(7) Not manually activate an alarm for any reason other than an occurrence of an event that the alarm system was intended to report.

(8) Maintain at the alarm site a complete set of written instructions for the alarm system. Special codes, combinations, or passwords must not be included in these instructions.

(Ord. No. 02-527, § 4, 6-19-02)

Sec. 11-19. Fees for city responses to false fire alarm; hearing on false alarm determination.

(a) A permit holder will be charged a fee of $360.00 for each false fire alarm response by the fire department in excess of the following, during each permit period:

(1) Five false fire alarms for a Group A alarm system,

(2) Fifteen false fire alarms for a Group B alarm system, or

(3) Thirty false fire alarms for a Group C alarm system.

(b) If the false alarm(s) occurred during the three month period commencing on the date of the first operation of a newly installed alarm system, the permit holder shall not be charged the fee under subsection (a) of this section, and the false alarms shall not count against the number of false alarms allowable under that subsection.

(c) If the fire department receives notice of any fire alarm from an alarm system that does not have a valid permit, then each person in control of any portion of the alarm site shall be jointly and severally liable to the city for a fee of $300.00 for each false fire alarm response by the fire department. Notwithstanding the general definition of "false fire alarm" as set forth in section 11-11 of this Code, for the limited purposes of this subsection, "false fire alarm" means an incident in which the operation of an alarm system elicits an emergency response by the fire department when a situation requiring such a response by the fire department did not in fact exist; however, the term does not include an otherwise false fire alarm if the fire chief determines that the false alarm was caused primarily by a manual alarm

notification to the fire department and the person actuating the alarm was acting under a reasonable belief that smoke or fire existed.

(d) A notice of each false alarm (the "false alarm notice") shall be mailed to the permit holder, or the person in control if there is no valid alarm permit, within 30 days from the date of the false fire alarm response. Fees assessed under this subsection, if applicable, shall be paid within 30 days following the date that the city places the false alarm confirmation notice in the mail, unless a hearing has been timely requested under subsection (e), below.

(e) If the permit holder, or the person in control if there is no valid alarm permit, disputes any part of the false alarm notice, he must mail or deliver a written statement to the fire chief requesting a hearing. The request for hearing must be received by the fire chief not later than the 30th day following the date that the city places the false alarm confirmation notice in the mail. The sole purpose of the hearing is to ascertain whether or not the disputed alarm was false. The request for hearing shall specify facts and have documents and records attached that prove the alarm was not false. Hearings shall be conducted in accordance with the rules established for that purpose by the fire chief. The proceedings shall be informal. Without limitation of other provisions that the fire chief may establish in his rules, the records generated by the fire department personnel who responded to the alarm shall be admissible as proof of their contents and it shall not be required that the fire department personnel who responded be made available to testify at the hearing. The fire chief shall have the discretion at any time prior to the hearing to reverse a false alarm determination if the records clearly establish the response was not in fact a false fire alarm. At the hearing, the burden shall be upon the person requesting the hearing to demonstrate by a preponderance of the evidence that the fire alarm was not a false fire alarm. The decision of the hearing officer shall be final and fees assessed, if applicable, shall be paid within 15 days following the date that notice of the decision is mailed to the appellant.

(f) *Collection fee.* A collection fee shall be added to each false fire alarm response fee assessed under this section if the false fire alarm response fee remains unpaid on the 61st day after it is due. Collection fees are due and payable on the day they are added to the false fire alarm response fee. The collection fee shall be 30 percent of the false fire alarm response fee amount unless state law requires a lesser amount, in which case such lesser amount shall apply.
(Ord. No. 02-527, § 4, 6-19-02; Ord. No. 07-1298, § 2, 11-28-07; Ord. No. 2010-1016, § 2, 12-15-2010)

Sec. 11-20. Systems performance reviews.

If the fire chief believes that an alarm system is not being used or maintained in a manner that reasonably insures proper operation and prevention of false fire alarms, the fire chief may require a conference with the permit holder and the individual or other entity responsible for maintenance of the alarm system to review circumstances of each alarm.
(Ord. No. 02-527, § 4, 6-19-02)

Sec. 11-21. Violations; penalty; corporations; partnerships and associations.

(a) Whenever in this division an act is prohibited or is made or declared to be unlawful or an offense or misdemeanor, or whenever in this division the doing of any thing or act is required or the failure to do any thing or act is prohibited, the violation of the provision shall be and constitute a misdemeanor punishable, upon conviction, by a fine of not less than $250.00 nor more than $2,000.00. Each violation shall constitute and be punishable as a separate offense. Prosecution or conviction under this provision is cumulative of and shall never be a bar to the imposition or collection of false fire alarm fees or any other civil or administrative remedy provided or allowed in this division.

(b) In addition to prohibiting or requiring certain conduct of individuals, it is the intent of this division to also hold a corporation, partnership, association, limited partnership, limited

liability corporation or other such entity criminally responsible for acts or omissions performed by an agent acting in its behalf.
(Ord. No. 02-527, § 4, 6-19-02)

Sec. 11-22. Revocation of permit.

The permit for a fire alarm system will be revoked or refused for renewal for any of the following reasons:

(1) The permit holder has failed to make payment in full to the city of any fees due under this division within 30 days of the date the city has mailed a notice to the permit holder that the fees are due and owing or within 15 days following the date of mailing of the decision notice where an appeal has been timely filed; or

(2) The permit holder accrues more than twice the number of false fire alarms for the applicable group referred to in section 11-19(a) of this Code during the permit period; or

(3) Any fact or circumstance exists that would be a basis for denial of an application for issuance or renewal of a permit, or the permit was otherwise obtained or issued in error.

(Ord. No. 02-527, § 4, 6-19-02)

Sec. 11-23. Appeals.

(a) A person may appeal the denial or revocation of a permit by delivering a written request for an appeal to the fire chief not more than 15 days after the first date of mailing written notice of denial or revocation. The notice of denial or revocation shall be sent to the permit holder or applicant by certified mail, return receipt requested, addressed to the permit holder or applicant at the alarm site address, or to such other address specified by them in writing to the fire department.

(b) All hearings shall be held by a hearing officer appointed by the fire chief. The fire chief shall not designate any person to perform the duties of hearing officer under this section who has participated in the investigation of false fire alarms from the alarm site in question, or has prior knowledge of the allegations or circumstances discovered in such investigation. The hearing officer, may, prior to the hearing, receive a copy of the notice given to the permit holder.

(c) An assistant city attorney may be present at the hearing to advise the hearing officer as to procedural matters; however, the attorney shall not participate in any determination of the facts.

(d) All hearings shall be conducted under rules consistent with the informal nature of the proceedings; provided, however, the following rules shall apply to all hearings:

(1) All parties shall have the right to representation by an attorney licensed to practice in Texas though an attorney is not required.

(2) Each party may present witnesses in his own behalf.

(3) Each party has the right to cross examine all witnesses.

(4) Only evidence presented before the hearing officer at the hearing shall be considered in rendering the decision.

(e) The hearing officer may affirm or reverse a permit denial or a permit revocation; however, the exclusive remedy for determining whether a response was a false fire alarm response shall be the review process established in section 11-19(e) of this Code. No proceeding under this section may be used to address or reconsider the determination of whether or not a response was a false fire alarm response.
(Ord. No. 02-527, § 4, 6-19-02)

Sec. 11-24. Policies and procedures.

The fire chief shall institute in accordance with this division policies and procedures necessary to implement and enforce this division.

The request for hearing and supporting documents must be received by the director not later than the 30th day next following the date that the city places the false or non-permitted alarm notice in the mail. Failure to timely request a hearing shall render the notice and imposition of penalties final.

The request for hearing shall specify facts and have documents and records attached that prove the alarm was not false or generated by a non-permitted alarm system.

(3) The cause of the series of false alarms is repaired before it generates additional false alarms;

(5) During the 30-day period following the repair, the alarm system generates no additional false alarms from the documented common cause; and

(6) There are no unpaid fees or penalties under this article due and owing from the permit holder.

(c) *Application of section.* This section shall not apply to:

(1) The same alarm site, alarm system, alarm subscriber or permit holder more than once in any 24-month period; or

(b) *Effect of alarm permit revocation or expiration.* Upon revocation or expiration of the alarm permit by the director, the alarm system becomes a non-permitted alarm system, and all penalties, fees and punishments authorized by this article for a non-permitted alarm system are applicable.

(c) *Notice of alarm permit denial or revocation.* If the director denies an application for an alarm permit or revokes an alarm permit, the director shall cause a denial or revocation notice to be sent to the applicant at the address set out in the permit application and shall maintain a copy thereof. The notice shall state the reasons for the denial or revocation and advise the applicant of the right to a hearing as provided in section 11-71 of this Code.

Sec. 14-28. Task system employees.

(a) Upon the request of the department director of the department in which they are employed, regular, full-time employees of the city may be designated by order of the commission as "task system employees." Requests to the commission for such designations shall be made by the department director who shall demonstrate to the commission each of the following:

(1) The identity of classifications or positions of employment requested to be designated for task system employees.

(2) That the work performed within those positions or classifications is not temporary in nature, that the work is of a kind which varies in a predictable manner by season or otherwise so that more work is required to be performed in some workweeks than in other workweeks, and that the annually adjusted regular workweek of the employees therein requires the actual performance of an average of 40 hours of work per week.

(3) That the department director has developed a means of equitably assigning the employees involved so that each will be required to perform a specifically assigned task or tasks as his weeks' work, which task or tasks will, on an annually adjusted basis, require the actual performance of an average of 40 hours of work per week.

(4) That it is impracticable to assign the employees involved to a regular and uniform 40-hour workweek.

(b) The task system employee designation may be removed by the commission at any time upon its own motion or upon request of the department director and a finding that the conditions justifying its establishment as defined in subsection (a), above, no longer exist.

(c) Task system employees shall be considered to be full-time employees, and those task system employees who are not otherwise exempt from civil service classification under section 2 of article Va shall be entitled to civil service classification.

(d) The tasks to be performed as a regular workweek by each task system employee shall be as assigned from time to time by the department director. Such tasks shall be allocated so that they will require the actual performance of an average 40 hours of work per week on an annually adjusted basis. The department director shall maintain, by use of time clocks, a record of the hours actually worked by each task system employee by name and classification and shall furnish an annual report thereof for each calendar year to the commission by the thirty-first day of January of the next year so that the commission may properly review its designation pursuant to subsection (b) above. Any task system employee who is aggrieved by his or her task assignments shall be entitled to the recourse provided by the grievance procedure established in section 14-50 of this Code.

(e) Notwithstanding the requirements of subsections (a) and (d), above, the commission may, by order, find that an average of a lesser number of hours of productive effort is equivalent to an average of 40 hours per week on an annually adjusted basis for any classifications or positions of employees authorized for task system assignment, if their department director demonstrates to the commission each of the following:

(1) That the employees are required by virtue of the nature of their work to perform strenuous and continuing physical labor without an opportunity for the rest periods which are usually afforded to employees in other classifications;

(2) That no practicable means exist to restructure the employees' work assignments to provide such rest periods; and

(3) That the work tasks assigned to the employees will require a productive effort which is equivalent to not less than 40 hours of work as performed by other city employees who are assigned to labor under the normal working conditions associated with city employment.

Employees who are authorized to perform a reduced workweek pursuant to this section shall, nevertheless, not be subject to overtime benefits

in any workweek unless and until all of the requirements of section 14-168 of this Code, specifically including the requirements of subsection (e) thereof have been met. The designation of any position or classification of task system employees as equivalent workweek employees shall not impair their right to civil service classification under subsection (c) above. Consistent with the nature of the work to be performed, the commission shall establish minimum time in attendance work hour requirements, which shall in no event be less than 32 hours per week, for payroll reporting purposes as to each position or classification of task system employment which is authorized to perform an equivalent workweek under this subsection.

The grievance form may not be signed by a representative, or faxed, e-mailed, or otherwise transmitted by electronic means to the grievance coordinator or the commission.

(3) The grievant and department management are required to mutually disclose non-privileged information, names of witnesses/persons with relevant knowledge, and provide documents to be used in the step meetings. Failure by either party to disclose known witnesses/persons with relevant knowledge, documents or information may be grounds for exclusion/inclusion of such evidence, where appropriate. Failure by the department to disclose known witnesses/persons with relevant knowledge, documents or information shall subject the person responsible to discipline.

(4) With the approval of a grievance examiner, a grievance may be discontinued at any step in the process for the grievant's unexcused failure to disclose witnesses/persons with relevant knowledge, documents or information or failure to cooperate or respond. (5) The dates required herein for scheduling meetings/hearings may not be extended except where an investigation for criminal misconduct is pending, where the failure to meet a date is the result of an authorized leave of absence or excused illness of the grievant, or the parties mutually and voluntarily agree in writing to extend the deadlines. Any extension granted must be reasonable and not unduly or unnecessarily delay the grievance process.

(6) Upon mutual agreement, grievances by more than one grievant arising out of the same or similar fact situations may be consolidated and heard concurrently at the discretion of the department.

(9) No electronic or other technological mode of recording may be used at step I or II proceedings by any participant.

(11) Neither step I or II meetings nor step III hearings shall be open to the public.

(12) In each step of the grievance process, the grievant shall be allowed a reasonable time off from his regular duties to file his grievance and to attend step I or II meetings or a step III hearing thereon, and such time off shall not be charged against the grievant. Such allowed time does not include time for preparation, meetings with witnesses or representatives, drafting responses or gathering evidence, etc. At its discretion, the department may provide an alternative work schedule or overtime as needed to accommodate the grievant's attendance at step meetings or hearings.

(13) Subpoenas may be issued only for step III hearings and will be limited to a maximum of five fact witnesses per grievance. Upon presentation of the subpoena, city employees will be allowed reasonable time for travel and participation at step III hearings and will be compensated (regular or overtime hours, as appropriate) by the department.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-54. Grievability challenges.

Either the grievant's department, the director or the grievant may challenge grievability at any point in the grievance process and submit written arguments on the issue of grievability.

(1) At the request of either the grievant or the department, the grievance examiner's determination of grievability may be referred to the commission for review without hearing or testimony. Written arguments may be submitted to the commission; however, no other issues or new evidence on the issue of grievability may be submitted to the commission by either party at any time.

(2) When a request for a determination of grievability is filed with the director or the commission, all subsequent time frames in the grievance step process shall be suspended during the period of referral and review by the grievance examiner and/or the commission.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-55. Grievance process.

The grievance process shall consist of four steps.

(1) *Step I:*

a. The step I grievance form may be obtained from the departmental grievance coordinator. The completed form must be received by the grievance coordinator on or before the deadline. The date the grievance is filed shall be documented on the grievance form by the grievance coordinator. Thereafter, the grievance coordinator must arrange a meeting between the grievant and the immediate supervisor or another supervisor in the chain of command who might better resolve the grievance at this step, and/or other appropriate parties to be concluded no later than 30 calendar days after the date on which the grievance was received. If the meeting is not concluded within 30 calendar days, the grievance shall proceed automatically to step II.

[1] No later than 24 hours before the meeting, the parties shall mutually exchange all documents reasonably related and relevant to the grieved issue.

[2] If the grievance may not be resolved by the immediate supervisor because of a lack of authority to resolve the issue, steps I and II may be combined.

[3] If the grievant's immediate supervisor is the department director, steps I and II are automatically combined and considered concurrently. In such case, the department director shall meet with the grievant and shall not appoint a designee.

[4] When a performance rating of less than effective is grieved, at the option of the grievant, steps I and II may be combined and the grievance may proceed directly to a step II meeting. If steps I and II are combined, all time frames shall be the same as at step II.

b. Regardless of the outcome of the step I meeting, the immediate supervisor or appropriate party shall

respond in writing not later than ten calendar days after the date on which the meeting was concluded. The response must include the supervisor's evaluation of the grievance and proposed resolutions, if any. Any proposed resolution must be within the authority of the supervisor or approved by the department director.

[1] The supervisor or appropriate party shall submit the completed written response to the grievance coordinator. The grievance coordinator shall forward the supervisor's response to the grievant with a copy to the director. The response shall be either personally delivered by the grievance coordinator to the grievant or be served by certified mail, return receipt requested, to the last address of record provided by the grievant on the step I grievance form.

[2] If no written response is submitted by the supervisor or appropriate parties within the ten calendar days following the conclusion of the step I meeting, the grievance coordinator shall have an additional ten calendar days to automatically schedule a step II meeting. Notice shall be given to the grievant, the department director/designee and the supervisor. A supervisor or appropriate party who fails to comply with the requirements of this section or to do so timely may be disciplined.

[3] An untimely filed response may be accepted at the discretion of the grievant, but will not avoid the automatic referral to step II unless the grievant requests that the grievance be withdrawn.

c. Proposed resolutions for each grievance by a supervisor or appropriate party must be accepted by the grievant entirely or not at all. If the proposed resolution is rejected, the grievant may file a step II grievance form with the department grievance coordinator. If the grievant fails to timely file a step II grievance form, the grievance process is terminated. If the grievant accepts the proposed resolutions, the department must implement the proffered resolutions.

(2) *Step II:*

a. To continue the grievance, the grievant must reject all of the proposed step I resolutions, specifying reasons for the rejection on the step II grievance form. The completed step II grievance form must be received by the department grievance coordinator no later than the tenth calendar day after the date on which the grievant was served with the supervisor's response. If certified mail is used to give the step I response to the grievant, the step II grievance form still must be received no later than the tenth calendar day after the date the step I response was mailed.

b. The grievance coordinator shall arrange a step II meeting between the grievant, the immediate supervisor and/or the appropriate parties at step I and the department director or a designee of at least an assistant director level or the equivalent selected by the department director.

[1] Where steps I and II are combined, and the grievant's immediate supervisor is not the department director, the department director or a designee of at least assistant director or the equivalent shall hear the grievance. If the

grievant's immediate supervisor is the department director, the combined step I and II meeting shall be with the department director and may not be held with a designee from any level.

[2] The step II meeting must be concluded no later than 45 calendar days after the date on which the step II grievance form was received by the department's grievance coordinator. If the meeting is not concluded within 45 calendar days, the grievant has ten calendar days to request that a grievance examiner order the grievance to proceed to step III without a step II meeting. Such a request must be filed with the civil service coordinator at the human resources department in accordance with procedures recommended by the director and approved by the commission.

[3] No later than 24 hours before the scheduled step II meeting, both parties must mutually exchange through the grievance coordinator any additional non-privileged documents not previously disclosed or discovered through the exercise of reasonable diligence or provided at step I which are related to the grievant and reasonably related to his grievance or the grieved issue. Documents or information indirectly related to the grievant or his issue or related to other employees may be disclosed at the discretion of the department and the grievant respectively.

c. Within ten calendar days after the date the step II meeting concludes, the department director or the designee who conducted the step II meeting shall provide a written response to the grievance issues together with proposed resolutions to the grievance coordinator who shall be responsible for service of the response on the grievant in person or by certified mail, return receipt requested, to the last address of record provided by the grievant on the step II grievance form.

[1] Any proposed resolutions must be within the authority of the department director or designee.

[2] If no written response is submitted by the department director or the designee within the ten calendar days following the conclusion of the step II meeting, the grievance coordinator shall have an additional ten calendar days to refer the grievance to the civil service coordinator of the human resources department to automatically set the grievance for a step III hearing. Notice shall be given to the grievant, the department director or the designee and the supervisor that the matter was automatically referred to step III.

[3] An untimely filed response may be accepted at the discretion of the grievant, but will not avoid the automatic referral to step III unless the grievant requests that the grievance be withdrawn.

d. Proposed step II resolutions must be accepted by the grievant entirely or not at all. If the grievant accepts the proposed resolutions, the department must implement the resolutions.

(3) Alternative mediated Step II proceeding for written reprimands or a performance rating of less than effective: At the time of filing of a step II proceeding only for a grievance of a written reprimand or an employee performance rating of less than effective, the grievant may elect to proceed to a step II meeting with a department director or designee or to proceed to request a mediated step II in accordance with the procedures set forth below.

a. The director shall be authorized to establish a mediation program and to develop procedures for its implementation. Prior to implementation, the commission shall approve rules and procedures for step II mediations, which shall be in writing and made available to all parties. A mediation program for this purpose shall have certified mediators who shall not be city employees. A mediation program established under this section shall have the following features:

[1] At step II, instead of a meeting with the department director or a designee, the parties may mutually agree to mediate the grievable issue (written reprimand or less than effective performance rating). A mediated step II must be accomplished within the same time frames as a nonmediated step II proceeding.

[2] If a settlement is reached and reduced to writing and signed by all parties at the mediated step II, no further appeal is allowed.

[3] If a settlement is not reached through mediation, a grievant who wishes to continue the grievance shall file a step III request for grievance hearing with the director on or before the tenth calendar day following the conclusion of the mediated step II meeting.

b. No mediator may be called to testify at the commission or at a step III hearing.

(4) *Step III:* The director or his designee shall coordinate all proceedings at steps III and IV.

Grievance examiner

a. The completed step III request for grievance hearing form obtained from the human resources department must be received by the director on or before the tenth calendar day following service of the written step II department response or the conclusion of the mediation, as applicable. If the grievant fails timely to file a step III request, the grievance process is terminated. The request for grievance hearing must specify the reasons for the rejection. The director or his designee shall notify the department grievance coordinator when a step III request is filed and serve notice of the scheduled hearing date and time on the grievant and the department director/designee at least ten calendar days before the hearing.

b. The grievance examiner shall conclude an evidentiary hearing within 60 calendar days after the date of receipt by the director of the step III request for grievance hearing. If the grievant fails to appear at the hearing, the grievance examiner shall dismiss the grievance.

c. Step III grievance hearings shall be limited to the issues articulated at step I and shall be conducted as informal administrative proceedings. The presumption in favor of the departmental action mandated by the Charter is rebuttable. The burden shall be on the grievant to support the grievance by a preponderance of the evidence.

d. At each hearing, the grievance examiner shall:

[1] Review the current status of the grievance;

[2] Determine whether jurisdiction is proper;

[3] Determine the issues to be addressed and the extent to which evidence will be allowed;

[4] Determine who will be allowed to testify and what documentary and other evidence will be admitted; and

[5] Hear the evidence and ensure that the proceedings follow due process and these rules.

d. Written rules of evidence, order and procedure shall be adopted by the commission with copies provided to the parties at the time of filing. All rules adopted by the commission for step III hearings shall be enforced by grievance examiners. The hearing shall be transcribed.

e. The parties to a hearing before the grievance examiner shall be the grievant, his representative, the department, by and through a departmental representative designated by the department director, and the department's attorney. Other persons who may attend include fact witnesses, appropriate supervisory personnel, and any other persons necessary for a fair determination of the grievance.

f. The director, on behalf of the commission, may issue subpoenas to require the attendance of witnesses and/or the production of books, documents, records or other tangible evidence relevant to any factual dispute. At the time of hearing, the grievance examiner will determine which witnesses will be allowed to testify. Alternative forms of allowable testimony (video, telephonic, deposition, affidavit, etc.) may be accepted in addition to or in lieu of live testimony if, in the opinion of the grievance examiner, such alternative testimony is credible, relevant, authentic, and reliable.

g. All witnesses shall be examined under oath in relation to any matters relevant to the grievance issues. No general references or character evidence or testimony shall be allowed in any form, including character affidavits, declarations or statements. Persons to be called as witnesses may be excluded from the hearing room during the taking of testimony upon the request of either party.

h. Grievance examiners may impose a reasonable time limit on the time allowed the parties to present evidence or examine witnesses, limit the number of witnesses to be heard in accordance with commission rules, and restrict presentation of the issues or the proceedings.

i. After the close of evidence and the arguments of the parties, if any, the grievance examiner may rule immediately into the record or take the matter under advisement. In either case, the grievance examiner shall file a written determination within 15 calendar days after the date the hearing concludes. The determination shall consist of findings of fact and conclusions of law based upon the grievance issues, evidence, legal principles and arguments presented, and recommendations for resolution of the grievance. The authority and powers of the grievance examiner are limited to those of the commission as reflected by the commission's rules, the Charter and ordinances. A grievance examiner may not exceed her jurisdiction or authority or recom-

mend relief that is not otherwise authorized by this chapter or these rules.

j. The grievance examiner's determination shall be served on the grievant on or before the fifth calendar day following receipt by the director with a copy to the commission and the department director.

k. If the grievance examiner's determination is improper due to lack of jurisdiction, authority, due process or sufficiency of the evidence to sustain the examiner's findings or recommendations, either party may file a step IV request for review on a form provided by the director. If both the grievant and the department director fail to timely file a request for review, the grievance examiner's determination is deemed affirmed by the commission and the grievance process terminated.

(5) *Step IV:*

a. The completed step IV request for review form must be received by the commission on or before the tenth calendar day following service of the grievance examiner's determination.

b. The step IV request for review form provided by the director must include all of the reasons for the request, all agreed facts and issues through step III and may include a statement in support of the issues and/or a proposed resolution together with all supporting documentation and justification for the request. A copy shall be served upon the opposing party. No reply statement is allowed by the filing party.

c. The opposing party may file a response in support of the determination and/or a proposed resolution together with any agreed issues and/or facts and all supporting documentation and justification to be served upon the commission and all opposing parties at least seven calendar days before the scheduled commission review. The burden of proof remains on the grievant.

d. If both parties file a step IV request for review, each may prepare and file a response to the opposing party's request and statement.

e. Review by the commission shall be limited to the evidence before the grievance examiner, including the transcript from the Step III hearing. No new evidence may be submitted or introduced for the first time at step IV.

f. The commission may affirm, reverse, or modify the grievance examiner's determination and issue an order which shall be served upon the parties with a copy to the grievance coordinator and the grievance examiner. The commission's order is final for all administrative purposes.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-55.3. Retaliation prohibited.

It shall be a violation of the civil service rules and regulations for any supervisor to take any retaliatory action against any grievant for utilizing or participating in any of the grievance procedures established by this section. It shall also be a violation for a grievant to retaliate against a supervisor or another employee for participating in a grievance. If retaliation is alleged to have occurred, that allegation shall be incorporated into the next succeeding step proceeding through step III.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-55.4. Notice of these procedures.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-55.7. Nongrievable issues.

Unless specifically authorized in section 14-50 above, other issues that concern employees shall be handled as set forth below:

(1) *Employee concerns review programs.* All departments shall establish and implement programs with written procedures to address employee concerns which do not allege discrimination or are not expressly made grievable herein. The director shall establish guidelines for such programs which shall be approved by the commission prior to the development of any departmental program. Regardless of the form or manner, programs such as peer review, employee representative councils, mediation or any other alternative dispute resolution mechanism, or any combination of programs may be implemented to address such issues.

a. Each department's employee concerns review programs must be accessible to all of its employees regardless of civil service protection (e.g. probationary, part-time, appointed, executive, etc.).

b. Departments may reasonably limit concerns which can be addressed through this process. All programs and procedures and any amendments or subsequent changes must be approved by the commission prior to implementation.

c. There is no appeal to or review by the commission of decisions made by departments in any employee concerns review program.

(2) *Nonreferral complaints.* The director shall establish procedures for addressing complaints regarding nonreferral of applicants to posted vacant positions.

(3) *Classification challenge.* Any civil service protected employee who feels that he is performing duties outside the course and scope of his classification as defined by the position job description and/or the performance plan may request a review of his actual duties performed to ensure conformity and consistency in that classification and the classification system.

a. The request must be made in writing and filed with the employee's department grievance coordinator who shall be responsible for immediately providing a copy of the request to the department director or his designee.

b. The department director or his designee shall review the request and no later than ten calendar days after the request was provided by the grievance coordinator shall determine whether the request has merit and should be resolved internally without formal review by the director. The department director or designee may elect to:

[1] Make no change in the employee's duties; or

[2] Eliminate any duties alleged to be outside the job description of the employee's classification and/or the employee's performance plan; or

[3] Assign and/or substitute other duties that conform with the current job description of the employee's classification and/or reflect duties on the employee's performance plan; or

[4] Join the employee's request for a job audit and determination. The department director shall immediately forward a request to the director for review.

c. If the department director or designee fails to take any action within ten calendar days after the employee's initial request, the grievance coordinator shall forward the employee's request to the director requesting a formal job audit.

d. The director shall process the request as expeditiously as possible and issue a determination as to the propriety of the duties the employee is being asked to perform and whether they are within the existing classification. The final determination of the director shall be forwarded to the department grievance coordinator, the employee and the department director or designee.

e. Upon receiving the director's determination, the department director shall have ten calendar days to elect to change those duties that are non-conforming with the employee's job description and performance plan and set forth in writing the proposed actions, if any, to be taken with respect to the employee's duties and/or classification. The department director or designee shall respond in writing to the director within ten calendar days of receipt of the director's determination, setting forth the proposed action(s), if any, to be made with respect to the employee's duties and/or classification. The director will send a copy of the determination and the department director's response and proposed action to the requesting employee.

[1] If the department director's proposed action implements the director's determination, the offer is presumed accepted and

the request may not be pursued further. There is no appeal to or review by the commission.

[2] If the department's proposed action is inconsistent with the director's determination, the employee may request a review by the commission.

f. When an employee is authorized to request a review by the commission above, the employee must request a review by the commission in writing on a form provided by the director within ten calendar days after the employee's receipt of the department's response provided by the director. The request must be filed with the director, who shall log the request, monitor its progress and place the request on the agenda of the commission at the next possible regularly scheduled meeting. At least ten calendar days' notice of the date of the commission review shall be served on all parties.

[1] The parties may submit written arguments and relevant documents in support of their respective positions. The director shall supply a copy of his determination to the commission at least five calendar days before the matter is scheduled for commission review. Unless the commission specifically requests, there will be no oral presentation, testimony or arguments to the commission.

[2] The commission shall review the director's determination, the department's response and proposed action, and the written arguments and documents of the parties and shall issue its order at the earliest practical time after the scheduled meeting of the commission affirming, rejecting, or modifying the determination of the director and/or proposed action of the department director with regard to the employee's duties and/or classification. The order of the commission shall be final and shall be implemented immediately. There shall be no further appeal or review.

(4) *Discrimination complaints.* Any complaint which alleges discrimination in whole or in part, based on race, color, religion, sex, national origin, age 40 years and over, veteran status, disability, genetic information, sexual orientation, gender identity, Family Medical Leave Act status, workers' compensation status, or retaliation for filing a charge/claim of discrimination (discrimination factors) or for whistleblowing is not grievable through the grievance process. All such claims will be referred by the grievance coordinator to the office of the inspector general for investigation and/or to the director for a determination of severability, if necessary. All or any portion of the complaint which is not based upon a discrimination factor and which may be segregated and severed, may proceed through the grievance process if it is otherwise grievable herein even if the grievant has concurrently or subsequently filed a complaint on the nongrievable (discrimination based) aspects of the complaint with the office of inspector general and/or the Equal Employment Opportunity Commission (EEOC), or the Texas Workforce Commission (TWC).

a. If at any point in the grievance process, a grievant alleges discrimination in either the grievance forms, at step proceedings, or in documentary materials, all such discrimination based issues, documents or testimony will be excluded from consideration.

b. If the grievable issues cannot be separated from the discrimination based issues which are not grievable, further processing of the griev-

ance will be suspended, and the grievance will be referred to the office of inspector general for an investigation of the discrimination complaint. If an allegation of discrimination is sustained, the office of inspector general will inform the department who will attempt to resolve the issues in accordance with the applicable law. If any nondiscrimination issues remain to be resolved after the office of inspector general issues its findings, any previously intertwined grievable issues will be referred back to the department (if referred at steps I or II) or to the director (if referred at step III) for completion of grievance processing of the remaining unresolved grievable (nondiscrimination) issues.

c. A civil service protected employee who files a grievance must affirm in writing on a form provided by the director, that the grievance is not based upon a discrimination factor in whole or in part. If the grievant indicates a discrimination factor on the form, the grievant will be referred to the office of inspector general and the grievance handled as indicated above.

d. Notices regarding the filing of federal and state law complaints of discrimination shall be posted in prominent places in compliance with state and federal laws. A charge of discrimination filed with the EEOC or the TWC will not affect a valid grievance based on the same facts, even if concurrently or subsequently filed with the processing of the grievance, so long as the grievance is processed in accordance with the rules set forth above and limited to the nondiscrimination based facts. EEOC and/or TWC determinations will not affect any grievance.

(5) *City appeals to state court.* In cases of exceptional importance, legal precedence, or challenge to jurisdiction or legal authority, the city/department may seek a declaratory judgment from a state district court of Harris County construing the commission's orders. The appeal must be filed within thirty days after the date of the commission's order and be based upon substantial evidence. The commission need not be joined as a necessary party.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

DIVISION 4. RULE 4. CLASSIFICATION PLAN

Sec. 14-56. Generally.

The commission shall, in cooperation with the mayor and council, have a classification plan which shall provide for the use of standard titles for all classes of positions in the classified service and a written job description for each classification which will describe duties and responsibilities and set forth minimum requirements necessary for the successful performance of the task involved in each classification.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-57. Adding or revising classifications.

The commission may, at any meeting, add new classifications or revise existing classifications whenever it is deemed advisable, always subject to the approval of the mayor and council. There shall be no new classification proposed for council approval until the proposal, with full details of the duties involved, has been submitted to the commission for its recommendation.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-58. Interpretation of specifications.

The specifications of the various positions in the classification plan are hereby declared to have the following force and effect:

(1) The use of a particular expression or illustration as to duties, qualifications, or other attributes, shall not be held to

exclude others not mentioned, provided such others are similar in kind or quality; nor to limit the power of the supervising authority to alter the detailed tasks involved in the duties of a position. But when a substantial change of duties is made, except for limited, temporary periods, such change shall be reported to the commission with a view to a possible reclassification of the position.

(2) In determining where a given position is to be allocated, the specifications shall be considered as a whole. Consideration shall be given to the job purpose, the specific responsibilities, duties, tasks, and qualification requirements, and to the relation of the position to other classifications as all together affording a picture of the kind of employment the classification is intended to embrace.

(3) The commission shall prescribe minimum and maximum age requirements of applicants for appointment to particular positions. The minimum age for employment in the classified service of the city shall be 18 years.

(4) For all classes, qualifications such as legal authority to work, honesty, and industry shall be deemed to be required even though they may not be specifically mentioned in the definitions of the positions.

(5) The statement of necessary special qualifications in the specifications of a position, comprising an enumeration of license, registration, or other legal qualifications required for the performance of the duties of the position, shall constitute a basis and source of authority for acceptance or rejection of applications for examination for the position and also for the evaluation of the qualifications of an applicant. When such qualifications exist in state laws or city ordinances, they shall be required even though they are not specifically stated in the specifications.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-59. Allocation of positions to classes.

The commission shall allocate each position in the classified service to its appropriate class under the classification plan by placing in each class those positions substantially similar in nature, degree of difficulty, responsibility, and character of work which require generally the same kind and amount of training and experience for proper performance and which merit approximately equal pay. In making such allocations, provisions shall be made for the uniform application of the classification plan to positions in the various departments of the city.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-60. Status of incumbents of positions when allocated.

Should a position in the original allocation process be allocated or reallocated to a different class in order to correct an error in its original allocation, the employee in such position shall be entitled to continue therein, provided he legally occupies that position by regular appointment thereto.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-61. Allocation of new positions and reallocation.

(a) Whenever a new position is created by the mayor and council, the commission shall allocate the position to its proper class in the classification plan, or if no suitable class exists, one shall be established as provided in these rules and the position allocated thereto.

(b) Whenever the duties of a position are so changed as to justify its allocation to a different class, the commission shall make that reallocation and shall decide whether the change represents a promotion or a demotion for the incumbent of the position. Should it be a promotion, the incumbent must qualify therefor, provided he has not previously done so.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-62. Protesting allocations.

If an employee believes that his position has been improperly allocated, he may protest by

presenting his reasons therefor upon such forms or documents as the director may prescribe. The claim shall be investigated consistent with the rules under a classification challenge under section 14-55.7(3) of this Code.

The commission, through the director, may secure from the employee or his supervisor a new statement of the duties and responsibilities of the position under consideration. Should a change to the classification be proposed, the employee and/or the department director shall have an opportunity to be heard by the commission before the revised classification shall become effective.

DIVISION 6. RULE 6. EXAMINATION

Sec. 14-79. Requirements for examinations.

The director shall, whenever vacancies exist within the civil service or even in advance of such vacancies, prepare, view and rate necessary examinations, or direct this work, which examinations shall determine the suitability of applicants for civil service positions. No person shall be appointed to a position in the civil service, except as otherwise provided for by law, until he shall have signed a completed application on the forms prescribed by the commission, qualified by passing the required examination, and been certified for appointment in accordance with these rules.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-80. Notice required; exceptions.

Public notice of competitive group examinations shall be given at least seven calendar days prior to such examinations by posting notices in the office of the commission or upon any public bulletin boards available in the City Hall or elsewhere as the director may decide. Such examinations may be further publicized through the use of any other media most likely to reach qualified applicants for the position in question. This requirement may be waived by the commission in cases of special examinations for positions for which there is substantial difficulty in obtaining qualified applicants.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-81. Contents of notice.

Each official notice of an examination shall state the title, duties and pay of the position for which the examination is to be held, the qualifications required, the time and place for making application, the time and place of examination, and any other information which is deemed to be pertinent and useful.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-82. Open application period.

Should the commission find that there is a shortage of qualified candidates for positions or classes of positions which urgently need to be filled, it may announce that no time limit has been established for receiving applications, and applications may be filed during such period of time as may be necessary to establish a satisfactory employment list. When a satisfactory employment list has been established, public notice shall then be given that no further applications will be accepted.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-83. Types of examinations.

(a) All examinations shall be open, competitive, and free in character and designed to measure fairly the applicant's suitability to perform the duties of the position which he seeks to fill.

(b) An examination may be written or oral and may include physical tests, demonstrations of skill, evaluation of training and experience of applicants as recorded in their applications, or any combination thereof.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-84. Applications and examination admission.

(a) All applications shall be made on forms prescribed by the director who may require such information as he deems pertinent, but no questions in the application, or in any other portion of the examination, shall be so framed as to elicit information concerning the political, fraternal or religious opinion or affiliation of the applicant.

(b) Any person may apply for any examination unless the public notice of same shall disqualify such person based upon a bona fide occupational qualification.

(c) The commission or director may reject the application of any person for admission to an examination, or refuse to examine any applicant, who is found to lack any of the qualifications prescribed in the public notice, or who is physically or mentally unqualified to perform the duties of the class, or who has been dismissed from the public service for delinquency or misconduct, or who has made false statements of any material fact, or has practiced or attempted to practice deception or fraud in his application or in his examination. In every such case, the commission may reject the application and likewise may cancel the eligibility of the applicant if he has already been admitted to an examination and has attained a place on a list of eligibles, and take action for his removal from the service in case he has already received appointment when such finding is made.

(d) The director may exclude from any further participation in any examination any applicant who does not make a passing grade on any part of an examination where the examination is in more than one part. Failure in any portion of the examination shall be sufficient grounds for exclusion in any other part of the examination, or, if all portions of the examination have been completed, the director may declare such applicant as failing in the entire examination.

(e) When applications are received from qualified applicants who are living in another city and it is not practical for such applicants to present themselves in the city for the examination, the director may make arrangements with any other person in that city who is acceptable to the commission to administer the examination.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-85. Conduct of examinations.

(a) The examinations shall be conducted by the director, or by persons designated by him, according to the procedure established by the director. Safeguards shall be devised which, insofar as possible and practicable, shall conceal the identity of candidates from examiners or other persons engaged in scoring, marking, or otherwise rating the candidates.

(b) The director shall arrange for suitable persons in the service of the city, with the consent of the supervising authorities under whom such persons work, to assist in examinations. When there is an insufficient number of such persons available, the director may arrange to employ temporarily such other persons as might be needed and shall provide for their pay.

(c) It shall be the duty of all city employees having such authority to allow the reasonable use of public buildings and other facilities as conditions might require for holding such examinations and tests.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-86. Passing grade.

The commission shall have the power to place the passing grade at any figure or percentage deemed equitable in each test but, unless a definite figure is set, the passing grade shall be 70, based upon a total weight of 100 for the entire examination.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-87. Eligibility for examinations.

(a) Examinations for appointment shall be open to persons who meet the requirements for admission to the examinations as established in the public notices therefor or as specified in these rules. Such requirements may relate only to qualifications, characteristics, skills and abilities related to the actual performance of the duties of the job for which the examination is being held.

(b) No additional applicant shall be admitted to the examination room after any candidate has permanently absented himself from the place of examination.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-88. Reexaminations; correcting; amending, etc., records.

The commission shall have the power, whenever in its judgment the interests of the public service require it, to order a reexamination of applicants for any position, and shall have the power to correct, amend, or revoke any schedule, list or other papers or records when it appears that an error or injustice has been done; and when any person whose name appears on the list of eligibles has, for any reason, become incapacitated for appointment in the public service, the commission may strike such name from said list of eligibles. The reason for such action shall be recorded in full in the minutes of the commission.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

All original papers, applications, examination papers and questions, certificates, and all other papers pertaining to the application and examination are the property of the human resources department and must be filed with the human resources department and shall be kept for a minimum of three years or longer if circumstances require.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-90. Notice of results.

Each person competing in an examination shall be given a written notice of the examination results. Those who fail to attain a place on the list of eligibles shall be notified of that fact.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-91. Review of results.

Each person competing in an examination may, within five business days after the notice of the results, and only after such person has requested in writing to the director, be permitted to inspect his rating and examination papers at the appropriate human resources department location, during business hours, and may secure any necessary explanations of the methods by which the ratings were determined. However, no examinee will be permitted to review the questions used in a written examination but may be allowed to review his answer sheet only.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-92. Appeals.

An examinee may file his appeal with the director for correction of his rating at any time during the five days immediately following notice of the examination results; such appeals must be made in writing and must set forth the grounds for such appeal. The commission shall review such appeal within a reasonable time and shall notify the examinee of its decision, and the decision of the commission shall be final.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-93. Correction of results.

If, after examination of the appeal filed by a candidate, the director finds that any manifest error existed in the rating, scoring, or computing of the results, he shall, upon approval by the commission, make the required correction and place the name of that person in its true position on the list as the correction warrants. Such correction, however, shall not invalidate any appointment previously made from such list.

(a) The director may prepare a list of eligibles, when needed, from the results of each examination. The list shall contain the names of only those persons who have met the minimum requirements for eligibility. Names shall be listed in a descending scale order starting with the one receiving the highest rating.

(b) When two or more candidates have equal final weighted ratings, their names shall be arranged on the list by the order in which the application was submitted.

(c) When a list of eligibles is being prepared in the course of an open application or examination period, as provided for by Rule 6, section 14-84 of this Code, names of eligibles shall be added to the list as rapidly as the necessary examinations are completed and rated, and in the order to which their final earned ratings entitle them. However, names certified prior to receipt of later eligibles shall not instantly be affected even though later eligibles may have higher earned final ratings, the prior certified names being affected only when these certified are returned to the eligible list at which time the names of eligibles who earned higher, though later, ratings shall be placed above them on the list to await another certification.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-100. Duration of lists of eligibles.

All lists of eligibles shall remain in existence for one year unless sooner exhausted, and at the end of one year they shall expire and new examinations shall be given as the need requires.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-101. Promotional lists.

After each promotional examination, the commission, through the director, shall prepare and keep available a promotional list of eligible. When two or more persons have equal final weighted ratings, their names shall be placed in the following manner: The one with the higher performance rating shall be placed above the other; but if there should still be a tie, the one of greater seniority shall be placed above the other one.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

(b) Any person who voluntarily resigns from a position in the civil service and who leaves the service shall forfeit any rights which he might have had under civil service and may be reappointed in the civil service only in the manner prescribed by the rule governing original appointment. (1) Failure to report for an interview.

(2) Declining an appointment.

(3) Inability to be located.

(4) Continued unavailability after expiration of a stated limited period of time during which, at the eligible's request, the director has not certified him.

(5) Failure to report to work after appointment.

(6) Death of eligible.

(7) Loss of legal authority to work.

(8) The commission has reason to believe that the individual is unqualified for appointment because of:

[1] Incapacity;

[2] Errors discovered in computing his examination score;

[3] False statements made in his application; or

[4] Other similar reasons.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Violation of this rule by a city employee shall be grounds immediate indefinite suspension of the offending employee or employees as provided for by Rule 15. Violation of this rule by an applicant shall cancel all present rights of that applicant or candidate for consideration as an appointee to the city's service. Violation of this rule by a noncivil service employee shall be grounds for the immediate discharge or termination of the noncivil service employee. DIVISION 8. RULE 8. CERTIFICATION AND APPOINTMENT; TRANSFERS

Sec. 14-110. Requests for certification.

Whenever it is desired to fill a vacant classified position, written notification and such information as might be necessary for an informed certification shall be submitted to the commission on a form prescribed by the director. Insofar as is practicable, each vacancy shall be anticipated sufficiently in advance by the department in order to permit the director to determine who may be available for appointment and, if necessary, to prepare a class specification and to establish a list of eligibles.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-111. Certification of eligibles.

(a) Upon receipt of written request for certification, the director shall certify to the department director the list of eligibles, and any other applicable data.

(b) If any of the number so certified shall not be available for appointment, the director shall certify the succeeding name or names from such list of eligibles until a sufficient number of eligibles are certified.

(c) Vacancies in the classified service shall be filled by promotion, except when the commission deems that the interests of the city may be served better thereby, such vacancies may be filled by the demotion, transfer, reemployment or original employment when applicable.

(d) The eligibles to be certified, subject to the limitations of the preceding section, shall be the highest ranking ones willing to accept employment chosen in this order:

(1) Former regular employees on a reemployment list whose services terminated only because of budgetary or force-reduction reasons.

(2) Regular employees on the appropriate promotion list, if any.

(3) Those approved for reappointment, if any.

(4) Those on an original employment list.

All names on one of such lists shall be exhausted before names from another list may be certified, but names certified may be those taken from two or more lists, if necessary, to provide the necessary number prescribed in subsection (a) of this section.

(e) If the appropriate lists do not contain a sufficient number of eligibles prescribed in subsection (a) of this section, the maximum number of available eligible persons willing to accept appointment shall then be certified. Under such circumstances, the director shall then prepare an examination in order to create a new list of eligibles from which certification shall be made.

(f) When, upon request for certification, there are no eligibles on an appropriate list, certification may be made at the discretion of the director, and the director may appoint any qualified person available to fill the position.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-112. Report and effective date of appointments.

An appointment shall be reported immediately to the human resources department on the form prescribed by the commission. The director, after certification of conformity with the rules, shall forward one copy of the form to the department concerned, the payroll section, and the civil service personnel files. An appointment shall become effective as of the date on which the appointee enters upon duty.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-113. Temporary and emergency appointments.

(a) Whenever a department requires temporary assistance because of a special project, a temporary increase in the work load, or absence of a regular employee, appointments may be made from an appropriate list of eligibles for the duration of such unusual work. Each such employee shall have the prefix temporary in the official records.

(b) The acceptance or rejection by an eligible of temporary appointment shall not affect his standing on the list of eligibles, but the temporary service shall not be counted as a part of his probation in case of immediately subsequent, regular employment in the same position in the same department.

(c) No temporary appointment shall be made for a period of more than six months, but may be extended by the commission for a longer period. No temporary employment shall become regular unless the employee, at the time of original, temporary placement, came from a list of eligibles for that position. In case it is desired to convert a temporary appointment into a regular one, such appointee shall fulfill the requirements covering candidates for original entrance into the service and must be certified by the commission before he may become a regular appointee.

(d) In the event of an emergency which may result in loss of public property or in serious inconvenience to the public, the mayor may direct the director to select and appoint a person or persons without regard to the rules governing other appointments, but in no case shall such emergency placements be employed for longer than the duration of the emergency and each such employee shall have the prefix emergency in the official records.

(e) Successive or consecutive emergency appointments shall be made only with express approval by the commission with a view of limiting a person to a total of 90 working days of such employment.

