State law reference—Municipal recreation systems, T.C.A. § 11-24-101 et seq.

Sec. 12-84-1. Applicability.

The provisions of this chapter shall apply in the use of parks and parkways belonging to the city.
(Code 1985, § 23-66; Ord. No. 4763, 4-25-2000)

Sec. 12-84-2. Injuring or picking flowers and plants.

It is unlawful for any person to cut, break or in any way injure or deface any tree, plant or grass or pick any flowers, leaves or nuts, wild or cultivated, in any park.
(Code 1985, § 23-67; Ord. No. 4763, 4-25-2000)

Sec. 12-84-3. Sales and exhibitions.

It is unlawful for any person to expose any article for sale or exhibition in any park or parkway unless previously licensed so to do by the division of park services.
(Code 1985, § 23-68; Ord. No. 4763, 4-25-2000)

Sec. 12-84-4. Making fires.

It is unlawful for any person to make a fire within any of the parks, parkways, squares or places without special permission from the division of park services.
(Code 1985, § 23-69; Ord. No. 4763, 4-25-2000)

Sec. 12-84-5. Billposting—Erecting stands or platforms—Meetings.

It is unlawful for any person to post any bill, placard, notice or other paper upon any structure, erect any structure, stand or platform, or hold any religious or other meetings, or make any oration, or harangue or conduct any ceremony in any park or parkway without previous permission therefor from the division of park services.
(Code 1985, § 23-70; Ord. No. 4763, 4-25-2000)

Sec. 12-84-6. Permit required for poles and wires.

It is unlawful for any person to erect or have erected any telephone, telegraph, electric or other poles and wires in any of the parks or parkways in the city, except in accordance with a written permit from the division of park services.
(Code 1985, § 23-71; Ord. No. 4763, 4-25-2000)

Sec. 12-84-7. Indecency or breaches of the peace.

It is unlawful for any person to use threatening, abusive or insulting language, or commit any obscene or indecent act thereon, or any act tending to a breach of the public peace in any park or parkway.
(Code 1985, § 23-72; Ord. No. 4763, 4-25-2000)

Sec. 12-84-8. Animals at large prohibited.

It is unlawful for any person to allow to go at large any horse or other animal within any park or parkway, except that dogs may be allowed therein when led by a chain or proper leash not exceeding six feet in length.
(Code 1985, § 23-73; Ord. No. 4763, 4-25-2000)

Sec. 12-84-9. Bathing, fishing and interfering with birds prohibited.

It is unlawful for any person to bathe or fish in any of the waters or fountains, or cast any substance therein, or disturb or interfere in any way with the fish, birds or animals within any public park, parkway, square or place, except that the division of park services may authorize fishing in one or more of the lakes under its jurisdiction and adopt rules and regulations in respect thereto, and post appropriate signs to give the public notice thereof.
(Code 1985, § 23-74; Ord. No. 4763, 4-25-2000)

Sec. 12-84-10. Throwing missiles, begging and gaming prohibited.

It is unlawful for any person to throw stones or other missiles, or beg or publicly solicit subscriptions or contributions, or tell fortunes, or play games of chance, or climb upon any wall, fence, shelter, seat, statue or other erection in any park or parkway.
(Code 1985, § 23-75; Ord. No. 4763, 4-25-2000)

Sec. 12-84-11. Applicable park hours.

A. It is unlawful for any person to remain in any park between the hours of 8:00 p.m. and 6:00 a.m. March 15 through October 31, and 6:00 p.m. and 6:00 a.m. November 1 through March 14, except on special occasions specifically authorized by the city council.

B. Parks services may, by resolution approved by the city council, set hours varying from regular park hours for an individual park. Parks operating outside of regular park hours shall have a sign clearly posted at the established park entrance(s) indicating special hours.

C. This section shall not apply to downtown area parks maintained and managed by the Riverfront Development Corporation, or any museum, facility or institution maintained on park grounds.
(Code 1985, § 23-76; Ord. No. 4763, 4-25-2000; Ord. No. 5222, 11-5-2007)

Sec. 12-84-12. Traffic regulations generally.

The provisions of title 11 regulating traffic in the use of streets shall apply to the use of all drives in parks and parkways controlled by the city, whether within or without the corporate limits; provided, that if any provision of this chapter is inconsistent with the provisions of Title 11, the provisions of this chapter shall prevail and apply in parks and on parkways.
(Code 1985, § 23-77; Ord. No. 4763, 4-25-2000)

Sec. 12-84-13. Parking or stopping vehicles in certain places prohibited.

It is unlawful for any person to operate, stop or park any vehicle in the public parks and golf courses of the city except on the roadways therein and on other areas designated by the division of park services for public use provided such prohibition does not apply to golf carts and vehicles authorized by the division of park services.
(Code 1985, § 23-78; Ord. No. 4763, 4-25-2000)

Sec. 12-84-14. Standing vehicles for hire.

It is unlawful for any person to stand any vehicle for hire in any park or parkway without a permit to do so from the division of park services, and then only at such place as shall be indicated and allowed by the permit.
(Code 1985, § 23-79; Ord. No. 4763, 4-25-2000)

Sec. 12-84-15. Use of drives and bridle paths generally.

A. It is unlawful for any person to use the drives and bridle paths in public parks and parkways except as provided in section 11-16-17.

B. Animals to be used on either drives or bridle paths in public parks shall be well-broken, and constantly held in such control that they may be easily and quickly turned or stopped. They shall not be allowed to move at a rate of speed on the drives or bridle paths of more than eight miles an hour, and when it shall be deemed necessary to safety, good order, or the general convenience

that the speed of an animal or vehicle should be checked, or that it should be stopped, or its course altered, and the officer on duty shall so direct, by gesture or otherwise, such direction shall be obeyed.
(Code 1985, § 23-80; Ord. No. 4763, 4-25-2000)

Sec. 12-84-16. Position of horses ridden on roads.

All horsemen going at a walk or slow trot must keep near the curbstone or gutter on the right-hand side of the road while riding in parks or parkways. Those going more rapidly must keep nearer the middle of the road.
(Code 1985, § 23-81; Ord. No. 4763, 4-25-2000)

Sec. 12-84-17. General regulations to cyclists.

Cyclists must not coast in the parks, nor on the parkways or bicycle paths, and must keep their feet on the pedals and their hands on the handlebars and must not mount nor dismount, except on the extreme right of the roads or bicycle paths.
(Code 1985, § 23-82; Ord. No. 4763, 4-25-2000)

Sec. 12-84-18. Riding more than two abreast.

It is unlawful for persons riding horses or bicycles, or operating motorcycles, motor scooters or motor bikes, to ride more than two abreast within any park or parkway in the city.
(Code 1985, § 23-83; Ord. No. 4763, 4-25-2000)

Sec. 12-84-19. Instruction in operating automobiles, and other vehicles and trick riding prohibited.

Instruction in operating automobiles, bicycles, tricycles, motorcycles, velocipedes or other such vehicles of propulsion, and all trick or fancy riding on the same, is prohibited in the parks and parkways at all times.
(Code 1985, § 23-84; Ord. No. 4763, 4-25-2000)

Sec. 12-84-20. Drinking or sale of beverages with alcoholic content within public park areas and boundaries.

It is unlawful for any person or persons to sell, consume or possess any beverage with alcoholic content in any of the public parks or properties under the jurisdiction of the division of park services, except in such enclosed building or other structures and/or areas as are specifically designated and authorized by the division of park services, provided that the city council may by resolution exempt only persons participating in certain organized civic or charitable activities from the foregoing provisions.
(Code 1985, § 23-85; Ord. No. 4763, 4-25-2000)

Sec. 12-84-21. Use of helmets required in skate parks.

A. It is unlawful for any person to utilize the skate park(s) with skateboards, bicycles, or inline skates without the use of a helmet as a protective measure.

B. Violation of this section shall result in a fine of $50.00, unless otherwise waived at the discretion of the court and dismissed as a warning for a first offender.
(Ord. No. 5423, § 1, 12-6-2011)

Sec. 12-84-22. Method of naming and renaming.

When the city shall acquire any public parks and other public recreational areas, for use by the general public, by purchase, condemnation, or dedication, it shall be the duty of the Memphis City Council to select a suitable name for such new public park and other public recreational area. Furthermore, the Memphis City Council may change the official name adopted for existing City of Memphis parks and other recreational areas, by ordinance duly passed. Any conflicts with the Memphis and Shelby County Unified Development Code shall be made in favor of this section.
(Ord. No. 5759, § 8, 9-1-2020)

CHAPTER 12-88. MUD ISLAND RIVER PARK

Sections:

Sec. 12-88-1. Control and supervision.
Sec. 12-88-2. Reports on costs and revenues.

Sec. 12-88-1. Control and supervision.

An existing and established recreational area known as Mud Island River Park, located on Mud Island, shall hereafter be under the control and supervision of the mayor of Memphis.
(Code 1985, § 23-21; Ord. No. 4763, 4-25-2000)

Sec. 12-88-2. Reports on costs and revenues.

It shall be the responsibility of the mayor of Memphis and administration to maintain separate up-to-date records reflecting the costs of operating and maintaining Mud Island River Park, and all aspects thereof, and revenue

from the park, or any activities thereon. The mayor shall submit, on an annual basis, a report to the city council on the operating costs of, and revenue from, the park.
(Code 1985, § 23-22; Ord. No. 4763, 4-25-2000)

CHAPTER 12-92. WHARVES AND LANDINGS*

Sections:

Sec. 12-92-1. Bond may be required for wharfboats moored at public landings.
Sec. 12-92-2. Obstructing wharves and landings.
Sec. 12-92-3. Removal of leaking or sinking vessels from harbor—Generally.
Sec. 12-92-4. Removal of leaking or sinking vessels from harbor—Procedure in case of failure of master or person in charge to remove.

Sec. 12-92-1. Bond may be required for wharfboats moored at public landings.

The owners or operators of all wharfboats moored in front of any public landing on any river front may be required to give a bond in the sum of $5,000.00 to the city, conditioned that if any such wharfboat shall sink, be burnt or in any other manner become an obstruction to the ingress or egress of other watercraft, the owners or agents in charge of the same shall remove the wreck or obstruction at once, and at the owner's risk and expense.
(Code 1967, § 35-1; Code 1985, § 32-1)

Sec. 12-92-2. Obstructing wharves and landings.

No person, by himself or herself or agent, shall at any time, deposit, or cause to be deposited, on any wharf, landing or any of the contiguous public grounds or passageways leading to the river, any nuisance, incumbrance, obstacle or hindrance to the free and uninterrupted passage or transaction of business at such wharf or landing, except such articles as are intended for shipment or immediate storage in the city. Nor shall any person scatter hay, straw or any other article or substance on the levee, or make fires thereon, without permission of the port commission. All skids and other things used for the purpose of storing freight shall be placed and piled in such position and place as the agents of the commission may direct.
(Code 1967, § 35-2; Code 1985, § 32-2)

***Charter references—**Memphis and Shelby County Port Commission, §§ 627—654; Memphis River Front Harbor Commission, §§ 654.1—654.9.

Sec. 12-92-3. Removal of leaking or sinking vessels from harbor—Generally.

The agents of the port commission are vested with full power and authority to direct and compel the owner, master or agent or other person in charge of each and every boat or vessel, of whatsoever character or kind, lying and being within the harbor limits, or port of the city, that may be found, considered and adjudged to be in a leaking or sinking condition, to have the same forthwith removed beyond the limits of the harbor, or to such point or place within the limits of the city as they may deem best. It shall be the duty of such agents to give to the owner, master, agent or person in charge of such leaking or sinking boat or vessel immediate notice thereof, if found within or about the city, as well as to notify him or her of their determination in relation thereto. Should such master or person in charge fail, neglect or refuse to remove, or have the same promptly removed, he or she shall be guilty of a misdemeanor.
(Code 1967, § 35-3; Code 1985, § 32-3)

Sec. 12-92-4. Removal of leaking or sinking vessels from harbor—Procedure in case of failure of master or person in charge to remove.

Should the owner, master, agent or person in charge of any leaking or sinking boat, vessel or watercraft, as referred to in section 12-92-3, after having been duly notified of the condition thereof by an agent of the port commission, fail, neglect or refuse to remove the same as required, it shall be the duty of such agent to have such boat, vessel or watercraft removed, at the earliest possible period, at the expense of the owner, master, agent or person in charge of the same, and he or she shall retain the possession thereof until the entire cost and expense of such removal shall be fully paid and satisfied. In case such boat, vessel or watercraft should sink within the limits of the harbor before removal, the owner, master, agent or person in charge thereof shall be, and he or she is required, to remove the same and every part or parcel thereof, beyond the limits of the harbor, at his or her own proper cost and expense. In case of failure, neglect or refusal on the part of such owner, master, agent or person in charge to make the removal, as required by this section, of any and all such wrecks within the time specified, it shall be the duty of such agent, under the direction of the port commission, at the cost of the owner, master, agent or person in charge, to have the same removed beyond the precincts

of the city harbor, in the cheapest and most practical manner, keeping an accurate account of the outlay, so as to have the same charged up to the proper party on the books of the city. In case of such person's refusal to pay the same, on proper application, the amount so expended shall be recoverable from the owner, agent or charterer of such boat. The boat with all her machinery and fixtures, shall be liable for such charges, and a lien for such costs and charges is fixed and retained thereon. (Code 1967, § 35-4; Code 1985, § 32-4)

CHAPTER 12-96. MOTORBOATS*

Sections:

Sec. 12-96-1. Short title.
Sec. 12-96-2. Purpose.
Sec. 12-96-3. Definitions.
Sec. 12-96-4. Violation of federal laws or regulations.
Sec. 12-96-5. Reckless or negligent operation.
Sec. 12-96-6. Duty of operator in case of accident.
Sec. 12-96-7. Muffling of exhaust—Use of cut-outs.
Sec. 12-96-8. Motorboat traffic citation ticket—Arrest warrants.
Sec. 12-96-9. Motorboat violation forfeitures.

***State law reference—**Boating regulations, T.C.A. § 69-1-101 et seq.

Sec. 12-96-1. Short title.

This chapter shall be known as and may be cited as the "Memphis Motorboat Ordinance."
(Code 1967, § 35-41; Code 1985, § 32-46)

Sec. 12-96-2. Purpose.

The purpose of this chapter is to provide for and to promote the safety of persons and property in connection with the use, operation and equipment of motorboats, and to provide regulations relating to the use thereof, which are consistent with and in conformity with the laws of the United States regulating the use of motorboats upon navigable waters.
(Code 1967, § 35-42; Code 1985, § 32-47)

Sec. 12-96-3. Definitions.

The following terms and definitions shall be applied in the interpretation and enforcement of this chapter:

Federal Boating Program of 1958 means and includes the Federal Act of 1958 relating to the numbering of vessels and motorboats as contained in 46 USC 527, and all amendments thereto, all of which are incorporated herein by express reference, and all amendments which may hereafter be adopted by the United States Congress.

Motorboat means and includes every vessel propelled by machinery and not more than 65 feet in length, except tugboats and towboats propelled by steam or diesel power. The length shall be measured from end to end over the deck, excluding sheer.

Motorboat Act of 1940 means and includes the Motorboat Act of 1940 as adopted by the United States, and as appears in 46 USC 526 through and including 526u, and all amendments thereof, all of which are incorporated herein by express reference, and all amendments which may hereafter be adopted by the United States Congress.

Rules of the road means and includes the navigation rules of the United States relating to the navigation of vessels on the Mississippi River and its tributaries, as contained in 33 USC 301 through and including 356, and all amendments thereto, all of which are incorporated herein by express reference, and shall mean and include any amendments to such navigation rules hereafter made by the United States Congress. Such term shall also mean and include the regulations pursuant to such United States Code adopted by the United States Coast Guard, Department of the Treasury, styled "Pilot Rules for Western Rivers," and being sections 95.01 through 95.66 of part 95, subchapter F of chapter 1, under title 33, "Navigation and Navigable Waters," and all amendments thereto, all of which are incorporated herein by express reference, and any amendments of such regulations hereafter adopted by the United States Coast Guard.
(Code 1967, § 35-43; Code 1985, § 32-48)

Sec. 12-96-4. Violation of federal laws or regulations.

No person shall navigate, operate or use a motorboat in violation of:

A. The rules of the road;

B. The Motorboat Act of 1940; or

C. The Federal Boating Program of 1958, all of which are adopted as a part hereof by section 12-96-3.

(Code 1967, § 35-44; Code 1985, § 32-49)

Sec. 12-96-5. Reckless or negligent operation.

No person shall operate, navigate or use any motorboat in a reckless or negligent manner so as to endanger the life, limb or property of any person. Without in any way limiting the generality of the foregoing, by express enumeration of the following offenses, each of the following offenses shall constitute operation in a reckless or negligent manner, and shall be presumed to endanger life, limb or property:

A. Loading a motorboat with passengers or cargo beyond its safe carrying capacity, taking into consideration weather and all other existing conditions;

B. Operating a motorboat, or manipulating any water skis, surfboard, aquaplane, or other object towed by the motorboat, in such manner as to cause risk of collision, near misses with other vessels, or in such a reckless or negligent manner as to endanger the life, limb or property of any person;

C. Operating any motorboat, or manipulating any water skis, surfboard, aquaplane, or other object towed by the motorboat, while intoxicated or under the influence of any narcotic drug, barbiturate or marijuana;

D. Operating the motorboat while the operator or other person is sitting on the gunwale or on the

bow of the motorboat, providing that this restriction against sitting on the bow of a motorboat shall not apply to a motorboat which is equipped with protective bow railings, or lifelines, while the motorboat is moving at idle speed or a low speed, which does not approach a planing speed;

E. Operating a motorboat at speeds that create a damaging wake in designated "no wake" or "reduced speed" areas around docks, piers, etc.;

F. Operating a motorboat, towing a person or persons on water skis, surfboard, aquaplane, or similar device, or riding upon such water skis, surfboard, aquaplane or similar device, at any time between the hours from one hour after sunset to one hour before sunrise; providing that this prohibition shall not be applicable to exhibitions approved by the United States Coast Guard where adequate safeguards have been taken;

G. Operating, navigating or manipulating any motorboat, tow rope, water skis, surfboard, aquaplane, or rider thereon in such manner as to cause the vessel, towrope, water skis, surfboard, aquaplane, or other device, or any person riding thereon, to collide with or strike or throw water upon any other person, boat or object;

H. Operating a motorboat while pulling a person or persons on water skis, surfboard, aquaplane or other similar device, or riding upon such water skis, surfboard, aquaplane or other similar device, without two or more persons in the motorboat so that one will be available to keep a lookout ahead and the other to observe the person or persons being pulled;

I. Crossing the bow of a tow close aboard, in such manner that if the engine failed, or the skier fell from his or her skis, the tow would not have ample room and opportunity to stop before striking the boat or the skier;

J. Failing to have one United States Coast Guard approved life preserver aboard a motorboat for each person who is aboard the motorboat;

K. Failing to have the required lights and equipment aboard in operating condition, as prescribed by the Motorboat Act of 1940, for the particular time and circumstances under which the motorboat is then operating.

(Code 1967, § 35-45; Code 1985, § 32-50)

Sec. 12-96-6. Duty of operator in case of accident.

In case of collision, accident or other casualty involving a motorboat, it shall be the duty of the operator, insofar as he or she can do so without serious danger to his or her motorboat or persons aboard, to render such assistance as may be practicable and necessary to other persons affected by the collision, accident or other casualty, in order to save them from danger caused by the collision, accident or casualty. He or she shall also give his or her name, address, and identification of his or her motorboat to any persons injured, and to the owner of any property damaged.

(Code 1967, § 35-46; Code 1985, § 32-51)

Sec. 12-96-7. Muffling of exhaust—Use of cut-outs.

The exhaust of every internal combustion engine used on any motorboat shall be effectively muffled by equipment so constructed and used as to muffle the noise of the exhaust in a reasonable manner. The use of cut-outs is prohibited, except for motorboats competing in an organized and United States Coast Guard approved regatta or boat race, and for such motorboats which on trial runs, during a period not to exceed 96 hours immediately preceding such regatta or race, and for such motorboats while competing in official trials for speed records during a period not to exceed 48 hours immediately following such regatta or race.

(Code 1967, § 35-47; Code 1985, § 32-52)

State law reference—Engine mufflers, T.C.A. § 69-9-301 et seq.

Sec. 12-96-8. Motorboat traffic citation ticket—Arrest warrants.

A. An official making an arrest for a violation of this chapter shall be authorized to give a motorboat traffic citation ticket. In the event the form of traffic citation ticket includes information and is sworn to as required under the general laws of the state in respect to a complaint charging the commission of the offense alleged in such motorboat traffic citation ticket to have been committed, then such traffic citation ticket when filed with a court or a branch of a court having jurisdiction, shall be deemed to be a lawful complaint for the purpose of prosecution under this chapter.

B. It is unlawful for any person to violate his or her written promise to appear given to an officer upon the issuance of a motorboat traffic citation ticket regardless of the disposition of the charge for which such motorboat traffic citation ticket was originally issued.

C. In the event any person fails to comply with a motorboat traffic citation ticket given to such person or attached to a motorboat or fails to make appearance pursuant to a summons directing an appearance in the city court, or if any person fails or refuses to deposit bail as required and within the time permitted by ordinance, the clerk of the city court shall secure and issue a warrant for his or her arrest.
(Code 1967, § 35-48; Code 1985, § 32-53)

Sec. 12-96-9. Motorboat violation forfeitures.

A. The city's traffic violations bureau is authorized to collect the following schedule of forfeitures:

Section Violated	*Nature of Violation*	*Amount of Forfeitures*
12-96-5(A)	Overloading	$15.00
12-96-5(D)	Riding bow or gunwale	$10.00
12-96-5(E)	Damaging wake	$5.00
12-96-5(F)	Skiing at night	$15.00
12-96-5(G)	Close aboard (boat)	$5.00
	Close aboard (skier)	$5.00
12-96-5(H)	No observer	$5.00
12-96-5(I)	Crossing bow of tow	$15.00
12-96-5(J)	Insufficient preservers	$10.00
12-96-5(K)	Improper or no lights	$25.00

B. Nothing herein shall prohibit a person from requesting that the ticket or citation issued against him or her be transferred to the city court for disposition.

C. In the event of a violation of any motorboat regulation or laws not herein set out, excepting sections 12-96-5(B), reckless operation, and 12-96-5(C), operating under the influence, the traffic violations bureau is authorized to collect as a forfeiture an amount not to exceed $10.00.
(Code 1967, § 35-49; Code 1985, § 32-54; Ord. No. 553, § 1, 10-7-1969)

CHAPTER 12-100. CONVENTION CENTER HOTEL TOURISM DEVELOPMENT ZONE

Sections:

Sec. 12-100-1. Designation as qualified public use facility.
Sec. 12-100-2. Creation of district.
Sec. 12-100-3. District boundaries.
Sec. 12-100-4. Surcharge assessment.
Sec. 12-100-5. Surcharge assessment rate.
Sec. 12-100-6. Mandatory registration, filing of returns, payment of surcharge and licensing.
Sec. 12-100-7. Delinquent payments.
Sec. 12-100-8. Allocation and use of revenues.
Sec. 12-100-9. Remittance of revenues.
Sec. 12-100-10. Termination of surcharge.

Sec. 12-100-1. Designation as qualified public use facility.

The hotel development is hereby designated as a qualified public use facility (collectively, the "Convention Center Hotel QPUF") pursuant to and in accordance with Tenn. Code Ann. title 67, chapter 4, part 30 (as amended from time to time, hereinafter in this chapter called the "Act").
(Ord. No. 5841, § 1, 12-20-2022)

Sec. 12-100-2. Creation of district.

There is created the convention center hotel surcharge district (the "district") in accordance with the Act.
(Ord. No. 5841, § 1, 12-20-2022)

Sec. 12-100-3. District boundaries.

The district created by this chapter shall be comprised of the area located in the city within the following boundaries:

Parcel l (Hotel Site):

Legal Description of Land

Land situated in Shelby County, Tennessee:

Parcel 1

Tract 1

Being a survey of part of the City of Memphis property as recorded in Instrument U2-8944 at the Shelby County Register's Office located in Memphis, Tennessee and being more particularly described as follows:

Beginning at a point on the east line of North Main Street (82.5 ft. right-of-way), said point being 24.98 feet south of the extended south line of Market Avenue (66 ft. right-of-way); thence northwardly

along a curve to the right having a radius of 25.00 feet an arc distance of 39.25 feet (chord N65°34'21"E - 35.34 feet) to a point of tangency on the south line of Market Avenue; thence S69°27'10" along said south line a distance of 274.11 feet to a point of curvature; thence along a curve to the right, having a radius of 25.00 feet an arc distance of 39.22 feet (chord S24°26'09"E - 35.37 feet) to a point of tangency on the west line of Second Avenue (66 ft. right-of-way); thence S20°34'53"W along the west line of Second Avenue a distance of 225.51 feet to a point of curvature; thence along a curve to the right having a radius of 25.00 feet and an are length of 39.26 feet (chord S65°34'09"W -35.35 feet) to a point on the north line of Exchange A venue (106 ft. right-of-way); thence N69°26'36"W along the north line of Exchange Avenue a distance of 249.19 feet to a point; thence N20°35'53"E a distance of 80.00 feet to a point; thence N69°26'36"W a distance of 50.00 feet to a point on the east line of said North Main Street; thence N20°35'53"E along the east line of North Main Street a distance of 170.48 feet to the point of beginning.

Tract 11

Pedestrian crossing easement.

Being a pedestrian crossing across North Main Street (82.5 foot right-of-way), being 77.87 feet south of the south line of Market Avenue (66 foot right-of-way) and being more particularly described as follows:

Commencing at the intersection of the south line of Market Street (66 foot right-of-way) and the east line of north Main Street (82.5 foot right-of-way); thence S20°35'53"W along the east line of North main Street, a distance of 77.87 feet to the Point of Beginning; thence S20°35'53"W and continuing along the east line of North Main Street, a distance of 29.50 feet to a point; thence N68°56'18"W, a distance of 7.52 feet to a point; thence S64°53'15"W, a distance of 14.76 feet to a point; thence N69°15'23"W, a distance of 45.23 feet to a point; thence N25°15'16"W a distance of 14.45 feet to a point; thence N69°57'42"W a distance of 9.08 feet to a point, said point being the west line of North Main Street; thence N20°35'53"E along the west line of North Main Street a distance of 29.85 feet to a point; thence S70°35'14"E a distance of 9.44 feet to a point; thence N65°29'33"E a distance of 35.04 feet to a point; thence S69°37'14"E a distance of 15.52 feet to a point; thence S24°36'03"E a distance of 35.60 feet to a point; thence S69°56'31"E a distance of 7.55 feet to the point of beginning.

The underside and top of the structure occupying the described area is at 13.9' and 35.8' above the finish floor of the hotel at the west entrance.

Parcel 2

Tract 1

Beginning at a point on the east line of north Main Street (82.5' right-of-way), said point being 25.02 feet north of the extended north line of Market Avenue (66' right-of-way); thence N20°35'53"E along the east line of North Main Street a distance of 174.14 feet to point; thence N61°18'21"E a distance of 20.58 feet to a point on the south line of Winchester Avenue (50' right-of-way); thence S89°38'57"E along the south line of Winchester Avenue a distance of 158.85 feet to a point; thence S20°34'56"W a distance of 269.59 feet to a point the north line of said Market Avenue; thence N69°27'10"W along the north line of Market Avenue a distance of 137.51 feet to a point of curvature; thence along a curve to the right having a radius of 25.00 feet and an arc length of 39.29 feet (chord N24°25'39"W - 35.37 feet) to the point of beginning.

Tract II

Beginning at a point on the east line of North Main Street (82.5' R.O.W.), said

point being 24.98 feet south of the south line of Market Avenue (66' R.O.W.); thence along the east line of said North Main Street, N20°35'53"E a distance of 116.00 feet to a point; thence leaving the east line of said North Main Street and along a curve to the left, having a radius of 25.00 feet and an arc length of 39.29 feet (chord = S24°25'39"E - 35.37 feet) to a point, said point being on the north line of said Market Avenue; thence along the north line of said Market Avenue, S69°27'10"E a distance of 274.17 feet to a point; thence along a curve to the left, having a radius of 25.00 feet and an arc length of 39.22 feet (Chord - N65°36'11"E - 35.32 feet) to a point, said point being on the west line of Second Avenue (66' R.O.W.); thence along the west line of said Second Avenue, S20°37'38"W a distance of 115.97 feet to a point; thence leaving said Second Avenue and along a curve to the left, having a radius of 25.00 feet and an arc length of 39.28 feet (chord = N24°26'09"W - 35.37 feet) to a point, said point being on the south line of said Market Avenue; thence along the south line of said Market Avenue, N69°27'10"W a distance of 274.11 feet to a point; thence along a curve to the left, having a radius of 25.00 feet and an arc length of 39.25 feet (chord = S65°34'21"W a distance of 35.34 feet to the point of beginning.

(Ord. No. 5841, § 1, 12-20-2022)

Sec. 12-100-4. Surcharge assessment.

The making of sales (as such term is defined in the Act) by engaging in any business (as such term is defined in the Act), except for those businesses exempt under Tenn. Code Ann. title 67, chapter 4, part 712, in the district is declared to be a privilege. All such sales shall be subject to the surcharge assessment provided in this chapter and the city hereby levies such surcharge on all sales.
(Ord. No. 5841, § 1, 12-20-2022)

Sec. 12-100-5. Surcharge assessment rate.

The surcharge levied by this section shall be equal to five percent of the sales price (as such term is defined in the Act).
(Ord. No. 5841, § 1, 12-20-2022)

Sec. 12-100-6. Mandatory registration, filing of returns, payment of surcharge and licensing.

All persons carrying on business (as such term is defined by the Act) in the district, and all persons who may hereafter carry on business in the district, shall register with the city treasurer for the purpose of assessment and collection of the surcharge. All persons so registered shall file a return detailing Sales for the prior month and surcharge collected on account of such Sales on or before the 20th day of each calendar month and shall remit all surcharge collected during such month, together with any delinquent payments of surcharge, with such return. Each person who files a return and remits the appropriate amount of surcharge shall be granted a license which such person shall display within their place of business. The city treasurer is hereby authorized and directed to develop the forms for registration and filing monthly returns, as well as rules and regulations regarding the filing of the same.
(Ord. No. 5841, § 1, 12-20-2022)

Sec. 12-100-7. Delinquent payments.

Any nonpayment or delinquent payment of any surcharge shall be subject to the rights and remedies described in chapter 5-24 of the Memphis City Code.
(Ord. No. 5841, § 1, 12-20-2022)

Sec. 12-100-8. Allocation and use of revenues.

All revenues received by the city as a result of the surcharge, except for the reasonable expenses of the city

treasurer incurred as a result of its administrative duties under this chapter which shall not exceed one percent of such revenues, shall be designated for, and allocated to the payment of the cost of renovation and potential expansion of the Convention Center Hotel QPUF, including, without limitation, all debt issued or incurred in the acquisition, construction, leasing, renovation and equipping of the Convention Center Hotel QPUF, including principal, interest and other fees and charges.
(Ord. No. 5841, § 1, 12-20-2022)

Sec. 12-100-9. Remittance of revenues.

On or before the 15th day of each month, the city treasurer shall remit all revenues received during the prior month, less the aforedescribed administrative fee, to CCRFC or its assignee. CCRFC, or its assignee, is hereby directed to deposit such revenues in accordance with the Act and any agreements governing the payment or reimbursement of costs incurred, or debt issued or incurred by CCRFC to finance or refinance costs, in connection with renovation and potential expansion of the Convention Center Hotel QPUF.
(Ord. No. 5841, § 1, 12-20-2022)

Sec. 12-100-10. Termination of surcharge.

The surcharge shall continue until terminated as provided in the Act.

1. All actions heretofore undertaken by the mayor or his designee and other officials, employees, attorneys and agents of the city in furtherance of the intent of this resolution, and of the documents authorized by this resolution, are hereby ratified, confirmed and approved.
2. The mayor or his designee and other appropriate officials of the city are hereby authorized to enter into such agreements, and they and other appropriate employees of the city are hereby authorized to execute such certificates or other documents and take such other actions, as may be necessary or appropriate to carry out the intent of this chapter.
3. This chapter shall take effect from and after its adoption, the welfare of the City of Memphis requiring it.

(Ord. No. 5841, § 1, 12-20-2022)

13-16.	Building Sewers, Connections, Sewer Extensions and Development Fees
13-20.	Reserved
13-24.	Pretreatment
13-26.	Food Establishment Wastewater
13-28.	Sewer Fees and Charges
13-32.	Powers and Authority of Inspectors
13-36.	Review and Enforcement
13-40.	Stormwater Management and Pollution Control
13-41.	Stormwater Enterprise Fund

***State law reference—**Sewers and waterworks, T.C.A. § 7-35-101 et seq.

CHAPTER 13-4. IN GENERAL AND DEFINITIONS*

Sections:

Sec. 13-4-1. Definitions.

Sec. 13-4-1. Definitions.

Terms for which definitions are not specifically herein provided shall be interpreted consistent with the intent and substance of this chapter and as otherwise provided by state regulation at 0400-40-14-.03 or EPA regulation at 40 C.F.R. § 403.3. Unless the context specifically indicates otherwise, the meaning of terms used in this chapter shall be as follows:

Act or *the Act* means the Federal Water Pollution Control Act, also known as the Clean Water Act, as amended, and found in 33 U.S.C. § 1251 et seq.

Action level means a goal set forth in a permit or other document. In order for a requirement in a permit or other document to be deemed an action level it must specifically be designated as an "action level" in the permit or document, as applicable. An action level may be established as a numerical or other limitation. While an exceedance of an action level is not a violation, it can trigger or otherwise lead to additional requirements being imposed upon the discharger, including, but not limited to, user study of the cause of the action level exceedance and/or the imposition of enforceable discharge limitations.

Additional treatment charge means the portion of the service charge, which is levied on those users whose wastes are greater in strength than the concentration values established as representative of normal sewage or wastewater.

Alkalinity means the mass of a 100 percent sulfuric acid required to reduce the pH of a given volume of wastewater to a pH of 7.0. The value is expressed as pounds of sulfuric acid per day.

Authorized representative of the user means:

(1) A responsible corporate officer if the user is a Corporation. A responsible corporate officer means: (i) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy- or decision-making functions for the corporation, or (ii) the manager of one or more manufacturing, production, or operating facilities, provided the manager is authorized to make management decisions that govern the operation of the regulated facility, including having the explicit or implicit duty of making major capital investment recommendations, and initiate and direct other comprehensive measures to assure long-term environmental compliance with environmental laws and regulations; can ensure that the necessary systems are established or actions taken to gather complete and accurate information for individual and general discharge permit requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.

(2) A general partner or proprietor if the user is a partnership or sole proprietorship, respectively.

(3) A duly authorized representative of the individual designated in subsection (1) or (2) if: (i) The authorization is made in writing by the individual described in subsection (1) or (2); (ii) The authorization specifies either an individual or a position having responsibility for the overall operation of the facility from which the industrial discharge originates, such as the position of plant manager, operator of the well, well field superintendent, or a position of equivalent responsibility, or having overall responsibility for environmental matters for the company; and (iii) the written authorization is submitted to the control authority.

***Cross references—**Memphis Light, Gas and Water division, ch. 2-20; water and/or water closets and equipment requirements for barbershops, § 6-8-3; required toilet facilities in day care centers, § 9-28-7; garbage, trash, and refuse, Ch. 9-56; health and sanitation, Ch. 9-4, Ch. 9-100; toilet facilities required in coin-operated launderettes, § 6-16-13; sewage disposal in food establishments, § 13-24-53; required toilet facilities at public swimming pools, § 9-92-9; planning, tit. 15; required toilets and urinals in undertaking establishments, § 6-84-6; sewage disposal requirements for trailer courts, § 14-20-1 et seq.; rivers and harbors, Ch. 32; streets and sidewalks, Ch. 12-24; toilets, urinals, etc., required in tattoo shops, ch. 6-76; building code, Ch. 14; plumbing, Ch. 14-14.

State law references—Power to acquire, construct, and maintain sewage system and to charge for service, T.C.A. § 7-35-401 et seq.; authority to require connections to sewer system, T.C.A. § 7-35-201(I); Power to impose administrative penalties, T.C.A. § 69-3-123 et seq.

(4) If an authorization under subsection (3) is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, or overall responsibility for environmental matters for the company, a new authorization satisfying the requirements of subsection (3) must be submitted to the control authority prior to, or together with, any reports to be signed by an Authorized Representative of the user.

Best management practices ("BMPS") means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to implement the prohibitions listed in sections 13-24-43 and 13-24-44 of this chapter [See also Tennessee Rule 0400-40-14-.05(1)(a) and (2)]. BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw materials storage.

Blowdown means the discharge of water with high concentrations of accumulated solids from boilers to prevent plugging of the boiler tubes or stream lines. In cooling tower, blowdown is discharged to reduce the concentration of dissolved salts in the recirculating cooling water.

BOD (denoting biochemical oxygen demand) means the quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure in five days at 20 degrees centigrade, expressed in milligrams per liter (or pounds upon factoring in flow).

Building sewer means the extension from the building to the public sewer or other place of disposal, also called "house connection."

Calendar day means the 24-hour period from midnight-to-midnight or any other 24-hour period approved by the city for a particular facility that reasonably approximates the midnight-to-midnight time period.

Categorical industrial user ("CIU") means an industrial user subject to a categorical pretreatment standard or categorical standard (except for dental dischargers subject to 40 C.F.R. Part 441).

Categorical standards or *categorical pretreatment standard* means the national categorical pretreatment standards as found in 40 C.F.R. Chapter I, Subchapter N, Parts 405 et seq.

C.F.R. means the Code of Federal Regulations.

City means the City of Memphis, Tennessee.

COD (denoting chemical oxygen demand) means the measure of oxygen-consuming capacity of inorganic and organic matter present in wastewater. It is expressed as the amount of oxygen consumed from a chemical oxidant in a specific test. It is expressed in milligrams per liter (or pounds upon factoring in flow).

Composite sample means a sample composed of individual subsamples taken at regular intervals over a specified period of time. Unless otherwise specified by this chapter or the control authority, subsamples may be proportioned by time interval or size according to flow (i.e., flow-proportioned composite sample), or be of equal size and taken at equal time intervals (i.e., time-proportioned composite sample).

Control authority or *approving authority* means the City of Memphis, Division of Public Works. The term "Approving Authority" as used herein is differentiated from the term "Approval Authority" as defined in 40 C.F.R. § 403.3(c).

Control mechanism means a permit, order, or similar means of establishing enforceable requirements. This includes SIU discharge permits and other user permits. Failure to comply with the requirements set forth in these documents may result in enforcement actions, which may include, but is not limited to, administrative fines and/or withdrawal of the privilege to use the City of Memphis Wastewater System.

County means Shelby County, Tennessee unless otherwise specified.

Daily discharge means the "discharge of a pollutant" measured using approved methods at the appropriate sampling point during a calendar day, or any 24-hour period that reasonably represents the calendar day, established by the control authority in the control mechanism. For pollutants with limitations expressed in units of mass, the "daily discharge" is calculated as the total mass of the pollutant discharged over the day. For pollutants with limitations expressed in other units of measurement, the "daily discharge" is calculated as the average measurement of the pollutant over the day.

Daily maximum means the arithmetic average of all effluent samples for a pollutant (except pH) collected during a calendar day.

Daily maximum limit means the maximum allowable discharge limit of a pollutant during a calendar day. Where daily maximum limits are expressed in units of mass, the daily maximum limit will be determined by the daily discharge, i.e., the total mass discharged over the course of a calendar day. Where daily maximum limits are expressed in terms of a concentration, the daily discharge is the arithmetic average measurement of the pollutant concentration derived from all measurements using approved methods at the appropriate sampling point taken that day. This can be based upon the averaging of several grab samples during a calendar day or composite samples (e.g., 8-hour or 24-hour composite samples).

Day, for the purposes of counting when an event must occur (e.g., report within ten days), means, unless otherwise specified, a calendar day, which is a 24-hour period from midnight to midnight. "Days" refers to consecutive calendar days. For the purposes of an effluent limit (e.g., daily maximum limit), "day" or "calendar day" refers to midnight-to-midnight or other 24-hour period that reasonably approximates the midnight-to-midnight time period.

Direct discharge to state waters or *direct discharge* means the addition of pollutants to waters of the State from a source.

Director means the director of public works except where another position is specifically identified (e.g., EPA Regional Water Protection Division Director).

Discharge or *indirect discharge* means the introduction of pollutants into the city's POTW including the introduction of pollutants into the sewer system of the POTW as well as the delivery of wastewaters and other pollutants by truck or any other conveyance. "Discharge" or "indirect discharge" does not include a "direct discharge to State water."

Discharge permit means a SIU discharge permit or other user permit.

Discharger means a person who discharges.

Division means the Division of Public Works of the City of Memphis except where another entity is specifically identified (e.g., EPA Regional Water Protection Division).

Domestic source means the waste and wastewater from human or typical household activities including a household kitchen, water closets, lavatories and laundries, or any waste from a similar source and possessing essentially the same characteristics. Commercial facilities such as restaurants, hospitals, institutions (e.g., colleges), cafeterias, bakeries, ground-water remediation sites, and other non-household sources are not considered to be a "domestic source" (except wastewater from their bathroom facilities, segregated from other flows, is considered a "Domestic Source").

Easement means an acquired legal right for the specific use of land owned by others.

Environmental Protection Agency or *EPA* means the U.S. Environmental Protection Agency or, where appropriate, the regional water protection division director, the regional administrator, or other duly authorized official of said agency.

Existing source means any source of discharge that is not a "new source."

Facility site means the land or water area where any indirect discharge activity that is subject to regulation under this chapter is physically located or conducted, including adjacent land used in connection with the facility or activity (e.g., manholes on the user's owned or occupied property).

Garbage means solid wastes from the domestic and commercial preparation, cooking, and dispensing of food, and from the handling, storage, and sale of produce.

General discharge permit means a discharge permit that can be issued to more than one discharger.

Grab sample means a sample that is taken from a wastestream without regard to the flow in the wastestream and over a period of time not to exceed 15 minutes.

Holding-tank waste means any waste from holding tanks such as vessels, chemical toilets, campers, trailers, septic tanks, vaults, pits, sumps, and vacuum-pump tank trucks.

Hydrogen ion concentration: see "ph".

Industrial user means a source of indirect discharge.

Industrial wastes means the wastewater from industrial processes, trade, or business, as distinct from domestic sanitary sewage.

Instantaneous limit means the maximum concentration of a pollutant allowed to be discharged at any time,

determined from the analysis of any discrete sample (e.g., grab sample) of the discharge. pH may also be regulated by an instantaneous maximum and/or minimum limit. Where a composite sample shows a value higher than an instantaneous limit, such sampling result is deemed to provide conclusive evidence of a violation of an instantaneous limit applicable during that time period.

Interference means a discharge which, alone or in conjunction with a discharge or discharges from other sources, inhibits or disrupts the sewer system, WWTP, treatment processes, or operations or its sludge processes, use or disposal, exceeds the design capacity of the treatment works or the collection system, and/or which causes or contributes to a violation of any requirement of the city's NPDES permit or poses a threat to worker health and safety (e.g., chemical fumes). The term includes disruption with the use of biogas generated by a POTW as a fuel or prevention of sewage sludge use or disposal by the POTW in accordance with criteria, guidelines, or regulations developed pursuant to the Solid Waste Disposal Act ("SWDA"), the Clean Air Act, the Toxic Substances Control Act, or more stringent state criteria (including those contained in any state sludge management plan prepared pursuant to Title IV of SWDA) applicable to the method of disposal or use employed by the POTW.

Legal authority means the rules, regulations and ordinances of the City of Memphis regulating the discharge and treatment of industrial waste.

Local hearing authority means the Memphis Wastewater Hearing Authority. See T.C.A. § 69-3-124.

Local limit means specific discharge limits developed by the control authority to implement the general and specific discharge prohibitions listed in Tennessee Rule 0400-40-14-.05(1)(a) and (2).

Medical waste means isolation wastes, infectious agents, human blood and blood products, pathological wastes, sharps, body parts, contaminated bedding, surgical wastes, potentially contaminated laboratory wastes, and dialysis wastes.

mg/l means a concentration unit of milligrams per liter of solution.

Monthly average means the sum of all "daily discharges" measured during a calendar month divided by the number of "daily discharges" measured during that month.

Monthly average limit means the highest allowable average of "daily discharges" over a calendar month, calculated as the sum of all "daily discharges" measured during a calendar month divided by the number of "daily discharges" measured during that month.

Municipality means a city, town, borough, county, parish, district, association, or other public body created by or pursuant to state law and having jurisdiction over disposal of sewage, industrial wastes, or other wastes, or an Indiantribe or an authorized Indian tribal organization, or a designated and approved management agency under Section 208 of the Clean Water Act (33 U.S.C. § 1288).

National pretreatment standards or *pretreatment standard or standard* means any regulation containing pollutant discharge limits promulgated by the Environmental Protection Agency in accordance with the Act, which applies to users. The term includes general and specific prohibitive discharge limits pursuant to sections 13-24-43(A) and (B)(1)-(7), and local limits pursuant to section 13-24-44(C), (D) and (F).

National Pollution Discharge Elimination System ("NPDES") means the program for issuing, conditioning, and denying permits for the direct discharge of pollutants from point sources into navigable waters, the contiguous zone, and the oceans pursuant to Section 402 of the Clean Water Act as amended, 33 U.S.C. § 1342.

Natural outlet means any outlet, into a watercourse, pond, ditch, lake or other body of surface, or ground water.

New source means:

(a) Any building, structure, facility, or installation from which there is or may be a discharge of pollutants, the construction of which commenced after the publication of proposed pretreatment standards under Section 307(c) of the Clean Water Act, which will be applicable to such source if such Standards are thereafter promulgated in accordance with that section, provided that:

(1) The building structure, facility, or installation is constructed at a site at which no other source is located; or

(2) The building, structure, facility, or installation totally replaces the process or

production equipment that causes the discharge of pollutants at an existing source; or

(3) The production or wastewater generating processes of the building, structure, facility, or installation are substantially independent of an existing source at the same site. In determining whether these are substantially independent, factors such as the extent to which the new facility is integrated with the existing plan and the extent to which the new facility is engaged in the same general type of activity as the existing source should be considered.

(b) Construction on a site at which an existing source is located results in a modification rather than a new source if the construction does not create a new building, structure, facility, or installation meeting the criteria of parts (A)(ii) or (A)(iii) of this definition but otherwise alters, replaces, or adds to existing process or production equipment.

(c) Construction of a new source as defined under this paragraph has commenced if the owner or operator has:

(1) Begun, or caused to begin, as part of a continuous onsite construction program:

(A) Any placement, assembly, or installation of facilities or equipment; or

(B) Significant site preparation work including cleaning, excavation, or removal of existing buildings, structures, or facilities which is necessary for the placement, assembly, or installation of new source facilities or equipment; or

(2) Entered into a binding contractual obligation for the purchase of facilities or equipment, which is intended to be used in its operation within a reasonable time. Options to purchase or contracts which can be terminated or modified without substantial loss, and contracts for feasibility, engineering, and design studies do not constitute a contractual obligation under this subsection.

Non-significant categorical industrial user means an industrial user, subject to categorical pretreatment standards, that never discharges more than 100 gallons per day (gpd) of total categorical wastewater (excluding sanitary, non-contact cooling, and boiler blowdown wastewater, unless specifically included in the pretreatment standard) and the following conditions are met:

(a) The industrial user, prior to control authority's finding, has consistently complied with all applicable categorical pretreatment standards and pretreatment requirements;

(b) The industrial user annually submits the certification statement required in section 13-24-30(J)(2) of this chapter [see Tennessee Rule 0400-40-14-.12(17)], together with any additional information necessary to support the certification statement; and

(c) The industrial user never discharges any untreated concentrated wastewater.

Other user permit means an individual control mechanism or general discharge permit issued to a user that is not a significant industrial user. Failure to comply with the requirements set forth in other user permits may result in enforcement actions, which may include, but is not limited to, administrative fines and/or withdrawal of the privilege to use the City of Memphis Wastewater System. The requirements imposed in an other user permit and the manner in which such permits are issued and enforced, and such facilities are monitored or inspected, are subject to the city's sole discretion. Other user permits include, but are not limited to, food establishment wastewater discharge ("FEWD") permits imposing, among other things, requirements pertaining to fats, oils, and grease, waste hauler permits, permits issued to ground water remediation pump and treat facilities (except to the extent the discharger is identified as an SIU), special permits for the disposal of portable toilet wastewater, letters of approval for hauled wastewater, and letters of approval setting forth flow limitations (e.g., limiting use of the sewer system to certain hours) on users or new or expanded development or facilities.

Pass-through means a discharge which exits the wastewater treatment plant ("WWTP") into waters of the State in quantities or concentrations which, alone or in conjunction with a discharge or discharges from other

sources, is a cause of a violation of any requirement of the WWTPs' NPDES permits, including an increase in the magnitude or duration of a violation.

Person means any and all persons, including individuals, firms, partnerships, associations, public or private institutions, state and Federal agencies, municipalities or political subdivisions, or officers thereof, departments, agencies, or instrumentalities, or public or private corporations or officers thereof, organized or existing under the laws of this or any state or country.

pH means the negative log of the hydrogen ion concentration (in moles per liter) of a given water, pH = - $\log_{10}[H^+]$. Water will dissociate into hydrogen and hydroxyl ions (H_2O ? $H^+ + OH^-$) and the concentration of hydroxyl ion can be expressed as pOH. The pH + pOH always equals 14 in water. pH limits may be established in standard units, based on this relationship and the hydroxide load.

pH maximum limit means a limit imposed on the alkalinity of a discharge. A pH Maximum Limit is distinct from a pH Minimum Limit.

pH minimum limit means a discharge limit imposed on the acidity of a discharge. A pH Minimum Limit is distinct from a pH Maximum Limit.

Pollutant means dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, sewage sludge, munitions, medical wastes, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, municipal, agricultural, and industrial wastes, and certain characteristics of wastewater (e.g., pH, temperature, TSS, turbidity, color, BOD, COD, toxicity, or odor).

Pollution means the man-made or man induced alteration of the chemical, physical, biological, and radiological integrity of water.

Pretreatment means the reduction of the amount of pollutants, the elimination of pollutants, or the alteration of the nature of pollutant properties in wastewater prior to, or in lieu of, introducing such pollutants into the POTW. This reduction or alteration can be obtained by physical, chemical, or biological processes, by process changes, or by other means, except by diluting the concentration of the pollutants, unless allowed by an applicable pretreatment standard.

Pretreatment program means the rules, regulations, and/or ordinances of the city regulating the discharge and treatment of industrial and commercial wastewater, the Control Mechanisms issued under chapter 13-24 of title 13 of the Memphis Code and such other provisions as provided for in this chapter, 40 C.F.R. 403.1 et seq., and/or Tennessee Rule 0400-40-14-.01 et seq.

Pretreatment requirement means any substantive or procedural requirement related to pretreatment other than a National Pretreatment Standard imposed on a user.

Pretreatment standards or *standards* means prohibited discharge standards, categorical pretreatment standards, and local limits.

Priority pollutants means any pollutant identified in 40 C.F.R. Part 423, Appendix A.

Process wastewater means any water which, during manufacturing or processing, comes into direct contact with or results from the production or use of any raw material, intermediate product, finished product, by-product, or waste product.

Properly shredded garbage means the wastes from the preparation, cooking, and dispensing of food that has been shredded to such a degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half inch in any dimension.

Publicly owned treatment works ("POTW") means a treatment works as defined by Section 212 of the Federal Water Pollution Control Act, (33 U.S.C. § 1292) which is owned in this instance by the municipality (as defined by Section 502(4) of the Federal Water Pollution Control Act). This definition includes any devices and systems used in the storage, treatment, recycling and reclamation of municipal sewage or industrial wastes of a liquid nature. It also includes sewers, pipes, and other conveyances only if they convey wastewater to a WWTP. The term also means the municipality as defined in Section 502(4) of the Federal Water Pollution Control Act, which has jurisdiction over the indirect discharges to and the discharges from such a treatment works.

Sanitary sewer means a sewer which carries sewage and/or wastewater. It does not include a storm sewer, which is designed primarily to address storm water, surface, and ground waters.

Service charge means the assessment levied on users of the public sewer system.

Sewage means a combination of the water-carried wastes from residences, business buildings, institutions and industrial establishments, together with any groundwater, surface water, and storm water that may be present.

Sewage system or *wastewater system* means all facilities for collecting, pumping, treating, and disposing of sewage that flows to a city's WWTP.

Significant industrial user ("SIU") means any Industrial user of the City of Memphis Wastewater System, or wastewater systems of other municipalities connected to the City of Memphis Wastewater System, that is subject to categorical pretreatment standards under 40 C.F.R. § 403.6 and 40 C.F.R. Chapter I, Subchapter N (except for dental dischargers subject to 40 C.F.R. Part 441) and/or has an average discharge flow of 25,000 gallons or more per day of process wastewater to the POTW (excluding sanitary, non-contact cooling, and boiler blowdown wastewater); and/or has a discharge of a process wastestream which is greater than or equal to five percent of the average dry weather hydraulic flow and/or organic design capacity of the receiving WWTP; and/or is found by the City of Memphis to have a reasonable potential for adversely affecting the POTW's operation, or for violating any pretreatment standard or pretreatment requirement either singly or in combination with other contributing industries on the City of Memphis' Wastewater System, including, but not limited to, the quality of sludge produced, the wastewater system's effluent quality, groundwater in the area, or air emission generated by the wastewater system. Upon a finding that a non-categorical industrial user meeting the criteria above has no reasonable potential for adversely affecting the POTW's operation, or for violating any pretreatment standard or pretreatment requirement, the city may, at any time, on its own initiative or in response to a petition received from an industrial user, and in accordance with procedures in Tennessee Rule 0400-40-14-.08(6)(f), determine that such industrial user is not a significant industrial user.

Unless otherwise designated by Memphis subject to its discretion, dental dischargers subject to 40 C.F.R. part 441 are not "significant industrial users" as defined herein and are not "categorical industrial users" or "industrial users subject to categorical pretreatment standards" as those terms and variations are used herein and in 40 CFR part 403.

SIU discharge permit is a control mechanism issued to a significant industrial user that establish specific parameter limits and other requirements for control and monitoring of the wastewater discharges. Failure to comply with the requirements set forth in an SIU discharge permit may result in enforcement actions, which may include, but is not limited to, administrative fines and/or withdrawal of the privilege to use the City of Memphis wastewater system. Individual SIU discharge permits may be issued to individual industrial/commercial users. Subject to the control authority's discretion, general SIU discharge permits may be issued to a group of facilities.

Slug discharge or *slug* means any discharge of a non-routine, episodic nature (including, but not limited to, an accidental spill) or a batch discharge (including customary and non-customary batch discharges) which has a reasonable potential to cause Interference or Pass-Through, or in any other way violate chapter 13-24 of title 13 of the Memphis Code and/or Local Limits or permit conditions.

Special sewer service area means a sewer service area which shall be subject to unique and separate sewer infrastructure surcharge fees in addition to normal sewer fees described within this chapter, based upon the particular costs associated with providing sewer service in that area.

Standard methods means the analytical procedures set forth in the latest edition of "Standard Methods for the Examination of Water and Wastewater" published by the American Public Health Association; and/or "EPA Methods for Chemical Analysis of Water and Wastes" as per 40 C.F.R. Part 136 and amendments thereto; and/or City of Memphis, Public Works Division's laboratory procedures for certain tests that detail specific requirements that are not addressed elsewhere or are presented as optional.

Storm drain or *storm sewer* means a sewer which primarily carries storm and surface waters and drainage, but is designed to exclude sewage and industrial wastes, other than unpolluted cooling water.

Storm water means any flow occurring during or following any form of natural precipitation, and resulting from such precipitation, including snowmelt.

Suspended solids or *total suspended solids* means total suspended matter that either floats on the surface

of, or is in suspension in, water, wastewater, or other liquids, and that is removable by laboratory filtering as prescribed by standard methods.

TOC (denoting total organic carbon) means the measure of the concentration of covalently bonded carbon, which is combustible to carbon dioxide. It is not to be confused with elemental carbon, dissolved carbon dioxide, inorganic carbonates, or bicarbonates.

User means any person (including a waste hauler) that discharges wastewater or otherwise causes or permits wastewater to enter into the city's POTW, including, but not limited to, the sanitary sewer.

Wastewater means liquid and water-carried industrial wastes and sewage from residential dwellings, commercial buildings, industrial and manufacturing facilities, and institutions, whether treated or untreated.

Wastewater treatment plant ("WWTP") means the city's facilities for treating wastewater and includes that portion of the POTW which is designed to provide treatment of municipal sewage and industrial waste.

Watercourse means a channel or conduit in which surface water flow of water occurs, either continuously or intermittently.

Waters of the state means any and all water, public or private, on or beneath the surface of the ground, which are contained within, flow through, or border upon Tennessee, or any portion thereof, except those bodies of water confined to and retained within the limits of private property in single ownership which do not combine or effect a junction with natural surface or underground waters.
(Code 1985, § 33-16; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 4443, § 1, 11-5-1996; Ord. No. 5793, § 1, 8-17-2021)

CHAPTER 13-8. USE OF PUBLIC SEWERS

Sections:

Sec. 13-8-1. Discharge to natural outlets where public sewer available prohibited.
Sec. 13-8-2. Maintaining private methods of disposal.
Sec. 13-8-3. Connection to public sanitary sewer, when required.
Sec. 13-8-4. Disconnection of sanitary sewer service.
Sec. 13-8-5. Damaging sewerage works.

Sec. 13-8-1. Discharge to natural outlets where public sewer available prohibited.

It shall be unlawful to directly discharge to any natural outlet within the city, or in any area under the jurisdiction of the city, any untreated sewage or other polluted waters where suitable public collection and/or treatment has been provided in accordance with the provisions of [chapters] 13-8, 13-12, 13-16, 13-28 and 13-32, except where a Federal National Pollutant Discharge Elimination System (NPDES) permit has been duly issued and is currently valid for such discharge or the discharger is specifically exempt from obtaining an NPDES permit under duly promulgated state regulations. The city, upon becoming aware of such unlawful discharges, may refer the matter to TDEC or take such other action as the city deems appropriate. Nothing herein shall be deemed to change the obligation of a septic system to connect to the city's POTW to the extent otherwise provided under this chapter.
(Code 1985, § 33-26; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-8-2. Maintaining private methods of disposal.

Except as hereinafter provided in this chapter, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool or other facility intended or used for the disposal of sewage.
(Code 1985, § 33-27; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-8-3. Connection to public sanitary or combined sewer—When required.

The owner, occupant or lessee of all houses, buildings, or properties used for human occupancy, employment, recreation, or other purposes, situated within the city where public sewer is available and abutting on any street, alley, right-of-way, or easement in which there is now located or may in the future be located a public sanitary sewer of the city, is hereby required at his expense to install suitable sanitary facilities therein and to connect such facilities directly with the proper public sewer, in accordance with the provisions of chapters 13-8, 13-12, 13-16, 13-28, 13-32 within one year after date of official notice by the regulatory agency to do so, as long as no health hazard exists or is imminent. In cases of health hazards as determined by the city and county health department, the owner, occupant or lessee

must connect within 90 days of the official notice of the city and county health department that there exists a health hazard or that a health hazard is imminent.
(Code 1985, § 33-28; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

State law reference—Authority to require sewer connection, T.C.A. § 7-35-201 et seq.

Sec. 13-8-4. Disconnection of sanitary sewer service.

Any person wishing to demolish a building or remove the sanitary sewer service from any point into their property shall obtain a "sanitary sewer line cap permit." After this line has been capped, joints shall be left exposed and inspected by the POTW. All construction procedures and specifications relative to capping shall be approved by the approving authority.
(Code 1985, § 33-29; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-8-5. Damaging sewerage works.

A. No person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance or equipment which is part of the sewage works. Any person violating this provision may be subject to immediate arrest and shall be guilty of a misdemeanor, punishable as provided in section 1-8 of this Code of Ordinances and shall be responsible for correcting such damages.

B. If public sewer and/or the WWTP becomes obstructed or damaged, whether intentionally or otherwise, the person or persons responsible for such discharge or other cause of damage may be billed and shall pay for the expenses incurred by the city in cleaning out, repairing or rebuilding the sewer and/or WWTP. This includes, but is not limited to: (i) the discharge of fats, oil and grease into the sewer system; and (ii) digging or other surface or subsurface work puncturing a sewer pipe.

C. No unauthorized person shall enter into or alter any manhole or similar appurtenance of any public sewer, place or cause to be placed anything therein or interfere therewith. No person shall insert or place in any public sewer, manhole or other appurtenance thereof any debris or other materials which such sewer manhole or appurtenance thereof was not intended to receive. The city may remove or require the removal of any unauthorized materials or substances from the public sewer, repair or replace damaged infrastructure, and shall seek reimbursement of all costs, expenses and resulting damages incurred by city. Any removal or repair work undertaken by city may be performed directly by city workforces or city may engage the services of a contractor to perform such work.
(Code 1985, § 33-126; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

CHAPTER 13-12. PRIVATE SEWAGE DISPOSAL

Sections:

Sec. 13-12-1. Required when public sanitary sewer not available.
Sec. 13-12-2. Permit—Required—Application and fees.
Sec. 13-12-3. Permit required-effective date; notification of completion of work; inspection.
Sec. 13-12-4. Design and other specifications; discharge to natural outlet prohibited.
Sec. 13-12-5. Connection to public sewer upon availability, filling of abandoned facilities required, hardship exemptions.
Sec. 13-12-6. Maintenance and manner of operation.
Sec. 13-12-7. Private industrial disposal as exception to [chapters 13-8 and 13-28] provisions.

Sec. 13-12-1. Required when public sanitary sewer not available.

Where a public sanitary sewer is not available under the provisions of [section] 13-8-3, the sewer shall be connected to a private sewage disposal system complying with the provision of this chapter.
(Code 1985, § 33-41; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-12-2. Permit—Required—Application and fees.

Before commencement of construction of a private sewage disposal system, the owner shall first obtain a written permit signed by the division of public works. The application for such permit shall be made on a form furnished to the applicant, which the applicant shall supplement by any plans, specifications, and other information, which may be deemed necessary by the regulatory agency. A permit and inspection fee as designated by the regulatory agency shall be paid at the time application is filed. The permit and inspection fee of $25.00, to help defray the cost of plan review and

construction inspection, shall be paid to the city and shall be placed in an account designated as "sewer collection and treatment fund."
(Code 1985, § 33-42; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-12-3. Permit required-effective date; notification of completion of work; inspection.

A private sewage disposal system shall not operate until the installation is completed to the satisfaction of the applicable governmental entity for which approval is required (e.g., TDEC, Health Department) The city shall be allowed to inspect the work at any stage of construction, and, in any event, the entity seeking to operate a private sewage disposal system shall notify the city when the work is ready for final inspection and before any underground portions are covered.
(Code 1985, § 33-43; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-12-4. Design and other specifications—Discharge to natural outlet prohibited.

The type, capacities, location and layout of a private sewage disposal system shall comply with all recommendations of the state regulatory agency and the city. No septic tank or cesspool shall directly discharge to any natural outlet.
(Code 1985, § 33-44; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-12-5. Connection to public sewer upon availability—Filling of abandoned facilities required—Hardship exemptions.

At such time as a public sewer becomes available to a property served by a private sewage disposal system, a direct connection shall be made to the public sewer in compliance with chapters 13-8, 13-12, 13-16, 13-28 and 13-32 of this title, and any septic tanks, cesspools, and similar private sewage disposal facilities shall be abandoned and filled with suitable material, as required by the state regulatory agency and/or the city. In the event a person cannot make immediate connection, application may be made for a hardship exemption. Proof of hardship is incumbent upon the applicant. The division of public works may grant a hardship exemption, not to exceed 12 months, as long as no health hazard exists or is imminent.
(Code 1985, § 33-45; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-12-6. Maintenance and manner of operation.

The owner shall operate and maintain the private sewage disposal facilities in a sanitary manner at all times, at no expense to the city. The removal of septage (septic contents) from private sewage disposal facilities shall be performed by individuals licensed to perform such work.
(Code 1985, § 33-46; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-12-7. Private industrial disposal as exception to [chapters 13-8 and 13-28] provisions.

