates to the permitted level, the cable operator shall have the op-

portunity to submit a cost-of-service showing in an attempt to justify an initial basic cable rates above the FCC's reasonable rate standard. The city council will review a cost-of-service submission pursuant to FCC standards for cost-of-service review. The city council may approve initial basic cable rates above the benchmark if the cable operator makes the necessary showing; however, a cost-of-service determination resulting in rates below the benchmark or below the cable operator's September 30, 1992 rates minus ten percent, will prescribe the cable operator's new rates.

I. Decision.

1. By Formal Resolution. After completion of its review of the cable operator's proposed rates, the city council shall adopt its decision by formal resolution. The decision shall include one of the following:

a. If the proposal is within the FCC's reasonable rate standard or is justified by a cost-of-service analysis, the city council shall approve the initial basic cable rates proposed by the cable operator; or

b. If the proposal is not within the FCC's reasonable rate standard and the cost-of-service analysis, if any, does not justify the proposed rates, the city council shall establish initial basic cable rates that are within the FCC's reasonable rate standard or that are justified by a cost-of-service analysis.

2. Rollbacks and Refunds. If the city council determines that the initial basic cable rates as submitted exceed the reasonable rate standard or that the cable operator's cost-of-service showing justifies lower rates, the city council may order the rates reduced in accordance with subsections (G) or (H) of this section, as applicable. In addition, the city council may order the cable operator to pay to subscribers, refunds of the excessive portion of the rates with interest (computed at applicable rates published by the Internal Revenue Service for tax refunds and additional tax payments), retroactive to September 1, 1993. The method for paying any refund and the interest rate will be in accordance with FCC regulations as directed in the city council's decision resolution.

3. Statement of Reasons for Decision and Public Notice. If rates proposed by a cable operator are disapproved in whole or in part, or if there were objections made by other parties to the proposed rates, the resolution must state the reasons for the decision and the city council must give public notice of its decision. Public notice will be given by advertisement once in the official newspaper of the city.

J. Appeal. The city council's decision concerning rates for the basic service tier or associated equipment, may be appealed to the FCC in accordance with applicable federal regulations. (Ord. 11635 § 1 (part), 1993)

15.17.030 Review of request for increase in basic cable rates.

A. Notice. A cable operator in the city who wishes to increase the rates for the basic service tier or associated equipment shall file a request with the city and notify all subscribers at least thirty days before the cable operator desires the increase to take effect. This notice may not be given more often than annually and not until at least one year after the determination of the initial basis cable rates.

B. Expedited Determination and Public Hearing.

1. If the city council is able to expeditiously determine that the cable operator's rate increase request for basic cable service is within the FCC's reasonable rate standard, as determined by the applicable price cap, the city council shall:

a. Hold a public hearing at which interested persons may express their views; and

b. Act to improve the rate increase within thirty days from the date the cable operator filed its request with the city.

2. If the city council takes no action within thirty days from the date the cable operator filed its request with the city, the proposed rates will go into effect.

C. Extended Review Period.

1. If the city council is unable to determine whether the rate increase is within the FCC's reasonable rate standard based on the material before it, or if the cable operator submits a cost-of-service showing, the city council shall, by adoption of a formal resolution, invoke the following additional periods of time, as applicable, to make a final determination:

a. Ninety days if the city council needs more time to ensure that the requested increase is within the FCC's reasonable rate standard as determined by the applicable price cap; and

b. One hundred fifty days if the cable operator has submitted a cost-of-service showing seeking to justify a rate increase above the applicable price cap.

2. The proposed rate increase is tolled during the extended review period.

3. If the city council has not made a decision within the ninety or one hundred fifty day period, the city council shall issue a brief written order at the end of the period requesting the cable operator to keep accurate account of all amounts received by reason of the proposed rate increase and on whose behalf the amounts are paid.

D. Public Hearing. During the extended review period and before taking action on the requested rate increase, the city council shall hold at least one public hearing at which interested persons may express their views and record objections.

E. Objections. An interested person who wishes to make an objection to the proposed rate increase may request the city clerk to record the objection during the public hearing or may submit the objection in writing anytime before the decision resolution is adopted. In order for an objection to be made part of the record, the objector must provide the city clerk with the objector's name and address.

F. Delayed Determination. If the city council is unable to make a final determination concerning a requested rate increase within the extended time period, the cable operator may put the increase into effect, subject to subsequent refund if the city council later issues a decision disapproving any portion of the increase.

G. Price Cap Analysis. If a cable operator presents its request for a rate increase as being in compliance with the FCC's price cap, the city council shall review the rate using the price cap analysis in accordance with the standard form authorized by the FCC. Based on the city council's findings, the basic cable rates shall be established as follows:

1. If the proposed basic cable rate increase is within the price cap established by the FCC, the proposed rates shall become the new basic cable rates.

2. If the proposed basic rate increase exceeds the price cap established by the FCC, the city council shall disapprove the proposed rate increase and order an increase that is in compliance with the price cap.

H. Cost-of-Service Showings. If a cable operator submits a cost-of-service showing in an attempt to justify a rate increase above the price cap, the city council will review the submission pursuant the FCC standards for cost-of-service review. The city council may approve a rate increase above the price cap if the cable operator makes the necessary showing; however, a cost-of-service determination resulting in a rate below the price cap or below the cable operator's then current rate will prescribe the cable operator's new rate.

I. Decision. The city council's decision concerning the requested rate increase, shall be adopted by formal resolution. If a rate increase proposed by a cable operator is disapproved in whole or in part, or if objections were made by other parties to the proposed rate increase, the resolution must state the reasons for the decision. Objections may be made at the public hearing by a person requesting the city clerk to record the objection or may be submitted in writing at anytime before the decision resolution is adopted.

J. Refunds.

1. The city council may order refunds of subscribers' rate payments with interest if:

a. The city council was unable to make a decision within the extended time period as described in subsection C of this section;

b. The cable operator implemented the rate increase at the end of the extended review period; and

c. The city council determines that the rate increase as submitted exceeds the applicable price cap or that the cable operator failed to justify the rate increase by a cost-of-service showing, and the city council disapproves any portion of the rate increase.

2. The method for paying any refund and the interest rate will be in accordance with FCC regulations as directed in the city council's decision resolution.

K. Appeal. The city council's decision concerning rates for the basic service tier or associated equipment, may be appealed to the FCC in accordance with applicable federal regulations. (Ord. 11635 § 1 (part), 1993)

15.17.040 Cable operator information.

A. City May Require.

1. In those cases when the cable operator has submitted initial rates or proposed an increase that exceeds the reasonable rate standard, the city council may require the cable operator to produce information in addition to that submitted, including proprietary information, if needed to make a rate determination. In these cases, a cable operator may request the information be kept confidential in accordance with this section.

2. In cases where initial or proposed rates comply with the reasonable rate standard, the city council may request additional information only in order to document that the cable operator's rates are in accord with the standard.

B. Request for Confidentiality.

1. A cable operator submitting information to the city council may request in writing that the information not be made routinely available for building services department. A copy of the request shall be attached to and cover all of the information and all copies of the information to which it applies.

2. If feasible, the information to which the request applies shall be physically separated from any information to which the request does not apply. If this is not feasible, the portion of the information to which the request applies shall be identified.

3. Each request shall contain a statement of the reasons for withholding inspection and a statement of the facts upon which those reasons are based.

4. Casual requests which do not comply with the requirements of this subsection shall not be considered.

C. City Council Action. Requests which comply with the requirements of subsection B of this section, will be acted upon by the city council. The city council will grant the request if the cable operator presents by a preponderance of the evidence, a case for nondisclosure consistent with applicable federal regulations. If the request is granted, the ruling will be placed in a public file in lieu of the information withheld from building services department. If the request does not present a case for nondisclosure and the city council denies the request, the city council shall take one of the following actions:

1. If the information has been submitted voluntarily without any direction from the city, the cable operator may request that the city return the information without considering it. Ordinarily, the city will comply with this request. Only in the unusual instance that the public interest so requires, will the information be made available for building services department.

2. If the information was required to be submitted by the city council, the information will be made available for building services department.

D. Appeal. If the city council denies the request for confidentiality, the cable operator may seek review of that decision from the FCC within five working days of the city council's decision,

and the release of the information will be stayed pending review. (Ord. 13152 § 130, 1997; Ord. 11635 § 1 (part), 1993)

15.17.050 Automatic rate adjustments.

A. Annual Inflation Adjustment. In accordance with FCC regulations, the cable operator may adjust its capped base per channel rate for the basic service tier annually by the final GNP-PI index.

B. Other External Costs.

1. The FCC regulations also allow the cable operator to increase its rate for the basic service tier automatically to reflect certain external cost factors to the extent that the increase in cost of those factors exceeds the GNP-PI. These factors include retransmission consent fees, programming costs, state and local taxes applicable to the provision of cable television service, and costs of franchise requirements. The total cost of an increase in a franchise fee may be automatically added to the base per channel rate, without regard to its relation to the GNP-PI.

2. For all categories of external costs other than retransmission consent and franchise fees, the starting date for measuring changes in external costs for which the basic service per channel rate may be adjusted will be the date on which the basic service tier becomes subject to regulation or February 28, 1994, whichever occurs first. The permitted per channel charge may not be adjusted for costs of retransmission consent fees or changes in those fees incurred before October 6, 1994.

C. Notification and Review. The cable operator shall notify the city at least thirty days in advance of a rate increase based on automatic adjustment items. The city shall review the increase to determine whether the item or items qualify as automatic adjustments. If the city makes no objection within thirty days of receiving notice of the increase, the increase may go into effect. (Ord. 11635 § 1 (part), 1993)

15.17.060 Enforcement.

A. Refunds. The city may order the cable operator to refund to subscribers a portion of previously paid rates under the following circumstances:

1. A portion of the previously paid rates have been determined to be in excess of the permitted tier charge or above the actual cost of equipment; or

2. The cable operator has failed to comply with a valid rate order issued by the city.

B. Fines. If the cable operator fails to comply with a rate decision or refund order, the cable operator shall be subject to a fine of five hundred dollars for each day the cable operator fails to comply. (Ord. 11635 § 1 (part), 1993)

15.17.070 Construction of laws—FCC regulations.

The regulations set forth in this chapter are in addition to and cumulative of any regulations enacted by the FCC or other laws for the regulation of cable television services and equipment rates. To the extent that these regulations are irreconcilable with the FCC regulations for cable television services and rates, the FCC regulations prevail. Where the city has enacted regulations which are more stringent or restrictive than the FCC regulations for cable television services and rates, the city's regulations shall prevail as permitted under FCC regulations or other applicable laws. (Ord. 11635 § 1 (part), 1993)

Chapter 15.18

CABLE TELEVISION CUSTOMER SERVICE REGULATIONS

Sections:

15.18.010 Definitions.

15.18.020 Cable system office hours and telephone availability.

15.18.030 Installations, outages and service calls.

15.18.040 Communications between cable operators and cable subscribers.

15.18.050 Complaint procedures.

15.18.060 Enforcement.

15.18.070 Construction of laws—FCC regulations.

15.18.010 Definitions.

For the purposes of this chapter, the words set forth in this section shall have the following meanings:

"Normal business hours" means those hours during which most similar businesses in the community are open to serve customers. In all cases, "normal business hours" must include some evening hours at least one night per week or some weekend hours.

"Normal operating conditions" means those service conditions which are within the control of the cable operator. Those conditions which are not within the control of the cable operator include, but are not limited to, natural disasters, civil disturbances, power outages, telephone network outages, and severe or unusual weather conditions. Those conditions which are ordinarily within the control of the cable operator include, but are not limited to, special promotions, pay-per-view events, rate increases, regular park or seasonal demand periods, and maintenance or upgrade of the cable system.

"Service interruption" means the loss of picture or sound on one or more cable channels.

"Standard installation" means that installation that is located up to one hundred twenty-five feet from the existing distribution system. (Ord. 11636 § 1 (part), 1993)

15.18.020 Cable system office hours and telephone availability.

A. The cable operator will maintain a local, toll-free or collect call telephone access line which will be available to its subscribers twenty-four hours a day, seven days a week.

1. Trained company representatives will be available to respond to customer telephone inquiries during normal business hours.

2. After normal business hours, the access line may be answered by a service or an automated response system, including an answering machine. Inquires received after normal business hours must be responded to by a trained company representative on the next business day.

B. Under normal operating conditions, telephone answer time by a customer representative, including wait time, shall not exceed thirty seconds when the connection is made. If the call needs to be transferred, transfer time shall not exceed thirty seconds. These standards shall be met no less than ninety percent of the time under normal operating conditions, measured on a quarterly basis.

C. The operator will not be required to acquire equipment or perform surveys to measure compliance with the telephone answering standards above unless any historical records of complaints indicates a clear failure to comply.

D. Under normal operating conditions, the customer will receive a busy signal less than three percent of the time.

E. Customer service center and bill payment locations will be open at least during normal business hours and will be conveniently located. (Ord. 11636 § 1 (part), 1993)

15.18.030 Installations, outages and service calls.

Under normal operating conditions, each of the following standards will be met no less than ninety-five percent of the time measured on a quarterly basis:

A. Standard installations will be performed within seven business days after an order has been placed.

B. Excluding conditions beyond the control of the operator, the cable operator will begin working on "service interruptions" promptly and in no event later than twenty-four hours after the interruption becomes known. The cable operator must begin actions to correct other service problems the next business day after notification of the service problem.

C. The "appointment window" alternatives for installations, service calls, and other installation activities will be either a specific time or, at maximum, a four-hour block during normal business hours. The operator may schedule service calls and other installation activities outside of normal business hours for the express convenience of the customer.

D. An operator may not cancel an appointment with a customer after the close of business on the business day prior to the scheduled appointment.

E. If a cable operator representative is running late for an appointment with a customer and will not be able to keep the appointment as scheduled, the customer will be contacted. The appointment will be rescheduled, as necessary, at a time which is convenient for the customer. (Ord. 11636 § 1 (part), 1993)

15.18.040 Communications between cable operators and cable subscribers.

A. Notifications to Subscribers.

1. The cable operator shall provide written information on each of the following areas at the time of installation of service, at least annually to all subscribers, and at any time upon request:

a. Products and services offered;

b. Prices and options for programming services and conditions of subscription to programming and other services;

c. Installation and service maintenance policies;

d. Instructions on how to use the cable service;

e. Channel positions programming carried on the system; and

f. Billing and complaint procedures, including the address and telephone number of the city's cable communications commission.

2. Customers will be notified of any changes in rates, programming services or channel positions as soon as possible through announcements on the cable system and in writing. Notice must be given to subscribers a minimum of thirty days in advance of such changes if the change is within the control of the cable operator. In addition, the cable operator shall notify subscribers thirty days in advance of any significant changes in the other information required by the preceding paragraph.

B. Billing.

1. Bills will be clear, concise and understandable. Bills must be fully itemized, with itemizations including, but not limited to, basic and premium service charges and equipment charges. Bills will also clearly delineate all activity during the billing period, including optional charges, rebates and credits.

2. In case of a billing dispute, the cable operator must respond to a written complaint from a subscriber within thirty days.

C. Refunds. Refund checks will be issued promptly, but no later than either:

1. The customer's next billing cycle following resolution of the request or thirty days, whichever is earlier; or

2. The return of the equipment supplied by the cable operator if service is terminated.

D. Credits. Credits for service will be issued no later than the customer's next billing cycle following the determination that a credit is warranted. (Ord. 11636 § 1 (part), 1993)

15.18.050 Complaint procedures.

A. A subscriber who wishes to file a service-related complaint with the city against a cable operator must notify the city of such complaint in writing. A copy of the complaint must be forwarded by the subscriber to the cable operator.

B. The cable operator shall, within fifteen days of receipt of the complaint, provide a written response to the city and the complaining subscriber. Such response should include a proposed resolution to the alleged violations asserted in the complaint.

C. A complaining subscriber shall have fifteen days following the subscriber's receipt of the cable operator's response to notify the city and cable operator in writing of either of the following:

1. The subscriber's acceptance or rejection of the cable operator's proposed resolution; or

2. The subscriber's proposed resolution of the complaint.

A subscriber's failure to provide such written notification shall be deemed an acceptance of the cable operator's proposed solution. Where a subscriber proposes a resolution of the complaint, the cable operator shall have fifteen days following the cable operator's receipt of the subscriber's proposed resolution to notify the city and subscriber of its acceptance or rejection of the subscriber's proposed resolution.

D. Where a resolution to the complaint is not agreed upon by the cable operator and subscriber, the city may impose a resolution to be binding upon both the cable operator and the complaining subscriber.

E. To the extent allowed by law, a cable operator or subscriber may appeal a city-imposed resolution to the Federal Communications Commission. (Ord. 11636 § 1 (part), 1993)

15.18.060 Enforcement.

A. The city may enforce these customer service standards as permitted under the federal, state or local laws and regulations. The city shall have the right to inspect a cable operator's business records and equipment of a cable operator to assure compliance with the provisions of this chapter.

B. The city shall adopt rules of procedure for enforcement of this chapter. (Ord. 11636 § 1 (part), 1993)

15.18.070 Construction of laws—FCC regulations.

The regulations set forth in this chapter are in addition to and cumulative of any regulations enacted by the FCC or other laws for the regulation of cable television customer service. To the extent that these regulations are irreconcilable with the FCC regulations for cable television services and rates, the FCC regulations prevail. Where the city has enacted regulations which are more stringent or restrictive than the FCC regulations for cable television services and rates, the city's regulations shall prevail as permitted under FCC regulations or other applicable laws. (Ord. 11636 § 1 (part), 1993)

Chapter 15.20

STORMWATER MANAGEMENT

Sections:

15.20.010 Purpose.

15.20.020 Scope.

15.20.030 Administration.

15.20.040 Duties and responsibilities of stormwater administrator.

15.20.050 Duties and responsibilities of the director of the department of transportation.

15.20.060 Abbreviations.

15.20.070 Definitions.

15.20.080 General prohibition.

15.20.090 Specific prohibitions and requirements.

15.20.100 Release reporting and cleanup.

15.20.110 Stormwater discharge from construction activities.

15.20.120 Stormwater discharges associated with industrial activity.

15.20.130 Application of SDPCP.

15.20.140 Citizen participation.

15.20.150 Criminal penalty.

15.20.160 Authority to issue citations.

15.20.010 Purpose.

The purpose of this chapter is for the elimination or reduction of pollutants from entering the city's municipal separate storm sewer system and for control over discharges to and from the system. The provisions of this chapter are to complement the health and safety ordinance, the public services ordinance, the streets, sidewalks and public places ordinance, all agreements with the city and the building and construction ordinance. It shall be the purpose of this chapter:

A. To maintain and improve the quality of surface water and groundwater within the jurisdiction of the city.

B. To prevent the discharge of contaminated stormwater runoff from industrial, commercial, residential, and construction sites into the municipal separate storm sewer system (MS4) and natural waters within the city.

C. To promote public awareness of the hazards involved in the improper discharge of hazardous substances, petroleum products, household hazardous waste, industrial waste, sediment from construction sites, pesticides, herbicides, fertilizers, and other contaminants into the storm drains and natural waters of the city.

D. To encourage recycling of used motor oil and safe disposal of other hazardous consumer products.

E. To facilitate compliance with state and federal standards and permits by owners and operators of facilities engaged in industrial activities and construction sites within the city.

F. To enable the city to comply with all federal and state laws, regulations and permits applicable to stormwater discharge. (Ord. 13477 § 1 (part), 1998)

15.20.020 Scope.

This chapter shall apply to any stormwater discharge associated with industrial activity, as defined by Section 122.26(b)(14) of Title 40, Code of Federal Regulations. (Ord. 13477 § 1 (part), 1998)

15.20.030 Administration.

The city manager shall, to the extent that the duties and responsibilities established in Section 15.20.040 have not been delegated or assumed by another person, agency, department or entity pursuant to other ordinances adopted by the city, designate the stormwater administrator who shall then undertake the duties and responsibilities established in Section 15.20.040, and administer and coordinate the implementation and enforcement of all provisions of this chapter. (Ord. 14456 § 1, 2000: Ord. 13477 § 1 (part), 1998)
(Ord. No. 17393, § 11, 8-24-2010, eff. 9-1-2010)

15.20.040 Duties and responsibilities of stormwater administrator.

Duties and responsibilities of the stormwater administrator shall include, but not be limited to, the following:

A. Be the custodian of the MS4, including all dams, detention and retention basins, storm drains, outlet working channels and pumping stations;

B. Maintain and hold open for public inspection all records pertaining to the provisions of this chapter;

C. Review permit applications to determine whether proposed developments will eliminate or reduce the pollutants entering the MS4;

D. Review, approve or deny all applications for development permits required by adoption of this chapter;

E. Review permits for proposed development to assure that all necessary permits have been obtained from those federal, state or local governmental agencies (including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334 from which prior approval is required;

F. Maintain surveillance over the operation and maintenance condition of the MS4 to ensure its safe and effective functioning; notify the deputy director for streets of any required maintenance and/or repair work;

G. Conduct an annual inspection of the MS4 and provide a written inspection report, including an assessment of the operational condition, safety, effectiveness and maintenance condition of the system, and a line item list of required special maintenance or repairs to the deputy director of streets;

H. Establish and implement a program to locate and eliminate illicit discharges and improper disposals to the MS4;

I. Establish and implement a program to prevent, contain and respond to spills that may discharge into MS4. This program shall be in conjunction with the fire department's haz-mat division;

J. Establish and implement a program to identify and control pollutants in stormwater discharges from any industrial or commercial facility that the stormwater administrator determines that is contributing a substantial pollutant loading to the MS4. (Ord. 14456 §§ 2—4, 2000; Ord. 13477 § 1 (part), 1998)

15.20.050 Duties and responsibilities of the director of the department of transportation.

The director of the department of transportation shall, to the extent that the following duties and responsibilities have not been delegated or assumed by another person, agency, department or entity pursuant to other ordinances adopted by the city:

A. Maintain and repair the MS4 to ensure its safety and operational capability;

B. Participate in the annual inspection of the MS4 conducted by the stormwater administrator and advise the stormwater administrator of any required maintenance, repairs or alterations to the system;

C. Prepare and submit to the stormwater administrator an annual schedule of maintenance and repair to the MS4;

D. Carry out the annual schedule of maintenance repair as approved by the stormwater administrator;

E. Immediately notify the stormwater administrator of any illicit discharges to the MS4. (Ord. 14456 § 5, 2000; Ord. 13477 § 1 (part), 1998)
(Ord. No. 17393, § 12, 8-24-2010, eff. 9-1-2010)

15.20.060 Abbreviations.

The following abbreviations when used in this chapter shall have the designated meanings:

BMP	best management practices
BTEX	benzene, toluene, ethylbenzene, and xylene
CFR	Code of Federal Regulations
EPA	U.S. Environmental Protection Agency

HHW	hazardous household waste
mg/l	milligrams per liter
MS4	municipal separate storm sewer system
NOI	notice of intent
NOT	notice of termination
NPDES	National Pollutant Discharge Elimination System
ppb	parts per billion
PST	petroleum storage tank
RPE	registered professional engineer
RQ	reportable quantity
SDPCP	storm drain pollution control plan
SWPPP	stormwater pollution prevention plan
TPH	total petroleum hydrocarbons
U.S.C	United States Code

(Ord. 13477 § 1 (part), 1998)

15.20.070 Definitions.

A. Generally. For the purpose of this chapter, the following words shall have the meaning set forth in this section.

B. Terms.

"Agricultural stormwater runoff" means any stormwater runoff from orchards, cultivated crops, pastures, range lands, and other non-point source agricultural activities, but not discharges from concentrated animal feeding operations as defined in 40 CFR Section 122.23 or discharges from concentrated aquatic animal production facilities as defined in 40 CFR Section 122.24.

"Best management practices (BMP)" means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the pollution of waters of the United States. BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage.

"City" means the City of El Paso, Texas, or the city council of El Paso.

"Coal pile runoff" means the rainfall runoff from or through any coal storage pile.

"Commencement of construction" means the disturbance of soils associated with or clearing, grading, or excavating activities or other construction activities.

Construction General Permit. See building code for definition.

"Discharge" means any addition or introduction of any pollutant, stormwater, or any other substance whatsoever into the municipal separate storm sewer system (MS4) or into waters of the United States.

"Discharger" means any person who causes, allows, permits, or is otherwise responsible for, a discharge, including, without limitation, any operator of a construction site or industrial facility.

"Domestic sewage" means human excrement, gray water (from home clothes washing, bathing, showers, dishwashing, and food preparation), other wastewater from household drains, and waterborne waste normally discharged from the sanitary conveniences free from industrial waste.

"Environmental Protection Agency (EPA)" means the United States Environmental Protection Agency, the regional office thereof, any federal department, agency, or commission that may succeed to the authority of the EPA, and any duly authorized official of EPA or such successor agency.

"Extremely hazardous substance" means any substance listed in the Appendices to 40 CFR Part 355, Emergency Planning and Notification.

"Facility" means any facility where there is or may be a discharge of stormwater associated with industrial activity.

"Fertilizer" means a solid or non-solid substance or compound that contains an essential plant nutrient element in a form available to plants and is used primarily for its essential plant nutrient element content in promoting or stimulating growth of a plant or improving the quality of a crop, or a mixture of two or more fertilizers. The term does not include the excreta of an animal,

plant remains, or a mixture of those substances, for which no claim of essential plant nutrients is made.

"Final stabilization" means the status when all soil disturbing activities at a site have been completed, and a uniform perennial vegetative cover with a density of seventy percent of the cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of rip-rap, gabions, or geotextiles) have been employed.

"Fire department" means the fire department of the city or any duly authorized representative thereof.

"Garbage" means putrescible animal and vegetable waste materials from the handling, preparation, cooking, or consumption of food, including waste materials from markets, storage facilities, and the handling and sale of produce and other food products.

"Harmful quantity" means, for purposes of this chapter, discharges of oil, motor fuel, or other petroleum products in such quantities that the stormwater administrator has determined may be harmful to the public health or welfare of the public or the environment include discharges of such products that are of sufficient quantity to:

a. Violate applicable water quality standards;

b. Cause a film or sheen upon or discoloration of the surface of the water or adjoining shorelines or cause a sludge or emulsion to be deposited beneath the surface of the water or upon adjoining shorelines;

c. Cause any damage to the MS4; or

d. Interfere with the operation of the MS4.

"Hazardous household waste (HHW)" means any material generated in a household (including single and multiple residences, hotels and motels, bunk houses, ranger stations, crew quarters, camp grounds, picnic grounds, and day use recreational areas) by a consumer which, except for the exclusion provided in 40 CFR Section 261.4(b)(1), would be classified as a hazardous waste under 40 CFR Part 261.

"Hazardous substance" means any substance listed in Table 302.4 of 40 CFR Part 302.

"Hazardous waste" means any substance identified or listed as a hazardous waste by the EPA in 40 CFR Part 261.

"Hazardous waste treatment, disposal, and recovery facility" means all contiguous land, and structures, other appurtenances and improvements on the land, used for the treatment, disposal, or recovery of hazardous waste.

"Herbicide" means a substance or mixture of substances used to destroy a plant or to inhibit plant growth.

"Industrial activity" means the categories of industries and activities identified in Section 122.26(6)(14) of Title 40, Code of Federal Regulations, as amended, including, without limitation, construction activity including clearing, grading and excavation activities (except for operations that result in the disturbance of less than five acres of total land area which are not part of a larger plan of development or sale).

"Industrial waste" means any waterborne liquid or solid substance that results from any process of industry, manufacturing, mining, production, trade, or business, including transportation related activities.

"Motor vehicle fluid" means any vehicle crankcase oil, antifreeze, transmission fluid, brake fluid, differential lubricant, gasoline, diesel fuel, gasoline/alcohol blend, and any other fluid used in a motor vehicle.

"Municipal landfill (or landfill)" means an area of land or an excavation in which municipal solid waste is placed for permanent disposal, and which is not a land treatment facility, a surface impoundment, an injection well, or a pile (as these terms are defined in regulations promulgated by the Texas Commission on Environmental Quality).

"Municipal separate storm sewer system (MS4)" means the system of conveyances (including roads with drainage systems, municipal streets, flood control dams, retention and detention basins, grate and/or curb inlets, curbs, gutters, ditches, man-made channels, arroyos, agriculture drains,

storm drains or designated flow paths) owned operated or controlled by the city and designed or used for collecting or conveying stormwater, and which is not used for collecting or conveying sewage.

"Municipal solid waste" means solid waste resulting from or incidental to municipal, community, commercial, institutional, or recreational activities, and includes garbage, rubbish, ashes, street cleanings, dead animals, abandoned automobiles, and other solid waste other than industrial waste.

"NPDES general permit for stormwater discharges associated with industrial activity (or industrial general permit)" means the industrial general permit issued by EPA on August 27, 1992, and published in Volume 57 of the Federal Register at page 41304 on September 9, 1992, and any subsequent modifications or amendments thereto.

"NPDES general permit for stormwater discharges from construction sites (or construction general permit)" means the construction general permit issued by EPA on August 27, 1992, and published in Volume 57 of the Federal Register at page 41217 on September 9, 1992, and any subsequent modifications or amendments thereto.

"NPDES permit" means a permit issued by EPA (or by the state under authority delegated pursuant to 33 U.S.C Section 1342 (b)) that authorizes the discharge of pollutants to waters of the United States, whether the permit is applicable on an individual, group, or general area-wide basis.

"Non-point source" means any source of any discharge of a pollutant that is not a "point source."

"Notice of intent (NOI)" means the notice of intent that is required by either the industrial general permit or the construction general permit.

"Notice of termination (NOT)" means the notice of termination that is required by either the industrial general permit or the construction general permit.

"Oil" means any kind of oil in any form, including, but not limited to petroleum, fuel oil, crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure, sludge, oil refuse, and oil mixed with waste.

"Operator" means the person or persons who, either individually or taken together, meet the following two criteria; (a) they have operational control over the facility specifications (including the ability to make modifications in specifications); and (b) they have the day-to-day operational control over those activities at the facility necessary to ensure compliance with pollution prevention requirements and any permit conditions.

"Owner" means the person who owns a facility or part of a facility or who has control over day-to-day activities.

"Person" means any individual, partnership, co-partnership, firm, company, corporation, association, joint stock company, trust, estate, governmental entity, or any other legal entity; or their legal representatives, agents, or assigns or person who has control over day to day activities. This definition includes all federal, state, and local governmental entities.

"Pesticide" means a substance or mixture of substances intended to prevent, destroy, repel, or mitigate any pest, or any substance or mixture of substances intended for use as a plant regulator, defoliant, or desiccant (as these terms are defined in Section 76.001 of the Texas Agriculture Code).

"Petroleum product" means a petroleum product that is obtained from distilling and processing crude oil and that is capable of being used as a fuel for the propulsion of a motor vehicle or aircraft, including motor gasoline, gasohol, other alcohol blended fuels, aviation gasoline, kerosene distillate fuel oil, and No. 1 and No. 2 diesel.

"Petroleum storage tank (PST)" means any one or combination of aboveground or underground storage tanks that contain petroleum products and any connecting underground pipes.

"Point source" means any discernible, confined, and discrete conveyance, including but not limited to, any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel or other floating craft from which pollutants are or may be dis-

charged. This term does not include return flows from irrigated agriculture or agricultural stormwater runoff.

"Pollutant" means dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical waste, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and industrial, municipal, and agricultural waste discharged into water. The term "pollutant" does not include tail water or runoff water from irrigation or rainwater runoff from cultivated or uncultivated range land, pasture land, and farm land.

"Pollution" means the alteration of the physical, thermal, chemical, or biological quality of, or the contamination of, any water in the state that renders the water harmful, detrimental, or injurious to humans, animal life, vegetation, or property, or to the public health, safety, or welfare, or impairs the usefulness or the public enjoyment of the water for any lawful or reasonable purpose.

"Qualified personnel" means persons approved by the stormwater administrator who possess the appropriate competence, skills, and ability (as demonstrated by sufficient education, training, experience, and, when applicable, any required certification or licensing) to perform a specific activity in a timely and complete manner consistent with the applicable regulatory requirements and generally-accepted industry standards for such activity.

"Registered professional engineer (RPE)" means a person who has been duly licensed and registered by the State Board of Registration for Professional Engineers to engage in the practice of engineering in the State of Texas.

"Release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the municipal separate storm sewer system (MS4) or the waters of the United States or onto the ground in such a manner that a pollutant may be discharged in the MS4.

"Reportable quantity (RQ)" means, for any "hazardous substance," the quantity established and listed in Table 302.4 of 40 CFR Part 302; for any "extremely hazardous substance," the quantity established in 40 CFR Part 355 and listed in Appendix A thereto.

"Rubbish" means nonputrescible solid waste, excluding ashes, that consist of:

a. Combustible waste materials, including paper, rags, cartons, wood, excelsior, furniture, rubber, plastics, yard trimmings, leaves, and similar materials; and

b. Noncombustible waste materials, including glass, crockery, tin cans, aluminum cans, metal furniture, and similar materials that do not burn at ordinary incinerator temperatures (one thousand six hundred to one thousand eight hundred degrees Fahrenheit).

"Sanitary sewer (or sewer)" means the system of pipes, conduits, and other conveyances which carry industrial waste and domestic sewage from residential dwellings, commercial buildings, industrial and manufacturing facilities, and institutions, whether treated or untreated, to the city sewage treatment plant (and to which stormwater, surface water, and groundwater are not intentionally admitted).

"Septic tank waste" means any domestic sewage removed from holding tanks such as vessels, chemical toilets, campers, trailers, and septic tanks.

"Service station" means any retail establishment engaged in the business of selling fuel for motor vehicles that is dispensed from stationary storage tanks.

"Sewage (or sanitary sewage)" means the domestic sewage and industrial waste that is discharged into the city sanitary sewer systems and passes through the sanitary sewer system to the city sewage treatment plant for treatment.

"Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the facility or activity.

"Solid waste" means any garbage, rubbish, refuse, sludge from a waste treatment plant, water supply treatment plant, or air pollution control facility, and other discarded material, including, solid, liquid, semisolid, or contained gaseous ma-

terial resulting from industrial, municipal, commercial, mining, and agricultural operations, from community and institutional activities, and material from transportation related activities.

"State" means the State of Texas.

"Storm drain pollution control plan (SDPCP)" means a plan required by either the construction general permit or the industrial general permit and which describes and ensures the implementation of practices that are to be used to reduce the pollutants in stormwater discharges associated with construction or other industrial activity at the facility.

"Stormwater" means stormwater runoff, snow melt runoff, and surface runoff and drainage.

"Stormwater discharge associated with industrial activity" means the discharge from any conveyance which is used for collecting and conveying stormwater and which is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant which is within one of the categories of facilities listed in 40 CFR Section 122.26 (b) (14), and which is not excluded from EPA's definition of the same term.

Stormwater pollution prevention plan (SWPPP). See "storm drain pollution control plan (SDPCP)."

"Uncontaminated" means not containing a harmful quantity of any pollutant.

"Used oil (or used motor oil)" means any oil that has been refined from crude oil or a synthetic oil that, as a result of use, storage, or handling, has become unsuitable for its original purpose because of impurities or the loss of original properties but that may be suitable for further use and is recyclable in compliance with state and federal law.

"Water in the state (or water)" means any groundwater, percolating or otherwise, lakes, ponds, impounding reservoirs, springs, rivers, canals, streams, inside the territorial limits of the state, and all other bodies of surface water, natural or artificial, inland or coastal, fresh or salt, navigable or nonnavigable, and including the beds and banks of all watercourses and bodies of surface water, that are wholly or partially inside or bordering the state or inside the jurisdiction of the state.

"Water quality standard" means the designation of a body or segment of surface water in the state for desirable uses and the narrative and numerical criteria deemed by the state to be necessary to protect those uses, as specified in Chapter 307 of Title 31 of the Texas Administrative Code.

"Waters of the United States" means all waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce including all waters which are subject to the ebb and flow of the tide; all interstate waters, including interstate wetlands; all other waters the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce; all impoundments of waters otherwise defined as waters of the United States under this definition; all tributaries of waters identified in this definition; all wetlands adjacent to waters identified in this definition; and any waters within the federal definition of "waters of the United States": at 40 CFR Section 122.2; including the Rio Grande River, but not including any waste treatment systems, treatment ponds, or lagoons designed to meet the requirements of the federal Clean Water Act.

"Wetland" means an area that is inundated or saturated by surface water or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetland generally include swamps, marshes, bogs, and similar areas.

"Yard waste" means leaves, grass clippings, yard and garden debris, and brush that results from landscaping maintenance and land-clearing operations. (Ord. 16822 § 1 (part), 2008; Ord. 13477 § 1 (part), 1998)

15.20.080 General prohibition.

A. No person shall introduce or cause to be introduced into the municipal separate storm sewer

system (MS4) or waters within the jurisdiction of the city any discharge that is not composed entirely of stormwater.

B. It is an affirmative defense to any enforcement action for violation of subsection A of this section that the discharge was composed entirely of one or more of the following categories of discharges:

1. A discharge authorized by, and in full compliance with, an NPDES permit (other than the NPDES permit for discharges from the MS4);

2. A discharge resulting from firefighting;

3. Agricultural stormwater runoff;

4. A discharge from water line flushing, but not including a discharge from water line disinfection by superchlorination or other means unless it contains no harmful quantity of chlorine or any other chemical used in line disinfection;

5. A discharge from lawn watering, landscape irrigation, or other irrigation water;

6. A discharge from a diverted stream flow or natural spring;

7. A discharge from uncontaminated pumped groundwater or rising groundwater;

8. Uncontaminated groundwater infiltration (as defined as 40 CFR Section 35.2005 (20)) to the MS4;

9. Uncontaminated discharge from a foundation drain, crawl space pump, footing drain or sump pump;

10. A discharge from a potable water source not containing any harmful substance or material from the cleaning or draining of a storage tank or other container;

11. A discharge from air conditioning condensation that is unmixed with water from a cooling tower, emissions scrubber, emissions filter, or any other source of pollutant;

12. A discharge from individual residential or charity car washing;

13. An uncontaminated discharge from riparian habitat or wetland;

14. A discharge from water used in street washing; provided, that the water is not contaminated with any harmful cleaning substance;

C. No affirmative defense shall be available under subsection B of this section if the discharge or flow in question has been determined by the city to be a source of a pollutant or pollutants to the waters of the United States or to the MS4, and written notice of such determination has been provided to the discharger. (Ord. 13477 § 1 (part), 1998)

15.20.090 Specific prohibitions and requirements.

A. The specific prohibitions and requirements in this section are within but do not limit the general prohibition of all the discharges prohibited by the general prohibition in Section 15.20.080.

B. No person shall introduce or cause to be introduced into the MS4 any discharge that causes or contributes to causing the city to violate a water quality standard, the city's NPDES permit, or any state-issued discharge permit for discharges from its MS4.

C. No person shall release or cause, allow, or permit to be introduced any of the following substances into the MS4 nor the waters within the jurisdiction of the city such that the substance may enter the air or groundwater:

1. Any used motor oil, antifreeze, or any other motor vehicle fluid;

2. Any industrial waste;

3. Any hazardous waste, including hazardous household waste;

4. Any domestic sewage or septic tank waste, grease trap waste, or grit trap waste;

5. Any wastewater from a commercial carwash facility; from any commercial vehicle washing, cleaning, or maintenance at any new or used automobile or other vehicle dealership, rental agency, body shop, repair shop, or maintenance facility;

6. Any wastewater from the commercial washing, cleaning, de-icing, or other maintenance of aircraft;

7. Any wastewater from a commercial mobile power washer or from the washing or other cleaning of building exterior where the wastewater contains any harmful cleaning substance;

8. Any wastewater from commercial floor, rug, or carpet cleaning;

9. Any wastewater from the washdown or other cleaning of pavement that contains any harmful quantity of any cleaning substance; or any wastewater from the washdown or other cleaning of any pavement where any spill, leak, or other release of oil, motor fuel, or other petroleum or hazardous substance has occurred, unless all harmful quantities of such released material have been previously removed;

10. Any effluent from a cooling tower, condenser, compressor, emissions scrubber, emissions filter, or the blowdown from a boiler;

11. Any ready-mixed concrete, mortar, ceramic, or asphalt base material or hydromulch material, or from the cleaning of commercial vehicles or equipment containing, or used in transporting or applying, such material;

12. Any filter backwash from a swimming pool, fountain, or spa;

13. Any swimming pool or spa water;

14. Any discharge from water line disinfection by superchlorination or other means if it contains any harmful quantity of chlorine or any other chemical used in line disinfection;

15. Any water from a water curtain in a spray room used for painting vehicles or equipment;

16. Any contaminated runoff from a vehicle wrecking yard;

17. Any substance or material that will damage, block, or clog the MS4;

18. Any release from a petroleum storage tank (PST), or any leachate or runoff from soil contaminated by a leaking PST, or any discharge of pumped, confined, or treated wastewater from the remediation of any such PST release, unless the discharge complies with all state and federal standards and requirements.

D. No person shall introduce or cause to be introduced into the MS4 or waters within the jurisdiction of the city any harmful quantity of sediment, silt, earth, soil, or other material associated with clearing, grading, excavation or other construction activities, or associated with landfilling or other placement or disposal of soil, rock, or other earth materials, in excess of what could be retained on site or captured by employing sediment and erosion control measures to the maximum extent practicable under prevailing circumstances.

E. No person shall connect a line conveying sanitary sewage, domestic or industrial, to the MS4, or allow such a connection to continue.

F. Regulation of Pesticides, Herbicides, and Fertilizers.

1. Any sale, distribution, application, labeling, manufacture, transportation, storage, or disposal of a pesticide, herbicide, or fertilizer must comply fully with all state and federal statutes and regulations including, without limitation, the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and all federal regulations promulgated pursuant to FIFRA; Chapters 63, 75, and 76 of the Texas Agriculture Code and all state regulations promulgated pursuant thereto; and any other state or federal requirement.

2. No person shall use or cause to be used any pesticide or herbicide contrary to any directions for use on any labeling required by state or federal statute or regulation.

3. No person shall dispose of, discard, store, or transport a pesticide, herbicide, or fertilizer, or a pesticide, herbicide, or fertilizer container, in a manner that the person knows, or reasonably should know, is likely to cause, or does cause, a harmful quantity of the pesticide, herbicide, or fertilizer to enter the MS4 or waters of the United States.

G. Used Oil Regulation.

1. No person shall:

a. Discharge used oil into the MS4 or a sewer, drainage system, septic tank, surface water, groundwater, or watercourse;

b. Knowingly mix or commingle used oil with solid waste that is to be disposed of in a landfill or knowingly directly dispose of used oil on land or in all landfill or knowingly discharge used oil onto the ground;

c. Introduce used oil into the environment by any method, including application of used oil to a road or land for dust suppression, weed abatement, or other similar use.

2. A retail dealer who annually sells directly to the public more than five hundred gallons of oil in containers for use off-premises shall post in a prominent place a sign provided by the state informing the public that improper disposal of used oil is prohibited by law. The sign shall prominently display the toll-free telephone number of the state used oil information center. (Ord. 13477 § 1 (part), 1998)

15.20.100 Release reporting and cleanup.

A. The operator of any facility, vehicle, or other source of any spilling, leaking, pumping, pouring, emitting, emptying, discharging, escaping, leaching, dumping, disposing, or any other release of any of the following quantities of any of the following substances that may flow, leach, enter, or otherwise be introduced into the MS4 or waters of the United States, shall telephone and notify the fire department and the city engineer or other designee of the city manager as soon as practicable concerning the incident:

1. An amount equal to or in excess of a reportable quantity of any hazardous substance, as established under 40 CFR Part 302;

2. An amount equal to or in excess of a reportable quantity of any extremely hazardous substance, as established under 40 CFR Part 355;

3. An amount of oil that either (a) violates applicable water quality standards, or (b) causes a film or discoloration of the surface of the water or an adjoining shoreline or causes a sludge or emulsion to be deposited beneath the surface of the water or upon an adjoining shoreline; or

4. Any harmful quantity of any pollutant.

B. The immediate notification required by subsection A of this section shall include the following information:

1. The identity or chemical name of the substance released, and whether the substance is an extremely hazardous substance;

2. The exact location of the release, including any known name of the waters involved or threatened and any other environmental media affected;

3. The time and duration (thus far) of the release;

4. An estimate of the quantity and concentration (if known) of the substance released;

5. The source of the release;

6. Any known or anticipated health risks associated with the release and, where appropriate, advice regarding medical attention that may be necessary for exposed individuals;

7. Any precautions that should be taken as a result of the release;

8. Any steps that have been taken to contain and clean up the released material and minimize its impacts; and

9. The names and telephone numbers of the person or persons to be contacted for further information.

C. Within fourteen days following such release, the operator of a facility, vehicle, or other source of the release shall submit a written report to the city engineer or other designee of the city manager containing each of the items of information specified above in subsection B of this section, as well as the following additional information:

1. The ultimate duration, concentration, and quantity of the release;

2. All actions taken to respond to contain, and clean up the released substances, and all precautions taken to minimize the impacts;

3. Any known or anticipated acute or chronic health risks associated with the release;

4. Where appropriate, advice regarding medical attention necessary for exposed individuals;

5. The identity of any governmental/private sector representatives responding to the release; and

6. The measures taken or to be taken by the responsible person(s) to prevent similar future occurrences.

D. Any release report require.d by a state or federal authority containing the information de-

scribed in subsections B and C of this section, shall be adequate to meet the reporting requirements of subsection C of this section upon submittal to the city.

E. The notifications required by subsections B and C of this section shall not relieve the responsible person of any expense, loss damage, or other liability which may be incurred as a result of the release, including any liability for damage to the city, to natural resources, or to any other person or property; nor shall such notification relieve the responsible person of any fine, penalty, or other liability which may be imposed pursuant to this chapter or to state or federal law.

F. Any person responsible for any release as described in subsection A of this section shall comply with all state, federal, and any other local law requiring reporting, cleanup, containment and any other appropriate remedial action in response to the release.

G. Any person responsible for a release described in subsection A of this section shall reimburse the city for any cost incurred by the city in responding to the release within thirty days of being invoiced by the city. (Ord. 13477 § 1 (part), 1998)

(Ord. No. 17393, § 13, 8-24-2010, eff. 9-1-2010; Ord. No. 17808, § 10, 6-5-2012, eff. 6-11-2012)

15.20.110 Stormwater discharge from construction activities.

A. General Requirements.

1. All operators of construction sites shall use the methodology on best management practices from the "stormwater quality best management practices for construction activities" manual. The city council may, by resolution, adopt a stormwater quality best management practices for construction activities manual.

2. Qualified personnel (provided by the operator of the construction site) shall inspect disturbed areas of any construction site that have not been finally stabilized, areas used for storage of materials that are exposed to precipitation, structural control measures, and locations where vehicles enter or exit the site, at least once a month and within twenty-four hours of the end of a storm that is 0.5 inches or greater. All erosion and sediment control measures and other identified best management practices shall be observed in order to ensure that they are operating correctly and are effective in preventing significant impacts to receiving waters and the MS4. Based on the results of the inspection, best management practices shall be revised as appropriate, and as soon as is practicable.

3. All plans and specifications that are prepared for the construction of site improvements shall include a storm drain pollution control plan (SDPCP), that illustrates and describes the best management practices required by subsection A.1. of this section that will be implemented at the construction site. The stormwater administrator may deny approval of any building permit, grading permit, subdivision plat, site development plan, or any other city approval necessary to commence or continue construction, or to assume occupancy, on the grounds that the management practices described in the plans or observed upon a site inspection by city personnel are determined not to control and reduce the discharge of sediment, silt, earth, soil, and other materials associated with clearing, grading, excavation, and other construction activities to the maximum extent practicable. Together with written notification to the applicant that the approval sought is denied, the stormwater administrator shall provide the applicant a written explanation of the reasons for the denial. The applicant may appeal the decision made by the stormwater administrator to the appeals officer, in accordance with Chapter 2.30 of the El Paso City Code. Any appeal shall be made within ten days of the date the applicant receives notification of the decision of the stormwater administrator.

4. No person shall do any clearing, grubbing, excavation or grading on a site prior to the stormwater administrator granting approval of the submitted SDPCP for such site.

B. Storm Drain Pollution Control Plan Standards. All SDPCP requirements shall be construed and established in accordance with the SDPCP standards.

C. Storm Drain Pollution Control Plan Requirements. All operators of sites of construction activity, including clearing, grading, and excavation activities, that result in the disturbance of five or more acres of total land area, or that are part of a common plan of development or sale within which five or more acres of total land area are disturbed, or who are required to obtain an NPDES permit for stormwater discharges associated with construction activity, shall comply with the following requirements:

1. Any operator who intends to obtain coverage for stormwater discharges from a construction site under the NPDES general permit for stormwater discharges from construction sites ("the construction general permit") shall submit a signed copy of its notice of intent (NOI) and a SDPCP to the city prior to the approval of any subdivision, building permit or grading permit. For stormwater discharges from construction sites where the operator changes, an NOI shall be submitted at least two days prior to when the operator commences work at the site.

2. All construction sites with construction activity resulting in the disturbance of five acres or more will be required to submit an SDPCP and an application fee. Individual lots that are part of a larger development of five acres or more will not be required to submit a SDPCP or the application fees; however, such individual lots will be required to comply with the requirements of the SDPCP of the larger development. The following provision shall apply to all construction sites with construction activity resulting in the disturbance of five acres or more:

a. A SDPCP shall be developed for each construction site. A single SDPCP may be prepared for different operators at the construction site for a more effective coordination of BMPs and cost sharing. Individual operators may develop separate SDPCPs that covers only their portion of the project, provided that reference is made of other operators of the site. The SDPCP shall be developed in accordance with good engineering practices. The plan shall identify potential sources of pollution which may reasonably be expected to affect the quality of stormwater discharges from the construction site. The SDPCP shall describe and ensure the implementation of practices which will be used to reduce pollutants in stormwater discharges from the construction site and to assure compliance with the permit.

b. A storm drain pollution control plan (SDPCP) shall be prepared and implemented in accordance with the requirements of the construction general permit or any individual or group NPDES permit issued for stormwater discharges from the construction site, and with any additional requirement imposed by or under this chapter and any other city ordinance.

c. The SDPCP shall be prepared, signed, and sealed by a registered professional engineer.

d. The SDPCP shall be completed prior to the submittal of plans to the city engineer. The SDPCP shall be updated and modified as appropriate and as required by the construction general permit and this chapter. Any update or modification to the SDPCP shall be prepared, signed, and sealed by a registered professional engineer, if the original SDPCP was required by subsection (C)(2) of this section, to have been prepared by a registered professional engineer.

e. The SDPCP shall be submitted to the stormwater administrator for review and approval prior to the commencement of any construction.

f. Upon the review by the director of the city development department or other designee of the city manager of the SDPCP or any site inspection that the director of the city development department or other designee of the city manager may conduct, the director of the city development department or other designee of the city manager may deny approval of any building permit, grading permit, subdivision plat, site development plan, or any other city approval necessary to commence or continue construction, or to assume occupancy, on the grounds that the SDPCP does not comply with the requirements of the construction general permit, any individual or group NPDES permit issued for stormwater discharge from the

construction site or any additional requirement imposed by or under this chapter. Also, if at any time the city engineer or other designee of the city manager determines that the SDPCP is not being fully implemented, the city may similarly deny approval of any building permit, grading permit, subdivision plat, site development plan or any other city approval necessary to commence or continue construction, or to assume occupancy, at the site.

g. All contractors and subcontractors identified in a SDPCP shall sign a copy of the following certification statement before conducting any professional service identified in the SDPCP:

> I certify under penalty of Law that I understand the terms and conditions of the National Pollutant Discharge Elimination System (NPDES) permit that authorizes the stormwater discharges associated with industrial activity from the construction site identified as part of this certification.

The certification must include the name and title of the person providing the signature; the name, address, and telephone number of the contracting firm; the address (or other identifying description) of the site; the date the certification is made.

h. The SDPCP, with the registered professional engineer's signature and seal affixed, and the certifications of contractors and subcontractors required by Section 15.20.130(C)(7), and with any modifications attached, shall be retained at the construction site from the date of commencement of construction through the date of final stabilization.

i. The operator shall make the SDPCP and any modification thereto available to the city upon request.

j. The city may notify the operator at any time that the SDPCP does not meet the requirements of the construction general permit, any applicable individual or group NPDES permit issued for stormwater discharges from the construction site, or any additional requirement imposed by or under this chapter. Such notification shall identify those provisions of the permit or chapter which are not being met by the SDPCP, and identify which provisions of the SDPCP require modifications in order to meet such requirements. Within seven days of such notification from the city (or as otherwise provided by the city), the operator shall make the required changes to the SDPCP and shall submit to the city a written certification that the requested changes have been made.

k. The operator shall amend the SDPCP whenever there is a change in design, construction, operation, or maintenance of the site, which has a significant effect on the potential for the discharge of pollutants to the potential for the discharge of pollutants to the MS4 or the waters of the United States, and which has not otherwise been addressed in the SDPCP, or if the SDPCP proves to be ineffective in eliminating or significantly minimizing pollutants, or in otherwise achieving the general objective of controlling pollutants in stormwater discharges associated with construction activity. In addition, the SDPCP shall be amended to identify any new contractor that will implement a measure in the SDPCP.

l. Qualified personnel (provided by the operator of the construction site) shall inspect disturbed areas of the construction site that have not been finally stabilized, areas used for storage of materials that are exposed to precipitation, structural control measures, and locations where vehicles enter or exit the site, at least once a month and within twenty-four hours of the end of a rainfall event that is 0.5 inches or greater. Disturbed areas and areas used for storage of materials that are exposed to precipitation shall be inspected for evidence of, or the potential for, pollutants entering the drainage system. Erosion and sediment control measures identified in the SDPCP shall be observed by the operator to ensure that they are operating correctly. Where discharge locations or points are accessible, they shall be inspected to ascertain whether erosion control measures are effective in preventing significant impacts to receiving waters or the MS4. Locations where vehi-

cles enter or exit the site shall be inspected for evidence of off-site sediment tracking on a daily basis.

m. Based on the results of the inspections required by subsection (C)(2)(l) of this section, the site description and the pollution prevention measures identified in the SDPCP shall be revised as appropriate, but in no case later than seven calendar days following the inspection. Such modifications shall provide for timely implementation of any changes to the SDPCP within seven calendar days following the inspection.

n. A report summarizing the scope of any inspection required by subsection (C)(2)(l) of this section, and the name(s) and qualifications of personnel making the inspection, the date(s) of the inspection, major observations relating to the implementation of the SDPCP, and actions taken in accordance with subsection (C)(2)(m) of this section shall be made and retained as part of the SDPCP for at least three years from the date that the site is finally stabilized. Such report shall identify any incidence of noncompliance. Where a report does not identify any incidence of noncompliance, the report shall contain a certification that the facility is in compliance with the SDPCP, the facility's NPDES permit, and this chapter. The report shall be certified and signed by the person responsible for making it.

o. The operator shall retain copies of any SDPCP and all reports required by this chapter or by the NPDES permit for the site, and records of all data used to complete the NOI, for a period of at least three years from the date that the site is finally stabilized.

p. Where a site has been finally stabilized and all stormwater discharges from construction activities that are authorized by this chapter and by the NPDES permit for those construction activities are eliminated, or where the operator of all stormwater discharges at a facility changes, the operator of the construction site shall submit to the city a notice of termination (NOT) that includes the information required for notices of termination by Part VIII of the construction general permit.

q. Upon final stabilization of the construction site, the owner (or the duly authorized representative thereof) shall submit written certification to the city that the site has been finally stabilized. (See definition of final stabilization in this chapter). The city may withhold an occupancy or use permit for any premises constructed on the site until such certification of final stabilization has been filed and the city has determined, following any appropriate inspection, that final stabilization has, in fact, occurred and that any required permanent structural controls have been completed. (Ord. 13477 § 1 (part), 1998)
(Ord. No. 17393, § 14, 8-24-2010, eff. 9-1-2010; Ord. No. 17743, § 1, 3-6-2012; Ord. No. 17808, § 11, 6-5-2012, eff. 6-11-2012; Ord. No. 019760, § 1, 7-22-2025)

15.20.120 Stormwater discharges associated with industrial activity.

A. All operators of facilities which are sources of stormwater discharges associated with industrial activity, other than construction activities covered by Section 15.20.110, shall comply with the following requirements:

1. Any operator who intends to obtain coverage for stormwater discharge associated with industrial activity under the NPDES general permit for stormwater discharges associated with industrial activity ("the industrial general permit") shall submit a signed copy of its notice of intent (NOI) to the city at least two days prior to the commencement of the industrial activity at the facility. If industrial activity is already underway upon the effective date of the ordinance codified in this chapter, the NOI shall be submitted within thirty days from the effective date of said ordinance. Where the operator of a facility with a stormwater discharge associated with industrial activity which is covered by the industrial general permit changes, the new operator of the facility shall submit an NOI at least two days prior to the change.

2. A storm drain pollution control plan (SDPCP) shall be prepared and implemented in accordance with the requirements of the indus-

trial general permit or any individual or group NPDES permit issued for stormwater discharge from the industrial facility, and with any additional requirement imposed by or under this chapter, and any other city ordinance.

3. The SDPCP shall be signed, and sealed by a registered professional engineer.

4. The SDPCP shall be completed prior to the submittal of the NOI to the city and, for a new industrial operation, prior to the commencement of the industrial activity at the facility. The SDPCP shall be updated and modified as appropriate and as required by the industrial general permit and this chapter. Any update or modification to the SDPCP shall be signed, and sealed by a registered professional engineer.

5. A copy of any NOI that is required by subsection (A)(1) of this section shall be submitted to the city in conjunction with any application for a permit or any other city approval necessary to commence or continue operation of the industrial facility.

6. An operator shall submit the SDPCP and any modifications thereto, to the city for review and approval prior to the commencement of any industrial activity at the facility.

7. Upon the city's review of the SDPCP and any site inspection that the stormwater administrator may conduct, the city may deny approval of any application for a permit or any other city approval necessary to commence or continue operation of the facility, on the grounds that the SDPCP does not comply with the requirements of the industrial general permit, any individual or group NPDES permit issued for stormwater discharges from the industrial facility, or any additional requirement imposed by or under this chapter. Also, if at any time the city determines that the SDPCP is not being fully implemented, the city may similarly deny approval of any application for a permit or other city approval necessary to commence or continue operation of the industrial facility.

8. Any modification to the SDPCP shall be signed, and sealed by a registered professional engineer, as required for the original SDPCP by subsection (A)(3) of this section.

9. The SDPCP with the registered professional engineer's signature and seal affixed, and with any modifications attached, shall be retained at the industrial facility from the date of commencement of operations until all stormwater discharges associated with industrial activity at the facility are eliminated and the required notice of termination (NOT) has been submitted.

10. The operator shall make the SDPCP and any modification thereto available to the city upon request.

11. The city may notify the operator at any time that the SDPCP does not meet the requirements of the industrial general permit, any applicable individual or group NPDES permit issued for stormwater discharges from the industrial facility, or any additional requirement imposed by or under this chapter. Such notification shall identify those provisions of the permit or chapter which are not being met by the SDPCP, and identify which provisions of the SDPCP require modifications in order to meet such requirements. Within thirty days of such notification, the operator shall make the required changes to the SDPCP and shall resubmit the SDPCP for review and approval.

12. The operator shall amend the SDPCP whenever there is a change in design, construction, operation, or maintenance of the site, which has a significant effect on the potential for the discharge of pollutants to the MS4 or to the waters of the United States, or if the SDPCP proves to be ineffective in eliminating or significantly minimizing pollutants, or in otherwise achieving the general objective of controlling pollutants in stormwater discharges associated with industrial activity.

13. Qualified personnel (provided by the operator) shall inspect equipment an areas of the facility specified in the SDPCP at appropriate intervals. A set of tracking or follow-up procedures

shall be used to ensure that appropriate actions are taken in response to the inspections. Records of inspection shall be maintained.

14. Qualified personnel (provided by the operator) shall conduct comprehensive site compliance evaluations as required by Part IV.D.4 of the industrial general permit or by any part of a group or individual permit at intervals of no less than once per year. Based on the results of the compliance evaluation, the description of potential pollutant sources and the pollution prevention measures and controls identified in the SDPCP shall be revised as appropriate within two weeks of such evaluation and shall provide for implementation of any changes to the SDPCP in a timely manner, but in no case more than twelve weeks after the compliance evaluation.

15. A report summarizing the scope of the comprehensive site compliance evaluation required by subsection (A)(14) of this section and shall contain: personnel making the compliance inspection, the date(s) of the inspection, major observations relating to the implementation of the SDPCP, and actions taken in accordance with necessary and appropriate plan revisions shall be made and retained as part of the SDPCP for at least three years after all stormwater discharges from the facility are eliminated and the required NOT has been submitted. The report shall identify any incidence of noncompliance; or, if the report does not identify any incidence of noncompliance, the report shall contain a certification that the facility is in compliance with the SDPCP, the applicable NPDES permit, and this chapter. The report shall be signed by the individual responsible for the comprehensive site compliance evaluation, and it shall be submitted to the city within ten days of its completion.

16. If the industrial facility is required by Part VI.B.2 of the industrial general permit or by any part of a group or individual permit to conduct semiannual monitoring, a signed copy of each semi-annual monitoring report prepared in accordance with Part VI.D. shall be submitted to the city.

17. If the industrial facility is required by Part VI.B.3 of the industrial general permit or by any part of a group or individual permit to conduct annual monitoring, records of the monitoring results shall be retained at the facility and made available to the city upon written request. If expressly required by the city, a written report of the annual monitoring shall be prepared and submitted to the city.

18. By written notice, the city may require any industrial facility identified in accordance with this section to implement a monitoring program that includes the submission of quantitative data on the following constituents: any pollutants limited in effluent guidelines subcategories, where applicable; any pollutant listed in an existing NPDES permit for the facility; oil and grease, COD, pH, BODs, TSS, total phosphorus, total Kjeldahi nitrogen, nitrate plus nitrite nitrogen, and any information on discharges required under 40 CFR 122.21 (g) (7) (iii) and (iv). The city may require written reports of any such monitoring to be submitted.

19. By written notice, the city may require any industrial facility identified in this section to conduct semiannual or annual monitoring of stormwater discharges, or the city may specify an alternative monitoring frequency and specify additional parameters to be analyzed. The city may require written reports of any such additional monitoring to be submitted.

20. The operator shall retain the SDPCP until at least one year after stormwater discharges associated with industrial activity at the facility are eliminated, or that operator is no longer operating the facility, and a notice of termination (NOT) in compliance with subsection (A)(23) of this section has been submitted. The operator shall retain all records of all monitoring information, copies of all required reports, and records of all data used to complete the NOI, until:

i. At least one year after all stormwater discharges associated with industrial activity at the facility are eliminated;

ii. The operator ceases to operate that facility, and the required notice of termination (NOT) has been submitted; or

iii. Six years from the date the record was produced or prepared, whichever event occurs first.

21. For discharges subject to the semiannual or annual monitoring requirements of Part VI.B. of the industrial general permit, in addition to the records-retention requirements of the paragraph above, operators are required to retain for a six-year period from the date of sample collection, records of all monitoring information collected. Operators must submit such monitoring results, and a summary thereof, to the city upon request.

22. Any discharge composed of coal pile runoff shall comply with the following limitations: no discharge shall exceed a maximum concentration for any time of fifty mg/l total suspended solids, nor shall such runoff be diluted with stormwater or other flows in order to meet this limitation; the pH of such discharges shall be within the range of 6.0 to 9.0. Any untreated overflow from facilities designed, constructed, and operated to treat the volume of coal pile runoff which is associated with a ten-year, twenty-four-hour rainfall event shall not be subject to the fifty mg/l limitation for total suspended solids.

23. Where all stormwater discharges associated with industrial activity that are authorized by this chapter, and by the NPDES permit for those discharges from industrial activities are eliminated, or where the operator of stormwater discharges associated with industrial activity at a facility changes, the operator of the facility shall submit to the city a notice of termination (NOT) that includes the information required for notices of termination by Part IX of the industrial general permit.

B. All operators of a facility with stormwater discharge associated with industrial activity not included in subsection A of this section, shall comply with all the requirements listed in subsection A of this section but with the following modifications:

1. The SDPCP shall be prepared and signed by a responsible corporate officer (as defined in the instructions for the NOI) or by such other person who is authorized to bind the operator. The signature shall constitute the attestation of the person signing and the operator that the SDPCP fully complies with the requirements of the industrial general permit, or with any individual or group NPDES permit issued for stormwater discharges from the industrial facility, and with any additional requirement imposed by or under this chapter. The SDPCP shall contain the name, title and business address of the person signing the SDPCP, and the date that the SDPCP was so signed.

2. Any significant modification to the SDPCP shall be prepared and signed by a person with authority to bind the operator.

3. The SDPCP, with the authorized signature, and with any modifications attached, shall be retained at the industrial facility from the date of commencement of operations until all stormwater discharges associated with the industrial activity at the facility are eliminated and the required NOT has been submitted.

It is an offense for any person required to possess a stormwater permit issued by the EPA to discharge stormwater to the MS4 unless the person possesses such stormwater permit and the stormwater permit is valid and current. No person required to possess a SDPCP by this chapter shall discharge stormwater to the MS4 unless the person possesses a valid and current SDPCP. (Ord. 13477 § 1 (part), 1998)

15.20.130 Application of SDPCP.

A. There shall be a processing fee of one hundred dollars for the review and approval of storm drain pollution control plans (SDPCP) as required by Sections 15.20.110 and 15.20.120.

B. Application fees for review and approval of SDPCP shall be in addition to other fees required by other ordinances. Resubmittal of SDPCP in accordance to Section 15.20.110(C) shall be accompanied with a new application form and fee.

C. Application Form Contents. Every application will contain the following information:

1. Address of site.
2. Legal description of property.
3. Property owner's name, address and phone.
4. Contractor's name, address and phone number, if applicable.
5. SDPCP prepares name, address and phone.
6. Start and end date on construction, if applicable.
7. Acreage of disturbed area. (Ord. 13477 § 1 (part), 1998)

15.20.140 Citizen participation.

Citizen Reports of Violations.

A. All citizens are encouraged to report to the city any spills, releases, illicit connections, other instances of anyone discharging pollutants, into the MS4 or waters of the United States, and any other violation of this chapter, of which they become aware.

B. The director of public works, designated in Section 15.20.070 as the administrator of this chapter, shall receive all such citizen reports by telephone, in writing, and in person. A written record of each citizen report will be prepared and kept on file for a period of three years, and a copy of the city's record of the report will be furnished to the reporting citizen upon request. Also upon request, the city will inform the reporting citizen of any action undertaken by the city in response to the citizen's report.

C. The city shall establish a toll-free telephone number for the reporting of such violations. The toll-free number shall be displayed at various locations throughout the city, as designated by the stormwater administrator. (Ord. 14456 § 6, 2000; Ord. 13477 § 1 (part), 1998)

15.20.150 Criminal penalty.

Any person violating any provision of this chapter shall be deemed guilty of misdemeanor and upon conviction thereof shall be fined a maximum amount of not more than two thousand dollars per violation. Each violation of a particular section of this chapter shall constitute a separate offense, and each day an offense continues shall be considered a new violation for purposes of enforcing this chapter. A culpable mental state is not required to prove an offense under this ordinance. (Ord. 13477 § 1 (part), 1998)

15.20.160 Authority to issue citations.

The following public officials are authorized to enforce the provisions of this chapter and shall have the power to issue Class C misdemeanor citations to any person violating the provisions of this chapter.

A. The stormwater administrator and environmental personnel under his supervision;

B. Any personnel authorized to issue Class C misdemeanor citations is authorized to issue citations for violations of this chapter. (Ord. 14456 §§ 7—9, 2000; Ord. 13477 § 1 (part), 1998)

Chapter 15.22

WATER AND WASTEWATER IMPACT FEES*

Sections:

15.22.010 Short title.

15.22.020 Purpose.

15.22.030 Authority.

15.22.040 Definitions.

15.22.050 Administration and accounting.

15.22.060 Land use assumptions and service area.

15.22.070 Capital improvements plan.

15.22.080 Impact fee service areas.

15.22.090 Impact fee schedules.

15.22.100 Maximum fee and actual fee to be assessed.

15.22.110 Time of assessment.

15.22.120 Re-assessment.

15.22.130 Time of collection.

15.22.140 Impact fee as condition of building permit approval or meter connection.

15.22.145 Affordability reduction or waiver.

15.22.150 Refund of fees.

15.22.160 Appeal process.

15.22.170 Certification of compliance.

15.22.180 Updates to plans and revision of fees.

15.22.190 Functions of advisory committee.

15.22.010 Short title.

This chapter and its subsequent codification shall be known and may be cited as the City of El Paso Impact Fee Ordinance.

***Editor's note**—Ord. No. 18130, § 3, adopted March 4, 2014, amended Ch. 15.22 in its entirety to read as herein set out. Former Ch. 15.22, §§ 15.22.010—15.22.190, pertained to similar subject matter, and derived from Ord. No. 17113, § 3, 5-12-2009. See the Ordinance List, and the Code Comparative Table and Disposition List, for subsequent amendatory legislation.

15.22.020 Purpose.

The purpose of this chapter is to assure the provision of adequate water and wastewater to serve new development in the city by requiring each new development to contribute payments towards its share of the costs of the facilities necessitated by and attributable to the new development.

15.22.030 Authority.

This chapter is adopted pursuant to V.T.C.A. Local Government Code ch. 395. The provisions of this chapter shall not be construed to limit the power of the city to utilize other methods authorized under state law or pursuant to other city powers to accomplish the purposes set forth herein, either in substitution or in conjunction with this chapter.

15.22.040 Definitions.

The following definitions apply to this chapter:

A. *Advisory committee.* The capital improvements advisory committee on water and wastewater impact fees designated and appointed by the city council in accordance with V.T.C.A. Local Government Code ch. 395.

B. *Capital improvement.* A water supply, treatment and distribution facilities or a wastewater collection and treatment facilities, with a life expectancy of three or more years, to be owned and operated by or on behalf of the city whether or not located in the service area.

C. *Capital improvements plan.* The plan adopted by the city, as may be amended from time to time, that identifies water and wastewater capital improvements or facility expansions and their associated costs which are necessitated by and attributable to new development and will be financed in whole or in part through water and wastewater impact fees imposed under this chapter.

D. *Facility expansion.* The expansion of the capacity of an existing facility that serves the same function as an otherwise necessary new capital improvement, in order that the existing facility

may serve new development. The term does not include the repair, maintenance, modernization, or expansion of an existing facility to better serve existing development.

E. *Impact fee.* A charge or assessment imposed by the city against new development in order to generate revenue for funding or recouping the costs of capital improvements or facility expansions necessitated by and attributable to the new development. The term includes amortized charges, lump-sum charges, capital recovery fees, contributions in aid of construction, and any other fee that functions as described by this definition to fund capital improvements in the capital improvements plan. The term does not include:

1. Dedication of land for public parks or payment in lieu of the dedication to serve park needs;

2. Dedication of rights-of-way or easements or construction or dedication of on-site or off-site water distribution, wastewater collection or drainage facilities, or streets, sidewalks, or curbs if the dedication or construction is required by a valid ordinance and is necessitated by and attributable to the new development;

3. Lot or acreage fees to be placed in trust funds for the purpose of reimbursing developers for oversizing or constructing water or sewer mains or lines; or

4. Other pro rata fees for reimbursement of water or wastewater mains or lines extended by the city.

However, an item included in the capital improvements plan may not be required to be constructed except in accordance with V.T.C.A. Local Government Code § 395.019(2), and an owner may not be required to construct or dedicate facilities and to pay impact fees for those facilities.

F. *Land use assumptions.* A description of the service area and projections of changes in land uses, densities, intensities, and population in the service area over at least a ten-year period as may be amended.

G. *New development.* The subdivision of land; the construction, reconstruction, redevelopment, conversion, structural alteration, relocation, or enlargement of any structure; or any use or extension of the use of land; any of which increases the number of service units and is located within a service area.

H. *Service area.* The area within the corporate boundaries or extraterritorial jurisdiction, as determined under V.T.C.A. Local Government Code Chapter 42, of the city to be served by the capital improvements or facilities expansions specified in the capital improvements plan. The service area does include all or part of the land within the city and its extraterritorial jurisdiction.

I. *Service unit.* A standardized measure of consumption, use, generation, or discharge attributable to an individual unit of development calculated in accordance with generally accepted engineering or planning standards and based on historical data and trends applicable to the city subdivision in which the individual unit of development is located during the previous ten years. For purposes of compliance with the impact fee statute and this chapter, a service unit represents the water and wastewater flows in gallons per day (gpd) for a single family residential or equivalent unit with a water meter smaller than one inch.

15.22.050 Administration and accounting.

A. The El Paso Water Utilities shall administer the provisions of this chapter. The El Paso Water Utilities shall establish adequate financial and accounting controls to ensure that impact fees disbursed from an account established under this section are utilized solely for the purpose authorized under V.T.C.A. Local Government Code Chapter 395.

B. *Accounts and funds.* All funds collected shall be deposited in interest-bearing accounts clearly identifying the category of capital improvements or facility expansions within the service area for which the impact fee was adopted. Interest earned on impact fee accounts are considered funds of the account on which it is earned. Impact fee funds, to include interest generated from impact fee accounts, may be spent only for the pur-

poses for which the impact fee was imposed as shown by the capital improvements plan and as otherwise authorized by V.T.C.A. Local Government Code Chapter 395. The records of the accounts into which impact fees are deposited shall be open for public inspection and copying during ordinary business hours.

C. The El Paso Water Utilities shall maintain and keep adequate financial records for each account to show the source and disbursement of all revenues, which shall account for all monies received and ensure that the disbursement of funds from each account shall be used solely and exclusive for the purposes for which the impact fee was imposed as shown by the capital improvements plan and as otherwise authorized by V.T.C.A. Local Government Code Chapter 395.

D. The El Paso Water Utilities shall ensure that any fee collected under the impact fee ordinance is expended within a reasonable period of time but not to exceed ten years from the date the fee is deposited into the impact fee account.

15.22.060 Land use assumptions and service area.

The land use assumptions (LUA) and service areas are those adopted by the El Paso City Council on May 7, 2024.
(Ord. No. 019626, § 2, 5-7-2024)

15.22.070 Capital improvements plan.

The capital improvements plan (CIP) is the plan adopted by the El Paso City Council on May 7, 2024.
(Ord. No. 019626, § 3, 5-7-2024)

15.22.080 Impact fee service areas.

The impact fee service areas are those adopted by the El Paso city council on March 24, 2009 as reflected in Appendix A. Three separate service areas have been established within the City of El Paso and its extraterritorial jurisdiction to be served by the capital improvements or facilities expansions specified in the capital improvements plan. Those service areas are the Westside Service Area, the Eastside Service Area, and the Northeast Service Area.

15.22.090 Impact fee schedules.

Appendix B contains the City of El Paso Impact Fee Assessment Schedule. For purposes of compliance with the impact fee statute, the City of El Paso has determined that a service unit represents the water and wastewater flows in gallons per day (gpd) for a single family residential or equivalent unit with a water meter smaller than one inch.

15.22.100 Maximum fee and actual fee to be assessed.

The maximum allowable impact fee per service unit was calculated in accordance with V.T.C.A. Local Government Code § 395.015. In accordance with V.T.C.A. Local Government Code § 395.014(7), the city has awarded a credit based on the maximum credit of fifty percent of the total projected cost of implementing the capital improvements plan. Ad valorem taxes will not be used for the payment of improvements contained in the capital improvements plan.

The impact fee to be assessed is the impact fee adopted by the city council.

WATER IMPACT FEE PER SERVICE UNIT

	Impact Fee (Before Credit)	Maximum Allowable Impact Fee	Impact Fee to be Assessed
Service Area			
Northeast	$10,023	$5,012	$1,508
Westside	$3,136	$1,568	$844
Eastside	$14,954	$7,477	$892

WASTEWATER IMPACT FEE PER SERVICE UNIT

	Impact Fee (Before Credit)	Maximum Allowable Impact Fee	Impact Fee to be Assessed
Service Area			
Northeast	$1,345	$672	$372
Westside	$3,379	$1,689	$1,187
Eastside	$21,008	$10,504	$1,178

(Ord. No. 019626, § 4, 5-7-2024)

15.22.110 Time of assessment.

A. An "assessment" means a determination of the amount of the impact fee in effect on the date or occurrence provided in this section and is the maximum amount that can be charged per service unit of such development. No specific act by the city is required.

B. For new development which is platted, or re-platted and there is an increase in the number of service units in the development, after the adoption of an impact fee, impact fees shall be assessed on the incremental increase in service units in the development before or at the time of recordation of a subdivision plat or replat in the official records of the county clerk of the county in which the tract is located.

C. For land on which new development occurs or is proposed to occur without platting, impact fees shall be assessed at the time an application for an individual meter connection to the city's water or wastewater system is filed.

15.22.120 Re-assessment.

Following the initial assessment of an impact fee, the amount of the impact fee per service unit for that development cannot be increased unless the approved final plat expires or lapses under the applicable ordinance or law, and service units increase or meter size is increased.

15.22.130 Time of collection.

A. For new development, which is platted in accordance with the provisions of Title 19 before the adoption of an impact fee, an impact fee may not be collected on any service unit for which a valid building permit is issued within one year after the date of adoption of the impact fee ordinance.

B. For new development which is platted, or re-platted and there is an increase in the number of service units after the adoption of impact fee ordinance and if water and/or wastewater capacity is currently available:

1. For land platted within the corporate boundaries of the city, impact fees shall be collected at the time a building permit is issued.

2. For land platted outside the corporate boundaries of the city, impact fees shall be collected at the time an application for an individual meter connection to the city's water or wastewater system is filed.

3. For land on which new development occurs or is proposed to occur without platting, impact fees shall be collected at the time an application is filed for an individual meter connection to the city's water or wastewater system.

4. If the city fails to collect the fee at the time specified above, the city has the option of collecting the fee at the time of connection to the water or wastewater system.

C. For new development which is platted, or re-platted and there is an increase in the number of service units, after the adoption of an impact fee and if water and wastewater capacity is not currently available:

1. Impact fees shall be collected, except as otherwise provided in this chapter, only if the collection is made to pay for a capital improvement or facility expansion that has been identified in the capital improvements plan and the city commits to commence construction of the identified capital improvement within two years, under duly awarded and executed contracts or commitments of staff time covering substantially all of the work required to provide service, and to have the service available within a reasonable period of time considering the type of capital improvement or facility expansion to be constructed, but in no event longer than five years; or

2. The city has entered into an agreement that the owner of a new development may construct or finance the capital improvements or facility expansions and agrees that the costs incurred or funds advanced will be credited against the impact fees otherwise due from the new development impact fees shall be collected.

15.22.140 Impact fee as condition of building permit approval or meter connection.

New development occurring in any of the defined service areas shall not be connected to the city's water or wastewater system without payment of an impact fee in accordance with the provisions of this chapter. No building permit shall be issued without payment of an impact fee in accordance with the provisions of this chapter. If impact fees have not been collected in accordance with the provision of the impact fee ordinance and the development has been connected to the water and/or wastewater system, the El Paso Water Utilities may disconnect the service per their "Rules and Regulations" until such time as the impact fees are paid.

15.22.145 Affordability reduction or waiver.

Notwithstanding Section 15.20.130 of this chapter, the city manager or designee shall administratively reduce or waive an impact fee for a service unit if the service unit once constructed, qualifies as affordable housing under 42 U.S.C. Section 12745, as amended. In addition to meeting the requirements of 42 U.S.C. Section 12745, the waiver or reduction must comply with the city's adopted fee waiver program established under the provisions of this section and will be subject to an affordability period established by the city and enforced by agreement, restrictive covenant, lien, or other binding obligation, as approved by the city attorney. However, if affordable housing as defined by 42 U.S.C. Section 12745, is not constructed, the city may reverse its decision to waive or reduce the impact fee, and may assess and collect an impact fee at any time during the development approval or building process or after the building process if an impact fee was not already assessed.