(f) Emergency appointments shall be reported promptly to the commission with reasons therefor; the commission reserves the right to inquire into the nature of the emergency.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-114. Approval of appointments.

(a) Approval by the commission of regular appointments made in conformity with civil service rules and from lists of eligibles shall not be required.

(b) Approval by the commission of temporary appointments shall be required before the administration and regulatory department director may certify to the legality of the payrolls upon which such names appear.

(c) Approval by the commission before employment begins shall not be required in the case of an emergency placement, but each such appointment shall be reported to the commission immediately.

(d) When there is a vacancy in a scientific, managerial, professional, or educational class and there is a shortage of applicants in that class, the commission may approve the appointment of an applicant recommended by the mayor upon satisfactory evidence that the applicant meets the requirements for the class and is qualified otherwise; however, the commission may require the applicant to pass an examination.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-115. Transfers.

(a) A department director, with the approval of the mayor, may request the commission to reclassify within his department any classified employee under his jurisdiction with the same maximum salary. Reclassification shall not be allowed until prior approval by the commission.

(b) Transfer of a classified employee from a position under the jurisdiction of one department director to a position under the jurisdiction of another department director may be made only upon approval of the commission and both department directors concerned.

(c) Any transfer of an employee from a position in a lower class to a position in a class carrying a higher maximum salary shall be deemed a promotion; while any transfer from a position in a higher class to a position in a class carrying a lower maximum salary shall be deemed a demotion and neither may be accomplished except in the manner provided in these rules for making a promotion and for making a demotion.

(d) A city employee in a noncivil service position shall not be transferred, appointed, nor promoted to a civil service position without first having been qualified by the commission.

(e) When the best interests of the city may be served thereby, the commission may approve transfers, to vacancies, of employees who are about to be displaced for reasons not reflecting upon the efficiency, character, conduct or capacity of those employees.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Each employee so appointed shall complete the 12 months probationary period, which is to be regarded as a working evaluation period, before being considered a civil service employee.

(b) Each promotion in the civil service shall require an additional probationary period of six months, which is also to be regarded as a working evaluation period.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

(b) If an employee is transferred during the period of probation from a position in one department to a position in another department, the employee so transferred shall be required to start a new probationary period at the time of his transfer.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-125. Removals during probation.

(a) In case the department director deems a probationary employee unable or unwilling to render satisfactory service, or for other sufficient cause, the director of the department may remove such employee upon written notice to the commission. When any employee is removed for any cause during probationary period, he shall not be entitled to a review or hearing before the commission.

(b) If a civil service employee is removed during probation, from a position to which he has been promoted, he shall be restored to his former classification in the department in which the employee is presently assigned, unless the employee consents to other placement.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-126. Credit for prior service.

The provisions of this section shall be available in any instance in which a position which was not theretofore subject to civil service protections is revised or redesignated by action of the council or the commission so that it becomes a civil service position and the incumbent thereof qualifies for and continues to hold such position without a break in service after its revision or redesignation. Under such circumstances, the commission may, upon recommendation of the department director and the director and a finding that the duties and responsibilities of the position have not substantially changed, grant credit to the incumbent for all or a portion of his prior service time or none towards the appointment probation period established pursuant to section 14-122 of this Code.

Sec. 14-132. Promotional examinations generally.

Promotional examinations shall be limited to only employees in the classified service who, at the time of the examination, are serving in other classified positions and have served for such a period as may be prescribed by the director. A promotional examination may include employees with specific classifications in all departments or only in the department for which the list of eligibles is being established, as determined by the director in each instance. Certification shall be made in the same manner as that prescribed for original appointment. Promotional examinations may, at the direction of the director, consist of one or more of the following parts: Written, oral, psychological, and practical performance tests, a special rating by each candidate's department director and, in some cases, a medical examination as an additional requirement.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-133. Notice of promotional examinations.

Whenever a promotional examination is to be held, notice of such examination shall be posted. It shall be the duty of the director to determine where such notices shall be posted and the duty of the department director to see that each such notice is properly posted.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-134. Temporary promotions.

An interim or temporary promotion to a higher position, made necessary by reasons of sickness, disability, vacancy, or other absence of another employee, may be authorized by the commission upon the written request of the department director concerned who shall set forth full information regarding such request. All such temporary promotions, where practical, shall be filled from a promotional list if there is one in effect for the particular class, and shall continue only during such period of sickness, disability or other absence. Any such temporary promotion may or may not include a temporary increase in compensation at the discretion of the department director.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Secs. 14-135—14-139. Reserved.

DIVISION 11. RULE 11. LAYOFFS

Sec. 14-140. Notice.

When it is necessary to reduce the number of employees within any department due to reorganization of the department, reduction in funding, reduction in services provided, or for any other reason, each employee whose position is to be eliminated shall be so notified, and at the stated time his salary and work shall cease. This shall constitute a layoff. The department director shall notify the employee in writing at least 45 calendar days in advance of the layoff. A copy of the layoff notice shall be forwarded promptly to the director. A suspension, dismissal, discharge or discontinuance of temporary, part-time or seasonal employment shall not necessarily constitute a layoff and vice versa.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-141. Who shall be laid off.

When it becomes necessary to lay off one employee or more in the same classification in a department, the one or ones to be laid off shall be determined by the department director on the basis of this section. While there is no guarantee of reemployment for any laid-off employee, the names of all those laid off, who have received performance ratings reflecting acceptable performance or higher, shall be placed on a reemployment list for a period of one year. No employee in a regular position shall be laid-off while any probationary, temporary, part-time, seasonal, or emergency employee is performing comparable duties in the same department unless the department director determines that the continued use of such employees is necessary due to unpredictable work loads, seasonal or temporary work requirements, or related factors that make the use of regular full-time employees for the work impracticable or inefficient or would impair the quality of service of the department. Employees will be laid off by a combination of merit rating and seniority as provided in this ordinance.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-141.1. Rules of construction and definitions.

In the construction of this division, the following rules shall be observed and the following definitions shall apply, unless the context clearly indicates otherwise:

Classification means the actual employment category to which each employee is assigned at the city.

Combined merit rating means the total point score of overall appraisal ratings received during the past three years' annual performance ratings. Combined merit rating will be based on the overall performance ratings from the subject employee's annual performance ratings given upon forms promulgated by the director and approved by the commission, during the calendar year in which the implementation date occurs and for each of the two calendar years preceding the year in which the implementation date occurs. For each of those three years' performance reviews, the employee shall receive points on a basis that corresponds to the employee's overall performance rating numerical score. If the numerical scoring systems differ between types of performance review forms, those ratings shall be adjusted to obtain corresponding scoring systems according to standards set by the director.

If an employee received more than one performance rating during any such calendar year, then the results of each performance rating for that year shall be averaged on the basis of the number of performance ratings that the employee received during that calendar year. For any year in which an employee did not receive a performance rating for any reason including, but not limited to, not being employed by the city, then for that year the average of the scores the employee received in the remaining year(s) in the combined merit rating period shall be used. If an employee in a classification tier that is targeted for layoff has not received any performance reviews during employment with the city, then the department shall perform an unscheduled performance review before the implementation date, and the score on that review shall be multiplied by three to give that employee's combined merit rating. If a performance rating is on appeal through a grievance process, the appropriate hearing officer will be notified and requested to render a decision before the implementation date. If the appeal is still pending on the implementation date then the average of the scores the employee received in the remaining year(s) in the combined merit rating period shall be used instead of the score on the performance rating which is pending on appeal. Combined merit ratings shall be computed for all employees within the department and classification in which a layoff is to be implemented.

Department means each department, division of a department, office, or division of an office of the city that is listed on the Exhibit A at the end of this division, regardless of whether it actually constitutes a department of the city government, or not.

Implementation date means the date established in writing by the mayor for the implementation of a layoff within a department. All computations regarding the layoff shall be based upon the implementation date, and the delay of the actual implementation of the layoff for any reason shall not affect the use of the established implementation date for such computations, unless the mayor elects to establish a new implementation date.

Layoff tier. Each employee within a department and classification in which a layoff is to be implemented will be assigned to a layoff tier as determined by the employee's combined merit rating. Employees within a layoff tier will be laid off on the basis of their seniority with the employees having the least amount of seniority being laid off first. The most senior person within a layoff tier will be retained, barring any exemptions.

Managerial tier means a separate tier which consists of employees who occupy positions within classifications assigned to a pay grade greater than or equal to pay grade 23, as designated in the Officials and Administrators EEOC (Equal Employment Opportunity Commission) job category A, and which are designated as a mid-level manager or above on the class description. Managerial tier shall not include employees excepted from eligibility to civil service classification under Article Va, Section 2. When a classification in the managerial tier is targeted for layoff within a department, all employees holding positions within that classification in the department shall constitute one tier for the purposes of computing the combined merit rating.

Total continuous employment shall be computed from the date of an employee's initially reporting to work with the city as an employee in a regular position. Total continuous service in the current job classification shall be computed from the date of an employee's certification to the current job classification. If the employee has had a break in employment, then the total continuous employment or the total continuous service in the current job classification shall be computed from the date of the employee's return reporting to work with the city as an employee in a regular position. A break in employment shall consist of any instance in which the person ceased to be a regular employee of the city under these civil service rules, except for a

military leave authorized under state or federal law or a prior layoff and reemployment under Civil Service Rule 11.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-141.2. Layoff procedure including sequence of layoffs.

(a) With the exception of employees in classifications in the managerial tier, employees within the same classification in a department where the layoff is to be implemented shall be laid off on a lowest numbered layoff tier-first out basis. In the event that there are two or more employees within a given classification and layoff tier and the number of persons to be laid off is such that one or more of the employees within that classification and layoff tier need be laid off and one or more need not be laid off, then the person or persons with the least seniority, based on total continuous employment, shall be laid off first.

(b) For each job classification affected by the layoff, probationary, temporary, part-time, seasonal and emergency employees shall be laid off first and, exclusive of exemptions, comprise Layoff Tier Number One of the layoff scheme. Layoff Tier Number Two shall, exclusive of exemptions, be comprised of all employees having a combined merit rating falling below standard (i.e. below 9). Layoff Tier Number 3 shall, exclusive of exemptions, be comprised of all employees having a combined merit rating greater than or equal to 9 and less than or equal to 11.07. Layoff Tier Number 4 shall be comprised of all employees with a combined merit rating greater than 11.07.

(c) The employee or employees to be laid off will be determined by their layoff tier and seniority, based on total continuous employment, on a lowest tier number-first out basis. Within a layoff tier, the employee or employees having the least seniority (exemptions excluded) will be the first laid off. After all employees within a layoff tier (exemptions excluded) have been laid off, the employees in the next numbered layoff tier will be laid off in order of seniority, and layoffs will continue through layoff tiers sequentially until the layoff has been completed.

(d) If a tie exists between two or more employees after use of the procedure outlined in (c) of this section, then among those employees with the tie score, the following steps will be utilized in the following numbered sequence until the tie is broken, with use of a succeeding step only in the event a tie still exists among two or more employees:

(1) Employees will be laid off on the basis of the commencement of their total continuous service in the current job classification on a last in-first out basis, with the last commenced to be the first laid off.

(2) Employees will be laid off on the basis of their most recent job performance review score on a lowest score-first out basis, with the employee receiving the lowest score to be the first laid off.

(3) Employees will be laid off on the basis of the commencement of their total continuous employment on a last in-first out basis, with the last commenced to be the first laid off.

(4) Employees will be laid off on the basis of the date an employee filed an application for current continuous employment with the human resources department on a last in-first out basis, with the last applicant to be the first laid off.

(5) Employees will be laid off on the basis of total city service, which shall include all periods of permanent employment with the city, on at least total service-first out basis, with employee(s) with the least amount of total city service to be the first laid off.

(6) Employees will be laid off on the basis of their names selected on a random basis by the human resources director, or his or her designee, on a first selected-first out basis, with the first name(s) selected to be laid off first.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-141.3. Exemptions and directors' discretion.

The department director may exempt one or more employees from the operation of the layoff, if the department director makes a specific written finding that:

(1) The exempted employee(s) have specifically enumerated educational qualifications or specialized technical training, professional licenses or qualities relevant to their work functions that are not possessed by the employee or employees who would otherwise replace them; or

(2) The retraining of the employee or employees who would otherwise replace the exempted employee(s) would cause a deterioration of service delivery or service quality by the department or the exempted employee has specifically enumerated skills, the loss of which would adversely impact the department's service delivery or quality.

At least ten calendar days prior to the date that the laid off employees are formally notified in writing of their layoff under this rule, the department director implementing such layoff shall provide the city attorney with written exemptions, if any, for review and approval.

Except as to employees who are exempted in accordance with this subsection, the layoff shall be accomplished in the manner otherwise provided in this rule.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-141.4. Grant-funded positions.

In any instance in which a department has some positions that are funded in whole or in part by virtue of funding received from one or more state or federal grant contracts and other positions that are funded in whole by virtue of funds derived from other general sources of city revenue and a layoff is required due to a reduction or elimination of the funding, then the layoff shall be accomplished in accordance with this rule, but in such a manner as to affect only those employees whose positions are funded in whole or in part through the source of funding that has been reduced or eliminated. It shall be the duty of the department director to ensure that each employee hired, transferred, promoted, demoted or otherwise assigned into a position that is funded in whole or in part by any state or federal contract or grant in aid notified prior to such assignment that the position will not be wholly funded by general city revenues and that the employee's continued employment will be subject to the city's continued receipt of funds for the position under the applicable state or federal contract funding the position.

A position shall be considered to be funded by a state or federal grant contract for purposes of the administration of this subsection regardless of whether the grant contract provides for the receipt of the funds in advance of their expenditure by the city, or provides for the expenditure of city funds from other city sources with their subsequent reimbursement pursuant to the terms of the grant contract, or provides for any combination of advance funding and reimbursement funding.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-142. Reemployment list; reappointment; restoration of sick leave and vacation accruals.

The names of persons officially filling regular civil service positions at the time such positions are abolished and who have performance rating scores of acceptable or higher shall be placed on a reemployment list and shall remain on this list for a period of one year. When vacancies occur in positions with the same classification or any other classification which is determined by the director to require equivalent job skills within the same or any other department, except as provided below the last one or ones laid off shall be the first reappointed, and no other names shall be certified for those classifications until the one or ones laid off have been given a reasonable opportunity to accept reemployment with the city. Nothing herein shall be construed as a guarantee of reemployment.

(1) For any instance in which there exists a reemployment list for a classification, and if an employee has been or will be voluntarily or involuntarily demoted to

that classification within the department or if a qualified employee with a disability must be transferred to a vacant position in that classification as an accommodation of last resort, the department director may request and the commission may approve the certification of the employee to a position within that classification and thereby reject placement of those on the reemployment list.

(2) In any instance in which the reemployment list for a given classification contains employees who before the layoff did not work within the department in which they would be reemployed, the department director may request and the commission may approve the certification of only those employees on that reemployment list who worked in that department at the time they were laid off, and thereby reject all employees on the reemployment list who were not employed in that department at the time they were laid off. If vacancies that the department seeks to fill still exist after certification of all those employees who worked in the department at the time they were laid off, then for those remaining vacancies the last employees laid-off in that classification within any other department shall be the first reemployed.

(3) In any instance in which the duties assigned to a classification within a department will require the performance of different work functions, which vary as to tasks performed, equipment operated, or in any other manner that affects the transferability of persons between the functions, and any one or more employees on the reemployment list were, before the layoff, either:

a. Selected for employment or promotion to the same or similar work functions on the basis of different formal education qualifications, professional licenses, or specialized technical training, or

b. Given specialized training, whether of a formal or on-the-job nature, while employed by the city that substantially meets the needs of the work functions to be performed in the department where reemployment of employees based strictly on their numerical position on the reemployment list would, in the opinion of the department director, require the retraining, licensing, or additional education of any one or more employees on the reemployment list to effectively staff those activities of the department that will be performed, then the department director may request that the commission reject one or more employees on the reemployment list. The commission may reject the employee(s) based on the director's opinion:

[1] The employee(s) who will be rejected does not have educational or training skills or licenses relevant to the work functions required for the department that are possessed by the employee(s) who the department requests be employed, or

[2] The retraining, licensing or additional education of the employee(s) who will be rejected would cause a deterioration of service delivery or service quality by the department.

(4) Restoration of sick leave accruals. An employee laid off under the Rule 11 provisions and placed on a reemployment list who returns to regular employment with the city within one year of the layoff effective date, shall be immediately reinstated to the Compensable sick leave or Modified sick leave plan which the employee participated in at the time of layoff. Upon reemployment, the employee shall have restored all unused sick leave hours accrued by the employee as of the

time of layoff under the Compensable sick leave plan, not to exceed 1,040 hours. Any unused sick leave hours accrued by the employee under the Compensable sick leave plan as of the time of layoff in excess of 1,040 hours and for which the employee has been compensated, shall not be restored. Upon reemployment, any sick leave hours that had been accrued by the employee under the Modified sick leave plan and for which the employee was compensated subsequent to the layoff, shall not be restored to the employee.

(5) Restoration of vacation accruals. An employee laid off under the Rule 11 provisions and placed on a reemployment list who returns to regular employment with the city within one year of the layoff effective date, shall be reinstated to the vacation accrual program the employee participated in at the time of the layoff as provided under section 14-170 of this Code. All vacation hours the employee had accrued in excess of the vacation cap applicable to the employee at the time of layoff, shall also be restored to the employee. Any vacation hours accrued by an employee at the time of layoff, for which the employee was compensated subsequent to the layoff, shall not be restored to the employee.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-143. Transfer or demotion in lieu of layoff.

An employee who is determined to be in line for layoff may be transferred, before the effective date of such layoff, to a position in the same classification in a different department or to a position in any other classification for which the employee is qualified in the same department, in lieu of being laid off, such transfer to be governed by conditions or procedures prescribed in these civil service rules and the availability of suitable positions that the department directors desire to fill. If a regular employee is in line for layoff from a position to which he was promoted within the preceding 12 months, he may be demoted to his previous classification, provided that there is a vacant position available in such classification that the department director desires to fill and further provided that the employee is willing to accept a pay reduction to the rate applicable for the classification to which the employee will be demoted.

Sec. 14-144. Filing of plan; appeal.

(a) At least seven calendar days prior to the date that the laid off employees are formally notified in writing of their layoff under this rule, the department director implementing such layoff shall file a written plan reflecting such layoff with the human resources director as secretary to the commission for review of compliance with non-discrimination obligations. Such plan shall set forth:

(1) Reason for the layoff and the source of funding which was reduced, if applicable;

(2) An organizational plan or diagram for the department affected by the layoff as it appeared prior to the layoff;

(3) The names and the current home addresses and telephone numbers and classifications of the employees who are to be laid off;

(4) For each classification and final layoff tier in the department in which employees are to be laid off along with the computation of each employees' (whether laid off or not) combined merit rating score and layoff tier pursuant to section 14-141 of this Code; and

(5) A copy of any exemption designations made pursuant to section 14-141 of this Code.

(b) Each layoff process accomplished under this rule that causes the layoff of any permanent employee shall be subject to review by the commission upon the request of any laid off permanent employee filed in writing with the director within ten calendar days after the date that the employee is given written notice of the layoff. If the tenth day falls on a Saturday, Sunday, or holiday, the time for filing the request for review shall be extended to the next working day. In this paragraph "permanent employee"

shall mean a full-time regular employee who is serving in a classified civil service position who has completed the one-year probationary period applicable to new and rehired civil service employees but shall not be construed to mean any employee excepted from civil service classification pursuant to Article Va, Section 2. Such request shall specify the reason that the laid off employee believes that the layoff process was not properly accomplished in accordance with this rule. Any request which lacks such specificity may be rejected by the commission. The appeal shall not raise prior acts of the department or delve into past incidents. It shall focus solely on the process of the layoff and whether it was done correctly and in accordance with this rule. The chairman, in consultation with the other members and the director, shall determine the type of review to be conducted, establish a date and determine the names of those persons who would be affected by the appeal if meritorious. The director shall cause a written notice of the review proceeding to be mailed to each person who may be designated by the commission, at the address furnished in the layoff plan, by certified U.S. mail, return receipt requested. Any of the persons so designated may intervene in the review by filing a written statement of position on the matter with the director by the day prior to its setting. To the extent practicable, only one review shall be conducted for each layoff process. The commission shall limit its inquiry to the issue of whether the layoff process was accomplished as to all employees involved, whether laid off not, in accordance with this rule, and it shall not at any time substitute its judgment or opinion for that of the department director as to any decision made within the legitimate discretion of the department director. The commission shall enter a written decision as soon as practicable after the conclusion of the review which shall be done by written documentation only (no testimony or oral argument) but not later than the twentieth day next following the date that the review is concluded. The commission may uphold the layoff as presented, uphold it in part and change it in part or take any other action necessary in order to conform the layoff to this rule. In accordance with its determination the commission may order the reinstatement of any laid off employee with back pay and the layoff of any other employee in lieu thereof. The filing of an appeal hereunder shall not defer the implementation of the layoff. However, the mayor may defer the implementation of the layoff process, in whole or in part, upon written recommendation of the director and the commission chairman that it be deferred due to an apparent violation of this rule. Layoffs reviewed and sustained by the commission shall be final and shall not be subject to any other administrative recourse, review, or appeal process.

(c) To the extent an employee association has been duly recognized by the city as the sole and exclusive bargaining agent for municipal employees under Chapter 146 of the Local Government Code, the city and bargaining agent shall, through meet and confer, arrive at an alternate expedited process by which an exemption afforded under that section 14-141.3 of this Code may be challenged by the employee association on the grounds that it does not meet the criteria under that section, and whereby a laid off employee with at least eight years of service may challenge a combined merit rating of 9 received by the employee on the grounds that such rating does not accurately represent the employee's performance for the covered period.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-145. Review by human resources department for nondiscrimination obligations.

The mayor shall cause any plan for the implementation of a layoff to be reviewed by the human resources department to ensure that no employee is denied any benefit of employment or granted any preference on the basis of race, color, creed, sex, religion, national origin, age, gender, handicap or political of fraternal affiliation in the implementation of the layoff. If the commission finds that a denial of benefits or preference was undertaken for any of the foregoing reasons, then it shall order the reinstatement of the wronged employee(s) with back pay and the layoff of other employee(s) in lieu thereof. In order to facilitate such review the department director shall file a document reflecting the

racial and sexual makeup of the department, including the employees to be laid off, with the documents provided to the commission.

DIVISION 12. RULE 12. RESIGNATIONS

Sec. 14-150. Written resignation to be requested with copy forwarded to director.

An employee in good standing who decides to leave city employment for any reason shall be asked by his supervisor or department director for a formal resignation in writing and a copy of same shall be forwarded to the director.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-151. Investigation; treatment of forced resignation as removal.

The commission is authorized to make such investigation of any resignation as it may think advisable. If it develops that a separation reported as a resignation did not result from the voluntary act of the employee, the commission shall notify the mayor and may treat the separation as a removal and the provisions of these rules relating to removals shall then apply.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-152. Forfeiture of rights; reemployment.

Any employee in the classified service who voluntarily resigns his position shall forfeit all rights which he might have had under civil service. He can be reemployed with the city only in the manner prescribed by the rules governing original appointment, except that the commission may decide, after considering the recommendation of the department director, that his name may be returned to the original list of eligibles, if still in existence, or to a new list of eligibles for that classification. However, such eligibility for reemployment shall not take precedence over the rights of those who were laid off for budgetary or force-reduction reasons and are on a reemployment register.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-153. Withdrawal of resignation.

An employee, upon his written request before the effective date thereof and with the written approval of the department director, may be allowed to withdraw his resignation.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-154. Reinstatement of retired employees.

No employee in the classified service who is retired on pension for service retirement shall be eligible for reappointment to regular employment that includes eligibility for the same pension. Employees retired for disability shall file with the commission a letter requesting reinstatement, together with a physician's statement stating that the pension employee is now physically fit to resume his duties in the position from which he was retired. The commission shall transmit the letter and physician's certificate to the municipal employees pension board for its consideration. The pension board, after due investigation and satisfactory physical examination of the pensioned employee, shall notify the commission that the pensioned employee is physically qualified to have his name placed on an eligibility register for his former position or a lower position in the department from which he was pensioned.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-155. Absence from work without notice considered job abandonment.

Any employee who is absent for three consecutive working days, without having notified his immediate superior, shall be considered to have abandoned his position from the employment of the city. The department director or designee shall take reasonable affirmative steps to ascertain the whereabouts of the employee before effectuating this rule.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-156. Candidacy for and holding of elective office.

(a) Any employee in the classified or unclassified service of the city, except appointed or elected officers, who is a candidate for any public elective office, whether the same be federal, state, county or city, either paid or nonpaid, shall immediately, in writing make such candidacy known to the director. It shall be the duty of the director to determine if the candidacy poses a conflict of interest with the employee's city employment. If any such conflict is found, the director shall provide the employee's department director with a full report of his findings together with any recommendation that he may have. If the department director concurs that there is a conflict of interest, he shall forthwith report such findings to the mayor together with any recommendation he may have. The mayor shall finally determine whether a conflict of interest with the employee's city job exists.

(b) In the event that the director determines that the employee's candidacy results in no conflict of interest, and the employee is elected to the office sought, the same procedures as outlined above where candidacy presents a conflict shall be followed to determine if the holding of the office presents a conflict of interest and if termination from employment is appropriate.

(c) Failure to make such candidacy known shall be a violation of this rule. Disciplinary action shall then be handled consistent with the City Charter and these rules.

Non-covered employees. All employees of the City of Houston who:

(1) Are excluded from coverage under the Fair Labor Standards Act of 1938, as amended, and the regulations and administrative opinions interpreting that act; and

(2) Are designated as such by the human resources director and the commission. In reaching the determinations required by this subsection or subsection (a)(3) above, the director and the commission shall be guided by the various criteria which are applied to determine whether overtime must be paid under the wage and hour provisions of the Fair Labor Standards Act of 1938, as amended.

Overtime. Time actually worked in excess of 40 hours in a workweek.

Regular rate of pay. Regular rate of pay shall include:

(1) Base pay;

(2) Longevity pay; and

(3) Shift differential pay.

(4) Assignment Pay

The term "regular rate of pay" shall not include compensation excluded under Section 7(e) of the Fair Labor Standards Act of 1938, as amended or the interpretative regulations and administrative or judicial opinions construing that section.

Workweek. The workweek shall consist of 40 hours of actual work within the consecutive 168 hour period beginning with the day shift on Saturday.

Time actually worked or *actual work.* The time the employee is actually on duty or on a council declared holiday, on authorized sick leave, vacation leave, compensatory time off, death in the family leave or any other authorized leave. However for clarification, if the holiday falls on an eligible employee's day off, and the employee does not work on the holiday, the employee will receive holiday compensation, but those hours will not count towards the overtime calculation for that week.

(b) All departments of the city shall maintain accurate and complete records of all employee attendance and time actually worked during each work week. Each department director or designee shall certify the correctness of submitted time and attendance records in a manner prescribed by the director.

(c) All eligible employees of the City of Houston shall be compensated for working overtime beyond their regularly scheduled workweek by the payment of either monetary compensation at the rate of 1½ times their regular rate of pay or compensatory time at the rate of 1½ hours for each overtime hour worked. The following shall apply to the payment of overtime compensation:

(1) The department director or designee of the department in which the employee works shall verify that the overtime is needed to complete a required city service or operation.

(2) The department director or designee may determine whether overtime shall be paid in cash or compensatory time. Where overtime is paid in cash it shall be paid in the pay period in which it is earned or

as soon thereafter as is possible, taking into consideration both the workweek and the payroll system used.

(3) Where the employee is granted compensatory time the following shall apply:

a. The number of hours of compensatory time that may be accumulated shall not exceed 240.

b. Accrued compensatory time must be used within 120 calendar days from the date accrued, provided that it does not unduly disrupt departmental operations.

c. Eligible employees shall be paid for accrued compensatory time not taken within 120 days from the date of accrual. Such payment shall be in cash at the greater of:

[1] The employee's average regular rate of pay over the employee's last three years of employment by the city preceding the date of payment; or

[2] The employee's regular rate of pay for the pay period immediately preceding the date of payment.

Such payment shall be made in the first full pay period following expiration of the 120-day period.

d. Each department shall maintain detailed records of the accumulation and use of compensatory time in a form prescribed by director.

e. Accumulated compensatory time shall be used in accordance with the first-in-first-out (FIFO) accounting principle.

f. Any compensatory time accrued prior to April 15, 1986 and not used shall be carried on the records of the department until such time as it is used by the employee. The employee shall not be entitled to monetary compensation for any compensatory time accrued prior to April 15, 1986.

(d) A department director or designee may, subject to the operational requirements and needs of the department, require an eligible employee to work on a council declared holiday.

(1) *Definitions.* In this subsection only, the following definitions will apply:

Actual hours worked. The time an employee is working on duty performing assigned work required and authorized by the department director for the holiday starting with the actual time the work begins on the holiday and ending with the actual time the employee completes the required work or stops for the day on the holiday.

Eligible employee. For purposes of holiday compensation, holiday premium pay, and short notice premium pay, all permanent, full-time employees of the City of Houston other than those employees who are: (i) subject to Chapter 143 of the Texas Local Government Code, (ii) classified as fire protection or law enforcement personnel or (iii) subject to other civil service systems and/or other meet and confer or collective bargaining agreements under Chapter 143 or 174 of the Texas Local Government Code.

Holiday. A date that the council has declared as a holiday on which city offices will be closed.

Holiday compensation. The payment an eligible employee is to receive for the observance of a holiday, to be paid at one times the regular rate of pay, for the appropriate number of hours as indicated below.

Holiday hours. The hours accrued in lieu of payment for holiday premium pay.

Holiday premium pay. The payment or accrual an eligible employee is to receive in addition to base pay and any other additional pay not provided by this subsection, for the appropriate number of actual hours worked on the holiday as indicated below. It is to be paid at one times the regular rate of pay times the appropriate number of actual hours worked on the

holiday as indicated below, or accrued at one times the appropriate number of actual hours worked on the holiday as indicated below.

Regular or *scheduled hours*. The time an employee is usually and regularly scheduled to work on a day on which a holiday falls. The term excludes scheduled overtime hours.

Short notice call to duty. The director or designee determines that extraordinary circumstances or a true emergency exists that requires an employee to report to work or return to work on a holiday. Extraordinary circumstances or a true emergency occurs when the employee is provided less than 24 hours notice in advance of the starting time of the shift or hours to be worked on the holiday. It does not apply to those, scheduled or not, who know 24 hours or more in advance that they are required to work on the holiday.

Short notice premium pay. The payment or accrual an eligible employee is to receive in addition to base pay and any other additional pay not provided by this subsection, for the appropriate number of actual hours worked on the holiday as a result of Short Notice Call to Duty, regardless of the employee's regular work schedule. It will be paid at one and one-half times the regular rate of pay times the appropriate number of actual hours worked on the holiday as indicated below, or accrued at one and one-half times the appropriate number of actual hours worked on the holiday as indicated below.

(2) If an eligible employee's regular or scheduled hours to work fall on a holiday, but the employee is not required to and does not work on the holiday, the employee will be paid only holiday compensation at one times the regular rate of pay for the number of hours the employee is regularly scheduled to work on that day. Hours may not be accrued in lieu of payment.

(3) Where an employee's regularly scheduled day off falls on a holiday, the employee may be given a day off in lieu of the holiday or the employee may receive straight-time payment equal in value to the employee's regularly scheduled workday at the employee's regular rate of pay. The department director shall determine whether the employee shall be paid for the holiday or be given a day off at a later date. For purposes of computing overtime, cash payment granted will not be considered payment for hours worked. If a day off in lieu of the holiday is granted, it must be granted and taken within 180 calendar days of the holiday or be paid.

(4) If an eligible employee's regular or scheduled hours to work fall on a holiday and the employee is required to work on the holiday, but the employee does not work on the holiday because the employee has an excused absence or authorized leave for the date of the holiday, the employee will be paid only holiday compensation at one times the regular rate of pay for the number of hours the employee is regularly scheduled to work on that day; and no leave balance will be debited for that day. Hours may not be accrued in lieu of payment.

(5) If an eligible employee's regular or scheduled hours to work fall on a holiday, and the employee is required to work on the holiday, but does not work, resulting in an unexcused absence, the employee will be paid only holiday compensation at one times the regular rate of pay for the number of hours the employee is regularly scheduled to work on that day. In addition, disciplinary action may be taken, the same as if the employee did not work on any scheduled non-holiday work day.

(6) The department director or designee has discretion to determine whether holiday premium pay or short notice premium pay will be paid or hours accrued under the circumstances set out in items (7)

and (8) below. The number of hours will be the same whether they are paid or accrued.

(7) If an eligible employee is required by the department director or designee to work, and does work, on a holiday (regardless of whether regularly scheduled, or called to report to work more than 24 hours in advance of the starting of the shift), the employee will be paid or will accrue hours for the hours actually worked on the holiday for which the employee had 24 hours or more notice ("full notice hours") as follows:

a. Except as provided in (b) below, if the employee works on a holiday, the employee will be paid at one times the regular rate of pay for all actual full notice hours worked on the holiday, and additionally will receive holiday premium pay for the number of actual full notice hours worked on the holiday (For illustration purposes only: Total = 1 × regular rate of pay × number of actual full notice hours worked on the holiday, plus either 1 × regular rate of pay × number of actual full notice hours worked on the holiday or accrual of 1 × number of actual full notice hours worked on the holiday).

b. If the employee works fewer than the number of hours in his regular or scheduled hours on the holiday, or if not regularly scheduled to work on the holiday, fewer than the number of hours in the most frequently occurring daily schedule in the employee's work schedule the employee will be paid at one times the regular rate of pay for all actual full notice hours worked on the holiday, and additionally will receive holiday premium pay for the number of actual full notice hours worked on the holiday, plus holiday compensation only for the remaining hours of the regular or scheduled hours not worked on the holiday or if not regularly scheduled to work on the holiday, the remaining hours of the most frequently occurring daily schedule in the employee's work schedule. (For illustration purposes only: Total = 1 × regular rate of pay × number of actual full notice hours worked on the holiday, plus either 1 × regular rate of pay × number of actual full notice hours worked on the holiday or accrual of 1 × number of actual full notice hours worked on the holiday, and also paid additionally 1 × regular rate of pay × number of remaining regular or scheduled hours not worked on the holiday, or if not regularly scheduled, the remaining hours in the most frequently occurring daily schedule in the employee's work schedule not worked on the holiday.)

(8) If an eligible employee was not previously scheduled to work on a holiday but is then required by the department director or designee to report to work or stay at work with less than 24 hours notice before the time required to report to work, the employee will be paid or will accrue hours for the hours actually worked on the holiday for which the employee had less than 24 hours notice ("short notice hours") as follows:

a. The employee will be paid at one times the regular rate of pay for all actual short notice hours worked on the holiday, and additionally will receive short notice premium pay for the number of actual short notice hours worked on the holiday. Such payment will be made without regard to the employee's usual shift or regular scheduled hours. (For illustration purposes only: Total = 1 × regular rate of pay × number of actual short notice hours worked on the holiday, plus either 1.5 × regular rate of pay × number of actual short

notice hours worked on the holiday or accrual of 1.5 × number of actual short notice hours worked on the holiday.)

b. An employee required or called in to work on short notice call to duty should work only the hours necessary to do the required work and should not be required to work an entire shift or be held over unless operationally necessary.

(9) Holiday hours accrued must be used as follows:

a. If accrued, the accrued holiday hours must be used on or before the 180th day after the date of the holiday for which they were accrued or they shall be paid in the first full pay period immediately following the expiration of the 180 days.

b. Eligible employees who accrue holiday hours must make a good faith effort to use the accrued hours before the 180 day period expires. These hours shall be used before other forms of leave except Family and Medical leave or injury on duty leave.

c. If an eligible employee has failed to submit a request for accrued holiday leave on or before the thirtieth day before the relevant period expires, the department may, upon notice to the employee, convert a request for vacation or sick leave to accrued holiday leave in order to avoid the conversion of the accrued holiday leave to pay. Departments also may direct employees with accrued holiday leave hours that are within 30 days of conversion to pay to take such leave before it expires and becomes payable.

d. All accrued holiday hours of police and firefighter trainees not used on or before the date the trainee is scheduled to become a sworn classified officer or firefighter will be paid at one times the regular rate of pay with an effective date on the final day prior to the date on which the trainee is scheduled to become a sworn classified officer or firefighter.

e. All remaining accrued holiday hours not used on or before the date an eligible employee separates from city employment are forfeited and will not be paid.

(10) Holiday compensation paid in lieu of base pay for a holiday observed is to be included in pay reported for pension purposes so as not to reduce base pay or service for pension purposes. Holiday premium pay is not to be included in pay or service reported for pension purposes.

(11) An eligible employee who is scheduled to work, but does not work and is not paid for the last scheduled workday (unless the day is an authorized furlough day) before the holiday or is scheduled to work but does not work and is not paid for the first scheduled workday (unless the day is an authorized furlough day) after the holiday will not be paid holiday compensation, holiday premium pay, short notice premium pay, or accrue holiday hours for the holiday.

(12) If a holiday falls on a day that an eligible employee is on approved work-related injury leave or on transitional duty, the holiday will be compensated under Executive Order 1-33 and other applicable policies, but not under this section.

(e) Any employee who is exempt and, as a result, not eligible for overtime pay as prescribed in this section, may, notwithstanding and other provisions of this section to the contrary, be eligible for compensatory time on a straight time (hour-for-hour) basis, upon the recommendation of his department director and the approval of the director, subject to the following criteria:

(1) The employee is in a classification assigned to pay grades 26 and below.

(2) The overtime work must be performed under unusual circumstances, which shall

mean additional hours not ordinarily required to perform the employee's regularly assigned tasks including, but not limited to, unscheduled work hours on a council declared holiday or work performed over a confined period of time due to a special project assignment or a condition of emergency.

(3) An employee may not receive more than 40 hours of compensatory time hereunder in any calendar year quarter.

(4) Compensatory time granted under this subsection and its use shall be reported to the human resources director in accordance with subsection (c)(3)d., above.

(5) Any compensatory time granted must be used within 120 calendar days following the payroll period in which it was earned, and the employee's department director shall afford the employee a reasonable opportunity to use the time within that period. Compensatory time that is not used within the 120-day period is forfeited.

(6) Compensatory time granted hereunder may not be converted to any other form of leave benefit or be paid as a cash benefit under any circumstances, including the death, resignation or termination of the employee.

(7) The director may, subject to the review and approval of the mayor, issue administrative guidelines to the department directors for the granting and reporting of such compensatory time.

(f) Under certain extraordinary circumstances, the mayor may extend, amend and augment the above requirements in the following manner:

(1) The mayor will declare that an extraordinary and/or catastrophic condition exists and will order the human resources director, in consultation with the appropriate department directors, to issue an event-specific procedure to provide compensatory time to certain exempt employees.

(2) The procedure will extend eligibility for compensatory time to exempt employees in specified pay grades required to address the extraordinary condition, but shall in no case specify pay grades beyond pay grade 29.

(3) Maximum hours accumulated in a calendar year quarter may be increased, but shall in no case exceed 60 hours.

(4) The time period for using the compensatory time accumulated under this special subsection may be increased, but shall in no case extend beyond 365 calendar days from the pay period in which the compensatory time was granted.

(g) Notwithstanding the provisions of subsection 14-168(e) of this section, full-time exempt employees may be eligible to be compensated in cash in the form of special assignment pay for time worked in excess of 40 hours in one week, subject to the following limiting criteria:

(1) The work performed must be at a city-operated health clinic facility that is open to the public and provides a service to the public;

(2) The work performed by the full-time, exempt employee must directly involve providing critical service to the public at such a facility;

(3) The hours worked must be in addition to the normal 40 hours of the work week; and

(4) The employees must be employed by the city in a licensed medical professional capacity.

Special assignment pay is subject to approval by director and requires conclusive justification by the director of the department requesting the special assignment pay. Authorized special assignment pay will be reviewed on an annual basis by the director in conjunction with the requesting department. When authorized, the amount of assignment pay will be established on an individual basis for each affected classification by the director but may not be payable at more than 1½ times the employee's regular hourly

rate of pay. Authorized assignment pay will be funded by the requesting department's personnel budget.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-169. Prenatal, parental, and infant wellness leave.

(b) *Prenatal wellness leave.* Eligible employees shall receive a maximum of 160 hours of paid prenatal leave for prenatal wellness healthcare appointments and other absences related to the pregnancy from the first date the leave is used in a 12-month period, regardless of whether more than one birth occurs within that 12-month period. Such leave shall be compensated at the employee's regular rate of pay plus any longevity or supplemental pays. Unused leave shall not be compensable and shall be forfeited (1) on the date the pregnancy ends; (2) upon the date the employee separates from employment with the city; or (3) upon the date the employee moves to a part-time or temporary position, whichever comes first.

(c) *Paid parental leave.* Eligible employees shall receive a maximum 320 hours of paid parental leave to bond and care for a child after the birth or placement of a child with the employee for adoption or foster care from the first date the leave is used in a 12-month period, regardless of whether more than one birth or placement of a child with the employee for adoption or foster care occurs within that 12-month period. Beginning September 1, 2023, eligible employees shall receive a maximum of 480 hours of paid parental leave per 12-month period described above. Any unused paid parental leave shall not be compensable and shall be forfeited (1) on the date after the child's first birthday; (2) on the date after one year since placement of a child with the employee for adoption or foster care; (3) when an employee separates from employment with the city; or (4) when the employee moves to a part-time or temporary position, whichever comes first.

(d) *Infant wellness leave.* Eligible employees shall receive a maximum of 40 hours of infant wellness leave to seek medical care for their infants during the infant's first year after birth. An eligible employee shall not receive more than the maximum allotted amount of infant wellness leave, regardless of whether more than one birth or placement of a child with the employee for adoption or foster care occurs within that 12-month period. Any unused infant wellness leave shall not be compensable and shall be forfeited (1) after the infant's first birthday; (2) upon the date the employee separates from employment with the city; or (3) upon the date the employee moves to a part-time or temporary position, whichever comes first.

(e) The director shall promulgate internal rules regulations regarding employee eligibility for and use of the leaves described in this section.

(f) The provisions of this section are inapplicable to police officers and fire fighters serving in positions that are classified under Chapter 143 of the Texas Local Government Code. Prenatal, parental, and infant wellness leave for employees so classified shall be as provided by applicable provisions of Chapter 34 of this Code.
(Ord. No. 2022-267, § 2, 4-13-2022, eff. 5-14-2022)

Sec. 14-170. Vacations.

(a) Full-time employees, excluding temporary employees in the classified and unclassified service shall be allowed vacation with pay in accordance with the employee's service time and the following schedule:

Years 1 through 4	80 hours
Year 5	120 hours
Years 6 and 7	128 hours
Years 8 and 9	136 hours
Years 10 and 11	144 hours
Year 12	152 hours
Year 13	160 hours
Year 14	168 hours

Year 15	176 hours
Year 16	184 hours
Year 17	192 hours
Year 18 and beyond	200 hours

Service time for purposes of the foregoing accrual rates shall be based upon the employee's total eligible length of service with the city, and for a rehired employee credit shall be afforded for prior service time. Accruals shall be allocated on a fractional basis per pay period, with applicable service time adjustments commencing on the first pay period following the employee's service time anniversary date. Accruals during the first six months of service shall be subject to subsection (c) below.

Accruals of vacation time shall be limited as follows:

(1) Except as provided in item (2) below, accruals of vacation time shall be limited to a maximum of 360 unused hours.

(2) Persons who are actually employed by the city on October 1, 2003, and who have a commencement date for vacation benefits purposes that is prior to January 1, 2000, shall be subject to an accrual limit of 720 unused hours for so long as they remain continuously employed by the city without a gap in service.

Once the applicable maximum limit is reached, accruals shall be suspended and shall not recommence until the employee reduces the balance by use of benefits.

(b) When vacation absence is requested and approved by the department director or designee, the absence during that period shall not be converted to any other type of authorized absence, such as absence with pay, without pay, or sick or injury leave, without approval of the commission.

(c) No employee will accumulate any vacation leave until he has been in the city's service for a period of six months. If he continues in the city's service beyond said six months' period, such employee will be allowed such vacation leave as would have accrued during such six months' period of time.

(d) Vacation leave may be accumulated to a total of 360 or 720 working hours, as applicable, subject to the following:

(1) Each employee of the city shall, upon termination of employment, receive in a lump sum payment, the full amount of his salary for his unused accrued vacation leave. If the termination results from the death of the employee, then the amount shall be payable to the beneficiaries of the employee.

(2) Each employee, upon leaving the employment of the city, shall be paid accumulated vacation in the amount to be determined by taking the average of the hourly base pay of the employee, plus the longevity rate he has attained and has received or been entitled to receive during his last 60 calendar days of employment; provided, however, that the employee has received, for at least another 60 calendar day period of time, a higher base pay than that which he was paid during his last 60 calendar days of employment, then the amount of such payment shall be

[The next page is 1041]

determined by taking the average of the hourly base pay of the employee for the 60-day calendar period for which he was paid a greater hourly base pay, plus the longevity rate he has attained. The computation of the "hourly base rate of pay" shall be based upon the hourly equivalent for 80 hours of scheduled work (excluding overtime) per biweekly pay period, regardless of the actual work hours scheduled per day. For a rehired employee, all computations shall be based upon the employee's then current term of service.

(e) Employees who take an extended leave of absence without pay for personal reasons, consisting of 80 or more hours of absence, shall not accumulate vacation allowances during such absences.

(f) The provisions of this section are inapplicable to police officers and fire fighters serving in positions that are classified under Chapter 143 of the Texas Local Government Code. Vacation leave benefits for employees so classified shall be as provided by applicable provisions of Chapter 34 of this Code, the aforesaid Chapter 143, and any applicable agreements established between the city and employee bargaining groups under Chapter 143.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-171. Leave with pay.

(a) Attendance of employees at conventions, conferences and meetings of like nature is not to be considered a leave from duty but shall be noted on the payroll and such attendance must be authorized by the department director or designee.

(b) In the case of death in the immediate family, the department director may excuse an employee for as many as three calendar days. Immediate family shall include father, mother, sister, brother, husband, wife, child, grandparents, and other relatives if, in the opinion of the department director, such employee's presence due to his individual relationship and the circumstances of the case, would be required. Such absences and the reasons therefore must be reported in a manner prescribed by the director.

(c) Absence of employees due to religious holidays may be covered by the employee's accrued leave, except sick and wellness leave; however, such absences must be approved by the department director or designee.

(d) Employees who leave to serve as members of the uniformed military forces of the United States are to be given pay for whatever time they may have accumulated as vacation time prior to their leaving but shall not accumulate leaves with pay during absences which extend for periods of longer than one month unless otherwise provided by law.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-172. Leave without pay; voluntary leave without pay program.

(a) Department directors may grant, upon good reason, leaves of absence without pay for as many as 14 consecutive calendar days for full-time employees in the classified or unclassified service. All leaves in excess of 14 calendar days shall be reported promptly to the commission on forms prescribed by the commission. Commission approval of leaves without pay extending for more than 14 calendar days shall be required before such leaves shall be authorized. The commission, with the exception of those leaves known as military leave, shall not approve of more than 90 consecutive calendar days of leave at any one time, but the commission may subsequently approve extensions of a leave as long as a total of 180 calendar days of leave without pay in one 12-month period is not exceeded. Leaves without pay extending for more than 180 calendar days shall be authorized only after the request for the same is approved by the council. A leave for less than 180 days and more than 14 calendar days may be cancelled by the commission upon reasonable notice to the employee.

(b) Employees who begin a leave on Monday shall be paid for the preceding Saturday and Sunday. Employees who begin a leave on Tuesday or other weekday which immediately follows a council-approved holiday, or who return from a

leave on the day immediately following such a holiday, shall not be paid for that holiday. Saturdays, Sundays, off-days and holidays which come during a leave without pay shall be without pay, as also shall Saturdays, Sundays and off-days which terminate a leave.