Nothing in [chapters 13-8 and 13-28] of this [title] shall exclude the right of any industry or other facility to properly directly discharge its wastewater, after proper treatment in accordance with an NPDES permit, as applicable, into any stream designated by the State of Tennessee.
(Code 1985, § 33-47; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-12-8. Penalty for violation.

Any person using the city storm sewers and drain system or any part thereof in violation of chapters 13-4 through 13-24 shall be guilty of a misdemeanor and subject to punishment as provided in section 1-24-1.
(Code 1985, § 33-48; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

CHAPTER 13-16. BUILDING SEWERS, CONNECTIONS, SEWER EXTENSIONS AND DEVELOPMENT FEES

Sections:

Sec. 13-16-1. Permit requirements.
Sec. 13-16-2. Sewer development fees.
Sec. 13-16-3. Sewer connection fees.
Sec. 13-16-4. Sewer extensions.
Sec. 13-16-5. Sewer extension fees.
Sec. 13-16-6. Urban service boundary—Definition and amendment.
Sec. 13-16-7. Internal sewers and upstream properties.
Sec. 13-16-8. Expenditure of city funds—Limitation.
Sec. 13-16-9. Fees deposited in sewer fund.
Sec. 13-16-10. Connection to be at expense of owner; indemnification of city; construction.

Sec. 13-16-11. Separate and independent connection required for each building—Exception.
Sec. 13-16-12. Connection of old building sewers.
Sec. 13-16-13. Construction standards—Size—Slope—Materials—Methods of excavation.
Sec. 13-16-14. Construction standards—Elevation—Lifts—Where required.
Sec. 13-16-15. Construction standards—Connection to sanitary sewer of sources of surface runoff—Approval required.
Sec. 13-16-16. Construction standards—Conformity of connection to codes—Connection to be made gas tight and watertight—Inspection during construction.
Sec. 13-16-17. Notification to division of public works prior to covering of work underground; final inspection.
Sec. 13-16-18. Guarding of excavations posing hazard to public—Restoration of public property—Posting of bond.
Sec. 13-16-19. Sewer infrastructure surcharge fees.

Sec. 13-16-1. Permit requirements.

No unauthorized person shall uncover, make any connections with or opening into, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the division of public works. One copy of the permit shall at all times be available for inspection at the site of the work.
(Code 1985, § 33-61; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-2. Sewer development fees.

A. There is established a sewer development fee, as set forth herein, to be paid by new sanitary sewer customers connecting to the System as of July 1, 2021. Such fee shall reflect: (1) the actual cost to provide service to such new customers connecting to the System seeking an approved sewer connection for subdivisions, land developments, new buildings, and redevelopments of land or buildings served by the city sanitary sewer system or where the facility served requires modification of or enlargement of the existing sewers, whether within or outside the corporate limits of the city and whether service is by existing or by new facilities to be constructed; (2) a portion of the capital costs incurred by the city for the construction of wastewater treatment plant facilities and related assets, including prior upgrades and expansions; and (3) a portion of the capital costs incurred by the city for the construction of the sewage collection and conveyance system including sewer mains, manholes, lift stations, associated appurtenances including prior upgrades and expansions. The sewer development fee shall be payable by the applicant, developer of the subdivision, or developer of industrial, commercial or residential site as set forth herein, upon the execution of the subdivision contract or the sewer extension contract, or at the time of application for the sewer connection or plumbing permit, as appropriately determined by the approving authority.

B. Sewer development fees shall be calculated based upon the size of the water meter used for the connection using a trended original cost method defined as the historical cost of the city's assets in present day dollar amounts. Written confirmation of the applicable water meter size from Memphis Light, Gas and Water (MLGW) must be provided by the applicant or developer prior to payment of the sewer development fee as such payment is required in accordance with section 13-16-2(A). The sewer development fee shall be assessed, as set forth in this section and the fee schedule adopted by the approving authority:

Meter Size (in inches)	*Sewer Development Fee*
5/8	$2,255
3/4	$3,383
1	$5,638
1 ½	$11,277
2	$18,043
3	$33,830
4	$56,384
6	$112,767
8	$180,427
10	$259,364
12	$484,899

C. The sewer development fee calculation may be reviewed and adjusted by the approving authority every five years or as determined necessary due to significant changes to the customer makeup of the system, and in the instance of an extensive capital improvement plan.

D. The sewer development fee authorized herein shall become effective on July 1, 2021. Notwithstanding the foregoing, such fee assessment shall be implemented as follows:

From July 1, 2021 to June 30, 2022	50% of applicable fee
Subsequent years	100% of applicable fee

E. In support of the objectives of the Memphis 3.0 Comprehensive Plan which encourage increased support for community-based developers and development of affordable housing, the sewer development fee may be reduced up to 50 percent by the director of public works or his designee upon written request. In order to qualify for this discounted fee, developer must submit proof of 501c3 status and evidence that the development meets affordable housing standards for the following residential property types: 2-family (duplex), 3-family (triplex), 4-family (quadplex) structures, and single-family homes. For purposes herein, affordable housing shall be defined as at least 50 percent of the units serving households at 80 percent of the area median income as defined by the applicable standards adopted by the US Department of Housing and Urban Development.

F. No sewer development fee shall be assessed to a person authorized to install a private sewage disposal system pursuant to this division, but a sewer development fee may be charged to the developer or property owner when sanitary sewers are available under section 13-8-3 or when it is determined that sanitary sewers shall be extended to such development. The approval authority may thereafter require the installation of the sewer and the payment of the sewer development fee. The developer or property owner by applying for and receiving a private sewage disposal permit shall agree to such fee when the sewer is available. Notwithstanding the foregoing, a sewer development fee may be waived or reduced up to 50 percent by the director of public works or his designee upon written request by a low-income residential property owner of the following property types: 2-family (duplex), 3-family (triplex), 4-family (quadplex) structures and single-family homes; provided that, proof of such low-income is made available to the city upon request. For purposes herein, low-income shall mean families who have incomes at or below 80 percent of the area median income as defined by the applicable standards adopted by the U.S. Department of Housing and Urban Development.

G. The prior payment of a sewer development fee for any land or building currently served by the system shall not restrict the city's ability to assess a sewer development fee in accordance with section 13-16-2(A) for any proposed redevelopment of such land or building.

H. A sewer development fee shall be assessed to any development, redevelopment, new building or building addition resulting in the installation of an additional water meter or enlarged water meter. No sewer development fee shall be assessed for water meters dedicated to fire protection or irrigation.

I. Within the city reserve area, the owner(s) of property who petition for connection to the city's sanitary sewer system to serve their property shall at that time consent to, petition and request the annexation of such property by the city, with the annexation to take place at such time as the city may deem appropriate pursuant to state law. Until such time as annexation occurs, the owner(s) shall agree not to seek either incorporation as a separate entity nor annexation to any other incorporated area.

The consent to annexation shall be incorporated as a part of the city land development and/or sewer extension contract(s). At the time the sewer extension and/or land development contract is entered into the property owner shall submit his or her petition for annexation to the city.

The above-described consent to annexation by the city shall be made a restrictive covenant imposed by the property owner(s) upon the property which shall run with the land and shall be binding upon all heirs, successors and assigns. Such covenant shall be recorded in the office of the Shelby County register and it shall be the duty of the original property owner and all subsequent property owners to disclose the existence of the covenant to any parties to whom the property or a portion thereof is conveyed. Reference to such recorded covenant shall be evidenced on any final plat or plan development prior to the recordation of the plat or plan in the office of Shelby County register. It shall be the responsibility of the division of planning and development to ensure that the signed petition for annexation is submitted by the property owner and that the covenant appears on the plat or plan prior to signing and recordation of the final plat or plan.

(Code 1985, § 33-62; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 4143, § 1, 3-4-1993; Ord. No. 4292, § 1, 11-22-1994; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-3. Sewer connection fees.

There is established a sewer connection charge, as set forth herein, to defray the construction costs of providing a sewer tap to a property which charges shall be payable by the owner, applicant, developer of the subdivision, or developer of industrial, commercial or residential site as set forth herein, and which charge shall be payable prior to the physical sewer connection

being made. Sewer connection charges shall apply only where the physical connection is made by the division of public works.

A. Standard four- or six-inch connections to residential and small commercial facilities will be made at the owner's expense. The owner shall be responsible for all costs and expenses incurred.

B. For any connections other than standard connections as determined by the division of public works, or for a second connection to any property, the cost shall be based on time, materials and labor for the approving authority to install the connection.

(Code 1985, § 33-63; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-4. Sewer extensions.

A. The city may permit the orderly extension of its sanitary sewer system to provide gravity sewer service of adequate capacity to unsewered properties and to properties not served by sewers of adequate capacity following the comprehensive plan and policies of the city for gravity sewer system expansion.

B. No person shall undertake to extend city sanitary sewer service to his property without entering into a sewer extension contract with the city.

C. In order for a property to be eligible for city participation in the cost of a gravity sewer extension, all of the following criteria must be met:

1. The capacity, location and design of the proposed gravity sewer extension shall conform to the city's comprehensive plans and policies for extension of the sanitary sewer system.

2. The portion of the property or contiguous properties under one ownership being the subject of the request for a sewer extension shall neither be served by gravity sanitary sewer at the time of the request, nor have previously been part of a parcel or tract of property which was served by gravity sanitary sewers; i.e., for the purposes of determining eligibility for city funding participation, once a property or contiguous properties under one ownership is served by gravity sewers, it cannot be disassociated from that sewer service by the sale of all or part of the property.

3. The property shall not be situated within the corporate limits or within the recognized annexation reserve area of another municipality unless the sewer extension will be used to serve other properties that would otherwise be eligible for city funding participation. The city shall participate in funding only those portions of the sewer extension, which will serve such other properties.

D. Whenever the city enters into a contract with an owner/developer relative to extending a sanitary sewer to his property, a reasonable estimated time shall be indicated in the contract for the completion of this service by the city.

(Code 1985, § 33-64; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-5. Sewer extension fees.

A. The developer/owner/applicant shall pay to the city, upon execution of the sewer extension contract, a sewer extension fee as set forth herein. The developer/owner/applicant may secure payment of the sewer extension fee by executing a performance bond, certificate of deposit assigned to the city, or an irrevocable, automatically renewable letter of credit in favor of the city. Such securities shall be in the full amount of the sewer extension fee and be in a form acceptable to the city. Payment of the sewer development fee shall be made by the developer/owner/applicant to the city upon advertisement for bids for construction of the sewer extension.

B. The minimum sewer extension fee to be paid by the developer/owner/applicant shall not be less than 50 percent of the cost of engineering including surveying, easement acquisition, inspection and construction of any sewer extension and other applicable fees for a development located within the municipal boundaries of Memphis and 100 percent of such cost for developments located in unincorporated Shelby County which were authorized for a sewer extension or connection prior to August 18, 2017, and parcels to which sewer must be extended or connected pursuant to existing obligations between the city and the applicable developer or land owner. A preliminary estimate, based on the estimated cost of construction, engineering, easement acquisition, inspection, and other applicable fees shall be used for determining the fee to be charged to the developer for the purpose of negotiating a sewer extension contract. The final cost accounting shall be determined by the city

upon completion of the sanitary sewer extension, and final accounting shall be made to the developer of any additional fee required or refund due to the developer.

C. Sewer extension fees paid to the city prior to July 1, 2021, shall run with the land described in the sewer extension contract and may be used for the purpose of defraying sewer development fees. Any sewer extension fees paid on or after July 1, 2021, shall not be used for the purpose of defraying sewer development fees as determined in section 13-16-2.
(Code 1985, § 33-65; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 4143, § 1, 3-4-1993; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-6. Urban service boundary—Definition and amendment.

The Urban Service Boundary is defined by the Memphis 2000 Policy Plan and Map adopted by the Memphis City Council in September 1981 or its most recent adopted amendment. The Memphis and Shelby County Office of Planning and Development (O.P.D.) and the division of public works shall review the Urban Service Boundary periodically, and recommendations for amendments, if any, shall be forwarded to the Memphis City Council for consideration.
(Code 1985, § 33-66; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-7. Internal sewers and upstream properties.

A. The owner/developer or his successors in title or assigns shall, at the time of developing the property covered in the sewer extension contract, construct all internal sanitary sewers necessary to serve the property at their sole expense.

B. The owner/developer, upon entering into a sewer extension contract, shall grant permanent sanitary sewer easements and temporary construction easements to the city at no cost for future extension of the sanitary sewers through the property covered by the sewer extension contract to serve upstream properties. The sewer easement alignment shall be recommended by the owner/developer and be subject to the approval of the city. Acceptance of the sanitary sewer easements does not impose upon the city any obligation or responsibility to participate in the cost of or construct sanitary sewers within the easements.
(Code 1985, § 33-67; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-8. Expenditure of city funds—Limitation.

The city may only expend city funds on construction for which the city has contracted through the standard bidding process.
(Code 1985, § 33-68; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-9. Fees deposited in sewer fund.

All sewer development fees, connection fees and sewer extension fees collected herein shall be placed in the sewer collection and treatment fund established by [chapter] 13-28 and used for the purpose stated therein.
(Code 1985, § 33-69; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-10. Connection to be at expense of owner; indemnification of city; construction.

All costs and expenses incidental to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the city and its employees from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer. All construction on the owner's property shall conform to the applicable plumbing code.
(Code 1985, § 33-70; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-11. Separate and independent connection required for each building—Exception.

A separate and independent building sewer shall be provided for every building and for every dwelling unit in single family detached, single family attached and duplex developments, except that, where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, courtyard or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer, but the city does not

and will not assume any obligation or responsibility for damage caused by or resulting from any such single connection aforementioned.
(Code 1985, § 33-71; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-12. Connection of old building sewers.

Old building sewers may be used in connection with new buildings only when they are found, on examination and test by the division of public works, to meet all requirements of [chapters] 13-8, 13-12, 13-16, 13-28 and 13-32.
(Code 1985, § 33-72; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-13. Construction standards—Size—Slope—Materials—Methods of excavation.

The size, slopes, alignment, materials of construction of a building sewer, and the methods to be used in excavating, placing of the pipe, jointing, testing and backfilling the trench, shall all conform to the requirements of the building and plumbing codes and other applicable rules and regulations of the city.
(Code 1985, § 33-73; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-14. Construction standards—Elevation—Lifts—Where required.

Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any building gradient is too shallow to permit gravity flow to the public sewer, sanitary sewage carried by such building gradient shall be lifted by an approved pumping system and discharged to the building sewer. The installation and operational expenses of this system shall be borne solely by the property owner.
(Code 1985, § 33-74; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-15. Construction standards—Connection to sanitary sewer of sources of surface runoff—Approval required.

No person shall make connection of roof downspouts, foundation drains, areaway drains, or other sources of surface runoff or groundwater to a building sewer which in turn is connected directly or indirectly to a public sanitary sewer, unless connection is approved by the division of public works.
(Code 1985, § 33-75; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-16. Construction standards—Conformity of connection to codes—Connection to be made gas tight and watertight—Inspection during construction.

The connection of the building sewer into the public sewer shall conform to the requirements of the building and plumbing codes and other applicable rules and regulations of the city. All such connections shall be made watertight and verified by proper testing. Any deviation from the prescribed procedures and materials must be approved by the division of public works before installation. The division of public works shall have the right to inspect the work at any stage of construction, and in any event, the covers of all building sewer manholes, inspection chambers, cleanouts, and the like shall be watertight and shall be capable of withstanding, without damage or displacement, any traffic load to which they may be subjected.
(Code 1985, § 33-76; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-17. Notification to division of public works prior to covering of work underground; final inspection.

The applicant for the building sewer permit shall notify the division of public works before covering portions of the work to be underground, and when the building sewer is ready for final inspection and connection to the public sewer. The connection and testing shall be made under supervision of the division of public works.
(Code 1985, § 33-77; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-18. Guarding of excavations posing hazard to public—Restoration of public property—Posting of bond.

All excavations for building any sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways and other public property disturbed in the course of the work shall be restored in a manner

satisfactory to the city. The posting of a bond of appropriate value may be required to safeguard the interest of the city with regard to damage to public property.
(Code 1985, § 33-78; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 2, 8-17-2021)

Sec. 13-16-19. Sewer infrastructure surcharge fees.

A. There is established a sewer infrastructure surcharge fee, as set forth herein, to defray the construction costs, bond costs, and/or design costs associated with providing sewer services to a special service to a special sewer service area. Such a fee may take any of the following forms:

1. Sewer development infrastructure surcharge fee;
2. Sewer construction connection infrastructure surcharge fee;
3. Sewer extension infrastructure surcharge fee; and/or
4. Sewer user infrastructure surcharge fee.

B. Sewer infrastructure surcharge fees may not be credited against extension fees.
(Code 1985, § 33-79; Ord. No. 4443, § 2, 11-5-1996; Ord. No. 5793, § 2, 8-17-2021)

CHAPTER 13-20. RESERVED*

*__Editor's note—__Ord. No. 5793, § 3, adopted August 17, 2021, repealed ch. 13-20, §§ 13-20-1—13-20-9, which pertained to wastewater discharge agreements and derived from Code 1985, § 33-82—33-89; Ord. No. 4023, § 1, adopted March 26, 1991.

CHAPTER 13-24. PRETREATMENT†

Sections:

Article 1. Generally and Definitions

Sec. 13-24-1. Definitions.

Article 2. System Discharge and Incorporation of Federal and State Requirements

Sec. 13-24-20. [User compliance].
Sec. 13-24-21. Incorporation of Federal and State pretreatment requirements by reference.
Sec. 13-24-22. SIU permits and other permits.
Sec. 13-24-23. Permit provisions.
Sec. 13-24-24. Time period of permits; continuation of expired permits.
Sec. 13-24-25. Modification, suspension, or revocation of permits and appeals.
Sec. 13-24-26. Limitation to specific operation of specific user; nontransferable.
Sec. 13-24-27. Monitoring facilities, provisions to be outlined in discharge permit.
Sec. 13-24-28. Right of inspection, sampling and oversight; access to premises by control authority.
Sec. 13-24-29. Availability of information on user to public; use of claimed confidential information.
Sec. 13-24-30. Reporting and recordkeeping.
Secs. 13-24-31—13-24-39. Reserved.

Article 3. Discharge to Public Sanitary Sewers

Sec. 13-24-40. Reserved.
Sec. 13-24-41. Discharges of storm water, groundwater, etc., into sanitary sewer prohibited; exceptions; discharges into sanitary sewer system other than through specifically permitted building sewer, permit required.
Sec. 13-24-42. Implementation of categorical pretreatment standards.
Sec. 13-24-43. General and specific prohibitions.
Sec. 13-24-44. Certain discharge restricted, local limits, etc.
Sec. 13-24-45. Discretionary actions of control authority with respect to restricted discharges.

†__Editor's note—__Ord. No. 5793, §§ 3, 5 adopted August 17, 2021, repealed the former ch. 13-24, §§ 13-24-1—13-24-11, and enacted a new ch. 13.24 as set out herein. The former ch. 13-24 pertained to sewer discharge prohibitions and derived from Code 1985, § 33-101—33-111; Ord. No. 4023, § 1, adopted March 26, 1991; Ord. No. 5099, §§ 1—4, adopted 2005.

Sec. 13-24-46. Proper operation and maintenance/maintenance and inspection of pretreatment or flow equalization facilities, bypass and upset.
Sec. 13-24-47. Monitoring, control facilities for sampling and observation of industrial and commercial wastes/flow monitoring and repeat monitoring.
Sec. 13-24-48. Measurement and testing methods.
Sec. 13-24-49. Accidental and slug discharges.
Sec. 13-24-50. Reserved.
Sec. 13-24-51. Discharge of hauled wastes.
Sec. 13-24-52. Specific charge for hauled waste transported for disposal at the discharge point designated by the City of Memphis.
Sec. 13-24-53. Food establishment wastewater.
Sec. 13-24-53-01. Waste disposal - Construction plans approval and permit required.
Sec. 13-24-53-02. Subject to industrial wastewater limitations.
Sec. 13-24-53-03. Permit for food establishment wastewater discharge.
Sec. 13-24-53-04. Permit application required for new construction and others.
Sec. 13-24-53-05. Duration of fewd permits.
Sec. 13-24-53-06. Revocation of food establishment wastewater permit.
Sec. 13-24-53-07. Grease pretreatment required.
Sec. 13-24-53-08. Maintenance reports.
Sec. 13-24-53-09. Penalty for violation and civil liability.
Sec. 13-24-53-10. Surcharges for oil and grease.
Secs. 13-24-53-11—13-24-53-20. Reserved.
Secs. 13-24-54—13-24-59. Reserved.

Article 4. Review and Enforcement

Secs. 13-24-60—13-24-69. Reserved.
Sec. 13-24-70. Violations and enforcement actions.
Sec. 13-24-71. Local hearing authority.
Sec. 13-24-72. Purpose.
Sec. 13-24-73. Composition, length of term, officers.
Sec. 13-24-74. Removal.
Sec. 13-24-75. Power and duties.
Sec. 13-24-76. Appeal.
Sec. 13-24-77. Quorum.
Sec. 13-24-78. Members to be residents of the city.
Sec. 13-24-79. Members oath.
Sec. 13-24-80. Hearings.
Sec. 13-24-81. Administrative order/emergency order procedures.
Sec. 13-24-82. Violations and penalties.
Sec. 13-24-83. Damages assessment.
Sec. 13-24-84. Additional enforcement provisions.
Sec. 13-24-85. Special fund.
Sec. 13-24-86. Public notification and significant noncompliance.
Secs. 13-24-87—13-24-89. Reserved.

Article 5. Review and Oversight of Outlying Jurisdictional Programs with Permitted Industrial User and/or Other Discharges to Memphis STP(S)

Sec. 13-24-90. Purpose of this division.
Sec. 13-24-91. Prohibitions applicable to outlying jurisdiction issuance of industrial user permits for discharge to Memphis.
Sec. 13-24-92. Memphis review of and objections to outlying jurisdiction permits.
Sec. 13-24-93. Memphis issuance of industrial user permits for dischargers in outlying jurisdiction.
Sec. 13-24-94. Miscellaneous provisions regarding outlying jurisdictions issuance of permits.
Secs. 13-24-95—13-24-99. Reserved.
Article 6. Miscellaneous provisions
Sec. 13-24-100. Reservation of rights.
Sec. 13-24-101. Special agreements or arrangements.
Secs. 13-24-102—13-24-109. Reserved.

ARTICLE 1. GENERALLY AND DEFINITIONS

Sec. 13-24-1. Definitions.

Unless the context specifically indicates otherwise, the meanings of terms used in this chapter shall be the definitions as set forth in section 13-4-1 of chapter 13-4, which are hereby incorporated by reference into this chapter. Terms for which definitions are not specifically provided shall be interpreted consistent with the intent and substance of this chapter and as otherwise provided by state regulation at 0400-40-14-.03 or EPA regulation at 40 C.F.R. § 403.3.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

ARTICLE 2. SYSTEM DISCHARGE AND INCORPORATION OF FEDERAL AND STATE REQUIREMENTS

Sec. 13-24-20. [User compliance].

User compliance with these requirements is required whether or not such requirements are specifically incorporated into an SIU discharge permit or other user permit. This includes fees and charges as set forth in chapters 13-8 and 13-28, as well as other fees the division of public works may impose (e.g., permit fees, sampling fees, and inspection fees) on users.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-21. Incorporation of Federal and State pretreatment requirements by reference.

The regulatory requirements pertaining to users as set forth in: (a) 40 C.F.R. Part 403, (b) 40 C.F.R., Chapter I (Environmental Protection Agency), Subchapter N (Effluent Guidelines and Standards), Parts 405 et. seq., and (c) Tennessee Pretreatment Requirements as set forth in Chapter 0400-40-14, are hereby incorporated by reference, including all future changes to such regulations. User compliance with these requirements is required, and subject to enforcement for noncompliance, whether or not such requirements are specifically incorporated into an SIU discharge permit or other user permit.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-22. SIU permits and other permits.

A. Requirements to obtain a permit. Except as provided in subsection (C), below, the discharge of wastewater by: (i) a significant industrial user; or (ii) such other commercial or industrial facility that the city, based upon the exercise of its discretion, identifies as requiring a discharge permit, is illegal unless such entity has an SIU discharge permit or other user permit, as applicable, issued by the city or an outlying jurisdiction which is authorized under the city's pretreatment program and this chapter to issue a discharge permit.

B. Discretionary permitting of non-significant industrial users. In addition to food establishments and waste haulers, non-significant industrial users that the city, subject to its discretion, may require to obtain an other user permit are commercial or industrial facilities that: result in additional treatment costs to the city; have the potential for discharge of acidic wastewater; have the potential for discharge of wastewater with offensive characteristics (e.g., odors); have a wastestream or treatment process that the city believes is preferable to be regulated under a permit; any new or expanded development where the additional flows raise potential concerns regarding capacity associated with the collection system, pump station, and/or WWTP; discharge wastewater containing a pollutant that could potentially result in additional requirements (e.g., monitoring or effluent limitation) being imposed in the city's NPDES permit; or as the city otherwise deems appropriate. Conditions included in other user permits and the city regulation of non-significant industrial users are subject to the city's sole discretion.

C. Time frame for obtaining permit. An existing user designated by the control authority as requiring an SIU discharge permit or other user permit, shall submit a permit application and/or such other information as the city may require for a permit within the timeframe specified by the city. Any proposed new discharger which has not discharged prior to the date it is notified that it must be permitted, shall not discharge to the system until a permit is issued and it is in compliance with the terms of such permit. The city may issue individual or general discharge permits. It is illegal to discharge wastewater to the city's POTW (including the collection system) in violation of a discharge permit, other user permit and/or this chapter. The city may adjust the timeframes for applying for a permit on a case-by-case basis as it deems appropriate.

D. Construction summary submission. A letter report setting forth an engineering summary of proposed changes shall be submitted to the control authority prior to commencement of construction, if applicable, by any existing or other industrial or commercial facility intending to discharge to the city's POTW. The control authority does not by its approval of the letter report, submitted by an industrial or commercial facility, warrant or aver in any manner that the implementation of such measures will result in compliance with the applicable pretreatment requirements. Notwithstanding any approval of such letter report by the city, the industrial or commercial facility remains solely responsible for compliance with the applicable pretreatment requirements and all other Federal, state, and local requirements.

E. City options for non-significant industrial users. Notwithstanding anything to the contrary in this chapter, nothing herein shall preclude the City of Memphis from issuing a letter or other authorization allowing discharge into the POTW for wastewater involved in groundwater clean-ups or other such discharges as the city deems appropriate. SIUs, however, shall be regulated by an SIU discharge permit (see section 13-24-22(F)).

F. SIU discharge permits.

1. Except as otherwise specifically provided in this chapter, an SIU shall apply for and obtain an SIU discharge permit (individual or general).
2. The application for an individual SIU discharge permit shall contain, but not be limited to, the following information: Standard industrial classification; facility name, physical address, and

mailing address; if applicable, corporate name and address; facility contact name and contact information; authorized representative of the user; date facility began operations or expects to start-up; number of employees; water supply and use information; raw material and chemical use rates; production rates; byproduct and waste generation rates; if applicable, service volume rates; if applicable, descriptions of onsite and office waste storage and disposal; volumes of wastewater to be discharged, whether process wastewater, equipment or vehicle wash water, condensate, non-contact cooling water, boiler blowdown, storm water, domestic sanitary wastewater, or other wastewater; wastewater constituents and characteristics; time and duration of discharge, and whether discharges are batch or continuous; average wastewater flow rates, including daily, monthly, and seasonal variations, or estimates of such where such information is not yet available; site plans and floor plans showing all drains and sewers, description of activities, facilities and plant processes; if applicable, descriptions of pretreatment systems; discharge and monitoring locations; and any additional information, data, diagrams, and drawings as required by the control authority to make permitting decisions. Applications for specialized individual permits, such as for groundwater remediation sites, may not require all the information listed above. This will be determined by the control authority.

3. Except for existing dischargers, industrial users seeking an SIU discharge permit shall obtain a permit application form from the control authority and file with the control authority a completed permit application form with all required descriptions, certifications, determinations, reports, information, data, plans, diagrams, and drawings, in the form prescribed by the control authority, not less than 180 days prior to the first discharge of industrial wastewater to the POTW, unless modified or waived by the control authority. Existing dischargers shall file for a permit in accordance with section 13-24-22(C), above.

4. At the discretion of the control authority, the control authority may use general SIU discharge permits to control SIU discharges to the POTW if, in the opinion of the control authority, the following conditions are met. All facilities to be covered by a general permit must:

   a. Involve the same or substantially similar types of operations;

   b. Discharge the same types of wastes;

   c. Require the same effluent limitations;

   d. Require the same or similar monitoring; and

   e. In the opinion of the control authority, are more appropriately controlled under a general permit than under individual permits.

5. To be covered by the general SIU discharge permit, the SIU must file a written request for coverage that identifies its contact information, production processes, the types of wastes generated, the location for monitoring all wastes covered by the general SIU discharge permit, any requests in accordance with section 13-24-42(H) for a monitoring waiver for a pollutant neither present nor expected to be present in the discharge, and any other information the control authority deems appropriate. A monitoring waiver for a pollutant neither present nor expected to be present in the discharge is not effective in the general SIU discharge permit until after the control authority has provided written notice to the SIU that such a waiver request has been granted in accordance with section 13-24-42(H).

G. Other user permits.

1. A user required to obtain an other user permit shall submit an application, or such information as the city may require, for developing permit conditions and evaluating issues associated with the other user permit, within the timeframe identified by the city.

2. Subject to its discretion, the control authority may use general other user permits to control non-SIUs or other users to the POTW subject to such requirements as the city deems appropriate.

H. Requirement for a permittee with a general permit to obtain an individual permit. Notwithstanding any provision to the contrary, the city may require any permittee subject to a general SIU discharge permit or a general other user permit to be covered by an individual permit instead. In such instance, the permittee shall submit an individual permit application, or such information as the city may require, as applicable, within the timeframe specified by the city.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-23. Permit provisions.

A. General authority/change of discharge. The control authority has the right to deny issuance of a permit (and, as such, the use of the city's sewer system and treatment facilities) or to impose such conditions in a discharge permit as the city deems appropriate, including conditions upon the types of wastes that can be discharged (e.g., precluding wastes which are solid or viscous in nature), new or increased contributions of pollutants, or changes in the nature of pollutants to the POTW by industrial users or other users. Except as otherwise provided by the control authority, any significant industrial user changes that have the potential to substantially increase flow or pollutants discharged or otherwise substantially affect the POTW, the treatability of the wastewater entering the POTW, or the ability of the POTW to meet NPDES, sludge and other applicable requirements, are subject to control authority approval prior to SIU implementation. The authority may require the SIU to undertake a compatibility study to demonstrate to the satisfaction of the control authority that the wastewater to be discharged is compatible with the existing POTW, will not affect any requirements imposed upon the city (including sludge disposal requirements), and will not otherwise adversely affect the POTW. The control authority may preclude the discharge of certain wastes even if those wastes would otherwise meet numeric effluent limits for specific pollutants.

B. Requirements applicable to all users. Users, whether permitted (e.g., with an individual or a general permit), are hereby expressly subject to all provisions pertaining to users as set forth in: (1) 40 C.F.R. Part 403, (2) 40 C.F.R., Chapter I (Environmental Protection Agency), Subchapter N (Effluent Guidelines and Standards), Parts 405 et. seq. (categorical pretreatment requirements), (3) Tennessee pretreatment requirements as set forth in Rule 0400-40-14-.05, and (4) This chapter, as well as all other applicable ordinances, regulations, charges, and fees administered by the division of public works. User compliance with these requirements is required whether or not such requirements are specifically incorporated into an SIU discharge permit or other user permit.

C. Permit conditions. SIU discharge permits and other user permits, whether individual or a general permit, may contain such conditions as the city deems appropriate including, but not limited to, the following conditions:

1. Minimum and maximum pH limits in standard units and/or hydroxide loading;
2. Daily maximum limits, weekly average limits, monthly average limits, and instantaneous maximum limits
3. Daily maximum, weekly and monthly average discharge flow limits and, when deemed appropriate by the control authority, flow regulation and/or equalization, including average and/or maximum flow rates;
4. Requirements for installation of inspection and sampling facilities, and when required, for continuous pH monitoring and flow monitoring;
5. When categorical standards are applicable, categorical pretreatment standards, effluent limits, best management practices, baseline monitoring reports, compliance monitoring, and certification statements, based on applicable general pretreatment standards in Part 403 of the Federal Regulations;
6. Other best management practices (e.g., to implement local limits and/or the requirements of sections 13-24-43 and 13-24-44 in addition to, or in lieu of, the underlying 13-24-43 and 13-24-44);
7. A prohibition on the use of dilution to meet permit limits (e.g., to meet color limits) and/or the imposition of mass limitations to prevent dilution to meet applicable pretreatment standards or pretreatment requirements or where otherwise deemed appropriate;
8. Self-monitoring, sampling, reporting (e.g., electronic reporting), notification and record keeping requirements, including an identifica-

tion of the pollutants to be monitored, sample location, sampling frequency, sample type, and numbers, types, and standards for tests;

9. Requirements for submission of self-monitoring and other reports;

10. Maintaining plant records relating to wastewater discharge, as specified by the control authority, and for affording the control authority access thereto;

11. Maximum discharge rates, or other appropriate limits or prohibitions, when a potentially incompatible pollutant is proposed or present in the user's wastewater discharge or otherwise deemed appropriate by the control authority;

12. Penalties and damages for violation of the permit and provisions of chapter 13-24 of this title, including any daily penalties, costs to the control authority, and damages. Statement of applicable civil and criminal penalties for violation of pretreatment standards and requirements, and any schedule to achieve compliance with applicable requirements, however, such schedules do not extend the compliance date beyond applicable Federal and state deadlines;

13. Statement of duration;

14. Statement of non-transferability or a provision allowing transfer of a permit with, at a minimum, prior notification to the control authority and provision of a copy of the existing control mechanism to the new owner or operator;

15. When deemed appropriate by the control authority, compliance schedules to meet applicable requirements (e.g., local ordinance requirements and/or Federal Categorical Pretreatment Standards);

16. Requirements for repeat sampling after becoming aware of a violation;

17. Requirements to control slug discharges, if determined by the control authority to be necessary;

18. Requirements pertaining to the proper operation and maintenance of the user's treatment, sampling and analytical equipment, and notification to the authority regarding the failure of such equipment;

19. Requirements to address control authority concerns about the potential effect of influent sulfur content (e.g., upon the biogas at the WWTP) or the effect of other wastewater characteristics upon activities at the WWTP;

20. Action levels;

21. Other conditions as deemed appropriate by the control authority; and

22. The process for seeking a waiver from monitoring for a pollutant neither present nor expected to be present in the discharge in accordance with section 13-24-42(H).

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-24. Time period of permits; continuation of expired permits.

A. SIU discharge permits shall be issued for a specified time period, not to exceed five years. Other user permits may be issued for such time period as the city deems appropriate. To continue discharging wastewater to the POTW, a user with an existing permit must obtain a permit application form from the control authority, if applicable, and file with the control authority a completed permit application and/or such other information required by the city with all required descriptions, certifications, determinations, reports, information, data, plans, diagrams, and drawings, in the form prescribed by the control authority not less than 180 days prior to the expiration date of the existing discharge permit (unless an alternative period is provided by the city). General permits are automatically continued after its expiration date pending a city decision to reissue the general permit, except for any discharger that does not timely submit such information as required by the city, if applicable.

B. Notwithstanding any provision to the contrary, the conditions of an expired SIU discharge permit and others permits, as applicable, continue in force until the effective date of a new permit or the date of a decision by the city not to reissue the permit, as applicable, if: (i) the permittee has submitted a complete and timely permit application or such other information as the control authority may require; and (ii) the control authority, through no fault of the permittee, does not reissue a permit on or before the expiration date of the previous permit (for example, when issuance is impractical due to time or resource constraints).

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-25. Modification, suspension, or revocation of permits and appeals.

A. During the life of the permit, the control authority may conduct review of the permit to assess if the individual or general permit should be modified, suspended, or revoked.

B. The terms and conditions of a permit, or any part thereof, are subject to modification for good cause, including, but not limited to, the following reasons:

1. To incorporate any new or revised Federal, state, or local requirements;
2. To address significant alterations or additions to the user's operation, processes, or wastewater volume or character;
3. A change in the POTW'S NPDES permit or in the POTW (e.g., changes in the design or capability of WWTP or sludge disposal options);
4. A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized activity;
5. Information indicating that the authorized discharge poses a threat to the city's WWTP (e.g., would adversely impact the wastewater treatment process) or the collection system (e.g., could cause corrosion to the pipes or pumping station), city personnel, the receiving waters, or that contradicts prior information;
6. Violation of any term or condition of the permit and/or any requirement set forth in applicable law, regulation, and/or this chapter;
7. Misrepresentations or failure to fully disclose all relevant facts in the permit application or in any required reporting or the tampering of monitoring equipment;
8. Failure to allow timely access to the user's facility or records;
9. Failure to timely pay fines or applicable sewer charges;
10. Revision of or a grant of variance from categorical pretreatment standards pursuant to Tennessee Rule 0400-40-14-.13;
11. To correct typographical errors, omissions, or other errors in the permit;
12. Changes to the local sewer discharge requirements;
13. To change monitoring, sampling, or reporting requirements; and/or
14. For such other reason as the city deems appropriate.

C. When a permit is modified, only the conditions subject to modification are reopened. The user may request that the control authority modify the permit. All other terms and conditions of the existing SIU discharge permit and/or other user permit remain unchanged. In lieu of modifying or changing an existing permit, the control authority may require the user to apply for a new permit when there are significant changes to a user's facility, significant changes to the discharges, or other good cause exists. A user newly designated as a significant industrial user shall obtain an SIU permit, in which case its other user permit for the same discharge, if applicable, shall terminate upon issuance of an SIU discharge permit.

D. A request for modification or other change to a permit does not stay any term or condition set forth in the existing or modified permit pending a determination upon the request. The control authority may, upon its own initiative or in response to a request by the permittee, stay contested permit conditions or actions.

E. Any user is subject to having its permit modified, suspended, or revoked and sewer service discontinued for cause, including:

1. Violation of the SIU discharge permit, other user permit, or any provision of this chapter;
2. Failure of a user to fully disclose all relevant facts, or the permittee's misrepresentation of any relevant facts, including the reporting of the wastewater constituents and characteristics of its discharge;
3. Failure of the user to report significant changes in operations, which affect wastewater constituents and characteristics;
4. Refusal of reasonable access at the user's premises for the purpose of inspection or monitoring the applicable sewage or wastewater system;
5. Refusal or failure to pay all appropriate fees, charges, or civil penalties;

6. Causing the city to violate any condition of its NPDES permit(s); or

7. A determination by EPA, TDEC, or the control authority that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination.

F. Duty to provide information: The user shall furnish the control authority, within a reasonable time, any information which the control authority may request to determine whether cause exists for issuing, modifying, reissuing, suspending, or revoking an SIU discharge permit or other user permit or to determine compliance. The user shall also furnish to the control authority, upon request, copies of records required to be kept. Where the user becomes aware that it failed to submit any relevant facts in an application for a permit, or submitted incorrect information in an application for a permit, report to the control authority, or in any other correspondence pertaining to its regulated activities, it shall promptly submit such facts or information.

G. A user shall not refuse to provide the City of Memphis or its representatives (e.g., inspector) information or refuse to allow the city to undertake actions authorized by this chapter, based upon the user's belief that the information would be confidential business information. The user may request that the information be treated as confidential in accordance with section 13-24-29.

H. A permittee shall have the right to appeal the issuance, reissuance, modification, suspension, or revocation of a permit to the local hearing authority under article 4 of this chapter. Any appeal must be received within 30 days of the city's action.

I. Action of the control authority for which review has been available (e.g., enactment of an ordinance, or issuance, reissuance, modification, suspension, or revocation of a permit) shall not be subject to administrative or judicial review in any civil or criminal proceeding for enforcement. Among other things, this means that an underlying permit condition or ordinance requirement cannot be challenged in an enforcement proceeding.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-26. Limitation to specific operation of specific user; nontransferable.

A. SIU discharge permits and other user permits are issued to a specific user for a specific operation and the SIU discharge permit and other user permit shall not be reassigned, transferred, or sold to a new owner, other industrial user, or different premises. The city, subject to its discretion, may modify the existing SIU discharge permit and/or other user permit to include the new owner and may make such changes to the SIU discharge permit or other permit as the city deems appropriate.

B. The user shall provide the city 90-days written notice prior to requested transfer of a permit and shall include a permit application (unless waived by the city).
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-27. Monitoring facilities, provisions to be outlined in discharge permit.

Monitoring facilities, in accordance with section 13-24-47 of this chapter, may be required in the SIU permit or other user permit.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-28. Right of inspection, sampling and oversight; access to premises by control authority.

Inspectors may include representatives of the division of public works, control authority, and/or its designee (including contractors), bearing proper credentials and identification. Inspectors shall be permitted to enter appropriate property areas at all reasonable times for the purpose of inspection, observation, measurement, sampling, and testing as the inspector deems necessary, to assure user compliance with [this chapter]. Sampling, inspection, and other oversight may be undertaken at any location at the facility site including, but not limited to, effluent discharge points, internal wastestream points, and manholes located on the user's owned or occupied property. This includes the authority to inspect the production, sewage, and wastewater facilities of any user to ascertain whether the purposes of this chapter are being met and all requirements are being complied with. Persons or occupants of premises where wastewater is discharged shall allow the inspector ready access at all reasonable times, at a minimum, the days and hours of operations indicated in the permit application submitted by the user, for the purposes of inspection, sampling, testing, photographing, videotaping, copying documents and records, and conducting interviews in the performance of their duties. Access to the property for the purposes set forth herein shall not be conditioned upon the City of Memphis and/or the inspectors signing an access agreement, including, but not limited to, a

document pertaining to the potential waiver or release from liability or provisions pertaining to secrecy, confidentiality, or disclosure of information. The inspector shall have the right to set up on the user's property such sensors or other devices as are necessary to conduct sampling, metering operations, or other oversight, which includes, but is not limited to, composite samplers, discrete samplers, flow measuring devices, continuous monitoring devices and/or sensors, controllers, remote telemetry devices, modems, and cleaning devices such as air blasts or water blasts. Where a user has security measures in force, which would require proper identification and clearance before entry into the premises, the user shall make necessary arrangements with security personnel so that, upon presentation of suitable identification, the inspectors shall be permitted to enter without delay for the purposes of performing their specific responsibilities.
(Ord. No. 5793, §§ 3, 5 8-17-2021)

Sec. 13-24-29. Availability of information on user to public; use of claimed confidential information.

A. Confidential business information. All information and data on a user obtained from reports, Questionnaires, applications, permits, inspection, monitoring programs, or submitted to the control authority pursuant to this chapter shall be available to the public, subject to the restrictions of the Tennessee Open Records Act codified at [T.C.A. §] 10-7-501 et seq., and applicable statutory exemptions. Any such claim must be asserted at the time of submission in the manner prescribed on the application form or instructions, or, in the case of other submission, by stamping the words "confidential business information" on each page containing such information. If no claim is made at the time of submission, the control authority may make the information available to the public without further notice. If a claim is asserted, the information will be treated in accordance with the standards in 40 C.F.R. Part 2 (Public Information).

B. Effluent data. Notwithstanding any provision to the contrary, user information and data which are effluent data shall be available to the public without restriction.

C. State or control authority. All other information which is submitted to the State or control authority shall be available to the public at least to the extent provided by T.C.A. §§ 10-7-501 et seq.

D. Information requested by another governmental agency. Where user information is lawfully requested by another governmental agency (e.g., TDEC or EPA), the city may provide such information to the governmental agency and the city will not be required to make a confidentiality determination regarding such information. The user seeking confidentiality protection of the information shall bear the burden of demonstrating to the other governmental agency that such information is entitled to confidential protection. Prior to providing such information to the other governmental agency, the city shall provide notice to the user.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-30. Reporting and recordkeeping.

A. General. The control authority has the right to require the submission of such notices and self-monitoring reports from users as are necessary to assess and assure compliance by, among others, users with pretreatment standards and pretreatment requirements, including, but not limited to, the reports required in 40 C.F.R. § 403.12. Industrial users shall submit the following reports, as applicable, and industrial users and other users shall submit such reports as may be required by the control authority and shall contain the certification statement set forth in subsection 13-24-30(J)(1), below.

B. Baseline monitoring report (BMR).

1. Within either 180 days after the effective date of a categorical pretreatment standard or the final administrative decision on a category determination under Tennessee Rule 0400-40-14-.06(1)(d), whichever is later, existing categorical industrial users currently discharging to or scheduled to discharge to the WWTP shall submit to the control authority a report which contains the information listed in subsections (2)a—(2)e, (3) and (4), below. At least 90 days prior to commencement of their discharge, new sources and sources that become categorical industrial users subsequent to the promulgation of an applicable categorical standard, shall submit to the control authority a report which contains the information listed in subsection (2) below. A new source shall report the method of pretreatment it intends to use to meet applicable categorical standards and shall provide estimates of the information required under

subsections (B)(2)(d) and (E), below, regarding its anticipated flow and quantity of pollutants to be discharged.

2. Industrial users described above shall submit the information set forth below.

   a. Identifying information. The username and address of the facility including: the names of operators and owners.

   b. Permit information. A listing of any environmental control permits held by or for the facility.

   c. Description of operations. A brief description of the nature, average rate of production (including each product produced by type, amount, processes, and rate of production), and standard industrial classifications of the operation(s) carried out by such user. This description should include a schematic process diagram, which indicates points of discharge to the WWTP from the regulated processes.

   d. Flow measurement. Information showing the measured average daily and maximum daily flow, in gallons per day, to the POTW from each regulated process streams and other streams, as necessary, to allow use of the combined wastestream formula pursuant to section 13-24-42(B) (See Tennessee Rule 0400-40-14-.06(5)). The control authority may allow for verifiable estimates of these flows where justified by cost or feasibility considerations. In addition, discharge flow data showing whether flow-proportional, time-proportional composite, and/or grab sampling are required for collecting representative samples for discharge monitoring purposes based on the consistency of the discharge flows.

   e. Measurement of pollutants.

      (i) Identification of the categorical pretreatment standards applicable to each regulated process and any new categorically regulated processes for existing sources.

      (ii) The results of sampling and analysis identifying the nature and concentration (and/or mass, where required by the pretreatment standard or by the control authority), of regulated pollutants in the discharge from each regulated process.

      (iii) Instantaneous, daily maximum, and long-term average concentrations (or masses, where required), shall be reported.

      (iv) The sample shall be representative of daily operations and shall be analyzed in accordance with procedures set out in 40 C.F.R. § 136 and amendments, unless otherwise specified in an applicable categorical standard. Where the pretreatment standard requires compliance with a best management practice (BMP) or pollution prevention alternative, the industrial user shall submit documentation as required by the control authority, or the applicable standards, to determine compliance with the pretreatment standard.

      (v) The industrial user shall take a minimum of one representative sample to compile the data necessary to comply with the requirements of this subsection.

      (vi) Samples should be taken immediately downstream from pretreatment facilities if such exist or immediately downstream from the regulated process if no pretreatment exists. If other wastewaters are mixed with the regulated wastewater prior to pretreatment, the industrial user should measure the flows and concentrations necessary to allow use of the combined wastestream formula pursuant to section 13-24-42(B) and Tennessee Rule 0400-40-14-.06(5) to evaluate compliance with the pretreatment standards.

      (vii) The control authority may allow the submission of a baseline report, which utilizes only historical data,

so long as the data provide information sufficient to determine the need for industrial pretreatment measures.

(viii) The baseline report shall indicate the time, date, and place of sampling and methods of analysis, and shall certify that such sampling and analysis is representative of normal work cycles and expected pollutant discharges to the WWTP.

3. Compliance certification. Existing industrial users shall submit a statement, reviewed by the authorized representative of the industrial user and certified by a qualified professional, indicating whether pretreatment standards are being met on a consistent basis, and, if not, whether additional operation and maintenance (O&M) and/or additional pretreatment is required to meet the pretreatment standards.

4. Compliance schedule. If additional pretreatment and/or O&M will be required to meet the pretreatment standards, existing industrial users shall submit the shortest schedule by which the user will provide such additional pretreatment and/or O&M must be provided. The completion date in this schedule for meeting a categorical pretreatment standard shall not be later than the compliance date established for the applicable categorical pretreatment standard. A compliance schedule pursuant to this section must meet the requirements set out in subsection (C) of this section, below.

C. Compliance schedule progress report. The following conditions shall apply to the compliance schedule required under the BMR section above:

1. The schedule shall contain progress increments in the form of dates for the commencement and completion of major events leading to the construction and operation of additional pretreatment required for the user to meet the applicable pretreatment standards (such events include, but are not limited to, hiring a Tennessee State licensed professional engineer, completing preliminary and final plans, executing contracts for major components, commencing and completing construction, and beginning and conducting routine operation).

2. No increment referred to above shall exceed nine months.

3. The user shall submit a progress report to the control authority no later than 14 days following each date in the schedule and the final date of compliance including, at a minimum, whether or not it has complied with the increment of progress and, if not, the date on which it expects to comply with this increment of progress, the reason for any delay, and, if appropriate, the steps being taken by the user to return to the established schedule.

4. In no event shall more than nine months elapse between such progress reports to the control authority.

5. At the discretion of the control authority, progress reports may be submitted by the 15th of each calendar month until full compliance is achieved, as determined by the control authority.

D. Report on compliance with categorical pretreatment standard deadline. Within 90 days following the date for final compliance with applicable categorical pretreatment standards, or in the case of a new source, following commencement of the introduction of wastewater into the POTW, any industrial user subject to pretreatment standards and requirements shall submit to the control authority a report containing the information described in [subsections] (B)(2)(d) and (e) and (B)(3). For industrial users subject to equivalent mass or concentration limits, established by the control authority in accordance with the procedures in section 13-24-42(E) or (F), this report shall contain a reasonable measure of the industrial user's long term production rate. For all other industrial users subject to categorical pretreatment standards expressed in terms of allowable pollutant discharge per unit of production (or other measure of operation), this report shall include the user's actual production during the appropriate sampling period.

E. Self-monitoring reports (SMRs)

1. All significant industrial users (including CIUs, except for non-significant CIUs) must submit, at a frequency determined by the control authority, but no less than twice per year, reports indicating the nature, concentration of pollutants in the discharge, which are limited or otherwise required to be sampled by the

discharge permit and such other pretreatment standards as are applicable, and the measured or estimated average and maximum daily flows, as applicable, for the reporting period. In cases where the pretreatment standard requires compliance with a BMP (or pollution prevention alternative), the industrial user must submit documentation necessary to determine the compliance status of the industrial user, including documentation required by the control authority and/or the pretreatment standard. If a semi-annual reporting schedule is established, then such reports are to be submitted on April 15 and October 15 for the preceding six full-month calendar period, unless a different schedule is established by the control authority. Monthly self-monitoring reports (and reports at other frequencies established by the control authority) are required to be submitted on the 15th of the month following the compliance report (i.e., monthly compliance reports are due by the 15th of each successive calendar month) unless an alternative approach is established in writing by the control authority.

2. All self-monitoring reports must be signed and certified in accordance with this chapter (see subsection (J), below).

F. Potential reduced reporting for small CIUs. If allowed by State law or regulation, the control authority may reduce the requirement for self-monitoring reports by a categorical industrial user in section 13-24-30(E) herein, to a requirement to report no less frequently than once a year, unless required more frequently in the pretreatment standard or by the State, where the industrial user's total categorical wastewater flow does not exceed any of the following, and the industrial user otherwise meets the requirements as set forth in 40 C.F.R § 403.12(e)(3)(ii)—(v).

1. One one-hundredth (0.01) of a percent of the design dry weather hydraulic capacity of the POTW or 5,000 gallons per day, whichever is smaller, as measured by a continuous effluent flow monitoring device, unless the industrial user discharges in batches;

2. One one-hundredth (0.01) of a percent of the design dry weather organic treatment capacity of the receiving treatment plant as determined by the control authority; and

3. One one-hundredth (0.01) of a percent of the maximum allowable headworks loading (MAHL) of the receiving treatment plant for any pollutant regulated by applicable categorical pretreatment standard for which local limits were developed as determined by the control authority.

G. Reporting of alternate concentration or mass limits. Where an alternate concentration or mass limit has been calculated in accordance with section 13-24-42(F), this adjusted limit, along with supporting data, shall be submitted to the control authority.

H. Reports of changed conditions. Each industrial user must notify the control authority at least 30 days before any significant changes to the industrial user's operations or system or any substantial increase to the nature, quality, or volume of its wastewater discharged, including the listed or characteristic hazardous wastes for which the industrial user has submitted initial notification under subsection (K), below, or any changes that could reasonably be expected to cause interference or pass-through.

1. The control authority may require the user to submit such information as may be deemed necessary to evaluate the changed condition, including the submission of a new or updated permit application.

2. The control authority may issue an individual or general permit under section 13-24-22, modify, suspend, or revoke an existing discharge permit in response to, among other things, changed conditions or anticipated changed conditions.

   Control authority approval is required before a significant industrial user can make such changes.

I. Report of potential problems.

1. In the case of any discharge, including, but not limited to, accidental discharges, discharges of a nonroutine, episodic nature, a noncustomary batch discharge, or a slug discharge that might cause potential problems to the POTW (including problems to the collection system that may be caused by fats, oils or grease clogging the sewer system or lift stations), the industrial user shall immediately notify the control authority of the incident. This notification shall include

the location of the discharge, type of waste, concentration, and volume, if known, and corrective actions taken by the industrial user.

2. Within five days following such discharge, the industrial user shall, unless waived by the control authority, submit a detailed written report describing the cause(s) of the discharge and the measures to be taken by the industrial user to prevent similar future occurrences. Such notification shall not relieve the industrial user of any expense, loss, damage, or other liability which might be incurred as a result of damage to the WWTP, natural resources, or any other damage to person or property; nor shall such notification relieve the industrial user of any fines, penalties, or other liability which may be imposed pursuant to this chapter.

3. A notice shall be permanently posted on the industrial user's bulletin board or other prominent place advising employees who to call in the event of a discharge described in subsection (1), above. Employers shall ensure that all employees, who could cause such a discharge to occur, are advised of the emergency notification procedure.

4. Significant industrial users are required to notify the control authority immediately of any changes at its facility that significantly increases the potential for a slug discharge.

J. Certification statements.

1. The following reports shall be signed by the authorized representative of the user and shall have the certification statement set forth below in the indented language: permit applications, periodic self-monitoring reports, compliance schedule compliance reports, baseline monitoring, reports of accidental or slug discharges, and such other reports as the city identifies in writing to a user:

   I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

2. Annual certification for non-significant categorical industrial users. The city may determine that an industrial user, subject to categorical pretreatment standards, is a non-significant categorical industrial user rather than a significant industrial user on a finding that the industrial user meets the definition of "non-significant categorical industrial user" in section 13-4-1 due to its discharge of less than 100 gallons of total categorical wastewater on any given day. A facility identified by the city as a non-significant categorical industrial user based upon such criteria must annually submit the following certification statement signed by the authorized representative of the industrial user filling in the appropriate information:

   Based on my inquiry of the person or persons directly responsible for managing compliance with the categorical pretreatment standards under 40 C.F.R. ____, I certify that, to the best of my knowledge and belief that during the period from _____, _____ to _____, _____ [months, days, year]:

   a. The facility described as _____ [facility name] met the definition of a non-significant categorical industrial user as described in section 13-4-1 Definitions;

   b. The facility complied with all applicable pretreatment standards and requirements during this reporting period; and

   c. The facility never discharged more than 100 gallons of total categorical wastewater on any given day during this reporting period.

   This compliance certification is based on the following information.

   _____.

3. Certification of pollutants not present. Industrial users that have an approved monitoring waiver based on section 13-24-42(H) must certify on each report with the following statement that there has been no increase in the pollutant in its wastestream due to activities of the industrial user.

   Based on my inquiry of the person or persons directly responsible for managing compliance with the pretreatment standard for 40 C.F.R. _____ [specify applicable National Pretreatment Standard part(s)], I certify that, to the best of my knowledge and belief, there has been no increase in the level of [list pollutant(s)] in the wastewaters due to the activities at the facility since filing of the last self-monitoring report under section 13-24-30(E).

K. Notification of the discharge of hazardous wastes.

(1) Industrial/commercial users shall notify the control authority, the EPA Regional Waste Management Division, and the Tennessee Department of Environment and Conservation (TDEC) in writing of any discharge into the POTW of a substance, which, if otherwise disposed of, would be a hazardous waste under 40 C.F.R. Part 261 or Rule 0400-2-01. Such notification must include the name of the hazardous waste as set forth in 40 C.F.R. Part 261 or Rule 0400-12-01, the EPA hazardous waste number, and the type of discharge (continuous, batch, or other). If the industrial user discharges more than 100 kilograms of such waste per calendar month to the POTW, the notification shall also contain the following information to the extent such information is known and readily available to the industrial user: an identification of the hazardous constituents contained in the wastes, an estimation of the mass and concentration of such constituents in the waste stream discharged during that calendar month, and an estimation of the mass of constituents in the wastestream expected to be discharged during the following 12 months. All notifications for dischargers existing at the time should have taken place within 180 days of the city's first adoption of this rule (i.e., within 180 days of March 26, 1982). Industrial users who commence discharging after March 26, 1982, were and are required to provide the notification no later than 180 days after the discharge of the listed or characteristic hazardous waste. Any notification under this subsection need be submitted only once for each hazardous waste discharged. However, notifications of changed discharges must be submitted under section 13-24-30(H). The notification requirement in this section does not apply to pollutants already reported under the self-monitoring requirements of this chapter.

(2) Dischargers are exempt from the requirements of subsections (K)(1) in this section during a calendar month in which they discharge no more than 15 kilograms (kg) of hazardous wastes, unless the wastes are acute hazardous wastes as specified in 40 C.F.R. §§ 261.30(d) and 261.33(e). A discharge of more than 15 kg of non-acute hazardous wastes in a calendar month or of any quantity of acute hazardous wastes as specified in 40 C.F.R. §§ 261.30(d) and 261.33(e) requires a one-time notification.

(3) In the case of any new regulations under Section 3001 of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. § 6921, identifying additional characteristics of hazardous waste or listing any additional substance as a hazardous waste, the industrial user must notify the POTW, the EPA Regional Waste Management Division control authority, and the TDEC of the discharge of such substance within 90 days of the effective date of such regulations.

(4) In the case of any notification made under subsection (K) of this section, the industrial user shall certify that it has a program in place to reduce the volume and toxicity of hazardous wastes generated to the degree it has determined to be economically practical.

L. Recordkeeping. Users subject to the reporting requirements of this chapter shall retain and make available for inspection and copying all reports, and records of information obtained pursuant to any monitoring activities required by this chapter, any additional records of information obtained pursuant to monitoring activities undertaken by the user independent of such requirements, and documentation associated with best management practices. Records shall include the date, exact place, method, and time of sampling, and the

name of the person(s) taking the samples; the dates analyses were performed; who performed the analyses; the analytical techniques or methods used; and the results of such analyses. These records shall remain available for a period of at least three years. This period shall be automatically extended for the duration of any enforcement action or litigation concerning the user's compliance with its discharge permit or this sewer ordinance, or an enforcement action or litigation concerning the city, or where the user has been specifically notified of a longer retention period by the control authority.

M. Submission of all monitoring data. A user may monitor its discharge more frequently than the minimum set forth in its discharge permit, this sewer use ordinance, or as otherwise required. If a user subject to reporting requirements monitors any regulated pollutant at the appropriate sampling location more frequently than required by the control authority, using the procedures prescribed in section 13-24-48, the results of this monitoring shall be included in the reports required under section 13-24-30 and/or the discharge permit, as applicable.

N. Electronic reporting. Reports of permittees shall contain all results of sampling and analysis of the discharge, including the flow, nature, concentration, production and/or mass, where required. Upon the City of Memphis receiving approval from TDEC of a Cross Media Electronic Reporting Regulation (CROMERR) system, compliant with the Code of Federal Regulations Title 40, Part 3 (CROM ERR), the City of Memphis may require all or some of its users to submit such reports as the city deems appropriate in an electronic-only format through a CROMERR compliant system. CROMERR is an Environmental Protection Agency approved system allowing states, tribes, and local governments that receive or plan to begin receiving electronic documents in lieu of paper documents to satisfy regulations under an authorized program. Each user shall submit such CROMERR reports as the city identifies in a control mechanism (e.g., permit or letter) to the user within the time frame set forth, which shall provide the user at least 90 days to become CROMERR compliant. The user may request additional time for good cause, but such request does not automatically extend the deadline for becoming CROMERR compliant. New significant industrial user dischargers, including those located in outlying jurisdictions, shall submit reports through a CROMERR compliant system unless waived by the City of Memphis, Division of Public Works, in writing.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Secs. 13-24-31—13-24-39. Reserved.

ARTICLE 3. DISCHARGE TO PUBLIC SANITARY SEWERS

Sec. 13-24-40. Reserved.

Sec. 13-24-41. Discharges of storm water, groundwater, etc., into sanitary sewer prohibited; exceptions; discharges into sanitary sewer system other than through specifically permitted building sewer, permit required.

A. No person shall discharge or cause to be discharged any storm water, surface water, groundwater, roof runoff, subsurface drainage, or uncontaminated cooling water to any sanitary sewer except by permission of the City of Memphis and under permit from the control authority.

B. No person shall discharge, whether directly or by truck or other transportation, any substance into a manhole or other opening in a public sewer, other than through an approved building sewer, unless he/she has been issued a discharge permit by the control authority that specifically authorizes a discharge at such location. No person shall discharge any holding tank waste into the city POTW, including the collection system, unless he/she has been issued a permit by the control authority specifically authorizing such discharge. Unless otherwise allowed by the control authority under the terms and conditions of the permit, a separate permit must be secured for each separate discharge. This permit may state the specific location of discharge, the time of day the discharge is to occur, the volume of the discharge, the maximum discharge rate, wastewater constituents and characteristics, and such other conditions as the control authority deems appropriate. If a permit is granted for discharge of such waste into a community sewer, the user shall pay the applicable charges and fees and shall meet such other conditions as are required by the control authority.

C. No person who generates wastewater at one property shall discharge it at another property without approval from the control authority.

D. No person shall flush commercial or other non-domestic wastewater down the toilet or discharge it through other bathroom connections (e.g., shower drain). (Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-42. Implementation of categorical pretreatment standards.

A. *Compliance with categorical pretreatment standards required.* Users must comply with the categorical pretreatment standards found at 40 C.F.R. Chapter I, Subchapter N, Parts 405-471, as applicable. Compliance by existing sources with categorical pretreatment standards shall be within three years of the date the standard is effective unless a shorter compliance time is specified in the appropriate subpart of Subchapter N or the Federal Register promulgation of the Standard. Existing sources, which become industrial users subsequent to promulgation of an applicable categorical pretreatment standard, shall be considered existing industrial users except where such sources meet the definition of a new source. New sources shall install, have in operating condition and, "start-up" all pollution control equipment required to meet applicable pretreatment standards before beginning to discharge. Within the shortest feasible time (not to exceed 90 days), new sources must meet all applicable pretreatment standards.

B. *Use of the combined wastestream formula*. When wastewater subject to a categorical pretreatment standard is mixed with wastewater not regulated by the same standard, the control authority may impose an alternate limit in accordance with the combined wastestream formula as set forth in Tennessee Rule 0400-40-14-.06(5) or take such other action as necessary to assure compliance with categorical pretreatment standards.

C. *Fundamentally different factors variance*. A discharger may request a variance from categorical pretreatment standards in accordance with applicable procedures. See, e.g., Tennessee Rule 0400-40-14-.13.

D. *Net gross adjustment*. A categorical industrial user (CIU) may obtain a net/gross adjustment to a categorical pretreatment standard in accordance with the following subsections:

1. Categorical pretreatment standards may be adjusted to reflect the presence of pollutants in the industrial user's intake water in accordance with this section. Any industrial user wishing to obtain credit for intake pollutants must make application to the city. Upon request of the industrial user, the applicable pretreatment standard will be calculated on a "net" basis (i.e., adjusted to reflect credit for pollutants in the intake water) if the requirements of subsections (2) through (5) of this section are met.

2. Criteria.

   a. The applicable categorical pretreatment standards contained in 40 C.F.R. subchapter N specifically provide that they shall be applied on a net basis; or

   b. The industrial user demonstrates that the control system it proposes or uses to meet applicable categorical pretreatment standards would, if properly installed and operated, meet the pretreatment standards in the absence of pollutants in the intake waters.