15.22.150 Refund of fees.

A. Refund if service denied or service not available.

1. On the request of an owner of the property on which an impact fee has been paid, the city shall refund the impact fee paid if:

a. Existing facilities are available and service is denied; or

b. The city has, after collecting the impact fee when service was not available, failed to commence construction within two years; or

c. Service is not available within a reasonable period considering the type of capital improve-

ment or facility expansion to be constructed, but in no event later than five years from the date of payment of the impact fee.

2. A request for a refund shall be submitted to the El Paso Water Utilities on a form provided for by the El Paso Water Utilities for such purpose.

3. Any refund shall bear interest calculated from the date of collection to the date of refund at the statutory rate as set forth in V.T.C.A. Finance Code § 302.002, or its successor statute.

B. Refund if funds not spent.

1. The city shall refund any impact fee or part of it that is not spent as authorized by this chapter within ten years after the date of payment.

2. All refunds shall be made to the record owner of the property at the time the refund is paid. However, if the impact fees were paid by another political subdivision or governmental entity, payment shall be made to the political subdivision or governmental entity.

3. Any refund shall bear interest calculated from the date of collection to the date of refund at the statutory rate as set forth in V.T.C.A. Finance Code § 302.002, or its successor statute.

4. For purposes of this section, an impact fee collected shall be considered expended if the total expenditures for capital improvements or facility expansions within a service area within ten years following the date of payment of the impact fee, equal or exceed the total impact fees collected within the service area for such improvements or facility expansions during such period.

15.22.160 Appeal process.

A. The property owner or applicant for a new development may appeal the following administrative decisions to the city manager or designee:

1. The applicability of an impact fee to the development or structure;

2. The amount of the impact fee assessed or collected;

3. Amount of a refund due.

15.22.170 Certification of compliance.

A. The city shall submit a written certification verifying compliance with this chapter to the attorney general each year not later than the last day of the city's fiscal year.

B. The certification must be signed by the mayor and include a statement that reads substantially similar to the following: "This statement certifies compliance with Chapter 395, Local Government Code."

15.22.180 Updates to plans and revision of fees.

A. The city shall update the land use assumptions and capital improvements plan at least every five years, commencing from the date of adoption of such plans, and shall, if necessary, recalculate the impact fees based thereon in accordance with the procedures of V.T.C.A. Local Government Code Chapter 395 or in any successor statute.

B. The city may review its land use assumptions, impact fees, capital improvements plan and other factors more frequently than provided in Subsection A above to determine whether the land use assumptions and capital improvements plan should be updated and the impact fees recalculated accordingly.

C. After conducting the review required in Subsection A above, the city council determines that no change to the land use assumptions, capital improvements plan or impact fee is needed at the time of an update under Subsection A above, the city council may dispense with the update in accordance with V.T.C.A. Local Government Code § 395.0575.

15.22.190 Functions of advisory committee.

The capital improvements advisory committee shall have those duties and responsibilities as established under Chapter 2.80 of the El Paso City Code and V.T.C.A. Local Government Code Chapter 395.

(Ord. No. 019626, § 5, 5-7-2024)

Chapter 15.24

ACQUISITION, USE, AND DISPOSITION CITY PROPERTY

Sections:

15.24.010 General provisions.

15.24.020 Civil remedies.

15.24.030 Public forum.

15.24.010 General provisions.

A. Definitions. The following definitions apply to this chapter only.

1. "Applicant" means a person that submits an application under this chapter.

2. "City property" means real property, and improvements on real property, owned by the City of El Paso that is not (i) dedicated for public use as a park or public right-of-way, (ii) managed by the El Paso International Airport, (iii) managed by the El Paso Water Utilities, (iv) managed by other departments of the City of El Paso as specified in the El Paso City Code, ordinance, or resolution enacted by the El Paso City Council, and (v) managed by a third party pursuant to a contract with the City of El Paso.

3. "Person" means an individual, corporation, organization, government, or governmental subdivision or agency, business, trust, estate, partnership, association, utility, or any other legal entity.

4. "Policies" means any policies adopted by the real estate division as provided under this chapter.

5. "Real estate division" means the division or department within the City of El Paso that is responsible for handling real estate transactions for the City.

6. "Real estate transaction" any request by a person or applicant related to the use or purchase of city property.

7. "Right of entry" a temporary use of city property for the purpose of conducting surveys, measuring, testing, staging, parking, measuring, photographing, inspecting, mowing, general clean-up, and other due diligence purposes.

8. "Special event rental" means a temporary use of city property for private events.

B. Prohibition. No person will use or enter city property without acquiring rights under this chapter or without being authorized by a person that has acquired rights to the subject city property under this chapter. Notwithstanding anything to the contrary, no rights are deemed granted or acquired unless a person submits an application that complies with all requirements of this chapter and policies adopted by the real estate division, an application has been approved by the real estate division, an agreement has been signed by the city and the applicant, and the applicant has paid all required fees, consideration, due diligence, and other costs.

C. Agreement Requirements.

1. City manager, or designee, is authorized to sign any agreements approved by the city attorney's office as to form pertaining to special event rentals and rights of entry.

2. All real estate transactions must be accompanied by an agreement or document approved as to form by the city attorney's office. The city attorney's office may approve a standard form agreement for each type of transaction. Any agreements or documents by the city attorney's office must comply with the minimum requirements set forth in this chapter.

3. All grants of rights to use city property may be revoked by the city council if necessary to secure efficiency of public service at a reasonable rate, or to assure that the property is maintained in good order throughout the life of the grant.

D. Insurance.

1. All grants of rights to use city property must require insurance in the amounts that meet the minimum amounts established by the city's risk management division. The real estate division will include in the policies the minimum amounts established by the risk management division. The real estate division, in consultation with the risk

management division and the city attorney's office may require higher insurance amounts depending on the proposed activities that will take place on the city property.

E. Indemnification.

1. All grants of rights to use city property must require indemnification by the applicant in the manner determined by the city attorney's office.

F. Policies and Application Forms.

1. The real estate division will adopt policies and application forms for real estate transactions pertaining to city property. Such policies must be consistent with this chapter. The real estate division will process all applications in accordance with the policies adopted by the real estate division. The policies adopted by the real estate division provide guidelines for processing of real estate transactions and do not confer any rights to any person submitting an application for a real estate transaction. The real estate division may amend the policies as needed, provided that such amended policies comply with this chapter. The real estate division may deny applications if the real estate transaction is not in the best interest of the city or for any other reasons set forth in the policies.

G. Fees.

1. All applicants will pay a fee for a real estate transaction at the time of submitting an application under this chapter. The city council will set through the annual budget process the fees that an applicant is required to pay for a real estate transaction related to city property.

2. Payment of fees does not guarantee that a right will be granted under this chapter. The fees are assessed to recover the costs incurred by the city in reviewing an application.

3. Except as otherwise provided in this chapter, all fees are non-refundable.

4. No fees will be charged to third party contractors for any real estate transaction that is needed to complete a city project or that is related to the provision of services by a contractor hired by the city.

H. Consideration.

1. In addition to other charges under this chapter, all applicants will pay a consideration amount for a real estate transaction. The consideration amounts will be set by city council through the annual budget process, provided however, that consideration amounts may not be lower than the fair market value as determined by the methods established by the real estate division in the policies.

I. Due Diligence Costs.

1. In addition to other charges under this chapter, applicants may be required to pay any due diligence costs as determined by the real estate division. Due diligence costs will be set at the actual amounts charged by the contractors hired by the city. Applicants must pay due diligence costs in advance prior to the hiring of contractors by the city. Due diligence costs are non-refundable once the city is obligated to pay the contractor.

J. Other costs.

1. In addition to other charges under this chapter, applicants may be required to pay other costs for services related to the use of city property including but not limited to utilities, security, and traffic control as required under the policies.

K. No Guarantee. The payment of fees or other charges under this chapter does not guarantee any rights or act as a reservation of city property for certain dates. The real estate division may determine that a city property is not available or that it is not prudent for the city to enter into a particular real estate transaction.

L. No Waiver. The acquisition of city property under this chapter or the use of city property under this chapter does not relieve the person or applicant from complying with any other requirements under the El Paso City Code or other laws (local, state, or federal) including but not limited to building permit requirements, zoning requirements, platting requirements, environmental requirements, health and safety requirements, temporary use requirements, special event permit requirements, and noise ordinance requirements. The acquisition of city property under this chap-

ter or the use of city property under this chapter does not relieve the person or applicant from obtaining permits or licenses from other entities such as federal or state entities.

M. This chapter does not affect any rights granted prior to the enactment of this ordinance.
(Ord. No. 19276, § 1, 12-14-2021)

15.24.020 Civil remedies.

Nothing in this chapter limits the city's right to enforce any property rights or seek remedy under the law as it pertains to city property.
(Ord. No. 19276, § 1, 12-14-2021)

15.24.030 Public forum.

No Public Forum. No rental or use of a city property will constitute a designation of such facility as a public forum. Unless sponsored by the city, all events occurring on city property are considered private events.
(Ord. No. 19276, § 1, 12-14-2021)

HOUSING CODE ADOPTED

Sections:

17.04.010 Adopted—Amendments.

17.04.020 Section 101.4 amended—Existing buildings.

17.04.030 Section 102.1 amended—Enforcement officer.

17.04.040 Section 103.1 amended—Right of entry.

17.04.050 Section 103.2.4 deleted—Unsafe residential buildings.

17.04.060 Section 106 deleted—Housing board of adjustments and appeals.

17.04.070 Section 107 amended—Appeals.

17.04.080 Section 108 amended—Violations and penalties.

17.04.090 Sections 302.5.2 and 302.5.3 deleted—Heating facilities.

17.04.120 Appendices not adopted.

17.04.010 Adopted—Amendments.

The book entitled "Standard Housing Code, 1985 Edition," and the 1987 revisions, a copy of which, authenticated by the signature of the mayor and the city clerk, is made a public record by resolution of the city council, and is on file in the city clerk's office, is adopted as the housing code of the city, as fully as if copied at length in this chapter, but with the changes set forth in this chapter. (Ord. 9358 § 1, 1988: prior code § 13-49 (part))

17.04.020 Section 101.4 amended—Existing buildings.

Section 101.4, existing buildings, of the Standard Housing Code is amended as follows:

101.4 - Existing Buildings.

101.4.1 Alterations, repairs or rehabilitation work may be made to any existing building without requiring the building to comply with all the requirements of this Code provided that the alteration, repair or rehabilitation work conforms to the requirements of this Code for new construction. The Housing Official shall determine, subject to appeal to the Board of Adjustments and Appeals identified in Section 18.08.090 of the El Paso City Code, the extent, if any, to which the existing building shall be made to conform to the requirements of this Code for new construction.

In addition, existing buildings governed by this Code shall comply with the requirements of Section 508 of the Standard Housing Code as amended under Ordinance No. 9107 (Requirements for Accessibility) passed and approved July 28, 1987. (Ord. 9358 § 2, 1988: prior code § 13-49(1))

17.04.030 Section 102.1 amended—Enforcement officer.

Section 102.1, enforcement officer, of the Standard Housing Code is amended as follows:

The provisions of this code shall be enforced by the building official of the City of El Paso. At any place in the standard housing code and this chapter that the terms "housing official" or "building official" are used, it shall be understood to mean the building official and shall have the same meaning as set forth in Section 18.02.101.4 of this code. (Ord. 16984 § 2, 2008: Ord. 13152 § 131, 1997; Ord. 9358 § 3, 1988: prior code § 13-49(2))

17.04.040 Section 103.1 amended—Right of entry.

Section 103.1, right of entry, of the Standard Housing Code is amended to read as follows:

Right of Entry. Whenever necessary to make an inspection to enforce any of the provisions of this code, or whenever the building official or his authorized representative has reasonable cause to believe that there exists in any building or upon any premises any condition

or code violation which makes such building or premises unsafe, dangerous or hazardous, the building official or his authorized representative may enter such building or premises at all reasonable times to inspect the same or to perform any duty imposed upon the building official by this code, provided that if such building or premises be occupied, he shall first present proper credentials and request entry; and if such building or premises be unoccupied, he shall first make a reasonable effort to locate the owner or other persons having charge or control of the building or premises and request entry. If such entry is refused, the building official or his authorized representative shall have recourse to every remedy provided by law to secure entry.

When the building official or his authorized representative shall have first obtained a proper inspection warrant or other remedy provided by law to secure entry, no owner or occupant or any other persons having charge, care or control of any building or premises shall fail or neglect, after proper request is made as herein provided, to promptly permit entry therein by the building official or his authorized representative for the purpose of inspection and examination pursuant to this code. (Ord. 16984 § 1 (part), 2008; Ord. 13152 § 132, 1997; Ord. 9358 § 4, 1988: prior code § 13-49(3))

17.04.050 Section 103.2.4 deleted—Unsafe residential buildings.

Section 103.2.4, unsafe residential buildings, of the Standard Housing Code is not adopted. (Ord. 9358 § 5, 1988: prior code § 13-49(4))

17.04.060 Section 106 deleted—Housing board of adjustments and appeals.

Section 106, housing board of adjustments and appeals, of the Standard Housing Code is not adopted. All references to the housing board of adjustments and appeals within this code are hereby deleted. (Ord. 9358 § 6, 1988: prior code § 13-49(5))

17.04.070 Section 107 amended—Appeals.

Section 107, appeals, of the Standard Housing Code is amended to read as follows:

A. Any person receiving written notice from the building official of structural deficiencies in his property under this Code may, within thirty days following the date of such notice, enter an appeal in writing to the appeals officer, depending upon the deficiencies for which the person received notice. Such appeal shall state the location of the property, the date of the notice of violations and the number of such notice. The appellant must state the variance or modification requested, the reasons therefor and the hardships or conditions upon which the appeal is made. A fee of twenty-five dollars shall accompany such notice of appeal.

Notices from the building official which address existing buildings and requirements for new construction, shall be appealed to the appeals officer, as identified in Chapter 2.30 of the El Paso City Code.

B. Upon appeal, the appeals officer will permit, in appropriate cases where the application of the requirement of this Code in the allowance of the stated time for the performance of any action required hereunder would appear to cause undue hardship on an owner, one or more extensions of time, not to exceed one hundred twenty days each, from the date of such decision of the appeals officer. Such requests for additional extensions of time shall be filed with the appeals officer not less than thirty days prior to the expiration of the current extension.

Upon appeal, the appeals officer shall consider and determine appeals whenever it is claimed that the true intent and meaning of this Code or any of its regulations have been misconstrued or wrongly interpreted.

C. An appeal should not be considered where an appeal case has been previously decided involving the same premises.

All decisions of the appeals officer to vary the application of any provision of this

Code or to modify an order of the building official shall specify in what manner such variance or modification is made, the conditions upon which it is made, and the reasons therefor. Every decision shall be in writing and shall indicate the vote upon the decision. A copy of all decisions shall be promptly filed in the office of the building official. The appeals officer shall notify the appellant in writing of the final action. (Ord. 16984 §§ 1 (part), 3, 2008: Ord. 13152 § 133, 1997; Ord. 9358 § 7, 1988: prior code § 13-49(6))

(Ord. No. 17389, § 1, 8-24-2010, eff. 9-1-2010; Ord. No. 019761, § 1, 7-22-2025)

17.04.080 Section 108 amended—Violations and penalties.

Section 108, violations and penalties, of the Standard Housing Code is changed to read:

Any person, firm, corporation or agent who shall violate a provision of this Code, or fail to comply therewith or with any of the requirements thereof, or who shall erect, construct, alter, demolish or move any structure, or has erected, constructed, altered, repaired, moved or demolished a building or structure in violation of this Code shall be deemed guilty of a misdemeanor and punished by a fine not exceeding Two Thousand Dollars ($2,000), and if the violation be continuing, each day's violation shall constitute a separate offense. (Ord. 9358 § 8, 1988: prior code § 13-49(7))

17.04.090 Sections 302.5.2 and 302.5.3 deleted—Heating facilities.

Section 302.5, heating facilities, of the Standard Housing Code is amended by deleting subsections 302.5.2 and 302.5.3, without substitution. (Ord. 9358 § 9, 1988: prior code § 13-49(8))

17.04.120 Appendices not adopted.

The appendices of the Standard Housing Code are not adopted, but are retained as administrative guidance aids. (Ord. 9358 § 10, 1988: prior code § 13-49(11))

Chapter 17.08

LODGINGHOUSES, TENEMENT HOUSES, HOTELS AND MOTELS

Sections:

Article I. General Provisions

17.08.010 Definitions.

Article III. Lodginghouses

17.08.120 License—Required—Term—Fee—Display.

17.08.130 License—Suspension and revocation.

17.08.140 Operation regulations.

17.08.150 Violation—Penalty.

Article V. Hotels, Tourist Courts and Motels

17.08.220 License—Required—Application—Fee.

17.08.230 License—Suspension or revocation.

17.08.240 Operation regulations.

17.08.250 Violation—Penalty.

Article I. General Provisions

17.08.010 Definitions.

A. As used in this chapter, the following terms mean:

1. "Hotel" means a building or part of a building, in which four or more rooms are offered as sleeping accommodations to transient persons for compensation.

2. "Lodginghouse" means any building or part of a building where four or more rooms, or eight or more beds, whichever accommodates the smaller number of persons, are offered at any one time as lodgings for compensation, whether with or without meals, except hotels, tourist courts and motels, and except light housekeeping rooms where bedclothes are not furnished.

3. "Lodginghouse for persons of unsound mind" means any place at which lodging is furnished to two or more persons of unsound mind, not members of the family of the person furnishing such lodging, whether or not the persons of unsound mind have been judicially determined to be such.

4. "Tourist court" or "motel" means a place at which sleeping accommodations in three or more cottages, rooms or separate buildings, with parking facilities on the same premises, or on other premises adjacent thereto, are offered for compensation for transients traveling by motor vehicle.

B. Definitions in subsections (A)(1) and (A)(5) of this section shall also include any other establishment (except a hospital) which offers sleeping accommodations for compensation, if it uses in its name or advertising the words "hotel," "motel," "tourist court," "tourist rooms" or other words of similar meanings reasonably indicating that it solicits transient trade.

Definitions in subsections (A)(1) and (A)(5) of this section do not include or apply to trailer courts, lodginghouses, or similar places which are otherwise defined herein or regulated by other ordinances, and such other ordinances are kept in effect; provided, places which fall within the definition of a hotel as set forth in this section or use the word "hotel" as set forth in subsection A of this section shall be covered by such definition and regulations thereof and not by the lodginghouse definition contained in subsection (A)(2) of this section or the regulations thereof although they fall within the definition of lodginghouse also. (Ord. 8593 § 2, 1986; prior code § 13-2)

Article III. Lodginghouses

17.08.120 License—Required—Term—Fee—Display.

A. No person shall operate a lodginghouse without a license as provided in this article. Applications for such license shall be made to the city license collector in writing, stating:

1. The name and residence address of the operator of the business, of all partners if a partnership, and of all officers if a corporation;

2. The name under which and the address at which the lodginghouse is to be operated; and

3. The kind and number of accommodations offered.

B. Licenses shall be issued for one year, and may be renewed from year to year without refiling the application.

C. The fee for the license shall be forty-five dollars per year, payable in advance. This fee is not levied for revenue, but to pay a part of the cost of regulation under the police power, and the city council finds that the fee bears a reasonable relation to such costs.

D. The operator shall immediately give written notice to the license collector of any change in the facts stated in the application.

E. The license collector shall inform the director of the city-county health unit and the chief of the fire department of all original licenses issued, and all cancellations, suspensions or expirations.

F. The license shall be kept posted on the premises in a place where it will be readily visible to persons seeking accommodations. (Ord. 15752 § 1, 2004: Ord. 12118 § 1, 1994; Ord. 9000 § 1, 1987; prior code § 13-9)

17.08.130 License—Suspension and revocation.

The director of the city-county health unit may, after reasonable notice and opportunity to be heard, revoke or suspend any license issued under this article, for failure of the owner, operator, manager or caretaker to comply or to see that his servants comply with any requirement of Sections 17.08.120 and 17.08.140. The licensee may appeal from such revocation or suspension to the sanitation board of the city by giving to the director of the city-county health unit written notice of appeal; and in such case the board shall, after reasonable notice to the director and to the licensee, hear the case and affirm, rescind or modify the order. If such appeal is taken the director's order shall not be enforced pending action by the board. (Prior code § 13-10)

17.08.140 Operation regulations.

Every lodginghouse shall be operated in accordance with the following regulations:

A. One shower or tub, one lavatory and one commode, shall be provided for each ten sleeping rooms or fraction thereto (or each sixteen persons, if accommodations for more than one person are provided in one room) for the free use of lodgers at all times.

B. An adequate supply of clean individual towels shall be provided for lodgers free of charge.

C. Lodginghouses and all furnishings, fittings, fixtures and plumbing therein shall be maintained in a clean condition and shall at no time become a public or private nuisance and shall comply with the plumbing, building, electrical, garbage and all other ordinances of the city and laws of the state for the protection of public health or safety.

D. All floors shall be sprinkled and swept once a day.

E. Beds shall be at least two feet apart in a horizontal direction and so arranged that the air shall circulate freely under and around each bed. Except where air conditioning is provided, all windows shall be open at least three hours each day; at least ten square feet of window space, having unobstructed access to the open air, shall be provided for each room and for each one hundred square feet of floor space; and at least one-half of each window space will be available for ventilation.

F. All beds, bedclothing, mattresses and pillows shall be kept free from vermin.

G. Each bed shall be provided with a pillow slip for each pillow and two white linen or cotton sheets ninety-nine inches long after being washed, and sufficiently wide to cover the mattress and springs. Sheets and pillow slips shall be changed every eight days, and for each new guest or occupant.

H. Partitions and ceilings, whether put in before or after the effective date of the building code of the city, shall conform to the type of construction of the building, as classified in such code with reference to fire protection, but in no case are

combustible partitions or ceilings permitted, except that in a building of ordinary construction partitions may be two by four inch stud walls covered on both sides with metal or gypsum lath and three-fourths of an inch of gypsum plaster, and ceilings may be metal or gypsum lath and three-fourths of an inch of gypsum plaster, or better. All partitions throughout their entire length shall extend from the floor to the ceiling. Provided, however, in cases of construction done within the then city prior to May 20, 1936, and in cases of construction done in areas annexed since such date where the construction was completed prior to annexation, this provision shall not apply to open beam ceilings of wooden deck construction nor to ceilings constructed of noncombustible material. (Prior code § 13-11)

17.08.150 Violation—Penalty.

A. Any person who shall operate a lodginghouse before obtaining a license as required in this article, or after such license has been revoked, or while it is suspended, shall be deemed guilty of a misdemeanor and punished by a fine as provided in Sections 1.08.010 through 1.08.030. Each day's operation shall constitute a separate offense.

B. Any owner, operator, manager or caretaker of a lodginghouse who shall fail to comply with any of the requirements of Sections 17.08.120 and 17.08.140 shall be deemed guilty of a misdemeanor and punished by a fine as provided in Sections 1.08.010 through 1.08.030. Each day's violation shall constitute a separate offense. (Prior code § 13-12)

Article V. Hotels, Tourist Courts and Motels

17.08.220 License—Required—Application—Fee.

A. No person shall operate a hotel, tourist court or motel without a license as provided in this article. Application for such license shall be made to the permit official in writing, stating:

1. The name and residence address of the operator of the business, of all partners if a partnership, and of all officers if a corporation;

2. The name under which and the address at which the lodginghouse is to be operated; and

3. The kind and number of accommodations offered.

B. Licenses shall be issued for one year, and may be renewed from year to year without refiling the application.

C. A fee for a license under this section is established and the established fee shall be payable in advance.

D. The operator shall immediately give written notice to the permit official of any change in the facts stated in the application.

E. The permit official shall inform the director of department of public health and the chief of the fire department of all original licenses issued, and all cancellations, suspensions or expirations.

F. The license shall be kept posted on the premises in a place where it will be readily visible to persons seeking accommodations (Ord. 16984 § 4, 2008: Ord. 15752 § 2, 2004: Ord. 12118 § 2, 1994; Ord. 9000 § 2, 1987; prior code § 13-19)
(Ord. No. 17389, § 2, 8-24-2010, 9-1-2010)

17.08.230 License—Suspension or revocation.

The director of the city-county health unit may, after reasonable notice and opportunity to be heard, revoke or suspend any license issued under this article, for failure of the owner, operator, manager or caretaker to comply or to see that his servants comply with any requirement of Sections 17.08.220 and 17.08.240. The licensee may appeal from such revocation or suspension to the sanitation board of the city by giving to the director of the city-county health unit written notice of appeal; and in such case the board shall, after reasonable notice to the director and to the licensee, hear the case and affirm, rescind or modify the order. If such appeal is taken the director's order shall not be enforced pending action by the board. (Prior code § 13-20)

17.08.240 Operation regulations.

Every hotel, tourist court or motel shall be operated in accordance with the following regulations:

A. A manager or caretaker shall be provided, to reside on the premises and to be responsible for the cleanliness, sanitation and safety of the premises, and for compliance with applicable regulations in this title and Chapter 2.64. B. At least one bath or shower and one lavatory, with hot and cold running water, and one flush toilet, shall be provided for every four sleeping rooms, and shall be accessible to the persons for whose use it is intended by an entrance independent of any inhabited room except that of the user. Plumbing shall be connected with the public sewer system, or sewage otherwise disposed of according to law if a connection with a public sewer is not available.

C. An adequate supply of potable drinking water shall be provided.

D. All rooms occupied by guests shall be screened so as reasonably to exclude flies and mosquitoes, and shall be provided with artificial light and heat when needed. Rooms and furnishings shall be kept clean, and free of insects and vermin.

E. Each bed shall be provided with a pillow slip for each pillow and with two white linen or white cotton sheets, at least ninety-nine inches long after shrinkage, and of sufficient width to cover the mattress and spring. Pillow slips and sheets shall be laundered before supplying to each guest. Any guest remaining longer than one week shall be supplied with clean pillow slips and sheets each week. An adequate supply of clean individual towels shall be provided.

F. The premises shall be so maintained and operated as not to constitute a public or private nuisance; and all structures and operations shall be in compliance with the plumbing, building and electrical codes and the garbage ordinances and provisions of this code and all other laws and ordinances for the protection of the public health and safety.

G. Partitions and ceilings, whether put in before or after the effective date of the building code of the city, shall conform to the type of construction of the building as classified in such code with reference to fire protection; but in no case are combustible partitions or ceilings permitted, except that in a building of ordinary construction partitions may be two by four inch stud walls covered on both sides with metal or gypsum lath and three-fourths of an inch of gypsum plaster, and ceilings may be metal or gypsum lath and three-fourths of an inch of gypsum plaster, or better. All partitions throughout their entire length shall extend from the floor to the ceiling. Provided, however, in cases of construction done within the then city limits prior to May 20, 1936, and in cases of construction done in areas annexed since such date where the construction was completed prior to annexation, this provision shall not apply to open beam ceilings of wooden deck construction, nor to ceilings constructed of noncombustible material. (Prior code § 13-21)

17.08.250 Violation—Penalty.

A. Any person who shall operate a hotel, tourist court or motel before obtaining a license as provided in this article, or after such license has been revoked, or while it is suspended, shall be deemed guilty of a misdemeanor and punished by a fine as provided in Sections 1.08.010 through 1.08.030. Each day's operation shall constitute a separate offense.

B. Any owner, operator, manager or caretaker of a hotel, tourist court or motel who shall fail to comply with any of the requirements of Sections 17.08.220 and 17.08.240 shall be deemed guilty of a misdemeanor and punished as provided in Sections 1.08.010 through 1.08.030. Each day's violation shall constitute a separate offense.

C. Any person, including any owner, or operator, manager or caretaker of a lodginghouse for persons of unsound mind who shall operate such lodginghouse without a permit from the director of the city-county health district or who shall otherwise fail to comply with the requirements of

Article IV of this chapter shall be deemed guilty of a misdemeanor and punished by a fine not to exceed five hundred dollars. Each day's operation shall constitute a separate offense. (Ord. 10975 § 5, 1992; Prior code § 13-22)

Chapter 17.12

TRAILER COURTS

Sections:

17.12.120 Parking trailers outside courts.

17.12.130 Inspection.

17.12.135 Correction and re-inspection.

17.12.140 Enforcement.

17.12.150 Violation—Penalty.

17.12.010 Definitions.

As used in this chapter the following terms shall mean:

A. "Approved" means approved in accordance with the requirements of any applicable ordinance; or, if there are no such ordinance requirements, then approved by the appropriate inspection department of the city as being in compliance with generally accepted standards of safety.

B. "Hard-surfaced" means paved with concrete, asphalt, chat, or equal paving material.

C. "House trailer" means any vehicle or structure so designed and constructed as to permit occupancy thereof as living quarters for one or more persons, or the conduct of any business, profession, occupation or trade, and so designed that it is or may be mounted on wheels and capable of traveling on streets or highways, whether propelled or drawn by its own or other motive power. The term does not include a vehicle used merely for the transportation of property; or a vehicle, such as a passenger automobile, used for the transportation of persons and not equipped or designed as living quarters or as an office or shop; or a vehicle moved only on fixed rails or tracks. A housetrailer shall still be deemed to be a trailer although its wheels have been removed permanently or temporarily, or it is mounted on blocks, bricks or other foundation.

D. "Trailer court" means a lot, tract, or parcel of land (including buildings and facilities thereon) where parking facilities and accommodations are provided, with or without compensation, for one or more housetrailers when such trailers are being used for habitation or other purposes within the definition of housetrailer.

E. "Unit" means the spaces reserved for parking a housetrailer in a trailer court; or any vehicle, building or structure used as sleeping or living quarters in a trailer court, according to the context. (Prior code § 13-23)

17.12.020 License—Required.

No person shall establish, maintain or operate a trailer court within the city without having a license as provided in this chapter. (Prior code § 13-24)

17.12.030 License—Procedure for obtaining.

A. The applicant for the license required in Section 17.12.020 shall submit to the permit official two copies of plans for the proposed trailer court. The plans shall be drawn to scale, in sufficient detail to show compliance with all applicable ordinances, and shall show all driveways and locations for the parking of house trailers, all buildings, sanitary conveniences, sewer disposal methods, drainage and utility installations. The plans shall be subject to the approval of all city departments concerned as in the case of other building permits.

Provided, submission and approval of such plans shall not be required in connection with the

application for a license for any trailer court which was already lawfully in operation on the effective date of Ordinance No. 1518, passed and approved on May 3, 1956, and so continues in operation, but if changes in the design of such existing court be made in the future, the plans for such changes shall be submitted and subject to approval.

B. After approval of the plan the applicant shall apply to the permit official for a license. The permit official may provide forms for the application, showing the name of the owner of the trailer court, the address to which notices may be sent, the location of the trailer court, and other information reasonably necessary to the enforcement of this chapter. The application shall be accompanied by payment of one-fourth of the annual established license fee for each three months or part thereof between the date the license is issued and the next March thirty-first.

C. The license shall not be valid until a certificate of occupancy has been issued as required by the building code. (Ord. 16984 § 5, 2008: prior code § 13-25)
(Ord. 17159, § 1, 8-11-2009; Ord. No. 17389, § 3, 8-24-2010, 9-1-2010)

17.12.040 License—Fees.

A. The annual license fee shall be as identified in the adopted budget resolution for the current fiscal year or by other appropriately adopted resolution by the city council. Annual license fees shall be due on March 31st of each year, for the twelve months following March 31st. The license fee is levied to pay part of the expenses of enforcement of this chapter, and not for revenue. (Ord. 15753 § 1, 2004: Ord. 12118 § 3, 1994: Ord. 8997 § 1, 1987; prior code § 13-26)
(Ord. 17159, § 2, 8-11-2009)

17.12.050 License—Renewal.

A. Licenses may be renewed annually by payment of the annual established fee as, provided, if any change is made in the trailer court which would have been required to be shown on the original application, a report thereof shall be made to the permit official and approval to be obtained as in the case of an original application.

B. Renewal applications shall be made by the applicant on a form available at the permit official. (Prior code § 13-27)
(Ord. 17159, § 3, 8-11-2009; Ord. No. 17389, § 4, 8-24-2010, eff. 9-1-2010)

17.12.060 License—Revocation.

The city council may revoke or suspend the license, after reasonable notice and opportunity to be heard, for any violation of this chapter committed or permitted by the holder of the license. (Prior code § 13-28)

17.12.070 Driveways—Water supply—Sewage disposal—Garbage removal.

A. Driveways in trailer courts shall be at least twenty feet wide, graded and hard-surfaced, plainly marked, and adequately lighted at night; provided, trailer courts which were already lawfully in operation on the effective date of Ordinance No. 1518, passed and approved on May 3, 1956, and so continue in operation, may continue to operate with existing lawful driveways of less width; but if the court be redesigned the twenty-foot width requirement shall be complied with.

B. Trailer courts shall be provided with an adequate supply of water from the city water system or other approved water system if the city water is not available; and shall be connected to the city sewer system if such connection is available, otherwise sewage disposal shall be provided in accordance with the plumbing code and all applicable laws and ordinances. Provision shall be made for removal of garbage and waste in accordance with the garbage regulations of this code. (Prior code § 13-29)

17.12.080 Parking.

A. Spaces reserved for the accommodation of housetrailers shall be at least twenty feet wide and defined by markers at each corner and shall be graveled or hard-surfaced and adequately drained;

provided, trailer courts which were already lawfully in operation on the effective date of Ordinance No. 1518, passed and approved on May 3, 1956, and so continue in operation, and have such spaces not less than eighteen feet wide may continue to use such spaces.

B. Every housetrailer when parked shall be at least ten feet from any building, any other trailer, and any street property line, and at least five feet from any property line separating the court from adjoining property; provided, trailer courts which were already lawfully in operation on the effective date of Ordinance No. 1518, passed and approved on May 3, 1956, and so continue in operation, may continue to operate with existing lawful setbacks so long as no actual hazard to health or safety is caused thereby; but if the court be redesigned the new setback requirements shall be complied with. (Prior code § 13-30)

17.12.090 Toilet, bathing and laundry facilities—Building lighting.

Every trailer court shall observe the following minimum plumbing requirements:

A. One water closet for each sex for every ten units or fraction thereof;

B. For each water closet provided for men, there shall be in addition, one urinal stall or trough of equal size;

C. Each toilet room shall be provided with one lavatory or wash basin and one additional lavatory for each two additional water closets;

D. One shower stall or bathtub shall be provided for each sex for every ten units or fraction thereof;

E. Water closets, basins, showers and bathtubs shall be placed in approved buildings, so located that no unit shall be more than three hundred feet from such a facility; provided, trailer courts which were already lawfully in operation on the effective date of Ordinance No. 1518, passed and approved on May 3, 1956, and so continue in operation, need not comply with this distance requirement;

F. Buildings shall be well lighted at all times, well ventilated with all openings screened with screen wire of not less than sixteen mesh to the square inch; and all buildings shall be constructed to meet building code requirements for their designated use;

G. Toilet and bathroom floors shall have floor drains and shall be the equal of approved concrete for floors and elevated not less than four inches above yard grade with floor drains;

H. An approved slop sink shall be provided for each twenty units or major fraction thereof, with a minimum of one slop sink or laundry tub;

I. Laundry rooms with floor drain and laundry tubs or automatic washer shall be provided for each twenty units or fraction thereof;

J. It is unlawful to permit waste from sinks, showers or other fixtures in housetrailers to be deposited on any street, alley, sidewalk, trailer court, or upon any lot. Sinks, showers and other similar fixtures in housetrailers when in use shall be connected with the city sewer system or other sewer disposal approved by the building official or other designee of the city manager and in compliance with the plumbing and other ordinances of the city;

K. Whenever the number of any plumbing fixtures required by this section depends upon the number of units to be served thereby, it shall not be necessary to include those housetrailers which have such fixtures therein, properly connected to an approved water or sewer system; but at least one of each of the required fixtures shall be provided in a building in the court, even though all housetrailers are so equipped, so as to provide emergency facilities in case of the plumbing in any housetrailer should become unusable. (Prior code § 13-31)

(Ord. 17159, § 4, 8-11-2009; Ord. No. 17389, § 5, 8-24-2010, eff. 9-1-2010)

17.12.100 Management—Office required—Recordkeeping.

A. Every trailer court shall be provided with a building, or portion of a building, to be used as

an office, in which shall be kept all records pertaining to the management and supervision of the court. Such records shall be available for inspection at any reasonable time by any department or agency concerned in the enforcement of this chapter.

B. The person in charge of the court shall keep a register of all persons accommodated in the court. The register shall show the names of all persons accommodated, their home addresses, the make and model of their automobile and housetrailer, the license number (including state of issuance) and the duration of their stay. Such registers shall be preserved, and subject to inspection by law enforcement agencies, for five years.

C. Every trailer court shall be under the direct management of the owner, or of some person designated by him as his agent, for whose acts as manager the owner shall be fully responsible. An owner who does not himself manage the court shall file the name of such agent with the city license collector. (Prior code § 13-33)

17.12.110 Rules and regulations.

The owner or manager shall prescribe rules and regulations for the management of the court and shall furnish copies of all such rules and regulations to the city-county health unit. The rules shall provide not less than the following requirements:

A. Regular inspection of the water and sanitary conveniences;

B. The collection and removal of garbage and refuse;

C. Prohibition of the storage of unsightly materials or vehicles;

D. The regular cleaning, repairing and disinfecting of all buildings;

E. Such other measures as may be deemed necessary by the department of environmental services for comfort and safety of persons in the court;

F. The control and confinement of all pet animals;

G. Report to the department of public health all cases of communicable disease that come to the manager's attention and that have not been treated by a physician;

H. Immediate report to the police department of disorderly persons or conduct;

I. Regular cleaning, repairing and disinfecting of all buildings and other such measures for comfort and safety of the general public;

J. The owner or manager of the trailer court shall see that each housetrailer is equipped with an underwriter's laboratory approved fire extinguisher. If the extinguisher is a dry chemical fire extinguisher or a carbon dioxide fire extinguisher, it must have at least a 6 B C rating; if the extinguisher is of a water type, it must have at least a 2 A rating.

All extinguishers shall be inspected at least once a year by a person competent to determine whether they are in good working order and kept filled. After each inspection a tag shall be attached to the extinguisher showing the date of the inspection, the general condition of the extinguisher, and the signature, address and telephone number of the person who made the inspection.

Provided, extinguishers shall not be required if the trailer court is equipped with a system of standpipes, with one and one-half inch hose and with hose cabinets, all in compliance with the standards of the National Board of Fire Underwriters, Pamphlet No. 14, entitled "Standpipe and Hose Systems," proposed in October, 1952. The number of risers or standpipes in the trailer court shall be such that no part of the interior of any trailer in the court shall be more than five feet from the reach of a suitable nozzle attached to a seventy-five foot section of one and one-half inch hose.

All standpipe equipment and fire extinguishers shall be protected from freezing and other damage, and kept in repair and readiness for use at all times.

No reserve supplies of high hazard flammable liquid shall be stored either in the trailers or on the premises;

K. No person shall park any vehicle in any driveway in a trailer court, so as to leave less than twenty feet of the width of the driveway open for the passage of vehicles.

L. Copies of all rules and regulations shall be posted in conspicuous locations throughout the court. (Prior code § 13-34)
(Ord. 17159, § 5, 8-11-2009)

17.12.120 Parking trailers outside courts.

A. No person shall park, place, locate or keep any housetrailer, being used for habitation, on any street, alley or sidewalk, or on any private property, for more than three hours, except in a trailer court licensed under this chapter. The three-hour limitation in this section does not abrogate any shorter limitation on, or any prohibition against, stopping or parking any vehicle, as imposed under the traffic regulations or any other law or ordinance.

B. A trailer which is not being used for habitation, but is being used for any other purpose (except storing property therein) and is parked or kept elsewhere than in a licensed trailer court, shall comply with all requirements of the zoning ordinance and the building code which would be applicable if the trailer were a building or structure used for that purpose. This requirement does not apply if the trailer is on wheels and legally parked as a vehicle in a public street or alley.

C. A trailer which is not being used for any purpose, except the storage of property therein, may be kept or parked in any place where a vehicle could legally be kept or parked.

D. No person shall keep or park a housetrailer in violation of this section or in violation of Section 20.10.340 of the City Code. (Prior code § 13-36)
(Ord. 17159, § 6, 8-11-2009)

17.12.130 Inspection.

A. The department of environmental services shall inspect each trailer court at least once every year or upon receiving a complaint.

B. If the director of the department of environmental services or designee shall determine that the condition of the court has become so unsanitary as to endanger the health of the occupants of the court or the residents of the neighborhood, he may order the court closed and all occupants removed therefrom until the necessary corrections have been made. The owner or manager may appeal to the city manager from such order and the city manager may, after reasonable notice and opportunity to be heard, make such order as may be appropriate under the circumstances.

C. The owner or manager shall request annual inspections of all gas heating equipment and shall post warning notices as required by the city building code.

D. Any rental contract or lease for a unit shall contain the following statement in all capital letters:

"REPORT ANY ADVERSE HEALTH CONDITIONS IN THIS TRAILER COURT TO THE DEPARTMENT OF ENVIRONMENTAL SERVICES." (Ord. 9132 §§ 1, 2, 1987; prior code § 13-35)
(Ord. 17159, § 7, 8-11-2009)

17.12.135 Correction and re-inspection.

A. For trailer courts in violation of this chapter, the director of the department of environmental services shall issue a correction notice to the operator regarding the violation(s). The owner or operator receiving a correction notice shall promptly remedy the violation and ask for a re-inspection by the department of environmental services. No license shall be issued until the violation(s) have been satisfactorily corrected and passed by the director of the department of environmental services and all fees identified in the adopted budget resolution for the current fiscal year or by other appropriately adopted resolution by the city council have been paid.

B. A correction notice issued by the director of the department of environmental services shall contain, as a minimum, the following:

1. The name and address of the court;

2. The reason(s) for the correction notice;

3. Recommended corrective measures to bring the facility into compliance; and

4. Establish a reasonable time limit for the completion of the corrective measures.

C. Upon correction of the violation(s), the owner or operator shall call for and receive a re-inspection by the director of the department of environmental services. The process shall be repeated until compliance with the code is achieved.

D. The owner or operator of a facility receiving a correction notice shall pay the appropriate re-inspection fee as identified in the adopted budget resolution for the current fiscal year or by other appropriately adopted resolution by the city council, for each re-inspection performed by the director of the department of environmental services. Such fees shall be paid within five days from the date of re-inspection.

(Ord. 17159, § 8, 8-11-2009)

17.12.140 Enforcement.

The enforcement of the licensing, health, building, plumbing, electrical, air conditioning, safety, fire prevention, and zoning ordinance pertaining to trailer courts and trailers either existing or proposed, regardless of location, shall be under supervision of the building official as defined in Section 18.02.101.4.1 of this Code. (Ord. 16984 § 6, 2008: prior code § 13-37)

(Ord. 17159, § 9, 8-11-2009; Ord. No. 17389, § 6, 8-24-2010, eff. 9-1-2010)

17.12.150 Violation—Penalty.

Any person who shall violate any provision of this chapter shall be deemed guilty of a misdemeanor and punished by a fine of not less than ten dollars nor more than five hundred dollars, and in the case of continuing violations, each day's violation shall be deemed a separate offense. (Ord. 9430 § 13, 1988: prior code § 13-38)

Chapter 17.16

RESERVED

Editor's note—Ord. No. 17075, § 1, passed February 24, 2009, repealed Chapter 17.16 in its entirety. Formerly said chapter pertained to Inspections and certificates and derived from Ord. 16984, § 1, 2008; Ord. 16806, § 2; Ord. 15754, § 1, 2004; Ord. 9585, § 1, 1988; Ord. 8981, 1987; Prior Code §§ 13-51—13-55.

***Editor's note**—Ord. No. 19138, § 1, adopted Feb. 2, 2021, repealed the former Ch. 17.20, §§ 17.20.010—17.20.150, and enacted a new Ch. 17.20 as set out herein. The former Ch. 17.20 pertained to similar subject matter and derived from the prior code §§ 7A-11—7A-25; Ord. 9430; Ord. 9815; Ord. 11043; and Ord. 11230, § 1(part), adopted in 1992.

17.20.010 Title.

This chapter may be cited as the "City of El Paso Fair Housing Ordinance."
(Ord. No. 19138, § 1, 2-2-2021)

17.20.020 Policy.

Through fair, orderly and lawful procedures, it is the policy of the city to promote the opportunity for each person to obtain housing without regard to race, color, sex, sexual orientation, gender identity, religion, national origin, disability or familial status. This policy is grounded upon the recognition of the right of every person to have access to adequate housing of the person's choice, and the denial of this right because of race, color, sex, sexual orientation, gender identity, religion, national origin, disability or familial status is detrimental to the health, safety and welfare of the inhabitants of the city and constitutes an unjust deprivation of rights, which is within the power and proper responsibility of government to prevent and to create a procedure for investigating and settling complaints of discriminatory housing practices; and to provide rights and remedies substantially equivalent to those granted under federal law.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.030 Definitions.

As used in this chapter, unless a different meaning clearly appears from the context:

A. "Actor" means a person identified in a complaint as having committed an unlawful act under this chapter.

B. "Complainant" means a person, including the city, who files a written complaint under Section 17.20.070 of this chapter.

C. "Conciliation" means the attempted resolution of issues raised by a complaint or by the investigation of the complaint, through informal negotiations involving the aggrieved person, the actor, and the city.

D. "Conciliation agreement" means a written agreement setting forth the resolution of the issues in conciliation.

E. "Discriminatory housing practice" means an act that is unlawful under Section 17.20.040 or declared unlawful under the Federal Fair Housing Act of 1968 (Public Law 90-284) or the Federal Fair Housing Amendments Act of 1988 (Public Law 100-430).

F. "Familial status" means one or more individuals (who have not attained the age of eighteen years) being domiciled with:

1. A parent or another person having legal custody of such individual or individuals; or

2. The designee of such parent or other person having such custody, with the written permission of such parent or other person.

The protections afforded against discrimination on the basis of familial status shall apply to any person who is pregnant or is in the process of securing legal custody of any individual who has not attained the of eighteen years.

G. "Family" includes a single individual.

H. "Grievance officer" means the person serving as fair housing grievance officer and includes the assistants, agents or employees assigned to work with the grievance officer.

I. "Disability" means, with respect to a person:

1. A physical or mental impairment which substantially limits one or more of such person's major life activities;

2. A record of having such an impairment; or

3. Being regarded as having such an impairment, but such term does not include current, illegal use of or addiction to a controlled substance (as defined in Section 102 of the Controlled Substances Act, 21 U.S.C. § 802).

J. "Housing unit" means any building, structure, mobile home, or portion thereof, which is occupied, designed, or intended for occupancy by a family or families as a residence, and any vacant land offered for sale or lease for the construction or location thereon of any such building, structure or portion thereof.

K. "Person" includes one or more individuals, corporations, partnerships, associations, labor organizations, legal representatives, mutual companies, joint-stock companies, trusts, unincorporated organizations, trustees, trustees in bankruptcy, receivers and fiduciaries whether acting as principal or agent in the transaction, or two or more persons having a joint or common economic interest.

L. "Person(s) aggrieved" means any person who claims to have been injured by a discriminatory housing practice or who believes that he or she will be injured by a discriminatory practice that is about to occur.

M. "Rent" includes to lease, sublease, and otherwise grant for a consideration the right to occupy premises not owned by the occupant.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.040 Unlawful discriminatory housing practices.

A. It is unlawful for a person, on the basis of race, color, sex, sexual orientation, gender identity, religion, national origin, disability or familial status:

1. To refuse to sell or rent an available housing unit to another person after the other person makes a bona fide offer to buy or rent the housing unit;

2. To refuse to negotiate with a person for the sale or rental of a housing unit;

3. To discriminate against a prospective buyer or renter in connection with the showing of a housing unit;

4. To discriminate against a person in the terms, conditions or privileges of sale or rental of a housing unit, or in the provision of services or facilities in connection therewith;

5. To represent to a person that any housing unit is not available for inspection, sale or rental when such housing unit is in fact so available, or to otherwise make unavailable or deny such housing unit to any person;

6. As to a multiple-listing service, real estate brokers' organization or other service, organization or facility relating to the business of selling or renting housing units:

a. To deny a person access to or membership or participation in the service, organization or facility, or

b. To discriminate against a person in the terms or conditions of such access, or membership or participation.

B. It is unlawful:

1. To make an oral or written statement indicating a policy of the actor or of a person represented by the actor to discriminate on the basis of race, color, sex, sexual orientation, gender identity, religion, national origin, disability or familial status in the selling or renting of a housing unit;

2. For gain or profit, to induce or attempt to induce a person to sell or rent a housing unit by a representation that a person of a particular race, color, religion, sex, sexual orientation, gender identity, national origin, disability or familial status is in proximity to, is present in or may enter into the neighborhood in which such housing unit is located;

3. To make, print or publish, or cause to be made, printed or published, any notice, statement or advertisement which with respect to the sale or rental of a housing unit that indicates any preference, limitation or discrimination based on race, color, religion, sex, sexual orientation, gender identity, national origin, disability or familial status or an intention to make any such preference, limitation or discrimination;

4. For a person whose business consists in whole or in part in the making or purchasing of any real estate loans, whether commercial or residential, with respect to such loans or financial assistance for the purpose of purchasing, constructing, improving, repairing, or maintaining a housing unit(s) to make any preferential determinations based on color, sex, sexual orientation, gender identity, religion, national origin, disability or familial status, such acts include but are not limited to the following:

a. To deny such loan or other financial assistance to a person, or

b. To discriminate against such person in the fixing of the amount, interest rate, duration or other terms or conditions of such loan or other financial assistance,

c. To refuse to provide loans or other financial assistance to a person, secured by residential real estate.

5. With respect to persons with disabilities, not to:

a. Allow reasonable modifications in existing housing,

b. Allow reasonable accommodations in rules, practices, or

c. Meet the requirement for new designs and construction all as set forth in the Fair Housing Amendments Act, referenced above. It is expressly intended that this chapter provide at least the minimum coverage allowed by the above-referenced Act, and is in no way intended to reduce the coverage provided by said Act.

6. To coerce, intimidate, threaten or otherwise interfere with any person in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other person in the exercise or enjoyment of any right granted or protected by Sections 803, 804, 805 or 806 of the Federal Act.

(Ord. No. 19138, § 1, 2-2-2021)

17.20.050 Exemptions.

A. Nothing in Section 17.20.040 (other than Section 17.20.040(B)(3)) shall apply to:

1. The sale or rental of any single-family house by an owner, provided the following conditions are met:

a. The owner does not own or have an interest in more than three such single-family houses at any one time,

b. The house is sold or rented without the use of a real estate broker, agent or salesperson or the facilities of any person in the business of selling or renting dwellings. If the owner selling the house does not reside in it at the time of the sale or was not the most recent resident of the house prior to such sale, the exemption in this paragraph (A)(1) of this section applies to only one such sale in any twenty-four-month period.

2. Rooms or units containing living quarters occupied or intended to be occupied by no more than four families living independently of each other, if the owner actually maintains and occupies one of such living quarters as his or her residence.

B. Nothing in Section 17.20.040 shall prohibit:

1. A religious organization, association or society, or any nonprofit institution or organization operated, supervised or controlled by or in conjunction with a religious organization, association or society from limiting the sale, rental or occupancy of housing units which it owns or operates to persons of the same religion or from giving preference to such persons, provided that:

a. Such sale, rental or occupancy is not for a commercial purpose,

b. Membership in such religion is not restricted because of race, color, sex, sexual orientation, gender identity, national origin, disability or familial status;

2. A private club not in fact open to the public, which as an incident to its primary purpose or purposes provides lodging which it owns, from limiting the rental or occupancy of such lodgings to its members or from giving preference to its members; provided, that such lodging is not owned or operated for a commercial purpose;

3. Nothing in this chapter shall be deemed to prevent operating housing primarily for persons fifty-five or older or sixty-two and older as long as such operations comply with the limitations set forth in the Fair Housing Amendments Act of 1988, referenced in this chapter.

4. Appraisal exemption. This chapter does not prohibit a person engaged in the business of furnishing appraisals of real property from taking into consideration factors other than race, color, religion, sex, sexual orientation, gender identity, disability, familial status or national origin. Discriminatory appraisals are intended to be specifically prohibited under this chapter;

5. Effect on other law.

a. This chapter does not affect a reasonable local or state restriction on the maximum number of occupants permitted to occupy a dwelling or restriction relating to health or safety standards.

b. This chapter does not affect a requirement of nondiscrimination in any other state or federal law.

(Ord. No. 19138, § 1, 2-2-2021)

17.20.060 Fair housing grievance officer—Appointment—Duty to implement and enforcement of provisions.

The city council shall appoint a fair housing grievance officer and provide the grievance officer with a staff adequate to effectively enforce this chapter. The fair housing grievance officer shall implement and enforce this chapter in a manner affirmatively to further the purpose of this chapter. The grievance officer shall cooperate with the secretary of housing and urban development and the attorney general of the United States in the enforcement of the Fair Housing Act of 1968, Public Law 90-284 and the Fair Housing Amendments Act of 1988, and may assist the secretary or attorney general in any way consistent with the purpose and policy of this chapter.

(Ord. No. 19138, § 1, 2-2-2021)

17.20.070 Discriminatory housing practices—Reporting.

A. An aggrieved person may report any discriminatory housing practice to the grievance officer and may file a complaint not more than one hundred eighty days after the commission of the practice of which complaint is made. A complaint may also be filed by the grievance officer, if such officer has evidence to believe that a person has committed a discriminatory housing practice.

B. The grievance officer shall treat a complaint referred by the secretary of housing and urban development or the attorney general of the United States under the Fair Housing Act of 1968, Public Law 90-284 and the Fair Housing Amendments Act of 1988, as a complaint filed under subsection A of this section.

C. A complaint shall be in writing, verified, and contain the following information:

1. Name of aggrieved person;

2. Street address of current residence of aggrieved person;

3. Telephone number, if any, of aggrieved person;

4. Name of actor;

5. Street address of actor, if known to the aggrieved person;

6. Date of alleged discriminatory practice;

7. Street address of property involved;

8. General statement of facts pertaining to the offense, including the basis of the alleged discriminatory practice (race, color, religion, sex, sexual orientation, gender identity, familial status, disability or national origin);

9. Date of filing complaint;

10. Signature of aggrieved person;

11. If complainant is other than aggrieved person, the signature, name and street address of the complainant, in addition to the preceding information.

D. Not more than ten working days after the filing of complaint by certified mail, the grievance officer shall notify the actor named in the complaint that:

1. A complaint alleging the commission of a discriminatory housing practice has been filed against the actor and of his rights. The grievance officer shall furnish a copy of the complaint to the actor;

2. The actor may file a verified written answer to the complaint within seven days after the complaint is received by the actor.

E. A complaint or answer may be reasonably and fairly amended at any time. The grievance officer by certified mail shall furnish a copy of each amended complaint or answer the actor or the complaint, respectively, as promptly as practicable.

F. The grievance officer and staff may not make public, without the written consent of the persons concerned, the name of the actor or the aggrieved person or any information relative to a complaint, before the grievance officer notifies the city attorney of a discriminatory housing practice alleged to have been committed in a complaint or while the complaint is in the process of being investigated and prior to completion of all negotiations.

(Ord. No. 19138, § 1, 2-2-2021)

17.20.080 Discriminatory housing practices—Investigation.

A. Upon receiving a properly completed complaint, the grievance officer must process the complaint no later than thirty days. The grievance officer must also serve notice upon the complainant acknowledging the filing and advising the complainant of the time limits and forums provided under the law. The grievance officer must complete its investigation of the complaint within one hundred days of the date of the receipt of the complaint. If impracticable to do so, the officer must notify the complainant and the respondent actor in writing of this fact and the reason(s) for same.

B. If the grievance officer determines that there is not probable cause to believe that a particular alleged or suspected discriminatory housing practice has been committed, the grievance officer shall take no further action with respect to the alleged or suspected discriminatory housing practice.

C. The grievance officer shall have comprehensive authority, including but not limited to subpoena power to investigate allegations of complaints.

(Ord. No. 19138, § 1, 2-2-2021)

17.20.090 Discriminatory housing practices—Conciliation.

A. It is required that conciliation be attempted during the period after the filing of the complaint and prior to the filing of a charge or dismissal.

B. It is required that any conciliation agreement arising out of conciliation efforts by the grievance officer shall be an agreement between the actor and the complainant and shall be subject

to the grievance officer's approval. Such conciliation shall be made public unless the complainant and respondent actor otherwise agree and the grievance officer determines that disclosure is not required to further the purposes of the law.

C. If the grievance officer determines that there is probable cause to believe that a discriminatory housing practice alleged in a complaint has been committed, the grievance officer and the actor, or a person who owns, controls or manages the housing unit involved in the discriminatory practice, or a person who employs the actor, may voluntarily enter into a conciliation agreement.

D. If a conciliation agreement is executed under this section, a party to the agreement may not be prosecuted in municipal court for an offense specified in the agreement (as provided under subsection F(1) of this section) unless the grievance officer determines that the agreement has been violated and notifies the city attorney in writing of the violation.

E. A conciliation agreement must be in writing in a form approved by the city attorney and must be signed and verified by the grievance officer and each other party to the agreement. A conciliation agreement that is not executed before the expiration of thirty days after the notification to the actor (as required under Section 17.20.070(D)) must be specifically approved by the city attorney prior to its execution. A conciliation agreement is executed upon its signing and verification by all parties to the agreement.

F. A conciliation agreement executed under this section must contain:

1. An identification of the discriminatory housing practice and corresponding actor that gives rise to the conciliation agreement under subsection C of this section and the identification of any other discriminatory housing practice and actor that the parties agree to make subject to the limitation on prosecution in subsection D of this section; and

2. Identification of the housing unit subject to the conciliation agreement; and

3. A statement that each party entering into the conciliation agreement with the grievance officer agrees:

a. Not to violate this chapter or the conciliation agreement, and

b. To file with the grievance officer a monthly activity report, in accordance with the following regulations:

i. If the practice giving rise to the conciliation agreement under subsection C of this section involves:

(A) An actor who engages in a business relating to the selling or renting of housing units, or

(B) A housing unit occupied or intended for occupancy on a rental or sale basis, or

(C) A violation of Section 17.20.040(B)(4). The activity report must state, with respect to each person of the specified class discrimination in the complaint who in person contacts a party to the conciliation agreement concerning the sale, rental or financing of a housing unit, the name and street address and telephone number, if any, of such person, the date of each contact and the result of each contact,

ii. If the practice giving rise to the conciliation agreement under subsection C of this section involves a violation of Section 17.20.040(B)(2), the activity report must state the number and manner of solicitations concerning housing units made by the party and the approximate boundaries of each neighborhood in which the solicitations are made,

iii. The party who prepares the activity report shall sign and verify the report,

iv. An activity report must be filed each month with the grievance officer on the date specified in the conciliation agreement for a period of not less than three months nor more than twenty-four months, as required by the conciliation agreement.

G. In addition to the requirements of subsection F of this section, a conciliation agreement may include any other term or condition agreed to by the parties.

H. If the grievance officer determines that a conciliation agreement has been violated, the grievance officer shall give written notice by certified mail to all actors subject to the agreement.

I. The grievance officer must make a final administrative disposition of a complaint within one year of the date of receipt of the complaint, unless it is impracticable to do so. If it is impracticable, the grievance officer shall notify the complainant and actor in writing.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.100 Violation of conciliation agreement.

A. A person commits an offense if, after such person and the grievance officer execute a conciliation agreement under Section 17.20.090, such person violates Section 17.20.090(F)(3)(a) or (b).

B. It is no defense to prosecution under this section that, with respect to a discriminatory housing practice gave rise to the conciliation agreement under Section 17.20.090(C):

1. The actor did not commit the offense; or

2. The grievance officer did not have probable cause to believe the offense was committed.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.105 Remedies—Prompt judicial action.

The grievance officer shall have authority to seek prompt judicial action for appropriate temporary or preliminary relief pending final disposition of a complaint if the grievance officer concludes such action is necessary to carry out the purposes of the law or this chapter.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.110 Discriminatory housing practices—Notification of city attorney.

A. Except as otherwise provided in subsection B of this section, if the grievance officer determines that there is probable cause to believe that a discriminatory housing practice alleged in a complaint has been committed, the grievance officer shall promptly notify the city attorney in writing of the identification of the actor and the discriminatory housing practice and direct that appropriate action be taken using the grievance officer's subpoena power if necessary. The grievance officer has the power to grant actual damages or to arrange to have the dispute adjudicated in court, at the expense of the office of the grievance officer, the claim to an award of actual damages, to an aggrieved person. The grievance officer is further authorized to seek injunctive or equitable relief in a court of competent jurisdiction, as well as assess a civil penalty or arrange to have the matter adjudicated in court at the grievance officer's agency's expenses, and may assess an award of punitive damages against the actor. It is further intended that the complainant may instead seek enforcement through a judicial election procedure with the remedies available under the above-referenced Act brought at the grievance officer's expense on behalf of the complainant.

B. After the grievance officer attempts a conciliation under Section 17.20.090, the grievance officer may postpone the notification to the city attorney required under subsection A of this section for a period of not more than thirty days after notification to the actor of a complaint (as required under Section 17.20.070(D)). However, if a conciliation agreement is executed during the thirty-day period of postponement, the grievance officer is not required to notify the city attorney of the identification of the actor or of a discriminatory housing practice specified in the conciliation agreement (as provided in Section 17.20.090(F)(1)) unless the grievance officer determines that the agreement has been violated.

C. Notification required under subsection A of this section is not a prerequisite to prosecution or referral to HUD as a discriminatory housing practice under this chapter. This section does not limit any communications, otherwise lawful, between the grievance officer and the city attorney.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.120 Discriminatory housing practices—Dismissal of complaint.

If, after the city attorney files a complaint in the municipal court charging an actor with a dis-

criminatory housing practice, a conciliation agreement is executed under Section 17.20.090 before commencement of trial on the discriminatory housing practice, the city attorney may cease prosecution and move for dismissal of the complaint.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.125 Enforcement by private persons.

This chapter may be enforced by an aggrieved person by the commencement of an action in an appropriate court not less than one year after the occurrence or termination of an alleged discriminatory housing practice; said court may: (1) award the plaintiff actual and punitive damages; (2) grant as relief as it deems appropriate, any temporary or permanent injunction, temporary restraining order, or other order, and allow reasonable attorneys' fees and costs. It is expressly intended that any grievance officer's actions are subject to judicial review upon application by any party aggrieved by a final order of such grievance officer. Such review process must include access to all remedies contemplated by the Fair Housing Act. Such court's authority must include authority to grant the petitioner, or any other party, such temporary relief, restraining order, or other order as the court determines is just and proper; to affirm, modify, set aside in whole or in part, the order, or remand the order for further proceedings and enforce the order to the extent the order is affirmed or modified.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.130 Discriminatory housing practices—Additional remedies.

The procedures prescribed by this chapter do not constitute an administrative prerequisite to another action or remedy available under other law.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.140 Educational and public information activities.

The grievance officer may conduct such educational and public information activities as are designed to promote the policy of this chapter.
(Ord. No. 19138, § 1, 2-2-2021)

17.20.150 Violation—Penalty.

Any person who violates this chapter is guilty of a separate offense for each day or portion of a day on which the violation is committed, and each offense is punishable by a fine of not more than five hundred dollars.
(Ord. No. 19138, § 1, 2-2-2021)

18.02.101 TITLE AND SCOPE

18.02.101.1 Title.

The provisions of this chapter shall constitute and be known and be cited as the "Building and Construction Administrative Code" hereinafter referred to as "this Code" of the City of El Paso.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.101.2 Purpose.

The purpose of this Code is to provide for the administration and enforcement of the following technical codes adopted by the city, as amended:

El Paso City Code:

Chapter 18.08, Building Code.

Chapter 18.10, Residential Building Code.

Chapter 18.12, Mechanical Code.

Chapter 18.16, Electrical Code.

Chapter 18.18, Outdoor Lighting Code.

Chapter 18.20, Plumbing Code.

Chapter 18.21, Private Sewage Disposal Code.

Chapter 18.24, Gas Code.

Chapter 18.28, Existing Building Code.

Chapter 18.30, Swimming Pool & Spa Code.

Chapter 18.40, Vacant Building Code.

Chapter 18.44, Grading.

Chapter 18.46, Landscape Code.

Chapter 18.47, Irrigation Code.

Chapter 18.50, Property Maintenance Code.

Chapter 18.60, Flood Damage Prevention.

Chapter 18.70, Energy Conservation Code.

Chapter 18.80, Alternative Energy Conservation Code—Deleted in its entirety.

The provisions of this Code and the technical codes shall govern all construction and installations, regardless of the trade areas concerned or of the type or class of permit under which the work is performed.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.101.3 Interpretation.

Where, in any specific case, different sections of this Code, or of the technical codes, or other codes mentioned herein, specify different materials, methods of construction or other requirements, the most restrictive shall govern.

Where there is a conflict between a general requirement and a specific requirement, the specific requirement shall be applicable.

Where there are any conflicting provisions between this Code and the International Building Code and/or International Residential Code, 2021 Edition, Chapter 1, Scope and Administration, this Code shall prevail.

All references as may be used in state or other applicable law, and in the ordinances and technical codes of the city, to the plumbing official, mechanical official, gas official, code official, or the authority having jurisdiction, shall mean the building official.

All references within the technical codes to the building department or the department of building safety shall mean the building permits and inspections division or the code compliance division of departments of the city as provided by ordinance, as applicable, or as designated by the city manager. All references in this chapter to the department, when relating to the duties of the department, shall mean the building permits and inspections division or the code compliance division, as applicable, or as designated by the city manager.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.101.4 Referenced standards.

Standards referenced in the technical codes shall be considered an integral part of the codes without separate adoption. If specific portions of a standard are denoted by Code text, only those portions of the standard shall be enforced. Where Code provisions conflict with a standard, the Code provisions shall be enforced. Permissive and advisory provisions in a standard shall not be constructed as mandatory.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.101.5 Code remedial.

This Code is declared to be remedial, and shall be construed to secure the beneficial interests and purposes thereof, which are public safety, health, and general welfare, through structural strength, stability, sanitation, adequate light and ventilation, and safety to life and property from fire and other hazards attributed to the built environment including alteration, repair, removal, demolition, use and occupancy of buildings, structures, or premises, and by regulating the installation and maintenance of all electrical, gas, mechanical and plumbing systems, which may be referred to as service systems.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.101.6 Quality control.

Quality control of materials and workmanship is not within the purview of this Code except as it relates to the purposes stated herein or the requirements of the technical codes.

18.02.101.7 Permitting and inspection.

The inspection or permitting of any building, structure, system or plan by any jurisdiction, under the requirements of this Code, shall not be construed in any court as a warranty of the physical condition of such building, system or plan or their adequacy. No jurisdiction nor any employee thereof shall be liable in tort for damages for any defect or hazardous or illegal condition or inadequacy in such building, system or plan, nor for any failure of any component of such, which may occur subsequent to such inspection or permitting.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.102 DEFINITIONS.

Unless otherwise expressly stated, the following words and terms shall have the meanings as shown in this Code. In addition, definitions located in the technical codes are hereby incorporated into this Code.

1. Building, existing: Building constructed prior to the adoption of the Building Code for which a legal certificate of occupancy has not been issued. A building subject to the existing Building Code.

2. Building official: The official appointed pursuant to Section 18.02.103.1 of this Code who is charged with the administration and enforcement of the codes enumerated in Section 18.02.101.2 above.

3. Expedited plan review: The expedited plan review process may be used to expedite the review of commercial construction documents for new construction projects, major additions to existing facilities and for complex projects upon payment of the established fee.

4. Home improvement: The repair, replacement, remodeling, alteration, conversion, modernization, or addition to any existing building or any portion or system thereof which is used or designed to be used as a dwelling unit, including construction, replacement or improvement of porches, garages, carports, roofs, fences, rock walls and swimming pools.

5. Master permit: All new construction shall require a building permit that shall serve as the master permit and all other required permits (electrical, mechanical, plumbing, fire, and/or irrigation permits) shall be obtained separately and attached to the master permit. For new construction, master permits must be obtained prior to any other required permits.

6. Separate subcontractor permit: Are permits issued for disciplines such as electrical, me-

chanical, plumbing, fire, and/or irrigation. Separate subcontractor permits are issued separately and may be used as stand-alone permits or may be attached to a master permit for new construction.

7. Permittee: The governmental entity, utility company, contractor, person or business entity that has received a permit pursuant to this chapter.

8. Tenant improvement: Work performed by or on behalf of a tenant in a completed building, or shell, or space within a building that has previously received a certificate of occupancy or certificate of completion.

9. Shell I structure: A shell I structure shall consist of foundation, exterior walls, roofing along with underground MEP systems only.

10. Shell II structure: A shell II structure may have interior walls as well as partial interior MEP systems however, remain incomplete until a tenant improvement completes the structure for occupancy.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.103 POWERS AND DUTIES OF THE BUILDING OFFICIAL

18.02.103.1 Building official.

The building official shall be designated by the city manager and shall obtain valid building official certification from the International Code Council or other recognized certification program as required by the approved job specifications for the position.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.103.2 Administration and enforcement.

The building official shall be responsible for enforcing the provisions of this Code and of the technical codes and is authorized to render interpretations of those codes that are consistent with their spirit and purpose. The building official is further authorized to designate employees of the building permits and inspections division and code compliance division to perform these duties.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.103.3 Deputy building officials.

The building official may designate city employees to be known as deputy building officials under either the building permits and inspections division or the code compliance division for purposes of carrying out authority and delegation with respect to all matters under this Code and the technical codes.

Employees designated to be known as deputy building officials shall have a valid building official certification from the International Code Council or other recognized certification program at the time of appointment and shall have the powers as delegated by the building official. Final authority for interpretation of the codes enumerated in Section 18.02.101.2 shall rest with the building official.

To the extent that provisions in the technical codes regarding the designation or appointment of deputy building officials may be contrary to the provision in this section, this section shall control.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.103.4 Chief inspector qualifications.

Chief inspectors in the building permits and inspection division and the code compliance division shall obtain valid building official certification from the International Code Council or other recognized certification program as required by the approved job specifications for the position.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.103.5 Inspector qualifications.

Inspectors in the building permits and inspections division and the code compliance division shall obtain valid inspector certification from the International Code Council or other recognized certification program as required by the approved job specifications for the position.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.103.6 Right of entry.

Whenever necessary to make an inspection to enforce any of the provisions of this Code and of the technical codes, or whenever the building offi-

cial has reasonable cause to believe that there exists in any building or upon any premises any condition or code violation which makes such building, structure, premises, electrical, gas, mechanical or plumbing systems unsafe, dangerous or hazardous, the building official may enter such building, structure or premises at all reasonable times to inspect the same or to perform any duty imposed upon the building official by this Code or the technical codes; provided, that if such building or premises is occupied, he shall first present proper credentials and request entry. If such building, structure or premises is unoccupied, he shall first make a reasonable effort to locate the owner or other persons having charge or control of such and request entry. If entry is refused, the building official shall have recourse to every remedy provided by law to secure entry.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.103.7 Inspection warrant.

When the building official shall have first obtained a proper inspection warrant or other remedy provided by law to secure entry, no owner or occupant or any other persons having charge, care or control of any building, structure or premises shall fail or neglect, after proper request is made as herein provided, to promptly permit entry therein by the building official for the purpose of inspection and examination pursuant to this Code or the technical codes.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.103.8 Tests.

The building official may require tests or test reports as proof of compliance with any provision of this Code or of the technical codes. Required tests are to be made at the expense of the owner, or his agent, by an approved testing laboratory or other approved agency.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.104 CONTRACTORS AND LICENSING

18.02.104.1 Contractors' responsibilities.

It shall be the duty of every contractor who shall make contracts for the construction, installation or repair of buildings, structures, or fire protection, electrical, gas, mechanical or plumbing systems, for which a permit is required, to conform to the requirements of this Code and the technical codes and with all other federal and state regulations.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.2 Contractor registration.

Persons, firms, partnerships or corporations doing business as contractors shall file an annual registration application with the department to be eligible to apply for and obtain permits. The established registration fee shall accompany such application. Pursuant to the State Occupations Codes, plumbing, electrical and mechanical contractors shall be exempt from the registration fee.

Plumbing, electrical and mechanical contractors shall provide copies of the bond and general liability insurance policies, to include exemptions and/or restrictions associated with such policies.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.3 Registration application.

The application shall require such information as determined reasonably necessary by the building official and shall include the following:

1. Company or business name, as well as all company names used for the last five years.
2. Company or business address and phone number, as well as all previous business addresses for last five years.
3. Number of years the company has been in operation.
4. Principal owner of company.
5. Name of company operator or manager.

6. Full name, date of birth, residence address, residence phone number, position with the company, and current e-mail of the person completing the application.

7. A list of individuals authorized to obtain permits on behalf of the company and what documentation each will show to verify authorization when obtaining permits on behalf of the company, such as a Driver's License Number or other identification card number.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.4 Disclosures.

The registration application shall include disclosure of the following information:

Whether the principal owner or operator has filed an assumed name certificate with El Paso County. If so, a copy of such shall be attached.

Whether there are any restrictions and/or exceptions imposed on the company's bond or general liability coverage.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.5 Acknowledgements.

The registration application shall be signed by the principal owner or operator of the company and shall include a statement acknowledging the following:

1. That the company and the persons involved understand that they have a duty to comply with this Code and the technical codes.

2. That to be eligible to obtain permits from the city, they must annually file the registration application required by this section.

3. That all statements made in the registration application and submittal attachments are true and correct.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.6 Licenses required.

No individual, firm or corporation shall construct, install, maintain or repair any air conditioning, cooling, refrigeration or heating equipment, electrical equipment, plumbing, gas equipment, residential water treatment equipment, fire protection systems, or irrigation systems for which a permit is required, nor contract to do so, without being a holder of a proper license for the appropriate class of work being done as required by the State of Texas and this Code as listed herein. No individual, firm or corporation shall employ or otherwise cause any person who does not hold an appropriate license to engage in such activities for which a license is required.

1. Mechanical contractors. No person, firm or corporation shall install, maintain or repair any air conditioning, cooling, refrigeration or heating equipment, nor contract to do so, without being a holder of a proper license for the appropriate class of work being done as required by the Texas Department of Licensing and Regulation and this Code; nor shall any person, firm or corporation employ or otherwise cause any person who does not hold an appropriate license to engage in such activities for which a license is required.

2. Electrical contractors. No person or entity shall engage in electrical contracting or hold themselves out to be able to engage in electrical contracting without being the holder of a master electrician's license or the registered employer of a full-time employee who is a master electrician. Electrical work shall be performed under the control, supervision, direction and responsibility of a master electrician.

3. Plumbing contractors. No person or entity shall engage in plumbing contracting or hold themselves or itself out to be able to engage in plumbing contracting without being the holder of a master plumbing license or the registered employer of a full-time employee who is a master plumber.

4. Plumbing and gas installations, including water treatment equipment, shall be performed under the control, supervision, direction and responsibility of a master plumber and certified residential water treatment operator, respectively.

5. Irrigation systems shall be performed under the control, supervision, direction and responsibility of a master plumber or licensed irrigator.

Fire Protection.

6. Each person or organization, before engaging in business as an independent fire protection system contractor must obtain a certificate of registration from the Texas Department of Insurance (Texas State Fire Marshal's Office). A registered firm may not subcontract with an unregistered firm to allow the unregistered firm as an independent contractor to perform any act of a fire protection system contractor.

7. An individual or organization may not engage in the business of planning, certifying, leasing, selling, installing, servicing, monitoring, or maintaining:

a. Any fire alarm, or fire detection devices, or systems;

b. Portable fire extinguishers;

c. Fixed fire extinguisher systems;

d. Fire protection sprinkler systems, and

e. Any other type of fire protection system; unless the individual or organization holds a registration certificate issued by the Texas Department of Insurance (Texas State Fire Marshal's Office).

8. Medical gas installations shall be performed by a master plumber with state medical gas endorsement.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.7 Bonds required.

It shall be the duty of every contractor, owner, firm, partnership, corporation, and builder who shall make contracts to construct, install, maintain or repair buildings, structures or systems for which a permit is required, and every contractor, owner, or builder making such contracts and subletting the same, or any part thereof, to have on file with the city, a bond in the sum of fifty thousand dollars executed in a form prescribed and approved by the city attorney. This section shall apply to plumbing, mechanical, electrical, irrigation and fire contractors acting as general contractors, whether or not state law requires a bond for their particular discipline.

Exceptions:

1. The following type of work shall require a bond in the sum of ten thousand dollars executed in the form prescribed and approved by the city attorney:

a. Irrigation installations.

b. Site lighting and landscape installations.

c. Temporary structure placement.

d. Mobile placement permits.

e. Temporary sign placements.

f. Tents in excess of two hundred square feet.

g. Fences.

h. Pavement and curb cut excavation.

However, the building official shall have the authority to require a bond in the amount of twenty-five thousand dollars if the subject work exceeds ten thousand dollars in valuation.

2. The following type of work shall not require a bond:

a. Residential property owners doing all the construction work or who will be hiring workers without employing a licensed contractor to perform the construction work on the residence they claim as their homestead.

b. Federal, state, county and city agencies and departments performing building work on their facilities and using only their employees to perform the construction work.

c. Commercial building and facilities owners, agents or lessees requesting permits for change of occupancy permits or minor nonstructural remodeling work which does not affect means of egress, such as non-loadbearing partitions within tenant spaces and whose cost does not exceed five thousand dollars.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.8 Bond requirements.

1. No permit shall be issued under this chapter to any person, firm, or corporation applying for a permit until such applicant has filed with the city, the required bond signed by a surety company authorized to do business in Texas. The city and the person for whom the work is to be done

shall be named as co-obligees under such bond. The bond shall provide that the principal and its agents, employees, and subcontractors shall comply with all provisions of this Code and the technical codes and that the principal shall pay damages which are sustained by the city or by the person for whom the work is done and that are caused by failure of the principal, its agents, employees or subcontractors to comply with the provisions of this Code and the technical codes, and that the principal shall indemnify the city against all claims arising out of such failure to comply. Bonds shall be issued and maintained for the time period from the issuance of the permit through one year after the date of completion of the work for which the bond was required. The surety shall be acceptable to the city as to solvency; and if the city becomes dissatisfied that the surety is solvent, a new bond may be required. In addition, the surety shall be required to notify the city within thirty days of any termination or cancellation of the bond or any claims paid which reduce the liability under the bond.

2. Permit applicants who have provided a bond to the city in the amount required, for a permit pursuant to the requirements of a chapter of the City Code other than this chapter, that meets all of the requirements established in this chapter, shall not be required to obtain an additional bond but are required to provide a copy of such bond, provided that such bond specifically includes coverage for the permit or permits issued pursuant to this chapter. Permittees who have multiple permits issued pursuant to this chapter are required to provide only one current valid bond for all such permits but may be required to provide a copy of the current bond with each application for a permit.

3. Contractors under contract with a government agency shall provide the bond required in this section. No bond is required when all of the work performed pursuant to a permit issued under this chapter to a government agency is performed entirely by the employees of that government agency.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.9 Insurance required.

No contractor, owner, firm, partnership, corporation, or builder bonded or required to be bonded under Section 18.02.104.7 shall apply for a permit until the applicant presents evidence satisfactory to the building official that the applicant meets the minimum insurance requirements stated herein. Homestead permits for new construction is not exempt from obtaining required insurance.

Exceptions: Apartment complexes, hospitals, school districts, retirement communities and other facilities approved by the building official, using only their own employees to perform all of the permitted construction work only on property which they own, subject to the approval of the building official.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.10 Insurance requirements.

The applicant shall procure and shall maintain during the term of the permit such commercial general liability, property damage liability and vehicle liability insurance, naming the permittee and any subcontractor performing work associated with the permit as insured, co-insured or additional insured for claims for damages for personal injury, including accidental death, as well as from claims for property damage that may arise from work associated with the permit.