(c) If an employee returns to work before his leave expires, the employee's department director shall notify promptly the human resources department in writing, and, furthermore, the employee's department director will notify the human resources department in writing if an employee fails to return on the working day next following the end of this leave. Failure to return within three days from a leave shall be taken as evidence of job abandonment.

(d) In time of war or emergency, an employee who serves in the Uniformed Military Forces of the United States shall be granted a military leave without pay but shall be eligible for reinstatement to his former position and all other entitlements consistent with the requirements of the Uniformed Services Employment and Reemployment Rights Act of 1994, as amended.

(e) When budgetary constraints require a reduction in expenditures, the mayor is authorized to implement, as needed, a program of voluntary and/or involuntary leaves of absence without pay (furloughs) whereby employees will not come to work and will not be paid on a regular work day. The mayor must designate and approve the parameters of such a program (the Furlough Plan) in advance. The Furlough Plan must specify: (1) whether furloughs will be voluntary, involuntary, or both, (2) the limited duration of time either or both shall be in effect, (3) whether furloughs will be citywide or department specific, (4) the date(s) either or both programs will be activated and implemented, (5) the civil service systems and respective employee groups, pay grades or classifications affected, (6) the minimum and maximum number of days or hours to be taken as furlough, and (7) the time period during which furloughs must be taken. Furloughs must affect all designated employee group members consistently (i.e. all employees in each affected group will be treated the same as all other members of that group) and (8) all Federal and State laws concerning labor standards and pay will be followed.

(f) At the direction of the mayor, the director will promulgate procedures for each type of furlough authorized consistent with sections 14-172(a) through 14-172(e) of this Code and the parameters specified in the Furlough Plan. During the course of a furlough, whether voluntary or involuntary, the mayor may alter or revise specific components of the program to respond to changes in the city's financial condition and the director will modify procedures accordingly. Any furlough taken will be appropriately noted on each affected employee's attendance records and will in no way be regarded as an unauthorized absence, a permanent reduction in pay, a reduction in force or contribute toward disciplinary action. A furlough shall not affect the employee's accrual of sick and vacation leave or eligibility for health insurance or other benefits, subject, however, to any relevant provisions in an applicable pension agreement.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-173. Outside employment of employees.

No employee shall contract for, or be engaged in, any work of any kind after regular working hours for compensation or non-monetary compensation, unless specifically authorized, in writing, to do so by his department director or designee. An employee shall submit a new outside work authorization form annually and/or for each new work assignment. The department director or designee shall not approve a request permitting a member of his department to hold a full-time or part-time position which would deprive another from regular employment by the city. The department director or designee will be required to maintain in his office a permanent record of all outside employment authorization forms for which approval has been sought. Such records shall be maintained for a minimum period of three years.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Secs. 14-174—14-181. Reserved.

DIVISION 15. RULE 15. DISCIPLINARY ACTIONS GENERALLY*

Sec. 14-182. Removal; demotion; suspension.

(a) A department director may terminate the employment of, demote, reduce in pay or temporarily suspend for any period of time any noncivil service employee in his department (or division), which action shall not be subject to appeal or review by the commission.

(b) A department director may, for just cause, indefinitely suspend the employment of, demote, or reduce in pay, any civil service employee in his department (or division) which action shall be subject to appeal and review by the commission pursuant to the authority vested in it by the Charter and these rules.

(c) A department director may temporarily suspend without pay any civil service employee in his/her department (or division) for any period of time not to exceed 90 days. An employee temporarily suspended for up to 15 calendar days, shall not have a right of appeal before the commission, but civil service employees may request a hearing which may be granted at the discretion of the commission. An employee temporarily suspended for 16 to 90 calendar days shall have a right of appeal before the commission pursuant to the authority vested in it by the Charter and these rules.

(d) No indefinite suspension, demotion or reduction in pay of any civil service employee shall become effective until the employee has been given an opportunity by his/her department director to explain the conditions or actions which prompted consideration of one or more of these disciplinary actions. The department director shall give to the employee written notice of the indefinite suspension, demotion or reduction in pay, the effective date thereof, and the reasons or grounds for such action with a copy of the notice to the commission. The disciplinary action shall then become effective immediately, but the employee shall retain the right of appeal to the commission as prescribed in these rules. ARTICLE III. SICK LEAVE AND INJURY

DIVISION 1. GENERALLY

Sec. 14-220. Definitions.

As used in this article, the following words and phrases shall have the meanings ascribed to them in this section unless the context of their usage clearly indicates another meaning:

Activestatus means that the employee is following an approved schedule, performing all the regular duties of his employment at a regularly established business location of the city or another location to which he may be required to travel to perform the regular duties of his employment. An employee shall be deemed to remain on active status for compensable sick leave plan or modified sick leave plan benefits purposes on each day of leave compensated as a city benefit, such as each day of a regular paid vacation or holiday, on authorized paid sick or injury leave, on a scheduled nonworking off day (exempt employees only), on relief of duty with pay, or on an unpaid absence of 80 consecutive work hours or less. An employee on an unpaid absence in excess of 80 consecutive work hours for any reason will not be considered to be on active status for sick leave benefits purposes under either plan while on such unpaid absence. Employees serving temporary disciplinary suspensions of 15 calendar days or less shall be considered to be on active status, but employees serving longer term temporary disciplinary suspensions shall not be considered to be on active status for sick leave benefits purposes under either plan.

Base pay means the employee's current approved salary rate of pay stated in hourly, biweekly or other appropriate rate of pay, excluding overtime, assignment pay, higher classification pay, shift differential, allowances, incentives or any additional compensation based upon his normal working hours.

Benefit or *benefits* means compensation in the form of continuation of salary.

Benefit year means a plan year commencing on September 1 of each calendar year and ending on August 31 of the next calendar year.

Break in service means any termination of employment of any duration for any reason. The term "break in service" shall not include an authorized leave of absence (paid or unpaid) or a temporary disciplinary suspension of any duration.

Compensable sick leave means a benefit payable to an employee only when the employee has available sick leave hours and has been authorized sick leave by the department director because he cannot discharge his regular duties due to a bona fide illness, disease or off duty injury of the employee, or in order to care for a family member due to the family member's bona fide illness, disease or injury, or because the employee requires time off to consult with or receive testing or treatment from a health care provider for the diagnosis or treatment of his bona fide illness, disease or off duty injury.

Compensable sick leave plan means the program of benefits created in division 2 of this article.

Department director means the director of the department to which an employee is assigned or the department director's designee.

Director means the human resources director of the city.

Employee means any permanent or temporary full-time employee of the city in the classified or unclassified service, including firefighters and police officers who are classified under chapter 143 of the Texas Local Government Code.

Family member means the spouse, child or step-child, or parent or step-parent of the employee.

Frozen days means unused accumulated benefit days that an employee who was employed prior to September 1, 1985, had accrued as of August 31, 1985, through the

city's former sick leave plan as provided under former section 14-169 of the City Code which was repealed effective September 1, 1985.

Full-time means regularly assigned to work not less than 40 hours per week.

Modified sick leave plan means the program of benefits created in division 3 of this article.

Part-time means regularly assigned to work less than 40 hours per week.

Sick leave means time off authorized at the discretion of an employee's department director for an employee's own bona fide illness, disease, or off duty injury, or because the employee requires time off to consult with or receive testing or treatment from a health care provider for the diagnosis or treatment of the bona fide illness, disease or off duty injury. Sick leave may also mean time off authorized at the discretion of an employee's department director in order to care for a family member due to the family member's bona fide illness, disease, or injury. Sick leave may be authorized as uncompensated if the employee has no compensable sick leave plan or modified sick leave plan hours available.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-221. Application.

The provisions of this division shall apply to employees who are covered by either the compensable sick leave plan or the modified sick leave plan. No employee may be covered by both plans. Sick leave benefits will not be provided for persons who are employed by the city on a part-time basis or to emergency employees.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-222. Outside employment.

No employee shall engage in any outside employment on any day for which the employee has requested or received compensable or uncompensated sick leave, whether or not related to family medical leave, or workers' compensation benefits with or without salary continuation. Approval of outside employment pursuant to applicable civil service regulations and department policies shall not be construed as authorizing an exception to the foregoing prohibition. A violation of this section shall be grounds for appropriate disciplinary action, including indefinite suspension or termination.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-223. Off days, holidays.

Benefits may only be utilized and will only be charged for days and hours upon which an employee is regularly scheduled to work. Benefits will not be provided for any extra work days or work hours to which an employee may have been assigned to work on an overtime basis.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-224. Benefit amount.

When sick leave is utilized by an active employee, compensable sick leave plan or modified sick leave plan, benefits will be computed for payment purposes on the basis of the employee's then current base pay plus any permanent pay components, such as longevity pay, assignment pay or bilingual pay to which the employee is regularly entitled, regardless of whether charged to available sick leave time allowances or charged to frozen days (in the case of employees whose service commenced prior to September 1, 1985, who may have frozen days available).

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-225. Coverage, transitional provisions.

(a) The modified sick leave plan is a closed enrollment plan that is available only to those employees who have been employed by the city since on or before August 31, 1985, without a break in service and who did not elect to convert to the city's former income protection plan as authorized by law in 1985. Other employees eligible for sick leave benefits, including members of the former income protection plan and persons hired or rehired following a break in service on or after September 1, 1985, shall be members of the compensable sick leave plan.

(b) Employees who are rehired following a break in service shall be members of the compensable sick leave plan and shall be treated in all respects as new employees thereunder, unless

entitled to restoration of modified sick leave plan membership or restoration of other benefits following a layoff or a military leave as provided by law or by civil service regulations.

(c) The modified sick leave plan shall remain unaffected by the creation of the compensable sick leave plan. An employee who is a member of the modified sick leave plan shall continue to accrue benefits as set forth in division 3 of this article for so long as he remains continuously employed by the city without a break in service. The value of frozen days for a modified sick leave plan member determined as of August 31, 1985, under former section 14-225(a) of the City of Houston Code of Ordinances shall apply to his payment upon termination pursuant to section 14-233 or 14-244 of this Code, as applicable; however, frozen days shall be payable as provided in section 14-224 of this Code when utilized by an active employee for authorized compensable sick leave.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-226. Injury in course and scope of employment, workers' compensation benefits and salary continuation.

(a) In a circumstance in which an employee is injured in the course and scope of performing his duties on behalf of the city, the employee's department director may grant the injured employee an injury leave of absence not to exceed 12 months' duration. An employee who qualifies for workers' compensation income benefits under state law shall be paid in accordance with applicable state law for supplemental income or other benefits for which the injured employee may be eligible. In addition to statutory workers' compensation benefits, an injured employee may be paid supplemental salary continuation in an amount not to exceed in the aggregate the maximum of his base salary plus any permanent pay components, such as longevity pay, assignment pay or bilingual pay, to which the employee is regularly entitled. Salary continuation may only be paid in accordance with rules and terms promulgated by the mayor as required elsewhere herein.

(b) Salary continuation benefits provided under this section shall not be charged to the available compensable sick leave plan time allowances or to the modified sick leave plan balance otherwise authorized in these provisions for compensable sick leave.

(c) If, at the end of the first 12-month period of injury leave, the employee is still not able to return to full-time employment but medical prognosis indicates that the employee will be able to resume full-time employment following an additional period of treatment and/or convalescence, the city council may, upon the request of the department director with the concurrence of the director and the mayor, grant additional leaves of absence at full or reduced pay for a period not to exceed an additional 12 months, to be granted in increments of three months.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-227. Sick leave regulations.

The mayor may, upon recommendation of the director, establish regulations for the accounting of sick leave use and benefits under either plan, for the verification of bona fide illness, disease, off duty injury or medical or other treatment by a health care provider, and for discipline of employees who have excessive absences. Any such regulations shall be consistent with this article and other applicable laws and shall be written so as to ensure that benefits and their use are properly accounted for and that sick leave benefits are limited to eligible uses. The director shall submit accounting regulations to the city controller for approval prior to recommending them to the mayor. With the exception of any provisions that relate to employees who work shifts of unusual duration, the foregoing regulations shall provide, as a qualification for sick leave hereunder, that each absence for an eligible reason after 64 hours within a benefit year, regardless of the duration of the absence, whether taken cumulatively or in a single event, must be verified by an attending health care provider's statement on a form promulgated by the director. No assessment by telephone will be accepted as a verification required herein.

Verification may be required prior to the use of 64 hours of sick leave in any instance of potential abuse of sick leave.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-228. Coordination.

All payments for sick leave benefits under this article (whether paid pursuant to the modified sick leave plan, the compensable sick leave plan or as salary continuation under section 14-226 of this Code) shall be subject to coordination with:

(1) Payments to which an employee is entitled by virtue of any policy or self-funded plan of disability insurance benefits provided in whole or in part at the expense of the city; and

(2) Payments to which an employee is entitled by virtue of any state or federally provided or mandated benefit program including, but not limited to, state workers' compensation benefits and federal social security benefits.

The coordination shall extend to payments made thereunder for the purpose of compensating an employee for lost wages or lost capacity to earn wages, but it shall not extend to payments expressly made thereunder for the reimbursement of actual medical expenses incurred by an employee. In any instance where such other payments as described in section 14-228(2) are available, then the sick leave compensation benefits under this Article shall be reduced by an amount equal to the other benefits that are available to the employee, so that the employee shall not receive more than an amount equal to his base salary plus any other permanent pay components.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-229. Removal because of medical impairment.

(a) This section provides the exclusive procedure for determining whether an employee, whether full-time or part-time, who is not subject to chapter 143 of the Local Government Code is sufficiently physically or mentally fit to continue the employee's duties or assignment.

(b) As used in this section, the terms "reasonable accommodation" and "undue hardship" shall have the same meaning as those terms appearing in the Americans with Disability Act of 1990, as amended, (42 U.S.C. section 1210 et seq.) enacted by Congress on July 29, 1990 and in regulations issued under that Act by the United States Equal Employment Opportunity Commission.

(c) The department director shall be responsible for restructuring the employee's duties and responsibilities as a reasonable accommodation so long as the employee can perform the essential job functions of his or her position. Whenever a question exists whether the employee is sufficiently physically or mentally fit to continue the employee's essential job functions, whether or not the employee is on leave of absence, upon receiving a written order by the department director, the employee shall submit to the department a report from the employee's personal physician, psychiatrist, or psychologist, as appropriate. If the report by the employee's personal physician, psychiatrist, or psychologist establishes that the employee is unable to perform the essential job functions of the employee's position, the department director shall attempt to make a reasonable accommodation. If reasonable accommodation cannot be made within the department, then the department director shall notify the director, who shall institute a city-wide search for available positions. The director shall make a report and recommendation to the civil service commission, and the commission shall hold a hearing to determine whether a reasonable accommodation for the employee's disability can be made either in the employee's current position or by transfer to another available position. If the commission determines that a reasonable accommodation can be made, it shall enter an order of accommodation and/or if applicable, reclassifying the employee's position or transferring the employee to another available position, in consultation with the department director or designee. The commission shall not transfer the employee to another department if there is a vacancy in the employee's department that the employee is qualified to perform with or without reasonable accommodation. If

the commission determines that no reasonable accommodation can be made and that the employee will not be able to resume his or her essential job functions with or without a reasonable accommodation within a reasonable period of time, the commission shall enter an order removing the employee from the city's employment roster; however, such order shall not prejudice the employee's ability to seek reappointment with the city in the future, should there be a change in the employee's medical condition.

(d) If the commission, the department director, or the employee questions the report, the commission may appoint a physician, psychiatrist, or psychologist, as appropriate, to examine the employee and to submit a report to the commission, the department director, and the employee.

(e) If the report of the appointed physician, psychiatrist, or psychologist, as appropriate, disagrees with the report of the personal physician, psychiatrist, or psychologist, as appropriate, the commission may appoint an independent three-member board composed of a physician, a psychiatrist, and a psychologist or any combination, as appropriate, to examine the employee. The board shall submit to the commission a written report of its finding regarding whether employee is sufficiently physically or mentally fit to continue the person's essential job function. The commission, at its next regularly scheduled meeting after the date it receives the report of the board, shall determine whether the employee is sufficiently physically or mentally fit to continue the assignment. The commission shall hold a hearing to make the determination of fitness and reasonable accommodation as is provided in subsection (b) above and enter an order accordingly.

(f) The employee shall be responsible for paying the cost of the services of the employee's personal physician, psychiatrist, or psychologist, as appropriate. The city shall pay all other costs. (Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

DIVISION 2. COMPENSABLE SICK LEAVE PLAN

Sec. 14-230. Application.

The compensation benefits provided in this division shall constitute the compensable sick leave plan and shall be available only to those employees who are entitled to coverage hereunder. (Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-231. Compensable sick leave.

(a) The compensable sick leave plan is created effective September 1, 1996. A member of the city's former income protection plan, which is replaced by the compensable sick leave plan, may be entitled to an initial sick leave time allowance hereunder as provided by section 6 of Ordinance No. 96-1088 and regulations promulgated thereunder. The initial sick leave time allowance, if any, shall be in addition to the biweekly sick leave time allowances received under subsection (b).

(b) A compensable sick leave plan member who is actively at work shall receive a biweekly sick leave time allowance of 2.5 hours per biweekly payroll period up to a maximum of 65 hours per benefit year.

(c) Sick leave may not be compensated unless sufficient unused sick leave time allowances are currently available to the employee at the time of the absence. If sick leave time allowances are not available, any authorized sick leave shall be uncompensated unless the employee elects to use other available benefits, such as vacation, to supplement any deficiency in sick leave time allowances.

(d) Except for classified fire fighters of the Houston Fire Department, who are addressed in subsection (f) of this section, in his first full biweekly payroll period that commences in October, each member of the compensable sick leave plan who has used fewer sick leave time allowance hours than he received during the previous benefit year shall be given additional sick leave time allowance hours in an amount equal to the difference between the number of hours received and the number of hours used. However, no additional sick leave time allowance hours shall be given that would cause the employee's available sick leave time allowance hours to exceed 1,040 hours. Once an employee has 1,040 hours of unused sick leave time allowances, the annualized addition for unused hours shall not be provided. The annual addition

authorized in this subsection for unused sick leave time allowance hours shall not apply to initial sick leave time allowances provided under subsection (a).

(e) Except for classified fire fighters of the Houston Fire Department, who are addressed in subsection (g) of this section, upon discharge of employment, all unused sick leave time allowances in excess of 1,040 hours shall be payable to the employee or to the employee's beneficiaries, as applicable, at the employee's rate of base pay, plus longevity, at the time of discharge. The first 1,040 hours of unused sick leave time allowances shall have no value, except when used for compensable sick leave benefits and may not be converted to any other use or benefit, nor shall they be payable upon discharge or death of the employee under any circumstances.

(f) For all classified fire fighters who are compensable sick leave plan members: No later than a member's first full biweekly payroll period that commences in October, each member of the compensable sick leave plan who has used fewer sick leave time allowance hours than the member received during the previous benefit year shall be given additional sick leave time allowance hours in an amount equal to the difference between the numbers of hours received and the number of hours used. However, no additional sick leave allowance hours shall be given that would cause the member's available sick leave time allowance hours to exceed 520. Once a member has 520 hours of unused sick leave time allowance, the annualized addition for unused hours shall not be provided.

(g) For all classified fire fighters who are compensable sick leave plan members: Upon discharge of employment, all unused sick leave time allowances in excess of 520 hours shall be payable to the member or to the member's beneficiaries, as applicable at the member's rate of base pay, plus longevity, at the time of separation. The first 520 hours of unused sick leave time allowances shall have no value, except when used for compensable sick leave benefits and may not be converted to any other use or benefit, nor shall they be payable upon separation or death of the employee under any circumstances.

(h) For all classified fire fighters who are compensable sick leave plan members: Sick Reserve hours, as defined and created by the 2009 Collective Bargaining Agreement between the City of Houston and the Houston Professional Fire Fighters Association, also known as the International Association of Fire Fighters, AFL-CIO-CLC, Local Union 341, shall be available for use only when a member's sick leave is exhausted and shall not be payable upon discharge nor count towards the 520 compensable sick leave plan threshold. For the purposes of leave utilization, sick shall be utilized before Sick Reserve.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015; Ord. No. 2017-462, §§ 7.1, 7.2, 6-28-2017, eff. 7-1-2017)

Sec. 14-232. Personal leave hours.

(a) Compensable sick leave plan members are eligible to receive personal leave hours in accordance with the following schedules:

(1) A fire fighter classified under chapter 143 of the Texas Local Government Code:

Hours of Benefits Used in Preceding Benefit Year	*Personal Leave Hours Earned*
None	16
From one minute to eight hours	8
More than 8 hours	None

(2) Any other compensable sick leave plan member:

Hours of Benefits Used in Preceding Benefit Year	*Personal Leave Hours Earned*
None	24
From one minute to eight hours	16
From eight hours and one minute to 16 hours	8

Hours of Benefits Used in Preceding Benefit Year	*Personal Leave Hours Earned*
More than 16 hours	None

(b) Personal leave hours granted for each benefit year will be awarded as of the first full pay period in October of each succeeding benefit year. Personal leave hours may not be accumulated past August 31 of each benefit year and may only be used during the benefit year in which they are awarded. No compensation of any sort will be granted for personal leave hours that are not timely used during the benefit year awarded.

(c) Personal leave hours may be used in the same manner as vacation and may be taken separately or in conjunction with regular vacation or other authorized leave. Department directors may impose internal regulations, including reasonable advance notice requirements for taking personal leave hours, in order to ensure that working schedules are maintained. However, no department director shall unreasonably continually or arbitrarily deny an employee the right to use earned personal leave hours.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015; Ord. No. 2017-462, § 7.3, 6-28-2017, eff. 7-1-2017)

Sec. 14-233. Frozen days.

(a) Those compensable sick leave plan members who were employed by the city before September 1, 1985, and who have frozen days may utilize them as supplemental compensation in the event of illness or injury and exhaustion of sick leave time allowances available under the compensable sick leave plan. Frozen days may not be utilized for sick leave benefits while compensable sick leave plan time allowances remain available. Also, frozen days may not be utilized to supplement the benefits received through any long term disability policy that may be provided by the city as an adjunct benefit to the compensable sick leave plan.

(b) The value of an employee's remaining frozen days that have not been used as supplemental benefits under subsection (a), above, shall be payable to the employee upon termination of employment with the city, or to the employee's beneficiaries in the event of the death of the employee. Payment under this subsection will be limited to the value of the employee's remaining frozen days that were not used as supplemental benefits; the payment value therefor shall be as calculated as of August 31, 1985, under former section 14-225(a) of the City of Houston Code of Ordinances, regardless of whether the employee is earning a lesser or greater amount at the time of termination.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-234. Long-term disability.

The city may, if it so elects, provide an insurance policy or a self-funded plan of long term

disability coverage for members of the compensable sick leave plan who meet certain eligibility criteria therefor in such form and upon such terms as the city council may, from time to time, elect to offer.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-235. Wellness leave.

(a) During each benefit year, a compensable sick leave plan member may take up to eight hours of wellness leave to go to health care providers for examinations and physicals, annual check ups and prospective health screening/testing of any kind in order to ensure that the employee continues to stay in good health or for the purpose of encouraging early detection of potentially debilitating or life threatening illness or diseases that might otherwise be ignored.

(b) The director may impose internal regulations, including reasonable advance notice requirements for taking any of such hours, in order to ensure that working schedules are maintained. No department director shall unreasonably refuse to allow such leave, but shall ensure that the time is taken when mutually beneficial or convenient for both the employee and the department.

(c) Wellness leave taken by compensable sick leave plan members will be payable in the same manner as sick leave, but shall not be regarded as use of sick leave time allowances, nor shall it be regarded as a use of sick leave for other purposes, such as attendance awards.

(d) Unused wellness leave hours may not be carried from one benefit year to the next; remaining unused hours will be canceled on August 31 of each benefit year. No compensation of any sort will be paid or granted for wellness leave that is not timely used.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Secs. 14-236—14-239. Reserved.

DIVISION 3. MODIFIED SICK LEAVE PLAN

Sec. 14-240. Application.

The benefits provided in this division 3 shall constitute the modified sick leave plan and shall be available only to those employees who are covered by the modified sick leave plan. The meaning of the word "employee" as used in this division shall be so restricted.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-241. Benefit days—Accrual.

(a) Employees shall receive benefit sick days at the rate of 1¼ eight-hour working days for each full month of employment so that they shall be eligible to receive 15 eight-hour benefit days per benefit year.

(b) Benefit days may be accumulated without limitation.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-242. Same—days charged.

When an employee utilizes an accumulated benefit day for sick or injury leave purposes, it will be charged to his or her accumulated benefit days on a first-in-first-out accounting basis so that days used during any benefit year will be charged:

(1) First to frozen days, if any;

(2) Then to unused days accumulated, if any, from the earliest benefit year and then to unused days accumulated, if any, from each succeeding benefit year until all days earned through the expiration of the last preceding benefit year have been exhausted; and

(3) Finally to unused days accumulated, if any, during the then-current benefit year.

No further benefits will be paid when all unused accumulated benefit days have been exhausted.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-243. Same—Annual valuation.

After the conclusion of each benefit year, the director shall determine the number of benefit days accrued during the benefit year that were not utilized during the benefit year, if any, by each employee and the per day value thereof. Such per day value shall be based upon the employee's average daily rate of base pay plus

longevity during the benefit year, and it shall be computed by adding an amount equal to the employee's daily rate of base pay plus longevity as applicable for each biweekly city payroll cycle that commenced during the benefit year and dividing that sum by the number of city biweekly payroll cycles that commenced during the benefit year. To the extent that the city may have two or more different biweekly payroll cycles in effect, then the computation for each employee shall be based upon the payroll cycle applicable to that employee. The per day value of the days so determined shall apply to their payment upon discharge pursuant to section 14-244 of this Code; however, they shall be payable as provided in section 14-224 of this Code when utilized by an active employee for compensable sick leave plan benefits.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-244. Same—Discharge benefit.

The combined value of any unused accumulated benefit days will be payable to the employee, or to the employee's beneficiaries in the event of the death of the employee, upon the discharge or death of the employee, in the following manner:

(1) Remaining frozen days, if any, will be payable at their per day value calculated as of August 31, 1985, as established under former section 14-225(a) of the City of Houston Code of Ordinances.

(2) Remaining days, if any, from each benefit year elapsed since the inception of this plan (September 1, 1985), will be paid at their per day value as established pursuant to section 14-243 of this Code.

(3) Remaining days, if any, from the benefit year in which the employee's employment with the city is discharged will be paid at the employee's daily average rate of base pay plus longevity during the benefit year of discharge, to be computed through the biweekly payroll period in which the discharge occurs in the same manner provided in section 14-243 of this Code.

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-245. Wellness.

Members of the modified sick leave plan may utilize up to eight hours per benefit year of their accrued benefit days for wellness leave to go to health care providers for examinations and physicals, annual checkups and prospective health screening/testing of any kind in order to ensure that the employee continues to stay in good health or for the purpose of encouraging early detection of potentially debilitating or life threatening illness or diseases that might otherwise be ignored. Even though the wellness time used will be charged to their available benefit balance, it shall not be regarded as a use of sick leave for other purposes, such as attendance awards.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-252. Rights cumulative.

The provisions of this article shall not be construed to abridge any right of compensation or benefits arising under state or federal law or regulations, including those benefits arising under section 431.005 of the Texas Government Code.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-253. Military leave.

(a) An employee who is called to duty shall be entitled to be placed on military leave upon written application to the director. Each application shall be accompanied by duly authenticated copies of state or federal military orders, and any other documentation reasonably required by the director to establish the employee's right to leave status under this article. Upon receipt of an application and related documents establishing the right to leave status under this article, the director shall place the employee on military leave status.

(b) An employee on active military duty can be authorized to use up to eighty (80) hours of accrued leave per pay period.

(c) Accrued hours include, but are not limited to, floating holiday or deferred holiday, personal leave hours, compensatory time, vacation hours, or Paid Time Off (PTO) under the Houston Police Department Paid Time Off Program. Sick leave hours and no-value PTO hours may not be used. Value of leave used will be computed using bi-weekly base pay plus longevity rates of pay, and shall include any other pay to which the employee would be entitled to if the employee was using time for a reason other than military leave including, but not limited to, all allowances, assignment pays and certification pays to which the employee was entitled prior to being placed in a military leave status.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

Sec. 14-254. Compensation.

(a) A full-time employee who is granted military leave under this article and whose military salary is less than his city salary shall be entitled to compensation for the difference. Such compensation shall not apply to any period prior to the reporting of the employee for the military call up or following the employee's discharge from the call up. In those instances in which an employee is eligible for compensation at full pay under section 431.005 of the Texas Government Code, the compensation hereunder shall not be payable for any period during which the employee is entitled to compensation thereunder.

(b) The compensation payable under this section shall be paid from time to time in accordance with administrative regulations established by the director with the consent of the city controller. Sec. 14-255. Status for other purposes.

The military leave provided under this Article shall not be construed to make any employee of the city who is on military leave an active employee of the city during his period of service in the armed forces while called up. For all other purposes the employee shall be regarded as being on leave without pay status entitled to those rights of restoration of employment and benefits that are provided by applicable state and federal law.
(Ord. No. 2015-1300, § 2(Exh. A), 12-16-2015)

ARTICLE I. IN GENERAL

Sec. 15-1. Public policy; prohibited interest in city contracts; persons indebted to city.

(a) It shall be against the public policy of the city as expressed by the city council for any employee of the city to bid on or to be awarded any contract being let by the city or to be pecuniarily interested, directly or indirectly, in any contract let by the city, or in any work done by the city, or in any matter wherein the rights or liabilities of the city are or may be involved.

(b) It shall be against the public policy of the city as expressed by the city council for any firm, partnership or corporation, in which any employee of the city has any ownership interest in excess of one percent of the total ownership interest in such firm, partnership or corporation to bid on or to be awarded any contract being let by the city or to be pecuniarily interested, directly or indirectly, in any contract let by the city, or in any work done by the city or in any matter wherein the rights or liabilities of the city are or may be involved.

(c) It shall be against the public policy of the city to enter into any contract or other transaction or business relationship or amend or extend any contract or business transaction that (i) requires the expenditure of funds equal to or exceeding the amount that requires the taking of competitive bids under state law, as amended from time to time, or (ii) grants a right, privilege, lease or franchise valued, in any one year period, in an amount equal to or in excess of the amount prescribed in (i) of this subsection, if the proposed contracting entity or any owner thereof is then indebted to the city or a qualifying entity, as set forth in article VIII of this chapter.

(d) It shall be against the public policy of the city to enter into, or to continue or extend, any contract if it is determined that a proposed or current contracting entity or person is an employer that has been convicted of wage theft, has been assessed an administrative penalty involving wage theft, or has been adjudicated in a civil action of engaging in wage theft by a court of competent jurisdiction, as set forth in article IV of this chapter.

(e) In the event that any contract or work, purchase or sale, is found to have been made in violation of subsections (a) or (b) hereof, then the said contract or work, purchase or sale, shall be null and void and shall be discontinued, and new arrangements shall be entered into as in the case of the incipiency of such contract of work, purchase or sale.

(f) It is a defense to prosecution under this section that the person contracting with the city is employed at one of the city's golf or tennis facilities and has executed a concession contract with the city to teach golf or tennis lessons at such facilities at times outside the person's regular working hours.

(g) It is an exception under this section that an employee of the city or employee's relative may participate in a city assistance program to the same extent as a member of the general public, which participation may be memorialized in a grant, loan, note, deed of trust, contract or other agreement between the city or the city's agent and employee if the employee qualifies for assistance under such program in accordance with the laws, rules, regulations and guidelines applicable to the city assistance program. However, a city employee eligible to participate in a city assistance program under this subsection is prohibited from engaging in any one or more of the following activities as it relates to the employee or any of the employee's relatives within the first, second, or third degree of consanguinity or affinity, as determined under Chapter 573, Texas Government Code:

(1) Exercising any functions or responsibilities with respect to administering the city assistance program including determining eligibility to participate in the city assistance program; or

(2) Participating in a decision-making process with regard to the city assistance program.

Sec. 15-17. Equal employment opportunity clause.

All contracts entered into by the city involving the expenditure of $50,000.00 or more of public funds ("nonexempt city contracts") shall incorporate—by inclusion, attachment, or reference—an equal employment opportunity clause, which shall read as follows:

"EQUAL EMPLOYMENT OPPORTUNITY

"1. The contractor, subcontractor, vendor, supplier, or lessee will not discriminate against any employee or applicant for employment because of sex, race, color, ethnicity, national origin, age, familial status, marital status, military status, religion, disability, sexual orientation, genetic information, gender identity, pregnancy, or any other legally protected characteristic. The contractor, subcontractor, vendor, supplier, or lessee will take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their sex, race, color, ethnicity, national origin, age, familial status, marital status, military status, religion, disability, sexual orientation, genetic information, gender identity, pregnancy, or any other legally protected characteristic. Such action will include, but not be limited to, the following: employment; upgrading; demotion or transfer; recruitment advertising; layoff or termination; rates of pay or other forms of compensation and selection for training, including apprenticeship. The contractor, subcontractor, vendor, supplier, or lessee agrees to post in conspicuous places available to employees, and applicants for em-

ployment, notices to be provided by the city setting forth the provisions of this equal employment opportunity clause.

"2. The contractor, subcontractor, vendor, supplier, or lessee states that all qualified applicants will receive consideration for employment without regard to sex, race, color, ethnicity, national origin, age, familial status, marital status, military status, religion, disability, sexual orientation, genetic information, gender identity, pregnancy, or any other legally protected characteristic.

"3. The contractor, subcontractor, vendor, supplier, or lessee will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding a notice to be provided by the agency contracting officer advising the said labor union or workers' representative of the contractor's and subcontractor's commitments under Section 202 of Executive Order No. 11246, as amended or superseded, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

"4. The contractor, subcontractor, vendor, supplier, or lessee will comply with all provisions of Executive Order No. 11246, as amended or superseded, and the rules, regulations, and relevant orders of the secretary of labor or other federal agency responsible for enforcement of the equal opportunity and affirmative action provisions applicable and will likewise furnish all information and reports required by the mayor and/or contract administrator(s) for purposes of investigation to ascertain and effect compliance with this program.

"5. The contractor, subcontractor, vendor, supplier, or lessee will furnish all information and reports required by Executive Order No. 11246, as amended or superseded, and by the rules, regulations, and orders of the secretary of labor, or pursuant thereto, and will permit access to all books, records, and accounts by the appropriate city and federal officials for purposes of investigations to ascertain compliance with such rules, regulations, and orders. Compliance reports filed at such times as directed shall contain information as to the employment practice policies, program, and workforce statistics of the contractor, subcontractor, vendor, supplier, or lessee.

"6. In the event of the contractor's, subcontractor's, vendor's, supplier's, or lessee's noncompliance with the nondiscrimination clause of this contract or with any of such rules, regulations, or orders, this contract may be cancelled, terminated, or suspended in whole or in part, and the contractor, subcontractor, vendor, supplier, or lessee may be declared ineligible for further city contracts in accordance with procedures provided in Executive Order No. 11246, as amended or superseded, and such other sanctions may be imposed and remedies invoked as provided in the said executive order, or by rule, regulation, or order of the secretary of labor, or as may otherwise be provided by law.

"7. The contractor shall include the provisions of paragraphs 1-8 of this equal employment opportunity clause in every subcontract or purchase order unless exempted by rules, regulations, or orders of the secretary of labor issued pursuant to Section 204 of Executive Order No. 11246 of September 24, 1965, as amended or superseded, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontractor or purchase order as the contracting agency may direct as a means of enforcing such provisions including sanctions for noncompliance; provided, however, that in the event the contractor becomes involved in, or is threatened with litigation with a subcontractor or vendor as a result of such direction by the contract-

ing agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

"8. The contractor shall file and shall cause each of his subcontractors, if any, to file compliance reports with the city in the form and to the extent as may be prescribed by the mayor. Compliance reports filed at such times as directed shall contain information as to the practices, policies, programs, and employment policies and employment statistics of the contractor and each subcontractor."

Sec. 15-20. Appointment of contract administrators.

Sec. 15-21. Function of contract administrators.

(a) It shall be the function of contract administrators to see that all nonexempt city contracts with all contractors, vendors, suppliers, and lessees contain the equal employment opportunity clause and all of the required language as set forth in the Code of Federal Regulations that is applicable for federal and federally assisted contracts. Further, it shall be the function of the contract administrators to determine, after review, if a city contractor is in compliance with this article.

(b) The office of business opportunity contract administrators shall coordinate with the respective departments' contract administrators or des-

ignated department representatives responsible for the oversight of contracts to monitor all contract compliance functions in all city departments and divisions to ensure that contract compliance procedures are applied uniformly throughout the city.

(c) All contract administrators and designated department representatives responsible for the oversight of contracts shall cooperate fully with the OBO director in locating and encouraging minority businesses to enter into contracts involving the expenditure of less than $50,000.00 of city funds ("exempt city contracts"), as well as nonexempt city contracts, and in assisting minority contractors whenever possible.

(d) In addition to the compliance monitoring performed by the contracting departments and OBO, the chief procurement officer shall evaluate performance of contractors as well as compliance with contract terms and conditions. Designated department representatives shall cooperate fully with the chief procurement officer in this regard. (Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013; Ord. No. 2015-668, § 3(Exh. A), 7-8-2015)

Sec. 15-22. Noncompliance of contractor.

In the event that a contract administrator encounters an instance of noncompliance with this chapter, the following procedure will be followed:

(1) Where deficiencies are found to exist in a contractor's wage, hiring, and employment practices, the contract administrator shall issue, in writing, a notice of noncompliance to such contractor, giving that contractor 14 days after receipt of such notice to show cause why the imposition of sanctions should not be instituted. The notice, which shall be served upon the contractor by certified United States mail, return receipt requested, or by commercial carrier that provides written confirmation of delivery, shall set forth:

a. The specific basis and reason, action or failure to act, and all other relevant data, which caused the noncompliance finding;

b. The specific statutes, regulations, and/or ordinances with which the contractor is not complying;

c. The date of the compliance review;

d. A specific date by which the compliance must be achieved by the contractor;

e. The action to be taken by the city for continued noncompliance;

f. The time and place of any informal conciliation conference between the contractor and the contract administrator; and

g. The specific documents, records, or other relevant information concerning the contractor's compliance status requested by the contract administrator.

(2) If, within this 14-day time period, the contractor is unable to show good cause for his failure to resolve deficiencies, the contract administrator shall issue a notice of proposed recommendation of sanctions to the contractor and to the commission. The notice, which shall be served as set forth in item (1), shall set forth:

a. A short and plain statement of the matters that constitute the basis for the imposition of sanctions;

b. A citation of the provisions of the executive order, regulations, or ordinances pursuant to which the requested action may be taken;

c. The date of the compliance review;

d. The date of the informal conciliation conference between the contractor and the contract administrator;

e. The specific documents, records, and other relevant information concerning the contractor's compliance status requested by the contract administrator; and

f. An enumeration of the sanctions being requested.

(3) The contractor shall be afforded 14 days from receipt of a notice of proposed recommendation of sanctions to file an answer and to make a request for a hearing with the commission.

(4) If a hearing is requested within the specified time limit, a hearing shall be provided for the contractor, vendor, or supplier as set forth in this procedure.

(5) If, at the end of the 14-day period, no answer including a hearing request has been made, in writing, the contractor shall be deemed to have waived the right of a hearing, and shall be deemed to have consented to the making of a decision by the commission on the basis of such information as is available.

(6) In the event the address of the contractor is unknown or that notice which has been mailed is returned undelivered, service upon any employee or agent at the contract site shall be deemed service upon the contractor.

(7) Any decision of the commission shall be submitted to the chief procurement officer at the same time the decision is sent to the contractor.

(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013; Ord. No. 2015-668, § 3(Exh. A), 7-8-2015)

Sec. 15-23. Commission hearing procedure.

(a) A record shall be made of all hearings conducted by the commission. All hearings held by the commission shall be public and shall be conducted under rules consistent with the nature of the proceedings; provided, however, that the following rules shall apply to such hearing:

(1) The formal rules of evidence applicable to judicial proceedings are not required. The commission may receive hearsay testimony or evidence which, while technically objectionable, is in its discretion relevant and reasonably reliable.

(2) The commission may exclude irrelevant, cumulative, immaterial, or repetitious evidence.

(3) Only evidence presented before the commission at such hearing may be considered in rendering a final order.

(4) All parties to the hearing may be represented by a licensed attorney, though an attorney is not required.

(5) Each party may present witnesses in his own behalf.

(6) Each party has the right to cross-examine all witnesses.

(7) All witnesses may be placed under the witness rule at the request of any party. The legal department of the city shall have an attorney present who shall represent the city's interest at each hearing held by the commission.

(b) If the contractor does not appear before the commission at the date and time specified, the contract administrator may introduce evidence showing the noncompliance of the contractor, vendor or supplier.

(c) After completion of the presentation of evidence by all parties appearing, the commission shall make written findings and a final order as to whether a violation of this Code exists, setting forth in such written findings the specific conditions which classify the contractor to be in noncompliance in violation of this Code, federal regulations, or executive order. If the commission finds that violation of this Code, federal regulations or executive order exists, the commission shall submit its recommendation to the mayor and city council.

(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013; Ord. No. 2015-668, § 3(Exh. A), 7-8-2015)

Sec. 15-24. Sanctions.

(a) Upon receiving the recommendation of the commission, the mayor and city council shall review and consider the recommendation of the commission within 30 days. The mayor and city council shall make a decision based upon the record of the hearing, including but not limited to reports and records of the contractor and/or the commission.

(b) Subsequent to review, the mayor and city council may:

(1) Adopt the recommendation of the commission;

(2) Adopt the recommendation of the commission with modifications;

(3) Return the recommendation to the commission for development of further factual evidence if the city council finds the record to be incomplete; or

(4) Reject the recommendation and take no action against the contractor.

(c) Additionally, the mayor and city council may impose any other sanctions as provided by law. The decision of the mayor and city council shall be final and exhaust all available administrative remedies.
(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013; Ord. No. 2015-668, § 3(Exh. A), 7-8-2015)

Secs. 15-25—15-40. Reserved.

ARTICLE III. CONTRACTS; PROCUREMENT*

Sec. 15-41. Statement of policy.

It is the policy of the city that all procurements shall be made in accordance with relevant state and federal law, as well as the charter and this Code.
(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-42. Definitions.

As used in this article, the following terms have the meanings set forth below:

Bid means the response submitted by a bidder to an invitation to bid (ITB), including any variation of the competitive bid process, such as best-value bid or multi-step bid.

Proposal means the response submitted by a vendor in response to a request for proposals (RFP) issued by the city.

Procurement means the process by which pricing, qualifications, and bids and/or proposals for goods and services are solicited from vendors, which may result in contracts for the purchase of such goods or services. Procurement includes three phases: planning and sourcing, solicitation (through the selected method of procurement and contract award) and contract administration (performance and closeout).

Public work means a project calling for the construction, repair or renovation of buildings, streets, bridges, sewers, water lines, or any other publicly owned improvements to real property.

Request for proposals (RFP) means the document used to solicit proposals for services or a combination of goods and services from vendors. Price is not the primary evaluation criterion but is a factor considered in the determination of best value and affordability. The process may consist of two steps (prequalification and proposals) or a single step (proposals including consideration of quality).

Public private partnership (P3) means an agreement between the city and the private sector by which the private sector makes physical assets or services available to a public entity for an extended term in exchange for fixed payments over a term of 20 years or more.

Request for qualifications (RFQ) means the document used to solicit statements of qualifications from vendors. The process is generally used to pre-qualify vendors as part of a multi-step process or to select professional services prohibiting price as a consideration or whenever the best interest of the city is served.

Reverse auction means a real time bidding process that occurs online and allows vendors to compete during the short time allowed for the bidding. Each vendor knows the bids of all the others and can repeatedly amend a bid while the auction proceeds.

*__Editor's note__—Ord. No. 2015-668, § 4(Exh. B), 7-8-2015, amended Ch. 15, Art. III, in its entirety to read as herein set out. Formerly said article was entitled Contracts for Public Improvements and Maintenance and derived from Ord. No. 1013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013.

Solicitation means the document used to solicit bids, proposals, or qualifications.

Submission means the document responding to a RFQ.

Threshold means the amount of expenditure that triggers a requirement for a competitive procurement under state law, as may be amended from time to time.

Vendor means a provider of goods and/or services, including professional and construction services, that does business or seeks to do business with the city.

Work services means services that are not of a professional or consulting nature that involve manual labor or are performed by skilled trades.

(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-43. Chief procurement officer; authority; duties.

(a) There is hereby created the position of the chief procurement officer (CPO).

The CPO shall be appointed by the mayor. The CPO shall possess the qualifications and experience necessary to effectively provide leadership on procurement methods and globally accepted public procurement practices. In making procurement decisions, the CPO may delegate purchasing authority to certain departments for a defined period of time, provided that those departments comply with the procurement procedures promulgated by the CPO. The CPO shall develop requirements to be met by delegates prior to commencing any procurement or purchasing activity, including periodic reporting for submission to the CPO. The CPO may at any time withdraw approval for delegated authority if established procedures are not followed.

(b) Except as provided in this article, no department director or individual acting under the department director's authority shall order the procurement in excess of the threshold, of supplies, services, construction, or professional or consulting services other than through the office of or with the approval of the CPO. To the extent of any conflict with any other provision of this Code, this article takes precedence.

(c) The CPO shall:

(1) Lead day-to-day procurement activities across all city departments for direct and indirect sourcing.

(2) Accelerate the implementation of procurement best practices and organizational development efforts.

(3) Transform procurement operations into a strategic function that optimizes the city's strategic and operational objectives.

(4) Drive cross-functional procurement strategy, common process definition and deployment, and personnel and organizational development.

(5) Make procurement decisions and recommendations in accordance with globally accepted public procurement standards and promulgate procurement policies in conjunction with department directors.

(6) When appropriate, consult with user departments and legal counsel when making decisions regarding procurement.

(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-44. Procurement methods.

Whenever practicable, the CPO shall conduct a competitive process for the selection of a vendor associated with contracting opportunities. The following methods or strategies shall be used, as appropriate, based on the type of procurement:

(1) Competitive bid;

(2) Best value bids;

(3) Request for proposals;

(4) Request for qualifications;

(5) Hybrid methods;

(6) Non-competitive methods:

a. Sole source; and

b. Emergency procurements;

(7) Innovative methods and other procurement strategies:

a. Interlocal agreements;

b. Public-private partnerships;

c. Innovative methods;

d. Reverse auctions;

e. Cooperative purchasing; and

f. Other methods as may be authorized by law.

(8) Revenue generating contracts;

(9) Alternative delivery methods for construction projects; and

(10) Informal procurements for purchases under the threshold.

(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-45. Competitive sealed bids; bid opening; bid bonds; rejection of bids; return of bid bonds.

(a) A competitive bidding process or variation (such as best value bid) shall generally be used for the purchase of goods, equipment, and work services.

(b) The CPO shall ensure that the specifications for such purchases are not restrictive and provide maximum opportunity for fair and open competition. When a brand name or make is used as the standard to illustrate the requirements in a specification, the ITB shall include language indicating that the requirement may be met by a different source and shall include the phrase "or equal" so as to avoid issuing specifications that are restrictive.

(c) Bids shall be opened and read in public. The opening shall be held at a time, date, and place designated in the ITB at a location approved by the CPO. The time and date, and when appropriate, the place of the meeting designated in the ITB may be rescheduled without the necessity of readvertising for bids if:

(1) The ITB includes notice that the opening may be rescheduled, provided the rescheduled date or time may not be earlier than the time or date identified in the original solicitation; and

(2) A letter of clarification is issued.

(d) Late or unsealed bids shall not be read and shall be returned to the bidder unopened.

(e) For purposes of this section, bid bond means a valid and enforceable bond that is in substantial compliance with the following requirements:

(1) The bond must be executed by a corporate surety authorized by the state board of insurance to conduct insurance business in the State of Texas and shall comply with any other requirements set out by law or included in the bid package.

