E. High Weeds. All premises and exterior property shall be maintained free from weeds in excess of twelve inches so as not to endanger the health, safety, and welfare of the citizens of the metropolitan government. "Weeds" shall be defined as all grasses, annual plants, and vegetation that grow without reasonable intent or purpose to cultivate, harvest, or use for human consumption, or are not otherwise trimmed or controlled. "Weeds" does not include ornamental grasses, trees, trimmed shrubs, or cultivated flowers and gardens. Subject to Section 13.12.190, natural landscaping may be allowed if an intentional design for vegetative growth is on file with and approved by both the metropolitan beautification commission horticulturalist and the Nashville Department of Transportation and Multimodal Infrastructure's chief traffic engineer or his/her designee. All government-owned greenways, parks, recreation areas, and the facilities or grounds of any department of the metropolitan government shall be exempt from the provisions of this section.

F. Rodent Harborage. All buildings, structures and exterior property shall be kept free from rodent harborage and infestation and conditions that promote or support rodent harborage and infestation. Where rodents are found, they shall be promptly exterminated by process that is approved and that is not injurious to human health. After extermination, proper precautions shall be taken to eliminate rodent harborage and prevent re-infestation.

G. Exhaust Vents. Exhaust pipes, ducts, conductors, fans, vents, or blowers shall not discharge gases, steam, vapor, hot air, grease, smoke, odors or other gaseous or particulate wastes directly upon abutting or adjacent public or private property or that of another tenant.

H. Accessory Structures. All accessory structures, including detached garages, fences and walls, shall be maintained structurally sound, in good repair, and in an otherwise safe, clean, and sanitary condition.

I. Gates. Gates which are required to be self-closing and self-latching, in accordance with the Building Code shall be maintained such that the gate will positively close and latch when released from a still position of six inches from the gatepost.

J. Swimming Pools. Swimming pools shall be maintained in a safe, clean, and sanitary condition, and in good repair.

K. Motor Vehicles.

1. Except as provided for in the zoning code, no inoperable or currently unregistered motor vehicle shall be openly parked or stored on any premises within the area of the metropolitan government. Furthermore, no vehicle shall be at any time in a state of major disassembly or disrepair, nor shall it be in the process of being stripped or dismantled, nor shall it undergo a major overhaul, including body work, on any private property within the area of the metropolitan government. This section shall not apply to a motor vehicle on the premises of a business enterprise involved solely in

the repair, renovation or servicing of motor vehicles, or a vehicle inside a structure or similarly enclosed area designed and approved for such purposes.

2. Except as provided in subsection K.1., the parking, storage, or accumulation of an inoperable or unregistered motor vehicle on any premises within the area of metropolitan government, the disassembly, stripping, dismantling, or major overhaul, including body work, of any motor vehicle, or the parking or storage of any motor vehicle in a state of major disrepair on any private property within the area of the metropolitan government, shall constitute a nuisance detrimental to the health, safety and welfare of the inhabitants of the area of the metropolitan government. It shall be the duty of the registered owner of the motor vehicle, the owner of record of the property, or the person in possession of the private property upon which the motor vehicle is located, to abate the nuisance through the removal of the motor vehicle from the area of the metropolitan government, or to have the motor vehicle stored inside a fully enclosed structure or similarly enclosed area designed and approved for such purposes.

3. Every motor vehicle located on private property shall be either stored inside a fully enclosed structure or similarly enclosed area designed and approved for such purposes, or parked or stored in a safe manner on a paved or graveled area, other than a sidewalk. For the purposes of this section, "paved or graveled area" includes, but is not limited to, parking areas which use asphalt, concrete, gravel, and pavers. Such paved or graveled area for private residential property shall not exceed twenty-five percent of the unimproved lot area. In any case where this provision is found to be in conflict with any provision included in Title 17, Zoning, of the metropolitan code of laws, the zoning provision shall prevail. This subsection shall not be applicable to any vehicle for which a valid disabled driver license plate or placard has been issued pursuant to Tennessee Code Annotated § 55-21-101, et seq., and is visibly displayed on or in the vehicle. Further, the provisions of this subsection shall not apply to the parking of automobiles during special events on property under the control of the metropolitan board of public education.

4. Painting of motor vehicles is prohibited unless conducted inside an approved spray booth.

5. Every motor vehicle parked or stored on a paved or graveled area of any residentially-zoned property pursuant to subsection K.3. of this section must contain an engine, radiator, hood, all doors, trunk lid, bumpers, fenders, four wheels with inflated tires, all windows, both front and rear windshields, a battery, a gas cap, and a complete exhaust system. An exception to citation for violation of this subsection shall be made if a vehicle is missing no more than two of the aforementioned parts.

6. Trucks. On any residential property containing a single-family or two-family home, no truck with a maximum axle-load capacity of more than one and one-half tons shall be stored or parked anywhere on the property.

7. Tractor-Trailers. On any residential property containing a single family or two-family home, no tractor-trailer (or portion thereof) shall be stored or parked anywhere on the property.

8. School Buses. On any property containing a single-family or two-family home, one school bus may be parked or stored on the property, provided the driver of the bus resides on the premises and the bus is operated by a private or public K—12 school or school system in Davidson County. No more than one school bus may be parked or stored on the property, regardless of the number of bus drivers residing on the premises.

9. Motor vehicles offered for sale on commercial property. No motor vehicle having a "for sale" sign displayed in or on the vehicle, or having any other conspicuous marking informing persons that the vehicle is for sale, may be parked in the parking area of any commercial property for more than twenty-four consecutive hours within a seven day period unless the person parking the vehicle has the written permission of the property owner or is an employee of a commercial establishment served by the parking area. All such motor vehicles parked for sale on commercial property within the permissible twenty-four consecutive hour period must have a valid state-issued license plate on the vehicle.

L. Except as otherwise provided in the metropolitan zoning code, fences shall be constructed using only the following materials:

1. Woven wire or chain link;

2. Wrought iron;

3. Wood, vinyl, steel, or aluminum slats of no more than one inch by six inches in width hung vertically, horizontally, or diagonally between steel, wood, or vinyl posts no further than ten feet apart;

4. Masonry consisting of brick, concrete block, split-face block, dry-stack stones, or stones and mortar;

5. Plastic or other synthetic material treated in a manner to maintain the fence in good structural condition and with an appearance that is aesthetically compatible with the type of fence it represents;

6. Decorative-type split rail or dry-stack stone may be used for decorative fences.

M. Metal fences shall consist of materials manufactured and/or treated in a manner to prevent rust or corrosion. Wood fences shall be painted, stained or preserved in a manner to maintain the fence in good structural condition. All fences shall be maintained in a manner to preserve the structural integrity and appearance of the fence, including, but not limited to, the replacement of broken boards or sections and preventing paint from peeling.

N. The provisions of subsections L and M shall not apply to temporary construction fencing, temporary tree protection fencing, temporary festival fencing, fencing around a place of incarceration, or to any fence located on property in the AR, AG, R80 or RS80 zoning districts as designated on the official zoning map of the metropolitan government.

O. Barbed wire and razor wire fencing shall be prohibited in all residential zoning districts unless the property satisfies all of the requirements of Section 17.16.330 of the metropolitan zoning code regarding the keeping of domestic animals/wildlife on the property and all necessary permits have been issued.

P. Trailers and Watercraft. No trailer or watercraft located on Private single family or two-family residential property shall be stored in the front yard of the property, but shall be stored on a paved or graveled driveway, or behind the front facade of the residential structure. For purposes of this subsection the following definitions shall apply: "Trailer" means every non-motorized vehicle drawn by a motor vehicle designed for carrying or transporting persons or property. "Watercraft" means every vessel used or capable of being used as a means of transporting persons on water, including motorized and non-motorized devices. All watercraft must be fully operational and, if such watercraft is equipped with a motor that is twenty-five horsepower (25HP) in size or greater, such watercraft must have affixed thereto a current registration issued by the Tennessee Wildlife Resources Agency.

Q. Wood Chips/Mulch. No owner or occupant of any parcel of property one-half acre in size or greater shall permit more than five percent of the lot area to be covered with wood chips/mulch. Piles or mounds of wood chips/mulch placed within this five percent lot area limitation shall not exceed two feet in height. This subsection shall not apply to commercial establishments engaged in the sale of wood chips/mulch, nor to any government-owned property used for the collection and/or sale of mulch.

R. Mulch, as used in this section, means any nonliving, organic, or synthetic material which is customarily used in landscape design to prevent erosion, regulate temperature, or maintain soil moisture.

S. Intermodal Containers. On any property zoned R or RS, no intermodal container, including but not limited to general-purpose shipping containers, garmentainers, and/or hard or soft-open topped bulk containers, shall be kept for storage purposes anywhere on the property for longer than ninety days.

T. Fences.

1. Electric fences are permitted only if compliant with the following requirements:

a. In AG, AR2a, RS80, RS40, RS30, RS20, R80, R40, R30, and R20 zoning districts, electric fences are permitted if the property satisfies all of the requirements of Section 17.16.330.B of the metropolitan zoning code regarding the keeping of domestic animals/wildlife on the property and all necessary permits have been issued; or

b. In all non-residential zoning districts, the construction and use of electric fences are permitted, subject to the following standards:

(i) Electrification:

(a) The energizer for electric fences must be driven by a commercial storage battery not to exceed 12 volts DC. The storage battery is charged primarily by a solar panel. However the solar panel may be augmented by a commercial trickle charger.

(b) The electric charge produced by the fence upon contact shall not exceed energizer characteristics set forth in paragraph 22.108 and depicted in Figure 102 of International Electro technical Commission (IEC) Standard No. 60335-2-76 (as attached to BL2017-688).

(ii) Perimeter fence or wall: No electric fence shall be installed or used unless completely surrounded by a non-electrical fence or wall not less than six feet in height.

(iii) Location: Electric fences shall be permitted on any non-residential outdoor storage areas.

(iv) Height: Electric fences shall not exceed the maximum height permitted by Title 17 of the Metro Code of Laws.

(v) Warning signs: Electric fences shall be clearly identified with warning signs that read: "Warning-Electric Fence" at intervals of not less than thirty linear feet.

(vi) Accessibility: A Knox Box or similar device used to hold access keys for fire departments, police departments and emergency medical services shall be installed for purposes of minimizing damage and to allow access to the enclosed area. Installation may be subject to the oversight and direction of the Nashville Fire Department.

2. In all zoning districts, no fence otherwise permitted under this code shall be erected with barbs or sharp projections on top of such fence, unless it is five feet or

more from a property line or more than seven feet above grade and projecting inward, provided that the following two exceptions shall apply:

a. In all residential zoning districts, barbed wire and razor wire fencing shall be prohibited unless the property satisfies all of the requirements of Section 17.16.330 of the metropolitan zoning code regarding the keeping of domestic animals/wildlife on the property and all necessary permits have been issued.

b. In non-residential zoning districts, the use of barbed or razor wire below seven feet on a fence along any property line is prohibited, unless erected to contain animals under the conditions set forth in subsection T.2.a above. If a fence is erected along any sidewalk in the urban services district, no more than a single strand of barbed wire may be placed on the top of the fence over seven feet high.

c. Within the Urban Zoning Overlay District (UZO), barbed wire and razor wire fencing shall be prohibited along arterial and collector roadways as defined by the adopted Major & Collector Street Plan; provided, that this section shall not be construed to prevent anyone from stretching a single strand of barbed wire on the top of any fence over seven feet high to prevent anyone from climbing over the same.

d. Within the Urban Services District, barbed wire and razor wire fencing along sidewalks shall be further regulated by Metropolitan Code Section 13.32.120.

3. Except as otherwise provided in the metropolitan zoning code, fences shall be constructed using only the following materials:

a. Woven wire or chain link;

b. Wrought iron;

c. Wood, vinyl, steel, or aluminum slats of no more than one inch by six inches in width hung vertically, horizontally, or diagonally between steel, wood, or vinyl posts no further than ten feet apart;

d. Masonry consisting of brick, concrete block, split-face block, dry-stack stones, or stones and mortar;

e. Plastic or other synthetic material treated in a manner to maintain the fence in good structural condition and with an appearance that is aesthetically compatible with the type of fence it represents;

f. Decorative-type split rail or dry-stack stone may be used for decorative fences.

4. Metal fences shall consist of materials manufactured and/or treated in a manner to prevent rust or corrosion. Wood fences shall be painted, stained or preserved in a manner to maintain the fence in good structural condition. All fences shall be maintained in a manner to preserve the structural integrity and appearance of the fence, including, but not limited to, the replacement of broken boards or sections and preventing paint from peeling.

5. The provisions of subsections T.3 and T.4 of this section shall not apply to temporary construction fencing, temporary tree protection fencing, temporary festival fencing, fencing around a place of incarceration, or to any fence located on property in the AR, AG, R80 or RS80 zoning districts as designated on the official zoning map of the metropolitan government.

6. Fences shall be constructed in such a manner so that all fence cross beams and cross bracing shall face the interior of the property, and shall not be oriented toward the street or an adjacent property.

7. Fences shall be constructed according to the visibility requirements in Section 17.20.180 of the metropolitan zoning code.

U. Holiday Lights and Decorations. Holiday lights and decorations shall be permitted in exterior property areas. Such lights and decorations shall be maintained in good, functional condition and shall not impede any ingress or egress to the property or any structures upon the property. (Ord. BL2025-1071 § 1, 2025; Amdts. 1, 2 to Ord. BL2025-1048 § 2, 2025; Ord. BL2025-1048 § 2, 2025; Amdt. 1 to Ord. BL2025-995 § 3, 2025; Ord. BL2025-995 § 3, 2025; Ord. BL2021-795 § 1, 2021; Amdt. 1 to Ord. BL2020-388 § 1, 2020; Ord. BL2020-388 § 1, 2020; Ord. BL2018-1256 § 2, 2018; Ord. BL2016-463 § 1, 2016; Amdt. 1 to Ord. BL2015-1280 § 1, 2015; Ord. BL2015-1280 § 1, 2015; Amdt. 1 to Ord. BL2014-819 § 2, 2014; Ord. BL2014-819 § 2, 2014; Amdt. 1 to Ord. BL2013-552 § 1, 2013; Ord. BL2013-552 § 1, 2013; Amdt. 1 to Ord. BL2010-735 § 1; Ord. BL2010-735 § 1, 2010; Ord. BL2010-651 § 1, 2010; Ord. BL2008-216, § 1, 10-6-2009; Ord. BL2007-1436 § 1, 2007; Ord. BL2006-1187 § 1, 2006; Ord. BL2005-727 § 1, 2005; Ord. BL2005-505 § 3, 2005; Ord. BL2004-427 § 2, 2004; Amdt. 1 with Ord. BL2004-346 § 1, 2004; Amdt. 1 with Ord. 2002-1052 § 1, 2002; Ord. BL2001-585 § 1 (part), 2001)

Editor's note—It should be noted that Ord. BL2013-552 § 2 states: It is the intent of the Metropolitan Council that revenues derived from fines assessed for violations of this ordinance [section] be allocated to the Department of Codes Administration to offset a portion of the costs associated with enforcing the ordinance [section].

16.24.340 Exteriors of buildings and structures.

A. General. The exterior of a building or structure shall be maintained in good repair, structurally sound, and in a clean and sanitary condition so as not to pose a threat to the public health, safety, or welfare.

B. Protective Treatment. All exterior surfaces, including but not limited to, doors, door and window frames, cornices, porches, trim, balconies, decks and fences shall be maintained in good condition. Exterior wood surfaces, other than decay resistant woods, shall be protected from the elements and decay by painting or other protective covering or treatment. Peeling, flaking, and or chipped paint shall be eliminated and the underlying surfaces shall be protected from the elements and decay by paint or other protective covering or treatment. All siding and masonry joints, as well as those between the building envelope and the perimeter of windows, doors, and skylights, shall be maintained weather resistant and water tight. All metal surfaces subject to rust or corrosion shall be coated to inhibit such rust and corrosion and all surfaces with rust or corrosion shall be stabilized and coated to inhibit future rust and corrosion. Oxidation stains shall be removed from exterior surfaces. Surfaces designed for stabilization by oxidation are exempt from this requirement.

C. Premises Identification. All buildings and structures within Metropolitan Nashville and Davidson County shall have approved address numbers posted in accordance with following:

1. Residences are to have their numbers displayed on a contrasting background and in a position to be plainly visible and legible from the street or road fronting the property. The numbers may be attached to the residence or attached to the mailbox, provided the mailbox is next to the street.

2. Numbers posted on the outside of nonresidential buildings must be six inches, or larger, on a contrasting background, and in a position to be plainly visible and legible from the street or road fronting the premises. Numbers posted on interior doors or spaces (such as a lease space in a mall) must be at least three inches in size.

3. Multifamily buildings shall have their numbers displayed to be plainly visible and legible, on a contrasting background, and a minimum size of six inches in height. Identifying numbers, at least three inches in height shall also be posted on or at the doors of individual dwelling units.

D. Structural Members. All structural members shall be maintained free from deterioration, and shall be capable of safely supporting the imposed dead and live loads.

E. Foundation Walls. All foundation walls shall be maintained plumb and free from open cracks and breaks and shall be kept in such condition so as to prevent the entry of rodents and other pests.

F. Exterior Walls. All exterior walls shall be free from holes, breaks, and loose or rotting materials, and shall be maintained weatherproof and properly surface coated where required to prevent deterioration.

G. Roofs and Drainage. The roof and flashing shall be sound, tight, and not have defects that admit rain. Roof drainage shall be adequate to prevent dampness or deterioration in the walls or interior portion of the building or structure. Roof drains, gutters, and downspouts shall be maintained in good repair and free from obstructions. Roof water shall not be discharged in a manner that creates a public nuisance.

H. Decorative Features. All cornices, belt courses, corbels, terra cotta trim, wall facings and similar decorative features shall be maintained in good repair with proper anchorage and in a safe condition.

I. Overhang Extensions. All overhang extensions including, but not limited to canopies, marquees, signs, metal awnings, fire escapes, standpipes, and exhaust ducts shall be maintained in good repair and shall be properly anchored so as to be in a sound condition. When required, all exposed surfaces of metal or wood shall be protected from the elements and against decay or rust by periodic application of weather-coating materials, such as paint or other appropriate surface treatment.

J. Stairways, Decks, Porches and Balconies. Every exterior stairway, deck, porch, and balcony, and all appurtenances attached thereto, shall be maintained structurally sound, in good repair, with proper anchorage, and shall be capable of supporting the imposed loads.

K. Chimneys and Towers. All chimneys, cooling towers, smoke stacks, and similar appurtenances shall be maintained structurally safe and sound, and in good repair. All exposed surfaces of metal or wood shall be protected from the elements, decay, and or rust by periodic application of appropriate weather coating materials, such as paint or similar surface treatment.

L. Handrails and Guards. Every handrail and guard shall be firmly fastened and capable of supporting normally imposed loads and shall be maintained in good condition.

M. Window, Skylight and Door Frames. Every window, skylight, door and frame shall be kept in sound condition, good repair, and weather tight.

N. Glazing. All glazing materials shall be maintained free from cracks and holes.

O. Openable Windows. Every window, other than a fixed window, shall open and close easily and shall be capable of being held in either position by window hardware.

P. Insect Screens. During the period from April 1st to November 1st, every door, window and other outside opening required for ventilation of habitable rooms, food preparation areas, food service areas, or any areas where products to be included or utilized in food for human consumption are processed, manufactured, packaged or stored, shall be supplied with approved tightly fitting screens of not less than sixteen mesh per inch and every swinging door shall have a self-closing device in good working condition. Exceptions:

1. Screen doors shall not be required where other approved means, such as air curtains or insect repellent fans are employed;

2. Residential units having approved central heating, ventilation and air conditioning systems.

Q. Doors. All exterior doors, door assemblies, and hardware shall be maintained in good condition. Locks at all entrances to dwelling units, rooming units and guestrooms shall tightly secure the door. Locks on means of egress doors shall be in accordance with the requirements of Section 16.24.530 as follows: All means of egress doors shall be readily openable from the side from which egress is to be made without the need for keys or special knowledge, tools, or effort, except where the door conforms to that permitted by the building code.