1. Minimum limits of liability and coverage shall be two hundred fifty thousand dollars for bodily injury liability, including death, for each person, and five hundred thousand dollars in the aggregate, and one hundred thousand dollars for property damage for each occurrence, and one hundred thousand dollars in the aggregate. Permit applicants that are governmental entities may comply with the insurance requirements of this section by providing certification that they are self-insured.

2. Such insurance shall be written by an accredited insurance company under the supervision of the board of insurance commissioners of the State of Texas. Evidence of compliance with these insurance requirements shall be considered

as having been met when copy of the insurance policy or a certificate of insurance has been filed with and approved by the building official. Such policy shall include an endorsement that the city is named as an additional insured to the full amount of the policy limits and that building official shall be notified at least thirty days in advance in the event the policy or policies are canceled and ten days in advance for cancelation due to non-payment of policy premiums. The certificate of insurance shall recite or attach such endorsement for additional insured and the notice requirements. The permittee shall maintain said insurance with a solvent insurance company authorized to do business in Texas. The policy shall provide that the insurer will defend against all claims and lawsuits which arise and will pay any final judgment of a court of competent jurisdiction against the city, its officers, agents, servants or employees and permittee, his officers, agents, servants or employees. Failure to keep the policy in full force and effect throughout the term of the permit shall be grounds for cancellation of the permit.

3. Permit applicants who have provided certificates of insurance to the city pursuant to the requirements of a chapter of the City Code other than this chapter, that meet all of the requirements established in this chapter, shall not be required to obtain additional insurance but are required to provide such certificates of insurance showing present coverage as required in this chapter.

4. Governmental agencies: Permits shall be required in connection with all city (including but not limited to El Paso Public Service Board/El Paso Water Utilities), county, state, or federal public works projects provided that no initial permit fee shall be required for such projects. When work is performed by the employees of a governmental agency, the insurance requirements of this section may be met by providing certification that the governmental agency obtaining the permit is self-insured. Work performed by those contracting with a governmental agency shall provide the insurance required herein. Permits issued for homeowner/homesteads need to provide insurance for new construction only.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.104.11 Identification of vehicles.

Every person engaging in business for which a license is required under Section 18.02.108.4 shall mark all vehicles used in the conduct of such business, with the name under which such business is conducted and the license number. The same name and number shall be used for all vehicles of such person or entity. The markings shall be as follows:

1. Permanent signs only (not magnetic or removable).

2. Letters and numbers at least two inches high.

3. A color of sufficient contrast to the vehicle color so as to be plainly legible.

4. Marked on both sides of vehicle.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105 PERMITS

18.02.105.1 Permit application.

Any owner, authorized agent or contractor who desires to construct, enlarge, alter, repair, move, demolish or change the occupancy of a building or structure, or to erect or construct a sign, or to erect, install, enlarge, alter, repair, remove, convert or replace any electrical, gas, mechanical, plumbing or fire protection systems, or board and secure a vacant premises, where the work is regulated by the technical codes or the fire code, or to cause any such work to be done, shall first make application to the building official and obtain the required permit for the work. No permit required under this Code or the technical codes shall be issued until the proper application, on a form approved by the building official, accompanied by all required documents, has been filed with the department and the established fee has been paid.

Exception:

1. The County of El Paso, the State of Texas, and the United States Government and other governmental entities that are, as a matter of law, are exempt from having to obtain a permit, provided, that only such construction as is owned, operated and maintained by such governmental agencies.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.3 Master permits.

For all new construction, a master permit must be obtained/issued prior to the issuance of any separate subcontractor permits for any electrical, mechanical, plumbing, fire and/or irrigation permits.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.4 Separate subcontractor permits.

Separate subcontractor permits are required for building, gas, plumbing, mechanical, electrical, irrigation, and fire protection work.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.5 Permits required for every building.

Permits shall be required for every building, structure, or service system. This includes every separate building or structure regardless of the number of buildings or structures located on the same site or lot and regardless of the ownership of such buildings, structures or service systems. For projects where there are multiple buildings of similar nature on a single parcel, such as apartment complexes or storage units, the master building permit fee shall be calculated as if the project were a single building.

Exceptions:

For one- or two-family dwellings; fences may be permitted under the same permit as the principal building or structure provided such fences are located on the same site or lot and are under the same ownership as the principal building or structure.

1. All portions of the same building, structure or service system created by dividing one building, structure, or service system by fire walls shall be permitted under the same permit provided all such portions thus created are located on the same site or lot and are under the same ownership, and are intended for construction under the same schedules.

2. The building official may allow construction of minor, related work of the same type under one permit for more than one building, structure, or service system when located on the same site or lot and under the same ownership.

3. In the case of city annual permits, the building official may allow for the use of a single permit to be issued to a city department that will apply to all buildings, structures, or service systems under their control that are owned or operated by the City of El Paso.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.6 Information required.

Each application for a permit, with the required established fee, shall be filed with the building official on a form furnished for that purpose, and shall contain a general description of the proposed work and its location. The application shall be signed by the owner or his authorized agent. The building permit application shall indicate the proposed occupancy of all parts of the building and of that portion of the site or lot, if any, not covered by the building or structure, and shall contain such other information as may be required by the building official.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.7 Drawings and specifications.

Drawings, specifications, engineering calculations, diagrams, soil investigation reports, special inspection and structural observation programs, and other data as required by the building official, shall be submitted in a digital form compatible with the city's system, with each application for permit. Paper submittals of full plan sets for new construction shall be assessed the established fee for conversion of paper documents to digital format. The construction documents shall be prepared, signed and sealed by a registered design

professional where required by state law and this Code. Where special conditions exist, the building official is authorized to require additional construction documents to be prepared by a registered design professional. At any time prior to issuance of a master building permit, all construction documents submitted to the department may be expedited to reduce the review time. Such requests must be submitted in writing to the building official.

Exception: The building official is authorized to waive the submission of construction documents and other data not required to be prepared by a registered design professional if it is found that the nature of the work applied for is such that review of construction documents is not necessary to obtain compliance with this Code.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.8 Additional data.

A. The building official may require details, computations, stress diagrams, and other data necessary to describe the construction or installation and the basis of calculations. All drawings, specifications and accompanying data required by the building official to be prepared by an architect or engineer shall be affixed with their signature and official seal.

B. Title sheet. Construction documents shall contain a title sheet(s) indicating the name, address, and phone numbers of project owner(s), design professionals, and contractors (if known). The title sheet shall also contain information regarding the Code review as performed by the design professional, including the size of the building, type of construction, and type(s) of occupancy, building area, and height modifications (if any), fire sprinklers (if any), deferred items (if any), and other information as directed by the building official.

C. A pre-submission conference will be required for projects receiving city assistance. Applicants with projects receiving funds of any kind or tax incentives will be required to attend a pre-submission conference with appropriate project staff to explain proposed development and receive instruction/requirements to expedite the review and permitting of their projects. The conference will be scheduled and conducted in advance of any plan submittals to the city.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.9 Design professional.

The architect or engineer who prepares construction documents shall have full responsibility for complying with Texas Occupations Code Ch. 1001 (Engineers) or Ch. 1051 (Architects), as applicable, and shall affix his official seal to said drawings, specifications and accompanying data for the following:

1. For new construction, additions, expansions or for changes in occupancy or use of:

A. All group A, B, E, F, H, I, and M occupancies;

B. Buildings and structures three stories or more high;

C. All buildings and structures, five thousand square feet or more in area, excluding group R-3 occupancies.

2. For tenant improvements, alterations, repair, or rehabilitation, including changes of occupancy, of:

A. All group A, E, F, H, and I, occupancies where the affected area exceeds one thousand square feet or the proposed work involves or affects structural elements, fire-resistive elements or fire exits;

B. All group B, and M occupancies where the affected area exceeds three thousand square feet meeting the requirements for a single exit and not exceeding more than 29 occupants, or the proposed work involves or affects structural elements, fire-resistive elements or fire exits;

C. All other buildings and structures three stories or more high.

For all other buildings and structures, the submittal shall bear the certification of the applicant that some specific state law exception permits its preparation by a person not so registered.

Every application for a permit to do electrical work on residential premises over five thousand square feet in living area shall be accompanied by drawings and electrical load calculations. Such drawings and electrical load calculations shall be signed by a master electrician, unless they bear the signature and seal of an electrical engineer.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.10 Application submission.

Plumbing, electrical, mechanical and special building (including roofing) permit applications which are not required to be accompanied by plans shall be submitted and paid for in the department.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.11 Examination of documents/plan review.

The building official shall examine or cause to be examined each application for a permit and the accompanying documents, consisting of drawings, specifications, computations and additional data, and shall ascertain by such examinations whether the construction indicated and described is in accordance with the requirements of the technical codes and all other pertinent laws or ordinances.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.12 Issuing permits.

The building official shall act upon an application for a permit without unreasonable or unnecessary delay. If the building official is satisfied that the work described in an application for a permit and the contract documents filed therewith conform to the requirements of the technical codes and other pertinent laws and ordinances, and all required established fees have been paid, he shall issue a permit to the applicant.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.13 "One call" system notification.

When a permit is requested by an applicant under this Code, and excavation or digging is involved, the building official shall require that a "one call" service be contacted by the permit applicant. The applicant shall be responsible for making the "one call" and no duty is expressed or implied on the part of the city to verify that such "one call" has been made by the applicant. However, the building official shall require confirmation, in a manner which he believes to be appropriate, that such a "one call" has been made by the applicant. A permit shall be denied for failure to contact a "one call" service or provide confirmation that such "one call" service has been contacted by the applicant when the building official requires that a "one call" service be contacted.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.14 Application referral to city departments for approval—Permits not issued for work in violation of ordinances.

A. Application for permit for the construction, alteration or repair of buildings or structures shall be subject to the requirements of all applicable ordinances, laws and regulations, including but not limited to, the requirements for acceptance of subdivision improvements, as well as drainage approval where a subdivision plat is not required. Applications involving more than one acre of land shall require stormwater pollution prevention (SWPP) permit. Applications for properties located in the floodplain shall also be subject to FEMA regulations. The city manager or designee shall promptly approve, disapprove or conditionally approve the application as to its compliance with all applicable ordinances, laws and regulations; and no permit shall be issued until the application is so approved.

B. A permit shall not be issued for any work which would involve a violation of the zoning ordinance or any other law or ordinance, and any permit so issued shall be void.

C. The approval, disapproval or conditional approval of a permit required by this Code shall be based on the orders, regulations, ordinances or other duly adopted requirements in effect at the

time the application for the permit is filed. When a series of permits is required for the development of a project, the applicant, by providing verification of the orders, regulations, ordinances or other duly adopted requirements in effect at the time the original application was filed for the first permit in that series, shall be entitled to develop that project based on those orders, regulations, ordinances or other duly adopted requirements.

D. No permit shall be issued until all required and/or applicable impact fees have been paid and any permit so issued shall be void.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.15 Prerequisite to issuance of permits.

A. Unconditional permits. An unconditional master building permit shall be issued for a lot within a subdivision, or a lot within an approved phase of a subdivision when the subdivision plat required by Title 19 (Subdivisions) of this Code has been recorded and the subdivision improvements required by the subdivision plat or accompanying subdivision improvement plans, have been constructed, completed, and if the improvements are public improvements, accepted for maintenance by the city.

B. Conditional permits. If the subdivision improvements required under Title 19 (Subdivisions), have not been constructed, completed, and if the improvements are public improvements, accepted by the city for maintenance, then the building official may issue conditional master building permits for lots within the subdivision or lots within an approved phase of the subdivision provided the following requirements are complied with:

1. The developer provides financial security in accordance with Section 19.08.040 of the City Code for completion of the subdivision improvements; and

2. Fully charged fire hydrants are installed within the subdivision or the approved phase of the subdivision; and

3. Drivable surface, acceptable to the fire code official and the building official in accordance with applicable ordinances, has been constructed within the subdivision or the approved phase of the subdivision.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.16 Authorization to proceed with construction.

The building official may issue to a contractor duly registered with the department an authorization to proceed with construction without a master building permit subject to the following conditions:

1. Application for the master building permit has been submitted to the building official, and

2. All required drawings for all aspects of the work have been submitted to the building official for review; and,

3. After, the first review cycle and no conflicts or violations with Title 19 and 20 of the City Code are determined; and,

4. Either the owner or lessee of the building or structure, as applicant, has in the form and manner required by the building official, provided a statement that the applicant understands and agrees that the project is proceeding at the applicant's sole risk and that all requirements of this Code necessary to obtain the master building permit have been accomplished.

The work commenced under an authorization to proceed with construction shall not progress beyond the first required inspection for any type of permit sought until the permit is issued. No inspection shall be granted until the permit is issued, unless authorized by the building official.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.17 Affidavits.

The building official may accept a sworn affidavit from a registered architect or engineer stating that the plans submitted conform to the technical codes. For buildings and structures the affidavit shall state that the plans conform to the laws as to egress, type of construction and general arrangement and if accompanied by drawings showing the structural design, a statement that the

plans and design conform to the requirements of the technical codes as to strength, stresses, strains, loads and stability. The building official may without any examination or inspection accept such affidavit, provided the architect or engineer who made such affidavit agrees to submit copies of inspection reports as inspections are performed and upon completion of the structure, electrical, gas, mechanical or plumbing systems a certification that the structure, electrical, gas, mechanical or plumbing system has been erected in accordance with the requirements of the technical codes. When, under this section, the building official relies upon such affidavit, the architect or engineer shall agree, as provided in the affidavit required in this section, to accept full responsibility for the compliance of the design documents with all provisions of the technical codes and other pertinent laws or ordinances.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.18 Permit issued on basis of an affidavit.

Whenever a permit is issued in reliance upon an affidavit submitted under Section 18.02.105.17, or whenever the work to be covered by a permit involves installation under conditions which, in the opinion of the building official, are hazardous or complex, the building official shall require that the architect or engineer who signed the affidavit or prepared the drawings or computations be responsible for conformity with the permit, and upon completion make and file with the building official written affidavit that the work has been done in conformity with the reviewed plans and with the provisions of the technical codes. In the event such architect or engineer is not available, the owner shall employ in his stead another architect or engineer licensed by the State of Texas.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.19 Plans.

When the building official issues a permit, he shall endorse in writing or by stamp, both sets of plans "THESE PLANS HAVE BEEN REVIEWED FOR GENERAL CONFORMITY WITH ALL PERTINENT CODES AND ORDINANCES." One set of drawings so reviewed shall be retained by the building official and the other set shall be returned to the applicant. The permitted drawings shall be kept at the site of work and shall be open to inspection by the building official or his authorized representative. The printing of approved electronic plan sets for use by the contractor shall be the responsibility of the permit applicant.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.20 Conditions of permits.

A permit issued shall be construed as authority to proceed with the work and not as authority to violate, cancel, alter, or set aside any of the provisions of the technical codes, nor shall issuance of a permit prevent the building official from thereafter requiring a correction of errors in plans, construction, or violations of this Code or the technical codes.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.20.1 Construction work hours.

A permit issued shall be construed as authority to proceed with the work from Monday through Saturday from 6:00 a.m. to 10:00 p.m. (the "established construction hours"). No work, including but not limited to new construction, repair, remodeling or grading of any kind shall be conducted outside the established construction hours or on legal holidays or Sundays unless the property owner or his authorized agent has paid the established fee and obtained an after-hours construction/grading permit.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.20.2 After hours construction/grading permit.

An application for after hours construction permit shall be granted by the permit official upon a showing of urgent necessity, or upon a showing that the public interest will be served by issuance

of the permit, or upon a showing that the public peace and quiet will not be reasonably disturbed, provided the following requirements are met:

A. The application shall provide a written rationale detailing the reason for the request.

B. The application shall be filed seven days prior to the start date for after hours construction.

C. The permit holder shall agree to provide a completed notification form as provided by the permit official to persons occupying property within three hundred feet of the construction site.

D. Notification shall also be posted on the construction site and shall indicate a contact name and phone number of the property owner or his authorized agent.

E. The permit official shall have the authority to revoke the permit if reasonable accommodations are not made to minimize neighborhood or resident disruption.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.20.3 Emergency condition.

Certain events or circumstances may occur or arise that require a property owner or his authorized agent to take immediate action outside the established construction hours to address imminent public safety concerns, or to protect the integrity of a construction site. Under such or similar exigencies, the property owner or his authorized agent may use commercially reasonable efforts to immediately address the emergency or protect the construction site and shall notify the permit official, pay the established fee and obtain an after hours construction permit as soon as reasonably practicable thereafter.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.20.4 Duration of permit.

An approved after-hours construction/grading permit shall be valid for the duration of time specified on the application, not to exceed one year. A permit holder may request one permit renewal upon payment of the established fee.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.21 Nontransferable.

Permits issued under this chapter shall be personal to the permittee, and shall not be assigned or transferred to any other person, firm, builder, owner or contractor. A registered contractor may not obtain a permit on behalf of an unregistered contractor.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.22 Placement of permit.

The permit holder, prior to starting construction and until the final inspection of the work, shall post the permit, in a conspicuous place at the address where the permit work is authorized. In addition, the permit holder shall post a sign indicating the street address and suite number, if any, of sufficient size to be readable from the construction site access entry.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.23 Duration of permits.

1. Every permit issued shall automatically expire and become null and void under any of the following circumstances:

a. The work authorized by such permit is not commenced within six months from the issuance date of the permit;

b. The work authorized by such permit is suspended or abandoned for a period of six months after the time the work is commenced;

c. The permit applicant fails to call for and receive an inspection for any period of six months.

d. Residential roofing, window replacement, water heater replacement and a/c conversion permits shall expire within one month from the issuance date of the permit. No extensions or completion permit shall be issued for these permit types.

e. Residential fence and swimming pool permits shall expire within six months from the issuance date of the permit. No extensions or completion permits shall be issued for these permit types.

2. A permittee holding an unexpired permit may apply for a maximum of two extensions of time for periods of not more than one hundred eighty days each; provided that the request for

extension is made in writing prior to the expiration of the current permit, and justifiable cause is demonstrated. Such extension authorizations shall be made in writing by the building official. There shall be no fee for the extension of an unexpired permit.

3. A completion permit may be obtained for an expired master building or associated permit(s) within one year of the date of expiration of the original master building or associated permit(s) provided, there have been no modifications to the existing plans, there is no need for additional plan review and the existing plans still comply with current codes. The cost of the completion permit shall be as prescribe by the adopted FY Schedule C in effect on the date of permit application. An expired subcontractor permit may only be renewed in conjunction with the renewal of an expired master building permit.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.24 Refusal to issue permit.

If the application for a permit and the accompanying contract documents describing the work do not conform to the requirements of the technical codes or other pertinent laws or ordinances, or the required established fees have not been paid, the building official shall not issue a permit, but shall return the contract documents to the applicant with his refusal to issue such permit. Such refusal shall, when requested, be in writing and shall contain the reason for refusal.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.25 Denial/Revocation of permits.

The building official shall deny or revoke permits to any contractor upon any one of the following findings:

A. Denial.

1. The contractor has failed to file the annual registration application required by this section.

2. The contractor has made false statements or misrepresentations in the annual registration application required by this section.

3. The contractor has any outstanding fees or penalties due in connection with the permit application.

4. The permit official shall have the authority to deny permits if a contractor has five or more expired permits at any given time.

B. Revocation.

1. The contractor was a holder of previous permits that have been revoked for any of the following grounds:

a. For failure to complete the work described in the permit.

b. For making false statements or misrepresentations as to material facts in the permit application.

c. Work was done in violation of or not in conformity with the provisions of this Code or the technical codes.

Exception:

Prior permit cancellations/revocations that were cancelled/revoked at the request of the permit holder and property owner or lessee who is a party to the contract on which the permit is based, and not involving any of the grounds listed herein.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.26 Ineligibility period.

A contractor whose permit privileges have been revoked by the building official as described in Section 18.02.105.25 shall be ineligible to obtain permits for a period of time as follows:

1. If a contractor has had one permit revoked in any twelve-month period, such contractor shall be ineligible to obtain a permit for a period of three months; provided, however, that in the event that the contractor cures the cause for revocation of the permit which was involved in the dispute, such contractor shall immediately become eligible to obtain permits.

2. If a contractor has had two permits revoked in any twelve-month period, such contractor shall be ineligible to obtain a permit for a period of six months.

3. If a contractor has had three permits revoked in any twelve-month period, such contractor shall be ineligible to obtain permits for a period of one year.

4. If a contractor has five or more expired permit, such contractor shall be ineligible to obtain new permits until such time as the number of expired permits is less than five.

Upon finding that a contractor is ineligible to obtain permits, the building official shall provide written notice of such finding to the contractor or to their principal place of business.

Exception:

Permits may be issued to a contractor whose permit privileges have been revoked, for completing work on expired permits
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.27 Appeals.

Any contractor that is declared by the building official to be ineligible to obtain permits pursuant to this section shall have the right to appeal to the construction board of appeals pursuant to the provisions of Chapter 2.30.
(Ord. No. 019528, § 1, 8-1-2023; Ord. No. 019762, § 1, 7-22-2025)

18.02.105.28 Cancelation/termination of permit.

1. A permit may be canceled by the permit holder at any time prior to the commencement of any work.

2. Subsequent to performance of any work, a permit may be canceled or terminated by the general contractor, permit holder or property owner with the concurrence of all parties involved.

3. Absent any concurrence from the parties involved, the permit shall remain on hold until its expiration period or good cause is shown to the building official that allows the permit to be cancelled.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.29 MISCELLANEOUS PERMIT PROVISIONS

18.02.105.29.1 Homeowner/homestead permits.

Permits shall be issued to a homeowner doing work on their intended primary residence only if all of the following conditions apply:

1. The permit is for an R-3 occupancy that is the homeowner's own primary residence which he currently occupies;

2. The homeowner will act as his own general contractor;

3. The homeowner will perform some or all of the proposed building construction work (as permitted under this Code);

4. The homeowner provides proof that all electrical, plumbing, mechanical or irrigation work shall be performed by contractors registered with the department;

5. Permits for trades will only be issued to contractors licensed by the state and registered with the city.

6. Insurance requirements for new single-family dwellings shall be as per Section 18.02.104.10.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.29.2 Homeowner permits.

With the exception of homestead permits as defined in Section 18.02.105.29.1. No permit shall be issued to the owner of any building, structure or occupancy, except R-3 occupancies.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.29.3 Mobile homes/manufactured housing placement permit.

The building official may issue a placement permit for manufactured homes, mobile homes or HUD-Code manufactured homes provided that all of the following conditions are met:

1. The building is erected on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation.

2. The building meets the regulations of the Title 24, CFR Section 3280.

3. The building is placed in an area whose zoning permits the placement of mobile homes and the building is installed in accordance with the manufacturer's requirements, in accordance with the rules promulgated by Title 24, CFR Section 3280 Housing and Urban Development (HUD) Code of Federal Regulations and all of the technical codes and zoning codes of the city are met.

4. Placement of any mobile home constructed prior to 1976 is not allowed within the City of El Paso unless any such mobile home is in compliance with Section 3 above.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.29.4 Texas Industrialized Buildings/Housing Placement Permit.

The building official may issue a placement permit for structures built at a location other than the permanent commercial site and transported to the permanent site for erection and installation provided that all of the following conditions are met:

1. The building meets all the requirements of the Texas Industrialized Housing and Building Act, Texas Occupations Code Ch. 1202 and is classified as "industrialized building" and bears an approved decal or insignia under the rules of the Texas Department of Licensing and Regulation reflecting that the building has been inspected at the manufacturing plant or facility by the Texas Department of Licensing and Regulation.

2. Two complete sets or an electronic copy of the designs, plans and specifications bearing the stamp of Texas Industrialized Building Code Council are submitted to the department for review.

3. The building is placed on a site-built permanent foundation system designed by a professional engineer.

4. The building was not designed or intended to be used other than on a site-built permanent foundation.

5. All of the requirements of this Code, the International Fire Code, the Texas Accessibility Standards, the technical codes, the municipal code and other city, state and federal regulations are met.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.29.4.1 Temporary Placement Texas Industrialized Buildings for School Sites.

A. The building official may issue a temporary placement permit for structures built at a location other than the permanent commercial site and transported to the permanent site for installation provided that all of the following conditions are met:

1. The building meets all the requirements of the Texas Industrialized Housing and Building Act, Texas Occupations Code Ch. 1202 and is classified as "Industrialized Building" and bears an approved decal or insignia under the rules of the Texas Department of Licensing and Regulation reflecting that the building has been inspected at the manufacturing plant or facility by the Texas Department of Licensing and Regulation.

2. Two complete sets or an electronic copy of the site plan showing the location were the building will be placed, designs, plans and specifications bearing the stamp of Texas Industrialized Building Code Council are submitted to the department for review.

3. The building is securely anchored to an on-site-built foundation system designed by a professional engineer.

4. The building was not designed or intended to be used other than on a site-built permanent foundation.

5. All of the requirements of this Code, the International Fire Code, the Texas Accessibility Standards, the technical codes, the municipal code and other city, state and federal regulations.

B. Duration:

1. An approved temporary placement permit for school sites shall be valid for two years from the date the permit is issued.

2. Upon expiration of the placement permit the structure will be removed or;

3. A new permit application for permanent placement shall be submitted. Such application for permanent placement shall comply with all applicable requirements of this Code, the International Fire Code, the Texas Accessibility Standards, the technical codes, the municipal code and other city, state and federal regulations.

4. Prior to permit issuance an affidavit shall be provided by an authorized representative of the school district acknowledging the duration of permit.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.105.29.5 Temporary gas permit.

A special permit is required when an owner or contractor intends to use fuel gas for temporarily heating a structure or part of a structure before certification of all plumbing or mechanical work. Such permit is required whether the intended use is for all or part of the system of piping, devices and appliances making up the permanent heating system for the structure, or by the use of a temporary system, or by the use of parts of either or both systems.

Such owner or contractor shall make application to the building official on forms provided by the department and shall set out the proposed use of the system, its design and period of use desired.

If the building official finds that such request is reasonable as to design and length of time requested under the conditions existing in the particular case, and that safe conditions of operation of such system can be maintained then the building official shall issue the permit.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106 PERMIT FEES

18.02.106.1 General.

The fees described in this section as well as the fees described in the Fire Prevention Code are applicable to all plumbing, mechanical, electrical, irrigation, and fire contractors.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.2 Prescribed fees.

Fees are established and required in conjunction with all permits and services provided under this title, including this Code and the technical codes, except as may be specifically excepted or provided otherwise. A permit, although issued, shall not be valid until all established fees have been paid for each of the various types of permits and services listed therein. An amendment to a permit shall not be valid until the additional established fee, if any, due to an increase in the estimated cost of the building, structure, electrical, plumbing, and mechanical or gas systems, has been paid.

Exceptions:

1. The City of El Paso, the County of El Paso, the El Paso Housing Authority, the State of Texas, other governmental entities that are, as a matter of law, exempt from having to pay permit fees, utility companies and other entities whose permit fees have been waived by franchise agreement or resolution of the city council, and the United States Government are exempted from the payment of the permit fees required in this chapter; provided, that only such construction as is owned, operated and maintained by such governmental agencies shall be exempted from payment of such permit fees. Also, provided that the city council may authorize the building official to waive the permit fees required in this chapter when the project for which the permit is issued is a city project. For the purpose of this subsection, a "city project" shall be a project that the city council finds to be for the benefit of the general public, and that is to be either constructed on property owned by the city or with funds provided in whole or part by the city.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.3 Accounting.

The city shall keep an accurate accounting of all permit fees and other moneys collected, the names of all persons upon whose account the

same was paid, along with the date and amount thereof, in accordance with the established records retention schedule.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.4 Schedule of permit fees.

On all buildings, structures, electrical, plumbing, mechanical and gas systems or alterations requiring a permit, the established fee for each permit shall be paid at the time application is filed.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.5 Building permit valuations (excluding new residential and residential additions.

If, in the opinion of the building official, the valuation of building, alteration, structure, electrical, gas, mechanical or plumbing systems appears to be underestimated on the application, permit shall be denied, unless the applicant provides a certified professional appraisal to meet the approval of the building official. The certified appraisal shall include total cost, such as required earthwork within the building area, electrical, gas, mechanical, plumbing, including materials, labor and equipment, and all other permanent equipment.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.6 Valuation for commercial master permits.

Permit valuation for the master permit for new commercial buildings and structures construction work shall be based on the International Code Council rates for building type and occupancy in effect on the date of the permit application. Subsequent to the completion of work, a certified professional appraisal may be submitted to the building official for a re-valuation.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.6.1 Permit fee for new residential or residential addition permits.

Permit fees for the master permit for new residential or residential additions buildings and structures construction work shall be based on the square footage cost prescribed by the FY Schedule C in effect on the date of the permit application. Permit fees for new residential buildings may be adjusted per council action.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.7 Valuation for shell only permits.

Permit valuation for new commercial shell only buildings and structures construction work shall be based eighty percent of the value obtained from the International Code Council rates for building type and occupancy in effect on the date of the permit application.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.7.1 Valuation for shell II only permits.

Permits for shell II permits shall be based on the International Code Council rates for building type and occupancy in effect on the date of the permit application.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.8 Valuation for tenant improvement permits to shell buildings.

Permit valuation for tenant improvements to commercial shell only buildings and structures construction work shall be based on twenty percent of the value obtained from the International Code Council rates for building type and occupancy in effect on the date of permit application.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.9 Valuation for foundation only permits.

Permit valuation for foundation only work on commercial buildings shall be based on ten percent of the value obtained from the International Code Council rates for building type and occupancy in effect on the date of the permit application. This work shall be authorized separately and the fee shall be in addition to the overall permit fee.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.9.1 Valuation for groups F (factory), S (storage), and U (utility occupancies), as defined by the IBC.

Permit valuation for commercial buildings of, Groups F (Factory), S (Storage), and U (Utility) occupancies, shall be based on seventy percent of the value obtained from the International Code Council rates for building type and occupancy in effect on the date of the permit application.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.10 Fee refunds.

A portion of the fee paid for building, electrical, plumbing, or mechanical permits may be returned to the permit applicant; provided, that no work authorized under the permit has been started, and the permit and associated records are returned for cancellation within six months after the date of issuance. In each case, thirty percent of the established permit fee shall be retained by the department for plan review, in addition to any costs expended by the department for the issuance and maintenance of records, inspections to verify that no work was started, and costs of processing and preparing the refund.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.11 Submission, plan review and additional review fees.

Each application for master or separate subcontractor permit shall be subject to a permit fee. The total permit fee includes fees for plan review and required inspections and may also include an established fee for plan submission. All fees shall be collected at the time of permit issuance.

The established plan submission fee shall only be assessed if the plans for a particular project require more than three reviews. Any assessed plan submission fee shall be collected at the time of permit issuance.

Plans that amend or revise the following, subsequent to the issuance of a permit, shall require an additional plan review and the applicant shall be assessed the established fee for the additional plan review. The established fee shall be equal to the sum of the plan submission fees for each additional review cycle that require review due to:

a. Modifications to the electrical, plumbing or mechanical systems which require revised drawings or calculations;

b. Modifications to the fire, smoke, carbon monoxide alarms or suppression systems which require revised drawings or calculations;

c. Modifications to the fire separations, accessibility requirements or ingress/egress which require revised drawings or calculations;

d. Modification to the structural systems which require revised drawings or calculations; or

e. Modifications which expand the occupancy or type of use for the structure which require revised drawings or calculations.

If no permit under the plan is secured within one hundred eighty days after the date of permit application, then the application shall be considered expired and a plan review fee in the amount of thirty percent of the established permit fee and any applicable submission fee is due and payable. The submission fee and plan review fee is nonrefundable and may not be applied to any future building permits.

If plans are approved and a permit is secured within one hundred eighty days after the date of permit application, the permit fee and any applicable plan submission fee are due and payable at the time of permit issuance.

If at any time subsequent to permit issuance, there is no activity in excess of one hundred eighty days, such application shall be declared expired. Upon expiration, any plans, and all other documents associated with the application for permit shall be destroyed.

The building official shall collect any outstanding fees on the subject property prior to the issuance of any permits.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.12 Plan review options available to the applicant.

The following optional preliminary plan review processes are available to all applicants. To

take advantage of one of the optional plan reviews mentioned below an applicant shall pay the fee established by city council in the annual budget resolution for the requested preliminary plan review prior to application for a master building permit.

1. Expedited review 1: The fee as prescribed in the annual budget resolution, shall apply to all construction/building permits with a valuation equal to or greater than three hundred thousand dollars, excluding one- and two-family dwellings.

2. Expedited review 2: The fee as prescribed in the annual budget resolution, shall apply to all construction/building permits with a valuation less than three hundred thousand dollars, including one- and two-family dwellings regardless of valuation.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.13 Building permit fees: Mechanical, Electrical, Plumbing, Gas, Irrigation, Solar, permit fees.

A person obtaining a permit shall pay the established fee.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.14 Mechanical permit fees.

For all mechanical construction work requiring a mechanical permit, the established fee for each mechanical permit shall be paid at the time the permit is issued.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.15 Electrical permit fees.

For all electrical construction work requiring an electrical permit, the established fee for each electrical permit shall be paid at the time the permit is issued.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.16 Plumbing permit fees.

For all plumbing construction work requiring a plumbing permit, the established fee for each plumbing permit shall be paid at the time the permit is issued.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.17 Gas permit fees.

For all gas construction work requiring a gas permit, the established fee for each gas permit shall be paid at the time the permit is issued.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.18 Temporary gas permit fee.

A nonrefundable established permit fee is required for each month or portion of a month for which such permit is requested and shall be paid when the application is filed. This shall be separate from and in addition to fees required under Section [18.02.106.17] 18.02.109.6.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.19 Irrigation permit fees.

For all irrigation work requiring a permit, the established fee for each irrigation permit shall be paid at the time the permit is issued.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.20 Moving of buildings or structures.

A person obtaining a permit for the moving of buildings or structures shall pay the established fee.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.21 Demolition of building or structure.

A person obtaining a permit for the demolition of any building or structure or of any portion of a building or structure shall pay the established fee.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.22 Temporary structures.

A person obtaining a permit for temporary structures (construction sheds, seat canopies, tents, etc.), shall pay the established fee as applicable:

A. For tents to be used for assembly or display or storage.

B. For amusement devices (rides) available to the public, at any one location.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.23 Sidewalk, street, alley, public right-of-way, and parking meter space, rental.

A. Each application for permit shall pay an additional established fee for use of any sidewalk, street, alley, public right-of-way, or any space the occupancy of which prevents the use of one or more parking meters.

B. Such fee shall not apply to permits issued pursuant to Chapter 13.08 (Excavations) or Chapter 18.44 (Grading).

C. If the use of the space is not discontinued at the expiration of the time for which payment has been made, the permit may be extended from time to time upon payment of further fees computed as if the extension were an original issuance. If the use of the parking meter space is discontinued before expiration of the time covered by the advance payment, and notice thereof given the building official so that he may ascertain whether such use is actually discontinued, the holder of the permit shall be entitled to a refund of the unearned portion of the payment meter space, but not to a refund of any other fees paid under this section.

D. The permits and fees herein required for use of streets, sidewalks, alleys and parking meter space shall not be required when such use is necessary for the purpose of paving, surfacing, repairing, widening or other improvement of streets, sidewalks or alleys, done by or under contract with the city. The contractor and the person in charge of such work shall, however, as far as possible consistent with the nature of work, stack or arrange all material and equipment in such manner as not to create a hazard to persons using the streets, sidewalks or alleys, and upon completion or abandonment of the work shall clear the occupied areas.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.24 Fees for fire protection systems and appliances.

On all construction work requiring a permit for the installation of fire protection systems and appliances, the established fee for each permit shall be paid at the time the permit is issued.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.25 Fees for temporary or partial certificate of occupancies.

On the original application and for each extension thereof, the established fees for temporary or partial certificate of occupancies shall be paid at the time of each application or request for extension.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.26 Investigation inspection fees.

An investigation permit fee in the established amount shall be charged for any special investigation inspection, which is not a part of a regular permit program to include a pre-inspection, or any special investigation prior or subsequent to commencement of work.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.27 Re-inspection fees.

A re-inspection fee in the established amount shall be additionally charged for any re-inspection required because the work failed to comply with this Code, the technical codes, the Fire Prevention Code, or because the work was not ready for the inspection as requested.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.28 Starting work without a permit—Commercial.

Any person who commences any work on a commercial building, structure, electrical gas, mechanical or plumbing system before obtaining the necessary permits or written authorization from the building official shall be required to obtain a permit at three hundred percent of the established permit fee. The payment of such permit fee shall

not relieve such person from concurrent or later prosecution for violation of this Code or the technical codes.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.29 Contractor starting work without a permit—Residential.

Any contractor who commences any work on a residential building, structure, electrical, gas, mechanical or plumbing system before obtaining the necessary permits or written authorization from the building official shall be required to obtain a permit at three hundred percent of the established permit fee. The payment of such permit fee shall not relieve such person from concurrent or later prosecution for violation of this Code or the technical codes.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.106.30 Homeowner starting work without a permit—Residential.

Any homeowner who commences any work on his own residential building, structure, electrical, gas, mechanical or plumbing system before obtaining the necessary permits or written authorization from the building official shall be required to obtain a permit at two hundred percent of the established permit fee. The payment of such permit fee shall not relieve such person from concurrent or later prosecution for violation of this Code or the technical codes.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107 INSPECTIONS

18.02.107.1 Inspections.

The building official, upon notification from the permit holder or his agent shall make the following inspections and such other inspections as necessary, and shall either release that portion of the construction or shall notify the permit holder or his agent of any violations which must be corrected in order to comply with the technical codes.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.2 Existing building inspections.

Before issuing a permit the building official may examine or cause to be examined any building, electrical, gas, mechanical or plumbing systems for which an application has been received for a permit to enlarge, alter, repair, move, demolish, install or change the occupancy. He shall inspect all buildings, structures, electrical, gas, mechanical and plumbing systems, from time to time, during and upon completion of the work for which a permit was issued. He shall make a record of every such examination and inspection and of all violations of the technical codes.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.3 Retaining walls.

1. Foundation inspection: To be made after trenches are excavated, forms erected, and reinforcing steel is in place.

2. In-progress inspection: Walls retaining over four feet of earth shall also be subject to an in-progress inspection as well as material testing, to be performed when the wall is approximately twenty-five percent to fifty percent complete. Walls retaining less than four feet of earth do not require in-progress inspections.

3. Final inspection: To be made after the retaining wall is completed.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.4 Reroofing.

Final inspection: To be made after the reroofing or recovering work has been completed.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.5 Signs.

1. Foundation inspection: To be made after piers are drilled or after trenches are excavated and forms erected.

2. Electrical sign inspections: To be made after the wiring and equipment is installed. This inspection shall be made at the place of business of the electrical permit holder or of the sign permit holder, except that the building official may approve on-site inspection.

3. Final inspection: To be made after the sign installation is completed and ready for use.

4. Sign inspections. Sign foundations, piers and trenches shall be inspected for freestanding signs greater than eight feet in height or two hundred square feet in facial area.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.6 Irrigation and landscaping systems.

1. Irrigation system inspection. Piping, wiring, controllers and backflow prevention devices required under Chapter 18.47 (Irrigation systems) shall be inspected prior to final occupancy.

2. Landscape inspection. Trees, plant materials, hard surface materials, etc. required under Chapter 18.46 (Landscape) shall be inspected prior to final occupancy.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.7 Plaster fire protection.

In all buildings where plaster is used for fire protection purposes, the permit holder or his agent shall notify the building official. Plaster shall not be applied until the release from the building official has been received.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.8 Reinforcing steel and structural frames.

Reinforcing steel or structural framework of any part of any building or structure shall not be covered or concealed without first obtaining a release from the building official.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.9 Inspection of annexed installations.

When an area is annexed to the city, the existing buildings therein may be inspected as set forth in Section 18.02.107.2.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.10 Non-business hour inspections and inspections by appointment.

Non-business hour inspections and inspections by appointment. Inspections may be made upon payment of the established fee. Inspections requested for weekends, city-observed holidays, or other times outside regular business hours of the department shall be subject to prior approval of the building official. A minimum of two hours shall be charged for non-business hour inspection requests and inspections by appointment, which shall be paid before the inspection will be scheduled.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.11 Requirements for prefabricated buildings.

Building, plumbing, mechanical, fuel gas and electrical installations, structural systems, piping and wiring in prefabricated buildings or buildings which are moved into the city limits shall be made to conform to the requirements of this Code and the technical codes for new work; provided, however, that this provision shall not apply to any structure which complies with the standards and requirements of the Texas Department of Licensing and Regulations for Manufactured Housing or Industrial Housing and Buildings.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.12 Manufacturers and fabricators.

When deemed necessary by the building official, he shall make, or cause to be made; an inspection of materials or assemblies at the point of manufacture or fabrication. A record shall be made of every such examination and inspection and of all violations of the technical codes.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.13 Reserved.

18.02.107.14 Special inspection and test program.

Special inspection is the monitoring of materials, installation, fabrication, erection and placement of components and connections that require special expertise that are critical to the integrity of the building structure. Special inspections are required to ensure compliance with the approved

construction documents (plans) and standards referenced in the applicable codes. Special inspectors and special inspection agencies shall have the proper certifications to conduct the special inspections detailed in the currently adopted International Building Code edition.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.14.1 Special inspections and tests requirements.

Special inspections by certified special inspectors shall be required for the following:

1. Inspection of fabricators—Where fabrication of structural load bearing members and assemblies is being performed.

2. Steel construction—Steel elements of buildings and structures requiring special inspection as required in the currently adopted International Building Code edition.

3. Concrete construction—Verification for concrete construction as identified in the currently adopted International Building Code edition.

4. Masonry construction—Verification for masonry construction as required in the currently adopted International Building Code edition.

5. Wood construction—Fabrication of wood structural elements and assemblies both prefabricated and field assembled as required in the currently adopted International Building Code edition.

6. Soils—Existing conditions and verification of site preparation prior to placement of prepared fill as required in the currently adopted International Building Code edition.

7. Deep driven, cast-in-place and helical pile foundations—Inspection and installation and testing of pile foundations as required in the currently adopted International Building Code edition.

8. Pier foundations—Inspection, installation and testing of pier foundations as required in the currently adopted International Building Code edition.

9. Vertical masonry foundation elements—Inspection and verification as required in the currently adopted International Building Code edition.

10. Sprayed fire resistance materials—Inspection of fire resistive materials applied to structural elements as required in the currently adopted International Building Code edition.

11. Mastic and intumescent fire-resistant coatings—Inspections of mastic and intumescent materials as required in the currently adopted International Building Code edition.

12. Exterior insulation and finish systems (EIFS)—As identified in Section 1704.14 of the 2009 edition IBC.

13. Special cases—Inspections needed in the opinion of the building official because of use of alternate materials, unusual design or use of materials as required in the currently adopted International Building Code edition.

14. Smoke control—Inspections involving testing of ductwork prior to concealment as required in the currently adopted International Building Code edition.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.14.2 Special inspectors/agencies.

Special inspectors are required to obtain International Code Council (ICC) certification for the specific discipline they will be inspecting. Organizations that employ special inspectors shall gain accreditation through the International Accreditation Service (IAS), a subsidiary of the ICC.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.15 Third party service providers.

18.02.107.15.1 Purpose and authority.

Third party service providers may conduct plan review and inspection services for the building industry to expedite service delivery for commercial or residential development, which may be provided by different entities or individuals and must be all inclusive as identified in Section 18.02.107.15.3. This section establishes the licensing procedure and requirements for qualification as a third party service provider. Any reference in this section to third party service providers shall apply equally to companies and individuals en-

gaged in such services. This section does not apply to the hiring of such companies by the city to provide services relating to potential litigation or to provide services ancillary to compliance with local, state or federal laws. Such hiring shall be done in consultation with the city attorney and in accordance with the applicable requirements of local, state or federal law.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.15.2 Procedures for third party service providers.

The City of El Paso operates under the currently adopted edition of the International Building Codes published by the International Code Council (ICC). Third party service providers shall be licensed by the city solely on the basis of their qualification and current certification of inspectors and plans examiners by the International Code Council. Licenses shall be required for residential and commercial services. Services provided by third parties shall include all types of plan review and inspections for residential or commercial projects as licensed by the city. City licenses shall be renewed on an annual basis. Special inspections shall be provided in accordance and compliance with the currently adopted edition of the International Building Code.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.15.3 Qualification requirements.

The determination of a potential third party service provider's qualifications shall be based on the criteria set forth below. Third party service providers may also present other information which objectively demonstrates that the potential third party service provider has the capacity to perform plan review and inspections (except special inspections) as required under the provisions of this Code. Third party service providers must submit the following:

1. Third party service provider's history identifying previous experience in conducting residential or commercial plan review and inspection services.

2. Proof of International Code Council certification for each individual who will be performing plan review and/or inspections services as specified below:

a. Residential plan review.

1) Residential plans examiner; and

2) Residential energy inspector/plans examiner; and

3) Accessibility inspector/plans examiner or TAS certification; and

b. Residential inspection.

1) Residential combination inspector; or individual.

2) Building/residential inspector.

3) Plumbing inspector.

4) Electrical inspector.

5) Mechanical inspector.

6) Current State of Texas plumbing inspector license.

c. Commercial plan review.

1) Building plans examiner.

2) Electrical plans examiner.

3) Mechanical plans examiner.

4) Plumbing plans examiner.

5) Commercial energy plans examiner or commercial energy inspector/plans examiner with ASHRAE 90.

6) Accessibility inspector/plans examiner or Texas registered accessibility specialist (TAS).

d. Commercial inspections.

1) Commercial building inspector.

2) Commercial electrical inspector.

3) Commercial mechanical inspector.

4) Commercial plumbing inspector.

5) Fuel gas inspector.

6) Med gas endorsement.

7) Commercial energy inspector or commercial energy inspector/plans examiner with ASHRAE 90.

8) Accessibility inspector/plans examiner or Texas registered accessibility specialist.

9) Current State of Texas plumbing inspector license.

3. Staff resumes including the identification, education, certification, and continuing education completed for each staff member who will be performing third party services.

4. Evidence of commercial liability, property damage liability, vehicle liability and errors and omissions insurance coverage with minimum combined bodily injury (including death), property damage, vehicle, and errors and omissions, limits of not less than one million dollars for each occurrence, and two million dollars annual aggregate. In addition, third party service providers must provide evidence of a bond as required by Section 18.02.04.7 of the El Paso City Code.

5. Any other information in support of the third party service provider's application.

6. Third party plumbing inspection services shall comply with Texas Occupations Code Tit. 18, Ch. 1301, and the Texas State Board of Plumbing Examiners Rules, as applicable and as may be amended. Pursuant to State Plumbing Code Section 1301.255(e), plumbing inspections must be paid directly by the city.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.15.4 Scope of services.

Licensed third party service providers shall be required to provide complete site plan review, plan review, and inspection services for residential and commercial projects as determined by the city. These services must include zoning, grading, and site development review, plan review and inspection of private sector projects for which the building official determines that third party services would be appropriate.

Any agreements entered into between an approved third party service provider and the private sector are private contracts to which the City of El Paso is not a party.

Contractors desiring to use third party service providers for plan review/inspection services shall pay, at the time of permit issuance, the city established fees as set forth in Schedule C, as well as any plumbing inspection fees applicable.

Licenses will be renewed every three years using the same criteria identified in Section 18.02.107.15 and available information from previous audits.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.15.5 Third party service provider audits.

Third party service providers shall be subject to the same quality review as City of El Paso employees performing the same service. An audit of a third party service provider's annual services including inspections and plan reviews may be conducted by the city to assure that inspections of residential and commercial developments were adequately and accurately performed. Third party service providers will be notified in writing of all audit findings with deficiencies.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.15.6 Third party service provider audit process.

The city is authorized to conduct periodic unannounced audits of all services provided under this section. Site as well as plan review and inspection services may be audited. The following shall apply to all third party service providers:

1. Following written notice by the building official of an audit resulting in one or more deficiencies (failure to comply with code requirements), and for each written notice of deficient audit thereafter, the third party service provider shall:

a. Inform the respective builder/contractor of the specific code infraction(s) and the corrections required.

b. Following correction of the deficiencies, the city shall conduct a follow up plan review and/or inspection to assure compliance. The established fee for plan review and/or re-inspection shall be paid.

c. The city shall not be responsible for the cost of any corrections required and/or project delays.

2. Two audits with one or more deficiencies within any one-hundred-eighty-day period shall also result in:

a. A conference with the building official and the third party service provider in an effort to improve the performance of the third party service provider.

b. Prior to performing any further third party services, the third party service provider shall be required to show evidence of process improvements, internal correction procedures, methods, and/or training, and/or staff reassignments as appropriate to prevent recurrence of infraction.

3. Three audits with one or more deficiencies within any one-hundred-eighty-day period shall also result in:

a. Third party service provider being placed on probation for a period of one hundred eighty days.

b. Third party service providers that have been placed on probation more than once in any five-year period shall have their license for third party services terminated and be deemed non-qualified for a two-year period, in reference to subsequent request for qualification solicitations or license renewal or reinstatement.

4. Further audits with one or more deficiencies during the probationary period shall result in:

a. Suspension of third party service provider for a period of one hundred eighty days.

5. A third party service provider suspended pursuant to this section may appeal the building official's decision to the construction board of appeals, pursuant to Chapter 2.30 and Chapter 18.380 of the City Code.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.107.15.7 Third party service provider license fees.

Applicants shall pay at the time of application or renewal a fee as set forth in Schedule C as adopted by the El Paso City Council.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.108 DEMOLITION

18.02.108.1 Demolition of building or structure.

The purpose of this section is to assure greater public safety during demolition activities by establishing the process and setting forth the requirements for obtaining a demolition permit, establishing requirements for demolition including notification to adjacent property owners when applicable and encouraging the salvage and/or recycling of materials. City-ordered demolitions shall be exempt from the requirements of this section.

A. Definitions.

1. Deconstruction means the process of systematically dismantling a structure or portion of a structure in an environmentally, economically and socially responsible manner, aiming to maximize the recovery of materials for reuse and recycling.

2. Demolition means the deconstructing, destroying, razing, tearing down, alteration or wrecking of any structure or removal of any load-supporting structural member of a building or structure together with any related handling operations.

B. Permit required.

1. A demolition permit shall be required before any person proceeds with any of the following activities/work:

2. Level I. The demolition or partial demolition of a single family, duplex, triplex, quadruplex or commercial building under five thousand square feet of the gross floor area being demolished.

3. Level II. The demolition or partial demolition of a commercial building greater than five thousand square feet but less than ten thousand square feet of the gross floor area being demolished.

4. Level III. The demolition or partial demolition of a commercial building greater than ten thousand square feet of the gross floor area being demolished.

C. Fees.

1. A person obtaining a level I demolition permit shall pay the established fee.

2. A person obtaining a level II demolition permit shall pay two hundred percent of the established permit fee.

3. A person obtaining a level III demolition permit shall pay three hundred percent of the established permit fee.

D. Duration.

A demolition permit shall be valid for a consecutive ninety-day period. Every permit issued shall expire under any of the following circumstances:

1. The work authorized by such permit is not commenced within three months from the issue date of the permit;

2. The work authorized by such permit is suspended or abandoned for a period of three months after the time the work is commenced;

3. The permit applicant fails to call for and receive an inspection for any period of three months.

4. Upon completion and successful final inspection of the work authorized by such permit.

5. A permittee holding an unexpired permit may apply for one extension of time for a period of not more than one ninety-day period; provided that the request for extension is made in writing prior to the expiration of the current permit, such extension authorizations shall be made in writing to the building official. There shall be no fee for the extension of an unexpired permit.

6. A completion permit may be obtained for an expired permit within six months of the date of expiration of the original permit. The cost of the completion permit shall be equal to one half the established fees required for a new permit for such work.

E. Application requirements.

1. Emergency demolition. Emergency demolition will be permitted upon provision of:

a. A fire assessment from the fire marshal's office;

b. A structural engineer's assessment of imminent hazard approved by the building official;

c. Court order; or

d. Upon a determination made by the building official pursuant to International Building Code Section 116.1 that the structure or equipment is unsafe and must be taken down and removed or made safe.

Exception: Historic landmark commission approval is not required for a designated structure when ordered by the building and standards commission, or declaration of imminent hazard by the fire marshal or building official.

2. Standard demolition. The applicant shall provide a demolition plan

3. Complete and interior demolition. The applicant shall provide:

a. Scaled survey or site of property clearly labeling limits of proposed demolition.

b. Scaled floor plan of structure clearly labeling area(s) of existing structure.

c. Proposed demolition and/or removal and replacement of materials.

d. Hazardous material/asbestos remediation report.

e. Proof of utility disconnections.

f. Proof of ownership, title deed and/or warranty deed or notarized letter from property owner authorizing demolition.

F. Demolition of property within the Downtown Plan Area.

1. If the property to be demolished is located within a historic district or is a landmark, approval for demolition from the historic landmark commission is required prior to the issuance of a demolition permit and all other application requirements of Section 18.02.108.1E. shall be followed.

Exception: Historic landmark commission approval is not required for a designated structure when ordered by the building and standards commission, or declaration of imminent hazard by the fire marshal or building official.

2. If the property to be demolished is within the Downtown Plan Area, the applicant will be required prior to demolition to:

a. Provide for as-built drawings or photo-documentation.

b. Provide proof of notices sent: If the proposed building to be demolished is three stories or less, the applicant shall provide copies of certified letters to all adjacent property owners and businesses notifying them of the proposed demolition and approximate schedule of events. If the proposed demolition is for a commercial or industrial structure or a residential structure four stories or more, all property owners and business within three hundred feet shall be notified. If the proposed building to be demolished shares a common wall with another building(s) the applicant shall submit a sealed structural engineer's report that verifies that the proposed demolition will not adversely impact adjoining structures.

G. Additional provisions.

1. No wall, chimney or other structural part shall be left at the end of each shift in such condition that it may collapse due to wind, vibration or other cause.

2. Upon the completion of demolition operations, the site shall be completely cleared of rubbish, brush, weeds and other debris. The site must be left free of ponds/ponding areas.

3. Footings/foundations, basement/surface slabs, septic tanks, wells, cesspools, and cisterns shall be completely removed.

Exception: Footings, foundations, basement walls may remain provided that:

a. The site is properly secured by appropriate fencing.

b. Plans sealed by a design professional are submitted at the time of proposed new construction using existing footings, foundations, or basement walls.

c. The plans provide an engineering analysis stating that the footing/foundations are structurally adequate for the intended new structure.

d. An engineering inspection report indicating that the original footings/foundation or other structures that will be utilized have not been disturbed, structurally impaired and/or impacted by the demolition.

4. The applicant shall coordinate with applicable city departments for the blocking of walkways, thoroughfares and alleys to protect the public.

H. Final site preparation/security.

1. The site must be left ready for new construction. All underground utilities, footings, foundations, vaults, basements, etc., must be removed and clean fill must be used to return the site/lot to its original and/or otherwise appropriate elevation consistent with adjoining lots and/or public improvements.

Exception: Footings, foundations, basement walls may remain provided that:

a. The site is properly secured by appropriate fencing.

b. Plans sealed by a design professional are submitted at the time of proposed new construction using existing footings, foundations, or basement walls.

c. The plans provide an engineering analysis stating that the footing/foundations are structurally adequate for the intended new structure,

d. An engineering inspection report indicating that the original footings/foundation or other structures that will be utilized have not been disturbed, structurally impaired and/or impacted by the demolition.

2. Contractor shall return all public improvements to their original and/or improved condition(s).

(Ord. No. 019528, § 1, 8-1-2023)

18.02.111 CERTIFICATES OF OCCUPANCY

18.02.111.1 New building certificate of occupancy.

A certificate of occupancy allows for full occupancy of an entire building or structure when

the entire building or structure is dedicated to one specific use or occupancy type. A new building shall not be occupied or a change made in the occupancy, nature or use of a building or part of a building until the building official has issued a certificate of occupancy. The certificate shall not be issued until the building has passed all required inspections, is in compliance with the technical codes and other applicable laws and ordinances and is released by the building official and the applicant has paid the established fee.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.2 Existing building certificate of occupancy.

A certificate of occupancy for any existing building may be obtained by applying to the building official and supplying the information and data necessary to determine compliance with the technical codes for the occupancy intended. Where necessary, in the opinion of the building official, detailed drawings, or a general inspection, or both, may be required. When, upon examination and inspection, it is found that the building conforms to the provisions of the technical codes and other applicable laws and ordinances for such occupancy, a certificate of occupancy shall be issued and the applicant has paid the established fee.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.3 Certificates of occupancy for lots with unconditional master building permits.

Certificates of occupancy shall be issued for lots receiving unconditional master building permits as described in Section 18.02.105.15A. of this Code when the structures comply with the requirements of the building and zoning codes, and all subdivision improvements have been completed in accordance with Title 19 (Subdivisions) of this Code and upon payment of the established fee.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.4 Certificates of occupancy for lots with conditional master building permits.

Certificates of occupancy may be issued for lots receiving conditional master building permits as described in Section 18.02.105.15B. of this Code provided the applicant has paid the established fee and the following requirements are complied with:

1. The structures comply with the requirements of the building and zoning codes; and
2. The subdivision improvements required under Title 19 (Subdivisions) have been constructed, completed, and if the improvements are public improvements, accepted by the city for maintenance, or the developer provides financial security in accordance with Section 19.08.040 of the City Code for completion of the subdivision improvements; or
3. The subdivision improvements for the approved phase of the subdivision have been constructed, completed, and if the improvements are public improvements, accepted by the city for maintenance and the developer provides financial security in accordance with Section 19.08.040 of the City Code for completion of the remaining subdivision improvements.

(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.5 Temporary Certificate of Occupancy (TCO).

A TCO may be issued that allows for temporary occupancy of an incomplete building upon payment of the established fee and provided that the building has passed the following life safety and service system inspections:

1. Inspections required prior to issuance of a commercial TCO:

   Engineering final, electrical final, fire final, mechanical final, plumbing final, building final.

2. Inspections required for a residential TCO:

   Electrical final, mechanical final, plumbing final, building final, and fire final.

A TCO is valid for thirty days. An extension TCO may be granted for an additional thirty days

upon written request for extension and upon payment of the established fee contained in Schedule C.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.6 Reserved.

18.02.111.6.1 Conditional certificate of occupancy (CCO).

A CCO allows for temporary occupancy of a complete or portion of an existing building or structure for an occupancy other than the occupancy for which the building or structure was intended, or for vacant premises as described in this section, provided all life safety requirements have been met for the proposed new occupancy and upon payment of the established fee. A CCO shall not exceed one year.

A CCO for otherwise vacant premises shall be allowed only in specific portions of the street level in buildings within a one-mile radius of the Downtown Plan Area, upon application approval by the building official and upon agreement to the proposed occupancy classification and compliance benchmarks. A CCO for otherwise vacant premises may be extended through a second year with no additional permit fees by the building official, pending a phased compliance plan and expires automatically when applicant vacates the premises.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.6.2 Reserved.

18.02.111.7 Certificate of completion.

After the building official inspects the work completed under permit for a building, structure, electrical, fire protection, plumbing, mechanical, fuel gas, or similar system or structure that cannot be occupied, and finds no violations of the provisions of this Code or the technical codes, the building official is authorized to issue a certificate of completion. Such certificate of completion certifies that the work performed under the permit has been satisfactorily completed. The certificate of completion does not authorize the occupancy of any incomplete shell, building or structure.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.8 Connection of service utilities.

No person shall make connections from a utility, source of energy, fuel or power to any building or system which is regulated by the technical codes for which a permit is required, until released by the building official, and a certificate of occupancy or completion is issued.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.9 Temporary connection.

The building official may authorize the temporary connection of the building or system to the utility source of energy, fuel or power for the purpose of testing building service systems or for use under a temporary certificate of occupancy. Any person receiving authorization under this section shall pay the established fees for installation and inspection.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.10 Authority to disconnect service utilities.

The building official shall have the authority to order the disconnection of utility service to the building, structure or system regulated by the technical codes in case of emergency where necessary to eliminate an immediate hazard to life or property. The building official shall notify the serving utility, and whenever possible the owner and occupant(s of the building, structure or service system of the decision to disconnect prior to taking such action. If not notified prior to disconnecting, the owner or occupant of the building, structure or service system shall be notified in writing, as soon as practical thereafter.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.11 Plumbing outside city limits.

Water service shall not be furnished to any property outside the city limits having a water

plumbing system installed on or before January 1, 1972, unless such water plumbing system has been inspected, tested and approved in accordance with rules and regulations of the public service board/El Paso Water Utilities (EPWU).

Water service shall not be furnished to any property outside the city limits having a water plumbing system installed after January 1, 1972, unless such water plumbing system has been inspected and all plumbing thereon complies with the requirements of this Code and the technical codes.

Persons receiving permits and inspections under this section shall pay all established fees.

After the public service board or EPWU begins water service to a property outside the city limits, all additional plumbing work done on such property shall comply with this Code and the technical codes and pass the inspections therein required. Such additional plumbing work shall be pursuant to a permit issued upon payment of the established fees.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.12 Relations with the El Paso Water Utilities (EPWU Department).

No system of plumbing utilizing a private disposal system as provided in the plumbing code shall be turned on by EPWU until EPWU has received a final approval of such system from the building official.

No existing out-of-city plumbing system as defined in Section 18.02.111.11 until the private sewage (whether individual or community to which the system is connected has been inspected and approved by the building official and notice of such approval has been furnished to EPWU.

Clear water waste from swimming, wading and bathing pools and similar devices and installations may be utilized for irrigation by either surface or subsurface spreading when specifically authorized by the building official.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.111.13 Appeals.

In any case where a decision of the building official, regarding adequacy or quality of public or private improvements, prevents the issuance of a permit or certificate of occupancy, the permit applicant may appeal the decision to the Appeals Officer in accordance with the requirements and procedures of Chapter 2.30 of the City Code.
(Ord. No. 019528, § 1, 8-1-2023; Ord. No. 019762, § 2, 7-22-2025)

18.02.112 CONSTRUCTION SITE WASTE MANAGEMENT REQUIREMENTS

18.02.112.1 Discarded building materials and construction site waste.

Construction site waste must be properly managed and disposed to ensure worker safety, public health and welfare, as well as to reduce risks of injury, pollution, environmental contamination, and ensure storm water protection. Practices such as trash disposal, proper material handling, and spill prevention and clean up measures must be implemented in accordance with El Paso City Code, Title 9 (Health and Safety), Chapter 9.04 (Solid Waste Management) and Texas Administrative Code, Title 30, Chapters 327, 330, and 335.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.113 RESERVED

18.02.114 SEVERABILITY

If any section, subsection, sentence, clause or phrase of this Code or of the technical codes is for any reason held to be unenforceable, such decision shall not affect the validity of the remaining portions of this Code or of the technical codes.
(Ord. No. 019528, § 1, 8-1-2023)

18.02.115 VIOLATIONS AND PENALTIES

Any person, firm, corporation or agent who shall violate a provision of this Code or of the technical codes, or fail to comply therewith, or with any of the requirements thereof, or who shall erect, construct, alter, install, demolish or move any structure, electrical, gas, mechanical or plumb-

ing system, or has erected, constructed, altered, repaired, moved or demolished a building, structure, electrical, gas, mechanical or plumbing system; in violation of a detailed statement or drawing submitted and permitted thereunder, shall be deemed guilty of a misdemeanor and punished by a fine not to exceed two thousand dollars. Each such person shall be deemed guilty of a separate offense for each and every day or portion thereof during which any violation of any of the provisions of this Code or of the technical codes is committed or continued.
(Ord. No. 019528, § 1, 8-1-2023)

(Ord. No. 019528, § 1, 8-1-2023)

18.08.020 Adoption.

The book entitled "International Building Code," 2021 Edition, a copy of which authenticated by the city clerk is on file in the city clerk's

***Editor's note—**Ord. No. 019528, § 2, adopted Aug 1, 2023, amended Ch. 18.08 in its entirety to read as set out herein. The former Ch. 18.08, §§ 18.08.010—18.08.300, pertained to similar subject matter and derived from Ord. No. 18509, § 1, adopted May 31, 2016.

office, is adopted as the building code of the city, as fully as if copied at length in this chapter, but with the changes set forth in this chapter and Chapter 18.02, the Building and Administrative Code of the City of El Paso. Exception: As an alternative, existing buildings undergoing repair, alterations, additions or change of occupancy shall be permitted to comply with the El Paso Existing Building Code Chapter 18.28.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.030 Section 105.2 Work exempt from permit, amended.

International Building Code, 2021 Edition, Section 105.2, Work exempt from permit, Building: is hereby amended to read as follows:

105.2 Work exempt from permit. Exemptions from permit requirements of this code shall not be deemed to grant authorization for any work to be done in any manner in violation of the provisions of this code or any other laws or ordinances of this jurisdiction. Permits shall not be required for the following:

Building:

1. Masonry landscape walls and fences not over forty-two inches high, completely within the subject property and meeting zoning requirements. Where there is a difference in elevation between abutting properties or property lines, the height measurement shall be taken from the high side of the wall, exclusive of retaining walls.

a. Chain link or wrought iron fences not over six feet high, completely within the subject property and meeting zoning requirements.

2. Oil derricks.

3. Retaining walls that are not over 4 feet (1219 mm) in height measured from the bottom of the footing to the top of the wall, unless supporting a surcharge or impounding Class I, II or IIIA liquids.

4. Water tanks supported directly on grade if the capacity is not greater than 5,000 gallons (18,925 L) and the ratio of height to diameter or width is not greater than 2: 1.

5. Sidewalks and driveways not more than 30 inches (762 mm) above adjacent grade, and not over any basement or story below and are not part of an accessible route.

6. Painting, papering, tiling, carpeting, cabinets, counter tops and similar finish work.

7. Temporary motion picture, television and theater stage sets and scenery.

8. Prefabricated swimming pools accessory to a Group R-3 occupancy that are less than 24 inches (610 mm) deep, are not greater than 5,000 gallons (18,925 L) and are installed entirely above ground.

[9]. Swings and other playground equipment accessory to detached one- and two-family dwellings.

[10]. Window awnings in Group R-3 and U occupancies, supported by an exterior wall that do not project more than 54 inches (1372 mm) from the exterior wall and do not require additional support.

[11]. Nonfixed and movable fixtures, cases, racks, counters and partitions not over 5 feet 9 inches (1753 mm) in height.

Electrical:

1. Repairs and maintenance: Minor repair work, including the replacement of lamps or the connection of approved portable electrical equipment to approved permanently installed receptacles.

2. Radio and television transmitting stations: The provisions of this code shall not apply to electrical equipment used for radio and television transmissions, but do apply to equipment and wiring for a power supply and the installations of towers and antennas.

3. Temporary testing systems: A permit shall not be required for the installation of any temporary system required for the testing or servicing of electrical equipment or apparatus.

Gas:

1. Portable heating appliance.

2. Replacement of any minor part that does not alter approval of equipment or make such equipment unsafe.

Mechanical:

1. Portable heating appliance.
2. Portable ventilation equipment.
3. Portable cooling unit.
4. Steam, hot or chilled water piping within any heating or cooling equipment regulated by this code.
5. Replacement of any part that does not alter its approval or make it unsafe.
6. Portable evaporative cooler.
7. Self-contained refrigeration system containing 10 pounds (4.54 kg) or less of refrigerant and actuated by motors of 1 horsepower (0.75 kW) or less.

Plumbing:

1. The stopping of leaks in drains, water, soil, waste or vent pipe, provided, however, that if any concealed trap, drain pipe, water, soil, waste or vent pipe becomes defective and it becomes necessary to remove and replace the same with new material, such work shall be considered as new work and a permit shall be obtained and inspection made as provided in this code.
2. The clearing of stoppages or the repairing of leaks in pipes, valves or fixtures and the removal and reinstallation of water closets, provided that such repairs do not involve or require the replacement or rearrangement of valves, pipes or fixtures.

(Ord. No. 019528, § 1, 8-1-2023)

18.08.035 Section 107.2.5.2 Finish Floor Elevation.

Finish floor elevations shall be set at one foot above the 100 year (1% annual chance) flood elevation for residential and multi-family structures
(Ord. No. 019528, § 1, 8-1-2023)

18.08.040 Section 202 Definitions, Shell, amended.

International Building Code, 2021 Edition, Section 202 Definitions, is hereby amended to read as follows:

Shell: A shell building shall meet the requirements that consist of all exterior walls, foundation, site work, landscaping and zoning, parking requirements, property line firewalls and roof structure. Multi-story shell building shall include elevator floor assemblies, mezzanines (when used), stairwells and elevators. Any mechanical, plumbing or electrical scope of work will be limited to "rough-in" designs for future use. Utilities service connections will be stub outs into the building's service entrance for connection at time of the time of tenant improvements. Shell building shall not be occupied upon completion. However, they must meet all minimum requirements for public works, zoning, land development, sanitation and water, before a certificate of completion is issued. No certificate of occupancy will be issued until landscaping, civil work or building construction is completed.

(Ord. No. 019528, § 1, 8-1-2023)

18.08.050 Section 310.1 Residential Group R, R-3, amended.

International Building Code, 2021 Edition, Section 310.1 Residential Group R, R-3 is hereby amended to read as follows:

R-3 Residential occupancies where the occupants are primarily permanent in nature and not classified as R-1, R-2, R-4 or I, including child care facilities which accommodate six or more children of any age who stay less than 24 hours per day and are permitted under the Zoning Ordinance or personal home care facilities permitted under the Zoning Ordinance.

(Ord. No. 019528, § 1, 8-1-2023)

18.08.055 Section 1109.2.1 Family or assisted-use toilet and bathing rooms.

In assembly and mercantile occupancies, an accessible family or assisted-use toilet room shall be provided. In buildings of mixed occupancy, only those water closets required for the assembly or mercantile occupancy shall provide assisted-use toilet. In recreational facilities where separate-sex bathing rooms are provided, an accessible family or assisted-use bathing room shall be provided.

Fixtures located within family or assisted-use toilet and bathing rooms shall be included in determining the number of fixtures provided in an occupancy.

Exception: Where each separate-sex bathing room has only one shower or bathtub fixture, a family or assisted-use bathing room is not required.

1109.2.1.1 Standard. Family or assisted-use toilet and bathing rooms shall comply with Sections 1109.2.1.2 through 1109.2.1.7.

1109.2.1.2 Family or assisted-use toilet rooms. Family or assisted-use toilet rooms shall include only one water closet one lavatory and one diaper changing station. A family or assisted-use bathing room in accordance with Section 1109.2.1.3 shall be considered a family or assisted-use toilet room. Every new establishment or use shall be required to provide a baby diaper changing station in accordance with the requirements of this section. Each establishment or use shall be required to provide at each floor level containing bathrooms, at least one diaper changing station that is accessible to women, and one that is accessible to men, or a single station accessible to both. Each establishment shall provide signage indicating the location of the baby diaper changing station. Any shopping center, mall or other facility encompassing multiple establishments and having a central directory shall indicate on the directory the location of all stations. A baby diaper changing station shall mean a safe, sanitary and convenient baby diaper changing station, deck, table or similar amenity which is installed or placed in a separate, designated location in an establishment or use subject to the provisions of this section.

Exception: A urinal is permitted to be provided in addition to the water closet in a family or assisted use toilet room.

1109.2.1.3 Family or assisted-use bathing rooms. Family or assisted-use bathing rooms shall include only one shower or bathtub fixture. Family or assisted-use bathing rooms shall also include one water closet and one lavatory. Where storage facilities are provided for separate-sex bathing rooms, accessible storage facilities shall be provided for family or assisted-use bathing rooms.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.060 Section 311.4 Required separation for Group S tenants, added.

International Building Code, 2021 Edition, Section 311.4 Required separation for Group S tenants, is hereby added to read as follows:

311.4 Required Separation for Group S Tenants. Tenants of a Group S occupancy shall be separated from other tenants by 1-hour fire partitions and horizontal assemblies or a Code required fire barrier. Non-fire rated partitions may be used to separate Group S tenants provided no area between partitions rated at 1-hour or more exceeds 3,000 sq. ft. or a sprinkler system is installed
(Ord. No. 019528, § 1, 8-1-2023)

18.08.070 Section 424.312.2 Fences, added.

International Building Code, 2021 Edition, Section 312.2 Fences, is hereby added to read as follows:

312.2 Fences.

312.2.1 Electrified Fences General. To the extent that the construction of an electrified fence does not conflict with the requirements specified herein, such fence shall be constructed or installed in conformance with the specifications set forth in IEC Standard 60335-2-76.

312.2.2 Definition. Electrified Fence—Any fence, barrier or enclosure partially or totally enclosing a building, field or yard, carrying any electrical pulse or charge through any part, section or element thereof.

312.2.3 Restricted Use.

1. The installation of an electrified fence is restricted to the following uses and zoning districts:

a. For control of domestic farm animals in areas zoned and actually utilized for farming or

ranching activities; or for other areas where large domestic animals such as horses or cattle are legally maintained.

b. For the permitted uses of outdoor storage, motor vehicle storage, major utility and recycling facilities, general warehouse, contractor yard and manufacturing within the regional commercial district "C-4".

c. For installation in industrial and manufacturing districts designated as "Q", "P-1", "M-1" "M-2" and "M-3" as defined by Title 20 of the El Paso City Code.

2. Only battery-powered units are acceptable. Units must be approved by a Nationally Recognized Testing Laboratory (NRTL) with final installation acceptable to the Building Official.

3. The installation of an electric fence is prohibited,

a. Within 25 feet of any outdoor area used for the handling of hazardous materials pursuant to the Fire Code, or

b. Within five feet of any public right-of-way.

312.2.4 Permit Required. The installation of an electric fence requires an approved permit with the permit official. It shall be unlawful for any person to install, maintain or operate an electrified fence in violation of the provisions of this section.

1. Applications must include the following:

a. Site plan indicating the location of the electrified fence and perimeter fence.

b. Schematics and load calculations indicating and/or displaying the,

i. Location of the power source,

ii. Materials used for the fence construction,

iii. Location of the regulating and monitoring equipment, and

iv. Location of emergency access, knox box and cut-off switch.

2. A permit shall be obtained and renewed every two years with a notarized statement attached to the renewal application from an authorized representative of the fence or barrier equipment manufacturer indicating the installation is operating in conformance with the original design and complies with acceptable safety standards.

312.2.5 Registration Required. Prior to the installation or use of an electrified fence and upon permit issuance, the permit holder must register the electrified fence with the fire code official to identify the location of said fence and required cut-off switch and knox box in the event that deactivation is required by an authorized public safety official.

312.2.6 Standards.

312.2.6.1 Standards—Electrification. Electric fences or barriers must be designed and certified by an authorized representative of a fence or barrier equipment manufacturer. Upon installation, said representative shall certify the installation meets the following design and safety requirements:

1. AC current shall not be used to energize any electric fence.

2. The energizer for electric fences shall be driven by a commercial storage battery not to exceed 12 volts capacity charged by a solar panel. A commercial trickle charger may augment power source.

3. The electric charge produced by the fence upon contact shall meet the energy output requirements of section 22.108 of the IEC.

4. All ground system cables shall be properly insulated.

5. The controller ground system shall not be connected to any plumbing systems in or out of use and shall be at least 50 feet from other utility and buried water pipes.

6. The fence controller ground wire shall not touch any buildings on site.

7. Fence controller and its ground system shall be at least 50 ft. away from radio and buried telephone wires.

8. An electric fence shall be installed at a minimum clearance from power or telephones lines in accordance with Table BB.1 of the IEC.

9. A lightning diverter (commonly referred to as a lightning arrestor) shall be installed between the fence and the fence controller.

10. A cut-off switch shall be installed capable of disconnecting the fence from the controller in case of emergencies, electrical storms, etc.

11. A knox box shall be installed to provide secure access to the appropriate public safety official to the cut-off switch. The knox box shall be illuminated to a minimum one foot candle.

12. Each energizer shall be connected to its own ground system and must not be connected to any other ground system(s).

13. Two or more energizers shall not be connected to the same fence unless the use of multiple energizers does not increase the overall charge transmitted on the fence and adequate access is provided to the cut-off switch to each energizer.

14. All cabling/wire and connectors shall be of the same material (steel, copper, etc.).

15. All wires shall be separated at minimum clearance in accordance with section 29.101 of the IEC.

16. Barbed or razor wire shall not be used in conjunction with any electric fence system.

312.2.6.2 Standards-Height. Electrified fences shall be a minimum of six (6) feet in height and shall not exceed a maximum often (10) feet in height.

312.2.6.3 Standards—Warning Signs. All electric fences shall have warning signs of reflective material and shall be in accordance with the following requirements:

1. Shall be a minimum of 4 inches by 8 inches in accordance with annex BB of the IEC.

2. All lettering shall be a minimum of one (1) inch high.

3. Shall consist of a yellow background with black inscriptions and kept in good condition to ensure continued visibility.

4. Shall be placed at a maximum of 30 feet distance along the fence with a minimum of two signs for less than a 50-foot length.

5. Signs shall bear the words "Live Wires" or "Electric Fence" in indelible letters in English and Spanish.

312.2.7 Required Barrier(s).

1. No electrified fence shall be installed or used unless it is completely surrounded by a perimeter fence that is not less than six (6) feet in height and no more than eight feet in height in accordance with the provisions of section 20.16.030 of the El Paso City Code.

2. The distance between the electrified fence and required perimeter fence shall be a minimum of four inches at its closest point.

3. The perimeter fence between an electrified fence and an adjacent residential zone shall be a masonry fence.

4. If the masonry fence between an electrified fence and an adjacent residential zone is more than three feet from the electrified fence, there shall be a second perimeter fence installed between the electrified fence and the adjacent residential zone that is no more than three feet from the electrified fence.

5. If a code compliant perimeter fence does not exist, a separate permit shall be obtained for the construction of the perimeter fence that shall be constructed prior to the electrified fence installation pursuant to Title 20 of the El Paso City Code.

6. The area between the perimeter wall or fence and the electrified fence shall be kept clear of shrubbery, weeds, trash and debris.

312.2.8 Hours of activation. An electrified fence shall only be energized during the hours when the general public does not have legal access to the protected property.

312.2.9 Fees. The established fee for a permit to install an electrified fence shall be paid by the applicant at the time of filing an application and upon the renewal of the permit.

312.2.10 Barbed Wire, Farm/Ranch.

1. Barbed wire fences installed in conventional multi-strand configuration may be used for the same purpose, the same area, and under the same conditions outlined in Section 312.2.11

2. Wire shall be securely fastened to durable wooden or metal posts, spaced not to exceed fifteen (15) feet center-to-center, and designed to withstand all loads reasonably expected to be imposed upon them.

3. Gates in such fences shall have solid frames, be conventionally hinged, and shall not swing over public property.

4. The use of barbed wire in conjunction with an electric fence is prohibited.

312.2.11 Barbed Wire Other Than Farm/Ranch.

1. Barbed wire may be used as a topping on walls and fences in areas zoned for commercial and manufacturing uses provided such wire is properly attached and secured to risers or outriggers especially designed for this purpose. Such barbed wire installation shall be placed not less than seven (7) feet above finished grade at any point along the fence, and shall not at any point extend beyond the property line, over the public way, or adjoining property.

2. The use of barbed wire for dwellings or apartments in residential and apartment zones is prohibited.

3. The use of barbed wire in conjunction with an electric fence is prohibited.

4. The use, design and minimum height of barbed wire fence topping shall be determined by the building official for each such installation. Such determination shall be based on the need for barbed wire protection, considering the probable risk or theft or trespass, the character of the neighborhood, and other pertinent factors; the possible hazards to persons; and reasonable consideration of appearance.

312.2.12 Use of Broken Glass. The use of broken glass and similar materials designed to do bodily harm, as a topping for fences and walls is prohibited.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.080 Section 501.2 Address identification, amended.