3. Credit for generic pollutants such as biochemical oxygen demand (BOD), total suspended solids (TSS), and oil and grease should not be granted unless the industrial user demonstrates that the constituents of the generic measure in the industrial user's effluent are substantially similar to the constituents of the generic measure in the intake water or unless appropriate additional limits are placed on process water pollutants either at the outfall or elsewhere.

4. Credit shall be granted only to the extent necessary to meet the applicable categorical pretreatment standard(s), up to a maximum value equal to the influent value. Additional monitoring may be necessary to determine eligibility for credits and compliance with pretreatment standard(s) adjusted under this section.

5. Credit shall be granted only if the user demonstrates that the intake water is drawn from the same body of water as that into which the POTW discharges. The city may waive this requirement if it finds that no environmental degradation will result.

E. *Implementation of production-based limit.*

1. When the limits in a categorical pretreatment standard are expressed only in terms of mass of pollutant per unit of production, the control authority may convert the limits to equivalent limitations expressed either as mass of pollutant discharged per day or effluent concentration for purposes of calculating effluent limitations applicable to individual industrial users.

2. Any industrial user operating under a control mechanism incorporating equivalent mass or concentration limits calculated from a production-based standard shall notify the control authority within two business days after the user has a reasonable basis to know that the production level will significantly change within the next calendar month. Any industrial user not notifying the control authority of such anticipated change will be required to meet the mass or concentration limits in its control mechanism that were based on the original estimate of the long-term average production rate.

F. *Imposition of equivalent mass or concentration based limits.*

1. When a categorical pretreatment standard is expressed only in terms of pollutant concentrations, the control authority may also establish equivalent mass limits so that local, state, or Federal authorities may enforce either concentration or mass limits. In the alternative, an industrial user may request that the control authority convert the concentration limits to equivalent mass limits and include only the equivalent mass limits in the permit. The determination to convert concentration limits to mass limits is within the discretion of the control authority. The control authority may establish equivalent mass limits in lieu of a concentration limit only if the industrial user meets all the conditions set forth in subsections (F)(1)(a) through (e) below.

   a. Employ, or demonstrate that it will employ, water conservation methods and technologies that substantially reduce water use during the term of its discharge permit;

   b. Currently use control and treatment technologies adequate to achieve compliance with the applicable categorical pretreatment standard and has not previously used or plan to use dilution as a substitute for treatment;

   c. Provide sufficient information to establish the facility's actual average daily flow rate for all wastestreams, based on data from a continuous effluent flow monitoring device, as well as the facility's long-term average production rate. Both the actual average daily flow rate and the long-term average production rate must be representative of current operating conditions;

   d. Not have daily flow rates, production levels, or pollutant levels that vary so significantly that equivalent mass limits are not appropriate to control the discharge; and

   e. Have consistently complied with all applicable categorical pretreatment standards during the period prior to the industrial user's request for equivalent mass limits.

2. An industrial user subject to equivalent mass limits must:

   a. Maintain and effectively operate control and treatment technologies adequate to achieve compliance with the equivalent mass limits;

   b. Continue to record the facility's flow rates with a continuous effluent flow monitoring device;

   c. Continue to record the facility's production rates and notify the control authority whenever production rates are expected to vary by more than 20 percent from its baseline production rates. Upon notification of a revised production rate, the control authority may reassess the equivalent mass limit and revise the limit as necessary to reflect changed conditions at the facility; and

   d. Continue to employ the same or comparable water conservation methods

and technologies as those implemented pursuant to subsection (F)(1)(a) of this section, so long as it discharges under an equivalent mass limit.

3. When developing equivalent mass limits, the control authority may:

   a. Calculate the equivalent mass limit by multiplying the actual average daily flow rate of the regulated process(es) of the industrial user by the concentration-based daily maximum and monthly average standard for the applicable categorical pretreatment standard and the appropriate unit conversion factor;

   b. Upon notification of a revised production rate, reassess the equivalent mass limit and recalculate the limit as necessary to reflect changed conditions at the facility;

   c. Retain the same equivalent mass limit in subsequent discharge permit terms if the industrial user's actual average daily flow rate was reduced solely as a result of the implementation of water conservation methods and technologies, and the actual average daily flow rates used in the original calculation of the equivalent mass limit were not based on the use of dilution as a substitute for treatment; and

   d. Deny or condition equivalent mass limits upon the industrial user also being in compliance with section 13-24-46(C)(4) regarding the prohibition of bypass.

4. The control authority may convert the mass limits of the categorical pretreatment standards of 40 C.F.R. Parts 414, 419, and 455 to concentration limits for purposes of calculating limitations applicable to individual industrial users. The conversion is at the discretion of the control authority.

5. If only equivalent mass limitations are included in the control mechanism, once included in the control mechanism, the industrial user must comply with the equivalent limitations in lieu of the promulgated categorical standards from which the equivalent limitations were derived.

G. *Calculation of categorical limits*. Many categorical pretreatment standards specify one limit for calculating maximum daily discharge limitations and a second limit for calculating maximum monthly average, or four-day average limitations. Where such standards are being applied, the same production or flow figure shall be used in calculating both the average and the maximum equivalent limitation under applicable categorical pretreatment standards.

H. *Sampling waiver*. The control authority may authorize an industrial user subject to a categorical pretreatment standard to forego sampling of a pollutant regulated by a categorical pretreatment standard if the industrial user has demonstrated through sampling and other technical factors that the pollutant is neither present nor expected to be present in the discharge, is present only at background levels from intake water, and there will be no increase in the pollutant due to activities of the industrial user. See Tennessee Rule 0400-40-14-.12(5)(b). This authorization is subject to the following conditions:

1. The waiver may be authorized where a pollutant is determined to be present solely due to sanitary wastewater discharged from the facility, provided that the sanitary wastewater is not regulated by an applicable categorical standard and otherwise includes no process wastewater.

2. The monitoring waiver is valid only for the duration of the effective period of the individual control mechanism, but in no case longer than five years. The user must submit a new request for the waiver before the waiver can be granted for each subsequent control mechanism.

3. In making a demonstration that a pollutant is not present, the industrial user must provide data from at least one sampling of the facility's process wastewater prior to any treatment present at the facility that is representative of all wastewater from all processes.

4. The request for a monitoring waiver must be signed by an authorized representative of the user and include the certification statement in [section] 13-24-30(J)(3). See 40 C.F.R. § 403.6(a)(2)(ii) and Tennessee Rule 0400-40-14-.06(1)(b)2.

5. EPA and TDEC have determined that, where the lowest minimum detection level for a pol-

lutant as set forth in 40 C.F.R. Part 136 has been used in the analysis, it is appropriate to equate a non-detectable sample result as demonstrating that a pollutant is not present.

6. In order for a monitoring waiver approval by the control authority to be effective, it must be included as a condition in the user's discharge permit.

7. Upon approval of the monitoring waiver and revision of the user's control mechanism by the control authority, the industrial user must certify on each report with the statement in section 13-24-30(J)(3) that there has been no increase in the pollutant in its wastestream due to activities of the industrial user.

8. In the event that a waived pollutant is found to be present or is expected to be present because of changes that occur in the industrial user's operations, the industrial user must immediately comply with the monitoring requirements as set forth in section 13-24-30(E) or other more frequent monitoring requirements imposed by the control authority and notify the control authority.

9. This provision does not supersede certification processes and requirements established in categorical pretreatment standards, except as otherwise specified in the categorical pretreatment standard.

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-43. General and specific prohibitions.

A. General prohibition against interference and pass-through. No person shall introduce into the POTW any pollutant(s) which cause pass-through or interference. This prohibition and the specific prohibitions in subsections (B)(1) through (11), below, apply to each person introducing pollutants into the POTW, whether or not the person is subject to other National Pretreatment Standards or any national, state, or local pretreatment requirements.

B. Specific prohibitions. No person shall discharge, or cause to be discharged, any of the following to the city's POTW (including the city's sewers):

1. Petroleum oil (e.g., gasoline, benzene, naptha, fuel oil, diesel fuel, jet fuel, or kerosene), nonbiodegradable cutting oil, products of mineral oil origin, or any other pollutant: (i) which causes interference or pass-through, (ii) creates a fire or explosion hazard in the POTW, including, but not limited to, wastewater with a closed cup flashpoint of less than 140° Fahrenheit or 60° Celsius using the test methods specified in 40 C.F.R. § 261.21, as determined by a Pensky-Martens Closed Cup Tester, using the test method specified in ASTM Standard D-93-79 or D-93-80 or a Setaflash Closed-Cup Tester, using the test method specified in ASTM Standard D-3278-78, and/or (iii) pollutants which cause an exceedance of ten percent of the lower explosive limit (LEL) at any point within the POTW.

2. Pollutants, including toxic or poisonous solids, liquids, vapors, or gases in sufficient quantity, either singly or by interaction with other wastes, to result in the presence of toxic gases, vapors, or fumes within the WWTP in a quantity that may injure personnel, cause workers to have acute health or safety problems, cause fires, explosions, interfere with any sewage or wastewater treatment process or any sanitary sewer system, constitute a hazard to humans or animals, threaten the public health or safety, create a public nuisance, or create any hazard in the receiving waters of the sewage or wastewater treatment plant.

3. Pollutants in violation of a pH minimum limit, i.e., having a pH lower than 5.5 standard units.

4. Pollutants with corrosive properties capable of causing damage or hazard to the structures, equipment, conveyances, and personnel of the sewerage works or interfering with the operation of the treatment facility.

5. Wastewaters in violation of a pH maximum limit, i.e., having a pH higher than 10.0 standard units unless prior approval of a higher limit is approved by the City of Memphis, Division of Public Works, and set forth in a discharge permit. In order to discharge a pH above 10.0 standard units, the city may require the user to submit a study identifying, among other things, the flow and pH concentrations requested, an estimate of the duration the discharge will exceed 10.0 standard units, the potential impacts of the high pH on the sewer system, lift

stations, WWTP or any other part of the POTW, and such other information as the city may request. In no event shall a user discharge a pH equal to or over 11.5 s.u.

6. Wastewaters exceeding the hydroxide loadings set forth in a discharge permit, as applicable.

7. Solid, viscous, or foaming substances in quantities of such size or amount as to reasonably raise a concern to the city of the potential to cause obstruction to the flow in sewers, overflows, Interference with the proper operation of the wastewater facilities, or cause a violation of the POTW's NPDES permit. This prohibition includes, but is not limited to, the discharge of user's, foaming agents, paper pulp, clays, ashes, bones, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, oil, grease, underground garbage, whole blood, paunch manure, hair and fleshing, wipes, bed pads, cotton tips, tissues, entrails, paper dishes, cups, Styrofoam, milk containers, etc., either whole or ground by garbage grinders. Should blood, tissue, or other prohibited body parts be unavoidably discharged into the sanitary sewer, then such discharge must be accompanied by or immediately followed with a liquid disinfectant; such disinfectant may include bleach.

8. Any trucked or hauled pollutants, except at discharge points designated by the control authority.

9. Any pollutant, including oxygen-demanding pollutants (e.g., BOD, etc.), released at a flow rate and/or pollutant concentration which will cause interference.

10. Any wastewater having a temperature which will inhibit biological activity in the WWTP resulting in interference, but in no case wastewater with a temperature resulting in the temperature at the introduction into the WWTP which exceeds 40°C (104° F) unless approved by the control authority.

11. Any wastewater or waste into street inlets or sewer manholes.

C. pH Limits. The pH discharge limit is an instantaneous reading of any discharge into the sanitary sewer and not an average of any kind. In addition to standard units, the city may establish limits on pH based upon the hydroxide loading.

D. *Limits on other corrosive pollutants*. The city may establish limits in a discharge permit on other pollutants (e.g., chloride and sulfates), as the city deems necessary to prevent corrosion to the collection system or other parts of the POTW.

E. *Dilution prohibition*. No industrial user shall ever increase the use of process water, or in any way attempt to dilute a discharge, as a partial or complete substitute for adequate treatment to achieve compliance with a discharge limitation unless expressly authorized by an applicable pretreatment standard or pretreatment requirement or, in the case of other discharge limitations (e.g., local limits), unless expressly authorized by the control authority.

F. *Safe harbor affirmative defense*. A user shall have an affirmative defense in any action brought against it alleging a violation of the general prohibitions established in subsection (A) of this [section] and the specific prohibitions in subsections (B)(1), (2), (6) and (7) where the user can demonstrate that:

1. It did not know, or have reason to know, that its discharge, alone, or in conjunction with a discharge or discharges from other sources, would cause pass-through or interference, and a local limit designed to prevent pass-through and/or interference, as the case may be, fits one of the following descriptions:

   a. The local limit for that pollutant is established in section 13-24-44(C) for each pollutant in the user's discharge that caused pass-through or interference, and the user was in compliance with each such local limit directly prior to and during the pass-through or interference; or

   b. The local limit has not been established in section 13-24-44(C) for the pollutant(s) that caused the pass-through or interference, the user's discharge directly prior to and during the pass-through or interference did not change substantially in nature or constituents from the user's

prior discharge activity when the WWTP was regularly in compliance with the WWTP's NPDES permit requirements and, in the case of interference, applicable requirements for sewage sludge use or disposal.

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-44. Certain discharge restricted, local limits, etc.

A. *Restricted discharges*. Except as otherwise specifically authorized by the control authority in writing, no person shall discharge or cause to be discharged the following described pollutants, substances, materials, wastewaters, and/or wastes. The limitations or restrictions of materials or characteristics of waste or wastewaters discharged to the sanitary sewer, shall not be violated without a variance being granted. The following are restricted discharges to the POTW:

1. Any liquid or vapor having a temperature higher than 150 degrees Fahrenheit (65 degrees Celsius).

2. Any wastewater or waste containing fats, wax, grease, or oils in excess of 100 milligrams per liter (mg/l) or containing substances which may solidify or become viscous at temperatures between 32 and 150 degrees Fahrenheit (zero (0) and 65 degrees Celsius). This 100 mg/l standard applies to hydrocarbons, whether measured as: (i) petroleum oil, nonbiodegradable cutting oil, or products of mineral oil origin, (ii) animal or vegetable origin, or (iii) total hydrocarbons.

3. Any waste that has not been properly shredded. The installation and operation of any waste grinder equipped with a motor of three-fourths (0.75) horsepower or greater shall be subjected to the review and approval of the control authority.

4. Any wastewaters or wastes containing strong acid, iron pickling wastes, or any waters or wastes containing concentrated plating solutions whether neutralized or not, except by written permission of the control authority.

5. Any wastewater or wastes (e.g., contaminated waters, rinse waters, etc.) containing iron, chromium, copper, lead, mercury, zinc, other heavy metals or toxic substances to such degree that any such discharge exceeds the local limits established by the control authority unless a variance is obtained.

6. Any wastewater or wastes containing phenols and/or chlorophenols, to such degree that any such discharge in the composite sewage at the WWTP exceeds the limits established by the control authority.

7. Any radioactive wastes or isotopes of long half-life (over 100 days) without special permit. The radioactive isotopes (I 131 and P 32) used at hospitals are not prohibited if properly diluted at the source.

8. Materials, which exert or cause:

   a. Concentrations of inert suspended solids (such as, but not limited to, clays, fibers, fuller's earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate), which is reasonably anticipated to cause obstruction to the flow in sewers, damage to the sewer system, or interference.

   b. BOD, chemical oxygen demand, or disinfection requirements in such quantities as to constitute interference.

9. Wastewater containing objectionable substances, which are not readily amenable to treatment or reduction by the sewage treatment processes employed.

10. Any wastewater that may cause the wastewater treatment facility effluent or any product of the treatment process, residues, biogas, sludges, or scums to be unsuitable for reclamation and reuse or to interfere with the reclamation process.

11. Any wastewater that could have a detrimental environmental impact or create an objectionable color, foam, or nuisance in the waters of the state.

12. Any wastewater that could cause excessive collection or treatment costs or may use a disproportionate share of the POTW.

13. Any wastewater, which causes hazard to human life or creates a public nuisance.

14. Any wastewater containing hydraulic fluid, brake fluid, transmission fluid, steering fluid, motor oils, or lubricants removed from vehicles or other machinery except to the extent that there is a de minimis amount after having gone through an oil/water separator or other treatment device.

15. Any wastewater where there is a significant likelihood of producing toxic effects to the biota in the receiving water of the POTW's effluent.

16. Any hazardous waste as classified or characterized under the Resource, Conservation, and Recovery Act (RCRA), 40 C.F.R. Part 261. This prohibition does not apply if the domestic sewage exemption as set forth in 40 C.F.R. § 261.4(a)(1) would be applicable.

17. Any wastewater or waste from an EPA Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) site, unless approved by the U.S. Environmental Protection Agency in writing and the city (subject to the city's sole discretion).

B. *Discharge that potentially interferes with plant operations.* When it is determined by the control authority that a user is discharging wastewater so as to potentially interfere with the operation or efficacy of the POTW then the control authority may develop effluent limitation(s) (including a prohibition) for such user to correct the concern and/or take such other action as the city deems appropriate.

C. *Local limits.*

1. The control authority is authorized to establish local limits for pollutants discharged to the POTW pursuant to Tennessee Rule 0400-40-14-.05(3). Local limits may be reviewed and revised as deemed appropriate by the control authority. The local limits may be implemented as concentration and/or mass limits, as permitted or required under applicable state or Federal rules and regulations. When mass limits are used, continuous flow monitoring of the discharge flows may be required. Daily discharge flow volumes and monthly average discharge flows measured shall be reported and used to calculate pollutant mass discharge for each day of discharge, the calendar monthly average discharge, and the daily maximum discharge for the calendar month.

2. The following local limits apply to all users discharging into the city's POTW (including the sewer system) unless subject to a variance under subsection (d), below, or superseded by local limits subsequently adopted by the division of public works and approved by TDEC, with the notice of such local limits set forth on the division of public works (e.g., website at www.memphistn.gov). Such subsequent local limits may also include limits on additional pollutants beyond those identified below. Compliance with all local limits (including those identified on the above identified website) is required regardless of whether a person is issued a permit.

TABLE I
LOCAL LIMITS FOR DISCHARGE INTO THE MUNICIPAL SEWERAGE SYSTEM

Constituent	*Daily * Maximum Limit Concentration mg/l*	*Instantaneous Maximum Limit** Concentration mg/l*
Biochemical Oxygen Demand	(1)	(1)
Settleable Solids (ml/l)	(1)	(1)
Total Suspended Solids	(1)	(1)
Nitrogen (total Kjeldahl)	(1)	(1)
Arsenic	1.0	2.0
Cadmium (total)	(2)	(2)
Chromium (hexavalent)	1.0	2.0
Chromium (total)	5.0	10.0
Copper (total)	5.0	10.0
Cyanide (oxidizable) ***	2.0	4.0
Cyanide (total) ***	4.0	8.0
Lead (total)	(2)	(2)
Mercury	(2)	(2)
Nickel (total)	5.0	10.0
Zinc (total)	5.0	10.0

Constituent	*Daily * Maximum Limit Concentration mg/l*	*Instantaneous Maximum Limit** Concentration mg/l*
Ammonia NH3-N	125 ppm	250 ppm

* See definition of "Daily Maximum Limit."

** See definition of "Instantaneous Limit" providing for noncompliance to be determined by use of a grab sample or a composite sample, as applicable.

*** Cyanide samples are required to be collected as grab samples.

(1) Effluent Limits and/or action levels may be established for these pollutants.

(2) Cadmium, mercury, and lead discharges are severely restricted due to limitations placed on the disposal of sewage sludge containing cadmium, mercury, and/or lead. Actual allowable discharge concentrations for these constituents will be determined on a case-by-case basis.

D. *Potential variances*. The city, subject to its discretion, may grant a variance for a user's local limits, as it deems appropriate. Notwithstanding such authority, nothing herein shall be deemed to entitle a user to a variance.

1. Consideration of variances to the Local Limits may be based on consideration of any of the following criteria:
   a. Age, location, land availability, and type of manufacturing processes employed;
   b. Total mass of pollutant discharged by the industry;
   c. Volume of industrial waste in proportion to the total wastewater flow in the system;
   d. Energy requirements of the application of control and treatment technology, but only if the discharger demonstrates that less energy consumptive alternative control technology is not available;
   e. Removal efficiency of the receiving WWTP to effectively treat the pollutant, and potential to cause interference or pass-through of the WWTP treatment process;
   f. Available pollutant treatment capacity at the receiving WWTP;
   g. Potential threat to the health and safety of sewer workers;
   h. Protection of biosolids produced at the receiving WWTP;
   i. Interim measures that can be undertaken to reduce the discharge of the pollutant(s) of concern;
   j. Costs and schedule associated with installing additional pretreatment to meet the limits; and/or
   k. Such other factors as the control authority deems appropriate.
2. In no case shall a variance be granted for those parameters defined by Federal Pretreatment regulations as general and specific prohibitions at 40 C.F.R. §§ 403.5(a) and (b) (see sections 13-24-43(A) and (B)), or that would violate applicable categorical standards.

E. *Discharge of specific pollutants restricted*. No user or other person shall discharge wastewater containing any of the pollutants listed herein into the municipal sewer system or shall otherwise allow any wastewater to enter the municipal sewer system containing any of the listed pollutants without obtaining written approval from the control authority.

Individual Pollutants	*Groups of Pollutants*
O,M,P-Xylenes	a) Total Polychlorinated Biphenyls (PCBs), Arochlor compounds
1,1-Dichloroethlyene	
1,2 trans,dichloroethylene	(b) Herbicides and Pesticides, including, but not limited to:
3,3-Dichlorobenzidene	Aldrin
Beryllium	Chlordane
Bromodichloromethane	Demeton
Dimethylnitrosamine	Dieldrin
Ethyl benzene	Endosulfan I
O-Dichlorobenzene	Endosulfan II
Tin	Endosulfan sulfate
1,1,1,2-Tetrachloroethane	Endrin
1,1,2-Trichloroethane	Endrin aldehyde
1,1-Dichloroethane	Guthion
1,1-Dichloropropane	Heptachlor
1,2,3-Trichloropropane	Heptachlor epoxide
1,2-Cis,dichloroethylene	Hexachlorocyclo-hexane

Individual Pollutants	*Groups of Pollutants*
1,2-Dibromo-3-Chloro-propane	Hexachlorocyclopentadi-ene
1,2-Dichloroethane	Lindane
1,2-Dichloropropane	Mirex
1,3-Dichloropropane	Methoxychlor
1,3-Dichloropropene	Parathion
1,4-Dichlorobenzene(p)	4,4-DDD
2,2-Dichloropropane	4,4-DDE
2,4-Dinitroluene	4,4 DDT
2,4-Dinitrophenol	Alpha BHC, Beta BHC, Delta BHC, or Gamma BHC
2-butanone (MEK)	Tetrachlorodiphenyle-thane (TDE)
2-Chlorophenol	Toxaphene
4-methyl-2-pentanone (MIBK)	
Acetone	(c) Total Dioxin
Acrylonitrile	
Aluminum	
Barium	
Benzo (a) pyrene	
Benzotrichloride	
Bromobenzene	
Bromoform	
Chlorobenzene	
Chlorodibromomethane	
Chloroethane	
Chloroform	
Cumene	
Dichloroethylether(Bis(2-chloroethyl)	
Diisobutylenes	
Hexachlorobenzene	
Hexachlorobutadiene	
Hexane	
Isopropylbenzene	
M-Dichlorobenzene	
Molybdenum	
O-Chlorotoluene	
Para-Dichlorobenzene	
P-Chlorotoluene	
Phenanthrene	
Pyrene	
Titanium	
Toluene	
Vinyl chloride	

The control authority reserves the right to modify this list of pollutants restricted from entering the POTW as may become necessary to protect the POTW from interference and pass-through or as the city otherwise deems appropriate. This may be undertaken by the city providing an updated list of restricted pollutants on the city website or in any other manner that provides a discharger notice.

F. *Fifteen percent of maximum allowable loading limitation*. Unless otherwise agreed to in writing by the control authority, no user shall discharge a mass loading of any compound or pollutant, which has a local limit, of more than 15 percent of the maximum allowable industrial loading (MAIL) of that compound or pollutant as calculated from current local limits. The city may impose a 15 percent limit on pollutants based upon the rated capacity of the WWTP.

G. *Best management practices*. The city may develop best management practices (BMPs), by ordinance or in individual and/or general wastewater discharge permit, to implement local limits and such other requirements, as it deems appropriate. The city may decide not to apply a local limit to user(s) that are subject to a best management practice designed to address that pollutant. (Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-45. Discretionary actions of control authority with respect to restricted discharges.

A. *Potential options for acceptance of wastewater*. If any waters or wastes are discharged or are proposed to be discharged to the public sanitary sewers, which waters contain substances or possess characteristics which, in the judgment of the control authority, are incompatible with the capacities of the publicly owned treatment works (including the collection system) and/or may have a deleterious effect upon the sewerage works, processes, sludge use, equipment, or receiving waters, or which otherwise may create a hazard to life or constitute a public nuisance, the control authority may undertake such action(s) as it deems appropriate, including but not limited to of the following: (1) Reject the wastes; (2) Require pretreatment or an acceptable condition for discharge to the public sanitary sewers; (3) Require control over the quantities and rate of discharge; and/or (4) Require payment to cover the added cost of handling and treating the wastes as provided in [chapter 13-28].

B. *Flow and other associated requirements*. The city, in response to potential capacity concerns associated with the collection system, wastewater treatment plant, and/or pumping/lift station, or for other good cause, may impose flow limits including limitation on the hours that flows may enter the sewer system (e.g., limiting the discharge of wastewater and/or domestic wastewater to off-peak hours), may require any user to install on-site storage as a condition to connect or increase flow, and/or may impose such other conditions as the control authority deems appropriate. Such conditions may be set by the control authority in a control mechanism (e.g., permit, letter of approval, or conditional letter of approval). No person shall violate the conditions established by the control authority set forth in a control mechanism issued by the control authority.

C. *Control authority review of pretreatment system*. If the control authority permits the pretreatment or equalization of waste flows, the design and installation of any new process pretreatment or flow equalization system installed in connection therewith shall, upon request from the city, be subject to the review and/or approval of the control authority. The City of Memphis does not by its approval of any of the designs, installation, or the construction of the plans and equipment or any of the information or plans submitted by the permittee, warrant or aver in any manner that the permittee's implementation of such measures will result in compliance with the applicable pretreatment requirements. Notwithstanding such review and/or approval, compliance with Federal, state, and local law (including this chapter and/or a discharge permit) is the sole responsibility of the user. In no event shall the City of Memphis be deemed liable for any user actions based upon the city's review and/or approval of user documents.

D. *Use of interceptors, traps and/or separators.* Interceptors, traps, and/or separators shall be provided by industrial and commercial dischargers (in addition to those cases otherwise specified in this chapter) when, in the opinion of the control authority, they are necessary for the proper handling of water or waste containing such materials as fats, oils, greases, sand, or flammable reactive or corrosive liquids, substances which may solidify or become viscous in the system, or other harmful ingredients. In maintaining interceptors, traps, and separators, the owner shall be responsible for the proper removal and disposal by appropriate means of the captured material and shall maintain records of the waste manifests, laboratory reports, chain-of-custodies, any field reports, log sheets, field test data (e.g., pH, temperature, ammonia, or chlorine), dates, and means of disposal, which are subject to review by the control authority. Any removal and hauling of the collected materials not performed by the owner's personnel must be performed by waste transport and disposal firms and must be documented by the facility. Any transport to a Memphis WWTP or to a designated discharge point must be undertaken by a city approved waste transport firm.

E. *Removed substances*. Except as provided by subsection (D) above, or otherwise approved in a discharge permit or in writing by the City of Memphis, division of public works, removed substances, such as solids removed from liquid wastestreams, sludges, filter backwash, or other residuals removed in the course of treatment or control of wastewater, shall be disposed of in a manner such as to prevent such material from entering the sewer system and waters of the state.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-46. Proper operation and maintenance/ maintenance and inspection of pretreatment or flow equalization facilities, bypass and upset.

A. *Proper operation and maintenance*. The user shall, at all times, properly operate and maintain all pretreatment facilities and systems of treatment and control (and related appurtenances) which are installed or used by the industrial user to achieve and monitor compliance with pretreatment standards and pretreatment requirements. This includes adequate laboratory controls and appropriate quality assurance procedures, the operation of back-up or auxiliary facilities, or similar systems which are installed by the industrial user only when the operation is necessary to achieve compliance. Except as provided by 13-24-46(C), the intentional diversion of waste streams from any portion of the industrial user's treatment facility is prohibited. In no event shall the diversion of waste streams from any portion of the user's treatment facility cause interference or pass-through.

B. *Pretreatment and/or flow equalization*. Where pretreatment or flow equalization facilities are required for any water or wastewater, they shall be maintained continuously and satisfactorily and in effective operation by the owner at his expense and shall be subject to

periodic inspection by the control authority. The owner or operator shall maintain and make available, as requested, operating records as prescribed by the control authority.

C. *Bypass.*

1. For the purposes of this section,

   a. Bypass means the intentional diversion of wastestreams from any portion of a user's treatment facility or around required metering or sampling equipment.

   b. Severe property damage means substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.

2. A user may allow any bypass to occur which does not cause pretreatment standards or pretreatment requirements to be violated, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the provision of subsections (3) and (4) of this section.

3. Bypass notifications.

   a. If a user knows in advance of the need for a bypass, it shall submit prior notice to the control authority, at least ten days before the date of the bypass, if possible.

   b. A user shall submit oral notice to the control authority of an unanticipated bypass that exceeds applicable pretreatment standards within 24 hours from the time it becomes aware of the bypass. A written submission shall also be provided within five days of the time the user becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass. The control authority may waive the written report on a case-by-case basis if the oral report has been received within 24 hours.

4. Bypass.

   a. Bypass is prohibited, and the control authority may take an enforcement action against a user for a bypass, unless bypass was unavoidable to prevent loss of life, personal injury, or severe property damage; there were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime; and the user submitted notices as required under subsection (3) of this section. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass, which occurred during normal periods of equipment downtime or preventive maintenance.

   b. The control authority may approve an anticipated bypass, after considering its adverse effects, if the control authority determines that it will meet the three conditions listed in [subsection] (4)(A) of this section.

   c. In no event shall the diversion of flows cause the city to violate its NPDES permit(s). Notwithstanding any provision to the contrary, bypass shall not be a defense to causing interference or pass-Through.

D. *Upset.*

1. For the purposes of this section, upset means an exceptional incident in which there is unintentional and temporary noncompliance with categorical pretreatment standards because of factors beyond the reasonable control of the user. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

2. An upset shall constitute an affirmative defense to an action brought for noncompliance with categorical pretreatment standards if the requirements of subsection (3), below, are met. An upset is not an affirmative defense for violation of any other requirement (e.g., general and specific prohibitions, local limits).

3. A user who wishes to establish the affirmative defense of upset shall demonstrate through properly signed, contemporaneous operating logs or other relevant evidence that:

   a. An upset occurred and the user can identify the cause(s) of the upset;

   b. The facility was, at the time being operated, in a prudent and workman-like manner and in compliance with applicable operation and maintenance procedures; and

   c. The user has submitted the following information to the control authority within 24 hours of becoming aware of the upset (and, if this information is provided orally, a written submission must be provided within five days) that includes: a description of the indirect discharge and cause of noncompliance; the period of noncompliance, including exact dates and times or, if not corrected, the anticipated time the noncompliance is expected to continue; and steps being taken and/or planned to reduce, and prevent recurrence of the noncompliance.

4. In any enforcement proceeding, the user seeking to establish the occurrence of an upset shall have the burden of proof.

5. Review of whether an event meets the upset criteria is available to a user only in the context of an enforcement action brought for noncompliance with categorical pretreatment standards.

E. *Reduction in production required as necessary to achieve compliance.* Users shall control production to the extent necessary to maintain compliance with discharge limitations upon reduction, loss, or failure of its treatment facility until the facility is restored or an alternative method of treatment is provided. This requirement applies in the situation where, among other things, the primary source of power of the treatment facility is reduced, lost, or fails.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-47. Monitoring, control facilities for sampling and observation of industrial and commercial wastes/flow monitoring and repeat monitoring.

A. *Installation of control facility*. When required by the control authority, the owner or operator of any industrial, commercial property, any new or expanded development (including developments discharging only domestic flow), or facility serviced by a sewer, shall install a suitable control facility for sampling together with such necessary equipment, which could include: meters, instruments, refrigerated samplers, connections such as contact closures or flowmeter output to drive flow-proportional composite sampler, digital read-outs, data-loggers, recorders, and other appurtenances, in the sewer to facilitate observation, sampling, measurement, and recording of the wastes and discharge and/or domestic flows.

B. *Monitoring manhole and related provisions*. Unless otherwise required by the city and/or federal or State regulations, all regulated and permitted non-domestic waste from the property or facility shall be discharged through the control facility or facilities, as applicable, after any pretreatment of the waste. Unless otherwise required by the city, those industries with a permitted average daily maximum BOD_5 or TSS of 10,000 pounds per day or greater and/or with a permitted average daily maximum discharge flow of 700,000 gallons per day or greater and/or as deemed necessary by the control authority to monitor other permitted pollutants shall install a monitoring manhole. The facility, when required, shall be accessible and safely located, and shall be constructed in accordance with plans approved by the control authority. The facility shall be installed by the owner at his expense and shall be maintained by him so as to be safe and accessible at all times. Plans for such facilities for the installation of control and related equipment must be reviewed and/or approved by the control authority before construction is begun.

C. *Calibration.* The user shall ensure that all monitoring, analytical, and sampling equipment used to monitor flow or analyze pollutants discharged under a permit are periodically calibrated and maintained at intervals which

ensure the accuracy and reliability of measurements, and when required by the control authority, the user shall provide written documentation and certification of the calibrations.

D. *Flow monitoring maintenance and calibration logs*. When the measurement or reporting of discharge flow is required, appropriate effluent flow measurement devices and methods consistent with accepted scientific and engineering practices shall be selected and used to ensure the accuracy and reliability of measurements of the volume of monitored discharges. The City of Memphis may require that the entire flow measuring system be designed, stamped, signed, constructed, and installed under the direct supervision of a Tennessee State Licensed Professional Engineer. The devices shall be installed, calibrated, and maintained to ensure that the accuracy and reliability of the measurements are consistent with the accepted capabilities of the device and in accordance with the device manufacturer. The flow measuring devices shall be capable of measuring flows with a maximum deviation of less than plus or minus five percent from the true discharge rates throughout the range of expected discharge flows (i.e., from the highest peak flow to the minimum flow) using no less than three calibration points, unless otherwise approved by the control authority. The flow measuring device shall be calibrated and maintained at the expense of the permittee as often as recommended by the device manufacturer or at least annually, whichever is more frequent. The city, subject to its discretion, may require a user to have a qualified third-party undertaking calibration. If the flow measuring device can be tested and certified to prove accuracy of ± five percent, then recalibration is not required. Calibration reports and/or verification reports shall be submitted as required by the city. The permittee shall maintain written maintenance and calibration logs for the flow measuring device, which will include at least the following information:

1. Name of permittee's facility;
2. Name, signature, and affiliation of person(s) performing maintenance and/or calibration;
3. Device type, manufacturer, model, and serial number;
4. Date and time of maintenance and/or calibration;
5. Description of maintenance and/or calibration;
6. Whether the maintenance and/or calibration was routine or due to problem with device, with brief explanation;
7. Whether or not it was likely that the device was producing accurate flow readings before maintenance and/or calibration, with brief explanation; and
8. Whether and/or not it is likely that the device is producing accurate flow readings after maintenance or calibration, with brief explanation.

E. *Flow monitor calibration report*. The permittee shall submit a flow measuring device calibration certification letter to the control authority within 30 days, or such alternative time established by the control authority, of initial permitted sewer discharge and all subsequent letters before June 30th every year thereafter. Any user first subject to this requirement shall submit the certification June 30th of every year it discharges. If required by the City of Memphis, each of these letters must be certified by either: (i) the manufacturer that calibrated the meter or (ii) both a Tennessee State Licensed Professional Engineer and a responsible corporate officer. The flow measuring device calibration reports shall include at least the following information:

1. Name of permittee's facility;
2. Location and ID of the device;
3. Device type, manufacture, model, serial number, and size;
4. Total range capacity of the device;
5. Maximum range used at the facility;
6. Minimum of three calibration points evenly spaced within the maximum range used at the facility to determine accuracy of the device (e.g., 0%, 25%, 50%, 75% and 100%; 4 mA, 8 mA, 12 mA, 16 mA and 20 mA; or 0 GPM, 200 GPM, 400 GPM, 600 GPM and 800 GPM when the maximum range is 800 GPM);
7. Final accuracy of device at each of the calibration points used;
8. Date of calibration;
9. Name of person performing the calibration; and,

10. Name and signature of certifying Tennessee State Licensed Professional Engineer (if required) or other appropriate third-party approved by the control authority.

F. *Monitoring instrumentation calibration and maintenance*. Instrumentation used for self-monitoring (e.g., pH monitoring) shall be calibrated and maintained at least as often as recommended by the manufacturer and shall be calibrated and maintained more frequently when necessary to maintain instrument reading accuracy and reliability within acceptable error limits based upon the manufacturer's specifications. The permittee shall maintain a maintenance and calibration log for each instrument, which would include at least the following information:

1. Name of permittee facility;
2. Name, signature, and affiliation of person(s) performing maintenance and/or calibration;
3. Instrument type, manufacturer, model, and serial number;
4. Date and time of maintenance and/or calibration;
5. Description of maintenance and/or calibration;
6. Whether the maintenance and/or calibration was routine or due to problem with the instrument, with brief explanation;
7. Whether or not it was likely that the instrument was producing accurate readings before maintenance and/or calibration, with brief explanation; and
8. Whether or not it is likely that the instrument is producing accurate readings after maintenance and/or calibration, with brief explanation.

G. *Repeat monitoring*. If sampling performed by an industrial user indicates a violation, the industrial user shall notify the control authority within 24 hours of becoming aware of the violation. The industrial user shall also repeat the sampling and analysis and submit the results of the repeat analysis to the city within 30 days after becoming aware of the violation (or sooner if so directed by the control authority or its designee). Repeat sampling within 30 days of a violation under this section need not be undertaken if the control authority undertakes sampling and indicates in writing to the industrial user that such repeat sampling is not required.

H. *Toxicity testing/toxicity reduction evaluation*. The user shall undertake effluent toxicity testing as required by the authority, using the test procedures and methodology specified by the authority. In the event toxicity is indicated, the user shall undertake a toxic reduction evaluation and take steps to reduce toxicity, as required by the City of Memphis and/or the control authority. (Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-48. Measurement and testing methods.

A. *Analytical requirements*. All pollutant analyses, including sampling techniques, to be submitted as part of a discharge permit application or report(s) shall be performed in accordance with the techniques prescribed in 40 C.F.R. Part 136 and amendments thereto, unless otherwise specified in an applicable categorical pretreatment standard. If 40 C.F.R. Part 136 does not contain sampling or analytical techniques for the pollutant in question, or where the EPA determines that the Part 136 sampling and analytical techniques are inappropriate for the pollutant in question, sampling and analyses shall be performed by using validated analytical methods or any other applicable sampling and analytical procedures, including procedures suggested by the control authority or other qualified parties approved by EPA.

B. *Representative sample collection.* Samples collected to satisfy reporting requirements must be based on data obtained through appropriate sampling and analysis performed during the period covered by the report and be based on data that is representative of conditions occurring during the reporting period. The control authority, subject to its sole discretion, may undertake all or part of the sampling and/or analysis otherwise required by the SIU in lieu of requiring the SIU to undertake the minimum sampling.

1. Except as indicated in subsections (B)(2) and (3) below, the industrial user must collect wastewater samples using 24-hour flow-proportional composite sampling techniques, unless time-proportional composite sampling or grab sampling is authorized by the control authority. Where time-proportional composite sampling or grab sampling is authorized by the control authority, the samples must be representative of the discharge. Using protocols (including appropriate preservation) specified in 40 C.F.R. Part 136, multiple grab samples collected during a 24-hour period may be composited prior to the analysis as follows: for cyanide,

total phenols, and sulfides the samples may be composited in the laboratory or in the field; for volatile organics and oil and grease, the samples may be composited in the laboratory. Composite samples for other parameters unaffected by the compositing procedures as documented in approved EPA methodologies may be authorized by the control authority, as appropriate. Notwithstanding anything to the contrary, grab samples may be required to show compliance with instantaneous limits.

2. Samples for oil and grease, temperature, pH, cyanide, total phenols, sulfides, and volatile organic compounds must be obtained using grab collection techniques.

3. For sampling required in support of baseline monitoring report and 90-day compliance reports, a minimum of four grab samples must be used for pH, cyanide, total phenols, oil and grease, sulfide, and volatile organic compounds for facilities for which historical sampling data do not exist; for facilities for which historical sampling data are available, the control authority may authorize a lower minimum. For the self-monitoring reports required by 13-24-30(E), the industrial user is required to collect the number of grab samples necessary to assess and assure compliance with applicable pretreatment standards and pretreatment requirements.

4. Chain-of-custody forms must be filled out and maintained in the user's files for a period of at least three years. Upon request of the control authority, the chain-of custody forms shall be submitted to the city.

C. *Approval required to change sampling locations*. The control authority may specify user monitoring points. In such a case, compliance monitoring points shall not be changed without the approval of the control authority.

D. *Monitoring and flow measurement facilities*. Wastewater monitoring and flow measurement facilities shall be properly operated, kept clean, and maintained in good working order at all times. The failure of a user to keep its monitoring facility in good working order shall not be grounds for the user to claim that non-compliant sample results are not representative of its discharge.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-49. Accidental and slug discharges.

A. Authority to require development of a plan. The control authority may require a user to develop a plan to provide protection from accidental and/or slug discharge of prohibited materials or other substances regulated by these regulations. Any facilities to prevent accidental and/or slug discharge of prohibited material shall be provided and maintained at the user's own cost and expense.

B. Minimum requirements for SIU slug control plans. If a significant industrial user is required to develop a slug control plan by the control authority, the plan shall contain, at a minimum, the following elements:

1. Detailed descriptions of discharge practices, including routine and non-routine batch discharges;

2. Detailed descriptions of stored chemicals, and/or stored waste;

3. Procedures for immediately notifying the POTW of slug discharge, including any discharges that would violate a prohibition under section 13-24-43, with procedures for follow-up written notification within five days;

4. If necessary, procedures to prevent adverse impact from accidental spills, including inspection and maintenance of storage areas, handling and transfer of materials, loading and unloading operation, control of plant site run-off, worker training, building of containment structures or equipment, measures for containing toxic organic pollutants (include solvents), and/or measure and equipment for emergency response.

C. Additional potential requirements for SIU slug control plans. Upon notice from the control authority, an SIU shall submit the following additional information in a Slug control plan as indicated in the control authority's notice:

1. Material safety data sheets, when applicable;

2. Best management practices to prevent, control, and cleanup releases of chemicals, materials, and/or wastes;

3. If necessary, engineering practices (e.g., temporary storage) to assure that interference or pass-through does not occur;

4. Employee education;

5. Adequate storage or other practices (e.g., trucking the waste off-site for disposal) to assure that potential batch discharges (whether wastewater or off-specification product) will not interfere with the operation of the POTW (including the collection system); and

6. Such other requirements as the control authority deems appropriate.

D. Potential requirements for Non-SIU slug control plans. The control authority may require a non-SIU to develop a Slug control plan containing such requirements as set forth in section 13-24-49(B) and (C) as the control authority deems appropriate.

E. Control authority approval of slug control plan. Subject to the control authority's discretion, a user may be required to submit a plan to the control authority for approval. Failure to submit a slug control plan to the control authority, meeting the requirements of section 13-24-49, may subject the user to an enforcement action.

F. Notice to potentially avoid downstream problem at POTW. In order to ensure the integrity of the wastewater treatment plant at a high level and protect the treatment process from unacceptable flows, any user facility at which an accidental spill occurs or any person causing an accidental spill that may enter the sewer system, shall notify the POTW as soon as reasonably possible by telephone and e-mail as to the spill's nature, relating its location, quantity, duration of event, the time of such spill, and corrective action, so that further action may be taken at the wastewater treatment plant to deal with any problems which the incoming flow may create. The applicable e-mail and telephone numbers for notification are as follows:

- Stiles Wastewater Treatment Plant: 901-636-4300

- Maxson Wastewater Treatment Plant: 901-789-0510

- E-Mail: pretreatment@memphistn.gov

G. *Written notice*. See section 13-24-30(I) regarding reporting of, among other things, accidental discharges or slug discharges.

H. *Notice to employees*. A notice shall be permanently posted on the industrial user's bulletin board(s) or other prominent places advising employees who to call in the event of a dangerous discharge. Employers shall ensure that all employees who become aware of a slug discharge occurring are advised of the emergency notification procedure.

I. *Closure plan*. In the event a significant industrial user will be terminating its discharge on a temporary or permanent basis, the discharger shall notify the control authority at least 60 days prior to such termination. The control authority, subject to its discretion, may require any user to submit a closure plan to the control authority for approval at least 30 days before cessation of discharge. If required, the closure plan, at a minimum, shall address the cleaning and other activities that will be occurring, the anticipated effect on the quality and quantity of the discharge, and how the discharger will assure that such activities will not adversely impact the POTW or otherwise cause interference or pass-through. (Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-50. Reserved.

Sec. 13-24-51. Discharge of hauled wastes.

A. *Requirements applicable to trucked or hauled wastes*. The requirements of this chapter apply to pollutants from domestic and non-domestic sources, which are transported (e.g., by truck or rail) to the POTW. These requirements apply to such trucked or hauled pollutants to the same extent as pollutants discharged directly into the sewer system. Except for wastewater from residential household septic tank, food establishment grease, drive through car wash traps, and portable toilets, no user shall have wastewater hauled to the Memphis WWTP without receiving preapproval from the City of Memphis.

B. *Requirements for generators and/or haulers of wastewater*. The control authority may require any generator and/or hauler of wastewater, including but not limited to, those pertaining to holding tank wastes, industrial waste, sludge, septage, fats, oils and grease, or other sanitary sewage to:

1. Monitor, sample, and analyze the wastewater;

2. Provide a representative waste analysis of the waste prior to discharge;

3. Submit reports, including a waste tracking form, and such other information as requested

by the control authority for every load or at such other frequency as the control authority deems appropriate; and/or

4. Undertake such additional requirements as deemed appropriate by the control authority to implement pretreatment requirements and to protect the POTW, human health, and the environment.

C. *Designated discharge points and approvals*. No person may discharge hauled wastewater of any type into the sewer system or WWTP except at a discharge point designated by the City of Memphis and with proper permit, approvals, and manifest. Alternate site locations must be approved or designated by the City of Memphis. Sewer systems treated by the POTW include all sewer systems located in Memphis, Germantown, certain systems located in Bartlett, Collierville, Lakeland, Millington, unincorporated Shelby County, and certain parts of Desoto County, Mississippi, including Southaven, Mississippi, and Horn Lake, Mississippi. Except for the Memphis designated point(s), wastewater may not be hauled into any sewer systems treated by the Memphis POTW.

D. *Hauling license required and other requirements*. Any person engaged in the hauling of wastewater to the Memphis WWTP must obtain any necessary approvals from the Shelby County Health Department. Licensed haulers shall be responsible for complying with all the terms and conditions contained in the license, in addition to Section R.5 of the Septic Cleaner Regulations of the Memphis and Shelby County Plumbing Code. Additionally, if the waste hauler intends to use the POTW disposal site, the hauler must obtain a disposal permit from the control authority and shall be responsible for complying with all the terms and conditions contained in the permit and the City of Memphis Sewer Use Ordinance. All trucks must be marked with the company name, phone number, waste hauler permit number, city, and state. The tank must also be marked with the company name and capacity of the tank in gallons.

E. *Hauled waste tracking form required for every load*. Waste haulers must provide a waste-tracking form for every load. This form shall include, at a minimum, the name and address of the industrial waste hauler, permit number, truck identification, names and addresses of sources of waste, and volume and characteristics of waste. The form shall identify the type of industry, known or suspected waste constituents, and a certification that none of the hauled wastes are RCRA hazardous wastes as defined in 40 C.F.R. Part 261 or State Rule 0400-12-01.

F. *Absolute prohibition on hauling of hazardous waste to Memphis POTW*. In no event shall any person arrange for or deliver to the POTW (including the collection system), by truck or rail, any pollutant or waste which would be a hazardous waste as defined in 40 C.F.R. Part 261 or State Rule 0400-12-01.

G. *Letter of approval and manifest*. Except as provided in subsection (H), below, or the City of Memphis otherwise provides in writing, no wastewater may be picked up and disposed at the POTW (including the collection system) unless the entity producing the waste has a letter of approval from the City of Memphis authorizing receipt of the particular wastestream, and each truck load or other load is accompanied with a properly completed manifest. Misrepresentation as to the waste delivered by a hauler may lead to civil and/or criminal enforcement. The generator of the waste must submit a written request to the City of Memphis containing all required information requesting approval to dispose of the waste and must receive the letter of approval prior to the pickup of the waste. The following are the requirements for the written request:

1. Must be on company letterhead and must be signed by an authorized representative of the user;

2. Must include the physical address or location of the facility;

3. Must include the address or physical location of the waste sump, pit, or catch basin;

4. Must include estimated volume or volumes of wastewater and/or sludge from each basin, sump, pit, basement, etc.;

5. Must include source of waste for each basin, sump, pit, basement, etc. (e.g., sanitary or septic waste, lift station sludge, sediment from industrial Pretreatment system, laundry waste, maintenance shop sludge, mop water, storm water, etc.);

6. Must include a certification statement of non-hazardous waste, "I certify that the waste to be disposed of would not be classified as hazard-

ous waste as defined under the Resource Conservation and Recovery Act at 40 C.F.R. Part 261 and State Rule 0400-12-01;"

7. Must include a certification regarding inapplicability or compliance with categorical pretreatment Standards in accordance with one of the following two options:

   a. "I certify that the waste is not subject to categorical pretreatment standards as set forth in 40 C.F.R. Chapter I, Subchapter N, Part 405 et seq." or

   b. "I certify that the waste is from the following category [insert category], is subject to categorical pretreatment standards as set forth in 40 C.F.R. Chapter I, Subchapter N, Part 405 et seq., and that based upon the attached sampling information, the waste is in compliance with the applicable categorical pretreatment standard.

   If option B applies, the letter must include the sampling information.

8. Must include the number of expected disposals or frequency of disposals from each basin, sump, or pit (e.g., a one-time event, one-disposal every three months for 12 months, one disposal per month for 12 months, etc., but not for any longer than 12 months); and

9. When required by the control authority, must include the laboratory report(s) of test results for a representative grab sample collected from each basin, sump, pit, basement, etc., with completed chain-of-custody document(s) attached, and must include any required field test results (e.g., pH) or such additional information as the control authority may require.

H. *Wastestreams not requiring separate written approval*. Notwithstanding subsection (G), above, the following wastestreams are not required to have a separate written approval for each particular wastestream unless otherwise required by the control authority on a case-by-case basis:

1. Wastewater from residential household septic tanks;

2. Food establishment grease removal equipment;

3. Drive-through car wash traps; and

4. Portable toilets.

I. *Documents required during disposal and fee.* A copy of the approval letter and properly completed manifest must accompany the permitted waste hauler during the disposal at the City of Memphis' designated discharge point. The disposal fee will be a charge based on a rate established by the division of public works in accordance with the gallon capacity of the truck.

J. *Pollutant limits and other conditions*. Maximum hauled waste pollutant limits and such other conditions as the control authority deems appropriate may be set by the control authority in a permit and/or letter of approval for determining whether a request to transport and dispose of waste to the designated discharge point is acceptable or not. No person shall violate the pollutant limits established by the control authority for hauled wastewater or otherwise be in violation of a waste hauler permits, disposal permit, letter of approval, or other user permit issued by the control authority.

K. pH Limits for hauled wastewater and volume.

1. All hauled wastewater must not violate a pH minimum limit of 5.5 standard units, i.e., having a pH lower than 5.5 standard units.

2. Notwithstanding section 13-24-43(B)(5), all hauled wastewater must not violate a pH maximum limit of 10.0 standard units.

3. Decanting or back flushing of the grease trap or its wastes for the purpose of reducing the volume to be hauled is prohibited.

L. *Forfeiture of hauler waste privileges*. Failure to renew and/or obtain a waste hauler permit or disposal permit or recurrence of late payment of disposal fees may result in the waste hauler not being allowed to use the City of Memphis' designated discharge point for disposal.

M. *City reservation of rights*. The City of Memphis, subject to its discretion, may prohibit the disposal and/or discharge of pollutants or wastes hauled or trucked to the POTW or any subcategories thereof.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-52. Specific charge for hauled waste transported for disposal at the discharge point designated by the City of Memphis.

The disposal fee charge for hauled wastewater originating from residential household septic tanks, food establish-

ment grease removal equipment, drive through car washes, portable toilets, and industrial wastewater and sludge shall be a flat rate based upon the volume of the truck (tank capacity). All customers will be charged on a hauled waste disposal charge based on rate in cents per gallon of wastewater multiplied by the capacity in gallons of the truck hauling the wastewater. The rate may be reviewed and adjusted by the division of public works.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53. Food establishment wastewater.

Sec. 13-24-53-01. Waste disposal - construction plans approval and permit required.

A. *Compliance with chapter*. All food service establishments ("FSE"), including but not limited to cafes, restaurants, hotels, retirement centers, nursing homes, hospitals, grocery stores, markets, prisons, mobile food units, or other food preparation establishments, discharging wastewater to the city's POTW, including the sewer system, shall comply with this chapter except to the extent that any requirement is specifically superseded by the City of Memphis, Division of Public Works, Fats, Oil and Grease ("FOG") Plan, if applicable. The FOG Management Plan, if applicable, would be available at www.memphistn.gov.

B. *Grease trap required/design criteria.*

1. An FSE shall not discharge to the POTW, including the collection system, unless it has installed and is operating and maintaining a sufficiently sized oil and grease, water and solids separator (hereinafter called grease removal equipment) necessary to prevent the accumulation of oil and grease in the sewer collection system. Approval of the City of Memphis, Division of Public Works, shall be required during the construction plans approval process.

2. All grease traps used in conjunction with food service establishments shall have the capacity of 15 gallons per seat of dining capacity, except that no single grease trap shall be smaller than 750 gallons or larger than 3,000 gallons. In certain cases, multiple grease traps may be utilized. Alternative treatment technologies shall be considered on a case-by-case basis for food establishments that are to be located in an existing building where large grease removal equipment is not feasible. The use of enzymes and other chemical agents to dissolve, emulsify, or break-up fats, oil, and greases (FOG) in lieu of physically cleaning and removing FOG with grease removal equipment is prohibited.

C. *Food establishment wastewater discharge ("FEWD") permits*. All FSE's shall obtain a FEWD permit to discharge to the POTW, including the collection system, from the control authority. This permit shall be posted on the premises and renewed as needed. Except where the control authority requires the FSE to obtain an individual permit, an FSE may be covered by a general other user permit.

D. *Multi-dwelling units, apartments and other FSE's - Control of fats, oils and grease (FOG) discharges*. Any multi-dwelling unit, or apartment building, complex or FSE's may be subject to enforcement action for discharging FOG that contributes to a sanitary sewer overflow event, or obstruction to the sewer system.

E. *Person who causes obstruction of sewers*. No person shall discharge or cause a discharge that results in an obstruction of the sewer system. For example, a plumber shall take such actions as necessary to avoid the release of FOG material that is lodged in a pipe to be released into the sewer system.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53-02. Subject to industrial wastewater limitations.

Wastewater discharged into public sewers from FSE's are subject to the limitations set forth in sections 13-24-43 and 13-24-44 of this chapter and such other provisions of this chapter and City Code provisions that apply to discharges to the POTW (including the sewer system), general and specific prohibitions, reporting, user charges, permit fees, sampling fees, inspection fees, and any other fees established from time to time by the city, and such conditions as the control authority includes in a permit.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53-03. Permit for food establishment wastewater discharge.

In addition to requirements otherwise set forth in this chapter, a permit for food establishment wastewater discharge may require pretreatment of wastewater before

discharge, restriction of peak flow discharges, discharge of certain wastewater only to specified sewers of the city, relocation of point of discharge, prohibition of discharge of certain wastewater components, restriction of discharge to certain hours of the day, payment of additional charges to defray increased costs of the city created by the wastewater discharge, and such other conditions as may be required. Except as otherwise provided in this section 13-24-253 and subparts thereof, FEWD permits are subject to the same provisions in this chapter applicable to other user permits.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53-04. Permit application required for new construction and others.

Any newly constructed building or redevelopment resulting in a new FEWD establishment shall complete and file with the division of public works, an application in the form prescribed by the division of public works. The applicant may be required to submit, in units and terms appropriate for evaluation, the following information:

A. Name and address of applicant;

B. Volume of wastewater to be discharged;

C. Time of daily food preparation operations;

D. Description of food preparation, dining room capacity by seats, number of employees, and size of kitchen;

E. Type of FOG treatment; and

F. Any other information as may be deemed by the approving authority to be necessary to evaluate the permit application.

The division of public works, subject to its discretion, may require other FEWDS (e.g., existing FEWDS) to submit permit applications. The division of public works, after evaluating the data furnished by the applicant, may require additional information. After evaluation and acceptance of the data furnished, an on-site inspection of the waste discharge system, treatment systems, or other systems relating to the waste discharge may be required. The approving authority may then issue a FEWD Permit subject to the terms and conditions provided herein.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53-05. Duration of FEWD permits.

FEWD permits shall be issued for a specified time period, not to exceed five years. If the permittee is not notified by the city 30 days' prior to the expiration of the permit, the permit shall be extended under section 13-24-24(B) until such time as the city: (1) reissues a new FEWD permit; or (2) decides that a new FEWD permit should not be reissued. The terms and conditions of the permit may be subject to modification and change by the city during the life of the permit as limitations or requirements as identified in sections 13-24-43 and 13-24-44 are modified and changed or as otherwise deemed appropriate by the control authority. See section 13-24-25 pertaining to modification of permits, including FEWD permits.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53-06. Revocation of food establishment wastewater permit.

In addition to causes set forth in section 13-24-25, the division of public works may revoke the FEWD permit of any permittee who is found to be in violation of this chapter or who:

A. Fails to install grease pretreatment devices as required by permit;

B. Fails to fulfill reporting requirements or pretreatment maintenance as required by permit;

C. Refuses reasonable access to the permittee's premise for the purpose of inspection or monitoring; or

D. Violates any condition of the FEWD permit.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53-07. Grease pretreatment required.

A. *Grease reduction equipment/oil and grease limit.* FEWDs shall make wastewater acceptable under the limitations established herein (see, e.g., section 13-24-44(A)(2) setting forth a FOG limit of 100 mg/l) before discharging to any public sewer. All permittees are required to install an approved type of grease removal equipment ("GRE") in the waste line leading from the food preparation area, or from sinks, drains, appliances, dish washers, mop sinks, floor drains, and other fixtures or equipment used in food preparation or cleanup where grease may be introduced into the sewerage system. Such grease pretreatment devices shall be installed to remove grease from wastewater and shall be maintained

in efficient operating conditions by periodic removal of the accumulated grease. No such collected grease shall be introduced into any drainage piping or public sewer. Such grease may, however, be hauled by a licensed waste hauler to the city's WWTP subject to the provisions of this chapter.

B. *Segregation of oils, greases and greasy solids.* Each FEWD shall also be required to provide a collection drum or container for the purpose of physically segregating oils, greases, and greasy solids. FEWDs shall establish procedures for personnel to practice maximum segregation of oils, greases, and greasy solids to the collection drum or container prior to washing and other water cleaning, which goes into sewers. The FEWD is responsible for the proper removal and disposal by appropriate means of the material captured from either grease pretreatment devices on wastewater lines or the collection drum for segregating oils, grease, and greasy solids.

C. *Training program to assure proper handling of grease waste*. Upon notification from the division of public works, the FEWD shall undertake a training program to assure that its employees are familiar with and implement a program to assure that grease waste is properly handled. Recordkeeping and reporting of such training program, and other food and grease related activities may be required.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53-08. Maintenance reports.

The FEWD shall maintain records of grease pretreatment device cleaning, maintenance, and grease removal on site. The division of public works may require the FEWD to provide results of periodic measurements of its discharge, which may include chemical analysis of oil and grease content and measurements of FOG content in GRE. FEWDs shall allow the city or its representative ready access at all reasonable times to all parts of the premises for purposes of sampling and inspections.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53-09. Penalty for violation and civil liability.

Any person(s) discharging wastewater in violation of a FEWD permit and/or this chapter is subject to fines, penalties, cost recovery, injunction, termination of sewer service, permit revocation, and/or such other remedies as are available to the control authority.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-53-10. Surcharges for oil and grease.

The division of public works may impose and modify such additional surcharges, as it deems appropriate, to address disproportional costs or other concerns associated with the discharge of FOG (e.g., the impact on the collection system).
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Secs. 13-24-53-11—13-24-53-20. Reserved.

Secs. 13-24-54—13-24-59. Reserved.

ARTICLE 4. REVIEW AND ENFORCEMENT

Secs. 13-24-60—13-24-69. Reserved.

Sec. 13-24-70. Violations and enforcement actions.

A. *Enforcement.* A violation of any of the foregoing may result in enforcement actions including, among other things, administrative fines, civil penalties, withdrawal of the privilege to use the City of Memphis Wastewater System, and suspension or termination of the existing permit (e.g., waste hauler permit) and/or prohibition from obtaining a new permit.

B. *Criminal penalties*. Any person in violation of this chapter shall be guilty of a misdemeanor and subject to punishment as provided in section 1-24-1. Any person who willfully and negligently violates permit conditions may be subject to other criminal penalties, including criminal penalties imposed by the State of Tennessee and/or the United States.

C. *Damaging sewerage works*. The prohibitions and requirements of section 13-8-5 (damaging sewerage works) are hereby incorporated by reference. A violation of section 13-8-5 is also a violation of this chapter.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-71. Local hearing authority.

There is hereby created and established a local hearing authority to be known as the Memphis Wastewater Hearing Authority and referred to hereinafter as the "Hearing Authority."
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-72. Purpose.

The hearing authority shall serve as the local hearing authority as prescribed in T.C.A. § 69-3-124 and shall be responsible for the review of orders issued or actions undertaken by the director of public works or his designee pursuant to the Sewer Use Ordinance, pretreatment statutes codified at T.C.A. §§ 69-3-123 through 69-3-129, and such requirements as set forth in the National Pollutant Discharge Elimination System ("NPDES") permits issued to the City of Memphis.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-73. Composition, length of term, officers.

A. The hearing authority shall be composed of the following seven members and two alternates who shall be appointed by the mayor subject to approval by the Memphis City Council, and shall constitute the voting members of the hearing authority:

Representative Group (# of members)	*Length of Term (years)*
Industry (2)	1
Private Citizenry (3)	2
Engineering/Science (2)	2
Public Interest Group/ University (2)	1

B. Each member and alternate shall serve without compensation and may be reappointed, but do not succeed themselves automatically.

C. One alternate shall be appointed from the "industry" group and one from the "public interest/university" group.

D. A chairperson of the hearing authority shall be elected at the first meeting of each newly appointed hearing authority from among its own membership to serve for a term of one year. Another member shall serve as vice chair for a period of one year upon a majority vote of all members.

E. The hearing authority shall keep complete and accurate records of the proceedings of all meetings and the director of public works or his designee shall serve as the hearing authority's technical secretary.

F. The hearing authority may issue subpoenas requiring attendance of witnesses and production of such evidence as requested, administer oaths, and take testimony as the hearing authority deems necessary to fulfill its purpose.

G. No member or alternate shall participate in the appeal of any matter in which the member or alternate has a direct personnel or financial interest.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-74. Removal.

Members may be removed from the hearing authority for continued absence from meetings or other just cause in accordance with the procedure for removal of board or commission members set forth within House Rule Ordinance No. 1852 of the City Charter.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-75. Power and duties.