R. Basement Hatchways. Basement hatchways, bulkhead enclosures, and crawl space access doors shall be maintained to prevent the entrance of rodents, rain, and surface drainage water.

S. Guards for Basement Windows. Every basement or cellar window, that is openable, shall be supplied with screens of standard-size mesh, or other approved protection against the entry of rodents.

T. Defacement of Property. No person shall willfully or wantonly damage, mutilate, or deface any exterior surface of any building or structure, located on any private or public property, by placing thereon any marking, carving, or graffiti. It shall be the duty of the owner of the building, structure, and or real property on which the building or structure is located to restore said surface to an approved state of maintenance and repair.

U. Boarding of Vacant Buildings.

1. Whenever the director of the department of codes administration shall deem a vacant building or structure to be unsafe, or considered a hazard to the public health, safety or welfare, the director may order such building or structure to be locked, boarded or otherwise secured. Every person owning or having control of such vacant building or structure shall lock, board or otherwise secure all windows, doors and openings on the ground floor of the building to restrict entry by unauthorized persons.

2. A vacant building that is boarded shall be boarded by using a minimum of three-eighths inch plywood, OSB, composite board or equivalent. Any board placed on a vacant building shall be painted a color that is consistent with the color of the structure using exterior grade paint, and shall be cut to fit into any windows, doors or other openings on such vacant building. Such boards shall be painted within fifteen days of being affixed to the structure. The director of the department of codes administration shall have the authority to waive the aesthetic requirements of this subsection U.2. in the event of a natural disaster or in the interest of public safety.

V. Holiday Lights and Decorations. Holiday lights and decorations shall be permitted on the exterior of buildings and structures. Such lights and decorations shall be maintained in good, functional condition and shall not impede any ingress or egress to the building or structure upon which the lights and decorations are placed. (Ord. BL2025-1071 § 2, 2025; Ord. BL2015-1015 § 1, 2015; Amdt. 1 to Ord. BL2007-40 § 1, 2008; Ord. BL2007-40 § 1, 2008; Ord. BL2001-585 § 1 (part), 2001)

16.24.350 Interiors of buildings and structures.

A. General. The interior of a building or structure and any equipment therein shall be maintained in good repair, structurally sound, and in an otherwise clean and sanitary condition. Occupants shall keep that part of the building or structure that they occupy or control in a clean and sanitary condition. Every owner of a building or structure containing a rooming house, a hotel, a dormitory, two or more dwelling units, or two or more nonresidential occupancies, shall maintain, in a clean and sanitary condition, the shared or public areas of the structure and exterior property.

B. Structural Members. All structural members shall be structurally sound and capable of supporting the imposed loads.

C. Interior Surfaces. All interior surfaces, including windows and doors, shall be maintained in good, clean and sanitary condition. Peeling, chipping, flaking, or abraded paint shall be repaired, removed, or covered. Cracked or loose plaster, decayed wood, and other defective surface conditions shall be corrected.

D. Stairs and Walking Surfaces. Every stair, ramp, landing, balcony, porch, deck or other walking surface shall be maintained in sound condition and in good repair.

E. Handrails and Guards. Every handrail and guard shall be firmly fastened and capable of supporting normally imposed loads and shall be maintained in good condition.

F. Interior Doors. Every interior door shall fit reasonably well within its frame and shall be capable of being opened and closed by being properly and securely attached to jambs, headers, or tracks as intended by the manufacturer of the attachment hardware. (Ord. BL2001-585 § 1 (part), 2001)

16.24.360 Rubbish and garbage.

All exterior property and premises, and the interior of every building and structure, shall be free from any accumulation of rubbish, garbage, and debris.

A. Disposal of Rubbish. Every owner or occupant of a structure shall dispose of all rubbish in a clean and sanitary manner by placing such rubbish in approved containers.

B. Rubbish Storage Facilities. The owner of every occupied premises shall supply approved covered containers for rubbish and shall be responsible for the clean and sanitary removal and disposal of all rubbish.

C. Disposal of Garbage. Every occupant of a building or structure shall dispose of garbage in a clean and sanitary manner by placing such garbage in an approved garbage disposal facility or in approved garbage containers.

D. Garbage Facilities. The owner of every dwelling shall supply one of the following: An approved mechanical food waste grinder in each dwelling unit; an approved incinerator unit in the structure available to the occupants in each dwelling unit; or an approved leak-proof, covered, outside garbage container accessible and sufficient in capacity to serve each dwelling unit.

E. Containers. The operator of every establishment producing garbage shall provide, approved leak proof containers with close-fitting covers for the storage of such materials, and shall cause said containers to be utilized at all times. All rubbish and garbage storage facilities and containers shall be provided and handled in such manner as may be prescribed by the rules and regulations of the department of public works and the metropolitan health department. (Ord. BL2001-585 § 1 (part), 2001)

16.24.370 Extermination.

All structures shall be kept free from insect and rodent infestation. Approved extermination processes that are not injurious to human health shall be promptly employed to rid any building or structure in which insects or rodents are found. After extermination, proper precautions shall be taken to prevent re-infestation.

A. Owner. The owner of any building or structure shall be responsible for extermination within the building or structure, or part thereof, prior to renting or leasing the building or structure, or part thereof.

B. Single Occupant. The occupant of a one-family dwelling or of a single-tenant nonresidential structure shall be responsible for extermination on the premises.

C. Multiple Occupancy. The owner of a building or structure containing two or more dwelling units, a multiple occupancy, a rooming house, or a nonresidential building or structure shall be responsible for extermination in the public or shared areas of the building or structure and exterior property. If infestation is caused by failure of an occupant to prevent such infestation in the area occupied by said occupant, the occupant shall be responsible for extermination.

D. Occupant. The occupant of any building or structure shall be responsible for the continued rodent and pest-free condition of the structure.

EXCEPTION: Where the infestations are caused by defects in the structure, the owner shall be responsible for extermination. (Ord. BL2001-585 § 1 (part), 2001)

16.24.380 Light.

A. Habitable Spaces. In residential occupancies, every habitable space shall have at least one window of approved size facing directly to the outdoors or to a court. The minimum total glazed area for every habitable space shall be eight percent of the floor area of such room. Wherever a wall or other obstructions face a window of a habitable space and such obstruction is located less than three feet from the window and extends to a level above that of the ceiling of the habitable space, such window shall not be deemed to face directly to the outdoors nor to a court and shall not be included as contributing to the required minimum total window area for the habitable space.

EXCEPTION: Where natural light for rooms or spaces without exterior glazing areas is provided through an adjoining room, the unobstructed opening to the adjoining room shall be at least eight percent of the floor area of the interior room or space, but not less than twenty-five square feet. The exterior glazing area shall be based on the total floor area being served.

B. Common Halls and Stairways. Every common hall and stairway in residential occupancies, other than in one- and two-family dwellings, shall be lighted at all times with at least a sixty watt standard incandescent light bulb or an equivalent compact fluorescent light (CFL), light emitting diode (LED), or other form of lighting of equal illumination for each two hundred square feet of floor area of said common hall or stairway, provided that the spacing between lights shall not be greater than thirty feet. In other than residential occupancies, means of egress, including exterior means

of egress stairways, shall be illuminated at all times with a minimum of one foot candle at floors, landings, and treads.

C. Other Spaces. All other spaces in residential and nonresidential buildings and structures shall be provided with natural or artificial light sufficient to permit the maintenance of sanitary conditions, the safe occupancy thereof, and the safe utilization of the appliances, equipment, and fixtures. (Ord. BL2010-652 § 1, 2010; Ord. BL2001-585 § 1 (part), 2001)

16.24.390 Ventilation.

A. Habitable Spaces. In dwelling units, every habitable space shall have at least one openable window. The total openable area of the window in every room shall be equal to at least forty-five percent of the minimum glazed area required in Section 16.24.380, above.

EXCEPTION: Where rooms and spaces without openings to the outdoors are ventilated through an adjoining room, the unobstructed opening to the adjoining room shall be at least eight percent of the floor area of the interior room or space, but not less than twenty-five square feet. The ventilation openings to the outdoors shall be based on a total floor area being ventilated.

B. Bathrooms and Toilet Rooms. Every bathroom and toilet room shall comply with the ventilation requirements for habitable spaces as required above, except that a window shall not be required in such spaces equipped with a mechanical ventilation system of sufficient capacity to provide at least one complete air change each six minutes. Air exhausted by a mechanical ventilation system from a bathroom or toilet room shall discharge to the outdoors and shall not be recirculated.

C. Cooking Facilities. Unless approved through the certificate of occupancy, cooking shall not be permitted in any rooming unit or dormitory unit, and a cooking facility or appliance shall not be permitted to be present in a rooming unit or dormitory unit.

EXCEPTION: Where specifically approved in writing by the director.

D. Process Ventilation. Where injurious, toxic, irritating or noxious fumes, gases, dusts, or mists are generated, a local exhaust ventilation system shall be provided to remove the contaminating agent at the source. Air shall be exhausted to the exterior and not be recirculated to any interior space.

E. Clothes Dryer Exhaust. Systems to manage exhaust from clothes dryers shall be independent of all other systems and shall be installed in accordance with the manufacturer's instructions. (Ord. BL2001-585 § 1 (part), 2001)

16.24.400 Occupancy limitations.

A. Privacy. Dwelling units, hotel units, rooming units, and dormitory units shall be arranged to provide privacy and be separate from other adjoining spaces.

B. Minimum Room Widths. A habitable space, other than a kitchen, shall not be less than seven feet in any plan dimension. Kitchens shall have a clear passageway of not less than three feet between counter fronts and appliances or counter fronts and walls.

C. Minimum Ceiling Heights. Habitable spaces, hallways, corridors, laundry areas, bathrooms, toilet rooms and habitable basement areas shall have a clear ceiling height of not less than seven feet. Exceptions:

1. In one- and two-family dwellings, beams or girders spaced not less than four feet on center and projecting not more than six inches below the required ceiling height.

2. Basement rooms in one- and two-family dwellings occupied exclusively for laundry, study, or recreation purposes, having a ceiling height of not less than six feet eight inches and not less than six feet four inches of clear height under beams, girders, ducts and similar obstructions.

3. Rooms occupied exclusively for sleeping, study or similar purposes and having a sloped ceiling over all or part of the room, with a clear ceiling height of at least seven feet over not less than one-half of the required minimum floor area. In calculating the floor area of such rooms, only those portions of the floor area with a clear ceiling height of five feet or more shall be included.

D. Bedroom Requirements. Every bedroom shall comply with the requirements of Sections 16.24.400(E) through 16.24.400(I).

E. Area for Sleeping Purposes. Every bedroom occupied by one person shall contain at least seventy square feet of floor area, and every bedroom occupied by more than one person shall contain at least fifty square feet of floor area for each occupant thereof.

F. Access from Bedrooms. Bedrooms shall not constitute the only means of access to other bedrooms or habitable spaces and shall not serve as the only means of egress from other habitable spaces.

Exception: Units that contain fewer than two bedrooms.

G. Water Closet Accessibility. Every bedroom shall have access to at least one water closet and one lavatory without passing through another bedroom. Every bedroom in a dwelling unit shall have access to at least one water closet and lavatory located in the same story as the bedroom or an adjacent story.

H. Prohibited Occupancy. Kitchens and nonhabitable spaces shall not be used for sleeping purposes.

I. Other Requirements. Bedrooms shall comply with the applicable provisions of this chapter including, but not limited to, the light, ventilation, room area, ceiling height and room width requirements; the plumbing facilities and water-heating facilities requirements; the heating facilities, electrical receptacle requirements; and the smoke detector and emergency escape requirements.

J. Overcrowding. Dwelling units shall not be occupied by more occupants than are permitted by the minimum area requirements of Table 16.24.400.

Table 16.24.400
MINIMUM AREA REQUIREMENTS

SPACE	MINIMUM AREA IN SQUARE FEET		
	1—2 occupants	3—5 occupants	6 or more occupants
Living Room	No requirements[a, b]	120	150
Dining Room	No requirements[a, b]	80	100
Kitchen	50	50	60
Bedrooms	Shall comply with Section 16.24.400(E).		

a. See Section 16.24.400(L) for combined living room/dining room spaces.
b. See Section 16.24.400(K) for limitations on determining the minimum occupancy area for sleeping purposes.

K. Sleeping Area. The minimum occupancy area required by Table 16.24.400 shall not be included as a sleeping area in determining the minimum occupancy area for sleeping purposes. All sleeping areas shall comply with Section 16.24.400(D).

L. Combined Spaces. Combined living room and dining room spaces shall comply with the requirements of Table 16.24.400 if the total area is equal to that required for separate rooms and if the space is located so as to function as a combination living room and dining room.

M. Efficiency Unit. Nothing in this section shall prohibit an efficiency living unit from meeting the following requirements:

1. An efficiency living unit occupied by not more than two occupants shall have a clear floor area of not less than two hundred and twenty square feet. A unit occupied by three occupants shall have a clear floor area of not less than three hundred and twenty square feet. These required areas shall be exclusive of the areas required by subsections (M)(2) and (M)(3) of this section.

2. An efficiency living unit shall be provided with a kitchen sink, cooking appliance, and refrigeration facilities, each having a clear working space of not less than thirty inches in front. Light and ventilation shall be provided in conformance with this chapter.

3. An efficiency living unit shall be provided with a separate bathroom containing a water closet, lavatory, and bathtub or shower.

4. An efficiency living unit shall have a maximum number of occupants of three.

N. Food Preparation. All spaces to be occupied for food preparation purposes shall contain suitable space and equipment to store, prepare and serve foods in a sanitary manner. There shall be adequate facilities and services for the sanitary disposal of food wastes and refuse, including facilities for temporary storage. (Ord. BL2001-585 § 1 (part), 2001)

16.24.410 Plumbing fixtures and fixture requirements.

A. Dwelling Units. Every dwelling unit shall contain a bathtub or shower, lavatory, water closet, and kitchen sink which shall be maintained in a sanitary, safe working condition. The lavatory shall be placed in the same room as the water closet or be located in close proximity to the door leading directly into the room in which such water closet is located. A kitchen sink shall not be used as a substitute for the required lavatory.

B. Rooming Houses. At least one water closet, lavatory, and bathtub or shower shall be supplied for each four rooming units in a rooming house.

C. Hotel. Where private water closets, lavatories, and baths or showers are not provided, one water closet, one lavatory, and one bathtub or shower having access from a public hallway shall be provided for each ten occupants of any hotel.

D. Employee Facilities. A minimum of one water closet, one lavatory, and one drinking facility shall be available to employees. Drinking facilities shall be a drinking fountain, water cooler, bottled water cooler, or disposable cups next to a sink or water dispenser. Drinking facilities shall not be located in toilet rooms or bathrooms. (Ord. BL2001-585 § 1 (part), 2001)

16.24.420 Toilet rooms.

A. Privacy. Toilet rooms and bathrooms shall provide privacy and shall not constitute the only passageway to a hall, other space, or to the exterior. A door and interior locking device shall be provided for all common or shared bathrooms and toilet rooms in a multiple dwelling.

B. Location. Toilet rooms and bathrooms serving hotel units, rooming units, or dormitory units, shall have access by traversing not more than one flight of stairs and shall have access from a common hall or passageway.

C. Location of Employee Toilet Facilities. Toilet facilities for employee use shall have access from within the employees' regular working area. Required toilet facilities shall be located not more than one story above or below the employees' regular working area and the path of travel to such facilities shall not exceed a distance of five hundred feet. Employee facilities shall either be separate facilities or public customer facilities.

Exception: Facilities that are required for employees in storage structures or kiosks, which are located in adjacent structures under the same ownership, lease or control, shall not exceed a travel distance of five hundred feet from the employees' regular working area to the facilities. (Ord. BL2001-585 § 1 (part), 2001)

16.24.430 Plumbing systems and fixtures—General.

A. General. All plumbing fixtures shall be properly installed and maintained in working order, shall be kept free from obstructions, leaks and defects, and shall be capable of performing the function for which such plumbing fixtures are designed. All plumbing fixtures shall be maintained in a safe, sanitary and functional condition.

B. Fixture Clearances. All plumbing fixtures shall have adequate clearances for usage and cleaning.

C. Plumbing System Hazards. Where it is found that a plumbing fixture or system in a building, structure, or premises constitutes a hazard to the occupants or the building, structure, or premises by reason of inadequate service, inadequate venting, cross connection, back siphonage, improper installation, deterioration, damage, or for similar reasons, the director shall require the defects to be corrected to eliminate the hazard. (Ord. BL2001-585 § 1 (part), 2001)

16.24.440 Water system.

A. General. Every sink, lavatory, bathtub or shower, drinking fountain, water closet, or other plumbing fixture shall be properly connected to either a public water system or to an approved private water system. All kitchen sinks, lavatories, laundry facilities, bathtubs, and showers shall be supplied with hot or tempered and cold running water in accordance with the plumbing code.

B. Contamination. The water supply shall be maintained free from contamination and all water inlets for plumbing fixtures shall be located above the flood-level rim of the fixture. Shampoo basin faucets, janitor sink faucets, and other hose bibs or faucets to which hoses are attached and left in place shall be protected by an approved atmospheric-type vacuum breaker or an approved permanently attached hose connection vacuum breaker.

C. Supply. The water supply system shall be installed and maintained to provide a supply of water to plumbing fixtures, devices, and appurtenances in sufficient volume and at pressures adequate to enable the fixtures to function properly, safely, and free from defects and leaks.

D. Water Heating Facilities. Water heating facilities shall be properly installed and maintained, and shall provide an adequate amount of water to be drawn at every required sink, lavatory, bathtub, shower, and laundry facility at a temperature of not less than one hundred twenty degrees Fahrenheit. A gas-burning water heater shall not be located in any bathroom, toilet room, bedroom, or other occupied room normally kept closed, unless adequate combustion air is provided. An approved combination temperature and pressure-relief valve and relief valve discharge pipe shall be properly installed and maintained on water heaters. (Ord. BL2001-585 § 1 (part), 2001)

16.24.450 Sanitary drainage system.

A. General. All plumbing fixtures shall be properly connected to either a public sewer system or to an approved private sewage disposal system.

B. Maintenance. Every plumbing stack, vent, and waste and sewer line shall function properly and be kept free from obstructions, leaks, and defects. (Ord. BL2001-585 § 1 (part), 2001)

16.24.460 Reserved.

16.24.470 Heating facilities.

A. Facilities Required. Heating facilities shall be provided in buildings and structures as required by this section.

B. Residential Occupancies. Dwellings shall be provided with heating facilities capable of maintaining a room temperature of sixty-five degrees Fahrenheit in all habitable rooms, bathrooms, and toilet rooms based on a winter outdoor design temperature of fourteen degrees

Fahrenheit, in accordance with Appendix D of the 2000 Edition of the Standard Plumbing Code. Cooking appliances shall not be used to provide space heating to meet the requirements of this section.

C. Heat Supply. Every owner, lessee, or operator of any building or structure who rents, leases, or lets one or more dwelling units, rooming units, dormitory rooms, or guestrooms on terms, either expressed or implied, to furnish heat to the occupants thereof shall supply heat during the period from October 1st to April 30th to maintain a temperature of not less than sixty-five degrees Fahrenheit in all habitable rooms, bathrooms, and toilet rooms.

Exception: When the outdoor temperature is below the winter outdoor design temperature for the locality, maintenance of the minimum room temperature shall not be required provided that the heating system is operating at its full design capacity.