International Building Code, 2021 Edition, Section 501.2 Address identification is hereby amended to read as follows:

501.2 Premises Identification.

501.2.1 Definitions. For the purposes of administering the numbering of buildings, the following definitions shall apply:

"Building numbering," means those numbers and/or letters as may be needed to identify building(s) at a municipal street address.

"Municipal street address" means the building numbering used in conjunction with the street name and assigned by the Planning Division for the City of El Paso for the purpose of identifying individual properties.

"Prominently displayed" means that which is conspicuously located, readily noticeable, and easily readable from the street during normal daytime atmospheric conditions by the driver of an emergency response vehicle.

"Shopping Mall or Strip Mall" means a building or buildings located on the same lot, containing one (1) or more units, which are utilized by the occupants for business purposes.

501.2.2 Municipal Street Address Identification Required. Building numbering shall be prominently displayed on all buildings for which a municipal street address has been assigned in accordance with the requirements of this Section.

501.2.3 Building Numbering Character Height. Building numbering shall be displayed in characters having a minimum height conforming to the following table:

Distance Building Numbering is Setback from the Street Curb	**Minimum Height**
Less than 100 ft.	8"
Equal to or greater than 100 ft. but less than 150 ft.	10"
Equal to or greater than 150 ft. but less than 200 ft.	12"
Equal, to or greater than 200 ft.	See 501.2.3.1

501.2.3.1 Where the distance of the building numbering located on the nearest building wall is equal to or greater than 200 ft. from the street curb, building numbering shall be located on a permanent sign that is not more than 50 ft. from the street curb and is in accordance with Chapter 20.66. If no other such permanent sign exists, a permanent sign shall be provided so that the building numbering shall be located not more than 50 ft. from the street curb. Such permanent sign shall be in accordance with Chapter 20.66 of the City Code and numbering shall be sized in accordance with 501.2.3.

501.2.3.2 Building Numbering Characters. The characters used for building numbering shall be oriented so that they read from left to right horizontally, are not wrapped around corners. The characters shall be a simple, block lettering style without serifs and shall not be slanted or italicized. The characters shall be designed and mounted to avoid shadows that diminish the readability.

501.2.3.3 Color. The color contrast between the building numbering characters and the background against which they are viewed shall be sharply contrasted and sufficiently distinct to ensure legibility/readability. The contrasting background color shall extend a minimum of 4" above, below, and on both sides of the building numbering without interference from any other building element, blending of color, or border. These contrasting colors shall be very dark on very light or the reverse and shall be subject to the approval of the Fire Code Official.

501.2.3.4 Visibility and Readability. Building numbering shall be installed and maintained so that it is clearly visible and easily readable from the street and not obscured by any obstructions such as, but not limited to, landscaping, signage, vehicles, off-street parking, other buildings or building elements.

501.2.3.5 Building Numbering Location.

1. When the primary public entry to the building fronts on the addressed street, building numbering shall be located within the upper one-fourth of the building, not to exceed 20 feet above the ground, on the building wall facing the addressed street.

2. On buildings where the public entry does not front the addressed street, building numbering shall be located near the primary public entry and contain the name of the addressed street. In addition, building numbering shall be located within the upper one-fourth of the building, not to exceed 20 feet above the ground, on the building wall facing the addressed street in compliance with all requirements of this Chapter.

3. On buildings that have a canopy or other building element fronting the addressed street, numbering shall be located on the canopy or other building element. Such numbering shall be located on the surface facing the addressed street and located equal distance from the top and bottom of the facade. If the canopy or other building element is closer than 50 feet to the addressed street, such numbering shall also be located on the sides of the canopy.

4. If another permanent structure or sign exists; the building numbering shall be centered on the face of the permanent structure or sign. Building numbering provided on a permanent sign shall not be included in the calculation of the allowable sign area.

5. On buildings, canopies and other permanent structures or signs where numbering is to be located, and the building, canopy or other permanent structure fronts the street at an angle, such numbering shall be located on the all sides facing the addressed street.

6. On buildings with frontage of 150 feet or more, building numbering shall be located within the upper one-fourth of the building, not to exceed 20 feet above the ground, on the opposing ends of the building wall fronting on the addressed street in accordance with the requirements of this Chapter.

7. In the event that the location of building numbering complying with this subparagraph does

not result in compliance with Section 501.2.2, the location shall be as directed by the Fire Code Official.

501.2.3.6 Multiple Individual Occupancies. When a building contains multiple individual occupancies, which have the same municipal street address, each occupancy shall be identified by additional numbers and/or letters, a minimum of six (6) inches high located in close proximity to its primary public entry if the primary entry is from the outside of the building. This requirement shall be in addition to the building numbering of the municipal street address located on the building wall or other structure as required in this Chapter.

501.2.3.7 Multiple Buildings at a Municipal Street Address. When there is more than one (1) building at a municipal street address, the building nearest to the addressed street shall display the numbering and/or lettering of the first and last building separated by a hyphen. Each remaining building shall be further identified by displaying distinguishing numbers and/or letters on at least one (1) wall located near the primary public entry for that building. Such numbering shall be subject to the approval of the Fire Code Official.

501.2.3.8 Buildings with Multiple Street Addresses. When there is more than one (1) municipal street address assigned to buildings located on the same lot, each building shall comply with the building numbering requirements. The building nearest the addressed street shall display the building numbering of the first and last municipal street address separated by a hyphen.

501.2.3.9 Additional Building Numbering. The owner of a property may provide additional building numbering beyond the building numbering required by this Section. Such additional building numbering, when located on a surface facing a street other than the addressed street, shall also contain the name of the addressed street in addition to the addressed numbering. Additional building numbering shall not be subject to the other requirements of this Section.

501.2.4 Appeal. The owner of a property may appeal the determination of the location or color for building numbering by the Fire Code Official to the Appeals Officer in accordance with Chapter 2.30 of the City Code.

501.2.5 Administration and Enforcement. The requirements of this Section shall be administered as part of the building permit and inspection process. The certificate of occupancy shall not be issued unless the building numbering has complied with this Section.

501.2.6 Existing Buildings. All existing buildings and buildings for which the permit application was received prior to January 1, 2006, except residential buildings containing not more than four (4) dwelling units, that were in full compliance with the pre-existing ordinance (Ord. 15963 A (part), 2004), shall comply with this Section within one (1) year of the enactment of this ordinance. All other building that have not been in compliance with the pre-existing ordinance (Ord. 15963 A (part), 2004), shall comply with this Section immediately upon enactment. The pre-existing ordinance (Ord. 15963 A (part), 2004) shall remain in full force an effect until the expiration of one (1) year from the enactment of this ordinance.

501.2.7 Enforcement. The Fire Code Official and the Building Official are authorized to issue a notice to correct and a citation to the owner, manager, operator or person who otherwise controls the use of any property on which the building numbering has not been provided as required by this Section. The Fire Code Official or the Building Official may issue one notice to correct. The owner, manager, operator or person who otherwise controls the use of any property must comply with the requirements of a notice to correct within thirty (30) days of the date a notice was issued.

501.2.8 Violation.

A. It shall be unlawful for any person who owns, manages, operates or otherwise controls the use of any premises subject to regulation under this chapter to fail to comply with all of its provisions.

B. Any person violating any provision of this chapter shall be deemed guilty of a misdemeanor

and shall be punished as provided in Sections 114 through 116 of the International Building Code, 2021 Edition.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.090 Reserved.

18.08.110 Reserved.

18.08.120 Section 1101.2 Design, amended.

International Building Code, 2021 Edition, Section 1101.2 Design, is hereby amended to read as follows:

1101.2 Design. Buildings and facilities shall be designed and constructed to be accessible in accordance with this Code, the Texas Accessibility Standards ("TAS") of the Architectural Barriers Act (Chapter 469, Government Code) and the American National Standard of the International Code Council (ICC/ANSI A117.1 2009 Edition).

A. All buildings and structures and their associated sites and facilities including employee work areas shall be made accessible as required by this chapter.

B. The design and construction of accessible building elements shall be in accordance with this chapter and Sections 4.1 through 4.35 of the TAS or its successor and the requirements of this Chapter.

C. TAS, a copy of which, authenticated by the signature of the Mayor and City Clerk, and made a public record by resolution of the City Council, is on file in the City Clerk's Office and except as modified in this Chapter, is hereby adopted and shall be considered an integral part of the Building Code.

Exceptions:

1. Group R3—One- and Two-Family Dwellings. One- and two-family dwellings regulated by the El Paso Residential Code, Chapter 18.10, and their accessory buildings shall be exempt from the requirements of this Section.

2. Group R2 Occupancies. Group R2 Occupancies having not more than four units on a site are exempt from the requirements of this Section.

3. Group R1 occupancies. Group R1 Occupancies that are actually occupied as a residence by the proprietor and that have ten or fewer rooms on a site for rent or hire are exempt from the requirements of this Section.

4. Storage Mezzanines. Mezzanines used solely for storage shall be exempt from the requirements of this Section provided the area of the inaccessible level is less than 2000 square feet.

5. Uninhabitable Spaces. Uninhabitable spaces shall be exempt from the requirements of this Section. For the purposes of this Section, uninhabitable spaces shall mean those spaces accessed only by ladders, catwalks, crawl spaces, very narrow passageways, or non-passenger elevators, and frequented only by service personnel for maintenance purposes.

6. Religious Ritual Places. Places used primarily for religious rituals within either a building or facility of a religious organization such as baptisteries, chancels and/or altars, confessionals and similar places are exempt from the requirements of this Section.
(Ord. No. 019528, § 1, 8-1-2023; Ord. No. 019762, § 3, 7-22-2025)

18.08.130 Section 1101.3 Maintenance of Facilities, added.

International Building Code, 2021 Edition, Section 1101.3, Maintenance of Facilities is hereby added to read as follows:

1101.3 Maintenance of Facilities. Any building, facility, dwelling unit, or site that is constructed or altered to be accessible or adaptable under this Section shall be maintained accessible/adaptable during its occupancy.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.140 Section 1101.4 Variances, added.

International Building Code, 2021 Edition, Section 1101.4, Variances, is hereby added to read as follows:

1101.4 Variances. Any exemptions from or modifications of the requirements of the TAS obtained for any project through a variance granted

by the Texas Department of Licensing and Regulation (TDLR) shall be deemed a variance under this chapter and approval by the Appeals Officer as described in City Code Chapter 2.30 shall not be required. The building official may issue a conditional building permit, pending final determination from TDLR, provided the applicant submits proof that a variance application for the requested exemption or modification has been submitted to TDLR.
(Ord. No. 019528, § 1, 8-1-2023; Ord. No. 019762, § 4, 7-22-2025)

18.08.150 Section 1107.6.1.1.1 Type A units, amended.

International Building Code, 2021 Edition, Section 1107.6.1.1.1 Type A units, is hereby amended to read as follows:

1107.6.2.1.1 Type A units. In Group R-2 occupancies containing more than four (4) dwelling units or sleeping units, at least three (3) percent but not less than one of the units shall be a Type A unit. All units on a site shall be considered to determine the total number of units and the required number of Type A units. Type A units shall be dispersed among the various classes of units. All type A units shall be provided with a roll-in shower and a permanent mounted folding shower seat meeting the specifications and requirements for roll-in showers and mounted folding shower seats in ACC/ANSI 1171.1 — 2003, Section 608.

Exceptions:

1. The number of Type A Units is permitted to be reduced in accordance with Section 1107.7.

2. Existing structures on a site shall not contribute to the total number of units on a site.

(Ord. No. 019528, § 1, 8-1-2023)

18.08.160 Reserved.

18.08.170 Section 1204.1 Equipment and systems, amended.

International Building Code, 2021 Edition, Section 1204.1 Equipment and systems, is hereby amended to read as follows:

1204.1 Equipment and systems. Interior spaces intended for human occupancy shall be provided with active or passive space-heating and cooling systems capable of maintaining an indoor temperature between 68 F (20 C) and 90 F at a point 3 feet above the floor in all habitable spaces. The installation of portable space heaters shall not be used to achieve compliance with this section.

Exception: Interior spaces where the primary purpose is not associated with human comfort.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.180 Section 1804.8 Excavation Greater Than 5 Feet, added.

International Building Code, 2021 Edition, Section 1804.7 Excavation Greater Than 5 Feet, is hereby added to read as follows:

1804.8 Excavation Greater Than 5 Feet. Excavations which will exceed five (5) feet in depth shall provide trench safety systems that meet Occupational Safety and Health Administration (O.S.H.A.) standards. Supporting systems shall be designed by a qualified professional and meet accepted engineering requirements. The building official may require that such supporting system designs be made part of the project drawings and specifications.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.190 Section 2114 Rock Masonry Retaining Walls, Yard Walls and Fences, added.

International Building Code, 2021 Edition, Section 2114 Rock Masonry Retaining Walls, Yard Walls and Fences, is hereby added to read as follows:

2114 Rock Masonry Retaining Walls, Yard Walls and Fences.

2114.1 General.

1. All retaining rock masonry walls, rock yard walls and rock fences shall be so designed as to withstand any normal and special loading which may be expected for the intended use of the structure and no subsequent change of use shall be permitted without provisions for the additional loading imposed by such new uses. For the purpose of this section, fences are further defined as

free-standing structures supporting no vertical weight other than the weight of the materials used in the construction of the fence and resisting no externally applied horizontal loadings other than wind or earthquake forces. Freestanding masonry sign pylons shall be classified as fences.

2. Rock masonry walls used in whole or in part for earth retention, in excess of 24 inches in height, shall be provided with adequate footings of reinforced concrete. Rock walls and fences, which due to inadequate or improper design or deterioration, show indications of becoming unstable or unsafe shall, be considered unsafe. Unsafe walls and fences shall be abated by repair and rehabilitation or by demolition.

3. If a wall is proposed to be built, constructed, or repaired on a common property line, written approval of adjoining property owners must be submitted with the application for a building permit. If the City is the adjoining property owner, written approval of the Zoning Administrator must be requested and submitted with the permit application.

2114.2 Retaining Walls. Permanent excavations with a grade separation exceeding twenty-four (24) inches on a vertical line, as opposed to embankments along the natural angle of repose of the soil material, that are retained with masonry shall have the masonry designed and constructed within the provisions of this chapter. Both residential and non-residential construction shall comply with this section.

2114.2.1 Design and Stability.

1. Walls used to retain more than four (4) feet of earth shall be designed by a registered professional engineer.

2. Walls shall be analyzed as gravity type structures. Native rubble masonry construction spanning between buttresses may be considered as having a flexural tensile/compressive strength of fifteen (15) PSI and an axial compressive strength not to exceed sixty (60) PSI. The effective width (thickness) dimensions for structural strength and stability shall be reduced by six (6) inches unless the wall is constructed utilizing a cast-in-place concrete core to ensure solid construction.

3. Foundation concrete shall be effectively bonded to the supported native stone rubble masonry in order to enable the system to perform as an integral composite unit. Bonding may be accomplished by the use of stones twelve (12) inches or larger in dimension placed in the plastic concrete of the foundation to obtain a minimum of six (6) inch embedment with a six (6) inch projection to bond with the native stone rubble masonry constructed above.

4. Externally applied loadings acting on retaining structures shall be those computed from design conditions but shall be no less than required under Chapter 16 of this Code. Parking areas limited to automobiles and other light vehicles shall require a minimum fifty (50) PSF uniform surcharge loading. A minimum of two hundred fifty (250) PSF uniform surcharge loading or AASHTO Lane Loading (whichever is greater) shall be required for parking areas subject to heavy vehicles.

2114.2.2 Materials.

1. Concrete, reinforcing steel and native stone, shall conform to the requirements of Chapters 19 and 21 of this Code. Structural concrete for foundations shall have a minimum twenty-eight (28) day compressive strength of two thousand five hundred (2500) PSI. Concrete for core fill of gravity retaining walls shall have a minimum twenty-eight (28) day compressive strength of two thousand (2000) PSI.

2. Mortar shall have a minimum twenty-eight (28) day compressive strength, of one thousand eight hundred (1,800) PSI when averaged over three (3) two (2) inch cubes of three (3) three (3) by six (6) inch cylinders in accordance with ASTM C109 or ASTM C780 and shall not contain more than fifteen (15) pounds of ASTM C207, Type S hydrated lime per cubic foot of mortar when mixed by volume. The building official may require submission of test reports confirming compliance with these requirements.

2114.2.3 Construction.

1. Foundations shall bear on native undisturbed soil capable of sustaining the load imparted upon it. Subject to the approval of the building official.

2. Foundation may be built upon mechanically compacted soil (native soils with increased densification or engineered fill materials) upon submittal of evidence that the proposed loadings will be adequately supported.

3. Adequate provisions shall be made to eliminate hydrostatic pressure buildup through the use of a free-draining backfill material over an underground water collection system that will drain through the wall and above the foundation in order to ensure stability of the foundation supporting soil. Random pattern weep holes shall not be considered as sufficient to accomplish required drainage. Retaining structures retaining less than four (4) feet of earth are not required to provide the above drainage system.

4. Foundations must bear a minimum of two (2) feet below finish grade level or one (1) foot into native undisturbed materials satisfactory for bearing (on the low side of the retaining structures) whichever provides the lowest elevation.

2114.2.4 Drawings and Specifications. All structures governed under this section shall be required to submit drawings in accordance with Chapter 18.02 Administrative Code. Such drawings shall include the following:

1. Theoretical calculated soil pressures at the toe and heel of the wall foundation.

2. Factor of safety against horizontal sliding and overturning (tipping) equal to or greater than 1.5.

3. Uniform surcharge loading and soil unit weight used in analysis and design (PCF).

4. Line or strip loadings (PLF) and locations with respect to wall.

5. Assumed unit weight of native stone rubble masonry construction (PCF).

6. Wall thickness and height dimensions with relative positioning for yard wall extensions, retained heights, base widths and foundations.

7. Locations of construction (through-wall) joints, changes in foundation bearing elevations, positioning, extent and construction of underground drainage against the retaining structure.

2114.3 Yard Walls and Fences. Yard walls and fences of masonry materials shall be considered as non-bearing walls and shall be supported either horizontally or vertically by intersecting fences, pilasters, monolithic columns, integral, with the fence construction of sufficient strength and stability to provide the required structural support. The minimum thickness shall be sufficient to resist all normal vertical and horizontal loads applied to the fence.

2114.3.1 Masonry walls over six (6) feet in height shall be designed as a structural wall by a licensed professional engineer and provided with adequate footings. The design will be reviewed by the building official.

2114.3.2 Design and Stability.

1. The unsupported height to thickness (KH/t) or length to thickness (KL/t) shall not exceed 40, where, K=2.0 for cantilevered conditions, and 1.0 for both ends being supported:

a. H = Height of fence above foundation

b. L = Horizontal distance between stiffening elements

c. t = Thickness of fence

2. In native stone rubble masonry walls with "no mortar" finishes, three (3) inches shall be deducted from the thickness of the fence for each face where this finish is used, when computing the minimum thickness for KH/t, KL/t and structural stability requirements.

3. Lateral support (stiffening elements) shall be provided by intersecting fences, pilasters, monolithic columns integral with the fence construction or other vertical members of sufficient strength and stability to provide the required structural support.

4. Masonry fences, including native stone rubble, shall have each wythe through-bonded with native stone rubble masonry having through-bond stones at a maximum spacing of three (3) feet vertically and three (3) feet horizontally.

5. Adequate strength, and stability to resist overturning, and other stresses for externally applied horizontal loads, shall be provided to the satisfaction of the building official and shall conform to accepted engineering design principles. Wind loading and shape factors shall be as set forth in Chapter 12 of this Code.

2114.3.3 Materials.

1. All materials shall be in accordance with Chapter 21.

2. Masonry fences, including native stone rubble, shall be laid in Type M, S, or N mortar.

3. Masonry fences, including native stone rubble, shall be provided with a reinforced concrete foundation in accordance with the approved subdivision design standards of the City.

(Ord. No. 019528, § 1, 8-1-2023)

18.08.200 Section 3107.1 General, amended.

International Building Code, 2021 Edition, Section 3107 Signs, is hereby amended to read as follows:

3107.1 General. Signs shall comply with the Zoning Ordinance and shall be designed, constructed and maintained in accordance with this Code.

(Ord. No. 019528, § 1, 8-1-2023)

18.08.210 Section 3201.1 Scope, amended.

International Building Code, 2021 Edition, Section 3201.1 Scope, is hereby amended to read as follows:

3201.1 Scope. The use of public property or any portion thereof, shall be in accordance with the City Charter, Section 3.18 and the provisions of this Chapter.

(Ord. No. 019528, § 1, 8-1-2023)

18.08.220 Section 3305.2 Temporary Facilities, added.

International Building Code, 2021 Edition, Section 3305.2 Temporary Facilities, is hereby added to read as follows:

3305.2 Temporary Facilities. Adequate sanitary facilities for the convenience of all workmen shall be provided according to Table 3305.1. Required facilities shall be located not more than one hundred (100) feet from the construction site, and shall not be within sixty (60) feet of any occupied structure, unless the occupant of such structure consents, or unless it is impracticable to locate the facilities the required minimum distance from the structure. Existing facilities owned by others may be used provided permission for their use is obtained and only if such facilities comply with the requirements or this section.

3305.3 Facilities shall be kept in a clean and sanitary condition throughout the duration of the work. The temporary workman's toilet shall be enclosed, screened, and weatherproofed and shall be connected to a sewer. Upon removal of the temporary facilities, the sewer connections shall be removed and the sewer capped. In lieu of connecting to a sewer, the temporary facility may be a portable, enclosed, chemically treated, tank-tight unit.

Table 3305.1 Number of Employees Minimum Number of Toilet Facilities	
If Serviced Once Per Week*	
1—10	1
11—20	2
21—30	3
31—40	4
Over 40	1 additional facility for each 10 additional employees
If serviced more than once per week*	
1—15	1
16—35	2
36—55	3
56—75	4
76—95	5
Over 95	1 additional facility for each 20 additional employees
*"Servicing" refers to the emptying of waste and the cleaning of the toilet facility. A camp equipped with flush toilets shall meet the standard for "minimum number of toilet facilities if serviced more than once per week".	

(Ord. No. 019528, § 1, 8-1-2023)

18.08.221 Section 3401.1 Compliance, amended.

International Building Code, 2021 Edition, Section 3401.1 Compliance, is hereby amended to read as follows:

3401.1 Compliance. Alterations or repairs to existing buildings and structures shall comply with the provisions for alterations or repairs in the International Existing Building Code, International Fire Code, International Fuel Gas Code, International Mechanical Code, International Plumbing Code, International Property Maintenance Code, International Private Sewage Disposal Code, International Residential Code and NFPA 70. Any alterations or repairs to existing structures made solely in order to improve accessibility shall comply with the provisions for alterations or repairs in this Code, provided however, that nothing in this Code shall require the entire existing structure to be brought into current code compliance. Any exterior site modifications that are required by this Code as a result of the alterations or repairs may be deferred for a period of up to 5 years provided however, that such are not required by Federal or State law.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.222 Section 3401.2 General, amended.

International Building Code, 2021 Edition, Section 3401.2 General, is hereby amended to read as follows:

33401.2 General. Additions to existing buildings or structures shall comply with the requirements of this code for new construction. Any addition to existing structures made solely to improve accessibility shall comply with the provisions for new construction in this Code, provided however, that nothing in this Code shall require the remaining existing structure to be brought into current code compliance. Any exterior site modifications that are required as a result of such addition may be deferred for a period of up to 5 years.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.230 Appendix C, Group U-Agricultural Buildings, adopted.

International Building Code, 2021 Edition, Appendix C, Group U-Agricultural Buildings, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.240 Appendix D, Fire Districts, adopted and amended. Added

International Building Code, 2021 Edition, Appendix D, Fire Districts, is hereby adopted and Sections D101.1.1.1 is hereby added to read as follows: The Fire District shall include such territory as defined herein.

D101.1.1.1 Fire District No. 1. Fire District No. 1 shall include the following portion of the City of El Paso, which is more particularly described by metes and bounds, as follows:

Beginning at the intersection of the east line of Santa Fe Street with the south line of Missouri Street; Thence northeasterly along the south line of Missouri Street to the west line of Campbell Street; Thence southeasterly and southerly along the west line of Campbell Street to the north line of Overland Street; Thence westerly along the north line of Overland Street to the west line of El Paso Street; Thence southerly along the west line of El Paso Street to the north line of Overland Street; Thence westerly along the north line of Overland Street to the east line of Santa Fe Street; Thence northerly and northwesterly along the east line of Santa Fe Street to the point of beginning at the south line of Missouri Street.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.250 Appendix E, Supplementary Accessibility Requirements, adopted.

International Building Code, 2021 Edition, Appendix E, Supplementary Accessibility Requirements, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.252 Appendix F, Rodent proofing, adopted.

International Building Code, 2021 Edition, Appendix F, Rodent Proofing, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.254 Appendix G, Flood Resistant Construction, adopted.

International Building Code, 2021 Edition, Appendix G, Flood Resistant Construction, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.260 Appendix I, Patio Covers, adopted.

International Building Code, 2021 Edition, Appendix I, Patio Covers, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.262 Appendix J, Grading, adopted.

International Building Code, 2021 Edition, Appendix J, Grading, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.270 Appendix K, Administrative Provisions, adopted.

International Building Code, 2021 Edition, Appendix K, Administrative Provisions, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.280 Appendices.

International Building Code, 2021 Edition, Appendices.

The appendices unless specifically adopted or referenced are retained as administrative guidance aids.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.290 Conflicting ordinances.

All ordinances and parts of ordinances in conflict with the provisions of this chapter are hereby repealed.
(Ord. No. 019528, § 1, 8-1-2023)

18.08.300 Violations and Penalties.

Any person, firm, corporation or agent who shall violate a provision of this Code or of the technical codes, or fail to comply therewith, or with any of the requirements thereof, or who shall erect, construct, alter, install, demolish or move any structure, electrical, gas, mechanical or plumbing system, or has erected, constructed, altered, repaired, moved or demolished a building, structure, electrical, gas, mechanical or plumbing system; in violation of a detailed statement or drawing submitted and permitted thereunder, shall be deemed guilty of a misdemeanor and punished by a fine not to exceed two thousand dollars. Each such person shall be deemed guilty of a separate offense for each and every day or portion thereof during which any violation of any of the provisions of this Code or of the technical codes is committed or continued.
(Ord. No. 019528, § 1, 8-1-2023)

This chapter may be cited as the "Residential Code."
(Ord. No. 019528, § 1, 8-1-2023)

18.10.020 Adoption.

The book entitled "International Residential Code, For One- and Two-Family Dwellings" 2021 Edition, a copy of which authenticated by the City Clerk is on file in the City Clerk's Office, is adopted as the Residential Code of the City, as fully as if copied at length in this chapter, but with the amendments set forth in this chapter and Chapter 18.02, the Building and Administrative Code of the City of El Paso.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.030 Section R101.2 Scope.

International Residential Code, 2021 Edition, R101.2 Scope, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.040 Section R105.2 Work exempt from permit.

Exemption from permit requirements of this code shall not be deemed to grant authorization for any work to be done in any manner in violation of the provisions of this code or any other laws or ordinances of this jurisdiction. Permits shall not be required for the following construction work:

Building:

1. One-story detached accessory storage building, canopy or structure, located in the rear yard, less than two hundred square feet in floor area and not within 5 feet of another structure, eave to eave. This exemption shall be restricted to only one accessory building within a site.

2. Masonry landscape walls and fences not over forty-two inches high, completely within the subject property and meeting zoning requirements. Where there is a difference in elevation between abutting properties or property lines, the height measurement shall be taken from the high side of the wall, exclusive of retaining walls.

a. Chain link or wrought iron fences not over six feet high, completely within the subject property and meeting zoning requirements.

3. Concrete walks, slabs on grade and driveways not more than thirty inches above grade, that are not over a basement or story below; and that will not serve as foundation or structural support for future construction, and are not located in public right-of-way.

4. Ordinary minor nonstructural repair work such as painting, papering, siding and similar finish work.

5. Movable cases, cabinets, counters, and partitions not over five feet nine inches high that do not establish a corridor.

6. Swimming pools, wading pools or ponds that are in-ground or above ground containing a body of water less than twenty-four inches in depth and less than five thousand gallons of water.

7. Replacement of less than twenty-five percent of existing roof covering on residential structures only.

8. Swings and other playground equipment.

Mechanical:

1. Portable heating appliances.

2. Portable ventilation equipment.

3. Portable cooling units.

4. Steam, hot or chilled water piping within any heating or cooling equipment regulated by the technical codes.

5. Replacement of any part which does not alter its approval or make it unsafe.

6. Portable evaporative coolers.

7. Self-contained refrigeration systems containing ten pounds (4.54 kg) or less of refrigerant and actuated by motors of one horsepower (746 W) or less.

Electrical:

1. Wiring devices or equipment installed by telephone, telegraph or other public service corporations used solely for the transmission of two-way communication.

2. Portable appliances or devices conforming to the electrical code, for operation from a receptacle outlet, provided such appliances are rated at no more than eighty percent of the branch circuit overprotective device.

3. Replacing or repairing flash or snap switches, receptacles, drop cords, replacing fuses, changing lamp sockets, or any other minor repairs of joints in wiring, fixtures, devices or equipment.

4. Ceiling fans, light fixtures, receptacle outlets or similar devices added onto an existing electrical circuit which has adequate capacity for the additional load in a one- or two-family residence; provided, however, that the work is performed by:

a. A homeowner, on property that is their primary residence; or

b. A master, journeyman or maintenance electrician licensed in accordance with Section 18.02.104.6.

Plumbing:

1. The stopping of leaks in drains, water, soil, waste or vent pipe; provided, however, that if any concealed trap, drainpipe, water, soil, waste or vent pipe becomes defective and it becomes necessary to remove and replace the same with new material, such work shall be considered as new work and a permit shall be obtained and inspection made as provided in this code.

2. The clearing of stoppages or the repairing of leaks in pipes, valves or fixtures, and the removal and reinstallation of water closets, provided such repairs do not involve or require the replacement or rearrangement of valves, pipes or fixtures.

(Ord. No. 019528, § 1, 8-1-2023)

18.10.050 Section R301.2 Climatic and geographic design criteria, amended.

International Residential Code, 2021 Edition, Section R301.2 Climatic and Geographic Design Criteria is hereby amended by completing Table 301.2(1), Climatic and Geographic Design Criteria, to read as follows:

Table R301.2(1)
Climatic and Geographic Design Criteria

Ground Snow Load	Wind Design				Seismic Design Category[f]	Subject To Damage From			Ice Barrier Underlayment Required[h]	Flood Hazards[g]	Air Freezing Index[i]	Mean Annual Temp[j]

(Ord. No. 019528, § 1, 8-1-2023)

18.10.050.1 Section R302.1 Exterior walls, amended.

International Residential Code, 2021 Edition, Section R302.1, Exterior walls, is hereby amended to add the following exceptions to read as follows:

6. Zero lot line properties where all of the following apply:

a. A minimum of 10 feet is provided between structures; and

b. Glazing is limited to a height of not less than 14 feet from grade level; and

c. Glazing is not more than 10% of the wall; and

d. Openings are prohibited; and

e. Where eaves are present they shall not extend more than 12 inches from the wall (including any required gutters) and eaves shall be fire rated.

7. Where all structures are provided with sprinkler systems.

(Ord. No. 019528, § 1, 8-1-2023)

18.10.060 Section R303.10 Required heating, amended.

International Residential Code, 2021 Edition, Section R303.8, Required heating, is hereby amended to read as follows:

R303.10 Required heating and cooling. Interior spaces intended for human occupancy shall be

provided with active or passive space-heating and cooling systems capable of maintaining an indoor temperature between 68 F (20 C) and 90 F at a point 3 feet above the floor and 2 feet from exterior walls in all habitable spaces. The installation of portable space heaters shall not be used to achieve compliance with this section.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.070 Reserved.

18.10.080 Section R313 Automatic Fire Sprinkler Systems, deleted.

International Residential Code, 2021 Edition, Section R313, Automatic Fire Sprinkler Systems, is hereby deleted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.090 Section R319 Site Address, amended.

International Residential Code, 2021 Edition, Section R319, Site Address, is hereby amended to read as follows:

R319 Site Address.

R319.1 Building Numbering.

R319.1.1 Definitions.

For the purpose of administering the numbering of buildings, the following definitions shall apply:

1. "Building Numbering" means those numbers and/or letters as may be needed to identify building(s) at a municipal street address.

2. "Municipal Street Address" means the building numbering used in conjunction with the street name and assigned by the Planning Division of the City of El Paso for the purposes of identifying individual properties.

3. "Prominently Displayed" means that which is uniformly located, readily noticeable, and easily readable from the street during normal daytime atmospheric conditions by a person having normal vision.

R319.1.2 Municipal Street Address Identification. Building numbering shall be displayed on all buildings for which a municipal street address has been assigned. In order to provide for the prominent display and uniform location of municipal street addresses, residential building numbering shall comply with the following:

1. Building numbering shall be displayed in characters having a minimum height of four (4) inches.

2. For properties fronting on a street with curbs, building numbering shall be mounted or painted on the face of the curb in close proximity to the entry driveway. In the case of a corner property fronting on two streets with the driveway located on the street that is not the street name of the municipal street address, the building numbering shall be mounted or painted in a prominent location on the face of the curb fronting on the addressed Street.

3. For other properties, building numbering shall be located on the building wall fronting the addressed street or on another permanent structure that fronts on the addressed street and is closer to the street than the building wall.

4. It is recommended, but not required, that building numbering for residential buildings meet the requirements of building numbering for other buildings described in Chapter 18.08.

R319.1.3 Administration and Enforcement. The requirements of this Section shall be administered as part of the building permit and inspection process. The building official shall refuse the issuance of a final inspection and certificate of occupancy unless the building numbering has been provided as required by this Section.

R319.1.4 Alternate Building Numbering Location. The building official shall be authorized to approve alternate location(s) for building numbering required under this Section when the owner of the property satisfactorily demonstrate that the alternate location(s) provide(s) an equivalent degree of visibility and readability.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.100 Section R320 Accessibility, deleted.

International Residential Code, 2021 Edition, Section R320, Accessibility, is hereby deleted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.110 Section R506.1 General, amended.

International Residential Code, 2021 Edition, Section R506.1, General, is hereby amended to read as follows:

R506.1 General. Concrete slab-on-ground floors shall be a minimum of 3.5 inches (89 mm) (for expansive soils, see Section R403.1.8). The specified compressive strength of concrete shall be as set forth in Section R402.2.

Slabs shall be constructed with control joints having a depth of at least one-fourth the slab thickness, and joints shall be spaced at intervals not more than 30 feet in each direction and slabs not rectangular in shape shall have control joints across the slab at points of offset, if offset exceeds 10 feet.

Exception: Control joints are not required or may exceed 30-foot intervals where welded wire fabric or equivalent is provided in accordance with Table 506. The welded fabric or equivalent material shall be placed at mid-depth of the slab or 2 inches from the top surface for slabs more than 4 inches in thickness.

Table 506

Maximum Dimension of Slab or Distance Between Control Joints (Feet) Slab Thickness (Inches)						WWF Wire Spacing (Inches)	WWF Wire Size Designation
3.5	4.0	4.5	5.0	5.5	6.0		
42	36	32	29	26	24	6x6	W1.4 x W1.4
59	52	42	42	38	35	6x6	W2.0 x W2.0
86	75	60	60	55	50	6x6	W2.9 x W2.9

Values in table are based on reinforcement with yield strength of 65,000 psi.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.120 Section R802.10.2 Design, amended.

International Residential Code, 2021 Edition, Section R802.10.2 Design, is hereby amended to add the following sentence at the end of the section, to read as follows:

R802.10.2 Design. The truss design drawings shall be prepared, signed, and sealed by a registered professional engineer, licensed in Texas.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.130 Reserved.

18.10.140 Section M1201.2 Application, amended.

International Residential Code, 2021 Edition, Section M1201.2 Application, is hereby amended to read as follows:

M1201.2 Application. In addition to the general administrative requirements of Chapter 18.02, Building and Construction Administrative Code, the provisions of this Chapter shall also apply to the requirements of Chapters 13 through 24.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.150 Section M1413 Evaporative Cooling Equipment, amended.

International Residential Code, 2021 Edition, Section M1413, Evaporative Cooling Equipment, is hereby amended to read as follows:

M1413 Evaporative Cooling.

M1413.1 General. Every evaporative cooler installed in, on or adjacent to any building as a part of a cooling or air conditioning system shall comply with these provisions.

M1413.2 Location.

M1413.2.1 No evaporative cooler shall be installed so as to obstruct any required means of egress nor reduce passage of required light and air.

M1413.2.2 Evaporative cooler installations that extend beyond the exterior line of a structure shall comply with Building Code and Zoning Regulations as to allowable projection and overhead clearance. Evaporative cooler structures which project

more than eighteen inches (18") into a traveled right-of-way shall maintain a minimum clearance of fourteen feet (14') above grade.

M1413.3 Materials of Construction. M1413.3.1 All evaporative cooler blowers and cabinets, including pan, corner posts, top and pad frames, shall be constructed of non-combustible materials or approved plastics as defined below. Evaporative pads and interior water circulatory systems need not be of non-combustible materials.

M1413.3.2 Approved Plastics. Approved plastic or reinforced plastic materials shall be those which are classified 94-5V in accordance with Underwriters Laboratory Test 94-5V "Vertical Burning Test for Classifying Materials".

M1413.3.3 Evidence of Compliance. Evidence of compliance with the requirements of Section M1413.3.1 to 1413.3.2 shall accompany all equipment installed within the City of El Paso.

M1413.4. Electrical Connections. Electrical components and installations shall conform to the El Paso Electrical Code. The blower motor and water recirculation pump shall be internally protected to shut-off automatically in the event of an electrical overload or excessive temperature. The maximum shut-off temperature shall be: (1) blower motor, 105°C; and (2) pump, 135°C.

M1413.5 Plumbing Connections. Water connections and materials shall conform to the El Paso Plumbing Code.

M1413.6 Structural Supports. Evaporative cooler fastenings, including mounts, platforms and frames, shall be of non-combustible material and shall be of sufficient size and strength to meet the requirements of the International Building Code.

M1413.7 Water Supply.

M1413.7.1 Bleeder Lines Prohibited. New and replacement evaporative coolers shall not be provided or installed with bleeder lines.

M1413.7.2 Automatic water draining System Required. An automatic water draining system shall be provided for all evaporative coolers for which the cooler manufacturer requires the use of a bleeder line. The automatic water draining system shall operate on a periodic basis of not less than a 4-hour interval between operation times and shall be capable of fully draining the water from the cooler pan. The automatic draining system shall either discharge into the building drainage system through an indirect waste piping system complying with Section 802 of the Plumbing Code or shall be conducted to the exterior of the building or structure, and shall be discharged so that the effluent is used for watering landscaping or other outdoor vegetation. In no event shall drainage from coolers be wasted into or upon the public way.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.155 Section M1601.1 (9), added.

Flexible air ducts in residential installations are limited to 10 feet in length unless an engineered design is provided.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.160 Section G2404.1.2 Manufactured homes, added.

International Residential Code, 2021 Edition, Section G2404.1.2, Manufactured Homes, is hereby added to read as follows:

G2404.1.2 Manufactured Homes. Appliance installations in manufactured housing meeting the requirements of the Texas Manufactured Housing Standards Act, or in industrialized housing or industrialized buildings meeting the requirements of the Texas Industrialized Housing and Building Act or bearing the Federal Compliance Plate (ANSI-A119.1), including the appliance connections and the fuel gas piping system, shall not be subject to the provisions of this Code except for the test provisions of Sections G2417.4.1 and G2417.4.2.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.170 Section G2412.2 (401.2) Liquefied petroleum gas storage, amended.

International Residential Code, 2021 Edition, Section G2412.2, Liquefied petroleum gas storage, is hereby amended to read as follows:

G2412.2 Liquefied Petroleum Gas.

G2412.2.1 Liquefied Petroleum Gas Storage. The storage system for liquefied petroleum gas shall be designed and installed in accordance with the Fire Code.

G2412.2.2 Liquefied Petroleum Gas Service. Liquefied Petroleum Gas systems shall not be installed in Group R1, R2, R3 and R4 occupancies when a natural gas utility supply pipe is available within 300 feet of the buildings.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.180 Section G2412.11 Meter location, added.

International Residential Code, 2021 Edition, Section G2412.11, Meter Location, is hereby added to read as follows:

G2412.11 Meter Location. A meter location, when required, shall be provided for the property or premises to be served. The location shall be such that the meter and connections are accessible in order that they may be read or changed. Space requirements, dimensions, and type of installation shall be acceptable to the gas company. Meter location will be determined by the utility company in conformance with their service franchise.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.190 Section G2415.3.1 Prohibited locations, added.

International Residential Code, 2021 Edition, Section G2415.3, Piping in concealed locations, is hereby amended to read as follows:

G2415.3 Piping in Concealed Locations. Portions of a piping system installed in concealed locations shall not have unions, tubing fittings, bushings, compression couplings and swing joints made by combinations of fittings.

Exceptions:

1. Tubing joined by brazing.
2. Fittings listed for use in concealed locations.

(Ord. No. 019528, § 1, 8-1-2023)

18.10.200 Section G2417.4 (406.4) Test pressure measurement, amended.

International Residential Code, 2021 Edition, Section G2417.4 Test Pressure Measurement, is hereby amended to read as follows:

G2417.4 Test Pressure Measurement. Test pressure shall be measured with a manometer or with a pressure-measuring device designed and calibrated to read, record, or indicate a pressure loss caused by leakage during the pressure test period. The source of pressure shall be isolated before the pressure tests are made. Mechanical gauges used to measure test pressures shall have a range such that the highest end of the scale is not greater than two (2) times the test pressure. Tests requiring a pressure of 10 psi or less shall utilize a testing gauge having increments of 0.20 psi or less. Tests requiring a pressure greater than 10 psi but less than or equal to 60 psi shall utilize a testing gauge having increments of 1 psi or less.

G2417.4.1 Test Pressure. Low pressure gas piping shall withstand a pressure of at least 10 psi or 16 inches of mercury. Higher pressure gas piping shall withstand a pressure of at least 60 psi on a clock gauge with a printed record chart. For the purposes of this section, "low pressure" shall mean pressure equal to or less than 0.5 psi.

G2417.4.2 Test duration. Test duration shall be not less than 15 minutes for low pressure gas piping and not less than 4 hours for higher pressure gas piping.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.210 Section P2501.2 Application, amended.

International Residential Code, 2021 Edition, Section P2501.2 Application, is hereby amended to read as follows:

P2501.2 Application. In addition to the general administrative requirements of Chapter 18.02, Building and Construction Administrative Code of the El Paso City Code, the provisions of this Chapter shall also apply to the plumbing requirements of Chapters 25 through 32.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.220 Section P2602.1 General, amended.

International Residential Code, 2021 Edition, Section P2602.1, General, is hereby amended to read as follows:

P2602.1 General. The water distribution and drainage system of any building or premises where

plumbing fixtures are installed shall be connected to a public water supply and to a public sewer system.

Exception:

1. Bathtubs, showers, lavatories, clothes washers and laundry sinks shall not be required to discharge to the sanitary drainage system where such fixtures discharge to an approved gray water recycling system. Evaporative coolers automatic water draining systems may discharge to an approved gray water recycling system.

2. When a public sewer is not available within 300 feet of the building for use, an individual or private sewage disposal system may be utilized provided that such system is designed, installed and maintained in accordance with the requirements of Chapter 18.21 of the Municipal Code.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.230 Section P2603.5.2 Protection of Water Service Entrance, added.

International Residential Code, 2021 Edition, Section P2903.1.1 Protection of Water Service Entrance, is hereby added to read as follows:

P2603.5.2 Protection of Water Service Entrance. Water service entrance and risers to all structures shall be on the heated side of a conditioned space.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.240 Section P2603.5.3 Plumbing within exterior walls, added.

International Residential Code, 2021 Edition, Section 2903.1.2 Plumbing within exterior walls, is hereby added to read as follows:

P2603.5.3 Plumbing within exterior walls. Placement of plumbing within exterior walls is prohibited unless the walls are at minimum, 2 by 6 walls and adequate provision is made to protect such pipes from freezing in accordance with Section 305.6 of the International Plumbing Code. Placement of water lines in ceiling areas is prohibited unless the water lines are placed on the warm side with a minimum of 10 inch insulation on the exterior/roof side of the structure.

Exceptions:

a. A service entrance may enter a non-conditioned space provided that the riser/service entrance is within an approved, heated valve protective enclosure also known as a "hot box", or

b. Cross linked polyethylene, also known as PEX, or approved equal, is used as the service entrance material, and

c. Any hose bibs installed shall be freeze proof.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.250 Section P2709.2 Lining required, amended.

International Residential Code, 2021 Edition, Section P2709.2, Lining required, is hereby amended to read as follows:

P2709.2 Lining Required. All shower receptors shall be provided with an approved lining, except as noted herein. The adjoining walls and floors, enclosing field-constructed shower receptors shall be lined with copper or other approved materials listed in this Code, extending not less than three (3) inches beyond or around the rough jambs and not less than three (3) inches above finished thresholds. Recessed shower compartments need not be lined, provided the compartment is formed of concrete, is recessed a minimum of four (4) inches below the adjacent floor level, and the concrete is not less than three and one-half (3½) inches thick with an ultimate compressive strength of not less than two thousand (2000) pounds per square inch.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.260 Section P2709.2.3 Hot-mopping, deleted.

International Residential Code, 2021 Edition, Section P2709.2.3, Hot-Mopping, is hereby deleted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.270 Reserved.

18.10.280 Section P2903.3.3 Accessibility, added.

International Residential Code, 2021 Edition, Section P2903.3.3, Accessibility, is hereby added to read as follows:

2903.3.2 Accessibility. Installation shall be such as to make the regulator accessible without excavating or removing permanent structural or finished portions of the structure.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.290 Section P2903.12 Under concrete slabs, added.

International Residential Code, 2021 Edition Section P2903.12, Under Concrete Slabs, is hereby added to read as follows:

P2903.12 Under Concrete Slabs. Inaccessible water distribution piping under slabs shall be copper water tube minimum Type L, brass, ductile iron pressure pipe, chlorinated polyvinyl chloride (CPVC) or crosslinked polyethylene (PEX) plastic pipe or tubing—all to be installed with approved fittings or bends. The minimum pressure rating for plastic pipe or tubing installed under slabs shall be 100 psi at 180°F.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.300 Reserved.

18.10.301 Section P3005.2.3 Building drain and building sewer junction, amended.

International Residential Code, 2021 Edition, Section P3005.2.3, Building Drain and Building Sewer Junction, is hereby amended to read as follows:

P3005.2.3 Building Drain and Building Sewer Junction. There shall be a cleanout within 10 feet of the junction of the building drain and the building sewer. The cleanout shall be outside the building and shall be brought up to the finished ground level. An approved two-way cleanout is allowed to be used at this location to serve as a required cleanout for both the building drain and building sewer.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.310 Part VIII Electrical, deleted.

International Residential Code, 2021 Edition, Part VIII-Electrical, is hereby deleted in its entirety and the following shall substitute in its stead:

Chapter 18.16 Adopted. The provisions of Chapter 18.16, City of El Paso Electrical Code, shall regulate the installation of electrical systems, equipment and components, indoors and outdoors that are within the scope of this Code, including services, power distribution systems, fixtures, appliances, devices and appurtenances.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.311 Appendix AA, Sizing and Capacities of Gas Piping.

International Residential Code, 2021 Edition Appendix AA, Sizing and Capacities of Gas Piping is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.312 Appendix AB, Sizing of Venting Serving Appliances Equip with Draft Hoods, Category I Appliances, and Appliances listed for Use with Type B Vents.

International Residential Code, 2021 Edition Appendix AB, Sizing of venting Serving Appliances Equip with Draft Hoods, Category I Appliances, and Appliances for Use with Type B Hoods, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.313 Appendix AC, Exit Terminals of Mechanical Draft and Direct-Vent Venting Systems.

International Residential Code, 2021 Edition Appendix AC, Exit terminals of Mechanical Draft and Direct-Vent Venting Systems, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.320 Appendix AE, Manufactured Housing Used as Dwellings, adopted.

International Residential Code, 2021 Edition, Appendix AE, Manufactured Housing Used as Dwellings is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.321 Appendix AG, Piping Standards for Various Applications.

International Residential Code, 2021 Edition Appendix AG, Piping Standards for Various Applications, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.330 Section AE101.1 General, amended.

International Residential Code, 2021 Edition, Section AE101.1 General, is hereby amended to read as follows:

AE101 General. These provisions shall be applicable only to a manufactured home used as a single-dwelling unit and shall apply to the following:

1. Construction, alteration and repair of any foundation system which is necessary to provide for the installation of a manufactured home unit.

2. Construction, installation, addition, alteration, repair or maintenance of the building service equipment which is necessary for connecting manufactured homes to water, fuel or power supplies and sewage systems.

3. Alterations, additions or repairs to existing manufactured homes. The construction, alteration, moving, demolition, repair and use of accessory buildings and structures and their building service equipment shall comply with the requirements of the Municipal Code.

These provisions shall not be applicable to the design and construction of manufactured homes nor shall they be deemed to authorize either modifications or additions to manufactured homes where otherwise prohibited.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.340 Reserved.

18.10.350 Appendix AH, Patio Covers, adopted.

International Residential Code, 2021 Edition, Appendix AH, Patio Covers, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.360 Appendix AK, Sound Transmission, adopted.

International Residential Code, 2021 Edition, Appendix AK, Sound Transmission, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.361 Appendix AM, Home Day Care—R-3 Occupancy.

International Residential Code, 2021 Edition Appendix AM, Home Day Care—R-3 Occupancy, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.362 Appendix AN, Venting Methods.

International Residential Code, 2021 Edition Appendix AN, Venting methods, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.363 Appendix AP, Sizing of Water Piping Systems.

International Residential Code, 2021 Edition Appendix AP, Venting methods, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.364 Appendix AQ, Tiny Houses.

International Residential Code, 2021 Edition Appendix AQ, Tiny Houses, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.365 Appendix AR, Light Straw Construction.

International Residential Code, 2021 Edition Appendix R, Light Straw Construction, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.366 Appendix AS, Strawbale Construction.

International Residential Code, 2021 Edition Appendix AS, Strawbale Construction, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.367 Appendix U, Solar ready Provisions—Detached One & Two Family Dwellings, Multiple Single Family Dwellings (Townhouses)

International Residential Code, 2021 Edition Appendix U, Solar-Ready Provisions, Detached One and Two Family Dwellings, Multiple Family Dwellings (Townhouses), is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.370 Reserved.

18.10.380 Appendices.

International Residential Code, 2021 Edition, Appendices unless specifically adopted or referenced are retained as administrative guidance aids.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.390 Conflicting ordinances.

All ordinances and parts of ordinances in conflict with the provisions of this chapter are hereby repealed as follows: Ordinance No. 014729 dated 12/12/2000, Ordinance No. 15967 dated 12-14-2004 and Ordinance No. 18510 dated 5-31-2016.
(Ord. No. 019528, § 1, 8-1-2023)

18.10.400 Violations and Penalties.

Any person, firm, corporation or agent who shall violate a provision of this Code or of the technical codes, or fail to comply therewith, or with any of the requirements thereof, or who shall erect, construct, alter, install, demolish or move any structure, electrical, gas, mechanical or plumbing system, or has erected, constructed, altered, repaired, moved or demolished a building, structure, electrical, gas, mechanical or plumbing system; in violation of a detailed statement or drawing submitted and permitted thereunder, shall be deemed guilty of a misdemeanor and punished by a fine not to exceed two thousand dollars. Each such person shall be deemed guilty of a separate offense for each and every day or portion thereof during which any violation of any of the provisions of this Code or of the technical codes is committed or continued.
(Ord. No. 019528, § 1, 8-1-2023)

Chapter 18.12

MECHANICAL CODE*

Sections:

18.12.010 Short title.

18.12.020 Adoption.

18.12.025 Reserved.

18.12.030 Section 309.1 Space-heating systems, amended.

18.12.040 Section 507.2.6 Clearance for Type I hood, amended.

18.12.040.1 Section 508.1.1 Makeup air temperature, amended.

18.12.050 Section 510.4 Independent system, Exception 9, added.

18.12.060 Section 603.6.1.1 Duct length, amended.

18.12.070 Section 908.6, Drainage, amended.

18.12.080 Section 928, Evaporative cooling, amended.

18.12.090 Appendix A is adopted in its entirety.

18.12.100 Conflicting ordinances.

18.12.010 Short title.

This chapter may be cited as the "Mechanical Code."
(Ord. No. 019528, § 1, 8-1-2023)

18.12.020 Adoption.

The book entitled "International Mechanical Code," 2021 Edition, a copy of which authenticated by the City Clerk is on file in the City Clerk's Office, is adopted as the Mechanical Code of the City, as fully as if copied at length in this chapter, but with the changes set forth in this chapter and Chapter 18.02, the Building and Administrative Code of the City of El Paso.
(Ord. No. 019528, § 1, 8-1-2023)

***Editor's note—**Ord. No. 019528, § 4, adopted Aug 1, 2023, amended Ch.18.12 in its entirety to read as set out herein. The former Ch. 18.12, §§ 18.12.010—18.12.100, pertained to similar subject matter and derived from Ord. No. 18511, § 1, adopted May 31, 2016.

18.12.025 Reserved.

18.12.030 Section 309.1 Space-heating systems, amended.

International Mechanical Code, 2021 Edition, Section 309.1 Space-heating systems, is hereby amended to read as follows:

309.1 Space-heating and cooling systems. Interior spaces intended for human occupancy shall be provided with active or passive space-heating and cooling systems capable of maintaining an indoor temperature between 68°F (20°C) and 90°F at a point 3 feet above the floor in all habitable spaces. The installation of portable space heaters shall not be used to achieve compliance with this section.

Exceptions:

1. Interior spaces where the primary purpose is not associated with human comfort.

2. Group F, H, S and U occupancies
(Ord. No. 019528, § 1, 8-1-2023)

18.12.040 Section 507.2.6 Clearance for Type I hood, amended.

International Mechanical Code, 2021 Edition, Section 507.2.6 Clearances for Standard Type I and Type I labeled for zero clearance hoods is hereby amended to read as follows:

507.2.6 Clearances for Standard Type I and Type I labeled for zero clearance hoods. All Type I hoods shall be installed with a clearance to combustibles of not less than 18 inches (457 mm).

Exception: Clearance shall not be required from ⅝-inch or thicker Type X gypsum wallboard, ½-inch or thicker (12.7 mm) Type C gypsum wallboard or ½-inch (12.7 mm) or thicker cementitious wallboard attached to noncombustible structures provided that a smooth, cleanable, nonabsorbent and noncombustible material is installed between the hood and the gypsum or cementitious wallboard over an area extending not less than 18 inches (457 mm) beside and above the hood and shall extend to the floor below the hood. There shall be no combustible structure

below the hood or within 18-inches in any direction, below the hood. Reduced clearances shown on hood tags are not approved.
(Ord. No. 019528, § 1, 8-1-2023)

18.12.040.1 Section 508.1.1 Makeup air temperature, amended.

International Mechanical Code, 2021 Edition, Section 508.1.1 Makeup air temperature, is hereby amended to read as follows:

508.1.1 Makeup air temperature. The temperature difference between makeup air and the air in the conditioned space shall not exceed 10°F (6°C) for heating and 15° for cooling except where the added heating and cooling loads or the makeup air do not exceed the capacity of the HVAC system.
(Ord. No. 019528, § 1, 8-1-2023)

18.12.050 Section 510.4 Independent system, Exception 9, added.

International Mechanical Code, 2021 Edition, Section 510.4 Independent system, is hereby amended to add Exception 9 at the end of the section, to read as follows:

510.4 Independent system.

Exception:

9. Contaminated air shall not be recirculated. Air containing explosive or flammable vapors, fumes or dusts; flammable, highly toxic or toxic gases; or radioactive materials shall be considered to be contaminated.
(Ord. No. 019528, § 1, 8-1-2023)

18.12.060 Section 603.6.1.1 Duct length, amended.

International Mechanical Code, 2021 Edition, Section 603.6.1.1 Duct length, is hereby amended to read as follows:

603.6.1.1 Duct length. In commercial Installations Flexible air ducts and connectors shall be limited to ten (10) feet in maximum length.

603.6.1.2 Duct length. In residential Installations flexible duct, if engineered design, the length will be unlimited.
(Ord. No. 019528, § 1, 8-1-2023)

18.12.070 Section 908.6, Drainage, amended.

International Mechanical Code, 2021 Edition, Section 908.6, Drainage, is hereby amended to read as follows:

908.6 Drainage. Water from such units shall be discharged into an approved disposal system in accordance with the Plumbing Code. All water supply, waste water and connections shall comply with the requirements of the International Plumbing Code.

908.6.1 All new installations or replacements of water-cooled refrigeration systems 3 H.P. or greater, governed by this Code or the International Plumbing Code, shall be provided with an effective recirculation system.

908.6.2 If an automatic waste system is provided for draining or flushing the system, it shall conform with Chapter 8 of the International Plumbing Code, as amended, and shall be piped to an approved receptacle unless other disposition is authorized by the building official. In no event shall drainage be wasted into or upon the public way.
(Ord. No. 019528, § 1, 8-1-2023)

18.12.080 Section 928, Evaporative cooling, amended.

International Mechanical Code, 2021 Edition, Section 928 Evaporative Cooling, is hereby amended to read as follows:

928.1 General. Every evaporative cooler installed system shall comply with these provisions.

928.2.1. No evaporative cooler shall be installed so as to obstruct any required means of egress nor reduce passage of required light and air.

928.2.2. Evaporative cooler installations which extend beyond the exterior line of a structure shall comply with Building Code and Zoning Regulations as to allowable projection and overhead clearance. Evaporative cooler structures which project more than eighteen inches (18") from a building shall maintain a minimum clearance of fourteen feet (14') above areas subject to vehicle traffic.

928.3 Materials of Construction.

928.3.1. All evaporative cooler blowers and cabinets, including pan, corner posts, top and pad frames, shall be constructed of non-combustible materials or approved plastics as defined below. Evaporative pads and interior water circulatory systems need not be of non-combustible materials.

928.3.2 Approved Plastics. Approved plastic or reinforced plastic materials shall be those which are classified as 94-5V in accordance with Underwriters Laboratory Test 94-5V "Vertical Burning Test for Classifying Materials".

928.3.3 Evidence of Compliance. Evidence of compliance with the requirements of Section 926.3.1 to 311.3.2 shall accompany all equipment installed within the City of El Paso.

928.4 Electrical Connections. Electrical components and installations shall conform to the El Paso Electrical Code. The blower motor and water recirculation pump shall be internally protected to shut-off automatically in the event of an electrical overload or excessive temperature. The maximum shut-off temperature shall be: (1) blower motor, 105°C; and (2) pump, 135°C.

928.5 Plumbing Connections. Water connections and materials shall conform to the El Paso Plumbing Code.

928.6 Structural Supports. Evaporative cooler fastenings, including mounts, platforms and frames, shall be of non-combustible material and shall be of sufficient size and strength to meet the requirements of the International Building Code.

928.7 Water Supply.

928.7.1 Bleeder Lines Prohibited. New and replacement evaporative coolers shall not be provided or installed with bleeder lines.

928.7.2 Automatic water draining System Required. An automatic water draining system shall be provided for all evaporative coolers for which the cooler manufacturer requires the use of a bleeder line. The automatic water draining system shall operate on a periodic basis of not less than a 4-hour interval between operation times and shall be capable of fully draining the water from the cooler pan. The automatic draining system shall either discharge into the building drainage system through an indirect waste piping system complying with Section 802 of the International Plumbing Code, as amended, or shall be conducted to the exterior of the building or structure, and shall be discharged so that the effluent is used for watering landscaping or other outdoor vegetation. In no event shall drainage from coolers be wasted into or upon the public right-of-way.
(Ord. No. 019528, § 1, 8-1-2023)

18.12.090 Appendix A is adopted in its entirety.

International Mechanical Code, 2021 Edition, Appendix A, is adopted.
(Ord. No. 019528, § 1, 8-1-2023)

18.12.100 Conflicting ordinances.

All ordinances and parts of ordinances in conflict with the provisions of this chapter are hereby repealed as follows: Ordinance No. 014732 dated 12-12-2000 and Ordinance No. 15965 dated 12-14-2004.
(Ord. No. 019528, § 1, 8-1-2023)

Chapter 18.16

ELECTRICAL CODE*

Sections:

18.16.010 Short title.

18.16.020 Adoption.

18.16.030 Article 80 Evaporative Coolers, added.

18.16.040 Section 210.70 Lighting Outlets Required (A)(2)(b), amended.

18.16.050 Section 210.70 Lighting Outlets Required (A)(3), added.

18.16.060 Section 210.71 Additional Outlets, added.

18.16.080 Reserved.

18.16.090 Section 230.28 Service Masts as Supports, amended.

18.16.110 Section 230.70 General, (A)(1), amended.

18.16.120 Section 230.70.1 "Six Hand Movement", added.

18.16.230 Section 406.8 Receptacles in Damp or Wet Locations (G) Air Condition Equipment, added.

18.16.240 Section 410.36 Means of Support (B) Suspended Ceilings, amended.

18.16.250 Section 422.12 Central Heating Equipment, amended.

18.16.260 Section 590.4 General (K) Temporary Service Poles, added.

18.16.270 Section 600.10 Portable or Mobile Signs, deleted.

18.16.280 Section 600.43 Miscellaneous Provisions, added.

18.16.290 Section 725.41 Class 1 Circuit Classifications and Power Source Requirements (C) Transformers for Class 2 and Class 3 low voltage Circuits, added.

18.16.300 Errata, adopted.

18.16.310 Conflicting ordinances.

***Editor's note—**Ord. No. 019528, § 5, adopted Aug 1, 2023, amended Ch. 18.16 in its entirety to read as set out herein. The former Ch. 18.16, §§ 18.16.010—18.16.310, pertained to similar subject matter and derived from Ord. No. 18512, § 1, adopted May 31, 2016.

18.16.010 Short title.

This chapter may be cited as the "Electrical Code".
(Ord. No. 019528, § 1, 8-1-2023)

18.16.020 Adoption.

The book entitled "NFPA 70 National Electrical Code," 2020 Edition, a copy of which authenticated by the City Clerk is on file in the City Clerk's Office is adopted as the Electrical Code of the City, as fully as if copied at length in this chapter, but with the changes set forth in this chapter and Chapter 18.02, the Building and Administrative Code of the City of El Paso.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.030 Article 80 Evaporative Coolers, added.

NFPA 70 National Electrical Code, 2020 Edition, Article 80 Evaporative Coolers, is hereby added to read as follows:

80.1 Evaporative Coolers. Evaporative cooler shall have their controls mounted in a metal box. Conductors -to the equipment.

80.2 Controls and Operating Mechanisms. In areas required by the Building Code to be accessible to persons with disabilities, the highest operable part of controls, receptacles and other operable equipment shall be placed within at least of one of the reach ranges specified in this section. Electrical and communications receptacles on walls shall be mounted no less than 15 in (380 mm) above the floor to the bottom of the box.

80.3 Forward Reach. If the clear floor space allows only forward approach to an object, the highest operable part of controls, receptacles and other operable equipment shall be placed not more than 48 in (1220 mm) above finished floor to the top of the box.

80.4 Side Reach. If the clear floor space allows only parallel approach to an object, the highest operable part of controls, receptacles and other operable equipment shall be placed not more than 54 in (1370 mm) above finished floor to the top of the box.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.040 Section 210.70 Lighting Outlets Required (A)(2)(b), amended.

NFPA 70 National Electrical Code, 2020 Edition, Section 210.70 Lighting Outlets Required, (A) Dwelling Units, (2) Additional Locations, (b) is hereby amended to read as follows:

210.70 Lighting Outlets Required. (A) Dwelling Units, (2) Additional Locations (b). For dwelling units, attached garages, and detached garages with electric power, at least one wall switch-controlled lighting outlet shall be installed to provide illumination on the exterior side of outdoor entrances or exits with grade level access. A vehicle door in a garage shall be considered as an outdoor entrance or exit.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.050 Section 210.70 Lighting Outlets Required (A)(3), added.

NFPA 70 National Electrical Code, 2020 Edition, Section 210.70 Lighting Outlets Required, (A) Dwelling Units, (3) Storage or Equipment Spaces, is hereby amended by adding the following sentence at the end of the paragraph:

210.70 Lighting Outlets Required. (A) Dwelling Units (3) Storage or Equipment Spaces.

Add: An attic shall be considered storage area if it has either a decked area or permanent access ladder.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.060 Section 210.71 Additional Outlets, added.

NFPA 70 National Electrical Code, 2020 Edition, Section 210.70C Additional Outlets, is hereby added to read as follows:

210.70C Additional Outlets. The following receptacle outlets shall be installed, in addition to those required by National Electrical Code, 2020 Edition, Sections 210-50 through 210-70:

(1) On wall areas over work benches, behind bars, serving counters, or other wall spaces where electrical signs or appliances may be used or installed, not less than one (1) receptacle outlet shall be installed for every six (6) feet or major fraction thereof (i.e., the second receptacle outlet shall be located a maximum of (nine) 9 feet from the beginning of the work bench, serving counter or wall space) from the edge measured horizontally along such wall parallel to the floor or ceiling.

(2) In lounges, taverns, bars or other establishments where electrical signs, appliances or similar devices may be placed on or attached to the ceiling, sufficient receptacle outlets shall be installed on the ceilings so that no point on such ceiling is more than twelve (12) feet from a receptacle outlet.

(3) In "mini-warehouse" units or similar storage occupancies designed to be leased or rented individually the following minimum requirements for lights and receptacles shall be provided:

Exterior lighting providing a minimum 2.0 foot-candle illumination at the ground level at the center of the entry door of each unit.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.080 Reserved.

18.16.090 Section 230.28 Service Masts as Supports, amended.

NFPA 70 National Electrical Code, 2020 Edition, Section 230.28, Service Masts as Supports, is hereby amended to read as follows:

230.28. Service Masts as Supports.

(a) Where a service mast is used for the support of service-drop conductors, it shall be of

rigid metal conduit or intermediate metal conduit supported and anchored to safely withstand the strain imposed by the service drop. All mast fittings shall be identified for use with service masts. Only power service-drop conductors shall be permitted to be attached to a service mast.

(b) All other service masts shall be of rigid metal conduit, intermediate metal conduit, or electrical metallic tubing.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.110 Section 230.70 General, (A)(1), amended.

NFPA 70 National Electrical Code, 2020 Edition, Section 230.70 General, (A) Location, (1) Readily Accessible Location, is hereby amended to read as follows:

230.70 General. (A) Location, (1) Readily Accessible Location.

(1) Readily Accessible Location.

(a) Services rated 800 amps or less. A load-break rated meter disconnect shall be installed on the exterior of the building or structure adjacent to and not more than five (5) feet from the meter. The service disconnecting means is allowed to meet this requirement if installed in compliance with this proximity requirement and the requirements of the NEC. If the service disconnecting means is located more than five feet from the meter, a separate and additional load-break rated meter disconnect that meets this proximity requirement is required on the supply (line) side of the service disconnecting means.

(b) Services rated over 800 amps. The service disconnecting means shall be located not more than five (5) feet, measured vertically and horizontally, from the point where the service conductors enter the building or structure.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.120 Section 230.70.1 "Six Hand Movement", added.

NFPA 70 National Electrical Code, 2020 Edition, Section 230.70.1, "Six Hand Movement", is hereby added to read as follows:

230.70.1 "Six Hand Movement".

"Six Hand Movement" rule will apply to switches or circuit breakers used to disconnect feeders only. A "main" switch or circuit breaker will be required ahead of any branch circuit overcurrent protection.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.230 Section 406.8 Receptacles in Damp or Wet Locations (G) Air Condition Equipment, added.

NFPA 70 National Electrical Code, 2020 Edition, Section 406.8 Receptacles in Damp or Wet Locations, is hereby amended to add paragraph (G) Air Condition Equipment, to read as follows:

406.8 Receptacles in Damp or Wet Locations.

(G) Air Condition Equipment.

Receptacles used solely for the maintenance of air condition equipment will not be required to have "In Use" type covers.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.240 Section 410.36 Means of Support (B) Suspended Ceilings, amended.

NFPA 70 National Electrical Code, 2020 Edition, Section 410.36 Means of Support, (B) Suspended Ceilings, is hereby amended to delete the last sentence as follows:

410.36 Means of Support, (B) Suspended Ceilings, Luminaires installed in suspended ceilings shall be securely attached to building structure from above at appropriate levels.
(Ord. No. 019528, § 1, 8-1-2023)

18.16.250 Section 422.12 Central Heating Equipment, amended.

NFPA 70 National Electrical Code, 2020 Edition, Section 422.12 Central Heating Equipment, is hereby amended to read as follows:

422.12 Central Heating Equipment. Central heating equipment other than fixed electric space-heating equipment shall be supplied by an individual branch circuit.

Exception 1: Auxiliary equipment, such as pump, valve, humidifier, or electrostatic air cleaner

directly associated with the heating equipment, shall be permitted to be connected to the same branch circuit.

Exception 2: Evaporative coolers may be supplied by the same individual branch circuit supplying the central heating equipment in residential occupancies only, provided the loads are non-coincidental.

(Ord. No. 019528, § 1, 8-1-2023)

18.16.260 Section 590.4 General (K) Temporary Service Poles, added.

NFPA 70 National Electrical Code, 2020 Edition, Section 590.4 General, is hereby amended to add paragraph (K) Temporary Service Poles, to read as follows:

590.4 General.

(K) Temporary Service Poles.

Temporary service poles shall be a minimum of four (4) inch by four (4) inch treated wood posts, or four (4) inch diameter round treated poles securely imbedded in the earth.

(Ord. No. 019528, § 1, 8-1-2023)

18.16.270 Section 600.10 Portable or Mobile Signs, deleted.

NFPA 70 National Electrical Code, 2020 Edition, Section 600.10 Portable or Mobile Signs, is hereby deleted in its entirety.

(Ord. No. 019528, § 1, 8-1-2023)

18.16.280 Section 600.43 Miscellaneous Provisions, added.

NFPA 70 National Electrical Code, 2020 Edition, Section 600.43 Miscellaneous Provisions, is hereby added to read as follows:

600.43 Miscellaneous Provisions.

(A) Sign circuits shall contain a copper grounding conductor deriving from the circuit's supply source; exterior locations shall terminate in a weatherproof box and cover. Taps in metallic raceways shall not be allowed as the grounding means.

(B) All sign installations shall maintain a clearance from adjacent power lines as follows:

Voltage—Line To Ground	H (ft.) Minimum Horizontal Clearance	V (ft.) Minimum Clearance Measured Either Diagonally or Vertically	V (ft.) Over or Under Catwalks Minimum Clearance Measured Either Diagonally or Vertically
Guy Wires and Neutrals	3	3	10.5
0—750 V Supply Cables Meeting Rule 230C2 and 230C3 NESC, 1997	3.5	3.5	11
0—750 V Open Conductors N.E.S.E. Rule 230C2 and 230C3	5.5	6	11.5
750V—22KV	7.5	8	13.5
Notes to table: 1. Signs should never hang over any adjacent power circuits. 2. Voltages are line to ground on a Y-Circuit with multi-ground neutral or between phases on an underground circuit.			

(Ord. No. 019528, § 1, 8-1-2023)

18.16.290 Section 725.41 Class 1 Circuit Classifications and Power Source Requirements (C) Transformers for Class 2 and Class 3 low voltage Circuits, added.

NFPA 70 National Electrical Code, 2020 Edition, Section 725.41 Class 1 Circuit Classifications and Power Source Requirements, is hereby amended

to add paragraph (C) Transformers for Class 2 and Class 3 low voltage Circuits, to read as follows:

725.41 Class 1 Circuit Classifications and Power Source Requirements.

(C) Transformers for Class 2 and Class 3 low voltage Circuits.

(1) Transformers for Class 2 and Class 3 low voltage circuits shall be accessible.

(2) Transformers for Class 2 and Class 3 low voltage circuits shall be installed in accordance with their listing.

(Ord. No. 019528, § 1, 8-1-2023)

18.16.300 Errata, adopted.

Errata to the 2020 NEC Code issued by the National Fire Protection Association is hereby adopted and shall become part of this Code.

(Ord. No. 019528, § 1, 8-1-2023)

18.16.310 Conflicting ordinances.

All ordinances and parts of ordinances in conflict with the provisions of this chapter are hereby repealed as follows: Ordinance No. 014308, 12-14-1999 and Ordinance No. 15900, 09-28-2004.

(Ord. No. 019528, § 1, 8-1-2023)

"Six Hand Movement" rule will apply to switches or circuit breakers used to disconnect feeders only. A "main" switch or circuit breaker will be required ahead of any branch circuit overcurrent protection.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.130 Section 250.8 Connection of Grounding and Bonding Equipment, paragraph (A)(6), deleted.

NFPA 70 National Electrical Code, 2008 Edition, Section 250.8 Connection of Grounding and Bonding Equipment, paragraph (A)(6) is hereby deleted in its entirety.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.140 Section 250.8 Connection of Grounding and Bonding Equipment, (B) Methods Not Permitted, amended.

NFPA 70 National Electrical Code, 2014 Edition, Section 250.8 Connection of Grounding and Bonding Equipment, (B) Methods Not Permitted, is hereby amended to read as follows:

250.8 Connection of Grounding and Bonding Equipment, (B) Methods Not Permitted. (1) Connection devices or fittings that depend solely on solder shall not be used. (2) Sheet metal screws shall not be used to connect grounding conductors or connection devices to enclosures.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.150 Section 310.2 Conductors, (B) Conductor Material, amended.

NFPA 70 National Electrical Code, 2014 Edition, Section 310.2 Conductors, (B) Conductor Material, is hereby amended to read as follows:

310.2 Conductors, (B) Conductor Material. Conductors in this article shall be of aluminum, copper clad aluminum or copper unless otherwise specified. Aluminum or copper-clad aluminum conductors shall not be smaller than No. 2 AWG, except a ground conductor which is part of an approved cable assembly shall be not smaller than No. 6 AWG. Aluminum or copper clad conductors shall be used in the connection of stationary or fastened in place equipment. Such branch circuits shall be installed using metal clad cable or other metal raceway. Such conductors shall also be permitted for the connection of accessory structures via overhead cable granted the ampacity of the structure does not exceed the ampacity of the conductor.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.160 Section 334.10 Uses Permitted (1), (2), (3), (4), (5) amended.

NFPA 70 National Electrical Code, 2014 Edition, Section 334.10 Uses Permitted, items (1), (2), (3) and (4) are amended to read as follows:

334.10 Uses Permitted. Type NM, Type NMC, and Type NMS cables shall be permitted to be used in the following:

(1) One- and two-family dwellings.

(2) Multifamily dwellings.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.165 Securing and Supporting Non-Metallic Sheath Cable, added.

NFPA 70 National Electrical Code, 2014 Edition, Section 334.30 Securing and Supporting nonmetallic sheathed cable shall be supported and secured by insulated staples, cable ties, straps, hangers, or similar fittings designed and installed so as not to damage the cable, at intervals not exceeding 4.5 feet (1.4 mm) and within 12 inches (300 mm) of every outlet box, cabinet, or fitting. Flat cables shall not be stapled on edge. Sections of cable protected from physical damage by raceway shall not be required to be secured within the raceway.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.170 Reserved.

18.16.180 Article 382 Nonmetallic Extensions, deleted.

NFPA 70 National Electrical Code, 2014 Edition, Article 382 Nonmetallic Extensions is hereby deleted in its entirety.
(Ord. No. 18512, § 1, 5-31-2016)

18.16.190 Article 394 Concealed Knob-and-Tube Wiring, deleted.

NFPA 70 National Electrical Code, 2014 Edition, Article 394, concealed Knob-and-Tube Wiring, is hereby deleted in its entirety.
(Ord. No. 18512, § 1, 5-31-2016)

18.16.200 Article 398 Open Wiring on Insulators, deleted.

NFPA 70 National Electrical Code, 2014 Edition, Article 398, Open Wiring on Insulators is hereby deleted in its entirety.
(Ord. No. 18512, § 1, 5-31-2016)

18.16.210 Section 404.10 Mounting of Snap Switches, (A) Surface-Type, deleted.

NFPA 70 National Electrical Code, 2014 Edition, Section 404.10 Mounting of Snap Switches, (A) Surface-Type, is hereby deleted in its entirety.
(Ord. No. 18512, § 1, 5-31-2016)

18.16.220 Section 406.8 Receptacles in Damp or Wet Locations (F) Plastic Bubble Type, added.

NFPA 70 National Electrical Code, 2014 Edition, Section 406.8 Receptacles in Damp or Wet Locations, is hereby amended to add paragraph (F) Plastic Bubble Type, to read as follows:

406.8 Receptacles in Damp or Wet Locations.

(F) "Plastic Bubble Type" in-use covers are not permitted.
(Ord. No. 18512, § 1, 5-31-2016)

18.16.230 Section 406.8 Receptacles in Damp or Wet Locations (G) Air Condition Equipment, added.

NFPA 70 National Electrical Code, 2014 Edition, Section 406.8 Receptacles in Damp or Wet Locations, is hereby amended to add paragraph (G) Air Condition Equipment, to read as follows:

406.8 Receptacles in Damp or Wet Locations.

(G) Air Condition Equipment.

Receptacles used solely for the maintenance of air condition equipment will not be required to have "In Use" type covers.
(Ord. No. 18512, § 1, 5-31-2016)

18.16.240 Section 410.36 Means of Support (B) Suspended Ceilings, amended.

NFPA 70 National Electrical Code, 2014 Edition, Section 410.36 Means of Support, (B) Suspended Ceilings, is hereby amended to delete the last sentence as follows:

410.36 Means of Support, (B) Suspended Ceilings, Luminaires installed in suspended ceilings shall be securely attached to building structure from above at appropriate levels.
(Ord. No. 18512, § 1, 5-31-2016)

18.16.250 Section 422.12 Central Heating Equipment, amended.

NFPA 70 National Electrical Code, 2014 Edition, Section 422.12 Central Heating Equipment, is hereby amended to read as follows:

422.12 Central Heating Equipment. Central heating equipment other than fixed electric space-heating equipment shall be supplied by an individual branch circuit.

Exception 1: Auxiliary equipment, such as pump, valve, humidifier, or electrostatic air cleaner directly associated with the heating equipment, shall be permitted to be connected to the same branch circuit.

Exception 2: Evaporative coolers may be supplied by the same individual branch circuit

supplying the central heating equipment in residential occupancies only, provided the loads are non-coincidental.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.260 Section 590.4 General (K) Temporary Service Poles, added.

NFPA 70 National Electrical Code, 2014 Edition, Section 590.4 General, is hereby amended to add paragraph (K) Temporary Service Poles, to read as follows:

590.4 General.

(K) Temporary Service Poles.

Temporary service poles shall be a minimum of four (4) inch by four (4) inch treated wood posts, or four (4) inch diameter round treated poles securely imbedded in the earth.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.270 Section 600.10 Portable or Mobile Signs, deleted.

NFPA 70 National Electrical Code, 2014 Edition, Section 600.10 Portable or Mobile Signs, is hereby deleted in its entirety.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.280 Section 600.43 Miscellaneous Provisions, added.

NFPA 70 National Electrical Code, 2014 Edition, Section 600.43 Miscellaneous Provisions, is hereby added to read as follows:

600.43 Miscellaneous Provisions.

(A) Sign circuits shall contain a copper grounding conductor deriving from the circuit's supply source; exterior locations shall terminate in a weatherproof box and cover. Taps in metallic raceways shall not be allowed as the grounding means.