In addition to any other duty or responsibility otherwise conferred upon the hearing authority by this chapter, the hearing authority shall have the duty and power as follows:

A. To recommend to the director of public works as the local administrative officer that this article or any provision included within this chapter be amended or modified;

B. To establish, modify, or amend procedural rules governing hearings, orders, issuance of permits, and all other matters not specifically requiring a hearing, provided that such rules do not conflict with applicable State or Federal law or the City Code of Ordinances;

C. To establish a schedule of the amount of civil penalty that can be assessed for certain specific violations or categories of violations in accordance with T.C.A. § 69-3-125(a)(3);

D. To hold meetings and such special meetings as the hearing authority may find necessary;

E. To hold hearings upon appeals from orders or actions of the director of public works as the local administrative officer in accordance with T.C.A. § 69-3-124;

F. To hold hearings related to the issuance, reissuance, suspension, revocation, or modification of an SIU discharge permit or other user permit and issue appropriate orders related thereto;

G. To hold such other hearings related to any aspect or matter in the administration of this chapter and to make such determinations and issue such orders as may be necessary to effectuate the purpose of this chapter;

H. To obtain assistance upon request from the director of public works or his designee as the hearing authority might need;

I. In addition to any other power granted by this title, the hearing authority is granted the authority to review the assessment of a civil penalty against any person in the amount not to exceed the sum of $10,000.00 per day for each day of violation during which the act or omission continues or occurs in accordance with T.C.A. § 69-3-125;

J. The decision of the hearing authority shall become final and binding on all parties unless appealed to the courts as provided in section 13-24-76, which governs appeals.

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-76. Appeal.

Pursuant to T.C.A. § 69-3-124(b), an appeal may be taken from any final order or other final determination of the hearing authority by any party who is or may be adversely affected thereby, to the chancery court pursuant to the common writ of certiorari set out in T.C.A. § 27-8-101, within 60 days from the date such order or determination is made.

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-77. Quorum.

A quorum of the hearing authority must be present at any regular or special meeting in order to conduct a hearing. Four members of the authority shall constitute a quorum.

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-78. Members to be residents of the city.

Each member and alternate of the hearing authority must have been a resident of Memphis for not less than one year and shall continue to maintain such residency throughout such member's term.

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-79. Members oath.

Each member of the hearing authority shall take an oath to faithfully perform the duties imposed upon him without fear or favor, and in full accordance with the constitution and laws of the State and the ordinances of the city.

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-80. Hearings.

Any hearing or rehearing brought before the hearing authority shall be conducted in accordance with T.C.A. § 69-3-124.

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-81. Administrative order/emergency order procedures.

A. Complaint issued by director or his designee.

1. Whenever the director or his/her designee has reason to believe that a violation of any provision of the pretreatment program (including but not limited to a violation of the sewer use ordinance, SIU discharge permit or other user permit) or orders of the hearing authority issued pursuant thereto has occurred, is occurring, or is about to occur, the director or his/her designee may cause a written complaint to be served upon the alleged violator or violators.

2. The complaint should specify the provision or provisions of the pretreatment program (including but not limited to a violation of the sewer use ordinance, SIU discharge permit or other user permit) or order alleged to be violated or about to be violated, the facts alleged to constitute a violation thereof, may order that necessary corrective action be taken within a reasonable time to be prescribed in such order, and shall inform the violators of the opportunity for a hearing before the hearing authority.

3. Any such order shall become final and not subject to review unless the person or persons

named therein request by written petition a hearing before the hearing authority, no later than 30 days after the date such order is served; provided, however, that the hearing authority may review such final order on the same grounds upon which a court of the state may review default judgments.

B. Emergency circumstances.

1. Whenever the director or his/her designee finds that an emergency exists imperatively requiring immediate action to protect the public health, safety or welfare, the health of animals, fish or aquatic life, a public water supply, or the facilities of the POTW, the director or his/her designee may, without prior notice, issue an order reciting the existence of such an emergency and requiring that such action be taken as the director or his designee deems necessary to meet the emergency (e.g., immediate termination of sewer service).

2. If the violator fails to respond, or is unable to respond, to the director or his/her designee's order, the director or his/her designee may take such emergency action, as he deems necessary, or contract with a qualified person or persons to carry out the emergency measures. The director or his designee may assess the person or persons responsible for the emergency condition for actual costs incurred by the POTW and local agencies in meeting the emergency.

3. Any person to whom an emergency order is issued shall comply with the emergency order immediately, but on petition to the hearing authority shall be afforded a hearing as soon as possible, but in no case shall such hearing be held later than three days from the receipt of such petition by the hearing authority.

C. Except as otherwise expressly provided, any notice, complaint, order, or other instrument issued by or under authority of this article 4 may be served on any person affected thereby personally, by the director or any person designated by him/her, or such service may be made in accordance with Tennessee statutes authorizing service of process in civil action. Proof of service shall be filed in the office of the director.

D. User compliance with the requirements of an administrative order or emergency order does not relieve the user of liability for any violations occurring before or after receipt of the order. Failure of a user to comply with any condition or requirement set forth in an administrative order or emergency order is a violation and is independently enforceable for each day of violation. An administrative order and emergency order have the full force of law and are enforceable in a court of law. Nothing in this section shall limit the authority of the control authority to take any action, including emergency actions or any other enforcement action, whether or not an administrative order or emergency order has been issued.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-82. Violations and penalties.

A. *Violations.*

1. Any person including, but not limited to, residential, carwash, restaurant, waste haulers, commercial facilities, or industrial users, who does any of the following acts or omissions shall be subject to a civil penalty of up to $10,000.00 per day for each day during which the act or omission continues or occurs:

   a. Violates an effluent standard or limitation imposed by the pretreatment program (including a violation of the sewer use ordinance);

   b. Violates the terms or conditions of an SIU discharge permit or other user permit;

   c. Fails to complete a filing requirement of the pretreatment program (including a violation of a filing requirement of the sewer use ordinance);

   d. Fails to allow or perform an entry, inspection, and monitoring or reporting requirement of the pretreatment program (including the sewer use ordinance);

   e. Fails to pay user or cost recovery charges imposed by the pretreatment program (including the sewer use ordinance); or

   f. Violates a final determination or order of the hearing authority or the director or his designee.

2. Any civil penalty may be assessed in the following manner:

   a. The director or his/her designee may issue an assessment against any person or industrial user responsible for the violation;

   b. Any person or industrial user against whom a civil penalty assessment has been issued may secure a review of such assessment by filing with the director or his/her designee a written petition setting forth the grounds and reasons for his/her objections and asking for a hearing in the matter involved before the hearing authority and, if a petition for review of the assessment is not filed within 30 days after the date the assessment is served, the violator shall be deemed to have consented to the assessment and it shall become final;

   c. Whenever any assessment has become final because of a person's failure to appeal the director or his/her designee's assessment, the director or his/her designee may apply to the appropriate court for a judgment and seek execution of such judgment and the court, in such proceedings, shall treat a failure to appeal such assessment as a confession of judgment in the amount of the assessment.

   d. In assessing the civil penalty, the director or his/her designee may consider the following factors:

      (i) Whether the civil penalty imposed will be a substantial economic deterrent to illegal activity;

      (ii) Damages to the POTW, including compensation for the damage or destruction of the facilities of the POTW, and also including any penalties, costs, and attorneys' fees incurred by the control authority as the result of the illegal activity, as well as the expenses involved in enforcing this section and the costs involved in rectifying any damages;

      (iii) Cause of the discharge or violation;

      (iv) The severity of the discharge and its effect upon the facilities of the POTW and upon the quality and quantity of the receiving waters;

      (v) Effectiveness of action taken by the violator to cease the violation;

      (vi) The technical and economic reasonableness of reducing or eliminating the discharge; and

      (vii) The economic benefit gained by the violator.

   e. The director or his/her designee may institute proceedings for assessment in the chancery court of the county in which all or part of the pollution or violation occurred, in the name of the control authority.

3. The division of public works may establish a schedule of the amount of civil penalty which can be assessed by the director or his/her designee for certain specific violations or categories of violations.

B. *Imprisonment.* In accordance with T.C.A. § 6-54-306, any violation of this chapter shall be subject to a maximum imprisonment under State law of 30 days. A violator may be subject to a greater length of imprisonment under Federal and/or State law.

C. *State or Federal enforcement*. Notwithstanding anything to the contrary, violation of a pretreatment program requirements by a user may subject a user to an enforcement action by TDEC, EPA, or a citizen suit including but not limited to the following:

1. In the case of civil enforcement under the federal Clean Water Act by EPA or a citizen suit, a user may be subject to, among other things, civil penalties of $55,800.00 per day, per violation, and such additional amounts as provided for by the Civil Monetary Penalty Inflation Adjustments in 40 C.F.R. § 19.4.

2. Any person who negligently or knowingly violates any requirement imposed in a pretreatment program including, but not limited to, SIU discharge permit or other user permit (e.g., hauled wastewater permit or food establishment wastewater permit conditions) may be subject to criminal penalties under the Clean Water Act.

D. *Interest/lien*. Interest may accrue on unpaid balances. A lien against the user's property may be sought for unpaid charges, fines, and penalties.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-83. Damages assessment.

A. The director or his/her designee may assess the liability of any polluter or violator for damages to the pretreatment agency resulting from any person's or industrial user's pollution or violation, failure, or neglect in complying with any permits or orders issued pursuant to the provisions of the pretreatment program or sections 13-24-75, 13-24-81, and 13-24-82, herein.

B. Any polluter or violator against whom a damage assessment has been issued may secure a review of such assessment by filing with the hearing authority an appeal asking for a hearing in the matter. If an appeal from such assessment is not made to the hearing authority by the polluter or violator within 30 days of notification of such assessment, he/she shall be deemed to have consented to such assessment and it shall become final.

C. Damages may include any expenses incurred in investigating and enforcing the pretreatment program or T.C.A., §§ 69-3-123 through 69-3-129 in removing, correcting, and terminating any pollution, and also compensation for any actual damages caused by the pollution or violation.

D. Whenever any assessment has become final because of a person's failure to appeal within the time provided, the director may apply to the appropriate court for a judgment and seek execution on such judgment. The court, in such proceedings, shall treat the failure to appeal such assessment as a confession of judgment in the amount of the assessment.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-84. Additional enforcement provisions.

A. *Other enforcement actions*. In addition to the enforcement remedies and responses otherwise identified in sections 13-24-70 through 13-24-83 of this chapter, noncompliance by a user may subject a user to enforcement response(s) including, but not limited to, a phone call, e-mail, notice of violation, increased monitoring, consent order or agreement, show cause request, case referral to Federal or state government, or such other remedy as the control authority deems appropriate. These enforcement responses include:

1. Notice of violation: The control authority may issue a notice of violation to a user when the control authority determines that a user violated, or continues to violate, any provision of this chapter, an SIU discharge permit, other user permit, enforcement order issued hereunder, or any pretreatment standard or pretreatment requirement. The notice of violation may request that the user promptly respond to the control authority and to identify, among other things, an explanation of the cause(s) of the violation and a plan for the satisfactory correction and prevention of future violations. Submission of the response by a user does not relieve the user of liability for any violations occurring before or after receipt of the notice of violation. Nothing in this section shall limit the authority of the control authority to take any action, including emergency actions or any other enforcement action, whether or not a notice of violation has been issued.

2. Increased monitoring: The control authority, in response to user violation(s), may require the user to increase the sampling and monitoring of its discharge or the control authority may undertake increased sampling and monitoring of the user's discharge. If increased monitoring is undertaken by the authority, the costs associated with such increased sampling and monitoring may be charged to the user.

The increase in a user's sampling and monitoring activities in response to violation(s) may be imposed upon the industrial user by the control authority issuing a modification to the user's SIU discharge permit or other user permit, issuing an administrative order, or by issuing any other appropriate mechanism. An option the control authority, subject to its discretion, may include in an SIU discharge permit or other user permit is a permit condition which automatically provides for increased sampling upon user noncompliance.

3. Consent order or consent agreement: The control authority may enter into a consent order or consent agreement when the control authority determines that a user violated, or continues to

violate, any provision of this chapter, a SIU discharge permit, other user permit or enforcement order issued hereunder, or any pretreatment standard or pretreatment requirement. A consent order or consent agreement may provide for monetary penalties for past violation(s), stipulated monetary penalties for future violation(s), an enforceable compliance schedule setting forth specific action(s) to be taken by the user to correct noncompliance within a specified time period, and/or such other conditions as the control authority deems appropriate.

Failure of a user to comply with any condition or requirement set forth in a consent order or consent agreement is a violation of this chapter and each day of a violation is independently enforceable. A consent order and consent agreement have the full force of law and are enforceable in a court of law. A consent order is subject to judicial approval as a precondition to its effectiveness whereas a consent agreement is not subject to such judicial approval prior to its adoption.

4. Show cause request: The control authority may issue a show cause request to a user when the control authority determines that a user violated, or continues to violate, any provision of this chapter, a SIU discharge permit, other user permit, enforcement order issued hereunder, or any pretreatment standard or pretreatment requirement. A show cause request may provide for the user to appear before the control authority (at a show cause meeting) and show cause as to why a proposed or subsequent enforcement action should not be taken. Nothing in this section shall limit the authority of the control authority to take any action, including emergency actions or any other enforcement action, whether or not a show cause request has been issued or a show cause meeting has been held.

5. Referral to State or Federal government: The control authority may refer a matter to a Federal and/or state government for enforcement by such governmental entity when the control authority determines that a user violated, or continues to violate, any provision of this chapter, an SIU discharge permit, or enforcement order issued hereunder, or any pretreatment standard or pretreatment requirement. The control authority may assist the Federal and/or state government in a Federal or state-initiated enforcement action against a user.

B. *City enforcement options not limited*. Nothing in this chapter, the control authority's enforcement response plan, or any other provision of Memphis' approved pretreatment program shall be intended to limit the enforcement discretion of the control authority as otherwise provided for by law.

C. *User liability for causing city violations*. A user shall be liable for any penalty imposed upon the city (whether the penalty is a result of a judicial or administrative trial or hearing or the settlement of a judicial or administrative penalty action) where the city's violation was caused by the user, either alone or in conjunction with the discharge(s) from other source(s). Where the user has violated a local limit under section 13-24-44(C) and a violation of the NPDES permit applicable to the city's POTW subsequently occurred for the same pollutant or associated pollutant(s), a rebuttable presumption is deemed to exist that the permittee caused the violation of the NPDES permit. The user shall have the burden of proof to demonstrate that its discharge did not cause, in whole or part, the city to violate its NPDES permit limitation.

D. *Exhaustion of administrative remedies and appeals*. Any issue that was decided by the hearing authority in a prior hearing or could have been decided by the hearing authority had the permittee or defendant, as applicable, appealed the matter, shall be binding upon such permittee or defendant in subsequent hearing(s) unless there is a change in law (e.g., a court overturned the hearing authority's decision or the underlying ordinance standard has been amended) or a significant change in the underlying facts.

E. *Need to halt or reduce activity not a defense*. It shall not be a defense in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. See section 13-24-46(E), requiring the reduction in production as necessary to achieve compliance.

F. *Duty to mitigate*. The user shall take all reasonable steps to minimize or prevent any discharge which has a reasonable likelihood of adversely affecting human

health or the environment or any action which has the reasonable likelihood of obstructing flow in the sewer collection system.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-85. Special fund.

All damages and/or penalties assessed and collected under section 13-24-82 and/or 13-24-83 shall be placed in a special fund by the pretreatment agency and allocated and appropriated to the City of Memphis for the administration of its pretreatment program.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-86. Public notification and significant noncompliance.

A. *Publication of SNC.* As provided for by 40 C.F.R. § 403.8, the control authority may publish annually, in a newspaper of general circulation that provides meaningful public notice within the jurisdictions served by the city, of industrial users, which at any time during the year were in significant noncompliance with applicable pretreatment requirements. For purposes of this provision, a significant industrial user (or any industrial user which violates subsection (3), (4), or (8) of this section) is in significant noncompliance if its violation meets one or more of the following criteria:

1. Chronic violations of wastewater discharge limits, defined here as those in which 66 percent or more of all the measurements for each pollutant taken during a six-month period exceed (by any magnitude) a numeric pretreatment standard or pretreatment requirement, including instantaneous limits, for the same pollutant parameter;
2. Technical review criteria (TRC) violations, defined here as those in which 33 percent or more of all the measurements for each pollutant parameter taken during a six-month period equal or exceed the product of the numeric pretreatment standard or pretreatment requirement, including instantaneous limits, multiplied by the applicable TRC (TRC = 1.4 for BOD, TSS, fats, oil and grease, and 1.2 for all other pollutants except pH);
3. Any other violation of a pretreatment standard or pretreatment requirement (daily maximum, long term average, instantaneous limit or narrative standard) that the control authority determines has caused, alone, or in combination with other discharges, interference or pass-through (including endangering the health of POTW personnel or general public);
4. Any discharge of a pollutant that has caused imminent endangerment to human health, welfare, or to the environment or has resulted in the POTW's exercise of its emergency authority to halt or reduce such a discharge;
5. Failure to meet, within 90 days after the schedule date, a compliance schedule milestone contained in a local control mechanism or enforcement order for starting construction, completing construction, or attaining final compliance;
6. Failure to provide, within 45 days after the due date, Federal or State required reports such as baseline monitoring reports, 90-day compliance reports, periodic self-monitoring reports, and reports on compliance with compliance schedules (however an industrial user is not in significant noncompliance if the late report only pertains to the reporting of a pollutant value for surcharge purposes, not for compliance purposes);
7. Failure to accurately report noncompliance;
8. Any other violation or group of violations, which may include a violation of best management practices, the control authority determines will adversely affect the operation or implementation of the control authority's pretreatment program.

B. *Publication of non-SNC violations*. Notwithstanding any provision to the contrary, the control authority may publish in a newspaper of general circulation any other noncompliance that does not meet the criteria or is not addressed in subsection (A) above (e.g., exceedance of the TRC by a non-significant industrial user).
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Secs. 13-24-87—13-24-89. Reserved.

ARTICLE 5. REVIEW AND OVERSIGHT OF OUTLYING JURISDICTIONAL PROGRAMS WITH PERMITTED INDUSTRIAL USER AND/OR OTHER DISCHARGES TO MEMPHIS STP(S)

Sec. 13-24-90. Purpose of this division.

A. Inasmuch as Memphis is the NPDES permittee that owns and operates WWTPs that receive wastewater, not only from discharges within the city but discharges

from facilities located outside of the city's corporate limits, this article of chapter 13-24 is drafted to provide a mechanism to assure that: (i) industrial user permits for discharge to Memphis issued by outlying jurisdictions impose requirements at least as stringent as that required by federal law, Tennessee law, and as set forth in this article; and (ii) outlying jurisdictions do not approve any discharges that would enter Memphis' sewers or WWTPs (e.g., discharges originating from outside the corporate limits of the outlying jurisdiction) without Memphis' approval.

B. The provisions of this article are modeled after the Clean Water Act ("CWA") §§ 401 and 402(b) provisions and implementing regulations (see, e.g., 40 C.F.R. §§ 122.4(a), 123.44 and 124.53) wherein EPA or an approved NPDES state review, comment upon, and potentially object to a draft permit proposed to be issued by the other governmental entity.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-91. Prohibitions applicable to outlying jurisdiction issuance of industrial user permits for discharge to Memphis.

A. No permit may be issued by an outlying jurisdiction to an industrial user to discharge to a Memphis WWTP when:

1. The conditions of the industrial user permit do not provide for compliance with the applicable requirements of CWA and regulations, Tennessee pretreatment Rules, and [this chapter] of Memphis;

2. The outlying jurisdiction has failed to provide Memphis an opportunity to review and object to an industrial user permit under section 13-24-92;

3. The outlying jurisdiction has failed to provide Memphis the requested information under section 13-24-92(B); and/or

4. Memphis has objected to issuance of the permit under section 13-24-92 and: (i) the permit has not been changed to resolve the objection(s); or (ii) Memphis and the outlying jurisdiction have not otherwise resolved the issue(s).

B. No user shall introduce sewage or wastewater to the Memphis POTW, including to the sewers, pipes, and other conveyances that convey wastewater to the Memphis WWTP if:

1. A permit cannot be issued to that user under section 13-24-91(A), above;

2. The industrial user is an existing source and has been identified as a significant industrial user by the outlying jurisdiction and/or Memphis and a permit has not been issued to such industrial user within 180 days of being identified as a significant industrial user;

3. A permit has not yet been issued to a new source unless the new source facility is designated as a non-significant categorical industrial user; or

4. The user is located in an outlying jurisdiction which does not have a written agreement with Memphis allowing the discharge of its users to the Memphis POTW.

C. Unless Memphis agrees in writing, in no event shall an outlying jurisdiction allow any person (including any industrial user) located outside of its jurisdictional boundaries to introduce sewage or wastewater to that outlying jurisdiction's sewer system such that it would discharge to the Memphis POTW, including to the sewers, pipes, and other conveyances that convey wastewater to the Memphis WWTP.

D. Issuance of a permit by an outlying jurisdiction or other authorization of the outlying jurisdiction for a user to discharge in contravention of the requirements set forth in this division, once approved as part of Memphis' pretreatment program, shall be deemed a violation by the outlying jurisdiction of the Clean Water Act ("CWA"), 33 U.S.C. §§ 1251 et seq., Tennessee Water Quality Control Act ("TWQCA"), T.C.A. §§ 68-3-101 et seq., and this chapter.

E. The introduction of sewage or wastewater to the Memphis POTW, including sewers, pipes, and other conveyances that convey wastewater to the Memphis WWTP, in contravention of the requirements set forth in this article, once approved as part of Memphis' pretreatment program, shall be deemed a violation by an industrial user in an outlying jurisdiction of the Clean

Water Act ("CWA"), 33 U.S.C. §§ 1251 et seq., Tennessee Water Quality Control Act ("TWQCA"), T.C.A. §§ 68-3-101 et seq., and this chapter.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-92. Memphis review of and objections to outlying jurisdiction permits.

A. Before issuing, reissuing, or modifying an industrial user permit for a discharge to the Memphis WWTP, an outlying jurisdiction shall provide a draft of the permit to Memphis and provide Memphis a minimum of 30 days to review and comment upon the draft permit. Memphis may extend the time to comment on the draft permit for an additional 30-day period for an existing permitted facility, and 60-day period for a newly permitted facility, upon providing the outlying jurisdiction written notice of such extension.

B. If Memphis needs more information (e.g., industrial user permit application, outlying jurisdiction rationale for the permit conditions) regarding its evaluation of the proposed industrial user permit, Memphis may request that the outlying jurisdiction provide Memphis the requested information. The time periods under section 13-24-92(A), above, are automatically extended during the pendency of the request until Memphis receives all the requested information.

C. Memphis may object to the issuance, reissuance, or modification of an industrial user permit by an outlying jurisdiction. Such objection may identify permit conditions in the draft permit that must be changed (e.g., modified or deleted) or additional conditions that must be added to the permit.

1. In objecting to the industrial user permit, Memphis shall provide a statement of the reason(s) for the objection(s) and the actions that must be taken by the outlying jurisdiction to eliminate the objection. These changes may be based upon the specific wording of a federal, Tennessee, or Memphis requirement or Memphis' general approach for implementing requirements for industrial users.

2. An objection may be based upon the objective that industrial users in outlying jurisdictions should not be subject to more lenient requirements than industrial users located in Memphis.

3. Objections may address any provisions of the proposed permit as well as the absence of permit conditions, including those relating to effluent limitations, the maintenance of records, reporting, monitoring, sampling, enforcement, or assuring that Memphis receives notice and information from the industrial user (e.g., slug reports, permit applications, etc.).

4. Unless Memphis agrees to withdraw its objections, if the outlying jurisdiction does not resubmit a permit revised to resolve an objection to Memphis' satisfaction, the permit shall not be issued by the outlying jurisdiction to the industrial user.

D. Where a Memphis objection is not resolved:

1. If an unresolved Memphis objection involves a proposed modification to the industrial user permit, then the permittee can continue to discharge to Memphis under the preexisting unmodified industrial user permit for the remaining term of the permit unless precluded by subsequent legal requirements.

2. If an unresolved Memphis objection involves a new industrial user permit, the industrial user may not discharge to Memphis unless it obtains a valid industrial user permit. The industrial user may request that Memphis issue the permit under section 13-24-93.

3. If an unresolved Memphis objection involves the reissuance of an industrial user permit, the industrial user may continue to discharge to Memphis under the preexisting permit, subject to the limitation in section 13-24-94(B).

E. In addition, Memphis may provide recommendations with respect to the proposed permit issuance, reissuance, or amendment. Failure of the outlying jurisdiction to follow a recommendation does not trigger the requirements of section 13-24-91(A).

F. Notwithstanding anything to the contrary, nothing herein shall be deemed to require Memphis to review industrial user permits issued by outlying jurisdictions.

(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-93. Memphis issuance of industrial user permits for dischargers in outlying jurisdiction.

A. Where an unresolved Memphis objection exists, the industrial user may request that Memphis issue an industrial user permit authorizing the discharge to the

Memphis sewers and WWTP. Memphis may condition its willingness to issue the permit to an industrial user located in an outlying jurisdiction, on the industrial user entering into a separate written agreement with Memphis wherein the industrial user agrees to be subject to such conditions as Memphis deems appropriate, including, but not limited to, being subject to:

1. Memphis' pretreatment Ordinance,
2. Announced and unannounced inspections and sampling by Memphis, and/or
3. Any and all enforcement actions as deemed appropriate by Memphis, including agreeing to be subject to administrative actions before Memphis and judicial actions in Tennessee State Courts, subject to the civil penalty amounts and damages as provided in Tennessee law and/or Memphis' Ordinance. Notwithstanding this provision, the industrial user does not waive any arguments as to whether it actually committed the alleged violation.

B. A permit issued by Memphis to an industrial user in an outlying jurisdiction may be appealed to the Memphis Hearing Authority.

C. Wherein Memphis issues a permit to an industrial user in an outlying jurisdiction, nothing herein shall be deemed to waive federal, State, and local legal obligations of the industrial user that apply in the outlying jurisdiction.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-94. Miscellaneous provisions regarding outlying jurisdictions issuance of permits.

A. For the purposes of this division, an "outlying jurisdiction" means a city, town, county, district, association, or other public body created by or pursuant to state law in which an industrial user is located outside the Memphis City limits that discharges sewage and/or wastewater to a sewer system located in that jurisdiction, wherein the sewage and/or wastewater empties into the Memphis sewage system for eventual treatment at the Memphis WWTP(s). An "outlying jurisdiction" also includes a state that is approved pursuant to 40 C.F.R. § 403.10(e), that issues permits to industrial user(s) for discharging sewage and/or wastewater to a sewer system located in that state, wherein the sewage and/or wastewater empties into the Memphis sewage system for eventual treatment at the Memphis WWTP(s). The City of Memphis is not an "outlying jurisdiction."

B. Where an industrial user in an outlying jurisdiction has submitted a timely and complete permit renewal application or request for permit reissuance, in no event shall the existing permit, if not reissued by the expiration date, be continued for a period longer than six months.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Secs. 13-24-95—13-24-99. Reserved.

ARTICLE 6. MISCELLANEOUS PROVISIONS

Sec. 13-24-100. Reservation of rights.

Nothing contained in chapters 13-4, 13-8, 13-12, 13-16, 13-24, 13-28 and 13-32, or otherwise contained in a city ordinance shall be construed to interfere with any additional requirements that may be imposed by the control authority subject to its sole discretion. Notwithstanding any other pretreatment program provision to the contrary, nothing in this chapter, any other city ordinance, or in the city's pretreatment program shall be deemed a legally binding commitment under the Clean Water Act, 33 U.S.C. §§ 1251 et seq., the Tennessee Water Quality Control Act of 1977, T.C.A. §§ 69-3-101 et seq., and applicable regulations (e.g., 40 C.F.R. Part 403, Rule 1400-40-14) for the city to undertake pretreatment implementation or enforcement activities beyond the minimum otherwise required by these Federal/state laws and regulations. Nevertheless, the city maintains its discretionary authority to undertake pretreatment activities beyond the minimum required.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Sec. 13-24-101. Special agreements or arrangements.

Nothing contained in this chapter shall be construed as prohibiting any special agreement or arrangement between the control authority and any person, or for the control authority to otherwise waive requirements herein, when conditions and circumstances making such special agreement(s), arrangement(s), or waiver(s) advisable and/or necessary, in the opinion of the control authority, are present. In no event shall special agreement(s), arrangement(s), or waiver(s) permit any industrial user to violate applicable minimum Federal or State pretreat-

ment requirements (e.g., National Categorical Pretreatment Standards) as set forth in 40 C.F.R. Part 403 and Rule 1400-40-14.
(Ord. No. 5793, §§ 3, 5, 8-17-2021)

Secs. 13-24-102—13-24-109. Reserved.

CHAPTER 13-26. FOOD ESTABLISHMENT WASTEWATER

Sections:

Sec. 13-26-1. Waste disposal—Construction plans approval and permit required.
Sec. 13-26-2. Subject to industrial wastewater limitations.
Sec. 13-26-3. Permit for food establishment wastewater discharge.
Sec. 13-26-4. Permit application.
Sec. 13-26-5. Duration of permits.
Sec. 13-26-6. Transfer of permit.
Sec. 13-26-7. Revocation of food establishment wastewater permit.
Sec. 13-26-8. Grease pretreatment required.
Sec. 13-26-9. Maintenance reports.
Sec. 13-26-10. Penalty for violation and civil liability.

Sec. 13-26-1. Waste disposal—Construction plans approval and permit required.

A. *Grease trap required.* All food service establishments discharging wastewater to the city's wastewater facilities shall install, operate, and maintain a sufficiently sized oil and grease, water and solids separator (hereinafter called grease trap) necessary to prevent the accumulation of oil and grease in the sewer collection system. Approval of the City of Memphis, division of public works, shall be required during the construction plans approval process.

B. *Design criteria.* All grease traps used in conjunction with food service establishments shall have the capacity of 15 gallons per seat of dining capacity, except that no single grease trap shall be smaller than 750 gallons or larger than 3,000 gallons. In certain cases, multiple grease traps may be utilized. Alternative treatment technologies shall be considered on a case-by-case basis for food establishments that are to be located in an existing building where a large grease trap is not feasible.

C. *General permit to discharge.* All food establishments shall obtain a permit to discharge to the wastewater system from the approving authority. This permit shall be posted on the premises and renewed as needed.
(Ord. No. 5099, § 5(part), 2005)

Sec. 13-26-2. Subject to industrial wastewater limitations.

Wastewater discharged into public sewers from facilities engaged in preparing food for consumption by the public shall be subject to the limitations set forth in sections 13-24-3 and 13-24-4 and such other conditions and requirements as are set forth in section 13-26-3. The permit for food establishment wastewater discharge shall be subject to all provisions of this chapter and all other regulations, user charges, and fees established from time to time by resolution of the council of the City of Memphis.
(Ord. No. 5099, § 5(part), 2005)

Sec. 13-26-3. Permit for food establishment wastewater discharge.

The permit for food establishment wastewater discharge may require pretreatment of wastewater before discharge, restriction of peak flow discharges, discharge of certain wastewater only to specified sewers of the city, relocation of point of discharge, prohibition of discharge of certain wastewater components, restriction of discharge to certain hours of the day, payment of additional charges to defray increased costs of the city created by the wastewater discharge, and such other conditions as may be required.
(Ord. No. 5099, § 5(part), 2005)

Sec. 13-26-4. Permit application.

Persons seeking a food establishment wastewater discharge permit shall complete and file with the approving authority, an application in the form prescribed by the approving authority. The applicant may be required to submit, in units and terms appropriate for evaluation, the following information:

Name and address of applicant;

Volume of wastewater to be discharged;

Time of daily food preparation operations;

Description of food preparation, dining room capacity by seats, number of employees, and size of kitchen;

Any other information as maybe deemed by the approving authority to be necessary to evaluate the permit application.

The approving authority will evaluate the data furnished by the applicant and may require additional information. After evaluation and acceptance of the data furnished, an on-site inspection of the waste discharge system, treatment systems or other systems relating to the waste discharge may be required. The approving authority may then issue a food establishment wastewater discharge permit subject to the terms and conditions provided herein.
(Ord. No. 5099, § 5(part), 2005)

Sec. 13-26-5. Duration of permits.

Permits shall be issued for a specified time period, not to exceed five years. A permit may be issued for a period less than a year or may be stated to expire on a specific date. If the permittee is not notified by the city 30 days prior to the expiration of the permit, the permit shall be extended one additional year. The terms and conditions of the permit may be subject to modification and change by the city during the life of the permit as limitations or requirements as identified in sections 13-24-3 and 13-24-4 are modified and changed. The permittee shall be informed of any proposed changes in his permit at least 30 days prior to the effective date of change. Any changes or new conditions in the permit shall include a reasonable time schedule for compliance.
(Ord. No. 5099, § 5(part), 2005)

Sec. 13-26-6. Transfer of permit.

Food establishment wastewater discharge permits shall be issued only for specific use for a specific operation. Any sale, lease, transfer, or assignment of the premises or operation for which the permit was issued shall require a new permit to be issued. Any new or changed conditions of operation shall require a new permit to be issued.
(Ord. No. 5099, § 5(part), 2005)

Sec. 13-26-7. Revocation of food establishment wastewater permit.

The approving authority may revoke the permit of any permittee who is found to be in violation of this ordinance or who:

Fails to install grease pretreatment devices as required by permit;

Fails to fulfill reporting requirements or pretreatment maintenance as required by permit;

Refuses reasonable access to the permittee's premise for the purpose of inspection or monitoring; or

Violates conditions of the permit.
(Ord. No. 5099, § 5(part), 2005)

Sec. 13-26-8. Grease pretreatment required.

Permittee shall make wastewater acceptable under the limitations established herein before discharging to any public sewer. All permittees shall be required to install an approved type grease pretreatment device in the waste line leading from the food preparation area, or from sinks, drains, appliances, and other fixtures or equipment used in food preparation or cleanup where grease may be introduced into the sewerage system. Such grease pretreatment devices shall be installed to remove grease from wastewater and shall be maintained in efficient operating conditions by periodic removal of the accumulated grease. No such collected grease shall be introduced into any drainage piping or public sewer.

Each permittee shall also be required to provide a collection drum or container for the purpose of physically segregating oils, greases, and greasy solids. Permittees shall establish procedures for personnel to practice maximum segregation of oils, greases, and greasy solids to the collection drum or container prior to washing and other water cleaning, which goes into sewers. The permittee shall be responsible for the proper removal and disposal by appropriate means of the material captured from either grease pretreatment devices on wastewater lines or the collection drum for segregating oils, grease, and greasy solids.
(Ord. No. 5099, § 5(part), 2005)

Sec. 13-26-9. Maintenance reports.

The approving authority shall require the permittee to keep records of grease pretreatment device cleaning, maintenance and grease removal on site. The approving authority may require the permittee to provide results of periodic measurements of its discharge, which is to include chemical analysis of oil and grease content. Permittees shall allow the city or its representative ready access at all reasonable times to all parts of the premises for purposes of sampling and inspections.
(Ord. No. 5099, § 5(part), 2005)

Sec. 13-26-10. Penalty for violation and civil liability.

Any person(s) discharging wastewater in violation of the food establishment wastewater discharge permits is subject to fines, penalties, cost recovery, injunction, termination of sewer service, permit revocation, and/or such other remedies as are available to the approving authority under section 13-36-3.
(Ord. No. 5099, § 5(part), 2005)

CHAPTER 13-28. SEWER FEES AND CHARGES

Sections:

Sec. 13-28-1. Established—Basis for determination.
Sec. 13-28-2. Distribution of funds—Accounting therefore.
Sec. 13-28-3. Sewer fee review.
Sec. 13-28-4. Appeals.
Sec. 13-28-5. Grays Creek Special Sewer Service District 1.
Sec. 13-28-6. Loosahatchie River Special Sewer Service Area.
Sec. 13-28-7. Billing and collection.
Sec. 13-28-8. Mary's Creek Special Sewer Service Area.
Sec. 13-28-9. Grays Creek Special Sewer Service District 2.

Sec. 13-28-1. Established—Basis for determination.

A. Requirements generally. In accordance with Public Law 92-500 and Title 40, Chapter 1, Subchapter B, Part 35, Subpart E, Section 35.925-11, which requires the city to implement a wastewater treatment user's charge, each user will pay its proportionate share of the cost for operation and maintenance of the total treatment works. Direct and incidental costs to the city, including, but not limited to, administrative, technical and legal expenses, shall be considered a part of the cost of operations and maintenance of the total treatment works. There shall be two types of charges: The first type of charge is volumetric charge; the second is a charge for treating wastewater, which has an excessive strength.

B. Sewer service charge. The sewer service charge shall be made up of two types of charges.

1. Volumetric charge. All customers will be charged a volumetric charge based on the equivalent strength of domestic sewage BOD5 of 250 milligrams per liter, SS of 300 milligrams per liter, and COD of 800 milligrams per liter. Since seven and forty-eight one hundredths (7.48) gallons equal one cubic foot, 1,000 gallons equals 133.689 cubic feet (cf) or 1,000 gallons equals 1.33689 hundred cubic feet (cf). The volumetric charge per 1,000 gallons shall be based on annual debt service, capital costs, treatment and operations and maintenance costs, and all other charges assigned to the sewer fund.

All customers shall be charged a volumetric charge in accordance with the following fee schedule until changed by amendment to this section. The volumetric charge shall be assessed against the name in which a meter has been installed.

Beginning January 1, 2020, the volumetric charge will be $3.32 per 1,000 gallons of flow. A residential maximum volume fee of $75.00 and a minimum of $8.65 per month per individual dwelling unit is herewith established.

Notwithstanding the foregoing, in the case of multifamily dwellings, a portion of the volumetric charge may be recovered through a monthly flat rate per customer charge. The charge, as determined by the director of public works, shall not exceed the amounts set forth in the fee schedule below. Amounts collected through any monthly flat rate charge shall be credited in accordance with section 13-28-56.

Beginning January 1, 2020	$12.95 per month

All citizens who qualify for the solid waste fee discount program as delineated in section 9-56-12, City of Memphis, Code of Ordinances shall be charged a reduced fee for wastewater use in accordance with the following fee schedule, until changed by amendment to this section:

Beginning January 1, 2020	$2.43 per 1,000 gallons

2. Additional treatment charge. In addition to the volumetric charge, all users who discharge wastewater with a strength greater than domestic sewage which shall include, but not be limited to, BOD of 250 milligrams per liter, SS of 300 milligrams per liter, and COD of 800 milligrams per liter will be assessed an additional treatment charge (ATC) based on the following formula:

$$ATC = \frac{U(B)T(B)}{B} + \frac{U(S)T(S)}{S} + \frac{U(C)T(C)}{C}$$

Where:

U(B) = BOD loading in excess of 250 milligrams per liter

T(B) = Treatment costs assigned to BOD (includes debt service, operation, maintenance, and replacement costs)

B = Total BOD loading or BOD capacity of treatment plants, whichever is less

U(S) = Suspended solids loading in excess of 300 milligrams per liter

T(S) = Treatment costs assigned to suspended solids (includes debt service, operation, maintenance, and replacement costs)

S = Total suspended solids loading or suspended solids capacity of treatment plants, whichever is less

U(C) = COD loading in excess of 800 milligrams per liter

T(C) = Treatment costs assigned to COD (includes debt service, operation, maintenance, and replacement costs)

C = Total COD loading or COD capacity of treatment plants, whichever is less

Sampling frequency for determination of the ATC will be specified in the discharge permit. COD or TOC analytical results may be used in lieu of the BOD test if the BOD test is not applicable due to a toxic effect of the wastewater or a substantial correlation can be developed between BOD and the substitute test, and if allowed by the approving authority. If a BOD test is not applicable due to a toxic effect, then the approving authority has the authority to require the discharger to determine the cause of the toxic effect and then to eliminate the constituent causing the toxic effect.

3. The division of public works may impose and modify such additional surcharges as it deems appropriate to address, among other things, disproportional costs associated with the discharge of wastewater by one or more users. For example, a fee schedule may be established to address disproportional costs the city incurs due to color, COD (due to its impacts on the city's disinfection process), sulfur (due to its impact on biogas generation), dissolved organics (due to its impact on disinfection costs) or fats oils and grease (due to its impact on the collection system). Nothing herein shall be deemed to require the city to accept such wastes for treatment.

C. Cooperative agreements. The sewer service charges in this section are applicable to every person inside and outside the corporate limits of the city whose sewage or wastewater empties into the city's sewage system for eventual disposal through the sewage system and sewage or wastewater treatment plants. The city may enter into appropriate agreements with the county and all other municipalities in the county or elsewhere using the city's sewage system for the disposal of their sewage or wastewater, which agreements shall provide for the implementation of the charges herein and the billing and collection thereof. Such county and municipalities shall be required to enter into such agreement in order to continue their position of discharging their sewage and wastewater through the sewerage system established by the city. All funds collected shall be deposited with the city in the sewer treatment fund in accordance with applicable agreements.

D. Private wells. Those users having private wells will install either water meters on the wells or approved flow metering devices on wastewater discharged to the city sewers. These water meters are subject to approval, inspections, and any maintenance, calibration, record keeping, and reporting requirements deemed necessary by the control authority to continually and reliably produce accurate flow volumes. Wastewater discharge flow metering devices requirements are found in section 13-24-47. Users will be classified as residential or commercial-industrial according to classifications established by the light, gas and water division or other water-serving utility.

E. Seasonal adjustment of sewer fees. Section 13-28-1(B) establishes a monthly maximum charge for residential sewer service regardless of the amount of water flow measured in a billing period. During the months of June, July, August, and September, the maximum charge shall be reduced, and the following fee shall apply for residential customers until changed by amendment to this section:

> June through September 2020 and during such months for subsequent years: $50.00

Those residential customers living in special sewer service surcharge areas will not be relieved of the flat rate charges even if their volumetric charges are reduced by the monthly maximum charge. The appropriate flat rate charge will be added to the volumetric charge to reach the adjusted monthly value. No such relief shall be granted to those customers residing in other cities or service areas whose fees are assessed based upon current contracts and agreements.

F. Any user desiring to exercise his option of installing an approved metering device shall notify the control authority of his exercise of the option, and the control authority from the date of installation of the metering device shall adjust its charges back to the date of the notice of the user to install the metering device or 90 days, whichever is sooner and such adjustment shall be based upon the average charge for the 90 days following the installation of the metering device. Those users having private wells shall have 90 days in which to install a water meter or a metering device for measuring wastewater discharged into the city sewer system. The city shall estimate charges for the period of time prior to the installation of the device and shall adjust the charges based on 90 days experience after the installation of the device. If a private well owner installs a water meter and thereafter elects to install a metering device for measuring wastewater discharge into the city sewerage system, then he likewise shall have his charges adjusted from the time of the installation of the device back to the date of notice to the control authority or 90 days, whichever is sooner, and such adjustment shall be based on the charges for 90 days following the installation. Wherever used in this section, the word "sewer" shall mean "sanitary sewer".

G. Groundwater remediation and monitoring wells. Owners or operators of groundwater remediation and/or monitoring wells, such as for TDEC leaking underground storage tank (LUST) sites or dry cleaner environmental remediation program (DCERP) sites, shall be subject to applicable rates based on flow and pollutants.

(Code 1985, § 33-131; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5036, § 1(part), 2004; Ord. No. 5099, § 6, 2005; Ord. No. 5312, § 1(33-131), 6-2-2009; Ord. No. 5356, § 1(33-131), 6-8-2010; Ord. No. 5498, § 1, 3-5-2013; Ord. No. 5514, § 1, 6-4-2013; Ord. No. 5651, § 1, 7-25-2017; Ord. No. 5738, § 1, 12-3-2019; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-28-2. Distribution of funds—Accounting therefor.

The division of public works shall institute an accounting system reflecting an equal distribution of total funds produced under the division based upon the respective needs of each segment of the wastewater treatment operations and maintenance functions, including but not limited to, treatment plant operations; sewer maintenance; sewer design; sewer construction; pollution control monitoring; wastewater treatment capital improvements bond indebtedness loan repayments; direct and incidental costs to the city, including, but not limited to, administrative, technical and legal expenses; and other expenditures necessary for an effective wastewater treatment program. Revenue generated under this division shall be used exclusively for the wastewater treatment program.

(Code 1985, § 33-132; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-28-3. Sewer fee review.

Rates generated under chapters 13-8, 13-12, 13-16, 13-28 and 13-32 of this title shall be reviewed periodically and approved or adjusted by the division of public works subject to the approval of the Memphis City Counsel.

(Code 1985, § 33-133; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-28-4. Appeals.

Appeals related to sewer use fees, connection fees, development fees, and/or sewer extension fees in situations in which the owner, user, company, etc., feels that extenuating circumstances exist that warrant a modification of the applicable fee should be made to the director of public works or his/her designee. The director of public works or his/her designee shall have authority to

modify or waive fees as is considered appropriate. The decision of the director of public works or his/her designee shall be final.
(Code 1985, § 33-134; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-28-5. Grays Creek Special Sewer Service District 1.

Due to the cost of designing, constructing, construction and financing a sewer system for the Grays Creek Drainage Basin the following sewer infrastructure surcharge fees are hereby established for any person directly or indirectly served by the Grays Creek Outfall Sewer outfall sewer:

A. Residential lot infrastructure surcharge development fee (which fee shall be in addition to normal development fees) shall be $1,000.00 per lot.

B. Multifamily dwelling infrastructure surcharge development fee (which fee shall be in addition to normal development fees) shall be the greater of $3,500.00 per acre or $415.00 per unit.

C. Commercial and industrial multi-unit building infrastructure surcharge development fee (which fee shall be in addition to normal development fees) shall be the greater of $50.00 per front foot, or $3,500.00 per acre.

D. Residential and commercial infrastructure user surcharge fee (which shall be in addition to normal user fees) shall be $6.00 per month.

E. Industrial user infrastructure surcharge fee (which shall be in addition to normal user fees) shall be ($0.60) per 1,000 gallons.

(Code 1985, § 33-135; Ord. No. 4443, § 3, 11-5-1996; Ord. No. 5196, § 2, 12-19-2006; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-28-6. Loosahatchie River Special Sewer Service Area.

There is now established the Loosahatchie River special sewer service area. Due to the cost of designing, constructing and financing a sewer system for the Loosahatchie River Drainage Basin east of the Illinois Central railroad and north of the existing city limits for the city (as of March 31, 1999), the following sewer infrastructure surcharge fees are established for any Person directly or indirectly served by the Loosahatchie River interceptor within the bounds delineated above.

A. Residential lot infrastructure surcharge development fee (which fee shall be in addition to normal development fees) shall be $1,000.00 per lot.

B. Multifamily dwelling infrastructure surcharge development fee (which shall be in addition to normal development fee shall be the greater of $3,500.00 per acre or $415.00 per unit.

C. Commercial and industrial multiunit building infrastructure surcharge development fee (which fee shall be in addition to normal development fees) shall be the greater of $50.00 per front foot or $3,500.00 per acre.

(Code 1985, § 33-136; Ord. No. 4734, § 1, 1-18-2000; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-28-7. Billing and collection.

A. The sewer service charge shall be included each month on the bills rendered by the light, gas and water division, or other serving utility, in accordance with its standard billing practices. Such charges shall be rendered on the first bill of the serving utility sent out on and after June 1, 1979, and for each month thereafter. Billings separate from those made by the light, gas and water division, as determined by the director of public works, may be made to commercial and users. Failure to pay the sewer service charge within 30 days from due date of the utility statement shall be grounds for terminating water service by the serving utility.

B. When service commences or ceases, applicable charges may be prorated.

C. If service shall be supplied to a location, the occupant or tenant of which was vacated, and the city is satisfied that there has been a termination of sewer service, then the city, on timely application of the owner or agent thereof, may suspend liability for such charges, and such charges shall be reinstated for the next utility bill rendered to the occupant or tenant of such premises.

D. Charges based on metered measurement of volume discharged to the sewer system and/or additional treatment charges based on wastewater strength, shall be paid monthly to the city in a manner prescribed by the division of public works.

E. The sewer service charges are applicable to every person, inside and outside the corporate limits of the city, whose sewage and wastewater empties into the city's collection and treatment systems.

F. Credit for prior billing errors is limited to errors occurring less than or equal to 12 months prior to the date that the claim for credit is made by residential or commercial customers.

G. In accordance with the apartment credit program the approving authority has the right to charge each tenant $12.95 per month effective January 1, 2020, if so requested in writing by the apartment owner, until this section is otherwise amended. The total amount collected will then be credited against the amount billed from the master water meter reading each month.

H. Commercial and industrial users that are billed separately from the light, gas, and water division or other serving utility billing system will be charged a late fee of one percent or $500.00, whichever is less, for any portion of each month in which billing information as required is not submitted to the sewer billing office by the 15th of each month for the previous month.
(Code 1985, § 33-156; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5036, § 1(part), 2004; Ord. No. 5099, § 7, 2005; Ord. No. 5312, § 1(33-156), 6-2-2009; Ord. No. 5356, § 1(33-156), 6-8-2010; Ord. No. 5651, § 3, 7-25-2017; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-28-8. Mary's Creek Special Sewer Service Area.

There is now established the Mary's Creek Special Sewer Service District. Due to the cost of designing, construction and financing a sewer system for the Mary's Creek drainage basin the following sewer infrastructure surcharge fees are established for any person directly or indirectly served by the Mary's Creek. Mary's Creek is a tributary of Gray's Creek in an area north of the Wolf River, east of the City of Memphis, and in the City of Memphis annexation reserve area as of July 2004. Mary's Creek runs generally east to west. Sewer service provided to Mary's Creek will only service land in the city and/or city annexation area:

A. Residential lot infrastructure surcharge development fee (which fee shall be in addition to normal development fees) shall be $2,200.00 per lot.

B. Multifamily dwelling infrastructure surcharge development fee (which shall be in addition to normal development fees) shall be the greater of $7,700.00 per acre or $915.00 per unit.

C. Commercial and industrial multiunit building infrastructure surcharge development fee (which fee shall be in addition to normal development fees) shall be the greater of $110.00 per front foot or $7,700.00 per acre.

D. Residential and commercial infrastructure user surcharge fee (which shall be in addition to normal user fees) shall be $12.00 per month.

E. Industrial user infrastructure surcharge fee (which shall be in addition to normal user fees) shall be $1.20 per 1,000 gallons.

(Ord. No. 5070, § 1, 2004; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-28-9. Grays Creek Special Sewer Service District 2.

There is now established the Grays Creek Special Sewer Service District 2. Due to the cost of designing, construction and financing a sewer system for the Grays Creek Special Sewer Service District 2, the following sewer infrastructure surcharge fees are established for any person directly or indirectly served by this portion of the Grays Creek sewer basin. Grays Creek District 2 begins at the upstream terminus of the interceptor constructed under the original Grays Creek Special Sewer Service Area (hereafter called District 1). The general boundaries of district 2 are the Memphis annexation area in the Grays Creek drainage basin that is upstream of a point approximately one mile east of Pisgah Road. This encompasses the area outside of Grays Creek District 1 that is bounded on the north by U.S. Highway 64, on the west by: (1) the eastern ridge line of an unnamed tributary to Grays Creek that is approximately 2,000 feet west of Roland Road; said tributary is north of and drains southward into Grays Creek; and (2) the eastern ridge line of an unnamed tributary to Grays Creek approximately 1,800 feet east of Pisgah Road; said tributary is south of and drains northward into Grays Creek. The southern boundary of this district is the Grays Creek Basin ridge line which generally follows Macon Road east of Pisgah. The eastern boundary is the Shelby County line which is also the eastern limit of the City of Memphis annexation reserve area. Sewer service will only be provided to

those areas in Grays Creek District 2 that are within the current limits of the City of Memphis and/or the City of Memphis annexation reserve area.

A. Residential lot infrastructure surcharge development fee (which fee shall be in addition to normal development fees) shall be $2,500.00 per lot.

B. Multifamily dwelling infrastructure surcharge development fee (which shall be in addition to normal development fees) shall be the greater of $8,750.00 per acre or $1,040.00 per unit.

C. Commercial and industrial multiunit building infrastructure surcharge development fee (which fee shall be addition to normal development fees) shall be the greater of $125.00 per front foot or $8,750.00 per acre.

D. Residential and commercial infrastructure user surcharge fee (which shall be in addition to normal user fees) shall be $12.00 per month.

E. Industrial user infrastructure surcharge fee (which shall be in addition to normal user fees) shall be $1.20 per 1,000 gallons.

(Ord. No. 5196, § 1, 12-19-2006; Ord. No. 5793, § 4, 8-17-2021)

CHAPTER 13-32. POWERS AND AUTHORITY OF INSPECTORS*

Sections:

Sec. 13-32-1. Authority to enter, sampling and oversight.
Sec. 13-32-2. Injury to or by city employees engaged in inspection activities.
Sec. 13-32-3. Authority to enter upon easements for the purposes of inspection of sewerage works.

Sec. 13-32-1. Authority to enter, sampling and oversight.

Inspectors may include representatives of the City of Memphis, division of public works, control authority, and/or its designee (including contractors), bearing proper credentials and identification. Inspectors shall be permitted to enter appropriate property areas at all reasonable times for the purpose of inspection, observation, measurement, sampling, and testing as the inspector deems necessary in accordance with this chapter. Sampling, inspection and other oversight may be undertaken at any location at the facility site including, but not limited to, effluent discharge points, internal wastestream points and manholes located on the user's owned or occupied property. This includes the authority to inspect production, waste and other areas to ascertain whether the purposes of this chapter are being met and all requirements are being complied with. Persons or occupants of premises where regulated activities occur shall allow the inspector ready access at all reasonable times, at a minimum the days and hours of operations for the purposes of inspection, sampling, testing, photographing, videotaping, copying documents and records, conducting interviews in the performance of their duties. Access to the property for the purposes set forth herein shall not be conditioned upon the City of Memphis and/or the inspectors signing an access agreement, including, but not limited to, a document pertaining to the potential waiver or release from liability or provisions pertaining to secrecy, confidentiality or disclosure of information. The inspector shall have the right to set up on the user's property such sensors or other devices as are necessary to conduct sampling, metering operations or other oversight, which includes, but is not limited to, composite samplers, discrete samplers, flow measuring devices, continuous monitoring devices and/or sensors, controllers, remote telemetry devices, modems, and cleaning devices such as air blasts or water blasts. Where a user has security measures in force, which would require proper identification and clearance before entry into the premises, the user shall make necessary arrangements with security personnel so that, upon presentation of suitable identification, inspectors shall be permitted to enter without delay for the purposes of performing their specific responsibilities.

(Code 1985, § 33-141; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-32-2. Injury to or by city employees engaged in inspection activities.

While performing the necessary work on private properties referred to in section 13-32-1 above, representatives of the division of public works, control authority and/or its designee shall observe all safety rules applicable to the premises established by the company except as otherwise deemed necessary by the city (e.g., to address an emergency situation).

(Code 1985, § 33-142; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 4, 8-17-2021)

Sec. 13-32-3. Authority to enter upon easements for the purposes of inspection of sewerage works.

Representatives of the division of public works (including its designee), and Tennessee Department of Environment and Conservation bearing proper credentials and identification, shall be permitted to enter all private properties through which the city holds a duly negotiated easement for the purposes of inspection, observation, measurement, sampling, repair and maintenance of any portion of the sewerage works lying within such easement. All entry and subsequent work, if any, on such easement shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

(Code 1985, § 33-143; Ord. No. 4023, § 1, 3-26-1991; Ord. No. 5793, § 4, 8-17-2021)

***Editor's note—**Ord. No. 5793, § 4, adopted August 17, 2021, amended ch. 13-32, §§ 13-32-1—13-32-4 in its entirety to read as herein set out. Former ch. 13-32, §§ 13-32-1—13-32-4, pertained to inspection of wastewater treatment facilities; said ordinance repealed § 13-32-4, which pertained to termination of service upon finding of violation and derived from Code 1985, § 33-144; Ord. No. 4023, § 1, 3-26-1991.

CHAPTER 13-36. REVIEW AND ENFORCEMENT*

Sections:

Sec. 13-36-1. Local hearing authority.
Sec. 13-36-2. Purpose.
Sec. 13-36-3. Composition, length of term, officers.
Sec. 13-36-4. Removal.
Sec. 13-36-5. Powers and duties.
Sec. 13-36-6. Appeal.
Sec. 13-36-7. Quorum.
Sec. 13-36-8. Members to be residents of city.
Sec. 13-36-9. Members oath.
Sec. 13-36-10. Hearings.

Sec. 13-36-1. Local hearing authority.

There is hereby created and established a local hearing authority to be known as the Memphis Wastewater Hearing Authority and referred to hereinafter as the "hearing authority."
(Ord. No. 5445, § 1, 4-3-2012)

Sec. 13-36-2. Purpose.

The hearing authority shall serve as the local hearing authority as prescribed in T.C.A. § 69-3-124 and shall be responsible for the review of orders issued or actions undertaken by the director of public works or his designee pursuant to the sewer use ordinance, pretreatment statutes codified at T.C.A. §§ 69-3-123—69-3-129, and such requirements as set forth in the National Pollutant Discharge Elimination System ("NPDES") permit issued to the City of Memphis.
(Ord. No. 5445, § 1, 4-3-2012)

Sec. 13-36-3. Composition, length of term, officers.

A. The hearing authority shall be composed of the following seven members who shall be appointed by the mayor subject to approval by the Memphis City Council, and shall constitute the voting members of the hearing authority:

Representative Group (# of members)	*Length of Term (years)*
Industry (1)	1
Private Citizenry (3)	2
Engineering/Science (2)	2
Public Interest Group/ University (1)	1

B. A chairperson of the hearing authority shall be elected at the first meeting of each newly appointed hearing authority from among its own membership to serve for a term of one year.

C. The director of public works or his designee shall serve as the hearing authority's technical secretary.
(Ord. No. 5445, § 1, 4-3-2012)

Sec. 13-36-4. Removal.

Members may be removed from the hearing authority for continued absence from meetings or other just cause in accordance with the procedure for removal of board or commission members set forth within Home Rule Ordinance No. 1852 of the City Charter.
(Ord. No. 5445, § 1, 4-3-2012)

Sec. 13-36-5. Powers and duties.

In addition to any other duty or responsibility otherwise conferred upon the hearing authority by this chapter, the hearing authority shall have the duty and power as follows:

1. To recommend to the director of public works as the local administrative officer that this chapter or any provision included within this chapter be amended or modified;

2. To establish, modify or amend procedural rules governing hearings, orders, issuance of permits, and all other matters not specifically requiring a hearing, provided that such rules do not conflict with applicable state or federal law or the City Code of Ordinances;

3. To hold meetings and such special meetings as the hearing authority may find necessary;

4. To hold hearings upon appeals from orders or actions of the director of public works as the local administrative officer in accordance with T.C.A. § 69-3-124;

***Editor's note—**Ord. No. 5445, § 1, adopted April 3, 2012, repealed the former Ch. 13-36, §§ 13-36-1—13-36-4, and enacted a new Ch. 13-36 as set out herein. The former Ch. 13-36 pertained to sewage pretreatment enforcement and derived from Code 1985; Ord. No. 4023, 3-26-1991; Ord. No. 5099, 2005.

5. To hold hearings relating to the issuance, reissuance, suspension, revocation or modification of an industrial wastewater discharge permit and issue appropriate orders relating thereto.

6. To hold such other hearings relating to any aspect or matter in the administration of this chapter and to make such determinations and issue such orders as may be necessary to effectuate the purposes of this chapter;

7. To obtain assistance upon request from the director of public works or his designee as the hearing authority might need;

8. In addition to any other power granted by this title, the hearing authority is granted the authority to review the assessment of a civil penalty against any person in an amount not to exceed the sum of $10,000.00 per day for each day of violation during which the act or omission continues or occurs in accordance with T.C.A. § 69-3-125;

9. The decision of the hearing authority shall become final and binding on all parties unless appealed to the courts as provided in section 13-36-6 which governs appeals.

(Ord. No. 5445, § 1, 4-3-2012)

Sec. 13-36-6. Appeal.

Pursuant to T.C.A. § 69-3-124(b), an appeal may be taken from any final order or other final determination of the hearing authority by any party who is or may be adversely affected thereby, to the chancery court pursuant to the common writ of certiorari set out in T.C.A. § 27-8-101 within 60 days from the date such order or determination is made.
(Ord. No. 5445, § 1, 4-3-2012)

Sec. 13-36-7. Quorum.

A quorum of the hearing authority must be present at any regular or special meeting in order to conduct a hearing. Four members of the authority shall constitute a quorum.
(Ord. No. 5445, § 1, 4-3-2012)

Sec. 13-36-8. Members to be residents of city.

The members of the hearing authority shall be residents of the city and shall have been for at least three consecutive years immediately preceding their appointment.
(Ord. No. 5445, § 1, 4-3-2012)

Sec. 13-36-9. Members oath.

Each member of the hearing authority shall take an oath to faithfully perform the duties imposed upon him without fear or favor, and in full accordance with the constitution and laws of the state and the ordinances of the city.
(Ord. No. 5445, § 1, 4-3-2012)

Sec. 13-36-10. Hearings.

Any hearing or rehearing brought before the local hearing authority shall be conducted in accordance with T.C.A. § 69-3-124.
(Ord. No. 5445, § 1, 4-3-2012)

CHAPTER 13-40. STORMWATER MANAGEMENT AND POLLUTION CONTROL

Sections:

Sec. 13-40-16. Purpose.
Sec. 13-40-17. Industry defined.
Sec. 13-40-18. Right of inspection defined.
Sec. 13-40-19. Availability of information on discharger to public—Use of information accepted as confidential.
Sec. 13-40-20. Information required.
Sec. 13-40-21. SWPPP plan requirements.
Sec. 13-40-22. Samples.
Sec. 13-40-23. Reporting.
Sec. 13-40-24. Stormwater discharge to sanitary sewer—Approval required.
Sec. 13-40-25. Accidental discharges.
Sec. 13-40-26. Fraud and false statements.
Sec. 13-40-27. Administrative enforcement remedies.
Sec. 13-40-28. Unlawful acts—Misdemeanor.
Sec. 13-40-29. Civil penalty for violation.
Sec. 13-40-30. Reserved.
Sec. 13-40-31. Appeal judicial proceedings and relief.
Sec. 13-40-32. Damages—Disposition of funds.
Sec. 13-40-33. Records retention.
Sec. 13-40-34. Reserved.
Sec. 13-40-35. Memphis Stormwater Board—Created.

ARTICLE 1. GENERAL PROVISIONS

Sec. 13-40-1. Purpose.

A. It is the purpose of this chapter to protect, maintain and enhance the environment of the City of Memphis and the short-term and long-term public health, safety and the general welfare of the citizens of the city by controlling discharges of pollutants to the city MS4 and to maintain and improve the quality of the receiving waters into which the stormwater outfalls flow, including without limitation, lakes, rivers, streams, ponds, wetlands and ground water of the city.

B. It is further the purpose of this chapter to enable the city to comply with the NPDES permit and applicable regulations (at 40 CFR 122.26) for stormwater discharges.

(Code 1985, § 33-200; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-2. Definitions.

For the purpose of this chapter the following terms, phrases and words and their derivatives, shall have the meaning given herein:

Accidental discharge means a discharge prohibited by this chapter into the MS4 which occurs by chance and without planning or consideration prior to occurrence.

Best management practices or *BMPs* means schedules of activities, prohibitions of practices, maintenance procedures and other management practices to prevent or reduce the pollution of stormwater runoff. BMPs also include treatment requirements, operating procedures and practices to control site runoff, spillage or leaks, sludge or waste disposal or drainage from raw materials storage.

Clean Water Act or the *Act* means the Federal Water Pollution Control Act, as amended, codified at 33 USC 1251 et seq.

Commercial means property devoted in whole or in part to commerce, that is, the exchange and buying and selling of commodities or services. The term shall include, by way of example, but not be limited to, the following businesses: amusement establishments, animal clinics or hospitals, automobile service stations, automobile dealerships for new or used vehicles, automobile car washes, automobile and vehicular repair shops, banking establishments, beauty shops and barbershops, bowling alleys, bus terminals and repair shops, camera shops, dental offices or clinics, day care centers, department stores, drug stores, funeral homes, furniture stores, gift shops, grocery stores, hardware stores, hotels, jewelry stores, laboratories, laundries and dry cleaning establishments, liquor stores, medical offices and clinics, motels, movie theaters, office buildings, paint stores or shops, parking lots, produce markets, professional offices, radio

stations, repair establishments, retail stores, restaurants and similar establishments serving prepared foods and beverages, rooming houses, shopping centers, stationary stores, television stations and production facilities, theaters, truck or construction equipment service stations, truck or construction equipment dealerships for new or used vehicles, truck or construction equipment washing facilities and truck or construction equipment repair shops.

Erosion and sediment control plan means a written plan, including drawings or other graphic representations, for the control of soil erosion and sedimentation resulting from a construction activity.