D. Occupiable Work Spaces. Indoor occupiable work spaces shall be supplied with heat during the period from October 1st to April 30th to maintain a temperature of not less than sixty-five degrees Fahrenheit, when the spaces are occupied. Exceptions:

1. Processing, storage, and operation areas that require cooling or special temperature conditions;

2. Areas in which persons are primarily engaged in vigorous physical activities.

E. Room Temperature Measurement. Required room temperatures shall be measured three feet above the floor at a point near the center of the room and at points two feet inward from the center of each exterior wall. (Ord. BL2001-585 § 1 (part), 2001)

16.24.480 Mechanical equipment.

A. Mechanical Appliances. All mechanical appliances, fireplaces, solid fuel-burning appliances, cooking appliances, and water heating appliances shall be properly installed and maintained in a safe working condition and shall be capable of performing the intended function.

B. Removal of Combustion Products. All fuel-burning equipment and appliances shall be connected to an approved chimney or vent.

Exception: Fuel-burning equipment and appliances that are labeled by the manufacturer for ventless operation.

C. Clearances. All required clearances from any mechanical equipment to combustible materials shall be maintained.

D. Safety Controls. All safety controls for fuel-burning equipment shall be maintained in effective operation.

E. Combustion Air. A supply of air for complete combustion of the fuel and for adequate and safe ventilation of the space containing the fuel-burning equipment shall be provided for the fuel-burning equipment.

F. Energy Conservation Devices. Devices intended to reduce fuel consumption by attachment to a fuel-burning appliance, to the fuel supply line thereto, or to the vent outlet or vent piping system therefrom, shall not be installed unless labeled by for such purpose and the installation is specifically approved. (Ord. BL2001-585 § 1 (part), 2001)

16.24.490 Electrical facilities.

A. Facilities Required. Every occupied building or structure shall be provided with an electrical system in compliance with the requirements of this section and Section 16.24.530.

B. Service. Service to a dwelling unit shall be a minimum of one hundred ampere, with three-wire capacity and service equipment shall be dead-front, having no live parts exposed whereby accidental contact could be made. Type "S" fuses shall be installed when fused equipment is used.

Exception: Existing service of sixty ampere, three-wire capacity, and feeders of thirty ampere or larger two-or-three-wire capacity shall be accepted if adequate for the electrical load being served.

C. Electrical System Hazards. Where it is found that the electrical system in a building or structure constitutes a hazard to the occupants or the building or structure by reason of inadequate service, improper fusing, insufficient receptacle and lighting outlets, improper wiring or installation, deterioration, damage, or for similar reasons, the director shall require the defects to be corrected to eliminate the hazard. (Ord. BL2001-585 § 1 (part), 2001)

16.24.500 Electrical equipment.

A. Installation. All electrical equipment, wiring, and appliances shall be properly installed and maintained in a safe and approved manner.

B. Receptacles. Every habitable space in a dwelling shall contain at least two separate and remote receptacle outlets. Every laundry area shall contain at least one grounded-type receptacle or a receptacle with a ground fault circuit interrupter. Every bathroom shall contain at least one receptacle. Any new bathroom receptacle outlet shall have ground fault circuit interrupter protection.

C. Lighting Fixtures. Every public hall, interior stairway, toilet room, kitchen, bathroom, laundry room, boiler room, and furnace room shall contain at least one

electric lighting fixture. (Ord. BL2001-585 § 1 (part), 2001)

16.24.510 Elevators, escalators and dumbwaiters.

A. General. Elevators, dumbwaiters, and escalators shall be maintained to sustain safely all imposed loads, to operate properly, and to be free from physical and fire hazards. The most current certificate of inspection shall be on display at all times within any elevator or shall be attached to the escalator or dumbwaiter; or the certificate shall be available for public inspection in the office of the building or structure operator.

B. Elevators. In buildings equipped with passenger elevators, at least one elevator shall be maintained in operation at all times when the building is occupied.

Exception: Buildings equipped with only one elevator shall be permitted to have the elevator temporarily out of service for testing or servicing. (Ord. BL2001-585 § 1 (part), 2001)

16.24.520 Duct systems—General.

Duct systems shall be maintained so as to be free of obstructions and capable of performing their required function. (Ord. BL2001-585 § 1 (part), 2001)

16.24.530 Fire safety requirements—Means of egress.

A. General. A safe, continuous, and unobstructed means of egress shall be provided from any point in a building or structure to the public way, in accordance with the requirements of the building code and fire code as adopted by the metropolitan government.

B. Emergency Escape and Rescue Openings. Basements with habitable rooms and every sleeping room shall have at least one openable emergency escape and rescue window or exterior door opening. Where openings are provided as a means of escape and rescue, they shall have a sill height of not more than forty-four inches. The net clear opening dimension required by this chapter shall be obtained by the normal operation of the window or door opening from the inside. Escape and rescue window openings with a sill height below the adjacent ground level shall be provided with an approved window well.

C. Minimum Net Clear Opening. All emergency escape and rescue openings shall have a minimum net clear opening of four square feet.

D. Minimum Net Clear Opening Height. All emergency escape and rescue openings shall have minimum net clear opening height twenty-four inches.

E. Minimum Net Clear Opening Width. All emergency escape and rescue openings shall have a minimum net clear opening width of twenty inches.

F. Operation. Required emergency escape and rescue openings shall be operational from the inside of the room or space without the use of keys or special tools, knowledge, or effort. Bars, grilles, grates, or similar devices are permitted to be placed over emergency escape and rescue openings provided the minimum net clear opening size complies with the building code and such devices shall be releasable or removable from the inside without the use of a key, tool, or force greater than that which is required for normal operation of the escape and rescue opening. Where such bars, grilles, grates, or similar devices are installed in existing buildings, smoke detectors shall be installed in accordance with Section 16.24.550.

G. Aisles. The required width of aisles in accordance with the fire code shall be unobstructed.

H. Locked Doors. All means of egress doors shall be readily openable from the side from which egress is to be made without the need for keys, tools, or special knowledge or effort, except where the door hardware conforms to that permitted by the building code. (Ord. BL2001-585 § 1 (part), 2001)

16.24.540 Fire resistance ratings.

A. Fire-Resistance-Rated-Assemblies. The required fire-resistance rating of fire-resistance-rated walls, fire stops, shaft enclosures, partitions, and floors shall be maintained.

B. Opening Protectives. Required opening protectives shall be maintained in an operative condition. All fire and smoke stop doors shall be maintained in operable condition. Fire doors and smoke barrier doors shall not be blocked, obstructed, or otherwise made inoperable. (Ord. BL2001-585 § 1 (part), 2001)

16.24.550 Fire protection systems.

A. Smoke Detectors. Existing Group R occupancies not already provided with single-station smoke alarms/detectors shall be provided with approved single-station smoke alarms/detectors.

B. Installation.

1. In existing one- and two-family dwellings, approved single-station smoke alarms/detectors shall be installed:

a. Outside of each separate sleeping area, in the immediate vicinity of the sleeping rooms; and

b. On each additional story of the dwelling unit including basements.

2. In all other existing Group R occupancies, installation shall be in accordance with the fire code.

C. Power Source. In Group R occupancies, single-station smoke alarms/detectors shall be battery operated or shall receive their primary power from the building wiring provided that such wiring is served from a commercial source. When power is provided by the building wiring, the wiring shall be permanent and without a disconnecting switch other than those required for overcurrent protection. (Ord. BL2001-585 § 1 (part), 2001)

Article VI. Dwellings and Structures Unfit for Human Habitation, Occupation, or Use

16.24.560 Findings, appointment, and purpose.

The metropolitan council finds that there exists in Metropolitan Nashville and Davidson County dwellings and structures that are unfit for human habitation, occupation, or use due to dilapidation, defects increasing the hazards of fire, accident or other calamities, lack of ventilation, light or sanitary facilities, or due to other conditions rendering such structures unsafe or unsanitary, or dangerous or detrimental to the health, safety or morals, or otherwise inimical to the welfare of the residents of Metropolitan Nashville and Davidson County. Therefore, the director of the department of codes administration is hereby appointed to enforce this chapter and to implement the power conferred upon the Metropolitan Government by Tennessee Code Annotated, Title 13, Chapter 21 (T.C.A. § 13-21-101 et seq.) to exercise its police powers to repair, close, or demolish the aforementioned dwellings and structures in the manner herein provided. (Ord. BL2001-585 § 1 (part), 2001)

16.24.570 Determination of unfitness for habitation, occupation or use.

Any dwelling or structure is unfit for human habitation, occupation, or use if conditions exist which, in the opinion of the director, are dangerous or injurious to the health, safety, or morals of the occupants of dwelling or structure, the occupants of neighboring buildings, structures, or premises, or other residents of the metropolitan government area. Such conditions may include the following, without limiting the generality of the foregoing, defects therein increasing the hazards of fire, accident, or other calamities; inadequate means of egress; lack of adequate ventilation, light, or sanitary facilities; dilapidation; disrepair; structural defects; and unsanitary conditions. (Ord. BL2001-585 § 1 (part), 2001)

16.24.580 Complaint procedures—Hearing.

Whenever a petition is filed with the department by the metropolitan development and housing authority ("MDHA"), other public authority or its agent, or at least five residents of Davidson County charging that any dwelling or structure is unfit for human habitation, occupation, or use, or whenever it appears to the director or the director's agent (on the director's own motion), that any dwelling or structure is unfit for human habitation, occupation, or use, the director shall, if the preliminary investigation discloses a basis for such charges, issue and cause to be served upon the owner of and parties in interest of such structure, a complaint, stating the charges in that respect and containing a notice that a hearing will be held before the director or the director's designated agent at a place therein fixed, not less than ten days nor more than thirty days after the serving of such complaint, that:

1. The owner or parties in interest or both shall be given the right to file an answer to the complaint and to appear in person, or otherwise, and give testimony at the place and time fixed in the complaint; and

2. The rules of evidence prevailing in courts of law or equity shall not be controlling in hearings before the director. (Ord. BL2001-585 § 1 (part), 2001)

16.24.590 Order to repair, vacate or demolish required when.

If, after such notice and hearing, as provided in Section 16.24.580, the director or the director's authorized agent determines that the dwelling or structure under consideration is unfit for human habitation, occupation, or use, the individual making the determination shall state in writing the findings of fact in support of such determination and shall issue and cause to be served upon the owner thereof an order:

1. If the repair, alteration, or improvement of such dwelling, structure or accessory dwelling or structure can be made at a cost not to exceed fifty percent of the value of the dwelling or structure, requiring the owner, within the time specified in the order, to repair, alter or improve such building or structure to render it fit for human habitation, occupation or use, or to vacate and close the building or structure as a place of human habitation, occupation or use. The order shall allow a reasonable time for the performance of any act it requires. For the purposes of this article, the value of the dwelling or structure shall be assumed to be that established by the tax assessor's office.

a. If the owner fails to comply with the order to repair, alter, improve, or vacate and close the dwelling or structure, the director may cause such dwelling or

structure to be repaired, altered, improved, or vacated and closed, and may cause to be posted on the main entrance of any dwelling or structure so vacated and closed, a placard with the following words, "This Building Is Unfit for Human Habitation, Occupation or Use. The Use or Occupancy of This Building is Unlawful and Prohibited by Order of the Director of the Department of Codes Administration." Such placard shall remain posted until the required repairs, alterations, or improvements are made. It is unlawful for any person to remove such notice without written permission of the director or for any person to enter such dwelling or structure except for the purpose of making the required repairs, alterations, or improvements.

b. A dwelling or structure closed pursuant to this section shall be securely closed by boarding-up all exterior openings such that a person could not gain entry without the use of a key, special tool, or significant physical effort. It shall be the duty of the owner to ensure that dwelling or structure remains closed.

c. It shall be unlawful to occupy or use a dwelling or structure ordered vacated pursuant to this section until a valid certificate of occupancy has been issued.

2. If the repair, alteration, or improvement of such dwelling, structure, or accessory dwelling or structure cannot be made at a cost not to exceed fifty percent of the value of the dwelling or structure, requiring the owner within the time specified in the order to remove or demolish such dwelling or structure. For the purposes of this article, the value of the dwelling or structure shall be assumed to be that established by the tax assessor's office.

a. The director, upon issuing an order to the owner to remove or demolish, shall forward a copy of said order to the vacant property review commission ("the commission"), and, for the purposes of assisting the commission in its review, supply the commission with a copy of the related structural and dwelling unit inspection record, complaint, and title research report. The department of codes administration may supplement these documents with pertinent information acquired during its investigation and hearing.

b. If the owner fails to comply with an order to remove or demolish the dwelling or structure, the director may cause such dwelling or structure to be removed or demolished, except that when the director has been notified by the commission of its intent to gain control of such dwelling or structure prior to the letting of bids for demolition, in which case the department shall suspend its effort to remove or demolish the dwelling or structure pending notice to proceed from the commission. (Ord. BL2001-585 § 1 (part), 2001)

16.24.600 Complaint and order—Service.

Any complaint and order issued pursuant to this article shall be served upon owners and parties in interest either personally or by certified or registered mail, but if the whereabouts of any such person or entity is unknown and the same cannot be ascertained by the director in the exercise of reasonable diligence, and the director shall make an affidavit to that effect, then the serving of such complaint or order of such persons or entities may be made by publishing the same once each week for two consecutive weeks in a newspaper printed and published and in general circulation throughout the area of jurisdiction of the metropolitan government. A copy of such complaint or order shall be posted in a conspicuous place upon the dwelling or structure affected by such complaint or order. A copy of such complaint and order shall be filed in the register's office of Davidson County, and such filing of the complaint or order shall have the same force and effect as other lis pendens notices provided by law. (Ord. BL2001-585 § 1 (part), 2001)

16.24.610 Appeal.

The owner, or the owner's authorized agent, and any party in interest, or its authorized agent shall have the right to appeal from the order of the director and to appear before the board of property standards and appeals at a specified time and place to show cause why they should not comply with any notice issued pursuant to this chapter. Requests for appeals shall be by written petition completed on forms supplied by the director and shall be filed with the director within twenty days from the date of service. (Ord. BL2001-585 § 1 (part), 2001)

16.24.620 Warning placards.

Where upon inspection, a vacant dwelling or structure is determined to be unfit for human occupation or use, the director shall immediately cause to be on the main entrance a placard with the following words, "This Building Is Unfit for Human Habitation, Occupation or Use. The Use or Occupancy of This Building is Unlawful and Prohibited by Order of the Director of the Department of Codes Administration." Such notice shall remain posted until the required repairs, alterations, or improvements are made or until such time as the dwelling or structure is removed or demolished. It is unlawful for any person to remove such placard without written permission of the director or for any person to enter such dwelling or structure except for the purpose of making the required repairs, alterations, or improvements, or removing or demolishing the dwelling or structure. (Ord. BL2001-585 § 1 (part), 2001)

16.24.630 Removal or demolition of buildings—Notice to vacate.

If the owner fails to comply with an order to remove or demolish a building or structure, the director may cause such building or structure to be removed or demolished to secure the intent of this chapter. When doing so, the director shall, whenever an occupied building or structure has been condemned and ordered removed or demolished, and the owner has failed to appeal to the board of property standards and appeals or has unsuccessfully appealed to said board, notify the tenant of such action in writing, and order such tenant to vacate the premises within a specified time, if necessary, or to do and perform such acts or works as may be necessary to fulfill the orders set forth in such notice. Should such tenants fail or refuse to promptly comply with such notice or orders, they shall be deemed guilty of a violation of this chapter. (Ord. BL2001-585 § 1 (part), 2001)

16.24.640 Demolition of building—Disposal of debris.

Every person repairing, altering, improving, moving, or demolishing a building or structure pursuant to this chapter and removing debris therefrom shall cause all such debris to be thoroughly dampened with water or covered to prevent the spread of such debris or dust to adjacent properties, whether public or private. In the case of demolition, it shall be the responsibility of the person demolishing a dwelling or structure to remove from the premises all demolition debris resulting from such demolition, to properly dispose of all demolition debris in a manner prescribed by the director of public works, and to fill any below-grade area with approved fill materials to grade level or to provide suitable protective fencing around any such below-grade area. (Ord. BL2001-585 § 1 (part), 2001)

16.24.650 Costs of repair or demolition—Lien on property.

A. The amount of the direct and indirect costs of such repairs, alterations, or improvements, or vacating and closing, or removal or demolition by the department shall be assessed against the owner of the property, and shall, upon the filing of the notice with the office of the Register of Deeds of Davidson County, be a lien on the property in favor of the Metropolitan Government of Nashville and Davidson County, second only to liens of the State of Tennessee and Metropolitan Government of Nashville and Davidson County for taxes, any lien of the Metropolitan Government of Nashville and Davidson County for special assessments, and any valid lien, right or interest in such property duly recorded or duly perfected by filing, prior to the filing of such notice. These costs shall be collected by the metropolitan trustee at the same time and in the same manner as property taxes are collected. If the owner fails to pay the costs, they may be collected at the same time and in the same manner as delinquent property taxes are collected and shall be subject to the same penalty and interest as delinquent property taxes. Indirect costs that may be assessed against the property owner shall include, but not be limited to, the cost of postage, advertising, title searches, and recording fees and shall include an administrative fee in the amount of seven hundred twenty-five dollars per demolition project to cover staff time in the administration of each demolition case.

B. In addition, the metropolitan government may collect the costs assessed against the owner through an action for debt filed in any court of competent jurisdiction. The metropolitan government may bring one action for debt against more than one or all of the owners of properties against whom said costs have been assessed, and the fact that multiple owners have been joined in one action shall not be considered by the court as a misjoinder of parties. If the structure is removed or demolished by the director, the director shall sell the materials of such structure and shall credit the proceeds of such sale against the cost of the removal or demolition, and any balance remaining shall be deposited in the chancery court by the director, shall be secured in such manner as may be directed by such court, and shall be disbursed by such court to the person found to be entitled thereto by final order or decree of such court. Nothing in this section shall be construed to impair or limit in any way the power of the metropolitan government to define and declare nuisances and to cause their removal or abatement, by summary proceedings or otherwise. (Ord. BL2010-642 § 11, 2010; Ord. BL2004-175§ 4, 2004; Ord. BL2001-585 § 1 (part), 2001)

16.24.660 Failure to comply—Penalty.

The owner, party in interest, lessee, agent, or person or entity in control of such dwelling or structure that is unfit for human occupation or use, upon failure or refusal to comply with a notice to repair, alter, improve, vacate and close, remove or demolish, such dwelling or structure, shall be guilty of a misdemeanor and subject to the penalties prescribed in this code. (Ord. BL2001-585 § 1 (part), 2001)

Chapter 16.28

BUILDING PERMITS

Sections:

16.28.010 Required when.
16.28.020 Blasting—Permit required—Regulations.
16.28.030 Normal maintenance repair—Permits not required.
16.28.040 Application.
16.28.050 Plans and specifications—Requirements.
16.28.060 Plot diagrams required.
16.28.070 Applications—Timely action required.
16.28.080 Applications—Examination by director—Exception.
16.28.090 Reviewed drawings—Marked—Copy at jobsite.
16.28.100 General liability insurance required when.
16.28.110 Fee schedule—Building permits.
16.28.120 Valuations—Computations.
16.28.130 Failure to obtain permit—Fees tripled.
16.28.140 Fees—Refunds.
16.28.150 Foundations permit—Utility installations.
16.28.152 Structural framing permit.
16.28.154 Building shell permit.
16.28.156 Building shell finish-out permit.
16.28.160 Private water system—Approval required.
16.28.170 Encroachment on street lines—Special application.
16.28.175 Moving of houses, buildings or structures.
16.28.180 Applications—Abandonment—Extensions.
16.28.190 Issuance.
16.28.195 Issuance of permits for the demolition of historic structures and sites.
16.28.200 Permit denial conditions.
16.28.210 Work authorized—Plumbing and electrical permit requirements applicable.
16.28.220 Nontransferability.
16.28.230 Approved permits and construction hours signs—Posted at premises.
16.28.235 Posting of information sign for major projects required.
16.28.240 Interpretation—Expiration—Extensions.
16.28.250 Supervision required when.
16.28.260 Change in contractor—Reissuance of permit—Fees.