(B) All sign installations shall maintain a clearance from adjacent power lines as follows:

Voltage—Line To Ground	H (ft.) Minimum Horizontal Clearance	V (ft.) Minimum Clearance Measured Either Diagonally or Vertically	V (ft.) Over or Under Catwalks Minimum Clearance Measured Either Diagonally or Vertically
Guy Wires and Neutrals	3	3	10.5
0—750 V Supply Cables Meeting Rule 230C2 and 230C3 NESC, 1997	3.5	3.5	11
0—750 V Open Conductors N.E.S.E. Rule 230C2 and 230C3	5.5	6	11.5
750V—22KV	7.5	8	13.5

Notes to table:

1. Signs should never hang over any adjacent power circuits.
2. Voltages are line to ground on a Y-Circuit with multi-ground neutral or between phases on an underground circuit.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.290 Section 725.41 Class 1 Circuit Classifications and Power Source Requirements (C) Transformers for Class 2 and Class 3 low voltage Circuits, added.

NFPA 70 National Electrical Code, 2014 Edition, Section 725.41 Class 1 Circuit Classifications and Power Source Requirements, is hereby amended to add paragraph (C) Transformers for Class 2 and Class 3 low voltage Circuits, to read as follows:

725.41 Class 1 Circuit Classifications and Power Source Requirements.

(C) Transformers for Class 2 and Class 3 low voltage Circuits.

(1) Transformers for Class 2 and Class 3 low voltage circuits shall be accessible.

(2) Transformers for Class 2 and Class 3 low voltage circuits shall be installed in accordance with their listing.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.300 Errata, adopted.

Errata to the 2014 NEC Code issued by the National Fire Protection Association is hereby adopted and shall become part of this Code.

(Ord. No. 18512, § 1, 5-31-2016)

18.16.310 Conflicting ordinances.

All ordinances and parts of ordinances in conflict with the provisions of this chapter are hereby repealed as follows: Ordinance No. 014308, 12-14-1999 and Ordinance No. 15900, 09-28-2004.

(Ord. No. 18512, § 1, 5-31-2016)

Chapter 18.18

OUTDOOR LIGHTING CODE

Sections:

Article I. Purpose, Intent, Compliance and Applicability

18.18.010 Intent.

18.18.020 Compliance.

18.18.030 New buildings, new outdoor light fixtures and additions to existing facilities.

18.18.040 Additions.

18.18.050 Roadways.

Article II. Definitions

18.18.060 Definitions.

Article III. Shielding and Total Outdoor Light Output Standards

18.18.070 Shielding standards.

18.18.075 Interior high intensity discharge lights.

18.18.080 Total outdoor light output standards.

18.18.090 Effective shielding standard.

18.18.100 Light trespass standard.

18.18.110 Multi-class lighting standard.

Article IV. On-Premise and Off-Premise Signs

18.18.120 Externally illuminated sign standards.

18.18.130 Internally illuminated sign and neon sign standards.

18.18.135 Off-premise outdoor advertising signs.

18.18.140 Curfews.

Article V. Special Uses

18.18.150 Recreational facilities.

18.18.160 Outdoor display lots.

18.18.170 Service station canopies.

18.18.180 Other lighting on parcels with special uses.

Article VI. Plans and Evidence of Compliance

18.18.190 Submission contents.

18.18.200 Additional submission.

18.18.210 Subdivision plats.

18.18.220 Lamp or light fixture substitution.

Article VII. Reserved

Article VIII. Prohibitions

18.18.230 Installation of nonconforming light fixtures and lamps.

18.18.240 Laser source light.

18.18.250 Searchlights.

18.18.260 Adjustable light fixtures prohibited.

18.18.270 Lighting causing light trespass.

Article IX. Temporary Exemptions

18.18.280 Temporary exemption requirements.

18.18.290 Temporary exemption permit requests.

18.18.300 Approval—Limitation.

Article X. Other Exemptions

18.18.310 Nonconformance.

18.18.320 Flag illumination.

18.18.330 State and federal facilities.

18.18.335 Statues and sculptures displayed for public viewing.

18.18.340 Emergency lighting.

18.18.345 Seasonal decorations.

18.18.350 Swimming pool and fountain lighting.

18.18.355 Entertainment districts.

18.18.360 Fossil fuel lights.

18.18.365 Downtown.

18.18.370 El Paso Star on the Franklin Mountain.

18.18.375 Historic properties.

18.18.376 City-owned facilities.

18.18.377 Heritage corridors.

Article XI. Appeals

18.18.380 Appeals.

Article XII. Conflicts, Violations, Penalties and Severability

18.18.390 Conflicts.

18.18.400 Violations.

18.18.410 Severability.

Article XIII. Effective Date

18.18.420 Effective date.

Article I. Purpose, Intent, Compliance and Applicability

18.18.010 Intent.

A. Purpose. This chapter describes the type of outdoor lighting and certain interior high intensity discharge lighting that property owners may use with the ultimate goal of eliminating situations where lighting is an interference issue such as: over-lighting, glare, light clutter, sky glow, energy waste as well as possible effects on human psychology, astronomy and animal/plant ecosystems.

B. Intent. It is the intent of this chapter to define practical and effective measures by which the obtrusive aspects of excessive and/or careless outdoor light usage can be minimized, while preserving safety, security, and the nighttime use and enjoyment of property. These measures will curtail the degradation of the nighttime visual environment by encouraging outdoor lighting and certain interior high intensity discharge lighting practices that direct appropriate amounts of light where and when it is needed, /increasing the use of energy-efficient sources, and decreasing the wastage of light and glare resulting from overlighting and poorly shielded or inappropriately directed lighting fixtures. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 1, 8-18-2009)

18.18.020 Compliance.

All outdoor luminaires devices shall be installed in conformance with the provisions of this Code, the building code, the electrical code, and the sign code of the City of El Paso as applicable and under appropriate permit and inspection. (Ord. 15996 § A (part), 2005)

18.18.030 New buildings, new outdoor light fixtures and additions to existing facilities.

For all proposed new construction or additions to existing facilities, all new outdoor lighting fixtures, including but not limited to replacement light fixtures, shall meet the requirements of this Code. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 2, 8-18-2009)

18.18.040 Additions.

Additions, as regulated in Sections 18.18.030 and 18.18.230, shall require the submission of a complete inventory and site plan detailing any proposed new outdoor lighting. New lighting on the site shall meet the requirements of this Code with regard to shielding and lamp type. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 3, 8-18-2009)

18.18.050 Roadways.

Lighting for public and private roadways shall utilize only full cutoff light fixtures or cutoff light fixtures. (Ord. 15996 § A (part), 2005)

Article II. Definitions

18.18.060 Definitions.

Unless otherwise expressly stated, the following words and terms shall, for the purposes of this Code, have the meanings shown below:

"Class 1 lighting" means all outdoor lighting used for, but not limited to, outdoor sales or eating areas, assembly or repair areas, advertising and other signs, outdoor recreational facilities, city parks as defined in City Code Section 13.24.010 and other similar applications where color rendition is important to preserve the effectiveness of the activity. Recognized class 1 uses are: outdoor eating and retail food or beverage service areas; outdoor maintenance areas; display lots; assembly areas such as concert or theater amphitheaters.

"Class 2 lighting" means all outdoor lighting used for, but not limited to, illumination for walkways, roadways, equipment yards, parking lots and outdoor security where general illumination for safety or security of the grounds is the primary concern.

"Class 3 lighting" means any outdoor lighting used for decorative effects including, but not limited to, architectural illumination, United States, state, county, or city flags and monument lighting, and illumination of trees, bushes, or other landscaping features.

"Cutoff" and "full cutoff" shall have the meanings as defined by the lighting handbook.

"Directly visible" means allowing a direct line-of-sight to the light source or lamp.

"Director" means the building official as defined in Section 18.02.101.4 of this Code.

"Display lot" means outdoor areas where active nighttime sales activity occurs and where accurate color perception of merchandise by customers is required. A display lot shall entail one of the following specific uses: automobile sales, boat sales, tractor sales, building supply sales, gardening or nursery sales, assembly lots, swap meets. Additional uses may be designated as display lot as determined by the director.

"Flood lamp" means a specific form of lamp designed to direct its output in a specific direction (a beam) with a reflector formed from the glass envelope of the lamp itself, and with a diffusing glass envelope.

"Footcandle" means one lumen per square foot. Unit of illuminance. It is the luminous flux per unit area in the Imperial system. One footcandle equals approximately ten (10.76) lux.

"Full cutoff light fixture" or "fully shielded light fixture" means a luminaire with light distribution such that no light is emitted above the horizontal plane at the lowest portion of the light fixture.

"Glare" means the sensation produced by a bright source within the visual field that is sufficiently brighter than the level to which the eyes are adapted to cause annoyance, discomfort, or loss in visual performance and visibility; blinding light. The magnitude of glare depends on such factors as the size, position, brightness of the source, and on the brightness level to which the eyes are adapted.

"Illuminance" means the amount of light falling onto a unit area of surface (luminous flux per unit area), measured in lumens per square meter (lux) or lumens per square foot (footcandles).

"Installed" means the attachment, or assembly fixed in place, connected to a power source, of any outdoor light fixture.

"Lighting handbook" means the most recent edition of the lighting handbook of the Illuminating Engineering Society, NA or its successor publication.

"Light trespass" means light falling into an area contrary to the requirements of this Chapter.

"Lighting zones" means the four lighting zones are based on the zoning districts or overlays established by the Zoning Ordinance. Guidelines used to guide the delineation of the lighting zones are:

A. Lighting Zone E1. This zone shall include all zoning districts with a "planned mountain development" overlay.

B. Lighting Zone E2. This zone shall include the zoning districts of R-F, R-1, R-2, R-2A, R-3, R-3A, R-4, R-5, RMH, RMD, P-R I, SRR, P-R II.

C. Lighting Zone E3. This zone shall include the zoning districts of A-1, A-2, A-3, A-4, A-O, A-3/O, A-M, C-OP and S-D.

D. Lighting Zone E4. This zone shall include the current zoning districts of C-1, C-2, C-3, C-4, C-5, M-1, M-2, M-3, P-C, Q, and P-I.

"Lumen" means a unit of luminous flux; used to measure the amount of light emitted by lamps.

"Luminaire" means the complete lighting assembly (including the lamp, housing, reflectors, lenses and shields), less the support assembly (pole or mounting bracket); a light fixture. For purposes of determining total light output from a luminaire or light fixture (see under this section, "Outdoor light output, total"), lighting assemblies which include multiple unshielded or partially shielded lamps on a single pole or standard shall be considered as a single unit.

"Luminous tube" means a glass tube filled with a gas or gas mixture (including neon, argon, mercury or other gasses), usually of small diameter (10-15 millimeter), caused to emit light by the passage of an electric current, and commonly bent into various forms for use as decoration or signs. A "neon" tube does not include common fluorescent tubes.

"Lux" means a unit of illuminance equal to one lumen per square meter. One lux equals approximately 0.1 (0.093) footcandles.

"Monument" means a structure that has the sole purpose and use of providing writings, drawings or pictures to commemorate persons, events or the site at which the structure is located, but does not include signs that are regulated by Chapter 20.18, sculptures or statutes.

"Multi-class lighting" means any outdoor lighting used for more than one purpose, such as security and decoration, such that its use falls under the definition of two or more classes as defined for class 1, 2 and 3 lighting.

"Net acreage" means the total area of the development project. For parcels including those special uses listed in Sections 18.18.150, 18.18.160, 18.18.170 and 18.18.180 that are exempted from the lumens per acre caps of Section 18.18.080 (recreational facilities, city parks and outdoor display lots), the area devoted to the special use shall also be excluded from the net acreage.

"Opaque" means that a material does not transmit light from an internal illumination source. Applied to sign backgrounds, means that the area surrounding any letters or symbols on the sign either is not lighted from within, or allows no light from an internal source to shine through it.

"Outdoor light fixture" means an outdoor illuminating device, outdoor lighting or reflective surface, luminous tube, lamp or similar device, permanently installed or portable, used for illumination, decoration, or advertisement. Such devices shall include, but are not limited to lights used for:

A. Parking lot lighting;

B. Roadway lighting;

C. Buildings and structures;

D. Recreational areas;

E. Landscape lighting;

F. Billboards and other signs (advertising or other);

G. Product display area lighting;

H. Building or structure decoration;

I. Building overhangs and open canopies; and

J. City parks.

"Outdoor light output, total" means the initial total amount of light, measured in lumens, from all lamps used in outdoor light fixtures. The term includes all lights and luminous tubing used for class 1, class 2, class 3 and multi-class lighting, and lights used for external illumination of signs, but does not include lights used to illuminate internally illuminated signs or luminous tubing used in neon signs. For lamp types that vary in their output as they age (such as high pressure sodium, fluorescent and metal halide), the initial lamp output, as defined by the manufacturer, is the value to be considered. For determining compliance with

Section 18.18.080, total outdoor light output standards, the light emitted from lamps in outdoor light fixtures is to be included in the total output as follows:

A. Outdoor light fixtures installed on poles (such as parking lot luminaires) and light fixtures installed on the sides of buildings or other structures, when not shielded from above by the structure itself as defined in subsections B., C. and D. of this section, are to be included in the total outdoor light output by simply adding the initial lumen outputs of the lamps;

B. Outdoor light fixtures installed under canopies, buildings (including parking garage decks), overhangs or roof eaves where all parts of the lamp or luminaire are located at least five feet but less than ten feet from the nearest edge of the canopy or overhang are to be included in the total outdoor light output as though they produced only one-quarter of the lamp's rated initial lumen output;

C. Outdoor light fixtures installed under canopies, buildings (including parking garage decks), overhangs or roof eaves where all parts of the lamp or luminaire are located at least ten feet but less than thirty feet from the nearest edge of the canopy or overhang are to be included in the total outdoor light output as though they produced only one-tenth of the lamp's rated initial lumen output; and

D. Outdoor light fixtures installed under canopies, buildings (including parking garage decks), overhangs or roof eaves where all parts of the lamp or luminaire are located thirty or more feet from the nearest edge of the canopy or overhang are not to be included in the total outdoor light output. Such lamps must however conform to the lamp source and shielding requirements of Section 18.18.070.

"Outdoor recreation facility" means an area designed for active recreation, whether publicly or privately owned, including, but not limited to, baseball diamonds/fields, soccer and football fields, golf courses, city parks, basketball courts, athletic fields or tracks, racquetball courts, golf driving ranges, tennis courts and swimming pools.

"Property" means a parcel of real property that has a property identification number assigned to it by the Central Appraisal District.

"Searchlight" means a lighting assembly designed to direct the output of a contained lamp in a specific tightly focused direction (a beam) with a reflector located external to the lamp, and with a swiveled or gimbaled mount to allow the assembly to be easily redirected. Searchlights include such lights that are used commonly to sweep the sky for advertisement purposes.

"Seasonal decorations" means temporary outdoor light displays consisting of unshielded low-wattage incandescent lamps of fifteen watts or less.

"Sign, externally illuminated" means a sign illuminated by light sources from the outside.

"Sign, internally illuminated" means a sign illuminated by light sources enclosed entirely within the sign cabinet and not directly visible from outside the sign.

"Sign, neon" means a sign including luminous gas-filled tubes formed into text, symbols or decorative elements and directly visible from outside the sign cabinet.

"Spot lamp" means a specific form of lamp designed to direct its output in a specific direction (a beam) with a reflector formed from the glass envelope of the lamp itself, and with a clear or nearly clear glass envelope. Spot lamps are those lamps so designated by the manufacturers.

"Spot light" means a lighting assembly designed to direct the output of a contained lamp in a specific tightly focused direction (a beam) with a reflector located external to the lamp. (Ord. 16985 § 33, 2008; Ord. 15996 § A (part), 2005)
(Ord. 17171, § 4, 8-18-2009; Ord. No. 17390, § 22, 8-24-2010, eff. 9-1-2010; Ord. No. 17882, § 1, 10-2-2012; Ord. No. 17921, § 1, 12-18-2012)

Article III. Shielding and Total Outdoor Light Output Standards

18.18.070 Shielding standards.

All nonexempt outdoor lighting fixtures shall have shielding as shown in Table 18.18.070.

Table 18.18.070 LAMP TYPE AND SHIELDING STANDARDS [1,2,3,4]

	LIGHTING ZONE			
USE CLASS AND LAMP TYPE	**E4**	**E3**	**E2**	**E1**
Class 1 lighting (Color Rendition):				
Initial output greater than or equal to 1800 lumens	F	F	F	F
Initial output below 1800 lumens (2)	A(1)	A(1)	A(1)	F
Class 2 lighting (General Illumination):				
Initial output greater than or equal to 1800 lumens	F	F	F	F
Initial output below 1800 lumens (2)	A(1)	A(1)	A(1)	F
Class 3 lighting (Decorative)(3):				
Initial output greater than or equal to 1800 lumens	F	F	F	X
Initial output below 1800 lumens (2)	A(1)	A(1)	A(1)	F
Residential lighting (all Classes)(4):				
Initial output greater than or equal to 1800 lumens	F	F	F	F
Initial output below 1800 lumens (2)	A(1)	A(1)	A(1)	A(1)

Notes to Table 18.18.070

A = all types of light fixtures are allowed except that any spot or floodlight shall be aimed not higher than twenty-five degrees from the vertical line between the light fixture and the ground when light emitted from a light fixture is visible from any off-site residential property or public roadway.

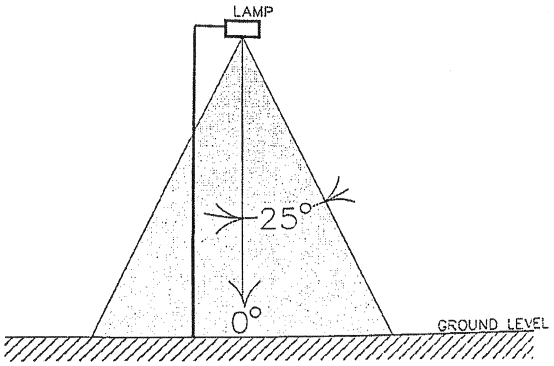

Illustration of Note "A"

F = only fully shielded light fixtures allowed

X = not allowed

1. Flood or spot lamps shall be aimed no higher than twenty-five degrees from the vertical line between the light fixture and the ground when the source is visible from any off-site residential property or public roadway.

Exception: seasonal decorations all be permitted in all lighting zones.

2. All class 3 lighting shall be extinguished between 11:00 p.m. (or when the business closes, whichever is later) and sunrise.

3. Residential refers to single family attached or detached uses located in any of the zone districts such as single-family detached and duplexes. Multiple-family residential uses, or apartments, must use standards for class 1, 2 and 3 lighting. (Ord. 15996 § A (part), 2005)

(Ord. 17171, § 5, 8-18-2009)

18.18.075 Interior high intensity discharge lights.

Interior high intensity discharge light fixtures shall be fully shielded light fixtures when the light from such light fixtures is visible from any public roadway or an off-site residential property.
(Ord. 17171, § 6, 8-18-2009)

18.18.080 Total outdoor light output standards.

Total outdoor light output shall not exceed the limits in Table 18.18.080. Seasonal decorations are not counted toward these limits; lighting used for external illumination of signs is counted, while lighting used for internal illumination of signs is not counted. (The values in this table are the maximum permitted levels and not intended as design standards; design standards shall be the lowest levels that meet the requirements of the task.)

Table 18.18.080 Maximum Total Outdoor Light Output Standards

Lumen Caps—Initial Lamp Lumens per Net Acre	Lighting Zone			
	E4	E3(4)	E2(4)	E1
Commercial and Industrial uses (1)				
Total (full cutoff+ unshielded)	1,000,000	200,000	50,000	125,000
Unshielded only	40,000	20,000	4,000	2,000
Residential uses (2,3)				
Total (full cutoff + unshielded)	20,000	10,000	10,000	10,000
Unshielded only	5,000	5,000	1,000	1,000

Notes to Table 18.18.080

1. This refers to all commercial and industrial uses and includes multiple family or apartment uses.
2. This refers to all single-family attached or detached uses.
3. In lighting zones E4-E 1, each residential single-family attached or detached home, duplex, triplex, quadruplex or townhome is allowed up to five thousand five hundred total lumens, or the amount indicated in this table based on the parcel's acreage, whichever is larger. Each is also allowed a maximum of five thousand five hundred lumens of unshielded ("A") lighting, provided Table 18.18.070 allows the lamp's type with "A" shielding. All residential spot or flood lamps permitted are to be aimed no higher than twenty-five degrees from the vertical line between the fixture and the ground when the source is visible from any off-site residential property or public roadway.
4. Public and private schools located in zones E2 and E3 may petition the director for an increase in the lumens per acre cap to the level permitted in zone E4. The director may allow an increase when the school submits an engineered design supporting the need of such increase.
5. For projects using a portion of a parcel, the calculation of the allowable lumen cap shall be based on a project area that includes only the building, parking and landscaping portions of the parcel. (Ord. 15996 § A (part), 2005)

(Ord. 17171, § 7, 8-18-2009)

18.18.090 Effective shielding standard.

All light fixtures that are required to be shielded shall be installed and maintained in such a manner that the shielding is effective as described in the definition in Section 18.18.060 for full cutoff light fixtures. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 8, 8-18-2009)

18.18.100 Light trespass standard.

A. Beyond the shielding requirements of Section 18.18.070, all light fixtures shall be located, aimed or shielded so as to minimize stray light trespassing across residential property boundaries.

B. Any lamp installed on a residential property in zone E1 and visible from any other residential property shall be shielded such that the lamp is not directly visible from that property.

C. Luminaires, spot lamps or spotlights which are aimed, directed or focused such as to cause direct light to be directed toward residential buildings, adjacent or nearby land, streets or roadways shall be redirected or their light output controlled as necessary to eliminate such conditions. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 9, 8-18-2009)

18.18.110 Multi-class lighting standard.

Multi-class lighting shall conform to the shielding and timing restrictions, if any, which apply to the most restrictive class. (Ord. 15996 § A (part), 2005)

Article IV. On-Premise and Off-Premise Signs

18.18.120 Externally illuminated sign standards.

External illumination for signs shall conform to all provisions of this Code. In particular, such lighting shall be treated as class 1 lighting and shall conform to the lamp source, shielding restrictions and lumen caps of Section 18.18.080. Upward-directed sign lighting is prohibited, unless as allowed by Section 18.18.310.A. (Ord. 15996 § A (part), 2005)
(Ord. No. 18366, § 1, 6-2-2015)

18.18.130 Internally illuminated sign and neon sign standards.

A. Outdoor internally-illuminated advertising signs constructed with faces of translucent materials and wholly illuminated from within do not require shielding. Colored or dark backgrounds with light lettering or symbols are preferred to minimize the detrimental effects of light pollution. Lamps used for internal illumination of such signs shall not be counted toward the lumen caps in Section 18.18.080.

B. Neon signs shall be treated as internally illuminated signs for the purposes of this Code, and shall not have their luminous outputs counted toward the lumen caps in Section 18.18.080. Neon lighting extending beyond the area considered to be the sign area (as defined in the sign code) shall conform to all provisions of this Code and shall be treated as class 3 (decorative) lighting.

C. Other internally-illuminated panels or decorations not considered to be signage according to the sign code (such as illuminated canopy margins or building faces), shall be considered decorative (class 3) lighting, and shall be subject to the standards applicable for such lighting, including but not limited to the lamp source, shielding standards and lumens per acre caps of Section 18.18.080. (Ord. 15996 § A (part), 2005)

18.18.135 Off-premise outdoor advertising signs.

Illumination of outdoor advertising off-premise signs is prohibited in lighting zone E1.
(Ord. 17171, § 10, 8-18-2009)

18.18.140 Curfews.

Illumination for all signs, both externally and internally illuminated, shall be turned off at the curfew times listed in Table 18.18.140 or when the business or portion thereof open to the public closes, whichever is later. Signs subject to curfews are required to have functioning and properly adjusted automatic shut-off timers. Internally illuminated signs may continue to be used and illuminated but must conform to the curfews as indicated.

Table 18.18.140 ILLUMINATED SIGN CURFEWS

	Lighting Zone			
	E4	E3	E2	E1
On-Premise and Off-Premise Signs	12 A.M. (midnight)	12 A.M. (midnight)	9 P.M.	9 P.M.

(Ord. 15996 § A (part), 2005)
(Ord. 17171, § 11, 8-18-2009)

Article V. Special Uses

18.18.150 Recreational facilities.

A. Lighting for outdoor recreation facilities to include city parks as defined in City Code Sections 13.24.010 in lighting zones E1, E2, E3, and E4, shall be considered class 1 (color rendition), as defined in the Lighting Handbook, and shall be exempt from the lumens per acre limits of Section 18.18.080.

B. Shielding. In lighting zones E1, E2, E3 and E4, full cutoff is required for outdoor recreation facilities. Football fields, soccer fields, golf courses and baseball diamonds designed for class III or IV levels of play (typically amateur or municipal

league, elementary to high school, training, recreational or social levels; cf. Lighting Handbook and Illuminating Engineering Society, NA RP-6 Sports and Recreational Area Lighting publication) or designed for class I and II levels of play (typically college, semi-professional, professional or national levels) shall utilize luminaires with minimal uplight consistent with the illumination constraints of the design. Where full cutoff light fixtures are not required and not utilized, acceptable luminaires shall include those which:

1. Are provided with internal and/or external glare control louvers and installed so as to minimize uplight and offsite light trespass, and

2. Are installed and maintained with aiming angles that permit no greater than five percent of the light emitted by each light fixture to project above the horizontal.

C. Illuminance. All lighting installations shall be designed to achieve no greater than the minimal illuminance levels for the activity as recommended by the Illuminating Engineering Society of North America (IESNA).

D. Off-site light trespass. The installation shall also limit off-site trespass (outside the parcel containing the recreational facility) to the maximum extent possible consistent with the illumination constraints of the design. For class III and IV levels of play, a design standard of one lux (0.1 fc) at the property line of any residential property at a vertical point five feet above grade, as measurable from any orientation of the measuring device, shall be required. For Class I and II levels of play, a design goal of one and one-half lux (0.15 fc) at the property line of any residential property at a vertical point five feet above grade, as measurable from any orientation of the measuring device, shall be required.

E. Engineering design. Every such lighting system shall be designed by a professional engineer currently registered in the State.

F. Curfew. All events shall be scheduled so as to complete all activity before the curfew listed in Table 18.18.150. Illumination of the playing field, court or track shall be permitted after the curfew only to conclude a scheduled event that began prior to the curfew that was unable to conclude before the curfew.

Table 18.18.150 SPORTS FACILITY AND DISPLAY LOT LIGHTING CURFEWS

Lighting Zone			
E4	**E3**	**E2**	**E1**
11 P.M.	10 P.M.	9 P.M. City Parks: 10 PM (1 Oct - 30 April) 11 PM (1 May—30 Sept)	8 P.M.

(Ord. 15996 § A (part), 2005)
(Ord. 17171, § 12, 8-18-2009; Ord. No. 17921, § 2, 12-18-2012)

18.18.160 Outdoor display lots.

A. Lighting for display lots shall be considered class 1 (Color Rendition), and shall be allowed a lumens per acre cap of two million.

B. Shielding. All display lot lighting shall utilize a full cutoff system that are installed in a fashion that maintains the full cutoff characteristics.

C. Illuminance. Lighting for display lots shall be considered class 1 (color rendition).

D. Off-site trespass. The display lot shall limit off-site light trespass (outside the parcel containing the display lot) to a maximum of 0.5 lux (0.05 fc) at the property line of any residential property at a vertical point five feet above grade, as measurable from any orientation of the measuring device, shall be required.

E. Engineering design. Every display lot lighting system shall be designed by a professional engineer currently registered in the state.

F. Curfew. Display lot lighting exceeding the lumens per acre cap of Section 18.18.080 shall be turned off at the curfew listed in Section 18.18.150 or within thirty minutes after closing of the business, whichever is later. Lighting in the display lot after this time shall be considered class 2 lighting, and shall conform to all restrictions of this Code applicable for class 2 lighting, including the lu-

mens per acre caps in Section 18.18.080. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 13, 8-18-2009)

18.18.170 Service station canopies.

A. Lighting class. Lighting for service station canopies shall be considered class 2 lighting (general illumination).

B. Shielding. All luminaires mounted on or recessed into the lower surface of service station canopies shall be full cutoff light fixtures and utilize flat lenses.

C. Total under-canopy output. The total light output used for illuminating service station canopies, defined as the sum of all under-canopy initial bare-lamp outputs in lumens, shall not exceed forty lumens per square foot of canopy in lighting zone E4, and shall not exceed twenty lumens per square foot in lighting zone E3. All lighting mounted under the canopy, including but not limited to luminaires mounted on the lower surface or recessed into the lower surface of the canopy and any lighting within signage or illuminated panels over the pumps, is to be included toward the total at full initial lumen output.

D. Lumen output. The lumen output of lamps mounted on or within the lower surface of a canopy is included toward the lumen caps in Section 18.18.080 and is subject to the provisions contained in the definition of "outdoor light output, total" in Section 18.18.060. Other lighting located under a canopy but not mounted on or within the lower surface is included toward the lumen caps in Section 18.18.080 at full initial output.

E. Off-site light trespass. The service station canopy lot shall limit off-site light trespass (outside the parcel containing the service station lot) to a maximum of 0.5 lux (0.05 fc) at the property line of any residential property at a vertical point five feet above grade, as measurable from any orientation of the measuring device, shall be required. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 14, 8-18-2009)

18.18.180 Other lighting on parcels with special uses.

On a property with special uses as listed above, all lighting not directly associated with the special use areas above shall conform to the lighting standards described in this Code, including but not limited to the lamp type and shielding requirements of Section 18.18.070 and the lumens per acre limits of Section 18.18.080. The net acreage for the determination of compliance with Section 18.18.080 shall not include the area of the athletic field or outdoor display lot, as regulated in Section 18.18.160; the area of any service station canopy shall be included in the net acreage. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 15, 8-18-2009)

Article VI. Plans and Evidence of Compliance

18.18.190 Submission contents.

Except for temporary exemption permits governed by Article IX of this chapter, the applicant for any permit required by any provision of this Code in connection with proposed work involving outdoor lighting fixtures shall submit (as part of the application for permit) evidence that the proposed work will comply with this Code. Even if no other such permit is required, the installation or modification (except for routine servicing and same-type lamp replacement) of any exterior lighting shall require submission of the information described below. The submission shall contain but shall not necessarily be limited to the following, all or part of which may be part or in addition to the information required elsewhere in this Code upon application for the required permit:

A. Plans indicating the location on the premises of all lighting fixtures, both proposed and existing on the site;

B. Description of all lighting fixtures, both proposed and existing. The description may include, but is not limited to, catalog cuts and illustrations by manufacturers (including sections where required); lamp types, wattages and initial lumen outputs; and

C. Photometric data, such as that furnished by manufacturers, or similar showing the angle of cut off of light emissions. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 16, 8-18-2009)

18.18.200 Additional submission.

The above required plans, descriptions and data shall be sufficiently complete to enable the director to readily determine whether compliance with the requirements of this Code will be achieved. If such plans, descriptions and data cannot enable this ready determination, the applicant shall additionally submit as evidence of compliance to enable such determination such certified reports of tests as will do so provided that these tests shall have been performed and certified by a recognized testing laboratory. (Ord. 15996 § A (part), 2005)

18.18.210 Subdivision plats.

If any subdivision proposes or is required to have installed street or other common or public area outdoor lighting, submission of the information as described in Section 18.18.190 shall be submitted with the illumination plans required by Title 19. (Ord. 15996 § A (part), 2005)

18.18.220 Lamp or light fixture substitution.

Changes to an approved plan of outdoor light fixture or the type of light source therein shall be subject to the approval of the director. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 17, 8-18-2009)

Article VII. Reserved

Article VIII. Prohibitions

18.18.230 Installation of nonconforming light fixtures and lamps.

The installation of any outdoor lighting fixture or lamp for new construction, additions, or new outdoor lighting fixtures, including but not limited to replacement light fixtures, to existing facilities not in compliance with this chapter is prohibited. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 18, 8-18-2009)

18.18.240 Laser source light.

The use of laser source light or any similar high intensity light for outdoor advertising, entertainment or decorative purposes, when projected above the horizontal, is prohibited unless a temporary exemption permit is obtained pursuant to sections 18.18.280 through 18.18.300. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 19, 8-18-2009; Ord. No. 17882, § 2, 10-2-2012)

18.18.250 Searchlights.

The operation of searchlights for non-governmental purposes is prohibited unless a temporary exemption permit is obtained pursuant to sections 18.18.280 through 18.18.300. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 20, 8-18-2009; Ord. No. 17882, § 3, 10-2-2012)

18.18.260 Adjustable light fixtures prohibited.

Outdoor light fixtures shall be in a fixed position and shall not have adjustable hinges or knuckles unless such light fixture is exempt from the shielding standards pursuant to Section 18.18.335. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 21, 8-18-2009)

18.18.270 Lighting causing light trespass.

A. If after complaint and investigation, the director finds that a light fixture directs light toward residential buildings, the director shall give written notice of such violation to the owner and/or to the occupant of such premises demanding that the violation be abated within ninety days of the date of written notice.

B. Light trespass onto residential property from lighting shall be remedied by redirecting the light fixture or by controlling the light output as necessary.

C. Light levels shall not exceed a maximum of 0.25 footcandles (2.5 lux) at the property line of any residential property at a vertical point five feet above grade.

D. Light trespass measurements shall be made at the property line of the residential site, with the meter held normal to a line between any offending light source(s) and the light meter. If measurement on private property is not possible or practical, light level measurements may be made at the boundary of the public right of way or at any other location on an adjacent property.

E. Measurement shall be made using a commercial cosine and color corrected meter having an accuracy tolerance of plus or minus five percent or better at one lux (0.1 footcandle). The meter shall have been calibrated within two years of the date of measurement by the manufacturer or by a certified illumination laboratory.

F. Measurements shall be taken using a 4.5″ long, 1.75″ +/- 0.25″ diameter thin wall black tube baffle atop the meter's photoelectric cell aperture to prevent any stray light from other sources from affecting the measurement. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 22, 8-18-2009)

Article IX. Temporary Exemptions

18.18.280 Temporary exemption requirements.

A. Temporary exemption permits apply to:

1. Carnivals, festivals, grand openings, concerts and other similar temporary events.

2. Construction, provided that such temporary exemption shall not apply to the use of lights otherwise prohibited under this chapter during hours of the day during which construction is prohibited by law.

3. Laser source light, provided that:

a. The laser source light shall not be directed onto residential property or the structures thereon or on the public right-of-way or any vehicles thereon and shall be aimed and directed, so as not to shine on any buildings; and

b. Applicant obtains all applicable state or federal approvals.

4. Searchlights, provided that:

a. The searchlight shall be aimed and directed, so as not to shine on any buildings; and

b. Applicant obtains all applicable state or federal approvals.

B. An applicant requesting a temporary exemption permit under this chapter shall submit such application at the time of the application for any other permit required for the temporary event that is required by this City Code.

C. Temporary exemption permits shall be requested no less than five city working days prior to the beginning of the temporary event.

D. Applicant shall pay the established fee. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 23, 8-18-2009; Ord. No. 17882, § 4, 10-2-2012)

18.18.290 Temporary exemption permit requests.

A temporary exemption permit request shall be subject to the approval of the director. Such request shall contain the following information:

A. Specific code exemption(s) requested;

B. Duration of requested exemption(s);

C. Proposed location on premises of the proposed light fixture(s);

D. Purpose of proposed lighting;

E. Information for each luminaire and lamp combination as required in Section 18.18.190;

F. Previous temporary exemptions, if any, and addresses of premises thereunder; and

G. Such other data and information as may be required by the director. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 24, 8-18-2009)

18.18.300 Approval—Limitation.

The director shall have five business days from the date of submission of the request for temporary exemption permit to act, in writing, on the request. If approved, the exemption shall be valid for not more than thirty consecutive calendar days

from the date of issuance of the approval. The approval shall be renewable upon further written request for a maximum of one additional thirty consecutive calendar-day period. The director is not authorized to grant more than one temporary permit and one renewal for a thirty consecutive calendar-day period for the same Property within one calendar year. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 25, 8-18-2009)

Article X. Other Exemptions

18.18.310 Nonconformance.

A. Bottom-mounted or unshielded on-premise or off-premise sign lighting shall be brought into compliance with the shielding standards of Section 18.18.070 no later than May 7, 2015. An existing off-premise sign may remain as upward directed sign lighting if LED type luminaires are utilized and installed no later than May 7, 2016. No exceptions to this section will be permitted after May 7, 2016.

B. Post top antique or acorn style luminaires that cannot achieve full cutoff may be used if they achieve cutoff.

C. There shall be no changes in type, size or wattage of either lamp or ballast or any alterations to structural members, including but not limited to poles and bases, without conforming to all applicable requirements of this Code.

D. All existing outdoor lighting fixtures shall be brought into compliance with the shielding standards of Section 18.18.070 not later than May 7, 2015. Compliance with lumens cap is not mandatory but is encouraged. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 26, 8-18-2009; Ord. No. 18366, § 1, 6-2-2015)

18.18.320 Flag illumination.

Illumination of city, county, state or U.S. flags with spot lights or flood lamps is exempt from all the requirements of this Code. (Ord. 15996 § A (part), 2005)

18.18.330 State and federal facilities.

Compliance with the intent of this Code by facilities that are owned, operated and maintained by the state or federal government is encouraged but not required. (Ord. 15996 § A (part), 2005)

18.18.335 Statutes and sculptures displayed for public viewing.

Illumination of statues or sculptures that are displayed in a manner that the public may view such statute or sculpture shall be exempt from the requirements of this Chapter.
(Ord. 17171, § 27, 8-18-2009)

18.18.340 Emergency lighting.

Emergency lighting, used by police, firefighting, or medical personnel, or public entities, including but not limited to water utilities, electric and gas companies or at their direction, is exempt from all requirements of this Code for as long as the emergency exists. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 28, 8-18-2009)

18.18.345 Seasonal decorations.

Seasonal decorations are exempt from all requirements of this chapter. Except that laser source lights or searchlights used in conjunction with seasonal decorations shall require a temporary exemption permit issued pursuant to sections 18.18.280 through 18.18.300.

A. Temporary exemption permits apply to:

1. Carnivals, festivals, grand openings, concerts and other similar temporary events.

2. Construction, provided that such temporary exemption shall not apply to the use of lights otherwise prohibited under this chapter during hours of the day during which construction is prohibited by law.

3. The temporary use of laser source light and searchlights, provided that temporary exemption permits issued for laser source light use shall be issued pursuant to the requirements of Section 18.18.240 and that temporary exemption permits issued for searchlight use shall be issued pursuant to the requirements of Section 18.18.250.

B. An applicant requesting a temporary exemption permit under this chapter shall submit such application at the time of the application for any other permit required for the temporary event that is required by this City Code.

C. Temporary exemption permits shall be requested no less than five city working days prior to the beginning of the temporary event.

D. The city is authorized to charge fees related to the issuance of temporary exemption permits. Such fees shall be in accordance with the fee schedule established pursuant to budget resolution or other resolution adopted by the city council.

(Ord. 17171, § 29, 8-18-2009; Ord. No. 17882, § 5, 10-2-2012)

18.18.350 Swimming pool and fountain lighting.

Underwater lighting used for the illumination of swimming pools and fountains is exempt from the lamp type and shielding standards of Section 18.18.070, though such lighting shall conform to all other provisions of this chapter. (Ord. 15996 § A (part), 2005)

18.18.355 Entertainment districts.

Entertainment districts established by the city council are exempt from all requirements of this chapter.

(Ord. 17171, § 30, 8-18-2009)

18.18.360 Fossil fuel lights.

All outdoor light fixtures producing light directly by the combustion of natural gas or other fossil fuels are exempt from all requirements of this Code. (Ord. 15996 § A (part), 2005)

18.18.365 Downtown.

The geographic area of downtown is exempt from all the requirements of this Chapter. For purposes of this section, downtown is the area bounded by: Paisano, Stanton, Loop 375, S. Oregon St., 6th St., S El Paso St. Paisano, S. Santa Fe St. to the intersection of Father Rahm Ave. From the intersection of Father Rahm and S. Santa Fe St. north and east of the railway right of way to the intersection of W. Paisano and S. Coldwell St, to W. San Franciso St. to S. Durango St., to E. Missouri to N. Santa Fe St. to Interstate 10 to N. Campbell to E. Main St. From the intersection of N. Campbell and E. Main St. south and west of the rail right of way to Virginia, to E. San Antonio to St. Vrain to Paisano. (Ord. 15996 § A (part), 2005)

(Ord. 17171, § 31, 8-18-2009)

18.18.370 El Paso Star on the Franklin Mountain.

The El Paso Star on the Franklin Mountain, operated as of the date of the ordinance codified in this chapter, is exempt from all requirements of this Code. (Ord. 15996 § A (part), 2005)

(Ord. 17171, § 28, 8-18-2009)

18.18.375 Historic properties.

Properties designated as federal, state, or local historic landmarks or that are within a federal, state, or local historic district shall be exempt from this chapter if there is a finding of an adverse impact to any significant historical, cultural, or archaeological element of the property as determined in writing by the El Paso historic landmark commission or by the Texas Historic Preservation Officer whenever the El Paso historic landmark commission is without jurisdiction to require review of proposed work pursuant to Chapter 20.20 of the El Paso City Code. (Ord. 16041 § 1, 2005)

(Ord. 17171, § 33, 8-18-2009)

18.18.376 City-owned facilities.

The following city owned properties and projects are exempt from complying with the intent of this code:

1. Spray parks;

2. The El Paso International Airport, which for the purposes of this section is from a point beginning at the intersection of Terminal Drive and Piper Court, north and west along Airway Boulevard to Convair Road, north and east along

Convair Road to the easternmost point of Terminal Drive, and south along Terminal Drive to the point of beginning, to include the airport terminal building and all property located within the Security Identification Display Area (SIDA) and the airport security perimeter.
(Ord. No. 18507, § 1, 5-31-2016; Ord. No. 018884, § 1, 12-11-2018)

Editor's note—Ord. No. 18507, § 1, adopted May 31, 2016, set out provisions intended for use as § 18.18.380. Inasmuch as there were already provisions so designated, this section has been codified as set out herein, at the discretion of the editor.

18.18.377 Heritage corridors.

Ornamental lighting including but not limited to string lights, lighted archways and spires located within the public rights-of-way for the following heritage corridors are exempt from all requirements of this chapter:

1. El Paso International Airport Corridor which is Airway Boulevard from Interstate 10 to Airport Road;

2. Kern Place Neighborhood Corridor which is Cincinnati Avenue which is from North Stanton Street to North Oregon Street; East Glory Road from North Mesa Street to North Oregon Street; and East Baltimore Avenue from North Stanton Street to North Mesa Street.
(Ord. No. 18665, § 1, 4-18-2017)

Editor's note—Ord. No. 18665, § 1, adopted April 18, 2017, repealed the former § 18.18.377, and enacted a new § 18.18.377 as set out herein. The former § 18.18.377 pertained to El Paso International Airport Corridor and derived from Ord. No. 18507, § 1, adopted May 31, 2016.

Article XI. Appeals

18.18.380 Appeals.

Any person aggrieved by any decision of the director made in administration or enforcement of this Code has the right of appeal to the appeals officer. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 34, 8-18-2009; Ord. No. 019762, § 5, 7-22-2025)

Article XII. Conflicts, Violations, Penalties and Severability*

18.18.390 Conflicts.

Where any provision of federal, state, or local law conflicts with any provision of this Code, the most restrictive shall govern unless otherwise regulated by law. (Ord. 15996 § A (part), 2005)

18.18.400 Violations.

Any person who violates a provision of this chapter shall, upon conviction, be guilty of a misdemeanor and punished by a fine not to exceed two thousand dollars. Each day the violation occurs shall constitute a separate offense. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 35, 8-18-2009)

18.18.410 Severability.

If any section, subsection, sentence, clause or phrase of this Code is for any reason held to be illegal, such decision shall not affect the validity of the remaining portions of this Code. (Ord. 15996 § A (part), 2005)

Article XIII. Effective Date†

18.18.420 Effective date.

The provisions of this chapter that were in effect from May 7, 2005 until the effective date of this ordinance shall remain in effect for building permits for which applications were made during that time. Building permits for which applications were made after the effective date of this ordinance shall be subject to this ordinance. (Ord. 15996 § A (part), 2005)
(Ord. 17171, § 36, 8-18-2009)

***Editor's note**—Inasmuch as there were two articles numbered as XI, this Article XI has been renumbered as Article XII, at the discretion of the editor.

†**Editor's note**—For purposes of sequential order, and at the editor's discretion, this article has been renumbered as Article XIII. See editor's note to Article XII.

Chapter 18.20

PLUMBING CODE*

Sections:

18.20.010 Short title.

18.20.020 Adoption.

18.20.020.1 Reserved.

18.20.030 Section 312.10.3 Backflow Inspection Records, added.

18.20.040 Section 403.3 Required public toilet facilities, exception added.

18.20.050 Section 412.5 Floor drains in mechanical rooms and boiler rooms, added.

18.20.060 Section 417.5.3 Shower receptor, added.

18.20.070 Section 604.8.3 Accessibility, added.

18.20.080 Reserved.

18.20.090 Reserved.

18.20.100 Section 605.4 Water Distribution Pipe, amended.

18.20.110 Section 608.16.5, Connections to lawn irrigation systems, amended.

18.20.120 Section 701.2 Sewer required, amended.

18.20.130 Reserved.

18.20.140 Reserved.

18.20.150 Reserved.

18.20.160 Section 708.1.3 Building drain and building sewer junction, amended.

18.20.170 Section 802.1.9 Condensate and Evaporative Cooler Waste, added.

18.20.175 Section 903.1.1 Roof Extension, amended.

18.20.180 Section 1003.3.1.1 No water-jacketed grease trap, added.

18.20.190 Table 1003.3.5.1 Capacity of Grease Interceptors, amended.

18.20.200 Section 1003.5 Sand interceptors in commercial establishments, amended.

18.20.220 Appendix B is adopted in its entirety.

18.20.222 Appendix C is adopted in its entirety.

18.20.224 Appendix D is adopted in its entirety.

18.20.226 Appendix E is adopted in its entirety.

18.20.230 Conflicting ordinances.

18.20.240 Section 603.1.1 Protection of Water Service Entrance, added.

18.20.250 Section 603.1.2 Plumbing within exterior walls, added.

18.20.260 Conflicting Ordinances.

18.20.010 Short title.

This chapter may be cited as the "Plumbing Code."

(Ord. No. 019528, § 1, 8-1-2023)

18.20.020 Adoption.

The book entitled "International Plumbing Code," 2021 Edition, a copy of which authenticated by the city clerk is on file in the city clerk's office, is adopted as the Plumbing Code of the city, as fully as if copied at length in this chapter, but with the changes set forth in this chapter and Chapter 18.02, the Building and Administrative Code of the City of El Paso.

(Ord. No. 019528, § 1, 8-1-2023)

***Editor's note**—Ord. No. 019528, § 6, adopted Aug 1, 2023, amended Ch. 18.20 in its entirety to read as set out herein. The former Ch. 18.20, §§ 18.20.010—18.20.260, pertained to similar subject matter and derived from Ord. No. 18513, § 1, adopted May 31, 2016.

18.20.020.1 Reserved.

18.20.030 Section 312.10.3 Backflow Inspection Records, added.

International Plumbing Code, 2021 Edition, Section 312.10.3 Backflow Inspection Records, is hereby added to read as follows:

312.10.3 Backflow Inspection Records. Records of inspections, tests and maintenance of the backflow assemblies shall be kept and made available to the building official upon request and to the El Paso Water Utilities in accordance with the rules and regulations of the public service board. Records shall indicate the procedure performed (inspection, test or maintenance), the organization that performed the work, the results and the date. Records shall be maintained by the owner, tenant or responsible person.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.040 Section 403.3 Required public toilet facilities, exception added.

International Plumbing Code, 2021 Edition, Section 403.3 Required public toilet facilities, is hereby amended to add the following exception at the end of the section:

Exception: Small tenancies and areas located in stand-alone buildings or tenancies. Customers, patrons, visitors and employees need not be provided with public toilet facilities in small tenancies located in stand-alone buildings, structures or facilities when all of the following conditions are met:

1. The gross floor area of the tenancy does not exceed 200 square feet; and

2. The building, or structure is not used for the preparation, storage handling and sale of potentially hazardous food as defined in the Texas Food Establishment Rules of the Texas Department of State Health Services; and

3. Toilet facilities are provided elsewhere on the same site within 200 lineal feet of travel distance from the exempted tenancy; and

4. The site is provided with the minimum number of facilities required by International Plumbing Code, 2015 Edition, Section 403 and Table 403.1, and the owner or tenant in control of the toilet facilities required in condition 3, shall furnish to the building official a written and notarized statement that customers, visitors, patrons and employees of the exempted tenancy will have access to and use of these facilities; and structures used for the preparation, storage, handling and sale of food shall be connected to a water supply and provided with utensil and hand washing facilities as required by Title 9.12 of the City Code.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.050 Section 412.5 Floor drains in mechanical rooms and boiler rooms, added.

International Plumbing Code, 2021 Edition, Section 412.5 Floor drains in mechanical rooms and boiler rooms is hereby added to read as follows:

Mechanical equipment rooms, boiler rooms and all similar equipment rooms shall have an approved floor drain for disposing of accumulation of liquid wastes incident to cleaning or recharging such equipment. Such floor drains shall be equipped with an approved trap priming or trap seal device as required in IPC Section 1002.4.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.060 Section 417.5.3 Shower receptor, added.

International Plumbing Code, 2021 Edition, Section 417.5.3 Shower Receptor, is hereby added to read as follows:

421.5.1.1 Shower Receptor. Shower receptors shall have a finished curb, dam or threshold not less than one (1) inch below the sides and back of the receptor. The curb shall be not less than two (2) inches nor more than nine (9) inches in depth when measured from the top of the curb to the top of the drain. The finished floor shall slope uniformly toward the drain not less than one-fourth (¼) inch per foot nor more than one-half (½) inch, and floor drains shall be flanged to provide a watertight joint in the floor.

421.5.2 Shower Linings. All shower receptors shall be provided with an approved lining, except as noted herein. The adjoining walls and floors, enclosing field-constructed shower receptors shall be lined with copper or other approved materials listed in this Code, extending not less than three (3) inches beyond or around the rough jambs and not less than three (3) inches above finished thresholds. Recessed shower compartments need not be lined, provided the compartment is formed of concrete, is recessed a minimum of four (4) inches below the adjacent floor level, and the concrete is not less than three and one-half (3½) inches thick with an ultimate compressive strength of not less than two thousand (2000) pounds per square inch.

421.3 Shower Waste Outlet. An approved flanged drain shall be installed with shower subpans or linings. The flange shall be flush with the sub-base and be equipped with a clamping ring or other device to make a water-tight connection between the lining and the drain. The flange shall have weep holes to ensure constant drainage of water to sanitary drainage system. Shower receptacle waste outlets shall be not less than two (2) inches in diameter and shall have a removable strainer.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.070 Section 604.8.3 Accessibility, added.

International Plumbing Code, 2021 Edition, Section 604.8.3 Accessibility, is hereby added to read as follows:

604.8.3 Accessibility. Installation shall be such as to make the regulator accessible without excavating or removing permanent structural or finished portions of the structure.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.080 Reserved.

18.20.090 Reserved.

18.20.100 Section 605.4 Water Distribution Pipe, amended.

International Plumbing Code, 2021 Edition, Section 605.4 Water distribution pipe, is hereby amended to read as follows:

605.4 Water distribution pipe. Water distribution pipe shall conform to NSF 61 and shall conform to one of the standards listed in Table 605.4 Copper or copper alloy tubing used in inaccessible water distribution piping under slabs shall be minimum Type L. Any material subject to corrosion shall be protected when used in corrosive soils. All hot water distribution pipe and tubing shall have a minimum pressure rating of 100 psi at 180°F.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.110 Section 608.16.5, Connections to lawn irrigation systems, amended.

International Plumbing Code, 2021 Edition, Section 608.16.5, Connections to lawn irrigation systems, is hereby amended to read as follows:

608.16.5 Connections to lawn irrigation systems. The potable water supply to lawn irrigation systems shall be protected against backflow by a pressure-type vacuum breaker or a reduced pressure principle backflow-preventer. Where chemicals are introduced into the system, the potable water supply shall be protected against backflow by a reduced pressure principle backflow-preventer.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.120 Section 701.2 Sewer required, amended.

International Plumbing Code, 2021 Edition, Section 701.2, Sewer required, is hereby amended to read as follows:

701.2 Sewer required. Every building in which plumbing fixtures are installed and all premises having drainage piping shall be connected to a public sewer.

Exception: When a public sewer is not available within 300 feet of the property, an individual or private sewage disposal system may be utilized provided that such system is designed, installed and maintained in accordance with the requirements of Chapter 18.21 of the City Code.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.130 Reserved.

18.20.140 Reserved.

18.20.150 Reserved.

18.20.160 Section 708.1.3 Building drain and building sewer junction, amended.

International Plumbing Code, 2021 Edition, Section 708.1.3, Building drain and building sewer junction, is hereby amended to read as follows:

708.1.3 Building drain and building sewer junction. There shall be a cleanout near the junction of the building drain and the building sewer. The cleanout shall be outside the building and shall be brought up to the finished ground level within ten (10) feet of the structure. An approved two-way cleanout is allowed as an alternative at this location to serve as a required cleanout for both the building drain and building sewer.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.170 Section 802.1.9 Condensate and Evaporative Cooler Waste, added.

International Plumbing Code, 2021 Edition, Section 802.1.9 Condensate and Evaporative Cooler Waste, is hereby added to read as follows:

802.1.9 Condensate and Evaporative Cooler Waste. Waste from evaporative cooler's automatic water draining systems and condensate from air conditioner units, shall discharge into the building drainage system through an indirect waste line or discharged so that the effluent is used for watering landscaping or other vegetation.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.175 Section 903.1.1 Roof Extension, amended.

903.1.1 Roof extension. Open vent pipes that extend through a roof shall be terminated not less than 12 inches above the roof.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.180 Section 1003.3.1.1 No water-jacketed grease trap, added.

International Plumbing Code, 2021 Edition, Section 1003.3.1.1 No water-jacketed grease trap, is hereby added to read as follows: **1003.3.1.1 No water-jacketed grease trap.** No water-jacketed grease trap or grease interceptor shall be approved or installed.
(Ord. No. 019528, § 1, 8-1-2023)

18.20.190 Table 1003.3.5.1 Capacity of Grease Interceptors, amended.

International Plumbing Code, 2021 Edition, Table 1003.3.5.1 Capacity of Grease Interceptors, is hereby amended to read as follows:

Table 1003.3.5.1 Capacity of Grease Traps	
Total Flow-Through Rating (gpm)	**Grease-Retention Capacity (pounds)**
20 or less	40
25	50
35	70
50	100

(Ord. No. 019528, § 1, 8-1-2023)

18.20.200 Section 1003.5 Sand interceptors in commercial establishments, amended.

International Plumbing Code, 2021 Edition, Section 1003.5 Sand interceptors in commercial establishments, is hereby amended to read as follows:

1003.5 Sand Interceptors in Commercial Establishments. Sand and similar interceptors or traps for heavy solids shall have a water seal of not less than six (6) inches. Traps shall have a minimum of two compartments. Each compartment shall be a minimum of 30 inches by 30 inches with a minimum depth of three (3) feet, covered with a remov-

able grating that will allow the free entrance of waste. Trap walls and bottom shall be of concrete made watertight.

Exception: Sand traps are not required in commercial facilities containing less than 4 washing machines.

1003.5.1. Waste Line shall be a minimum of four (4) inches for uses other than residential swimming pools in which case the waste line may be three (3) inches. Outlet pipe shall leave the trap at a point not less than six (6) inches nor more than twelve (12) inches above the bottom and must rise vertically outside to the top of the trap where a properly sized cleanout shall be provided and formed by an inverted wye (y) so installed that the point of intersection of the wye (y) branches shall form the seal. Such seal shall be no less than twelve (12) inches in depth.

1003.5.2. Sand Traps installed within thirty (30) feet from a 3 or 4 inch stack shall have a (2) inch vent; sand traps installed over thirty (30) feet from a 3 or 4 inch stack shall have a three (3) inch vent.

(Ord. No. 019528, § 1, 8-1-2023)

18.20.220 Appendix B is adopted in its entirety.

(Ord. No. 019528, § 1, 8-1-2023)

18.20.222 Appendix C is adopted in its entirety.

(Ord. No. 019528, § 1, 8-1-2023)

18.20.224 Appendix D is adopted in its entirety.

(Ord. No. 019528, § 1, 8-1-2023)

18.20.226 Appendix E is adopted in its entirety.

(Ord. No. 019528, § 1, 8-1-2023)

18.20.230 Conflicting ordinances.

All ordinances and parts of ordinances in conflict with the provisions of this chapter are hereby repealed.

(Ord. No. 019528, § 1, 8-1-2023)

18.20.240 Section 603.1.1 Protection of Water Service Entrance, added.

International Plumbing Code, 2021 Edition, Section 603.1.1 Protection of Water Service Entrance is hereby added to read as follows:

603.1.1 Protection of Water Service Entrance. Water service entrance and risers to all structures shall be on the heated side of a conditioned space.

(Ord. No. 019528, § 1, 8-1-2023)

18.20.250 Section 603.1.2 Plumbing within exterior walls, added.

International Plumbing Code, 2021 Edition, Section 603.1.2 Plumbing within exterior walls is hereby added to read as follows:

603.1.2 Plumbing within exterior walls. Placement of plumbing within exterior walls is prohibited unless the walls are at minimum, 2 by 6 walls and adequate provision is made to protect such pipes from freezing in accordance with Section 305.6 of the International Plumbing Code. Placement of water lines in ceiling areas is prohibited unless the water lines are placed on the warm side with a minimum of 10 inch insulation on the exterior/roof side of the structure.

Exceptions:

a. A service entrance may enter a non-conditioned space provided that the riser/service entrance is within an approved, heated valve protective enclosure also known as a "hot box", or

b. Cross linked polyethylene, also known as PEX, or approved equal, is used as the service entrance material, and

c. Any hose bibs installed shall be freeze proof.

(Ord. No. 019528, § 1, 8-1-2023)

18.20.260 Conflicting Ordinances.

All ordinances and parts of ordinances in conflict with the provision of this chapter are hereby repealed.

(Ord. No. 019528, § 1, 8-1-2023)

18.20.224 Appendix D is adopted in its entirety.

(Ord. No. 18513, § 1, 5-31-2016)

18.20.226 Appendix E is adopted in its entirety.

(Ord. No. 18513, § 1, 5-31-2016)

18.20.230 Conflicting ordinances.

All ordinances and parts of ordinances in conflict with the provisions of this chapter are hereby repealed.

(Ord. No. 18513, § 1, 5-31-2016)

18.20.240 Section 603.1.1 Protection of Water Service Entrance, added.

International Plumbing Code, 2009 2015 Edition, Section 603.1.1 Protection of Water Service Entrance is hereby added to read as follows:

603.1.1 Protection of Water Service Entrance. Water service entrance and risers to all structures shall be on the heated side of a conditioned space.

(Ord. No. 18513, § 1, 5-31-2016)

18.20.250 Section 603.1.2 Plumbing within exterior walls, added.

International Plumbing Code, 2015 Edition, Section 603.1.2 Plumbing within exterior walls is hereby added to read as follows:

603.1.2 Plumbing within exterior walls. Placement of plumbing within exterior walls is prohibited unless the walls are at minimum, 2 by 6 walls and adequate provision is made to protect such pipes from freezing in accordance with Section 305.6 of the International Plumbing Code. Placement of water lines in ceiling areas is prohibited unless the water lines are placed on the warm side with a minimum of 10 inch insulation on the exterior/roof side of the structure.

Exceptions:

a. A service entrance may enter a non-conditioned space provided that the riser/service entrance is within an approved, heated valve protective enclosure also known as a "hot box", or

b. Cross linked polyethylene, also known as PEX, or approved equal, is used as the service entrance material, and

c. Any hose bibs installed shall be freeze proof.

(Ord. No. 18513, § 1, 5-31-2016)

Chapter 18.21

PRIVATE SEWAGE FACILITIES

Sections:

Article I. General

18.21.010 Definitions.
18.21.020 Scope of chapter.

Article II. Administration

18.21.025 Stop work orders.
18.21.030 Requirements for new private sewage facilities.
18.21.040 Final inspection.
18.21.050 Expiration of permit to construct.
18.21.060 License to operate.
18.21.070 Existing private sewerage facilities.
18.21.080 Innovative designs.
18.21.090 Abandoned facilities.
18.21.100 On-site sewage disposal board of exceptions.
18.21.110 Exception.
18.21.120 Appeal.

Article III. Lawful Discharges and General Requirements

18.21.130 Lawful discharges.
18.21.140 Requirements.

Article IV. Design Standards for Site Evaluation

18.21.150 Residential lot sizing.
18.21.160 Soil technology and disposal method selection.
18.21.170 Percolation test procedures.

Article V. Design Standards for On-site Treatment Methods

18.21.180 Design standards for residential sewerage systems.
18.21.190 Design standards for institutional sewerage systems.
18.21.200 Design standards for aerobic sewerage plants.
18.21.210 Design standards for grease traps.

Article VI. Design Standards for Effluent Disposal Systems

18.21.220 Site evaluation.
18.21.230 Soil absorption trench.
18.21.240 Soil absorption beds.
18.21.250 Evapotranspiration beds.
18.21.260 Pressure dosing systems.
18.21.270 Mound systems.
18.21.280 Residential collective systems.
18.21.290 Gravelless drainfield piping.
18.21.300 Design standards for disposal alternatives/special applications.

Article VII. Prohibited Systems

18.21.310 Cesspools prohibited.
18.21.320 Bore holes and injection wells prohibited.
18.21.330 Seepage pits.
18.21.340 Privies prohibited.

Article VIII. Fees

18.21.350 Fees.

Article IX. Enforcement

18.21.360 Penalties.
18.21.370 Nuisance declared.

Article I. General

18.21.010 Definitions.

The following words and terms, when used in this chapter, shall have the following meanings, unless the context clearly indicates otherwise:

1. "Aerobic digestion" means the bacterial decomposition and stabilization of sewage in the presence of free oxygen.

2. "Anaerobic digestion" means the bacterial decomposition and stabilization of sewage in the absence of free oxygen.

3. "Bedrock" means a continuous horizontal layer of hardened mineral deposits that does not support growth of common plant life.

4. "Blackwater" means all sewage other than greywater that contains sufficient human or animal wastes to require the water to be treated prior to disposal to the earth's subsurface.

5. "Bore hole" means a drilled hole four feet or greater in depth and one to three feet in diameter.

6. "Caliche" means a white or pale yellow deposit of carbonate or sulfates of varying hardness that exists in the soil profile.

7. "Cesspool" means a non-watertight covered receptacle intended for the receipt and partial treatment of domestic sewage. This device is constructed such that its sidewalls and bottom are open jointed to allow the gradual discharge of liquids while retaining the solids for an anaerobic decomposition.

8. "Chemical" means a liquid or powdered waste that in sufficient quantity could have a biotoxic effect on on-site sewage facilities.

9. "Chemical toilet" means a portable toilet using chemicals to mask odors, discourage insect breeding, and provide partial disinfection.

10. "Collective system" means an on-site sewage collection, treatment, and disposal system designed to serve two or more sewage-generating units where the total combined flow from all units does not exceed five thousand gallons per day.

11. "Commission" means the Texas Commission on Environmental Quality.

12. "Composting toilet" means a disposal facility designed to decompose non-waterborne human wastes through bacterial action facilitated by aeration.

13. "Department" means the Texas Department of State Health Services.

14. "Evaportranspiration system" means a subsurface sewage disposal system which relies on soil capilarity and plant uptake to dispose of treated effluent through surface evaporation and plant transpiration.

15. "Gravelless drainfield pipe" means a generically labeled large diameter (usually eight or ten inches) geotextile fabric-wrapped piping product which is intended for use without gravel in a subsurface sewage disposal system.

16. "Greywater" means wastewater from clothes washing machines, showers, bathtubs, handwashing lavatories, and sinks that are not used for food preparation or disposal of chemical and biological ingredients.

17. "Holding tank" means a watertight container used to receive and store sewage in an anaerobic environment pending its delivery to, and treatment at, an approved treatment facility.

18. "Individual" means a person, group of persons, corporation, or entity permitted to own, or use real estate.

19. "Injection well" means a hole drilled into permeable soil which is intended to receive either raw sewage or the effluent from some form of treatment process.

20. "Innovative design" means detailed drawings and specifications describing the construction of on-site sewerage facilities that utilize materials and concepts not included in these standards.

21. "Institution" means any establishment other than a single-family residence or a duplex residence.

22. "Licensing authority" means the department of environmental services.

23. "Mobile home park" means any facility or area developed for lease or rental of space for the placement of two or more mobile homes.

24. "Mound system" means a soil absorption system which is installed in or below an artificially created mound of earth.

25. "Natural soil" means earthen materials deposited into place by natural processes and not disturbed by artificial processes.

26. "On-site aerobic treatment unit" means a watertight covered receptacle designed to receive, store and provide treatment to domestic sewage received through a building sewer. Its function is to separate solids from the liquid, promote the aerobic digestion of organic matter through the use of a forced air supply, store and aerobically digest settleable solids, and allow the clarified liquid to be disposed of in a subsurface disposal system.

27. "On-site sewerage facilities" means septic tanks, pit privies, cesspools, sewage holding tanks, injection wells used to dispose of sewage, chemical toilets, treatment tanks, collective systems, and all other facilities, systems, and methods used for the disposal of sewage other than the disposal systems operated under a permit issued by the Texas Commission on Environmental Quality.

28. "Pit privy" means a vented waterproof vault intended to store human wastes and allow its decomposition through natural processes. In this type of treatment, no external water source is provided and there is no direct discharge to the surface. It is recommended for use only in primitive and remote areas.

29. "Platted" means recorded with the county clerk's office in an official plat record.

30. "Portable toilet" means a small portable enclosure with a built-in toilet seat and a raw sewage holding tank. It is primarily intended for use at construction sites and other areas where temporary restroom facilities are required. Domestic sewage collected in these facilities is generally retained in an anaerobic state pending delivery to, and treatment at, an approved treatment facility.

31. "Pressure dosing" means the use of some form of pumping device and a network of small diameter piping to distribute treated effluent within a subsurface sewage disposal area.

32. "Private sewage facility" means all systems and methods used for the disposal of sewage, other than those operated in accordance with the terms and conditions of a valid waste discharge permit issued by the Texas Commission on Environmental Quality. "Private sewage facility" is synonymous with "private sewerage facility," and includes the following three units:

a. A generating unit, including, but not limited to, a residence or an institution;

b. A treatment unit, including, but not limited to, a septic tank or holding tank; and

c. The disposal unit, including, but not limited to, an evapotranspiration unit bed or an absorption trench.

33. "Sanitary control easement" means a document securing all land, within one hundred fifty feet of a public or private potable water well location, from pollution hazards that include, but are not limited to, solid and liquid waste disposal sites, animal pens, improperly sealed or abandoned wells, major sewage pumping and treatment plants, and drainage ditches which contain industrial waste discharges.

34. "Scum" means a mass of organic or inorganic matter which floats on the surface of sewage.

35. "Seepage pit" means an unlined covered excavation in the ground which is designed to operate in essentially the same manner as a cesspool.

36. "Septic tank" means a watertight covered receptacle designed to receive, store and provide treatment to domestic sewage received from a building sewer. Its function is to separate solids from the liquid, digest organic matter under anaerobic conditions, store the digested solids through a period of detention, and allow the clarified liquid to be disposed of in a subsurface disposal system.

37. "Sewage" means water which contains, or which has been in contact with, organic and inorganic contaminants such as human or animal wastes, vegetable matter, cooking fats and greases, laundry and dishwashing detergents, and other chemical compounds and waste products.

38. "Single-family dwelling" means a habitable structure constructed on, or brought to its site, and occupied by one or more persons.

39. "Sludge" means a semiliquid mass of partially decomposed organic and inorganic matter which settles at or near the bottom of a receptacle containing sewage.

40. "Soil" means the unconsolidated mineral material on the surface of the earth that serves as a natural medium for the growth of plants.

41. "Soil absorption system" means a subsurface sewage disposal system which relies on the soil's ability to absorb moisture and allow its dispersal by lateral and vertical movement through and between individual soil particles.

42. "Split system" means a wastewater disposal system that treats and disposes of blackwater and greywater separately.

43. "Substantial modification to on-site sewerage facilities shall include replacement of a septic or aerobic tank, addition of a septic or aerobic tank to a system, any extension or expansion of an existing disposal bed.

44. "Subsurface sewage disposal system" means a network of perforated piping installed below ground level which is used to distribute pretreated sewage effluent over a given disposal area.

45. "Ultra-low-flow toilets" means toilets that use one and one-half gallons or less per flush. (Ord. 16818 §§ 1—3 (part), 5, 2008; Ord. 9718 § 1, 1989; Ord. 9448 (part), 1988)

18.21.020 Scope of chapter.

This chapter will govern the design, construction, and operation of all private sewage facilities which have a potential discharge that does not exceed five thousand gallons per day. All private sewage facilities with potential discharges in excess of five thousand gallons per day shall be designed, constructed and operated in accordance with the requirements of the Texas Commission on Environmental Quality. (Ord. 16818 § 2 (part), 2008; Ord. 9448 (part), 1988)

Article II. Administration

18.21.025 Stop work orders.

Upon notice from the licensing authority, work upon any private sewage facility that is being done contrary to the provisions of this code, or in a dangerous or unsafe manner shall immediately be stopped. Such notice shall be in writing; and shall be given to the owner of the property, or to his agent, or to the person doing the work; and shall state the conditions under which work may be resumed. (Ord. 9718 § 2, 1989)

18.21.030 Requirements for new private sewage facilities.

A. A permit to construct shall be obtained from the licensing authority prior to commencing the construction or installation of, or a substantial modification to, a private sewage facility. Such permit shall be issued upon a finding that construction can commence.

B. To make an application for a permit to construct, the applicant shall submit to the licensing authority the following:

1. A properly completed application form;

2. A receipt showing payment to the city comptroller of the required fee;

3. The results of the percolation tests performed by a registered professional engineer or registered professional sanitarian (either having demonstrated expertise in conducting percolation tests to the licensing authority);

4. A drawing or drawings to scale reflecting that the proposed private sewage facility will comply with this chapter and demonstrating that the lot or tract is large enough for the private sewage facility to be constructed thereon;

5. A statement or other evidence that demonstrates that the requirements set forth in Section 18.20.110 of this code have been met;

6. Any additional information that the licensing authority may require.

C. The completed application and all additional information submitted shall not contain any false or misleading information or conceal any material facts and shall be sworn to and notarized.

D. A registered professional engineer shall design all private sewage facilities serving institutions which will discharge in excess of five hundred gallons per day of sewage, and shall affix his seal to such design. Said designs shall be made in accordance with this chapter and good engineering judgment.

E. A registered professional engineer shall design all private sewage facilities utilizing evapotranspiration beds for effluent disposal, utilizing aerobic treatment processes, all pressure dosing system, all mound systems, all collective systems, all systems for institutions and all other innovative systems and shall affix his seal to such design. However, any such system design may be approved without such engineer's seal at the discretion of the licensing authority in those instances where a similar plan has been provided for similar environmental conditions.

F. Upon completion of the private sewage facility designed under subsections D and E of this section, and prior to issue of a license to operate, a registered professional engineer's certification may be required at the discretion of the licensing authority indicating that the installation had been inspected and it was installed in accordance with the design drawings and specifications. (Ord. 9718 § 3, 1989; Ord. 9448 (part), 1988)

18.21.040 Final inspection.

A. Within ten days after a proper and complete application has been made, the licensing authority shall make a finding on the issuance of a permit, based upon the information contained in the completed application and any other information available to the licensing authority.

B. Upon a finding that construction can commence, a permit to construct shall be issued to the applicant. Upon a finding that a permit to construct cannot be issued, the licensing authority shall so notify the applicant in writing within ten days of that finding and shall include the specific reasons for denying the issuance of a permit. (Ord. 9448 (part), 1988)

18.21.050 Expiration of permit to construct.

A permit to construct shall expire one hundred eighty days from the date of issuance unless construction has been completed on the private sewage facility for which the permit was issued. An expired permit may be reissued provided the conditions under which the permit was originally issued have not changed. A fee will be charged to defray the cost of reissuance. When a permit has expired and the original conditions have changed, a new application must be submitted with a new application fee. (Ord. 9448 (part), 1988)

18.21.060 License to operate.

A. A license to operate shall be obtained from the building official prior to operating a new private sewage facility. Such license shall be issued after satisfactory completion and approval of construction.

B. Each new private sewage facility shall be inspected and approved by the department of environmental services prior to the final covering of the facility. The applicant or installer shall notify the department of environmental services that an inspection is desired at least three days, excluding weekends and legal holidays, prior to the need for inspection. The applicant or installer shall provide whatever reasonable assistance the department of environmental services requests in order to make the inspection.

C. At the time of an inspection and issuance of a written site approval form, the department of environmental services shall within ten days make a written finding on the issuance of a license, based upon the information obtained from the inspection and any other information available to the licensing authority and shall furnish said finding to the building official within ten days.

D. Upon a finding that the applicant or installer has complied with all applicable code provisions, tendered all required fees and the use of the new private sewage facility will not cause pollution, injury to the public health, or nuisance conditions and is not in conflict with this chapter and upon payment of appropriate fees, a license to operate the facility shall be issued to the applicant.

E. Upon a finding that a license to operate cannot be issued, the department of environmental services shall so notify the applicant in writing within five days of that finding and shall include the specific reasons for denying the issuance of a license.

F. Licenses to operate issued under the authority of this chapter shall be for an indefinite period and shall be transferred to a succeeding owner. Upon the request of a new owner of a licensed private sewage facility, the department of environmental services shall transfer the license to that new owner, provided the private sewage facility has not been substantially modified. (Ord. 16985 § 37, 2008; Ord. 16818 § 6, 2008: Ord. 9718 § 4, 1989; Ord. 9448 (part), 1988)
(Ord. No. 17390, § 24, 8-24-2010, eff. 9-1-2010)

18.21.070 Existing private sewerage facilities.

A. Private sewage facilities in use on July 26, 1988 are not required to be licensed, except as provided in subsection C of this section, or rebuilt in accordance with this chapter, provided the facility is not causing pollution, a threat to the public health, or nuisance conditions, or has not been substantially modified.

B. If an existing private sewage facility is causing pollution, a threat to the public health, or nuisance conditions, or has been substantially modified after July 26, 1988, then the private sewage facility shall be licensed in accordance with Section 18.21.030.

C. In order to provide a basis for future planning of water and wastewater services, encourage the protection of community health, enhance the value of existing homes and facilitate the future sale of such homes, the owner of any residential private sewage facility which has not previously been licensed by the licensing authority shall apply for a license to operate the facility. This subsection shall not apply to any person currently under pending enforcement action or to any person who installed a system for compensation. The licensing authority shall issue the license to operate upon receiving a written application giving the name of the system owner, the location of the system, the lot size, approximate number of persons served by the system, the approximate age and a general description of the system, and a statement that the system is not overflowing onto the surface or open to the surface. Any such systems registered within two years of the enactment of this chapter shall be entitled to a partial waiver of fees. (Ord. 9448 (part), 1988)

18.21.080 Innovative designs.

Designs for on-site sewerage systems approved by the Texas Commission on Environmental Quality pursuant to its evaluation program for innovative designs shall be deemed designed in accordance with this chapter. New and innovative designs for on-site sewerage systems not covered by the design standards of this chapter must be submitted to the Texas Commission on Environmental Quality for their approval. (Ord. 16818 § 1 (part), 2008; Ord. 9448 (part), 1988)

18.21.090 Abandoned facilities.

A. Every abandoned building (house) sewer or part thereof, shall be plugged or capped in an approved manner within five feet of the property line.

B. Every cesspool, septic tank and seepage pit which has been abandoned or has been discontinued otherwise from further use or to which no waste or soil pipe from a plumbing fixture is connected, shall have the sewage removed therefrom and be completely filled with earth, sand, gravel, concrete or other approved material.

C. The top cover or arch over the cesspool, septic tank, or seepage pit shall be removed before filling and the filling shall not extend above the top of the vertical portions of the sidewalls or above the level of any outlet pipe until inspection has been made, following which the cesspool, septic tank or seepage pit shall be filled to the level of the top of the ground.

D. No person owning or controlling any cesspool, septic tank, or seepage pit on his own premises or in any abutting portion of a public street, alley or other public property, shall fail, refuse or neglect to comply with the provisions of this section.

E. Where disposal facilities are abandoned consequent to connecting any premises with the public sewer, the permittee making the connection shall fill all abandoned facilities as required by the licensing authority within thirty days from the time of connection to the public sewer. (Ord. 9448 (part), 1988)

18.21.100 On-site sewage disposal board of exceptions.

A. There is established a board to be called the on-site sewage disposal board of exceptions, which shall consist of five members appointed by the mayor and city council. The board shall be composed of: one consumer, one person con-

nected with public health, one sewer system installer, one developer and one registered professional engineer. Alternatives shall be appointed for each position as replacements in case of a regular member's absence or conflict of interest. The members of the board shall serve without compensation.

B. Of the regular members first appointed, three shall be appointed for a term of four years and two shall be appointed for a term of two years, and thereafter all regular members shall be appointed for terms of four years. Alternate members shall be similarly appointed and have similar terms of office.

C. Three members of the board shall constitute a quorum. The board shall establish rules for its procedures not inconsistent with the city Charter and this code; such rules shall include provisions for the election, terms and duties of such officers as the board deems necessary. (Ord. 9448 (part), 1988)

18.21.110 Exception.

A person desiring an exception to any requirement of this chapter shall file three copies of a written request with the licensing authority stating: (A) The nature of the exception requested; (B) Specific reasons that justify the granting of the exception; and (C) Any information that the licensing authority reasonably requests. Requests for exceptions or variances shall be considered on an individual basis. The burden of proof is the responsibility of the registered professional engineer or registered professional sanitarian responsible for the design. Within thirty days after the receipt of said request, the licensing authority shall review the request and reply to the applicant in writing either granting or denying the request. If the request is denied, the licensing authority shall include the reasons for denial in the reply. (Ord. 9448 (part), 1988)

18.21.120 Appeal.

A. Any person aggrieved by an action or decision of the licensing authority made hereunder may, within thirty days of the date of the document giving notice of the action or decision, or within thirty days of the action, if no document is given, appeal to the on-site sewage disposal board of exceptions.

B. The appeal shall be initiated by filing a written objection with the board in triplicate. The written objection shall state what the complainant believes the action or decision of the licensing authority should have been and the reasons therefor. A copy of the document containing the notice of the complained of action or decision, or a written statement of the complained of action or decision, if no document was given, shall be attached to said written objection.

C. Upon receipt of said written objection and attachment, the board shall set the same down for a hearing to be held within the next thirty days and advise all parties of the date, time, and place of the hearing.

D. At hearings before the board, all witnesses shall be sworn. The board shall hear the testimony of the licensing authority and any witnesses the licensing authority may call. The board shall hear the testimony of the complainant and any witnesses the complainant may call. The board shall review all documents and exhibits submitted by the parties. The board shall not be bound by formal rules of evidence and shall control the evidence, reserving the power to exclude or limit testimony or exhibits it does not consider relevant.

E. The board shall maintain an accurate record of the evidence adduced at the hearing.

F. Within ten days of the close of the hearing, the board shall reduce to writing its report, which shall consist of a finding of facts and its decision, and shall notify the licensing authority and the complainant of its decision. The board shall file the original of its report with the city clerk, shall keep one copy for itself, shall send one copy to the complainant, and shall send one copy to the licensing authority.

G. If the licensing authority or the complainant is dissatisfied with the board's decision, he may, within thirty days from the date the board filed its report, file a written objection with the city clerk. When such an objection is filed, the clerk shall place the matter on the agenda of city council for review at the next meeting of city council that is at least ten days after the date of the filing of the objection. The city clerk shall notify the licensing authority and the complainant that the matter is on the agenda.