(2) The bond must be payable to the city.

(3) The bond must be conditioned such that if the bidder is awarded the contract and then fails to execute the contract timely or to provide any required bonds timely, or to do both, then in that event the surety will be obligated to pay to the city an amount equal to the difference between the bid of the bidder on whom the bond was written and the bid of the bidder who is finally awarded the contract and who executes the contract and provides the required bonds, up to the penal sum of the bond.

(f) All bid documents prepared by or on behalf of the city for public works projects or for contracts for the maintenance of public property shall require:

(1) That bidders must submit, along with their bids, a bid bond or a certified or cashier's check in an amount equal to ten percent of their bids.

(2) That the bidder to whom the contract is awarded must, if the contract amount exceeds the amount set by state law or other amount stated in the project documents, provide a performance bond in an amount equal to 100 percent of the contract amount, as described in section 15-52 of this Code.

(3) That the bidder to whom the contract is awarded must provide a payment bond if the contract is in excess of the amount set by state law or other amount stated in the project documents.

(4) That the bidder to whom the contract is awarded must provide such other bonds as are required by law or by the terms of the bid documents.

(g) Bidders submitting bids for the furnishing of materials only shall have the option of furnishing to the city, with any such bid, a cashier's or certified check in the sum of ten percent of the amount of such bid, in lieu of the bidder's bond required by this section. Such cashier's or certified check shall be furnished on the same terms and conditions as set out in this section.

(h) Upon receipt of a tabulation of bids and a recommendation as to the award of a contract, the CPO shall return to each vendor who has made a bid deposit the bond, cashier's check or certified check representing such deposit, except that the CPO shall retain any such deposit made by the lowest and second lowest bidders, as shown by such tabulation. Any deposit so retained shall be returned at such time as a contract has been awarded.
(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-46. Best value bids.

In compliance with applicable law, the CPO may utilize a best value bid method, a process under which criteria other than price are considered when making an award. The criteria upon which the outcome will be determined will be identified in the ITB.
(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-47. Request for proposals.

(a) Whenever the experience, qualifications, or overall quality is determined to have an impact on the success of the project, the CPO or authorized delegate may elect to utilize the RFP method in order to serve the best interests of the city. The RFP document shall, at a minimum, clearly state the scope of services, the process that will be followed, the criteria that will be considered in the evaluation of proposals, and a list of submission requirements.

(b) The goal of the RFP method is to obtain the best value, highest qualified, or a value-added proposition at an affordable price to the city.

(c) The CPO shall develop procedures for the use of the RFP method, specifying when its use is appropriate, and setting forth best practices and guidance to evaluation committee members.

(d) Consulting services and professional services not covered by the Professional Services Procurement Act, Texas Government Code Chapter 2254, shall generally be procured using the RFP method.
(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-48. Request for qualifications.

(a) The purpose of the RFQ method is to identify the highest qualified vendor with whom the city would then negotiate a reasonable fee.

(b) The Professional Services Procurement Act of the Texas Government Code, Chapter 2254, requires that the selection of architects, engineers, and land surveyors be made based on qualifications. Price shall not be considered in such selection.

(c) Other types of professional services may be procured using a RFQ when the CPO determines that the RFQ method is in the best interest of the city.
(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-49. Noncompetitive methods.

Noncompetitive methods are acceptable only under specific circumstances, such as:

(1) *Sole source.* Procurements of supplies, equipment, goods or services may be made without the use of a competitive method if such supplies, equipment, goods, or services can only be obtained from a single source. The CPO shall promulgate procedures for the review of a sole source requested by an operating department These procedures shall address the evidence necessary to demonstrate that the unique specifications, qualities, or capabilities of the items substantiate a sole source exception.

(2) *Emergency.* The CPO may execute contracts without the use of a competitive method without prior approval of city council when procurements are necessary (i) due to a threat to public health or safety, (ii) for repairs to city property in order to protect against further loss or damage, (iii) to prevent or minimize seri-

ous disruption in city services, (iv) to ensure the integrity of city records, or (v) in the reasonable opinion of the CPO, whenever the best interests of the city is served. The CPO shall implement procedures to meet these requirements, and when practicable, conduct informal competition for the award of an emergency contract. Any emergency purchases made in excess of the threshold shall be submitted to city council for approval as soon as practicable.

(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-50. Innovative methods.

Subject to applicable law, the CPO may conduct procurements using innovative methods, including, but not limited to, electronic procurement, reverse auctions, prequalification and pilot procurement programs that have no cost to the city. In order to implement innovative methods of procurement, either directly or through a vendor, the CPO must make a determination that such process is competitive and in the best interest of the city. Innovative methods may take into consideration market conditions, spend analysis, and other factors. Such methods include:

(1) *Interlocal agreements.* The city may enter into interlocal agreements with other governmental entities in order to cooperatively perform governmental functions and services, including purchasing. Such agreements will be entered into as authorized by state and federal law.

(2) *Public-private partnerships (P3s).* The city may enter into public-private partnerships or "P3s" in accordance with state law. If the city elects to move forward with a P3 proposal, the city will conduct a competitive process for the selection of a vendor and negotiation of a contract.

(3) As an alternative or in addition to directly conducting procurement using innovative methods, the CPO may conduct reverse auctions, electronic auctions, or provide an on-line or electronic forum for competitive bids, requests for qualifications and requests for proposals and other types of innovative methods of procurement on the city's behalf.

(4) *Cooperatives.* Under Texas law, the city may participate in a cooperative purchasing program with another local government or a local cooperative organization. Provided the city purchases goods and services in accordance with the cooperative purchasing requirements, the city is deemed to have satisfied state law competitive procurement requirements for the purchase of the goods or services.

(5) Other methods as may be authorized by law.

(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-51. Revenue-generating contracts.

The city may enter into contracts with third parties for the purpose of generating revenue for the city. The CPO shall be informed prior to or at the commencement of the negotiation of all revenue-generating contracts. The CPO shall promulgate policies to ensure that a competitive procurement is conducted when market conditions indicate doing so would be in the best interests of the city.
(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-52. Informal procurement.

Any purchase exceeding $3,000.00 but less than the threshold may be made by soliciting quotes from one or more vendors, provided that a city-wide contract is not available for the goods or services required. Such procurement opportunity need not be published in a newspaper of general circulation, but the city may elect to publish such opportunities on a central procurement website so as to promote competition.
(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-53. Competitive bidding and alternative delivery methods for construction.

(a) Construction shall generally require a competitive bid process; however, the CPO may choose to conduct a variation of the competitive process as authorized by law, whenever the best interest of the city will be served.

(b) All solicitations for construction projects in excess of the amount set in state law or other amount set forth in the project documents shall include a requirement that, if awarded the work, the vendor shall furnish a performance bond. For purposes of this requirement, "performance bond" means a valid and enforceable bond which is in substantial compliance with the following requirements:

(1) The bond must be executed by a corporate surety authorized by the state board of insurance to conduct insurance business in the State of Texas.

(2) The bond must be payable to the city.

(3) The bond must be conditioned upon the faithful performance of work in accordance with the plans, specifications and contract documents.

(4) The bond must comply with any special requirements contained in the bid package.

(5) The bond must be accompanied by satisfactory evidence of the authority of the surety's agent to bind the surety by executing the bond.

(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-54. Protests.

The CPO shall establish protest procedures and steps to be taken by vendors and the city when a vendor is dissatisfied with a procurement process. The bid protest process does not create any due process right, but is intended to allow vendors the opportunity to raise concerns regarding actions taken regarding a competitive solicitation.

(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-55. Conflicts of interest.

The CPO shall establish a process for addressing conflicts of interest in the procurement and contracting process. Such conflicts may be set forth in state law, common law, the city charter, and/or city ordinance. Anyone involved in procurement is required to disclose any conflict or appearance of conflict before participating in a procurement process.

(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-56. Ethics, values, and guiding principles.

Procurement personnel and others involved in a procurement must exhibit the highest level of ethical behavior so as to protect the integrity of the procurement process. Procurement professionals and those involved in any procurement in the city shall observe the values and guiding principles globally accepted and promulgated by public procurement professional organizations. Such values and guiding principles include but are not limited to: transparency, impartiality, accountability, professionalism, ethics and service.

(Ord. No. 2015-668, § 4(Exh. B), 7-8-2015)

Sec. 15-57. Prohibited practices.

The following practices are prohibited:

(1) *Restrictive specifications.* City employees and officials are prohibited from issuing specifications that restrict fair and open competition for a contracting opportunity. This provision does not prohibit the city from engaging in non-competitive procurements when updating or upgrading a standardized system that was originally procured through a competitive process.

(2) *Bid splitting, sequential bidding, and component purchases.* In accordance with state law, it shall be unlawful to split purchases for the purpose of avoiding a procurement process. The appropriate process shall be determined based on the entirety of the scope to fulfill the project or purpose intended. Public officials and employees shall not segregate components of a project to avoid a procurement or approval process.

(3) *Bid rotating; bid rigging.* It shall be unlawful for any vendor to engage in bid rotating practices. Bid rotation occurs when vendors take turns being the designated successful vendor; for example, each vendor is designated to be the successful bidder on certain contracts, with others

designated to win other contracts. Bid rigging is a form of fraud in which a contract is promised to one party even though for the sake of appearance several other parties also present a bid. Such practices interfere with the competitive environment sought for public procurements and are strictly prohibited.

(4) Any other act prohibited by law.

(Ord. No. 2013-1081, § 4, 11-20-2013)

Sec. 15-62. Wage theft complaint involving city contracts; procedures.

(a) A person employed in connection with a city contract who has a good faith belief that he is the victim of wage theft may file a wage theft complaint with the Inspector General on a form prescribed by the IG.

(b) The IG shall first determine whether a wage theft complaint alleges wage theft as defined in this article and, if the complaint is found deficient in that regard, shall dismiss the complaint. A complaint shall likewise be dismissed, and the complainant referred to the commission, if no city contract is involved in the complaint. No record shall be maintained relating to any complaint dismissed under this section.

(c) If the IG is satisfied that a complaint alleges sufficient facts to support further inquiry, the complaint shall be investigated in a manner consistent with similar investigations of employee misconduct or other matters by a person trained in employment law, including the taking of sworn statements from the complainant and the employer's personnel and the inspection of relevant records.

(d) Upon completion of the investigation of a wage theft complaint, the IG shall determine whether the complaint is meritorious and sustain or dismiss the complaint.

(f) The city or the employer may request that the complaint be resolved by mediation.

(g) If no resolution is achieved, the complainant shall be referred to the commission unless the same claim is then on file with that agency. The matter shall also be referred to the city attorney for appropriate action in the best interests of the city.

(h) Should the IG determine, with respect to a wage theft complaint, that the complainant also filed the same complaint with the commission, the IG shall seek to determine status of the complaint at the commission and, if it appears that the commission may conclude its action on that complaint within a reasonable period of time, may abate his review or investigation pending the final resolution of the complaint by the commission.

(b) For purposes of this section, any conviction of an employer for wage theft occurring within the five year period preceding the effective date of this article or at any time thereafter shall be cause for inclusion in the database. No assessment of an administrative penalty relating to wage theft or adjudication of wage theft by a civil court prior to the effective date of this article shall be a basis for including an employer in the database.

(c) No employer shall be included in the database unless:

(1) The finance director has received confirmation from the Inspector General that an employer has met at least one of the criteria set forth in subsection (a) of this section; or

(2) The employer named in such complaint has received 30 days' written notice of the city's intent to place its name in the database and has failed to demonstrate that the criteria for placement on the database have not been met.

(d) An employer shall be removed from the database if more than five years has elapsed since the date of the employer's most recent conviction, adjudication, or assessment of administrative penalty relating to wage theft, as set forth in subsection (a) of this section.

If the Inspector General determines that retaliation has occurred, the employer shall be subject to the sanctions provided in this article. For purposes of this provision, retaliation means action to discharge from employment, discipline or otherwise punish an employee for filing a wage theft complaint in good faith.

(a) If, at the time an employer is included in the wage theft database, the employer is then serving as a contractor, subcontractor or as a goods or materials supplier in connection with any city contract, the finance director and Inspector General shall notify the city attorney who may take appropriate action to serve the best interests of the city, including the use of remedies provided by the city's contract with the employer.

(b) If an employer included in the wage theft database currently holds, or wishes to apply for or renew, an occupational license or permit listed in section 1-10(b)(8) of this Code, the appropriate director or other licensing official or board shall, for a period of five years following the employer's inclusion in the wage theft database, revoke or refuse to issue or renew any such occupational license or permit, provided such action is based upon the employer's conviction of an offense set forth in section 1-10(b)(8) of this Code.

(c) Each licensing official or board shall notify the employer in writing by certified mail of the refusal to issue, revocation of, or refusal to renew, the license or permit pursuant to the preceding subsection and shall cite the violation of this article and section 1-10(b)(8) of this Code as the grounds on which such decision was made. The employer shall have all applicable rights of appeal or contest relating to the refusal to issue or renew or to the revocation of a license or permit under this section.

ARTICLE V. MINORITY, WOMEN AND SMALL BUSINESS ENTERPRISES

Sec. 15-81. Declaration of policy.

(a) It is the policy of the city to stimulate the growth of local minority, women and small business enterprises by encouraging the full participation of these business enterprises in various phases of city contracting, as set forth in this article. The purposes and objectives of this article are:

(1) To promote equal opportunity for participation amongst local minority, women and small business enterprises in all phases of city contracting;

(2) To increase the utilization of such local firms in providing certain goods and services;

(3) To provide opportunities to broaden and enhance local firms' ranges of capacities; and

(4) To increase opportunities for such local firms to serve as contractors, in addition to acting as subcontractors to others, there applicable, in an effort to remedy discriminatory practices and eliminate statistical disparities in city contracting.

(b) This article is intended to be remedial in nature and to continue only until its purposes and objectives are achieved. At least every five years the city shall make its best efforts to initiate a review of its minority and women business enterprise program, the results of which shall be provided to city council, who shall determine, upon its receipt of recommendations and the consideration of other relevant information from the OBO director, whether there is strong statistical and anecdotal evidence of discrimination against minority and women business enterprises in city contracting warranting the continuation of a race and gender conscious minority and women business enterprise program.

Sec. 15-83. Program elements.

(a) Based upon a review of annual awards and purchases by affected city departments, the office of business opportunity shall each year submit a progress report to the city council. The report shall include two percentage figures that are intended to as closely as possible represent the ratio of the prior year's measured utilization and availability of local MWSBEs to do business in:

(1) The supply of goods and nonpersonal or nonprofessional services; and

(2) The performance of personal or professional services;

to the prior year's total local business community utilization and availability to do business in each of the two named fields of city contracting.

In addition, the report shall include percentage figures that are intended to as closely as possible represent the ratio of the prior year's measured utilization and availability of local MWSBEs to do business in construction to the prior year's total local business community utilization and availability to do business in city construction contracting. The report may also include figures and other evidence of factors prescribed in Part 26, Title 49 of the Code of Federal Regulations in the year the report is made that may affect the aforementioned ratio of utilization and availability.

(b) Based upon the measured utilization and availability and any other relevant factors prescribed in Part 26, Title 49 of the Code of Federal Regulations and identified in the report submitted pursuant to subsection (a) above, city council shall from time to time set annual citywide percentage goals for city contracting with MWSBEs in each of the two named categories described in subsection (a)(1) and (2) above and for contracting with MWSBEs in the construction category. The adjustment, if any, in the percentage goals shall be made during the first quarter of the fiscal year.

(c) It is the responsibility of each city department to determine which contracts initiated by it are goal-oriented contracts and which are regulated contracts. If the determination is made that a contract is a goal-oriented contract or a regulated contract, the initiating department shall review the contract and shall determine, by reference to the MWSBE register, the number of certified MWSBEs in each of the two named categories described in subsection (a)(1) and (2), above, and for construction, the number of certified MWSBEs in the construction category. The initiating department director or his or her

designee shall determine whether the contract is one to which MWSBE provisions should be applied.

(1) These provisions are not required to be applied in the following circumstances:

a. A public or administrative emergency exists which requires the goods or services to be provided with unusual immediacy;

b. The service or goods requested are of such a specialized, technical or unique nature as to require the city department to be able to select its contractor without application of MWSBE provisions (such as contracts for expert witnesses, certain financial advisors or technical consultants);

c. If application of MWSBE provisions would impose an unwarranted economic burden or risk on the city or unduly delay acquisition of the goods or services, or would otherwise not be in the best interest of the city; or

d. If the possible MWSBE participation level based on MWSBE availability would produce negligible MWSBE participation.

If one of the above-listed conditions is determined to exist, the department director shall certify that determination in writing prior to the award of the contract, specifying the conditions which lead to the determination, and submit the determination to the OBO director for review and approval.

(2) If the contract does not fall within one of the above-listed exceptions, based upon its overall review, the initiating department shall assign an appropriate MWSBE participation level, if any, for the contract (whether goal-oriented or regulated) considering the local availability of certified MWSBEs in the contract field.

The intention of this article is to provide administrative flexibility in the application of MWSBE provisions of this Code and in the percentage participation level on a contract-by-contract basis so as not to limit access to city contracting by nonminority-owned, non-women-owned or established business enterprises to a greater degree than necessary to meet the city-wide annual goal and the policies and objectives of this article.

(d) The bidding documents and the contract documents for goal-oriented contracts for which a MWSBE participation level has been established shall contain a provision detailing the purposes and objectives of the city's MWSBE ordinance and shall incorporate by reference this article and the then-current motion or ordinance establishing MWSBE annual goals. Regulated contracts which are determined to have significant subcontracting potential for which a MWSBE participation level has been established shall contain contractual provisions (and proposal provisions if submitted for proposals or for bids) requiring the contractor to meet or exceed the determined MWSBE participation level for that contract, or to establish that it has made good-faith efforts to do so, and that notwithstanding such efforts, was unable to meet or exceed the determined participation levels. The OBO director shall establish procedures defining good-faith efforts. These procedures will be reviewed and approved by the mayor and the city attorney. (Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013)

Sec. 15-84. Office of business opportunity.

(a) Applications for certification as a MWSBE and any addenda thereto shall be made on a form promulgated by the OBO director, and the requirements for certification shall be consistent with the applicable requirements set forth in subsection (b) below.

(b) The office of business opportunity has responsibility for:

(1) Establishing procedures for the implementation of this article, and reviewing and approving procedures established by city departments, such procedures to be narrowly designed to attain the purposes and objectives specified herein

without unduly limiting nonminority-owned or nonwoman-owned or established business enterprises. Such procedures shall be reviewed and approved by the mayor and by the city attorney prior to implementation;

(2) Certifying businesses as minority, small or women business enterprises and maintaining and distributing to affected city departments a current register, updated monthly, of such business (including a separate listing of such businesses whose applications for certification are pending) specifying the categories of city contracting represented by the certified MWSBEs;

(3) Developing educational programs for and otherwise assisting (without offering favoritism in relation to the competitive bidding system) MWSBEs to compete effectively for city contracts;

(4) Making recommendations to the mayor, city council and city departments to further the policies and objectives of this article, including but not limited to assisting city departments in setting contract-specific MWSBE goals;

(5) Reviewing documentation from potential contractors and from contractors concerning good-faith efforts made to meet or exceed the participation level for contracts. The final recommendation to city council for award or for acceptance of work shall be the city department's, although the office of business opportunity may take exception;

(6) Compiling a report of the progress of city departments, by department, in attaining the city-wide goals set by city council. This report shall be based upon MWSBE contractor and subcontractor information, to be specified by the office of business opportunity. Upon completion, the report is to be submitted quarterly to city council members, the mayor and all affected city department directors for their information;

(7) Receiving and reviewing complaints and suggestions concerning the MWSBE program from contractors, MWSBEs and city departments; and

(8) Without limiting the authority of the office of business opportunity to establish procedures that are consistent with the terms of this article, the office of business opportunity is specifically directed to promulgate and implement procedures as follows:

a. Grievance procedures for any person aggrieved by any decision of the office of business opportunity under this article. The procedures shall include notice and a hearing before an impartial hearing officer who shall be appointed by the mayor;

b. Mediation procedures for the resolution of disputes between contractors or bidders and MWSBE participants or potential participants with respect to any aspect of compliance with this article, including, without limitation, any assertion that a contractor, subcontractor, or MWSBE has failed to make good faith efforts to comply with this article;

c. Procedures to implement and enforce any sanctions provided under this article;

d. Procedures to ensure performance of work by MWSBEs, which procedures shall include: (i) a requirement that no more than 50 percent of their work may be subcontracted, without a specific waiver from the office of business opportunity for cause; (ii) a requirement that the minority person, small business or woman owner of a MWSBE have the necessary experience, expertise, credentials and regulatory authority to conduct the type of business for which the business is certified; (iii) a requirement that bidders and contractors make good faith efforts to meet or exceed

contract MWSBE goals; and (iv) a requirement that MWSBEs accurately represent all material information required for certification and truly perform a commercially useful function;

e. Procedures for counting participation by MWSBEs as prime contractors, subcontractors, suppliers and joint venturers on city contracts, which procedures shall ensure that all work performed by MWSBEs is included in the computation of the progress made toward meeting the annual city-wide goals;

f. Procedures to ensure that this article is limited in its application to the certification of locally based MWSBEs;

g. Procedures to coordinate the operation of this article with other local MWSBE programs, which may include reliance upon certification procedures of other entities that are determined to be reliable and equivalent to this article;

h. Procedures to ensure access to necessary records of prime contractors and subcontractors on city contracts; and

i. Procedures for handling theft of services (wage theft) complaints of employees of city contractors and subcontractors.

(c) MWSBE certification shall be valid for a period of three years from the date of certification; provided, however, all applicants certified as MWSBEs shall be subject to review on an annual basis pursuant to procedures established by the OBO director to ensure compliance with all applicable provisions of this article.

(d) Applications for renewal of MWSBE certification shall be evaluated under the same criteria and subject to the same manner of review as original applications.

(e) All procedures established under this section shall be reviewed and approved by the city attorney prior to implementation. A copy of all procedures hereunder shall be maintained in the office of business opportunity for inspection, and copies may be purchased at the fees prescribed by law.

(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013)

Sec. 15-84.1. Responsibilities of city departments; department utilization plan.

(a) Each department director shall be accountable for the oversight and implementation of the following activities:

(1) Informing MWSBE organizations or associations of the department's procurement procedures and future procurement opportunities;

(2) Ensuring that department bid solicitations and requests for proposals are sent to MWSBEs in a timely manner;

(3) Referring MWSBEs to technical assistance services available from the office of business opportunity and other organizations that provide such services;

(4) Reviewing each request for waiver or modification of participation goals prior to its submission to the office of business opportunity for approval;

(5) Monitoring the department's procurement activities to ensure compliance with and progress towards the city-wide participation goals; and

(6) Providing the OBO director with the departmental utilization plan prescribed in subsection (b) of this section and any other documentation requested by the office of business opportunity necessary in evaluating a department's progress in achieving city-wide participation goals.

(b) Each department that has procured goods and services in excess of three million dollars during the fiscal year ending on June 30th of the preceding calendar year shall be required to

submit a departmental utilization plan for the following fiscal year commencing on July 1st. Departmental utilizations plans shall be submitted on or before June 15, 2014, and not later than June 15th of each calendar year thereafter.

(c) Each department director shall be responsible for creating, submitting, and implementing an annual departmental utilization plan that shall include, at a minimum, the following:

(1) The department's forecast of anticipated projects and contract specific goals for the upcoming fiscal year;

(2) A detailed, written explanation for any departmental goal that is not consistent with the overall city-wide goals for MWSBE participation;

(3) A list of the names and titles of department personnel responsible for the implementation of the departmental utilization plan;

(4) The methods and relevant activities proposed for achieving the department's participation goals; and

(d) Upon review by the OBO director, all departmental utilization plans shall be submitted to the mayor and city council for final approval.

(e) A departmental utilization plan may be amended to reflect changes in the department's projected procurements, expenditures, or other relevant circumstances and resulting changes in the department's participation goals. Such amendments shall be submitted to the OBO director for review and shall be submitted to city council for final approval not less than 30 days prior to the proposed date of implementation.

(f) Each department director shall be accountable for setting and making reasonable efforts to meet the participation goals stated its departmental utilization plan. Departments shall, at minimum, engage in outreach activities that encourage eligible businesses to apply for certification as MWSBEs and encourage MWSBEs to participate in all facets of the procurement process and compete for city contracts, including contracts awarded by negotiated acquisition and emergency and sole source contracts.
(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013)

Sec. 15-85. Filing of plan.

Before execution of any contract or issuance of any purchase order for which a MWSBE goal has been established, a bidder or potential contractor shall submit a plan setting forth how it intends to meet the contract MWSBE goal or documentation demonstrating its proof of good faith efforts to meet the contract MWSBE goal. After execution of a contract or receipt of a purchase order, the contractor shall comply with the submitted plan, unless it has received approval from the OBO director for a deviation therefrom. Approval shall not be unreasonably withheld. While it is not a requirement that a contractor meet its goal, it is required that the contractor objectively demonstrate to the office of business opportunity that it has made good faith efforts to meet the goal. To this end, the contractor shall maintain records as prescribed by the office of business opportunity demonstrating its efforts at compliance. The contractor shall be required to submit to the office of business opportunity reports of its efforts under this article in such form or manner as shall be prescribed by the OBO director.
(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013)

Sec. 15-86. Sanctions.

(a) The OBO director is authorized to suspend any contractor who has failed to make good faith efforts to meet any goal established under this article from engaging in any contract with the city for a period up to, but not to exceed, five years. The OBO director is also authorized to suspend any MWSBE who has failed to make good faith efforts to meet all requirements necessary for participation as a MWSBE from engaging in any contract affected by this article for a period up to, but not to exceed, five years.

(b) In accordance with section 15-84 of this Code, the office of business opportunity shall establish procedures for the imposition of sanctions and shall ensure that no sanction is imposed without notice of the grounds being given and an opportunity for a hearing consistent with the procedures set forth in sections 15-22, 15-23, and 15-24 of this Code. Any procedure established shall be consistent with state law.
(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013)

Sec. 15-87. Determination of established business enterprise status.

(a) Based upon a review of data submitted by MWSBEs or MWSBE applicants and any other information available from its files or the files of any other governmental entity, the office of business opportunity shall determine the size of each MWSBE or MWSBE applicant by determining the average of the gross receipts for the prior three years and the average number of employees for the 12 calendar months immediately preceding the review, as applicable. The calculation of size shall be based solely upon the size standards and methods of calculation identified by the U.S. Small Business Administration (SBA) including, without limitation those set forth in 13 C.F.R. part 121, subpart A, secs. 121.101 through 121.107, and sec. 121.201, any amendment or successor thereto, or any other document defining such size standards or the calculation thereof that has been fully and finally adopted by the SBA. The review shall be applicable to business entities applying for initial certification as a MWSBE or to certified MWSBEs, provided that such review may not be initiated until the applicant or certified MWSBE has established a business history of sufficient length to allow calculation of size based on the three year financial or 12 month employee data, as applicable.

(b) Following the review described in this section, each certified MWSBE or MWSBE applicant shall be re-evaluated under this section on an annual basis based upon the size standards and methods of calculation identified by the SBA and procedures established by the OBO director to ensure compliance with all applicable provisions of this article.

(c) All MWSBEs and MWSBE applicants shall, upon written request of the OBO director, provide to the office of business opportunity copies of any and all documents, including without limitation financial statements and tax records, requested by the director in connection with the review authorized in subsection (a) of this section, not later than 20 business days following the date of mailing of the request. Failure to timely and completely comply with any such request will authorize the imposition of sanctions under section 15-86 of this Code, or denial of certification in the case of a MWSBE applicant.

(d) Following the review authorized by subsection (a) of this section, the office of business opportunity shall classify each MWSBE or MWSBE applicant whose size meets or exceeds the size standard identified by the SBA for that class of enterprise as an established business enterprise. The classification shall be effective as of the date of mailing of the notice provided in section 15-88 of this Code.
(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013)

Sec. 15-88. Notice, appeal and waiver.

(a) Immediately upon classification of a certified MWSBE or MWSBE applicant as an established business enterprise pursuant to section 15-87 of this Code, the office of business opportunity shall notify the business so classified of the action by United States certified mail, return receipt requested, addressed to the last known address of the business and deemed given when placed in a United States mail depository.

(b) Each notice shall inform the affected MWSBE or MWSBE applicant of the following matters:

(1) That the MWSBE or MWSBE applicant has been classified as an established business enterprise;

(2) That the classification is effective as of the date of mailing of the notice;

(3) That the MWSBE or MWSBE applicant may appeal the classification or seek a

waiver of the classification pursuant to the procedures established under this section;

(4) That the provisions of section 15-89 of this chapter shall become enforceable with respect to any certified MWSBE one year following the notice of classification, unless the decision is reversed or a waiver is granted and the classification is withdrawn prior to the expiration of the one-year period; and

(5) That any MWSBE applicant deemed ineligible for certification based upon its classification as an established business enterprise shall remain ineligible for certification unless and until any withdrawal of the classification as an established business enterprise is granted pursuant to an appeal or a request for waiver conducted under this section.

(c) In order to appeal a classification as an established business enterprise, a MWSBE or MWSBE applicant must submit to the OBO director a written notice of appeal no later than 60 days following the date of mailing of the notice of classification. The sole basis for an appeal shall be that the office of business opportunity has incorrectly calculated the size of the business according to SBA standards based upon incorrect information or error in computation. The notice of appeal shall be accompanied by any documentation necessary to demonstrate the asserted error. If the OBO director finds that an error or errors were made in calculating the size of the business and that any such error resulted in an incorrect classification as an established business enterprise, the classification shall be withdrawn and the business promptly notified of the withdrawal. If the OBO director finds that no error was made, or that any error would not materially alter the classification, he shall notify the business that the classification is not altered, by certified mail, return receipt requested. The business may within ten days of the date of mailing of the notice submit to the OBO director a written request for a hearing, which hearing shall be conducted under the procedures set forth in subsections (e) through (g) of this section.

(d) In order to seek a waiver of a classification as an established business enterprise, a MWSBE or MWSBE applicant must submit to the OBO director a written request for a hearing no later than 60 days following the date of mailing of the notice of classification. The written request shall include documentary evidence, including but not limited to financial statements and tax records, relevant to the following criteria:

(1) Profitability of the enterprise;

(2) Sales of the enterprise, including a demonstration that 55 percent or more of the enterprise's sales, within the period utilized by the office of business opportunity in its classification determination, are not related to city contracts;

(3) Ability of the MWSBE or MWSBE applicant to obtain bonding, if the enterprise acts as a prime contractor or in a category in which obtaining bonding is required; and

(4) Positive comparison of the enterprise's business and financial profile with those of non-MWSBE firms in the same business category based on an objective industry standard.

(e) The OBO director shall notify the affected MWSBE or MWSBE applicant of the place and time of a hearing before the OBO director or his designee to consider an appeal requested under subsection (c) of this section, or a request for waiver of the classification under subsection (d) of this section, or both, as applicable, by United States certified mail, return receipt requested. The hearing shall be set not later than 30 days following receipt of the request, provided that the OBO director or his designee may in his discretion extend such date by a reasonable period for good and sufficient cause shown. Hearings for businesses that have both appealed under subsection (c) of this section and requested a waiver under subsection (d) of this section may be consolidated in a single hearing at the discretion of the OBO director or his designee.

(f) The OBO director shall promulgate written procedures for the conduct of hearings. The OBO director or his designee shall hear each

appeal or request for waiver and shall consider only the criteria set forth under subsections (c) and (d)(1) through (d)(4) of this section, as applicable, in determining whether to withdraw the classification of the affected business as an established business enterprise. The OBO director shall develop objective standards for evaluating each factor set forth under subsections (d)(1) through (d)(4) based upon recognized industry or governmental practices or standards. The burden shall be on the business to demonstrate by clear, convincing and cogent evidence either that a material error in classification was made or that the granting of a waiver is justified by at least two of the criteria set forth in subsections (d)(1) through (d)(4) of this section.

(g) Notwithstanding any provision of this Code or of the rules or regulations of the office of business opportunity to the contrary, including any provision for mediation of a decision of the OBO director, the decision of the OBO director or his designee regarding appeal or waiver shall be final.
(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013)

Sec. 15-89. Effect of classification; re-application.

(a) Upon the expiration of one year following the notice of classification as an established business enterprise referenced in section 15-88(a) of this Code, and in the absence of any withdrawal of such classification by the OBO director, each certified MWSBE so classified shall be ineligible for future participation in any city contract as a MWSBE and its certification shall be withdrawn. No application for re-certification shall be granted absent the prior determination of the OBO director that the applicant does not meet or exceed the SBA size standards referenced in section 15-87(a) of this Code. Certified businesses whose evaluation results in classification as an established business enterprise shall timely file any re-certification application due prior to expiration of the one year extension of program eligibility referenced in this section, but the application shall not be granted unless and until the classification is withdrawn or waived.

(b) Notwithstanding any provision of this Code or the rules or regulations of the office of business opportunity to the contrary, including any provision for mediation of a decision of the OBO director, any initial applicant for MWSBE certification who meets the criteria for an established business enterprise at the time of its application and is so classified shall be denied certification on that basis alone and shall have no recourse for the denial except through challenging the classification in the manner set forth in section 15-88 of this chapter. Any and all other matters pertaining to the eligibility of the applicant shall be abated and shall only be reinstated if the classification as an established business enterprise is withdrawn.

(c) The office of business opportunity may continue to assist established business enterprises following ineligibility as follows:

(1) Such businesses, if formerly certified by the city, may continue to be listed in any listing of MWSBE firms in a separate category of established MWSBE firms for the information of other private or public entities; and

(2) Such businesses, if formerly certified by the city, may receive information, counseling and referrals to other agencies supporting business enterprises from the office of business opportunity after their classification as established business enterprises.

(d) No sooner than one year following the date of program ineligibility provided in subsection (a) of this section or the denial of certification provided in subsection (b) of this section, any established business enterprise may apply for reinstatement as a fully eligible, certified MWSBE or reinstatement of an application for certification abated under subsection (b) of this section, as applicable, upon demonstrating the existence of one or more of the following conditions:

(1) That the subsequent history from the date of initial classification as an established business enterprise demonstrates that a size calculation as of the date of application for reinstatement

would place the business below the SBA size standards for that category of business;

(2) That the established business enterprise has successfully obtained an SBA size determination from a federal agency authorized to make such a determination, or has prevailed in an SBA size protest under 13 CFR § 121.1001, et seq., as amended, including any judicial review thereof, establishing that the business does not meet or exceed the applicable SBA size standard;

(3) That the SBA size standards have been revised in such a manner that the subject business no longer meets or exceeds the size standard for its category based upon the most recent three-year average for receipts or 12 month average for employees, as applicable; or

(4) That the criteria listed in section 15-88(d) of this Code demonstrate the need to grant a waiver and withdraw the classification of the business as an established business enterprise.

(e) Applications for reinstatement shall be on a form prescribed by the OBO director and shall be accompanied by relevant documentary evidence supporting the ground or grounds for reinstatement asserted, as requested by the OBO director.

(f) Within 30 days following receipt of a completed application for reinstatement, the OBO director shall grant the application or deny the application and set the matter for hearing within 30 days of the date of mailing notice of such denial.

(g) The burden on the business applying for reinstatement shall be to demonstrate the existence of one or more of the conditions set forth in subsections d(1) through d(4) of this section by clear, convincing and cogent evidence, to be evaluated by the director under hearing procedures consistent with the nature of the application and, to the extent applicable, with the provisions of subsections (c), (d), (e) and (f) of section 15-88 of this Code. In addition, a business seeking reinstatement under subsection (b)(4) of this section that has previously sought a waiver of classification as an established business enterprise pursuant to section 15-88(d) of this chapter must present evidence of a material and substantial change in circumstances not shown at the preceding hearing, and the OBO director or his designee shall disregard evidence that is repetitious or cumulative of the prior hearing on the matter.

(h) The decision of the OBO director or his designee following a hearing on reinstatement shall be final, and any applicant denied reinstatement is to be notified in writing of the decision within ten days following the hearing. No business denied reinstatement may subsequently apply for reinstatement until the expiration of one year from the date of the denial.

ARTICLE VI. PERSONS WITH DISABILITIES BUSINESS ENTERPRISES

Sec. 15-90. Declaration of policy.

(a) It is the policy of the city to stimulate the growth of local business enterprises owned, controlled and managed by persons with disabilities by encouraging the full participation of such businesses in all phases of its procurement activities and by affording them a full and fair opportunity to compete for all city contracts. The city council finds and determines that such businesses are historically underutilized and disadvantaged with respect to government and private sector contracting and in need of the measures provided by this article. The purposes and objectives of this article are:

(1) To increase the utilization of local PDBE enterprises to provide goods and services; and

(2) To provide opportunities for local PDBE enterprises to broaden and enhance their range of capacities; and

(3) To increase opportunities for local PDBE enterprises to serve as contractors for the supply of goods and services to the city, in addition to acting as subcontrac-

tors to others, all in order to help eliminate the historical underutilization and disadvantages faced by such businesses.

(b) This article is intended to be remedial in nature and to continue only until its purposes and objectives are met as determined by regular periodic reviews.

(c) This article is not intended to duplicate, supplement or overlap in any fashion the requirements, definitions, procedures or remedies afforded by the Americans with Disabilities Act of 1990, 42 U.S.C. § 12101 et seq., and shall be construed and applied in a manner entirely separate from and independent of any measures required by that Act.

(d) This article is not intended to duplicate, supplement or overlap in any fashion any state or federal program providing aid or assistance to individuals with disabilities, or to entities that aid or assist individuals with disabilities, with respect to rehabilitation, employment, job training, housing, economic or medical assistance and shall be construed and applied in a manner entirely separate from and independent of any such state or federal program.
(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013)

(Ord. No. 2013-428, § 10(Exh. A), 5-8-2013, eff. 7-1-2013)

Sec. 15-93. Application and certification.

(a) Applications for certification as a PDBE and any addenda thereto shall be made in a form promulgated by the OBO director, and the requirements for certification shall be consistent with the applicable requirements set forth under article

V of this chapter and the procedures of the office of business opportunity for businesses applying for certification as MBEs, SBEs or WBEs, except as follows:

(1) Each applicant for certification as a PDBE shall submit, in addition to any other information required, a disability affidavit and accompanying letter from a medical doctor documenting the present existence and nature of the medically determined physical or mental impairment asserted as the basis for certification as a PDBE; and

(2) The applicant's substantial functional limitations must be a result of his or her physical or mental impairment.

(3) The existence of a physical or mental impairment alone, without substantial and continuing functional limitations as a result of the impairment, does not satisfy the requirements for certification.

(c) Notwithstanding any provision of this chapter to the contrary, the OBO director shall have the authority to question the authenticity or accuracy of information provided by any PDBE applicant, either for initial certification or for renewal of certification, purporting to verify the present existence of the claimed mental or physical impairment and/or the degree to which the impairment is claimed to limit a major life activity.

(d) If the OBO director finds that the PDBE application meets the criteria of this article, article V of this Code and applicable rules and procedures promulgated by the director, the director shall approve the application.

(e) If the OBO director determines that questions exist as to the matters referenced in subsection (b) of this section, the OBO director shall notify the applicant in writing of the nature of the questions raised and set the matter for a hearing before the OBO director or his designee not later than 30 days following the date of mailing of the notice. At such hearing the burden shall be upon the applicant to provide clear, convincing and cogent evidence to establish the nature and extent of the claimed impairment. The decision of the OBO director or his designee denying or granting certification shall be final, subject to the grievance procedures authorized by section 15-84(8)(a) of this Code.

*__Editor's note—__Ord. No. 2015-668, § 5(Exh. C) adopted July 8, 2015, amended Ch. 15, Art. VII in its entirety to read as herein set out. Formerly said article was entitled Public Works Contractor Debarment and derived from Ord. No. 1013-428, § 10(Exh.A), 5-8-2013, eff. 7-1-2013.

(4) Any other conduct that evidences the inability of the contractor to responsibly complete contracts on behalf of the city.

The conduct giving rise to the debarment may be based upon actions taken in connection with work undertaken for the city, other public entities, or private entities. The conduct may also result in a referral to law enforcement.
(Ord. No. 2015-668, § 5(Exh. C), 7-8-2015)

Sec. 15-104. Wrongful conduct investigation; debarment determination.

(a) Any department director or elected city official may refer a contractor to the chief procurement officer for purposes of determining whether debarment is appropriate. The referral shall be signed and in writing and shall set forth the basis of the complaint asserted.

(b) Following receipt of the referral, the chief procurement officer, in his sole but reasonable discretion, shall assign an impartial individual, who may be a city employee, to investigate whether there is reasonable cause to believe wrongful conduct has occurred. In consultation with the city attorney, the CPO shall promulgate regulations governing the debarment process, including but not limited to the assignment of an impartial individual to conduct investigations on the CPO's behalf.

(c) Upon receipt of the investigator's findings, the CPO shall:

(1) Affirm or deny the finding;

(2) Return the matter for further investigation; or

(3) Refer the matter to the commission for a hearing in accordance with the standard of review and timeframes provided in section 15-105 of this Code.

(d) Upon the CPO's affirmation of a finding of wrongful conduct, the CPO shall provide to the contractor a written notice of debarment and offer the opportunity for a hearing, pursuant to the debarment regulations established under this section, and section 15-105 of this Code. A contractor's failure to make a timely request for a hearing renders the CPO's decision final.
(Ord. No. 2015-668, § 5(Exh. C), 7-8-2015)

Sec. 15-105. Debarment by the commission.

(a) A contractor who has received notice of debarment from the chief procurement officer may request a review by the commission, if, not later than 14 days after the date of the debarment decision, the contractor provides a written notice of appeal to the commission. The notice of appeal must contain specific exceptions to the CPO's decision to issue a notice of debarment.

(b) The commission shall conduct a hearing within 30 days after the date it receives a valid notice of appeal from a contractor or referral for a hearing from the CPO.

(c) The commission shall issue a decision affirming or reversing the decision of the CPO or, in instances when the CPO has referred a matter to the commission for a hearing, issue a decision determining whether there is substantial evidence that the contractor has engaged in wrong conduct. The commission shall make written findings explaining the basis for its decision. All decisions and written findings of the commission shall be based upon whether there is substantial evidence that the contractor engaged in wrongful conduct.

(d) If the commission affirms the decision of the CPO or determines on its own that the contractor engaged in wrongful conduct, the contractor may request review by city council if, not later than 14 days after the date of the decision of the commission, the contractor submits a written

request for review by city council to the city secretary. A contractor's failure to make a timely request for a hearing renders the commission's decision final.
(Ord. No. 2015-668, § 5(Exh. C), 7-8-2015)

Sec. 15-106. Review by city council.

City council shall consider the matter in the manner set forth by Rule 12, section 2-2 of this Code. City council may:

(1) Affirm debarment for the recommended period of time;

(2) Affirm the debarment order with modifications as to the period of debarment;

(3) Return the matter to the CPO for development of further factual evidence if city council finds the record to be incomplete; or

(4) Overturn the debarment order and take no action against the contractor.

(b) The decision of city council shall be final and exhausts all administrative remedies.

(c) The city secretary shall notify the contractor in writing of city council's decision. The CPO shall maintain the record of all debarred contractors and shall publish the list on the city's website.
(Ord. No. 2015-668, § 5(Exh. C), 7-8-2015)

Sec. 15-107. Period of debarment; reinstatement.

(a) The period for debarment shall be commensurate with the seriousness of the cause or causes therefor, but in no case shall the period exceed five years.

(b) A debarred contractor may petition for reinstatement after one-half the period of debarment has passed by making written request to the CPO pursuant to the debarment regulations promulgated by the CPO.
(Ord. No. 2015-668, § 5(Exh. C), 7-8-2015)

Sec. 15-108. Effect of debarment order.

(a) Debarment of a contractor constitutes a finding under section 252.043(a) of the Texas Local Government Code that the contractor is not responsible and operates as the city's rejection of any bid submitted by the contractor during the debarment period. The CPO or designee shall return a debarred person's bid and bid bond immediately after bids are opened without requirement of any further action.

(b) When making a debarment decision, the CPO shall take into consideration whether the debarment affects any contract or subcontract existing at the time of the debarment decision.
(Ord. No. 2015-668, § 5(Exh. C), 7-8-2015)

Sec. 15-109. Application of remedies.

The provisions of this article are in addition to any other rights or remedies available to the city in connection with the award of any contracts to disqualify bidders who are not responsible, regardless of whether they have been so declared hereunder. This right extends but is not limited to declining to award contracts to bidders who have the same or substantially the same officers, owners, or managers as debarred contractors.
(Ord. No. 2015-668, § 5(Exh. C), 7-8-2015)

Sec. 15-110. Effect on other ordinances.

A debarred contractor is not eligible for certification under articles IV, V, or VI of this chapter. Debarment shall have the effect of terminating any certification thereunder.

Contracts awarded without the submission of a bid or proposal, including but not limited to contracts for engineering and architectural services, shall be subject to this section and shall not be finally approved by the city council until a determination as to any indebtedness of the contracting entity or any owner thereof to the city has been made as provided in this section. The controller shall prescribe the information that shall be required from contracting entities.

(b) Any failure to submit information required by subsection (a) shall constitute grounds for rejection or non-consideration of such bid, proposal or other submission. It shall be the duty of the initiating director to ascertain that the requisite ownership information has been submitted and signed.

(c) Upon the initiating director's determination of the contracting entity to be recommended for the award of a contract, information regarding ownership of the contracting entity submitted by such entity shall be promptly forwarded by the initiating director to the controller.

(d) Before a contract is submitted to city council for approval, the controller shall immediately investigate whether the recommended contracting entity or any owner thereof is indebted to the city and, if so, determine insofar as possible with the information provided, whether such indebtedness is then under active protest, challenge or appeal by such debtor. The controller shall maintain a log of all received information forms and, at least weekly, forward a copy of such log to the city's delinquent tax collection firm or other third party of the controller's choosing, to assist the controller in identifying debts owed the city and determine the amount of any debt due the city.

(e) Promptly after receipt of the report of the delinquent tax collection firm, or other third party, the controller shall certify in writing to each initiating director whether, based on the best information available, a recommended contracting entity is indebted to the city and, if so, the amount of such debt. The initiating director shall immediately forward a copy of the controller's certificate or report to each affected contracting entity, together with the telephone number of the delinquent tax collection firm, a contact in the controller's office, or the alternate third party source of information, by which a debtor may confirm the information in such record or file an appeal under section 15-124 of this Code. The controller's certificate will be deemed to have been received by the contracting entity within three business days after its deposit in the U.S. mail by the initiating director.

(f) Should the controller fail to produce the certificate required by subsection (e) within ten business days from receipt of an ownership information form, the affected contracting entity and all owners thereof will be deemed not to be indebted to the city for purposes of this article only.

(g) The controller's certificate or report shall be valid only until the first of March next following its date of issue. A subsequent award to the same contracting entity during the time that the controller's certificate or report remains valid may be based on the controller's certificate or report. A subsequent award to the same contracting entity after the first of March of each calendar year is subject to all of the requirements of this section.

(h) If the debt shown in the controller's certificate or report is paid, the receipt or other written proof of payment shall be delivered to the controller who shall immediately issue a new certificate or report to the initiating director confirming such payment.

(i) When an award or other transaction is ready to be submitted to city council for action, the initiating director shall forward to the city secretary the controller's certificate or report, or the resolution of any appeal and related information as provided in sections 15-123 and 15-124 of this Code.

ARTICLE XII. VETERAN-OWNED BUSINESS ENTERPRISES

Sec. 15-183. Declaration of policy.