16.28.010 Required when.

It shall be the duty of every person desiring to construct, alter, repair, enlarge, move or demolish any building or structure or part thereof or any appurtenances connected or attached thereto, or to install any heating, air conditioning or ventilating system or unit or any equipment, device, appliance or fixture, required or governed by this chapter, or to repair or replace any damage to a building or structure caused by termites, or to erect or construct any sign, billboard or similar structure governed by this chapter, or to do or cause any such work to be done, for which a permit is required, to first make application to the director of codes administration and obtain the required permits therefor, except as such may be specifically excluded by Section 16.04.020. (Prior code § 11-1-31)

16.28.020 Blasting—Permit required—Regulations.

A. It is unlawful for any person to perform any drilling or blasting of rock, earth, trees, etc., with any form of explosives, without first having obtained a permit for such work from the director of codes administration. All such blasting as may be permitted shall be performed between the hours of six a.m. and six p.m. and, where necessary, shall be properly covered or barricaded prior to the execution of the blasting operation.

B. It shall be the responsibility of the person engaged in any blasting activity to give proper notice and warning to all property owners, pedestrians and motor vehicle traffic in the area where such blasting is to be made, prior to detonation of such blast.

C. An applicant for a blasting permit must be experienced and qualified in the handling and discharge of explosives and blasting agents, must be twenty-one years of age or over and must furnish all necessary information concerning the amount of the charge and the location. The minimum public liability insurance as required by Section 16.28.100 shall be one hundred thousand dollars/three hundred thousand dollars bodily

injury and fifty thousand dollars property damage. (Prior code § 11-1-31.1)

16.28.030 Normal maintenance repair—Permits not required.

A. Normal maintenance repairs of an existing building or structure may with the approval of the building official be made without permit, provided such repairs do not violate any provisions of this chapter.

Normal maintenance repairs shall be defined as repairs to an existing building or structure, including but not limited to exterior and interior painting, papering, glazing of windows and doors, floor finishing, minor repairs to chimneys, stairs, porches, underpinning and repairs to an existing roof not to exceed thirty-three percent of the roof area.

B. Replacing an existing roof on an existing one or two family dwelling is considered normal maintenance and does not require a permit. Work shall conform to provisions of the adopted International Residential Code for One- and Two-Family Dwellings. (Ord. BL2015-1145 § 18, 2015; Ord. 95-1487 § 87, 1995)

16.28.040 Application.

A. Each application for a permit required by this chapter with the required fee, shall be filed with the director of codes administration on a form furnished by him, and shall contain a general description of the proposed work and its location. The application shall be signed by the owner or his authorized agent.

B. Each application for a permit shall indicate the proposed occupancy of all parts of the building and of that portion of the site or lot, if any, not covered by the building or structure, and shall contain such other information as may be required by the director.

C. No permit shall be issued pursuant to this chapter if, within the past twelve months, the applicant or property owner has been found by a court of law having jurisdiction over such matters of violating a stop work order issued pursuant to Section 16.04.110 of the metropolitan code of laws for the property for which the permit is sought, or of violating Tennessee Code Annotated § 7-51-1201 by demolishing a historic residential structure on the property for which the permit is sought.

D. Every application for a permit required by this chapter shall include a proposed plan for the disposal of construction and demolition waste generated on the property by the activity for which the permit is sought. Such plan shall include a statement, signed by the applicant, providing that no construction and demolition waste will be stored on the property that is not in compliance with Chapter 16.24 of the Metropolitan Code of Laws. (Amdt. 1 to Ord. BL2006-1263 § 1, 2006; Ord. BL2006-1263 § 1, 2006; Ord. BL2006-1069 § 1, 2006; Ord. BL2005-921 § 1, 2006; prior code § 11-1-33)

16.28.050 Plans and specifications—Requirements.

A. When required by the director of codes administration, two or more copies of specifications and of drawings drawn to scale with sufficient clarity and detail to indicate the nature and character of the work shall accompany every application for a permit. Such drawings and specifications shall contain information, in the form of notes or otherwise, as to the quality of materials, where quality is essential to conformity with this chapter. Such information shall be specific, and this chapter shall not be cited as a whole or in part, nor shall the term "legal" or its equivalent be used, as a substitute for specific information.

B. The director may require details, computations, stress diagrams and other data necessary to describe the construction and basis of calculations and they shall bear the signature of the person responsible for the design.

C. All drawings, specifications or accompanying data shall bear the name and address of the designer. Drawings, specifications and accompanying data for buildings, structures or appurtenances shall comply with the provisions of Section 62-2-101, et seq. of the Tennessee Code Annotated. When required, each drawing comprising the set of construction documents, specifications and accompanying data shall bear the seal of the appropriate architect and/or engineer responsible for the preparation thereof. The director of the department of codes administration shall not require of such designers, mechanics or builders, drawings or specifications in more detail than the minimum required to ascertain compliance with the applicable code. Inspections resulting in disapproval shall state any requirements necessary for approval.

D. Plans for all buildings shall indicate how required structural and fire-resistive integrity will be maintained where a penetration of a required fire-resistive wall, floor or partition will be made for electrical, mechanical, plumbing and communication conduits, pipes and systems, and also indicate in sufficient detail how the fire integrity will be maintained where required fire-resistive floors intersect the exterior walls.

E. Foundation plans for prefabricated or factory-built structures shall be sealed by a civil engineer registered to practice in the State of Tennessee. (Ord. 89-1092 § 1, 1990; prior code § 11-1-34)

16.28.060 Plot diagrams required.

The director of codes administration shall require drawings showing the location of the proposed building or structure and of every existing building or structure on the site or lot. He may also require a boundary line survey, if necessary, prepared by a qualified surveyor. (Prior code § 11-1-35)

16.28.070 Applications—Timely action required.

The director of codes administration shall act upon an application for a permit under this chapter, with plans as filed or as amended, without unnecessary or unreasonable delay. (Prior code § 11-1-37)

16.28.080 Applications—Examination by director—Exception.

A. The director of codes administration shall examine or cause to be examined each application for permit and the drawings and computations filed therewith and shall ascertain by such examinations whether the construction indicated and described is in accordance with the requirements of this chapter and all other pertinent laws or ordinances.

B. The director of codes administration and the fire marshal may accept plans and a sworn affidavit from a registered architect or engineer, affixed with his or her seal, stating that the plans submitted conform with all provisions of this chapter and all other pertinent laws and ordinances. The director of codes administration and fire marshall may rely upon such affidavit and in their discretion approve the plans submitted therewith without further review. In such event, the architect or engineer having provided the affidavit shall assume full responsibility for the compliance of such plans with all provisions of this chapter and other pertinent laws or ordinances. Architects and engineers hereinabove referred to shall be registered under the laws of this state regulating the practice of architecture and engineering. Nothing in this chapter shall be construed to waive inspection requirements or the authority of the director of codes administration or fire marshall to reject work not in compliance with the provisions of this chapter or other applicable laws or ordinances. (Ord. BL2021-1012 § 1, 2021; Ord. BL2007-1390 § 15, 2007; prior code § 11-1-38)

16.28.090 Reviewed drawings—Marked—Copy at jobsite.

When the director of codes administration issues a permit, he shall endorse, in writing or by stamp, both sets of plans "Reviewed." One set of drawings so reviewed shall be retained by the director and the other set shall be returned to the applicant. The reviewed drawings shall be kept at the site of work and shall be open to inspection by the director or his authorized representative. (Ord. 95-1487 § 86 (part), 1995; prior code § 11-1-39)

16.28.100 General liability insurance required when.

Nothing in this chapter shall be construed as prohibiting the director of codes administration, as conditions may seem to warrant, from requiring a certificate of general liability insurance for such amount as he may deem necessary, with an insurance company licensed in the State of Tennessee, as a condition precedent to the issuance of any permit required by this chapter. Such insurance as may be required shall not be canceled without at least thirty days' prior notice, in writing, to the director of codes administration. (Ord. 94-1226 § 10, 1994)

16.28.110 Fee schedule—Building permits.

A. Building Permit Fees. The fee for building permits shall be determined as set forth in this section.

1. Building permit fees for residential construction based on valuation. Residential construction includes one-family and two-family residential construction and townhouses as defined by the 2018 Edition of the International Residential Code, but not multi-family construction shall be $5.00 per $1,000 total valuation.

2. Building permit fees for commercial construction and all other construction other than one-family and two-family residential construction and townhouses as defined by the 2018 Edition of the International Residential Code, shall be based on valuation.

Total Valuation		Fees
$0.00 to $2,000.00		$40.39
$2,000.01 to $50,000.00	to	$40.39 for the first $2,000.00 plus $6.92 for each additional thousand or fraction thereof, to and including $50,000.00.
$50,000.01 to $100,000.00	to	$372.71for the first $50,000.00 plus $5.57 for each additional thousand or fraction thereof, to and including $100,000.00.
$100,000.01 to $500,000.00	to	$651.38 for the first $100,000.00 plus $4.19 for each additional thousand or fraction thereof, to and including $500,000.00.

Total Valuation	Fees
$500,000.01 and up	$2,326.84 for the first $500,000.00 plus $2.79 for each additional thousand or fraction thereof.

B. Moving of Buildings or Structures. For the moving of any building or structure where such necessitates the transportation of such building or structure in public rights-of-way or on public streets, the fee shall be two hundred fifty-two dollars; except, that such fee shall not be charged for the moving of temporary construction office sheds, mobile homes or house trailers.

C. Signs. For the erection, construction or alteration of any sign, billboard, awning, marquee or similar structure, the fee shall be determined from Section A.2. above using the schedule for commercial construction. The minimum fee for a permit to erect a sign shall be fifty-five dollars.

D. Trailers and Mobile Homes. For each trailer or mobile home located on an individual site, lot, trailer park, mobile home subdivision or apartment complex, there shall be a fee of fifty-five dollars, such fee to be charged on the original location of a trailer or mobile home on the site. For each succeeding trailer or mobile home moved onto a lot not within a trailer park, mobile home subdivision or apartment complex, there shall be required a use and occupancy permit.

E. Certificate of Occupancy and Compliance. For the issuance of a use and occupancy permit or certificate of compliance where there has been no building permit issued, the fee shall be fifty-five dollars.

F. Re-inspection Fee. For a re-inspection, the fee shall be fifty dollars.

G. Plans Examination Fees.

1. For the examination for code compliance of plans, specifications, drawings and other data, the plans examination fee shall be:

Total Valuation	Fees
$0.00 to $275,000.00	One-half of the building permit fee as set forth in subsection A of this section.
$275,000.01 to $5,000,000.00	$1.338.54 for the first $275,000.00 plus $0.18 per thousand for each additional thousand or fraction thereof, to and including $5,000,000.00.
$5,000,000.01 and above	$2,181.82 for the first $5,000,000.00 plus $0.07 per thousand for each additional thousand or fraction thereof.

Such plan-examination fee is in addition to the building permit fee and in no case shall this be refunded even if there is not a subsequent building permit issued. If an issued building permit is due a refund as per Section 16.28.140, in no case shall the plans examination fee be refunded.

2. Exceptions from plans examination fee:

a. One- and two-family dwelling building permits;

b. Townhouse building permits;

c. Demolition permits;

d. Blasting permits;

H. Use Verification Letter. The fee for a letter to confirm the zoning designation and entitlements within the designation shall be fifty dollars.

I. Beer and Liquor Letter. The fee for a letter to confirm the distance requirements pertaining to the sale of beer and liquor as required by state law shall be forty dollars.

J. Workforce housing fee adjustments.

1. In order to facilitate the provision of workforce housing within the area of the metropolitan government, the permit fees provided in subsections A. and H. of this section shall be reduced by twenty-five percent for new home construction, or the rehabilitation of existing dilapidated and vacant homes, to be used for workforce housing.

2. For purposes of this subsection, "workforce housing" means housing that meets one of the following two criteria:

a. Housing to be sold at a price at or below two and one-half times ninety-five percent of the median family income currently listed for Davidson County as established by the U.S. Department of Housing and Urban Development; or

b. Housing to be rented for at least five years at an annual rental amount that is at or below thirty percent of seventy percent of the median family income currently listed for Davidson County as established by the U.S. Department of Housing and Urban Development.

3. The director shall have the authority to promulgate rules and regulations to implement the provisions of this subsection, provided such rules and regulations are not inconsistent with the express provisions of this subsection. Applicants obtaining the twenty-five percent reduction in permit fees for workforce housing shall provide the director with a sworn affidavit that the residences constructed will satisfy the criteria set forth above and shall file a deed restriction with the Davidson County Register of Deeds requiring that the property remain a workforce housing unit for at least five years. In the event the property does not remain a workforce housing unit for at least five years, the permit holder shall pay to the metropolitan government the amount of the permit fee reduction provided above plus interest at the rate of ten percent per annum.

K. Waiver. Upon resolution by the metropolitan council, building, electrical, gas/mechanical, and/or plumbing permit fees may be waived by the director of codes administration when a state of emergency is declared by the mayor. (Ord. BL2022-1215 § 5, 2022; Ord. BL2021-717 § 2, 2021; Subst. Ord. BL2010-788 § 2, 2010; Ord. BL2010-642 § 12, 2010; Ord. BL2004-175 § 5, 2004; Ord. 95-1324 §§ 1, 2, 1995; Ord. 92-295 §§ 1—4, 1992; Ord. 92-118 §§ 21, 22, 1992; Ord. 91-1525 § 2, 1991; prior code § 11-1-42)

16.28.120 Valuations—Computations.

A. New Building or Structures and Additions. For the purpose of determining permit fees only for new buildings or structures and additions, valuations will be computed by using the "cost-per-square foot" figures as shown in the Building Valuation Data, as published by the International Code Council. The value is based on construction type, occupancy group, the building area and without use of a regional modifier. "Valuation" means total cost of all structures which includes structural, electrical, plumbing, mechanical system and other systems, interior finish, normal site preparation (excavation and backfill for building), architectural and design fees, overhead and profit, but excluding land cost.

B. Remodeling Existing Buildings or Structures. For the purpose of determining permit fees, the "valuation" means the total cost of the project(s) including the cost of materials (including those supplied by owners), interior/exterior finishes, architectural and design fees, labor, overhead, profit, including all plumbing, electrical, mechanical and other systems. (Ord. BL2004-175 § 6, 2004; Ord. 95-1324 § 3, 1995)

16.28.130 Failure to obtain permit—Fees tripled.

In addition to any other penalty imposed for failure to obtain a permit, where construction of any work, for which a permit is required, is commenced before a permit is issued, the permit fees shall be tripled. (Ord. 91-1525 § 3, 1991; prior code § 11-1-43)

16.28.140 Fees—Refunds.

A. Application for a refund of fees paid for any unused building permit, where the work covered by such permit is to be performed by another or abandoned shall be made on forms provided by the director.

B. Refunds shall only be made for that portion of a building permit fee exceeding seventy-five dollars. In no case shall any fee be refunded on any unused permit over six months old or when any inspection has been made, regardless of the fees paid. In no case shall any portion of the plans examination fee collected under Section 16.28.110 H. be refunded. (Ord. BL2010-642 § 13, 2010; Ord. 91-1525 § 4, 1991; Ord. 89-1003 §§ 2, 3, 1989; prior code § 11-1-44.1)

16.28.150 Foundations permit—Utility installations.

A. When application for a permit to erect or enlarge a building has been filed and pending issuance of such permit, the director of codes administration may, at his discretion, issue a special permit for the foundations of such building. The holder of such a special permit shall proceed at his own risk and without assurance that a permit for the superstructure will be granted.

B. When utilities are to be installed within an individual parcel of land to connect to a building or structure, a utility permit may be issued.

Exceptions: Utilities installed by the Utility Company.

C. The partial permit fee for the foundation/utility installation shall be not less than five percent of the total building as per Section 16.28.120. (Ord. BL2002-1142 § 23, 2002; Prior code § 11-1-45)

16.28.152 Structural framing permit.

A. When application for a permit to erect or enlarge a building has been filed and pending issuance of such permit, the director of codes administration may, at his discretion, issue a special permit for the structural framing of such building. This permit would include installing columns, floor systems, bearing walls, but not roof systems or nonbearing exterior walls.

B. The electrical, plumbing, and HVAC systems may be "rough-in" in the non-tenant areas.

C. The partial permit for the structural framing fee shall be not less than fifty percent of the total building valuation as per Section 16.28.120. (Ord. BL2002-1142 § 24, 2002)

16.28.154 Building shell permit.

A. When application for permit to erect or enlarge a building has been filed and pending issuance of such permit, the director of codes administration may, at his discretion, issue a special permit for the shell of such building.

B. This permit would include installing exterior walls and the roof system. The electrical, plumbing, and HVAC systems may be "rough-in" in the non-tenant areas.

C. The partial permit for the shell fee shall be not less than sixty-five percent of the total building valuation as per Section 16.28.120. If a structural framing permit has been previously issued, the partial permit for the shell fee shall be not less than fifteen percent of the

total building valuation as per Section 16.28.120. (Ord. BL2002-1142 § 25, 2002)

16.28.156 Building shell finish-out permit.

A. When application for a permit to erect or enlarge a building has been filed and pending issuance of such permit, the director of codes administration may, at his discretion, issue a special permit for finishing-out the interior of the shell of such building. This permit would include installing all interior finishes of each tenant space.

B. The electrical, plumbing, and HVAC permits may be issued to complete finish out of the installation of each system.

C. The partial permit for the tenant finish-out fee shall be not less than forty-five percent of the total building valuation as per Section 16.28.120 for a building that the total tenant area is substantiality less that the gross area of the building. If the tenant is basically equal to the gross area of the building, the partial permit for the tenant finish-out permit fee shall be not less than thirty percent of the total building valuation as per Section 16.28.120. (Ord. BL2002-1142 § 26, 2002)

16.28.160 Private water system—Approval required.

Where public water supply and sewer services are not available and it would be necessary to install a private water supply or private sewer disposal system, a building permit shall not be issued until such private water supply or private sewer disposal system has been approved by the metropolitan health department and satisfactory evidence of such approval has been submitted to the director of codes administration. (Prior code § 11-1-46)

16.28.170 Encroachment on street lines—Special application.

A. No permit shall be granted for the construction of any building or for the alteration of any building where such building is to be changed and such change will affect the exterior walls, bays, balconies or other appendages or projections fronting on any street, alley or public lane, or for the placing on any lot or premises of any building or structure removed from another lot or premises, unless the applicant has made application at the office of the director of public works for the lines of the public street on which he proposes to build, erect or locate such building.

B. It shall be the duty of the director of public works to see that the street lines are not encroached upon in any manner whatsoever, except as provided in Section 3202 of the Standard Building Code and other applicable sections of the Standard Building Code. (Ord. BL2002-1142 § 27, 2002; Ord. 95-1487 § 89, 1995; prior code § 11-1-41)

16.28.175 Moving of houses, buildings, or structures.

A. Any person desiring to move any house, building, or structure shall obtain a moving permit as provided in this title. If the house, building, or structure is to be moved to another location within the jurisdiction of the metropolitan government, the application for the moving permit shall be accompanied by an application for a foundation permit and a building permit. Said building permit shall be accompanied by complete plans and specifications showing the changes or conditions of said house, building, or structure and all contemplated improvements, signed by the owner or the owner's agent. Exception: No construction plans are required for one and two family dwellings.

B. Not later than forty-five days after the date the moving permit is obtained, the house, building, or structure must either: (1) be permanently affixed on a foundation at the new site; or (2) moved to a site outside of the jurisdiction of the metropolitan government.