H. When the matter comes before city council, the city council shall review the matter, considering such information as is in the board's file and report along with such other evidence as city council may deem relevant and as may be offered by the licensing authority or the complainant. The city council shall

either affirm, reverse, or modify the decision of the board.

I. These provisions for appeal are not exclusive, but are cumulative of any other remedies at law or in equity. (Ord. 9448 (part), 1988)

Article III. Lawful Discharges and General Requirements

18.21.130 Lawful discharges.

After the adoption of this chapter, only the following types of sewage discharges shall be lawful:

A. Sewage discharged into an organized disposal system operating under a valid permit issued by the Texas Commission on Environmental Quality or by the licensing authority;

B. Sewage discharged into a private sewage facility designed, installed, licensed, operated, and maintained in accordance with this chapter;

C. Sewage discharged into an existing private sewage facility that is in use on the effective date of this chapter, and has not been substantially modified since the effective date of this chapter; such a facility shall not be operated or maintained in such a manner as to cause pollution, a threat to the public health, or nuisance conditions. (Ord. 16818 § 2 (part), 2008; Ord. 9448 (part), 1988)

18.21.140 Requirements.

A. No person, except the person owning or having the right of possession and use of the parcel of land upon which a proposed private sewage facility is to be located, or a contractor licensed by the licensing authority to install private sewage facilities, may apply for a private sewage facility permit. The license to operate shall be issued only to the person owning or having the right of possession and use of the land.

B. The design, construction, and installation of any new private sewage facility and the maintenance of any private sewage facility shall, at a minimum, meet the requirements set forth in this chapter.

C. The construction, installation, or substantial modification of a private sewage facility shall be made in accordance with the approved design and requirements of the permit to construct issued therefor.

D. No component of a private sewage facility shall be covered until an inspection by the licensing authority has been made; provided, however, absorption trenches or beds, or evapotranspiration beds may be partially backfilled, but all ends and other critical areas shall not be covered until the licensing authority has determined, as evidenced by the issuance of a written site approval form that the installation, construction, or substantial modification complies with this chapter, or other special conditions specified in the permit.

E. No person may cause, suffer, allow, or permit the operation or use of a new private sewage facility unless a written site approval form, license, or necessary license amendment therefor, has first been issued.

F. No person may cause, suffer, allow, or permit the construction or installation of a private sewage facility on a lot or tract that is smaller than that required to meet the requirements set forth in this code.

G. The effluent from a private sewage facility, whether using an aerobic or anaerobic treatment unit, must be discharged into a properly designed and constructed absorption or evapotranspiration unit and shall not be discharged to the ground surface without first obtaining appropriate permits from the Texas Commission on Environmental Quality; into or adjacent to any water in the state or in a manner which violates water quality standards.

H. No person may cause, suffer, allow, perform or permit the construction or installation of, or a substantial modification to, a private sewage facility unless a permit therefor has first been issued or there is an emergency. In emergency situations, the owner or licensed installer of a private sewage facility shall provide an oral statement to the licensing authority within two days describing the need for emergency modifications. An emergency shall be defined as an event or set of circumstances so unexpected as to prevent the owner from filing an earlier application for modification. After any oral statement, the owner shall provide the licensing authority with the neces-

sary statements and information within seven days after the oral application.

I. No person may cause, suffer, allow, or permit the maintenance of a private sewage facility in such a manner as to cause pollution, injury to public health, or nuisance conditions. (Ord. 16818 § 2 (part), 2008; Ord. 9448 (part), 1988)

Article IV. Design Standards for Site Evaluation

18.21.150 Residential lot sizing.

A. No design for an on-site sewerage facility shall be approved for a lot less than five acres unless the lot is located in a subdivision approved by the city plan commission.

B. Smaller Lots or Tracts. On smaller lots or tracts, approved by the city plan commission on a preliminary or final basis prior to January 1, 1988, an on-site sewerage facility may be permitted to be constructed and licensed to operate if it meets the following criteria: it must be demonstrated by a thorough investigation of a registered professional engineer or registered professional sanitarian (either having demonstrated expertise in on-site sewage system design) that an on-site sewerage facility on one of these lots can be operated without causing a threat or harm to an existing or proposed water supply system or to the public health, or creating the threat of pollution or nuisance conditions. The foregoing demonstration will be presumed to have been made when it is shown that an on-site facility can be constructed which meets the design standards of the Texas Commission on Environmental Quality in effect on December 31, 1987 and entitled "Construction Standards for Private Sewage Facilities." The foregoing demonstration will also be presumed to be made if a sewage disposal plan or a site specific design for the lot was approved by the department of environmental services prior to the adoption of the ordinance codified in this chapter. (Ord. 16818 § 1 (part), 3 (part), 2008; Ord. 9448 (part), 1988)

18.21.160 Soil technology and disposal method selection.

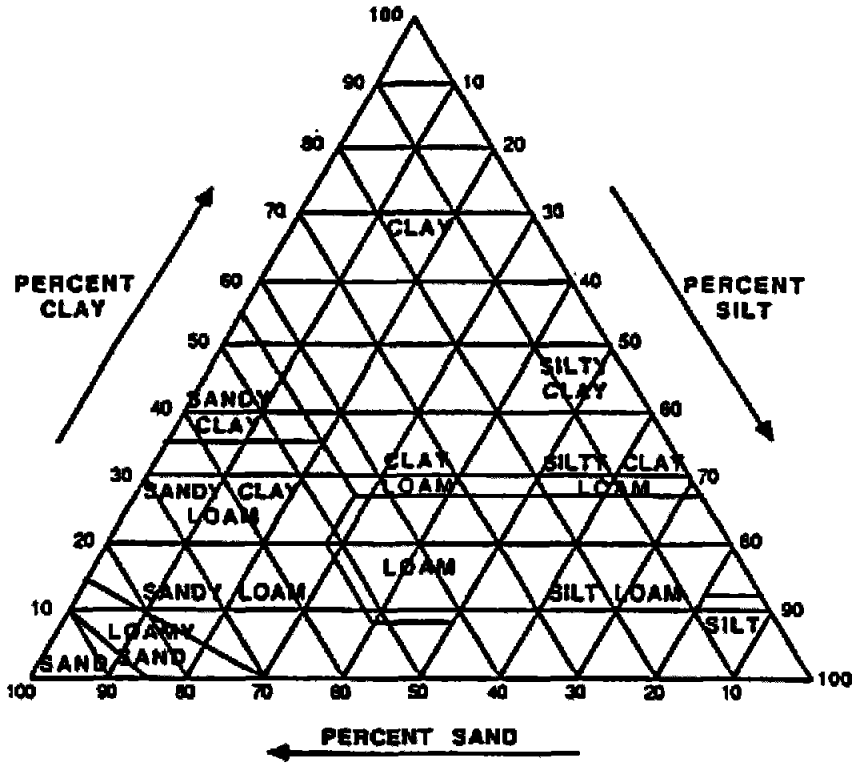
A. Prior to project building construction, a site evaluation, soil characterization study, and project component positioning must be performed by a registered professional engineer, or registered professional sanitarian. Site evaluation is a combination of field inspection, laboratory testing, and desk top analysis. It includes a thorough understanding of the codes and regulations governing the use of the site. The following are the required elements of the evaluation.

B. Topography. A site's topography relates to the changes in surface height over the site's total area. Topography can influence the choice of system used. For instance, pressure dosing may be the only type of system possible where the only acceptable location for the disposal area is at a higher elevation than the treatment unit. Grading plans to alter the topography may be used in order to evaluate whether the site can be used. Care must be taken to protect or replace the site's topsoil.

C. Soil Characteristics. The most important characteristics of soil are the ability to absorb fluid, provide adequate treatment, and convey the treated water under ground. Permeability is the characteristic relating to ease of water movement through soil. The main properties indicative of absorption capacity are soil texture, (see Table 18.21.160(A)) structure, color, thickness of permeable strata and swelling characteristics.

1. Soil Properties. Soil properties are discussed in detail by the United States Department of Agriculture, Soil Conservation Service (USDA-SCS), in the soil survey report for El Paso County. This survey includes general soil maps which outline the areas of different soils onto aerial photos. General information is given regarding the soil's suitability for sewage effluent

Table 18.21.160(A)
USDA SOIL TEXTURAL CLASSIFICATIONS



Clay— Smaller than 0.002 millimeters in diameter

Silt — 0.05 to 0.002 millimeters in diameter

Sand — 2.0 to 0.05 millimeters in diameter

disposal on a broad scale and can be used for preliminary evaluation.

2. Field Investigation. A careful field investigation must be made by persons trained or having qualified experience in soils science or on-site sewage disposal to determine the capability of a site to absorb and treat wastewater. The investigation should be done during the wettest season of the site. The soil evaluation should address the eight site characteristics listed in Table 18.21.160(B). A site plan must be submitted to the local Licensing Authority showing the proposed location of the various components of the on-site sewage system and the existing or future improvements, lot lines and any other item that restricts the choices of component locations.

D. Groundwater. Seasonal high groundwater (perched water) tables can exist in any area of the state. Under such conditions, it is possible to locate perched water near the ground surface during wet periods each year. This situation is the result of seasonal rain storm runoff permeating into a shallow soil mantle that lies upon an impermeable material like a solid rock or very dense clay. The mechanism for the removal of this water is by very slow draining to open channels or areas not influenced by clay or rock. Some moisture is taken upon by evaporation and transpiration of plants that are rooted into the permeable top soil.

E. Flooding. Usual site development requires that the structure be built on the highest portion of the site. The sewage system is developed in the remaining area of the site that is lower than the structure. Unfortunately, the lower area of a site may be subject to flooding as it naturally receives storm runoff from all areas upstream of it. Careful evaluation of flooding potential is necessary to determine whether flood preventative measures must be incorporated into the on-site sewage system. All of a soil absorption system must be constructed out of the flood-prone area, and not within areas subject to inundation or erosion by flood waters or rainfall runoff. An applicant for a permit to install a sewage system shall consult with the local flood plain ordinance administrator, county engineer, State Highways and Public Transportation Department, nearest river authority, Farmers Home Administration, Federal Emergency Management Agency, and other officials who may have information regarding the potential for flooding at the disposal site.

F. Solid and Fractured Rock. Solid or fractured rock underlying a thin absorptive soil mantle which is less than four feet thick poses two different problems to the on-site sewage system user. Solid material will reduce the absorptive capacity of a site while fractured rock may act as the mechanism for direct pollution of an aquifer that lies under the site. Percolation tests in these materials are unreliable and must not be used to size the sewerage system.

G. Caliche. Deposits of a white-to-pale yellow mineral form of calcium carbonate and related compounds of variable thickness and hardness that should be carefully inspected by a soils scientist or qualified local authority to determine site suitability for treated sewage absorption. Caliche has several forms that may or may not allow the site to be developed as a sewage absorption area. However, if a soils scientist or qualified local authority is unavailable, an evaportranspiration system can be installed if climatic conditions are appropriate.

H. Offsets from Property Lines. Minimum spacings from adjacent property owners must be adhered to. A common property line may be built upon with fencing or masonry walls. The area may serve as natural or artificial drainage for storm runoff. For these reasons, private on-site sewerage systems must not be built on these spacings, unless there is a written agreement between the adjacent property owners involved.

I. Clearances from Structures and Surface Improvements. Table 18.21.160(C) indicates clearance requirements relating to structures and surface improvements. Structure foundations or surface improvements, such as swimming pools, concrete curbs, landscaping, lawn sprinklers, concrete, asphalt, wood decks, or other types of

Table 18.21.160(B)
Criteria for Soil Absorption of Sewage Effluent Developed for Site Specific Evaluations

Site Characteristic	Classification: Suitable	Classification: Provisionally Suitable*	Classification: Not Suitable
Topography	Slopes 0 — 15%	Slopes 15 — 30%	Slopes greater than 30% Complex slopes
Subsoil Texture	Sandy soils Loamy soils	Clayey soils with low shrink-swell potential	Clayey soils with high shrink-swell potential
Subsoil Structure		Angular or sub-angular; Blocky	Platy structure; Weathered rock; Massive clayey soils
Soil Depth	Weathered rock or consolidated bedrock greater than 48 inches below ground surface	Weathered bedrock or consolidated rock from 36 to 48 inches below ground surface	Weathered rock or consolidated bedrock less than 36 inches below ground surface
Restrictive Layer	None within 36 inches of the ground surface		Restrictive horizon within 36 inches of the ground surface or below the trench bottom
Soil Drainage	No drainage mottles within 36 inches of the ground surface		Drainage mottles (chroma 2 or less) within 36 inches of the ground surface
Flooding			Areas subject to a possible flood; depressional areas without adequate drainage
Soil Permeability	Greater than or 5 min/inch but less than or equal to 60 min/inch		Less than or equal to 5 min/inch or greater than 60 min/inch. Unselective fill materials groundwater

*Soil may be reclassified from unsuitable to provisionally suitable under certain conditions using acceptable site or system modifications.

Table 18.21.160(C)
Minimum Required Distances in Feet for Conventional Systems

From To:	Sewage Treatment Tanks	Lined Evapo. Beds	Soil Absorption Systems or Unlined Evapo. Beds	Sewer Pipe with Watertight Joints
Private water wells, underground cisterns and pump suction pipes	50 +	150* +	150* +	20 +
Public water wells	50	150*	150	20
Water supply lines	10	10	10	9
Streams, ponds and lakes	50	75*	75	20
Sharp slopes, breaks	5	var.	50**	5
Foundations, structures and surface improvements	5	5	15	—
Property lines	10	10	10	—
Easement lines	1	1	5***	—
Soil absorption systems	5	5	20	—
Swimming pools	15	15	15	—

* When a leak detection system as described in Sec. 301.13.(c)(3)(A)(ii)(IV)(-a-) is used, the minimum required distance is 50 feet to existing private water wells, cisterns and pump suction pipes.

Var. These minimum required distances may be varied if an innovative lined system is required by the permitting authority to be designed by a Registered Professional Engineer or Registered Professional Sanitarian.

** The absorption system's bottom must be a minimum of 50 feet from any break or outcropping ledges, unless it is designed by a Registered Professional Engineer or a Registered Professional Sanitarian having hydrogeological data of the strata below the system's site. Greywater disposal areas may be installed to within 25 ft. of the slope face.

*** A drainage easement having sloped sides greater than 30% or grade breaks will require adherence to the 50 foot criteria indicated by **.

\+ This distance may be reduced to a minimum of 50 feet, for existing private water wells only, if the space between the existing private water well casing and the surrounding ground is filled with cement slurry that is pumped through a tube that extends to the required depth of sealing. This depth shall be at least two times the horizontal encroachment measurement but not more than the depth to the water producing strata. A three-foot-square by six-inch-thick concrete slab shall be poured around the casing.

materials must not be placed or planned for installation in any manner that will jeopardize the suitability of subsurface sewage disposal sites, unless a study by a registered professional engineer or a registered professional sanitarian is approved by the licensing authority.

J. Spacing with Other Utilities. Utility companies may have special restrictions that can be enforced onto on-site sewerage system installations. Safety of operations has been cited as a reason to maintain distance from buried electric and gas conduits. Safety to public health requires the separation of potable water piping from sanitary sewerage systems. Table 18.21.160(C) lists commonly used criteria, but each utility company serving the parcel should be consulted prior to installing the sewerage system even if no potential problems are evident.

K. Disposal System Selection. In designing a private sewage facility, several options concerning subsurface disposal are available. Table 18.21.160(D) has been prepared to aid in the selection of the proper system based on site evaluation, percolation rate, and lot size considerations. The table includes the systems generally recommended for subsurface disposal which are drainfields, absorption beds, and evapotranspiration beds. The purpose of Table 18.21.160(D) is to indicate the most feasible type of system to construct taking into consideration lot size, soil absorptive capacity, water conservation practices, and local climate.

1. System Selection. After determining the sizing of appropriate treatment tankage, the licensing authority shall confer with the applicant regarding the calculations to determine the bottom area required for trenches, an absorption bed system, and an evapotranspiration system. Generally, the system having the least number of square feet of bottom area will be the most economical. In most cases where adequate room is available, a trench system will be less costly.

2. Low Soil Permeability. In areas where soils have low permeability, it is possible to design a system which combines both soil absorption and evaportranspiration. Such systems are somewhat complicated and should be designed by a person trained in sewerage system design. (Ord. 9448 (part), 1988)

18.21.170 Percolation test procedures.

The percolation test is but one of many indicators of a site's future suitability to accept sewage for safe permanent disposal. Consequently, it should not be considered as the sole basis of designing an on-site sewerage system.

A. Location and Number of Tests. A minimum of three test holes will be required with the holes uniformly spaced over the proposed absorption field site.

1. Adjacent Groups. If the percolation rate results fall in adjacent groups, the absorption field may be designed using the test results from the hole with the slowest percolation rate or one additional hole may be dug, tested and all four results averaged. To properly average the results, each test result must be converted to minutes per inch, then added together. The sum is then divided by the number of tests. If tests in an area vary by more than twenty minutes per inch, variations in soil type are indicated and percolation rates should not be averaged.

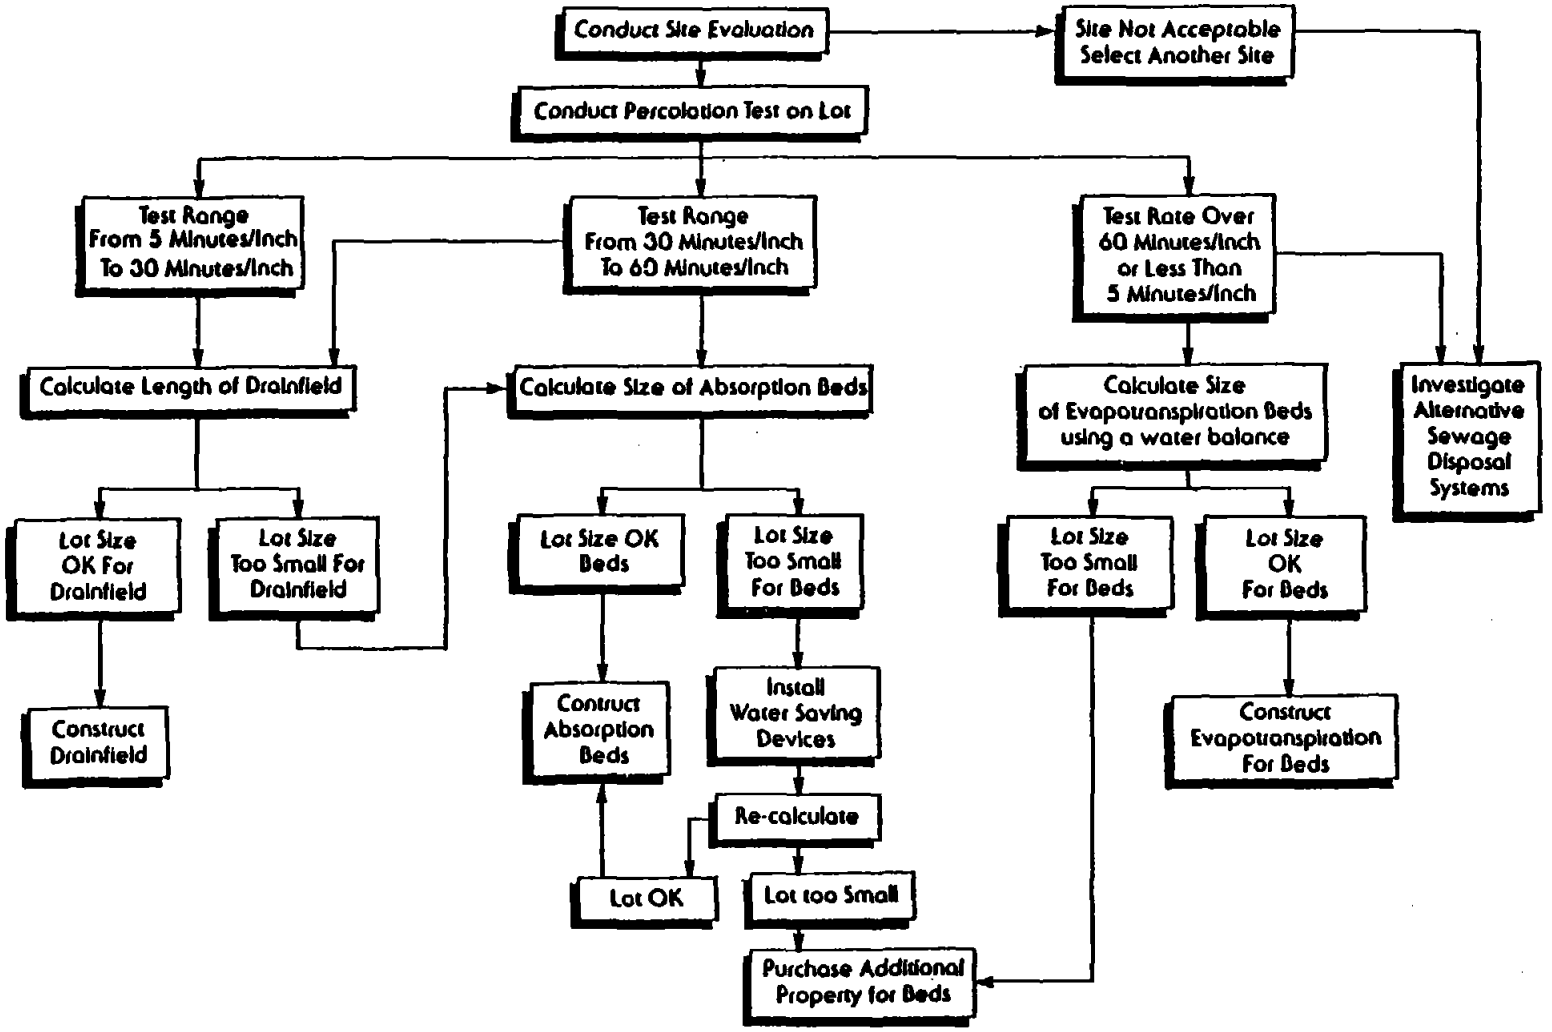
2. Nonadjacent Groups. If the percolation rate results fall in nonadjacent groups, the Absorption field may be designed using the test results from the hole with the lowest percolation rate or two additional holes may be dug, tested, and the results averaged.

3. Alternative Procedure. In lieu of the previously mentioned procedure, four holes may be dug and tested and the results averaged at the same time to reduce the amount of time required to conduct the test.

B. Type of Test Hole. Dig or bore a hole with a diameter of from six to twelve inches with vertical sides to the depth of the proposed absorption trench. The bottom of the hole must be at the same elevation as the proposed drainfield bottom.

C. Preparation of Test Holes. Carefully

Table 18.21.160(D)
FLOW SHEET FOR SELECTING PROPER SUBSURFACE DISPOSAL METHODS



scratch the bottom and sides of the hole with a knife blade or sharp-pointed instrument in order to remove any smeared soil surfaces and to provide a natural soil interface into which water may percolate. Remove all loose material from the hole and carefully place approximately one inch of coarse sand or fine gravel into the bottom of the hole to protect the bottom from scouring.

D. Saturation and Swelling of the Soil. It is important to distinguish between saturation and swelling. Saturation means that the void spaces between soil particles are full of water. This can be accomplished in a short period of time. Swelling is caused by intrusion of water into the individual soil particle. This is a slow process, especially in a clay-type soil, and is the reason for requiring a prolonged soaking period.

E. Filling of Test Holes. In the conduct of the test, carefully fill the hole with clear water to a minimum depth of twelve inches. In most soils, it is necessary to refill the hole by supplying a surplus reservoir of water manually or by means of an automatic siphon, to keep water in the hole until saturation occurs (approximately twenty-four hours). Determine the percolation rate twenty-four hours after water is first added to the hole. This procedure is to insure that the soil is given ample opportunity to swell and to approach the condition it will be in during the wettest season of the year. Thus, the test will give comparable results in the same soil, whether made in a dry or in a wet season. In sandy soils containing little or no clay, the swelling procedure is not essential and the test may be made as described in subsection G of this section after the water from one filling of the hole has completely seeped away.

F. Percolation Rate Measurement. With the exception of sandy soils, percolation rate measurements shall be made on the day following the procedure described in subsection E of this section. After the overnight swelling period, adjust the water depth to approximately twelve inches from the bottom. From a fixed reference point, measure the drop in water level over a thirty-minute period. This drop is used to calculate the percolation rate. If the rate is slower than thirty minutes per inch, continue with measuring the rate for an additional thirty minutes. The slower rate of the two consecutive one-half-hour tests should be used.

G. Percolation Rate Measurement (Sandy Soils). In sandy soils (or other soils in which the first six inches of water seeps away in less than thirty minutes, after the overnight swelling period), the hole should be filled to a depth of six inches and that depth maintained by adding water for thirty minutes. After thirty minutes, the drop in water level should be measured over an additional ten-minute period and the percolation rate calculated from this measurement. (Ord. 9448 (part), 1988)

Article V. Design Standards for On-site Treatment Methods

18.21.180 Design standards for residential sewerage systems.

A. House Sewer. The sewer from the house plumbing system to the septic tank shall be constructed of structurally sound pipe such as cast iron, ductile iron, or SDR 35 (or equivalent) plastic pipe with metallic locating tape, bedded in sand. Cast iron, ductile iron, Schedule 40 PVC, or high strength pipe should always be used under driveways. The pipe from the house to the septic tank shall have a minimum inside diameter of not less than four inches and be compatible with the house stub out pipe. The slope of the house sewer shall be no less than one-quarter-inch fall per foot of pipe. The stub out location shall be at the highest possible elevation with respect to the house foundation to avoid deep treatment systems. The line must be of watertight construction. A cleanout plug must be provided within three feet of the building and at ninety-degree turns in alignment, both horizontal and vertical, and at every seventy-five feet of

straight horizontal piping. Prospective installers and users of low flush commodes should consult with the manufacturers of these devices regarding their grade requirements. Too steep or too shallow slopes on pipes connecting the toilet and the treatment tank may require excessive maintenance. Piping from the treatment tankage to the disposal area must have at least two inches inside diameter, have at least a minimum fall of one-eighth inch per foot and be as sturdy as SDR 35 PVC piping. Metallic locating tape shall be used with the installation of all piping to and within the disposal area. This tape shall be readily detectable with a metal detector.

B. Septic Tank Capacity Based on Sewage Loading. A properly designed septic sewage tank shall be watertight. The settleable and suspended solids will undergo partial decomposition under anaerobic conditions. As a result of use, the septic tank will accumulate partially decomposed solids which must be removed periodically. As additional sewage is introduced into the tank, partially clarified effluent is discharged into the subsurface disposal field. The best method for estimating the tank's sewage loading is based upon the number of bedrooms in the house. Table 18.21.180 shall be used to determine the required minimum septic tank liquid capacity.

Table 18.21.180
Septic Tank Minimum Liquid Capacities

Number of Bedrooms	Septic Tank Capacity (Gallons)
Two or less	1,000
Three	1,000
Four	1,250
For each additional	250

Note: The inside liquid depth of the tank shall not be less than 30 inches.

See Table 18.21.230 for calculating the number of bedrooms based on dwelling living area.

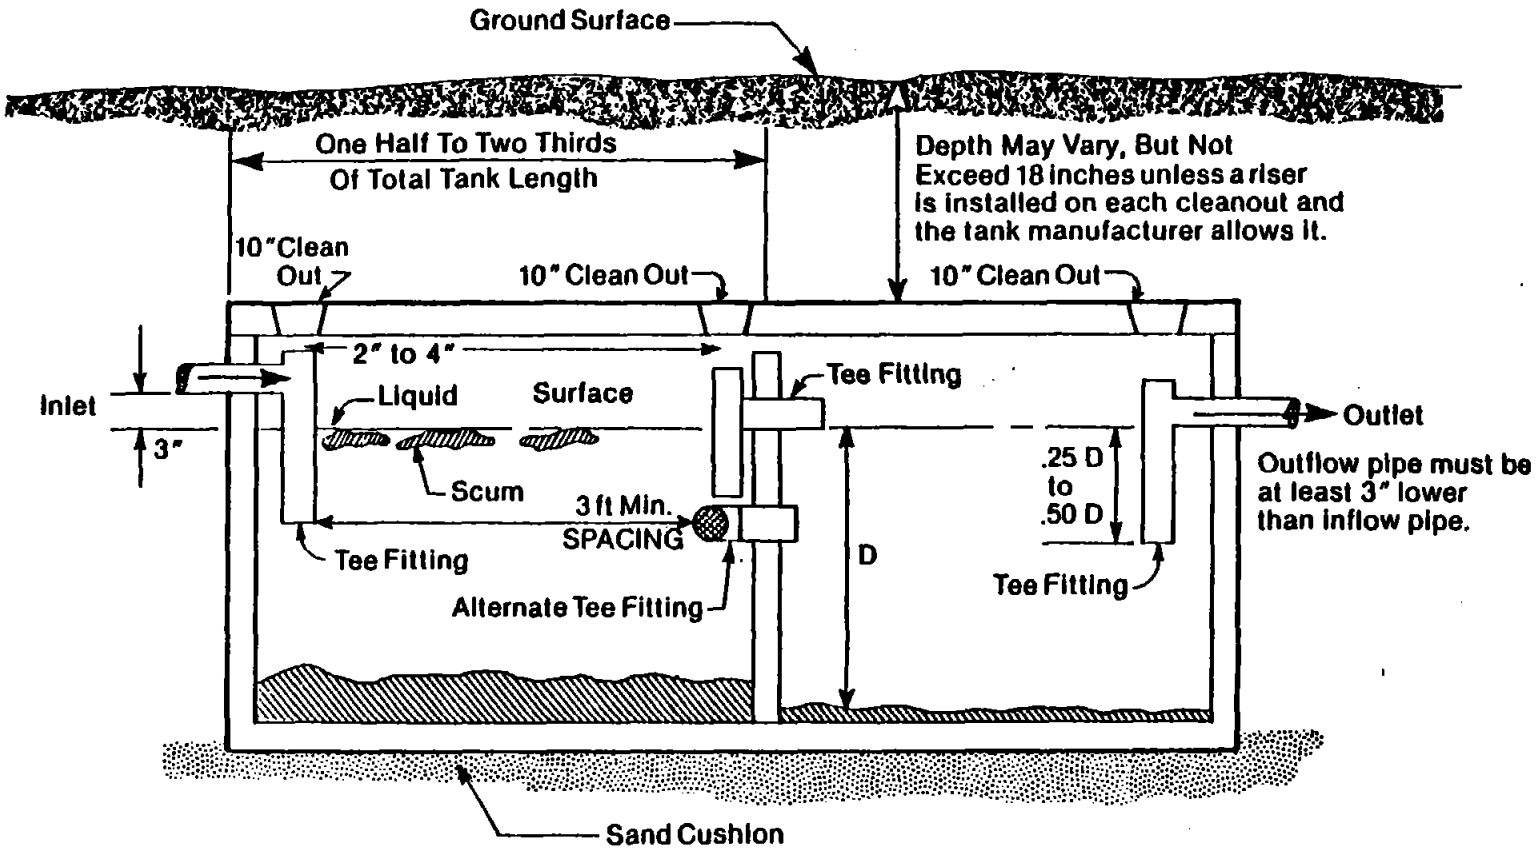
Consideration shall be given to increasing total tank capacity if extensive use of kitchen sink waste grinder/disposals is anticipated.

C. Inlet and Outlet Devices. To assure rapid drainage of house plumbing, the flow line of the inlet pipe shall be at least three inches higher than the operating tank liquid level which is determined by the flow line of the outlet pipe. Liquid penetration of the inlet device shall be at least six inches, but never greater than that of the outlet device. Liquid penetration of the outlet device shall be approximately one-fourth to one-half of the tank's liquid depth. T branches are required for inlet and outlet devices because they provide a means for venting the gases produced by the decomposition process from the tank and absorption system through the house plumbing. Otherwise, gases may escape from around the lid of the tank and cause an odor nuisance in the vicinity of the septic tank. T branches also offer ready access for required maintenance. To prevent the escape of floating solids from the tank to the subsurface disposal field and the possibility of inlet stoppages, the open spaces between the tops of the inlet and outlet devices and the underside of the tank cover shall not be greater than four inches, nor less than two inches (See Figure 18.21.180(A)). In order to provide a good watertight septic tank, the inlet and outlet T branches shall be installed in a permanent manner at the time the septic tank is constructed. Factory built tanks shall have the T branches grouted in place before delivery so that the only connections to the tank at the point of installation will be the influent and effluent lines. Manufacturers of prefabricated tanks shall be allowed to install watertight flanges into the tank walls, into which inlet and outlet stubs can be easily fitted by field installers, causing watertight connections.

D. Details of Septic Tank Design.

1. Two single compartment tanks in a series, or a two compartment tank, with approximately one-half to two-thirds of the total volume in the first compartment, will be required for acceptable solids removal. Tanks may be round, rectangular, or of a shape that allows the department's standards to be met. The second tank or compartment shall have inlet and outlet devices designed the same as for a single-com-

Figure 18.21.180(A)
TWO COMPARTMENT SEPTIC TANK



Not intended to serve as an engineered design for construction purposes

partment tank, except that the elevation, or flow line, of the inlet devices in the second unit shall be the same as the outlet device in the first unit (See Figure 18.21.180(B)). A ten-inch minimum diameter or square port shall be provided to each flow line device for inspection, cleaning, and maintenance. Both the inlet and outlet devices shall be accessible for inspection and maintenance without having to enter the septic tank. For tanks not having more than twelve inches of earthen cover, the use of sectional slab covers will conveniently and safely provide the needed access. For tanks buried more than twelve inches, manholes with risers are required. The septic tank shall be of sturdy, watertight construction. Materials used may be steel-reinforced poured-in-place concrete, steel-reinforced pre-cast concrete, reinforced fiberglass, polyethylene, or other materials approved by the licensing authority. Metal septic tanks are prohibited because they are subject to corrosion. The septic tank shall be structurally designed to resist buckling from external hydraulic loading and exterior loading caused by earth fill, garden tractors, riding lawn mowers, or any expected maximum wheel weights. Tanks exhibiting obvious deflections, leaks, or defects that will impair treatament must not be used. Where concrete tanks are installed, sweating, or condensation at construction joints is acceptable.

2. In the case of poured-in-place concrete tanks, septic tank bottoms shall be at least six inches thick with 6 x 6 x 6 gauge welded steel mesh or number three reinforcing bars on six-inch centers, with such reinforcing materials being extended up into the wall area of the tank so that it will mesh with the reinforcing materials in the walls of the tank. The floor and walls must be constructed monolithically. Walls are to be a minimum of six inches thick.

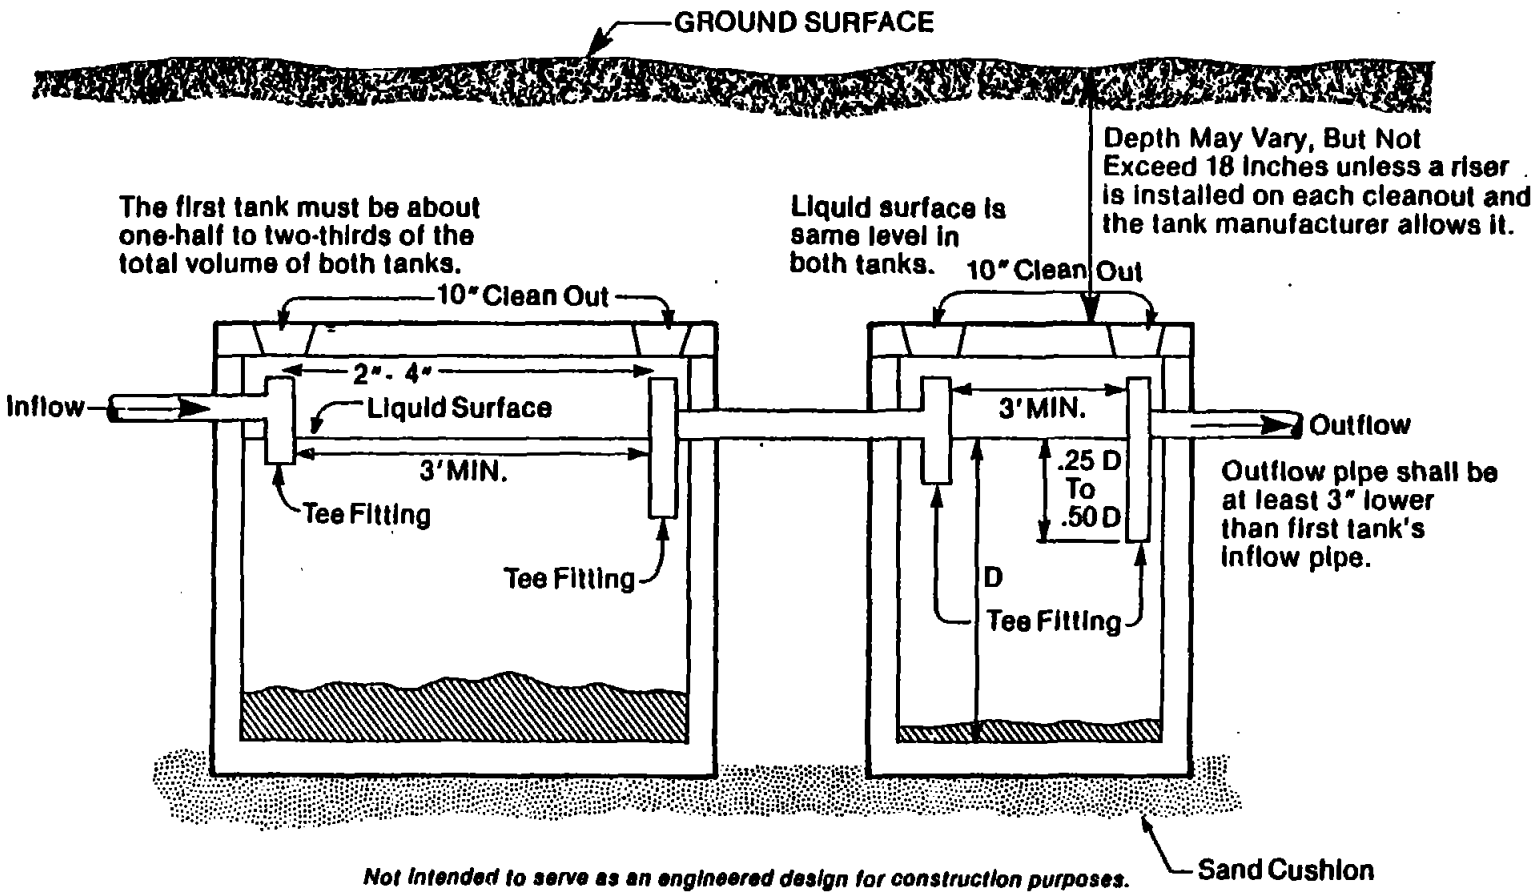
3. Septic tank tops reinforced with 6 x 6 x 6 gauge welded steel mesh or number three reinforcing bars on six-inch centers must be poured off-site rather than on the tank (not on top of a wooden frame over the tank) and must be moved onto the tank after hardening and then sealed to the tank with a permanent bonding material or rubber gasket having a one-half inch minimum thickness so as to form a seal between tank and top. To facilitate handling, tops may be poured in sections but must be sealed when in place. Tops must be a minimum of three inches thick.

4. Precast concrete, polyethylene, and prefabricated fiberglass tanks are subject to prior approval of the licensing authority, who should consult with the department regarding the uniquely differing materials, manufacturing methods, and designs used. All precast or prefabricated tanks shall be clearly marked, tagged, or stamped with the manufacturer's name, an exclusive serial number, and the capacity of such tanks near the level of the outlet in at least two positions so as to be clearly visible to the inspecting or permitting authority even after they have been placed in the ground. Listing of this information with the address of the installation shall be maintained by the licensing authority.

5. Septic tanks must be installed so as to provide at least twelve inches drop in elevation from the bottom of the outlet pipe to the bottom of the disposal area. A sand pad, sandy loam, or select material with a minimum thickness of four inches must be placed under all prefabricated tanks. All septic tank excavations must be backfilled with sand, pea gravel, select backfill, or loam not containing rocks greater than one inch in size. It is acceptable to mound sandy loam over a septic tank which is set high to maintain fall to the drainfield.

6. When treated sewage must be pumped to the disposal area, an effluent pump shall be placed in a watertight tank. A check valve shall be provided if the disposal area is upgrade and higher than the pump. The tank shall be pro-

Figure 18.21.180(B)
TWO SEPTIC TANKS
IN SERIES



Not intended to serve as an engineered design for construction purposes.

vided with a highwater alarm having a power circuit separate from the pump. The electrical connections shall be hard-wired, external to the pump chamber. Effluent pump tanks shall have a minimum capacity of five hundred gallons after the alarm is activated. (Ord. 9448 (part), 1988)

18.21.190 Design standards for institutional sewerage systems.

A. General Consideration of Use of Septic Tank Systems. Septic tanks may be used as a means of sewage treatment for nonresidential activities. However, experience indicates that the usefulness of the septic tank systems decreases as the size of the establishment served increases. A registered professional engineer shall be required to design all private sewage facilities serving institutions.

B. Sewage Loading. The total quantity of sewage applied per day to the septic tank provides the basis for the determination of its size. Table 18.21.190 will be of assistance in estimating the daily sewage flow per capita for a variety of living and activity situations. Organic loading of sewage from restaurants, hospitals, nursing homes, and other commercial establishments will require an increase in tank size.

C. Compartments to be Provided. Two compartments or two or more treatment units connected in series shall be utilized; shall be provided, the first created by a wall with a tee to permit liquid flow from the first compartment to the second one. The flow line of this intermediate fitting shall be at the elevation of the flow line of the outlet fitting of the second compartment. The fitting shall be three inches below the elevation of the flow line of the first compartment's inlet fitting. The capacity of the first compartment shall be one to two times the capacity of the second compartment. All tanks must be vented internally.

D. Selection of Septic Tank Capacity. The net volume or effective capacity below the flow line of a septic tank for flows up to two hundred fifty gallons per day shall be at least seven hundred fifty gallons. For flows between two hundred fifty and five thousand gallons per day, the capacity of the tank shall be equal to at least three days sewage flow. For daily flows over five thousand gallons per day, the determination of the necessity for a waste discharge permit must be obtained from the commission.

E. Pump Tank Usage. When treated sewage must be pumped to the disposal area, an effluent pump shall be placed in a watertight tank. A check valve shall be provided if the disposal area is upgrade and higher than the pump. The tank shall be provided with a highwater alarm having a power circuit separate from the pump. The electrical connections shall be hard-wired external to the pump chamber. Effluent pump tanks shall have a minimum capacity of one thousand gallons after the alarm is activated. For daily flows over five hundred gallons, a duplex pump configuration must be provided. (Ord. 9448 (part), 1988)

18.21.200 Design standards for aerobic sewerage plants.

A. Introduction. A number of small (up to one thousand five hundred gallons per day) aerobic wastewater disposal systems have been designed and marketed for the on-site treatment of sewage. The design standards in this section govern the installation and use of on-site aerobic sewerage plants for private residences, small businesses, and institutions that will not treat more than one thousand five hundred gallons per day. Sewerage plants designed to treat more than one thousand five hundred gallons per day must meet the design criteria for sewerage systems, published by the department and the commission.

B. Appropriate Usage. The installation and use of aerobic individual wastewater disposal units, other than septic systems, are acceptable to the licensing authority provided they meet the requirements of this section.

Table 18.21.190
Individual Usage Rates in Businesses/Institutions

This table may be used for estimating gallons of daily sewage flow per person to determine minimum tank capacity requirements, unless actual water usage data is available and has been carefully checked by the designer of the proposed system.

Type of Establishment	Gallons/Person/Day
Airports (per passenger)	5
Apartment houses	50
Boarding schools	50
Churches (per member)	5
Country clubs (per resident member)	100
Country clubs (per nonresident member present)	25
Day care centers (without kitchen)	15
Day care centers (with kitchen)	25
Drive-in theaters (per car space)	5
Factories (gallons per person per shift, exclusive of industrial wastes)	20
Hospitals	200
Hotels	80
Institutions other than hospitals	100
Laundries, self-service (gallons per wash, i.e., per customer)	50
Lounges (bar & tables)	10
Mobile homes	75
Motels	50
Movie theaters (per auditorium seat)	5
Office buildings*	15
Parks (without bathhouse)	5
Parks (with bathhouse)	15
Restaurants (24-hour full service)	70/seat/day
Restaurants (breakfast/lunch or lunch/dinner)	35/seat/day
Restaurants (fast food — paper plate service)	15/seat/day
Schools without cafeterias, gymnasiums or showers	15
Schools with cafeterias, but no gymnasiums or showers	20
Schools with cafeterias, gymnasiums and showers	25
Service stations (per vehicle served)	10
Stores (total per day per washroom)	400
Swimming pools and bathhouses	10
Townhouses (with clothes washer)	50
Travel trailer/RV parks	50
Vet clinics (per animal)	10
Work or construction camps (semi-permanent)	50
Youth camps (no showers or meals served)	15

*Note: Offices without food service or bathing facilities, with restrooms equipped with toilets requiring 1.5 gallon per flush or less, and automatic cutoff faucets .. 6

C. Effluent Disposal Practice. The effluent from an individual small aerobic wastewater disposal unit must be discharged into properly designed and constructed subsurface sewerage system. No discharges to or above the ground surface or into the waters of the state are authorized by the department. No local regulatory progam has been established to permit such practices.

D. Operation and Maintenance Responsibility. Companies distributing aerobic individual small waste disposal systems shall provide an inspection and repair service.

E. Emergency Operation. The principal structure or containing vessel of an individual small wastewater unit is designed to provide treatment to a predetermined amount of daily incoming sewage. In the event of more than one day's failure of mechanical or electrical devices, anaerobic conditions will prevail when aeration equipment is inoperable. The unit's owner shall be prepared for emergencies by contractual arrangement with the plant's seller, by stocking spare parts, by hiring a licensed sewage pumping and hauling company, or by preventing the generation of more sewage until the emergency is eliminated.

F. National Sanitation Foundation Criteria. Individual small aerobic wastewater disposal units shall have a National Sanitation Foundation Seal indicating the unit meets the Foundation's standard 40. Units not having a NSF approval rating must be approved through the procedure of Section 18.21.080.

G. Treatment Limitations. The prospective user should be aware that small aerobic treatment plants treat sewage differently than septic tanks. Aerobic treatment plants operate by mixing raw sewage together with air and masses of bacteria. Several kinds of bacteria consume the sewage and air, changing it to nitrogen, carbon dioxide and water, all of which are used by plant life. Treated clear effluent still contains microscopic bacteria and viruses that were in the raw sewage so it must be kept out of contact with the general public as much as possible. It is possible to disinfect treated sewage with chlorine, bromine, ultraviolet light, ozone, or other commercially available products. However, nothing will make aerobically treated sewage safe enough to use as fresh water. Disposal systems for aerobic plant effluent shall be the same as for septic tank effluents.

H. Siting Considerations. Most aerobic treatment plants sized for single home or small commercial shop use are usually only slightly larger than a septic tank but may not be installed as deeply. The organic loading, of commercial or institutional applications may require individual design considerations. Its inspection access is exposed to the surface, unlike a septic tank which is usually covered over with a layer of gravel or grass sod. The unit is generally one piece construction using concrete or fiberglass.

I. Solids Accumulations. Most aerobic treatment plants operate by applying air from an air compressor into the bottom of the tank that first accepts raw sewage. As the air bubbles rise to the surface the sewage mixes with a mass of brownish gray bacteria called activated sludge. Several baffles or compartments are required within the single unit so that several different activities can be done at the same time. These include mixing the air, sewage, and bacteria together, then allowing the bacteria to settle while the treated effluent is drained off the top. Solid materials that the bacteria cannot consume will accumulate in a sludge holding compartment along with grease, oil, and other undigested floating wastes. The sludge and floating wastes will have to be removed occasionally by a sludge hauling company. How often sludge has to be removed depends upon the type and amount of waste the owner applies to the system. (Ord. 9448 (part), 1988)

18.21.210 Design standards for grease traps.

A. Installation. Grease traps shall be used on kitchen wastelines from institutions, hotels, restaurants, schools with lunchrooms, and other places that may discharge large amounts of greases and oils to the sewer. However, wastes from garbage grinders must not be allowed to enter a grease trap. The trap shall be installed near the plumbing fixture that discharges greasy wastewater and should be easily accessible for cleaning. When maximum efficiency grease removal is necessary, a dual chambered trap that separates, then stores grease shall be utilized. If the dual chamber trap is installed as close as possible to the source of hot greasy wastes, the separated grease can be conveyed to the secondary chamber, where it accumulates, cools, and solidifies.

B. Sizing. Grease trap sizing will depend on the particulars of the application. Building code authorities and trap manufacturers should be consulted prior to sizing the unit. Grease interceptors shall be sized using Chapter 18.20 of this code. (Ord. 9448 (part), 1988)

Article VI. Design Standards for Effluent Disposal Systems

18.21.220 Site evaluation.

The effluent discharge from a septic tank or aerobic plant requires further handling to render it safe from a public health standpoint. A well-designed subsurface soil absorption system will allow these liquids to seep into the ground without creating a health hazard or nuisance. After the prospective builder has selected a suitable area and is assured that safe distances from wells, lakes, etc. can be maintained, the builder must determine, with the assistance of an experienced soils scientist, registered professional engineer or registered professional sanitarian whether soil formations in the selected area will allow a soil absorption system to work. When conventional soil absorption systems are used, there shall be no interference from groundwater. The groundwater table must be situated at least four feet below the bottom of the soil absorption system. The design standards for conventional soil absorption systems set forth in this chapter are based on the premise that impervious strata are at depths greater than four feet below the bottom of the absorption trench. Conventional soil absorption systems shall not be used if either impervious strata or groundwater exists at depths less than four feet from the trench or bed bottom, unless a detailed site evaluation is made and a design by a registered professional engineer or registered professional sanitarian is accepted by the licensing authority. (Ord. 9448 (part), 1988)

18.21.230 Soil absorption trench.

A soil absorption trench may be used if the proposed site provides sufficient room and is of suitable soil. An experienced soils scientist, registered professional engineer, or registered professional sanitarian should be consulted to determine if the site qualifies for trenches.

A. Absorption Trench Field for Level Terrain. Where the topography or ground slope is not too steep, a flat or level system of gravel-filled trenches or percolation beds is recommended. The use of a looped trench system will avoid dead ends and assure maximum effective utilization of all portions of the system. No individual trench shall exceed seventy-five feet in length.

1. The field bottom must be at least twelve inches lower than the flowline of the treatment tank. The capacity of any particular absorption system is determined by the total area of trench or bed bottom built into the system. The amount of this required minimum area will depend upon the expected sewage load, the average soil percolation rate, and the site's soil evaluation results. The soil percolation rate may be determined by performing a percolation test as described in Section 18.21.110 of this chapter. The trench dimensions for single family residen-

tial units may then be estimated from Table 18.21.230. For sewage flows of less than five thousand gallons per day from commercial or institutional establishments, A, the absorption trench bottom required, is determined by formula $A = 1.25\ Q/Ra$, where Ra, the allowable application rate, is found in Table 18.21.230 and Q is the daily flow.

2. All parts of the trench or bed bottom shall be at the same elevation. Trenches should be constructed as shallow as possible with a minimum depth of eighteen inches and a maximum depth of thirty-six inches. Deeper trenches should be used where snow may saturate the upper portion of the trench. For trench depths greater than twenty-four inches (except where snow exists), sand shall be used to fill the trench up to the top soil over as shown in Figure 18.21.230(A). The trench width shall not exceed thirty-six inches, as narrow trenches (twelve to eighteen inches) are recommended. Although trench length is based on bottom area only, sidewall area is important since much of the wastewater is absorbed through the sidewalls and is eventually evaportranspirated. Maximum allowable spacing between adjacent edges of parallel trenches is three trench widths.

3. Liquid from the sewerage unit is conducted to the absorption system via a watertight line similar to the house sewer. The liquid is distributed uniformly through the gravel-filled trenches by the use of three-inch to ten-inch perforated plastic pipe of any one size, or equivalent pipe materials. It is important that the distribution piping be laid reasonably level (four inches per one hundred feet maximum allowable grade) in the trenches, with a minimum of six inches gravel depth under the pipe. A total gravel depth of approximately twelve inches is required. The trench media must be clean graded gravel, broken vitrified brick, washed rock, crushed stone, or similar aggregate that is generally one uniform size (from 0.75 inches to 2.0 inches). Oyster shell, other types of shell, and soft limestone are not allowed for trench media because the cementitious properties of this type of material often result in early trench failure. The distribution pipe shall consist of plastic perforated pipe, four-inch corrugated polyethylene, or equivalent materials with an SDR ratio (ratio of pipe diameter to wall thickness) not numerically greater than forty-one. Jointed tile is not recommended for use because of the difficulty in maintaining joint spacing and keeping the line level. Covering of several layers of newspapers, a layer of butcher paper, or geotextile filter fabric material over the top of the gravel is required to prevent the sandy loam or sand backfill from invading the gravel until the backfill becomes stabilized. When only sandy loam is placed over gravel, only geotextile filter fabric shall be allowed. Tar paper or other impervious material shall not be used under any circumstance. The pipe selected for drainfield construction shall have sufficient strength to resist crushing from external loadings such as earth fill, garden tractors, riding mowers, and similar yard equipment. Bituminous fiberboard or paper pipe shall not be used anywhere in the sewerage system. Poor construction practices will cause serious damage to the soil absorption system. Prior to issuance of a permit, notice shall be given to the licensing authority of the types of piping proposed.

4. It is extremely important that care be taken to avoid sealing the surface of the bottom and sides of the absorption trenches through smearing. Trenches or beds shall not be excavated when the soil is sufficiently wet so as to smear or compact easily. All smeared or compacted surfaces occurring during construction shall be raked to a depth of one inch and loose material removed just before the gravel or other media is placed. The absorptive areas should not be walked on unnecessarily. The completed surface of the disposal area must not be paved, used for parking of vehicles, or covered with impermeable materials.

Table 18.21.230
Absorption Trench and Bed Sizing for Single-Family Residential Dwellings

Average Percolation Rate (Minutes/Inch)		Sewage Application Rate, R_a	Soil Texture (See Table 18.21.160(A), Soil Textural Classifications)	Minimum Bottom Area (Sq. Ft.) for a One or Two Bedroom House		Minimum Bottom Area for Each Additional Bedroom* (Sq. Ft./Bedroom)	
Minutes Per Inch	Inches Per Hour	Gallons Per Sq. Ft. Per Day		Trench	Bed	Trench	Bed
Less than 5	More than 12	Too great for consideration	Sand/gravel	Sections on alternative systems			
5—15	4—12	0.6	Sandy loam	380	750	200	250
15—30	2—4	0.5	Sandy clay	500	900	250	300
30—45	1.3—2	0.4	Silty clay	625	1125	300	400
45—60	1.0—1.3	0.3	Clay loam	800	1500	400	500
More than 60	Less than 1.0	Less than 0.3	Clay	See sections on alternative systems			

Minimum trench bottom area is calculated to include capacity for washing machine wastewater, organic material from garbage grinders, and infiltration of rainfall.

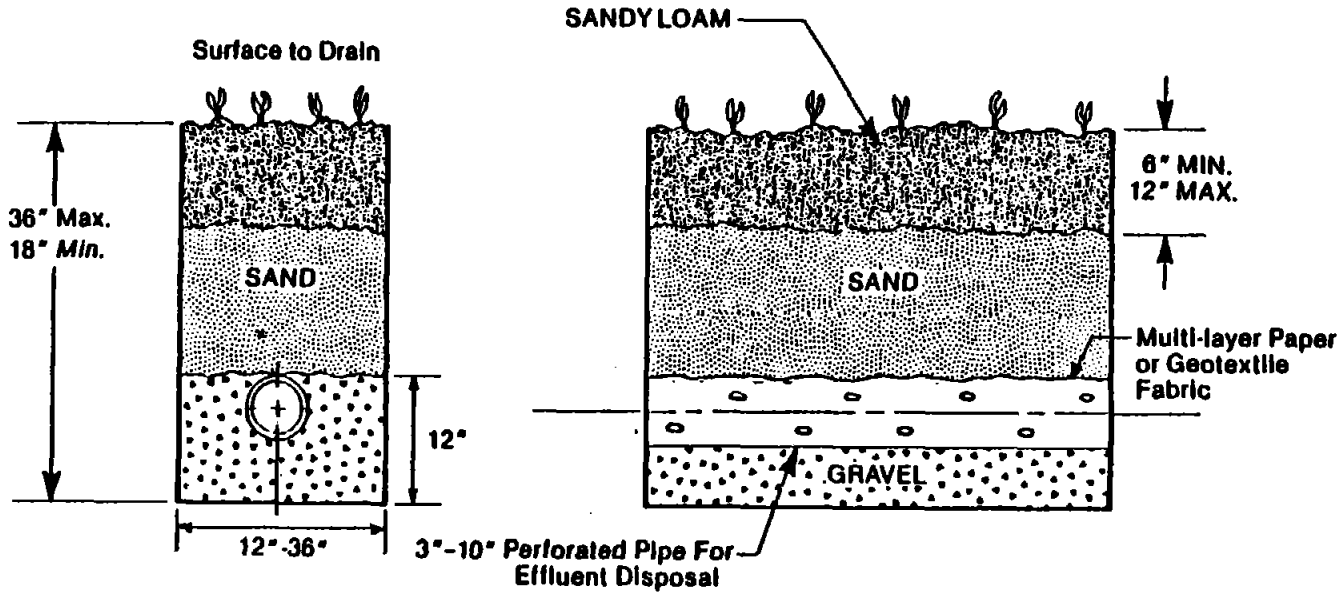
Required minimum spacing between parallel conventional absorption trenches is 3 trench widths.

*When dwellings consist of a large living area relative to the number of designated bedrooms, the following guidelines should be used to approximate the trench area:

Less than 1,500 sq. ft. — Use trench area for two-bedroom house. 1,500 sq. ft. to 1,900 sq. ft. — Use trench area for three-bedroom house. For each additional 800 sq. ft. — Add trench area equal to one bedroom.

This criteria is valid for normal water concumption by an average household occupancy and is not applicable to collective sewage system design.

Figure 18.21.230(A)
SOIL ABSORPTION TRENCH



Not intended to serve as an engineered design for construction purposes.

B. Absorption Trench Field for Irregular Terrain. Where the topography or ground slope is too steep for feasible construction of a closed-looped trench system, the following alternate layout may be used. There shall be a minimum sixteen-inch drop from the bottom of the outlet pipe to the bottom of the first trench when trenches are installed in this configuration.

1. A single level trench, constructed like the closed-looped trench, is built along a contour. The overflow from this trench is conducted via a watertight pipe to the next lower level where a second trench can be built along a contour similar to the upper trench. The pattern can be repeated until the required minimum trench bottom area has been provided. It is required that no individual trench exceed seventy-five feet in length. This technique is graphically illustrated in Figure 18.21.230(B). Other details of trench construction described in subsection (A)(1) of this section, and shown in Figure 18.21.230(A), should be followed. The crossover trench must be as shallow as possible to prevent effluent from draining from upper to lower levels through disturbed soil.

2. Table 18.21.160(C) should be reviewed if the irregular terrain has sharp slopes and breaks. (Ord. 9448 (part), 1988)

18.21.240 Soil absorption beds.

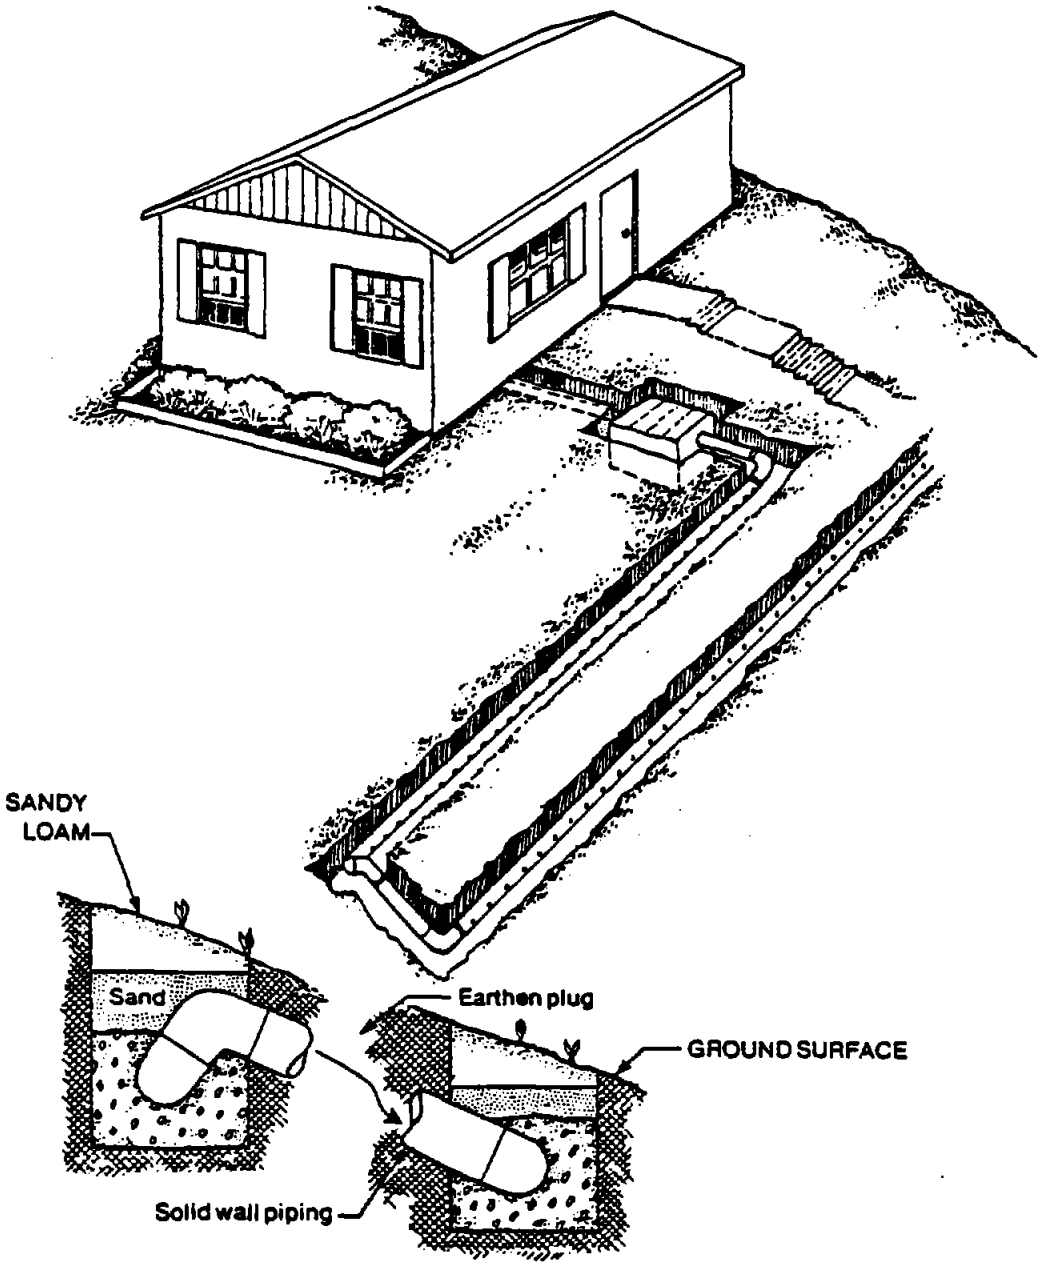
A. In addition to the trench-type absorption field, two or three absorption beds of reasonably equivalent areas, separated by at least four feet and using water tight flow diversion valving, (See Figure 18.21.240), may be used in areas where the combination of soil percolation and lot size precludes the use of a trench-type system with minimum spacing between trenches. While absorption beds require more bottom area than trenches, they tend to be more compact.

B. The bed shall be constructed with its depth ranging from twenty-four inches to thirty-six inches. It shall be kept as shallow as possible to promote aerobic bacterial action in the soil. The bottom of the bed must be level to within plus or minus one inch for uniform wastewater distribution. Fill dirt or top soil shall not be placed on the bed bottom for any reason. Media (gravel, crushed stone, etc.) that is generally one uniform size from 0.75 to two inches shall be placed on the bed bottom followed by two or more distribution pipes spaced six to twelve feet apart and three feet from the edge of the bed. The amount of gravel and spacing between the pipes is dependent on the size of the pipe used. The distribution pipe is then surrounded with additional gravel to the top of the pipe. The pipe must be one size, from three to ten inches in diameter. The total depth of the gravel in the bed is twelve inches. The gravel shall then be covered with filtering material, such as several layers of newspaper, a layer of butcher paper, or geotextile filter fabric, to prevent the final soil layer from invading the gravel and reducing porosity. The next soil layer shall consist of sand, sandy loam, or a mixture of the two.

C. Wicks. In order to provide continuous capillary action in the sand, wicks shall be incorporated in the rock media. Wicks are simply sand structures which penetrate through the rock media to the bottom of the bed (See Figure 18.21.240). The total wick area shall be ten to fifteen percent of the bed surface area and shall be uniformly spaced throughout the bed. Wicks may also be constructed by simply grading furrows in the rock media in between the distribution pipe. The total amount of rock media may be reduced by filling the initial twelve inches of the bed with coarse sand (2.0 mm) and placing rock media only around the top, bottom, and sides of the distribution pipe to form an eighteen-inch enclosure.

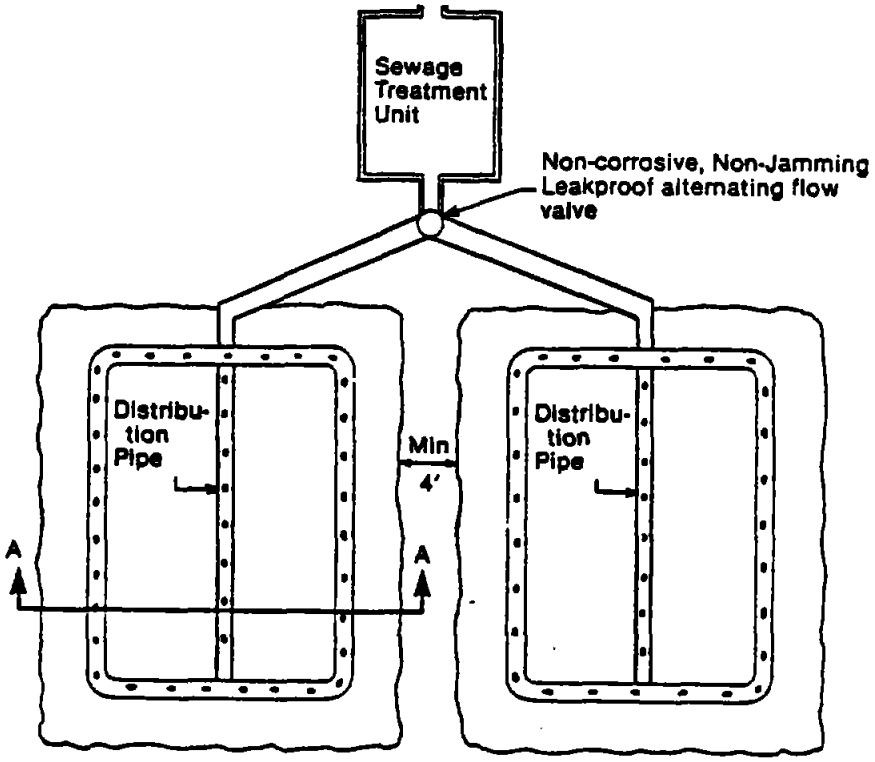
D. Capillary Medium. If clay, rock, or other semi-impervious material is excavated from the bed site, it must be removed and under no circumstances be used as backfill in the bed. Sand or sandy loam will provide a capillary medium to help eliminate some of the wastewater through

Figure 18.21.230(B)
SEPTIC TANK SYSTEM FOR
SLOPING GROUND
(without sharp slopes or grade breaks)

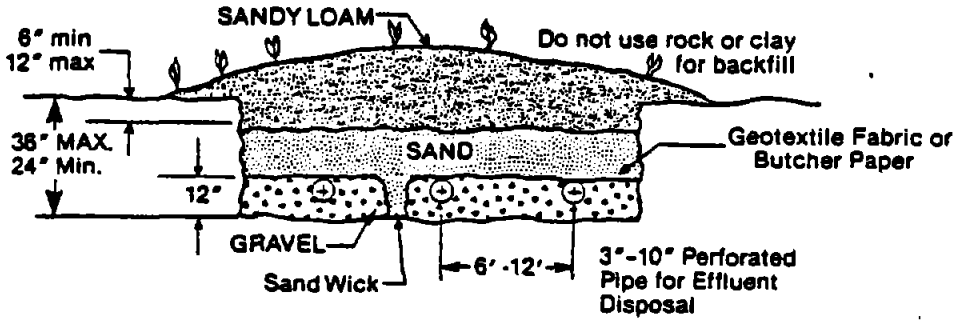


The septic tank and perforated piping shall be installed level while compacted earthen plugs shall separate the solid wall piping from the perforated piping and gravel.

Figure 18.21.240
SOIL ABSORPTION BED DETAILS



Plan View Of Dual Bed System



Section A-A

Not intended to serve as an engineered design for construction purposes.

evapotranspiration. The bed shall be filled to within six inches from the top with sand or sandy loam and mounded with sandy loam so that the center of the bed is approximately four inches above normal ground elevation. This will provide drainage away from the absorption bed. When this system is used, the total absorption bed area must be calculated using the following formulas:

For Dwellings:

$$A = \frac{150\,(1 + B)}{Ra}$$

Where:

A = The total absorption bed area required for two beds.

B = The total number of bedrooms in the dwelling.

Ra = Sewage application rate for absorption trenches expressed as gallons per square foot of bed bottom, per day based on percolation rate.

(See Table 18.21.230)

For non-single family residential situations:

$$A = \frac{2Q}{Ra}$$

Where:

Q = The total daily wastewater discharge in gallons from that situation.

(Ord. 9448 (part), 1988)

18.21.250 Evapotranspiration beds.

A. General. Evapotranspiration bed systems may be used in locations where soil conditions are not suitable for any type of soil absorption system. For very porous soils, solutioned limestone, fractured bedrock, and situations that would allow excessively rapid migration of sewage toward groundwater, lined evapotranspiration beds must be designed and certified by a registered professional engineer or registered professional sanitarian. The beds must be located outside the flood-prone area and not within areas subject to inundation or erosion by flood waters or rainfall runoff. An applicant for a permit to install a sewerage system shall consult with the local floodplain ordinances administrator, county engineer, State Highways and Public Transportation Department, nearest river authority, Farmers Home Administration, Federal Emergency Management Agency, and any other officials who may have information regarding the potential for flooding at the site of the evapotranspiration beds.

B. Construction Features. The following factors must be considered in the design of evapotranspiration beds: annual mean rainfall and wettest month of the year, annual mean evaporation rate and monthly minimal rate, growing season variations, native grasses and shrubs available for cover, absorptive capacity of the soil surrounding an unlined bed, and site conditions, including varying sunlight and air movement.

1. Evapotranspiration beds are constructed in impervious soil or soil with very high absorptive capacity. When the soils have a very high percolation rate, less than five minutes per inch, impervious liners must be constructed to guard against the possibility of wastewater discharging through the soil (fissured rock or gravel) and contaminating streams, lakes, or shallow groundwater. Impervious liners may consist of reinforced concrete, twenty mil minimum single layer thickness plastic, or rubber liners. All must be repairable in the field. Liners are not required in slowly permeable soils (having permeability of less than ten centimeters per second) and should not be used since some of the wastewater may be absorbed into the soil and will help to reduce the overall evapotranspiration load. An evapotranspiration system shall be designed using the following parameters:

a. Beds may be designed in any configuration,

but the total number of square feet of bed area must be determined by the formulas in subsection C of this section.

b. At least two beds must be constructed with valving arranged to allow the effluent from a sewerage unit to alternate between each bed. When one bed becomes saturated (top of bed remains moist) the valving must be operated to allow effluent to flow into the alternate underloaded bedding. In order to determine the water level in the beds during use, an inspection port shall be installed in each bed. Inspection ports shall be designed to prohibit access to the bed bottom by insects, small animals, and unauthorized persons.

c. The beds shall be constructed as shallow as possible with a depth ranging from eighteen inches to a maximum of thirty-six inches. This is necessary to keep the beds aerobic and prevent clogging. Treatment tankage should be installed as high as practical to permit shallow bed construction.

d. Evapotranspiration Bed. Its design features, as illustrated in Figure 18.21.250(A), are as follows:

i. All piping must be three to four inches in diameter. All perforated collection lines of an evapotranspiration bed monitor system must have a minimum crush strength of one thousand five hundred pounds per linear foot. The standpipe and sample sump must be of Schedule 40 polyvinylchloride or stronger. All connections shall be glued or rubber gasketed joints with the exception of the intruder resistant standpipe cap located at finished topsoil grade. Perforations in the collection lines must face downward, with the two rows of perforations equally offset perpendicular to the ground.

ii. The end(s) of the perforated collection line(s) shall extend to within two feet of both opposite ends of the bed, measured at the bed bottom.

iii. An evapotranspiration bed which is twenty feet wide or less shall have a minimum of one collection line which must be located centrally, down the length of the bed. An evapotranspiration bed which is greater than twenty feet but equal to or less than forty feet in width, shall have a minimum of two collection lines. These lines must be equally spaced (within approximately one foot) from the edge of the bed to pipe, and from pipe to pipe, installed parallel down the length of the bed. The two collection lines must be jointed by a perforated header line. As indicated in item (ii) of this subparagraph (B)(1)(c), the header line shall be within two feet, and parallel, to the edge of the bed measured at the bed bottom.

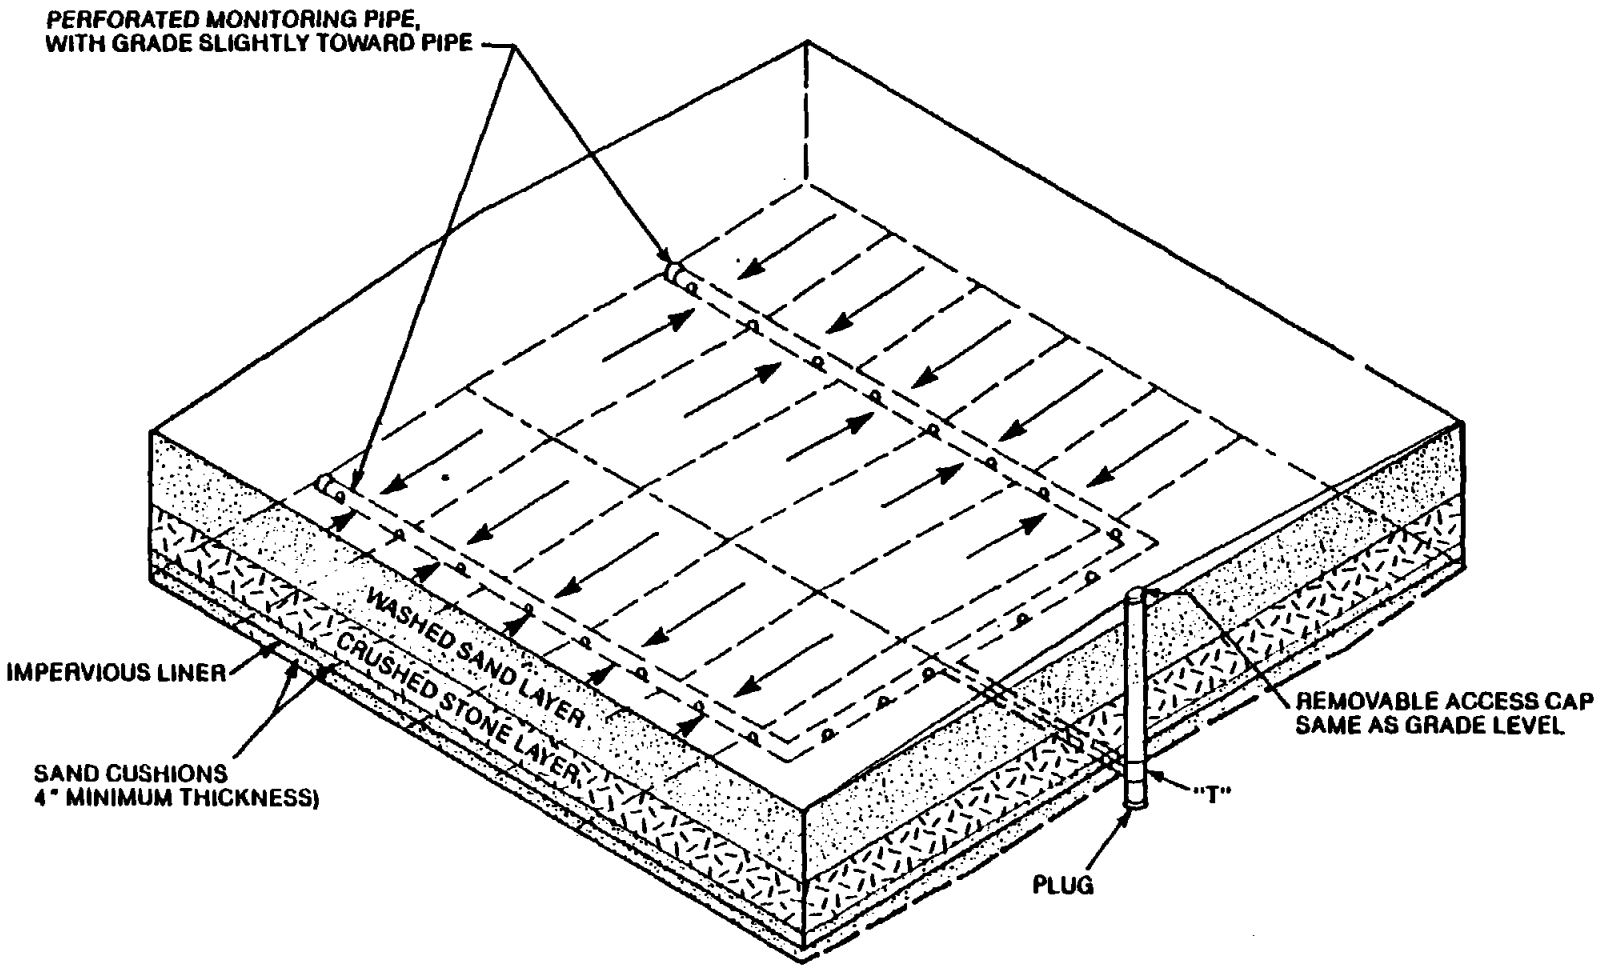
4. The collection line system must maintain a minimum fall of one-sixteenth inch per foot toward the standpipe/sump assembly.

5. The collection line(s) shall tee into a solid wall sandpipe which must have a sampling sump below the bottom of the tee. This sump shall be eight to twelve inches in depth, measured from the bottom of the tee. A cap or plug must be glued to the bottom of the sump to provide a watertight connection. The top of the standpipe shall be flush with the finished grade of topsoil, and shall be covered with an intruder-resistant, removable access cap. A minimum three inch wide by three inch deep dry moat shall surround the standpipe cap to facilitate ease of cap removal and replacement.

6. The pit bottom on which the collection line(s) shall be placed must be an impermeable surface, graded to provide a minimum fall of one-eighth inch per foot toward the collection line from either side. This will result in an impermeable shallow vee trench for the collection line to rest in.

7. The collection line(s) shall be located within the sand cushion required under lined beds. The minimum four inch sand cushion depth will increase as it follows the grade fall of the pit bottom toward the collection line. The backfill material around the standpipe should consist of sand or sandy loam.

Figure 18.21.250(A)
LEAK MONITOR SYSTEM



Not intended to serve as an engineered design for construction purposes.

8. Rock media that is generally one uniform size from 0.75 to two inches shall be placed on the bed bottom to a depth of twelve inches or less depending on the overall bed depth, after the liner and sand cushion are placed over the monitor system.