Impervious means not allowing the passage of water through the surface of the ground or ground covering or a substantial reduction in the capacity for water to pass through the surface of the ground or ground covering.

Industrial means a business engaged in industrial production or service, that is, a business characterized by manufacturing or productive enterprise or a related service business. This term shall include by way of example, but not be limited to the following: apparel and fabric finishers, automobile salvage and junk yards, blast furnace, blueprint and related shops, boiler works, cold storage plants, contractor's plants and storage facilities, foundries, furniture and household goods manufacturing, forge plants, greenhouses, manufacturing plants, metal fabrication shops ore reduction facilities, planing mills, rock crushers, rolling mills, saw mills, smelting operation, stockyards, stone mills or quarries, textile production, utility transmission or storage facilities, truck or construction equipment salvage or junkyards, warehousing and wholesaling facilities.

Institutional means an established organization, especially of a public or charitable nature. This term shall include, by way of example, but not be limited to, the following: churches, community buildings, colleges, day care facilities, dormitories, drug or alcohol rehabilitation facilities, fire halls, fraternal organizations, golf courses and driving ranges, government buildings, hospitals, libraries, kindergartens or preschools, nursing homes, mortuaries, schools, social agencies, synagogues, parks and playgrounds.

Manager means the person designated by the city to supervise the operation of the stormwater management program and who is charged with certain duties and responsibilities by this chapter, or his or her duly authorized representative.

Multifamily residential means an apartment building or other residential structure built for three or more units or lots under common ownership and condominiums of three or more units.

National Pollutant Discharge Elimination System or *NPDES permit* means a permit issued pursuant to section 402 of the Act (33 USC 1342).

Notice of intent or *N.O.I.* means a written notice by the discharge to the Commissioner of the Tennessee Department of Environment and Conservation or his or her designee, that a person wishes his or her discharge to be authorized under a general permit authorized by state law or regulation, particularly Tennessee NPDES general permit number TNR050000 for stormwater discharges associated with industrial activity.

Non-stormwater means any discharge to the MS4 that is not: discharged pursuant to a NPDES permit; discharged pursuant to a State of Tennessee multi-sector general permit for stormwater discharges associated with industrial activity or any discharge as described at 40 CFR part 122.26(d)(2)(iv)(B)(1).

[The next page is T13:39]

Person means any individual, partnership, copartnership, firm, company, trust estate, governmental entity or any other legal entity or their legal representatives, agents or assigns. The masculine gender shall include the feminine, the singular shall include the plural where indicated by context.

Pollution prevention plans means a written site specific plan to eliminate or reduce and control the pollution of stormwater through designed facilities, sedimentation ponds, natural or constructed wetlands and best management practices.

Significant spills includes, but is not limited to releases of oil or hazardous substances in excess of reportable quantities under section 311 of the Clean Water Act (at 40 CFR 110.10 and CFR 117.21) or section 102 of the Comprehensive Environmental Response Compensation and Liability Act (CERCLA), (at 40 CFR 302.4).

Stormwater means stormwater runoff, snow melt runoff and surface runoff and drainage.

Stormwater management means the collection, conveyance, storage, treatment and disposal of stormwater runoff in a manner to meet the objectives of this chapter and its terms, including, but not be limited to measures that control the increased volume and rate of stormwater runoff and water quality impacts caused by manmade changes to the land.

Stormwater management plan or *SWMP* means the set of drawings and other documents that comprise all of the information and specifications for the programs, drainage systems, structures, BMPs, concepts and techniques for the control of stormwater and which is incorporated at part of the NPDES permit for the city and as part of this chapter.

Toxic pollutant means any pollutant or combination of pollutants listed as toxic in 40 CFR part 401 promulgated by the administrator of the Environmental Protection Agency under the provisions of 33 USC 1317.

Variance means the modification of the minimum stormwater management requirements contained in this chapter and the stormwater management plan for specified circumstances where strict adherence of the requirement would result in unnecessary hardship and not fulfill the intent of this chapter.

Water quality means characteristics that are related to the physical, chemical, biological and/or radiological integrity of stormwater.
(Code 1985, § 33-201; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-3. Abbreviations.

CERCLA means the Comprehensive Environmental Response, Compensation and Liability Act in its original form or as amended.

CFR means Code of Federal Regulations.

USC means United States Code.
(Code 1985, § 33-202; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-4. Unauthorized discharge a public nuisance.

Discharge of stormwater in any manner in violation of this chapter; or any violation of any condition of a permit issued pursuant to this chapter; or any violation of any condition of a stormwater discharge permit issued by the State of Tennessee Department of Environment and Conservation is declared a public nuisance and shall be corrected or abated.
(Code 1985, § 33-206; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-5. Improper disposal.

A. It is unlawful for any person to improperly dispose any contaminant into the MS4. Contaminants include, but are not limited to the following:

1. Trash or debris;
2. Construction materials;
3. Petroleum products including but not limited to oil, gasoline, grease, fuel oil, heating oil or hydraulic fluids;
4. Antifreeze and other automotive products;
5. Metals in either particulate or dissolved form;
6. Flammable or explosive materials;
7. Radioactive materials;
8. Batteries, including but not limited to, lead acid automobile batteries, alkaline batteries, lithium batteries or mercury batteries;
9. Acids, alkalis or bases;
10. Paints, stains, resins, lacquers or varnishes;
11. Degreasers and/or solvents;

12. Drain cleaners;
13. Pesticides, herbicides or fertilizers;
14. Steam cleaning wastes;
15. Soaps, detergents or ammonia;
16. Swimming pool backwash including chlorinated swimming pool discharge;
17. Chlorine, bromine and other disinfectants;
18. Heated water;
19. Animal waste, either from domestic animals or from feeder lot operations;
20. Known leaking sanitary sewers and connections which have remained uncorrected for more than seven days;
21. Recreational vehicle waste;
22. Animal carcasses;
23. Food wastes;
24. Medical wastes;
25. Bark and other fibrous materials;
26. Collected lawn clippings, leaves or branches;
27. Silt, sediment or gravel;
28. Dyes, except as stated in subsection B of this section;
29. Chemicals, not normally found in uncontaminated water;
30. Any hazardous material or waste, not listed above;
31. Washing of fresh concrete for cleaning and/or finishing purposes or to expose aggregates;
32. Junk motor vehicles, as defined in subsection C of this section;
33. Leaking solid waste disposal containers.

B. Dye testing. Dye testing is allowed but requires verbal notification to the city's stormwater manager a minimum of 24 hours prior to the date of the test. The city and Shelby County governmental agencies are exempt from this requirement.

C. Junk motor vehicles defined.

Junk motor vehicle means any vehicle which shall include by way of example but not be limited to the following vehicle types: automobiles, construction equipment, motorcycles and trucks, which meets all of the following requirements:

1. Is three years old or older;
2. Is extensively damaged, such damage including, but not limited to any of the following: a broken window or windshield or missing wheels, engine or transmission;
3. Is apparently inoperable;
4. Is without a valid current registration;
5. Has a fair market value equivalent only to the value of the scrap in it.

(Code 1985, § 33-207; Ord. No. 4538, § 1, 11-18-1997; Ord. No. 5530, § 1, 8-20-2013)

Sec. 13-40-6. Exceptions—Allowable discharges.

The following types of discharges shall not be considered prohibited discharges for the purpose of this chapter unless the director of public works determines that the type of discharge, whether singly or in combination with others, is causing significant contamination of the MS4:

A. Potable water;
B. Potable water line flushing;
C. Uncontaminated water from crawl space, pumps or footing drains;
D. Lawn watering;
E. Residential car and boat washing;
F. Dechlorinated swimming pool water;
G. Materials placed as part of an approved habitat restoration or bank stabilization project;
H. Natural uncontaminated surface water or ground water;
I. Flows from riparian habitats and wetlands;

J. Common practices for water well disinfection; and other discharges as described at 40 CFR 122.26(d)(2)(iv)(B)(1), some of which are described above;

K. Other types of discharges as determined by the director of public works;

L. Unless otherwise prohibited by this chapter, any discharge that could be made directly to waters of the state without a federal or state permit being required.

(Code 1985, § 33-208; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-7. Illicit connection defined.

Any connection, existing or future, identified by the director of public works, as that which could convey anything not composed entirely of surface and stormwater directly to the MS4 is considered an illicit connection and is prohibited with the following exceptions.

A. Connections conveying allowable discharges as defined in section 13-40-6;

B. Connections conveying discharges pursuant to an NPDES permit (other than an NPDES stormwater permit).

(Code 1985, § 33-209; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-8. Monitoring and inspection.

A. *Monitoring*. The manager shall periodically monitor the quantity of and the concentration of pollutants in stormwater discharges from the areas and locations designated in the city stormwater management plan and the NPDES stormwater permit.

B. *Detection of illicit connections and improper disposal.*

1. The manager shall take appropriate steps to detect and eliminate illicit connections to the city MS4, including the adoption of a program to screen illicit discharges and identify their source or sources.

2. The manager shall take appropriate steps to detect and eliminate improper discharges, including programs to screen for improper disposal and programs to provide for public education, public information and other appropriate activities to facilitate the proper management and disposal of used oil, toxic materials and household hazardous waste.

C. *Inspections.*

1. The manager or his or her designee, bearing proper credentials and identification, may enter and inspect all properties for regular periodic inspections, investigations, monitoring, observation, measurement, enforcement, sampling and testing, to effectuate the provisions of this chapter, the stormwater management plan and/or the NPDES stormwater permit. The manager or his or her designee shall duly notify the owner of the property or the representative on site and the inspection shall be conducted at reasonable times.

2. Upon refusal by any property owner to permit an inspector to enter or continue an inspection, the inspector shall terminate the inspection or confine the inspection to areas which no objection is raised. The inspector shall immediately report the refusal and the grounds to the manager. The manager may seek appropriate compulsory process.

3. In the event the manager or his or her designee reasonably believes that discharges into the city MS4 may cause an imminent and substantial threat to human health or the environment, the inspection may take place at any time and without notice to the owner of the property or a representative on site. The inspector shall present proper credentials upon reasonable request by the owner or representative.

4. At any time during the conduct of an inspection or at such other times as the manager or his or her designee may request information from an owner or representative, the owner or representative may identify areas of the facility or establishment, material or processes which contains or may contain a trade secret. If the manager or his or her designee has no clear and convincing reason to question such identification, the inspection report shall note that trade secret information has been omitted. To the extent practicable, the manager shall protect all information which is designated as a trade secret by the owner or their representative.

(Code 1985, § 33-210; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-9. Construction activity.

All construction activity, defined below, shall be in compliance with all applicable requirements under this section.

If one or more acres are disturbed by construction activity, an application shall be applied for under the "State of Tennessee's General Permit for Stormwater Discharges Associated with Construction Activity." If a Tennessee General NPDES Permit is applied for, a copy of the notice of intent (N.O.I.) shall be sent to the manager of the stormwater management section. To seek coverage under the Tennessee Department of Environment and Conservation General Permit, the N.O.I. shall be submitted to the following address:

Stormwater N.O.I. Processing

Division of Water Pollution Control

401 Church Street

Tennessee Department of Environment and Conservation

Nashville, TN 37243-1534

The copy of the N.O.I. should be sent to the following address:

Attn:

Manager/Stormwater Management

City of Memphis-Environmental Engineering

125 N. Main Room 620

Memphis, TN 38103
(Code 1985, § 33-221; Ord. No. 4538, § 1, 11-18-1997; Ord. No. 5116(part), 2005)

Sec. 13-40-10. Construction activity regulated.

A. It shall be unlawful for any person to permit any discharge of stormwater from a construction activity from land owned or controlled by them on a total land area of one or more acres disturbed by construction activity without having received coverage under the general permit for stormwater discharges associated with construction activity from the Tennessee Department of Environment and Conservation, with a copy of the notice of intent (N.O.I.) provided to the stormwater management section at the same address listed in section 13-40-9.

B. The term "construction activity" shall mean any clearing, grading, or excavating that results in the disturbance of more than one acre of total land area. The term shall not include the following:

1. "Surface mining" as the same is defined in T.C.A. § 59-8-202;
2. Such minor construction activities as home gardens and individual home landscaping, home repairs, home maintenance work and other related activities which result in minor soil erosion;
3. The construction of single-family residences when built separately on lots within subdivisions which have been approved and recorded in the office of the Shelby County Register that are not a part of a larger common plan of development; provided that excavation is limited to trenches for the foundation, basements, service and sewer connections, and minor grading for driveways, yard areas and sidewalks;
4. Individual service and sewer connections for single or two family residences;
5. Agricultural practices involving the establishment, cultivation or harvesting of products of the field or orchard, preparing and planting of pasture land, forestry land management practices including harvesting, farm ponds, daily operations, and livestock and poultry management practices and the construction of farm buildings;
6. Any project carried out under the technical supervision of the Soil Conservation Service of the United States Department of Agriculture;
7. Construction, installation or maintenance of electrical, natural gas, telephone and cable television lines or poles;
8. Installation, maintenance, and repair of any underground public utility lines when such activity occurs in an existing hard surface road, street or sidewalk, provided the activity is confined to the area of the road, street or sidewalk which is hard surfaced and a street, curb, gutter or sidewalk permit has been obtained;
9. Construction, repair or rebuilding of track or other related facilities of a railroad company;

These activities may be undertaken without formal notice; however, the persons conducting these excluded activities shall remain responsible for otherwise conducting those activities in accordance with the provisions of this chapter and other applicable law including responsibility for controlling sedimentation and runoff.

C. Best management practices for construction activities. The minimum standards for controlling erosion and sedimentation to prevent or minimize the discharge of stormwater from a construction activity, shall be set forth in the Tennessee Department of Environment and Conservation's "Erosion and Sediment Control Handbook" as adopted and amended from time to time. These erosion and sediment control best management practices ("BMPs") apply to all construction activity regardless if there is a discharge of stormwater from the construction site. The city subject to its sole discretion may waive these BMPs for any construction less than one acre.
(Code 1985, § 33-222; Ord. No. 4538, § 1, 11-18-1997; Ord. No. 5116(part), 2005; Ord. No. 5446, § 2, 4-3-2012)

Sec. 13-40-11. Construction activity letter of intent required.

No discharge of stormwater from a construction activity, whether temporary or permanent, shall be conducted within the corporate boundaries of the City of Memphis unless the developer has submitted a notice of intent to be covered under the state's general NPDES permit for stormwater discharges associated with construction activity ("N.O.I.").
(Code 1985, § 33-223; Ord. No. 4538, § 1, 11-18-1997; Ord. No. 5116(part), 2005)

Sec. 13-40-12. Data required in construction activity letter of intent.

A. To be covered under a L.O.I., the developer shall submit the following information to:

Attn:
Manager/Stormwater Management
664 St. Jude Place
Memphis, TN 38105-2800

B. The L.O.I. shall include:

1. Name, mailing address and location for which the letter of intent is submitted;
2. Name, mailing address, telephone number, ownership status (federal, state, private, public or other entity) of the developer responsible for the construction activity;
3. A site map, on 8½ by 11 inch sized paper with boundaries one to two miles outside the site property, with the site and construction area outlined and with the receiving water or receiving storm sewer highlighted and identified.

C. Construction activities may begin after submission of the letter of intent. One need not wait for approval from the city. When the construction activity is finished the developer shall notify the Memphis MS4 and request termination of the L.O.I. under this chapter. Coverage under this chapter terminates 20 days after the MS4's receipt of such notice.
(Code 1985, § 33-224; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-13. Private infrastructure defined.

Private detention facilities, defined in chapter 6, page 10 of the city's Drainage Design Manual, located in the city engineer's office shall be maintained so as to enhance water quality to meet the requirements of this chapter and the NPDES stormwater permit.
(Code 1985, § 33-229; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-14. Maintenance criteria.

Maintenance of detention facilities shall consist of, but not be limited to, the following items: outlet cleaning, mowing, herbicide spraying, litter control, removal of sediment from basin and outlet control structures and repair of drainage structures. Any material removed from a detention structure shall be disposed of in an environmentally sound manner. Herbicide spraying shall be conducted in an environmentally sound manner.
(Code 1985, § 33-230; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-15. Enforcement options.

Maintenance criteria not performed as listed in section 33-230, or other violations of this article, may be subject to the provisions of sections 33-247 through 33-251 as set forth herein.
(Code 1985, § 33-231; Ord. No. 4538, § 1, 11-18-1997; Ord. No. 5530, § 2, 8-20-2013)

ARTICLE 2. STORMWATER DISCHARGES FROM INDUSTRIAL SOURCES

Sec. 13-40-16. Purpose.

It is the purpose of this article to control stormwater runoff from industrial sources in order to minimize, to the maximum extent practicable, pollutants discharged from industrial sources into the MS4. This reduction will

be achieved by a combination of management practices, control techniques, system design, engineering methods and plan review.
(Code 1985, § 33-236; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-17. Industry defined.

An "industry" is one as defined in section 13-40-2.
(Code 1985, § 33-237; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-18. Right of inspection defined.

Right of inspection is defined in section 13-40-8.
(Code 1985, § 33-238; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-19. Availability of information on discharger to public—Use of information accepted as confidential.

All information and data on a discharger obtained from reports, questionnaires, permits, monitoring programs and from inspections shall be available to the public without restriction unless the discharger specifically requests confidential treatment and is able to demonstrate to the satisfaction of the approving authority that the release of such information would divulge information regarding processes or methods which would be detrimental to the discharger's competitive position. Information accepted by the approving authority as confidential shall not be transmitted to any other governmental agency by the approving authority until and unless prior and adequate notification is received by the discharger. Information accepted by the approving authority as confidential shall not be transmitted to the general public by the approving authority unless written permission has been obtained from the discharger. All information relating to the discharge form a discharger into the MS4 shall not be confidential information. All such information which is submitted to the approving authority shall be available to the public without restrictions.
(Code 1985, § 33-239; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-20. Information required.

As required in the Tennessee multi-sector permit (TMSP) for stormwater discharges associated with industrial activity and any NPDES stormwater permit, all industries discharging into the city storm sewer system shall prepare a stormwater pollution prevention plan (SWPPP). A copy of this SWPPP must be kept on the industrial site and available for inspection and copying at reasonable times by the manager or his or her designee.
(Code 1985, § 33-240; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-21. SWPPP plan requirements.

The SWPPP must follow, at a minimum, the outline of the plan listed in the Tennessee multi-sector permit language or a facility NPDES stormwater permit language, whichever is applicable.
(Code 1985, § 33-241; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-22. Samples.

A. Samples of stormwater collected for compliance monitoring shall be representative of the discharge. Sampling locations will be those defined in the Tennessee multi-sector permit or a NPDES permit. Sampling and analyses shall be in accordance with 40 CFR part 122.21 and 40 CFR part 136 and/or applicable permit language.

B. Samples taken by city personnel for the purpose of determining compliance with the requirements of this chapter or rules adopted hereunder may be split with the discharger if requested before the time of sampling.

C. Sampling manhole or access. The division may require a stormwater discharger to install and maintain at the discharger's expense a suitable manhole or sampling facility at the discharger's facility or suitable monitoring access to allow observation, sampling and measurement of all stormwater runoff being discharged into the city storm sewer system. The manhole shall be constructed in accordance with plans approved by the division and shall be designed so that flow measurement and sampling equipment can be installed. Access to the manhole or monitoring access shall be available to city representatives at all times.
(Code 1985, § 33-242; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-23. Reporting.

A. Any facility required to sample under either the TMSP or an NPDES stormwater permit shall provide a copy of the periodic monitoring report to the city as required in the applicable permit's language.

B. The division may require reporting by dischargers of stormwater runoff to the city stormwater system, where an NPDES stormwater permit is not required, to

provide information to the city. This information may include any data necessary to characterize the stormwater discharge.
(Code 1985, § 33-243; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-24. Stormwater discharge to sanitary sewer—Approval required.

Stormwater discharges to the sanitary sewer are prohibited unless prior written approval is granted from the industrial pretreatment section of the division of public works.
(Code 1985, § 33-244; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-25. Accidental discharges.

A. In the event of any discharge of a material as defined in section 13-40-2 in amounts which could cause a threat to public drinking water suppliers, a significant spill as defined in definitions or any other discharge which could constitute a threat to human health or the environment, the owner or operator of the facility shall give notice to the manager of the stormwater management department and the local field office of the Tennessee Department of Environment and Conservation as soon as practicable, but in no event later than the close of business on the day following the accidental discharge or as soon as the discharger becomes aware of the circumstances.

If an emergency response by governmental agencies is needed, the owner or operator should also call the city's emergency management agency, immediately to report the discharge. A written report must be provided to the manager of stormwater management within five days of the time the discharger becomes aware of the circumstances, unless this requirement is waived by the manager for good cause shown on a case-by-case basis, containing the following particulars.

1. A description of the discharge, including an estimate of volume;
2. The exact dates and times of discharge;
3. Steps being taken to eliminate and prevent recurrence of the discharge;
4. A site drawing should be rendered that shows the location of the spill on the impacted property, the direction of flow of the spill in regards to the topographical grade of the property, the impacted watercourse(s) and the property or properties adjacent to the spill site.

B. The discharger shall take all reasonable steps to minimize any adverse impact to the MS4, including such accelerated or additional monitorings as necessary to determine the nature and impact of the discharge. It shall not be a defense for the discharger in an enforcement action that it would have been necessary to halt or reduce the business or activity of the facility in order to maintain water quality and minimize any adverse impact that the discharge may cause.

C. It is unlawful for any entity, whether an individual, residential, commercial or industry to fail to comply with the provisions of this section.
(Code 1985, § 33-245; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-26. Fraud and false statements.

Any reports required by this chapter or rules adopted hereunder and any other documents required by the city to be submitted or maintained by the discharger shall be subject to the enforcement provisions of this chapter and any other applicable local and state laws and regulations pertaining to fraud and false statements. Additionally, the discharger shall be subject to the provisions of 18 USC 1001 relating to fraud and false statements and the provisions of section 309 of the Clean Water Act, as amended, governing false statements and responsible corporate officials.
(Code 1985, § 33-246; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-27. Administrative enforcement remedies.

The enforcement remedies enumerated herein shall be applicable to all sections of this chapter.

A. *Notification of violation.* Whenever the manager finds any permittee or person discharging stormwater has violated or is violating this chapter, or a stormwater permit or order issued hereunder, the manager or his or her agent may serve upon the user written notice of the violation. This notice shall be by registered or certified mail with return receipt. Within ten days of the receipt date of this notice, an explanation of the violation and a plan for the satisfactory correction and prevention thereof, to include specified required actions, shall be submitted to the manager. Submission of this plan in no way relieves the discharger of liability for any violations occurring before or after receipt of the notice of violation.

B. *Consent orders.* The director of public works is empowered to enter into consent orders, assurances of voluntary compliance or other similar documents establishing an agreement with the person responsible for the noncompliance. Such orders will include specific action to be taken by the permittee or person discharging stormwater to correct the noncompliance within a time period specified by the order. Consent orders shall have the same force and effect as compliance orders issued pursuant to subsection D of this section.

C. *Show cause hearing.* The director of public works may order any person who causes or contributes to violation of this chapter or stormwater permit or order issued hereunder to show cause why a proposed enforcement action not be taken. Notice shall be served on the person specifying the time and place for the meeting, the proposed enforcement action and the reasons for such action and a request that the violator show cause why this proposed enforcement action should not be taken. The notice of the meeting shall be served personally or by registered or certified mail with return receipt at least ten days prior to the hearing. Such notice may be served on any person, principal executive, general partner or corporate officer.

D. *Compliance order.* When the director of public works finds that any person has violated or continues to violate this chapter or a permit or order issued thereunder, he or she may issue an order to the violator directing that, following a specified time period, adequate structures and/or devices be installed or procedures implemented and properly operated. Orders may also contain such other requirements as might be reasonably necessary and appropriate to address the noncompliance, including the construction of appropriate structures, installation of devices, self monitoring and management practices.

E. *Cease and desist orders.* When the director of public works finds that any person has violated or continues to violate this chapter or any permit or order issued hereunder, the director of public works may issue an order to cease and desist all such violations and direct those persons in noncompliance to:

1. Comply forthwith; or

2. Take such appropriate remedial or preventative action as may be needed to properly address a continuing or threatened violation, including halting operations and terminating the discharge.

(Code 1985, § 33-247; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-28. Unlawful acts—Misdemeanor.

It is unlawful for any person to:

A. Violate a provision of this chapter;

B. Violate the provisions of any permit issued pursuant to this chapter;

C. Fail or refuse to comply with any lawful notice to abate issued by the manager, which has not been timely appealed to the director of public works within the time specified by such notice; or

D. Violate any lawful order to the director of public works within the time allowed by such order shall be guilty of a misdemeanor; and each day of such violation or failure or refusal to comply shall be deemed a separate offense and punishable accordingly. Any person found to be in violation of the provisions of this chapter shall be punished by a fine as set out in section 1-24-1.

(Code 1985, § 33-248; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-29. Civil penalty for violation.

A. Any person who violates the provisions of this chapter shall be subject to a civil penalty of not less than $50.00 or more than $5,000.00 per day for each day of violations. Each day of violation may constitute a separate violation. The imposition of a civil penalty under this section may be in addition to the recovery of damages as provided in subsection (D), below.

B. The city shall give the violator 30 days notice of the assessment of any penalty.

C. In assessing a civil penalty, the city may consider the following factors:

1. The harm done to the public health or the environment;

2. Whether the civil penalty imposed will be substantial economic deterrent to the illegal activity;

3. The economic benefit gained by the violator;

4. The amount of effort put forth by the violator to remedy this violation;

5. Any unusual or extraordinary enforcement costs incurred by the city;

6. The amount of penalty established by ordinance or resolution for specific categories of violations, if applicable; and

7. Any equities of the situation which outweigh the benefit of imposing any penalty or damage assessment.

D. The city may also assess damages proximately caused by the violator to the city which may include any reasonable expenses incurred in investigating and enforcing violations of this chapter, or any other actual damages caused by the violation.

E. The violator may appeal the civil penalty or damage assessment by filing a petition for review with the Memphis Stormwater Board in accordance with section 13-40-35. If a petition for review of such damage assessment or civil penalty is not filed within 30 days after the damage assessment or civil penalty is served in any manner authorized by law, the violator shall be deemed to have consented to the damage assessment or civil penalty and it shall become final.

F. The alleged violator may appeal a decision of the Memphis Stormwater Board pursuant to title 27, chapter 9 of the T.C.A.

G. Whenever any damage assessment or civil penalty has become final because of a person's failure to appeal the damage assessment or civil penalty, the city may apply to the appropriate chancery court for a judgment and seek execution of such judgment. In accordance with T.C.A. § 68-221-1106(e) the court, in such proceedings, shall treat the failure to appeal such damage assessment or civil penalty as a confession of judgment.
(Code 1985, § 33-249; Ord. No. 4538, § 1, 11-18-1997; Ord. No. 5446, § 1, 4-3-2012)

Sec. 13-40-30. Reserved.

Editor's note—Ord. No. 5446, § 1, adopted April 3, 2012, repealed § 13-40-30, which pertained to processing a violation and derived from Code 1985, § 33-250; Ord. No. 4538, § 1, 11-18-1997.

Sec. 13-40-31. Appeal judicial proceedings and relief.

The director of public works may initiate proceedings in any court of competent jurisdiction against any person who has or is about to:

A. Violate the provisions of this chapter;

B. Violate the provisions of any permit issued pursuant to this chapter;

C. Fail or refuse to comply with any lawful order issued by the director or public works which has not been timely appealed to the director of public works, within the time allowed by this chapter;

D. Violates any lawful order of the director of public works within the time allowed by such order.

Any person who shall commit any act declared unlawful under this chapter shall be guilty of a misdemeanor and each day of such violation or failure shall be deemed a separate offense and punishable accordingly.

The director of public works, with consent of the mayor may also initiate civil proceedings in any court of competent jurisdiction seeking monetary damages for any damages caused to the MS4 by any person, and to seek injunctive or other equitable relief to enforce compliance, with any lawful orders of the director of public works or the manager.
(Code 1985, § 33-251; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-32. Damages—Disposition of funds.

All damages and civil penalties collected under the provisions of section 13-40-29, following the adjustment for the expenses incurred in making such collections shall be allocated and appropriated to the stormwater management program for its administration.
(Code 1985, § 33-252; Ord. No. 4538, § 1, 11-18-1997; Ord. No. 5446, § 1, 4-3-2012)

Sec. 13-40-33. Records retention.

All discharges subject to this chapter shall maintain and preserve for no fewer than five years, all records, books, documents, memoranda, reports, correspondence and any and all summaries thereof, relating to monitoring, sampling and chemical analyses made by or in behalf of the discharger in connection with its discharge. All records which pertain to matters which are the

subject of any enforcement or litigation activities brought by the city pursuant hereto shall be retained and preserved by the discharger until all enforcement activities have concluded and all periods of limitation with respect to any and all appeals have expired.
(Code 1985, § 33-253; Ord. No. 4538, § 1, 11-18-1997)

Sec. 13-40-34. Reserved.

Editor's note—Ord. No. 5446, § 1, adopted April 3, 2012, repealed § 13-40-34, which pertained to requests for consideration and derived from Code 1985, § 33-254; Ord. No. 4538, § 1, 11-18-1997.

Sec. 13-40-35. Memphis Stormwater Board—Created.

A. There is hereby created and established the Memphis Stormwater Board (hereafter "board") to hear appeals filed by any person relating to an order, permit or such other actions deemed appropriated by the director or incurring a civil penalty or damage assessment imposed by the city pursuant to the City of Memphis Stormwater Ordinance.

B. The board may issue subpoenas requiring attendance of witnesses and production of such evidence as requested, administer oaths, and take testimony as the board deems necessary to fulfill its purpose.

C. The membership of the board shall consist of five members and two alternate members as follows:

Representative Group (# of members)	*Initial Length of Term*	*Subsequent Length of Term*
Development or Industrial Community (1)	1	2
Development or Industrial Community (1)	2	2
Private Citizenry (1)	2	2
Civil or Environmental Engineers (2)	1	2
Civil or Environmental Engineers (1)	2	2
Public Interest Group/University (1)	2	2

1. The members and the alternates shall be appointed by the mayor and confirmed by the council.

2. Each member and alternate member appointed by the mayor must have been a resident of Memphis for not less than one year, and shall continue to maintain such residency throughout such member's term.

3. Each member shall serve without compensation and may be reappointed, but do not succeed themselves automatically.

4. Each member shall serve for a term of two years. However, the initial term of two of the original members representing the civil or environmental engineers group and one of the original members representing the development or industrial community group shall expire after one year and the term of the remaining original members shall expire after two years. Subsequent terms for every group shall expire after two years.

D. The board shall annually select one of its members to serve as chair and another member to serve as vice chair for a period of one year upon a majority vote of all members.

E. The board shall keep complete and accurate records of the proceedings of all meetings and the director of public works or his designee shall serve as the board's technical secretary.

F. No member shall participate in the appeal of any matter in which the member has a direct personal or financial interest.

G. Three members shall constitute a quorum, and the concurrence of a majority of the board present and voting in any matter shall be required for a determination.

H. Members may be removed from the board for continued absence from meetings or other just cause in accordance with the procedure for removal of board or commission members set forth within Home Rule Ordinance No. 1852 of the City Charter.

I. An appeal may be taken from any final order or other final determination of the board by any party who is or may be adversely affected thereby, to the chancery court pursuant to the common writ of certiorari set out in T.C.A. § 27-8-101 within 60 days from the date such order or determination is made.

J. Each member of the board shall take an oath to faithfully perform the duties imposed upon him without fear or favor, and in full accordance with the constitution and laws of the state and the ordinances of the City of Memphis.
(Ord. No. 5446, § 3, 4-3-2012)

CHAPTER 13-41. STORMWATER ENTERPRISE FUND

Sections:

Sec. 13-41-1. Definitions.
Sec. 13-41-2. Declaration of purpose—Establishment of enterprise service area.
Sec. 13-41-3. Powers, duties and responsibilities.
Sec. 13-41-4. Organization.
Sec. 13-41-5. Establishment of SFU, SFU rate and stormwater fee—Establishment of policy regarding expenditure of enterprise revenues.
Sec. 13-41-6. Stormwater fee for single-family detached residential property.
Sec. 13-41-7. Stormwater fee for multi-family residential property.
Sec. 13-41-8. Reserved.
Sec. 13-41-9. Stormwater fee for nonresidential property.
Sec. 13-41-10. Reserved.
Sec. 13-41-11. Appeal of impervious surface calculation.
Sec. 13-41-12. Rate determinations—Compliance with bond covenants.
Sec. 13-41-13. Billing procedures—Delinquent accounts and collection procedures.
Sec. 13-41-14. Review of SFU rate.
Sec. 13-41-15. Reserved.
Sec. 13-41-16. Reserved.
Sec. 13-41-17. Expense of collection of stormwater fees.
Sec. 13-41-18. Reserved.

Sec. 13-41-1. Definitions.

The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

Bonds means revenue bonds, notes, loans or any other debt obligations issued or incurred to finance the costs of construction, engineering, and other studies.

City means the City of Memphis.

Contributor or *user* means any person owning, operating, or otherwise responsible for property within the city which directly or indirectly discharges stormwater, surface or subsurface waters, to any portion of the stormwater system, including direct or indirect discharges to the city's stormwater drainage system, or which is directly or in directly protected by the city's flood protection system or stormwater drainage system. The term "contributor" or "user" means any person responsible for the direct or indirect discharge of stormwater (surface or subsurface waters) to the city's stormwater drainage system.

Costs of construction means costs reasonably incurred in connection with providing capital improvements to the system or any portion thereof, including but not limited to the costs of the following:

1. Acquisition of all property, real or personal, and all interests in connection therewith including all rights-of-way and easements therefor;
2. Physical construction, installation and testing including the costs of labor, services, materials, supplies and enterprise services used in connection therewith;
3. Architectural, engineering, legal and other professional services;
4. Insurance premiums during construction, to the extent not paid for by a contractor for construction and installation;
5. Any taxes or other charges which become due during construction;

6. Expenses incurred by the city or on its behalf with its approval in seeking to enforce any remedy against any contractor or subcontractor in respect of any default under a contract relating to construction;
7. Principal and interest on any bonds; and
8. Miscellaneous expenses incidental thereto.

Debt service means the amount of money necessary annually to pay the interest on outstanding debt and pay the principal of maturing debt.

Developed property means real property upon which a structure or impervious surface has been placed or constructed, thus increasing the amount of rainwater or surface water runoff.

Director means the director of the division of public works or designee.

Dwelling unit means a singular residential housing unit or apartment providing complete, independent living facilities for one or more persons including permanent provisions for living, sleeping, eating, cooking and sanitation.

Exempt property means public rights-of-way including public streets, alleys, sidewalks, and public drainage facilities.

Extension and replacement means costs of extensions, additions and capital improvements to or the renewal and replacement of capital assets or purchasing and installing new equipment for the system or land acquisition for the system and any related costs thereto or paying extraordinary maintenance and repair, including the costs of construction, or any other expenses which are not costs of operation and maintenance or debt service.

Fiscal year means a 12-month period commencing on July 1, and ending on June 30 of the succeeding year.

Flood protection system means the system of levees, floodwalls, floodgates, storm sewer gatewells, and stormwater pumping stations lying adjacent to rivers, creeks, and streams within the city, including associated control and operating equipment and facilities whether adjacent to such rivers, creeks, or streams or remotely located, which are intended to provide flood protection to properties adjacent to such rivers, creeks, and streams.

Impervious area means the number of square feet of hard-surfaced areas which either prevent or retard the entry of water into the subsurface soil, as it entered under natural conditions as undeveloped property, and/or cause water to run off the surface in greater quantities or at an increased rate of flow from that present under natural conditions as undeveloped property, including but not limited to roofs, roof extensions, patios, porches, driveways, sidewalks, concrete/asphalt pavement, gravel surfaces and athletic courts.

Implementation date means the date that the City of Memphis will begin charging the storm water fee to its customers (May 1, 2006). The fee will become due at the end of the month upon which it is charged and will be payable in the following month. For example, the first charge will be due on May 31, 2006. Depending upon the billing cycle it will appear on MLGW utility bills sometime during the month of June 2006. The fee will then be collected in the month of July 2006 when those bills are paid.

Multi-family residential property means a residential structure designed with two or more dwelling units to accommodate two or more families or groups of individuals living separately and not sharing the same living space.

Nonoperating revenues refers to revenues derived from activities other than the basic operations of the stormwater enterprise fund, but excluding interest income on bond proceeds and on contributed capital.

Nonresidential property means any property developed for commercial, industrial, governmental, or institutional use, including churches, hospitals, and other eleemosynary institutions and including multiuse properties incorporating residential uses, but excluding undeveloped property, golf courses, nurseries, and property used exclusively for agricultural purposes.

Operating budget means the annual operating budget for the stormwater enterprise fund adopted by the city council for the succeeding fiscal year.

Operations and maintenance expense means the current expenses, paid or accrued, of operation, maintenance and current repair of the system, as calculated in accordance with sound accounting practice, and includes, without limiting the generality of the foregoing, insurance premiums, administrative expenses including recordkeeping, the cost of materials and supplies used for current operations, and charges for the accumulation of appropriate reserves for current expenses not annually

incurred, but which are such as may reasonably be expected to be incurred in accordance with sound accounting practice.

Revenues means all rates, fees, assessments, rentals, civil penalties, fines, or other charges or other income received by the enterprise fund, in connection with the management and operation of the system, including amounts received from the investment or deposit of moneys in any fund or account and any amounts contributed by the city, all as calculated in accordance with sound accounting practice.

SFU rate means the dollar value periodically determined and assigned to each SFU as a charge for stormwater services, and expressed as a dollar value per SFU per month.

Single-family residential property means a detached residential structure designed as a single dwelling unit to accommodate one family or group of individuals living together and sharing the same living space, but excluding multi-class (i.e., commercial, residential, industrial, institutional etc.) properties which include single-family residential uses.

Single-family unit or *SFU* means the average impervious area of a single-family detached residential dwelling unit located within the city as periodically determined and established as provided in this chapter.

Stormwater drainage system means the system of publicly or privately owned or operated rivers, creeks, ditches, drainage channels, pipes, basins, street gutters, and lakes within the city through which or into which stormwater runoff, surface water, or subsurface water is conveyed or deposited.

Stormwater fee means the fee authorized by state law and this chapter which is established to pay operations and maintenance, extension, replacement and debt service of the stormwater drainage system.

Stormwater enterprise fund or *enterprise fund* means the enterprise fund created by this chapter to operate, maintain and improve the storm drainage system and for such other purposes as stated in this chapter.

Stormwater system or *system* means the existing stormwater facilities, stormwater drainage system, and flood protection system of the city and all improvements thereto which by this chapter are constituted as the property and responsibility of the enterprise, to be operated as an enterprise fund to, among other things; control discharges and flows necessitated by rainfall events; and incorporate methods to collect, convey, store, absorb, inhibit, treat, to prevent or reduce flooding, overdrainage, environmental degradation and water pollution or otherwise affect the quality and quantity of discharge from such system.

Total annual revenue requirements refers to the total amount of revenue required in one year to meet all expenditures incurred during that year for the financing of construction and for the operations and maintenance, including administration and renewal and replacement funding, of the stormwater drainage system, including facilities for the collection, transportation, and treatment of stormwater, and of the flood control protection system, including river levees and stormwater pumping stations.

Undeveloped property means real property that has no impervious area.
(Ord. No. 5135, § 1(part), 2005; Ord. No. 5157, § 1, 2006)

Sec. 13-41-2. Declaration of purpose—Establishment of enterprise service area.

A. The city finds, determines, and declares it to be conducive to the health, welfare, safety and convenience of the city and its residents that a stormwater service area be established within the city. Consequently, pursuant to T.C.A. §§ 68-221-1101 through 68-221-1113, a stormwater enterprise fund, to be known as "The Memphis Stormwater Enterprise Fund," is established, and it is ordained and declared that the city limits shall be and constitute the stormwater enterprise fund service area, and that the enterprise shall comprise and include elements of the city's stormwater drainage and flood protection systems which provide for the collection, treatment and disposal of stormwater, surface water, and groundwater. It is further found, determined, and declared that the elements of the stormwater enterprise fund are of benefit and provide services to all real properties within the incorporated city limits, including property not directly served by the stormwater drainage system, and that such benefits and services may include, but are not limited to, the provision of adequate systems of collection, conveyance, detention, treatment and release of stormwater; the reduction of hazard to property and life resulting from stormwater runoff and flooding; improvement in general health and welfare through reduction of undesirable

stormwater conditions and flooding; and improvement to the water quality in the stormwater and surface water system and its receiving waters.

B. It is further determined and declared to be necessary and conducive to the protection of the public health, welfare, safety and convenience of the city and its residents that charges be levied upon and collected from the owners or occupants of all lots, parcels of real estate, and buildings that discharge stormwater (surface or subsurface waters), directly or indirectly, to the city stormwater drainage system, and that the proceeds of such charges so derived be used for the purposes of operation, maintenance, repair, replacement and debt service for construction of the stormwater drainage and flood protection improvements comprising the stormwater enterprise fund.
(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-3. Powers, duties and responsibilities.

The stormwater enterprise fund shall have the following powers, duties, and responsibilities:

A. Prepare ordinances as needed to implement this chapter and forward the ordinances to the city council for consideration and adoption, and adopt such regulations and procedures as are required to implement this chapter and carry out its duties and responsibilities;

B. Prepare and administer an adjustment and credit manual to set guidelines under which the city will grant adjustments and credits to stormwater user fees;

C. Administer and enforce this chapter and all ordinances, regulations and procedures adopted relating to the design, construction, maintenance, operation and alteration of the stormwater drainage system, including but not limited to the quantity, quality and/or velocity of the stormwater conveyed thereby;

D. Prepare and revise a comprehensive drainage and flood protection plan for periodic review and adoption by the city council;

E. Establish and enforce regulations to protect and maintain water quality within the system in compliance with water quality standards established by state, regional and/or federal agencies as adopted or amended;

F. Prepare an annual operating budget for the enterprise fund and make recommendations regarding the financing of the cost of extending, maintaining, and replacing the system.
(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-4. Organization.

The stormwater enterprise fund shall be under the direction, management and control of the director of the division of public works. In that capacity, the director or his designee shall supervise the day-to-day operation of the stormwater enterprise fund, shall enforce this chapter and the provisions of all ordinances and regulations adopted pursuant to this chapter and shall carry out the policy.
(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-5. Establishment of SFU, SFU rate and stormwater fee—Establishment of policy regarding expenditure of enterprise revenues.

A. For purposes of this chapter, an SFU shall be equivalent to 3,147 square feet of impervious property.

B. Except as provided in this chapter, every contributor owning or occupying a single-family residential property, multi-family residential property, or a nonresidential property, other than exempt property, shall pay to the city, at the same time payment is made for other city services, a stormwater fee to be determined and billed as provided in this chapter. In the event the owner and the occupant of a particular property are not the same, the liability for payment of the stormwater fee attributable to that property shall be joint and several as to the owner and occupant. The stormwater fee shall be a monthly service fee and shall be determined by this chapter and the SFU rate which is established in this chapter and from time to time adjusted as provided in this chapter.

C. The stormwater fees provided in sections 13-41-5 through 13-41-9 shall be applied and computed for each contributor during the customary billing periods.

D. The SFU rate to be applied to residential and nonresidential properties for fiscal years 2007 through 2011 are identified below:

FY 2007*	$2.177/SFU/month
FY 2008	$2.88/SFU/month
FY 2009	$3.30/SPU/month

FY 2010	$3.64/SFU/month
FY 2011	$4.02/SFU/month
*For the purposes of this article, the rate shown for FY2007 is based upon the inclusion of the last two months of FY2006 for a total billing period of 14 months.	

E. Any changes to the stormwater fee shall be accomplished by adoption of an ordinance amending this section.

F. No revenues generated by the stormwater enterprise user fee shall be used for any purpose other than stormwater expenses.
(Ord. No. 5135, § 1(part), 2005; Ord. No. 5157, § 2, 2006)

Sec. 13-41-6. Stormwater fee for single-family detached residential property.

A. The stormwater fee for a single-family detached residential property shall be the following percentage of the SFU rate:

Impervious Area of the Property (square feet)	*Percentage of SFU Rate*
1,841 or less	58%
1,842 to 4,794	100%
4,795 or more	152%

B. As to a new single-family detached residence, the stormwater fee attributable to that residence shall commence upon the earlier of the following:

1. The issuance of a permanent water-meter;

2. If no electric-meter is issued for that development or if development has halted, on the date that the director or the director's designee determines in reasonable judgment that the development is substantially complete or has been halted for at least three months.

C. Any owner or occupant of a residential property aggrieved by the directors calculation of the stormwater fee as provided in this section may appeal such determination to the director as provided in section 13-41-11 of this chapter.
(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-7. Stormwater fee for multi-family residential property.

A. The stormwater fee for a non-single family detached residential property shall be the following percentage of the SFU rate multiplied by the number of dwelling units on the property:

Non-Single Residential Family Property Classification	*Percentage of SFU Rates*
Multi-family (excluding high rise multi-family, condominiums and mobile homes)	41%
Townhome/condominium	57%
Mobile home	77%
High-rise multi-family apartment	13%

(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-8. Reserved.

Sec. 13-41-9. Stormwater fee for nonresidential property.

A. The stormwater fee for nonresidential property shall be the SFU rate multiplied by the numerical factor obtained by dividing the total impervious area of a nonresidential property by the number of square feet in one SFU. The minimum fee for any nonresidential property shall be equal to one SFU rate. For newly developed nonresidential property, the fee attributable to that property shall commence or increase, for additional development to property which is already developed, upon the issuance of the certificate of occupancy for such additional development or, if no certificate of occupancy will be issued for that development or if development has halted, on the date that the director or the directors designee determines in reasonable judgment that the development is substantially complete or has been halted for at least three months.

B. For separately electric-metered occupancy units within a nonresidential property with joint users of common impervious areas, the director shall either (1) calculate and allocate the pro rata stormwater fee among the users based upon the proportionate share of the total building area for each occupancy unit, (2) calculate and allocate the stormwater fee for the property to an existing

electric meter that services the common impervious areas used by the occupants, or (3) a combination of these methods.

C. Any owner or occupant of a nonresidential property aggrieved by the director's calculation of the stormwater fee or allocation among users as provided in this section may appeal such determination to the director as provided in section 13-41-11 of this chapter.

D. An adjustment to the stormwater fee may be granted by the director who is hereby authorized to establish procedures and standards for the adjustment of fees.
(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-10. Reserved.

Sec. 13-41-11. Appeal of impervious surface calculation.

A. Any owner or occupant of a single-family residential property aggrieved by the initial or any subsequent determination of the stormwater fee for such property, as provided in section 13-41-6 of this chapter, may appeal such determination and calculation to the director, utilizing information supplied by the appealing owner or occupant, provided such information is verified as correct by a registered professional engineer or registered land surveyor at the owner or occupant's expense.

B. Any owner or occupant of a multi-family residential property aggrieved by the initial or any subsequent calculation of the stormwater fee, as provided in section 13-41-7 of this chapter, may appeal such calculations and allocation to the director as outlined herein.

C. Any owner or occupant of nonresidential property aggrieved by the initial or any subsequent calculation of the total impervious area of such property, calculation of the stormwater fee for such property, as provided in section 13-41-9 of this chapter, may appeal such calculations or allocation to the director. Upon approval of such appeal, the stormwater fee shall be recalculated using information obtained as provided in this section.

D. An appeal by the owner, occupant, or occupant organization of a single-family or multi-family residential property must be filed in writing to the director of public works subject to the requirements set forth in section 13-41-11(F). Following such appeal, a billing credit shall be issued by the director or his designee for billing errors confirmed by the division of public works and shall be limited to errors occurring 12 months retroactive to the date of filing of the appeal by the customer.

An appeal by the owner, occupant, or occupant organization of a nonresidential property must be filed in writing to the director of public works subject to the requirements set forth in section 13-41-11(F). Following such appeal, a billing credit shall be issued by the director or his designee for billing errors confirmed by the division of public works and shall be limited to errors occurring 12 months retroactive to the date of filling of the appeal by the customer.

E. The owner, occupant, or occupant organization of a nonresidential property, who is aggrieved: (i) by the initial or any subsequent calculation of the impervious area of the property, (ii) by the calculation of the stormwater fee, or (iii) by the allocation of such fee among occupants, may appeal such determinations, provided that such appeal must be filed in writing within 90 days after the initial billing of the stormwater fee for that property or within 90 days after any billing showing a recalculation of the stormwater fee for that property. If an appeal occurs within 90 days after the initial billing of a property, any adjustment of the stormwater fee resulting from such appeal shall be retroactive to the date of the initial billing. If an appeal occurs within 90 days after a billing showing a recalculation of the stormwater fee, any adjustment of the stormwater fee resulting from such appeal shall be retroactive to the date the recalculated bill went into effect.

F. Appeals by the owners, occupants, or occupant organizations of multifamily residential properties or nonresidential properties shall include a statement of the total property area, and/or total impervious area, as appropriate for the particular grounds for appeal. Appeals by the owners of single-family residential properties shall include a statement or data showing the actual square footage of the lot or parcel. Such information may be shown on stormwater enterprise reporting forms or on appeal forms and may be accompanied by plats, county assessor's records, or survey data. The director may request additional information from the appealing party. Based upon the information provided by the enterprise fund and appealing party, the director shall make a final calculation of the stormwater fee. The director shall notify the parties, in writing, of his or her decision within 90 days after receipt of the appeal.
(Ord. No. 5135, § 1(part), 2005; Ord. No. 5732, § 1, 11-19-2019)

Sec. 13-41-12. Rate determinations—Compliance with bond covenants.

A. In calculating the SFU rate as provided in section 13-41-5 of this chapter, the director shall include in the budgeted expense and revenue amounts sufficient funds as will ensure compliance with any and all rate covenants applicable to any outstanding bonds, notes or other obligations issued in connection with the construction and operation of the stormwater enterprise fund system.
(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-13. Billing procedures—Delinquent accounts and collection procedures.

A. The procedures for billing of the stormwater fees provided in sections 13-41-6 through 13-41-9 and for the collection of delinquent stormwater service fees shall be as provided in section 13-41-17.

B. Contributors who are not subject to billing by Memphis Light, Gas, and Water division shall be directly billed for stormwater services by the city. In such instances, the billing and collection of stormwater fees shall be subject to the same rules and procedures as to delinquency in payment, certification of delinquency, and property lien as provided in section 13-41-17.
(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-14. Review of SFU rate.

Under this chapter, the director shall review the SFU rate as conditions require and revise the rate as necessary to ensure that the system generates adequate revenues to pay total annual revenue requirements.
(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-15. Reserved.

Sec. 13-41-16. Reserved.

Sec. 13-41-17. Expense of collection of stormwater fees.

The approving authority shall institute an accounting system reflecting an equal distribution of total funds produced under the division based upon the respective needs of each segment of the stormwater operations and maintenance functions; including, but not limited to, stormwater drainage system maintenance; design, and construction; flood control and protection; stormwater capital improvements bond indebtedness loan repayments; direct and incidental costs to the city, including, but not limited to, administrative, technical and legal expenses; and other expenditures necessary for an effective stormwater program. Revenue generated under this division shall be used exclusively for the stormwater program.
(Ord. No. 5135, § 1(part), 2005)

Sec. 13-41-18. Reserved.

14-24.	Reserved

CHAPTER 14-4. HOUSING CODE*

Sections:

Sec. 14-4-1. Housing code adopted by reference.

Sec. 14-4-1. Housing code adopted by reference.

The 2015 Edition of the ICC International Property Maintenance code, as locally amended, is hereby adopted by reference, a copy of said code being on file in the Office of Council Records of the Memphis City Council.
(Ord. No. 5708, 12-18-2018; Ord. No. 5811, 12-7-2021)

CHAPTER 14-5. ELECTRICAL CODE

Sections:

Sec. 14-5-1. Electrical code adopted by reference.

Sec. 14-5-1. Electrical code adopted by reference.

The 2014 Edition of the National Electric Code (NEC) is hereby adopted by reference as if set out in its entirety herein, a copy of said code being on file in the Office of Council Records of the Memphis City Council.

The local amendments, including certain amendments to the provision of the NEC and locally drafted Appendix A - Electrical Permit and Inspection Fees, as set forth in Exhibit A [on file with the city] are also adopted and together these provisions and the 2014 NEC shall become the 2018 Memphis and Shelby County Electrical Code.
(Ord. No. 5714, 12-18-2018)

CHAPTER 14-6. BUILDING CODE

Sections:

Sec. 14-6-1. Building code adopted by reference.

***Editor's note—**Ord. No. 5708, adopted Dec. 18, 2018, repealed the former Ch. 14-4 and enacted a new Ch. 14-4 as set out herein. Former Ch. 14-4, §§ 14-4-1—14-4-105, pertained to similar subject matter, and derived from the Code 1985, §§ 48-1—48-23, 48-31—48-40, 48-51—48-60, 48-76, 48-86—48-95, 48-106—48-113, 48-126—48-132, 48-146—48-150, 48-166—48-172, 48-186—48-191, 48-206, 48-208, 48-210—48-214.4; Ord. No. 4232, 1-4-1994; Ord. No. 4412, 6-4-1996; Ord. No. 4755, 4-11-2000; Ord. No. 5292, 2-3-2009; Ord. No. 5404, 7-5-2011; Ord. No. 5448, 6-5-2012.

Sec. 14-6-1. Building code adopted by reference.

The 2015 Edition of the ICC International Building Code is hereby adopted by reference, a copy of said code being on file in the Office of Council Records of the Memphis City Council.

The following Appendices of the 2015 Edition of the ICC International Building Code, or as locally drafted, are also adopted, but that any appendix not listed in this [section] is specifically not adopted: Appendix A - Building Permit, Plans and Inspection Fees, Appendix C - Group U Agriculture Building, Appendix D - Fire District, Appendix F - Rodent proofing and Appendix H - Signs.
(Ord. No. 5710, 12-18-2018)

CHAPTER 14-7. EXISTING BUILDING CODE

Sections:

Sec. 14-7-1. Existing building code adopted by reference.

Sec. 14-7-1. Existing building code adopted by reference.

The 2015 Edition of the International Code Council International Existing Building Code is hereby adopted, a copy of said code being on file in the Office of Council Records of the Memphis City Council.

The local amendments to the sections of the 2015 Edition of the International Code Council International Existing Building Code noted in the attached Exhibit A [on file with the city] are also adopted and together these provisions and the 2015 Edition of the International Code Council International Existing Building Code shall become the 2018 Memphis and Shelby County Existing Building Code.

Appendix A - Guidelines for the Seismic Retrofit of Existing Buildings and Appendix B - Supplemental Accessibility Requirements for Existing Buildings and Facilities of the 2015 Edition of the ICC International Existing Building Code are hereby specifically adopted, but that Appendix C - Guidelines for the Wind Retrofit of Existing Buildings listed in the 2015 Edition of the ICC International Existing Building Code is not adopted.
(Ord. No. 5711, 12-18-2018)

CHAPTER 14-8. DANGEROUS, DERELICT OR ABANDONED STRUCTURES IN MULTIFAMILY HOUSING, COMMERCIAL AND INDUSTRIAL DISTRICTS*

Sections:

Sec. 14-8-1. Dangerous, derelict or abandoned structures in multifamily housing, commercial and industrial districts.

Sec. 14-8-1. Dangerous, derelict or abandoned structures in multifamily housing, commercial and industrial districts.

Property maintenance inspection fees, chronic nuisance fees, demolition fees, and other property maintenance fees are established within Section 103.5 of the 2015 Edition of the ICC International Property Maintenance Code, and appendix A pertaining to boarding standards, as locally amended.

Editor's note—A copy of said ICC International Property Maintenance Code, and appendix A pertaining to boarding standards can be found on file in the Office of Council Records of the Memphis City Council.

(Ord. No. 5708, 12-18-2018)

CHAPTER 14-9. ENERGY CONSERVATION CODE

Sections:

Sec. 14-9-1. Energy conservation code adopted by reference.

Sec. 14-9-1. Energy conservation code adopted by reference.

The 2015 Edition of the ICC International Energy Conservation Code and those local amendments attached to this Joint Ordinance as Exhibit A [on file with the city], are hereby incorporated by reference as if set out herein and that no appendices from the 2015 Edition of the ICC International Energy Conservation Code are adopted.

The adoption of the 2015 Edition of the ICC International Energy Conservation Code and those local amendment attached hereto, shall be implemented through their inclusion in the appropriate section of the Memphis and Shelby County Building Code, the Memphis and Shelby County Residential Code and other Technical Codes which contains provisions that addresses the required standards for the energy efficiency of various buildings, structures and their internal support systems.

(Ord. No. 5713, 12-18-2018)

CHAPTER 14-10. FUEL GAS CODE

Sections:

Sec. 14-10-1. Fuel gas code adopted by reference.

Sec. 14-10-1. Fuel gas code adopted by reference.

The 2015 Edition of the ICC International Fuel Gas Code is hereby adopted, a copy of said code being on file in the Office of Council Records of the Memphis City Council.

The local amendments to the sections of the 2015 Edition of the ICC International Fuel Gas Code noted in the attached Exhibit A [on file with the city] are also adopted and together these provisions and the 2015 ICC Fuel Gas Code shall become the 2018 Memphis and Shelby County Fuel Gas Code.

Appendix A - Gas Permit and Inspection Fees, a locally drafted amendment, is hereby adopted into this code, but that no appendix listed in the 2015 ICC International Fuel Gas Code is adopted.

(Ord. No. 5717, 12-18-2018)

CHAPTER 14-11. RESIDENTIAL CODE

Sections:

Sec. 14-11-1. Residential code adopted by reference.

Sec. 14-11-1. Residential code adopted by reference.

The 2015 Edition of the ICC International Residential Code is hereby adopted by reference, a copy of said code being on file in the Office of Council Records of the Memphis City Council.

***Editor's note—**Ord. No. 5708, adopted Dec. 18, 2018, repealed the former Ch. 14-8 and enacted a new Ch. 14-48 as set out herein. Former Ch. 14-8, §§ 14-8-1—14-8-12, pertained to similar subject matter, and derived from the Code 1985, § 48-215—48-226; ; Ord. No. 4126, 9-15-1992; Ord. No. 4191, 6-15-1993; Ord. No. 4588, 6-2-1998; Ord. No. 4851, 4-3-2001; Ord. No. 4961, 9-17-2002.

The 2015 Edition of the ICC International Residential Code is amended by adoption of the local amendments attached to this Joint Ordinance as Exhibit A [on file with the city].

The 2015 Edition of the ICC International Residential Code and those local amendments attached to this Joint Ordinance as Exhibit A [on file with the city] are hereby incorporated by reference as if set out herein in their entirety from the 2015 Edition of the ICC International Residential Code and that no appendices from the 2015 Edition of the ICC International Residential Code are adopted.
(Ord. No. 5712, 12-18-2018)

CHAPTER 14-12. BOILER AND UNFIRED PRESSURE VESSEL CODE

Sections:

Article 1. General Provisions

Sec. 14-12-49. Bond for persons repairing or installing boilers or pressure vessels.
Sec. 14-12-50. Work permits.

Article 4. Rules and Regulations Relating to Construction, Installation, Inspection, Maintenance and Use

Sec. 14-12-51. Power boilers—New installations.
Sec. 14-12-52. Power boilers—Existing installations.
Sec. 14-12-53. Boiler runway or platform.
Sec. 14-12-54. Miniature boilers—New installations.
Sec. 14-12-55. Miniature boilers—Existing installations.
Sec. 14-12-56. Heating boilers—New installations.
Sec. 14-12-57. Existing installations.
Sec. 14-12-58. Unfired pressure vessels—New installations.
Sec. 14-12-59. Unfired pressure vessels—Existing installations.
Sec. 14-12-60. General requirements.

ARTICLE 1. GENERAL PROVISIONS

Sec. 14-12-1. Short title.

This chapter shall be known and may be cited as the "Boiler and Unfired Pressure Vessel Safety Code." (Code 1967, § 45-1; Code 1985, § 42-1)

Sec. 14-12-2. Definitions.

For the purposes of this chapter, the following definitions shall apply:

Approved means approved by the board of boiler rules.

A.S.M.E. Boiler and Pressure Vessel Code means the Boiler and Pressure Vessel Code of the American Society of Mechanical Engineers, 1983 Edition.

Board or *board of boiler rules* means the board created by section 14-12-4 and empowered to recommend to the city council rules and regulations and amendments to the rules and regulations and interpret rules and regulations for the safe and proper construction, installation, inspection, repair and use of boilers and unfired pressure vessels in this city.

Boiler, except where the context clearly indicates otherwise, means and includes a closed vessel or vessels intended for use in heating water or other liquids or for generating steam or other vapors under pressure or vacuum by the direct application of heat from combustible fuels, electricity or nuclear energy and shall also include an unfired pressure vessel, meaning a vessel in which pressure is obtained from an external source or from an indirect application of heat.

Certificate of competency means a certificate issued to a person who has passed an examination prescribed by the board of boiler rules.

Certificate of inspection means an inspection upon which an inspection certificate may be issued.

City boiler and pressure vessel construction code is used to designate the accepted reference for construction, installation, operation and inspection of boilers and unfired pressure vessels and will be referred to as the city boiler and pressure vessel construction code, which is practically the same as the A.S.M.E. Boiler and Pressure Vessel Construction Code.

Condemned boiler or unfired pressure vessel means a boiler or unfired pressure vessel that has been inspected and declared unsafe or disqualified by legal requirements by an inspector qualified to take such action who has applied a stamping or marking designating its rejection.

Deputy inspector means any deputy or assistant to the chief inspector, as defined herein.

Director means the director of the Memphis and Shelby County office of planning and development.

Division means the Memphis and Shelby County office of planning and development.

Existing installations, insofar as the application of this chapter is concerned, means and includes any boiler or unfired pressure vessel constructed, installed, placed in operation or contracted for before April 12, 1960.

External inspection means an inspection made when a boiler or unfired pressure vessel is in operation.

Fusion welding means a process of welding metals in molten state or matter in vaporous state, without the application of mechanical pressure or blows. Such welding may be accomplished by an oxyacetylene or oxyhydrogen flame or by electric arc. Thermit welding is also classed as fusion welding.

Hot water supply boiler means a boiler furnishing hot water to be used externally to itself.

Inspector means the chief boiler inspector, any deputy inspector or a special inspector.

Internal inspection means an inspection made when a boiler or unfired pressure vessel is shut down and hand holes or manholes opened for inspection of the interior.

Locomotive boiler means a boiler mounted on a self-propelled track locomotive and used to furnish motivating power for traveling on rails. It does not include locomotive cranes, tractors or other self-propelled apparatus.

Low pressure heating boiler means a boiler operated at pressures not exceeding 15 pounds per square inch gauge steam or at pressures not exceeding 160 pounds per square inch gauge and temperatures not exceeding 250 degrees Fahrenheit for water.

Major repairs means those upon which the strength of a boiler or unfired pressure vessel would depend.

Miniature boiler applies to fired pressure vessels, fired and unfired boilers, which do not exceed the following limits:

1. Sixteen inch inside diameter;
2. Five cubic feet gross volume, exclusive of the casing and insulation;
3. Twenty square feet water heating surface;
4. One hundred pounds per square inch gauge maximum allowable working pressure.

National board means the national board of boiler and pressure vessel inspectors.

New boiler installations means and includes all boilers constructed, installed, placed in operation or contracted for after April 12, 1960.

New unfired pressure vessel installations means and includes all unfired pressure vessels constructed, installed, placed in operation or contracted for after April 12, 1960.

Nonstandard boiler or unfired pressure vessel means a boiler or unfired pressure vessel that does not bear the state stamp, the national board stamping or the stamp of any state or political subdivision which has adopted a standard of construction equivalent to that required by the board of boiler rules.

Owner or *user* means any person owning or operating any boiler or unfired pressure vessel within this city.

Portable boiler means a fired boiler which is primarily intended for temporary location and the construction and usage of which is obviously portable.

Power boiler means a closed vessel in which steam or other vapor to be used externally to itself is generated at a pressure of more than 15 pounds per square inch gauge by the application of heat.

Reinstalled boiler or unfired pressure vessel means a boiler or unfired pressure vessel removed from its original setting and reerected at the same location or erected at a new location without change of ownership.

Secondhand boiler or unfired pressure vessel means a boiler or unfired pressure vessel of which both the location and ownership have been changed after primary use.

Special inspector means an inspector holding a city commission and who is regularly employed by an insurance company authorized to insure against loss from explosion of boilers and unfired pressure vessels in this city, provided such company complies with the requirements of section 14-12-13.