C. If a house, building, or structure is removed from the jurisdiction of the metropolitan government, said house, building, or structure shall not be moved back into Metropolitan Nashville and Davidson County unless another moving permit is obtained pursuant to subsection A. of this section. Any house, building, or structure to be moved back into Metropolitan Nashville and Davidson County shall be permanently affixed on its new foundation not later than thirty days from the date the moving permit is obtained. No house, building, or structure that was not originally built within the jurisdiction of the metropolitan government shall be permitted to be moved into Metropolitan Nashville and Davidson County.

D. The owner of any house, building, or structure that is moved to another site within the jurisdiction of the metropolitan government shall make all necessary improvements required in order for said house, building, or structure to comply with the requirements of this Code not later than one hundred fifty days from the date the house, building, or structure is placed on its new foundation. The building official may grant one extension of sixty days upon a showing of delay caused by matters beyond the control of the owner or house mover.

E. Moving permits issued pursuant to this Section shall include a condition that the exterior of the house, building, or structure to be moved be covered with an appropriate housewrap.

F. Any person who fails to satisfy the above-mentioned time requirements shall be subject to the penalties set forth in Section 1.01.030 of the Metropolitan Code.

G. No permit shall be issued for the moving of any house, building, or structure if the applicant for the permit has been found guilty of violating the provisions of this section, or of failing to satisfy the conditions of a previously issued permit for the moving of any house, building, or structure, by a court of competent jurisdiction within twelve months preceding the application for said permit. (Ord. BL2010-613 § 2, 2010)

16.28.180 Applications—Abandonment—Extensions.

An application for a permit for any proposed work shall be deemed to have been abandoned six months after the date of filing, unless before then a permit shall have been issued; provided, that for cause, one or more extensions of time for periods of not exceeding ninety days each may be allowed by the director of codes administration. (Prior code § 11-1-36)

16.28.190 Issuance.

If the application for a permit under this chapter and the drawings filed therewith describe work which does not conform to the requirements of this chapter or other pertinent laws or ordinances, the director of codes administration shall not issue a permit, but shall return the drawings to the applicant with their refusal to issue such permit. Such refusal shall, when requested, be in writing and shall contain the reasons therefore. (Amdt. 1 to Ord. BL2021-842 § 1, 2021; Ord. BL2021-842 § 1, 2021; Ord. BL2020-459 § 1, 2020; Amdt. 1 to Ord. BL2006-936, 2006; Ord. BL2006-936 § 1, 2006; prior code § 11-1-47)

16.28.195 Issuance of permits for the demolition of historic structures and sites.

A. When the department of codes administration receives an application for a demolition permit for a structure which, individually or as part of a group of structures, is listed or is eligible for listing on the National Register of Historic Places, or meets the criteria of T.C.A. § 7-51-1201 as determined by the historic zoning commission, but is not included in a historic overlay district, the director of codes administration shall not issue a demolition permit for the structure until the historic zoning administrator approves the demolition permit. The historic zoning administrator must take action on the demolition permit within ninety days of the permit application, unless a longer period is agreed upon by the applicant and the historic zoning administrator. The department of codes administration shall provide notice by email to the district councilmember representing the district in which the historic structure is located within two business days after the application for the demolition permit has been filed.

B. Prior to the issuance of a demolition permit or a building permit where a portion of the structure is proposed to be removed for a structure that is included in a historic overlay district, the responsible contractor and any subcontractor shall submit signed affidavits that they have reviewed the permit to be approved including any related preservation permit and understand the limits of the demolition work to be done.

C. The following requirements shall be satisfied prior to the issuance of a demolition permit for a residential structure that was originally constructed before 1865:

1. The property owner or the owner's agent applying for a demolition permit for a residential structure that was originally constructed before 1865 shall, with the application for the permit, present to the director of codes administration and the executive director of the metropolitan historical commission at least two reports, each prepared by a qualified historic restoration consultant, stating the following:

a. The name and qualifications of the person making the report.

b. The condition of structural elements of the building proposed to be demolished. Such report should include an assessment of damage or decay, if any, to foundations, flooring, floor supports, walls and other vertical supports, ceilings, roofs and their support systems and other horizontal elements, fireplace, chimneys, exterior cladding and other exterior elements that may affect structural integrity, windows, window frames and doors and/or any fault, defect or condition that might affect the structural integrity or the water-tightness of the building.

c. An estimated cost of repair for those item(s) identified in the structural report as damaged or decayed and which affect the structural integrity of the structure.

d. A valuation from a qualified historic properties real estate appraiser of the building(s) proposed to be demolished.

2. For purposes of subsection C.1., the following definitions shall apply:

a. "Qualified historic restoration consultant" is defined as a professionally licensed architect or general contractor with a specialty in historic buildings, i.e., one who has worked directly on the rehabilitation or restoration of historic buildings for a minimum of ten years and/or a minimum of 15 long-term (lasting six months or more) historic building projects. The consultant shall

provide a list of qualifying historic projects, detailing their scope, budget, the consultant's scope of involvement, specific historic issues/challenges, date of completion, and client contact information. The MHZC will determine whether the consultant meets these criteria.

b. "Qualified historic properties real estate appraiser" is defined as an individual who has a minimum of five years of professional experience working as a real estate appraiser, specifically including the valuation of historic property, buildings, and their appurtenances. For these purposes, "historic" shall be defined as one hundred years old and older. The appraiser shall provide a listing of historic properties evaluated, with accompanying date of service and client contact information. The MHZC will determine whether the consultant meets these established criteria.

3. Upon receipt of the demolition permit application, the metropolitan historic zoning commission shall, at a scheduled public hearing, make the determination as to whether or not the structure meets the criteria of T.C.A. § 7-51-1201. If the historic zoning commission determines that the structure at issue meets the criteria of T.C.A. § 7-51-1201, it shall initiate legislation to allow the metropolitan council the opportunity to approve or disapprove the demolition in accordance with T.C.A. § 7-51-1201 et seq. (Ord. BL2025-742 § 3, 2025; Amdt. 1 to Ord. BL2021-842 § 2, 2021; Ord. BL2021-842 § 2, 2021)

16.28.200 Permit denial conditions.

If the application for a permit under this chapter and the drawings filed therewith describe work which does not conform to the requirements of this chapter or other pertinent laws or ordinances, the director of codes administration shall not issue a permit, but shall return the drawings to the applicant with his refusal to issue such permit. Such refusal shall, when requested, be in writing and shall contain the reasons therefor. (Prior code § 11-1-48)

16.28.210 Work authorized—Plumbing and electrical permit requirements applicable.

A. A general building permit shall carry with it the right to install in any new building or structure or part thereof any heating system, air conditioning or ventilating system or unit, storm drains not connected to a public sanitary sewer system, elevators, sidewalk elevators, vaults, chutes, coal holes, lifts, cranes, derricks, steam power boilers, steam, oil, gas or vapor engines or similar equipment or devices, and the right to treat any building or structure for termites or termite protection, provided such equipment, devices or treatments are incorporated into the plans and set forth in the specifications submitted with the application for a building permit. Where such equipment and devices or treatments are not incorporated into the plans and specifications submitted with the application for a building permit, a separate building permit shall be required. Where structural damage caused by termites is required to be replaced, the building permit fees as set forth in Section 16.28.110 shall be paid.

B. The issuance of a building permit shall not be construed as waiving the requirement for a plumbing or electrical permit for the installation of any plumbing or electrical system, device or equipment necessary or required for proper operation of such installations. (Prior code § 11-1-51)

16.28.220 Nontransferability.

Permits issued under this chapter are not transferable from one contractor, one job, site or location to another, and any refunds shall be made in accordance with Section 16.28.140. This section shall not prohibit the correction or change of addresses or location made through error on the application. (Ord. 98-1445 § 80, 1998)

16.28.230 Approved permits and construction hours signs—Posted at premises.

A. Work requiring a building permit shall not be commenced until the permit holder or his agent shall have posted the building permit card in a conspicuous place on the front of the premises. The permit shall be protected from the weather and in such position as to permit the director of codes administration to conveniently make the required entries thereon. This permit card shall be maintained in such position by the permit holder until the certificate of occupancy required by this chapter has been issued by the director.

B. A project information sign shall be posted at all project sites, excluding public infrastructure projects, in English and Spanish, for all projects requiring a building permit or a grading permit issued pursuant to Chapter 15.64. The sign shall include a phone number for the project applicant, as well as a phone number to file complaints with the Metropolitan Codes Department. One double-sided 24" (vertical) × 36" (horizontal) sign shall be posted for every fifty feet of site frontage, with no more than three signs required per street frontage containing the appropriate set of information:

1. For project sites located within or adjacent to a residential zone district, excluding permits obtained by the homeowner/resident working on his or her own residence the sign must state "No work is allowed to be performed on this site between the hours of 12:00

midnight Saturday and 12:00 midnight Sunday" and must also contain information about the acceptable noise level at a construction site pursuant to Section 9.30.010.

2. For all other project sites, excluding permits obtained by the homeowner/resident working on his or her own residence: "No work is allowed to be performed on this site between the hours of 12:00 midnight Saturday and 12:00 midnight Sunday." (Ord. BL2021-1050 § 1, 2022; Ord. BL2020-236 § 2, 2020; Ord. BL2017-835 § 1, 2017; prior code § 11-1-49)

16.28.235 Posting of information sign for major projects required.

A. For purposes of this section, "major project" means a project meeting one of the following criteria:

1. New construction or demolition of a building more than three stories in height;

2. New construction or demolition of a building with an average roof height more than forty feet above grade, excluding rood access structures or parapets;

3. New construction or demolition of a building covering ten thousand square feet or more of lot area, regardless of height; or

4. Any alteration to a building façade or any demolition activity that impacts the exterior of the building and is performed at a level above the third story or more than forty feet above grade, whichever is less.

B. Upon the issuance of a building or demolition permit for a major project, signs shall be posted at the construction or demolition site(s) in accordance with this section.

C. A project information sign shall be posted at all major project sites containing the following information:

1. A rendering or elevation drawing of the building exterior that does not contain logos or commercially recognizable symbols, provided that a rendering or elevation drawing is not required for demolition projects;

2. A title line stating "Work in Progress" and specifying the intended type(s) of occupancy classification(s);

3. Anticipated project completion date;

4. The name or company name, physical address, and telephone number of the owner of the property;

5. Website and telephone number of the project developer or development company, if applicable; and

6. The company name and telephone number of the general contractor, or for a demolition site, the demolition contractor.

D. Speed limit traffic signs shall be posted along all public streets and roadways within one hundred linear feet of any major project site so as to be visible to approaching motor vehicle occupants. The signs shall post a speed limit of fifteen mph.

E. The project information signs required by this section shall comply with the latest edition of the Manual for Uniform Traffic Control Devices (MUTCD).

F. The project information sign and motor vehicle speed limit signs must be in place at least twenty-four hours prior to commencement of any construction or demolition activity, and shall remain visible at the site until all work is completed. (Amdt. 1 to Ord. BL2016-223 § 3, 2016; Ord. BL2016-223 § 3, 2016; Ord. BL2015-1016 § 1, 2015)

16.28.240 Interpretation—Expiration—Extensions.

A. A permit issued pursuant to this chapter shall be construed to be a license to proceed with the work and shall not be construed as authority to violate, cancel, alter or set aside any of the provisions of this chapter, nor shall such issuance of a permit prevent the director from thereafter requiring a correction of errors in plans or in construction or of violations of this chapter.

B. Any permit issued shall become invalid unless the work authorized by it shall have been commenced within six months after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of one-hundred eighty days after the time the work is commenced. In no case shall a permit be valid for more than two years after its issuance; provided that for cause, if the work authorized by it is sufficiently under way and is being diligently pursued, one or more extensions of time, for periods not exceeding ninety days each, may be allowed in writing by the director.

C. In the case of a permit issued to demolish a building or structure, such demolition permit shall become invalid unless the work authorized by it shall have been commenced within thirty days after its issuance, or unless the work so authorized shall have been completed within sixty days after work is timely commenced; provided that extensions of time may be allowed as provided in this section. Within thirty days of issuance of any demolition permit, an affidavit shall be submitted to the director certifying the date that demolition has commenced and describing the nature of the work performed to date. All demolition described in the affidavit must comply with the definition set forth in Section 17.04.060. If no such affidavit is submitted within thirty days of issuance, the demolition permit

shall be deemed invalid. (Amdt. 1 to Ord. BL2016-178 § 1, 2016; Ord. BL2016-178 § 1, 2016; Ord. BL2010-613 § 3, 2010; Ord. BL2007-1390 § 16, 2007; Ord. 95-1329 § 2 (part), 1995; prior code § 11-1-50)

16.28.250 Supervision required when.

Whenever a permit is to be issued in reliance upon an affidavit as provided in Section 16.28.080, or whenever the work to be covered by a permit involves construction under conditions which, in the opinion of the director of codes administration, are hazardous or complex, the director shall require that the architect or engineer who signed the affidavit or made the drawings or computations shall supervise such work, be responsible for its conformity with the approved drawings, and forthwith upon its completion make and file with the director a written affidavit that the work has been done in conformity with the approved plans and with the structural provisions of this chapter. In the event such architect or engineer is not available, the owner shall employ in his stead a competent person or agency whose qualifications are approved by the director. (Prior code § 11-1-52)

16.28.260 Change in contractor—Reissuance of permit—Fees.

When a change in a contractor occurs before a job is completed, the contractor who obtains the permits shall notify the codes department in writing. A new permit shall be taken out for the unfinished construction. The contractor that completes the construction shall pay a prorata permit fee based upon the unfinished construction; but in no case, less than the minimum permit fee. (Ord. 98-1445 § 81, 1998)

Chapter 16.32

INSPECTIONS

Sections:

16.32.010	**Required when—Authority of director.**
16.32.020	**Establishment of boundary lines.**
16.32.030	**Successive inspections—When conducted.**
16.32.040	**Plastering—Approval required.**
16.32.050	**Covering structural framework—Approval required.**
16.32.060	**Inspections prerequisite to further work.**

16.32.010 Required when—Authority of director.

A. Before issuing a permit required by Sections 2.80.010 through 2.80.110 and Chapters 16.04, 16.08, 16.28 and 16.36 through 16.56, the director of codes administration may examine or cause to be examined any building for which an application has been received for permit to enlarge, alter, repair, move, demolish or change the occupancy thereof. He shall inspect all buildings and structures, from time to time, during and upon completion of the work for which a permit was issued. He shall make a record of every such examination and inspection and of all violations of Sections 2.80.010 through 2.80.110 and Chapters 16.04, 16.08, 16.28 and 16.36 through 16.56.

B. When deemed necessary by the director of codes administration, he shall make an inspection of materials or assemblies at the point of manufacture or fabrication. He shall make a record of every such examination and inspection and of all violations of abovementioned sections and chapters.

C. The director of codes administration may make or cause to be made the inspections called for by Sections 2.80.010 through 2.80.110 and Chapters 16.04, 16.08, 16.28 and 16.36 through 16.56. He may accept reports of inspectors of recognized inspection services; provided, that after investigation he is satisfied as to their qualifications and reliability. No certificate called for by any provision of Sections 2.80.010 through 2.80.110 or Chapters 16.04, 16.08, 16.28 and 16.36 through 16.56 shall be based on such reports unless the same are in writing and certified by a responsible officer of such service. (Prior code § 11-1-53)

16.32.020 Establishment of boundary lines.

The director of codes administration shall inspect or cause to be inspected at various intervals all construction or work for which a permit is required, and a final inspection shall be made of every building or structure upon completion, prior to the issuance of the certificate of occupancy required by this chapter. Prior to the first inspection, the permittee shall establish the lot lines or boundary of the parcel by the placement of stakes or pins at each corner of the lot. Such markers are to remain in place during the construction. (Prior code § 11-1-54)

16.32.030 Successive inspections—When conducted.

The director of codes administration, upon notification from the permit holder or his agent, shall make the following inspections of buildings and such other inspections as may be necessary, and shall either approve that portion of the construction as completed or shall notify the permit holder or his agent wherein the same fails to comply with the law:

A. Foundation Inspection. The foundation inspection is to be made after trenches are excavated and forms erected.

B. Frame Inspection. The frame inspection is to be made after the roof, all framing, fire-blocking, bracing and insulation is in place and all pipes, chimneys and vents are complete.

C. Final Inspection. The final inspection is to be made after the building is completed and ready for occupancy.

D. Mechanical Rough-In Inspection. The mechanical rough-in inspection is to be made after mechanical equipment and ductwork is in place but before being concealed by walls and/or ceilings.

E. Mechanical Final Inspection. The mechanical final inspection is to be made after the mechanical construction is completed and the building is ready for occupancy. (Prior code § 11-1-55)

16.32.040 Plastering—Approval required.

In all buildings where plaster is used for fire protection purposes, the permit holder or his agent shall notify the director of codes administration after all lathing and backing is in place. No plaster shall be applied until the approval of the director has been received. (Prior code § 11-1-58)

16.32.050 Covering structural framework—Approval required.

No reinforcing steel or structural framework of any part of any building or structure shall be covered or concealed in any manner whatsoever without first obtain-

ing the approval of the director of codes administration, the designing architect or engineer. (Prior code § 11-1-57)

16.32.060 Inspections prerequisite to further work.

No work shall be done on any part of a building or structure beyond the point indicated in each successive inspection without first obtaining the written approval of the director of codes administration. Such written approval shall be given only after an inspection shall have been made of each successive step in the construction as indicated by each of the three inspections indicated in Section 16.32.030. (Prior code § 11-1-56)

Chapter 16.33

RENTAL INSPECTIONS

16.33.010 Authority; intent—Remedial.

This chapter is enacted pursuant to Tennessee Code Annotated § 13-21-301 et seq. and is declared to be remedial to promote the health, safety, and welfare of citizens by providing for the establishment of rental inspection districts and for inspection of residential rental dwelling units that are either deteriorated or in the process of deteriorating for compliance with applicable local housing, building, plumbing, electrical, fire, health or related codes. (Ord. BL2007-1550 § 1, 2007)

16.33.020 Definitions.

[The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:]

(1) "Deteriorated" means any structure or vacant or unimproved lot or parcel in a predominantly built-up neighborhood:

(A) Which, because of physical condition or use, is regarded as a public nuisance at common law or has been declared a public nuisance in accordance with local housing, building, plumbing, electrical, fire, health or related codes;

(B) Which, because of physical condition, use or occupancy is considered an attractive nuisance;

(C) Which, because it is dilapidated, unsanitary, unsafe, vermin-infested or other condition, has been designated by the appropriate agency or department of the municipality as unfit for human habitation or use;

(D) Which is a fire hazard, or is otherwise dangerous to the safety of persons or property;

(E) From which the utilities, plumbing, heating, sewerage or other facilities have been disconnected, destroyed, removed, or rendered ineffective so that the property is unfit for human habitation or use;

(F) Which, by reason of neglect or lack of maintenance, has become a place for accumulation of trash and debris, or a haven for rodents or other vermin;

(G) Which has been tax delinquent for a period of at least three years; or

(H) Which has not been rehabilitated within the time constraints placed upon the owner or party in interest by the director.

(2) "Director" means the director of the department of codes administration, or such other officers and employees of the department of codes administration as may be charged with the administration of this chapter, or the director's duly authorized representative.

(3) "Dwelling" means any building or structure, or part thereof, used and occupied for human occupation or use or intended to be so used, and includes any outhouses and appurtenances belonging thereto or usually enjoyed therewith.

(4) "Dwelling unit" means a building or structure or part thereof that is used for a home or residence by one or more persons who maintain a household.

(5) "Municipality" means the Metropolitan Government of Nashville and Davidson County.

(6) "Owner" means the holder of the title to real property and every mortgagee of record.

(7) "Parties in interest" means all individuals, associations, corporations and others who have interests of record in a structure and any who are in possession thereof.

(8) "Residential rental dwelling unit" means a dwelling unit that is leased or rented to one or more tenants. However, a dwelling unit occupied in part by the owner thereof shall not be construed to be a residential rental dwelling unit unless otherwise provided by zoning ordinance.