(a) It is the policy of the city to stimulate the growth of local veteran-owned small businesses, including service-disabled veteran-owned small businesses, by encouraging the full participation of such businesses in all phases of its procurement activities and by affording them a full and fair opportunity to compete for all city contracts. The purposes and objectives of this article are:

(1) To increase the utilization of local VOSB enterprises to provide goods and services; and

(2) To provide opportunities for local VOSB enterprises to broaden and enhance their range of capacities; and

(3) To increase opportunities for local VOSB enterprises to serve as contractors for the supply of goods and services to the city, in addition to acting as subcontractors to others.

(b) This article is intended to be remedial in nature and to continue only until its purposes and objectives are met as determined by regular periodic reviews.

(c) This article is not intended to duplicate, supplement or overlap in any fashion any state or federal program providing aid or assistance to veterans, or to entities that aid or assist veterans, with respect to rehabilitation, employment, job training, housing, economic or medical assistance and shall be construed and applied in a manner entirely separate from and independent of any such state or federal program.
(Ord. No. 2025-378, § 17(Exh. A), 5-7-2025)

Sec. 15-184. Definitions.

(a) The following words and phrases, when used in this article, shall have the meanings provided in this section, unless the context clearly indicates another meaning.

Armed Forces means the United States Army, Navy, Air Force, Marine Corps, or Coast Guard.

Disabled veteran means an individual who served on active duty in the armed forces, separated from the Armed Forces under honorable conditions, and has a disability rating letter issued by the Department of Veterans Affairs establishing a service-connected disability rating between zero and one-hundred percent, or a disability determination from the Department of Defense.

Owned, controlled and managed means that the one or more veterans who own the requisite interests in or assets of a business applying for veteran-owned small business certification possesses equivalent incidents of such ownership, including an equivalent interest in profit and loss, and has contributed an equivalent percentage of capital and equipment to the business. Contributions of capital and equipment must be real and substantial. In instances where expertise is relied upon to demonstrate ownership, control, and management, it must be shown that the expertise is: (1) in a specialized field; (2) in an area(s) critical to the firm's operation and performance of a commercially useful function; (3) critical to the firm's continued success; and (4) documented in the records of the firm, including but not limited to documentation showing the particular expertise and its value to the firm. Additionally, the individual whose expertise is relied upon must have a significant financial investment in the business. Ownership shall be measured as though not subject to the community property interest of a spouse, if both spouses certify in writing that the nonparticipating spouse relinquishes control over his or her community property interest in the subject business (but by doing so is not required to transfer to his or her spouse his or her community property ownership interest or to characterize the property as the separate property of the spouse). The one or more VOSB owners shall have recognized, ultimate control over all day-to-day business decisions affecting the VOSB and shall hold a title commensurate with such control. Such ultimate control shall be known to and at least tacitly acknowledged in day-to-day operations by employees of the business.

Service-Disabled Veteran, as defined in 13 CFR §128.102, as amended, is a veteran who is registered in the Beneficiary Identification and Records Locator Subsystem or successor system, maintained by Department of Veterans Affairs' Veterans Benefits Administration as a service-disabled veteran.

Service-Disabled Veteran-owned small business or *SDVOSB* means, as found in 13 CFR Part 128, as amended, a SBE that is not less than fifty-one (51) percent owned, controlled and managed by one or more service-owned veterans, or in the case of any publicly owned business, not less than fifty-one (51) percent of the stock of which is owned by one or more service-disabled veterans.

Small business enterprise or *SBE* means a firm whose gross revenues or number of employees, averaged over the past three years, inclusive of any affiliates as defined by 13 CFR Section 121.103, does not exceed the size standards defined in Section 3 of the Federal Small Business Act and applicable Small Business Administration regulations related to the size standards found in 13 CFR Part 121. The term shall also include a certified VOSB defined in this Code.

Veteran, as defined in 13 CFR Part 128, as amended, is a person who served on active duty with the Armed Forces for any length of time and at any place and who was discharged or released under conditions other than dishonorable. Reservists or members of the National Guard called to federal active duty or disabled from a disease or injury incurred or aggravated in line of duty or while in training status also qualify as a veteran.

Veteran-owned small business or *VOSB* means, as found in 13 CFR Part 128, as amended, a SBE that is not less than fifty-one (51) percent owned, controlled and managed by one or more veterans, or in the case of any publicly owned business, not less than fifty-one (51) percent of the stock of which is owned by one or more veterans.

Sec. 16-8. Child safety fund.

(a) Pursuant to section (a) of article 102.014, Texas Code of Criminal Procedure there is hereby assessed a fine on each parking violation. The fine shall be assessed on every violation to which it appertains under the provisions of the state law.

(b) There is hereby created within the treasury of the city a fund to be designated as the child safety fund. The fund shall consist of those fees and fines that are payable into the fund as provided in section 106.002 of the Texas Local Government Code.

(c) In connection with the annual fiscal year city budget process, or an amendment thereto, the monies expected to be available in the fund shall be appropriated for the purposes provided by section 106.003 of the Texas Local Government Code in accordance with the following procedures and policies:

(1) Provisions for the services of school crossing guards shall be the first priority for expenditure of the fund. No monies shall be appropriated from the fund for administrative expenses as allowed by section 343.013 of the Texas Local Government Code or for other child services as provided by section 106.003(b) of the Texas Local Government Code, unless a surplus of funding exists after school crossing guard services have been funded.

(2) The chief of police or his designee shall annually designate a period during which applications will be received from public, parochial or private elementary or secondary schools for funding of school crossing guard services contracts during the next school year. Notice shall be provided by mailing a copy to the superintendent's office of each public school district having one or more schools in the city, by mailing a copy to each private and parochial school in the city that has its name and address available through a listing provided to the public by the Texas Education Agency and by publishing notice one time in a newspaper of general circulation. In the notice, the chief of police or his designee shall specify a date for the receipt of applications and specify the place where information may be obtained regarding the form in which they shall be provided. The chief of police may issue rules and regulations for the submission of applications and the determination of allowable service costs for personnel and equipment reimbursements hereunder.

(3) It is the policy of the city council to rely upon the traffic safety recommendations of school districts for public schools and school administrators for other schools in determining the need for school crossing guard services. Each application shall include justification for funding of each crossing location that is requested therein, including a description of street conditions, traffic levels, street use, expected student crossing use and related safety data, which shall be provided by the chief traffic safety official of school districts and by the principal of schools not operated by school districts. Subject to the priorities of funding set forth in item (4), below, the chief of police or his designee shall recommend each application that is timely filed in proper form for the issuance of a funding contract by the city council. In the event that the city council questions the appropriateness of a recommendation, then the matter may be referred by city council to the traffic engineer.

(4) Monies shall be disbursed from the fund to reimburse costs of providing paid school crossing guards at schools. No school district or school shall be reimbursed an amount greater than its actual service costs as computed in accordance with the rules and regulations adopted under item (2), above. To the extent that the monies available in the fund are insufficient to cover the costs of school crossing guards at both elementary schools and secondary schools, then funding shall be first applied to cover the full costs of elementary school crossing guards. To the extent that the monies available in the fund are insufficient to cover the full allowable costs of all elementary school crossing guards for which applications are timely filed and approved, then the available money in the fund shall be apportioned equally on the basis of the total number elementary school crossings within the city for which a funding application was timely filed and approved. In the event that the monies available in the fund are sufficient to pay the full costs of elementary school crossing guard services and only a portion of the costs of secondary school crossing guard services, then the funds remaining after full payment of the elementary school crossing guard services shall be equally apportioned for secondary school crossing guard services in the same manner provided above.

(d) All funding for school crossing guards for public schools under this section shall be made available through the school district that operates the school. Private and parochial schools funding shall be provided to the school. Funding shall be made available in quarterly reimbursements upon contracts and a schedule to be established by the chief of police, who may require proof that the services were or are being actually provided. All expenditures of the city under this section for contracts issued or other obligations assumed shall be expressly limited to the monies available in the fund.

Indigency is to be determined by the court. The defendant shall file an oath or affirmation of indigency under the penalties of perjury stating that he is financially unable to employ counsel. (c) An attorney may not receive more than one fee for each one half day in court, regardless of the number of cases in which he appears as appointed counsel on the same day.

Sec. 16-48. Plea by defendant.

(a) The charge shall be read to the defendant, who shall plead thereto, and the plea shall be entered upon his docket by the judge of one of the municipal courts. All pleas must be made to the judge by the defendant or his legal representative.

(b) No plea of guilty shall be accepted except by the judge of one of the municipal courts. Should the defendant plead guilty before the municipal court, the judge thereof shall thereupon enter the plea on the judge's docket and assess a fine and costs as may be authorized by law. (a) When a defendant has been found guilty, by plea or conviction, a judgment that the defendant pay a fine shall also direct that the defendant may request of the court a deferred payment, either to a certain time or by an installment agreement.

(b) The defendant's petition to the court for an installment agreement shall include:

(1) A statement of the fines which have been assessed against the defendant.

(2) A statement that the defendant is unable to pay the fine assessed at the time the petition is made.

(3) A statement of the amount of money the defendant will be able to pay periodically.

(4) A statement that if the court grants the installment agreement, the defendant shall make the payment of that amount.

The action of the presiding judge, on a proper form, shall be transmitted to the clerk of the municipal courts to be entered upon the municipal courts docket by the clerk and to the controller who shall authorize a refund of so much of the fine and costs as the presiding judge, in his sole discretion, in each particular case, shall so designate.

tions of city ordinances enumerated in articles II, IV, VI, XI, and XII and division 1 of article III of chapter 26 of this Code and of offenses involving the parking or stopping of a vehicle that arise under the Fire Code of the city.

(b) Adjudication hearing officers shall have the authority to administer oaths and to issue orders compelling the attendance of witnesses and production of documents.

(c) An order compelling the attendance of witnesses or production of documents may be enforced by the municipal courts department.
(Ord. No. 07-464, § 6(Exh. A), 4-11-07; Ord. No. 2010-740, § 2, 9-22-2010)

Sec. 16-64. Parking citations.

(a) The administrative adjudication process for parking, standing or stopping of vehicle violations that are subject to adjudication under this article shall be initiated by the issuance of a parking citation. A citation may be issued by a peace officer or other authorized parking compliance agent designated by or upon authority of the city.

(b) If the owner or operator of the vehicle is not present at the time of issuance of the citation, the citation may be issued by affixing the citation to the vehicle in a conspicuous place.

(c) The citation shall provide that the person charged with a parking, stopping or standing offense shall have the right of an instanter hearing to determine the issue of liability for the charged offense. Such right to a hearing shall be exercised by appearing in person before an adjudication hearing officer within 30 days from the date of issuance of the citation at such convenient and reasonable hours as may be specified by the adjudication hearing officer, which hours shall be printed on the parking citation.

(d) The original or any copy of the citation is a record kept in the ordinary course of business in the city and is rebuttable proof of the facts it contains.
(Ord. No. 07-464, § 6(Exh. A), 4-11-07; Ord. No. 2011-75, § 3, 2-2-2011; Ord. No. 2019-1015, § 33, 12-11-2019; Ord. No. 2023-548, § 14, 7-12-2023)

Sec. 16-64.1. Online adjudication.

In addition to the information required in section 16-64(c), a citation shall provide that the person charged with a parking, stopping or standing offense may, within 30 days of the issuance of the citation, contest the citation online in accordance with procedures established by the director of the municipal courts department. Such procedures will allow the person charged to submit written statements and evidence.
(Ord. No. 2011-75, § 4, 2-2-2011; Ord. No. 2023-548, § 15, 7-12-2023)

Sec. 16-65. Presumption of ownership.

(a) It is presumed that the registered owner of the motor vehicle that is the subject of the administrative hearing is the person who parked or stopped the vehicle at the time and place of the offense charged.

(b) A state department of transportation computer-generated record of the registered vehicle is a prima facie evidence of its contents in an administrative adjudication hearing under this article.
(Ord. No. 07-464, § 6(Exh. A), 4-11-07)

Sec. 16-66. Hearings.

(a) At the hearing before the adjudication hearing officer, the person charged may either admit, admit with explanation, or deny the alleged infraction.

(b) The issuing peace officer or other authorized parking compliance agent shall not be required to attend the hearing.

(c) No formal or sworn complaint shall be necessary. The adjudication hearing officer shall examine the contents of the citation and the evidence related to ownership of the vehicle in question, and shall hear and review the testimony and evidence presented by the person charged. If the adjudication hearing officer determines by the preponderance of the evidence that the violation was committed by the person charged, he shall find the person charged liable therefor.

(d) At the conclusion of the hearing, the adjudication hearing officer shall issue an order stating whether or not the person charged is liable for violation of the parking, standing or stopping ordinance and the amount of any fine, costs, or fees assessed against him. The order and all other records of the proceeding shall be filed with the clerk of the municipal court. All such orders shall be kept in a separate index or file by the clerk of the municipal court. The filing of the order and other records of the proceeding shall be kept in accordance with section 682.009 of the Texas Transportation Code.

(e) Failure of a person charged with the offense to appear before an adjudication hearing officer within 30 days from the issuance of the citation shall be considered an admission of liability for the charged offense and a default notice shall be issued on that basis.

(f) Fines for violations shall be as provided in section 26-10 of this Code. The presiding judge shall establish fines for persons who do not wish to contest their citations and for persons who admit liability under subsection (f)[(e)], above. The presiding judge shall establish the amount of any added fine that shall be payable if a citation or fine ordered by an adjudication hearing officer is not fully satisfied within 30 days from the date of issuance of the citation.

(g) Court costs shall be payable on all citations in the amounts required by law including, but not limited to, the fees payable under section 16-8 of this Code. The court costs shall be disposed of as provided in section 16-8, or as otherwise provided by law. All other fines and fees shall be deposited in the city treasury as general revenues of the city.

(h) The clerk of the municipal courts shall cause a video or audio tape record to be made of each hearing and shall retain the tape and any documents introduced at the hearing until the time for an appeal to be filed has expired.
(Ord. No. 07-464, § 6(Exh. A), 4-11-07; Ord. No. 2011-75, §§ 3, 5, 2-2-2011; Ord. No. 2019-1015, § 33, 12-11-2019; Ord. No. 2023-548, § 16, 7-12-2023)

Sec. 16-67. Appeal.

(a) A person who is found liable after an administrative adjudication hearing or online adjudication process may appeal that finding of liability to the municipal courts by filing a notice of appeal with the clerk of the municipal courts. The notice of appeal must be filed not later than thirty days after the date on which the adjudication hearing officer entered the finding of liability and shall be accompanied by the payment of the appellate filing fee stated for this provision in the city fee schedule for each citation that is appealed. The appellate filing fee shall be refunded if the municipal court overturns the hearing officer's finding of liability. Unless the person, on or before the date of filing of the notice of appeal, posts a bond in the amount of the civil penalty and any late fees, an appeal does not stay the enforcement of the civil penalty. An appeal shall be decided by the municipal court under the substantial evidence rule and on the basis of the evidence adduced at the hearing before the adjudication hearing officer. The clerk's

office shall provide or cause to be provided a copy of the record to the municipal court. If the municipal court finds the record to be materially incomplete, the court may upon its own motion or upon the motion of the defendant or the prosecuting attorney refer the case back to the adjudication hearing officer for further proceedings; however, no evidence may be adduced at the appeal hearing.

(b) The municipal court shall not reverse the adjudication hearing officer's decision unless it is determined to be:

(1) In violation of the law;

(2) Not reasonably supported by substantial evidence, based upon a review of the reliable and probative evidence in the record as a whole; or

(3) Arbitrary and capricious or characterized by an abuse of discretion.

(Ord. No. 07-464, § 6(Exh. A), 4-11-07; Ord. No. 2010-740, § 2, 9-22-2010; Ord. No. 2011-75, § 6, 2-2-2011; Ord. No. 2011-654, § 2, 8-3-2011; Ord. No. 2011-1168, § 13, 12-14-2011)

Sec. 16-68. Enforcement.

In addition to the added fine amount for delayed payment as provided in section 16-66(g) of this Code, the failure to comply with an order or default notice issued under this article may be enforced in any of the other manners provided in Section 682.010 of the Texas Transportation Code.

(Ord. No. 07-464, § 6(Exh. A), 4-11-07; Ord. No. 2011-75, § 7, 2-2-2011)

Sec. 17-1. Short title.

This chapter may be cited as the Houston Fair Housing Ordinance.
(Ord. No. 06-412, § 2(Exh. A), 4-26-06)

Sec. 17-2. Declaration of policy.

(a) It is the policy of the City of Houston to promote housing opportunities for all persons. Such policy is established upon the recognition of the rights of each individual to obtain housing without regard to race, color, religion, sex, national origin, familial status, or disability; and further that the denial of such rights through considerations based on race, color, religion, sex, national origin, familial status, or disability is detrimental to the health, safety, and welfare of the inhabitants of the city and constitutes an unjust denial or deprivation of such rights which are within the power and the proper responsibility of the government to prevent.

(b) This chapter is enacted pursuant to authority explicitly granted municipalities by Section 2.08 (a) of the Texas Fair Housing Act.
(Ord. No. 06-412, § 2(Exh. A), 4-26-06)

Sec. 17-3. Purpose.

The purposes of this chapter are:

(1) To provide for fair housing practices in the city;

(2) To create a procedure for investigating and settling complaints of discriminatory housing practices and any residential real estate-related transactions; and

(3) To provide rights and remedies substantially equivalent to those granted under federal law.

(Ord. No. 06-412, § 2(Exh. A), 4-26-06)

Sec. 17-4. Office established.

There is hereby established within the housing and community development department the office of fair housing. The mission of the office of fair housing shall be to monitor and evaluate fair housing opportunities in the city and to hear fair housing complaints under this chapter.

***Editor's note—**Ord. No. 2006-412, § 2(Exh. A), adopted April 26, 2006, effective September 1, 12:01 a.m., 2006 (per § 6 of Ord. No. 2006-412), amended Chapter 17 in its entirety to read as herein set out. Formerly, said chapter pertained to discrimination and derived from Code 1968, §§ 15½-11—15½-23 and subsequent amendatory ordinances. Section 5 of Ord. No. 2006-412 states that the various former ordinance provisions that are amended in Section 2 of Ord. No. 2006-412 are saved from repeal for the limited purpose of their continuing application to any violation committed before September 1, 2006, as applicable. For this purpose, a violation is deemed to have been committed before the effective date of Ord. No. 2006-412, as applicable, if any element of the offense was committed prior to the September 1, 2006, as applicable.

Cross reference—Anti-discrimination provisions in city contract, § 15-16 et seq.

(3) To recommend to the mayor and city council reasonable provisions and programs to further fair housing opportunities in the city; and

Sec. 17-6. Fair housing administrator.

(a) There is hereby created the office of fair housing administrator, who shall be in charge of the office of fair housing. The fair housing administrator, who shall be appointed by the mayor and confirmed by the city council, shall have the responsibility for implementing and enforcing this chapter 17 and may establish such rules and regulations as are determined necessary to perform the duties of that office.

(b) The fair housing administrator shall cooperate with the Secretary of Housing and Urban Development and the Attorney General of the United States in the enforcement of the federal Fair Housing Act, and may assist the secretary or attorney general in any way consistent with the policy of this chapter. The fair housing administrator is encouraged to cooperate with the Texas Workforce Commission, Civil Rights Division, in the enforcement of the Texas Fair Housing Act, and may assist the commission in any way consistent with the policy of this chapter.

(c) The fair housing administrator shall treat a complaint referred by the Secretary of Housing and Urban Development or the Attorney General of the United States under the federal Fair Housing Act, or by the Texas Workforce Commission, Civil Rights Division, under the Texas Fair Housing Act, as a complaint filed under this chapter. No action will be taken under this chapter against a person for a discriminatory housing practice if the referred complaint was filed with the governmental entity later than one year after an alleged discriminatory housing practice occurred or terminated.

(d) The fair housing administrator may order discovery in aid of investigations under this chapter. If the city attorney issues such a statement, the panel shall automatically determine that no reasonable cause exists to believe that a discriminatory practice has occurred or is about to occur.

ARTICLE I. IN GENERAL

Sec. 19-1. Statement of purpose.

(a) The purpose of this chapter is to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

(1) Protect human life and health.

(2) Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public.

(3) Minimize prolonged business interruptions.

(4) Minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains.

(5) Provide for the sound use and development of flood prone areas in such a manner as to minimize the future flood-blight areas.

(b) This chapter provides a regulatory system to monitor the review of plats and permits to reduce the likelihood that development within this city will increase the dangers of flooding. To accomplish this purpose, this chapter utilizes the following methods:

(1) Restrictions or prohibitions of land uses that are dangerous to health, safety or property in times of flood, or cause excessive increases in flood heights or velocities.

(2) Requirements that land uses particularly vulnerable to floods, including facilities that serve such land uses, be protected against flood damage at the time of initial construction.

(3) Maintenance of control of the alteration of natural floodplains, stream channels,

Former Ch. 19 pertained to similar subject matter and derived from Ord. No. 85-1705, § 1, adopted 9-25-1985, and subsequent amendatory provisions. See the Code Comparative Table for a complete derivation.

and natural protective barriers, that are involved in the accommodation of floodwaters.

(4) Mitigation of filling, grading, dredging and other development that may increase flood damage.

(5) Prevention or regulation of the construction of flood barriers that will unnaturally divert floodwaters or which may otherwise increase flood hazards to other lands.

(c) The degree of regulation for flood protection established by this chapter is considered reasonable for regulatory purposes and is based on maps promulgated by FEMA that are required to be used as a condition of obtaining flood insurance. These maps are based on scientific and engineering considerations. On rare occasions greater floods can and will occur and flood heights may be increased by man-made or natural causes. Neither the regulations in this chapter nor the issuance of permits or other approvals granted pursuant to this chapter are intended to imply that lands outside the areas of special flood hazards or uses permitted within such areas will be free from flooding or flood damage.

(d) These rules and regulations shall be applicable throughout the city. The Houston special flood hazard areas identified by the effective version of the FEMA scientific and engineering report with accompanying flood insurance rate maps and flood boundary-floodway maps, and any subsequent revisions or amendments thereto are hereby adopted by reference and declared to be a part of this chapter. The provisions of this chapter shall take precedence over any less restrictive conflicting laws, ordinances, codes, or official determinations. For purposes of this chapter, the city engineer shall determine which of these conflicting laws are most restrictive and that decision shall be final.

(e) The FIS and the FIRM, and any subsequent revisions or amendments thereto that are being administered as provided in section 19-4 of this Code, are available for public inspection in the office of the city engineer during normal business hours. The city engineer shall be custodian of these records for all purposes. Maps may also be made available on the City of Houston website, but in the event of any conflict, the maps in the office of the city engineer shall control and are considered the official version.

(f) The Director of Houston Public Works is authorized to promulgate guidelines for administration of this chapter that are consistent with the requirements of this chapter and applicable state and federal laws and regulations.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-2. Definitions.

As used in this chapter the following words and terms shall have the following meanings unless the context of their usage clearly indicates another meaning:

0.2 percent flood elevation or *flood level* means the elevation above mean sea level that floodwaters have been calculated to have a 0.2 percent chance of reaching in any given year.

Addition means any alteration to an existing structure that increases its footprint.

AO, AH, or *VO Zones (areas of shallow flooding)* means those areas designated on the flood insurance rate map with a one percent or greater chance of flooding to an average depth of one to three feet, where a clearly defined channel does not exist, where the path of flooding is unpredictable, and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

Areas of combined probability means an area subject to both riverine and coastal flooding the limits of which are identified on the Flood Insurance Study profiles.

Base flood means a flood having a one percent chance of being equaled or exceeded in any one year.

Base flood elevation (BFE) or *base flood level* means the elevation above mean sea level that floodwaters have been calculated to reach during the base flood at a specific location.

Basement means any area of a building having its floor subgrade (below natural ground elevation) on all sides.

Breakaway wall means an open wooden lattice, insect screening or any other suitable building material approved by the city engineer that is not part of the structural support of the associated structure and that is intended to collapse under wind and water loads without causing collapse, displacement or other structural damage to the elevated portion of the structure or damage to the structural integrity of the structure on which breakaway walls are used. In addition, breakaway walls must be designed so that if carried downstream they will not cause damage to any other structure. Breakaway walls must have a design safe loading resistance of not less than ten and not more than 20 pounds per square foot. Use of breakaway walls that exceed a design safe loading resistance of 20 pounds per square foot (either by design or when so required by city or state codes) may be permitted only if a professional engineer, licensed in the State of Texas, certifies that the designs proposed meet the following conditions:

(1) Wall collapse shall result from a water load less than that which would occur during the base flood; and

(2) The elevated portion of the building and supporting foundation system shall not be subject to collapse, displacement, or other structural damage due to the effects of wind and water loads acting simultaneously on all building components (structural and nonstructural). Maximum wind and water loading values to be used in this determination shall each have a one percent chance of being equaled or exceeded in any given year (one hundred-year mean recurrence interval).

Certificate of Compliance means a document issued and filed in the Real Property Records by the city engineer indicating that a property owner has resolved a violation, temporary permit or substantial damage determination that caused a Certificate of Non-Compliance to be issued.

Certificate of Non-Compliance means a document issued and filed in the Real Property Records by the city engineer indicating that a property is in violation one or more provisions of this chapter; has been issued a temporary permit; or for which a substantial damage determination has not been resolved within six months from the date of the first notice of violation.

Conveyance means, unless otherwise determined by the city engineer, the flow of water during the base flood with a velocity that is greater than one foot per second or a depth that is greater than one foot.

Critical facilities means facilities that materially affect the public health and welfare. Such facilities include, but are not be limited to:

(1) Hospitals, nursing homes, blood banks, health care facilities including those storing vital medical records, and housing likely to contain occupants who may not be sufficiently mobile to avoid death or injury during a flood;

(2) Police stations, fire stations, vehicle and equipment storage facilities, and emergency operations centers that are needed for flood response activities before, during, and after a flood;

(3) Public and private utility facilities that are vital to maintaining or restoring normal services to flooded areas before, during and after a flood;

Functionally dependent use means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking facilities, port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship repair facilities, but does not include long-term storage or related manufacturing facilities.

Sec. 19-4. Use of other flood hazard data to supplement the effective firm.

(a) New elevation and flooding studies are undertaken by or under the auspices of FEMA and local political subdivisions, such as the Harris County Flood Control District. Upon determination that the data generated by such a study appears to be reliable and based upon sound engineering and surveying practices and further that the study's data indicate that the effective FIRMs are FIRM is materially inaccurate, the city engineer may cause the study data to be administered for purposes of this chapter as though it were a part of the effective FIRM. Any such determination shall be issued in writing and a copy shall be placed on file in the office of the city secretary. The city engineer is authorized to utilize updated information from FIS and floodplain models in administering this chapter.

(b) Where the study data are being administered as provided in subsection (a), the following procedures shall apply:

(1) To the extent of any inconsistencies between the study data and the effective FIRM, the more restrictive base flood or 0.2 percent chance flood elevations and Houston special flood hazard areas shall be controlling, and in no instance may any determination or designation that is based on the effective FIRM be reduced by study data.

(2) If alternative base flood or 0.2 percent chance flood elevations exist for the property because of the administration of supplemental data as provided in section 19-4 of this Code, the applicant shall provide two surveys, one of which shall be based in the effective FIRM and one of which shall be based on the study data.

(3) Any applicant for a plat, permit or other approval that is denied because of the application of the study data may appeal the denial of the permit, plat or other approval based on the validity of the study data as applied to the applicant's property or project. The appeal shall be considered in the same manner as a variance application under article II of this chapter. In any such appeal, the city engineer shall provide the documentation for the study data; however, the burden of demonstrating that the study data are incorrect as applied to the applicant's property shall rest upon the applicant and must be supported by the agency then responsible for the study data. Any appeal pursuant to this section shall not result in the change in any of the study data. In addition, if the

study data being used has been published by FEMA for comment as a draft or preliminary FIRM:

a. The appeal process shall be limited to the application of the study data by the city to the specific application that is the subject of the appeal;

b. The appeal process shall not be regarded as an appeal under part 67, or a request for map amendment under part 69, of Title 44 of the Code of Federal Regulations;

c. Any outcome of the appeal to the city is in no way binding on FEMA, nor will it affect or limit any action the agency may take; and

d. Any challenge to the use of the study data as the basis for a FIRM should be separately addressed to FEMA under the applicable federal rules.

(c) For any special flood hazard area for which a floodway has not been designated, the applicant may submit an engineering analysis by a registered professional engineer licensed in the State of Texas that defines the floodway with respect to the site for which a development permit is sought.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-13. Plat approval; issuance.

(a) Any person who is required or elects to obtain a plat shall also comply with the provisions of this chapter, if applicable.

(b) When a person files an application for approval of a plat, the approval of the plat is subject to the approval of a drainage plan for the property that is the subject of the plat application if the property is located in whole or in part in a Houston special flood hazard area within the city. The drainage plan shall include the 0.2 percent chance flood elevation data for the property and be certified as true and correct on the face of the drainage plan by a registered professional engineer licensed in the State of Texas. If alternative 0.2 percent chance flood elevations exist for the property because of the administration of supplemental data as provided in section 19-4 of this Code, the drainage plan shall include both 0.2 percent chance flood elevations.

(c) The city engineer shall review the drainage plan and determine whether the development will be reasonably safe from flooding and whether such proposed development is:

(1) Consistent with the need to minimize flood damage within the Houston special flood hazard area;

(2) To be constructed so that all public utility facilities including, but not limited to, sanitary sewer, gas, water and electrical systems are located and constructed to minimize flood damage from the 0.2 percent chance flood;

(3) To be constructed so that drainage is provided to reduce exposure of such development to flood hazards; and

(4) Would comply with the applicable requirements of article III of this chapter.

(d) If the proposed development satisfies the criteria in subsection (c) of this section, the city engineer shall approve the drainage plan and shall so notify the city planning commission in writing.

(e) The city planning commission shall not approve a final plat until the city engineer has approved the drainage plan for that site. If the proposed development requires mitigation pursuant to section 19-17 or section 19-43 of this Code, the final plat and deed shall identify the location and volume of the mitigation as a feature of the

property. The obligation to have a mitigation feature shall run with all the land covered by the development permit. The owner of the land shall have the obligation to have and comply with the development permit unless that obligation is transferred to another person pursuant to rules and regulations promulgated by the director pursuant to subsection (f) of section 19-1 of this Code.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Secs. 19-14, 19-15. Reserved.

DIVISION 3. FLOODPLAIN DEVELOPMENT PERMIT PROCESS

Sec. 19-16. Regulatory process for permits; term.

(a) A floodplain development permit is required in addition to any other permit that may be required for any development activity in a Houston special flood hazard area. Any development within a Houston special flood hazard area shall be unlawful without a floodplain development permit, regardless of whether a plat is required under chapter 42 of this Code.

(b) A floodplain development permit will expire if development has not commenced within 18 months after issuance, and upon completion of the project for which it is granted, or after five years has elapsed from the date of permit issuance, whichever occurs first.

(c) No building permit, floodplain development permit, or plat approval shall be given on properties with existing floodplain violations unless the work permitted will remedy the violation, or the violations have been otherwise removed or corrected. Work permitted with a floodplain development permit must be undertaken in a manner designed to minimize surface runoff, erosion, and sedimentation, and to safeguard life, limb, property, and the public welfare.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-17. Floodplain development permit application.

(a) An applicant for a floodplain development permit shall submit an application on forms furnished by the city engineer along with plans in duplicate, drawn to scale, showing:

(1) The existing topography and the location, dimensions, and elevation of any proposed alterations;

(2) Existing and proposed structures;

(3) The location of the proposed alterations in relation to Houston special flood hazard areas;

(4) Elevation in relation to mean sea level of the lowest floor of all proposed structures and substantial improvements;

(5) Elevation in relation to mean sea level to which any structures will be or have been floodproofed;

(6) If the site is adjacent to a watercourse or drainage channel, the definition of how that watercourse or drainage channel will be impacted;

(7) 0.2 percent chance flood elevations from effective FIS data for all structures and substantial improvements; except that, this information is not required for A Zones where base flood elevation data has not been provided and must be developed from federal, state, or other sources; and

(8) All lettered cross section lines and corresponding labels, as shown on the FIRM that intersect the proposed development, as well as the nearest lettered cross section lines upstream and downstream of the site, for all new construction, additions to existing structures, or substantial improvements. The lettered cross section lines shall be labeled with the corresponding 0.2 percent chance flood elevation as indicated in the effective FIS.

Each sheet in the plans on which elevations are marked shall include the vertical datum and adjustment, consistent with the effective

FIRM, along with the site benchmark used for vertical control; except that, if the plan elevations are not on the same vertical datum as the base flood elevations shown on the effective FIRM, each sheet in the plans on which elevations are marked shall also show tabulated vertical datum differences.

(b) The applicant shall also provide a statement of compliance with copies of all supporting permits, licenses and approvals, and a floodproofing certificate where floodproofing is or may be required by the applicable provisions of this chapter.

(c) For areas that the city engineer has determined have no conveyance capacity, the applicant shall submit documentation that demonstrates that the proposed development will not, at any time, diminish the storage volume of the Houston special flood hazard area in accordance with the requirements of section 19-34(a).

(d) For areas that the city engineer has determined to have conveyance capacity and for areas for which the city engineer has made no determination of conveyance capacity, the applicant shall submit an engineering analysis certified by a professional engineer licensed in the State of Texas in accordance with section 19-34(b).

(e) Fees to be paid under this chapter are set forth in the city fee schedule. Payment of any applicable fees when due is a condition of the processing of any application under this article.

(f) In addition to other responsibilities under this Code or the Construction Code, the city engineer shall review each permit application to verify compliance with the provisions of this chapter.

(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-18. Additional requirements for floodplain development permit applications.

At the discretion of the city engineer, an applicant may be required to submit any or all of the following:

(1) Plans with the "official coordinate system" of the city as defined in section 33-81 of this Code as their horizontal datum. Where required, each sheet shall be marked with horizontal datum information and with the combined scale factor required to convert from surface coordinates to grid coordinates;

(2) Any datum differences between the vertical datum and adjustment of elevations used on the sheet and any other vertical datum and adjustment typically used in the watershed tabulated on each sheet in the plans on which elevations are marked, or a separate survey based on said additional vertical datum(s) and adjustment(s);

(3) A survey of property ownership of the site, which is signed and sealed by public surveyor licensed in the State of Texas;

(4) An interim drainage plan for the site during the activity;

(5) An indication of the source of fill material and the proposed disposal site, if applicable, and the expected duration of the activity;

(6) An engineering analysis signed and sealed by a registered professional engineer licensed in the State of Texas as required by the city engineer; and

(7) Any other relevant documentation requested by the city engineer.

(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-19. Review.

(a) The city engineer shall review each floodplain development permit application and the plans and documentation submitted in accordance with sections 19-17 and 19-18 of this Code and shall either approve or deny the issuance of the floodplain development permit. Approval or denial of a floodplain development permit by the city engineer shall be based on compliance with the applicable provisions of this chapter. In addition to employing the standards contained in article III of this chapter, the city

engineer may deny a floodplain development permit application if the issuance could result in:

(1) Danger to life or property due to flooding or erosion damage in the vicinity of the site;

(2) Susceptibility of the development and the contents of any structure to flood damage and the effect of such damage on the individual owner;

(3) Danger that materials may be swept onto other lands to the injury of others;

(4) Impairment of the access to and exit from the site in times of flood for ordinary and emergency vehicles; or

(5) Unusually high costs of providing governmental services during and after flood conditions, including maintenance and repair of streets, bridges, public utilities and facilities such as sewer, gas, electrical and water systems.

(b) In connection with this determination, the city engineer shall consider the following factors:

(1) Unusual circumstances affecting the expected height, velocity, duration, rate of rise and sediment transport of the floodwaters and the effects of wave action, if applicable, expected at the site in the presence of floodwaters;

(2) The necessity of a waterfront location for the structure, where applicable; and

(3) The lack of alternative locations not subject to flooding or erosion damage for the proposed use.

(c) A permittee shall submit an elevation certificate to the city engineer before the framing of a structure has started. Failure to do so may result in the revocation of a permit issued hereunder.

(d) The city engineer may enter any structure or premises to perform any duties or responsibilities imposed by this chapter.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-20. Variance procedure.

(a) Any applicant for a permit may apply for a variance from the requirements of this chapter. Except as may be otherwise provided in subsection 19-22(f), a variance may be sought only on the basis that the imposition of the requirements of this chapter for the issuance of a permit to the applicant constitutes an exceptional hardship.

(b) An applicant may file a request for variance at any time. However, no variance may be granted for development on vacant land in a floodway, and no variance may be granted after an applicant has complied with the provisions of this chapter and a permit has been issued. An applicant shall file the application for a variance on a written form to be supplied by the city engineer, and shall include the following information, at a minimum:

(1) The particular requirement from which a variance is sought;

(2) The nature of the hardship presented by the imposition of the requirements, including specific information on the uniqueness of the property for which the variance is requested;

(3) The proposed alternative method or procedure to be utilized in lieu of the required method, practice or procedure that is proposed;

(4) The effect of the proposed construction on flood levels within the city;

(5) The estimated cost in dollars of complying with the requirement;

(6) The estimated cost in dollars of construction by the proposed alternative method of procedure;

(7) The size, in acres, of the land area or the number of lots involved in the permit application; and

(8) The existence of lots contiguous to or surrounding the land area which are located below the 0.2 percent chance flood level.

(c) In addition, the applicant shall submit a verified acknowledgment stating:

(1) The granting of a variance for construction below the flood level may result in increased flood insurance rates commensurate with the increased risk resulting from the reduced lowest floor elevation; and

(2) Construction below the 0.2 percent chance flood level increases risks to life and property to the applicant and the residents of this city and the surrounding area.

(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-21. Restriction on applicants; fee for application.

(a) A variance application may be filed only by the owner of the property or the attorney-in-fact for the owner of the property on which a variance is sought, and written authorization to act for an owner must accompany an application. The application shall be submitted as a verified statement. Each variance application shall be accompanied by the fee for this provision stated in the city fee schedule.

(b) A variance application and all required information shall be submitted to the city engineer, who will review the information submitted, and may request additional information, or return the application as incomplete. Upon determination that the application is complete, the city engineer will forward the application to the board for review in accordance with section 19-22 of this Code.

(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-22. Review by the board of variance application; determination by city engineer.

(a) The city engineer shall receive, and transmit to the general appeals board, all applications for variances, except for those applications specified in subsection 19-22(f) of this Code. Except for those applications specified in subsection 19-22(f), the board shall be the body that determines whether a variance is to be granted. The board may consider the granting of a variance under the following circumstances:

(1) The application is for the reconstruction, rehabilitation, or restoration of an historic structure and the reconstruction, rehabilitation, or restoration of the structure will not preclude the structure's continued designation as an historic structure.

(2) The application is for improvement of an existing structure that is required to correct an existing violation of a state or local health, sanitary or safety code specification that has been identified by the neighborhood protection official and that is the minimum necessary to ensure safe living conditions.

(3) The application is for a development for which the city engineer finds that the granting of the variance is consistent with the procedures and standards established for the granting of variances. As the lot size increases, the burden on the applicant to provide a technical justification in favor of a variance under the facts of the case shall increase.

(4) The application is for an addition to, new construction of, or substantial improvements to, a structure necessary for the conduct of a functionally dependent use provided that:

a. The applicable requirements of sections 19-20, 19-21 and 19-22 of this Code are met;

b. The structure will be protected by methods designed to minimize flood damage during the 0.2 percent chance flood; and

c. The structure will create no additional threats to public safety.

(5) The variance is in effect an appeal from the application of a Houston special flood hazard area or 0.2 percent chance flood elevation determination or both being administered on the basis of supplemental data pursuant to section 19-4 of this

Code and the applicant demonstrates, with the concurrence of the agency then responsible for the study data, that the determination is scientifically or technically incorrect. The variance shall be limited to approval, with or without conditions, or denial and shall not constitute a change in the study data.

The board shall deny variances to disaggregated lots of proposed larger developments or subdivisions or structures when that larger development has been the subject of or included within a floodplain development permit application that has been previously disapproved by the city engineer.

(b) In addition, to grant a variance, the board must affirmatively find that:

(1) The imposition of the requirements of this chapter constitute an exceptional hardship on the applicant;

(2) No feasible method or procedure is currently available to comply with the requirement; and

(3) The imposition of the requirements of this chapter to the particular circumstances would be unjustified in light of good and sufficient cause which has been demonstrated to the board.

(c) In granting a variance, the board must find that the variance, if allowed, will not have the effect of:

(1) Increasing flood level height due to impedence of the stream of channel flow;

(2) Introducing or increasing any threat to public safety;

(3) Creating a nuisance which unreasonably interferes with the use of adjacent property;

(4) Causing a fraud to be worked upon the public or any individual member of the public;

(5) Causing extraordinary public expense for any reason; and

(6) Creating conflict with the codes and ordinances of the city, or with any provisions of a state or federal regulation other than the applicable requirements of this chapter.

(d) The board, in granting a variance, shall grant only the minimum variance necessary to afford relief from the complained of hardship.

(e) If the board approves a variance, the chair shall send, by regular mail, a notice of variance decision to the applicant, stating that:

(1) The variance has been approved, along with any conditions imposed by the board;

(2) The issuance of a variance to construct a structure below the 0.2 percent chance flood level may result in increased premium rates for flood insurance commensurate with the increased risk resulting from the reduced lowest floor elevation; and

(3) The construction under a variance of any structure below the 0.2 percent chance flood level may increase risks to life and property to the applicant and the residents of this city and the surrounding area.

Upon receipt of the notice of variance, the applicant shall file a copy of the notice of variance decision, along with the applicant's statement required in section 19-20(c) of this Code, in the permanent real property records of the county or counties in which the property is located. Upon the receipt of a copy of the notice of variance certified by the county clerk of the county in which the property is located, the city engineer shall issue a floodplain development permit complying with all provisions of this chapter with the exception of the variance granted.

(f) The city engineer may grant a variance for reconstruction of a structure damaged by fire, hail, wind or other event that is not flooding, if the applicant proposes to reconstruct on an existing foundation that is currently below the minimum flood protection elevation, and the reconstruction will not increase the footprint of the foundation.

(g) The city engineer shall maintain a permanent public record of all notices of variance and the variances granted. The written justification for the granting of each variance shall be included in such records.

(h) The denial of a variance by the board shall be final and is not subject to reconsideration.

(i) A variance is unique to and applies to only the property for which it is granted.

(j) Modification to the development scope or detail in an approved variance shall void the variance.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-23. Revocation of floodplain development permit.

(a) In addition to the remedies provided in section 19-91 of this Code, whenever the city engineer finds that there are grounds for revocation of a floodplain development permit, he shall give written notice to the permittee by personal service or by certified mail, return receipt requested, addressed to the applicant at the address set forth in the floodplain development permit application. That notice may require that any work on the property currently underway is required to stop immediately, that a stop work order is being issued, and shall set forth:

(1) The specific grounds upon which the floodplain development permit in question may be revoked;

(2) The fact that there will be a hearing before the board in which the city will seek the revocation of the floodplain development permit;

(3) The date, time and place of such hearing; and

(4) The fact that the permittee may appear in person or be represented by an attorney.

(b) All hearings shall be held by the board. The chair of the board or, in the chair's absence, the vice-chair of the board, shall serve as the hearing officer for all hearings held hereunder, moderating the discussion and ensuring the rules of this section are observed. However, no person shall perform the duties of hearing officer under this section if the person has participated in the investigation or has prior knowledge of the allegations or circumstances discovered in the course of said investigation except as may be set forth in the notice given pursuant to this section.

(c) All hearings shall be conducted under rules consistent with the nature of the proceedings; provided, however, that the following rules shall apply to such hearings:

(1) All parties shall have the right to representation by a licensed attorney, though an attorney is not required.

(2) Each party may present witnesses in his own behalf.

(3) Each party has the right to cross-examine all witnesses.

(4) Only evidence presented before the board at such hearing may be considered in rendering the final order.

(d) If the permittee fails to appear at the hearing at the date and time specified, the city engineer shall establish a case on behalf of the city that presents sufficient evidence, that unless it were otherwise rebutted, shows that grounds exist for revocation of the floodplain development permit in question.

(e) After completion of the presentation of evidence by all parties appearing, the board shall make written findings and render a written order as to whether or not there are grounds for revocation of the floodplain development permit. If there are such grounds, the board shall revoke the floodplain development permit; provided, the board may, in the interest of justice, take such other lesser actions as the board may deem appropriate including, but not limited to, the temporary suspension of the permit, the revision of the floodplain development permit, or the addition of conditions. A true and accurate copy of the board's order shall be personally delivered or mailed by certified mail, return receipt requested, to the permittee.

(f) In the event a floodplain development permit is revoked, suspended, or revised hereunder by the board, the city shall not be liable to any person for any refund of any part of any fees.

(g) The revocation, suspension, or revision of a floodplain development permit may be appealed to the city council pursuant to Rule 12 of section 2-2 of this Code and upon the filing of a written application with the city secretary within ten days after the board's written order is rendered. An appeal of a revocation, suspension, or revision of a floodplain development permit shall not operate to suspend the board's order pending such an appeal.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018; Ord. No. 2021-1037, § 20(Exh. I.21), 12-1-2021, eff. 4-1-2022; Ord. No. 2022-234, § 4, 3-30-2022)

ARTICLE III. STANDARDS FOR FLOOD HAZARD REDUCTION

DIVISION 1. GENERALLY

Sec. 19-31. General construction of structures.

All structures, including modular homes, shall be constructed, regardless of location within the city, to be reasonably safe from flooding. In addition, the following provisions shall apply to structures located or to be constructed within various flood zones or areas:

(1) Within a Houston special flood hazard area, the provisions of the Construction Code and division 2 of this article shall apply. Substantial improvements and substantial damage are regulated only in the special flood hazard area, a subset of the Houston special flood hazard area.

(2) Within a watercourse or floodway, the provisions of the Construction Code and divisions 2 and 3 of this article shall apply.

(3) Within a coastal high hazard area, the provisions of the Construction Code and divisions 2 and 4 of this article shall apply.

(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

DIVISION 2. STANDARDS IN HOUSTON SPECIAL FLOOD HAZARD AREAS

Sec. 19-32. General standards.

(a) All new construction in the Houston special flood hazard areas, or substantial improvement of any existing structure in special flood hazard areas, shall be performed to keep the structure reasonably safe from flooding and in accordance with the following standards:

(1) Improvements shall be designed or modified to adequately anchor them to prevent flotation, collapse, or lateral movement of the structure in the presence of floodwaters;

(2) Improvements shall be constructed by methods and practices to minimize flood damage;

(3) Improvements shall be constructed with materials and equipment resistant to flood damage;

(4) Electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities shall be designed and located above minimum flood protection elevation to prevent water from entering or accumulating within the components during conditions of flooding;

(5) Water supply systems shall be designed to prevent or eliminate infiltration of floodwaters into the system;

(6) Sanitary sewer systems shall be designed to prevent or eliminate infiltration of floodwaters into the structure's systems and discharge of sewage into floodwaters;

(7) On-site disposal systems, including but not limited to sewage treatment plants and septic tank systems located on the site of the structure, shall be located to prevent impairment of the function of those systems in the presence of floodwaters and to prevent contamination of floodwaters from those systems during flooding; and

(8) Fully enclosed areas below the lowest floor that are used solely for parking, building access or storage in an area other than a basement and that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered architect or professional engineer licensed in the State of Texas or meet or exceed the following minimum criterion: have a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding, with the top of all such openings no higher than one foot above grade or BFE, whichever is lower. Openings may be equipped with screens, louvers, valves, or other coverings or devices, provided they permit the automatic entry and exit of floodwaters.

(b) For a development site partially located in the Houston special flood hazard area, the applicant shall submit a site topographic map to establish the site boundary for the determination of the flood area.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-33. Base flood elevation requirements in Houston special flood hazard areas.