Standard boiler or unfired pressure vessel means a boiler or unfired pressure vessel which bears the stamp of the city or of a state which has adopted a standard of construction equivalent to that required by the board of boiler rules or a boiler which bears the national board stamp.

Unfired pressure vessel means a vessel in which pressure is obtained from an external source or from an indirect application of heat.
(Code 1967, § 45-2; Code 1985, § 42-2; Ord. No. 1427, § 1, 8-29-1972)

Sec. 14-12-3. Applicability—Exceptions.

A. Except as otherwise specifically provided, this chapter shall apply to all boilers and unfired pressure vessels.

B. This chapter shall not apply to the following boilers and unfired pressure vessels.

1. Boilers and unfired pressure vessels under federal control;
2. Unfired pressure vessels meeting the requirements of the interstate commerce commission for shipment of liquids or gases under pressure;
3. Air tanks located on vehicles operating under the rules of other state authorities and used for carrying passengers or freight;
4. Air tanks installed on the right-of-way of railroads and used directly in the operation of trains;
5. Unfired pressure vessels having a volume of five cubic feet or less;
6. Unfired pressure vessels designed for a working pressure not exceeding 15 pounds per square inch gauge, when not located in places of public assembly;
7. Unfired pressure vessels which are under the regulation and control of the bureau of safety engineers under the city liquefied petroleum gas code.

(Code 1967, § 45-3; Code 1985, § 42-3)

Sec. 14-12-4. Board of boiler rules—Generally.

A. There is created within the office of planning and development a board of boiler rules consisting of six members who shall be appointed to the board by the mayor. At the expiration of the initial members' terms of office, they or their successors identifiable with the same interest respectively as hereinafter provided, shall be appointed for terms of four years each. The mayor may at any time remove any members of the board for inefficiency or neglect of duty in office. Upon the death or incapacity of any member the mayor shall fill the vacancy for the remainder of the vacated term with a representative of the same interests with which his or her predecessor was identified.

B. Of the six appointed members of the board of boiler rules, one shall be a practical steam operating engineer of high pressure boilers and unfired pressure vessels or any other representative of owners and users of high pressure boilers and unfired pressure vessels within the city having practical experience with boilers and unfired pressure vessels; one shall be a representative of boiler or unfired pressure vessel manufacturers within the city; one shall be a representative of a boiler insurance company licensed to do business within the city; one shall be a mechanical engineer on the faculty of a recognized engineering college within the city or a graduate mechanical engineer having equivalent experience; one shall be representative of the practical boilermakers within the city; and one shall be a representative of owners and users of low pressure boilers or pressure vessels within the city.

C. The board of boiler rules shall elect one of its members to serve as chairperson and, at the call of the chairperson, the board shall meet at least four times each year at the City Hall or other place designated by the board. No approval, decision or ruling of the board shall be effective unless supported by the vote of at least four members thereof and approved by director of planning and development.

D. The members of the board of boiler rules shall serve without salary and shall receive their actual traveling and hotel expenses, incurred while in the performance of their duties as members of the board, to be paid in the same manner as in the case of other city officers. (Code 1967, § 45-4; Code 1985, § 42-4)

Sec. 14-12-5. Board of boiler rules—Rules and regulations.

A. The board of boiler rules shall recommend to the city council the definitions, rules and regulations for the safe construction, installation, inspection and repair of boilers and unfired pressure vessels in this city. The definitions, rules and regulations so recommended shall be based upon and, at all times follow the generally accepted nationwide engineering standards, formulae and practices established and pertaining to boiler and unfired pressure vessel construction and safety, and the board may, by resolution, recommend to the city council an existing published codification thereof, known as the Boiler and Pressure Vessel Construction Code of the American Society of Mechanical Engineers, with the amendments and interpretations thereto made and approved by the Council of the Society, and may likewise recommend the amendments and interpretations subsequently made and published by the same authority.

B. Subsequent amendments to the rules and regulations recommended by the board of boiler rules to the city council shall become effective upon adoption of amendments to this chapter by the city council.
(Code 1967, § 45-5; Code 1985, § 42-5)

Sec. 14-12-6. New installations to conform to chapter—Exceptions.

No boiler or unfired pressure vessel which does not conform to the rules and regulations set forth in this chapter or amendments thereto governing new construction and installation shall be installed and operated in this city after 12 months from the date upon which the first rules and regulations under this chapter pertaining to new construction and installation shall have become effective, unless the boiler or unfired pressure vessel is of special design or construction, and is not covered by the rules and regulations, nor is in any way inconsistent with such rules and regulations, in which case a special installation and operating permit may, at its discretion, be granted by the board of boiler rules.
(Code 1967, § 45-6; Code 1985, § 42-6)

Sec. 14-12-7. Maximum allowable working pressure.

A. The maximum allowable working pressure of a boiler or unfired pressure vessel carrying the A.S.M.E. Code symbol shall be determined by the applicable sections of the codes under which it was constructed and stamped.

B. The maximum allowable working pressure of a boiler which does not carry the A.S.M.E. Code symbol shall be computed in accordance with the A.S.M.E. Power Boiler Code Suggested Rules Covering Existing Installations. The maximum allowable working pressure of an unfired pressure vessel which does not carry the A.S.M.E. Code symbol shall be computed in accordance with the A.S.M.E. Unfired Pressure Vessel Code Recommended Practice for Inspection, Repair and Allowable Working Pressure for Vessels in Service.

C. This chapter shall not be construed as in any way preventing the use or sale of a boiler or unfired pressure vessel referred to in this section, provided it has been made to conform to the rules and regulations of the board of boiler rules governing existing installations and provided, further, it has not been found upon inspection to be in an unsafe condition.
(Code 1967, § 45-7; Code 1985, § 42-7)

Sec. 14-12-8. Right of entry to enforce chapter.

The director, the chief inspector or any deputy or special inspector shall have free access, during reasonable hours, to any premises in the city where a boiler or unfired pressure vessel is being constructed or is being installed, for the purpose of ascertaining whether such boiler or unfired pressure vessel is constructed and installed in accordance with the provisions of this chapter.
(Code 1967, § 45-8; Code 1985, § 42-8)

ARTICLE 2. INSPECTORS AND INSPECTIONS GENERALLY

Sec. 14-12-9. Appointment and qualifications of chief inspector.

The chief inspector, who shall be the boiler safety engineer of the Memphis and Shelby County office of construction code enforcement, shall be a citizen of Shelby County who has had at the time of such appointment not less than ten years' practical experience in the construction, maintenance, repair or operation of high pressure boilers and unfired pressure vessels, as mechanical engineer, practical steam operating engineer, practical boilermaker or boiler inspector and who shall have passed the same kind of examination as that prescribed by this article for deputy or special inspectors.
(Code 1967, § 45-19; Code 1985, § 42-21)

Sec. 14-12-10. General powers and duties of chief inspector.

The chief inspector, if authorized by the director of planning and development is charged, directed and empowered:

A. To cause the prosecution of all violators of the provisions of this chapter;

B. To issue, suspend or revoke, for cause, inspection certificates as provided in this article;

C. To draw upon the city comptroller for funds necessary to meet the expenses authorized by this chapter, which shall include the necessary traveling expenses of the chief inspector and his or her deputies and the expenses incident to the maintenance of his or her office;

D. To take action necessary for the enforcement of the laws of the city governing the use of boilers and unfired pressure vessels to which this chapter applies and of the rules and regulations of the board of boiler rules;

E. To keep a complete record of the type, dimensions, maximum allowable working pressure,

age, location and date of the last recorded internal inspection of all boilers and unfired pressure vessels to which this chapter applies;

F. To publish and distribute, among manufacturers and others requesting them, copies of the rules and regulations adopted by the board of boiler rules.

(Code 1967, § 45-20; Code 1985, § 42-22)

Sec. 14-12-11. Employment and qualifications of deputy inspectors.

The director shall employ deputy inspectors who shall be responsible to the chief inspector and who shall have had at time of appointment not less than five years' practical experience in the construction, maintenance, repair or operation of high pressure boilers and unfired pressure vessels as a mechanical engineer, practical steam operating engineer, boilermaker or boiler inspector and who shall have passed the examination provided for in this article.

(Code 1967, § 45-21; Code 1985, § 42-23)

Sec. 14-12-12. Special inspectors generally.

A. In addition to the deputy inspectors authorized by section 14-12-11, the chief inspector shall, upon the request of any company authorized to insure against loss from explosion of boilers and unfired pressure vessels in this city, issue to any inspectors of such company commissions as special inspectors, provided that each such inspector, before receiving his or her commission, shall satisfactorily pass the examination provided for in section 14-12-13, or, in lieu of such examination, shall hold a commission or a certificate of competency as an inspector of boilers and unfired pressure vessels for a state that has a standard of examination substantially equal to that of the city or a commission as an inspector of boilers issued by the national board of boiler and pressure vessel inspectors.

B. Such special inspectors shall receive no salary from, nor shall any of their expenses be paid by, the city and the continuance of a special inspector's commission shall be conditioned upon his or her continuing in the employ of a boiler insurance company duly authorized as aforesaid and upon his or her maintenance of the standards imposed by this chapter.

C. Such special inspectors shall inspect all boilers and unfired pressure vessels insured by their respective companies and, when so inspected, the owners and users of such boilers and unfired pressure vessels shall be exempt from the payment to the city of the inspection fees provided for in section 14-12-17.

D. Each company employing such special inspectors shall, within ten days following each internal boiler or unfired pressure vessel inspection made by such inspectors, file a report of such inspection with the chief inspector upon appropriate forms as promulgated by the American Society of Mechanical Engineers. Reports of external inspection shall not be required except when such inspections disclose that the boiler or unfired pressure vessel is in a dangerous condition.

(Code 1967, § 45-22; Code 1985, § 42-24)

Sec. 14-12-13. Examination of inspectors.

The examination for chief, deputy or special inspectors shall be in writing and shall be held by the board of boiler rules or by at least two members of the board. Such examination shall be confined to questions, the answers to which will aid in determining the fitness and competency of the applicant for the intended service. In case an applicant for an inspector's appointment or commission fails to pass the examination, he or she may appeal to the board for another examination which shall be given by the board within 90 days. The records of an applicant's examination shall be accessible to the applicant and his or her employer.

(Code 1967, § 45-23; Code 1985, § 42-25)

Sec. 14-12-14. Replacement of inspector's certificate of appointment or commission.

If an inspector's certificate of appointment or commission is lost or destroyed, a new certificate or commission shall be issued in its place without another examination.

(Code 1967, § 45-24; Code 1985, § 42-26)

Sec. 14-12-15. Suspension or revocation of inspector's appointment or commission.

A. An inspector's appointment or commission may be suspended by the director after due investigation and recommendation by the board of boiler rules, for the incompetence or untrustworthiness of the holder thereof or for willful falsification of any matter or statement contained in his or her application or in a report of any inspection made by him or her. Written notice of any such suspension shall be given by the board of boiler rules within not more than ten days, to the inspector and his or her employer. A person whose appointment or

commission has been suspended shall be entitled to an appeal to the board as provided in section 14-12-21 and to be present in person or to be represented by counsel at the hearing of the appeal.

B. If the board of boiler rules has reason to believe that a commissioned inspector is no longer qualified to hold his or her appointment or commission, the board shall, upon not less than ten days' written notice to the inspector and his or her employer, hold a hearing at which such inspector and his or her employer shall have an opportunity to be heard. If, as a result of such hearing, the board shall find that such inspector is no longer qualified to hold his or her appointment or commission, the board shall recommend to the director that such appointment or commission shall be revoked and the director shall thereupon revoke such appointment or commission forthwith.

C. A person whose appointment or commission has been revoked shall be entitled to apply, after 90 days from the date of such revocation, for reinstatement of such appointment or commission.
(Code 1967, § 45-25; Code 1985, § 42-27)

Sec. 14-12-16. Inspections generally.

A. Each boiler and unfired pressure vessel used or proposed to be used within this city, except boilers or unfired pressure vessels specifically exempted therefrom, shall be thoroughly inspected as to their construction, installation and condition as follows:

1. Power boilers, meaning boilers operating at steam or vapor pressures in excess of 15 pounds per square inch gauge, shall be inspected annually both internally and externally while not under pressure and shall also be inspected annually externally while under pressure if possible. The board of boiler rules may, in its discretion, permit longer periods between inspections.

2. Low pressure steam or vapor heating boilers, hot water heating boilers and hot water supply boilers shall be inspected both internally and externally biennially where construction will permit.

3. Unfired pressure vessels subject to internal corrosion shall be inspected both internally and externally biennially where construction will permit, except that the board of boiler rules may, in its discretion, provide for longer periods between inspections.

4. Unfired pressure vessels not subject to internal corrosion shall be inspected externally at intervals set by the board of boiler rules but internal inspections shall not be required of unfired pressure vessels, the contents of which are known to be noncorrosive to the material of which the shell, head or fittings are constructed, either from the chemical composition of the contents or from evidence that the contents are adequately treated with a corrosion inhibitor, provided that such vessels are constructed in accordance with the rules and regulations of the board of boiler rules or in accordance with standards substantially equivalent to the rules and regulations of the board, in effect at the time of manufacture.

5. A grace period of two months beyond the periods specified in subsection (A)(1), (2), (3) and (4) of this section may elapse between inspections.

B. Subject to the applicable grace period provided in subsection A of this section, the rules and regulations formulated by the board applying to the inspection of unfired pressure vessels may be modified by the board to reduce or extend the interval between required inspection where the contents of the vessel or the materials of which it is constructed warrant special consideration.

C. The inspections herein required shall be made by the chief inspector, by a deputy inspector or by a special inspector.

D. If at any time a hydrostatic test shall be deemed necessary to determine the safety of a boiler or unfired pressure vessel, same shall be made, at the discretion of the inspector, by the owner or user thereof.

E. All boilers and unfired pressure vessels to be installed in this city after the 12-month period from the date upon which the rules and regulations of the board shall become effective, shall be inspected during construction as required by the applicable rules and regulations of the board by an inspector authorized to inspect boilers in this city, or, if constructed outside the city, by

an inspector holding a certificate of competency as an inspector of boilers for a state that has a standard of examination substantially equal to that of this city.
(Code 1967, § 45-26; Code 1985, § 42-28)

Sec. 14-12-17. Inspection fees.

A. The owner or user of a boiler or unfired pressure vessel required by this chapter to be inspected by the chief inspector or his or her deputy inspector shall pay directly to the chief inspector, upon completion of the inspection, fees in accordance with the following schedule:

1. *Power boilers.*

Internal Inspections

Boilers of 50 sq. ft. of heating surface or less	$5.00
Boilers over 50 sq. ft. of heating surface and less than 500 sq. ft. of heating surface	$8.00
Boilers over 500 sq. ft. of heating surface and less than 10,000 sq. ft. of heating surface	$15.00
Boilers over 10,000 sq. ft. of heating surface	$20.00

External Inspections

Boilers of 50 sq. ft. of heating surface or less	$3.00
Boilers over 50 sq. ft. of heating surface	$5.00

Not more than the equivalent of the internal and external inspection fees shall be charged or collected for any and all inspections as above of any boiler in any one year.

2. *Low-pressure heating boilers.*

Inspection of heating boilers without a manhole	$5.00
Inspection of heating boilers with a manhole	$10.00
Inspection of hot water supply boilers	$3.00

Not more than one fee shall be charged or collected for any and all inspections as above of any low-pressure boiler in any two-year period.

3. *Hydrostatic tests.* When it is necessary to make a special trip to witness the application of a hydrostatic test, an additional fee based on the scale of fees applicable to an internal inspection of the boiler or unfired pressure vessel shall be charged. All fees prescribed above shall be doubled for inspection on Saturdays, Sundays or holidays.

4. *Permits for installation of boilers, unfired pressure vessels or for alterations or repairs.* The fee for installation of boilers, unfired pressure vessels or for alterations or repairs shall be based on the contract price of the complete installation. The fee shall be $15.00 for the first $1,000.00 evaluation and $8.00 for each additional $1,000.00 evaluation or fraction thereof over $1,000.00.

5. *Biennial or required inspection of unfired pressure vessels.* Fees to be based on the maximum length of vessel times the maximum width or diameter.

Internal and/or external inspection of each unfired pressure vessel subject to inspection having a cross sectional area of 50 sq. ft. or less	$5.00
For each additional 100 sq. ft. of area in excess of 50 sq. ft.	$1.00

Provided that not more than $40.00 shall be paid per day for the actual inspection time of each inspector on any one vessel.

A group of pressure vessels, such as the rolls of a paper machine or dryer operating as a single machine or unit, shall be considered as one pressure vessel.

6. *Others.* All other inspections, including shop inspections and inspection of secondhand or used boilers or unfired pressure vessels made by the chief or deputy inspector shall be charged for at the rate of not less than $25.00 for one-half day of four hours and $55.00 for one full day of eight hours, plus all expenses, including traveling and hotel.

Secondhand means an object which has changed ownership and location after primary use.

B. The chief inspector shall transfer all inspection fees received to the comptroller.
(Code 1967, § 45-27; Code 1985, § 42-29; Ord. No. 273, § 1, 9-3-1968; Ord. No. 2349, § 1(1), 12-16-1975; Ord. No. 3022, § 1(1), 6-9-1980)

Sec. 14-12-18. Inspection certificates.

A. If, upon inspection, a boiler or unfired pressure vessel is found to comply with the rules and regulations of the board, the owner or user thereof shall pay to the city the sum of $11.00 in the case of a power boiler; $11.00 in the case of a low-pressure heating boiler, including hot water supply, coil or storage water heaters that exceed any one of the following limitations: 200,000 Btu input, 120-gallon capacity or 200 degrees Fahrenheit temperature; and the sum of $5.00 in case of an unfired pressure vessel. The chief inspector, or his or her duly authorized representative, shall issue to such owner or user an inspection certificate bearing the date of inspection and specifying the maximum pressure under which the boiler or unfired pressure vessel may be operated. Such inspection certificate shall be valid for not more than 14 months from its date except that the certificate shall be valid for a period not more than two months beyond the period set by the board in accordance with section 14-12-17(A)(1). Certificates shall be posted under glass in the room with the boiler or unfired pressure vessel inspected. If the boiler or unfired pressure vessel is not located within the building, the certificate shall be posted in a location convenient to the boiler or unfired pressure vessel inspected, or in the case of a portable boiler or unfired pressure vessel, the certificate shall be kept in a metal container to be fastened to the boiler or vessel or kept in a toolbox accompanying the boiler or unfired pressure vessel.

B. No inspection certificate issued for an insured boiler or unfired pressure vessel by a special inspector shall be valid after the boiler or unfired pressure vessel for which it was issued shall cease to be insured by a company duly authorized by this state to carry such insurance.

C. The chief inspector or his or her authorized representative may at any time suspend an inspection certificate when, in his or her opinion, the boiler or unfired pressure vessel for which it was issued cannot be operated without menace to the public safety or when the boiler or unfired pressure vessel is found not to comply with the rules and regulations herein provided. Such suspension of an inspection certificate shall continue in effect until such boiler or unfired pressure vessel shall have been made to conform to the rules and regulations of the board and until the inspection certificate shall have been reinstated.
(Code 1967, § 45-28; Code 1985, § 42-30; Ord. No. 273, § 2, 9-3-1968; Ord. No. 2349, § 1(2), 12-16-1975; Ord. No. 3022, § 1(2), 6-9-1980; Ord. No. 3152, § 1, 9-8-1981)

Sec. 14-12-19. Operation without or in violation of inspection certificate.

It is unlawful for any person to operate in this city a boiler or unfired pressure vessel under pressure without a valid inspection certificate. The operation of a boiler or unfired pressure vessel without such inspection certificate or at a pressure exceeding that specified in such inspection certificate, shall constitute a misdemeanor on the part of the owner, user or operator thereof and shall be punishable as provided in section 1-24-1 and each day of such unlawful operation shall be deemed a separate offense.
(Code 1967, § 45-29; Code 1985, § 42-31)

Sec. 14-12-20. Exemptions from sections 14-12-16 through 14-12-19.

The following boilers and unfired pressure vessels shall be exempt from the requirements of sections 14-12-16 through 14-12-19:

A. Boilers or unfired pressure vessels located on farms and used solely for agricultural purposes;

B. Steam or vapor boilers used for heating purposes carrying a pressure of not more than 15 pounds per square inch gauge and which are located in private residences or in apartment houses of less than six families;

C. Hot water heating boilers or hot water supply boilers, operated at pressures not exceeding 160 pounds per square inch gauge or temperatures not exceeding 250 degrees Fahrenheit which are located in private residences or in apartment houses of less than six families;

D. Unfired pressure vessels containing only water under pressure for domestic supply purposes, including those containing air, the compression of which serves only as a cushion or airlift

pumping system, when located in private residences or in apartment houses of less than six families.

(Code 1967, § 45-30; Code 1985, § 42-32)

Sec. 14-12-21. Appeals from orders or acts of inspectors.

Any person aggrieved by an order or act of an inspector or the chief inspector under this chapter may, within 15 days' notice thereof, appeal from such order or act to the board of boiler rules, which shall, within 30 days thereafter, hold a hearing, after having given at least ten days' written notice to all interested parties. The board shall, within 30 days after such hearing, issue an appropriate order either approving or disapproving such order or act. A copy of such order by the board shall be given to all interested parties.

(Code 1967, § 45-31; Code 1985, § 42-33)

ARTICLE 3. RULES AND REGULATIONS RELATING TO ADMINISTRATION

Sec. 14-12-22. Manufacturers' data and blueprints to be submitted.

A. Manufacturers' data reports on boilers and unfired pressure vessels which are to be operated at pressures in excess of 15 pounds per square inch gauge (unless otherwise exempted by these rules and regulations) shall be filed with the chief inspector before installation. If the boilers or unfired pressure vessels are of special design, blueprints showing details of proposed construction shall be submitted to the chief inspector and his or her approval secured before construction is started.

B. If new or used equipment is being installed by the owner or user of any plant, similar information shall be furnished the chief inspector.

(Code 1967, § 45-42; Code 1985, § 42-46)

Sec. 14-12-23. Registration of existing boilers.

Within six months from April 12, 1960, all owners or users of boilers then in use or installed ready for use in the city, shall report to the chief inspector on forms prescribed by the department, giving the location, type, capacity, age and date of installation.

(Code 1967, § 45-43; Code 1985, § 42-47)

Sec. 14-12-24. Inspections generally.

A. All power boilers shall be regularly inspected internally at least every 12 months. An external inspection shall be made annually approximately six months from the date of the internal inspection.

B. All low pressure heating boilers shall be inspected both internally and externally every two years where construction will permit.

C. All unfired pressure vessels subject to internal corrosion shall be inspected both internally and externally every two years where construction will permit.

D. All unfired pressure vessels not subject to internal corrosion shall be given a certificate inspection every three years.

(Code 1967, § 45-44; Code 1985, § 42-48)

Sec. 14-12-25. Preparation for inspection.

The owner or user shall prepare each boiler or unfired pressure vessel for internal inspection and shall prepare for and apply a hydrostatic pressure test whenever necessary, on the date specified by the chief inspector, deputy inspector or special inspector, which date shall be not less than seven days after the date of notification.

(Code 1967, § 45-45; Code 1985, § 42-49)

Sec. 14-12-26. Examination for inspector's certificate of competency.

A. Examinations for certificates of competency as inspector of boilers and unfired pressure vessels shall be held at the office of the board of boiler rules or at any location to be selected by the board, four times each year, namely, the first Wednesday of the months of March, June, September and December. Special examinations will be held when considered necessary by the board.

B. Applicants for certificate of competency as inspector of boilers and pressure vessels shall meet the requirements of the state board of boiler rules.

C. The application for examination for a certificate of competency shall be in writing upon a form to be furnished by the board, stating the school education of the applicant, a list of his or her employers, his or her period of employment and position held with each employer. Applications containing willful falsification or untruthful statements shall be rejected. If the applicant's history and experience meet with the approval of the board of boiler rules, he or she shall be given a written

examination dealing with the construction, installation, operation, maintenance and repair of boilers and unfired pressure vessels and their appurtenance, and the applicant shall be accepted or rejected on the merits of this examination. If the applicant is successful in meeting the requirements of the board, a certificate of competency will be issued by the chief inspector.

D. After the expiration of 90 days, an applicant who fails to pass the examination will be permitted to take another written examination, and his or her acceptance or rejection will be determined by the board on the basis of this examination.
(Code 1967, § 45-46; Code 1985, § 42-50; Ord. No. 1427, § 1, 8-29-1972)

Sec. 14-12-27. Special inspector's commission generally.

A. Upon the request of any company authorized to insure against loss from explosion of boilers and unfired pressure vessels in the city, a commission as a special inspector and an identifying corn mission card shall be issued by the chief inspector to an inspector in the employ of such company, provided the inspector has successfully passed the written examination and holds a certificate of competency, as set forth in section 14-12-26. Work cards expire December 31 of each year. Annual renewal shall be made upon request of the holder for a fee of $10.00.

B. Commissions issued to inspectors in the employ of such companies shall be held at the home office of the employing company. The commission and the identifying commission card shall be returned to the chief inspector when the inspector to whom the commission was issued is no longer in its employ or at the request of the chief inspector.
(Code 1967, § 45-47; Code 1985, § 42-51; Ord. No. 2349, § 1(3), 12-16-1975; Ord. No. 3022, § 1(3), 6-9-1980)

Sec. 14-12-28. Reciprocal special inspector's commission.

Upon the request of a boiler insurance company authorized to do business in this city, a commission as special inspector shall be issued by the chief inspector to an inspector in the employ of such company, provided the inspector is at least 25 years of age, has had the experience prescribed in section 14-12-26 and holds a certificate of competency or commission issued by a state which has adopted the A.S.M.E. Boiler and Unfired Pressure Vessel Construction Code and which holds a written examination similar to that required by the city. Application for a reciprocal commission shall be accompanied by a photostatic copy of the applicant's state commission or certificate of competency.
(Code 1967, § 45-48; Code 1985, § 42-52)

Sec. 14-12-29. Revocation of special inspector's certificate of competency or commission.

The certificate of competency and commission issued to a special inspector may be suspended by the director and may be revoked upon ten days' notice to the inspector and to the employer of such inspector, for incompetence or untrustworthiness; for willful falsification of any matter or statement contained in his or her application, or in the report of any inspection; or for other sufficient reasons. The holder of such certificate of competency or commission shall be entitled to a hearing before the director before the revocation thereof.
(Code 1967, § 45-49; Code 1985, § 42-53)

Sec. 14-12-30. Inspectors' conflicts of interest.

Inspectors commissioned by the city shall not be engaged in the sale of any article or device that is related to boilers or unfired pressure vessels and shall devote their full time to inspection work.
(Code 1967, § 45-50; Code 1985, § 42-54)

Sec. 14-12-31. Inspection reports.

City inspectors and special inspectors shall, within one year from the effective date of these rules for power boilers and two years for all other objects, submit to the chief inspector an inspection report on each boiler or unfired pressure vessel subject to inspection by such inspectors. Complete data shall be submitted on each nonstandard boiler or unfired pressure vessel on Form P-5 of the A.S.M.E. Code at the time of the first internal inspection. Subsequent internal or certificate inspections of those objects shall be reported on Form P-6 of the A.S.M.E. Code. On all standard boilers or unfired pressure vessels, the first and subsequent internal or certificate inspection shall be submitted on Form P-6 of the A.S.M.E. Code. The report shall be submitted within ten days of the date of the inspection and for unfired pressure vessels shall indicate the maximum period between certificate inspections. External inspections shall be re-

ported on Form P-6 immediately when hazardous conditions affecting the safety of the boiler or unfired pressure vessel are found to exist.
(Code 1967, § 45-51; Code 1985, § 42-55)

Sec. 14-12-32. Reports by insurance companies—Risks written, cancelled, not renewed or suspended.

All insurance companies shall notify the chief inspector within 30 days of all boiler or unfired pressure vessel risks written, cancelled, not renewed or suspended because of unsafe conditions.
(Code 1967, § 45-52; Code 1985, § 42-56)

Sec. 14-12-33. Reports by insurance company—Risks refused because of defects.

If an insurance inspector, upon the first inspection of a new risk, finds that the boiler or any of the appurtenances are in such condition that his or her company refuses insurance, the company shall immediately notify the chief inspector and submit a report of the defects.
(Code 1967, § 45-53; Code 1985, § 42-57)

Sec. 14-12-34. Defective conditions disclosed at time of external inspections.

If upon an external inspection, there is evidence of a leak or crack, enough of the covering of the boiler or unfired pressure vessel shall be removed to satisfy the inspector in order that he or she may determine as to the safety of the boiler or unfired pressure vessel or if the covering cannot be removed at that time, he or she may order the operation of the boiler or unfired pressure vessel stopped until such time as the covering can be removed and proper examination made.
(Code 1967, § 45-54; Code 1985, § 42-58)

Sec. 14-12-35. Accident reports.

When an accident occurs which serves to render a boiler or unfired pressure vessel inoperative, the owner or user shall immediately notify the chief inspector, and submit a detailed report of the accident. In case of serious accident, such as explosion, notice shall be given immediately by telephone, telegraph or messenger and neither the boiler or unfired pressure vessel nor any of the parts thereof shall be removed or disturbed before an inspection has been made by the chief inspector or a deputy inspector or a special inspector, unless for the purpose of saving human life.
(Code 1967, § 45-55; Code 1985, § 42-59)

Sec. 14-12-36. Inspection fee—Refusal to allow inspection or pay fee—Operation without inspection certificate.

A. If a boiler or unfired pressure vessel shall, upon inspection, be found to be suitable and to conform to these rules and regulations, the owner or user shall pay directly to the chief inspector a fee of $2.00 for each boiler or unfired pressure vessel required to be inspected under this chapter before a certificate of inspection shall be issued.

B. If the owner or user of a boiler or unfired pressure vessel required to be inspected refuses to allow an inspection to be made or refuses to pay the above fee, the certificate of inspection shall be suspended by the chief inspector until the owner or user complies with the requirements.

C. The owner or user who causes a boiler or unfired pressure vessel to be operated without possessing a valid certificate of inspection shall be subject to the penalty provided for in section 14-12-19.
(Code 1967, § 45-56; Code 1985, § 42-60)

Sec. 14-12-37. Term of inspection certificate.

An inspection certificate shall be valid for not more than 14 months unless some defect or condition affecting the safety of the boiler or unfired pressure vessel is disclosed; provided, however, that, a certificate issued for a boiler or unfired pressure vessel inspected by a special inspector shall be valid only if the boiler or unfired pressure vessel for which it was issued continues to be insured by a duly authorized insurance company.
(Code 1967, § 45-57; Code 1985, § 42-61)

Sec. 14-12-38. Restamping.

When the stamping on a boiler or unfired pressure vessel becomes indistinct, the inspector shall instruct the owner or user to have it restamped. Request for permission to restamp the boiler or unfired pressure vessel shall be made to the chief inspector and proof of the original stamping shall accompany the request authorized by the chief inspector. Restamping authorized by the chief inspector shall be done only by an inspector and shall be

identical with the original stamping, except that it will not be required to restamp the A.S.M.E. symbol. Notice of completion of such restamping shall be filed with the director by the inspector who stamped the boiler together with a facsimile of the stamping applied.
(Code 1967, § 45-58; Code 1985, § 42-62)

Sec. 14-12-39. Suspension of inspection certificate.

If, upon inspection, a boiler or unfired pressure vessel is found to be in such condition that it is unsafe to operate, the inspection certificate shall be suspended by the chief inspector, who shall be notified by a deputy inspector or special inspector. Any person causing such objects to be operated shall be guilty of a misdemeanor.
(Code 1967, § 45-59; Code 1985, § 42-63)

Sec. 14-12-40. Condemnation.

Any boiler or unfired pressure vessel having been inspected and declared unsafe by the chief or deputy inspector shall be stamped by the inspector with an arrowhead stamp having an overall length of one-half-inch and width of three-eighths inch on either side of the letters "XXX," as shown by the following facsimile, which will designate a condemned boiler or unfired pressure vessel:

XXX	XXX

(Code 1967, § 45-60; Code 1985, § 42-64)

Sec. 14-12-41. Permission to reinstall moved equipment.

If a standard or A.S.M.E. boiler or unfired pressure vessel located in this city is to be moved to another location for temporary use or repairs, application shall be made by the owner or user to the chief inspector for permission to reinstall the boiler or unfired pressure vessel.
(Code 1967, § 45-61; Code 1985, § 42-65)

Sec. 14-12-42. Nonstandard equipment.

A. A nonstandard boiler or unfired pressure vessel now in use in this city, if removed outside the boundaries of the city, cannot be brought in and reinstalled without permission of the board of boiler rules.

B. Shipment of nonstandard boilers or unfired pressure vessels into this city for use is prohibited.
(Code 1967, § 45-62; Code 1985, § 42-66)

Sec. 14-12-43. Reinstallation or shipment into city of used or secondhand equipment.

Before a used or secondhand boiler or unfired pressure vessel can be reinstalled or shipped into this city, an inspection must be made by an authorized inspector and data submitted by him or her shall be filed by the owner or user of the boiler or unfired pressure vessel with the chief inspector for his or her approval.
(Code 1967, § 45-63; Code 1985, § 42-67)

Sec. 14-12-44. Fittings and appliances for reinstalled equipment.

In any case where a stationary boiler or unfired pressure vessel is moved and reinstalled, the fittings and appliances must comply with the provisions of this chapter for new installations.
(Code 1967, § 45-64; Code 1985, § 42-68)

Sec. 14-12-45. Increasing safety factors.

The board of boiler rules authorizes an inspector to increase factors of safety if the condition of the boiler or unfired pressure vessel warrants it. If the owner or user does not concur with the inspector's decision, the owner or user may appeal to the board of boiler rules, which may request a joint inspection by the chief inspector and a deputy or special inspector. Each inspector shall render his or her report to the board of boiler rules and the board shall render the final decision, based upon the data contained in all the inspectors' reports.
(Code 1967, § 45-65; Code 1985, § 42-69)

Sec. 14-12-46. Inspection of drum heads.

For new installations, provision shall be made to permit making inspections of the drum heads of all boilers. For existing installations, heads of lower drums shall be thoroughly examined at the annual inspection and either a sufficient amount of brickwork shall be removed or inspection doors provided to enable this examination to be made.
(Code 1967, § 45-66; Code 1985, § 42-70)

Sec. 14-12-47. Removal of safety appliances—Excess load on safety valves.

A. No person, except under the direction of an inspector, shall attempt to remove or shall do any work upon any safety appliance prescribed by this chapter while a boiler or unfired pressure vessel is in operation.

Should any of these appliances be repaired during outage of a boiler or unfired pressure vessel, they must be reinstalled and in proper working order before the object is again placed in service.

B. No person shall in any manner load the safety valve or valves to maintain a working pressure in excess of that stated on the certificate of inspection.
(Code 1967, § 45-67; Code 1985, § 42-71)

Sec. 14-12-48. Boiler attendants.

Every owner or user of any boiler or steam generating apparatus, when such equipment is in use, shall have a licensed engineer of the grade required on duty at all times as provided for in section 46-12 of the city's 1967 Code of Ordinances.
(Code 1967, § 45-68; Code 1985, § 42-72)

Sec. 14-12-49. Bond for persons repairing or installing boilers or pressure vessels.

Any person making repairs, alteration or installing any boiler or pressure vessel required under this chapter to be inspected shall have at least one person in his or her employ doing such work who has on file in the chief inspector's office a bond of $500.00 which is to assure the city of the compliance of same.
(Code 1967, § 45-69; Code 1985, § 42-73)

Sec. 14-12-50. Work permits.

A. Before erecting any boiler or pressure vessel regulated by this chapter, and before making any repairs or alterations to any boiler or pressure vessel, the person doing such work shall first file an application and secure a permit for the same. Specifications for such work shall be made on blanks furnished by the chief inspector's office and shall accompany all such applications for permits.

B. For repairs being made in case of emergencies when the office of the inspector is closed, a permit shall be taken out as soon as the office is opened after the repairs have been started and the chief inspector notified of such.

C. Before installing any boiler or pressure vessel required under this chapter to be inspected, the owner or user shall first obtain a permit from the chief inspector.
(Code 1967, § 45-70; Code 1985, § 42-74)

ARTICLE 4. RULES AND REGULATIONS RELATING TO CONSTRUCTION, INSTALLATION, INSPECTION, MAINTENANCE AND USE

Sec. 14-12-51. Power boilers—New installations.

A. No power boiler, except reinstalled boilers and those exempted by these rules and regulations, shall hereafter be installed in this city unless it has been constructed, inspected and stamped in conformity with the city boiler construction code and is approved, registered and inspected in accordance with the requirements of these rules and regulations.

B. A boiler having the standard stamping of any state that has adopted a standard of construction equivalent to the standard of the city may be accepted by the chief inspector; provided however, that, the person desiring to install the boiler shall make application for the installation and shall file with this application the manufacturer's data covering the construction of the boiler in question.

C. All new boiler installations, including reinstalled boilers, shall be installed in accordance with the requirements of the latest revision of the A.S.M.E. Boiler Construction Code and these rules and regulations.

D. Upon the completion of installation and proper permits acquired, all boilers shall be inspected by the chief inspector, a deputy inspector or a special inspector. At the time of this inspection, the boilers shall be stamped with a serial number of the city followed by letters "MFS," such letters and figures to be not less than $^{5}/_{16}$ of an inch in height. Stamping shall not be concealed by lagging or paint and shall be exposed at all times.
(Code 1967, § 45-81; Code 1985, § 42-86)

Sec. 14-12-52. Power boilers—Existing installations.

A. *Application of section.* This section shall apply to existing power boiler installations.

B. *Maximum allowable working pressure for standard boilers.* The maximum allowable working pressure for standard boilers shall be determined in accordance with the applicable provision of the edition of the A.S.M.E. Code under which they were constructed and stamped.

C. *Maximum allowable working pressure for nonstandard boilers.* The maximum allowable working pressure on the shell of a nonstandard boiler or drum shall be determined by the strength of the weakest section of the

structure computed from the thickness of the plate, the tensile strength of the plate, the efficiency of the longitudinal joint or tube ligaments, the inside diameter of the outside course and the factor of safety allowable by these rules.

$$\frac{TS \times t \times E}{R \times FS} = \text{Maximum allowable working pressure in lb. per sq. in. gauge}$$

$R \times FS$

Where

TS = Ultimate tensile strength of shell plates, lb. per sq. in.

t = Minimum thickness of shell plate, in weakest course, in inch.

E = Efficiency of longitudinal joint.

For riveted construction, E shall be determined by rules given in paragraph P-181 of A.S.M.E. Boiler Construction Code for Power Boilers. For fusion welded construction, E shall be determined by rules in paragraph P-102 of A.S.M.E. Boiler Construction Code for Power Boilers.

For tube ligaments, E shall be determined by rules in paragraphs P 192 and P 193 of A.S.M.E. Boiler Construction Code for Power Boilers. For seamless construction, E shall be considered 100 percent.

R = One-half the inside diameter of the weakest course of shell or drum in inches.

FS = Factor of safety permitted.

1. *Tensile strength.* When the tensile strength of steel or wrought iron shell plates is not known, it shall be taken as 55,000 pounds per square inch for steel and 45,000 pounds per square inch for wrought iron.

2. *Crushing strength of mild steel.* The resistance to crushing of mild steel shall be taken at 95,000 pounds per square inch of cross sectional area.

3. *Strength of rivets in shear.* When computing the ultimate strength of rivets in shear, the following values in pounds per square inch of the cross sectional area of the rivet shank shall be used:

Iron rivets in single shear	38,000
Iron rivets in double shear	76,000
Steel rivets in single shear	44,000
Steel rivets in double shear	88,000

When the diameter of the rivet holes in the longitudinal joints of a boiler is not known, the diameter and cross sectional area of rivets, after driving may be selected from the following table or ascertained by cutting out one rivet in the body of the joint:

Sizes of Rivets Based on Plate Thickness

Thickness of plate	1/4″	9/32″	5/16″	11/32″	3/8″	13/32″
Diameter of rivet after driving	11/16″	11/16″	3/4″	3/4″	13/16″	13/16″
Thickness of plate	7/16″	15/32″	1/2″	9/16″	5/8″	
Diameter of rivet after driving	15/16″	15/16″	15/16″	1 1/16″	1 1/16″	

4. *Factors of safety.* The following factors of safety shall be increased by the inspector if the condition and safety of the boilers demand it.

   a. The lowest factor of safety permissible on existing installations shall be 4.5 excepting for horizontal return tubular boilers having continuous lap seams more than 12 feet in length where the factor of safety shall be eight, and when this latter type of boiler is removed from its existing setting, it shall not be reinstalled for pressures in excess of 15 pounds per square inch gauge.

   b. Reinstated or secondhand boilers shall have a minimum factor of safety of six when the longitudinal seams are of lap riveted construction and a minimum factor of safety of five when the longitudinal seams are of butt and double strap construction.

5. *Age limit of fire tube boilers.* The age limit of a horizontal return tubular, flue or cylindrical boiler having a longitudinal lap joint and operating at a pressure in excess of 50 pounds per square inch gauge shall be 30 years. A reasonable time for replacement shall be given at the discretion of the director not to exceed one year.

6. *Welded boilers.* Boilers having either longitudinal or circumferential seams of fusion welded construction shall have been constructed and stamped in accordance with the rules and regulations of the A.S.M.E. Boiler Construction Code or shall have the standard stamping of another state that has adopted a standard of construction equivalent to the standards of the A.S.M.E. Boiler Construction Code.

7. *Pressure on old boilers.* In no case shall maximum working pressure of an old boiler be increased to a greater pressure than would be allowed for a new boiler of same construction.

8. *Cast iron headers and mud drums.* The maximum allowable working pressure on a water tube boiler, the tubes of which are secured to cast iron or malleable iron headers or which have cast iron mud drums, shall not exceed 160 pounds per square inch gauge.

9. *Pressure on cast iron boilers.* The maximum allowable working pressure for any cast iron boiler, except hot water boilers, shall be 15 pounds per square inch gauge.

D. *Safety valves.* The use of weighted-lever safety valves shall be prohibited and these valves shall be replaced by direct spring-loaded pop type valves that conform to the requirements of the A.S.M.E. Boiler Construction Code for Power Boilers.

Safety valves having either the seat or disc of cast iron shall not be used.

Each boiler shall have at least one safety valve and if it has more than 500 square feet of water heating surface, it shall have two or more safety valves.

The valve or valves shall be connected to the boiler, independent of any other steam connection and attached as close as possible to the boiler without unnecessary intervening pipe or fittings. Where alteration is required to conform to this requirement, owners or users shall be allowed one year in which to complete the work.

No valve of any description shall be placed between the safety valve and the boiler nor on the escape pipe (if used) between the safety valve and the atmosphere. When an escape pipe is used, it shall be full size and fitted with an open drain to prevent water lodging in the upper part of the safety valve or escape pipe. When an elbow is placed on a safety valve escape pipe, it shall be located close to the safety valve outlet of the escape pipe, shall be securely anchored and supported. All safety valve discharges shall be so located or piped as to be carried clear from walkways or platforms used to control the main stop valves or boilers or steam headers.

The safety valve capacity of each boiler shall be such that the safety valve or valves will discharge all the steam that can be generated in the boiler without allowing the pressure to rise more than six percent above the highest pressure to which any valve is set and in no case to more than six percent above the maximum allowable working pressure.

One or more safety valves on every boiler shall be set at or below the maximum allowable working pressure. The remaining valves may be set within a range of three percent above the maximum allowable working pressure, but the range of setting of all of the safety valves on a boiler shall not exceed ten percent of the highest pressure to which any valve is set.

When two or more boilers operating at different pressures and safety valve settings are interconnected, the lower pressure boilers or interconnected piping shall be equipped with safety valves of sufficient capacity to prevent over pressure considering the generating capacity of all boilers.

In those cases where the boiler is supplied with feed water directly from pressure mains without the use of feeding apparatus (not to include return traps), no safety valve shall be set at a pressure greater than 94 percent of the lowest pressure obtained in the supply main feeding the boiler.

The relieving capacity of the safety valves on any boiler may be checked by one of the three following methods and, if found to be insufficient, additional valves shall be provided:

1. By making the accumulation test, which consist of shutting off all other steam-discharge outlets from the boiler and forcing the fires to the maximum. The safety valve capacity shall be

sufficient to prevent a pressure in excess of six percent above the maximum allowable working pressure;

2. By measuring the maximum amount of fuel that can be burned and computing the corresponding evaporative capacity (steam generating capacity) upon the basis of the heating valve of this fuel. These computations shall be made as outlined in the appendix of the A.S.M.E. Boiler Construction Code for Power Boilers;

3. By determining the maximum evaporative capacity by measuring the feed water.

When either of the methods outlined in subsection (D)(2) or (3) of this section is employed, the sum of the safety valve capacities shall be equal to or greater than the maximum evaporative capacity (maximum steam generating capacity) of the boiler.

E. *Boiler feeding and feed piping.* All boilers shall have a feed supply which will permit the boilers being fed at any time while under pressure.

A boiler having more than 500 square feet of water heating surface shall have at least two means of feeding, one of which shall be an approved feed pump, injector or inspirator. Where a source of feed directly from pressure mains is available at sufficient pressure to feed the boiler against a pressure six percent greater than the release pressure of the safety valve with the highest release setting, this may be considered one of the means.

The feed water shall be introduced into the boiler in such manner that it will not be discharged close to riveted joints of shell or furnace sheets or directly against surfaces exposed to gases at high temperature or direct radiation from the fire.

The feed piping to the boiler shall be provided with a check valve near the boiler and a valve or cock between the check valve and the boiler. When two or more boilers are fed from a common source, there shall also be a valve on the branch to each boiler between the check valve and source of supply. Whenever a globe valve is used on feed piping, the inlet shall be under the disc of the valve.

In all cases where returns are fed back to the boiler by gravity, there shall be a check valve and stop valve on each return line, the stop valve to be placed between the boiler and the check valve and both shall be located as close to the boiler as is practicable.

Where deaerating heaters are not employed, it is recommended that the temperature of the feed water be not less than 120 degrees Fahrenheit to avoid the possibility of setting up localized stress. Where deaerating heaters are employed, it is recommended that the minimum feed water temperature be not less than 215 degrees Fahrenheit so that dissolved gases may be thoroughly released.

F. *Fusible plugs.* Fire-actuated fusible plugs if used shall con form to the requirements of the A.S.M.E. Boiler Construction Code for Power Boilers.

G. *Water columns, gauge glasses and gauge cocks.* No outlet connections (except for damper regulator, low water fuel cutout, drains, steam gauges or such apparatus that does not permit the escape of an appreciable amount of steam or water therefrom) shall be placed on the piping that connects the water column to the boiler. The water column shall be provided with a valved drain of at least three-fourths-inch pipe size, the drain to be piped to a safe location.

Each boiler shall have three or more gauge cocks, located within the range of the visible length of the water glass, except when such boiler has two water glasses with independent connections to the boiler, located on the same horizontal line and not less than two feet apart.

For all installations where the water gauge glass or glasses are more than 30 feet from the boiler operating floor, it is recommended that water level indicating or recording gauges be installed at eye height from the operating floor.

H. *Steam gauges.* Each steam boiler shall have a steam gauge, with dial range not less than 1½ times the maximum allowable working pressure, connected to the steam space or to the steam connection to the water column. The steam gauge shall be connected to a siphon or equivalent device of sufficient capacity to keep the gauge tube filled with water and so arranged that the gauge cannot be shut off from the boiler except by a cock placed near the gauge and provided with a tee or lever handle arranged to be parallel to the pipe in which it is located when the cock is open.

When a steam gauge connection longer than eight feet becomes necessary, a shut-off valve may be used near the boiler provided the valve is of the outside screw and yoke type and is locked open. The line shall be ample size, with provision for free blowing.

Each boiler shall be provided with a one-quarter-inch nipple and globe valve connected to the steam space for the exclusive purpose of attaching a test gauge when the boiler is in service so that the accuracy of the boiler steam gauge may be ascertained.

I. *Stop valves.* Each steam outlet from a boiler (except safety valve connections) shall be fitted with a stop valve located as close as practicable to the boiler.

When a stop valve is so located that water can accumulate, ample drains shall be provided. The drainage shall be piped to a safe location and shall not be discharged on the top of the boiler or its setting.

When boilers provided with manholes are connected to a common steam main, the steam connection from each boiler shall be fitted with two stop valves having an ample free flow drain between them. The discharge of this drain shall be visible to the operator while manipulating the valves and shall be piped clear of the boiler setting. The stop valves shall consist preferably of one automatic nonreturn valve (set next to the boiler) and a second valve to the outside-screw and yoke type.

J. *Blow-off piping.* The construction of the setting around each blow-off pipe shall permit free expansion and contraction. Careful attention shall be given to the problem of sealing these setting openings without restricting the movement of the blow-off piping.

All blow-off piping, when exposed to furnace heat, shall be protected by fire brick or other heat resisting material so constructed that the piping may be readily inspected.

Each boiler shall have a blow-off pipe fitted with a valve or cock, in direct conflection with the lowest water space. Cocks shall be of the gland or guard type and suitable for the pressure allowed. The use of lobe valves shall not be permitted. When the maximum allowable working pressure exceeds 100 pounds per square inch gauge, each blow-off pipe shall be provided with two valves or a valve and cock, such valves and cocks to be not less than extra heavy type.

When the maximum allowable working pressure exceeds 100 pounds per square inch gauge, blow-off piping shall be not less than extra heavy from the boiler to the valve or valves and shall be run full size without use of reducers or bushings. The piping shall be wrought iron or steel and shall not be galvanized.

All fittings between the boiler and blow-off valve shall be steel. In case of renewal of blow-off pipe or fittings, they shall be installed in accordance with the rules and regulations for new installations.

K. *Repairs and renewals of boiler fittings and appliances.* Whenever repairs are made to fittings or appliances or it becomes necessary to replace them, the work shall comply with the provisions of this chapter for new installations.

L. *Stamping of existing boilers.* Each boiler shall be stamped with a serial number of the city followed by the letters "MFS," such letters and figures to be not less than $^{5}/_{16}$ inch in height. The stamping shall not be concealed by lagging or paint and shall be exposed at all times.

M. *Suggested operating practices.* It is recommended that the suggested rules of the A.S.M.E. Boiler Construction Code covering the care of power boilers and pressure vessels be used as a guide for proper and safe operating practices.
(Code 1967, § 45-82; Code 1985, § 42-87; Ord. No. 1427, § 1, 8-29-1972)

Sec. 14-12-53. Boiler runway or platform.

A. *Runway or platform.* Where necessary for safety, there shall be a steel runway or platform of standard construction installed across the tops of adjacent boilers or at some other convenient level for the purpose of affording safe access. The inspector shall notify the chief inspector of owners or users who must provide for these requirements and the chief inspector shall give written notice to the owner or user that the installation be made. The owner or user shall be allowed one year from the date of the chief inspector's notification in which to complete the work. All runways shall have at least two means of exit, each to be remotely located from the other.

B. *Exits from boiler rooms.* To lessen the hazard of being trapped within the boiler room, ash pit aisles or other locations, there shall be at least two means of exit as may be considered necessary by the chief inspector or the board of boiler rules. Each elevation shall be provided with at least two means of egress, each to be remotely located from the other.

All authorized inspectors shall notify the chief inspector of owners or users who must provide for these requirements. The chief inspector then shall give written

notice to the owner or user that the necessary work must be completed within six months from the date of notification.

C. *Conditions not covered by section.* All cases not specifically covered by this section shall be treated as new installations, or may be referred to the chief inspector for instructions concerning the requirements.
(Code 1967, § 45-83; Code 1985, § 42-88)

Sec. 14-12-54. Miniature boilers—New installations.

A. No miniature boiler, except reinstalled boilers and those exempted by these rules and regulations, shall hereafter be installed in this city unless it has been constructed, inspected and stamped in conformity with section 5 of the A.S.M.E. Boiler Construction Code and is approved, registered and inspected in accordance with these rules and regulations.

B. A miniature boiler having the standard stamping of a state that has adopted a standard of construction equivalent to the standard of construction of this state may be accepted by the chief inspector; provided however, that the person desiring to install the same shall make application for the manufacturer's data report covering the construction of the boiler in question.

C. All new installations of miniature boilers, including reinstalled boilers must be installed in accordance with the requirements of the latest revision of the A.S.M.E. Boiler Construction Code and these rules and regulations.

D. Upon completion of the installation, all miniature boilers shall be inspected by the chief inspector, a deputy inspector or a special inspector. At the time of this inspection, all miniature boilers must be stamped with the serial number of the city, followed by the letters "MFS," such letters and figures to be not less than 5/16 inch in height.
(Code 1967, § 45-84; Code 1985, § 42-89)

Sec. 14-12-55. Miniature boilers—Existing installations.

A. *Application of section.* This section shall apply to existing miniature boilers.

B. *Maximum allowable working pressure.* Rules and regulations, as adopted for power boilers applying to strength of materials and calculations to determine maximum allowable working pressure, shall be used for miniature boilers unless a special rule is stated herein. The maximum allowable working pressure on the shell of a boiler or drum shall be determined by the provisions of section 14-12-52.

C. *Construction.* The construction of miniature boilers, including factors of safety, except where otherwise specified, shall conform to that required for power boilers.

D. *Safety valves.* Each miniature boiler shall be equipped with a sealed, spring-loaded, pop type safety valve not less than one-half-inch pipe size, connected directly to the boiler.

The safety valve shall be plainly marked by the manufacturer showing name or identifying trademark, nominal diameter and pressure at which it is set to release.

The safety valve relieving capacity of each boiler shall be such that it will discharge all the steam that can be generated by the boiler without allowing the pressure to rise more than six percent above the maximum allowable working pressure.

In those cases where the boiler is supplied with feed water directly from a pressure main or system without the use of a mechanical feeding device, the safety valve shall be set to release at a pressure not in excess of 94 percent of the lowest pressure obtained in the supply main or system feeding the boiler. Return traps shall not be considered mechanical feeding devices.

E. *Gauge glass and water level indicator.* Each miniature boiler shall be equipped with a water gauge glass for determination of the water level.

The lowest permissible water level shall be at a point one-third of the height of the shell, except where the boiler is equipped with an internal furnace, in which case it shall be not less than one-third of the tube length above the top of the furnace.

For small boilers where there is insufficient space for the usual type of gauge glass, water level indicators of the glass, bull's eye type may be used.

F. *Feeding and feed water piping.* Every miniature boiler shall be provided with at least one feed pump or other mechanical feeding device except where the following conditions exist:

1. Where the boiler is connected to a water main or system having sufficient pressure to feed the boiler at any time while under pressure;

2. Where the fuel burned is such that all heat input can be discontinued instantaneously by the operation of a valve, cock or switch, thereby permitting the boiler pressure to be quickly lowered to a point where water can be introduced from the connection to the water main;

3. Where the boiler is operated without extraction of steam (closed system) in which case the boiler is filled, when cold, through the connection or opening provided in accordance with the following rule.

Each miniature boiler shall be fitted with a feed water connection which shall not be less than one-half-inch iron pipe size. The feed piping shall be provided with a check valve near the boiler and a valve or check between the check valve and the boiler.

Feed water may be introduced through the blow-off connection where the boiler is operated without extraction of steam (closed system).

Feed water shall not be introduced through the water column or gauge glass connections while the boiler is under pressure.

G. *Blow-off pipe.* Each miniature boiler shall be provided with a blow-off connection, not less than one-half-inch iron pipe size, directly connected with the lowest water space.

Blow-off piping shall not be galvanized and shall be provided with a valve or cock.

H. *Steam gauges.* Each miniature boiler shall be equipped with a steam gauge having a dial range not less than 1½ times the maximum allowable working pressure. The gauge shall be connected to the steam space or to the steam connection to the gauge glass by a brass or bronze composition siphon tube or equivalent device that will keep the gauge tube filled with water.

I. *Stop valves.* The steam piping from a miniature boiler shall be provided with a stop valve located as close to the boiler shell or drum as is practicable, except in those classes where the boiler and steam receiver are operated as a closed system.

J. *Gas burners.* For installations which are gas-fired, the burners used shall conform to the requirements of the American Gas Association, as stated in the appendix of the A.S.M.E. Boiler Construction Code, section V.

K. *Flue connection.* Each gas-fired boiler shall be equipped with at least four-inch vent pipe or flue, in no case less than the vent outlet from the boiler extended to and approved location outside the building or connected to a chimney flue. Where the horizontal run is more than ten feet the vent shall be increased to six inches. A draft hood of approved design shall be provided on each boiler.

L. *Stamping of boilers.* Each boiler shall be stamped with a serial number of the city, followed by the letters "MFS," such letters and figures to be not less than 5/16 inch in height The stamping shall not be concealed by lagging or paint and shall be exposed at all times.
(Code 1967, § 45-85; Code 1985, § 42-90)

Sec. 14-12-56. Heating boilers—New installations.

A. No heating boiler, except reinstalled boilers and those exempted by these rules and regulations, shall hereafter be installed in this city unless it has been constructed, inspected and stamped in conformity with section 4 of the A.S.M.E. Boiler Construction Code and is approved, registered and inspected in accordance with the requirements of these rules and regulations.

B. All new heating boiler installations, including reinstalled boilers, must be installed in accordance with the requirements of the latest revision of the A.S.M.E. Boiler Construction Code and these rules and regulations.

C. Upon completion of the installation, all boilers shall be inspected by the chief inspector, a deputy inspector or a special inspector. At the time of this inspection, all steel heating boilers must be stamped with the serial number of the city, followed by the letters "MFS," such letters and figures to be not less than 5/16 inch in height. All cast iron heating boilers shall have securely attached to the front of the boiler a metal tag not less than one inch in height, which shall have the serial number of the city stamped thereon.

D. It is recommended that the return water connections to all low pressure steam heating boilers supplying a gravity return heating system be so arranged as to form what is known as the "water line return" so that the water cannot be forced out of the boiler below the safe water level. This connection is shown in Figure H-3, section 4, A.S.M.E. Boiler Construction Code.
(Code 1967, § 45-86; Code 1985, § 42-91)

Sec. 14-12-57. Existing installations.

A. *Application of section.* This section shall apply to existing heating boilers.

B. *Maximum allowable working pressure in A.S.M.E. Code boilers.* The maximum allowable working pressure of a boiler built in accordance with the A.S.M.E. Code shall in no case exceed the pressure indicated by the manufacturer's identification stamped or cast upon the boiler or upon a place secured to it.

C. *Maximum allowable working pressure for noncode riveted boilers.* The maximum allowable working pressure on the shell of a noncode riveted heating boiler shall be determined in accordance with the provisions of this article for covering existing installations power boilers, except that in no case shall the maximum allowable working pressure of a steam heating boiler exceed 15 pounds or a hot water boiler exceed 160 pounds at a temperature not exceeding 250 degrees Fahrenheit.

D. *Maximum allowable working pressure for noncode welded boilers.* The maximum allowable working pressure of a noncode steel or wrought iron heating boiler of welded construction shall not exceed 15 pounds. For other than steam service the maximum allowable working pressure shall be calculated in accordance with section IV of the A.S.M.E. Code.

E. *Maximum allowable working pressure for noncode cast iron boilers.* The maximum allowable working pressure of a noncode boiler composed principally of cast iron shall not exceed 15 pounds for steam service or 30 pounds for hot water service. The maximum allowable working pressure of a noncode boiler having cast iron shell or heads and steel or wrought iron tubes shall not exceed 15 pounds for steam service or 30 pounds for water service.

F. *Fired radiators.* A radiator in which steam pressure is generated at a pressure of 15 pounds or less is considered a low pressure boiler.

G. *Procedure if operation unsafe at previously approved pressure.* If in the judgment of the inspector a steam heating boiler is unsafe for operation at the pressure previously approved, the pressure shall be reduced, proper repair made or the boiler retired from service.

H. *Safety valves.* Each steam heating boiler shall be provided with one or more officially rated safety valves of the spring-pop type adjusted and sealed to discharge at a pressure not to exceed 15 pounds per square inch. The installation, size and capacity of the safety valves shall conform to the requirements of the A.S.M.E. Heating Boiler Code.

I. *Water relief valves.* Each hot water heating boiler shall have at least one officially rated pressure relief valve set to relieve at or below the maximum allowable working pressure of the boiler. Each hot water supply boiler shall have at least one officially rated pressure temperature relief valve of the automatic-reseating type set to relieve at or below the maximum allowable working pressure of the boiler. The installation, size and capacity of the relief valves shall conform to the requirements of the A.S.M.E. Heating Boiler Code.

J. *Steam gauge.* Each steam boiler shall have a steam pressure gauge connected to the steam space of the boiler itself or on steam pipe near the boiler. The graduations of the steam gauge shall not be less than 15 pounds nor more than 30 pounds.

K. *Water gauge glass and gauge cocks.* Each steam boiler shall have at least one water gauge glass with the lowest visible part above the heating surfaces in the primary combustion chamber. When, in the judgment of an inspector, the heating surfaces above the low water line may be injured by contact with gases or high temperature the water gauge glass shall be raised until the lowest visible part of the gauge glass is above such heating surface.

Each steam boiler shall have two or more gauge cocks located within the visible length of the water gauge glass, except when such boiler is provided with two water gauge glasses.

L. *Stop valves and check valves.* If a boiler may be closed off from the heating system by closing a steam stop valve, there shall be a check valve in the condensate return line between the boiler and the system.

If any part of a heating system may be closed off from the remainder of the system by closing a steam stop valve, there shall be a check valve in the condensate return pipe between the boiler and the system.

M. *Feed water connections.* Feed water connections shall be independent of any water gauge connections and be made to the condensate return pipe or reservoir of the condensate return pump. There should be a stop valve and a check valve in the feed water line at the boiler.

N. *Return pump.* Each condensate return pump where practicable shall be provided with an automatic water level control set to maintain the water level within the limits of two gauge cocks.

O. *Repairs and renewals of fittings and appliances.* Whenever repairs are made to fittings or appliances or it becomes necessary to replace them, the work must comply with the provisions of this chapter for new installations.

P. *Stamping of existing heating boilers.* Each steel heating boiler shall be stamped with a serial number of the city, followed by the letters "MFS," such letters and figures to be not less than 5/16 inch in height. The stamping shall not be concealed by flagging or paint and shall be exposed at all times. Each cast iron heating boiler shall have securely attached to the front of the boiler a metal tag not less than one inch in height, which shall have the serial number of the city stamped thereon. (Code 1967, § 45-87; Code 1985, § 42-92; Ord. No. 1427, § 1(4), (5), 8-29-1972)

Sec. 14-12-58. Unfired pressure vessels—New installations.

A. No unfired pressure vessel, except reinstalled vessels and those exempt by these rules and regulations, shall hereafter be installed in this city unless it has been constructed, inspected and stamped in conformity with section 8 of the A.S.M.E. Boiler and Unfired Pressure Vessel Construction Code and is approved, registered and inspected in accordance with the requirements of these rules and regulations.

B. All new installation unfired pressure vessels, including reinstalled unfired pressure vessels, shall be installed in accordance with the requirements of the latest revision of the A.S.M.E. Boiler and Unfired Pressure Vessel Construction Code, section 8, and these rules and regulations.

C. An unfired pressure vessel having the standard stamping of a state that has adopted a standard of construction equivalent to the standard of these rules may be accepted by the chief inspector; provided, however, that, the person desiring to install the same shall make application for the installation and shall file with this application the manufacturer's data report covering the construction of the unfired pressure vessel in question.

D. Upon completion of the installation, all unfired pressure vessels shall be inspected by the chief inspector, a deputy inspector or a special inspector. At the time of this inspection each unfired pressure vessel shall be stamped with a serial number of the city followed by the letters "MFS," such letters and figures to be not less than 5/16 of an inch in height. The stamping shall not be concealed by lagging or paint and shall be exposed at all times.

E. Rupture discs or safety heads may be used for additional protection of pressure vessels.
(Code 1967, § 45-88; Code 1985, § 42-93)

Sec. 14-12-59. Unfired pressure vessels—Existing installations.

A. *Application of section.* This section applies to existing unfired pressure vessel installations.

B. *Maximum allowable working pressure for standard unfired pressure vessels.* The maximum allowable working pressure for standard unfired pressure vessels shall be determined in accordance with the applicable provisions of the edition of the A.S.M.E. Code under which they were construed and stamped.