(9) "Structure" means any dwelling or place of public accommodation or vacant building or structure suitable as a dwelling or place of public accommodation. (Ord. BL2007-1550 § 2, 2007)

16.33.030 Director.

The department of codes administration, acting through its director, shall perform the duties authorized by this

chapter. (Ord. BL2007-1550 § 3, 2007)

16.33.040 Residential rental inspection districts authorized.

(1) Pursuant to Tennessee Code Annotated § 13-21-302, the director is authorized to inspect residential rental dwelling units that are either deteriorated or in the process of deteriorating for compliance with applicable housing, building, plumbing, electrical, fire, health or related codes. The residential rental dwelling units shall be located in a residential rental inspection district. Residential rental inspection districts shall be established by ordinance based upon a finding that:

(A) There is a need to protect the public health, safety and welfare of the occupants of dwelling units inside the designated residential rental inspection district;

(B) The residential rental dwelling units within the designated residential rental inspection district are either deteriorated or in the process of deteriorating or the residential rental dwelling units are in the need of inspection by the municipality to prevent deterioration, taking into account the number, age and condition of residential dwelling rental units inside the proposed residential rental inspection district; and

(C) The inspection of residential rental dwelling units inside the residential rental inspection district is necessary to maintain the health, safety and welfare of tenants and other residents living in the proposed residential rental inspection district. Nothing in this section shall be construed to authorize a municipality-wide residential rental inspection district and the boundaries of the residential rental inspection district shall be limited to such areas that meet the criteria set forth in this section.

(2) No residential rental inspection district shall be established until and unless the location and extent thereof shall have been submitted to the planning commission in accordance with Metropolitan Charter section 11.505.

(3) Any residential rental inspection district established pursuant to the authority of this chapter shall exist for a period not to exceed ten years from the date of adoption of the ordinance creating such residential rental inspection district. Nothing contained herein shall preclude the re-establishment of any residential rental inspection district by ordinance as authorized by this chapter.

(4) Any residential rental inspection district established pursuant to this chapter shall be subject to removal from its designation as a rental inspection district by vote of the metropolitan council upon adoption of an ordinance amending section 16.33.140 of this chapter. (Ord. BL2007-1550 § 4, 2007)

16.33.050 Notice.

The director shall make reasonable efforts to notify owners and parties in interest of residential rental dwelling units in the designated residential rental inspection district regarding the adoption of the residential rental inspection ordinance. The director shall provide a summary of the provisions of the residential rental inspection ordinance to owners and parties in interest of residential rental dwelling units in the designated residential rental inspection district. (Ord. BL2007-1550 § 5, 2007)

16.33.060 Owners duty to notify director.

Owners and parties in interest of dwelling units in a residential rental inspection district shall notify the director in writing if the dwelling unit is used for residential rental purposes. The director may develop a form for such purposes. There shall be no registration fee or a fee of any kind associated with the written notification. The director shall not require that the written notification from the owner or party in interest of a dwelling unit subject to this chapter be provided to the director in less than 60 days after the adoption of an ordinance establishing a residential rental inspection district. However, there shall be no penalty for the failure of an owner or party in interest of a residential rental dwelling unit to comply with the provisions of this section, unless and until the director provides actual or written notice to the property owner or party in interest. Notice sent by regular first class mail to the last known address of the owner or party in interest shall be deemed compliance with this section. (Ord. BL2007-1550 § 6, 2007)

16.33.070 Inspections.

Upon establishment of a residential rental inspection district in accordance with this part, the director may, in conjunction with the written notifications as provided for in this part, proceed to inspect dwelling units that are either deteriorated or in the process of deteriorating located in the designated residential rental inspection district. The director is authorized to inspect residential rental dwelling units that are either deteriorated or in the process of deteriorating to determine if the dwelling units are being used as a residential rental property and to determine if the dwelling units are in compliance with applicable housing, building, plumbing, electrical, fire, health or related codes. (Ord. BL2007-1550 § 7, 2007)

16.33.080 Periodic inspections.

Except as provided in section 16.33.090, following the initial inspection of a residential rental dwelling unit found to be deteriorated or in the process of deteriorat-

ing, the director may inspect periodically any residential rental dwelling unit that is deteriorated or in the process of deteriorating that is not otherwise exempted by this chapter. (Ord. BL2007-1550 § 8, 2007)

16.33.090 Follow-up inspections.

Following the initial or periodic inspection of a residential rental dwelling unit found to be deteriorated or in the process of deteriorating and which is subject to this chapter, the director has the authority to require the owner or party in interest of such dwelling unit to submit to such follow-up inspections of the dwelling unit as the director deems necessary, until such time as the dwelling unit is brought into compliance with the provisions of all applicable housing, building, plumbing, electrical, fire, health or related codes. (Ord. BL2007-1550 § 9, 2007)

16.33.100 Exemption.

Following the initial or periodic inspection of a residential rental dwelling unit found to be deteriorated or in the process of deteriorating, and provided that there are no violations of applicable codes and ordinances, or such violations are remedied in a timely manner, the director shall provide to the owner or party in interest of such residential rental dwelling unit an exemption from this chapter for a minimum of four years. For the purposes of this section, timely manner shall be construed to mean less than 90 days after the owner has been given notice of violation. If a residential rental dwelling unit has been issued a certificate of occupancy within the last four years, an exemption shall be granted for a minimum period of four years from the date of the issuance of the certificate of occupancy. If the residential rental dwelling unit becomes in violation of housing, building, plumbing, electrical, fire, health or related codes during the exemption period, the director may revoke the exemption granted by this section. (Ord. BL2007-1550 § 10, 2007)

16.33.110 Powers of director.

The director is authorized to exercise such powers as may be necessary or convenient to carry out and effectuate the purposes and provisions of this chapter, including the following powers to:

(1) Investigate conditions in the municipality in order to determine which residential rental dwelling units therein are deteriorated or in the process of deteriorating;

(2) Administer oaths, affirmations, examine witnesses, issue subpoenas and receive evidence;

(3) Enter upon the premises for the purpose of making examinations and inspections; provided, the director may enter inside the dwelling unit only with the consent of the persons in possession, or with a validly issued search warrant, or in the event of an emergency presenting an immediate threat to the health, safety, and welfare of the persons in possession. Such entry shall comply in all respects with Amendment 4 to the Constitution of the United States as well as Article I, Section 7, of the Constitution of Tennessee. Such entry shall be made in such manner as to cause the least possible inconvenience to the persons in possession;

(4) Appoint and fix the duties of such officers, agents and employees as the director deems necessary to carry out the purposes of this chapter; and

(5) Delegate any of such director's functions and powers under this chapter to such officers and agents as the director may designate. (Ord. BL2007-1550 § 11, 2007)

16.33.120 No fee schedule.

No fee schedule shall be established to administer the provisions of this chapter.

In addition, no fee shall be charged to an owner or party in interest for an inspection of a dwelling unit subject to this chapter who has submitted a written notification to the director as to the identity of such unit owner or party in interest as provided in [section] 16.33.060, nor shall a fee be charged for a subsequent inspection of a residential dwelling unit that has received an exemption from the residential inspection ordinance for a minimum of four years pursuant to [section] 16.33.100. (Ord. BL2007-1550 § 12, 2007)

16.33.130 Appeals.

An owner or party in interest may appeal any order of the director issued pursuant to this chapter to the board of property standards and appeals. The owner or party in interest may request and shall be granted a hearing before the board, provided, that such person shall file in the office of the director a written petition completed pursuant to the rules, regulations and requirements of the board, within twenty days after the date on which the order was served upon the owner or party in interest. (Ord. BL2007-1550 § 13, 2007)

16.33.140 District designation.

The following areas meet the criteria set out in Tennessee Code Annotated § 13-21-302(a)(2) and section 16.33.040 of this chapter and are hereby designated as the geographic areas known as rental inspection districts:

a. Urbandale - Nations.
b. Sylvan Heights.
c Hadley Washington - Meharry.
d. North Nashville - Buena Vista - Metrocenter.

e. Napier - Trimble - Wedgewood/Houston.
f. Airport - Murfreesboro Pike.
g. Edgefield - Shelby Hills.
h. Cleveland Park - McFerrin Park.
g. Greenwood - Eastwood.
h. Vanderbilt - 21st.
i. Hermitage.
j. South Madison.
k. Madison Park.
l. Edenwold.
m. Holder Drive.
n. Tusculum Road.

The rental inspection districts as designated are illustrated by the rental inspection districts summary map prepared by the metropolitan planning department which is hereby incorporated into this section by reference and filed with the metropolitan clerk.

The director shall have the authority to schedule a phased implementation of this ordinance over a three year period for the rental inspection districts described above. (Ord. BL2016-125 § 1, 2016; Ord. BL2007-1550 § 14, 2007)

16.33.150 Powers supplemental.

Nothing in this chapter shall be construed to abrogate or impair the powers of the courts or of any department of the metropolitan government to enforce any provisions of its charter or its ordinances or regulations, nor to prevent or punish violations thereof, and the powers conferred by this chapter shall be in addition and supplemental to the powers conferred by any other law. (Ord. BL2007-1550 § 15, 2007)

16.33.160 Failure to comply—Penalty.

An owner or party in interest, upon willful failure or refusal to comply with the notice requirements authorized by this chapter, shall be subject to a penalty of fifty dollars per day for each day of violation. (Ord. BL2007-1550 § 16, 2007)

16.33.170 Required registration.

a. It shall be the duty of all landlords of one or more dwelling units to register with the department of codes administration on forms provided by the director of codes administration, through the permit application portal, or through whichever means are provided to the public for such purpose. Information required upon registration shall include the following: the landlord or landlord's agent's name, telephone number, and physical address, which physical address may not be a post office box, as well as the street address and unit number, as appropriate, for each dwelling unit that the landlord owns, leases, or subleases, or has the right to own, lease, or sublease. A fee of ten dollars may be collected upon registration and charged annually upon renewal of registration to cover the administration of this section.

b. If information required under subdivision (a) changes, landlords or their agents are required to update the information with the department of codes administration within thirty days of a change. Whenever there is a sale or change in ownership of a dwelling unit, the original landlord or the landlord's agent is required to update ownership information within thirty days of a change in ownership.

c. If a landlord fails to register or fails to notify the department of codes administration of a change of ownership within thirty days of the change, a fine of fifty dollars per week may be assessed until the landlord comes into compliance with this section.

d. Prior to the assessment of any fine under subsection (c), the department of codes administration shall give the landlord the opportunity to appear at a hearing concerning the landlord's failure to register or timely send notification of a change of ownership. The department of codes administration shall send by certified mail written notice containing the date, time, and place of the scheduled hearing to the landlord at least fifteen days prior to the hearing date. (Ord. BL2023-1839 § 1, 2023)

Chapter 16.36

CERTIFICATES OF OCCUPANCY

Sections:

16.36.010	**Prerequisite for occupancy.**
16.36.020	**Issuance—Contents.**
16.36.030	**Temporary certificates.**
16.36.040	**Existing buildings—Examination and inspection.**
16.36.050	**Green permits for sustainable design.**

16.36.010 Prerequisite for occupancy.

No new building shall be occupied and no change in occupancy of a building or part of a building shall be made until after the department of codes administration shall have issued a certificate of occupancy therefor. (Prior code § 11-1-59)

16.36.020 Issuance—Contents.

A. Upon completion of a building erected in accordance with approved plans, and after the final inspection and upon application therefor, the department of codes administration shall issue a certificate of occupancy stating the nature of the occupancy permitted, the number of persons for each floor when limited by law and the allowable load per square foot for each floor in accordance with the provisions of Sections 2.80.010 through 2.80.110 and Chapters 16.04, 16.08, 16.28 and 16.36 through 16.56.

B. The metropolitan department of codes administration shall have three days from the time they are notified to inspect a building or dwelling for a use and occupancy permit. If a violation is found, the permit shall be withheld. If the inspection is not made within three working days, the permit shall be deemed to be granted and the permit shall be issued by the department. (Prior code § 11-1-60)

16.36.030 Temporary certificates.

A temporary certificate of occupancy may be issued for a portion or portions of a building which may safely be occupied prior to final completion of the building. (Prior code § 11-1-61)

16.36.040 Existing buildings—Examination and inspection.

A certificate of occupancy for any existing building shall be obtained by applying to the department of codes administration and supplying the information and data necessary to determine compliance with Sections 2.80.010 through 2.80.110 and Chapters 16.04, 16.08, 16.28 and 16.36 through 16.56 for the occupancy intended. Where necessary, in the opinion of the director, two sets of detailed drawings or a general inspection or both may be required. When, upon examination and inspection, it is found that the building conforms to the provisions of this chapter for such occupancy, a certificate of occupancy shall be issued. (Prior code § 11-1-62)

16.36.050 Green permits for sustainable design.

A. In addition to the certificate for occupancy required pursuant to this chapter, the department of codes administration shall issue a "green permit" to any building meeting the sustainable design protocol as provided in this section.

B. Developers seeking to obtain a green permit shall notify the department of codes administration of their intent in writing and provide proof of green building permit registration at the time they apply for a building permit pursuant to Chapter 16.28 of the metropolitan code.

C. Upon completion of the building, the department of codes administration shall issue a green certificate of occupancy provided the following conditions have been satisfied:

1. For a residential development, the applicant shall provide proof of certification from one of the following sustainable design protocols:

a. The U.S. Green Building Council's LEED certification program

b. The "EarthCraft House" green building program.

2. For a commercial development, the applicant shall provide proof of certification from the U.S. Green Building Council's LEED certification program, and shall provide proof of compliance with the U.S. Green Building Council's water conservation qualifier, requiring that the building reduce potable water consumption by twenty percent.

D. In the event a temporary use and occupancy permit is issued pending completion of the green building certification for the project, and such green building certification is not obtained within one year from the date the temporary use and occupancy permit is issued, the department of codes administration shall issue a permanent use and occupancy permit provided the requirements of Section 16.36.020 are satisfied. Once the project finally obtains its green building certification, the department of codes administration shall issue a green certificate of occupancy, as well.

E. The department of codes administration is authorized to develop and implement additional green building certification programs subject to approval of the council

by resolution receiving twenty-one affirmative votes. (Amdts. 1, 2 to Ord. BL2008-217 § 1, 2008; Ord. BL2008-217 § 1, 2008)

Chapter 16.40

FLOOR LOADS

Sections:

16.40.010 **Occupancies exceeding safe capacity prohibited.**

16.40.020 **Computation of safe loads—Responsibility of owner.**

16.40.030 **Posting safe loads in certain buildings.**

16.40.040 **Exceeding posted capacity prohibited.**

16.40.010 Occupancies exceeding safe capacity prohibited.

No existing or new building shall be occupied for any purpose which will cause the floors thereof to be loaded beyond their safe capacity. The director of codes administration may permit occupancy of a building for mercantile, commercial or industrial purposes, by a specific business, when he is satisfied that such capacity will not thereby be exceeded. (Prior code § 11-1-63)

16.40.020 Computation of safe loads—Responsibility of owner.

It shall be the responsibility of the owner, agent, proprietor or occupant of Groups S and F occupancies or any occupancy where excessive floor loading is likely to occur to employ a competent architect or engineer in computing the safe load capacity. All such computations shall be accompanied by an affidavit from the architect or engineer stating the safe allowable floor load on each floor in pounds per square foot uniformly distributed. It shall thereupon be filed as a permanent record of the department of codes administration. (Prior code § 11-1-64)

16.40.030 Posting safe loads in certain buildings.

In every building or part of a building used for business storage, industrial or hazardous purposes, the safe floor loads, as approved by the director of codes administration, shall be marked on plates of approved design which shall be supplied and securely affixed by the owner of the building in a conspicuous place in each story to which they relate. Such plates shall not be removed or defaced, and if lost, removed or defaced, shall be replaced by the owner of the building. (Prior code § 11-1-65)

16.40.040 Exceeding posted capacity prohibited.

No owner shall place, or permit to be placed, on any floor of a building, a greater load than the safe load so determined and posted as provided in this chapter. (Prior code § 11-1-66)

Chapter 16.44

NOISE CONTROL*

Sections:

16.44.010 Construction noise.

16.44.010 Construction noise.

Construction noise is governed by the provisions of Chapter 9.30 of this Code. (Amdt. 1 to Ord. BL2019-1631 § 4, 2019; Ord. BL2019-1631 § 4, 2019)

---

*__Editor's note—__Ord. BL2019-1631, § 1, adopted August 20, 2019, repealed the former Ch. 16.44, §§ 16.44.010—16.44.060, which pertained to similar subject matter and derived from prior Code §§ 11-1-17.8—11-1-17.10. Section 4 of said ordinance enacted a new Ch. 16.44 as set out herein.

Chapter 16.48

PRESERVATION OF EXISTING BUILDINGS

Sections:

16.48.010	**Variances authorized when—Guidelines.**
16.48.020	**Exemptions for historic buildings.**

16.48.010 Variances authorized when—Guidelines.

A. To promote conservation and rehabilitation of existing buildings, alterations, repairs, or change of use and occupancy may be made where such rehabilitation conforms to intent of this code as established by the director. The director may exercise discretionary authority, subject to appeal, to vary or modify in whole or in part the application of any provision of this code where compliance with such provision would create practical difficulty or undue hardship, and further subject to Sections 3405, D102.1, and D102.2 of the Standard Building Code.

B. Such variance or modification shall be consistent with the intent of this code, which is to achieve acceptable levels of safety for the general public. The director may require documented justification for any request for such variances or modifications from any code provision to be prepared in written form, supported by technical or other data deemed necessary and that proposal shall become a part of the permanent records of the department of codes administration.

C. The director may adopt a committee to develop such rules, regulations and guidelines such as, but not limited to, "Chapter 34, Section 3409 Compliance Alternatives, of the Standard Building Code" as may be necessary to carry out the intent of this chapter, which is to allow discretion and flexibility in the rehabilitation of existing buildings.

D. The director shall create a rehab committee that shall meet on as needed basis. The members of committee shall be the assistant director of the codes department, the chief plans examiner or the chief building inspector and the assistant fire marshal or his designated deputy. The decision of the rehab committee may be subject to Chapter 2.80 (the board of fire and building appeals). (Ord. BL2002-1142 § 28, 2002; Ord. 95-1487 § 85, 1995; prior code § 11-1-76)

16.48.020 Exemptions for historic buildings.

The provisions of this code relating to the construction, alteration, repair, enlargement, restoration, relocation or moving of buildings or structures shall not be mandatory for existing buildings or structures identified and classified by the state or local jurisdiction as historic buildings, or those built prior to 1933, when such buildings or structures are judged by the director to be safe and in the public interest of health, safety and welfare regarding any proposed alteration, repair, enlargement, restoration, relocation or moving within the fire district. The application must submit complete architectural and engineering plans and specifications bearing the seal of a registered professional engineer or architect. (Prior code § 11-1-77)

Chapter 16.52

UNSAFE BUILDINGS

Sections:

16.52.010—16.52.060 Reserved.

16.52.070 Notice to vacate.

16.52.010—16.52.060 Reserved.