(a) The following additional requirements shall apply in Zones A1—30, AE, AH, A, and A99:

(1) For any addition to, and new construction and substantial improvement of, any residential structure:

a. The lowest floor and all utilities must be elevated to at least the minimum flood protection elevation, except that additions which are no greater than 33% of the habitable area of the structure shall be permitted to be constructed at one foot above base flood elevation; and

b. If the flood elevation of a garage attached to an addition is lower than the minimum flood protection elevation, the garage must meet the requirements of item (8) of section 19-32 of this Code.

(2) Any addition to, and new construction and substantial improvement of, any nonresidential structure:

a. Shall be elevated to at least the minimum flood protection elevation measured to the lowest floor; or

b. Shall, along with sanitary sewerage facilities, be floodproofed to the minimum flood protection elevation.

(b) The following additional requirements apply in an X Shaded Zone:

(1) Any addition to, and new construction of any residential structure shall:

a. Have the lowest floor and all utilities elevated to at least the minimum flood protection elevation, except that additions which are no greater than 33% of the habitable area of the structure shall be permitted to be constructed at the same elevation as the structure it is being added to; and

b. If the flood elevation of a garage attached to an addition is lower than the minimum flood protection elevation, the garage must meet the requirements of item (8) of section 19-32 of this Code.

(2) Any addition to, and new construction of nonresidential structure:

a. Shall be elevated to at least the minimum flood protection elevation measured to the lowest floor; or

b. Shall, along with sanitary sewerage facilities, be floodproofed to the minimum flood protection elevation.

(c) The following additional requirements shall apply in an AO Zone:

(1) All additions to, and new construction and substantial improvement of, any residential structure within an AO Zone shall have the lowest floor and all utilities elevated above the highest adjacent grade to at least two feet above the depth number in feet specified on the FIRM for the site or at least three feet above the highest adjacent grade if no depth number is specified. If the floor elevation of a garage attached to an addition is lower than the minimum flood protection elevation, the garage must meet the requirements of item (8) of section 19-32 of this Code.

(2) All additions to, and new construction and substantial improvement of, any nonresidential structure within an AO Zone shall have the lowest floor elevated above the highest adjacent grade at least two feet above the depth number specified in feet on the FIRM or at least three feet above the highest adjacent grade where no depth number is specified or, together with utility and sanitary sewerage facilities, be completely floodproofed to or above that level.

(d) All structures to be constructed in whole or in part within these zones shall be designed with adequate drainage paths around structures on slopes to guide floodwaters around and away from those structures.

(e) For critical facilities located in an area that is subject to a 0.2 percent or greater chance of flooding in any given year (X Shaded Zone), all additions, new construction, and substantial improvements shall have the lowest floor elevated or floodproofed to at least three feet above the elevation that is subject to a 0.2 percent or greater chance of flooding.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-34. Additional standards for design and mitigation.

(a) For areas that the city engineer has determined have no conveyance capacity, proposed development shall not, at any time, diminish the storage volume within a Houston special flood hazard area. Applicants shall demonstrate compliance with this requirement by submitting plans that demonstrate one or more of the following:

(1) Demonstrate that any loss of storage volume will be mitigated on-site, such that there is no net fill;

(2) Demonstrate that any loss of storage volume will be mitigated off-site in accordance with rules and regulations promulgated by the director pursuant to subsection (f) of section 19-1 of this Code;

(3) Identify an amount of fill associated with elevated floor construction that, although the amount may be approaching zero, is recognized by the city engineer as sufficiently important to be addressed, but for which mitigation is not required, in accordance with rules and regulations promulgated by the director pursuant to subsection (f) of section 19-1 of this Code; or

(4) In the 0.2 percent chance floodplain, the amount of fill proposed does not impact or impede the 100 year overland sheet flow in the watershed.

(b) For areas that the city engineer has determined to have conveyance capacity, and for areas for which the city engineer has made no determination of conveyance capacity, development shall not, at any time, either change the conveyance capacity or diminish storage volume of the Houston special flood hazard area; except that, if the applicant submits a Conditional Letter of Map Revision approved by FEMA, the engineering analysis need only demonstrate that the development will not, at any time, diminish storage volume of the Houston special flood hazard area.

(c) Mitigation facilities and drainage improvements shown on a subdivision plat, an approved mitigation plan, or a drainage plan for a site are required to be maintained by the property owner. Obstructions within mitigation areas, failure of mitigation facilities, and other impediments to full drainage may be cited as violations of this chapter. The owner of each mitigation facility or

drainage improvement shall submit an annual mitigation facility recertification to the city engineer, accompanied by the fee stated in the city fee schedule.

(d) In areas of combined probability, the city engineer may approve a deviation from the standards in section 19-34(a) and (b) so long as there is zero net fill below the 0.2% flood elevation.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Secs. 19-35—19-40. Reserved.

DIVISION 3. DEVELOPMENT IN A WATERCOURSE AND FLOODWAY

Sec. 19-41. Generally.

In addition to complying with the standards set out in division 2 of this article, development in a watercourse or a floodway shall comply with the provisions of this division.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-42. Watercourses.

A watercourse maintained by a county or a county agency shall not be altered or relocated unless the county engineer responsible for flood control in the county where the property is located, certifies to the city engineer in writing that the flood-carrying capacity of the altered watercourse will be the same as or greater than the flood-carrying capacity of the original watercourse.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-43. Floodways.

(a) Except as may be otherwise provided in this chapter, no floodplain development permit shall be issued for a development to be located in any floodway, or any special flood hazard area for which a floodway has not been designated, if that development provides for:

(1) Encroachment by the deposition of fill, or other similar construction, within the floodway, or the special flood hazard area if no floodway has been designated; or

(2) New construction, any addition to an existing structure, or substantial improvement of any structure within the floodway, or the special flood hazard area if no floodway has been designated.

The general restriction does not apply to a repair or renovation that is not a substantial improvement.

(b) For those facilities necessary to protect the health, safety and welfare of the general public, the city engineer may issue a floodplain development permit for development of a site or the new construction, addition to an existing structure, or substantial improvement of a structure within the floodway, or any special flood hazard area for which a floodway has not been designated, if a professional engineer licensed in the State of Texas submits supporting documentation or an engineering analysis acceptable to the city engineer and written certification to the effect that:

(1) The cumulative effect of the proposed development when combined with all other existing development, and if a floodway has not been designated, all anticipated development, will not have an adverse effect on flood levels at any point within the city during occurrence of the base flood;

(2) The development will not impede the flow of floodwaters; and

(3) The development will not result in an adverse effect on the conveyance capacity during the occurrence of the base flood.

(c) The city engineer shall issue a floodplain development permit for development for an addition to, or for the replacement or substantial improvement of, a structure in a floodway, or any special flood hazard area for which a floodway has not been designated, if the city engineer determines that:

(1) The bottom of its lowest horizontal structural member will be elevated at least three feet above the 0.2 percent chance flood level;

(2) The foundation system for the structure will be elevated floor construction; and

(3) The applicant has paid all fees required by section 19-17(e) of this Code.

If the city engineer cannot so determine, then the city engineer shall deny the floodplain development permit.

(d) While the community acknowledges the increased risks associated with development on vacant land in the floodway, the city engineer shall issue a floodplain development permit for a development in a floodway, or any special flood hazard area for which a floodway has not been designated, if the city engineer determines that:

(1) The bottom of the lowest horizontal structural member of the structure will be elevated at least two feet above the 0.2 percent chance flood level;

(2) The foundation system for the structure will be elevated floor construction;

(3) The applicant has submitted an engineering analysis acceptable to the city engineer, certified by a professional engineer licensed in the State of Texas, that demonstrates that the applicant will provide floodway conveyance offset volume at a rate defined by the city engineer. The floodway conveyance offset volume may be provided on applicant's site or at an off-site mitigation facility located within one-quarter mile upstream and in the same watershed as the site. If the applicant chooses to provide off-site mitigation, the applicant shall also comply with the requirements of section 19-17(c); and

(4) The applicant has paid all fees required by section 19-17(e) of this Code.

(e) The city engineer shall issue a floodplain development permit for development for the construction of a bridge, or the repair or replacement of an existing bridge in a floodway, or any special flood hazard area for which a floodway has not been designated, if the city engineer determines that:

(1) The cumulative effect of the proposed construction when combined with all existing development, and if a floodway has not been designated, all anticipated development, will result in a zero increase in flood levels at any point within the city during occurrence of the base flood; and

(2) The bottom of the lowest horizontal structural member of the bridge, excluding the pilings or columns, will be elevated at least 18 inches above the base flood level, or at least the 0.2 percent chance flood level, whichever is higher. If the city engineer determines that construction to this elevation is not practical based upon the application of sound engineering principles to the proposed construction, the elevation geometry, the attendant roadway geometry, and the necessity for the bridge to be built or reconstructed in the proposed location, the city engineer may approve a deviation from this standard.

If the city engineer cannot so determine, then the city engineer shall deny the floodplain development permit.

(f) If the city engineer denies a floodplain development permit pursuant to section 19-43(a), (b), (c) or (e) of this Code, and the general appeals board finds and determines in writing that:

(1) The improvement is insubstantial;

(2) The insubstantial construction will not increase flood levels during occurrence of the 0.2 percent chance flood; and

(3) The insubstantial improvement will not impede the flow of floodwaters;

then the city engineer shall issue a floodplain development permit only if the other applicable provisions of this chapter have been met by the applicant for the floodplain development permit.

(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-44. Boathouses and piers; Lake Houston.

Where a floodway has been designated, the city engineer may issue a floodplain develop-

ment permit for construction of a boathouse or pier provided the proposed development meets the requirements for bridge construction provided in section 19-43(e) of this Code. No floodplain development permit shall be necessary for construction of a boathouse or pier on Lake Houston.

DIVISION 4. COASTAL HIGH HAZARD AREAS

Sec. 19-51. Generally.

Within special flood hazard areas, certain areas have been designated as coastal high hazard areas. There are special flood hazards associated with high velocity waters requiring additional conditions on construction within these areas.
(Ord. No. 2018-258, § 2(Exh. A), 4-4-2018)

Sec. 19-52. Building restrictions.

(a) In addition to the requirements of division 2 of this article, the following provisions shall apply in coastal high hazard areas:

(1) All buildings or structures shall be located landward of the reach of the mean high tide.

(2) All structures shall be elevated so that the bottom of the lowest horizontal structural member of the lowest floor, exclusive of pilings or columns, is elevated to at least the minimum flood protection elevation, with all space below the lowest horizontal structural member open so as not to impede the flow of water.

(3) All structures shall be elevated on and securely anchored to adequately anchored pilings or columns to withstand high velocity waters and hurricane wave wash and resist flotation, collapse and lateral movement due to effects of wind and water loads acting simultaneously on all building components.

(4) Pilings or columns used as structural support shall be designed and anchored to withstand high velocity water and hurricane wave wash and to resist flotation, collapse and lateral movement due to effects of wind and water loads acting simultaneously on all building components. For purposes of this section, wind and water loading values are considered as having a one percent chance of being equaled or exceeded in any given year (100-year mean recurrence interval).

(5) No fill shall be used as structural support of any structure.

(6) There shall be no alteration of the topography prior to development that would increase potential flood damage.

(7) Breakaway walls are allowed below the base flood elevation but the space enclosed by breakaway walls may be used only for parking of vehicles, building access, or storage.

(8) If breakaway walls are utilized, the space enclosed by the breakaway walls shall not be used for human habitation.

(9) No alteration, repair, reconstruction, or improvement to a structure or other obstruction shall enclose or obstruct the space below the lowest floor, except for breakaway walls as provided herein.

(b) When a floodplain development permit application is filed under the provisions of section 19-17, a registered professional engineer licensed in the State of Texas shall develop or review the structural design, specifications and plans for the construction and shall certify that the design and methods of construction of the structure to be built are in accordance with accepted standards of practice for meeting the provisions of subsections (a)(2), (a)(3) and (a)(4) of this section. In plans for any structure that includes breakaway walls, the breakaway walls must be specifically identified as such when submitted to the city engineer for approval.

(1) The health officer is authorized and directed to take action as may be reasonably necessary to protect the public health, safety and welfare by condemning or initiating the condemnation of any food or drug product or item of food equipment that may be used or held with intent to sell, offer or expose for sale within the city that is suspected to be unsafe, adulterated, misbranded or expired pursuant to applicable ordinances or state or federal laws, rules and regulations.

(2) Expiration of ready-to-eat time/temperature controlled for safety (TCS) food items that are required to be time and date marked as provided under section 3-501.17(A) of the U.S. Food and Drug Administration Food Code, 2022 ('FDA Model Food Code') shall be determined from the markings. Food that is not from an approved source as specified under section 3-201.11-17 of the FDA Model Food Code shall be discarded.

(3) Ready-to-eat food that may have been contaminated by an employee who has been restricted or excluded as specified under section 2-201.12 of the FDA Model Food Code shall be discarded.

(4) Food that is contaminated by food employees, consumers, or other persons through contact with their hands, bodily discharges, such as nasal or oral discharges, or other means shall be discarded.

(5) Pending disposition, the health officer may direct that the product or item not be used or sold by causing the same to be appropriately tagged if he finds upon diligent inquiry and inspection that the product or item poses an immediate threat of danger to the health, safety and welfare of the public and if the owner or person in possession thereof is afforded the right of a public hearing thereon within 24 hours, exclusive of Saturdays, Sundays and holidays observed by the closure of city offices, before the director of public health or his designee.

(1) The items offered for sale shall be limited to foods that are not time/temperature controlled for safety (TCS) food, such as baked goods;

(2) The sale shall not be conducted in a food establishment;

(3) The consumer is informed by a clearly visible label. The label shall include:

a. The name and physical address of the cottage food production operation;

b. The common or usual name of the product;

c. Disclosure of any major food allergens, such as eggs, nuts, sesame, soy, peanuts, milk, wheat, fish, or shellfish used in the product; and

d. The following statement: 'This food is made in a home kitchen and is not inspected by the Department of State Health Services or a local health department.

Suspension is effective upon service of the notice required by subsection (b) below. Where a permit or medallion is suspended, food processing and/or food service operations shall immediately cease.

(b) Whenever a permit or medallion is suspended, written notice shall be given to the permit or medallion holder or the person in charge or any employee or agent of the food establishment or mobile food unit. The notice shall set forth:

(e) If the permit or medallion holder fails to appear at the hearing at the time, place, and date specified, the city shall present sufficient evidence to establish a prima facie case showing violation of this article or conditions constituting a hazard to public health that formed the basis of the suspension of the permit or medallion.

(f) If the hearing officer finds that the food service establishment, food processing establishment or mobile food unit was, in fact, in violation of this article or that it constituted a hazard to public health, the hearing officer shall make written findings of fact and shall order the permit or medallion suspended until all violations of this article are corrected and any conditions constituting a hazard to public health are eliminated. A copy of the findings and order of the hearing officer shall be sent by certified mail, return receipt requested, to the permit or medallion holder.

Approval for the alternative shall be granted if it is determined that, for the purpose intended, the alternative proposed is at least equivalent to the requirement otherwise specified in this division with respect to safety, sanitation and related purposes. The burden of demonstrating compliance with the foregoing standard shall be upon the requestor. Consistent with the foregoing procedures and standards, the director of public health or his designee may waive any requirement of this division upon his determination that failure to comply with the requirement, as applied to the operation of the certified farmers market or vendor's establishment, does not endanger the public health or safety of the food supply. The health officer may require any or all of the following measures:

(1) The immediate exclusion of the employee from the commissary or vending operation.

(2) The immediate closing of the commissary and vending operations concerned, in accordance with the procedures set out in article II of this chapter, until, in the opinion of the health officer, no further danger of disease outbreak exists.

(3) Restriction of the employee's services to some area of the establishment where there would be no danger of transmitting disease.

(4) Adequate medical and laboratory examinations of the employee, of other employees and of such persons' body discharges.

(Code 1968, § 19-606; Ord. No. 83-744, § 1, 5-17-83; Ord. No. 07-1051, §§ 3, 6(Exh. B), 9-12-07)

Sec. 20-207. Interior of vending machines.

(a) The non-food-contact surfaces of the interior of vending machines shall be designed and constructed to permit easy cleaning and to facilitate maintenance operations and shall be kept clean and in good repair. Inaccessible surfaces and areas shall be minimized.

(b) All food-contact surfaces of vending machines shall be smooth, in good repair, and free of breaks, corrosion, open seams, cracks and chipped places. The design of such surfaces shall preclude routine contact between food and V-type threaded surfaces, except that in equipment where such contact is unavoidable, such as ice makers, such threads shall be minimized. All joints and welds in food-contact surfaces shall be smooth, and all internal angles and corners of such surfaces shall be rounded to facilitate cleaning.

(c) If solder or other sealer is used on food-contact surfaces, it shall be composed of safe materials and be corrosion-resistant.

(d) All food-contact surfaces of vending machines, including containers, pipes, valves and fittings, shall be constructed and repaired with safe materials, including finishing materials, shall be corrosion-resistant, nonabsorbent, easily cleanable and durable under conditions of normal use, and shall be cleaned, rinsed and sanitized as often as necessary to keep such surfaces clean. The health officer may establish frequencies for such cleanings based upon the type of product being dispensed to ensure that the surfaces are kept clean, and the operator shall comply with any such requirements.

(e) All food-contact surfaces, unless designed for in-place cleaning, shall be accessible for manual cleaning, rinsing, sanitizing and inspection:

(1) Without being disassembled; or

(2) By disassembly without the use of tools; or

(3) By easy disassembling with the use of only simple tools such as a screwdriver or an open-end wrench.

(f) All food-contact parts or surfaces not designed for in-place cleaning shall be cleaned, rinsed and sanitized in clean portable containers or in utensil-washing sinks at the location or at the commissary. Cleaning shall consist of washing in warm water containing a suitable detergent and brushing or wiping, as appropriate. Rinsing shall consist of immersion or wiping with clean clear rinse water. Sanitizing shall be accomplished by:

(1) Immersion or rinsing in water of at least 180° Fahrenheit (82.2° Celsius) for 30 seconds; or

(2) Immersion for one minute in a chemical sanitizing solution containing at least 50 parts per million (p.p.m.) of available chlorine, or 12.5 p.p.m. of available iodine, or 200 p.p.m. of quaternary ammonium sanitizer.

(g) In machines designed so that food-contact surfaces are not readily removable, all such surfaces intended for in-place cleaning shall be designed and fabricated so that:

(1) Cleaning and sanitizing solutions can be circulated throughout a fixed system using an effective cleaning and sanitizing regimen; and

(2) Cleaning and sanitizing solutions will contact all food-contact surfaces; and

(3) The system is self draining or capable of being completely evacuated; and

(4) The procedures utilized result in thorough cleaning of the equipment.

(h) The food storage compartment and other compartments in refrigerated vending machines which are subject to condensation or cooling water retention shall be self draining or equipped with a drain outlet which permits complete draining. In vending machines that store cartoned beverages, diversion devices and retention pans or drains for leakage shall be provided. All such drains and retention pans shall be easily cleanable.
(Code 1968, § 19-607; Ord. No. 83-744, § 1, 5-17-83; Ord. No. 07-1051, §§ 3, 6(Exh. B), 9-12-07; Ord. No. 2025-743, § 28, 8-27-2025)

Sec. 20-208. Exterior of vending machine.

(a) The vending machine shall be of sturdy construction and the exterior shall be designed, fabricated, finished and maintained to facilitate its being kept clean and to minimize the entrance of insects and rodents. The exterior of the machine shall be kept clean.

(b) Door and panel access openings to the food and container storage spaces of the machine shall be tight-fitting, and if necessary, gasketed to prevent the entrance of dust, moisture, insects and rodents.

(c) All ventilation louvers or openings into vending machines shall be effectively screened. Screening material for openings into food and container storage spaces of the machine shall be not less than 16 mesh to the inch or equivalent. Screening materials for openings into condenser units which are separated from food and container storage spaces shall be not less than 8 mesh to the inch or equivalent.

(d) In all vending machines in which the condenser unit is an integral part of the machine, such unit, when located below the food and container storage space, shall be separated from such space by a dust-proof barrier, and when located above, shall be sealed from such space.

(e) In order to prevent seepage underneath the machine and to promote cleaning, free-standing vending machines shall have one or more of these elevation or movability features:

(1) Be light enough to be manually moved with ease by one person; or

(2) Be elevated on legs or extended sidewalls to afford, with or without kickplates, an unobstructed vertical space of at least six (6) inches (15 and 24-hundredths centimeters) under the machine; or

(3) Be mounted on rollers or casters which permit easy movement; or

(4) Be sealed to the floor.

Where used, kickplates shall be easily removable or be capable of being rotated. These kickplates shall be designed and installed to make the area under the machine easily accessible for routine cleaning without unlocking the cabinet door.

(f) Counter type machines shall be:

(1) Sealed to the counter; or

(2) Mounted on 4-inch (10.16 cm) legs or the equivalent; or

(3) Easily movable for cleaning with service connections in place.

(g) All service connections through an exterior wall of the machines, including water, gas, electrical and refrigeration connections, shall be grommeted, or closed with no opening larger than 1/32 inch (0.79 mm) to prevent the entrance of insects and rodents. All service connections to machines vending time/temperature controlled for safety (TCS) food shall be such as to discourage their unauthorized or unintentional disconnection.
(Code 1968, § 19-608; Ord. No. 83-744, § 1, 5-17-83; Ord. No. 07-1051, §§ 3, 6(Exh. B), 9-12-07; Ord. No. 2015-1202, § 96, 12-2-2015)

Sec. 20-209. Vending machine locations.

(a) Vending machines, ovens and other equipment shall be located in a room, area or space which can be maintained in a clean condition and which is protected from overhead leakage or condensation from water, waste or sewer piping. The immediate area in which the equipment is located shall be well-lighted and ventilated. Each vending machine shall be located so that the space around and under the machine can be easily cleaned and maintained, and so that insect and rodent harborage is not created.

(b) The floor area where vending machines are located shall be reasonably smooth, of cleanable construction, and capable of withstanding repeated washing and scrubbing. This space and the immediate surroundings of each vending machine shall be maintained in a clean condition.

(c) Adequate hand-washing facilities, including hot and cold or tempered running water, soap and individual towels, shall be convenient to bulk food machine locations and shall be available for use by employees servicing or loading bulk food machines.

(d) In operations where vending machines are rented, leased or owned by persons other than the holder of the commissary food dealer's permit, the facilities for cleaning and hand-washing, and for garbage and refuse storage and disposal may be provided by persons owning, renting or leasing the vending machine(s) or by other persons. However, it is the responsibility of the holder of the commissary food dealer's permit to see that all of the requirements of this article are fulfilled.

(e) *Outdoor food vending areas, overhead protection.* If located outside, a machine used to vend food shall be provided with overhead protection except that machines vending canned beverages need not meet this requirement.
(Code 1968, § 19-609; Ord. No. 83-744, § 1, 5-17-83; Ord. No. 07-1051, §§ 3, 6(Exh. B), 9-12-07)

Sec. 20-210. Single-service articles.

Single-service articles shall be purchased in sanitary packages which protect the articles from contamination, shall be stored in a clean, dry place until used, and shall be handled in a sanitary manner. Such articles shall be furnished to the customer in the original individual wrapper or from a sanitary single-service dispenser. All single-service articles shall be protected from manual contact, dust, insects, rodents, and other contamination.
(Code 1968, § 19-610; Ord. No. 83-744, § 1, 5-17-83; Ord. No. 07-1051, §§ 3, 6(Exh. B), 9-12-07)

Sec. 20-211. Equipment cleaning.

(a) All equipment at the vending location must be kept clean. Food-contact surfaces, if any, must be cleaned, rinsed and sanitized as often as necessary to keep such surfaces clean. The health officer may establish set frequencies for such cleanings to protect the public health based upon the type of product being dispensed, and the operator shall comply with any such requirements.

(b) The cavities and door edges of microwave ovens must be cleaned at least once a day with nonabrasive cleaners and shall be kept free of encrusted grease deposits and other accumulated soil. All doors, seals, hinges and latch fasteners (screws and related hardware) shall be kept tight and adjusted in accordance with manufacturer's procedures.

(c) Food contact surfaces of all equipment and utensils must be protected from contamination at all times including while being transported from the commissary to the vending location.
(Code 1968, § 19-611; Ord. No. 83-744, § 1, 5-17-83; Ord. No. 07-1051, §§ 3, 6(Exh. B), 9-12-07; Ord. No. 2025-743, § 29, 8-27-2025)

Sec. 20-212. Water supplies.

(a) All water used in vending machines shall be of a safe and sanitary quality and from a source constructed and operated according to all applicable laws. Water used as a food ingredient shall be piped to the vending machine under pressure, except that in controlled location vending machines, water may be obtained from a safe source and carried to the machines in containers that are clean and of good sanitary construction.

External water-fill parts and drawers of controlled location vending machines shall be designed so that covers and drawers are secured to the machine.

All plumbing connections and fittings shall be installed and maintained according to all applicable laws.

(b) If used, water filters or other water conditioning devices shall be of a type which may be disassembled for periodic cleaning or replacement of the active element.

(c) To prevent leaching of toxic materials caused by possible interaction of carbonated water, piping and contact surfaces, post-mix soft drink vending machines manufactured after January 1, 1975, which are designed with an incoming water supply air gap, shall have no copper tubing or other potentially toxic water system tubing between the air gap and the downstream, carbonated water dispensing nozzle.

(d) To prevent leaching of toxic materials caused by possible interaction of carbonated water, piping and contact surfaces, of post-mix soft drink vending machines which are indirectly connected to the external water supply system shall be equipped with a double (or two single) spring-loaded check valve or other devices which will provide positive protection against the entrance of carbon dioxide or carbonated water into the water supply system. Backflow preventive devices shall be located to facilitate servicing and maintenance. No copper tubing or other potentially toxic tubing or contact surfaces shall be permitted in or downstream from the check valves or backflow devices. These check valves or backflow devices shall be inspected and cleaned or replaced not less than once every 12 months, and the holder of the food dealer's permit under which the machine is operated shall maintain a record thereof for inspection by the health officer upon request.

(e) Where spring-loaded check valves are used to prevent the backflow of carbon dioxide into accessible upstream copper or to other potentially toxic piping or tubing, a screen of not less than 100 mesh to the inch shall be installed in the water line immediately upstream from the check valves in a location which permits servicing or replacement.

(f) In all vending machines in which carbon dioxide is used as a propellant, all food-contact surfaces from the check valves or other protective devices, including the valves of devices, shall be of such material as to preclude the production of toxic substances which might result from interaction with carbon dioxide or carbonated water.
(Code 1968, § 19-612; Ord. No. 83-744, § 1, 5-17-83; Ord. No. 07-1051, §§ 3, 6(Exh. B), 9-12-07)

Sec. 20-213. Trash and garbage.

(a) All trash and other solid or liquid waste shall be removed from the machine location as frequently as may be necessary to prevent nuisances and unsightliness, and shall be disposed of in a lawful manner.

(b) Self-closing, leak-proof, easily cleanable, insect-proof and rodent-proof waste receptacles shall be provided in the vicinity of each machine or machines to receive used cups, cartons, wrappers, straws, closures, and other items. Plastic bags and wet strength paper bags may be used to line the receptacles. Soiled waste receptacles shall be cleaned at such frequency as is necessary to prevent insect and rodent attraction.

Waste receptacles shall not be located within the vending machines, with the exception of those machines dispensing only packaged food with crown closures and ring tabs; in which case, the closure receptacles may be located under counters or otherwise enclosed in a manner that will not create a nuisance or prevent space around and under the counter or enclosure from being easily cleaned and maintained. Suitable racks or cases shall be provided for multiuse containers or bottles.

(c) Containers shall be provided within all machines dispensing liquid food in bulk for the collection of drip, spillage, overflow, or other internal wastes. Such machines shall be equipped with an automatic shut-off device at the waste pail or other devices or valves which will place the machine out of operation before the waste pail overflows. Such devices shall prevent water or liquid product from continuously running in the event of the failure of any single control, high level control, or other flow-control device in the liquid product or water system.

Controlled location vending machines not connected to a water supply system which generate no internal liquid wastes may be equipped with easily removable drip pans at the dispensing platform in lieu of internal waste containers and automatic shut-off devices. Controlled location vending machines that are connected to a water supply and have no internal waste containers, shall be equipped with at least 2 independently operated controls to prevent the continued flow of water in the event of failure of any single flow-control device.

Containers or surfaces on which such wastes may accumulate shall be readily removable for cleaning, shall be easily cleanable, and shall be corrosion-resistant. If liquid wastes from drip, spillage or overflow which originate within the machine are discharged into a sewage system, the connection to the sewer shall be through an air gap.

(Code 1968, § 19-613; Ord. No. 83-744, § 1, 5-17-83; Ord. No. 07-1051, §§ 3, 6(Exh. B), 9-12-07)

(a) On each vending machine there shall be conspicuously and permanently displayed, in letters of at least one-fourth inch in height, the business name, service telephone number and information notifying users of the machine of the telephone number of an agent of the operators where persons can report malfunctions of the machine and request refunds of money put into the machine when the machine has malfunctioned. The telephone number of the health department to which consumers may call to register complaints regarding the sanitation of the machine shall also be conspicuously and permanently displayed on each vending machine other than those machines described in section 20-216 of this Code which do not dispense any time/temperature controlled for safety (TCS) foods. Such information shall be posted in numbers and letters of at least one-fourth inch in height. The health officer may designate the location, wording and manner in which the information required under this section shall be posted on vending machines if he finds that such requirements will aid in notifying consumers of the information, and operators shall comply with such requirements.

(b) All operators of vending machines, except as provided in section 20-216 of this Code, shall:

(1) Maintain, at the operator's headquarters or at some other designated location within the city, a current list of all vending machines operated by such operator

within the city and the complete address of each machine location and of all commissaries or other establishments from which his machines are serviced.

This information shall be furnished to the health officer as a requirement for the renewal of the food dealer's permit and shall be available for inspection by the health officer during regular business hours;

(2) Notify the health department, in writing, within 30 calendar days of each new location at which vending machines that dispense time/temperature controlled for safety (TCS) food, hot or cold cup beverages or bulk foods have been placed in operation; and

(3) Notify the health department, in writing, within 30 calendar days of any change in operations involving new types of vending machines or conversions of existing machines to dispense products other than those for which the machines were originally designed and constructed.

(Code 1968, § 19-614; Ord. No. 83-744, § 1, 5-17-83; Ord. No. 07-1051, §§ 3, 6(Exh. B), 9-12-07; Ord. No. 2015-1202, § 96, 12-2-2015)

Compliance with the requirements of this article and all other applicable provisions of this chapter shall be a condition for the issuance of a food dealer's permit when any vending machines are to be operated by the permit holder.

(b) No person shall operate any vending machine unless the permit holder has notified the health department, in writing, that he intends to operate one or more vending machines under his permit. Upon receipt of such information, the health department shall make a notation on the permit that one or more vending machines are being operated by the permit holder. Such permits are not transferable.

(c) A food dealer's permit may be revoked or suspended for violations of the requirements of this article, for conditions existing in connection with one or more vending machines operated by the permit holder which pose a substantial hazard to public health, for repeated or serious violations of other applicable provisions of this chapter, or repeated or serious violations of federal or state food laws. Any such suspension or revocation shall be made in accordance with the procedures set out in article II of this chapter.

Sec. 20-216. Controlled location machines.

All controlled location vending machines and vending machines which dispense exclusively bottled or canned soft drinks, prepackaged ice, water, candy, cookies, crackers, or similar prepackaged, non-time/temperature controlled for safety (TCS) food snacks, or ball gum, nuts, and panned candies are exempt from the requirements of sections 20-214(b) and 20-215 of this Code, but shall meet all other applicable requirements of this article.

Sec. 20-217. Inspections.

The health officer, after proper identification, shall be permitted to enter at any reasonable time upon any private or public property where vending machines or commissaries are operated, or from which such machines are otherwise serviced, for the purpose of determining compliance with the provisions of this article and all other applicable provisions of this chapter. The operator shall make provisions for the health officer to have access to the interior of all food vending machines operated by him in the company of the operator or his employee.

Sec. 20-219. Compliance; penalties for violation.

(a) No person shall place or cause to be placed any food in a vending machine in the city unless the vending machine and the food placed in such machine are in full compliance with all applicable provisions of this article and all other applicable laws.

(b) A permit holder shall ensure that all vending machines which he is operating and all food placed in such machines are in full compliance with this article and all other applicable laws.

(c) Whenever the health officer shall find any article of food which is adulterated, misbranded or detrimental to public health, he shall cause such article to be tagged or otherwise properly marked as provided by law. When it is not possible to tag the articles of food within a vending machine, the health officer shall cause the machine containing the food items in question to be tagged.

(d) Any person who violates any provision of this article shall be guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine of not less than $50.00 nor more than $2,000.00; provided however, if such person is convicted of an offense under this article which offense is also a violation of the penal laws of the state, such person shall be subject to the penalties set out in the penal laws of Texas for the offense.

(c) Written notice of the filing of each application for a permit shall be given to each property owner within the designated area surrounding the proposed site. Notice shall also be given to any civic organization, property owners association, or any other interested group with identifiable boundaries, provided that the organization, association or group is registered with the planning and development department in a manner prescribed by the director of that department. The hearing officer shall promulgate rules for hearings. If a hearing is timely requested, the hearing officer shall conduct a hearing and shall make the determination whether the permit should be granted in accordance with this section. Otherwise, the director shall make that determination.

(b) In making a determination regarding the permit, the hearing officer or director shall consider whether the site complies with the requirements of section 21-170 of this Code and may not reasonably be expected to cause a nuisance.

(c) If the application is finally approved, the director shall issue the permit to the applicant.

(d) If an application is denied, the applicant shall be afforded a written notice of the reason for denial. There shall be no appeal from the denial of an application by the hearing officer pursuant to subsection (a) of this section. However, an applicant whose application is denied by the director shall be entitled to appeal the matter to the hearing officer by filing a written notice of appeal in the director's office within 15 days following the date that notice of the denial is mailed to the applicant. If an appeal is timely filed, the director shall cause the matter to be referred to the hearing officer, who shall conduct a hearing in accordance with this section. (c) The city, acting through the city attorney or any other attorney representing the city, is hereby authorized to enter into agreements in lieu of litigation to achieve compliance with the terms, conditions and restrictions of any permit authorized under this division or the provisions of this division.

(d) When it is necessary to make an inspection to enforce the provisions of this division or to inspect or investigate conditions related to air quality, the health officer may enter a site at reasonable times to inspect or to perform the duties imposed by this division or to inspect or review records, reports, data, plans, or other documents relating to compliance with this division. If the site is occupied, credentials must be presented to the occupant and entry requested. b. Strict application of the requirements of this chapter would make a project infeasible due to the existence of unusual physical characteristics that affect the property in question, or is otherwise contrary to sound public policy;

(2) The circumstances supporting the granting of the variance are not the result of a hardship created or imposed by the applicant;

(3) The intent and general purposes of this chapter will be preserved and maintained;

The findings of the director, together with the specific facts upon which such findings are based, shall be made available to the applicant.

(b) Any variance granted under the provisions of this chapter shall apply only to the specific property for which the director approved the variance, and shall not constitute a change of any part of this chapter, or establish any policy, rule or regulation contrary to the provisions of this chapter.

Sec. 25-9. Special events where security control services or traffic control services are necessary.

(a) The MOSE director, in consultation with the appropriate director, shall review each application taking into consideration the size of the

special event, including, but not limited to, anticipated attendance, spectatorship, and the proposed use of special effects or other devices in conjunction with the special event, in determining the requisite security control services and traffic control services to be provided by the special events organizer to ensure the preservation of the general public's health, safety, and welfare during the special event.

(b) Upon the review of an application, the MOSE director shall notify the special event organizer of the necessity to furnish a written security control plan or traffic control plan. The security control plan or traffic control plan shall be provided within three business days of receipt of the request but in no event less than ten business days prior to the special event. All security control plans and traffic control plans shall be subject to review, approval, and appeal in the same manner as a permit application under this article.
(Ord. No. 2010-911, § 2(Exh. A), 12-1-2010)

Sec. 25-10. Revocation of permit.

(a) A special event permit may be revoked if the MOSE director or the appropriate director determines that:

(2) The special event poses an immediate threat to public health or safety;

(3) The special event organizer or any person associated with the special event has failed to obtain any other permit required pursuant to this Code or other applicable law; or

(4) The permit was issued in error or contrary to law.

(b) Except as provided in subsection (c) of this section, notice of revocation shall be in writing and shall set forth the specific reasons for the revocation.

(c) Any threat to health or safety requiring immediate revocation of a permit shall authorize the MOSE director or the appropriate director to notify the special event organizer verbally of such revocation. This provision shall not in any way diminish the authority of public safety authorities to preserve public safety and enforce all applicable laws during any special event.

(d) The appeal of a revocation shall be handled in the same manner and under the same time requirements as the denial of a permit.
(Ord. No. 2010-911, § 2(Exh. A), 12-1-2010)

Sec. 25-11. Appeal of permit denial or revocation.

The hearing committee shall render a written decision on the matter within five business days of the date of the hearing and immediately provide a copy of such decision to the special event organizer.

(b) Upon receipt of the hearing committee's decision to uphold the denial or revocation of a permit, the special event organizer may appeal such decision by giving written notice to the city secretary within five business days of the date of such decision. The city secretary and city agenda director shall arrange a date for the matter to be reviewed by the city council, at the next regularly-scheduled council meeting at which it is possible to give lawful prior notice of the matter after the receipt of the hearing committee's decision and the record required by Rule 12 of section 2-2 of

this Code. The city secretary shall give written notice thereof to the special event organizer. The city council shall consider the appeal under the provisions of Rule 12. Upon the conclusion of the city council's review of the matter, the city council shall render a decision to grant or deny the requested permit. Such decision shall be final and shall exhaust the special event organizer's administrative remedies. If the foregoing time requirements appear inadequate to resolve the appeal prior to the date scheduled for the special event, the burden shall be upon the special event organizer to expedite any filings required and to request a special city council meeting, which shall be granted if reasonable under the circumstances.
(Ord. No. 2010-911, § 2(Exh. A), 12-1-2010)

(b) In the event an admission fee is charged by a special event organizer or any person or entity in conjunction with a special event and in the absence of a revenue sharing agreement under section 25-17 of this Code, the fee applicable thereto shall include ten percent of the gross revenue derived from the special event, in addition to any other applicable fees established by city council. MOSE shall require an accounting of all pre-sale tickets that were sold, the use of consecutively numbered admission tickets, recording cash registers or other reasonable methods to ensure accurate accounting of receipts and revenues derived from such activities.

(c) MOSE shall establish uniform procedures relating to reservations, deposits and the manner for paying applicable event user fees.

(d) The MOSE director, with the concurrence of the appropriate director may waive fees for city produced or city sponsored special events or any special event designated by the mayor to honor, observe, or celebrate any occasion of special significance to the city provided funds are available in the respective departmental budgets to provide the necessary city services during the special event.

(e) Except as otherwise provided in this Code, or in any agreement authorized under this Code or any ordinance of the city, MOSE shall endeavor to ensure reimbursement of the costs of providing city personnel and other city services for a special event.

(f) In reaching a determination of city costs for purposes of this section, the MOSE director shall consult with the appropriate director for a determination of the necessary city employee staffing and other required city services. event organizer with an accounting of the costs incurred as a result of such services or damage and the special event organizer shall be responsible for prompt payment thereof.

(h) All application processing fees shall be remitted to the city's general fund.
(Ord. No. 2010-911, § 2(Exh. A), 12-1-2010)

The MOSE director shall notify the event producing entity of the director's determination in writing.

(c) The Event Safety Alliance Guidelines shall be available for public review in the city secretary's office. These requirements shall be maintained in the MOSE director's office for inspection and for purchase at the copy fee provided by law.

(d) Plans for signage or displays referenced in subsection (a) of this section must describe the size, height, setback, illumination, density and spacing type, other dimensions, placement location, and safety requirements of the signage or displays to be installed.

(3) Relevant safety provisions, including security control plans

The website shall include a schedule for obtaining any requisite licenses or permits.

(f) Upon receipt of the director's decision to deny a plan for signage or displays, the event producing entity may appeal such decision by giving written notice to the city secretary within five business days of the date of such decision. The city secretary and city agenda director shall arrange a date for the matter to be reviewed by city council, at the next regularly-scheduled council meeting for which it is possible to give lawful prior notice of the matter after the receipt of the directors' decision and the record required by rule 12 of section 2-2 of this Code. The city secretary shall give written notice thereof to the event producing entity. The city council shall consider the appeal under the provisions of rule 12. Upon conclusion of the city council's review of the matter, the city council shall render a decision to grant or deny the requested plan for signage or displays. Such decision shall be final and shall exhaust the event producing entity's administrative remedies. If the foregoing time requirements appear inadequate to resolve the appeal prior the date scheduled for the special event, the burden shall be upon the event producing entity to expedite any filings required to request a special city council meeting, which shall be granted if reasonable under the circumstances.
(Ord. No. 2015-1302, § 2, 12-16-2015)

The department to which such property is inventoried shall cause such signs to be prepared and posted. The city shall incur no liability for damage caused to any such vehicle by such removal and the owner, by permitting his vehicle to be placed on such

(a) Definitions. As used in this section, the following terms and phrases shall have the following meanings:

Approved Bicycle Friendly Driver Training Class means a class, approved by the parking official, designed to teach violators best practices in considering the road safety of bicyclists and other non-motorists on shared rights-of-way.

Bicycle means a vehicle with two wheels in tandem, usually propelled by pedals connected to the rear wheel by a chain or an integrated motor, and having handlebars for steering and a saddle-like seat. Bicycle includes an 'electric bicycle' as defined by Texas Transportation Code section 664.001, as amended, and tricycles.

Bicycle lane means a dedicated portion of the roadway separated from motor vehicle traffic with striping and/or physical delineation intended for the exclusive use of bicyclists.

Bicyclist means a person riding a bicycle.

(b) No person shall stop, stand, or park any vehicle upon a bicycle lane. The provision of this subsection shall not apply to on-street bikeways where travel lanes are shared by vehicles and bicyclists and where the city permits on-street parking.

(c) In lieu of paying a fine pursuant to section 26-10 of this Code, a person who has not previously received a citation for violation of this section may appear for an instanter hearing before an adjudication hearing officer within 30 days of the date of the offense and make a request to take an Approved Bicycle Friendly Driver Training Class. A person who requests to take an Approved Bicycle Friendly Driver Training Class must do so within 90 days of the request being granted and shall return proof of completion within that time period. Upon receiving acceptable proof of completion, an adjudication hearing officer shall enter a finding of not liable in the case. The presiding judge of the municipal courts department and the parking official are authorized to prescribe rules and regulations for the administration of this section.

(d) In addition to any applicable fine, any vehicle parked or left in violation of this section shall be subject to being towed to a place of impoundment in the manner provided by law. (Ord. No. 2020-893, § 2, 10-14-2020; Ord. No. 2023-548, § 9, 7-12-2023)

Sec. 26-101. Parking for rental of goods or services prohibited.

(a) Notwithstanding section 26-155 of this Code, no person shall park a vehicle or motor assisted scooter upon any public property in the city, including any public roadway, sidewalk, park, street, parking space, right-of-way or other public property, for the purpose of exhibiting, placing, displaying or offering to rent any goods or services. This section does not apply if:

(1) The person is a permittee under division 2 of article III of this chapter, and displays his permit or a true copy on the dashboard of the parked vehicle, and is renting goods or services as part of a special event pursuant to chapter 25 of this Code; or

(2) The city and the person have entered into an agreement by which the director has authorized the person to park a vehicle on a roadway and rent goods or services.

(b) This section does not apply to a commercial vehicle loading zone under article IV of this chapter.
(Ord. No. 2021-205, § 4, 3-24-2021)

Sec. 26-102. Standing and parking of motor assisted scooters.

(a) It shall be unlawful for any person, for the purpose of renting a motor assisted scooter, to stand, park, place, offer to rent, exhibit, or display a motor assisted scooter on any public roadway, street, alley, parking space, sidewalk, park, right-of-way, or any other public property within the city limits.

(b) The director may authorize the removal of any item unlawfully left on city property in violation of this section. The city may remove or authorize a contractor to remove any item unlawfully left on city property and charge a fee in the amount stated for this provision in the city fee schedule for the city's cost of removing the item to the person who owns or is responsible for placing the item on city property, if such person is known. To the extent an item unlawfully left on city property has an identifiable owner, then the city will place the item in storage for up to 30 calendar days and notify the owner of the owner's opportunity to retrieve the item upon payment to the city of the removal and storage fee in the amount stated for this provision in the city fee schedule. After 30 days from the date the city notified the owner or following a reasonable, but unsuccessful attempt to locate the owner of such item, the city may dispose of such item. The city is entitled to retain any proceeds of a sale disposing of an item in order to cover the costs incurred by the city for removal and storage of such item. The director may establish additional notification procedures, including but not limited to notification procedures where an item unlawfully left on city property has no identifiable owner.

DIVISION 1. GENERALLY

Sec. 26-151. Designation of metered on-street parking zones and maximum parking time therein—Generally.

The traffic engineer, in consultation with the parking official, is hereby authorized to establish parking metered on-street parking zones upon any street or portion of any street where it is determined, upon the basis of a traffic engineering study, that the installation of parking meters shall be necessary to aid in the regulation, control or inspection of the parking of vehicles. The parking of vehicles in such parking meter zones shall be controlled and regulated by parking meters. The traffic engineer from time to time shall also establish maximum parking times for each parking meter zone.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-152. Installation of meters—Generally.

The parking official, upon approval of the traffic engineer, is hereby authorized to install meters within any portion of the right-of-way designated pursuant to section 26-151 of this Code.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-153. Designation of metered public off-street parking zones.

(a) The parking official, with the approval of the department director under whose jurisdiction the property is placed, is hereby authorized to designate any portion or section of any area within any public ground or lands owned or controlled by the city as a public metered off-street parking zone within which parking shall be controlled by parking meters whenever the parking official shall find and determine that the use of public property or any public building, structure or activity situated thereon or adjacent thereto will be benefitted by the control of such parking, or access to such ground, buildings or activity will be made more readily available to a larger number of citizens, or congested traffic and parking conditions will be thereby alleviated. In the zones so designated, the parking official shall, with the approval of the department director under whose jurisdiction the property is placed, designate the maximum parking time for each parking meter, basing his designation on the fact finding above set forth.

(b) Whenever so designated, any such public metered off-street parking zone shall be considered a "street" as such term is used in other provisions of this chapter and such other provisions shall govern the use of such zones by the public; but such zones shall not thereby become streets for all purposes unless expressly recognized as such by the city council.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-154. Operation, design, etc., of meters.

(a) Parking meters shall be capable of being operated, either electronically or mechanically, upon the deposit therein of United States coinage, and may also accept currency, credit cards,

debit cards, digital payment or other forms of payment, based upon the capabilities of the meters installed.

[The next page is 1867]

(b) Each parking meter shall be so designed, constructed, installed, and set that, upon the expiration of the time period registered for payment made as provided herein, it will indicate by an appropriate flag, electronic display, or otherwise that the lawful parking meter period has expired, and during such period of time and prior to the expiration thereof, will indicate the interval of time that remains of such period. Where a meter has been installed that controls two or more parking spaces, then the meter shall separately perform the above function for each individual space.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 09-2, § 9, 1-7-09; Ord. No. 2011-1175, § 6, 12-14-2011; Ord. No. 2023-548, § 10, 7-12-2023)

Sec. 26-155. When meter regulations effective.

Parking meters in the established zones shall regulate the parking of vehicles between the hours of 7:00 a.m. and 6:00 p.m. on Mondays through Saturdays except legal holidays unless otherwise specified on the meter or applicable signage.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-156. Manner of parking in meter zones.