C. *Maximum allowable working pressure for nonstandard unfired pressure vessels.*

1. *For internal pressure.* The maximum allowable working pressure on the shell of a nonstandard pressure vessel shall be determined by the strength of the weakest course computed from the thickness of the plate, the tensile strength of the plate, the efficiency of the longitudinal joint, the inside radius of the course and the factor of safety allowed by these rules.

TS × T × E = Maximum allowable working pressure.

R × FS = Pounds per square inch.

TS = Ultimate tensile strength of shell plate pounds per square inch. When the tensile strength is not known it shall be taken as 55,000 pounds per square inch for temperatures not exceeding 700 degrees Fahrenheit.

T = Minimum thickness of shell plate of weakest course, inches.

E = Efficiency of longitudinal joint depending upon construction.

Use valves as follows:

For Riveted Joints

Calculated riveted efficiency.

For Fusion Welded Joints

Single lap weld	40%
Double lap weld	60%
Single butt weld	50%
Double butt weld	70%
Forge weld	70%
Brazed steel	80%
Brazed copper	90%

R = Inside radius of weakest course of shell, inches, provided the thickness does not exceed ten percent of the radius. If the thickness is over ten percent of the radius, the outer radius shall be used.

FS = Factor of safety allowed by these rules.

2. *For external pressure.* The maximum allowable working pressure for cylindrical vessels subjected to external or collapsing pressure shall be determined by the rules in Paragraphs U-120 to U-138 inclusive of the A.S.M.E. Boiler and Unfired Pressure Vessel Construction Code, section 8.

D. *Factors of safety.* The minimum factor of safety shall in no case be less than four for vessels up to and including 20 years of age and shall be not less than four and one-half where the age of the vessel is more than 20 years. These factors of safety may be increased when deemed necessary by the inspector to insure the operation of the vessel within safe limits. The condition of the vessel and the particular service it is being subjected to will be the determining factor.

E. *Inspection of inaccessible parts.* Where, in the opinion of the inspector, as the result of conditions disclosed at an inspection, it is advisable to remove interior or exterior lining, covering or brick work to expose certain parts of the vessel not normally visible, the owner or user shall remove such material to permit proper inspection and the drilling of any part of the vessel where necessary to ascertain thickness.

F. *Safety appliances.* Each unfired pressure vessel shall be protected by such safety and relief valves and indicating and controlling devices as will insure its safe operation. These valves and devices shall be so constructed, located and installed that they cannot readily be rendered inoperative. The relieving capacity of safety valves shall be such as to prevent a rise of pressure in the vessel of more than ten percent above the maximum allowable working pressure taking into account the effect of static head. Safety valve discharges shall be carried to a safe place.

G. *Rupture discs.* Rupture discs or safety heads may be used for additional protection of unfired pressure vessels.

H. *Repairs and renewals of fittings and appliances.* Whenever repairs are made to fittings and appliances or it becomes necessary to replace them, the work must comply with this chapter.

I. *Stamping of existing unfired pressure vessels.* Each unfired pressure vessel shall be stamped with a serial number of the city followed by the letters "MFS," such letters and figures to be not less than 5/16 inch in height. The stamping shall not be concealed by lagging or paint and shall be exposed at all times.
(Code 1967, § 45-89; Code 1985, § 42-94)

Sec. 14-12-60. General requirements.

A. *Inspections generally.* All boilers and unfired pressure vessels, unless otherwise exempt by these rules and regulations and which are subject to regular inspection as provided for in section 14-12-24, shall be prepared for such inspection, or hydrostatic tests whenever necessary or by the owner or user when notified by the chief inspector, deputy inspector or special inspector.

The owner or user shall prepare each boiler or unfired pressure vessel for internal inspection and shall prepare for and apply the hydrostatic test whenever necessary, on the date specified by the chief inspector, deputy inspector or special inspector, which date shall not be less than seven days after the date of notification.

B. *Preparation for internal inspection.* The owner or user shall prepare a boiler for internal inspection in the following manner:

1. Water shall be drawn off and the boiler thoroughly washed.

2. All manhole and handhole plates, wash-out plugs and plugs in water column connection shall be removed, the furnace and combustion chambers thoroughly cooled and cleansed.

3. All grates of internally fired boilers shall be removed.

4. At each annual inspection, brick work shall be removed as required by the inspector in order to determine the condition of the boiler, headers, furnace, supports or other parts.

5. The steam gauge shall be removed for testing.

6. Any leakage of steam or hot water into the boiler shall be cut off by disconnecting the pipe or valve at the most convenient point.

Unfired pressure vessels shall be prepared for inspection to the extent deemed necessary by the inspector.

C. *Improper preparation for inspection.* If a boiler or unfired pressure vessel has not been properly prepared for an internal inspection or the owner or user fails to comply with the requirements for hydrostatic tests as set forth in these rules, the inspector may decline to make the inspection or test and the certificate of inspection shall be withheld until the owner or user complies with the requirements.

D. *Removal of covering to permit inspection.* If the boiler or unfired pressure vessel is jacketed so that the longitudinal seams of shells, drums or domes cannot be seen, enough of the jacketing, setting wall or other form of casing or housing shall be removed so that the size of the rivets, pitch of the rivets and other data necessary to determine the safety of the boiler or unfired pressure vessel may be obtained, provided such information cannot be determined by other means.

E. *Lap seam cracks.* The shell or drum of a boiler in which a lap seam crack is discovered along a longitudinal riveted joint shall be immediately discontinued from use. If the boiler is not more than 15 years of age, a complete new course of the original thickness may be installed at the discretion of the inspector (and after approval by the chief inspector). Patching is prohibited. (By "lap seam crack" is meant the typical crack frequently found in lap seams, extending parallel to the longitudinal joint and located either between or adjacent to rivet holes.)

F. *Hydrostatic pressure tests.* A hydrostatic pressure test, when applied to boilers or unfired pressure vessels of riveted or welded construction, except locomotive boilers, shall not exceed 1½ times the maximum allowable working pressure. Hydrostatic pressure applied to locomotive boilers shall not exceed 1¼ times the maximum allowable working pressure. During the hydrostatic pressure test, the safety valve or valves shall be removed or each valve disc shall be held down by means of a testing clamp and not by applying additional load to the spring with the compression screw. It is suggested that the minimum temperature of the water used to apply a hydrostatic test be not less than 70 degrees Fahrenheit but the maximum temperature shall not exceed 160 degrees Fahrenheit.

Note: When a hydrostatic test is to be applied to existing installations, the pressure shall be as follows:

1. For all cases involving the question of tightness, the pressures shall be equal to the release pressure of the safety valve or valves having the lowest release setting.

2. For all cases involving the question of safety, the pressure shall be equal to 1½ times the maximum allowable working pressure, except for locomotive boilers, in which case it shall be 1¼ times the maximum allowable working pressure.

G. *Low water fuel cut-offs.* All automatically-fired steam or vapor boilers shall be equipped with an automatic low-water fuel cut-off and water feeding device so constructed that the water inlet valve cannot feed water into the boiler through the float chamber, and so located as to automatically cut off the fuel supply and/or supply requisite feedwater when the surface of the water falls to the lowest safe water line. This point should be not lower than the bottom of the water glass.

Such a fuel or feedwater control device may be attached direct to a boiler or to the tapped openings provided for attaching a water glass direct to a boiler, provided that such connections from the boiler are nonferrous tees or Ys not less than one-half-inch pipe size between the boiler and the water glass so that the water glass is attached direct and as close as possible to the boilers; the straightway tapping of the Y or tee to take the water glass fittings, the side outlet of the Y or the tee to take the fuel cut-off or waterfeeding device. The ends of all nipples shall be reamed to full size diameter.

Designs embodying a float and float bowl shall have a vertical straightway drainpipe at the lowest point in the water equalizing pipe connections by which the bowl and the equalizing pipe can be flushed and the device tested.

H. *Safety appliances.* No person shall remove or tamper with any safety appliances prescribed by these rules except for the purpose of making repairs. The resetting of safety appliances shall be done in the presence of an authorized inspector.

I. *Blow-off tanks.* Blow-off piping from a power boiler or a miniature boiler shall not discharge directly into a sewer. A blow-off tank shall be used where conditions do not provide an adequate and safe open discharge.

Blow-off tanks hereafter installed, if of metal, shall have a plate thickness of not less than $^{5}/_{16}$ inch and shall be designed for a minimum working pressure of 50 pounds per square inch gauge.

The outlet from the blow-off tank shall be twice the area of the inlet pipe and made to extend internally within eight inches from the bottom of the tank.

A vent pipe at least four times the area of the inlet pipe shall lead to the outer atmosphere.

Vents shall be as direct as possible to the outer air and discharge at a safe location. There shall be no valve or other possible obstructions, such as water pockets, between the tank and the discharge end of the vent pipe.

All pipe connections between the tank and the boiler shall be as direct as possible and shall conform to Paragraph P-229, A.S.M.E. Boiler Construction Code.

For convenience in cleaning the tank, a manhole or an access opening shall be provided.

Where a blow-off tank is not vented as specified above, it shall be constructed for a pressure equal to that allowed on the boiler to which it is attached or shall be equipped with a safety valve or valves of sufficient capacity to prevent the pressure from exceeding the safe working pressure of the tank.

As an alternate to the above, blow-off facilities may conform to the provisions set forth in the pamphlet titled, "Boiler Blow-Off Equipment," published by the National Board of Boiler and Pressure Vessel Inspectors, whose address is 1155 N. High St., Columbus, Ohio.

J. *Location of blow-offs.* The discharge of safety valves, blow-off pipes and other outlets shall be located so as to prevent injury to personnel.

K. *Pressure reducing values.* Where pressure reducing valves are used, one or more relief or safety valves shall be provided on the low pressure side of the reducing valve in case the piping or equipment on the low pressure side does not meet the requirements for the full initial pressure. The relief or safety valves shall be located adjoining to or as close as possible to the reducing valve. Proper protection shall be provided to prevent injury or damage caused by the escaping steam from the discharge or relief or safety valves if vented to the atmosphere. The combined discharge capacity of the relief valves shall be such that the pressure rating of the lower pressure piping or equipment shall not be exceeded in case the reducing valve sticks open.

The use of hand-controlled by-passes around reducing valves is permissible. The by-pass, if used around a reducing valve, shall not be greater in capacity than the reducing valve unless the piping or equipment is adequately protected by relief valves or meets the requirements of the high pressure system.

It is mandatory that a pressure gauge be installed on the low pressure side of a reducing valve.

L. *Electric steam generators.* All electric steam generators shall be grounded in accordance with the city electrical code.

A suitable screen or guard shall be provided around high tension bushings and a sign posted warning of high voltage. This screen or guard shall be so located that it will be impossible for anyone working around the generator to accidentally come in contact with the high tension circuits. When adjusting safety valves, the power circuit to the generator shall be open. The generator may be under steam pressure, but the power line shall be open while the operator is making the necessary adjustments.

Each kw of electrical energy consumed by an electric steam generator operating at maximum rating shall be considered the equivalent of one square foot of heating surface of a fire tube boiler when determining the required amount of safety valve capacity.

M. *Major repairs.* Where a major repair is necessary, an inspector shall be called for consultation and advice as to the best method of making such repair. After such repair is made it shall be subject to the approval of the

inspector. Repairs to all boilers and unfired pressure vessels and their appurtenances, shall conform as nearly as practicable to the requirements of the National Board of Boiler and Pressure Vessel Inspectors.

N. *Repairs by fusion welding.* When repairs are to be made wherein fusion welding is to be used, permission shall be obtained from the chief inspector, a deputy inspector or a special inspector and the welding shall be done in accordance with the rules recommended by the National Board of Boiler and Pressure Vessel Inspectors.

O. *Riveted patches.* In applying riveted patches, the design of the patch and method of installation shall be in accordance with the rules for riveted patches recommended by the National Board of Boiler and Pressure Vessel Inspectors.

P. *Boiler room and clearance.* When boilers are replaced or new boilers installed in either existing or new buildings, a minimum height of at least three feet shall be provided between the top of the boiler proper and the ceiling.

All boilers shall be so located that two feet clearance around the boiler shall be provided for the proper operations of the boiler and its appurtenances, for the inspection of all surfaces, tubes, water walls, economizer, piping, valves and other equipment and for their necessary maintenance and repair.

Every boiler hereafter installed in a building other than an industrial building, shall be located in a separate room or compartment and when not otherwise provided, shall be enclosed by fire walls or partitions as approved with floor and ceiling of fire resistant construction.

Boiler and machinery rooms shall have proper ventilation, natural or mechanical, to insure adequate supply of fresh air to the boilers for proper combustion.

When machinery emptying poisonous or noxious gases is located or operated in such rooms special precautions shall be provided for the safety of the attendants and occupants of the building.

Q. *Shop inspections.* Any new power boiler being constructed for installation in the city shall be shop inspected in accordance with the provisions of the applicable section of the A.S.M.E. Boiler Code and shall be stamped A.S.M.E. and National Board. This shall not apply to low pressure heating boilers where shop inspection is not required by the A.S.M.E. Boiler Construction Code.

Inspections made at the request of a boiler or tank manufacturer by the chief inspector or any deputy inspector shall be charged for at the rate of $25.00 for one-half day and $55.00 for one day plus all expenses, to include traveling, hotel and incidentals. This charge shall not void the regular charge or fee for inspection or certificate when the boiler is installed.

R. *Inspection of secondhand equipment.* Charges for inspection of secondhand equipment shall be at the rate provided for in subsection Q of this section for shop inspections.

S. *Conditions not covered by rules.* In any condition not covered by these rules, the A.S.M.E. Code for new installations shall apply.
(Code 1967, § 45-90; Code 1985, § 42-95)

CHAPTER 14-13. MECHANICAL CODE

Sections:

Sec. 14-13-1. Mechanical code adopted by reference.

Sec. 14-13-1. Mechanical code adopted by reference.

The 2015 Edition of the International Code Council (ICC) International Mechanical Code is hereby adopted, a copy of said code being on file in the Office of Council Records of the Memphis City Council.

The local amendments to the sections of the 2015 Edition of the ICC Mechanical Code noted in the attached Exhibit A [on file with the city] are also adopted and together these provisions and the 2015 ICC Mechanical Code shall become the 2018 Memphis and Shelby County Mechanical Code.

Appendix A - Summary Of Permit And Inspection Fees, a locally drafted appendix, is hereby adopted into this code, but that no other appendix listed in the 2015 ICC International Mechanical Code is adopted.
(Ord. No. 5716, 12-18-2018)

CHAPTER 14-14. PLUMBING CODE

Sections:

Sec. 14-14-1. Plumbing code adopted by reference.

Sec. 14-14-1. Plumbing code adopted by reference.

The 2015 Edition of the International Code Council (ICC) International Plumbing Code is hereby adopted, a copy of said code being on file in the Office of Council Records of the Memphis City Council.

The local amendments to the sections of the 2015 Edition of the ICC International Plumbing Code noted in the attached Exhibit A [on file with the city] are also adopted and together these provisions and the 2015 ICC International Plumbing Code shall become the 2018 Memphis and Shelby County Plumbing Code.

The following appendices as provided in the 2015 Edition of the ICC International Plumbing Code are hereby adopted: Appendix B - Rate of Rainfall for various Cities, Appendix C - Structural Safety, Appendix D - Degree Day and Design Temperature, Appendix E - Sizing of Water Pipe Systems, and that locally drafted Appendix A - Plumbing Permit and Inspection Fees and Appendix H - Cross Connection, Backflow, Back Siphonage, are also adopted, but that no other appendix listed in the 2015 edition of the ICC International Plumbing Code is adopted.
(Ord. No. 5715, 12-18-2018)

CHAPTER 14-16. ELEVATORS, DUMBWAITERS, ESCALATORS AND AMUSEMENT DEVICES

Sections:

Article 1. General Provisions

Sec. 14-16-1. Definitions.
Sec. 14-16-2. Applicability.
Sec. 14-16-3. Enforcement of chapter.
Sec. 14-16-4. City inspector generally.
Sec. 14-16-5. Inspector's license.
Sec. 14-16-6. Construction permit for elevators, escalators and dumbwaiters.
Sec. 14-16-7. Supervision of installation, relocation, alteration or repair of equipment.
Sec. 14-16-8. Responsibility of person installing, relocating or altering equipment.
Sec. 14-16-9. Registration of elevators, escalators and dumbwaiters.
Sec. 14-16-10. Requirements for elevator operators.
Sec. 14-16-11. Requirements for amusement device operators.
Sec. 14-16-12. Notice of cancellation, expiration or placing of insurance on elevators.
Sec. 14-16-13. Elevator, dumbwaiter and escalator accidents.
Sec. 14-16-14. Institution of prosecutions under chapter.
Sec. 14-16-15. Penalty for violations of chapter—Continuing violations.

Article 2. Board of Elevators Rules

Sec. 14-16-16. Created—Composition—Appointment and terms of members.
Sec. 14-16-17. Filling of vacancies.
Sec. 14-16-18. Removal of members.
Sec. 14-16-19. Election of chairperson.
Sec. 14-16-20. Secretary.
Sec. 14-16-21. Meetings.
Sec. 14-16-22. Required vote and approval of decisions and rulings.
Sec. 14-16-23. General powers and duties—Rules and regulations.
Sec. 14-16-24. Appeals to board.

Sec. 14-16-100. Car lighting.
Sec. 14-16-101. Glass in cars.
Sec. 14-16-102. Aprons for cars equipped with car-leveling devices.
Sec. 14-16-103. Adjusting and renewing guide shoes.
Sec. 14-16-104. Clearances between cars, counterweights and shaftways.
Sec. 14-16-105. Signal systems generally.
Sec. 14-16-106. Emergency signal.
Sec. 14-16-107. Platform elevators.
Sec. 14-16-108. Car and counterweight safeties and speed governors.
Sec. 14-16-109. Operation and control.
Sec. 14-16-110. Disconnecting devices.

ARTICLE 1. GENERAL PROVISIONS

Sec. 14-16-1. Definitions.

Except as otherwise expressly provided, the following words, wherever used in this chapter, shall have the following meanings:

Amusement device means such devices as have fixed parts or frames, in which are movable parts, which carry persons up or down or in a vertical, oblique or more or less circular direction in any plane, or which give motion or acceleration to such persons, as a mode of amusement.

Board means the city board of elevator rules.

Director means the director of Memphis and Shelby County office of planning and development.

Division means the Memphis and Shelby County office of planning and development.

Dumbwaiter means a hoisting and lowering mechanism equipped with a car which moves in guides in a substantially vertical direction, the floor area of which does not exceed nine square feet, the total compartment height of which does not exceed four feet, the capacity of which does not exceed 500 pounds, and which is used exclusively for carrying freight. The term "dumbwaiter" shall not include a dumbwaiter installation placed out of active service.

Elevator means a hoisting and lowering mechanism equipped with a car or platform which moves in guides in a substantially vertical direction and which serves two or more floors of a building or structure.

Elevator inspector means the elevator safety engineer or other safety engineer employed by Shelby County who is licensed to inspect elevators.

Escalator means a power-driven, inclined, continuous stairway used for raising or lowering passengers.

Freight elevator means an elevator used primarily for carrying freight and on which only the operator and the persons necessary for loading and unloading are permitted to ride.

Hoistway means a shaftway for the travel of one or more elevators or dumbwaiters. It includes the pit and terminates at the underside of the overhead machinery space, floor or grating, or at the underside of the roof where the hoistway does not penetrate the roof. For the purpose of this chapter, the term "elevator" and the term "dumbwaiter" shall also include their hoistways together with hoistway enclosures and hoistway doors or gates giving entrance thereto and the elevator or dumbwaiter machinery enclosures.

Inspection includes all tests as required by the rules and regulations prescribed under this chapter.

Installation placed out of active service means an elevator or dumbwaiter whose suspension ropes have been removed, whose car and counterweight rest at the bottom of the hoistway and whose hoistway doors are permanently boarded up or barricaded on the hoistway side, or an escalator whose power feed lines have been disconnected and whose top and bottom entrances have been permanently boarded up or barricaded.

Licensed elevator inspector means an elevator inspector who has been issued a license to inspect elevators, dumbwaiters and escalators as provided in this chapter.

New installation: new elevator, dumbwaiter or escalator means a complete elevator, dumbwaiter or escalator installation, the application for the permit for the installation or relocation of which is filed on or after January 1, 1961. All other elevators, dumbwaiters or escalators shall be deemed to be existing installations.

Passenger elevator means an elevator that is used to carry persons other than the operator and persons necessary for loading and unloading.

Sidewalk elevator or hoist means a freight elevator which operates between a sidewalk or other area exterior to the building and floor levels inside the building area, which has no landing opening into the building at its upper limit of travel, and is within the space on a street or public way usually intended for the sidewalk.

Terms not defined. Terms other than listed above shall have the same meaning as defined in the Elevator Safety Code referred to in section 14-16-43.
(Code 1967, § 49-1; Code 1985, § 46-1)

Sec. 14-16-2. Applicability.

This chapter is adopted for the regulation of elevators, dumbwaiters and escalators, and their hoistways, and amusement devices.
(Code 1967, § 49-2; Code 1985, § 46-2)

Sec. 14-16-3. Enforcement of chapter.

A. Except where otherwise provided, the office of planning and development shall have the power and it shall be its duty to enforce the provisions of this chapter and the rules and regulations recommended by the board of elevator rules and adopted by the city council.

B. It shall be the duty of the director of planning and development to direct the enforcement of this chapter through the personnel of the Memphis and Shelby County office of construction code enforcement.
(Code 1967, § 49-3; Code 1985, § 46-3)

Sec. 14-16-4. City inspector generally.

A. The city elevator inspector shall be either a mechanical engineer, elevator constructor or machinist, licensed elevator inspector, or an operating engineer experienced in the use, operation and repair of machinery and shall have a knowledge of the strength of the materials. He or she shall have had at least five years' practica1 experience in the erection, operation, or repair of such machinery or equipment.

B. The city elevator inspector shall be bonded by good and lawful security to insure the faithful performance of his or her duties, in the penalty of such amounts as the city council shall determine.

C. The city elevator inspector shall make inspection of all elevators, dumbwaiters, escalators and amusement devices as provided for in this chapter. He or she shall make daily, monthly and annual reports as the director of planning and development may require.
(Code 1967, § 49-4; Code 1985, § 46-4)

Sec. 14-16-5. Inspector's license.

A. No person shall be licensed as an elevator inspector to inspect elevators, escalators or new or altered dumbwaiters unless he or she is an employee of Shelby County authorized to inspect elevators, escalators, and dumbwaiters, or an employee authorized to inspect elevators, escalators, and dumbwaiters for any insurance company insuring such elevators, escalators and dumbwaiters in the city; provided, however, he or she has satisfied the board of elevator rules that he or she has had experience in inspecting elevators, dumbwaiters and escalators, has satisfactorily passed a written examination given by the board testing his or her knowledge of this chapter and the rules and regulations adopted by the board. The board may license a person as an elevator inspector without such examination, if he or she holds a license as an inspector of elevators for a state or city that has a standard of examination substantially equal to that provided for in this section. A written application for such examination and license shall be made upon a form to be supplied by the board upon request, and shall be accompanied by a statement of the applicant's experience together with an examination fee of $5.00. Such examination shall be given not more than six months from the date when the applicant makes such application. If the applicant has the experience and successfully passes the examinations herein specified, he or she shall, upon payment to the board of a license fee of $10.00, be entitled to a license as an elevator inspector as a matter of right and such licenses shall be renewable annually at a fee of $10.00.

B. There shall be no limit to the number of times an applicant may seek a license as herein provided, except that a rejected applicant may not make a new application within six months from the date on which he or she was notified that he or she has failed to qualify. A fee of $5.00 shall be paid to the board for each subsequent examination.

C. If the board has reason to believe that a licensed inspector is no longer qualified to hold his or her license, it shall give such inspector reasonable notice of the time

and place of a hearing at which the board shall inquire into the inspector's fitness and competency to act as an elevator inspector. If the board shall find that such inspector is no longer qualified to act as an inspector, it shall revoke his or her license forthwith, and such inspector shall not thereafter make any inspection required under this chapter.
(Code 1967, § 49-5; Code 1985, § 46-5; Ord. No. 2346, § 1(1), 12-16-1975; Ord. No. 3018, § 1(1), 6-9-1980)

Sec. 14-16-6. Construction permit for elevators, escalators and dumbwaiters.

A. A construction permit shall be obtained from the office of planning and development before erecting or constructing new elevators, dumbwaiters, and escalators, moving such apparatus from one hoistway to another, or before making alterations to existing equipment. The owner, or his or her authorized agent, shall submit an application for such permit accompanied by plans and specifications in duplicate, in such form as the division may prescribe. Where such plans and specifications indicate compliance with this chapter, the director shall issue a construction permit. No permit shall be required for repairs and replacements normally necessary for maintenance and made with parts of equivalent materials, strength and design.

B. A construction permit shall be issued by the division or its authorized representative for every new elevator, dumbwaiter or escalator installation or alteration before the installation thereof is started. The division or its authorized representative shall issue such permit if the plans and specifications required under subsection A of this section indicate compliance with the applicable rules and regulations of this chapter. If such plans and specifications indicate failure to comply with the applicable rules and regulations of this chapter, the division or its authorized representative shall give notice to the person filing the application of changes necessary for compliance therewith. After such changes have been made, the division or its authorized representative shall issue a construction permit. No permit shall be required for repairs or replacements normally necessary for maintenance.

C. The fee for construction permits required by this section shall be $15.00 for the first $1,000.00 evaluation based upon installation costs, and $8.00 for each additional $1,000.00 of evaluation or fraction thereof over the first $1,000.00.
(Code 1967, § 49-6; Code 1985, § 46-6; Ord. No. 276, § 1, 9-3-1968; Ord. No. 2346, § 1(2), 12-16-1975; Ord. No. 3018, § 1(2), 6-9-1980)

Sec. 14-16-7. Supervision of installation, relocation, alteration or repair of equipment.

The installation, relocation, alteration or repair of all elevators, dumbwaiters and escalators must be performed under the supervision of an electric elevator installer licensed by the city.
(Code 1967, § 49-7; Code 1985, § 46-7)

Sec. 14-16-8. Responsibility of person installing, relocating or altering equipment.

The person or firm installing, relocating or altering an elevator, dumbwaiter or escalator shall be responsible for its operation and maintenance until the operating permit therefor has been issued by the director of planning and development, except during the period when any limited operating permit, as defined in section 14-16-42 shall be in effect, and shall also be responsible for all tests of new, relocated and altered equipment until the operating permit therefor has been issued by the director.
(Code 1967, § 49-8; Code 1985, § 46-8)

Sec. 14-16-9. Registration of elevators, escalators and dumbwaiters.

The owner or lessee of every elevator, escalator, and dumbwaiter shall register with the office of planning and development each such elevator, escalator or dumbwaiter owned or operated by him or her, giving type, contract load and speed, name of manufacturer, its location and the purpose for which it is used and such other information as the division may require. Such registration shall be made on a form to be furnished by the division on request.
(Code 1967, § 49-9; Code 1985, § 46-9)

Sec. 14-16-10. Requirements for elevator operators.

A. Before any person may operate an elevator, except automatic operation and continuous pressure operation elevators, he or she shall be at least 18 years of age and properly qualified by passing an examination prescribed by the director of planning and development. No person shall employ or permit any person to operate any elevator who is not so qualified.

B. A fee of $1.00 shall be charged for each qualifying elevator operator who shall be issued an elevator operator's card. No such card will be issued unless the fee is included with the application.
(Code 1967, § 49-10; Code 1985, § 46-10)

Sec. 14-16-11. Requirements for amusement device operators.

Amusement devices shall be in the charge of competent persons of responsible age.
(Code 1967, § 49-11; Code 1985, § 46-11)

Sec. 14-16-12. Notice of cancellation, expiration or placing of insurance on elevators.

In case an insurance company cancels insurance upon any elevator or the policy expires and is not renewed, notice shall immediately be given to the city elevator inspector. An insurance company shall likewise notify the city elevator inspector immediately upon placing of insurance upon an elevator.
(Code 1967, § 49-12; Code 1985, § 46-12)

Sec. 14-16-13. Elevator, dumbwaiter and escalator accidents.

A. The owner of an elevator, dumbwaiter or escalator, or his or her duly authorized agent, shall immediately notify the director of planning and development of each and every accident to a person requiring the service of a physician or disability exceeding one day, or damage exceeding $100.00 to the elevator, dumbwaiter or escalator or its hoistway or its hoistway enclosure or doors, and shall afford the director every facility for investigating and inspecting such accident or damage. The director shall, without delay, after being notified, make an investigation and shall have placed on file a full and complete report of such accident.

B. Such report shall give in detail all material facts and information available and the cause or causes, so far as they can be determined, which shall be open to the public inspection at all reasonable hours. When an accident involves the failure or destruction of any part of the construction or the operating mechanism of such a device, the use of such device is forbidden until it has been made safe and until it has been reinspected and any repairs, changes or alterations have been approved by the director and a permit in such form as the director may prescribe has been issued. The removal of any part of the damaged construction or operating mechanism from the premises is for-bidden until permission to do so has been granted by the director.
(Code 1967, § 49-13; Code 1985, § 46-13)

Sec. 14-16-14. Institution of prosecutions under chapter.

Prosecutions for violations of the provisions of this chapter shall be instituted by the city elevator inspector or his or her duly authorized deputy.
(Code 1967, § 49-14; Code 1985, § 46-14)

Sec. 14-16-15. Penalty for violations of chapter—Continuing violations.

Any person, including the owner, agent, contractor, mechanic, or worker violating any of the terms or provisions of this chapter, or failing to obey any order of the director or the city elevator inspector issued in pursuance of the enforcement of this chapter, shall be deemed guilty of a misdemeanor and, upon conviction thereof, shall be subject to punishment as provided in section 1-24-1 and, where such violation is of continuing nature, each day such person violates any such provision or fails to conform to any such provision of this chapter or any such order of the director or of the city elevator inspector, shall be deemed a separate offense.
(Code 1967, § 49-15; Code 1985, § 46-15)

ARTICLE 2. BOARD OF ELEVATORS RULES

Sec. 14-16-16. Created—Composition—Appointment and terms of members.

A. There is created within the office of planning and development a board of elevator rules, consisting of five members who shall be appointed by the mayor and approved by the city council. At the expiration of the initial members' terms of office, they, or their successors identifiable with the same interest respectively as hereinafter provided, shall be appointed for terms of four years each.

B. Of the five appointed members of the board, one shall be a representative of the manufacturers of elevators used within the city, one shall be a representative of labor, one shall be a representative of an insurance company authorized to insure the operation of elevators within the city, one shall be a representative of owners and lessees of elevators within the city, and one shall be a representative of the public at large.
(Code 1967, § 49-25; Code 1985, § 46-27)

Sec. 14-16-17. Filling of vacancies.

Upon the death, resignation or incapacity of any member of the board, vacancies for the unexpired term shall be filled in the same manner as provided for the original appointment of members with a representative of the same interest with which his or her predecessor was identified.
(Code 1967, § 49-26; Code 1985, § 46-28)

Sec. 14-16-18. Removal of members.

The mayor may at any time remove any member of the board of elevator rules for incompetency, inefficiency or dereliction of duty.
(Code 1967, § 49-27; Code 1985, § 46-29)

Sec. 14-16-19. Election of chairperson.

The board shall elect one of its members to serve as chairperson.
(Code 1967, § 49-28; Code 1985, § 46-30)

Sec. 14-16-20. Secretary.

The elevator inspector shall serve as secretary of the board.
(Code 1967, § 49-29; Code 1985, § 46-31)

Sec. 14-16-21. Meetings.

The board shall meet at the call of the chairperson at least four times each year, and it shall have other such meetings as the director of planning and development may decide are necessary at such places as the director shall provide.
(Code 1967, § 49-30; Code 1985, § 46-32)

Sec. 14-16-22. Required vote and approval of decisions and rulings.

No approval, decision or ruling of the board shall be effective unless supported by the vote of at least three members thereof and approved by the director of planning and development.
(Code 1967, § 49-31; Code 1985, § 46-33)

Sec. 14-16-23. General powers and duties—Rules and regulations.

A. It shall be the duty of the board to license elevator inspectors as provided for in this chapter, and the board shall have the power and it shall be its duty to consult with engineering authorities and organizations studying and developing safety codes, including the American Standards Association, and to determine what rules and regulations governing the qualifications, training and duties of elevator operators and the operation, maintenance, construction, alteration and installation of elevators, dumbwaiters and escalators, and the inspection of new and existing installations are adequate, reasonable and necessary to provide for the safety of life, limb and property, and to protect the public welfare, and upon such determination the board shall recommend to the city council the adoption, amendment or repeal of rules and regulations as follows:

1. Rules and regulations for the maintenance and operation of all elevators and escalators;
2. Rules and regulations for the construction of new elevator, dumbwaiters and escalators;
3. Rules and regulations for the alteration of existing elevators, dumbwaiters and escalators;
4. Rules and regulations prescribing minimum safety requirements for all existing elevators, dumbwaiters and escalators;
5. Rules and regulations prescribing the fees for construction permits, operating permits, acceptance inspections, initial inspections and periodic inspections for new and existing elevators, dumbwaiters and escalators.

B. Before any such rule or regulation shall be recommended by the board of elevator rules to the city council, a public hearing shall be held thereon, notice of which shall be published not less than 15 days nor more than 30 days prior to the date assigned for such hearing. The rules recommended by the board shall be amended or repealed in the same manner in which they are adopted.

C. No alteration or amendment shall be made to the rules and regulations recommended by the board unless public hearings are held as provided in this section. Any person engaged in the inspection, alteration, construction, repair or operation of elevators, dumbwaiters or escalators or any owner or lessee thereof, may, from time to time, by written petition to the director of planning and development, request that rules and regulations recommended by the board under this section be altered or amended or the director himself or herself may request such alterations or amendments. The director shall refer such petition to the board for its consideration and recommendation, and the board shall hold public hear-

ings with respect to the subject matter of the petition, and shall thereafter approve or disapprove such petition and report its action to the director. Such alterations or amendments approved by the board shall become effective when approved by the city council.
(Code 1967, § 49-32; Code 1985, § 46-34)

Sec. 14-16-24. Appeals to board.

Any person aggrieved by an order or act of the inspector or chief elevator inspector or director of planning and development under this chapter may, within 15 days after notice thereof, appeal from such order or act to the board, which shall, within 30 days thereafter, hold a hearing of which at least ten days' written notice shall be given all interested parties. The board shall, within 30 days after such hearing, issue an appropriate order either approving or disapproving said order or act. A copy of such order by the board shall be served upon all interested parties.
(Code 1967, § 49-33; Code 1985, § 46-35)

ARTICLE 3. INSPECTIONS AND TESTS

Sec. 14-16-25. Required inspections defined.

The inspections required by sections 14-16-27 and 14-16-28 shall be deemed "required inspections" within the meaning of this chapter.
(Code 1967, § 49-45; Code 1985, § 46-51)

Sec. 14-16-26. Generally.

All new, altered and existing elevators, dumbwaiters and escalators, except installations placed out of active service, shall be tested and inspected in accordance with the schedule set forth in this article.
(Code 1967, § 49-44; Code 1985, § 46-52)

Sec. 14-16-27. New, relocated or altered elevators, escalators and dumbwaiters.

A. The person or firm installing, relocating or altering elevators, dumbwaiters or escalators shall notify the office of planning and development in writing at least seven days before completion of the work and shall subject the new, moved or altered portions of the equipment to the tests specified in Part IX, section 900, Rules 900.01 to 900.5 inclusive and section 901, Rule 901.1 of the Elevator Safety Code, insofar as the equipment mentioned therein is required or provided to show that such equipment conforms to the requirements specified.

B. All new, altered and relocated elevators, dumbwaiters and escalators shall be inspected for compliance with the requirements of this chapter, before the operating permit required by this chapter is issued. Such inspection shall conform to the requirements of Part IX, section 900, Rule 900.la and 900.lc and section 901, Rule 901.la of the Elevator Safety Code, insofar as the equipment mentioned therein is required or provided, to show that such equipment conforms to the requirements specified. Such inspections shall be made by an inspector licensed by the city and employed by Shelby County who shall also witness the tests specified in this section.
(Code 1967, § 49-46; Code 1985, § 46-53)

Sec. 14-16-28. Periodic inspection and testing of all elevators and escalators.

A. The owner or lessee of every passenger elevator and escalator shall cause it to be inspected and tested every sixth calendar month, and the owner or lessee of every freight elevator shall cause it to be inspected and tested every twelfth calendar month following the month in which the inspection and test required by section 14-16-27 was made; provided that, inspection and test of elevator car safeties, counterweight safeties, where provided and overspeed governors and tests of escalator safety devices shall only be required every twelfth calendar month following the month in which the inspection and test required by section 14-16-27 was made, unless the inspection indicates that it should be made at lesser intervals and provided further that any such inspection and test of a passenger elevator, freight elevator or escalator may be made within the first 15 days of the month following the calendar month during which such inspection and test is due.

B. The inspection required by this section shall be made by elevator inspectors licensed by the city.

C. Periodic inspections and tests under this section shall conform to the following requirements of the Elevator Safety Code:

1. Electric elevator—to Part IX, section 900, Rules 900.6a to 900.6i inclusive;
2. Escalators—to Part IX, section 900, Rule 900j;
3. Hydraulic elevators—to Part IX, section 901, Rule 901.2 provided that inspections and tests

of car safeties and of counterweight safeties, where provided, of elevators haying roped-hydraulic driving machines shall conform to Part IX, rules 900.6f, 900.6g and 900.6h.

(Code 1967, § 49-48; Code 1985, § 46-54)

Sec. 14-16-29. Inspection of amusement devices.

Amusement devices shall be inspected before the season or engagement period opens and/or at least once a year.

(Code 1967, § 49-49; Code 1985, § 46-55)

Sec. 14-16-30. Additional inspections and tests.

A. Car safeties, counterweight safeties where provided, overspeed governors and oil buffers of electric elevators and car safeties, counterweight safeties, where provided and overspeed governors of hydraulic elevators having roped-hydraulic driving machines, shall be tested, as required by Part IX, section 900, Rule 900.7d, of the Elevator Safety Code, once every five years following the date of the initial test required by section 14-16-27 for elevators having traction driving machines and once every two and one-half years following the date of the initial test required by such sections for elevators having drum type or roped-hydraulic drum machines. These tests shall be in lieu of one of the periodic tests of such devices required by Part IX, section 900, Rules 900.6h and 900.9i respectively, of the Elevator Safety Code.

B. Hydraulic elevator pressure tanks and piston rods of roped-hydraulic elevators shall, in addition to the periodic inspections and tests required by Part IX, section 901, Rule 901.2, of the Elevator Safety Code, be cleaned, inspected and tested once every three years, following the date of the initial tests and inspection required by section 14-16-27, as required by Part IX, section 901, Rule 901.3d of the Elevator Safety Code.

C. The inspections required by this section shall be made by an elevator inspector licensed by the city, who shall also, except as hereinafter provided, witness the tests. The tests required by this section shall be made by a person competent to perform such service, provided that where such licensed inspector is not available at the time the required tests are made, the person conducting such tests shall submit to the office of planning and development an affidavit, upon a form furnished by the division, certifying that the tests have been made and the results thereof.

D. In addition to inspections specifically provided for in this article, the director of planning and development may designate a licensed inspector in the employ of the city to make such additional inspections as may be required to enforce the provisions of this chapter. No fee shall be charged for such inspection.

(Code 1967, § 49-50; Code 1985, § 46-56)

Sec. 14-16-31. Inspections to be by licensed inspectors.

All required inspections made under the requirements of this article shall be made by, or in the presence of, inspectors qualified and licensed as prescribed in section 14-16-5, except as otherwise specifically provided.

(Code 1967, § 49-51; Code 1985, § 46-57)

Sec. 14-16-32. Acceptance of elevator and escalator inspections made by licensed inspectors.

The city elevator inspector shall have authority to accept in lieu of his or her own official inspections, except acceptance inspections, inspections of elevators and escalators made by a licensed inspector.

(Code 1967, § 49-52; Code 1985, § 46-58)

Sec. 14-16-33. Inspection reports.

A. A report of every required inspection shall be filed with the office of planning and development by the inspector making such inspection on a form approved by the division, within 20 days after the inspection or test has been completed. For the inspections required by sections 14-16-27 and 14-16-28, the report shall include all information required by the division to determine whether the elevator, dumbwaiter or escalator is in a safe operating condition and whether the owner or lessee of the elevator or escalator has complied with the rules and regulations which are applicable under the provisions of this chapter. For the inspection required by section 14-16-27, the report shall, in addition, indicate whether the elevator, dumbwaiter or escalator has been installed in accordance with the construction permit issued by the office of planning and development under this chapter and meets the requirements of the applicable rules of the elevator safety code.

B. Where an elevator is inspected by a licensed elevator inspector of a duly accredited insurance company which is the primary insurer of the conveyance and which is licensed to do business in this city, a copy of

each inspection report of such elevator shall be filed by the insurance company with the city elevator inspector within 20 days of such inspection.
(Code 1967, § 49-53; Code 1985, § 46-59)

Sec. 14-16-34. Guide for inspections and tests.

The American National Standard Practice for the Inspection of Elevators, Escalators and Moving Walks (Inspector's Manual), ANSI A17.2-1979, Fifth Edition, is adopted as a guide for making the inspection and tests required by this article.
(Code 1967, § 49-54; Code 1985, § 46-60; Ord. No. 2887, § 1, 6-26-1979)

ARTICLE 4. OPERATING PERMIT FOR ELEVATORS, ESCALATORS AND DUMBWAITERS

Sec. 14-16-35. Required—Exception.

No elevator, dumbwaiter or escalator shall be operated by the owner or lessee thereof, unless an operating permit has been issued pursuant to this article; provided, however, that, no operating permit shall be required for elevators or escalators which are located in a highly restricted area owned and operated by the United States Government.
(Code 1967, § 49-65; Code 1985, § 46-76)

Sec. 14-16-36. Fee.

The fee for operating permits required by this article shall be:

For each hand-power freight	$16.00
For each power freight or escalator	$16.00
For each passenger	$16.00

(Code 1967, § 49-66; Code 1985, § 46-77; Ord. No. 276, § 2, 9-3-1968; Ord. No. 2346, § 1(3), 12-16-1975; Ord. No. 3018, § 1(3), 6-9-1980; Ord. No. 3155, § 1, 9-8-1981)

Sec. 14-16-37. Issuance.

A. Operating permits shall be issued by the director of planning and development within the time limits hereafter specified, to the owner or lessee of every new and existing elevator, dumbwaiter and escalator where the inspection report indicates compliance with this chapter; provided that, no permit shall be issued if the fees required by this article have not been paid. Such time limits shall be 30 days for existing elevators and escalators and three days for new elevators, dumbwaiters and escalators, after the required date for filing the inspection report required by section 14-16-33, unless such time is extended by the director of planning and development.

B. If the inspection report required by section 14-16-33 indicates failure of compliance with the applicable requirements of this chapter or with the detailed plans and specifications approved by the office of planning and development under section 14-16-6, the director shall give notice to the owner or lessee or the person filing such plans and specifications of changes necessary for compliance therewith. After such changes have been made, the director shall issue an operating permit.
(Code 1967, § 49-67; Code 1985, § 46-78)

Sec. 14-16-38. Term—Contents.

The operating permit required by this article shall be issued for the period covered by the inspection required by sections 14-16-27 and 14-16-28, and shall state the contract load and speed for such elevator, dumbwaiter or escalator.
(Code 1967, § 49-68; Code 1985, § 46-79)

Sec. 14-16-39. Printing and framing.

Permits issued under this article shall be printed eight inches wide by four inches high and suitably framed in metal, with a clear transparent cover.
(Code 1967, § 49-69; Code 1985, § 46-80)

Sec. 14-16-40. Posting.

The permit required by this article shall be posted in a conspicuous location in the elevator car or cage, or in the platform and on or near the dumbwaiter or escalator.
(Code 1967, § 49-70; Code 1985, § 46-81)

Sec. 14-16-41. Revocation.

If the director of planning and development has reason to believe that any owner or lessee to whom an operating permit has been issued under this article is not complying with the applicable rules and regulations of this chapter, he or she shall so notify such owner or lessee, and shall give notice of a date for a hearing thereon to such owner or lessee. If, after such hearing, he

or she shall find that such owner or lessee is not complying with such rules and regulations, he or she shall revoke such permit.
(Code 1967, § 49-71; Code 1985, § 46-82)

Sec. 14-16-42. Limited permits.

A. The director of planning and development may permit the temporary use of any elevator, dumbwaiter or escalator for passenger or freight service during its installation or alteration, under the authority of a limited operating permit issued by him or her for each class of service. In the case of elevators, such limited permit shall not be issued until the elevator shall have been tested under contract load, and the car safety and terminal stopping equipment have been tested to determine the safety of the equipment for construction purposes and until permanent or temporary guards or enclosures are placed on the car and around the hoistway at the landing entrances on each floor. Landing-entrance guards shall be provided with locks that can be released from the hoistway side only. Automatic and continuous-pressure elevators shall not be placed in temporary operation from the landing push buttons unless door locking devices and/or interlocks required by the Elevator Safety Code are installed and operative.

B. Limited permits shall be issued for a period not to exceed 30 days and may be renewed at the discretion of the director.

C. Where a limited permit is issued, a notice bearing the information that the equipment has not been finally approved shall be conspicuously posted on, near or visible from each entrance to such elevator, dumbwaiter or escalator.
(Code 1967, § 49-72; Code 1985, § 46-83)

ARTICLE 5. GENERAL SAFETY AND EQUIPMENT REQUIREMENTS

Sec. 14-16-43. Safety code for elevators, dumbwaiters, escalators and moving walks—Adopted.

The following supplementary code shall be considered a portion of this chapter: American National Standard Safety Code for Elevators, Dumbwaiters, Escalators and Moving Walks, ANSI A17.1-1978, Ninth Edition and ANSI A17.1a-1979 Supplement, herein referred to as the "Elevator Safety Code," as approved by the Standards Committee, the Secretariats (formerly "Sponsors"), and on May 4, 1978, by the American National Standards Institute, Incorporated.
(Code 1967, § 49-83; Code 1985, § 46-101; Ord. No. 867, § 24A(2), 12-13-1969; Ord. No. 2887, § 1, 6-26-1979)

Sec. 14-16-44. Elevator—Application.

A. *Generally.* The requirements of the Elevator Safety Code adopted by section 14-16-43 shall apply to all installations of elevators, dumbwaiters and escalators, as hereinafter specified and except as otherwise provided in this chapter.

B. *New installations.* All new elevators, dumbwaiters and escalators shall be designed and installed in accordance with the requirements of the Elevator Safety Code.

C. *Relocations.* All relocations of elevators, dumbwaiters and escalators, made after January 1, 1961, shall meet the requirements of the Elevator Safety Code.

D. *Existing installations.* Existing elevators, dumbwaiters and escalators, legally installed before January 1, 1961, may be used without being reconstructed to comply with the requirements of the Elevator Safety Code, except such rules of such code as specifically refer to such installations.

E. *Alterations generally.* Existing installations may be altered to obtain the advantage of any provisions of the Elevator Safety Code, provided the safety requirements covering such provisions are met. Alterations of existing installations shall conform to Part XI of such code, or to the following exceptions:

1. Hoistway gates for freight elevators in existing buildings may be five feet six inches high with maximum two-inch openings, if approved by the city elevator inspector;

2. Permission granted by the board of elevator rules.

F. *Major combination of alterations.* When any combination of alterations or changes is made, constituting more than 50 percent of the elevator installation or hoistway construction, as determined by the office of planning and development, the entire installation shall conform to the requirements of the Elevator Safety Code.

G. *Repairs and replacements.* Repairs and replacements of damaged, broken or worn parts shall conform to the requirements of Part XI, Rule 1100.3 of the Elevator Safety Code.
(Code 1967, § 49-84; Code 1985, § 46-102)

Sec. 14-16-45. Elevator Safety Code—Granting of exceptions.

The board of elevator rules only shall have power to grant exceptions from the requirements of the code adopted by section 14-16-43, and to permit the use of other devices and methods, at its discretion, within the limitations stated in such code.
(Code 1967, § 49-85; Code 1985, § 46-103)

Sec. 14-16-46. General requirements for elevator and dumbwaiter hoistways.

A. *Generally.* Elevator and dumbwaiter hoistways shall be enclosed in accordance with the requirements of this section.

B. *Fireproof/semi-fireproof heavy timber, protected noncombustible and ordinary masonry construction.* In fireproof, semifireproof, heavy timber, protected noncombustible and ordinary masonry construction hoistways shall have noncombustible enclosures of at least two hour fire-resistance rating. Exceptions: in public buildings of heavy timber, protected noncombustible or ordinary masonry construction when not over two stories in height, enclosures of hoistways may be one-hour construction, except for enclosures in basements and cellars, which shall be two-hour noncombustible construction.

C. *Unprotected noncombustible and woodframe buildings.* In unprotected noncombustible and woodframe buildings, hoistway enclosures shall be at least one-hour noncombustible construction.

D. *Protection for openings.* All openings shall be protected with approved fire doors or approved fire windows as required. In one hour construction wooden doors at least one and three-eighths inches in thickness may be used.

E. *Emergency door.* Emergency doors in hoistways shall be provided at intervals of not over 36 feet for express elevators making long runs without stops in accordance with Rule 110.1a of the Elevator Safety Code.

F. *Roofs or tops.* Roofs or tops of hoistways which extend to the top floor of the building shall be of equal fire resistant construction as required for the roof of the building, except where an elevator is accepted as a required exit.

G. *Ventilation.* Hoistways shall be ventilated equal to one percent of the area of the hoistway which may be through the penthouse or by mechanical ventilation for existing elevators. Elevators hereafter installed shall conform to Rule 100.4 of the Elevator Safety Code.

H. *Hoistways not extending to lowest floor or to roof.* A hoistway that does not extend to the lowest floor shall be enclosed at its lowest point with a floor construction equal to the required enclosure construction. When it does not extend through or to the roof construction, it shall have a top equal to the required enclosure construction.

I. *Hoistways in existing buildings.* In buildings existing before January 1, 1961, where hoistways are not constructed as required in this chapter, the director may modify the requirements in accordance with conditions and good practice, but at least the openings shall have substantial guards or gates as specified, and shall be protected from fire communicating from floor to floor, at least by approved trap doors. Such traps shall be arranged to open and close by the action of the elevator's movement and shall form a substantial floor covering or they may be suspended in the open position provided they are supported by approved type fusible links.
(Code 1967, § 49-86; Code 1985, § 46-104)

Sec. 14-16-47. Maintenance in safe operating condition—Responsibility of owner.

A. Every elevator, escalator, dumbwaiter and amusement device shall be maintained by the owner or lessee in a safe operating condition so that it conforms to the provisions of this chapter and to rules and regulations adopted by the city council.

B. The owner or his or her duly appointed agent shall be responsible for the safe operation and proper maintenance of an elevator, dumbwaiter or escalator after the operating permit has been issued by the director of planning and development, and also during the period of effectiveness of any limited operating permit as defined

in section 14-16-42(B). The owner shall also be responsible for making all initial and periodic tests required by this chapter.
(Code 1967, § 49-87; Code 1985, § 46-105)

Sec. 14-16-48. Lighting and electrical equipment.

Lighting shall be by electricity and together with all other electrical equipment shall be in conformity with the city/county electrical code and to the National Electrical Code as approved by the American Standards Association and published by the National Board of Fire Underwriters. The disconnect switch and all electric control devices shall be located so as to be accessible at all times. All electrical equipment shall be protected from falling objects and mechanical injury.
(Code 1967, § 49-88; Code 1985, § 46-106)

Sec. 14-16-49. Safety controls, guard rails and design standards for amusement devices.

A. Amusement devices shall be equipped with approved safety controls. The cars or receptacles which persons are permitted to occupy shall have handrails of sufficient number and height or other approved appliances or safeguards, to prevent persons from being thrown therefrom or coming in contact with structural members or other obstructions.

B. In all cases the design of such devices and construction shall be equal in structural safety to the requirements for elevators for comparable members or parts.
(Code 1967, § 49-89; Code 1985, § 46-107)

Sec. 14-16-50. Use of elevators and escalators as required exits.

The use of elevators and escalators for required exits shall be permitted only when in conformity with the requirements of the city/county building code, except that no escalator will be accredited as a required means of exit which has a vertical travel of more than two stories or 35 feet.
(Code 1967, § 49-90; Code 1985, § 46-108)

Sec. 14-16-51. Protection of floor openings for escalators.

Floor openings for escalators shall be protected against the passage of flame, smoke or gases in the event of fire in accordance with requirements approved by the board of elevator rules.
(Code 1967, § 49-91; Code 1985, § 46-109)

Sec. 14-16-52. Portable hoists for elevators and dumbwaiters prohibited.

No portable power chain or cable hoist shall be installed to raise or lower an elevator car or platform, or dumbwaiter car or platform.
(Code 1967, § 49-92; Code 1985, § 46-110)

Sec. 14-16-53. Elevators for use of fire department.

In buildings equipped with one or more elevators, at least one elevator shall be kept in readiness at all times for fire department use, in event of fire.
(Code 1967, § 49-93; Code 1985, § 46-111)

Sec. 14-16-54. Sidewalk elevators and hoists.

Sidewalk elevators or hoists are prohibited and permits for the same shall not be granted except by the city council, in cases where a refusal would cause the property owner undue hardship, due to the impracticability of other installation. (Sidewalk elevators are not recommended, since their use involves accident hazards which cannot easily be eliminated. It is preferable to use freight elevators of standard type operating inside the building line.) Where permitted, they shall conform to the requirements of Part IV of the Elevator Safety Code.
(Code 1967, § 49-94; Code 1985, § 46-112)

Sec. 14-16-55. Authority to forbid use of unsafe devices.

A. The elevator inspector may forbid the use of any elevator, dumbwaiter, escalator or amusement device deemed unsafe on account of defects or of an incompetent operator, until his or her lawful orders have been complied with and he or she shall have the authority to order the power cut off from any such defective device.

B. If the inspection report required by section 14-16-33 indicates that an elevator or escalator is in an unsafe condition, so that its continued operation may be dangerous to the public safety, then the director of planning and development may, at his or her discretion,

require the owner or lessee to discontinue the use of such elevator or escalator until it has been made safe and in conformity with the rules and regulations of this chapter.
(Code 1967, § 49-95; Code 1985, § 46-113)

ARTICLE 6. MINIMUM SAFETY REQUIREMENTS FOR ELEVATORS

Sec. 14-16-56. Definitions.

For the purpose of this article, the following definitions shall apply:

Capacity is the load which the elevator is designed and equipped adequately to handle as determined by the rules and regulations of this article and/or as designated by the supervising inspector.

Capacity speed is the maximum velocity of the car in feet per minute (F.P.M.) in the up direction with capacity load in the car.

Shall means that the provisions are mandatory in all cases.

Should means that the provisions are advisory on all existing installations and that the provisions are mandatory whenever there is effected a major or substantial alteration or change in the installation.
(Code 1967, § 49-106; Code 1985, § 46-126)

Sec. 14-16-57. Procedure when compliance with article increases weight of elevator.

Where compliance with this article increases the weight of the elevator car, additional weight shall be added to the counterweight, where considered necessary by the director, in order to secure safe operation of the elevator. In every such case, all parts affected by the increased weight shall be checked to determine whether they will safely sustain the increased load and where necessary shall be reinforced or replaced with parts of adequate strength.
(Code 1967, § 49-107; Code 1985, § 46-127)

Sec. 14-16-58. General maintenance requirements.

All parts of elevators, including machines, cars, hoistways, hoistway landing opening protective devices, etc. and all appurtenances shall be maintained in a structurally sound, firmly secured and sufficient condition to perform safely the work which they are intended to do and sufficiently clean to prevent fire hazards.
(Code 1967, § 49-108; Code 1985, § 46-128)

Sec. 14-16-59. Car and counterweight cables.

A. *Material.* Cables for power elevator cars and counterweights shall be of iron or steel.

Exception: the division of public service and the supervising inspector may permit marlin covered steel cables where liability of corrosion or other hazard exists.

B. *Tags.* Wherever cables are renewed, a metal tag shall be attached to the new cables at their fastenings. On this tag shall be stated the diameter, rated ultimate strength and material of the cables, the date of the cable installation and the name of the person or firm who installs the cables.

C. *Diameter.* Hoisting cables for power elevators shall not be less than one-half-inch in diameter.

D. *Number of cables for drum machine.* No winding drum power elevator shall be used for passenger service and, when practical, for freight service, unless it is equipped with two or more hoisting cables.

E. *Splicing prohibited.* No cable shall be lengthened or repaired by splicing.

F. *Top clearances.* Whenever car or counterweight cables are replaced, the car and/or counterweight top clearances shall not be reduced below the requirements of section 14-16-104(E).

G. *Cable rating.* Safe working loads for cables shall be based on the manufacturers' rated ultimate strength of the cables and should not exceed those permitted for new elevators. In no case shall the factor of safety of cables for power elevators be less than six for freight elevators or less than seven for passenger elevators. For hand power elevators, the factor of safety for the cables shall be not less than four. In no case shall the factor of safety of new cables be less than those of the cables replaced.

H. *Cable strength.* Where the material and rated ultimate strength of cable is not known, the loads shall be limited to the loads allowed for iron cables of the same diameter.
(Code 1967, § 49-109; Code 1985, § 46-129)

Sec. 14-16-60. Speed governor cables.

A. *Material.* Cables for speed governors, when such cables are replaced, shall be of iron, steel, monel metal, phosphor bronze or covered iron or steel.

Exception: elevators with hatch covers.

B. *Diameter.* Speed governor cables shall be not less than three-eighths inch in diameter.

C. *Tiller rope.* Tiller rope may be used only for the portion of the governor cables wound on the safety drum.

D. *Tags.* New speed governor cables shall be tagged as provided in section 14-16-59(B).

E. *Clearance.* Speed governor cables shall run clear of governor jaws during normal operation of the car.

F. *Altered cable.* Wherever the diameter, construction and/or material of the speed governor cable is changed, approval of the proposed change shall be obtained from the supervising inspector and the car safety shall be retested with the altered governor cable in use before the elevator is replaced in service.
(Code 1967, § 49-110; Code 1985, § 46-130)

Sec. 14-16-61. Cable connections.

A. *Fastenings.* Cable ends, when cables are replaced, shall be fastened to the car or counterweight by spliced eyes, by return loops or by individual tapered zinc or babbitted sockets. The use of wire rope clips or claims shall be prohibited except on the inside of drums.

Exceptions:

1. Platform and sidewalk elevators;
2. Car counterweight cables or hydraulic elevators;
3. Hand power elevators.

B. *Number of wraps on drum.* All cables anchored to a winding drum shall have not less than one complete turn of cable left on the drum when the car or counterweight has reached the extreme limit of its overtravel.

C. *Reshackling for drum machines.* Hoisting and back drum counterweight cables of overhead drum machines shall be reshackled once every year, except where the cables are provided with an approved type emergency clamp device, to prevent the car from falling if the regular cable connection at the car and counterweight shall fail.

D. *Fastening drum.* The winding drum ends of car and counterweight cables shall be secured to the winding drum by clamps on the inside of the drum or as provided in subsection B of this section.
(Code 1967, § 49-111; Code 1985, § 46-131)

Sec. 14-16-62. Machines and machine safeties.

A. *Set screw fastening.* No set screw fastenings shall be used on power elevators in lieu of keys or pins on connections subject to torque or tension.

B. *Friction gearing.* No friction gearing or clutch mechanism shall be used for connecting the drum or sheaves to the main driving gear of power elevators.

C. *Cast-iron teeth.* No worn or gear having cast-iron teeth shall be used for replacement purposes on a worn and gear driven power machine.

D. *Brakes.* No power elevator machine except hydraulic machines shall be operated without brakes, which apply directly to the hoisting machines and are arranged to apply automatically by springs or gravity when the operating device is in the "STOP" position.

E. *Electrically released brakes.* All electric elevators, except electro-hydraulic elevators which are operated and/or controlled by magnetically operated contractors shall be equipped with electrically released brakes.

F. *Belt or chain drive.* No belt or chain driven power machine with a car traveling in excess of 30 feet shall be used for any passenger elevator unless the machine is equipped with an electrically released brake and a broken belt or broken chain safety switch of the non-automatic-reset type.

G. *Slack cable device.* Winding drum power machines shall be equipped with a slack cable device to apply the brake and stop the machine if the car should be obstructed while descending.

Exceptions:

1. Platform elevators with a travel not exceeding 15 feet;
2. Sidewalk elevators with a travel not exceeding 30 feet.

H. *Slack cable switches.* Slack cable switches located on the top of the car shall be of the enclosed type.

I. *Chain drive.* Chains for chain-driven machines when replaced shall be of the belt type with multiple links.

J. *Reverse phase relay.* Power elevator machine motors operated by polyphase alternating current shall be equipped with a reverse phase relay or equivalent protection.

K. *Power for hand elevator.* No electrically or mechanically driven friction gearing or clutch mechanism shall be used to operate any hand power elevator.

L. *Fuse or circuit-breaker.* No wire or other current-carrying device shall be substituted for the proper fuse or circuit breaker in an elevator circuit.
(Code 1967, § 49-112; Code 1985, § 46-132)

Sec. 14-16-63. Hydraulic machines.

A. *Gas release.* Cylinders of hydraulic elevator machines shall be provided with a means for releasing air or other gas.

B. *Relief valve.* Each positive-acting pump connected to the pressure tank of hydraulic elevators shall be equipped with a relief valve (or valves) so installed that it cannot be shut off. The relief valve shall be of sufficient size and so located as to pass the full capacity of the pump at full speed without exceeding the safe working pressure of the pump or tank.

C. *Automatic bypass.* Positive-acting elevator pumps, unless equipped with pressure regulators which control the motive power, shall be equipped with automatic by-passes.

D. *Hydrostatic test.* Pressure tanks, piping, pumps, valves, cylinders, pistons and packings of a hydraulic elevator shall be maintained to withstand successfully a hydrostatic test wherein the maximum testing pressure is 50 percent over the normal working pressure. Pressure tanks must have adequate openings for internal inspection purposes.

E. *Water-gauge glass.* Each pressure tank shall be equipped with a water-gauge glass, having brass valves and fittings attached directly to the tank and so located as to show the level of the water when the tank is more than half filled.

F. *Pressure gauge.* Each pressure tank shall be provided with a correctly indicating pressure gauge having a capacity not less than 1½ times the normal working pressure allowed in the tank.

G. *Inspection gauge.* Each pressure tank shall be provided with a one-quarter inch pipe-size valved connection for attaching an inspector's gauge while the tank is in operation.

H. *Tank guard.* Discharge tanks shall be adequately covered or screened.

I. *Packing.* All packings used in connection with a hydraulic elevator shall be maintained sufficiently tight to prevent any uncontrolled movement of the elevator.

J. *Compliance with rules.* Hydraulic elevators operated from pressure tanks where the fluid pressure is obtained by directly admitting steam, air or other gas to the tank, shall comply with all the rules covering hydraulic elevators.

K. *Water level.* The water level in a pressure tank shall be maintained at about two-thirds of the capacity of the tank.
(Code 1967, § 49-113; Code 1985, § 46-133)

Sec. 14-16-64. Penthouses and machine rooms.

A. *Access.* Safe and convenient access to penthouses and machine rooms shall be provided and maintained.

B. *Use as thoroughfare prohibited.* Elevator machine rooms and penthouses shall not be used as thoroughfares.

C. *Machine room doors.* Doors to machine rooms shall be arranged to permit the doors to be opened from within the machine room without keys.

D. *Machine guards.* When power elevator machines are not located in an elevator machine room, the machines shall be surrounded by a substantial grill enclosure at least six feet high.

Exceptions: machines located in a pump, engine or machine room in the charge of an attendant and/or in any room secured against unauthorized access. Machines located six feet or more above the floor.

E. *Light.* Permanent provision for adequate artificial light shall be made in machine rooms and penthouses. The electric light switch shall be within easy reach of the machine room entrance.

F. *Disconnect switch.* A manually operated multi-pole disconnect switch shall be provided in the machine room of every electric elevator located adjacent to and visible from the hoisting machine or motor generator set. No provision shall be made to close the disconnect switch from any other part of the building.

G. *Floor.* Penthouses used as machine rooms and machine rooms shall be provided with a floor. If metal bar grading is used for flooring, the flooring should be designed to reject a three-quarter inch round ball. If perforated sheet steel is used for flooring, the openings should be designed to reject a ball 1⅛ inch in diameter.

H. *Machine room storage.* Machine rooms shall not be utilized as general storage space and no flammable liquids shall be stored or kept in such rooms.