16.52.070 Notice to vacate.

Whenever an occupied building or structure has been condemned or ordered demolished or repaired by the director of codes administration, he shall notify the tenants of such action in writing, and order such tenants to vacate the premises within a specified time, if necessary, or to do and perform such acts or works as may be necessary to fulfill the orders set forth in such notice. It is unlawful for any tenant to fail or refuse to promptly comply with any such notice or order. (Prior code § 11-1-72)

Chapter 16.56

FLOOD CONTROL REQUIREMENTS

Sections:

16.56.010	**Building permit applications—Review conditions.**
16.56.020	**Subdivision proposals—Review conditions.**
16.56.030	**Water supply and sanitary sewage systems.**

16.56.010 Building permit applications—Review conditions.

The director of codes administration shall review all building permit applications for new construction or substantial improvements to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is in a location that has a flood hazard, any proposed new construction or substantial improvement, including prefabricated and mobile homes, must:

A. Be designed (or modified) and anchored to prevent flotation, collapse, or lateral movement of the structure;

B. Use construction materials and utility equipment that are resistant to flood damage; and

C. Use construction methods and practices that will minimize flood damage. (Prior code § 11-1-87)

16.56.020 Subdivision proposals—Review conditions.

The metropolitan planning commission shall review subdivision proposals and other proposed new developments to assure that all such proposals are consistent with the need to minimize flood damage, and all public water utilities and facilities, such as sewer, gas, electrical, and water systems are located, elevated and constructed to minimize flood damage. (Prior code § 11-1-88)

16.56.030 Water supply and sanitary sewage systems.

The director of water and sewerage services shall require new or replacement water supply systems and/or sanitary systems to be designed to minimize or eliminate infiltration of floodwaters into the systems and discharges from the systems into floodwaters, and require on-site disposal systems to be located so as to avoid impairment of them or contamination from them during flooding. (Prior code § 11-1-89)

Chapter 16.60

SUSTAINABLE DEVELOPMENT DESIGN STANDARDS

Sections:

16.60.010	**Policy.**
16.60.020	**Purpose.**
16.60.030	**Organizations affected.**
16.60.040	**Definitions.**
16.60.050	**Policy and goals.**
16.60.060	**Procedures and responsibilities.**
16.60.070	**Budgeting and financing.**
16.60.080	**Training.**
16.60.090	**Implementation.**
16.60.100	**Exemptions.**
16.60.110	**Continued monitoring.**

16.60.010 Policy.

1. The metropolitan government shall integrate green and/or sustainable building principles and practices into the design, construction, and operations of all metropolitan government facilities, and metropolitan government-funded projects to the extent described in section 16.60.050, at a minimum. Furthermore, the metropolitan government shall provide leadership and guidance to encourage the application of green building practices in private sector development. This policy is intended to yield long-term cost savings to the government's taxpayers by implementing substantial improvements in life-cycle performance and reduced life-cycle costs.

2. In addition, in considering purchases of land for future development, the metropolitan government shall evaluate its ability to develop the property in ways that enhance sustainability and reduce potential negative environmental impacts from development.

3. The LEEDTM Green Building Rating Systems in effect at the time of enactment of this chapter are hereby adopted as the standard for sustainable building principles and practices of the metropolitan government. (Ord. BL2007-1374 § 1, 2007)

16.60.020 Purpose.

The purpose of the metropolitan government's policy on sustainable building is to require the government's commitment to environmental, economic, and social stewardship, to yield cost savings to the metropolitan government taxpayers through reduced operating costs, to provide healthy and productive work environments for staff and visitors, and to contribute to the government's goals of protecting, conserving, and enhancing the region's environmental resources. Additionally, the metropolitan government shall help to set a community standard of sustainable building. (Ord. BL2007-1374 § 1, 2007)

16.60.030 Organizations affected.

The provisions of this chapter shall be applicable to all metropolitan government departments, agencies, boards and commissions and their contractors responsible for planning, designing, developing, constructing and managing metropolitan government-owned facilities and buildings. (Amdt. 1 to Ord. BL2007-1374 § 1, 2007; Ord. BL2007-1374 § 1, 2007)

16.60.040 Definitions.

[The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:]

"Addition" means new construction projects that expand the square footage of occupied area of an existing building by adjoining structures, adding stories, or renovating previously unoccupied or unconditioned space.

"Building and facility" means any metropolitan government owned or leased structure that encloses a space used for sheltering any occupancy.

"Green and/or sustainable building principles and practices" means those principles and practices consistent with the LEEDTM Green Building Rating Systems.

"LEEDTM" is an acronym for Leadership in Energy and Environmental Design. The LEEDTM rating system is a voluntary, consensus-based green building rating system developed by the U.S. Green Building Council (USGBC). It is based on existing, proven technology and evaluates environmental performance from a "whole building" perspective. LEEDTM is a third party verified system designed for rating new and existing commercial, institutional, and multi-family residential buildings. It contains prerequisites and credits in six categories: Sustainable site planning, improving energy efficiency, conserving materials and resources, embracing indoor environmental quality, safeguarding water, and innovation in design. There are four rating levels: Certified, Silver, Gold, and Platinum.

"LEEDTM Project Scorecard" is a checklist for identifying a project potential for sustainable design opportunities early in the design.

"LEEDTM Reference Guide" means the supporting document to the LEEDTM Green Building Rating System. The guide is intended to assist project teams in understanding LEEDTM criteria and the benefits of complying with each credit. The guide includes examples of strategies that can be used in each category, case studies of

buildings that have implemented these strategies successfully, and additional resources that will provide more information.

"Life cycle cost analysis" means an inclusive approach to costing a facility or group of facilities that encompasses planning, design, construction, operation and maintenance over the useful life of the facilities and finally any decommissioning or disassembly costs. Life cycle cost analysis looks at the net present value of design options as investments. The goal is to achieve the highest, most cost-effective environmental performance possible over the life of the project.

"Metropolitan Government Sustainable Development Design Guidelines" means the LEEDTM Green Building Rating Systems adopted by the metropolitan government pursuant to section 16.60.010 of this chapter.

"Sustainable building" means the integration of building materials and methods that promote environmental quality, economic vitality, and social benefit through the design, construction and operation of the built environment. Sustainable building merges sound, environmentally responsible practices into one discipline that looks at the environmental, economic and social effects of a building or built project as a whole. Sustainable design encompasses the following broad topics: efficient management of energy and water resources, management of material resources and waste, protection of environmental quality, protection of occupant health and indoor environmental quality, reinforcement of natural systems, and integrating the design approach. (Ord. BL2007-1374 § 1, 2007)

16.60.050 Policy and goals.

1. It is the policy of the metropolitan government to finance, plan, design, construct, manage, maintain, and decommission its facilities and buildings to be sustainable. This chapter shall apply to new construction and additions, for which the planning and construction commences on or after January 1, 2020. For new construction, this chapter shall apply to projects which exceed five thousand gross square feet of occupied space or for which the total project cost exceeds two million dollars. For additions to existing buildings or facilities, this chapter shall only apply to projects that add five thousand or more gross square feet of occupied space, LEEDTM certification requirements shall only apply to the scope of the addition itself.

2. The LEEDTM rating system and reference guide, as enacted and established as of the effective date of this ordinance, shall be used as a guide for design and a measuring tool to determine what constitutes sustainable building by national standards.

3. Project teams are required to pursue LEEDTM certification through the U.S. Green Building Council and develop a strategy to achieve LEEDTM Silver level rating of the most applicable LEEDTM rating system for buildings outside of the Urban Services District (USD) and LEEDTM Gold level rating of the most applicable LEEDTM rating system for buildings within the USD. (Amdt. 1 to Ord. BL2019-1599 § 2, 2019; Ord. BL2019-1599 § 2, 2019; Ord. BL2007-1374 § 1, 2007)

16.60.060 Procedures and responsibilities.

1. The metropolitan government departments, agencies, boards or commissions undertaking a construction project subject to the provisions of this chapter and the department of codes administration are responsible for ensuring that facilities and buildings comply with section 16.60.050.

2. The department of codes administration is further responsible for coordinating with metropolitan government departments any educational and technical resources available that support and promote sustainable design and construction of metropolitan government facilities.

3. Project managers for projects pursuing LEEDTM certification are required to submit proof of LEEDTM registration and a LEEDTM scorecard indicating all points which a project intends to pursue to the department of codes administration at the time an application for the building permit is filed. Without submission of the aforementioned LEEDTM proof of registration and scorecard, the director of the department of codes administration shall hold the building permit application until said documents are provided evidencing that the project is pursuing LEEDTM Silver or Gold certification. (Amdt. 1 to Ord. BL2019-1599 § 2, 2019; Ord. BL2019-1599 § 2, 2019; Ord. BL2007-1374 § 1, 2007)

16.60.070 Budgeting and financing.

All capital construction which falls under this policy is required to budget LEEDTM design standards in the development of a metropolitan government funded facility. Budget planning and life cycle cost analysis to achieve LEEDTM Silver or Gold rating is required. (Amdt. 1 to Ord. BL2019-1599 § 3, 2019; Ord. BL2019-1599 § 3, 2019; Ord. BL2007-1374 § 1, 2007)

16.60.080 Training.

Metropolitan government departments, agencies, boards and commissions subject to the provisions of this chapter shall coordinate the LEEDTM training for persons managing the construction of their respective projects. (Ord. BL2007-1374 § 1, 2007)

16.60.090 Implementation.

1. The sustainable development design standards shall be forwarded to the metropolitan department of codes administration for review consistent with the above referenced policy objectives.

2. The purchasing agent shall assist and review all request for proposals (RFP) and invitations to bid (ITB) documents to ensure consistency with this article. (Ord. BL2007-1374 § 1, 2007)

16.60.100 Exemptions.

1. The metropolitan government sustainable development design guidelines of achieving LEEDTM Gold status for buildings within the USD shall not apply to current metropolitan government facilities that have been approved as part of the fiscal year 2019-2020 capital spending plan for planning, land acquisition and/or construction. However, these projects shall still implement metropolitan government sustainable development design guidelines and strategies to the maximum extent possible and practicable. Design guidelines of achieving LEEDTM Silver status shall continue to apply to metropolitan government facilities outside of the USD.

2. Metropolitan government facility construction projects that are to remain predominately unoccupied or to predominately serve specialized functions are not subject to the government's sustainable development design guidelines. For purposes of this subsection, "specialized functions" include thermal transfer functions, solid and/or toxic waste disposal functions, water and wastewater treatment functions, warehouse and/or storage functions, and mechanical functions. The director of the department of codes administration shall make a determination as to whether a facility construction project is to serve a predominately specialized function using the meaning of the phrase contained in this subsection.

3. Even though projects may become exempt from the government's required sustainable development design guidelines, project teams are required to complete a LEEDTM Project Scorecard for each project as an evaluation of a projects sustainable design potential. Project teams are encouraged to apply the relevant portions of metropolitan government sustainable development design guidelines and to develop goals that increase the environmental, social, and economic benefits of the project. The department of codes administration shall retain the LEEDTM certification status of each construction project subject to the provisions of this chapter. (Amdt. 1 to Ord. BL2019-1599 § 4, 2019; Ord. BL2019-1599 § 4, 2019; Ord. BL2007-1374 § 1, 2007)

16.60.110 Continued monitoring.

A. It shall be the duty of the metropolitan government department, agency, board, or commission having control over a building or facility that was constructed or renovated using the LEED sustainable building rating system pursuant to this chapter to provide information detailing the environmental performance and operation of the building or facility for the previous calendar year. This information shall be made available to the public on metropolitan government's website no later than June 30 of each year.

B. The information required by subsection A. of this section shall include, but not be limited to, the following for each LEED facility:

1. The costs for electricity, natural gas, and water for the previous calendar year;

2. The building or facility's energy and water usage in kilowatt hours, therms, and gallons (as applicable) for the previous calendar year compared to both a non-LEED certified building/facility of similar size and use within the area of the metropolitan government and to the current Commercial Buildings Energy Consumption Survey (CBECS) Energy Use Intensity (EUI) benchmark for similar building type;

3. The estimated energy and water cost savings for the previous calendar year compared to a non-LEED certified building/facility of similar size and use within the area of the metropolitan government;

4. The square footage of both the LEED building and the non-LEED comparison building. (Ord. BL2023-72 § 1, 2023; Amdt. 1 to Ord. BL2013-381 § 1, 2013; Ord. BL2013-381 § 1, 2013)

Chapter 17.04

GENERAL PROVISIONS AND DEFINITIONS

Sections:

17.04.010	**Title and purpose.**
17.04.020	**Applicability.**
17.04.030	**Exceptions.**
17.04.040	**Severability.**
17.04.050	**Rules for construction of language.**
17.04.055	**Fees, in-lieu contributions and other assessments, estimates or payments.**
17.04.060	**Definitions of general terms.**

17.04.010 Title and purpose.

A. Title and Citation. The ordinance codified in this title shall be known as "the Zoning Code for Metropolitan Nashville and Davidson County," and may be cited and referred to herein as "this Zoning Code."

B. Purpose and Authority. This Zoning Code is enacted pursuant to Articles 2 and 20 of the Charter of the Metropolitan Government of Nashville and Davidson County and Title 13 of the Tennessee Code Annotated. This title is designed to implement the goals and objectives of Concept 2010: A General Plan for Nashville and Davidson County and its associated subarea and functional plans. Created by this title are a diverse range of zoning districts which establish appropriate land uses and associated standards of development needed to implement the land use policies of the General Plan. In conjunction with this title an official zoning map assigns an appropriate zoning classification to all properties to which this title is applicable. Also established by this title are special overlay districts, including a planned unit development district, which are intended to address specific aspects of land use control or design not easily accomplished by conventional zoning techniques. This title further establishes development standards which are designed to protect the value and integrity of neighboring properties, enhance the general character and appearance of the community, reinforce the central business district, and provide for a reasonable balance between efficient utilization of land, protection of this community's environmental resources and assuring the operational integrity of streets. Also established in this title are those rules and procedures deemed necessary and appropriate to administer and enforce the provisions of this title, so as to protect the public health, safety, morals, convenience, order, prosperity and general welfare of the present and future inhabitants of Metropolitan Nashville and Davidson County. (Ord. 96-555 § 1.1, 1997)

17.04.020 Applicability.

A. General. The provisions of this Zoning Code shall apply to the development of all land within the jurisdiction of the Metropolitan Government of Nashville and Davidson County, exclusive of incorporated municipalities. No development shall be undertaken without prior authorization pursuant to this Zoning Code.

B. Minimum Requirements. The requirements of this Zoning Code shall be considered as the minimum requirements for the promotion of the public health, safety and general welfare. It is not intended to interfere with or abrogate or annul any easements, covenants or other agreements between parties. Where this Zoning Code imposes a greater restriction upon property than that imposed by other resolutions, rules, regulations, easements, covenants or agreements, the provisions of this Zoning Code shall govern.

C. New Development. Upon the effective date of this Zoning Code or any subsequent amendment, any new building or other structure or any tract of land shall be used, constructed or developed only in accordance with all applicable provisions of this Zoning Code.

D. Existing Development. Any existing use, lot, building or other structure legally established prior to the effective date of this Zoning Code that does not comply with any of its provisions shall be subject to the regulations of the nonconforming provisions of this Zoning Code stipulated in Article XIV of Chapter 17.40, except as provided in the Downtown Code, Chapter 17.37. (Ord. BL2009-586 § 1(Exh. A, § 2), 2010; Ord. 96-555 § 1.2, 1997)

17.04.030 Exceptions.

A. Previously Issued Permits and Exceptions. Any variance, exception or permit authorized before the effective date of this Zoning Code may be continued, changed, extended, enlarged or structurally altered only as provided in this title.

1. Any permit issued before the effective date of this Zoning Code or subsequent amendment shall remain in effect provided that construction is begun within six months from the date of issuance of the permit. Construction shall mean physical improvements such as, but not limited to, water and sewer lines, footings, and/or foundations have been developed on the site. Clearing, grading, the storage of building materials, or the placement of temporary structures shall not constitute beginning construction.

2. Where no limitation as to duration of the use was imposed at the time of authorization the use may be continued. When the use was granted for a specific period of time, the applicable provisions of this code shall be applied upon the expiration of that time.

3. In no event shall such use be changed except to a conforming use or a nonconforming use as provided for in Section 17.40.650C. A change of use is a change to another use either under the same use group or any other use group or major class of use. A change in occupancy or ownership shall not by itself constitute a change in use.

B. Temporary Dwelling as a Result of Natural Disaster. The zoning administrator may issue a temporary permit for a mobile home as a single-family dwelling unit on any lot previously occupied by a permanent dwelling that was destroyed by natural causes and is being reconstructed. The zoning administrator may impose conditions upon the issuance of the permit to provide for the least impact on surrounding property. Permits shall be for a period of time not to exceed three months. The zoning administrator may review and grant an extension of time not to exceed one additional three-month period. (Ord. 96-555 § 1.3, 1997)

17.04.040 Severability.

Should any article, section, clause or provision of this Zoning Code be declared by a court of competent jurisdiction to be unconstitutional or invalid, such decision shall not affect the validity of the ordinance codified in this title as a whole or any part thereof other than the part declared to be unconstitutional or invalid, each article, section, clause and provision hereof being declared severable. (Ord. 96-555 § 1.4, 1997)

17.04.050 Rules for construction of language.

A. General. All provisions, terms, phrases and expressions contained in this Zoning Code shall be construed in order that the true intent and meaning of the metropolitan county council may be fully carried out.

B. Computation of Time. The time within which an act is to be done shall be computed by excluding the first and including the last day; if the last day is a Saturday, Sunday or legal holiday, that day shall be excluded. In the computation of time for public hearing notice, both the first day (day of the advertisement) and the last day (day of the hearing) shall be excluded. The following time-related words shall have the meanings ascribed below.

1. "Day" means a calendar day unless working day is specified.

2. "Week" means seven calendar days.

3. "Month" means a calendar month.

4. "Year" means a calendar year, unless otherwise indicated.

C. Conjunctions. Unless the context clearly indicates to the contrary, conjunctions shall be interpreted as follows:

1. "And" indicates that all connected items, conditions, provisions or events shall apply.

2. "Or" indicates that one or more of the connected items, conditions, provisions or events shall apply.

3. "Either or" indicates that the connected items, conditions, provisions or events shall apply singularly but not in combination.

D. Delegation of Authority. The head of a department or other officer may authorize subordinates to perform the required acts or duties of this Zoning Code unless the terms of the provision or section specify otherwise.

E. Jurisdiction. The words "Nashville" or "Metropolitan Nashville" mean the area of jurisdiction of the Metropolitan Government of Nashville and Davidson County, exclusive of the incorporated municipalities.

F. Nontechnical and Technical Words. Words and phrases shall be construed according to the common and approved usage of the language, but technical words and phrases and such others as may have acquired a peculiar and appropriate meaning in law shall be construed and understood according to such meaning.

G. Number. A word indicating the singular number may be extended and applied to include the plural. The use of the plural number shall be deemed to include the singular unless the context clearly indicates the contrary.

H. Fractions. When any requirement of these regulations results in a fraction of a dwelling unit or other measurement, that fraction will be disregarded and the fraction if less than 0.5 shall be rounded down the nearest whole number, and if equal to or greater than 0.5 shall be rounded up to the nearest whole number.

I. Public Officials, Bodies and Agencies. All public officials, bodies and agencies to which reference is made are those of the Metropolitan Government of Nashville and Davidson County, unless otherwise indicated. All professionals to which reference is made shall be licensed to practice in the State of Tennessee.

J. Shall and May. The word "shall" is always mandatory and not discretionary. The word "may" is permissive.

K. Tense. Words used in the past or present tense include the future as well as the past or present, unless the context clearly indicates the contrary.

L. Text. In case of any difference of meaning or implication between the text of this Zoning Code and any figure, the text shall control.

M. "Written" means any representation of words, letters or figures whether by printing or other form or method of writing. (Ord. 99-1616 § 1 (part), 1999; Ord. 96-555 § 1.5, 1997)

17.04.055 Fees, in-lieu contributions and other assessments, estimates or payments.

Fees, in-lieu contributions and other assessments, estimates or payments required by this title or by the metropolitan government in furtherance of this title for single or multi-phase developments shall be determined by the fee or rate at the time of assessment or payment, whichever is later. The Metropolitan Government of Nashville and Davidson County may update fees and rates over time to reflect current standards and/or changes in market rates. (Ord. BL2014-947 § 3, 2014)

17.04.060 Definitions of general terms.

A. Applicability. Words in the text or tables of this title shall be interpreted in accordance with the provisions set forth in this section. Where words have not been defined, the definition found in the most current edition of Webster's Unabridged Dictionary shall be used. The zoning administrator shall have the right to interpret the definition of the word.