9. The top of the distribution pipe must be flush with the rock media and adequate to provide for uniform distribution of effluent. A twelve-foot maximum separation between pipes and no less than three feet separation between bed walls and the pipe is permissible. The bed bottom and the pipe must be level.

10. A water permeable sand barrier (butcher paper, newspaper, or geotextile filter fabric) is then placed over the rock. Sand is then added to fill the bed to within two inches from the top.

11. In order to provide continuous capillary action in the sand, wicks shall be incorporated in the rock media. Wicks are simply sand structures which penetrate through the rock media to the bottom of the bed (See Figure 18.21.250(B)). The total wick area shall be ten to fifteen percent of the bed surface area and shall be uniformly spaced throughout the bed. Wicks may also be constructed by simply grading furrows in the rock media in between the distribution pipe. In areas of the state where rock media is difficult to obtain, the total amount of rock may be reduced by filling the initial twelve inches of the bed with coarse sand (two millimeters) and placing rock media only around the top, bottom, and sides of the distribution pipe to form an eighteen-inch enclosure, as indicated in Figure 18.21.250(B).

12. After the sand is in place, the final two inches of bed volume are filled with sandy loam and mounded with a downward slope of two to four percent.

13. Final bed construction consists of covering the surface of the bed with vegetation having good transpiration properties and providing for the most stormwater diversion that is practical.

C. Bed Sizing. The bed area may be approximated by using the following formulas:

$$A = \frac{31{,}000\,(1 + B)}{EA - 1/2\ RFRA}$$

Where:

A = Total area of both beds (to find one bed area divide A by 2)

B = Total number of bedrooms (B = 2 for minimum residence)

EA = Mean evaporation rate in inches per year (See Table 18.21.250)

RFRA = Mean rainfall rate in inches per year (See Table 18.21.250)

For non-single family residential situations:

$$A = \frac{310\,Q}{EA - 1/2\ RFRA}$$

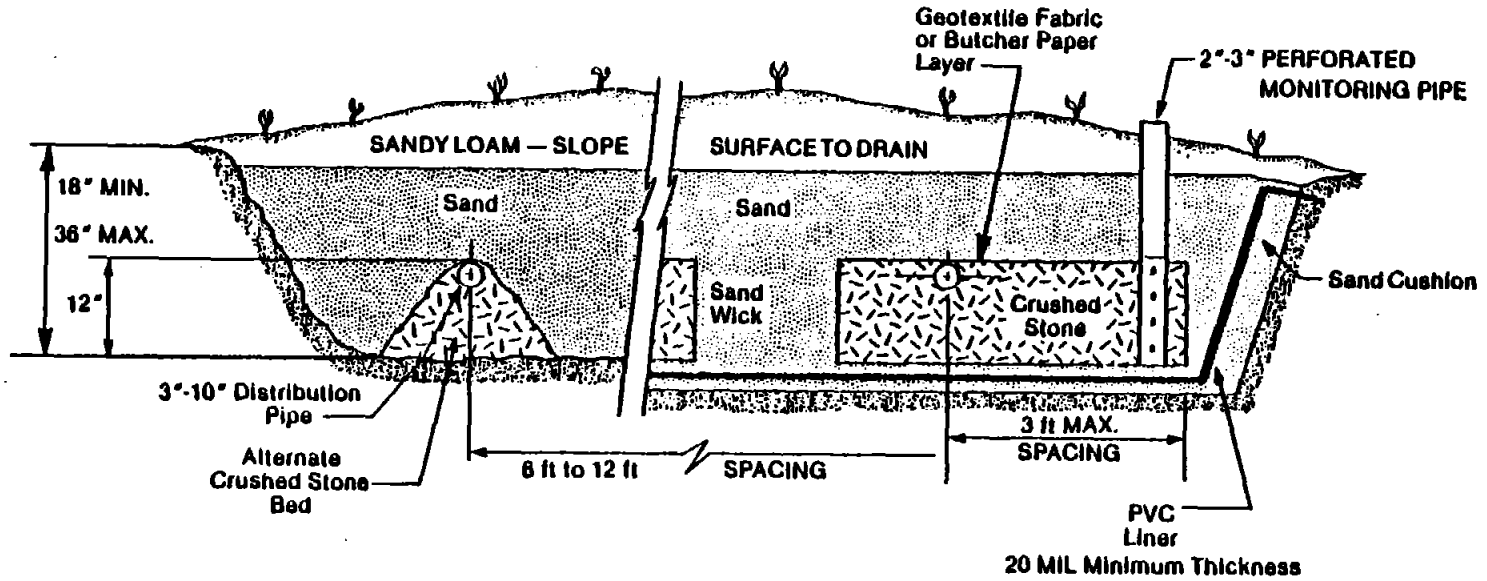
Where:

Q = Average daily flow into the system, expressed in gallons per day (see Table 18.21.190).

Evaporation and rainfall data for various areas of the state are listed in Table 18.21.250. Additional data may be found in "Report 192" and "Report LP192" published by the commission.

D. Plants and Grasses for Transpiration. The bed surface shall be covered with vegetation designed to take maximum advantage of transpiration, depending on the season and site's location. Evergreen bushes having shallow root systems can be planted in the bed to assist in water uptake. If grasses are used which have dormant periods, steps shall be taken to provide appropriate vegetation on the beds during these periods. Overseeding with winter grasses is commonly used to provide year-round transpiration. (Ord. 9448 (part), 1988)

Figure 18.21.250(B)
EVAPOTRANSPIRATION BED
(Cross Section)



NOTES:
1. Where a liner is used over rock or other material that may damage liner, the liner shall be laid on a 4" protective sand cushion, and covered by a similar cushion.
2. The crushed stone or gravel bed shall be made of ¾" to 2" size hard stone.
3. Sand columns, formed by a permeable material, shall extend completely through the crushed stone or gravel bed. Total column area shall be 10 to 15% of the bed area.
4. The surface shall be mounded or sloped to drain storm water.
5. The above drawing is for illustrative purposes; final construction design shall be site specific.

Not intended to serve as an engineered design for construction purposes.

Table 18.21.250
Mean Pan Evaporation and Rainfall

Station	E_A Mean Evaporation Rate (Inches/Year)	RFR_A Mean Rainfall (Inches/Year)

**Interpolated from map, p. 18 "Climatic Atlas of Texas"

18.21.260 Pressure dosing systems.

A. Description. A basic pressure dosing system must consist of an approved sewerage system, an effluent holding tank, an easily serviced screened intake electric pump which is activated by a float or programmed start/stop switch, a solid wall force main, and perforated distribution piping which is installed within the absorption area. The effluent pump must be capable of an operating range that will assure that effluent is delivered to the most distant point of the perforated piping network, yet not be excessive to the point that blow-outs occur in shallow systems. The programmed start/stop switch should allow the pump to operate at least three times during the twenty-four-hour day. A high water alarm, on an electric circuit separate from the pump, must be provided. After the alarm activates, the effluent holding tank shall have remaining capacity of five hundred gallons for residences and one thousand gallons for businesses and institutions. The number of perforations per length of pipe and the number of pipe lengths used per absorption area must be adequate to assure uniform liquid distribution over the entire bed area.

B. Application. Pressure dosing is an appropriate method of conveying effluent from a treatment site that is at a lower elevation than the disposal site. It is also appropriate where seasonal high water tables exist or where the soil mantle thickness is from two to four feet to solid rock. In these situations the system must be oversized substantially to promote the effect of evapotranspiration. Commercial establishments may need to use continuously staged pressure dosing if their flow rates vary greatly during their business hours. Pressure dosing systems shall be designed by a registered professional engineer. (Ord. 9448 (part), 1988)

18.21.270 Mound systems.

A. Physical Description. A mound system is comprised of a layering of sand fill, gravel, perforated pipe, and top soil. The layering begins in a two-to-three inch excavated area of natural ground and develops above the ground line approximately three feet. For greatest efficiency, its shape is rectangular. The small diameter perforated piping must be pressure-fed, as pressure systems have greater control over application rates.

B. Application. The purpose of this type of construction is to overcome adverse conditions at the disposal site such as a high groundwater table, shallow soil, impermeable soils, and high potential for flooding, for example. In general, the mound is constructed of a high quality soil which is brought in from another area. Since there is a potential for leakage from this type of system whch could result in the surfacing of sewage around its perimeter, it is not recommended for use except as a last resort. It may be used in an effort to improve the operation of a malfunctioning disposal system. Applications of effluent to a mound system depend upon the selection of fill materials used, the absorption rate of the natural ground, and depth to the shallow groundwater table. Mound systems shall be designed by a registered professional engineer. (Ord. 9448 (part), 1988)

18.21.280 Residential collective systems.

Collective private sewage facilities for residential properties shall meet the following additional requirements. Collective private sewage facilities shall be only approved for condominiums, planned unit developments, or any other entity legally authorized to assess and collect fees for the operation and maintenance of this collective disposal system, and individual or collective treatment systems. The right of the entity to assess and collect such fees shall be clearly defined to the licensing authority and in the lot owners agreement or other legal document issued by such entity to the lot owner. Proposed collective private sewage facilities shall be located above the one-hundred-year water surface elevation. (Ord. 9448 (part), 1988)

18.21.290 Gravelless drainfield piping.

A. Appropriateness. Gravelless pipe may be used in place of conventional gravel-filled trench systems.

B. Physical Description. Gravelless pipe generally consists of eight-inch or ten-inch diameter corrugated polyethylene pipe having two rows of perforations located approximately one hundred twenty degrees apart along the pipe's bottom half. The pipe is enclosed in a layer of spunbonded nylon filter wrap. Pipe shall meet American Society for Testing and Materials, ASTM F-667 Standard Specifications, for large diameter corrugated high density polyethylene (ASTM D 1248) tubing. Perforations shall be one-half-inch diameter in ten-inch diameter pipe and three-eights-inch diameter in eight-inch diameter pipe. Perforations shall be arranged and spaced so that only one hole exists in each inner corrugation. The filter cloth must meet ASTM D 3776 and ASTM D 1682 specifications for weight and grab strength. Its burst strength and air permeability must meet ASTM D 3786 and ASTM D 737 specifications, respectively. Installations must be in accordance with the pipe manufacturer's instructions. However, the system installer is cautioned against surrounding the pipe with native soils having percolation rates slower than thirty minutes per inch or laden with very fine soil particles that might plug the filter wrap.

C. Design Parameters. The design of an absorption bed, absorption trench, or evapotranspiration disposal field utilizing this product shall be based upon the same parameters that are used in the design of more conventional systems. (Ord. 9448 (part), 1988)

18.21.300 Design standards for disposal alternatives/special applications.

A. Greywater Systems. Generally, blackwater and greywater are approximately forty to sixty percent of the total domestic sewage flow, respectively. Subsurface greywater systems may be utilized with disposal of blackwater through a split system only under the following conditions:

1. A greywater disposal system utilizing anything other than conventional sewage treatment and absorption beds or trenches shall be designed and certified by a registered professional engineer or registered professional sanitarian who can provide to the licensing authority evidence that the system complies with all appropriate state regulations and local governmental regulations.

2. If flow restricting showerheads and faucet aerators are utilized throughout, a ten-percent reduction in greywater disposal trench, absorption bed, or evapotranspiration bed size will be allowed when a residential greywater system is incorporated into the disposal system design. The maximum allowable reductions in field size are determined by the type of system and the extent of watersaving fixture usage.

B. Composting Toilets. The composting toilet unit must be listed with the NSF. The NSF seal on a particular unit indicates its ability to meet the requirements of the NSF Standard Number 41, relating to wastewater recycle/reuse and water conservation devices. The liquid waste from the composting toilet unit must be disposed of through an approved subsurface disposal system.

C. Sewage Recycling Systems. For small on-site applications, sewage recycling systems are very limited in types and capability as follows:

1. On-site sewage recycling as flush water for urinals and commodes in commercial and institutional projects may be possible when advanced tertiary treatment processes are engineered into designs that meet or exceed NSF Standard Number 41 testing and certification requirements. An approvable design will be permitted only after the supplier and user of the recycle system enter into a post-installation inspection, maintenance, and repair agreement that satisfies the licensing authority.

2. Proposals to recycle highly refined sewage for use outside project buildings such as for sur-

face landscape irrigation will be subject to requirements indicated in Section 18.21.080 of this chapter (relating to innovative designs) and by the Texas Commission on Environmental Quality in 31 TAC Sections 317.1-317.13 (relating to design criteria for sewerage systems). (Ord. 16818 § 2 (part), 2008; Ord. 9448 (part), 1988)

Article VII. Prohibited Systems

18.21.310 Cesspools prohibited.

An individual commits an offense if he uses, operates, installs, maintains or services a cesspool. (Ord. 9448 (part), 1988)

18.21.320 Bore holes and injection wells prohibited.

An individual commits an offense if he installs, maintains, operates, services or uses a bore hole or injection well, unless the bore hole or injection well is part of a design licensed under Section 18.21.080. (Ord. 9448 (part), 1988)

18.21.330 Seepage pits.

An individual commits an offense if he uses, operates, maintains, or services a seepage pit. (Ord. 9448 (part), 1988)

18.21.340 Privies prohibited.

An individual commits an offense if he uses, operates, installs, or maintains a privy within one thousand three hundred twenty feet of any water well which is used for drinking water purposes. (Ord. 9448 (part), 1988)

Article VIII. Fees

18.21.350 Fees.

The following fees shall be charged for sewage facility permits and inspections and shall be paid to the city comptroller:

A. Single-family residence:

1. Permit to construct, forty dollars;
2. Inspection fee, fifty dollars;
3. State fee, ten dollars;
4. Economic hardship (twenty-five dollars plus state fee), thirty-five dollars (Applicants meeting federal poverty guidelines);
5. Follow-up inspection fee, thirty dollars;
6. License to operate (Section 18.21.070(C)), forty dollars.

B. Commercial:

1. Permit to construct, ninety dollars;
2. Operating license, one hundred dollars;
3. State fee, ten dollars.

(Ord. 9448 (part), 1988)

Article IX. Enforcement

18.21.360 Penalties.

A. Any individual, firm, corporation or agent who shall violate any provision of this chapter, or fail to comply therewith, or with any of the requirements thereof, or who shall erect, construct, alter, repair, or replace any private sewerage facility or has erected, constructed, altered, repaired, or replaced a private sewerage facility in violation of the proposed system as submitted and permitted thereunder, shall be guilty of a misdemeanor, and shall be subject to a fine not to exceed two thousand dollars.

B. Each day that a violation occurs constitutes a separate offense. (Ord. 9448 (part), 1988)

18.21.370 Nuisance declared.

A private sewage facility that is built, installed, used, operated or maintained in violation of this chapter is declared to be a public nuisance. All violations of this chapter are declared to be public nuisance. In addition to the penalties set forth in Section 18.21.360, this chapter may be enforced by injunction. (Ord. 9448 (part), 1988)

Chapter 18.24

GAS CODE*

Sections:

18.24.010 Short title.

18.24.020 Adoption.

18.24.030 Reserved.

18.24.040 Section 311 Accessible and acceptable location, added.

18.24.050 Section 401.2 Liquefied petroleum gas storage, amended.

18.24.060 Reserved.

18.24.070 Section 406.4 Test pressure measurement, amended.

18.24.080 Section 406.4.1. Test pressure, Low Pressure Gas Piping, added.

18.24.090 Section 406.4.2 Test duration, amended.

18.24.100 Section 406.4.3 Manufactured homes, added.

18.24.110 Section 417 Over 1-psi gas piping, added.

18.24.112 Appendix A—Sizing and Capacities of Gas Piping, is adopted in its entirety.

18.24.114 Appendix B—Sizing of venting systems serving appliances equipped with draft hoods, Category I appliance and appliance listed for use with Type B vents, is adopted in its entirety.

18.24.116 Appendix C—Exit terminals of mechanical draft and direct-vent venting systems, is adopted in its entirety.

18.24.118 Appendix D—Recommend procedure for safety inspection of an existing appliance installation, is adopted in its entirety.

18.24.120 Conflicting ordinances.

*Editor's note—Ord. No. 019528, § 7, adopted Aug 1, 2023, amended Ch. 18.24 in its entirety to read as set out herein. The former Ch. 18.24, §§ 18.24.010—18.24.120, pertained to similar subject matter and derived from Ord. No. 18514, § 1, adopted May 31, 2016.

18.24.010 Short title.

This chapter may be cited as the "Gas Code." (Ord. No. 019528, § 1, 8-1-2023)

18.24.020 Adoption.

The book entitled "International Fuel Gas Code," 2021 Edition, a copy of which authenticated by the city clerk is on file in the city clerk's office, is adopted as the Gas Code of the city, as fully as if copied at length in this chapter, but with the changes set forth in this chapter and Chapter 18.02, the Building and Administrative Code of the City of El Paso.
(Ord. No. 019528, § 1, 8-1-2023)

18.24.030 Reserved.

18.24.040 Section 311 Accessible and acceptable location, added.

International Fuel Gas Code, 2021 Edition, Section 311 Accessible and Acceptable Location, is hereby added to read as follows:

311 Accessible and Acceptable Location. A meter location, when required, shall be provided for the building or premises to be served. The location shall be such that the meter and connections are accessible in order that they may be read or changed. Space requirements, dimensions, and type of installation shall be acceptable to the gas company. Meter location will be determined by the utility company in conformance with their service franchise.
(Ord. No. 019528, § 1, 8-1-2023)

18.24.050 Section 401.2 Liquefied petroleum gas storage, amended.

International Fuel Gas Code, 2021 Edition, Section 401.2, Liquefied petroleum gas storage, is hereby amended to read as follows:

401.2 Liquefied petroleum gas. The storage system for liquefied petroleum gas shall be designed, installed and an operational permit obtained, in accordance with the Fire Code.

Exception: Liquefied petroleum gas system shall not be installed in Group R1, R2, R3 and R4 occupancies when a natural gas utility supply pipe is available within 1,000 feet of the buildings.
(Ord. No. 019528, § 1, 8-1-2023)

18.24.060 Reserved.

18.24.070 Section 406.4 Test pressure measurement, amended.

International Fuel Gas Code, 2021 Edition, Section 406.4 Test pressure measurement, is hereby amended to read as follows:

406.4 Test pressure measurement. Test pressure shall be measured with a manometer or with a pressure-measuring device designed and calibrated to read, record, or indicate a pressure loss caused by leakage during the pressure test period. The source of pressure shall be isolated before the pressure tests are made. Mechanical gauges used to measure test pressures shall have a range such that the highest end of the scale is not greater that two (2) times the test pressure. Tests requiring a pressure of 10 psi or less shall utilize a testing gauge having increments of 0.20 psi or less. Tests requiring a pressure greater than 10 psi but less than or equal to 100 psi shall utilize a testing gauge having increments of 1 psi or less. Tests requiring a pressure of greater than 60 psi shall utilize a testing gauge having increments of 2 psi or less.
(Ord. No. 019528, § 1, 8-1-2023)

18.24.080 Section 406.4.1. Test pressure, Low Pressure Gas Piping, added.

International Fuel Gas Code, 2021 Edition, Section 406.4.1 Test pressure, Low Pressure Gas Piping is hereby added to read as follows:

406.4.1.1 Test pressure. Low pressure gas piping shall withstand a pressure of at least 10 psi or 16 inches of mercury. Higher pressure gas piping shall withstand a pressure of at least 60 psi on a clock gauge with a printed record chart. For the purposes of this section, "low pressure" shall mean pressure equal to or less than 0.5 psi.
(Ord. No. 019528, § 1, 8-1-2023)

18.24.090 Section 406.4.2 Test duration, amended.

International Fuel Gas Code, 2021 Edition, Section 406.4.2 Test duration, is hereby amended to read as follows:

406.4.2 Test duration. Test duration shall be not less than 15 minutes for low pressure gas piping and not less than 4 hours for higher pressure gas piping.
(Ord. No. 019528, § 1, 8-1-2023)

18.24.100 Section 406.4.3 Manufactured homes, added.

International Fuel Gas Code, 2021 Edition, Section 406.4.3 Manufactured homes, is hereby added to read as follows:

406.4.3. Manufactured Homes. Appliance installations in manufactured housing meeting the requirements of the Texas Manufactured Housing Standards Act, or in industrialized housing or industrialized buildings meeting the requirements of the Texas Industrialized Housing and Building Act or bearing the Federal Compliance Plate (ANSI-A119.1), including the appliance connections and the fuel gas piping system, shall not be subject to the provisions of this Code except for the-test provisions of International Fuel Gas Code, Section 406.
(Ord. No. 019528, § 1, 8-1-2023)

18.24.110 Section 417 Over 1-psi gas piping, added.

International Fuel Gas Code, 2021 Edition, Section 417 Over 1-psi gas piping, is hereby added to read as follows:

417 Over 1-psi Gas Piping.

417.1 Scope and Responsibility. Under this section appear additional fundamental requirements for the installation of consumer gas piping system using over 1-psi gas pressure. Responsibility for observing these requirements shall rest with the installing agency.

417.2 Requirements. The requirements of the Gas Code are applicable to over 1-psi gas piping installations except as such requirements are mod-

ified in this chapter. Over 1-psi gas piping systems designed in accordance with this chapter and other requirements of this Code are intended for use where the building service regulator has been set to deliver gas at over 1-psi.

417.3 Over 1-PSI Piping System. Systems designed for over 1-psi gas pressure downstream of the meter shall adhere to all requirements of this Code, of the Gas Utility, and as follows:

1. Drawings and calculations, including site plan and gas piping diagrams shall be submitted to the Gas Utility for approval.

2. The gas pressure shall be regulated to ounces before entering any building or structure, unless otherwise approved by the Gas Utility.

3. All underground lines and above-ground lines within six (6) inches of the ground shall be of wrapped steel. Joints in underground lines and above-ground lines within six (6) inches of the ground shall be welded. Approved plastic pipe may be installed underground, outside buildings, without wrapping.

4. All above-ground lines installed more than six (6) inches above the ground inside buildings shall be of wrapped or bare steel and shall use only welded pipe joints.

5. Gas lines, located outside buildings, and more than 6 inches above ground and operating at up to 5-psi pressure may be installed with approved threaded joints.

(Ord. No. 019528, § 1, 8-1-2023)

18.24.112 Appendix A—Sizing and Capacities of Gas Piping, is adopted in its entirety.

(Ord. No. 019528, § 1, 8-1-2023)

18.24.114 Appendix B—Sizing of venting systems serving appliances equipped with draft hoods, Category I appliance and appliance listed for use with Type B vents, is adopted in its entirety.

(Ord. No. 019528, § 1, 8-1-2023)

18.24.116 Appendix C—Exit terminals of mechanical draft and direct-vent venting systems, is adopted in its entirety.

(Ord. No. 019528, § 1, 8-1-2023)

18.24.118 Appendix D—Recommend procedure for safety inspection of an existing appliance installation, is adopted in its entirety.

(Ord. No. 019528, § 1, 8-1-2023)

18.24.120 Conflicting ordinances.

All ordinances and parts of ordinances in conflict with the provisions of this chapter are hereby repealed.

(Ord. No. 019528, § 1, 8-1-2023)

18.28.120 Reserved.

18.28.130 Section 1012 Energy, added.

International Existing Building Code, 2021 Edition, Section 1012 Energy, is hereby amended to add an exception to read as follows:

1012 Energy. Buildings forty years or older undergoing a change in occupancy that would

result in an increase in demand for either fossil fuel or electrical energy do not need to comply with the International Energy Conservation Code.
(Ord. No. 019528, § 1, 8-1-2023)

18.28.140 Section [902.3.]612 Compliance with the Vacant Premises/Building Code, added.

International Existing Building Code, 2021 Edition, Section 902.3.612 Compliance with the Vacant Premises/Building Code, is hereby added to read as follows:

902.3.612 Compliance with the Vacant Premises/Building Code. Where the character or use of an existing building or part of an existing building is identified as a vacant building/area in accordance with 18.40 of the El Paso City Code, commonly referred to as the Vacant Premises/Building Code, the building shall then comply with all of the applicable requirements of the Vacant Building Code.
(Ord. No. 019528, § 1, 8-1-2023)

18.28.150 Section 701.1 Scope, amended.

International Existing Building Code, 2021 Edition, Section 701 Scope, is hereby amended to add the following:

701.1 Scope. Level 1 alterations as described in Section 602, shall comply and include, the removal and replacement or the covering of existing materials, elements, equipment, or fixtures using new materials, elements, equipment, or fixtures that serve the same purpose, as well as alterations described in Level 2 where change of use does not affect occupant load. Level I alterations shall comply with the requirements of Chapter 7. Level 1 alterations to historic buildings shall comply with this chapter, except as modified in Chapter 12.
(Ord. No. 019528, § 1, 8-1-2023)

18.28.160 Reserved.

18.28.170 Section 803.4.3 Fire sprinkler system supplemental installation requirements, added.

International Existing Building Code, 2021 Edition, Section 803.4.3 Fire sprinkler system supplemental installation requirements, is hereby added to read as follows:

803.4.3 Fire sprinkler system supplemental installation requirements. Where the work area in a building is required to be provided with automatic sprinkler protection in accordance with the International Building Code, an approved water supply riser pipe and stub out shall be installed as a component of the automatic sprinkler system to allow for future distribution and interconnection of an automatic sprinkler system to other work areas above and below the present work area.

Exception: If the Fire Code official determines that it is technically infeasible to design and install an automatic sprinkler system, work areas shall be protected throughout all occupiable spaces by an automatic fire detection system that activates the occupant notification system in accordance with the International Building Code.
(Ord. No. 019528, § 1, 8-1-2023)

18.28.180 Section 804.2.6 Fire wall alternative, added.

International Existing Building Code, 2021 Edition, Section 804.2.6 Fire wall alternative, is hereby added to read as follows:

804.2.6 Fire wall alternative. In other than Groups H, F-1 and S-1, fire barriers and horizontal assemblies constructed in accordance with the International Building Code shall be permitted to be used in lieu of fire walls to subdivide the building into separate buildings for the purpose of complying with the area limitations required for the new occupancy where all of the following conditions are met:

1. The buildings are protected throughout with an automatic sprinkler system in accordance with the International Fire Code.

2. The maximum allowable area between fire barriers, horizontal assemblies, or any combination thereof shall not exceed the maximum allowable area determined in accordance with Chapter 5 of the International Building Code without an increase allowed for an automatic sprinkler system in accordance with Section 506 of the International Building Code.

3. The fire-resistance rating of the fire barriers and horizontal assemblies shall not be less than that specified for fire walls in Table 706.4 of the International Building Code.

Exception: Where horizontal assemblies are used to limit the maximum allowable area, the required fire resistance rating of the horizontal assemblies shall be permitted to be reduced by 1 hour provided the height and number of stories increases allowed for an automatic sprinkler system by Section 504.2 of the International Building Code are not used for the buildings.
(Ord. No. 019528, § 1, 8-1-2023)

18.28.190 Section 806.4.2 Kitchens, amended.

International Existing Building Code, 2021 Edition, Section 806.4.2 Kitchens, is hereby amended to read as follows:

806.4.2 Kitchens. Kitchens shall have a minimum of three separate and remote duplex receptacle outlets.
(Ord. No. 019528, § 1, 8-1-2023)

18.28.200 Reserved.

18.28.220 Appendix A, Guidelines for the Seismic Retrofit of Existing Buildings, adopted.

International Existing Building Code, 2021 Edition, Appendix A, Guidelines for the Seismic Retrofit of Existing Buildings, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.28.230 Appendix B Supplementary Accessibility Requirements for Existing Buildings and Facilities, adopted.

International Existing Building Code, 2021 Edition, Appendix B Supplementary Accessibility Requirements for Existing Buildings and Facilities, is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.28.240 Appendix C Guidelines for the Wind Retrofit of Existing Buildings is hereby adopted.

International Existing Building Code, 2021 Edition, Appendix C Guidelines for the Wind Retrofit of Existing Buildings is hereby adopted in its entirety.
(Ord. No. 019528, § 1, 8-1-2023)

18.28.250 Conflicting ordinances.

All ordinances and parts of ordinances in conflict with the provisions of this chapter are hereby repealed.
(Ord. No. 019528, § 1, 8-1-2023)

Chapter 18.30

INTERNATIONAL SWIMMING POOL AND SPA CODE*

Sections:

18.30.010 Short title.

18.30.020 Adoption.

18.30.030 Chapter 1, Scope and Administration.

18.30.040 Chapter 2, Definitions.

Chapter 18.32

SOLAR HEATING, COOLING AND HOT WATER SYSTEMS

Sections:

18.32.010 Recommended Requirements to Code Officials for Solar Heating, Cooling and Hot Water Systems—Adopted.

18.32.010 Recommended Requirements to Code Officials for Solar Heating, Cooling and Hot Water Systems—Adopted.

The publication entitled "Recommended Requirements to Code Officials for Solar Heating, Cooling and Hot Water Systems, June 1980," a copy of which, authenticated by the signature of the mayor and city clerk, and made a public record by resolution of the city council, is on file in the city clerk's office, is adopted as the requirements for solar heating, cooling and hot water systems of the city, as fully as if copied at length in this chapter. The provisions contained in such publication are adopted as mandatory requirements which must be followed with respect to solar heating, cooling and hot water systems in the city and such provisions are not to be considered as just directory or recommended requirements. (Prior code § 6-15)

Chapter 18.36

STANDARD AMUSEMENT DEVICE CODE

Sections:

18.36.010 Adopted.

18.36.020 Section 103.2 amended—Inspections.

18.36.030 Section 105.3 added—Fees.

18.36.040 Section 107 amended—Violations and penalties.

18.36.050 Section 108 deleted and replaced—Board of adjustments and appeals.

18.36.010 Adopted.

The book entitled "Standard Amusement Device Code, 1979 Edition," a copy of which, authenticated by the signature of the mayor and the city clerk, and made a public record by resolution of the city council, is on file in the city clerk's office, is adopted as the amusement device code of the city, as fully as if copied at length in this chapter, but with the changes set forth in this chapter. (Prior code § 6-17 (part))

18.36.020 Section 103.2 amended—Inspections.

Standard Amusement Device Code Section 103.2, inspections, is changed to read:

Section 103.2—Inspections.

(a) The Building Official is hereby authorized to make such inspections and take such action as may be required to enforce the provisions of this Code.

(b) Whenever the Building Official shall find in or upon any amusement ride or device or portion thereof, any condition creating an imminent danger to human life, he shall immediately declare said ride or device to be unsafe and the use discontinued.

(Ord. 16985 § 38, 2008: Ord. 13152 § 279, 1997; prior code § 6-17(1))

18.36.030 Section 105.3 added—Fees.

Standard Amusement Device Code Section 105, permits, is changed by adding a new Section 105.3 entitled "Fees" to read as follows:

Section 105.3—Fees.

No permit shall be valid until the fees as prescribed in Section 107.4 of the Standard Building Code shall have been paid; nor shall an amendment to a permit be approved until the additional fees, if required, shall have been paid.

(Prior code § 6-17(2))

18.36.040 Section 107 amended—Violations and penalties.

Standard Amusement Device Code Section 107, violations and penalties, is changed to read:

Section 107—Violations and Penalties. Any person violating this Article shall be deemed guilty of a misdemeanor and punished by a fine not to exceed two thousand dollars.

(Ord. 9431 § 16, 1988: prior code § 6-17(3))

18.36.050 Section 108 deleted and replaced—Board of adjustments and appeals.

Standard Amusement Device Code Section 108, board of adjustments and appeals, is deleted in its entirety and reworded as follows:

Section 108—Board of Adjustments and Appeals.

The Board of Adjustments and Appeals as established under Section 111 (amended) of the Standard Building Code shall be the designated body for the express purpose of providing for the final interpretation of provisions of this Code.

(Prior code § 6-17(4))

Chapter 18.40

VACANT BUILDINGS*

Sections:

18.40.010 Purpose of chapter.

18.40.020 Definitions.

18.40.030 Vacant building registration.

18.40.040 Exemptions.

18.40.050 Appeal process.

18.40.060 Insurance requirements.

18.40.070 Additional administrative procedures.

18.40.080 Registration and commercial property inspection fees.

18.40.090 Delivery of notices.

18.40.100 Inspections and enforcement.

18.40.110 Emergency response information, signage, and installation of fire suppression systems.

18.40.120 Penalty.

18.40.130 Severability.

18.40.010 Purpose of chapter.

A. The purpose of this chapter is to establish a program for identifying and registering vacant buildings; to determine and establish the responsibilities of owners of vacant buildings and structures; to ensure that vacant buildings are maintained in compliance with applicable city code and to encourage their rehabilitation and/or demolition in efforts to minimize wider community deleterious effects.

B. The city council finds, determines and declares that buildings which remain vacant and unoccupied for any appreciable period of time become a harborage for rodents, an invitation for illegal occupancy and for illegal activities, as well as a fire hazard, and that unkempt grounds surrounding the property invites dumping and rubbish thereon, that such buildings become dilapidated, contribute to commercial and residential blight, depress market values of surrounding property, require additional government services, endanger the public safety and health, and generally remain detrimental to the public good. It is the finding of the city council that buildings that remain vacant with access points boarded over are unsightly, unsafe and have a significant and negative effect on their surroundings.

C. In order to protect the health, safety, morals, and welfare of the citizens of the City of El Paso, to preserve and enhance livability, preserve property values of surrounding buildings, and to ensure that buildings are promptly rehabilitated and/or demolished as appropriate, it is the policy of the city to address vacant building rehabilitation or demolition in accordance with due process requirements.

(Ord. No. 17968, § 1, 3-5-2013)

18.40.020 Definitions.

Unless otherwise expressly stated, the following terms shall for the purpose of this article, have the meanings indicated in this section:

A. "Owner" means a person in whom is vested the ownership or title of real property, including, but not limited to:

1. The holder of fee simple title;

2. The holder of a life estate;

3. The holder of a leasehold estate that includes the vacant portions of the building;

4. The buyer in a contract for deed;

5. A mortgagee, receiver, executor, or trustee in control of real property; and

6. The named grantee in the last recorded deed.

B. "Vacant" means any building, structure, or portion thereof, that regardless of its structural condition, is not occupied for a continuous period of two years from March 1, 2011 (the effective

***Editor's note—**Ord. No. 17968, § 1, adopted March 5, 2013, repealed the former Ch. 18.40, §§ 18.40.010—18.40.140, and enacted a new Ch. 18.40 as set out herein. The former Ch. 18.40 pertained to similar subject matter and derived from Ord. No. 17375, §§ 2—15, 8-24-2010, eff. 3-1-2011.

date of the Vacant Building Ordinance) or from the first day of vacancy, whichever is later, and to which any one of the following conditions apply:

1. It is located in an enforcement area;

2. The city has issued an order to the owner of the building or structure requiring that it be boarded up, fenced, or otherwise secured in an approved manner pursuant to Section 214.001 Texas Local Government Code; or

3. The city has issued a notice of violation of Chapter 18.50 of the City Code to the owner of the building or structure.

C. "Occupied" means that pursuant to and within the scope of a valid certificate of occupancy or within an occupancy use that is authorized for the building or structure designated primarily for nonresidential uses, that one or more persons conduct business in or reside in at least forty percent of the total area of a building or structure which is two stories or fewer (excluding stairwells, elevator shafts, and mechanical rooms); or where one or more persons conduct business in or reside in at least sixty percent of the total area of a building or structure which is more than two stories (excluding stairwells, elevator shafts, and mechanical rooms); or one or more persons reside in any portion of the building or structure where the building or structure is designated for residential use having four dwelling units or less.

D. "Enforcement area" means any area which lies within the boundaries of the Downtown 2015 Plan, as identified in Ordinance No. 016487 dated October 31, 2006, by map attached therein; the Lower Dyer Neighborhood Revitalization Strategy Area, as identified by Resolution dated January 15, 2008, by map attached therein; all of which are incorporated herein by reference. Maps of the enforcement areas are on file with the city clerk.

E. "Certificate of registration" means a certificate of registration issued by the permit official under this chapter to the owner of a vacant building, which may include owner obligations to undertake certain identified improvements to the vacant building during the registration term.

F. "Nonresidential uses" means any principal use of a building, structure, or portion thereof which is an occupancy type or use group other than a residential use group having four dwelling units or less.
(Ord. No. 17968, § 1, 3-5-2013)

18.40.030 Vacant building registration.

A. A person commits an offense if the person owns a vacant building without a valid certificate of registration or exemption issued pursuant to this chapter.

B. The owner or the owner's authorized agent shall submit an application to the permit official to register a building or apply for an exemption not later than thirty days after the building becomes a vacant building. One or more of the owners may designate an individual to execute the application on behalf of the owner(s).

C. The registration application shall be submitted on forms provided by the permit official. The registration application shall include the following information supplied by the applicant:

1. The address and description of the premises;

2. The building height, number of stories contained therein, area in square feet of each story, whether each story is above or below ground level, and year built;

3. The date on which the vacant building was last legally occupied, a description of the last or current use of the vacant building, and a description of any hazardous materials, uses, or conditions that currently exist or previously existing in the vacant building.

4. The names, addresses and telephone numbers of the owner or owners and authorized agents;

5. The name and address of any third party who the owner has entered into a contract or agreement with for property management;

6. The names and addresses of all known lien holders, tenants, and all other parties with an ownership or possessory interest in the building;

7. A telephone number where a responsible party can be reached at all times during business and nonbusiness hours;

8. The period of time the building is expected to remain vacant;

9. If the owner plans to return the building to sixty percent or more occupancy, the estimated date for returning the building to such occupancy;

10. If the owner plans to demolish the building, the date the building is scheduled for demolition;

11. If the owner proposes to rehabilitate or renovate the building, the date the building rehabilitation or renovation is scheduled to commence and be completed in accordance with all applicable codes;

12. If the owner proposes to retain the building, the measures that will be taken to try to reduce any adverse impact on the property values of adjacent property from the retention of the vacant building;

13. The plan for regular maintenance of the building during the period of vacancy with owner certification that the building is compliant with all applicable codes;

14. The measures the owner will employ to secure the building in accordance with all applicable zoning, property maintenance, historic preservation and building codes;

15. The measures the owner will employ to monitor and inspect the property and schedule for periodic inspection by the owner;

16. Proof of insurance required by Section 18.40.070 under this chapter;

17. The name of the addressee and the mailing address to which all notices or other communication required under this chapter may be delivered, including communication regarding registration and vacant building status;

18. The initial information required by Section 18.40.120 for emergency response information;

19. As applicable, the locations of emergency response signage required by Section 18.40.120;

20. If the owner was previously issued a certificate of registration for the vacant building, proof of compliance with any owner obligations in the prior certificate of registration or if the obligations were not met, documentation demonstrating significant progress in addressing the identified owner obligations; and

21. Any other reasonably related additional information required by the permit official.

D. A separate registration application is required for each vacant building, regardless of any separate occupied buildings that may also be located at the same street address. If more than one vacant building is located at the same street address, a separate certificate of registration is required for each vacant building. In addition, only one registration application is required for a single vacant building that has more than one street address.

E. The permit official shall, within one hundred eighty days, take one of the following actions regarding the filing of a completed application for which all required established fees have been paid:

1. Issue a certificate of registration if the permit official determines that:

a. The applicant has complied with all requirements for issuance of the certificate of registration;

b. The applicant has not made a false statement as to a material matter in an application for a certificate of registration; and

c. The applicant or owner has no outstanding fees charged under this chapter.

2. Deny the certificate of registration as provided under subsection F.

3. Inform the applicant that the certificate of registration cannot be issued within the time period under this section and advise the applicant as to the date on which the permit official shall make the required determination, which shall be the earliest date practicable.

The failure of the permit official to take action as required under this subsection shall not result in an automatic registration of a vacant building under this chapter.

F. In issuing a certificate of registration for a vacant building designated for nonresidential uses, the permit official will enumerate in the certificate of registration any owner obligations to undertake certain property improvements to the vacant building, which will be based on the owner's intended use, rehabilitation, demolition, or maintenance of the vacant building, and the schedule for such undertaking in accordance with all applicable codes or as identified in the owner's application submitted pursuant to subsection C., if the latter accomplishes an earlier completion of improvements.

G. If the permit official determines, upon initial review or inspection that the application does not address the requirements of this chapter, the permit official shall notify the owner and allow reasonable time for the revision of the application. If, upon final review of the completed application, the permit official determines that the requirements of subsections C. and E. have not been met, the permit official shall deny a certificate of registration to the owner.

1. If the permit official determines that the owner should be denied a certificate of registration, the permit official shall deliver written notice to the owner that the application is denied and include in the notice the reason for denial.

2. The owner may appeal the determination of the permit official by following the procedure provided in Section 18.40.060.

H. The permit official shall give notice of issuance, of a certification of registration for a vacant building to lien holders, tenants, and other parties, as identified in the application.

I. Except as otherwise provided herein, the certificate of registration for a vacant building shall terminate the earlier of:

1. One year after date of issuance;

2. The date the vacant building changes ownership, as determined by the permit official;

3. The date the vacant building becomes occupied, as determined by the permit official; or

4. The date the vacant building is demolished, as determined by the permit official.

J. Requests for termination of a certificate of registration shall be in writing to the permit official and accompanied by documentation in support of the request. The failure of the permit official to terminate the certificate of registration as provided herein within thirty days after the date that the written request was made shall constitute a denial of the request for the termination and the owner may appeal such action by following the procedure provided in Section 18.40.060.

K. A certificate of registration issued under this chapter is transferable to a new owner during the first six months following issuance of the certificate of registration and upon an owner's written request to the permit official for a transfer of the certificate of registration, provided that:

1. The owner has complied with the provisions of this chapter or other city ordinance or state or federal law applicable to the vacant building;

2. Payment of the administrative established fee for transfer of the certificate of registration; and

3. The new owner's acceptance of the application information for the certificate of registration to be transferred.

The failure of the permit official to transfer the certificate of registration as provided herein within thirty days after the date that the written request was made shall constitute a denial of the request for the transfer and the owner may appeal such action by following the procedure provided in Section 18.40.060.

L. An owner or applicant shall notify the permit official in writing within thirty days after any material change in the information contained in the application for a certificate of registration for a vacant building, including any changes in ownership of the property or intended use, rehabilitation, demolition, or routine maintenance of the vacant building.

M. If the permit official has reason to believe that a building is a vacant building and it is unregistered, the permit official shall evaluate the building and make a determination as to whether the

building is a vacant building within the meaning of this chapter. If the permit official finds the building is a vacant building:

1. The permit official shall give written notice of such determination to the owner of the subject building. The notice of determination shall identify the building; street address or legal description of the property; state the factual basis for the determination; classify the building as a vacant building; and the obligations of an owner to register the building as set forth in this chapter.

2. The notice under this section must comply with the requirements of Texas Local Government Code Section 54.005.

3. The permit official satisfies the requirements of this section to make a diligent effort, to use his best efforts, or to make a reasonable effort to determine the identity and address of an owner if the permit official searches the following records:

a. Real property records of El Paso County, El Paso, Texas;

b. El Paso Central Appraisal District records;

c. Records of the secretary of state;

d. Assumed names records of the El Paso County, El Paso, Texas;

e. Tax records of the city; and

f. Utility records of the city.

4. When the permit official mails a notice in accordance with this section to an owner and the United States Postal Service returns the notice as "refused" or "unclaimed," the validity of the notice is not affected, and the notice is considered delivered.

5. An owner may appeal the determination of the permit official that the building should be classified as a vacant building under this chapter by following the procedure provided in Section 18.40.060.

(Ord. No. 17968, § 1, 3-5-2013)

18.40.040 Exemptions.

A. An owner or the owner's authorized agent may apply for an exemption to the registration requirement or the vacant building plan requirement under the following circumstances. The applicant requesting an exemption under this section shall submit an application to the permit official on forms provided and shall pay the administrative established fee. The permit official shall issue the exemption provided herein upon a finding that the applicant has complied with all requirements for issuance of the exemption and the applicant has not made a false statement as to a material matter in the application. The failure of the permit official to issue an exemption provided herein within thirty days after the date that the application was made shall constitute a denial of the application for an exemption and the owner or the owner's authorized agent may appeal such action by following the procedure provided in Section 18.40.060.

B. A vacant building which has suffered fire damage or damage caused by extreme weather conditions may be exempted from the registration requirement under this chapter for a period of ninety days after the date of the fire or extreme weather event. The exemption request shall include the following information supplied by the applicant:

1. An address and description of the premises;

2. Detailed information regarding the date the damage was suffered and the extent of the damage if the request for an exemption is being submitted on this basis;

3. The names and addresses of the owner or owners; and

4. A statement of intent to repair and reoccupy the building in an expedient manner, or the intent to demolish the building.

C. Adaptive reuse alternative. Subject to the approval of the city official, the applicant may apply for an adaptive reuse construction permit and complete the required compliance repairs, alterations, additions, and or change of occupancy in accordance with the provisions set forth in the currently adopted International Existing Building

Code (IEBC). The applicant requesting this adaptive reuse alternative exemption must also comply with the following conditions:

1. The applicant shall be required to submit a vacant building registration application in accordance with Chapter 18.40 Vacant Buildings; and

2. Upon failure to comply with the requirements of the adaptive reuse alternative and the requirements prescribed within the adopted IEBC, the applicant shall be denied, by the city official, the adaptive reuse alternative exemption and shall then continue to comply with all the requirements prescribed within Chapter 18.40 Vacant Buildings.

(Ord. No. 17968, § 1, 3-5-2013)

18.40.050 Appeal process.

An owner, applicant or other person who has, in this chapter, been granted a right of appeal from any decision or action, may appeal such decision or action to the building and standards commission as provided herein.

A. The appeal shall be filed in writing with the permit official within thirty days after the date of issuance of the notice of decision or action.

B. A public hearing shall be scheduled within forty-five days of the filing of such notice of appeal, and notice of the date, time and place shall be provided in writing at least ten days prior to the hearing to the appellant and to the person designated on the application form to receive notices under this chapter, if different.

C. The building and standards commission shall hear all evidence presented and may uphold or overturn the decision or action of the permit official based on the application of the applicable provisions and requirements of this chapter.

D. The decision of the building and standards commission shall be final.

(Ord. No. 17968, § 1, 3-5-2013)

18.40.060 Insurance requirements.

A. Prior to the issuance of a certificate of registration for any vacant building designated for nonresidential uses, the owner shall procure and keep in full force and effect at all times during the registration term, commercial general liability and property insurance coverage, with minimum combined bodily injury (including death) and property damage limits of not less than one million dollars for each occurrence and two million dollars annual aggregate.

(Ord. No. 17968, § 1, 3-5-2013)

18.40.070 Additional administrative procedures.

A. Authorization for investigation.

1. The permit official may investigate any building for purposes relating to this chapter and for compliance with applicable City Codes if:

a. The owner fails to register the vacant building or obtain an exemption within thirty days following a final determination by the permit official that the owner's building is a vacant building subject to the provisions of this chapter;

b. The application for a certificate of registration has been denied and the right to appeal has expired; or

c. The owner fails to comply with the intended use, rehabilitation, demolition, or maintenance of the vacant building as stated in the application submitted pursuant to this chapter within thirty days after having received a written notice by the permit official of the violation, deficiency or failure to comply.

B. Loss of certificate of occupancy. If the permit official determines upon investigation that the building or structure itself or a portion thereof is in violation of an applicable City Code, the permit official may take action to suspend or revoke a certificate of occupancy as 1s authorized under such code.

(Ord. No. 17968, § 1, 3-5-2013)

18.40.080 Registration and commercial property inspection fees.

A. The established fee for a certificate of registration shall be charged and collected at the time of application submittal. The established registration fee shall be for the administrative costs for

registering and processing the vacant building owner registration form, and inspecting the vacant building and premises for compliance with the requirements of this chapter.

B. The established registration fee shall be paid on annual basis.
(Ord. No. 17968, § 1, 3-5-2013)

18.40.090 Delivery of notices.

A. Any written notice that the permit official is required to give an owner under this chapter is deemed to be delivered:

1. On the date the notice is hand delivered to the applicant; or

2. Three days after the date the notice is placed in the United States Mail with proper postage and properly addressed to the owner at the address provided in the most recent registration application.
(Ord. No. 17968, § 1, 3-5-2013)

18.40.100 Inspections and enforcement.

A. The permit official is authorized to administer this chapter and all enforcement officials are authorized to enforce the provisions of this chapter.

B. For all purposes relating to vacant building applications and registrations, the permit official is authorized at a reasonable time to inspect the premises that are the subject of the application or registration, to include but not be limited to, conducting an inspection in order to determine whether the owner's intended use, rehabilitation, demolition, or maintenance of the vacant building meets the requirements of the City Code for demolition, rehabilitation or maintenance of the status of vacancy, as appropriate.

C. For all purposes relating to enforcement under this chapter, an enforcement official is authorized at a reasonable time to inspect:

1. The exterior of a vacant building or other building that appears to the enforcement official to be unoccupied in whole or in part;

2. The interior of a vacant building or other building that appears to the enforcement official to be unoccupied in whole or in part, if permission of the owner, operator, or other person in control is given, or a search warrant or writ of entry is obtained.
(Ord. No. 17968, § 1, 3-5-2013)

18.40.110 Emergency response information, signage, and installation of fire suppression systems.

A. An owner of a vacant building shall provide the permit official with the name, street address, mailing address, and telephone number of a person or persons who can be contacted twenty-four hours a day, seven days a week, in the event of an emergency condition in or on the premises of the vacant building. An emergency condition includes any fire, natural disaster, collapse hazard, burst pipe, serious police incident, or other condition that requires an immediate response to prevent harm to property or the public.

B. The owner of the vacant building shall notify the permit official within five days after any change in the emergency response information.

C. The owner of the vacant building, or an authorized agent, must arrive at the premises within one hour after a contract person named under this section is notified by the city or emergency response personnel that an emergency condition has occurred on the premises.

D. Upon issuance of a certificate of registration for any vacant building designated for non-residential uses or for residential use having four or more dwelling units, the owner shall install placards approved by the fire chief or designee, which apply the following marking system to alert city or emergency response personnel to potential hazards:

1. Any vacant building determined by the fire chief or designee to be especially unsafe in case of fire, under Section 110, Chapter 9.52 of the City Code, shall be identified and marked pursuant to the requirements of El Paso City Code Chapter 9.52, Section 311.5.

2. Prior to receiving a placard, all buildings shall be inspected thoroughly by the fire chief or designee.

E. Where a vacant building is subject to the requirements of this section and Chapter 9.52 of the City Code, whichever being the more restrictive shall govern.

F. The owner of a vacant building that has a certificate of occupancy which is designated as an assembly (A), business (B), educational (E), institutional (I), hazard (H), factory (F), mercantile (M) building, Residential (R) (excluding buildings with four or fewer dwelling units), or utility (U) shall install a fire suppression system that conforms to the standards set forth in the currently adopted International Fire Code and maintain that system in good working order.

Exception: The sprinkler requirement for vacant structures shall not apply when the premises have been cleared of all combustible materials and debris and, in the opinion of the fire code official, the type of construction, fire separation distance, and security of the premises does not create a fire hazard.

(Ord. No. 17968, § 1, 3-5-2013)

18.40.120 Penalty.

A. A person who violates a provision of this chapter, or who fails to perform an act required of the person by this chapter, commits an offense. A person commits a separate offense each day or portion of a day during which a violation is committed, permitted or continued.

B. An offense under this chapter is punishable by a fine not to exceed two thousand dollars.

C. The penalty provided herein is in addition to any other enforcement remedies that the city may have under city ordinances and state law. Nothing in this chapter shall preclude the city from taking administrative or civil action as may be permitted by law.

(Ord. No. 17968, § 1, 3-5-2013)

18.40.130 Severability.

In the event that this ordinance or any provisions of it shall be deemed by a court to be in conflict with a provision of general law, or if adherence to or enforcement of any section of this chapter shall be restrained by a court, the remaining provisions of this local law shall not be affected.

(Ord. No. 17968, § 1, 3-5-2013)

Chapter 18.42

DANGEROUS STRUCTURES

Sections:

18.42.010 Authority to secure.

18.42.020 Liens.

18.42.010 Authority to secure.

A. The building official or the director, as defined in Chapter 2.38 of this Code, may secure a building before a public hearing is held by the building and standards commission under the following circumstances:

1. The building is unoccupied or is occupied only by persons who do not have a right of possession and

2. The building official or the director determine that violations of Chapter 18.50 exist in the building.

B. No later than eleven days after securing the building the building official or the director shall give notice to the owner by:

1. Personal service of a written notice; or

2. Depositing the notice in the United States Mail addressed to the owner at the owner's post office address.

C. If personal service cannot be obtained and the owner's post office address is unknown then service shall be by:

1. Publishing notice at least twice within a ten-day period in a newspaper of general circulation in the city; or

2. Posting the notice on or near the front door of the building.

D. The notice must contain:

1. An identification, which is not required to be a legal description, of the building and the property on which it is located;

2. A description of the violations of Chapter 18.50;

3. A statement that the city has secured the building;

4. A statement of the amount the city incurred securing the building, that the owner owes the city the amount incurred, and that the city will secure a lien against the real property for the assessed amount in the event of non-payment; and

5. A statement that the owner has thirty days from the date the building was secured to request a hearing before the building and standards commission in regard to any matter relating to the city's securing of the building.

(Ord. No. 17774, § 2, 4-17-2012)

18.42.020 Liens.

A. If the city incurs expenses to secure a building under this chapter, the city may assess the expense against the owner and the real property. If the owner fails to satisfy the debt the city can place a lien against the real property the building was located on, unless it is a homestead.

B. The notice must contain the name and address of the owner if that information can be determined with diligent effort, as defined in Chapter 2.38, a legal description of the real property on which the building was located, the amount of expenses incurred by the municipality, the balance due and that it accrues interest at a rate of ten percent a year from the assessment until paid in full.

C. The lien arises and attaches to the property at the time the notice of the lien is recorded in the El Paso Real Property Records.

D. The lien will be superior to all judicial liens and inferior only to bona fide mortgage liens recorded prior to the filing of the notice of dangerous structure hearing.

E. The lien is extinguished when the amount is paid in full.

F. The city may also seek to reduce the civil penalty to judgment.

(Ord. No. 17774, § 3, 4-17-2012)

Chapter 18.44

GRADING*

* **Editor's Note:** Ord. No. 17516, § 1, adopted March 29, 2011, repealed the former Ch. 18.44, §§ 18.44.010—18.44.250, and enacted a new Ch. 18.44 as set out herein. The former Ch. 18.44 pertained to similar subject matter and derived from Ord. 8867 (part), 1986; Ord. 9431, § 17, 1988; Ord. 11706 §§ 1, 2, 1993; Ord. 13110 §§ 1—3, 1997; Ord. 13152 §§ 280—284, 293—295, 1997; Ord. 13956 §§ 44—61, 74, 76—86, 1999; Ord. 16897 § 1, 2008; Ord. 16985 §;s 39, 40 (part), 45, 46, 2008; Ord. No. 17390, §§ 25—27, 31, 32, 8-24-2010, eff. 9-1-2010.

18.44.010 Short title.

This chapter shall be known and may be cited as the "grading ordinance".
(Ord. No. 17516, § 1, 3-29-2011)

18.44.020 Purpose.

The provisions of this chapter are to complement the subdivision ordinance and the zoning ordinance, and to make the uses permitted by these ordinances more feasible and acceptable in the interest of the individual property owner, the adjacent property owner and the general public. It shall be the purpose of this chapter:

A. To protect life, limb, property, the public welfare and the physical environment by regulating grading on public and private property;

B. To ensure that proposed grading shall result in the minimum possible disturbance of terrain and natural land features necessary to construct residences or other permitted buildings or structures, or to conduct other legal land uses;

C. In conjunction with Chapter 18.46 — Landscaping, to prevent grading which unnecessarily changes the physical character of terrain, mountains, and natural features;

D. To ensure that the grading will not adversely affect the natural topographic drainage features, result in excessive erosion, degrade natural drainage paths or other drainage features or alter natural surface runoff creating flood problems or irreparable scars;

E. To stabilize steep hillsides and ensure that lateral support to either public or private property is not endangered;

F. To regulate grading in a manner that stabilizes sites to prevent soil erosion both during construction and after construction;

G. To encourage harvesting and preservation of rainwater within the project site, reduce dependence on groundwater, and reduce potential offsite flooding and erosion;

H. To ensure proper method and construction for clearing, grubbing, excavating, filling and land grading operations;

I. To prevent grading that unnecessarily changes open spaces and to mitigate any adverse effects by retaining and/or restoring trees and vegetation;

J. In conjunction with Chapter 15 - Stormwater Management, to prevent erosion; and

K. In conjunction with the Drainage Design Manual and Design Standards for Construction - to use sustainability goals to stabilize graded sites. (Ord. No. 17516, § 1, 3-29-2011)

18.44.030 Definitions.

For the purpose of this chapter, the following words have the meaning set forth in this section:

A. "Best management practices" ("BMP") means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices such as effective integration of stormwater management systems (storage/controlled discharge), with appropriate combinations of landscape conservation, enhancement, structural controls, and impervious cover, which provide an optimum way to eliminate soil erosion and prevent soil from leaving the site though water runoff and/or wind during construction.

B. "Clearing" means the removal of surface vegetation without modifying, impacting or improving the drainage pattern.

C. "Dripline" means a vertical line run through the outermost portion of the crown of a tree and extending to the ground.

D. "Engineer" means a professional engineer currently licensed and registered with the State of Texas.

E. "Excessive erosion" — soil particle movement from a destabilized graded site that causes an off-site impact, public nuisance and/or creates a hazardous condition as determined by the permit official.

F. "Flood" or "flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from (1) the overflow of waters or (2) the unusual and rapid accumulation of runoff of surface waters from any source.

G. "Grading" means any disturbance of the surface of the land with heavy equipment that may modify or impact existing drainage patterns.

H. "Grading stabilization plan" ("GSP") means a plan for the purposes of stabilizing sites after completion of the grading operation or if the site becomes idle for more than one hundred eighty calendar days to prevent excessive erosion.

I. "Heavy equipment" means self powered, self propelled or towed mechanical devices, equipment and vehicles of the nature customarily for use in agriculture, mining, industry, business, transportation, building or construction such as tandem axle trucks, backhoes, trenchers, loaders, tractors, bulldozers, graders, cranes, forklifts, or similar like equipment but excluding automobiles, recreational vehicles and boats and their trailers.

J. "Natural drainage path" - a flowpath/channel/watercourse/wash/stream as delineated in the city's natural drainage path map, plus an additional twenty feet buffer on each side of the rim, as delineated in said map.

K. "Natural state" means the topography that existed prior to any disturbance of land as certified by a licensed surveyor.

L. "Owner" shall mean the person or entity that has any ownership interest in the property on which grading is proposed or has taken place or such owner's authorized agent.

M. "Permitee" means the governmental entity, utility company, contractor, person or business entity that has received a permit pursuant to this chapter.

N. "Processed material" means naturally occurring, materials such as sand, gravel and rock that have been subjected to any process other than initial excavation such as, but not limited to, screening, crushing, washing and segregating.

O. "Revegetation" means the restoration of formerly undisturbed areas through the replanting of appropriate native, non-invasive, adaptive and drought tolerant vegetation.

P. "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land and slopes used in connection with the facility or activity.

Q. "Slope" means the ratio of elevation change to horizontal distance, expressed as a percentage.

The slope is computed by dividing the vertical distance by the horizontal distance and multiplying the ratio by one hundred.

R. "Soil" means dirt, sand and other similar earth matter, rocks and other solid or semisolid mass material, whether produced by man or nature, but shall not include the matter consisting of the infrastructure or appurtenances thereto.

S. "Special flood hazard area" is defined in Chapter 18.60.

T. "Stabilization measure" means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices such as effective integration of stormwater management systems (storage/controlled discharge), with appropriate combinations of landscape conservation, enhancement, structural controls, and impervious cover, which provide an optimum way to eliminate soil erosion and prevent soil from leaving the site though water runoff and/or wind after the grading is complete or the site becomes idle for more than one hundred eighty calendar days.

U. "Stormwater" means stormwater runoff, snowmelt runoff, and surface runoff and drainage.

V. "Structurally stabilized site" means a slope that is constructed with a factor of safety as established in this chapter.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.040 Compliance with provisions.

A. No grading shall be done within the city without complying with the requirements of this chapter. All approvals of the permit official shall be in writing and issued in advance of the activity being approved.

B. Posting permit. A copy of the grading permit issued pursuant to this chapter shall be posted on the grading site during all hours of operation.

C. No blasting shall be permitted under this chapter.

D. At any time that a permit is required by this chapter, the applicant requesting the permit shall be responsible for contacting the "one call" notification system for the area and shall be required to furnish a verification number confirming that such a "one call" has been made as part of the application for grading permit. This requirement shall create no duty, express or implied, on the part of the city to verify that such a "one call" has been made by the applicant.

E. Work for which a grading permit has been issued under this chapter shall be executed in conformance with the grading plan approved by the permit official and shall not be abandoned or left incomplete.

1. Failure to continue significant work on a grading site once grading has begun or failure to complete the work within the time allowed in the grading permit, as limited in this chapter, may be determined by the permit official to be an abandonment of the work required by the permit, and such abandonment will constitute a violation of this chapter.

2. Having persons or equipment at a site but not executing the work shall not be construed to be significant work.

F. The grading stabilization plan (GSP) shall conform to the guidelines provided by this chapter.

G. In conjunction with this chapter, the applicant must comply with the requirements of the Stormwater Pollution Prevention Plan (SWPPP) as defined in Chapter 15.

H. No grading shall be done in an area of special flood hazard unless permitted and the grading meets the requirements of Chapter 18.60.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.050 Permits required.

A. A grading permit is required and may be issued by the permit official for the following activities:

1. The reshaping of the land to conform to approved plans for construction on the property;

2. If a borrow or waste permit is required as part of the grading, a grading permit is required for the borrow and/or the waste site as well as a grading permit for the site at which the grading

takes place. All requirements of the grading permit as part of a borrow or waste site shall be observed except that earthwork need not balance within the borrow or waste site.

B. When materials are to be borrowed from or wasted to a development site, a borrow or waste grading permit is required and may be issued by the permit official.

C. Proposed subdivisions. If property is required to be subdivided pursuant to Title 19, grading permits are required and shall be issued when the following requirements are met:

1. A grading permit shall not be issued by the permit official until preliminary approval on a subdivision/plat application or final approval on a combination plat application (as allowed in Chapter 19.01.060) has been granted by the city plan commission or administrative approval on a minor subdivision has been granted by the subdivision coordinator as applicable;

2. If the grading plan and/or drainage plan changes after the preliminary plat approval was granted by the city plan commission or administratively by the subdivision coordinator as applicable, such changes shall not be allowed until approved by the permit official;

3. A borrow or waste permit meeting the requirements of this chapter may be issued by the permit official pursuant to the requirements of this chapter.

(Ord. No. 17516, § 1, 3-29-2011)

18.44.060 Exceptions from permits.

Permits will not be required under the exceptions listed hereafter. The exceptions concern only the obligation to apply for a permit and the exemption from the requirement of obtaining a permit does not relieve the owner from complying with the remaining provisions of this chapter. A stormwater pollution prevention plan and authorization to discharge stormwater under the TPDES construction general permit shall be required when required by state regulations. The city engineer or other designee of the city manager reserves the right to require a grading stabilization plan if it is determined that the excepted grading activity has the potential to cause off-site impacts. The person engaged in grading shall have the burden of establishing that he qualifies under any of the following exceptions:

A. If the work is to be performed in connection with construction on a legally platted residential lot or an unplatted residential lot not exceeding one acre in size, and the grading is included as part of a valid building permit, a grading permit shall not be required. This exception shall not apply to any lot of any size within the Mountain Development Area.

B. Where the work to be performed is routine agricultural or land management operations necessary for cultivation of the soil of a farm or ranch;

C. Where the work is performed as part of a city solid waste disposal operation;

D. Where the work is small in depth, area or impact. It includes landscaping that does not impact existing drainage patterns, such as tree planting, on a residentially used property or interment in properly zoned cemeteries.

E. Demolition of existing buildings and structures including removal of the foundation system, provided that the original grades and drainage shall not be modified.

F. Quarry operations.

G. Road access to the area being surveyed and/or is the subject of geotechnical work, provided that grading for such access is less than twenty feet in width.

H. Maintenance activities to restore a site to the previously approved grading plan.

I. If the work is to be performed in connection with an existing commercial building permitted as determined by the permit official.

J. Maintenance activities performed as part of the duties and services related to street and right-of-way maintenance pursuant to El Paso City Code, Section 13.02.010.

(Ord. No. 17516, § 1, 3-19-2011; Ord. No. 17809, § 1, 6-5-2012, 6-11-2012)

18.44.070 Permit application.

Any person desiring a permit under this chapter shall apply to the permit official upon forms furnished by the city. The application will be signed by the owner of the property where the work is to be performed or by his duly authorized agent. The applicant shall assure that all application data are correct. Any falsification of application data shall invalidate the permit. Areas within the designated Mountain Development Area must meet the requirements of this chapter and Chapter 19.24. Every application shall contain the following information:

A. The location, nature and extent of the proposed work and a statement as to the intended use of the site. Changes in the intended use of the land involved will require reapplication for a permit;

B. The name and address of the owner of record (and owners, if more than one) of the property on which the work is to be performed;

C. The names, addresses and phone numbers of the persons or organizations that will perform the work and of the person who will be in effective control of the work;

D. The amount of material to be excavated, moved or filled and the proposed schedule of the work;

E. A verification number confirming that the applicant has contacted a "one call" notification system as required by this chapter;

F. Grading plan. The following are requirements to be included in the grading plan:

1. Existing and proposed contours that will shape the site, showing in detail the contours, grades, elevations and all facilities for control and disposition of stormwater runoff; the extent of all cuts and fills;

2. Boundaries of the property involved;

3. The location of all buildings and structures on-site and those on adjacent properties within a horizontal distance equal to three times the height of the proposed slope;

4. The plans and profiles for any facilities, walls, storm drains or other protective measures to be constructed as part of or in connection with the proposed work;

5. Plans and drawings shall be prepared, sealed, signed and dated by an engineer;

6. Shall indicate where the borrow is to be used, if applicable, and a separate grading plan for the waste of the borrow site shall be submitted if the site is unbalanced by more than ten percent;

7. The grading plan shall indicate where the source of the waste is located and a separate grading plan for the site where the waste will be taken shall be submitted.

8. The grading plan shall clearly identify the areas to remain undisturbed and manner in which they will be protected.

9. Where a natural drainage path will be crossed by construction vehicles regularly during construction, a temporary crossing shall be designed by an engineer and included in the grading plan. It shall be stabilized immediately after completing the grading operation in accordance with the GSP.

10. Prior to any disturbance in waters of the United States, the waters of the State of Texas or federally regulated wetlands, the permittee must verify whether a permit will be required from the U.S. Army Corps of Engineers (USACOE) and the Texas Commission for Environmental Quality (for the Environmental Protection Agency). Formal determination from the USACOE on jurisdiction or a permit from the USACOA must be provided.

11. Vertical and horizontal benchmark information.

12. Any additional information required by the permit official, that may be required to carry out the purpose and intent of this chapter.

G. Drainage plan. The following information is required to be included in the drainage plan:

1. Existing watersheds/drainage areas and how stormwater falling on or through the site will be contained or handled after grading has been completed;

2. Sufficient drainage information to demonstrate proper interim and final handling of stormwater runoff, including existing contours to a point where offsite flow pattern impacts can be determined;

3. A drainage study by an engineer where the proposed work covered by the application results in changes to existing patterns of drainage or results in the requirement for storm drainage facilities in accordance with the Drainage Design Manual;

4. Grading details for grading conducted in natural drainage ways shall be specifically identified in plans and drawings.

H. Grading stabilization plan (GSP). GSP is for the stabilization of the site/slopes after the grading operation is complete (post construction) or if the site becomes idle for more than one hundred eighty consecutive calendar days. These requirements are in addition to meeting the requirements of Chapter 15 which govern construction activities and erosion control BMPs. The following information is required to be included in the GSP:

1. Show all disturbed areas that will be exposed to erosion for more than one hundred eighty consecutive calendar days, including finalized graded areas.

2. The location and description of stabilization measures to be implemented to stabilize the site and prevent excessive erosion and degradation of the areas adjacent to the site specifying the methods to be used for water erosion, wind erosion and sediment control;

3. Detail the maintenance measures, sequencing/scheduling plan, inspections, verification procedures and documentation that will be followed to ensure that grading and erosion controls are in place and functioning effectively. Ongoing maintenance measures after the site has been stabilized must be included.

4. Certification that the GSP was prepared by an engineer.

5. The GSP may be combined with the grading plan if all facilities and measures are shown on the grading sheets without obscuring the clarity of either the grading plan or the GSP;

I. Stormwater pollution prevention plan (SWPPP) shall be required by the permit official when required by state regulations. Requirements for the SWPPP are defined in Chapter 15.

J. Geotechnical investigation. A geotechnical report prepared by an engineer indicating the types and characteristics of the soil formations with substantiating data and opinion as to slopes, fills, excavations to safely construct the proposed development of the site and the stabilization measure to be used. The minimum requirements for the geotechnical report include, but are not limited to slope stability, fill compaction requirements, grading operation restrictions and guidelines, soil type and stabilization requirements. In the event that a geotechnical investigation is not necessary, adequate documentation/justification must be provided to the permit official for evaluation.

K. A borrow or waste grading application shall include a projected land use plan for the borrow or waste area.

L. Permit application documents required by this chapter shall be submitted to the city in one hard copy and one electronic copy in pdf format.

M. All bonds and insurance as required in this chapter before issuance of the permit.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.080 Insurance and bonds.

A. Insurance requirements. No permit applicant shall be issued a permit until the applicant presents evidence satisfactory to the permit official that the applicant meets the following minimum insurance requirements:

1. Insurance shall not be required for projects less than one acre in size of disturbed land.

2. The applicant shall procure and shall maintain during the term of the permit such commercial general liability, property damage liability and vehicle liability insurance, naming the permittee and any subcontractor performing work associ-

ated with the permit as insured, co-insured or additional insured for claims for damages for personal injury, including accidental death, as well as from claims for property damage that arise from work associated with the permit.

3. Minimum limits of liability and coverage shall be two hundred fifty thousand dollars for bodily injury liability, including death, for each person and five hundred thousand dollars in the aggregate and one hundred thousand dollars for property damage for each occurrence and one hundred thousand dollars in the aggregate.

4. Such insurance shall be written by an accredited insurance company under the supervision of the Board of Insurance Commissioners of the State of Texas. Evidence of compliance with these insurance requirements shall be considered as having been met when copy of the insurance policy or a certificate of insurance has been filed with and approved by the permit official. Such policy shall include an endorsement that the city is named as an additional insured to the full amount of the policy limits and that the permit official shall be notified at least thirty days in advance in the event the policy or policies are canceled and ten days in advance for non-payment of policy premiums. The required endorsements shall be provided to the permit official prior to issuance of the permit. The permittee shall maintain said insurance with a solvent insurance company authorized to do business in Texas. The policy shall provide that the insurer will defend against all claims and lawsuits which arise and will pay any final judgment of a court of competent jurisdiction against the city, its officers, agents, servants or employees and permittee, his officers, agents, servants or employees. Failure by permittee to keep the policy in full force and effect throughout the term of the permit shall be grounds for cancellation of the permit.

5. Permit applicants who have provided certificates of insurance to the city pursuant to the requirements of a chapter of the City Code other than this chapter that meet all of the requirements established in this chapter shall not be required to obtain an additional insurance but are required to provide such certificates of insurance showing present coverage as required in this chapter.

6. Government agencies: Permits shall be required in connection with all city (including but not limited to El Paso Public Service Board/El Paso Water Utilities) public works projects provided that no permit fee shall be required for such projects. Permits shall be required for county, state or federal public works projects only when such projects include grading on the city's right-of way. When grading work is performed by the employees of a governmental agency, the insurance requirements of this section may be met by providing certification that government agency obtaining the permit is self-insured. Grading work performed by those contracting with a governmental agency shall provide the insurance required herein.

B. Permit bond requirements. No permit shall be issued under this chapter to any person, firm or corporation applying for a permit until such applicant has filed with the city engineer or other designee of the city manager a bond for the amount of fifty thousand dollars, signed by a surety company authorized to do business in Texas. The city shall be named as the obligee under such bond. The bond shall provide that the principal and its agents, employees, and subcontractors shall comply with all provisions of this chapter, that the principal shall pay all damages which are sustained by the city and which are caused by failure of the principal, its agents, employees or subcontractors to comply with the provisions of this chapter, and that the principal shall indemnify the obligee against claims arising out of such failure to comply, including but not limited to the warranty period required in this chapter. Bonds shall be issued for a duration sufficient to cover the warranty period required in this chapter. The surety shall be acceptable to the city as to solvency and such surety shall be listed on the current Department of the Treasury's Listing of Approved Sureties, Department Circular 570, United States Department of the Treasury or its successor publication, ("Circular 570"). If the city becomes

dissatisfied that the surety is solvent or the surety is no longer included in Circular 570, the permit official may require a bond from a surety listed in Circular 570. Permit applicants who have provided a bond to the city in the amount required by the permit official for a permit pursuant to the requirements of a chapter of the City Code other than this chapter that meets all of the requirements established in this chapter shall not be required to obtain an additional bond but are required to provide a copy of such bond provided that such bond specifically includes coverage for the permit or permits issued pursuant to this chapter. Permittees who have multiple permits issued pursuant to this chapter are required to provide only one current valid bond for all such permits but may be required to provide a copy of the current bond with each application for a permit.

When a government agency is required to obtain a permit, contractors under contract with a government agency shall provide the bond required in this section. No bond is required when all of the grading work performed pursuant to a permit issued under this chapter to a government agency is performed entirely by the employees of that government agency.

(Ord. No. 17516, § 1, 3-19-2011; Ord. No. 17809, § 2, 6-5-2012, 6-11-2012)

18.44.090 Warranty.

Any person issued a permit shall agree warrant and maintain the area described in the permit for a period of two years after the permit is closed by the city pursuant to Section 18.44.220, or until a building permit is issued for the purpose of maintaining a stabilized site in accordance with the approved GSP, whichever first occurs (the "warranty" or "warranty period"). The city may conduct inspections of the permitted area throughout the warranty period and require maintenance and correction of the work by the permit holder. Failure of the permit holder to correct the work shall constitute a failure to comply with the provisions of this chapter.

(Ord. No. 17516, § 1, 3-29-2011)

18.44.100 Permit application, staff review.

When grading is to be performed, the permit official shall review the grading permit application, to confirm that the application is in compliance with this chapter and evaluate any aspect of the proposed work that relates to or affects the zoning or land use, and on the apparent ecological effect of the development. The permit official may also refer applications to other appropriate city agencies for review and comment. In such cases, the staff shall provide such comments within a period of ten city working days. The failure of staff to provide timely comments shall not delay the continued processing of the permit application.

(Ord. No. 17516, § 1, 3-29-2011)

18.44.110 Issuance, denial, suspension or revocation of permit.

A. The grading permit will be issued by the permit official upon verification and approval of the information contained within the permit application; and upon payment of the appropriate permit fees.

B. The permit official may refuse to issue any grading permit whenever the proposed grading is contrary to the provisions of this chapter.

C. A grading permit may be denied for the failure of the applicant to contact a "one call" notification system for the area and to provide a verification number confirming that such a "one call" has been made by the applicant.

D. If any person does any grading or otherwise disturbs the ground cover of any property within the city without a grading permit, he must apply for a grading permit and shall be subject to a double permit fee.

E. Suspension and revocation. The permit official may suspend or revoke a permit for noncompliance with the requirements of this chapter. Suspension may be issued by the permit official for minor violations of the permit that can be corrected within ten calendar days. Failure to correct to the satisfaction of the permit official shall result in a revocation of the permit, provided that

suspension shall not apply to correction of public nuisance and/or hazardous conditions, as regulated in this chapter.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.120 Appeals.

Any permittee aggrieved by the decision of the permit official concerning the issuance, denial, revocation or suspension of a permit may appeal such decision to the appeals officer.
(Ord. No. 17516, § 1, 3-29-2011; Ord. No. 019762, § 6, 7-22-2025)

18.44.130 Period of validity of permits.

All permits, except for borrow and/or waste permits, shall expire within one year of the date of issuance of the permit. Two one-year extensions for completion of work may be granted subject to an established fee for each one-year extension. An application for an extension of the permit shall be submitted to the permit official prior to the expiration of the permit. The permit will become void and a new permit application required after expiration of the then existing term of the permit (1) when no application for an extension is timely submitted and (2) upon the expiration of the second extension. Borrow or waste permits shall expire within six months from the date of issuance of the permit. Upon expiration of the permit, a reapplication for a borrow or waste permit shall be required.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.140 Permit fees.

The application for any permit required by this chapter shall be accompanied by the established fee.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.150 Work hours specified.

Grading shall be permitted during the established construction hours as set forth in Section 18.02.105.20 of this Code. No grading of any kind shall be conducted outside established construction hours or on legal holidays or Sundays unless the property owner or his authorized agent has paid the established fee and obtained an after hours construction/grading permit pursuant to the requirements set forth in Section 18.02.105.20 of this Code.
(Ord. No. 17516, § 1, 3-29-2011; Ord. No. 18003, § 1, 4-30-2013)

18.44.160 Removing hazardous conditions.

A. If the permit official finds that any grading (either completed or in progress) is causing a hazard to persons or property, he may notify the owner and require that the hazard be removed or eliminated as soon as practicable depending upon the degree of urgency associated with the hazard involved. If such action is not completed within the time limit stated within the notice, the permit official may require that reasonable temporary protective measures be provided by the property owner in the interim until a final correction plan is approved by the permit official.

B. If materials are washed or deposited upon city right-of-way, drainage structures/easements/right-of-way, streets, alleys or other public property as a result of improperly controlled grading of higher or adjacent lands, the permit official shall notify the owner to remove such materials and restore the streets, alleys or other public property to their original condition within 24 hours or the time specified on the notice.

C. Regardless of whether or not any person is convicted of a misdemeanor for failure to comply with a notice given under subsection A. or B. of this section, the permit official may, if the owner or any principal named in the permit bond fails to comply with such notice, authorize the work to be done by city forces or by contract. The owner and any other principal named in the surety bond shall pay the city's actual cost for such work. If such work by the city is completed while the grading permit is active or during the warranty period, the surety that issued the permit bond required in this chapter shall be liable for the city's cost of doing the work in the event the principal or principals named in the bond do not make payment to the city.

D. Whenever earthen ramps are required to cross city rights-of-way, written approval must be obtained from the permit official prior to the installation of such ramps.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.170 Responsibilities of the owner.

Under this chapter the owner shall be responsible for:

A. Obtaining a permit if required for any grading. Application for the permit shall be made as provided in this chapter;

B. Obtaining, when required by this chapter, the services of an engineer;

C. All of the legal duties, obligations or liabilities incident to ownership of the property while the work of grading is in progress or after the completion of the work. Neither the issuance of a permit under this chapter nor the compliance with the provisions of this chapter shall relieve any person or owner from any responsibility for damages to persons or property otherwise imposed by law, nor impose any liability upon the city or any official of the city for such damages;

D. Installing the appropriate devices, structures, landscaping and facilities and executing soil stabilization, erosion control, handling of materials and other proper measures in conjunction with any proposed grading so as to fulfill the intent and purpose of this chapter;

E. The continued inspection, maintenance and repair of all retaining walls, drainage facilities, slopes, landscaping, soil stabilization and erosion control measures and any other protective devices located upon his property and constructed pursuant to the permit and maintenance activities specified in the approved grading stabilization plan and the documentation thereof;

F. All testing and costs associated with the quality assurance. The quality assurance shall incorporate testing as recommended by the geotechnical investigation and as required by the permit official to verify that the conditions of the permit and intent and purpose of this chapter have been fulfilled;

G. If a graded site becomes destabilized or destabilization becomes imminent, the owner shall immediately take all necessary steps to control such discharge; and

H. Apply for all applicable permits as required in the El Paso City Code.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.180 Responsibility and authority of the permit official.