Within the parking meter zones, all vehicles shall be parked parallel to the curb, unless otherwise indicated on the meter or by signage, curb markings, or other control system applicable to the meter. For parallel parking, no part of the curb side of the vehicle shall be parked at a distance greater than 18 inches from the curb. Where one parking meter has been installed on the meter pole for parallel parking, vehicles shall be parked along the curb so that the front of the vehicle is located opposite the parking meter. Where two meters have been installed on the meter pole for parallel parking, vehicles shall be parked along the curb so that either the front or rear of the vehicle is located opposite the parking meter, as applicable, based upon the relation of the meter locations to the parking spaces. Where a meter has been installed that controls two or more parking spaces, then the vehicles shall be parked in accordance with the signage or other control system applicable to the meter.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2019-1015, § 9, 12-11-2019)

Sec. 26-157. Payment; overtime parking and feeding meters prohibited.

(a) Parking in a metered zone during the restricted and regulated time applicable to the parking meter zone in which such meter is located requires payment in the amount applicable to that metered zone, which may be paid through operation of the meter as provided in section 26-154 of this Code. The maximum time to park in a parking meter zone is indicated on the receipt issued pursuant to section 26-154 of this Code, by appropriate street signage, or by signage located on the parking meter. It shall be unlawful to park beyond the maximum legal parking limit applicable to a parking meter zone.

(b) It shall be unlawful for the owner or operator of a vehicle to park the vehicle in any parking metered zone without paying the applicable parking fee.

(c) It shall be unlawful for the owner or operator of a vehicle to allow the vehicle to remain parked in any parking meter zone beyond the time paid to park such vehicle.

(d) It shall be unlawful for the owner or operator of any vehicle or for any person on behalf of another person to deposit any coin or make any other form of payment ("feed the meter") for the purpose of parking beyond the maximum legal parking limit applicable to the parking meter zone.

(e) Parking a vehicle in any parking zone in excess of the time paid for such vehicle for parking in such parking zone shall be the initial offense under this division. It shall also be unlawful to continue such violation, and more than one ticket may be issued for a continued violation under this division.

(f) If a notice on the meter itself or applicable signage placed under section 26-155 of this Code states that the parking metered zone is not

effective during certain hours or on certain days, then this section shall not be applicable during those days or times.

(g) *Exemption for vehicles in public law enforcement service.*

(1) As used in this subsection the term "peace officer" shall mean those persons who are defined as "peace officers" under § 2.12 of the Texas Code of Criminal Procedure and those employees of federal agencies who are authorized to carry handguns, investigate federal crimes, and make custodial arrests of persons accused of committing federal crimes.

(2) As used in this subsection the term "department head" shall mean the police chief or his designee which shall be of a rank no lower than assistant chief of police, sheriff, constable or other duly elected or appointed official in charge of the department or agency that employs a peace officer, provided that if the peace officer is employed by a state or federal agency, then it shall mean the person principally in command of the agency's division, field office or other work group that is responsible for the agency's operations within the city.

(3) It is a defense to prosecution under this section that the person who parked the vehicle is a peace officer and that he presents to the municipal court two affidavits:

a. One affidavit shall be duly executed by his department head and shall set forth:

[1] That the person was at the time of the alleged offense employed under the department head's command as a peace officer;

[2] That the vehicle parked was at the time of the alleged offense owned by or in the service of the State of Texas or the United States or an agency or subdivision thereof; and

[3] That the peace officer was (based upon department head's personal knowledge or upon the records of the department head's office) at the time of the alleged offense engaged in the performance of his officially assigned duties of office and was not parked while the peace officer was working at his customary office or job site.

b. The second affidavit shall be duly executed by the peace officer who parked the vehicle and shall state that while the vehicle was parked at an expired parking meter, the peace officer was engaged in the performance of his officially assigned duties of office, not at his customary office or job site, and:

[1] The vehicle was not parked at an expired parking meter for more than a total of four hours on the occasion during which the alleged offense arose; or

[2] Although the vehicle was parked for more than four hours at an expired parking meter, the peace officer was continuously engaged in the performance of his officially assigned duties of office the entire time the vehicle was parked at the meter and was not at his customary office or job site.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 09-2, § 10, 1-7-09; Ord. No. 2011-1175, § 7, 12-14-2011; Ord. No. 2013-479, § 2, 5-29-2013)

Sec. 26-158. Proof of parking meter location and time limit.

When any person is charged with having committed an offense under this division, proof that a parking meter was placed for the parking space in connection with which the offense was committed shall constitute prima facie evidence that the parking meter was installed and the

space laid out by order of the traffic engineer, and that its location and maximum parking time were designated by the traffic engineer.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-159. Effect on more restrictive provisions.

The provisions of this division shall not relieve any person from the duty to observe other and more restrictive provisions prohibiting, restricting, or limiting the stopping, standing, or parking of vehicles in specified places or at specified times.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-160. Parking meter fees.

Except as provided by section 32-312(6) of this Code, the parking official is hereby authorized to establish parking meter fees for any parking meter that has been placed upon any street or other property owned or controlled by the city. The following fees are hereby established for public parking at any parking meter that is governed by this section:

(1) *Demand parking:* A fee to be established by the parking official between a minimum of $0.31 for each ten minutes and a maximum of $1.89 for each ten minutes, which includes any applicable sales tax. Short-term parking fees shall apply to a meter during a time period for which the meter has been designated for short-term parking use upon determination that the public's needs during that time period may be best served by ensuring that the space is not used for lengthy periods of time by one vehicle.

(2) *Economy parking:* A fee shall be established by the parking official between a minimum of $0.31 for each hour and a maximum of $1.89 for each hour, which includes any applicable sales tax. Long-term parking fees shall apply at meters during those periods in which they have not been designated for short-term parking use.

The fees adopted under this provision shall be included in the city fee schedule.

In establishing the foregoing fees, the parking official shall consider the cost of providing the service, the prevailing private market parking rates in the immediate vicinity of the meter, and the needs of patrons of nearby businesses and other premises to have access to the use of metered parking, as well as relevant traffic mobility and engineering issues, as applicable. Without limiting the parking official's options, a parking space may be designated for demand parking during some times and days and economy parking during other times and days.

Those duties of the traffic engineer under this division that do not require the exercise of professional engineering judgment or that do not relate to traffic-control shall be performed by the parking official.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-162. Temporarily restricted meters.

No person shall park a vehicle in a metered space that is subject to an access restriction in accordance with division 2 of this article. This section does not apply if the person is a permittee under division 2 and displays his permit or a true copy on the dashboard of the parked vehicle.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-163. Disposition of fees.

Except as provided by sections 32-302(6) and 32-312(7) of this Code, all fees and/or revenues generated from the use of parking meters under this division and all fees and revenues generated under division 2 of this article shall be first expended to defray all costs associated with debt service and operation and maintenance of park-

ing meters placed in service on or after April 1, 2006, and any remaining funds shall be deposited into the ParkHouston special revenue fund.

DIVISION 2. TEMPORARY RESTRICTION OF ACCESS TO METERED PARKING

Sec. 26-181. Definitions.

As used in this division, the following words and terms shall have the following meanings unless the context of their usage clearly indicates another meaning:

Access restriction means any restriction or other means or method of rendering unavailable for use by the general public of one or more metered parking spaces.

Attendee means a person who is attending an event sponsored by a permittee.

Peak hours of traffic means those hours established by the traffic engineer at a particular city location.

Permit means a current and valid permit issued under this division to cause an access restriction.

Permittee means a person who holds a permit under this division and includes any employee, agent, or independent contractor of the permittee.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-182. Application for permit; fee.

(a) *Application.* Persons who desire to obtain a permit shall make application to the parking official no later than five business days before the first day of the proposed access restriction, setting forth the following:

(1) The applicant's name, telephone number, fax number, email address, business street address and mailing address;

(2) The name and 24-hour telephone number of a person or persons whom the parking official may contact if needed to resolve any issue that may arise with respect to the permit;

(3) The purpose for which the permit is requested;

(4) The duration for which the permit is requested; and

(5) The location and identification number of the metered parking spaces to be restricted.

(b) *Fee.* The fee for the permit shall be the total of the fee stated in the city fee schedule for each metered space per day requested under the permit application. If the parking official determines that the permit should be granted, then the applicant shall, prior to receiving the permit and in addition to the permit fee, pay for the city's lost revenues, which shall be an amount equal to the total cost of parking at the affected metered space or spaces for the duration of the permit, based upon the fee applicable to the metered space or spaces. No portion of the fee shall be refundable unless the parking official revokes the permit as provided herein.

(c) *Waiver of fee.* The parking official shall waive the permit fee for:

(1) Applications made by the city or upon written request of the city engineer for a city contractor working on a public works construction project; provided that a waiver shall only be afforded as reasonably required for purposes of access to the metered parking space or spaces for the prosecution of the city's work;

(2) Applications made by the Memorial Park Conservancy pursuant to section 32-312(8) of this Code; and

(3) Applications made by the Buffalo Bayou Partnership pursuant to section 32-302(7) of this Code.

(d) *State or federal law.* To the extent that the imposition of any fee, requirement or other provision set forth in this division would be inconsistent with a controlling state or federal

law, then this division shall be construed and applied in a manner that conforms with the applicable state or federal law.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2010-1016, § 2, 12-15-2010; Ord. No. 2011-1168, § 13, 12-14-2011; Ord. No. 2018-366, § 6, 5-2-2018; Ord. No. 2022-716, § 6, 9-28-2022)

Sec. 26-183. Review, issuance, terms, revocation.

(a) The parking official shall, subject to the provisions of this division and upon applicant's payment of the fee, approve an application as submitted or modified subject to this subsection and issue a permit, unless he determines that:

(1) The application is incomplete or materially untruthful;

(2) There exist any unresolved parking citations for any vehicle owned by the applicant; or

(3) The proposed access restriction, as requested, would substantially inconvenience the public in its use of the streets and that the inconvenience would outweigh any public benefits from the work, function, or activity for which the permit is requested, according to written criteria established by the traffic engineer.

(b) The parking official may, according to written criteria established by the traffic engineer, impose reasonable limitations upon scope of a permit, which shall be consistent with the nature and time of the restriction and its anticipated effects upon vehicular and pedestrian use of the streets. Without limiting the foregoing, the parking official shall not authorize restriction during peak hours of traffic if a practicable alternative time schedule could be used, unless he determines that traffic and mobility will not be adversely affected. Consistent with the foregoing criteria and with approval by the traffic engineer, the parking official may require the permit holder to provide traffic-control devices, signage, and notice to the public at the permit holder's expense.

(c) To the extent that another person has previously requested or obtained a permit for all or part of the area subject to the application or the parking official is aware of any other activity that will also affect traffic at the time and in the area affected by the application, the parking official shall require the persons to coordinate their restrictions or may delay the effective date of the permit until a previous restriction is concluded.

(d) Each permit shall be issued in writing, shall set forth the specific meter spaces affected, beginning and ending dates, authorized days of the week and times of day, nature and authorized site of the authorized restriction, and any requirements for traffic-control devices, signage, and public notice. The permit restriction shall not be valid except in strict accordance with its terms and shall be void if used in any other time, place, or manner.

(e) Permits are personal to the permit holder and may not be assigned or used by any other persons.

(f) Upon written notice to the holder, a permit may be suspended or revoked if the parking official determines that it was issued by error, that the obstruction is having unanticipated adverse effects upon vehicular or pedestrian traffic, or that the holder has not complied with any applicable term of the permit. If a permit is suspended or revoked, the parking official shall refund a percentage of the fees for any unutilized days under such permit.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-184. Hearing.

A person who is aggrieved by the decision of the city, its officials, or employees with respect to a permit application, suspension, revocation or other action under this division shall, upon written request, be entitled to a hearing to be conducted by a hearing officer designated by the director who shall promulgate rules for hearings. The decision of the hearing officer shall be final.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-185. Closing of meters.

If the parking official issues a permit, ParkHouston personnel shall officially mark the meter or meters for the duration of the permit. Depend-

ing upon the type and number of affected metered spaces and meters, the official marking may be in the form of meter bags, signage, or other indicia to indicate that the affected meter spaces are not available for public use.

(a) It is unlawful for any person or entity to cause, suffer, or permit an access restriction without a permit for the affected meter space or spaces.

(b) It is unlawful for a permittee to cause, suffer, or permit and access restriction in violation of any term of a permit.

(c) It is unlawful for a person who is not a ParkHouston employee to remove or tamper with any official marking placed under section 26-185 of this Code.

(d) Violation of this division is unlawful and shall be punishable as provided in section 1-6 of this Code.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2019-1015, § 11, 12-11-2019)

Sec. 26-187. Duty of permittee.

It shall be the duty of every permittee to cause each of its attendees and agents to comply with the requirements of this division and any permit issued hereunder.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-188. No private rights in street.

Nothing in this division shall be construed to give any person, whether or not a permittee, any property right in or to the use of any street. All permits issued and held under this division shall be subject to the superior right of the public to the safe and orderly movement of traffic.

(3) Park any commercial vehicle in any commercial vehicle loading zone without either:

a. Displaying a current and valid commercial vehicle parking permit issued and utilized pursuant to this article; or

b. Paying the meter fee as provided in section 26-228 of this Code; or

(4) Park any commercial vehicle in any commercial vehicle loading zone for a period in excess of that allowed for the class of permit held or in excess of the maximum time allowed by the meter.

In addition to any applicable fine or penalty, any vehicle parked in violation of this section shall be subject to being towed at the direction of any law enforcement officer.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 09-2, § 12, 1-7-09)

Sec. 26-223. Commercial vehicle parking.

The operator of a commercial vehicle may utilize a commercial vehicle loading zone during the posted hours of operation of the zone pursuant to a permit issued under this article or by payment of the meter fee as provided in section 26-228 of this Code.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-224. Permit application; issuance.

(a) A person may apply for a commercial vehicle loading permit by submitting an application in the form prescribed by the director, along with the appropriate permit fee.

(b) The parking official shall issue a permit, unless he determines that:

(2) There exist any unresolved parking citations as defined in section 26-261 of this Code for any vehicle owned by the applicant or any agent of the applicant.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 09-2, § 13, 1-7-09)

Sec. 26-225. Permit classes.

Permits shall be classified as follows:

(1) *Class A permit.* A Class A permit will be valid for a period of one year from the date of issuance and shall be transferable to any other commercial vehicle operated by the permittee upon prior notice in a manner prescribed by the parking official. A commercial vehicle with a Class A commercial vehicle loading zone permit may be parked in a commercial vehicle loading zone or, where such zones are unavailable or occupied, parked utilizing one or two metered automobile parking spaces without payment of the usual meter fee as required elsewhere in this chapter for such spaces. A commercial vehicle with a Class A permit may be parked for a period not to exceed two consecutive hours at one time.

(2) *Class B permit.* A Class B permit will be valid for a period of one year from the date of issuance and shall be transferable to any other commercial vehicle operated by the permittee upon prior notice in a manner prescribed by the parking official. A commercial vehicle with a Class B permit may be parked in a commercial vehicle loading zone for a period not to exceed one hour at one time.

(3) *Class C permit.* A Class C permit will be valid for a period of one year from the date of issuance and shall be transferable to any other commercial vehicle operated by the permittee upon prior notice in a manner prescribed by the parking official. A commercial vehicle with a Class C permit may be parked in a

commercial vehicle loading zone for a period not to exceed 30 minutes at one time.

(4) *Class D permit.* A Class D permit will be valid for a period not to exceed 21 consecutive days. A commercial vehicle with a Class D permit may be parked in a commercial vehicle loading zone for a period not to exceed one hour at one time. Only one Class D permit per commercial vehicle may be issued within a 12-month period.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-226. Permit specific to commercial vehicle.

Each permit shall be registered to a specific commercial vehicle and shall be transferable only as provided in this article.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-227. Display of permit.

A permit must be conspicuously displayed upon the commercial vehicle for which it is issued so as to be easily visible to any person passing such commercial vehicle on the street or sidewalk while the commercial vehicle is parked in any commercial vehicle loading zone. Any failure to display a permit shall create the presumption that no permit for the commercial vehicle exists. The parking official may accept a valid license plate number on file with the department for each permit holder in lieu of affixing a permit or hanging a permit.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2023-548, § 12, 7-12-2023)

Sec. 26-228. Use of parking meters.

As an alternative to obtaining a permit, the operator of a commercial vehicle may park the commercial vehicle in a commercial vehicle loading zone space or spaces during posted hours of operation for the zone by paying the commercial vehicle loading zone meter fee for each space utilized in whole or in part for parking the commercial vehicle in that zone, provided that:

(1) The commercial vehicle is then being expeditiously loaded or unloaded; and

(2) The meter or meters are not allowed to expire; and

(3) The commercial vehicle may not be parked in excess of the maximum time allowed as posted on the meter or as authorized by a permit as provided for by section 26-225 of this Code;

provided, however, that pending the installation of a meter in a commercial vehicle loading zone, an unpermitted commercial vehicle may utilize one or more metered passenger vehicle spaces, or portions of such spaces, within the same blockface as the unmetered commercial vehicle loading zone, by paying the meter fee for each space wholly or partially occupied by such commercial vehicle.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 09-2, § 14, 1-7-09; Ord. No. 2011-1175, § 11, 12-14-2011)

Sec. 26-229. Compliance with other laws.

Except as allowed by a Class A permit, a permit issued under this article shall not excuse compliance with applicable laws, and a commercial vehicle parked in any metered automobile parking space remains subject to any "no parking" and "tow-away zone" restrictions applicable to the parking space. Additionally, a permit does not excuse the requirement that the commercial vehicle must be expeditiously loaded or unloaded at all times while parked under this article.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-230. Fees.

(a) Fees for commercial vehicle loading zone permits are stated for this provision in the city fee schedule.

A permit may be replaced during its valid term for the fee stated for this provision in the city fee schedule, upon providing the parking official the police report for the stolen permit or an affidavit for a lost permit. The permit shall be valid only for the remainder of the original term.

(b) The commercial vehicle loading zone meter fee per hour per metered space is stated for this provision in the city fee schedule.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2011-1168, § 13, 12-14-2011)

Sec. 26-231. Disposition of fees.

All fees and/or revenues generated from the use of commercial vehicle loading zones shall be first expended to defray all signage and administration costs under this article, and the remainder shall be deposited into the ParkHouston special revenue fund.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2011-1175, § 12, 12-14-2011; Ord. No. 2020-348, § 9, 4-29-2020)

As used in this article the following words and phrases shall have the meanings ascribed in this section, unless the context of their usage clearly indicates another meaning:

Boot means a lockable road wheel clamp or similar device, which is designed to immobilize a parked vehicle and prevent its operation until the device is unlocked and removed, or (verb) the act of installing such a device.

City vehicle compound means a vehicle storage facility to which vehicles owned by persons other than the city are towed upon direction of peace officers and other authorized personnel of the city. The term includes both facilities that are owned and operated by the city and facilities that are designated by contract with the city to act as city vehicle compounds for purposes of this article.

Delinquent vehicle means any vehicle on which three or more unresolved parking citations are outstanding or on which any single unresolved parking citation related to parking in a space designated for a transport vehicle for a person with disabilities is outstanding, which citations were issued during the time the vehicle has been registered to or otherwise held by the owner.

Delinquent vehicle list means the current delinquent vehicle list as maintained by the parking official under section 26-263 of this Code.

Officer means any peace officer employed by the city and any other city employee, whether a peace officer or not, who is designated by the parking official to place and remove boots or to cause vehicles to be towed under this article. The city may also authorize persons who are not city employees to act as "officers" for the purpose of installing or removing boots by contract.

Vehicle means either a "motor vehicle" or a "trailer" as those terms are defined in section 45-2 of this Code, provided that it shall not include a vehicle registered to any governmental entity or agency thereof.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2011-1175, § 13, 12-14-2011)

Sec. 26-262. Purpose.

Pursuant to the provisions of this article an officer may cause a delinquent vehicle designated on the delinquent vehicle list to be booted, or towed, or both.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-263. Delinquent vehicle list.

(a) The parking official shall be responsible for creating and maintaining the delinquent vehicle list.

(b) A delinquent vehicle may be placed on the delinquent vehicle list after notice has been issued as provided in subsection (c), and a hearing, if requested, under subsection (d).

(c) At least 15 days prior to placing a delinquent vehicle on the delinquent vehicle list, the parking official shall mail a notice to the owner, at the address stated on the most current registration records available to the city from the state, or any more current address of which the parking official has actual notice, by first-class United States mail, postage prepaid. When the Texas Department of Transportation does not have current registration records for a vehicle, a self-adhering notice placed on the vehicle or handed to the vehicle operator by an officer will be deemed sufficient notice. The notice shall set forth:

(1) The license plate number of the alleged delinquent vehicle;

(2) A date certain on which the delinquent vehicle will be subject to placement on the delinquent vehicle list;

(3) A list of the three or more alleged unresolved parking citations or the single unresolved parking citation related to parking in a space designated for a transport vehicle for a person with disabilities, including the citation number, date, time, place of the violation, and the nature of the violation;

(4) That the owner may avoid the vehicle's being placed on the delinquent vehicle list by making an appearance on the unresolved parking citations;

(5) The name, mailing address (and street address if different), and telephone number of a city office or agency that may be contacted for a hearing if any of the alleged unresolved parking citations has been resolved by appearance, or if the recipient was not the owner of the vehicle when any of the alleged unresolved parking citations was issued, or if the title to the vehicle has been transferred since the unresolved parking citations were issued; and

(6) That administrative fees, boot fees, and towing/storage fees may be payable to obtain the release of a vehicle booted or towed pursuant to this article in addition to appearance on any unresolved parking citations.

For a vehicle that is not yet a delinquent vehicle, the notice required under this section may be mailed, adhered to the vehicle, or handed to the vehicle owner or operator by an officer advising that there are already two unresolved parking citations and that a third parking citation (which shall also be specified in the notice) will become unresolved if an appearance is not made thereon by the date specified for placement of the vehicle on the delinquent vehicle list.

(d) After expiration of the date certain provided in the notice issued under subsection (c), the parking official shall review the records to ensure

that the alleged unresolved citations have not been resolved by appearance, and that no information has been received indicating that the notice was erroneous. The parking official shall not have the authority to adjudicate any parking citation; however, he shall meet with any person desiring to present evidence that a notice given under subsection (c) is erroneous, shall afford the person an opportunity to present any relevant evidence on the matter, and shall mail or otherwise furnish a written notice to the person of his decision.

If the request for a hearing is received by the clerk of the municipal courts before the date specified in the notice for placement of the vehicle on the delinquent vehicle list, then the clerk shall notify the parking official of the request for hearing and afford the applicant an opportunity for a hearing prior to placement of the vehicle on the delinquent vehicle list. If the applicant timely appears for the hearing as scheduled, the clerk shall furnish the parking official and the applicant written notice of the adjudication hearing officer's decision.

(e) Once a vehicle has been placed on the delinquent vehicle list it shall not be removed from the list unless and until:

(1) All unresolved parking citations issued during the time it has been registered to or otherwise held by the owner are resolved by appearance;

(2) The parking official receives reliable information that the vehicle was not registered to its current owner at the time the unresolved citations were issued;

(3) The parking official receives reliable information that title to the vehicle has been transferred; or

(4) The parking official determines that the placement of the vehicle on the delinquent vehicle list was erroneous.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 09-2, § 15, 1-7-09; Ord. No. 2010-846, § 11, 11-3-2010; Ord. No. 2011-1175, §§ 14, 15, 12-14-2011)

Sec. 26-264. Booting or towing procedures.

(a) An officer may boot any vehicle then parked, lawfully or unlawfully, upon any street or highway within the city, or upon any other property under the ownership or control of the city. An officer may also boot any vehicle on property not owned or controlled by the city provided that parking citations may lawfully be issued for violation of city or state laws regarding the parking of vehicles on the property and further provided that the owner of the property gives written consent to the parking official for the installation of boots on the property.

An officer may cause the vehicle to be towed in lieu of being booted:

(1) If the vehicle, when located by the officer, was parked in violation of any city ordinance or state penal law relating to parking of vehicles;

(2) Under any circumstances in which towing by a peace officer is authorized by city ordinance or state law;

(3) If the location, configuration or size of the vehicle's tires, wheels, fender wells or other components makes the installation of any available boot owned by the city impracticable;

(4) If, based upon the age, model and condition of the vehicle, or the incidence of vehicular crimes in the area where the vehicle is located, or other relevant factors, the officer reasonably believes that there is a significant possibility of theft or damage relating to the vehicle if it is immobilized in place;

(5) If the owner has been convicted of any crime relating to the removal of, tampering with or theft of a boot previously installed by the city on any vehicle; or

(6) If the owner or operator of the vehicle requests, in writing, that the vehicle be towed.

A vehicle that has already been booted may be towed by an officer if any of the circumstances enumerated in items (1) through (6) above exists, or if:

(7) The owner has not made arrangements with the parking official to secure removal of the boot within 72 hours after its installation; or

(8) The vehicle remains immobilized in any zone where parking is prohibited during certain hours until the commencement of the restricted hours.

(b) At the time of booting or towing of a vehicle under this article the officer shall:

(1) Check or cause to be checked the appropriate records to ensure that the vehicle is properly listed on the delinquent vehicle list;

(2) Check or cause to be checked the most current vehicle registration records available to the city to ensure that the ownership of the vehicle is not reflected to have changed from that specified on the delinquent vehicle list;

(3) If booted, notify any office designated by the parking official and place a conspicuous notice or notices in a form approved by the director on the vehicle warning the operator or any other person not to attempt to move the vehicle and advising the operator of the means by which the boot may be removed, including the right of the hearing; provided, however, that the officer may hand the notice or notices to vehicle owner or operator who is present and objects to the placement of a notice on the vehicle; and

(4) If towed, notify the police dispatcher and any other office designated by the director so that they may respond promptly to any inquiry about the vehicle's disappearance.

(c) A vehicle may be booted or towed at any time on any day. A hearing requested pursuant to section 26-266 of this Code shall be conducted within two business days of such request.

(d) Vehicles shall be towed to a storage lot operated by the city or to a city-licensed storage lot operated under contract with the city. Each lot that is utilized shall have an attendant on duty or available for the release of vehicles from at least 6:00 a.m. to 9:00 p.m., Monday through Saturday, city observed holidays excepted, and shall have an attendant on call who will come to the lot upon one hour's notice at all other times.

(e) The parking official shall ensure that officers are available, either on duty or on call, to remove boots from vehicles Monday through Saturday, from 7:00 a.m. through 7:00 p.m. An officer shall remain on duty until at least two hours after a boot is installed. At other times, an officer shall be on call to remove a boot upon two hours' notice.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2010-1016, § 2, 12-15-2010; Ord. No. 2011-1175, §§ 16—18, 12-14-2011)

Sec. 26-265. Fees, release.

Except as provided in section 26-266 of this Code, the claimant of a vehicle may not secure the release of the vehicle until an appearance has been made on all unresolved parking citations relating to the vehicle which were issued while the vehicle was owned by the person who owned the vehicle at the time it is booted or towed hereunder, and the claimant has paid the following fees, as applicable:

(1) The administrative fee stated for this provision in the city fee schedule, if the vehicle has been booted or towed, or both, to defray the city's administrative costs in placing the vehicle on the delinquent vehicle list and related expenses under this article.

(2) The boot fee stated for this provision in the city fee schedule, if the vehicle has been booted, to defray the city's costs of installing, removing and maintaining the boot.

(3) Towing/storage and related fees, if the vehicle has been towed, in an amount established by the director, based upon the city's cost or upon the fees imposed by the city's contractors, as applicable. If

the vehicle has been towed and stored by city contractors, then the parking official may provide that the towing/storage fees be paid directly to the contractors, rather than to the city.

Towed vehicles that are not redeemed within 30 days shall be subject to disposition in the same manner provided by Chapter 683, Texas Transportation Code, for sale of abandoned motor vehicles by police auction after notice to the owner and lienholders. No person shall be permitted to claim a vehicle without proof of identity. If the person claiming the vehicle is not the owner or a family member residing at the same address as the owner, based upon the most current vehicle registration data available to the city, then proof shall also be required that the claimant is the owner or is redeeming the vehicle with the consent of the owner.

All fees and/or revenues generated from fees imposed under this section shall be deposited to the ParkHouston special revenue fund.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; ; Ord. No. 2011-1168, § 13, 12-14-2011; Ord. No. 2011-1175, § 19, 12-14-2011; Ord. No. 2020-348, § 10, 4-29-2020)

Sec. 26-266. Hearing.

(a) The presiding judge of the municipal courts department shall designate one or more persons to act as adjudication hearing officers to conduct post-deprivation hearings for persons whose vehicles have been booted or towed under this article.

(b) Hearings shall be conducted on a first-come, first-served basis without the necessity of a prior appointment. The hours when hearings will be conducted and the place or places where they will be conducted shall be established by the presiding judge of the municipal courts department, provided that hearings shall be conducted at least between 9:00 a.m. and 6:00 p.m., on Mondays through Fridays, city observed holidays excepted.

(c) The applicant may secure release of the vehicle pending the hearing by making an appearance on the unresolved parking citations and posting a bond for the administrative and boot fees prescribed in section 26-265 of this Code, as applicable. If a bond is posted then a hearing may then be scheduled for a date and time certain, and the vehicle shall be released. If the vehicle has been towed, then the applicant shall also be required to post a bond for the towing/storage fees or to make payment of the towing/storage fees to the city's contractor, as applicable, subject to reimbursement as provided in subsection (f), below.

(d) The adjudication hearing officer shall be a person who is not associated with the maintenance of the delinquent vehicle list, nor shall the adjudication hearing officer hear any appeal in which he has personally participated in any decision relating to the booting or towing of the vehicle.

(e) The only issues before the adjudication hearing officer will be whether or not the vehicle was a delinquent vehicle owned by the person designated on the delinquent vehicle list at the time it was booted or towed under this article and whether the city has complied with this article in placing it on the delinquent vehicle list and causing it to be booted or towed, or both. The adjudication hearing officer shall have no authority to adjudicate any unresolved parking citation. The adjudication hearing officer may consider any competent evidence, including, but not limited to, public records and testimony from the applicant and city employees. The applicant may be represented by legal counsel and may cross-examine any witness presented by the city. Each applicant must appear at the hearing and shall be subject to examination on any matter relevant to the issues before the adjudication hearing officer. The adjudication hearing officer shall announce and record his decision within one hour following the conclusion of the hearing.

(f) If the adjudication hearing officer determines that the vehicle was not a delinquent vehicle owned by the person designated on the delinquent vehicle list at the time it was booted or towed under this article, or that the city has not complied with this article in placing the vehicle on the delinquent vehicle list and causing it to be booted or towed, or both, then the

vehicle shall be ordered released without payment of the fees prescribed in section 26-265 of this Code. Vehicle storage and related fees shall be payable for each twenty-four-hour period or portion thereof that a towed vehicle remains in storage after the adjudication hearing officer orders its release if not reclaimed within 24 hours after the adjudication hearing officer orders its release. If a bond had been posted for the administrative, boot, or towing/storage fees prescribed in section 26-265 of this Code, the bond shall be ordered to be refunded to the applicant. Furthermore, the city shall reimburse the applicant for any towing/storage fees that the applicant may have paid to a city contractor in order to secure release of the vehicle if those fees have been directly incurred by the applicant.

(g) A hearing under this section must be requested within ten days after the initial booting or towing of the vehicle by the city. A hearing requested thereafter will be granted if the city has not disposed of the vehicle, provided the owner must pay the vehicle storage and related fees for each day after the tenth day until the vehicle is reclaimed, regardless of the adjudication hearing officer's determination.

(h) In any instance in which a vehicle has been towed to a vehicle storage facility not owned by the city, then the applicant may alternatively request a hearing under Section 2308.452 of the Texas Occupations Code, before the justice court in the time and manner provided by Section 2308.456 of the Texas Occupations Code. The justices of the justice courts and the judges of the municipal courts shall have no authority to adjudicate any fee imposed under section 26-265 of this Code, or to order any release of a vehicle without payment of applicable fees, or to order a refund of applicable fees.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2010-846, § 12, 11-3-2010; Ord. No. 2011-1175, §§ 20—22, 12-14-2011)

Sec. 26-267. Certain conduct unlawful.

(a) It shall be unlawful for any person, other than an officer, employee of the city, or other authorized person acting in the course and scope of his duties under this article, to remove or attempt to remove or to tamper in any manner with a boot installed on any vehicle pursuant to this article.

(b) It shall be unlawful for any person, except under the written direction of a peace officer, to tow or move or to cause to be towed or moved any vehicle on which a boot is then installed pursuant to this article from the place where it was booted.

(c) It shall be unlawful for any person, other than an officer or employee of the city acting in the course and scope of his duties or the owner or operator of a booted vehicle, to remove or relocate any notice placed upon a booted vehicle under section 26-265(b)(3) of this Code.

(d) Any offense under this section shall be punishable upon conviction by a fine of not less than $200.00 nor more than $500.00, and each day that any violation continues shall constitute a separate offense. To the extent that any conduct declared to be unlawful under this section also constitutes a violation of any valid and applicable state law, then such unlawful conduct shall be punishable as provided by state law.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2023-548, § 13, 7-12-2023)

Sec. 26-268. Release of vehicles from city vehicle compound.

A vehicle that is towed to a city vehicle compound for reasons initially unrelated to the booting or towing procedures established under this article shall not be released until it has been verified that the vehicle does not appear on the delinquent vehicle list. If the vehicle appears on the delinquent vehicle list and if a review of the most current vehicle registration records available to the city indicates that the ownership of the vehicle has not changed from that reflected on the delinquent vehicle list, then the vehicle shall be subject to the fee and release provisions of section 26-265 of this Code and hearing provisions of section 26-266 of this Code. This section shall apply without regard to the day or the time that the vehicle was initially towed. However, if the towing was not initiated at a time otherwise authorized for towing under subsection (c) of section 26-264, then the presiding judge of the

municipal courts department shall ensure that a hearing is afforded within two hours of a request therefor or alternatively the parking official shall authorize the vehicle to be released without resolution of the parking citations.

For purposes of this division, a 'chronic commuter parking problem' means the occupancy of curbside parking spaces by commuter vehicles at the same hours and on the same days, but shall not mean parking for events which by their nature are expected to occur on a frequency of less than once every two weeks.

(b) In carrying out the functions assigned by this division, the parking official shall consult with and obtain the concurrence of the traffic engineer.

(c) Notwithstanding the definition of residential area, areas within 1,000 feet outside of the boundary of the Washington Avenue Corridor, as defined in section 26-701 of this Code,

may be designated as a residential parking permit area pursuant to the procedures of this division.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2012-1097, § 4, 12-12-2012)

Sec. 26-312. Request for designation.

(a) A request for designation of a residential parking permit area shall be initiated by petition of residents within the proposed residential parking permit area. The minimum residential area for which a petition for designation may be submitted is one blockface, including both sides of the street if both sides are residential or one residential blockface if the opposing blockface is not residential. The request shall be filed with the parking official upon a form promulgated for that purpose by the director, provided that the parking official shall not consider a request for designation of a residential parking permit area consisting of the same block or street more than once in any consecutive 12-month period. The request shall include, at a minimum, the following:

(1) A description of the residential area proposed to be included in the residential parking permit area;

(2) A description of the chronic parking problem or condition to be remedied;

(3) Evidence of neighborhood support for the project;

(4) The name, address and telephone number of a resident in the proposed residential parking permit area who shall be the contact for the request;

(5) The names and addresses of all residents within the proposed residential parking permit area;

(6) Evidence of support of residents of the proposed residential parking permit area for designation by the traffic engineer of the proposed area as a tow-away zone; and

(7) Any other information reasonably required by the parking official to make any determination required under this article.

Each request shall be accompanied by the nonrefundable application fee stated for this provision in the city fee schedule.

The parking official shall immediately forward a copy of all information relating to the request to the traffic engineer.

(b) The parking official initially shall review each request for completeness. If the parking official determines that the request is complete, the request shall be acted upon as further provided in this article. If the parking official determines that the request is incomplete, he shall return the request with written notice of the deficiencies.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07; Ord. No. 2011-1168, § 13, 12-14-2011)

Sec. 26-313. Parking survey.

Upon receipt of a complete application for designation of a residential parking permit area, the parking official shall conduct or cause to be conducted a parking survey of the proposed residential parking permit area. The parking survey shall be conducted in the manner prescribed by the traffic engineer. The parking survey shall determine the following information, as well as any other information that the parking official or the traffic engineer determines will be useful to verify the chronic commuter parking problem identified in the application:

(1) The total number of legal curbside parking spaces in the proposed residential parking permit area;

(2) The number of legal curbside parking spaces that are occupied by motor vehicles;

(3) The number of curbside parking spaces that are occupied by commuter vehicles; and

(4) The general hours of occupancy of curbside parking spaces by commuter vehicles.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-314. Criteria for designation.

The parking official, in making a determination of approval or disapproval with respect to

designation, and the city council, in making a designation, shall consider the results of the parking survey and the following criteria:

(1) The extent to which curbside parking spaces are occupied by motor vehicles. The total number of curbside parking spaces occupied by motor vehicles at the minimum must exceed 60 percent of the number of curbside parking spaces on the public streets of the proposed residential parking permit area for the area to be eligible for designation;

(2) The extent to which motor vehicles parking in the area are commuter vehicles. The total number of curbside parking spaces occupied by commuter vehicles during any one-hour period must equal or exceed 25 percent of the total number of curbside parking spaces occupied by motor vehicles in the proposed residential parking permit area for the area to be eligible for designation;

(3) The extent to which residents cannot obtain adequate curbside parking adjacent to or near their residences because of widespread use of available curbside parking spaces by commuter vehicles;

(4) The time or times of day of greatest commuter parking in the period surveyed;

(5) The effect on the safety of the residents from intensive commuter vehicle parking;

(6) The existence of air and noise pollution, hazardous conditions, and deterioration of the residential environment as a result of traffic congestion and insufficient parking in the area;

(7) The extent and availability to the general public of parking in the residential area;

(8) The extent that the designation of a residential parking permit area would be likely to reduce traffic congestion and any other problems identified in this section;

(9) Evidence of support of the residents in the proposed residential parking permit area for the institution of a residential parking permit system and the willingness of those residents to bear the costs incidental to the issuance of permits authorized by this article;

(10) Whether the problems identified in this section can reasonably and feasibly be solved at no additional cost to the city through an alternative to the designation of a residential parking permit area; and

(11) Any other traffic issue identified by the traffic engineer.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-315. Parking regulations.

If the parking official determines that an application for designation meets the criteria for designation, he shall so notify the traffic engineer, including with the notification his recommendations regarding the proposed residential parking permit area. The traffic engineer, in consultation with the parking official, shall develop for the proposed residential parking permit area proposed parking regulations that shall establish the days of the week and the times of day that parking by commuter vehicles shall be prohibited in the residential parking permit area. Nothing in this article shall require the traffic engineer to develop any parking regulations for a proposed residential parking permit area for days and times the traffic engineer determines parking would interfere with traffic mobility. Parking regulations developed for residential parking permit areas for which an application is submitted after or was pending on October 19, 2005, shall not prohibit commuter vehicle parking along the portion of the blockface on which a nonresidential property faces.

(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-316. Public hearing.

(b) The parking official shall give written notice of the public hearing by mail no less than 15 days before the date of the public hearing as follows:

(3) To each registered civic association and recognized super neighborhood in whose area the proposed residential parking permit area is located, provided that notice may be given electronically if that is the customary format with which the department communicates with the civic association or super neighborhood.

(4) For purposes of this subsection 26-316(b), the boundaries of the proposed residential parking permit area(shall be the rear property line, and the side property line of a corner property, of each lot or tract that abuts a blockface included in the residential parking permit area.

(c) Notice in the form prescribed by the director shall be published once in a newspaper of general circulation in the city at least 10 days prior to the hearing and shall be given in electronic format to the district council member in which the proposed residential parking permit area is located.

(d) The notice shall clearly state the purpose, date, time and location of the public hearing; the location and boundaries of the proposed residential parking permit area; the regulations proposed for the area; and the permit fees that will be charged.

(e) Written notice that is given by mail shall be deemed given when it is deposited in the United States mail, properly addressed, postage paid. The affidavit of a person who has knowledge of the fact that notice was mailed is prima facie evidence that notice has been given as required by this section.

(f) At the public hearing, any interested person, including the traffic engineer, may present testimony, orally or in writing, with respect to the proposed residential parking permit area, the proposed regulations and the permit fees. The director may establish rules for the conduct of the public hearing.

Following the close of the public hearing, the parking official shall approve or disapprove the proposed residential parking permit area or modify the proposal in response to public comment. If the parking official approves the proposal, with or without modification, he shall recommend the application and the parking regulations developed in relation to that application to the city council for designation of the residential parking permit area. If the parking official does not approve the proposal, he shall so advise the applicant, and the application shall not be submitted to the city council.
(Ord. No. 07-464, § 7(Exh. B), 4-11-07)

Sec. 26-318. City council action.

(c) A theater, auditorium, or arena use may share parking by submitting a parking study with a site plan that details the parking supply and demand of the intended use. The number of shared parking spaces shall be determined by the director after consideration of all relevant factors, including the factors of subsection (d) this section.

(d) Upon written request of the applicant supported by information adequate to make a determination, the director may approve an additional reduction of up to ten percent of the required number of shared parking spaces after considering all relevant factors, including:

(1) The unique parking characteristics of each use classification, including employee, customer, and patron parking

demand, hours of operation, and projected convenience and frequency of use of the shared parking.

(2) Whether the use of shared parking spaces will be injurious to public health, safety, and welfare including, but not limited to, whether the additional reduction of shared parking spaces will cause increased traffic congestion, potential harm to adjacent property owners, and spillover parking into surrounding residential neighborhoods; and

(3) The recommendation of the Director of Houston Public Works.

(e) All shared parking spaces must conform to the following criteria:

(1) A shared parking space shall not be reserved for or restricted to a specific use classification. A parking space reserved for a specific use classification shall not be considered a shared parking space;

(2) All shared and reserved parking spaces shall be identified on a site plan;

(3) Each shared parking space shall be clearly identified by signage on each tract and parking facility identifying the location and availability of the shared parking spaces for participating uses;

(4) Each shared parking space must be made available at all times for use by employees, customers, and patrons; and

(5) Shared parking spaces that are located on off-site parking facilities must comply with the provisions of section 26-499 of this Code for each individual use classification.

(f) The director shall not approve a site plan that proposes to use shared parking spaces unless the applicant or responsible party submits a shared parking agreement to the department that takes the form of a memorandum of lease or a reciprocal easement agreement in a form approved by the city attorney. The shared parking agreement shall comply with the requirements of a memorandum of lease contained in section 26-501 of this Code.

(g) After the director approves a site plan that uses shared parking spaces, any change in the use classification or parking factor shall require the applicant or responsible party to submit a new site plan to the department for approval and a revised shared parking agreement if necessary. The building official shall not issue a building permit or certificate of occupancy without a site plan approved by the director for the revised shared parking agreement.

(h) Operation of a use classification without an approved site plan required by this subsection is a violation of this article.

The director shall approve an alternative to the number and location of the signs required by this subsection in excess of four upon determining that the alternative will provide maximum visibility and satisfy the objectives of this section without unduly burdening the applicant. Each sign shall be a minimum of four by eight feet in size and shall be posted no more than 15 feet from the public right-of-way. Each sign shall face and be clearly legible from the public right-of-way. b. Strict application of the requirements of this article would make a project infeasible due to the existence of unusual physical characteristics that affect the property in question or would create an impractical development or one otherwise contrary to sound policy;

(2) That the circumstances supporting the granting of the variance are not the result of a hardship imposed or created by the applicant;

(3) The intent and general purposes of this article will be preserved;

(4) The number of proposed parking spaces will be sufficient to serve the use for which it is intended;

(5) The granting of the variance will not be injurious to the public health, safety or welfare; and

(2) Deny the variance request if the commission is unable to make the findings necessary for the approval of a variance pursuant to section 26-563 of this Code; or

(3) Defer the variance to a later commission meeting.

(Ord. No. 2013-208, § 2(Exh. A), 3-6-2013)

Sec. 26-565. Applicability of variance.

Any variance granted under the provisions of this division will apply only to the specific building or tract and use classification upon which the commission was requested to grant the variance and shall not constitute a change of any part of this article. (3) Designed to accommodate the typical range of bicycle sizes;

(4) Securely anchored to the ground or building;

(5) Spaced with sufficient clearance from other bicycle racks to allow access to the bicycle spaces; and

valet parking services must be provided for those parking spaces during all operating hours of the use classification.

(b) The director shall review the valet parking plan along with the site plan and shall approve a valet parking plan that complies with the standards of subsection (a) of this section. No valet parking services may be provided pursuant to subsection (a) of this section unless the director approves the site plan along with the valet parking plan.

Sec. 26-783. Permits.

Motor vehicles with a parking permit issued under this article may park at an on-street parking space restricted by parking meters or signs establishing time limits in a community parking program area at the locations and during the days and times established by the traffic engineer pursuant to section 26-774 of this Code.
(Ord. No. 2019-1015, § 30(Exh. B), 12-11-2019)

Sec. 26-784. Effect of issuance of permit.

(a) A resident parking permit shall be valid for one year from its date of issuance. A permit may be renewed by filing an application pursuant to this section and paying the applicable fee. A renewal permit application shall be reviewed and approved in accordance with this section; provided, that a permit that has been revoked pursuant to section 26-785 of this Code shall not be reissued for a period of two years from the date of revocation.

(b) A business parking permit shall be valid for 30 days from its date of issuance. A permit may be renewed by filing an application pursuant to this section and paying the applicable fee prior to the expiration of the permit. A renewal permit application shall be reviewed and approved in accordance with this section; provided, that a permit that has been revoked pursuant to section 26-785 of this Code shall not be reissued for a period of two years from the date of revocation.

(c) No parking permit shall be issued to a person who is neither a resident nor an owner, agent, or employee of a business within a community parking program area.

(d) A parking permit issued to a resident or owner, agent, or employee of a business of a community parking program area who no longer qualifies for a parking permit is void and use thereof shall constitute an offense.

(e) A permit does not guarantee or reserve a parking space within a community parking program area. A permit issued pursuant to this article does not authorize the standing or parking of any motor vehicle in any place or during any time when the stopping, standing or parking of motor vehicles is prohibited or set aside for specified motor vehicle types. The issuance of a permit shall not excuse the observance of any traffic regulation.

(f) Whenever the holder of a permit is not in compliance with one or more of the applicable provisions of this article controlling the issuance or renewal of permits, the holder shall notify the parking official, who shall direct the holder to surrender the permit or present evidence that the permit has been removed from the motor vehicle.

(g) Until its expiration, surrender or revocation, a parking permit shall remain valid for the length of time the holder continues to reside or own, operate, or be employed by a business within a community parking program area.

(h) A permit shall be valid only in the community parking program area for which it is issued.

(i) Nothing in this article shall be construed to supersede the parking regulations of an area that is designated as a residential parking permit area.
(Ord. No. 2019-1015, § 30(Exh. B), 12-11-2019)

Sec. 26-785. Revocation of permit.

In addition to the penalties provided for violation of this article, the parking official shall revoke the parking permit of any individual found to have committed three or more violations of this article within any preceding 12-month period. Upon a determination by the parking official that a person who holds a permit has been adjudicated to have committed three or more such violations within the prescribed period, the parking official shall provide written notification to such person by certified mail, return receipt requested, revoking the permit and ordering the surrender of such permit to the parking official. Failure to surrender a revoked permit when ordered to do so constitutes a separate violation of this article, and a signed return receipt shall be prima facie evidence of the delivery of the notice to surrender the permit.
(Ord. No. 2019-1015, § 30(Exh. B), 12-11-2019)

Sec. 26-786. Permit fees.

(a) The fee for each community parking program permit is stated for this provision in the city fee schedule.

(b) The parking official shall not issue any permit unless and until the applicable fee identified in this section has been paid.
(Ord. No. 2019-1015, § 30(Exh. B), 12-11-2019)

Sec. 26-787. Display of permit.

Each permit shall be conspicuously displayed upon a motor vehicle so as to be easily visible to any person passing the vehicle on the street while the vehicle is parked in an area designated for parking by permit in a community parking program area, except the parking official may accept a valid license plate number on file with the department for each permit holder in lieu of affixing or hanging a permit. Any failure to display a permit shall create a presumption that no permit exists, except as otherwise provided in this section.
(Ord. No. 2019-1015, § 30(Exh. B), 12-11-2019)

Sec. 26-788. Adjudication.