I. *Enclosure for machinery compartment.* When a compartment which contains machinery for operating an elevator is not separated from the hoistway by fireproof or semifireproof construction, it shall be enclosed with partitions and ceiling of not less than two-hour noncombustible construction and all openings shall be protected with approved fire doors, approved fire shutters or approved fire windows, as the case may require, except that, where one-hour construction is permitted for hoistway enclosures it may have similar construction.
(Code 1967, § 49-114; Code 1985, § 46-134)

Sec. 14-16-65. Pipes and wiring.

A. *Electric apparatus enclosure.* All live parts of electric apparatus in or connected with the elevator shaftway shall be suitably enclosed to protect against accidental contact.

B. *Electric grounds.* All machine frames, controller frames, control ropes and metal conduits shall be effectively grounded.

C. *Maximum voltage.* The maximum voltage or rated system permitted an the operating device of power elevators shall be 300 volts to ground for automatic operation, elevators having operating devices in the car and at landings and 750 direct current or 600 volts alternating current for other types of operating devices.
(Code 1967, § 49-115; Code 1985, § 46-135)

Sec. 14-16-66. Counterweights.

A. *Defective counterweight.* Broken or cracked sections of counterweights shall be replaced.

B. *Counterweight rods.* Counterweight hanger rods and/or tie rods shall firmly support and secure the counterweight section in place.

C. *Counterweight guides.* Counterweights shall run in guide rails or guide boxes and these guides shall confine the counterweights to a definite lane of travel in the hoistway and shall extend from the pit to the underside of the overhead sheave beams.

D. *Guard for counterweight cables.* Cables extending through counterweights shall be guarded by metal or fiber sleeves attached to the cables.
(Code 1967, § 49-116; Code 1985, § 46-136)

Sec. 14-16-67. Fire-resistant hoistways.

A. *When required.* Fire-resistant enclosures and doors shall be provided where required by local laws and ordinances.

B. *Non-fire-resistant materials.* No non-fire-resistant structural materials shall be added on the inside of any fire-resistant hoistway.

C. *Bevel plates.* Projections extending inward from the general surface of the shaftway and which are opposite a car entrance of a power elevator (except interlocks, door closers, door operating devices and signal devices) shall be beveled on the under side or shall be guarded with metal plates or with wood faced with metal. The angle of such bevels shall be not less than 60 degrees from the horizontal.

D. *Recesses in shaftway.* Recesses (other than windows and landing openings) in the general surface of the shaftway, which are opposite a car opening of a power elevator shall be furred out with fire-resistant materials substantially flush with the general surface of the shaftway.

Exception: elevators with car doors or gates equipped with electric contacts.

E. *Window guards.* Windows which are opposite a car opening of a power elevator shall be furred out with wire grille or expanded metal with smooth edges substantially flush with the general surface of the shaftway and the openings should reject a two inch ball.

Exception: elevators with car doors or gates equipped with electric contacts.
(Code 1967, § 49-117; Code 1985, § 46-137)

Sec. 14-16-68. Nonfire-resistant hoistways.

A. *Enclosure generally.* Where fire-resistant hoistways are not required by local laws or ordinances, hoistways shall be enclosed to a height of not less than six feet from each floor on all sides not used for landing openings and should be extended to the ceiling. Where material is stored adjacent to the hoistways the enclosure shall extend to the ceiling.

B. *Automatic trap doors.* Hoistways which are equipped with automatic trap doors for fire retardation purposes shall be enclosed as per subsection A of this section, or shall be enclosed with a substantial railing at least 42 inches high with a tow board approximately six inches high on all sides not used for landing openings. Such railings shall be located not less than 12 inches from the line of the shaftway.

C. *Height of stairway enclosure.* When an elevator is located adjacent to a stairway, all portions of the hoistway enclosure adjoining the stairway shall be not less than six feet above each stair tread (measured at the stair tread nosing) and should be extended to the ceiling.

D. *Door lintel to ceiling.* The hoistways of power elevators shall be enclosed on the sides used for loading and unloading from the door lintel to the ceiling at each floor except at the top floor.

Exceptions:

1. Elevators having car doors or gates equipped with electric contacts;
2. Freight elevators used primarily to carry automobiles, industrial trucks or industrial railroad cars and upon which only the operator and persons necessary to unload the freight are permitted to ride;
3. Sidewalk and platform elevators;
4. Hand elevators;
5. Elevators equipped with automatic trap doors.

E. *Materials.* Enclosures shall be building walls, solid or latticed partitions, grille work, metal grating, expanded metal with smooth edges or wood. Openings should be designed to reject a two inch ball unless the enclosure is located within one inch of the moving car, counterweight or a sliding door or gate, in which case the enclosure shall be adequately protected.

F. *Recesses.* Recesses (other than windows) in the hoistway enclosures which are opposite a car opening of a power elevator shall be furred out substantially flush with the general surface of the hoistway. Furring materials shall be as in subsection E of this section.

Exception: elevators having car doors or gates equipped with electric contacts.

G. *Windows.* Windows in the hoistway which are opposite a car opening of a power elevator shall be furred out as in subsection F of this section.

Exception: elevators having car doors or gates equipped with electric contacts.

H. *Projections in hoistway.* Projections in the hoistway opposite a car opening of a power elevator shall be protected as provided in section 14-16-67.
(Code 1967, § 49-118; Code 1985, § 46-138)

Sec. 14-16-69. Outside bars required for certain hoistway windows.

Windows in the hoistway enclosure less than seven floors above the sidewalk level or less than three floors above the roof of an adjacent building shall be fitted on the outside with vertical metal bars not less than five-eighths inch in diameter and spaced not more than ten inches apart.

Note: this is the usual method of indicating on the exterior of the building the location of an elevator hoistway. It serves to warn firefighters not to place ladders against such windows.
(Code 1967, § 49-119; Code 1985, § 46-139)

Sec. 14-16-70. Hoistway thoroughfares.

A. *Across hatch covers.* No thoroughfares shall be permitted across the hatch covers of a hoistway whether inside or outside of a building.

Exception: the hatch covers of a sidewalk elevator.

B. *Under hoistway.* There shall be no thoroughfares under the hoistway of any elevator unless all the following conditions exist:

1. Adequate buffers are provided;
2. The car is provided with car safeties meeting the requirements of section 14-16-108;
3. The counterweight is provided with speed governor operated safeties.

Exceptions: counterweights equipped with broken rope, instantaneous type safeties where the contact speed is not in excess of:

a. 250 f.p.m. and the counterweight is 2000 lb. or less,

b. 200 f.p.m. and the counterweight is 3000 lb. or less,

c. 160 f.p.m. and the counterweight is 4000 lb. or less,

d. 125 f.p.m. and the counterweight is 5000 lb. or less,

e. 100 f.p.m. irrespective of the weight of the counterweight.

4. There shall be a structure under the hoistway sufficiently strong to withstand without failure the impact of the car with contract load or the impact of the counterweight when either is descending at capacity speed or at governor trip ping speed where a governor operated safety is used.

C. *Through pit.* There shall be no thoroughfares through a hoistway pit.
(Code 1967, § 49-120; Code 1985, § 46-140)

Sec. 14-16-71. Strength of hatch covers.

A. Hatch covers, when closed, shall be able to support a uniformly distributed load of at least 40 pounds per square foot.

B. Sidewalk hatch covers of the hinged or vertical-lift type shall be able to support a uniformly distributed load of 300 pounds per square foot.
(Code 1967, § 49-121; Code 1985, § 46-141)

Sec. 14-16-72. Counterweight hoistways.

A. *Outside counterweight hoistway.* Hoistways for counterweights located outside of elevator hoistways shall be kept enclosed for the full height of the shaftway.

Exception: if such hoistways are located outside of the building the shaftway for the counterweight shall be guarded to a height of ten feet above the ground, with solid construction.

B. *Counterweight pit guard.* Counterweight hoistways located in the enclosed shaftway of power elevators shall be guarded from a point one foot above the pit floor to a point seven feet above the floor of its own pit or above the floor of the adjacent pit.

Exceptions:

1. When compensating chains or cables are attached to the underside of the counterweight;

2. Light weight looped chains may be used where the clearances do not permit the installation of a guard.

C. *Counterweight shaftway doors.* Doors leading to counterweight shaftways shall be kept locked.
(Code 1967, § 49-122; Code 1985, § 46-142)

Sec. 14-16-73. Guard boxes for cables passing through floors outside hoistway.

Where cables pass through floors outside of the hoistway enclosure, such cables should be guarded to a height of not less than six feet with cable guard boxes.
(Code 1967, § 49-123; Code 1985, § 46-143)

Sec. 14-16-74. Guide rails.

A. *Defective rails.* Where guide rails are sufficiently worn to prevent the proper operation of the car safety device, they shall be replaced.

B. *Length of rails.* Guide rails shall extend continuously the full length of the car and/or counterweight hoistway.
(Code 1967, § 49-124; Code 1985, § 46-144)

Sec. 14-16-75. Overhead sheaves.

Overhead sheaves of power elevators shall not be fastened to the underside of the overhead support beams by bolts in tension.

Exception: secondary and deflecting sheaves of traction type elevators.
(Code 1967, § 49-125; Code 1985, § 46-145)

Sec. 14-16-76. Terminal limit switches and stopping devices for power elevators.

A. *Limit switch construction.* Limit switches or stopping devices located or constructed in a manner which interferes with their proper operation shall be altered to function properly.

B. *Normal limit switches.* Normal terminal limit switches or stopping devices (directional limits) shall be provided on all elevators and shall be arranged to automatically stop the car and to function independent of the operating devices and also independent of such final terminal limit switches or stopping devices as required by subsection C of this section, and further, should, when traveling at any speed attained during normal operation, bring the car to rest within the overtravels, but the buffers may be compressed.

Exceptions:

1. All elevators with hand rope or rod operating devices and equipped with normal terminal limit stop balls fastened to the rope or rod which are arranged to center the operating device and, if winding drum machine equipped shall also be provided with a machine automatic normal terminal stopping device to automatically apply the brake and center the operating device.

2. All elevators with wheel or lever operating devices and with winding drum machines shall be provided with a machine automatic normal terminal limit stopping device to automatically center the directional controls and apply the brake.

3. Hydraulic elevators with a car speed in excess of 150 feet per minute shall be equipped with an automatically operated stop valve (or valves) which is operated by the movement of the car or the machine and which is independent of the normal control valve (or valves).

C. *Final limit switches.* Final terminal limit switches or stopping devices shall be provided on all electric elevators in addition to the normal terminal limits or stopping devices and shall be arranged to automatically prevent all movement of the car by the operating devices and to stop the car independent of the normal terminal limit switches or stopping devices and further, should, when traveling at any speed attained during normal operation, bring the car to rest within the overtravels, but the buffers may be compressed.

Exceptions:

1. Electro-hydraulic elevators;

2. Electric platform or sidewalk elevators having winding drum machines with a normal terminal machine automatic stopping device and also with either normal limit switches in the hoistway or with normal limit stopping devices on the operating rope, chain or rod.

D. *Location of normal and final limits.* Normal and final terminal limits or stopping devices on electric elevators may be located on the car or in the hoistway if operated by the movement of the car, or they may be located in the machine room if mounted on and operated by a stopping device automatically connected to the car with no dependence on friction as a driving means, pro vided that, on winding drum machine equipped elevators:

1. If the normal terminal limit switches are in the hoistway or on the car, the final terminal stopping devices shall be in the machine room and operated by a machine automatic stopping device;

2. If the final terminal limit switches are in the hoistway or on the car, the normal terminal stopping devices shall be in the machine room and operated by a machine automatic stopping device;

3. If operated by polyphase alternating current and the car speed is in excess of 75 feet per minute, final stopping devices should be in the machine room and operated by a machine automatic stopping device and should open the elevator service circuit.

Exception: machines with direct current brakes and direct current main line switches operated by final terminal limit switches in the hoistways.

E. *Cams for limit switches.* The cam or cams for operating limit switches shall be of sufficient length to hold the switches in the open position when the car is in contact with the overhead structure or is resting on the fully compressed buffers.

Exception: cams which operate nonautomatic reset limit switches.

F. *Magnetically operated contactors.* Electric drum type elevators which are operated and/or controlled by magnetically operated contactors and which have a capacity speed in excess of 100 feet per minute, shall have independent motor control contactors operated by the normal and final terminal limit switches.
(Code 1967, § 49-126; Code 1985, § 46-146)

Sec. 14-16-77. Pits.

A. Elevator pits shall be kept clean and dry. Water or other liquid which may accumulate in the pit shall be drained off or pumped off.

B. Elevator pits shall not be used for storage space. (Code 1967, § 49-127; Code 1985, § 46-147)

Sec. 14-16-78. Buffers.

A. *Generally.* All buffers shall be maintained in an upright position and directly under the bumper striker plates affixed to the car or counterweights. The pit striker plate shall be kept centered under the buffer in cases where the inverted buffer is attached to the counterweight.

B. *Oil buffers.* Oil buffers shall be kept continuously filled with oil to the level indicated on the reservoir.

C. *Required oil.* Whenever oil is added, oils equivalent to those recommended by the buffer manufacturer for use in the buffer shall be used.

D. *Required buffers.* Where elevator pits are not equipped with bumpers and where the depth of the pit will permit, spring bumpers with tops at least 12 inches above the bottom of the pit when compressed, shall be installed in the elevator pit.

Exception: hydraulic plunger elevators, platform elevators, sidewalk elevators, hand elevators, and all elevators with a car speed of 50 feet per minute or less. (Code 1967, § 49-128; Code 1985, § 46-148)

Sec. 14-16-79. Hoistway doors or gates for power passenger elevators.

A. *Automatic fire door.* No automatic fire door shall lock any landing opening in the shaftway enclosure from the shaftway side nor any exit leading from any hoistway landing to the outside of the building.

B. *Landing opening.* Landing openings in a required fire-resistant hoistway shall be protected by solid horizontally sliding, swinging or combination sliding and swing doors.

C. *Maximum clearance hoistway door to threshold.* For automatic operation elevators the distance between the hoistway side of the hoistway door or gate and the edge of the landing threshold should be not more than two and one-half inches. The shaftway face of each shaftway door wherein the above measurement is exceeded shall be furred out to within one-half-inch of the edge of the landing threshold or provided with equivalent protection to prevent an adult or child from standing in the space between the closed hoistway door or gate and the elevator car door or gate. (See also section 14-16-96(E))

In a non-fire-resistant hoistway, the hoistway openings shall be protected by doors, as heretofore specified or by horizontally swinging gates which will reject a two inch ball.

Doors and gates shall guard the full width and height of the landing openings.

Exception: scissors or pantograph gates, which reject a three-inch ball when closed, may be used at basement landing openings nonfire-resistant hoistways.

D. *Hoistway doors over 100 feet per minute.* Hoistway doors or gates for power passenger elevators operated in excess of 100 feet per minute shall be provided with door interlocks which conform to section 14-16-82. In addition, the hoistway doors of all hydraulic passenger elevators shall be provided with a door closer or the elevator shall be equipped with devices which will compensate for the creeping of the car away from the landing opening while the hoistway doors or gates are opened. Lever or wheel operated power elevators shall not be permitted to have mechanic interlocks for the hoistway doors or gates where the interlocks are of a type which may mechanically lock the operating device in the run position.

E. *Hoistway doors under 100 feet per minute.* Hoistway doors or gates for power passenger elevators operated at 100 feet per minute or less shall have interlocks which conform with section 14-16-82, except that on such elevators existing contacts and mechanical locks which conform with section 14-16-83, may be continued in service until either their replacement or renewal is required or else the elevator is altered.

F. *Hoistway doors locked out of service.* Hoistway doors or gates shall be arranged to be opened by hand from the shaftway side, except when locked out of service. Main exit and bottom terminal hoistway doors or gates shall not be locked out of service while the elevator is in operation.

G. *Manual or mechanical locks.* Where hoistway door or gate interlocks on mechanical locks are:

1. Manually unlocked, these locking devices shall be arranged to prevent the opening of the hoistway doors or gates from the landing side except as provided in section 14-16-89.

2. Mechanically or electrically unlocked, the locking devices shall be arranged to prevent the opening of the hoistway doors or gates from the landing side unless the car is within the landing zone, except as provided in section 14-16-89.

H. *Power hoistway doors.* Power closed hoistway doors or gates in elevators employing a type of operation which does not require an operation in the car shall be driven by a mechanism so designed and set that the force necessary to prevent the closing of the door or gate shall not exceed 30 pounds and further, that the hoistway door or gate, plus the car door or gate, plus all parts rigidly connected thereto, shall not develop a kinetic energy in excess of seven foot pounds, computed for the average closing speed or shall be provided with other suitable protecting measures.

I. *Hoistway door vision panels.* Hoistway doors provided with vision panels shall have the openings protected with clear wire glass in cases where the hoistway is of fire-resistant construction, and in all other cases with either clear wire glass or may be protected by wire grille screens of not less than number 13 steel wire gauge or metal gratings of equivalent strength which are designed to reject a two-inch ball.
(Code 1967, § 49-129; Code 1985, § 46-149)

Sec. 14-16-80. Hoistway doors and gates for freight elevators.

A. *Generally.* Each landing opening in a freight elevator hoistway shall be continuously equipped with a properly working door or gate.

Where fire-resistant hoistways are required by local laws and ordinances, the landing door shall be either:

1. Automatic fire doors which are kept normally open, but which are closed automatically by the action of heat, provided hoistway gates equipped with locking devices meeting the requirements of section 14-16-86, are installed in addition to the doors; or

2. Nonautomatic fire doors without hoistway gates, provided the doors are provided with locking devices meeting the requirements of section 14-16-86(A) or (B).

Exception: the upper landing of sidewalk elevators.

B. *Maximum opening of gate.* Hoistway gates made of grille, lattice or other openwork shall be designed to reject a ball two inches in diameter.

C. *Maximum clearance from hoistway door to threshold.* Hoistway doors and gates shall be located within four inches of the edge of the landing threshold.

Exceptions:

1. Elevators provided with car gates equipped as required by section 14-16-97;

2. Top landing doors or gates;

3. Hand elevators.

D. *Guides.* Hoistway doors and gates of the sliding type shall operate in guides or rails.

E. *Width and height of doors.* Hoistway doors should guard the full width and height of the landing opening.

F. *Minimum size of gates.* Hoistway gates shall guard the full width of the landing opening and shall extend from within two inches of the landing threshold to a height of not less than five feet six inches above the threshold.

Exceptions:

1. The top landing gates, where the head room makes it impractical to install gates five feet six inches high, may extend from within two inches of the landing threshold to a height of not less than 42 inches above the threshold if set back at least 12 inches from the threshold.

2. Landing openings of freight elevators may be equipped with gates which extend from within two inches of the landing threshold to a height of at least 42 inches if set back at least 12 inches from the edge of the threshold or shall be guarded as specified in Rule 124 of the Elevator Safety Code.

3. The bottom landing of hand sidewalk elevators may be equipped with single bar gates 42 inches high if set back at least 12 inches from the edge of the landing threshold.

G. *Self-closing gates.* Manually opened self-closing gates shall be of the vertically sliding type only and shall be permitted only on power elevators which can be operated from the car only and on hand-power elevators.

H. *Full automatic gates.* Full automatic gates shall be permitted only at terminal landings on power freight elevators which can be operated only from the car and which have a capacity speed not in excess of 100 feet per minute and at all landings of power freight elevators which can be operated only from the car and which have a capacity speed not in excess of 100 feet per minute and used primarily for carrying automobiles and on hand elevators.

Exception: existing full automatic gates on freight elevators which can be operated only from the car and having a capacity speed not exceeding 100 feet per minute may be retained in use at all landings provided that such gates shall, when renewed or replaced, be subject to the restrictions provided in this subsection.

I. *Closing automatic gates.* Full automatic gates shall not be closed by the direct mechanical action of the car, but may be retarded, while closing, by the car.

J. *Vision panel requirements.* Hoistway doors provided with vision panels shall have the openings protected with clear wire glass in cases where the hoistway is of fire-resistant construction and in all other cases with either clear wire glass or may be protected by wire grille screens of not less than number 13 steel wire gauge or metal gratings of equivalent strength which are designated to reject a two-inch ball.
(Code 1967, § 49-130; Code 1985, § 46-150)

Sec. 14-16-81. Hoistway doors or gates for hand-power passenger elevators.

A. *Generally.* Hoistway doors or gates for hand-power passenger elevators shall meet the requirements of section 14-16-80.

B. *Sign.* The word "elevator" shall be conspicuously displayed on the landing side of the doors if they are not equipped with interlocks.

C. *Interlocks.* Hoistway doors for hand-power passenger elevators shall be equipped with interlocks unless:

1. Hoistway gates which close when the car leaves the landing are installed in addition to the hoistway doors; or
2. The hoistway doors are made in two parts, one above the other, the lower part extending approximately 30 inches above the floor and arranged to be opened only after the upper part has been opened and which will be closed by the closing of the upper part; or
3. The hoistway doors are equipped with two spring locks or latches, one located not less than six feet above the door.

(Code 1967, § 49-131; Code 1985, § 46-151)

Sec. 14-16-82. Hoistway door or gate interlocks.

A. *Recognized systems.* This chapter recognizes two systems of hoistway door or gate interlocks:

1. The door unit system in which the interlock is arranged to prevent the operation of the elevator machine by the operating device, in a direction to move the car away from the landing, unless the hoistway door or gate at that landing at which the car is stopping or is at rest, is locked in closed position;
2. The hoistway unit system, in which the interlocks are arranged to prevent the operation of the elevator machine by the operating device unless all doors or gates are locked in closed position.

With either of the above systems, the interlocks shall prevent the opening of the hoistway doors from the landing side, except as permitted by section 14-16-89, unless the car is at rest within the landing zone or coasting through the landing zone with its operating device in the stop position.

Exception: the interlock shall not prevent the operation of the car by the operating device with the hoistway door or gate open when the emergency release is in temporary use, nor when the car is being moved within the leveling zone by a car leveling device.

Note: no electrically released, gravity or spring applied rope gripper or lock to prevent the movement of the operating rope or rod shall be recognized as a component device in any interlock system, except where the elevator may be operated only from the car and when the operating devices are inaccessible from the landing side of the hoistway doors or gates when the same are in the closed position.

B. *Door system.* The door unit system may be used only where there is a regular operator on the car and where the car can be operated only from inside the car.

C. *Manual hoistway doors.* Power operated elevators where the hoistway doors are not equipped with a door closer and/or no operator is required on the car shall have hoistway doors considered in the closed position only when the door is within three-eighths inch of the lock jamb (or the edge of the opposite door in cases where bi-parting doors are used).

D. *Power closed hoistway door.* For power elevators which are operated only from the car: hoistway doors equipped with door closers shall be considered closed (and the car may be started) when the door is within four inches of the lock jamb (or the face of the opposite door in cases where bi-parting doors are used), if from this position and any other up to the fully closed position, as defined in subsection C of this section, the door (or doors, if bi-parting) cannot be opened from the landing side to create a door opening more than four inches wide, provided that the door closer will eventually close the door (or doors, if bi-parting) as defined in subsection C of this section.

E. *Functioning of interlocks.* The interlocks for the hoistway doors shall function so that the doors shall be in the closed position as defined in subsection C or D of this section, before the car may be operated by the operating device to move the car away from the landing except as provided in subsection H of this section.

F. *Contacts.* Interlock contacts shall be positively opened and the functioning of the interlock to prevent the movement of the car by the operating devices shall not be solely dependent on the action of a spring or springs, nor gravity, nor upon the closing of an electric circuit. If an electric circuit is used its interruption shall prevent the movement of the car by the operating devices.

G. *Interlocks inaccessible.* Interlocks shall be so located as to be normally inaccessible from the landing side of the closed hoistway doors or gates.

H. *Hoistway interlocks minimum of 100 feet per minute.* Hoistway doors or gates for power elevators with a contact speed not in excess of 100 feet per minute may have the interlock service arranged to permit the car to be operated away from the landing a distance of not over 12 inches before the locking operation takes place, provided the following requirements are met:

1. If the locking operation fails to take place as specified, further movement of the car will open the operating circuit;
2. The car cannot be started by the operating devices until the hoistway door is closed;
3. The car platform is equipped with a substantial vertical face flush with its outer edge and extending at least 12 inches below the car platform.

I. *Existing power hoistway doors.* On existing power opened and/or closed hoistway doors equipped with door closers and interlocks which do not meet the requirements of subsection D of this section, hoistway doors shall be considered in the closed position and the car may be started only when the door is within three-quarters inch of the lock jamb (or the edge of the opposite door, if bi-parting doors), provided that the closer will eventually close the door (or doors, if bi-parting) as defined in subsection C of this section.

Note: no new application which conforms with subsection I of this section will be allowed.
(Code 1967, § 49-132; Code 1985, § 46-152)

Sec. 14-16-83. Hoistway door or gate electric contacts and mechanical locks.

A. *Recognized systems.* This chapter recognizes two systems of hoistway door or gate electric contacts:

1. The door unit system, in which the contact is arranged to prevent the operation of the car by the operating devices unless the hoistway door or gate at which the car is standing is closed in position to be locked;
2. The hoistway unit system, in which the contacts are arranged to prevent the operation of the car by the operating devices unless all the hoistway doors or gates are closed in position to be locked.

Exception: the opening of the contact shall not prevent the operation of the car by the operating device when the emergency release is in temporary use, nor when the car is being moved within the leveling zone by a car-leveling device.

Note: no electrically released gravity or spring applied rope gripper or lock to prevent the movement of the operating rope or rod shall be recognized as a component device in any hoistway door or gate electric contact system, except where the elevator may be operated only for the car and when the operating devices are inaccessible from the landing side of the hoistway doors or gates when the same are in the closed position.

B. *Door unit system.* The door unit system may be used only when there is a regular operator on the car and where the car can be operated only from inside the car.

C. *Sliding hoistway doors.* Sliding hoistway doors or gates provided with contacts and mechanical locks shall be considered in the closed position when within two inches of full closure (and the car may be started), provided the mechanical locks are equipped with double hook or multiple hook latches which are arranged to prevent opening the doors or gates more than two inches after the car has left the landing zone.

Note: mechanical locks which are not provided with the double hook or multiple hook latches are acceptable only if they are of a type that have the hoistway door or gate locked in the closed position before the contact circuit is closed.

D. *Swinging or combination hoistway doors.* Swinging or combination slide and swing hoistway doors or gates provided with contacts and mechanical locks shall be considered in the closed position when within one inch of full closure (and the car may be started), provided the mechanical locks are equipped with double or multiple hook latches which are arranged to prevent opening the hoistway doors or gates more than one inch after the car has left the landing zone.

E. *Design of hoistway electric contacts.* Hoistway door or gate electric contacts shall be designed so that they are positively opened by the locking bar, or by a level, or by some other device attached to and operated by the door or gate. The functioning of a hoistway door or gate electric contact to prevent the movement of the car by the operating devices shall not be dependent solely on the action of a spring or springs, nor solely on gravity, nor shall it be dependent on the closing of an electric circuit. If springs are used, they shall be in compression. The interruption of the electric circuit shall prevent the movement of the car by the operating devices.

F. *Inaccessible contacts and locks.* Contacts and mechanical locks shall be so located as to be normally inaccessible from the landing side of the closed hoistway doors or gates.

G. *Mechanical locks for hoistway doors.* Mechanical locks shall prevent the opening of the hoistway doors or gates from the landing side unless the car is within the landing zone, except as permitted by subsections C and D of this section and except by emergency keys, if provided, as permitted by section 14-16-89.
(Code 1967, § 49-133; Code 1985, § 46-153)

Sec. 14-16-84. Mechanical locks (car-operated or hand-operated).

A. Mechanical locks shall be constructed with double hook or multiple hook latches.

Exceptions:

1. Mechanical locks which are constructed as defined in the note under section 14-16-83(C);

2. Mechanical locks for gravity closed gates may have single hook latches.

B. Mechanical locks shall be so located or so guarded as to be normally inaccessible from the landing side of the closed hoistway door or gate.

C. Mechanical locks shall meet the requirements of section 14-16-83(G).
(Code 1967, § 49-134; Code 1985, § 46-154)

Sec. 14-16-85. Emergency releases.

Emergency releases are not required, but where provided shall meet the following requirements:

A. They shall be equipped with a break-glass cover and a means for breaking the glass.

B. They shall be equipped with continuous pressure type buttons or switches.

C. They shall not function when the car can be moved by operating devices located at the landing.
(Code 1967, § 49-135; Code 1985, § 46-155)

Sec. 14-16-86. Freight elevator hoistway door or gate locking devices.

A. *Locking devices for automatic, CPPB.* For automatic or continuous pressure operation, electric or electrohydraulic elevators, locking devices shall meet the following requirements:

1. Vertical sliding hoistway doors or gates:
   a. If the capacity speed is in excess of 150 feet per minute shall be equipped with interlocks which conform to section 14-16-82(A)(2).
   b. If the capacity speed is not in excess of 150 feet per minute shall be equipped with interlocks which conform to section 820(A)(2) or with hoistway door electric contacts and mechanical locks which conform to section 14-16-83(A)(2).
2. Horizontal slide or swing or combination slide and swing hoistway doors or gates shall be equipped with interlocks which conform to section 14-16-82(A)(2).

Exception: where the capacity speed is not in excess of 100 feet per minute existing contacts and mechanical locks (provided same conform to section 14-16-83(A)(2)), may be continued in service until such time as their renewal or replacement is required or until the elevator is altered.

B. *Interlock requirements for manual or power hoistway doors.* For power elevators which are operated only from the car, manually or power operated hoistway doors or gates shall be equipped with interlocks which meet the requirements of section 14-16-82, or shall be equipped with electric contacts and mechanical locks which meet the requirements of section 14-16-83.

C. *Mechanical locks for self-closing and fully automatic hoistway gates.* For power elevators operated only from the car and for hand elevators, manually opened, self-closing and fully automatic vertically sliding hoistway gates shall be equipped with mechanical locks which meet the requirements of section 14-16-84.
(Code 1967, § 49-136; Code 1985, § 46-156)

Sec. 14-16-87. Gate or door counterweights.

A. All gate or door counterweights shall operate in guides or boxes from which they cannot be dislodged.

B. The bottoms of all guides or boxes shall be constructed to retain the counterweight if the counterweight means of suspension breaks. Car door or gate counterweight guides shall be guarded on their car enclosure side.
(Code 1967, § 49-137; Code 1985, § 46-157)

Sec. 14-16-88. Landing threshold for passenger and freight elevators.

A. *Maintenance.* Landing thresholds and ramps leading to landing thresholds shall be maintained so that persons will not readily slip or trip thereon.

B. *Tracks.* All tracks on a landing threshold shall have the tops of the rails substantially flush with the landing threshold.

C. *Landing lighting.* Landings shall be properly illuminated.
(Code 1967, § 49-138; Code 1985, § 46-158)

Sec. 14-16-89. Service and emergency keys for hoistway doors or gates.

Service and emergency keys are not required, but where provided they shall meet the following requirements:

A. Service keys shall be given only to authorized persons and may open any or all the hoistway doors or gates only when the car is within the landing zone of the door which is arranged to be opened by the service key.

B. Emergency keys shall be kept in a break-glass case adjacent to the elevator opening nearest to the main entrance to the building or shall be kept by the superintendent or person in charge of the building in a location where they are not accessible to unauthorized persons.

C. Emergency keys shall be of a type not readily duplicated and may open any hoistway doors or gates which are arranged to be opened by the emergency key regardless of the position of the car in the hoistway.
(Code 1967, § 49-139; Code 1985, § 46-159)

Sec. 14-16-90. Car slings and platform frames.

A. Elevator car slings shall be rectangular and platform frames shall be substantially level.

B. All power elevators shall have steel car frames and outside platform frames of steel.

Exceptions:

1. Elevators having their hoist ropes attached at or below the car platform may have wood frames and wood outside platform frames if a steel suspension beam of approved size, to which the hoist ropes are attached, is installed below the platform.

2. Existing wood car frames and platforms with wood outside frames having the hoist ropes attached to the car crosshead may be retained in use provided a steel beam of approved size is installed under the car platform extending the full width of the car and secured by "U" bolts or other approved means passing over the top of the crossheads or are provided with steel tierods of an approved size extending continuously over the top of the crosshead and bolted underneath the side members of the car platform or unless other approved means are provided to prevent separation of the platform from the crosshead.

3. When existing wood car frames and platforms are replaced or removed, the new car frames and the outside platform frames shall be of steel.

4. Platform elevators having a rise of 15 feet or less.

(Code 1967, § 49-140; Code 1985, § 46-160)

Sec. 14-16-91. Car floors.

A. Elevator car floors shall be maintained so that persons will not readily slip or trip thereon.

B. Where tracks are located on an elevator car floor the tops of the rails shall be substantially flush with the general surface of the car floor.
(Code 1967, § 49-141; Code 1985, § 46-161)

Sec. 14-16-92. Power elevator car sides.

A. *Generally.* Elevator car sides of solid or openwork, wood or metal construction shall be provided on all sides of passenger or freight power elevators which are not used for loading or unloading except sidewalk and platform elevators. If of openwork construction, openings should be designed to reject a two-inch ball, unless the enclosure is located within, one inch of the hoistway wall or the counterweight, in which case the enclosure shall be protected by a mesh which should reject a one-half-inch ball.

B. *Height.* Power freight elevator car enclosures should extend to a height of not less than six feet above the car floor and in no case shall they be less than 66 inches high. All power passenger elevator car enclosures shall extend from the car floor to the car top. That portion of the car enclosure which is in front of the counterweight shall extend to the car top or to the top of the crosshead where no car top is provided.
(Code 1967, § 49-142; Code 1985, § 46-162)

Sec. 14-16-93. Power elevator car tops.

Power passenger elevators shall be equipped with a solid or openwork car top which will reject a 1½-inch ball. Car tops shall be constructed to sustain a load of not less than 150 pounds applied at any place on the car top.
(Code 1967, § 49-143; Code 1985, § 46-163)

Sec. 14-16-94. Power operated sidewalk elevator tops.

Power operated sidewalk elevators shall be provided with either flat metal tops of metal frames or arched metal bows of sufficient strength to open the hatch covers, or be provided with a device that will stop the car before a person riding on the car platform could be injured, if the hatch cover is not in the open position when the car is operated in the up direction.
(Code 1967, § 49-144; Code 1985, § 46-164)

Sec. 14-16-95. Cars to have only one compartment.

Elevator cars shall not have more than one compartment.
(Code 1967, § 49-145; Code 1985, § 46-165)

Sec. 14-16-96. Car doors or gates for power passenger elevators.

A. *Requirements when provided with electric contacts.* Car doors or gates provided with car door or gate electric contacts shall protect each entrance of a power passenger elevator car, shall be arranged to guard the full width of the opening and shall extend from within two inches of, and up to a height of not less than six feet above the car platform flooring.

B. *Scissor or pantograph gate.* Car gates of the scissors or pantograph type on automatic operation elevators shall not be opened under power for spice in excess of nine inches from the full closure position.

C. *Driving mechanism when operator not used.* Power closed car doors or gates, in elevators employing a type of operation which does not require a operator in the car, shall be driven by a mechanism designed and set that the force necessary to prevent the closing of the door or gate shall not exceed 30 pounds and further, that the car door or gate, plus the hoistway door or gate, plus all parts rigid connected thereto shall not develop a kinetic energy in excess of seven foot pounds computed the average closing speed, or shall be provided with other suitable protecting measures.

D. *Relationship to hoistway doors.* For automatic operation passenger elevators having power closed or automatically released self-closing car doors or gates, and manually closed or self-closing hoistway doors, the closing of the car door or gate shall be prevented unless the hoistway door is closed in a position to be locked.

E. *Maximum clearance from car gate to hoistway gate for automatic or CPPB.* For automatic operation or continuous pressure operation, the minimum clearance space between the car doors or gates and the hoistway doors or gates shall not exceed 5½ inches. Where this distance is exceeded the hoistway doors or gates shall be altered to comply with section 14-16-79(C).

F. *New or replaced gates.* Where existing car gates are replaced or new gates installed, the gates shall be constructed to reject a three-inch ball.

G. *Sliding doors.* Sliding car doors may be solid, may be provided with open grille or bars which should be designed to reject a two-inch ball or may be provided with glass or open grille vision panels. Grilles, bars or vision panels may extend the full height of the car door panel. Clear wire or laminated glass shall be used for glass vision panel replacements.
(Code 1967, § 49-146; Code 1985, § 46-166)

Sec. 14-16-97. Car doors or gates for power freight elevators.

A. *Generally.* A car door or gate provided with a car door or gate electric contact shall be provided at each entrance to a power freight elevator where the construction does not comply with any of the following:

1. Section 14-16-67(D) or (E);
2. Section 14-16-68(D), (F) and (G);
3. Section 14-16-80(C);
4. Section 14-16-104(C).

Car doors or gates equipped with car doors or gate electric contacts shall be provided at each entrance to power elevators having automatic operation.

B. *Self-closing mechanically locked gate.* A self-closing mechanically locked car gate or door may be provided to guard the opening in the elevator car adjacent to the side of a hoistway which has but one landing opening; provided that, the elevator machine is not equipped with an electrically released brake and that the car speed is 75 feet per minute or less.

C. *Horizontal or vertical sliding gates.* Car doors or gates for power freight elevators shall be of the horizontally or vertically sliding type, shall guard the full width of the car opening and should extend from within two inches of and up to six feet above the car platform flooring.

D. *Collapsible gates.* Collapsible car gates for power freight elevators should be designed to reject a four and one-half-inch ball when the gate is fully closed.

E. *Sliding doors.* Sliding car doors may be solid, or may be provided with open grille or bars which should be designed to reject a two-inch ball or may be provided with glass or grille vision panels. Grilles, bars or vision panels may extend the full height of the door panel. Clear wire or laminated glass shall be used for glass vision panel replacements.

F. *Replacing or installing gates.* Where new car gates are installed or existing gates replaced, they shall comply with the dimensions specified in subsections C and D of this section.
(Code 1967, § 49-147; Code 1985, § 46-167)

Sec. 14-16-98. Car door or gate electric contacts.

A. *Arrangement.* Car door or gate electric contacts shall be arranged to prevent the starting of the car by the operating device unless the car door or gate is within two inches of full closure.

Exceptions:

1. The contact when the car door or gate is opened shall not prevent the starting of the car by the operating device if the emergency release is in

temporary use, nor prevent the movement of the car within the leveling zone by the car leveling device.

2. Automatic operation elevators may be operated with an open car gate if there is no passenger in the car, provided the elevator car is equipped with a floating platform and all safety requirements for this type of control and construction are complied with. See section 14-16-109(I).

3. In cases where both the car door or gate is equipped with a closer, and the hoistway door or gate is equipped with a door closer complying with section 14-16-82(D), and the elevator is operated only from the car, the contact may permit the starting of the elevator by the operating device when the car door or gate is within four inches of full closure.

B. *Functioning.* Car door or gate electric contacts shall be positively opened and the functioning of the contact to prevent the starting of the car shall not be solely dependent upon the action of a spring or springs, nor upon gravity, nor upon the closing of an electric circuit. If an electric circuit is used its interruption shall prevent the starting of the car by the operating devices.

C. *When prohibited.* Car door or gate electric contacts shall not be permitted on power elevators equipped with machines with mechanically released brakes.

D. *Rope gripper or lock.* No electrically released, gravity or spring applied rope gripper or lock to prevent the movement of the operating rope or rod shall be recognized as a component device in any car or gate electric contact system, except where the elevator may be operated only from the car and when the operating devices are inaccessible from the landing side of the hoistway doors or gates when the same are in the closed position.
(Code 1967, § 49-148; Code 1985, § 46-168)

Sec. 14-16-99. Car emergency exits.

A. *Required.* Each elevator car equipped with a top shall be provided with either a car top or car side emergency exit.

B. *Dimension for top exits.* Top emergency exit openings, where provided, should be not less than 14 inches by 22 inches. Where new exit openings are installed, they shall, where space conditions permit, conform to the dimensions specified.

C. *Opening top exits.* Top emergency exit covers, where provided, shall be arranged so that the exit covers may be opened by hand from either the inside or the top side of the car.

D. *Opening side exits.* Side emergency exit panels, where provided, shall open inwardly and shall be arranged to be opened by hand from either the inside or the outside of the car or may be equipped with lock and removable key which shall be kept either in the car or in the emergency hoistway door key case at all times, and also with the lock arranged to be opened by hand from the outside of the car.

E. *Electric contacts on side exits.* Side emergency exit panels, where provided, on automatic or continuous-pressure operated elevators, shall be provided with electric contacts which shall be arranged to prevent the operation of the car by the operating devices when the exit panel is open.

F. *Dimension for side exits.* Side emergency exit openings, where provided, should be not less than 16 inches wide and no fixed obstruction in the hoistway which blocks up the opening shall be permitted. Where new exit openings are installed, they shall conform to the dimensions specified where space conditions permit.
(Code 1967, § 49-149; Code 1985, § 46-169)

Sec. 14-16-100. Car lighting.

A. Elevator cars shall be adequately illuminated at all times when in use.

B. Elevator car lighting or hoisting lighting circuit switches shall be located on the car, in the hoistway or adjacent to the hoistway.
(Code 1967, § 49-150; Code 1985, § 46-170)

Sec. 14-16-101. Glass in cars.

No piece of glass, unless laminated or otherwise shatterproof should exceed one square foot in area when located in the cab of the car.
(Code 1967, § 49-151; Code 1985, § 46-171)

Sec. 14-16-102. Aprons for cars equipped with car-leveling devices.

A. Each elevator car equipped with car-leveling devices that operate the car when the hoistway doors or gates are open shall have the car platform provided with a substantial vertical face, flush with the edge of the car

platform adjacent to the hoistway opening and extending a sufficient distance below the car platform so that no horizontal opening in the hoistway occurs when the car may be moved by the car-leveling devices.

B. Elevator cars equipped with inching or teaser devices that operate the car when the hoistway doors or gates are open shall have the car platform provided with a vertical face as defined in subsection A of this section.
(Code 1967, § 49-152; Code 1985, § 46-172)

Sec. 14-16-103. Adjusting and renewing guide shoes.

When guide shoes are sufficiently worn so as to cause any material reduction in the clearances mentioned in section 14-16-104(A), (B) and (D), the guide shoes shall be adjusted or rebabbitted or renewed depending upon the type of guide shoes furnished.
(Code 1967, § 49-153; Code 1985, § 46-173)

Sec. 14-16-104. Clearances between cars, counterweights and shaftways.

A. *Between car and hoistway car and counterweight.* There shall be maintained a clearance of not less than one-half-inch between the sides of the car and the shaftway enclosure and not less than one-half-inch clearance between the car and its counterweights.

B. *Between car and landing threshold.* There shall be maintained a clearance of not less than one-half-inch between car platforms and landing thresholds for elevators using steel guide rails with side post construction, and three-fourths inch for elevators with wood guide rails or corner post construction. This clearance shall be maintained so as not to exceed 1½ inches.

C. *Between hoistway and open edge of car.* The clearance between the shaftway enclosure and the open edges of the car platform should not exceed five inches, except where the hoistway doors are installed wholly within the hoistway; in which case the maximum clearance should not exceed 7½ inches. Car doors or gates equipped as required in section 14-16-97, shall be installed where this above clearance exceeds 5½ inches.

D. *Between two cars.* If two or more adjacent cars are operated in the same shaftway the horizontal clearance between cars should not be less than two inches.

E. *Overhead clearances.*

1. The distance between the top of the elevator car sling and any obstruction directly above it when the car floor is level with the top landing shall be equal to or be greater than the sum of the following:
   a. The distance between the counterweight and its buffer;
   b. The maximum stroke of the counterweight buffer;
   c. Six inches.
2. The distance between the top of the counterweight and any obstruction directly above it when the car floor is level with the top landing shall be equal to or greater than the sum of the following:
   a. The distance between the top of the buffer and its striker plate on the car;
   b. The maximum stroke of the car buffer;
   c. Six inches.
3. For cars traveling faster than 250 feet per minute add this item to each of the above sums: one-half of the stroke of the buffer used.

Note: this item may be omitted if provision is made to eliminate the jump of the car or counterweight, if its top clearance is being considered, at buffer engagement.

F. *Reducing overhead clearance.* No structure or apparatus shall be installed either on the top of the car, or extending upwards above the top of the car, or extending downwards from the top of the hoistway which would reduce the over-travel clearances; unless prior to installation an investigation is made and permission is given by the department of labor, supervising inspector.

G. *Compressed counterweight buffer.* When the counterweight is resting on its fully compressed bumper, no equipment attached to the elevator car or car frame shall strike the overhead construction.
(Code 1967, § 49-154; Code 1985, § 46-174)

Sec. 14-16-105. Signal systems generally.

Each power freight or passenger elevator or each grouping of elevators shall be provided with a signal system by means of which signals can be given from any landing whenever an elevator is desired at that landing.

Exceptions:

A. Signal-operation elevators;

B. Automatic-operation elevators;

C. Continuous-pressure-operation elevators;

D. Power elevators which are scheduled to stop at each floor.

(Code 1967, § 49-155; Code 1985, § 46-175)

Sec. 14-16-106. Emergency signal.

Each automatic operation or continuous-pressure-operation elevator shall be equipped with either an emergency signal that can be operated from within the car and which is clearly audible outside the hoistway or shall be equipped with a telephone located in the car and connected to a central exchange or to a private exchange which is continuously attended.

(Code 1967, § 49-156; Code 1985, § 46-176)

Sec. 14-16-107. Platform elevators.

A. No platform elevator shall be used for passenger service.

B. No platform elevator with a travel in excess of 15 feet shall be permitted unless it complies with all the requirements of the freight elevator.

(Code 1967, § 49-157; Code 1985, § 46-177)

Sec. 14-16-108. Car and counterweight safeties and speed governors.

A. *Car safeties.* Each elevator suspended by cables shall be equipped with a mechanically applied car safety (or safeties), which should be attached below the car floor and capable of stopping and sustaining the car together with its contract load.

Exceptions:

1. Power freight-elevators and all platform elevators with a total rise not exceeding 15 feet;
2. Hand freight-elevators with a total rise not exceeding 30 feet;
3. Sidewalk elevators with a total rise not exceeding 30 feet.

B. *Governor for power freight elevators.* All power freight elevator cars where the capacity-speed is in excess of 100 feet per minute shall have the car safeties in conformity with subsection D of this section applied by speed governor devices.

Exception: rope geared hydraulic elevators.

C. *Broken rope safeties.* All power freight elevator cars with a capacity speed not in excess of 100 feet per minute and all hand-power elevator cars, subject to the requirements of subsection A of this section, may be equipped with broken rope type car safeties located either in the safety-plank beneath the car platform or in the crosshead of the car sling or on the stiles of the car sling.

When new car safeties are installed or existing car safeties replaced, they shall, subject to the requirement of subsection A of this section, be applied by speed governors.

Exception: existing broken-rope instantaneous type car safeties on rope geared hydraulic elevators may be retained in operation without governors irrespective of the car speed.

D. *Accessible safeties.* Four types of safeties are acceptable:

1. Type I (Instantaneous) which shall be limited to a capacity speed not in excess of 150 feet per minute, except as provided in subsection C of this section;
2. Type W.C. (Wedge Clamp) with constant retarding force;
3. Type G.W.C. (Gradual Wedge Clamp) with gradual increasing retarding force;
4. Type F.G.C (Flexible Guide Clamp) with constant retarding force.

E. *Pawl type safeties.* Pawl type safeties applying to a rack guide are permitted only on hand freight-elevators and only on power freight-elevators where the capacity-speed is not in excess of 50 feet per minute, where also the capacity is not in excess of 2,000 pounds; and where also, no person other than the operator is permitted to ride.

F. *Lubrication for safeties.* Car safeties shall be kept well lubricated and operating freely.

G. *Adjustment of car safeties.* Car safeties shall be adjusted to work together and the application of the safeties shall not cause the car platform to become out of level more than one-half-inch per foot measured in any direction.

H. *Setting of governors.* Speed governors shall be set to apply either at not less than 15 percent over the capacity speed or at not more than 40 percent over

capacity speed except that no speed governor shall be required to be set to apply at less than 175 feet per minute.

I. *Releasing car safeties.* Car safeties may be arranged to release by raising the elevator car but when the car safeties are applied no decrease in the tension of the governor cable or motion of the car in the descending direction shall release the car safeties.

J. *Governor location.* Governors shall be located where their full movement is unobstructed and nothing shall be stored or permitted to remain near the governors which might interfere with their operation.

K. *Testing car safety and governor.* Every car safety and its speed governor shall be tested in accordance with the requirements of the ASA Safety Code for Elevators.

L. *Repainting governors and safeties.* No speed governor and no car safety shall be repainted unless they are retested as required by subsection K of this section. (Code 1967, § 49-158; Code 1985, § 46-178)

Sec. 14-16-109. Operation and control.

A. *Operating devices accessible for hoistway.* Power elevators operated by ropes, cables, rods or any other devices which are accessible from the outside of the hoistway shall either:

1. Have these operating devices made inaccessible from the outside of the hoistway; or
2. Be equipped with all automatic operation equipment and operating device safeguards required by subsection (I)(2) of this section.

B. *Wheel or lever operating devices.* Wheel or lever operating devices shall be provided with up and down position indicators on the operating device.

C. *Hand-rope cable sheave guard.* Sheaves for hand-rope cables shall be equipped with guards to prevent the ropes from leaving the sheaves or the hand-rope cable tension shall be automatically maintained.

Overhead tension weights for hand-ropes shall be secured by cables or chains fastened to the weights and to a suitable anchorage. Hand-rope cables shall be kept smooth, clean, free of oil or grease and without projecting wires.

D. *Car switch operating device.* All operating devices of car switch operating elevators shall automatically return to the stop position when pressure is released.

E. *More than one operating system.* Elevators equipped with more than one operating system shall have the operating systems interlocked to allow the use of only one operating system at a time.

Exception: automatic operation elevators.

F. *Emergency stop switch.* Electro-hydraulic and electric elevators which have an elevator machine provided with an electrically released brake shall be provided with an emergency stop switch in the car and this switch should be of a type in which the contacts are mechanically opened and not solely spring opened.

Exceptions:

1. Automatic operation elevators equipped with a stop button so marked, in the car;
2. Sidewalk or platform elevators.

G. *Defective contacts.* Contacts which are badly pitted, burned, cracked or broken or which indicate a condition leading to possible fusing together of the contacts shall be renewed.

H. *Circuit breaker connected to fire alarm system.* No circuit breaker operated automatically by a fire alarm system shall interrupt the operating circuit of a passenger elevator.

I. *Automatic operation elevator.* Automatic operation elevators shall conform with the following:

1. If the car has started for a given landing, no impulse can be given to send the car in the reverse direction.
2. The car cannot be started by the operating devices unless the car door or gate is closed and is equipped with a contact as provided in section 14-16-98(A) and all hoistway doors or gates are closed and are equipped with either interlocks or with contacts and car operated mechanical locks and as required by either section 14-16-79(D) or (E) or section 14-16-86(A).

Exception: floating platform construction may be used on passenger elevators to permit the car to be operated from the landing buttons with the car gate open and no passenger in the car, under the following conditions:

a. The entire side of the hoistway opposite a car opening, including the doors, sills, lintels and spandrels shall be substantially flush (within tolerance of one-quarter inch).

b. The operation of the car from the car buttons shall be prevented unless the platform is depressed and the car gate is closed.

c. A weight of 30 pounds placed anywhere in the form shall cause it to function.

d. The platform shall be so constructed that there is no pocket or recess to catch refuse or dirt under the platform or no horizontal opening at the car sides where refuse or dirt may block the car platform in its depressed position.

e. The entire platform area within the car and the car threshold shall float.

f. There are no handrails in the car.

g. Hoistway door interlocks are provided as required by section 14-16-82(A)(2).

J. *C.P.P.B. operation.* Continuous-pressure operation shall not be used for elevators unless they are provided with all safety devices required for automatic operation.

K. *Overload circuit breaker.* If an overload circuit breaker is used for a direct-current elevator the opening of the motor circuit and the opening of the brake circuit shall occur simultaneously.

L. *Centering rope on rope or rod operating device.* Each power elevator operated by a hand rope or rod operating device shall be provided with a centering rope which will insure the operating mechanism being placed in the stop position when it is desired to stop the car, and the car shall be equipped with an operating rope car lock arranged to engage (at all landings) stop buttons on the operating rope or rod. The centering rope shall be so located as to be available to the operator for the full travel of the car.

Exceptions:

1. Electric elevators equipped with electrically released brakes and emergency stop switches in the car;

2. Electric elevators equipped with electrically released brakes and hoistway door or gate interlocks or electric contacts or with car door or gate electric contacts;

3. Sidewalk elevators.

M. *Sequence relay.* Electric elevators equipped with electric brakes and operated by hand cables, levers or wheel operating devices, shall, if provided with car emergency switches, car door or gate electric contacts or hoistway door or gate interlocks or electric contacts, have the operating and control circuits so arranged that in the case of failure of power or the opening of the car or hoistway door or gate interlock or contact circuits of the opening of the car emergency switch while the car is running, it will be necessary to return the operating device to the off position before the car can again be started.
(Code 1967, § 49-159; Code 1985, § 46-179)

Sec. 14-16-110. Disconnecting devices.

All new and relocated elevators shall be provided with a disconnecting means for automatic operation or continuous pressure operation elevators an all buildings exceeding 55 feet in height as follows: there shall be provided in the elevator car or at the starter's station for each automatic operation elevator or continuous pressure operation elevator a means to disconnect the elevator from the landing operating devices. The means provided shall be accessible only to authorized persons.
(Code 1967, § 49-160; Code 1985, § 46-180)

CHAPTER 14-20. TRAILERS AND TRAILER COURTS*

Sections:

Article 1. General Provisions

Sec. 14-20-1. Definitions.
Sec. 14-20-2. Trailer owners and occupants subject to city ordinances and rules.
Sec. 14-20-3. Parking or storing trailers outside trailer court.
Sec. 14-20-4. Rules and regulations of health department.
Sec. 14-20-5. Conflicts between chapter and other ordinances and laws.
Sec. 14-20-6. Violation of chapter, rules or regulations.

Article 2. Trailer Courts

Sec. 14-20-7. Permit—Fee.

***Charter reference—**Authority to regulate trailer camps, § 864.

State law reference—Mobile homes, T.C.A. §§ 55-4-401 et seq., 68-126-101 et seq.

Sec. 14-20-8. Approval of plans.
Sec. 14-20-9. Inspections.
Sec. 14-20-10. Management.
Sec. 14-20-11. Guest registration.
Sec. 14-20-12. Service buildings required.
Sec. 14-20-13. Water supply.
Sec. 14-20-14. Sewage disposal.
Sec. 14-20-15. Garbage and refuse disposal.
Sec. 14-20-16. Report of communicable diseases.

ARTICLE 1. GENERAL PROVISIONS

Sec. 14-20-1. Definitions.

For the purposes of this chapter, the following definitions shall apply:

Service building means a building maintained by trailer court management to provide toilet facilities for male and female, laundry facilities and to provide shower facilities for use by occupants of trailers without such facilities.

Trailer or trailer coach means any vehicle used or so constructed as to permit its being used, as a conveyance upon the public streets or highways and duly licensable as such and constructed in such a manner as will permit occupancy thereof as a dwelling or sleeping place for one or more persons, provided that this definition shall not include transport trucks or vans equipped with sleeping space for a driver or drivers.

Trailer court means any plot of ground within the city upon which two or more trailer coaches, occupied for dwelling or sleeping purposes, are located.
(Code 1967, § 39-1; Code 1985, § 37-1)

Sec. 14-20-2. Trailer owners and occupants subject to city ordinances and rules.

Immediately upon arrival within the city limits, the owner and occupants of any trailer shall be subject to all the laws, ordinances, rules and regulations of the city and any violation thereof shall constitute a misdemeanor.
(Code 1967, § 39-2; Code 1985, § 37-2)

Sec. 14-20-3. Parking or storing trailers outside trailer court.

The parking or storage of trailer coaches shall not be permitted on any premises within the city not operating as a trailer court under a valid permit. This section shall not apply to the owner of such vehicle if he or she is a bona fide resident of the city and possesses sufficient space on his or her premises to park or store the unoccupied trailer coach and if such parking or storage is approved in writing by the health department and is not in violation of any city ordinance.
(Code 1967, § 39-3; Code 1985, § 37-3)

Sec. 14-20-4. Rules and regulations of health department.

The health department is empowered to formulate from time to time and to enforce any rules and regulations that such department may deem advisable governing the operation of trailers and trailer courts, bearing on any matters of sanitation or housing.
(Code 1967, § 39-4; Code 1985, § 37-4)

Sec. 14-20-5. Conflicts between chapter and other ordinances and laws.

In any case where a provision of this chapter is found to be in conflict with a provision of any private or public act or ordinance or code, the provision which establishes the higher standard for the promotion and protection of the health and safety of the people shall prevail.
(Code 1967, § 39-5; Code 1985, § 37-5)

Sec. 14-20-6. Violation of chapter, rules or regulations.

Any person who violates the provisions of this chapter or the rules and regulations adopted pursuant thereto, or fails to perform the reasonable requirements of the health department or health officer after receipt of 30 days' written notice of such requirements, shall be subject to punishment as provided in section 1-24-1 for each offense and each day of continued violation after conviction shall constitute a separate offense.
(Code 1967, § 39-6; Code 1985, § 37-6)

ARTICLE 2. TRAILER COURTS

Sec. 14-20-7. Permit—Fee.

A. No trailer court shall be established or maintained by any person within the city without a valid current permit from the health department issued in the name of the current manager. The department is authorized to issue and to suspend or revoke permits upon written

notice of reasonable cause to secure abatement of unsanitary conditions and compliance with health rules and regulations.

B. Before a permit is issued by the health department, an annual permit fee of $150.00 shall be paid to the city and county health department. Such fee shall be due on January 1 of each calendar year and shall be paid by January 31.
(Code 1967, § 39-17; Code 1985, § 37-21; Ord. No. 349, § 1, 12-31-1968; Ord. No. 2955, § 1(1), (2), 12-11-1979)

Sec. 14-20-8. Approval of plans.

Such scale, detailed plans as may be required by the health department shall be submitted for review and approval before construction and operation of a trailer court. Such plans shall show provisions and arrangement facilities to comply with this chapter and with other codes and regulations involved.
(Code 1967, § 39-18; Code 1985, § 37-22)

Sec. 14-20-9. Inspections.

The health department is authorized and directed to make inspections of trailer courts and to enter at reasonable times upon the trailer court property to investigate compliance with health rules and regulations.
(Code 1967, § 39-19; Code 1985, § 37-23)

Sec. 14-20-10. Management.

The active manager or owner of a trailer court shall be capable and responsible for the proper sanitation of the premises and shall provide full-time competent employees to maintain and operate the establishment in a satisfactory condition at all times.
(Code 1967, § 39-20; Code 1985, § 37-24)

Sec. 14-20-11. Guest registration.

The owner or occupant of a trailer shall promptly register with the owner or manager of the trailer court when the vehicle is parked therein. The owner shall enter upon such register his or her date of arrival, name in full and the individual names of the persons in his or her party, license number of the vehicle and the state in which such vehicle was licensed, and the last permanent address of the owner of such vehicle; and, upon leaving, he or she shall enter the date of his or her departure.
(Code 1967, § 39-21; Code 1985, § 37-25)

Sec. 14-20-12. Service buildings required.

Each trailer court that accepts a dependent trailer coach for parking shall be provided with one or more service buildings.
(Code 1967, § 39-22; Code 1985, § 37-26)

Sec. 14-20-13. Water supply.

An accessible, adequate, safe and potable supply of water shall be provided in each trailer court, capable of furnishing a minimum of 125 gallons per day per trailer coach space. Where a public supply of water of such quality is available, connection shall be made thereto and its supply shall be used exclusively. The development of an independent water supply to serve the trailer court shall be made only after express approval has been granted by the health department.
(Code 1967, § 39-23; Code 1985, § 37-27)

Sec. 14-20-14. Sewage disposal.

Trailer courts shall be served by a public sewer system, if available, or by a private disposal system which has the approval of the health department. Each trailer coach space shall be provided with a satisfactory sewer connection. All sewage disposal apparatus, including appurtenances thereto, shall be provided, maintained and operated so as not to create a nuisance or health hazard.
(Code 1967, § 39-24; Code 1985, § 37-28)

Sec. 14-20-15. Garbage and refuse disposal.

A. One central station for storage of garbage receptacles and rubbish shall be provided in detail at every trailer court as follows: an area, basin, platform or rack constructed of concrete or similar material as to be permanently enduring, nonabsorbing, washable and cleanable in all its parts and equipped with a properly constructed drain connecting with the sanitary sewer, having a retaining wall not less than four inches in height entirely surrounding its outside circumference and of sufficient size to store and clean all of the garbage receptacles without contaminating adjacent

surfaces. Vehicle washing stations shall be similarly constructed but may be modified to specifically accommodate vehicles.

B. Standard garbage receptacles shall be supplied by the management of ample number to accommodate all the garbage, ashes and household refuse inside the cans, allowing the covers to fit properly at all times and at no time shall garbage, ashes or other refuse be dumped upon the ground on any part of the premises. Garbage receptacles shall be conveniently placed and readily accessible to all the patrons and employees of the establishment.
(Code 1967, § 39-25; Code 1985, § 37-29)

Sec. 14-20-16. Report of communicable diseases.

It shall be the duty of the owner or manager of a trailer court to promptly report to the health department all cases or suspected cases of communicable disease occurring within the court.
(Code 1967, § 39-27; Code 1985, § 37-30)

CHAPTER 14-24. RESERVED

Editor's note—Ord. No. 5459, § 16, adopted July 17, 2012, repealed Ch. 14.24, §§ 14-24-1—14-24-9, which pertained to landmarks preservation. For prior history, see Code Comparative Table. See section 8.4 of the Memphis and Shelby County Unified Development Code.

TITLE 15

UNIFIED DEVELOPMENT CODE

The Unified Development Code is currently being amended by the County and can be found here: http://www.shelbycountytn.gov/index.aspx?NID=924

CODE COMPARATIVE TABLE

1967 CODE

This table gives the location within this Code of those sections of the 1967 Code which are included herein. Sections of the 1967 Code not listed herein have been omitted as repealed, superseded, obsolete or not of a general and permanent nature. For the location of ordinances adopted subsequent thereto, see the table immediately following this table.

CODE COMPARATIVE TABLE

1985 CODE

This table gives the location within this Code of those sections of the 1985 Code, as supplemented, which are included herein. Sections of the 1985 Code, as supplemented, not listed herein have been omitted as repealed, superseded, obsolete or not of a general and permanent nature. For the location of ordinances adopted subsequent thereto, see the table immediately following this table.

EASEMENTS (Cont'd.)	
Notice of excavation or site preparation work in utility easements	12-4-12
EDUCATION AND TRAINING	
Air pollution control	
Source emission standards	
Emission standards for existing hospital/medical/infectious waste incinerators (HMIWI)	
Operator training and qualification requirements	9-12-21.5.E
Ambulances	
Attendants to have first aid certificate	9-20-3
Board of ethics	
Duties of the board of ethics	2-10-10.B
Broadband telecommunications regulatory board	
Duties; appeal of board findings.	2-44-2
Cable television program advisory council	
Authority to submit proposed rules and regulations for conduct of business to mayor and council, hold hearings and make recommendations on programming for education and local origination; actions deemed advisory	2-62-5
Duty to make recommendations on the programming for, and the coordination of, educational, governmental and local originated channels	2-62-2
Horse-drawn carriages	
Application for a carriage driver's training permit	6-1-22
Drivers and conductors	
Carriage driver's training permit, application for a	6-32-22
Tattoo establishments	
Permit	
Training in sterilization techniques and methods prerequisite to issuance	6-76-4
EDUCATION AND TRAINING (Cont'd.)	
Taxicabs	
Drivers and conductors	
Defensive driving school and taxi safety/courtesy course required	6-80-28
Vehicles and traffic	
Administration and enforcement	
When attendance of driver education course required—Additional penalty for benefit of driver education program	11-8-9
EGRESS. See: INGRESS, EGRESS	
ELDERLY PERSONS	
Aging commission of the mid-south	2-74-1 et seq.
See: AGING COMMISSION OF THE MID-SOUTH	
Property taxes	
Installment payment of taxes; attainment of age 65; special provisions; when due and payable	5-8-6
Tax relief to persons upon attainment of age 65	5-8-10
ELECTIONS	
1948 benefit plan	
Participation