The permit official, under the authority of this chapter and pursuant to applicable city ordinances and procedures, shall be responsible for:

A. Reviewing all grading permit applications as submitted under the requirements of Section 18.44.070 and the issuing or denying of grading permits as expeditiously as possible and confirm it meets the requirements of the chapter;

B. Temporary suspension of grading permit due to excessive erosion; engineer to provide corrective action; and collection of costs. The permit official may, during a situation in which, in his opinion, blowing sand or dust or runoff from a site under permit is causing or may cause excessive erosion affecting the health, safety, welfare, or property of resident adjacent to the site, after giving permittee due notice and time to take corrective action and upon permittee's failure to act within a period of time determined by the permit official to be reasonable, suspend the grading permit and cause the implementation of BMPs and/or stabilization measures as determined by the permit official to reduce said nuisance or hazard. The permit holder shall pay such costs to city within ten working days of receipt of an invoice for the costs. If the costs are not paid, then a claim will be made against the permit bond; and

C. On a per project basis, temporary deviations for project phasing under a SmartCode application may be evaluated and approved provided the deviations are not in conflict with the intent of this chapter.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.190 Authority to issue citations.

A. The permit official is authorized to enforce the provisions of this chapter and shall have the power to issue misdemeanor citations to any persons violating the provisions of this chapter.

B. The permit official is authorized to make inspections of any property necessary to enforce the provisions of this chapter. If the owner or person in possession of any property refuses to allow the permit official permission to enter the property, the permit official shall have recourse to every remedy provided by law to secure entry including obtaining the proper judicial warrants. (Ord. No. 17516, § 1, 3-29-2011)

18.44.200 Engineering controls for grading.

The requirement for grading permits may differ due to local conditions of land use, proposed site development, drainage patterns, topography, soil conditions and other items. The requirements in this section have been developed as an aid for operations covered by the grading ordinance. Engineering judgment, experience and competence shall be used to verify applicability of the requirements for the site.

Any deviation from the requirements in this section shall be reviewed by and must receive the approval of the permit official. The permit official shall impose the following requirements as part of the issuance of the grading permit.

A. Grading design requirements:

1. Shall maintain on-site balance of earthwork (within ten percent cut or fill) except where doing so would disturb existing natural drainage paths to be preserved. No materials shall be brought to or taken from the site, unless a borrow or waste permit is obtained.

2. Transporting of processed material from one site shall be allowed to a noncontiguous site when:

a. Both sites are under the same ownership or the permittee has obtained written permission from the owner of such other site not belonging to the permit applicant and is provided with the permit application.

b. The processed material is transported from a site with a grading/waste/borrow permit to a site with a grading/waste/borrow permit unless the other site is outside the city limits.

c. The permit official approves the route for transporting processed material from one site to another, and the acceptable wheel-axle loads.

3. Sites shall be graded and maintained to prevent the erosion of soil and to prevent the accumulation of stagnant water thereon, or within any structure located on the site.

4. Construction, grading, or paving on any site shall not increase the damage potential to upstream, downstream, or adjacent properties or public right-of-way, property and/or facilities.

5. Shall include sediment basins that discharge into city streets or natural drainage paths. Desilting basins shall provide sufficient settlement time for setting of solids in the basin before discharging onto city streets and natural drainage paths. Hydraulic and soil type documentation shall be provided to demonstrate or establish that adequate sedimentation occurs before leaving the sediment basin. Sediment basins shall be designed in accordance with the Drainage Design Manual.

6. No grading operation shall excavate or fill so as to cause falling rocks, soil, or debris in any form to fall, slide, or flow onto adjoining properties.

7. Compaction requirements.

a. The compaction requirements for load bearing fills upon which buildings, structures, streets, alleys or public facilities are to be located shall be determined by an engineer as part of the design for the fill and shall fully meet the requirements of the geotechnical investigation as approved by the permit official.

b. Fills shall be placed and compacted to produce a structurally stabilized slope in accordance with the construction design standards and geotechnical investigation.

8. Slope design requirements. Excavations shall be constructed and/or protected so that they are stable and do not endanger life or property. The provisions of this chapter are not intended to

prevent the use of any alternate method of slope design provided that the alternate is designed by an engineer as determined by the soils investigation report and the permit official finds that the alternate design is equivalent to that prescribed in this chapter.

a. Embankments and slopes supporting occupied buildings, streets and roadways shall have a factor of safety of not less than 1.5.

b. Slopes located above occupied buildings and whose toe is located within twenty feet or half of the embankment height from the exterior walls of any occupied building, whichever controls, shall have a factor of safety of not less than 1.5.

c. All other slopes and embankments shall have a minimum factor of safety of 1.3.

d. Drainage facilities shall be provided to protect slope faces from erosion.

e. Construction of berms and swales on the brow or top of the slope shall provide protection from runoff. Erosion protection shall be provided for the berms that will encounter concentrated flows. Swale inverts may be required to be lined in accordance with flow velocities per the Drainage Design Manual. Swales shall be sloped (minimum one percent for pervious and 0.5 percent for impervious) to lined down drains in order to safely discharge flows. Adequate erosion protection shall be provided at all discharge locations.

f. The slope of cut and fill surfaces shall not be steeper than 3 horizontal to 1 vertical. Permittee must also demonstrate that the slope will not become destabilized and not undergo excessive erosion (vegetation alone will not meet the stabilization requirements and additional measures will be necessary). Soil analysis describing engineering properties and suitability of the existing soils to support the proposed slope must be included in the geotechnical investigation. The permit official may require a flatter slope than 3 horizontal to 1 vertical (3H: 1V) if soils/geologic information submitted shows that flatter slopes are necessary for stability, stabilization measures effectiveness or maintenance.

i. The slope of cut surfaces which are five feet in height or less and are in competent bedrock shall be no steeper than 2H: 1V.

g. Areas adjacent to slopes shall not drain over onto the slope face if the off-site drainage width (measured in the direction of the slope) is greater than thirty feet. For areas greater than thirty feet, a swale or berm shall be provided to ensure the water does not erode the face of the slope in accordance with the GSP.

i. Slopes having a ratio of 3 horizontal to 1 vertical or steeper shall not exceed twenty feet in vertical height, without a five feet horizontal bench being placed mid height of slope and at every twenty feet in vertical height thereafter (the bench shall have a cross slope away from the brow [the top] of the slope). The bench shall be constructed with a swale to collect stormwater. Swale inverts may be required to be lined in accordance with flow velocities per the Drainage Design Manual and to prevent percolation into the slope. Swales shall be sloped (minimum one percent) to lined down drains in order to safely discharge flows. Adequate erosion protection shall be provided at all discharge locations.

ii. Cut slopes shall be blended into the existing terrain to produce a contoured transition from cut face to natural ground.

h. No stormwater storage structure shall be at or adjacent to the top (brow) of a slope. Water harvesting at the top of slope will be considered and approved on a per project basis.

i. Cut and fills shall be set back a minimum of five feet from walls, buildings or structures to allow sufficient access to the top of the slope for maintenance purposes and to assure the stability of the slope and the security of the foundations of the buildings and structures.

j. Subsurface drainage facilities shall be provided where needed to intercept seepage that would affect slope stability, building and structure foundations or create undesirable wetness.

k. Excavations shall not be made close to property lines as to endanger adjoining property without providing support and protection to prevent damage due to erosion, sliding, settlement or falling hazard.

l. Fills.

i. Fill materials shall be free of materials detrimental to the construction of stable fills as required by the geotechnical investigation.

ii. Fills shall not be placed where they will slide or wash onto the property of others nor shall they be placed where they will cause encroachment upon natural drainage paths or other natural drainage ways without providing facilities to assure the capacity of the drainage way as approved by the permit official and in compliance with other state and federal guidelines.

iii. Fills that toe out on natural slopes or grades steeper than three horizontal to one vertical shall not be made.

iv. Fills placed above the top of an existing or proposed surface with a slope steeper than three horizontal to one vertical shall be set back from the top of the slope face at least five feet or as determined by the soils investigation report, unless slopes are stabilized to the top of slope face.

v. Prior to placing fills on existing surfaces (condition before grading), all organic materials, vegetation, noncomplying fill, topsoil and other unsuitable materials shall be removed and the existing surface shall be scarified to a depth of six inches or as directed by the geotechnical investigation, whichever is greater.

vi. Fill slopes shall not be constructed by pushing soil over the top of slope.

vii. Fills used to support the foundations of any building or structure shall comply with the requirements of a geotechnical investigation.

9. Rainwater (precipitation) harvesting. Grading plans may be designed to encourage harvesting and use of rainwater within the project site, to reduce surface runoff discharged from project site.

10. Retaining walls. Retaining walls shall be engineered and shall be faced with stone or constructed with other earth colored material as approved by the permit official. If a series of retaining walls is required, the horizontal distance between walls shall be a minimum of four feet. Retaining walls in excess of four feet in height shall be constructed in accordance with the design prepared by an engineer. The design may require consultation with a geotechnical engineer, shall consider such factors as expansive soils, steep slopes and vehicles or structures near the walls and shall include the following:

a. Construction plans indicating how the proposed wall height will vary along its length.

b. Details with elevations showing top and bottom of wall for critical points along the wall length shall include a profile.

c. Supporting calculations that demonstrate a factor of safety in accordance with the Chapter 18.08.240 for bearing capacity, overturning, sliding, and internal stability, including surcharge loads due to sloping backfill, adjacent vehicles and structures.

11. Pond grading requirements. Pond slopes shall be stabilized per the grading stabilization plan. Slope design requirements will be applicable to the side slopes of the ponds.

12. Any drainage improvements that are installed, as a result of land disturbance activities shall be designed to compliment and blend with the natural topography of the land.

B. Preservation of existing natural drainage paths and terrain: Undeveloped areas in the City of El Paso contain significant natural terrain, drainage paths and vegetation. As a result, special design requirements are necessary to mitigate potential erosion hazards, minimize adverse ecological, physical and visual impacts and conserve natural scenic beauty so as to leave existing conditions undisturbed as much as practicable.

1. Natural drainage paths. The natural drainage paths as provided in the natural drainage path map shall be delineated in the grading plan. It is encouraged that the identified natural drainage paths remain in their natural state, including riparian vegetation, boulders and rock outcroppings. If the proposed grading is within the natural drainage paths, the following design requirements shall apply:

a. Shall meet the requirements of the Drainage Design Manual.

i. All modified existing natural drainage paths shall be designed to achieve a restored natural

appearance. The natural appearance shall be achieved using grading and landscape techniques that replicate a natural drainage path by using natural or earth colored materials native to El Paso, vegetation, boulders and contouring. The design plans shall be in conjunction with the overall landscape theme for a natural drainage path by a landscape architect and be sealed by an engineer. These improvements shall be detailed in the grading plan and GSP.

ii. An erosion/scour analysis must be completed and submitted to the permit official for approval. Water velocity shall be reduced to provide room for floodwater to spread safely and allow for native materials to be used for channel armoring.

iii. A continuous trapezoidal and/or rectangular channel section shall be utilized only if no other hydraulic alternative is feasible.

b. Disturbance for public access trails, roadway crossing and underground utilities required for the development shall be kept to a minimum and must be designed to meet the landscape requirements listed in the preceding section B.1.i.

c. Fences, walls and similar structures shall not be constructed in the undisturbed or modified natural drainage paths.

d. Where drainage structures enter natural drainage paths, the structure must be blended into the natural terrain and lined with natural or earth colored materials, revegetation or other alternative material as approved by the permit official.

e. Natural drainage path fencing is required for all channels with slopes higher than four feet high and slopes steeper than three feet horizontal and one foot vertical shall have fencing of two feet high along the abutting street and four feet high along residential land uses. Fencing shall be masonry, wrought iron, rock, concrete, or combination thereof.

f. Provide a maintenance access route to be determined based on site conditions and to be approved by the permit official. The access route may be a public street when immediately adjacent to the natural drainage path.

g. Existing natural vegetation on the property shall be retained in its natural state, except where necessary for the construction or to replace or improve undesirable vegetation. Areas to remain undisturbed shall be fenced off prior to the use of any heavy machinery on site and shall remain fenced during the entire construction process. Fencing material may include plastic fence or other similar materials. To protect the root zone of said vegetation, fencing shall be placed five feet to the outside of the dripline of such vegetation and shall be a minimum of three feet in height.

h. Revegetation shall be required on all disturbed areas. For purposes of this requirement, appearance shall conform to the overall landscape architect design. The existing top soil (twelve inches) shall be stockpiled and reused in areas where revegetation will occur.

2. Natural terrain. Where grading is proposed on any parcel having an average natural slope of ten percent or greater, grading shall be limited to the minimal amount possible under standard engineering practices. Special requirements shall be considered by the engineer including the intensity of land disturbance and natural characteristics of the terrain, such as steepness of slope, vegetation, landforms, soil type and rock stability.

a. The overall shape, height or grade of any cut or fill slopes shall be developed utilizing contour grading in concert with existing natural contours and the scale of the natural terrain of the site with seamless blending to the natural terrain at the edges of the disturbance.

b. Where two cut or fill slopes intersect and/or intersect the natural grade, the intersection shall be horizontally and vertically contoured and blended to match existing terrain.

c. The area of a site proposed to be graded shall be that which fits into the natural terrain and which allows for a minimal amount of grading. The ungraded area must be left in its natural form for the remainder of the site and native vegetation shall not be removed.

C. Construction activity requirements. The following operational guidelines must be followed during the grading of the site. They are required to be included as "general notes" on the approved grading plan.

1. No on-site processing of material for commercial or retail sales shall be allowed. On-site processing of materials to be used for preparation or construction of improvements within the site covered by the grading permit shall be allowed.

2. Work shall be conducted in a manner that preserves and does not obstruct, impede or interfere with the flow of stormwater in natural drainage ways, unimproved channels or watercourses, or improved ditches, channels or canals in such a manner as to cause flooding where it would not otherwise occur.

3. Construction equipment and fencing shall be kept out of watercourses except when necessary to perform work on the approved plans. Adequate by-bass measures shall be installed where temporary drainage blockages will occur. Where work within a channel is designated on approved plans, precautions shall be taken to stabilize the work area during construction to minimize erosion as shown on the plans. The channel, including bed and banks, shall always be restored/restabilized immediately after work in the channel is completed;

4. Where a drainage way will be crossed by construction vehicles regularly during construction, a temporary crossing shall be constructed as required in the approved grading plans.

5. Material stockpiling shall not be allowed when grading operations are idle for more than seven consecutive calendar days. Stockpiling shall be limited to ten feet high when grading operations are being conducted.

6. A traffic control permit shall be required if the grading operation will impact traffic.

7. Any use of vibratory equipment shall not be allowed, unless approved in writing by the permit official in advance of such use.

8. The permit official must be notified no later than 4:00 pm the day in advance of any grading work. Additional activity requirements/restrictions may be specified by the design engineer of record.

D. Grading stabilization plan design requirements: The applicant shall meet the following requirements in developing the GSP for the stabilization of the site/slopes after the grading operation is complete (post construction) or if the site becomes idle for more than one hundred eighty consecutive calendar days. These requirements are in addition to meeting the requirements of Chapter 15 which govern construction activities and erosion control BMPs. The requirements for soil erosion control measures depend largely upon the extent of the destructive and nuisance potentials due to erosion that may develop from the work to be performed. Thus, the need for erosion control measures is largely determined by prevailing winds, drainage patterns, soils characteristics, residences, businesses, thoroughfares and other facilities. Analysis must be completed to verify and account for drainage patterns, soil characteristics and proximity to downstream development where erosion may occur and/or may cause hazards or damage to public or private property. The following are design guidelines for completing and complying with the GSP.

1. The GSP shall be prepared and designed to meet the following goals:

a. Development plans for any project site shall be as effectively fitted to existing topography and soils as practical so as to create the least erosion potential possible.

b. Sediment caused by excessive erosion shall be removed from runoff water before leaving the site.

c. All disturbed areas, sites and slopes shall be stabilized through the implementation of a stabilization measure to prevent excessive erosion by wind or water.

d. Ensure that the stabilization measures are implemented properly and maintenance activities, both short and long term, are specified to ensure effectiveness of the stabilization measures.

e. Cut and fill slopes shall be stabilized through the implementation of a stabilization measure and surface water damage to cut and fill slopes shall be prevented.

2. Implementation of the GSP shall be applied to disturbed areas and soil stockpiles after the grading operation is complete or at such time the land becomes idle for more than one hundred eighty consecutive calendar days.

3. Scheduling requirements — The maintenance activities shall continue for the warranty period.

a. At any one time in the development of the site, the smallest practical project area should be physically disturbed. Final structures, paving, facilities and effective drainage control measures shall be completed in each project area as soon as possible.

b. Project areas physically disturbed during development shall be exposed to erosion producing influences for the shortest period of time practicable.

c. Critical areas such as slopes of three (horizontal) to one (vertical) or steeper and drainage ways shall be stabilized immediately after the completion of the grading.

d. Permanent storm drainage facilities, paving and other related facilities shall be constructed as soon as practicable to reduce water erosion problems.

e. The GSP must include a description of site work schedule and sequencing, specifically stating whether any portion of the land will remain graded and idle for more than one hundred eighty consecutive calendar days.

4. Erosion control—Waterways. Disturbed areas and slopes must be stabilized using one or more of the following stabilization measures. Stabilization measures are detailed in the design standards for construction:

a. Velocity dissipation devices.

b. Slope drains.

c. Streambank stabilization.

d. Earth dikes and drainage swales.

e. Sediment basin.

f. Check dams.

g. Others as proposed by the applicant and approved by the permit official.

5. Erosion control—Disturbed areas. Disturbed areas and slopes must be stabilized using one or more of the following stabilization measures. Stabilization measures are detailed in the design standards for construction.

a. Wind erosion - After completion of site grading the project area shall be watered as required to control wind erosion.

b. Palliative soil stabilizers (e.g. polyacrylamide, guar-based compounds, polyvinyl acetate, liquid polymers). Detail information for polymers shall include the type of palliative, mix ratio and application rate specific to the soil type, climatic conditions, and stabilization design life. Oil-based palliatives are not allowed.

c. Seeding methods such as hydro seeding, drilling, seeding and raking in, or other seeding method to provide long-term erosion control. Existing top soil shall be stockpiled and reused; soil roughening shall be implemented before seeding. Seed mixtures shall be provided with the GSP. Mixtures shall utilize native and adapted grasses that require no irrigation after the establishment period. Seeding alone is not erosion control until vegetation is established. Seeding shall be combined with applicable erosion control structural stabilization measure until vegetation is established.

d. Bonded fiber matrix. Detail information provided for bonded fiber matrix shall include the type of binder, mix ratio and application rate specific to the soil type, climatic conditions, and stabilization design life.

e. Crimped straw mulch - Use of mulch shall be limited to providing erosion control for six months or less, except when applied with a binding agent or netting to secure the mulch.

f. Geotextiles and mats.

g. Wood mulching.

h. Revegetation/landscaping - Revegetation shall include a weed-free seed mixture or live transplanted plants. Existing topsoil shall be stockpiled and reused in the revegetation areas.

i. Rock cover.

j. Others as proposed by the applicant and approved by the permit official.

6. Each stabilization measure shall be detailed on the plan. The GSP shall include the period of time for which the stabilization measure is intended to be effective and design details to document its ability to perform for that time period. The plan shall list all required maintenance activities and frequency of maintenance. The maintenance requirements must continue for the warranty period to ensure that graded sites are stabilized. Where specified as part of the stabilization measure, temporary irrigation shall be maintained for the time required to ensure vegetation survival.

a. Site monitoring shall be performed by the permittee responsible for the GSP. The city may also monitor the site compliance at any time and require access to the updated site GSP and records of all inspections made.

b. All stabilization measures identified in the GSP shall continue to be maintained. The permittee shall remain in charge of the site during the warranty period.

c. The city shall be notified in writing by the permittee/owner that a portion of the construction site is or will become idle. The permittee responsible for the GSP shall inspect the construction site to verify that the site is adequately protected. The city may conduct an inspection of the site.

d. Additional protection measures may be required by the permit official. Any construction site found idle for more than one hundred eighty consecutive calendar days without the installation of appropriate protection measures and notification that the construction project is idle shall be considered in violation of this chapter.

e. A monitoring and inspection program shall be implemented until a stabilized site is achieved or building resumes. Inactive/idle sites shall be inspected and maintained on one of the following schedules:

i. At least once every fourteen calendar days and within twenty-four hours following a wind event (as determined by the permit official) and/or rainstorm event of 0.5 inches or greater; or

ii. At least once every seven calendar days, on a specifically defined day each week, regardless of whether there has been a rainstorm event since the last inspection.

7. The GSP shall be updated in accordance with the actual construction sequence, and the stabilization measures are implemented according to actual construction progress.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.210 Penalty—Severability.

Any person violating this chapter shall be deemed guilty of a misdemeanor and shall be punished by a fine not to exceed two thousand dollars. in the case of a continuing violation, each day's violation shall be deemed a separate offense. the severability provisions of Section 1.04.060 of this Code apply to this chapter.
(Ord. No. 17516, § 1, 3-29-2011)

18.44.220 Permit closeout procedure.

After the permittee completes the grading under the permit, the permit shall be closed. As part of the closeout procedure, the applicant must submit the following to the city:

A. A statement from the engineer of record that states, "the grading operation has been substantially completed and generally conforms to the approved set of plans". The permittee shall call the permit official to establish the beginning of the warranty period and to notify the permit official that the GSP has been implemented.

B. A copy of the notice of termination filed with the state or dated construction site notice, if applicable, in accordance with Chapter 15.

The city will issue a letter stating general conformance to the permit has been met and that the warranty period requirements will continue to be in effect.
(Ord. No. 17516, § 1, 3-29-2011)

18.46.060 Application.

Article II. Design Requirements

18.46.070 Landscape plans required.
18.46.080 Required landscapable areas.
18.46.090 Required plants.

Article III. Standards

18.46.100 Landscape standards.
18.46.110 Irrigation standards.
18.46.120 Installation standards.
18.46.130 Maintenance standards.
18.46.140 Fees in lieu of installation.

Article IV. Street Tree

18.46.200 Required street trees.
18.46.210 Street tree standards.

Article V. Administration

18.46.300 Enforcement.
18.46.310 Appeals.
18.46.320 Violations—Penalty.
18.46.330 Severability.

***Editor's note—**Ord. No. 18026, § 1, adopted June 4, 2013, amended chapter 18.46 in its entirety to read as herein set out. Former chapter 18.46, §§ 18.46.010—18.46.140, 18.46.200, 18.46.210, 18.46.300—18.46.340, pertained to similar subject matter. See Code Comparative Table and Disposition List for complete derivation.

Article I. General Provisions

18.46.010 Title.

This chapter shall be known as the Landscape Ordinance for the City of El Paso, Texas.
(Ord. No. 18026, § 1, 6-4-2013)

18.46.020 Purpose.

A. The purpose of this chapter is to set forth the minimum requirements for irrigation and landscape for both residential and commercial property development within the corporate limits of the city. The regulations herein are designed to enhance the quality of life, increase property values and aesthetics of the city; while helping to improve air purification, reduce stormwater runoff, noise reduction and heat abatement while conserving energy, water and other natural resources.

B. In addition, landscape designers and property owners are encouraged to design and place landscaping materials in a good, economically viable, and environmentally sensitive manner as to improve the aesthetics of development, construction, and the quality of life for all citizens. This chapter encourages the use of quantifiable, generally recognized, scientific standards and methods as well as local and state regulations and manufacturer's recommendations in evaluating all designs. This chapter shall be used to stimulate creativity and innovation in such designs.

C. This chapter is also designed to prevent soil erosion, reduce the hazards of flooding, enhance the absorption of carbon dioxide and supply of oxygen; reduce the effects of noise, glare, dust and other objectionable activities generated by some land uses; promote the pleasant appearance and character of neighborhoods and high intensity commercial and industrial corridors; provide shade; to cool superheated urban areas, and thus reduce water consumption in cooling units, as well as other energy consumption related to environmental cooling; and facilitate the safe movement of traffic in vehicular use areas.

D. This chapter is also designed to promote water conservation and water efficiency by requir-

ing the planting of water-thrifty plants and other landscape materials. To assist in ensuring adequate supplies of water exist for El Paso's future, it is important that water conservation be promoted in landscape watering policies. Water conservation should be promoted through techniques such as the proper design of landscaped areas and plant selection, education of the public, and the proper use of irrigation of systems.
(Ord. No. 18026, § 1, 6-4-2013)

18.46.030 Rules of construction.

The following rules of construction shall apply:

A. The singular number includes the plural and the plural the singular, unless the context clearly indicates the contrary;

B. Words used in the present tense include the past and future tenses, and the future the present;

C. The word "shall" is always mandatory. The word "may" is permissive.

D. Words and terms not defined herein shall be interpreted in accord with Webster's Third New International Dictionary, Copyright 1986.
(Ord. No. 18026, § 1, 6-4-2013)

18.46.040 Interpretation.

A. The provisions of this chapter shall be interpreted and applied, as the minimum requirements for landscaping and irrigation in the city and shall control over all other landscape requirements in any other ordinance in the El Paso City Code, except Chapter 15.13 (Water Conservation) and Title 21 (Smart Code) of this Code.

B. It is not intended that this chapter shall interfere with, abrogate or annul any restrictive covenants or other agreements between individual parties. When there is a conflict between the requirements of this chapter and any restrictive covenant, agreements or other requirements imposed on the property, the more stringent requirement shall apply.

C. The provisions of this chapter shall be subordinate to the provisions of the El Paso City Code pertaining to traffic and pedestrian traffic.
(Ord. No. 18026, § 1, 6-4-2013)

18.46.050 Definitions.

The following terms as used in this chapter shall be defined as follows:

"Approved irrigator" means a Texas licensed irrigator.

"Approved plant list" means the list of plants and shrubs prepared by the tree board or its successor the board of parks and recreation, and the building official, and on file with the building official, and as may be amended from time to time.

"Automatic controller" means a mechanical, electrical or hybrid solid state timing device, capable of operating valve stations by set days of the week and the length of time of water application.

"Backflow prevention device" means a safety device used to prevent pollution or contamination of the potable water supply due to the reverse flow of water from the irrigation system.

"Berm, earthen" means an earthen mound designed to provide visual interest or screen undesirable views and decrease noise.

"Caliper" means the measurement of the thickness of a tree; the minimum diameter of a tree as measured six inches above the grade for trees under four inches in diameter and twelve inches above grade for trees four inches in diameter and larger. For multiple trunk trees, the diameter shall be based on the caliper of the largest trunk plus half the caliper of the next three largest trunks.

"Deciduous" means a plant that sheds its foliage annually.

"Development—Commercial" means all developments zoned or used for commercial uses as described under Title 20 (Zoning).

"Director" means the city manager or designee.

"Evergreen" means a plant with foliage that persists and remains green year round.

"Finish grade" means the ground elevation in its final and finished state before any landscape is installed.

"Frontage" means the property line where a parcel of land, lot, or site abuts a public right-of-way.

"Frontage landscape buffer area" means the ten foot wide area from the public right-of-way line into the property, along the frontage street.

"Grass". See "turf or turf grass."

"Gross building area" means the total enclosed area of a building exterior dimensions, excluding covered walkways or exterior fire escapes.

"Ground covering" means organic or inorganic material such as mulches and/or gravel used as ground covering.

"Ground cover organic" means low growing plant material, other than turf grasses, installed in such a manner as to provide continuous cover of the ground surface.

"Hardscape" means the use of solid non-organic materials such as rock or stone, concrete, asphalt, brick, or other similar type material.

"Impervious soil" means soil which is extremely dense (cementitious sedimentary soil) through which water will not readily penetrate adding to potential stormwater runoff and consists of a rainfall coefficient of .95 pursuant to the Drainage Design Manual.

"Impervious surfaces" means any surface such as roofing, solid surface plastic materials, solid surface oil-impregnated materials, concrete, asphalt, etc. through which water will not readily penetrate adding to potential stormwater runoff and consists of a rainfall coefficient of 1.0 pursuant to the Drainage Design Manual.

"Landscapable area" means that area of the lot that is required by this chapter to be landscaped, to include the frontage landscape buffer used to meet the landscape requirements specified in this chapter. It does not include the parkway or the parking lot trees.

"Landscaping" means the improvement of a section of ground by contouring the land and planting any combination of living plants, such as trees, shrubs, vines, groundcover or grass, natural features such as rock, stone, bark chips or shavings.

"Median" means the area within the public right-of-way, which separates two opposite directions of traffic.

"Mulch" means organic and/or inorganic material, which is placed, to prevent erosion, lower soil temperature and maintain soil moisture levels.

"Official" means the building official or his designee.

"Palm" means a long-lived plant of the family Palmae having a minimum eight feet unbranched clear trunk crowned by large pinnate or palmate leaves.

"Parking lot" for the purposes of this chapter, "parking lot" means any paved or unpaved area, not including a street or alley right-of-way, containing one or more parking spaces for motor vehicles, designed in accordance with the requirements of Chapter 20.14, and intended as an accommodation for patrons, customers, and employees, either with or without a charge for such accommodation.

"Parking spaces" means those spaces for the parking of any vehicle excluding eighteen-wheel tractors and their trailers.

"Parkway" means that area of street right-of-way between the property line and the curb or, in the absence of a curb, between the property line and the nearest edge of the street paving.

"Permeable surfacing" means materials with a permeable base.

"Plant, native or adapted" means a commercially grown or legally harvested plant material hardy to the natural conditions of the region, which once established is capable of sustaining growth without supplemental watering.

"Plant material" means the required trees and other plants that are required to be installed.

"Pond" means a depression in the soil intended to retain and/or detain both stormwater and all excess irrigation water.

"Project" means a specific development which is subject the requirements as stated herein.

"Shrub" means a woody plant, deciduous or evergreen, generally multi-stemmed with small branches near the ground, and smaller growing than a tree.

"Street oriented building" means the placement of a building on a lot such that its principal

orientation is toward the street and the principal entrance is from the sidewalk. Street oriented buildings prohibit parking in any space between the sidewalk and the building.

"Stormwater" means a buildup of naturally occurring precipitation (water), which falls on any parcel of land (site or watershed) of any given size.

"Structure" for the purposes of this chapter, "structure" means that which is built or constructed, an edifice or building of any kind, with four walls and a roof that encloses the interior space from the outside elements, or other artificially built or constructed work.

"Swale" means a landscape design using raised or depressed earthen channel of any depth or width designed to direct or move water to or from ponds, other swales, channels, arroyos or other drainage conveyance.

"Texas Licensed Irrigator" means a person who sells, designs, offers consultations regarding, installs, maintains, alters, repairs, services or supervises the installation of an irrigation system, including the connection of such system to a private or public, raw or potable water supply system or any water supply, and who is required to be licensed under Title 30, Texas Administrative Code, Chapter 30.

"Tree, buffer" means a deciduous or evergreen tree having a minimum of two inches caliper and ten feet in height which is planted with the frontage landscape buffer area of the property along the street frontage.

"Tree, parking lot" means a deciduous tree having a minimum of two inches caliper and ten feet in height, which is capable of obtaining a minimum canopy, spread of twenty feet at maturity. Branching structure shall be maintained at a minimum height of seven feet above the sidewalk area ground, three feet from the trunk; which is installed and located in a parking lot.

"Tree, project" means a deciduous or evergreen tree having a minimum of two inches caliper and ten feet in height, which is capable of obtaining a minimum canopy spread of twenty feet at maturity that is required based on calculations determined by the provisions of this chapter. Branching structure shall be maintained at a minimum height of seven feet above the sidewalk area ground, three feet from the trunk. Such trees shall be healthy and vigorous at time of planting.

"Tree grate" means a barrier with parallel or crossed bars blocking a passage but allows for tree trunk diameter growth.

"Tree, street" means a deciduous tree growing within the parkway of a street having a minimum of two inches caliper and ten feet in height, except that a street tree shall be three inches caliper and ten feet in height for development along any arterial.

"Tree well" means the basin where the root ball of the tree is planted.

"Turf or turf grass" means a surface layer of soil bound by grass and its roots into a thick mat that requires regular maintenance, mowing and watering.

"Unit of plant material" means one project deciduous or evergreen tree having a minimum caliper size of two inches and a minimum height of ten feet to twelve feet and a minimum of forty-five plants of five-gallon size, which area minimum of eighteen inches in height.

"Unmanned facility" means a structure which does not require a certificate of occupancy and is not occupied by any persons.

"Vehicular loading area" means a paved area designed to accommodate the maneuvering, loading and unloading and parking of commercial vehicles having a length of less than twenty-seven feet.

"Vehicular use area" means any area, excluding public rights-of-way, used for the purpose of driving, maneuvering, parking, storing or display of motor vehicles, boats, trailers, mobile homes and recreational vehicles, including new and used automobile lots, and other parking lot uses.

"Visibility triangle" means the area formed by the intersecting property lines and a diagonal line joining the property lines at the points twenty feet from their intersection on the corner lot at the intersecting corner.

"Water harvesting" means the process of intercepting irrigation or stormwater from a surface such as a roof, parking area or land surface and putting it to beneficial use thereby reducing runoff and making maximum use of irrigation and rain water.

"Weed barrier" means a porous overlay material used beneath mulch materials to reduce the germination and growth of unwanted plant material while allowing the percolation of water.
(Ord. No. 18026, § 1, 6-4-2013)

18.46.060 Application.

A. Except as provided herein, this chapter shall apply to the incorporated area of the City of El Paso, Texas, and to all projects listed below. All projects listed below shall provide landscaping in accordance with the requirements of this chapter, and an underground automatic irrigation system, shall be provided for all required landscapable areas in compliance with the requirements of this chapter, and shall comply with the requirements of 30 Texas Administrative Code, Chapter 344, §§ 344.72—344.77, and as may be amended.

1. The construction or erection of any new development, building, or structure, for which a building permit is required and zoned for a commercial use as defined under Title 20 (Zoning) of this Code.

a. For all sites, except zero lot line street frontage sites, the landscaping required by this chapter may be located anywhere on the parcel, except in the parkway or frontage landscape buffer area.

b. In addition to the required landscapable area, the parkway shall be landscaped per Section 18.46.060 and street trees must be provided as required by Section 18.46.200

c. On zero lot line street frontage lots the landscaping shall be located within and throughout the site.

d. In order to be considered as landscapable area there shall be at least ten feet distance between the walls of buildings. Trees planted in areas less than twenty feet between structures will not be given credit in satisfaction of the landscape requirements.

e. If there is no parkway or the parkway is less than four feet, the street trees shall be relocated within and throughout the parcel.

f. If the required frontage landscape buffer area is on a slope where a retaining wall is required and the planting of trees may disturb the structure of the wall, the buffer trees shall be relocated within and throughout the parcel.

2. The expansion of an existing building or parking lot, regardless of the amount of the increase in size.

a. Landscapable area shall be calculated based on the square footage of the new development or structure at a rate of fifteen percent per square foot. A minimum of one unit of plant material shall be required for every one thousand square feet, or portion thereof, of landscapable area.

b. If the site satisfied the code requirements prior to the enactment of this chapter and is deemed legal nonconforming, and if expanded in use as permitted by Title 20 (Zoning), then, only the additional square footage of expansion of landscapable area shall be required to satisfy the requirements of this chapter at a rate of fifteen percent per square foot.

c. For expansions of an existing building or parking lot where the original development was not required to comply with any landscaping requirements, the landscape requirement for the expansion shall be calculated based on the square footage of the expansion and the required landscaping for the expansion may be placed in the parkway.

3. Parking.

a. Any construction of off-street parking or a new parking lot is required to install one tree per ten parking spaces or portion thereof (within and throughout), whether they are required parking spaces or not. Tractor trailer parking lots require one tree for every ten parking spaces. (See Section 18.46.090). This is in addition to the required landscapable area.

b. Any expansion of an existing parking lot is required to install one tree per ten spaces. The number of trees required shall be based on the calculation of the total of all spaces both new and existing (within and throughout) the site, whether they are required parking spaces or not.

c. No parking space shall be more than one hundred feet from a tree.

d. Parking space maximums under Title 20.14 shall apply to this ordinance and additional trees shall be required, one tree for every five spaces over the maximum parking spaces allowed.

4. Unmanned facilities.

a. Any unmanned facility with a calculated landscapable area requiring one unit of plant material or less may install the plant material and irrigation system, or pay fees in lieu of installation as provided herein.

b. All other unmanned facilities with a calculated landscapable area requiring more than one unit of plant material, may install the plant material and irrigation system, or pay fees in lieu of installation as provided herein.

5. Parkways.

a. Parkway area ground treatment shall include permeable surfacing, not to include raw soil. With the exception of street trees, plant material shall be maintained in the parkway so that it does not exceed three feet. Landscaping of the parkway, including any frontage landscape buffers, shall not count towards the required landscapable area.

b. Parkways shall contain street trees as required by Section 18.46.200.

6. Frontage landscape buffers.

a. Frontage landscaping. The frontage along any street shall consist of a minimum ten foot landscape buffer, except as provided in paragraph c. below. The frontage landscape buffer may be crossed by driveways and pedestrian walkways connecting to adjacent land; however, no parking is permitted within a required frontage landscaping buffer. The frontage area buffer shall also include the entire area within the visibility triangle at the intersection of any roadways. Along freeways or any frontage roads, the frontage landscaping buffer shall be fifteen feet.

b. The frontage landscape buffer shall contain the required plant units based on Section 18.46.090 and the required frontage trees as required by Section 18.46.200. Ground treatment shall include decomposed granite, or other permeable surfacing, not to include raw soil.

c. A building may be located within the required ten foot frontage landscape buffer and any remaining portion within the ten-foot landscape buffer not occupied by [any] of the building shall be landscaped.

d. For shopping centers on properties with a lot depth of less than two hundred feet, the frontage buffer area may be reduced to seven feet on an arterial street. This provision does not apply to the following circumstances:

i. A shopping center where platted lots are further divided by metes and bounds.

ii. A shopping center that is located on more than one lot, whether the lots are platted or divided by metes and bounds.

iii. A shopping center that has detached buildings, whether those buildings are on the same building as the main shopping center building or whether the detached buildings are on separate lots that are platted or divided by metes and bounds.

7. Residential development shall comply with the street trees requirement under Article IV of this chapter.

B. Exemptions. The following projects are exempt from the requirements of this chapter:

1. Building restoration projects for historic structures as defined under Title 20 (Zoning).

2. Projects on land owned by the federal or State of Texas governments.

3. Any existing development, which changes its use from an approved use to any other, approved use within the same zoning category.

4. Expansion of an existing structure or parking lot if the existing landscaping within the devel-

opment would satisfy the requirements of this chapter if the entire development were treated as a new project.

5. Projects which are zoned or used for residential use as defined under Title 20 (Zoning) of this Code; if such residential use single-family, duplex, triplex, quadraplex or condominium, except that street trees are required and cannot be exempted for new development based on Section 18.46.200.

6. Existing buildings or parking lot areas that add a delivery or loading area, ramp or dock, or trailer storage area to an existing asphalt or concrete surface.

7. The addition of a building or buildings on a commercial lot when the additional building or buildings have a combined square footage of less than one thousand two hundred square feet of floor area.

8. Structures built from property line to property line (100% build out) shall only be required street trees as required in this chapter.

(Ord. No. 18026, § 1, 6-4-2013)

Article II. Design Requirements

18.46.070 Landscape plans required.

A. Projects that are subject to the requirements of this Chapter, shall require submission of separate plans for landscaping and irrigation. The landscape plan shall be designed by one of the following: (For irrigation plans, see Section 18.47.080.)

1. A landscape architect who holds a certificate of registration issued pursuant to Texas State Occupations Code Chapter 1052; or

2. An architect registered in the State of Texas; or

3. An engineer licensed in the State of Texas; or

4. A landscape contractor; or

5. A landscape designer; or

6. Any other person permitted under Texas State Occupations Code 1052.003 to design a landscape plan.

B. Landscape plan. The landscape plan shall include the following information:

1. Each plan shall be at a minimum scale of one inch equals forty feet, preferably one inch equals twenty feet. No architectural scaling shall be allowed. Plan size shall be on paper size twenty-four by thirty-six inches.

2. Date, scale, north arrow, project title and project address; and landscape designer with their address, phone number;

3. Name, address and telephone number of the property owner(s) representative;

4. Botanical name and common name, plant tag showing plant type, legend reference, size, height, quantity and location of proposed landscape materials to be used;

5. Landscape calculations, minimum required square footage of the landscapable area, total square footage of the landscapable area, parking provided, vehicular loading area, minimum required quantity of landscape materials, provided quantity of landscape materials;

6. Landscape master plan (long-term) with phasing plan;

7. Location of existing and proposed structures, signs, project trees, plant material, swales, berms, frontage trees, parking lot trees, street trees, and fire hydrants existing at the time of plan submission;

8. Show all curb cuts ingress and egress and distances to plant material; and

9. Show a five-foot clearance at maturity for all landscape material adjacent to any utility box, hydrant, meter or access point.

(Ord. No. 18026, § 1, 6-4-2013)

18.46.080 Required landscapable areas.

A. New commercial development. All new commercial development shall be required to comply with the landscapable area requirements, the parkway landscaping requirements, the frontage landscape buffer requirements and the parking lot tree requirements.

1. The required landscapable area shall be calculated as follows:

a. The square footage of the entire lot(s) on which the project is located, minus the square

footage of the building(s) footprint, multiplied by fifteen percent, shall equal the required landscapable area. For sites not qualifying for the street oriented building reduction in Section 18.46.090 A.3., the required landscaping shall not be less than ten percent of the developed parcel.

b. If required area is 0.5 of a unit of plant material or less, fees in lieu of installation may be paid as provided herein.

c. If required area is 0.51 to 0.99 it must comply by providing one unit of plant material.

d. Required area over 0.99 of a unit shall comply at a rate of one unit of plant material for each thousand square feet of required landscapable area or portion thereof;

e. The number of street trees required shall be one tree per every thirty linear feet of all street frontages, including any easements. The buffer trees are required to be located within the frontage landscape buffer area at every thirty linear feet within the frontage landscape buffer area. A minimum of one street and one buffer tree shall be installed if the property has less than fifty feet of frontage. If street trees are being placed within property along the street frontage based on the requirements of Section 18.46.200, then the required frontage trees may be distributed within and throughout the property.

f. The parkway square footage shall not be included when calculating the required fifteen percent landscapable area.

(Ord. No. 18026, § 1, 6-4-2013; Ord. No. 18676, § 1, 5-2-2017)

18.46.090 Required plants.

A. The following plant materials shall be installed within the required landscapable area as follows:

1. For every one thousand square feet, or portion thereof, of landscapable area, one unit of plant material shall be required. One unit of plant material consists of the following:

a. One project deciduous or evergreen trees having a minimum caliper size of two inches and a minimum height of ten feet to twelve feet;

b. A minimum of forty-five plants of five-gallon size, which are a minimum of eighteen inches in height.

c. For project trees, two one-inch caliper trees at a height of eight feet to twelve feet may be substituted for one two-inch caliper project tree.

d. Substitution of plant materials may be allowed for the preservation or relocation of existing healthy trees and shrubs based on equivalent size and type of plant material and shall be subject to review by the landscape plan reviewer on a case by case basis.

e. Other allowable substitutions are as follows;

i. Ten one-gallon shrubs may be substituted for one five-gallon shrub for up to fifty percent of the required five gallon shrubs.

ii. Five five-gallon shrubs may be substituted for one project tree for up to fifty percent of the required project trees.

iii. One project tree may be substituted for five five-gallon plants.

iv. Two one-inch caliper trees eight feet tall may be substituted for one two-inch caliper tree ten to twelve feet tall for up to fifty percent of the required project trees.

v. There are No substitutions for street, buffer, or canopy trees.

f. Palms may be installed on the property but will only count as three five-gallon plants and may only be substituted for up to fifty percent of the required five gallon plants.

2. Parking lots and vehicular use areas.

a. Shading shall be required for parking lots and vehicular use areas that are located within the project, with ten parking spaces or more shall be provided with at least one parking lot tree for every ten parking spaces.

b. Truck courts and truck-trailer parking lots shall be required to have parking lot trees placed around the perimeter of the parking lot.

c. Parking lot trees may be placed within the parking area or vehicular use area with due consideration for vehicle movement and maneuvering or directly adjacent to the vehicular use area.

d. Parking lot trees shall be located with respect to the location of parking lot light fixtures in such a manner as to not impede the distribution of light throughout the parking lot, unless the lighting is placed in the canopy of the trees.

e. Parking lot trees may be placed in planting areas of thirty-six square feet with no dimension less than four feet.

f. If an approved surface is installed for parking or storage of vehicles but is not striped, a tree shall be planted for every one thousand eight hundred square feet of approved surface. Automobile dealerships maintaining an area to rotate stock will be excluded from this calculation.

3. Street-oriented buildings.

a. In cases where a building is oriented toward the street, the required landscapable area shall be reduced by sixty percent if the building meets the following standards:

i. The building span is seventy percent of the width of the lot at the street; and

ii. The principal entrance is from the sidewalk facing the street; and

iii. No parking is located between the street and the building along any portion of the seventy percent span; and

iv. At least Thirty percent of the building facade is glass.

b. Any side off-street parking abutting the property line shall have the required frontage landscape buffer area and required buffer trees.

4. Designated landscape infill development area.

a. The designated landscape infill development area is shown as Appendix A attached to Ordinance Number 17656. [A copy of Ordinance 17656, Exh. A can be found in the city offices.]

b. For a property within the designated landscape infill development area, the required landscapable area may be reduced up to thirty percent.

c. The property shall comply with all other provisions of this chapter.

5. Plant coverage option. The following plant coverage option may be utilized in lieu of the requirements specified under Section 18.46.090 A.1.

a. Plant material shall be provided on all required landscapable area and will cover at least seventy-five percent of area.

b. Plant material used in the coverage calculation shall be shrubs or ground cover from the required the approved tree and plant list of the City of El Paso. The required coverage shall be fifty percent achieved within two years of the date of planting and seventy percent at maturity. In no instance shall the number of plants provided fall below forty percent of the total required under Section 18.46.090 A.1.

c. In addition to the required plant material, two project deciduous or evergreen trees having a caliper size of two inches and a minimum height of ten feet to twelve feet shall be required for every one thousand square feet, or portion thereof. For project trees, two one inch caliper trees at a height of eight feet to twelve feet may be substituted for a two inch caliper project tree. Project trees shall not be used in the calculation of the coverage area.

d. A required weather-based smart controller shall be required in order to utilize the plant coverage option.

6. Storage facilities.

a. Landscapable area shall be calculated for all storage unit development by the square footage of the entire lot(s) on which the project is located minus the square footage of the building(s) footprint, multiplied by ten percent. The required landscaping shall be placed around the outer perimeter of the parcel. The required landscaping shall not be placed in any area less than thirty-six square feet and with any dimension less than four feet. If the parcel that is being developed abuts a street, the street trees are still required to be placed every thirty feet and they may be counted towards the required tree count for the project. If onsite parking is required then canopy trees shall be required per the requirements of this chapter.

7. Groups—High hazard group (H), storage group (S), and utility (U) occupancy classifications, as defined in the International Building Code, in manufacturing and industrial zoning districts.

a. Landscapable area shall be calculated based on the square footage of the entire lot(s) on which the project is located, minus the square footage of the building(s) footprint multiplied by five percent.

b. The required landscaping shall be placed around the outer perimeter of the primary public building on the site. If the property being developed abuts residential uses a landscape buffer is required along those property lines.

c. The required landscaping shall not be placed in any area less than thirty-six square feet and with any dimension less than four feet.

d. All other provisions pertaining to the parking areas, frontage landscape buffer, and street trees shall comply with the applicable provisions of this Code.

(Ord. No. 18026, § 1, 6-4-2013; Ord. No. 18676, §§ 2, 3, 5-2-2017)

Article III. Standards

18.46.100 Landscape standards.

A. Water harvesting. The landscapable area shall be designed to ensure the most beneficial design for surface collection of water to include swales, parking lot islands, bar ditches, detention or retention ponds and constructed wetlands.

B. Plants. Seventy-five percent of all plants to be used in the landscape design shall be selected from the approved plant list on file and maintained in the department. No artificial plant materials shall be used to satisfy the requirements of this chapter. All plants and trees shall be healthy and vigorous at the time of planting. At least fifty percent of the plants installed shall be plant material of low water, drought-tolerant variety.

C. Turf. Turf shall not be installed on slopes exceeding twenty percent, unless approved by the building official or other designee of the city manager to match existing conditions or surrounding development. Turf grass is specifically prohibited in parkways. Turf shall have an amended soil base of a minimum of six inches.

D. Trees. Trees in pedestrian areas shall be planted and maintained, with the mature branching structure having a minimum of seven feet clearance from ground level within three feet from the trunk. All trees shall be healthy and vigorous. Trees shall be planted in beds with a minimum area of thirty-six square feet of surface area with no interior dimension less than four feet measured at ninety degrees to the interior edges.

E. Shrubs. Shrubs shall be a minimum size of a five-gallon container and a minimum plant height of eighteen inches (except for dwarf species and low growing species). Existing shrubs should be preserved and incorporated into the site landscaping.

F. Organic/inorganic ground covering/permeable paving.

1. Inorganic coverings such as gravel, river rock, shell, recycled glass (polished with rounded edges) and similar materials may be used as a landscape groundcover.

2. Organic ground covering such as organic mulch, wood chips or bark may be used as a landscape ground covering.

3. Nonporous materials shall not be installed under organic or inorganic ground covering.

4. Any weed barrier materials used must allow the percolation of standing water within seventy-two hours.

G. Plant material shall be installed to ensure that at maturity there is a five-foot clearance adjacent to any utility box, fire hydrant, FDC connection, utility meter or access point.

(Ord. No. 18026, § 1, 6-4-2013)

18.46.110 Irrigation standards.

For irrigation standards see 18.47.090.

(Ord. No. 18026, § 1, 6-4-2013)

18.46.120 Installation standards.

Landscape and irrigation systems shall be installed in accordance with the approved plan.

A. Minor modifications may be made to the landscape design (plant materials and irrigation system), by the landscape architect or designer, so long as the changes comply with the minimum standards applicable to this chapter.

B. Minor modifications shall be allowed within the landscape area as long as those changes do not affect the plant size, landscapable area, or required quantity and that the irrigation changes do not affect the hydraulic integrity of the system.

C. Installation shall be completed prior to the building final inspection.

D. Reserved.

E. An individual with a state irrigator, installer [only allowed through December 31, 2009], irrigation technician, master plumber, or journeyman plumber license shall be on the project site during all irrigation installation work to review and inspect all progress and aspects of the installation.

(Ord. No. 18026, § 1, 6-4-2013)

18.46.130 Maintenance standards.

A. Landscaping and irrigation shall be regularly and properly maintained to ensure healthy

and vigorous plant material. The property owner is responsible for regular weeding, mowing of grass, irrigating, fertilizing, pest prevention, pruning, and other maintenance of all plantings as needed. Trees may not be trimmed beyond national nursery standards for any reason.

B. Landscaping which dies shall be replaced by the owner with another living plant that is comparable to the existing plant or plant materials specified in the approved landscape plan as expeditiously as possible, but in any event no later than sixty days after notification from the director. The director may extend this time period up to an additional thirty days due to weather or due to events outside of the control of the property owner. (Ord. No. 18026, § 1, 6-4-2013)

18.46.140 Fees in lieu of installation.

A. When applicable. The following projects may pay fees in lieu of installation of the required landscaping material and irrigation system, and shall not be subject to the requirements of this chapter if such fees are paid in accordance with the following provisions.

1. Unmanned facilities.

2. Manned facilities, if the required landscapable area requires 0.5 of a unit of plant material or less.

B. Fee calculation. Where the city accepts payment of cash in lieu of the installation of landscape material and irrigation system, such payment shall be equivalent to the following:

1. Unmanned facilities.

a. Any unmanned facility with a calculated landscapable area requiring one unit of plant material or less, shall pay fees in the amount of five thousand dollars per site.

b. All other unmanned facilities with a calculated landscapable area requiring more than one unit of plant material, may pay fees based on five thousand dollars per unit of plant material required.

2. Manned facilities. Any manned facility with a calculated landscapable area requiring 0.5 of a unit of plant material or less, may pay fees based on five thousand dollars per unit of plant material required.

C. Form tendered. A cash payment made pursuant to this section shall be tendered in the form of a cashier's check, payable to the City of El Paso. The cashier's check shall be submitted to the director and shall accompany the building permit application.

D. Special fund.

1. Special fund established. The city shall establish a special fund for the deposit of all sums paid in lieu of installation pursuant to this chapter. The city shall account for all sums paid with reference to the individual property involved, and all sums received shall be committed by the city to be dedicated to the installation and planting of landscaping and plant material. In no case shall the funds be used for routine park, landscaping maintenance or other recreational facility maintenance. The fees shall be spent in locations as reasonably close as possible to the project which elected to pay such fees; however, the city shall not be restricted to spending the funds throughout the city so long as visible by the general public and in conformance with the purposes set forth in this chapter.

2. Accountability. The building official or other designee of the city manager shall maintain a written record of all moneys received in lieu of installation, including, at a minimum, the total amount of fees received, the property address generating the fees and the date the fees were received. The building official or other designee of the city manager shall maintain a record of all expenditures incurred from these funds and shall also perform a periodic reconciliation to the general ledger system of the city to ensure accountability of these funds.

3. Return of monies paid. Any monies not used as stated above within one year of payment to the city may be returned to the original individual or group that made payment upon application by said individual or group for a refund. Monies

shall be returned upon refund application after one year unless said monies have been encumbered for use prior to application.
(Ord. No. 18026, § 1, 6-4-2013)

Article IV. Street Tree

18.46.200 Required street trees.

A. Street trees are required on all city streets and arterials based on the requirements of this section. Maintenance and trimming of street trees and replacement of dead trees are the responsibility of the owner of the lot adjacent to or on which the trees are located. Street trees shall be maintained alive and healthy by the property owner of the lot adjacent parkway or on which the tree is located.

B. Street trees shall be selected from the approved tree and plant list of the City of El Paso maintained by the parks and recreation department. The street trees to be installed must be designated as a preferred (x) or allowed (o) medium or large deciduous tree from the approved tree or plant list.
(Ord. No. 18026, § 1, 6-4-2013)

18.46.210 Street tree standards.

A. Street trees shall be installed for commercial development per this chapter when any landscape is required per Chapter 18.46. For new residential development, street trees shall be installed by the property owner prior to the issuance of a certificate of occupancy. The required street trees and irrigation system shall be shown on all building permit applications on the site plan. If the developer elects to install the street trees, then the street trees and irrigation system shall be shown on the subdivision improvement plans and must be installed and completed as part of the subdivision improvements for the subdivision. An underground automatic irrigation system shall be required for new residential development and must comply with the standard specified in this chapter.

B. The spacing for all street trees shall be at thirty feet or less for all streets. Every lot over twenty feet wide shall have at least one street tree.

C. Adequate vertical clearance below the branches must be maintained for pedestrians, cars, and bicyclists. The minimum height to the lowest branch overhanging a sidewalk shall be seven feet; the lowest height overhanging a street shall be fourteen feet.

D. Street trees shall be a minimum of two inches caliper and ten feet in height, except that a street tree shall be a minimum of three inches caliper and ten feet in height for development along any arterial.

E. Street trees shall be placed in the parkway of the street, unless the department of transportation director and the planning official requires different locations of trees based on topography or a uniquely shaped lot.

F. The standard setback of trees located between the curb and the sidewalk shall be based on the following standards:

1. Where more than four feet of space of parkway exists between the back of curb and the sidewalk, street trees shall be planted with their centerline equal distance from the curb and sidewalk.

2. Where three to four feet of space of parkway exists between the back of curb and the sidewalk, street trees shall be planted two feet from tree centerline to back of curb.

3. Where less than three feet of space exists between the back of curb and the sidewalk, street tree placement will vary depending on the space available. A solution shall be selected from the following criteria:

a. The minimum distance between the back of curb and centerline of the tree shall be two feet;

b. The minimum distance between the centerline of the tree and the property-side edge of the sidewalk shall be four feet;

c. If items one and two cannot be met, then street trees shall be planted at least two feet beyond the property-side edge of the sidewalk.

4. Where the sidewalk is at the curb, a solution shall be selected from the following criteria:

a. If the sidewalk is less than six feet wide, the tree shall be planted at least two feet beyond the property-side edge of the sidewalk; or

b. If the sidewalk is six feet wide or wider, street trees shall be planted in cutouts in the sidewalk. The centerline of the tree shall be at least two feet from the back of curb, and at least four feet from the property-side edge of the sidewalk. If the remaining clear sidewalk space between the tree planter and the property-side edge of the sidewalk is less than four feet, a grate shall be used to cover the planting hole. The grate shall be of a size and design approved by the department of transportation. In all cases, the minimum effective clear sidewalk width shall be five feet.

G. On sites where evenly-spaced street trees are not possible due to topography or a uniquely shaped lot, random clustering of street trees may be acceptable, provided that the number of trees planted equals or exceeds the number that would be required if the trees were evenly-spaced. Such arrangement must be approved by the department of transportation director and the planning official.

H. A tree well shall be as deep as the root ball and at least twice as wide as the root ball. The bottom of the tree well should be convex and a minimum of four inches of mulch should be placed on the top of the well.

(Ord. No. 18026, § 1, 6-4-2013)

Article V. Administration

18.46.300 Enforcement.

A. Revocation of permit. Permits may be revoked in accordance with the provisions in Chapter 18.02 of this Code.

B. Citations. Employees authorized by the city manager or his designee, to include but not be limited to the city development director and building official and their designees, and the code enforcement division, are authorized to enforce the provisions of this chapter and shall have the power to issue misdemeanor citations to any persons violating the provisions of this chapter.

(Ord. No. 18026, § 1, 6-4-2013)

18.46.310 Appeals.

A. When the director does not approve a landscape or irrigation plan, or the installation of these improvements, the owner or duly authorized representative may appeal in writing that decision to the appeals officer in accordance with the requirements and procedures of Chapter 2.30 of the City Code. Where topography or the unique characteristics of a particular lot are such that the landscape requirements cannot be met, the director of the city development department or designee may waive up fifteen percent of the parking requirement below the minimum so that the minimum landscape requirement can be met or alternatively the missing landscape percentage can be waived up to fifteen percent of the total square footage required. In cases where the property owner disagrees with the determination of the director of the city development department or other designee of the city manager, the decision may be appealed to the appeals officer in accordance with the requirements and procedures of Chapter 2.30 of the City Code.

(Ord. No. 18026, § 1, 6-4-2013; Ord. No. 019762, § 7, 7-22-2025)

18.46.320 Violations—Penalty.

A. Civil and criminal penalties. The city shall have the power to administer and enforce the provisions of this chapter as may be required by governing law. Any person, firm, corporation or agent who shall violate a provision of this chapter, or fails to comply therewith, or with any of the requirements thereof, or who shall has erected, constructed, altered, installed, demolished or moved any landscaping or irrigation system, or has erected, constructed, altered, repaired, moved or demolished any landscaping or irrigation system, in violation of a detailed statement or drawing submitted and permitted under this chapter, is subject to suit for injunctive relief as well as prosecution for criminal violations. Any violation of a provision in this chapter is declared to be a nuisance.

B. Criminal prosecution. Any person violating any provision of chapter shall, upon conviction, be fined a sum not exceeding two thousand dollars. Each day that a provision of this chapter is violated shall constitute a separate offense.

C. Civil remedies. Nothing in this chapter shall be construed as a waiver of the city's right to bring a civil action to enforce the provisions of this chapter and to seek remedies as allowed by law, including, but not limited to the following:

1. Injunctive relief to prevent specific conduct that violates the ordinance or to require specific conduct that is necessary for compliance with the ordinance; and

2. A civil penalty up to five hundred dollars a day when it is shown that the defendant was actually notified of the provisions of the ordinance and after receiving notice committed acts in violation of the ordinance or failed to take action necessary for compliance with the ordinance; and

3. Other available relief.

(Ord. No. 18026, § 1, 6-4-2013)

18.46.330 Severability.

If any section, subsection, sentence, clause or phrase of this chapter is for any reason held to be unconstitutional, such decision shall not affect the validity of the remaining portions of this chapter.

(Ord. No. 18026, § 1, 6-4-2013)

Chapter 18.47

IRRIGATION SYSTEMS

Sections:

18.47.010 Title.

18.47.020 Definitions.

18.47.030 Valid License Required.

18.47.040 Permit Required.

18.47.050 Backflow Prevention Methods and Devices.

18.40.060 Specific Conditions and Cross-Connection Control.

18.47.070 Water Conservation.

18.47.080 Irrigation plans required.

18.47.090 Irrigation standards.

18.47.100 Completion of Irrigation System Installation.

18.47.110 Maintenance, Alteration, Repair, or Service of Irrigation Systems.

18.47.120 Reclaimed Water.

18.47.130 Advertisement Requirements.

18.47.140 Contracts.

18.47.150 Warranties for Systems.

18.47.160 Duties and Responsibilities of City Irrigation Inspectors.

18.47.170 Items Not Covered By This Ordinance.

18.47.180 Enforcement.

18.47.010 Title.

This Chapter shall be known as the Irrigation Ordinance for the City of El Paso, Texas. (Ord. 17041, 12-23-2008)

18.47.020 Definitions.

The following words and terms, when used in this ordinance, have the following meanings, unless the context clearly indicates otherwise.

(1) Backflow prevention—The mechanical prevention of reverse flow, or back siphonage, of nonpotable water from an irrigation system into the potable water source.

(2) Backflow prevention assembly—Any assembly used to prevent backflow into a potable water system. The type of assembly used is based on the existing or potential degree of health hazard and backflow condition.

(3) Completion of irrigation system installation—When the landscape irrigation system has been installed, all minimum standards met, all tests performed, and the irrigator is satisfied that the system is operating correctly.

(4) Consulting—The act of providing advice, guidance, review or recommendations related to landscape irrigation systems.

(5) Cross-connection—An actual or potential connection between a potable water source and an irrigation system that may contain contaminates or pollutants or any source of water that has been treated to a lesser degree in the treatment process.

(6) Design—The act of determining the various elements of a landscape irrigation system that will include, but not be limited to, elements such as collecting site specific information, defining the scope of the project, defining plant watering needs, selecting and laying out emission devices, locating system components, conducting hydraulics calculations, identifying any local regulatory requirements, or scheduling irrigation work at a site. Completion of the various components will result in an irrigation plan.

(7) Design pressure—The pressure that is required for an emission device to operate properly. Design pressure is calculated by adding the operating pressure necessary at an emission device to the total of all pressure losses accumulated from an emission device to the water source.

(8) Emission device—Any device that is contained within an irrigation system and that is used to apply water. Common emission devices in an irrigation system include, but are not limited to, spray and rotary sprinkler heads, and drip irrigation emitters.

(9) Employed—Engaged or hired to provide consulting services or perform any activity relating to the sale, design, installation, maintenance,

alteration, repair, or service to irrigation systems. A person is employed if that person is in an employer-employee relationship as defined by Internal Revenue Code, 26 United States Code Service, §3212(d) based on the behavioral control, financial control, and the type of relationship involved in performing employment related tasks.

(10) Head-to-head spacing—The spacing of spray or rotary heads equal to the manufacturer's published radius of the head.

(11) Health hazard—A cross-connection or potential cross-connection with an irrigation system that involves any substance that may, if introduced into the potable water supply, cause death or illness, spread disease, or have a high probability of causing such effects.

(12) Hydraulics—The science of dynamic and static water; the mathematical computation of determining pressure losses and pressure requirements of an irrigation system.

(13) Inspector—A licensed plumbing inspector, water district operator, other governmental entity, or irrigation inspector who inspects irrigation systems and performs other enforcement duties for a municipality or water district as an employee or as a contractor.

(14) Installer—A person who actually connects an irrigation system to a private or public raw or potable water supply system or any water supply, who is licensed according to Title 30, Texas Administrative Code, Chapter 30 (relating to Occupational Licenses and Registrations).

(15) Irrigation inspector—A person who inspects irrigation systems and performs other enforcement duties for a municipality or water district as an employee or as a contractor and is required to be licensed under Title 30, Texas Administrative Code, Chapter 30 (relating to Occupational Licenses and Registrations).

(16) Irrigation plan—A scaled drawing of a landscape irrigation system which lists required information, the scope of the project, and represents the changes made in the installation of the irrigation system.

(17) Irrigation services—Selling, designing, installing, maintaining, altering, repairing, servicing, permitting, providing consulting services regarding, or connecting an irrigation system to a water supply.

(18) Irrigation system—An assembly of component parts that is permanently installed for the controlled distribution and conservation of water to irrigate any type of landscape vegetation in any location, and/or to reduce dust or control erosion. This term does not include a system that is used on or by an agricultural operation as defined by Texas Agricultural Code, §251.002.

(19) Irrigation technician—A person who works under the supervision of a licensed irrigator to install, maintain, alter, repair, service or supervise installation of an irrigation system, including the connection of such system in or to a private or public, raw or potable water supply system or any water supply, and who is required to be licensed under Title 30, Texas Administrative Code, Chapter 30 (relating to Occupational Licenses and Registrations).

(20) Irrigation zone—A subdivision of an irrigation system with a precipitation rate based on plant material type (such as turf, shrubs, or trees), microclimate factors (such as sun/shade ratio), topographic features (such as slope) and soil conditions (such as sand, loan, clay, or combination) or for hydrological control.

(21) Irrigator—A person who sells, designs, offers consultations regarding, installs, maintains, alters, repairs, services or supervises the installation of an irrigation system, including the connection of such system to a private or public, raw or potable water supply system or any water supply, and who is required to be licensed under Title 30, Texas Administrative Code, Chapter 30.

(22) Irrigator-in-Change—The irrigator responsible for all irrigation work performed by an exempt business owner, including, but not limited to obtaining permits, developing design plans, supervising the work of other irrigators or irrigation technicians, and installing, selling, maintaining, altering, repairing, or servicing a landscape irrigation system.

(23) Landscape irrigation—The science of applying the necessary amount of water to promote or sustain healthy growth of plant material or turf.

(24) License—An occupational license that is issued by the Texas Commission on Environmental Quality under Title 30, Texas Administrative Code, Chapter 30 to an individual that authorizes the individual to engage in an activity that is covered by Title 30, Texas Administrative Code, Chapter 30.

(25) Mainline—A pipe within an irrigation system that delivers water from the water source to the individual zone valves.

(26) Maintenance checklist—A document made available to the irrigation system's owner or owner's representative that contains information regarding the operation and maintenance of the irrigation system, including, but not limited to: checking and repairing the irrigation system, setting the automatic controller, checking the rain or moisture sensor, cleaning filters, pruning grass and plants away from irrigation emitters, using and operating the irrigation system, the precipitation rates of each irrigation zone within the system, any water conservation measures currently in effect from the water purveyor, the name of the water purveyor, a suggested seasonal or monthly watering schedule based on current evaportranspiration data for the geographic region, and the minimum water requirements for the plant material in each zone based on the soil type and plant material where the system is installed.

(27) Major maintenance, alteration, repair, or service—Any activity that involves opening to the atmosphere the irrigation main line at any point prior to the discharge side of any irrigation zone control valve. This includes, but is not limited to, repairing or connecting into a main supply pipe, replacing a zone control valve, or repairing a zone control valve in a manner that opens the system to the atmosphere.

(28) Master valve—A remote control valve located after the backflow prevention device that controls the flow of water to the irrigation system mainline.

(29) Matched precipitation rate—The condition in which all sprinkler heads within an irrigation zone apply water at the same rate.

(30) New installation—An irrigation system installed at a location where one did not previously exist.

(31) Pass-through contract—A written contract between a contractor or builder and a licensed irrigator or exempt business owner to perform part or all of the irrigation services relating to an irrigation system.

(32) Potable water—Water that is suitable for human consumption.

(33) Pressure Vacuum Breaker—An assembly containing an independently operating internally loaded check valve and an independently operating loaded air inlet valve located on the discharge side of the check valve. Also known as a Pressure Vacuum Breaker Back-siphonage Prevention Assembly.

(34) Reclaimed water—Domestic or municipal wastewater which has been treated to a quality suitable for beneficial use, such as landscape irrigation.

(35) Records of landscape irrigation activities—The irrigation plans, contracts, warranty information, invoices, copies of permits, and other documents that relate to the installation, maintenance, alteration, repair, or service of a landscape irrigation system.

(36) Reduced Pressure Principle Backflow Prevention Assembly—An assembly containing two independently acting approved check valves together with a hydraulically operating mechanically independent pressure differential relief valve located between the two check valves and below the first check valve.

(37) Static water pressure—The pressure of water when it is not moving.

(38) Supervision—The on-the-job oversight and direction by a licensed irrigator who is fulfilling his or her professional responsibility to the client and/or employer in compliance with local or state requirements. Also a licensed installer working under the direction of a licensed irrigator or

beginning January 1, 2009, an irrigation technician who is working under the direction of a licensed irrigator to install, maintain, alter, repair or service an irrigation system.

(39) Water conservation—The design, installation, service, and operation of an irrigation system in a manner that prevents the waste of water, promotes the most efficient use of water, and applies the least amount of water that is required to maintain healthy individual plant material or turf, reduce dust, and control erosion.

(40) Zone flow—A measurement, in gallons per minute or gallons per hour, of the actual flow of water through a zone valve, calculated by individually opening each zone valve and obtaining a valid reading after the pressure has stabilized. For design purposes, the zone flow is the total flow of all nozzles in the zone at a specific pressure.

(41) Zone valve—An automatic valve that controls a single zone of a landscape irrigation system.

(Ord. 17041, § 1, 12-23-2008)

18.47.030 Valid License Required.

Any person who connects an irrigation system to the water supply within the city or the city's extraterritorial jurisdiction, commonly referred to as the ETJ, must hold a valid license, as defined by Title 30, Texas Administrative Code, Chapter 30 and required by Chapter 1903 of the Texas Occupations Code, or as defined by Chapter 365, Title 22 of the Texas Administrative Code and required by Chapter 1301 of the Texas Occupations Code.

Exemptions

A property owner is not required to be licensed in accordance with Texas Occupations Code, Title 12, §1903.002(c)(1) if he or she is performing irrigation work in a building or on a premises owned or occupied by the person as the person's home. A home or property owner who installs an irrigation system must meet the standards contained in Title 30, Texas Administrative Code, Chapter 344 regarding spacing, water pressure, spraying water over impervious materials, rain or moisture shut-off devices or other technology, backflow prevention and isolation valves.

(Ord. 17041, § 1, 12-23-2008)

18.47.040 Permit Required.

Any person installing an irrigation system within the territorial limits or extraterritorial jurisdiction of the city is required to obtain a permit from the city. Any plan approved for a permit must be in compliance with the requirements of this chapter.

Exemptions

(1) An irrigation system that is within an onsite sewage disposal system, as defined by Section 366.002, Health and Safety Code; or

(2) An irrigation system used on or by an agricultural operation as defined by Section 251.002, Agriculture Code.

(Ord. 17041, § 1, 12-23-2008)

18.47.050 Backflow Prevention Methods and Devices.

(a) Any irrigation system that is connected to the potable water supply must be connected through a backflow prevention method approved by the Texas Commission on Environmental Quality (TCEQ). The backflow prevention device must be approved by the American Society of Sanitary Engineers; or the Foundation for Cross-Connection Control and Hydraulic Research, University of Southern California; or the International Plumbing Code; or any other laboratory that has equivalent capabilities for both the laboratory and field evaluation of backflow prevention assemblies. The backflow prevention device must be installed in accordance with the laboratory approval standards or if the approval does not include specific installation information, the manufacturer's current published recommendations.

(b) If conditions that present a health hazard exist, one of the following methods must be used to prevent backflow;

(1) Reduced pressure principle backflow prevention assemblies may be used if:

(A) the device is installed at a minimum of 12 inches above ground in a location that will ensure that the assembly will not be submerged; and

(B) drainage is provided for any water that may be discharged through the assembly relief valve.

(2) Pressure vacuum breakers may be used if:

(A) no back-pressure condition will occur; and

(B) the device is installed at a minimum of 12 inches above any downstream piping and the highest downstream opening. Pop-up sprinklers are measured from the retracted position from the top of the sprinkler.

(c) Backflow prevention devices used in applications designated as health hazards must be tested upon installation and annually thereafter.

(d) If an existing irrigation system without a backflow-prevention assembly requires major maintenance, alteration, repair, or service, the system must be connected to the potable water supply through an approved, properly installed backflow prevention method before any major maintenance, alteration, repair, or service is performed.

(e) If an irrigation system is connected to a potable water supply through a pressure vacuum breaker or reduced pressure principle backflow assembly and includes an automatic master valve on the system, the automatic master valve must be installed on the discharge side of the backflow prevention assembly.

(f) The irrigation shall ensure the backflow prevention device is tested by a licensed Backflow Prevention Assembly Tester prior to being placed in service and the test results provided to the local water purveyor and the irrigation system's owner or owner's representative within ten business days of testing of the backflow prevention device.
(Ord. 17041, § 1, 12-23-2008)

18.47.060 Specific Conditions and Cross-Connection Control.

(a) Before any chemical is added to an irrigation system connected to the potable water supply, the irrigation system must be connected through a reduced pressure principle backflow prevention assembly or air gap.

(b) Connection of any additional water source to an irrigation system that is connected to the potable water supply can only be done if the irrigation system is connected to the potable water supply through a reduced-pressure principle backflow prevention assembly or an air gap.

(c) Irrigation system components with chemical additives induced by aspiration, injection, or emission system connected to any potable water supply must be connected through a reduced pressure principle backflow device.

(d) If an irrigation system is designed or installed on a property that is served by an on-site sewage facility, as defined in Title 30, Texas Administrative Code, Chapter 285, then:

(1) all irrigation piping and valves must meet the separation distances from the On-Site Sewage Facilities system as required for a private water line in Title 30, Texas Administrative Code, Section 285.91(10);

(2) any connections using a private or public potable water source that is not the city's potable water system must be connected to the water source through a reduced pressure principle backflow prevention assembly as defined in Title 30, Texas Administrative Code, Section 344.50; and

(3) any water from the irrigation system that is applied to the surface of the area utilized by the On-Site Sewage Facility system must be controlled on a separate irrigation zone or zones so as to allow complete control of any irrigation to that area so that there will not be excess water that would prevent the On-Site Sewage Facilities system from operating effectively.
(Ord. 17041, § 1, 12-23-2008)

18.47.070 Water Conservation.

All irrigation systems shall be designed, installed, maintained, altered, repaired, serviced, and operated in a manner that will promote water conservation as defined in the Definitions section of this ordinance.
(Ord. 17041, § 1, 12-23-2008)

18.47.080 Irrigation plans required.

A. Projects that are subject to the requirements of this chapter, shall require submission of

separate plans for landscaping and irrigation. The irrigation plan shall be designed and sealed by one of the following: (for landscape plans, see Section 18.46.070)

1. An irrigator who holds a license issued by the Texas Commission on Environmental Quality under Chapter 37, Texas Water Code; or

2. An architect registered in the State of Texas, to the extent the architect's acts are incidental to the pursuit of the architect's profession; or

3. An engineer licensed in the State of Texas, to the extent the engineer's acts are incidental to the pursuit of the engineer's profession; or

4. A landscape architect who holds a certificate of registration issued pursuant to State Occupations Code Chapter 1052, to the extent the landscape architect's acts are incidental to the pursuit of the landscape architect's profession.

B. The design professional shall prepare an irrigation plan for each site where a new irrigation system will be installed. A paper copy of the irrigation plan must be on the job site at all times during the installation of the irrigation system. A drawing showing the actual installation of the system is due to each irrigation system owner after all new irrigation system installations. During the installation of the irrigation system, variances from the original plan may be authorized by the design professional if the variance from the plan does not:

1. Diminish the operational integrity of the irrigation system;

2. Violate any requirements of this ordinance; and

3. Go unnoted in red on the irrigation plan.

C. All irrigation plans used for construction must be drawn to scale and must include complete coverage of the area to be irrigated. The plan must include, at a minimum, the following information:

1. The irrigator's seal, signature, and date of signing;

2. All major physical features and the boundaries of the areas to be watered;

3. A North arrow;

4. A legend;

5. The zone flow measurement for each zone;

6. Location and type of each controller;

7. Location, type and size of each:

a. Water source, such as, but not limited to a water meter and point(s) of connection;

b. Backflow prevention device;

c. Water emission device, including, but not limited to, spray heads, rotary sprinkler heads, quick-couplers, bubblers, drip, or micro-sprays;

d. Valve, including but not limited to, zone valves, master valves, and isolation valves;

e. Pressure regulation component; and

f. Main line and lateral piping.

8. The scale used; and

9. The design pressure.

(Ord. No. 17900, § 3, 10-30-2012)

Editor's note—Ord. No. 17900, § 3, adopted October 30, 2012, amended § 18.47.080 in its entirety to read as herein set out. Former § 18.47.080, pertained to irrigation plan design: minimum standards, and derived from Ord. No. 17041, § 1, 12-23-2008.

18.47.090 Irrigation standards.

A. Irrigation systems shall be installed in accordance with the standards and requirements of the irrigation equipment manufacturer, the Texas Commission on Environmental Quality, and the International Plumbing Code, and as may be amended, and all applicable regulations and laws.

B. The source of irrigation water, whether potable or reclaimed, as provided by the City of El Paso water utilities, shall be indicated on the irrigation plans.

C. When using a potable irrigation water source, an approved backflow prevention device shall be installed in accordance with the City of El Paso Plumbing Code.

D. No irrigation design or installation shall require the use of any component, including the water meter, in a way which exceeds the manufacturer's published performance limitations for the component.

E. Spacing.

(1) The maximum spacing between emission devices must not exceed the manufacturer's published radius or spacing of the device(s). The radius or spacing is determined by referring to the

manufacturer's published specifications for a specific emission device at a specific operating pressure.

(2) New irrigation systems shall not utilize above-ground spray emission devices in residential or commercial landscapes that are less than forty-eight inches not including the impervious surfaces in either length or width and which contain impervious pedestrian or vehicular traffic surfaces along two or more perimeters. If pop-up sprays or rotary sprinkler heads are used in a new irrigation system, the sprinkler heads must direct flow away from any adjacent surface and shall not be installed closer than four inches from a hardscape, such as, but not limited to, a building foundation, fence, concrete, asphalt, pavers, or stones set with mortar.

(3) Narrow paved walkways, jogging paths, golf cart paths or other small areas located in cemeteries, parks, golf courses or other public areas may be exempted from this requirement if the runoff drains into a landscaped area.

F. All irrigation systems shall include:

1. An automatic controller with multiple programs, multiple repeat cycle capabilities and a flexible calendar program. Power may be provided by either electricity or solar for all commercial applications, Residential may be powered by battery. Manuel systems shall no longer be approved after January 1, 2012.

2. Spray head type irrigation systems may be used in planting beds when:

i. Plant material spaced less than eighteen inches center to center.

ii. Spray head system are evenly spaced to achieve head to head coverage.

G. Spray heads shall not be used in the following locations:

1. Parkways;

2. Medians;

3. In areas less than ten feet in any dimension; and

4. On slopes exceeding twenty percent.

H. Drip and spray systems shall:

1. Be placed on separate valves;

2. All components on drip systems shall be measured in gallons per hour.

I. Wiring and sleeving:

1. All wire shall be direct burial. Multi-strand shall not be allowed for direct burial;

2. Irrigation piping and wiring installed under any hardscaped areas shall be within sleeving.

J. Storm retention pond areas that are irrigated shall incorporate, in the design, separate valves for the basin and slope areas. A moisture sensor shall be installed in the basin.

K. Flood irrigation water from a water improvement district is not an approved method of irrigation, and shall not satisfy the requirements of this chapter.

L. Water pressure. Emission devices must be installed to operate at the minimum and not above the maximum sprinkler head pressure as published by the manufacturer for the nozzle and head spacing that is used. Methods to achieve the water pressure requirements include, but are not limited to, flow control valves, a pressure regulator, or pressure compensating spray heads.