Cases involving violations of the parking provisions of this division shall be heard by adjudication hearing officers of the municipal courts department.

Sec. 27-1. Definition.

The term "mini-warehouse" as used in this chapter shall mean any storage facility containing multiple storage units or rooms which do not exceed 40 feet in length and 20 feet in width and which are available to the general public for rental under circumstances where the tenant or lessee has sole control over the property that is stored in such units or rooms.
(Code 1968, § 27½-1; Ord. No. 76-145, § 1(1), 2-3-76)

Sec. 27-2. License required.

No person shall own or operate a mini-warehouse without a license as herein provided. Any person who owns or operates a mini-warehouse at more than one location shall be required to obtain a license for each separate location. In the event the operator of any location is not the owner of such location, both the owner and operator shall be co-licensees for each such location.
(Code 1968, § 27½-2; Ord. No. 76-145, § 1(2), 2-3-76)

Sec. 27-3. License application and issuance.

(a) Any person desiring a license required by this chapter shall make application therefor in writing to the director of administration and regulatory affairs on a form provided by the director for that purpose stating where the business is to be located and the residential addresses of the owner and the operator. Such application shall be subscribed and sworn to before an officer authorized to administer oaths. Such application shall state that neither the applicant nor any business partner, nor, in the case of a corporation, any corporate officer, have had a license revoked under any city ordinance governing the business described herein.

(b) Upon the receipt of such application, the director of administration and regulatory affairs shall investigate the items in the application. If neither the applicant, his business partners, nor any corporate officers have had a license revoked as described above, the director of administration and regulatory affairs shall notify the applicant that it has been approved and shall issue a license to the applicant upon payment of the license fee.

(c) If the director of administration and regulatory affairs rejects the application, written notice, by certified mail, return receipt requested, shall be given to the applicant at the address stated in the application. The applicant shall have 30 days from the date of mailing thereof to appeal the rejection of his application to the city council by filing written notice of such appeal with the city secretary. Upon receipt of such notice, the city council shall hear evidence regarding the rejection of the application and shall, based upon the preponderance of the evidence, sustain or overrule such rejection. The city council shall give written notice of its action within ten days of its decision and such decision shall be final.
(Code 1968, § 27½-3; Ord. No. 76-145, § 1(3), 2-3-76; Ord. No. 08-52, § 49, 1-16-08, eff. 1-26-08)

Sec. 27-4. License fees.

The license fee for mini-warehouse operators is stated for this provision in the city fee schedule per year for each mini-warehouse location proposed to be operated by the applicant. All such fees are payable on or before the first day of January of each year and each such license will expire on December 31st of each year. If a permit is granted subsequent to January first, the fee shall be paid pro rata for the balance of the year, and any portion of a month shall be considered as an entire month in calculating the fee to be charged.
(Code 1968, § 27½-4; Ord. No. 76-145, § 1(4), 2-3-76; Ord. No. 2010-1016, § 2, 12-15-2010; Ord. No. 2011-1168, § 13, 12-14-2011)

Sec. 27-5. Records required.

Every person licensed as a mini-warehouse operator shall cause to be kept at his place of business a record of each rental or lease transaction, listing the date, the number of the unit

rented, the name and address of the lessee, and the lessee's driver's license number. The record shall be written legibly in ink and shall be kept neat and clean. All records provided for in this section shall be retained for three years and shall be available and open for inspection during regular business hours by any police officer of the city or by any authorized representative of the director of administration and regulatory affairs. It shall be unlawful for any person coming within the terms of this section to fail to keep or display the records as provided.
(Code 1968, § 27½-5; Ord. No. 76-145, § 1(5), 2-3-76; Ord. No. 08-52, § 50, 1-16-08, eff. 1-26-08)

Sec. 27-6. License revocation.

(a) Upon written verified complaint filed by any person with the director of administration and regulatory affairs setting out facts alleging that any licensee under this chapter has, since the license was granted, violated the provisions of this chapter, or any state or federal statute involving the criminal offense of theft, or violated the provisions of § 37.09 or 37.10 of the Texas Penal Code, or that the licensee falsified his original application for a license, the director of administration and regulatory affairs shall investigate the allegations.

(b) Based on his investigation, the director of administration and regulatory affairs shall determine whether just cause exists for a hearing on revocation.

(c) If just cause exists for a hearing on revocation of a license herein, the director of administration and regulatory affairs shall notify the licensee in writing by certified mail, return receipt requested, that a revocation hearing will be conducted at a specified time and place with reference to such complaint. A copy of the verified complaint shall be included, notifying the licensee of the allegations against him.

(d) At the hearing conducted by the director of administration and regulatory affairs or his designee, all parties may present evidence and may be represented by licensed attorneys. All parties may question opposing witnesses.

(e) Based on a preponderance of the evidence, the director of administration and regulatory affairs or his designee shall determine, whether the license should be revoked. A written copy of the decision shall be sent to all parties by certified mail, return receipt requested, as soon after the conclusion of the hearing as practicable but in no event more than 30 days.

(f) In the event that the licensee's license is revoked, such licensee may appeal the revocation to city council pursuant to Rule 12 of section 2-2 of this Code and by notifying the city secretary in writing within 14 days after the revocation. A hearing before the city council shall be set as soon as practicable. Failure to appeal within 14 days shall render the decision of the director of administration and regulatory affairs final.

(g) The hearing shall be conducted by city council pursuant to Rule 12 of section 2-2 of this Code. The city council shall, based on a preponderance of the evidence, render its decision. A copy of the decision shall be sent to all parties by certified mail, return receipt requested, as soon after the conclusion of the hearing as practicable but in no event more than 30 days. This shall conclude the licensee's administrative remedies and city council's action shall be final.

Sec. 28-10. Same—Electric.

(a) The construction and use of electrified fencing shall be allowed in the city only as provided in this section, subject to the following standards:

(1) *Electrification*:

a. No electrified fence shall be installed or operated with a power source other than a storage battery not exceeding 12 volts direct current, charged primarily with a solar panel; provided, however, in case of inclement weather or other conditions that inhibit the ability of the solar panel to fully recharge the battery, a charging device may be utilized for such pur-

pose, if connected in a manner that ensures that the charging device cannot provide a source of power to the fence. In no case shall an electrified fence be connected to any other electric power source.

b. The electric charge produced by the fence upon contact shall not exceed energizer characteristics set forth in paragraph 22.108 and depicted in Figure 102 of International Electrotechnical Commission (IEC) Standard No. 60335-2-76, as such standard exists upon January 30, 2008.

To the extent that the construction or installation of an electrified fence does not conflict with the requirements of this section, and unless otherwise specified herein, such fence shall be constructed or installed in conformance with the specifications set forth in IEC Standard 60335-2-76, as such standard exists upon January 30, 2008.

(2) *Perimeter fence or wall*: No electrified fence shall be installed or used unless it is completely surrounded by a non-electrical fence or wall that is not less than six feet and not more than eight feet in height. The perimeter fence or wall shall be separated from the electrified fence by not less than one foot at its closest point, and by not more than five feet at its farthest point, except at gate openings, which shall be installed in conformance with the specifications set forth in Annex CC of IEC Standard 60335-2-76, as such standard exists upon January 30, 2008. The area between the perimeter wall or fence and the electrified fence shall be kept completely clear of landscaping, shrubbery, other fences or any material of any kind. The lowest part of the perimeter fence or wall shall be constructed to follow the natural terrain to prevent penetration of such fence or wall at ground level. No part of a perimeter fence or wall shall be allowed to be in contact with an electrified fence by any means at any time. Perimeter fences adjacent to residential lots at the time of installation of the electric fence shall be either a wood privacy fence, a chain link fence with wood or plastic slats inserted into each weave of the fence, or an equivalent solid barrier fence.

(3) *Location*:

a. Limited to commercial outdoor storage areas only.

b. Prohibited within five feet of any public right-of-way or sidewalk, unless the barrier fence is a wood privacy fence, a chain link fence with wood or plastic slats inserted into each weave of the fence, or an equivalent solid barrier fence.

c. Prohibited within 25 feet of any outdoor area utilized for the storage, use, or handling of hazardous materials as defined in the Fire Code.

(4) *Height*: Shall be not less than six feet and not more than ten feet in height.

(5) *Signage; other markings*: Shall be clearly identified with warning signs in English, Spanish and Vietnamese that read: "Warning—Electric Fence" placed along the non-electrical perimeter fence or wall at intervals of not less than fifty feet, however, in no instance may there be less than one sign on each side of the non-electrical perimeter fence or wall. In addition to the required signs, the top or uppermost horizontal frame member of any entry gate providing access to any property upon which an electrified fence is located, shall be marked by the placement or addition of a yellow reflective paint, tape or other permanent weatherproof marking along the full length of the gate frame, which marking shall be at least 3 inches wide and be kept in good condition to ensure its continued visibility.

(6) *Hours of activation*: Shall not be activated between the hours of 8:00 a.m. and 5:00 p.m., except:

a. On days when the business is closed, such as weekends and holidays; or

b. When security personnel is available on-site to deactivate the electrical fence.

(7) *Key box*: Shall be installed in accordance with Houston Fire Department Life Safety Bureau Standards.

(8) *Registration*: Prior to the installation or use of any electrified fence, the property owner or lessee of the property upon which such fencing will be installed or used shall submit a completed registration for such fencing to the fire department using the form promulgated for that purpose by the fire chief. The property owner or lessee shall certify that the energizer of the fence complies with characteristics set forth in paragraph 22.108 and depicted in Figure 102 of IEC Standard No. 60335-2-76, as such standard exists upon January 30, 2008. No fee shall be charged in connection with the registration required by this item.

Sec. 28-12. Fencing or filling of abandoned excavations.

(a) It shall be unlawful for any person to build, construct or maintain, or to have built or constructed, any excavation of any size, and thereafter to abandon the use and maintenance thereof, unless such person shall construct a chain link fence or masonry fence at least six feet in height, which fence shall completely enclose such excavation, or fill such excavation with earth, bank sand or similar material. It is an affirmative defense to prosecution under this section that the excavation is for a basement or foundation for a structure that is actively being constructed or that the excavation is a swimming pool subject to regulation under chapter 43 of this Code.

(b) Any person violating any provision of this section, upon conviction, shall be fined not less than $100.00 nor more than $2,000.00 for each violation, and each day shall constitute a separate offense.

(a) It shall be unlawful for any owner or employee of any establishment in which food or beverages are sold or offered for sale for consumption on the premises to solicit, induce, entice, or encourage any patron or customer thereof to buy food or beverages from that establishment for consumption by the soliciting owner or employee or by any other person whom the soliciting employee or owner knows to be an owner or employee of the establishment.

(b) It shall be unlawful for any owner, manager, operator or person having control of any establishment in which food or beverages are sold or offered for sale for consumption on the premises to permit, allow or suffer any other owner or employee of the establishment to solicit, induce, entice, or encourage any patron or customer thereof to buy food or beverages from that establishment for consumption by the soliciting owner or employee or by any other person whom the soliciting owner or employee knows to be an owner or employee of the establishment.

(c) It shall be a defense to prosecution under this section that:

(1) The customer or patron solicited was known by the soliciting employee or owner to be a relative of either the soliciting employee or owner or the employee or owner for whom the food or beverages were solicited; or

(2) The customer or patron solicited was a friend of the soliciting employee or owner for whom the food or beverage was solicited and that friendship existed prior to the customer or patron's most recent visit to the establishment.

(d) In the interpretation and enforcement of this section the term "employee" shall be construed to include managers, operators, agents, and servants.

(e) The provisions of this section shall not apply to establishments operating under a license or permit granted under authority of the Texas Alcoholic Beverage Code.

(f) Any person violating any provision of this section, upon conviction, shall be punished as provided by section 1-6 of this Code. Each unlawful act shall constitute a separate violation.

Nothing in this subsec-

Special permits issued under this subsection and holders thereof shall be subject to all of the same restrictions imposed under subsection (c) with regard to other special permits and holders thereof, provided that the effective date of the annexation of the area where the lot or yard is situated shall apply in lieu of the applicable date specified in subsection (c) above, in any determination made with regard to the special permit or business operated thereunder. The provisions of this subsection shall not be available to the operator of any premises unless the premises was open for a business subject to regulation under this section on the date of first publication in a newspaper of general circulation of the notice of annexation hearings under section 43.052 of the Local Government Code or unless the operator had, on or before that date, leased or purchased the property and had actually commenced improving it for the express purpose of establishing the regulated business.

c. The mailing of notice, at least 15 days before the date of the commission meeting, to all civic associations registered with the planning and development department whose boundaries include all or a portion of the area situated within 300 feet of the property that is the subject of the transfer application; and

d. The posting of notice upon a sign on the property for which the improvement is requested, giving notice of the application and the date of the commission meeting. The director shall prescribe the dimensions of the sign and shall establish criteria for the location of the sign. If the property for which the application is made fronts on or has access to more than one public street, the director may require placement of more than one sign on the subject property upon a finding that more than one sign is necessary to provide adequate notice. The sign or signs shall be posted 72 hours after the director gives notice for their posting to the applicant, provided that the sign shall be posted at least 15 days prior to the date of the hearing.

(3) The applicant shall provide the following information to the director at the time specified by the director:

a. A certified list of the property owners to whom notice must be given pursuant to item (2) of this subsection; and

b. For each property owner and registered civic association to whom notice must be given pursuant to item (2) of this subsection:

1. One stamped envelope addressed to each property owner and registered civic association; and

2. One copy of the notice of the public hearing in the form prescribed by the director.

The applicant shall also provide proof to the director that the required newspaper notices have been timely published and that the required sign(s) have been posted and maintained for the required time period.

(4) The applicant and any member of the public may address the commission and present evidence or comments regarding the application at the meeting at which it is considered. The burden shall be upon the applicant to show by a preponderance of the credible evidence that the applicant is entitled to the granting of the application. Following the receipt of evidence and comments, the commission shall consider the matter and shall grant the application if it determines that each of the following criteria exists:

a. The improvement will not substantially increase the vehicular traffic on any street that is not a major thoroughfare. In making this determination, the commission shall consider whether the facility takes

its primary access from a major thoroughfare and whether it has rail or waterborne access for the receipt and shipment of materials.

b. The improvement will not have a negative effect upon the appearance of the community in which it is situated. In making this determination, the commission shall consider the applicant's plans for perimeter fencing and landscaping as well as the appearance of any structures, equipment, or other features of the facility that may be visible from the exterior.

c. The facility, by virtue of its activities, does not pose a substantial risk of adverse health effects, unlawful noise, fire, explosion, or other nuisance conditions, and the proposed improvements will not increase those risks. In making this determination, the commission shall consider the prior operating history of the facility.

d. There exists upon the property a capital investment of at least $500,000.00 current book value in facilities and equipment.

e. The facilities and equipment upon the property were placed for the operation of the facility for which the authorization is sought and may not readily be adapted to other uses that are not subject to regulation under this section or be removed to another location.

f. The granting of the application will not be injurious to the public health, safety, and welfare.

The commission may condition its granting of the application, if granted, upon the applicant's installation and maintenance of buffer zones, trees, shrubs, special fences, or other improvements to reduce noise or improve the external appearance of the property if it determines that the action is desirable to protect the public health, safety, and welfare. Any such requirement shall be consistent with the purpose of causing the use of the applicant's property to be as harmonious as practicable with the use of other nearby properties.

(5) The applicant or any person to whom notice is required to be given under part b. or c. of item (2) of this subsection may appeal, provided that the person attended and participated in the commission meeting, either in person or through an authorized representative. Appeals shall be to the city council and shall be governed by rule 12 of the city council rules of procedure (section 2-2 of this Code). Notice of an appeal must be filed in the city secretary's office by the tenth day following the rendition of the commission's decision on the application. The commission shall cause each meeting or portion thereof at which an application is to be considered to be videorecorded. Notwithstanding any provision of rule 12 to the contrary, any required transcript for an appeal to the city council may be prepared from the video recording. An appeal shall not suspend the action of the commission pending the decision of the city council.

(g) The licensing department may extend the filing period for a special permit upon demonstration to the director by clear and convincing evidence that the facility was in fact in operation on the effective date and that the applicant's failure to timely file was based upon an error or misunderstanding and not the result of conscious indifference to the requirements of this section.

(h) The provisions of this section are not applicable to the premises of a body shop facility with storage privileges operating under a valid license issued under division 4 of article II of chapter 8 of this Code.

(Ord. No. 97-75, § 3, 1-15-97)

Sec. 28-125. Same—Issuance or denial.

(a) Within 20 days of receipt of any application, either original or renewal, the director shall grant or deny the requested permit and give written notice to the applicant as to the decision, unless such time period is extended at the request of the applicant as provided in subsection (d), below.

(b) The director shall issue a permit to the applicant unless one or more of the following conditions exist:

(1) The applicant's enterprise is located within 1,500 feet of any school, church, public park, or licensed day-care center. Measurements shall be made in a straight line, without regard to intervening structures or objects, from the nearest point on the property line of the applicant's enterprise to the nearest point on the property line of such school, church, public park, or licensed day-care center;

(2) The applicant's enterprise is located within 1,000 feet of any other enterprise for which there is a permit. (3) Seventy-five percent or more of the tracts within a circular area, as described herein, are residential in character. The radius of such circular area shall be 1,500 feet, and the center of such circular area shall correspond to the midpoint of a line joining the two most distant points on the boundary of the tract on which the enterprise is located; multifamily tracts shall be counted as multiple residential tracts based upon the tax records acreage of the multifamily tract according to the following formula: each one-eighth acre of land or fraction thereof shall be equivalent to one residential tract. For purposes of this calculation a residential tract or multifamily tract shall be considered to be in the circular area in its entirety if any portion of it lies within the circular area;

(4) The applicant failed to supply all of the information requested on the application;

(5) The applicant gave materially false, fraudulent or untruthful information on the application;

(6) The applicant's enterprise is not in compliance with section 28-129 and section 28-130 of this Code (the director may allow any noncompliance with section 28-129 or section 28-130 to be cured during the director's review period established in subsection (d), below, provided that it must be cured before the notice of decision on the permit is issued);

(8) The operator has had a permit revoked for the same enterprise within the 180-day period next preceding the date that the application was filed; or

(c) Property uses and distances for original applications shall be determined as of the time that the application is filed. If a renewal application is timely filed as provided in section 28-124 of this Code, the property uses and measurements for the renewal application shall be determined as of the time that the original application for the enterprise was filed. If not timely filed, renewal

applications shall be subject to the same fees and shall be treated in the same manner in all respects as original applications.

(d) In the event that the director determines that an applicant is not eligible for a permit, the applicant shall be given notice in writing of the reasons for the denial within 20 days of the receipt of its application by the director, provided that the applicant may request, in writing, that such period be extended for an additional period of not more than ten days at any time before the notice is issued in order to make modifications necessary to comply with section 28-129 or 28-130 of this Code. An applicant may appeal the decision of the director regarding such denial by filing a written request for a hearing with the director within 20 days after he is given notice of such denial. The director's decision on the application shall be final unless an appeal is timely filed. An appeal shall not stay the director's decision on the issuance of a permit. The applicant's written request for a hearing shall set out the grounds on which the denial is challenged. The hearing shall be conducted by a hearing official from a panel of hearing officials, not to exceed ten in number, to be appointed by the mayor and confirmed by the city council. Such hearing officials shall be attorneys licensed to practice law in the State of Texas and shall serve without compensation. Hearings shall be conducted by each hearing official in rotation as appeals are filed. Should the hearing official next in rotation be unavailable or otherwise unable to hear an appeal within the time specified under this section, the hearing official next in order who is available shall be designated to hear such appeal. The hearing official shall not have participated in any investigation or decision relating to the denial of the permit. At the hearing the hearing official shall receive oral and written testimony regarding the application. Hearings shall be conducted under rules issued by the director, which shall be consistent with the nature of the proceedings and shall ensure that each party may present evidence, cross-examine witnesses and be represented by legal counsel.

(e) The hearing official shall conduct the hearing within 20 days after receipt of the applicant's written request for a hearing unless the applicant requests an extension in writing. The hearing official shall render a written decision and issue notice thereof to the applicant within five days after the conclusion of the hearing. The written decision of the hearing official shall be final subject to the provisions of section 28-135 of this Code.

(f) Failure of the director to give timely notice of his action on an application, or failure of the hearing official to timely conduct or give notice of his decision on an appeal from the director's decision shall entitle the applicant to the issuance of a temporary permit upon written demand therefor filed by the applicant with the director unless the delay resulted from a written request for a delay or deferral by the applicant. Such a temporary permit shall only be valid until the third day after the director gives notice of his action on the application or the hearing official gives notice of his decision on the appeal, as applicable.

(g) In any instance in which the applicant's establishment is to be situated within 1,000 feet, as measured hereunder, from another proposed establishment for which a previously filed permit application has been denied, and the previously filed application is still subject to appeals, the director may grant the permit on a conditional basis, subject to the outcome of the appeals on the previous application. A permit so issued may be withdrawn and denied effective upon the third day after notice thereof is given to the operator following the resolution of the appeals on the prior permit. In case of denial the applicant shall have the same rights of appeal hereunder as if the permit had been denied in the first instance.

(h) The provisions of item (2) of subsection (b) of this section, above, shall not be construed to prohibit an enterprise for which there is a permit from relocating to another location situated within 1,000 feet of its existing location, provided that the proposed location complies with all applicable requirements of this article other than its proximity to its own existing enterprise location. An original permit application shall be required to be filed for the proposed relocation, and the director shall conditionally grant the application, if granted, on the stipulation that the permit will not actually be issued until the applicant discontinues operation at its existing location and surrenders

the permit for its existing location. Any such relocation must be completed within 180 days from the date that the permit is conditionally granted or the conditional grant of the application will become void. Pending the removal of the enterprise to its new location, both the old and new locations shall be deemed to be operating under a permit for purpose of measurements to locations of other proposed enterprises for which applications may be filed.

(i) In any instance in which the proposed enterprise tract description submitted by an applicant pursuant to section 28-123(b)(4) of this Code, above, for a permit reflects a tract or parcel of land that has resulted from a subdivision of property for which compliance with the applicable subdivision requirements of chapter 42 of this Code was required, and the director determines that the property has not been lawfully subdivided in accordance with chapter 42, then the director shall cause all measurements and determinations regarding the issuance of the permit to be made on the basis of the parent tract from which the subdivision was made, rather than the subdivided tract.
(Ord. No. 97-75, § 3, 1-15-97)

Sec. 28-126. Same—Transfer upon change.

(a) A permit is personal to the owner(s) and the operator designated in the application holds the permit on the owner(s)' behalf as the owner(s)' agent, provided it may be transferred pursuant to this section. A transfer application must be filed by the tenth day next following any change of the owner(s) or operator designated on the application. In the event that a transfer application is not timely filed, then the permit shall be invalid for any purpose relating to the operation of the enterprise, and any transfer shall require the filing of an original permit application and be subject to the regulations applicable thereto. For purposes of measurements between enterprises under section 28-125(b)(2) of this Code, an establishment for which the permit has become invalid by operation of this section shall be treated as though it had a permit until the permit is revoked pursuant to section 28-127 of this Code.

(b) The director shall prescribe a form on which permit transfer applications shall be made. The form shall include a statement under oath that the original application remains correct as previously submitted in all respects except those that are amended hereby. The transfer application shall contain a statement under oath that the individual signing the transfer application has personal knowledge of the information contained therein and that the information is true and correct and shall not be complete unless accompanied by the nonrefundable transfer fee stated for this provision in the city fee schedule. Transfer applications shall be filed in the same place and at the same time as original applications and the fee shall be payable in the same manner as for original applications, as provided in section 28-123 of this Code.

(c) Transfers shall be reviewed, issued and subject to appeal in the same manner as original applications, pursuant to section 28-125 of this Code, except that items (1), (2), and (3) of subsection (b) shall not apply, and they shall be issued for the remaining term of the permit to be transferred.

(d) No change in ownership of an enterprise or transfer of a permit for an enterprise shall be allowed during the pendency of any administrative proceeding under section 28-127 of this Code, from the time that any request for revocation or suspension has been filed with the hearing official until the hearing official's order is final. Any such transfer or attempted transfer shall confer no rights whatever in the permit for the enterprise to the putative transferee.
(Ord. No. 97-75, § 3, 1-15-97; Ord. No. 2010-1016, § 2, 12-15-2010; Ord. No. 2011-1168, § 13, 12-14-2011)

(a) The city attorney shall have the authority to request the revocation of a permit for any one (1) or more of the following reasons:

(1) The owner or operator of the permitted enterprise knowingly allowed a person under 18 years of age to enter an enterprise;

(2) The permitted enterprise does not conform to the provisions of section 28-129 and section 28-130 of this Code;

(3) Three or more cumulative violations of any of the offenses contained in Chapter 21, Chapter 43, Section 22.011, or Section 22.021 of the Texas Penal Code or of the offenses contained in this article or in article VIII of this chapter have occurred on the premises of the permitted enterprise. These violations must have occurred in a consecutive period of 12 months, and the owner, operator or any manager licensed under article VIII of this chapter: (i) knowingly allowed such violations to occur; (ii) did not make a reasonable effort to prevent the occurrence of such violations; or (iii) should have known that such violations were occurring or did occur;

(4) The operator of the permitted enterprise gave materially false, fraudulent or untruthful information on the original, renewal or transfer application form;

(5) The enterprise has not been open for business for a period of 30 consecutive days, unless due to circumstances beyond the control of the owner, and the owner is proceeding with due diligence, given all attendant circumstances, to open or reopen the establishment;

(6) That there was a change of owner or operator for which a transfer application was not timely filed pursuant to section 28-126 of this Code; or

(7) That the permit was erroneously issued in contravention of the criteria of this article.

(b) The city attorney shall nave sole authority to initiate any action for revocation of a permit; provided, that the director may request that the city attorney give priority to any such action based upon the number or nature of violations involving a particular enterprise or enterprises.

(c) The director shall cause to be prepared and transmitted to the mayor and the city council, with a copy to the city attorney, a monthly report summarizing the number and type of violations set forth under subsection (a) of this section for each permitted enterprise. The city attorney shall cause to be prepared and transmitted to the mayor and city council a monthly report summarizing revocation actions filed, currently pending or decided during the reporting period; provided, that the city attorney may withhold from such report any factual information that, in the city attorney's opinion, may tend to compromise any ongoing investigation being conducted under this article or any penal law.

(d) Prior to revocation of a permit, the city attorney, with the assistance of the director, shall investigate the grounds alleged to determine whether probable cause for revocation may exist and, if so, shall notify the owner(s) and operator in writing of reasons for the proposed revocation and grant such owner(s) and operator the opportunity to appear before a hearing official to be designated by the mayor and confirmed by the city council in accordance with the procedures set forth under section 28-125(d) of this Code, at a time and place specified within such notice. The hearing official designated shall not have participated in any investigation of the alleged grounds for the revocation. Such hearing shall be held not less than 20 days after the notice is given. Hearings shall be conducted under rules issued by the director. Such rules shall be consistent with the nature of the proceedings and shall ensure that each party may present evidence, cross-examine witnesses and be represented by legal counsel. If, after the hearing, the hearing official finds that the permit should be revoked, he shall issue a written order revoking such permit which shall be effective as provided in section 28-135 of this Code. If the hearing official determines, based upon the nature of the violation, that the ends of justice would be served by a suspension in lieu of a revocation, he may suspend the operation of the permit for a period of time to be stated in the order of suspension, not to exceed two months; however, a suspension may not be ordered if the grounds are based upon item (6) or (7) of subsection (a), above.

(e) An enterprise shall be treated as having a permit for purposes of measurements under section 28-125(b)(2) of this Code, pending the final disposition of any court action involving judicial review of a permit revocation. An establishment holding a suspended permit shall be treated as having a permit for the purpose of measurements made under section 28-125(b)(2) of this Code.

Permits shall be surrendered at the same place and at the same time as provided in section 28-123(a) of this Code. The surrender of a permit shall be effective upon its filing in the office of the director.

(d) A permit shall not constitute authorization to operate the enterprise as an adult arcade or adult mini-theatre as that term is defined in section 28-81 of this Code. Each enterprise that also constitutes an adult arcade or adult mini-theatre shall require an additional permit under article II of this chapter.
(Ord. No. 97-75, § 3, 1-15-97; Ord. No. 2010-721, § 11, 9-15-2010, eff. 10-4-2010)

(a) It shall be unlawful for any person to construct any new hotel, to alter or remodel any existing hotel so as to add more sleeping rooms

thereto, or to convert any premises for use as a hotel unless the following requirements are met:

(1) The tract on which the hotel is situated shall have direct frontage on and take primary access from:

a. At least one major thoroughfare that is not a residential street;

b. The right-of-way of a limited access or controlled-access highway; or

c. A street or portion thereof that is not a residential street, that is striped or otherwise actually allows for at least four lanes of moving traffic, and that connects to a major thoroughfare that is not a residential street, provided that a hotel that is the result of the conversion of an existing apartment complex of 75 or more units to a suites hotel may be on a street or portion thereof that meets all of the requirements of this item 28-202(1)c. but that is a residential street.

All primary entrances to the property shall be at least 20 feet in width and shall be from the street identified above in this provision upon which the tract fronts and from which the tract takes primary access. Notwithstanding the foregoing, the hotel may have one or more secondary entrances to the tract from streets other than those identified in this paragraph, provided that the entrance lanes are not more than 15 feet in width and that the total number of secondary entrances does not exceed 75 percent of the total of primary entrances either in number or aggregate width.

(2) No portion of the tract on which the hotel, other than a hotel with 120 or more separately rentable units and service facilities is situated may have frontage on or take any access from any street on which any school, library, church, licensed day care center, health facility, or public park also has frontage, if the hotel tract would be within 750 feet of the school, library, church, licensed day care center, health facility, or public park tract. The distance shall be measured from the nearest point on the tract on which the hotel is situated to the nearest point on the tract on which the school, library, church, licensed day care center, health facility, or public park is situated.

(3) The property line of the tract on which a hotel with 50 or fewer separately rentable units is situated may not abut at any point any other tract that is in whole or in part residential in character. To the extent that any property line of the tract on which a hotel with 51 or more separately rentable units is situated abuts at any point any other tract that is in whole or in part residential in character, then the owner of the hotel shall provide a buffer along the entire length of that property line of the hotel. The buffer shall include the provision and maintenance of each of the following:

a. Hotel building(s) set back at least ten feet from the property line;

b. Canopy trees at least one per 100 lineal feet of property line;

c. Ornamental trees at least two per 100 lineal feet of property line;

d. Shrubs at least 16 per 100 lineal feet of property line; and

e. Solid wood or masonry fence at least eight feet in height.

Upon request by the applicant in writing, the director may waive any of the buffer requirements of item (3) above upon finding the following: (i) the project is a conversion of another premises to a suites hotel; (ii) the project, if a waiver is granted, will not be contrary to the public interest or detrimental to the public health, safety, or welfare; and (iii) the project, if a waiver is granted, will not result in a violation of any other applicable ordinance, regulation or statute.

(4) No premises located on a residential street shall be converted to a suites hotel other than an apartment complex with 75 or more units.

(5) A hotel, with or without service facilities, that has 75 or fewer separately rentable units may not be situated in a residential area unless the hotel is situated upon a tract that is contiguous to and abuts the right-of-way of a limited access or controlled access highway and takes its primary access from the frontage road of that highway, provided that the hotel may not take secondary access from any residential street.

(b) All determinations required under this section shall be based upon facts in existence on the day that the application for a building permit to construct, alter, or remodel the hotel is duly filed in the office of the building official with all plans, drawings, and other documents required for its consideration and processing under the terms of the *Building Code.* In the event that any applicant for a building permit to construct, alter, or remodel a hotel fails to initiate or prosecute the work such that the building permit expires under the terms of the *Building Code,* then a new building permit shall be required, and its issuance shall be subject to facts in existence at the time that the application is file for the new permit.

(a) The commission is authorized to consider and grant variances from the provisions of this division by majority vote of those members present and voting, when the commission determines that the following conditions exist:

(1) The imposition of the terms, rules, conditions, policies and standards of this division would create an undue hardship by depriving the applicant or owner of the property of reasonable use of the land; and

(2) The circumstances supporting the granting of the variance are not the result of a hardship imposed or created by the applicant; and

(3) The intent and general purposes of this division will be preserved and maintained; and

DIVISION 2. PERMITS

Sec. 28-231. Enterprise permit applications.

(a) Enterprise permits are categorized as restricted, unrestricted, or registration. A permit may only be issued to the owner of the tract where the enterprise will be located. The owner may designate, in writing and submitted with the application, an individual or company to represent them as applicant. A separate application and permit are required for each tract.

(b) An applicant who desires to obtain a permit under this article shall file an application with the department. The application shall be in the form prescribed by the planning official and shall include:

(1) The non-refundable fee set forth for this provision in the city fee schedule;

(2) Proof of ownership of the tract in the form of a certified copy of a deed, lease, or other evidence of legal title. If the applicant is not the title owner of the tract where the enterprise is located, proof that the applicant is authorized to act for the owner.

(3) A survey sealed by a state licensed surveyor, drawn to scale, and showing the exact location (existing or proposed) of any building or structure, or the location on the tract, in which hazardous materials will be manufactured, processed, generated, stored, or used.

(4) The specific occupancy divisions within Class H for the enterprise.

(5) If the application is for a registration of a nonconforming enterprise, the applicant shall provide evidence to the satisfaction of the planning official that one or more of the following conditions existed on the effective date:

a. The tract was in operation or in process of construction for use as an enterprise;

b. The tract was served by rail service; or

c. The active status of out of doors manufacture, processing, generation, storage, or use of hazardous materials.

(6) Any other information reasonably required by the planning official for the purpose of processing and evaluating the application under the requirements of this article.
(Ord. No. 2020-1092, § 2(Exh. A), 12-16-2020)

Sec. 28-232. Issuance or denial of an enterprise permit.

(a) The planning official shall review and approve an application for an enterprise permit meeting the standards set forth in this article unless:

(1) The information provided in the application is materially false or incomplete, or the applicant has failed in any material respect to comply with this article;

(2) The applicant has had a permit revoked for operations on the tract or any portion

thereof during the two-year period preceding the date of filing of the application; or

(3) The land use test area around a restricted or unrestricted permit meets one or more of the follow conditions:

a. One-third or more of the tracts within the land use test area are being used for residential purposes. In computing the foregoing percentage, any tract being used for multifamily residential purposes shall be counted as being equal to one tract for each eight dwelling units or fraction thereof upon the tract. Any tract other than the applicant's tract that is not improved with one or more buildings or structures shall not be included in the computation; or

b. Any portion of the tract upon which a sensitive use is situated falls within the land use test area.

Evaluation of these conditions shall be made based upon the land uses that existed on the date the application is filed with the department.

(b) When an application cannot be approved under this section, the planning official shall send notice via electronic mail to the applicant stating the reasons the application was denied. An applicant of an application denied pursuant to subsection (a)(3) of this section may submit written notice of intent to file a modification application, or a complete modification application, under the provisions of division 3 of this article within 90 business days of the date notice of the denial is sent by the planning official. A modification application will be held open for one year from the date of the notice of intent to file a modification application or a complete modification application is filed with the planning official. After a period of one year, an incomplete application for modification will be closed. An extension to complete an application for modification may be requested in writing by the applicant and may be granted by the planning official for a period not to exceed one year from the original date of the notice of intent to file a modification application or a complete modification application. Other than the opportunity to file a modification application, there shall be no appeal from the denial of an application.

(c) Each enterprise permit issued pursuant to this article shall include:

(1) The identity, type of legal entity, and legal address of the owner;

(2) The tract to which the permit pertains;

(3) The type of enterprise permit: restricted, unrestricted, or registration;

(4) A detailed statement identifying the historical and current status of the enterprise as:

a. An existing nonconforming enterprise established prior to February 16, 1997;

b. A conforming restricted enterprise registered between February 15, 1997 and the effective date;

c. A conforming restricted enterprise registered after the effective date;

d. A conforming unrestricted enterprise registered after the effective date; or

e. An existing unrestricted enterprise that is nonconforming as a result of outside storage exceeding the MAQs as of the effective date.

(5) A detailed statement of all activities authorized by the permit;

6) A detailed listing of all current and pre-existing authorizations and exemptions under which the permittee is operating; and

(7) Any other information required by the planning official, building official, or fire marshal that will facilitate identification of activities authorized by or subject to the permit.

(Ord. No. 2020-1092, § 2(Exh. A), 12-16-2020)

Sec. 28-233. Transfer.

Upon any change of ownership of the tract to which it pertains, an enterprise permit may be transferred to the new owner. A request to transfer ownership shall be made by the applicant in the form prescribed by the planning official and accompanied by:

(1) Payment of the non-refundable fee stated for this provision in the city fee schedule; and

(2) Proof of the change of ownership of the tract.

(Ord. No. 2020-1092, § 2(Exh. A), 12-16-2020)

Sec. 28-234. Revocation.

(a) The planning official may revoke an enterprise permit if the planning official determines:

(1) The permit application was materially false or incomplete;

(2) The permit was issued through error;

(3) The permit holder has failed to comply with any applicable provision of this article; or

(4) The use of the tract as an enterprise has been discontinued for a continuous period of 180 days.

(b) The planning official shall send notice to the permit holder of a revocation a minimum of 30 days before the date the permit is scheduled for revocation. Notice shall be sent by United States mail, first class, certified, return receipt requested, addressed to the last known address of the permit holder; provided that the notice shall be posted at the tract if returned by the U.S. Postal Service. The notice shall describe the basis of the revocation under subsection (a) of this section and the timeframe and method for the applicant to file a written request for the planning official to reconsider the revocation.

(c) A permit holder that has received a notice of revocation may, within the above-referenced 30-day notice period, present information to the planning official in writing to refute any determination made under subsection (a) of this section that is cited as a basis for permit revocation.

(d) If the grounds for revocation are based upon item (3) in subsection (a) of this section, and if the permit holder demonstrates to the satisfaction of the planning official that the violation was not intended and that effective measures have been taken to prevent a reoccurrence, then the planning official may suspend the permit in lieu of revocation. A suspension would continue, at a minimum, until the planning official has determined that the violation has been or will be adequately addressed.

(e) A decision by the planning official to suspend or revoke a permit under this section shall be made in writing and include the basis of the revocation under subsection (a) of this section. The decision of the planning official shall be final.

(f) An application for a permit following revocation of an enterprise permit at the same tract shall be treated as a new permit application under this article. Land use determinations shall be based upon uses in existence at the time the new permit application is filed.

(g) No application for a new permit or for expansion of operations under a registration that is required under this division shall be considered by the planning official while a revocation proceeding relating to the same tract is in progress under this section. In that instance, the planning official shall notify the applicant that action on the application will be withheld pending the resolution of the revocation proceeding.

(Ord. No. 2020-1092, § 2(Exh. A), 12-16-2020)

Sec. 28-235. Registrations.

(a) To assure public safety and emergency response effectiveness, hazardous enterprises that become non-conforming due to amendment of this article shall review their current hazardous enterprise permit and determine whether they may easily become conforming either as a restricted or unrestricted enterprise. If the enterprise would not qualify under the new rules, then in lieu of or in the alternative to

seeking a restricted permit or an unrestricted permit, an enterprise in existence or in process of construction on the effective date may seek a registration pursuant to this section, by making application as required under sections 28-231 through 28-233 of this article.

(b) An enterprise in existence or in process of construction on the effective date may continue to operate without a permit for a 60-day period following the effective date during which an application may be filed with the planning official, and thereafter may be authorized by the planning official to continue to operate while the city is acting upon the application.

(c) Applications for registrations shall not be subject to the land use criteria specified in section 28-232 of this Code and shall be granted or denied without notice and a hearing as otherwise provided in this division. However, if the applicant alternatively seeks a restricted permit or an unrestricted permit, then the applicant shall be subject to all criteria of this division with respect to the application insofar as it seeks a restricted or unrestricted permit.

(d) For purposes of this section, a building or structure is considered to be in process of construction when another permit required for its construction is applied for with the jurisdiction having authority to issue the other permit or if no other permit is required, when actual work commences on the ground.

(e) The filing period for a registration may be extended by the planning official if the applicant demonstrates, to the satisfaction of the planning official, that the enterprise was in fact in operation on the effective date and that the applicant's failure to timely file was based upon an error or misunderstanding and not the result of conscious indifference to the requirements of this article. A decision to extend a filing period is within the sole discretion of the planning official and is not subject to further appeal.
(Ord. No. 2020-1092, § 2(Exh. A), 12-16-2020)

Sec. 28-236. Limitations upon registrations.

(a) A registration authorizes enterprise operations within a building or structure identified for that use on the registration.

(b) A registration authorizes out of doors manufacture, processing, generation, storage or use of hazardous materials on the tract only if so designated on the registration.

(c) Any expansion of a building or structure to which the registration pertains, conversion of any other building or structure to use for enterprise operations or construction of any additional building or structure for enterprise operations shall be authorized only on the following basis:

(1) If the tract had rail service on the effective date and the rail service is designated on the registration, then no restriction exists.

(2) If the tract did not have rail service on the effective date, then construction or expansion will only be authorized following the application process for an enterprise permit under this article, except that the residential land use test criteria of section 28-232 of this Code shall be adjusted so that:

a. The test shall be based upon two-thirds or more, rather than one-third or more, of the tracts if the tract takes its street access exclusively from a major thoroughfare; or

b. The test shall be based upon one-half or more, rather than one-third or more, of the tracts if the tract does not take access exclusively from a major thoroughfare.

(d) The tract upon which an enterprise operating under a registration is situated may not be expanded, unless the enterprise seeks and obtains a new restricted or unrestricted permit.
(Ord. No. 2020-1092, § 2(Exh. A), 12-16-2020)

Sec. 28-237. Restricted enterprise permits—Expansion or construction.

A restricted enterprise permit is valid only for enterprise operations within the building or structure identified thereon for that purpose. Any expansion of the building or structure to

which the enterprise permit pertains, conversion of any other building or structure to use for enterprise operations or construction of any additional building or structure for enterprise operations shall require the application for and issuance of a new permit under this article. The holder of a restricted enterprise permit may not manufacture, process, generate, store, or use hazardous materials out of doors upon the tract without first obtaining an unrestricted enterprise permit.
(Ord. No. 2020-1092, § 2(Exh. A), 12-16-2020)

Sec. 28-238. Unrestricted enterprise permits—Expansion or construction.

The holder of an unrestricted enterprise permit may construct additional buildings or structures, convert the use of buildings or structures or undertake expansion of existing buildings or structures upon the tract to which the enterprise permit pertains without first obtaining a new permit under this article. The holder of an unrestricted enterprise permit may not expand the size of the tract to which the permit pertains without first obtaining a new unrestricted enterprise permit for the expanded tract.
(Ord. No. 2020-1092, § 2(Exh. A), 12-16-2020)

DIVISION 3. MODIFICATION TO STANDARDS.

Sec. 28-241. In general.

(a) A modification to the standards of this article may be requested by an applicant within the time period described in section 28-232(b) of this Code. The requested modification must meet or exceed the level of public safety standards enumerated in section 28-242 of this Code, and as otherwise required in this article or other chapters of this Code or state and federal law.

(b) The planning official is authorized to issue an enterprise permit for an application denied previously based upon the criteria of section 28-232 of this Code when a modification is approved under the provisions of this division. To qualify for a modification of these standards, the applicant shall:

(1) File an application in the form prescribed by the planning official;

(2) Include the material provided with the previously denied enterprise permit application;

(3) Provide technical information and other relevant documentation of specific evidence or data that justifies the required findings under subsection (c) of section 28-242 of this Code; and

(4) Pay all applicable fees as set forth for this provision in the city fee schedule, which shall include the fee for review of plans using alternative methods of construction, if the modification request includes alternative methods.

(c) Any modification approved under the provisions of this division shall apply only to the specific enterprise permit considered with the application and shall not constitute a change of this article, or any part hereof, or establish any policy or precedent, rule or regulation contrary to the provisions of this article.
(Ord. No. 2020-1092, § 2(Exh. A), 12-16-2020)

Sec. 28-242. Procedure and standards.

(a) Within five business days after receiving a complete application pursuant to section 28-241 of this Code, the planning official shall send an electronic copy of the modification request to the building official and fire marshal, for a technical review of the efficacy of the alternate materials or methods proposed.

(b) The building official and fire marshal shall submit their recommendations on the technical review detailed in subsection (a) of this section to the planning official within ten business days after the date their recommendations are completed. The planning official shall distribute the modification request and the technical review recommendation to the review committee within five business days after receipt of same.

(c) The review committee may request additional evaluation by other city departments or divisions, or hire experts to provide advice, and may request that the consulting experts or the applicant attend one or more meetings of the review committee to provide additional information for their thorough review. The review committee shall consider the modification request, the technical review recommendations of the building official and fire marshal, and the following standards:

(1) The approval of the modification would:

a. Not result in a violation of any other applicable ordinance, regulation, or statute;

b. Not be injurious to the public health, safety, and welfare;

c. Not impose an undue financial or administrative burden on the city; and

d. Be in accordance with the spirit and intent of this article.

(2) The applicant has established appropriate mitigation and safeguards that will be provided and maintained at the facility so the manufacturing, processing, generation, storage, or use of the hazardous material is not reasonably expected to pose a hazard to human health or the environment;

(3) There are no reasonable alternatives to granting the modification that would have an equal or lesser impact on the city, the applicant, residents of surrounding neighborhoods, or to a sensitive use; and

(4) The operation and location of the enterprise is not reasonably expected to prohibit the ability of the city to implement its emergency management plan or otherwise execute the duties of the office of emergency management described in chapter 13 of this Code.

(d) A unanimous recommendation of the review committee is required to grant a modification from the standards of this article. The review committee is authorized to impose any condition on the enterprise permit for which a modification is requested that the review committee determines is reasonably related to the request and furthers the intent and purpose of this article, specifically including a requirement to sign and submit a release and indemnification as determined by the review committee in favor of the city.

(e) The planning official shall advise the applicant of the decision by the review committee or request more information on behalf of the review committee within 30 business days after the date a complete application is submitted to the planning official. The decision of the review committee shall be final.

(f) The planning official shall provide an electronic copy of the approved modification application to applicant and the review committee within five business days after approval by the committee.

Sec. 28-281. Purpose.

The purpose of this article is to establish a method by which the city may measure certain types of criminal activity occurring in apartment communities in the city and to create a program to address within those apartment communities shown to have excessive levels of criminal activity the application of methods proven to reduce such activity. It is the intent of this article to identify the parties the city will hold responsible for compliance with and violations of this article, rather than to determine the rights and liabilities of persons under agreements to which the city is not a party. The terms of this article shall not be construed to alter the terms of any lease or other agreement between a landlord and a tenant or others relating to property that is the subject of this article; provided that no provision of any lease or other agreement shall be construed to excuse compliance with this article by any person. Additionally, a violation of this article shall not in and of itself create a negligence per se standard or otherwise expand existing liability in tort for either a landlord or a tenant.
(Ord. No. 06-1124, § 2, 11-8-06)

(2) Waive the initial meeting with the police official, which waiver shall be deemed a consent to the inspection and the owner's agreement to pay the fee prescribed by this article.

Failure of the owner to timely respond to the notice of designation shall be deemed the owner's acquiescence to the conduct of the inspection and agreement to pay the fee required by this article.

If the evidence presented at the hearing demonstrates to the satisfaction of the hearing officer the likelihood that the parking of vehicles or equipment in the front or side yards of residences in the residential area has caused, or is presently causing, a diminution in the value of the residences in such area, degrades the aesthetic appearance of the neighborhood, or tends to damage underground infrastructures leading to the loss of water or other conditions contrary to the public interest, the hearing officer shall recommend the application or petition favorably to the city council.