B. General Terms.

"Above ground" means visible from the surface of the earth.

"Abutting" means touching or sharing a common point or line. This term shall not be deemed to include parcels that are across a public way from each other.

"Accessory or ancillary building" means a structure detached from a principal building located on the same lot that is customarily incidental and subordinate to the principal building. These structures shall not be used as residential units or commercial activity unless authorized by base zoning, overlay, or appropriate use permit.

"Accessory apartment" means a secondary dwelling unit, attached to a single-family residence, the principal dwelling unit on a lot. The accessory apartment dwelling shall be subordinate in size, height, and purpose to the principal dwelling.

"Accessory use" means a use of land or of a building or portion thereof that is customarily incidental and subordinate to the principal use of the land or building and that is located on the same lot as the principal use.

"Active use" means a habitable space occupied by retail, office, residential, institutional, recreational or similar use, specifically excluding parking and mechanical uses.

"Adjacent" means nearby property touching the property lines of a parcel being considered and including property across streets.

"Adult entertainment" means any "adult bookstore," "adult video store," "adult theater," "adult nightclub," or any commercial establishment which for a fee or incidentally to another service, presents material or exhibitions distinguished or characterized by an emphasis on matter depicting, describing or relating to "specified sexual activities" or "specified anatomical areas," as defined below for observation by patrons therein.

1. "Adult bookstore" means an establishment which, as one of its principal business purposes, offers for sale books, magazines, other periodicals, or any other items which are distinguished or characterized by their emphasis on matter depicting, describing or relating to "specified sexual activities" or "specified anatomical areas" as defined in this section for observation of the patrons therein; or in conjunction therewith has facilities for the presentation of sexually oriented entertainment, including but not limited to sexually oriented movies, sexually oriented videos, sexually oriented films, or sexually oriented live entertainment, as defined in Section 6.54.010 of the Metropolitan Code, for observation by patrons therein.

2. "Adult nightclub" means a theater, concert hall, auditorium, nightclub, bar, restaurant or similar commercial establishment which regularly features live performances that are characterized by the exposure of "specified sexual activities" or by "specified anatomical areas," as defined below.

3. "Adult theater" means an enclosed building regularly used for presenting films, motion pictures, video cassettes, slides, or other photographic reproductions or other material depicting, describing or relating to "specified sexual activities" or "specified anatomical areas," as defined below for observation by patrons therein.

4. "Adult video" means a video, CD, laser disk, or similar medium with a cover available that depicts "specified sexual activities" or "specified anatomical areas."

5. "Adult video store" means a commercial establishment which, as one of its principal business purposes offers the sale or rental, or presentation for a fee or incidentally to another service, "adult videos," as defined in this section; or in conjunction therewith, regularly presents on the premises sexually oriented motion pictures or sexually oriented films, "adult videos," or sexually oriented live exhibitions which are distinguished or characterized by an emphasis on matter depicting, describing or relating to "specified sexual activities" or "specified anatomical areas" as defined in this section and in Section 6.54.010 of the Metropolitan Code for observation by patrons therein.

6. "Specified anatomical areas" means:

a. Less than completely and opaquely covered:

i. Human genitals; pubic region,

ii. Buttock, and

iii. Female breast below a point immediately above the top of the areola; and

b. Human male genitals in a discernibly turgid state, even if completely and opaquely covered.

7. "Specified sexual activities" means:

a. Human genitals in a state of sexual stimulation or arousal;

b. Acts of human masturbation, sexual intercourse or sodomy;

c. Fondling or other erotic touching of human genitals, pubic region, buttock or female breast.

"Affordable housing" means housing that, on an annual basis, costs thirty percent or less than the estimated median household income for households earning sixty percent or less than the median household income for the applicable county based on the number of persons in the household, as established by Median Household Income in the Past 12 Months by Household Size (B19019) from the most recently available U.S. Census Bureau American Community Survey.

"After hours establishment" means any establishment open to the general public at any time between the hours of 3:00 a.m. and 6:00 a.m., which has for its primary purpose entertainment, teen clubs, dance clubs, and establishments which feature the playing of live or recorded music. If the establishment requires a cover charge upon entry, contains a dance floor, or uses either a disc jockey or a live band, it shall be considered an 'after hours establishment,' regardless of whether the establishment serves or sells prepared food for consumption.

"Agricultural activity" means the raising of animal, fowl, fish and agricultural or horticultural crops, including but not limited to soybeans, tobacco, timber, orchard fruits, vegetables, flowers and/or ornamental plants for commercial purposes.

"Airport, medium or large commercial service" means publicly owned passenger and cargo loading and unloading facilities for aircraft and helicopters that receive scheduled passenger service and has at least .25% of national passenger boardings each calendar year. Included are runways, hangars, refueling and repair facilities, parking and all other facilities needed to operate aircraft or conduct an aeronautical activity. Uses indicated on the Airport Layout Plan approved by the FAA, or associated with supporting the passenger experience, including but not limited to ticket purchasing, restaurant, retail and other concessions, vehicular rental/leasing, ground transportation services, and hotel, or uses associated with construction activities are permitted as accessory uses.

"Airport/heliport" means passenger and freight loading and unloading facilities from aircraft and helicopters. Included are runways, hangers, refueling and repair facilities, parking and all other facilities needed to operate aircraft. Ticket purchasing, restaurants and retail stores are permitted as accessory uses.

"Alley" means a public or private right-of-way primarily designed for access to the side or rear of properties.

"Alternative financial services" means any building, room, space or portion thereof where an establishment provides a variety of financial services, including but not limited to cash advance, title loans, check cashing, pawnshops and flex loans, and such establishment is not a state or federally chartered bank, a savings and loan association, industrial loan and thrift company licensed by the state of Tennessee under Title 45, Chapter 5 of the Tennessee Code Annotated and providing only the services authorized under that chapter, or credit union, a mortgage company, a financial institution whose services are insured by an agency of the United States government, or any other entity offering financial services that is not determined to be a financial institution as defined under this section.

"Alternative structure" means a structure that is not primarily constructed for the purpose of holding antennas but on which one or more antennas may be mounted, including but not limited to buildings, water tanks, pole signs, billboards, church steeples, electric power transmission poles/towers, and streetlights.

"Animal boarding facility" means any buildings or land used, designated or arranged for the temporary boarding, care and grooming of domesticated dogs and cats for profit. This use does not include an animal hospital.

"Animal hospital" means an enterprise for the care and treatment of the diseases and injuries of animals, and where animals may be boarded during their treatment and convalescence.

"Antenna" means any apparatus designed for the transmitting and/or receiving of electromagnetic waves, including telephonic, radio or television communications. Types of elements include omni-directional (whip) antennas, sectionalized or sectorized (panel) antennas, multi or single bay (FM & TV), yagi, or parabolic (dish) antennas, or any other antenna elements approved by the director of information technology services or his delegate.

"Artisan distillery" means the production of alcoholic beverages in quantities not to exceed one thousand barrels per month, with a barrel containing not more

than fifty-five U.S. liquid gallons. No artisan distillery shall be permitted within an adult entertainment establishment.

"Asphalt plant" means the manufacturing asphalt-type roofing materials, asphalt and tar paving mixtures, paving block made of asphalt and various compositions of asphalt or tar with other materials, and the recycling of old asphalt into asphalt-type material. This use also includes the stockpiling of bulk materials required for the process and the storage of the required equipment use in the operation.

"Assisted care living" means a licensed "assisted-care living facility" by the State of Tennessee Board of Health that provides domiciliary care, room, board and nonmedical living assistance service to primarily aged, ambulatory persons (sixty-two years of age or older) who live in a rooming unit. Where there is a common kitchen and communal area for all residents within the facility, three rooming units in the facility shall be counted as one dwelling unit for determining the facility's density.

"Attachment" means a building element permitted beyond the front of the "Build-to Zone", but not into the right-of-way.

"Auction house" means an establishment where the real or personal property of others is sold by a broker or auctioneer to persons who attend scheduled sales or events.

"Audio/video tape transfer" means the production of multiple copies of audio or visual tapes from master copies.

"Automated teller machine (ATM)" means a facility to provide banking and other electronic services that are operated by the customer.

"Automobile" means any vehicle designed for carrying 10 passengers or less, is used for the transportation of persons, and has a gross weight of less than 10,000 pounds, but excluding motorcycles and vehicles used to carry passengers for a fee.

"Automobile convenience" means a facility where flammable and combustible liquids, such as gasoline and other motor fuels, are stored and subsequently dispensed, by use of fixed approved dispensing equipment by customers of the facility on a self-service basis and/or by employees on a full-service basis and which may include an automatic car wash for washing one automobile at a time, within an enclosed building; in addition, a facility which also provides sandwiches, snacks, staple groceries and other similar retail products or services, which are not recognized or defined by the Zoning Code as separate uses or as necessary components of separate uses, for sale on premises for consumption off premises by the customer.

"Automobile parking" means the use of property for the commercial parking or storage of operable automobiles on a temporary basis. This does not include the providing of off-street parking required for a use by Chapter 17.20. Such parking shall be for the use of licensed vehicles only and is not intended to include merchandise or vehicles for sale.

"Automobile repair" means any building, structure, improvements, or land used for the general repair, adjusting, overhauling, removing, replacing, rebuilding, or reconditioning of automobiles and engines, including but not limited to body, frame or fender straightening or repair, the reconditioning, repairing, sale, mounting, or installing of any used tires, welding, painting, or upholstery work, collision repair, vehicle steam cleaning, but excluding the assembly, disassembly, dismantling or salvage of automobiles, in whole or in part. No abandoned vehicles shall be stored on the premises. No vehicle to be repaired shall remain on the premises more than forty-five days.

"Automobile sales, new" means a franchised retail automobile dealership that is primarily housed in a structure and characterized by a mixture of secondary supporting uses; however, the principal use of the site shall be the marketing and display of new automobiles, whether by sale, rental, lease or other commercial or financial means. Secondary supporting uses may include an inventory of vehicles for sale or lease either on-site or at a nearby location of new or used automobiles in operating condition, and on-site facilities for the repair and service of automobiles previously sold, rented, or leased by the dealership as defined under "Automobile Repair" and "Automobile Service". No abandoned vehicles shall be stored on the premises.

"Automobile sales, used" means a retail business which sells operable, used automobiles that pass state vehicle inspection requirements upon display in the open for sale or trade. Secondary supporting uses may include the service of automobiles previously sold or traded as defined under "Automobile Service". No "Automobile Repair" or "Scrap Operation" activities may occur on-site and no abandoned vehicles shall be stored on the premises.

"Automobile service" means any building, structure, improvements, or land used for the replacement of any part, or repair of any part, to an automobile that does not require removal of the engine head or pan, engine transmission or differential, including, but not limited to oil change and lubrication, cooling, electrical, fuel and exhaust systems, wheel alignment and balancing, brake adjustment, relining and repairs, mufflers, batteries, new tire services and sales, shock absorbers, installation of stereo equipment, car alarms or cellular phones, but

excludes dismantling, rebuilding, reconditioning, or salvage of automobiles, in whole or in part. No abandoned vehicles shall be stored on the premises. No vehicle to be serviced shall remain on the premises more than forty-five days.

"Awning" means a structural extension over the exterior of a door or window which provides protection from the elements.

"Balcony" means an unenclosed habitable structure cantilevered or recessed from a facade.

"Bar or nightclub" means any establishment primarily in the business of the sale of alcoholic beverages for on-premises consumption and possessing the appropriate licenses for such.

"Basal area" means cross sectional square footage measured by going through the trunk of a tree on a parallel plane to the ground at diameter breast height.

"Base station" means equipment and non-tower supporting structure at a fixed location that enable wireless telecommunications between user equipment and a communications network. Examples include transmission equipment mounted on a rooftop, water tank, silo or other above ground structure other than a tower. The term does not encompass a tower as defined herein or any equipment associated with a tower. "Base station" includes, but is not limited to: equipment associated with wireless telecommunications services such as private, broadcast, and public safety services, as well as unlicensed wireless services and fixed wireless services such as microwave backhaul; radio transceivers, antennas, coaxial or fiber optic cable, regular and backup power supplies, and comparable equipment, regardless of technological configuration (including distributed antenna systems and small-cell networks); any structure other than a tower that, at the time the application is filed under this section, supports or houses equipment described in this definition that has been reviewed and approved under the applicable zoning or siting process, or under another metro regulatory review process, even if the structure was not built for the sole or primary purpose of providing such support. "Base station" does not include any structure that, at the time the application is filed under this section, does not support or house wireless communication equipment.

"Bed and breakfast inn" means a commercial establishment with four through ten furnished guest rooms whose principal use is for paid accommodation to guests. Bed and breakfast inns shall be occupied by the owner-occupant and/or a full-time live-in manager. Meals may be provided to overnight guests. The maximum stay for any guest shall be fourteen consecutive days.

"Beer and cigarette market" means a retail establishment where the majority of the inventory available for purchase is alcoholic beverages with an alcoholic content of eight percent alcohol by weight or less and/or any product containing or used for consuming nicotine, cannabidiol (CBD), tetrahydrocannabinol (THC), or other similar substances.

"Bike lane" means a section of a roadway which has been designated by striping, signing and pavement markings for the exclusive use of bicyclists.

"Bikeway" is a generic term for any road, street, path, or way that in some manner is specifically designated for bicycle travel, it may be for the exclusive use of bicycles or to be shared with other transportation modes.

"Block" means a unit of land bounded by streets or by a combination of streets and public land, railroad rights-of-way, waterways or any other barrier to the continuity of development.

"Block face" means a single boundary of a block described in the definition of a Block. A block face is opposing when it is across a public street.

"Boarding house" means a residential facility or a portion of a residential dwelling unit for the temporary accommodation of persons or families in a rooming unit, whether for compensation or not, who are in need of shared lodging and personal services, supervision, or rehabilitative services.

"Boat storage" means the use of property for the commercial parking or storage of boats. Such parking/storage is not intended to include boats for sale.

"Breakpoint technology" means the engineering design of a monopole, or any applicable support structure, wherein a specified point on the monopole is designed to have stresses concentrated so that the point is at least five percent more susceptible to failure than any other point along the monopole so that in the event of a structural failure of the monopole, the failure will occur at the breakpoint rather than at the base plate, anchor bolts, or any other point on the monopole.

"Buffer" means an area of land, including landscaping, berms, wall and fences, which is located between specified uses or rights-of-way.

"Building" means any structure that encloses a space used for sheltering any occupancy.

"Building contractors supply" means the construction and incidental storage activities performed by construction contractors on zone lots other than construction sites, as well as the retail or wholesale sale of materials used by the construction trades.

"Building permit" means a permit required by Title 16 of the Metropolitan Code for the construction, alteration, expansion or renovation of a structure.

"Building type" means a classification of buildings by function, disposition and configuration that provides

the norm against which variations are assessed and classified. Buildings shall be classified as residential, commercial, industrial, civic, or support.

"Build-to zone" means an area established within a given lot indicating where the building frontage must be located. Depending on particular circumstances, the build-to zone may be measured from the property line, the back of an easement, or the back of the sidewalk.

"Bulk regulations" means standards and controls that establish the maximum size of buildings and structures on a lot and the buildable area within which the building can be located, including coverage, setbacks, height, impervious surface ratio, floor area ratio and yard requirements.

"Business school" means an enterprise offering instruction and training, including four-year degrees and/or postgraduate degrees, in a service or the arts such as secretarial, cosmetology, commercial artist, computer software, legal, and similar training, provided that such enterprise does not offer student housing or athletic facilities at the site.

"Business service" means the provision of services required for the day to day operation of a business such as, but not limited to, consulting service, photocopy or office supply.

"Caliper inches" means the quantity in inches of the diameter of a tree measured at a height of six inches above the ground for trees with a diameter of four inches and under, and at twelve inches above the ground for trees over four inches in diameter.

"Camp" means a place where children, youth and adults gather together for spiritual, recreational, or educational purposes in an organized and supervised manner, and where overnight lodging (e.g. tents, cabins), food, counseling, religious, and outdoor recreational activities may be provided.

"Canopy" means a roof projection over a door, entrance into a building, a drive thru window or other business-related uses, including automatic teller machines (ATM), bank by car facilities, fuel pumps and the like, which is supported only by an attachment to the main building or by posts or columns, and is without walls.

"Car wash" means a building or portion thereof containing facilities for washing more than two automobiles, using production-line methods with a chain conveyor, blower, steam cleaning device or other mechanical devices within an enclosed structure or a self-service facility with one or more wash bay(s) that is free or coin-operated. Car wash also includes operations that are done by hand such as auto detailing.

"Cash advance" means any building, room, space or portion thereof where unsecured, short-term cash advances are provided, including those made against future pay checks, as regulated by Title 45, Chapter 17, of the Tennessee Code Annotated.

"Cellular on wheels (COW)" means a temporary PWSF placed on property to provide short term, high volume telecommunications services to a specific location and which can be easily removed from the property.

"Certificate of compliance" means approval by the zoning administrator that a use, building or structure complies with the provisions of this Zoning Code.

"Check cashing" means any building, room, space or portion thereof where checks are cashed in exchange for a fee, as regulated by Title 45, Chapter 18, of the Tennessee Code Annotated.

"Civic building" means any building designed and constructed for community use or benefit by governmental, cultural, educational, public welfare, religious or transportation organizations.

"Club" means a facility which offers social, educational, cultural or other similar activities that are only available to members and their guests.

"Collection center" means a facility which is staffed and fenced that has waste receptacles on site that are open to the public, when an attendant is present, to receive household waste, municipal solid waste and recyclable material.

"College or university" means an institution of higher education offering undergraduate or graduate degrees.

"Collocation" means the mounting or installation of transmission equipment on an eligible support structure for the purposes of transmitting and/or receiving radio frequency signals for communications purposes so that installation of a new support structure will not be required, including an eligible facilities request or a qualified collocation request.

"Columnar tree" means a fastigiate tree that narrows toward the top, having an upright narrow form, typically with branches that point upward, often nearly parallel to the main stem or trunk, thereby resembling a single column.

"Commercial amusement, inside" or "inside commercial amusement" means the provision of entertainment, performances or games of skill to the general public for a fee, or a permanent event space, and that is wholly enclosed in a building, including but not limited to a bowling alley, billiard parlor, batting facility, golf driving range, skating rink, wall climbing, arcade, or sport simulation. This use does not include an arena.

"Commercial amusement, outside" or "outside commercial amusement" means the provision of entertainment or games of skill to the general public for a fee, or a permanent event space, where any portion of the activity takes place outside of a building, including but

not limited to a golf driving range, archery range, miniature golf course, batting facility, or go-kart track. This use does not include a stadium.

"Commercial community gardening" means an individual or group of individuals growing and harvesting food crops and/or non-food, ornamental crops, such as flowers, for commercial sale. Commercial community gardens may be divided into separate plots for cultivation by one or more individuals or may be farmed collectively by members of the group and may include common areas maintained and used by group members.

"Commercial establishment" means an establishment used for the conduct of a business.

"Common open space" means land and/or an area of water within the site designed and intended for the use or enjoyment of the occupants, which may contain such complementary structures and improvements as are necessary and appropriate for the benefit and enjoyment of the occupants of the development.

"Communications hut" means a non-habitable structure that contains equipment for communications services.

"Community education" means instructions on a elementary, middle and high school level, approved under the regulations of the state.

"Completion" means the earliest of the following dates: The date a temporary certificate of occupancy is issued by the Metro Government for a project, the date a certificate of occupancy is issued by the Metro Government for a project, or the date the final inspection approving the project is completed.

"Concrete plant" means the production of concrete that uses a manufacturing process involving the mixing of a number of aggregates, sand, water, cement, and/or other components. This use also includes the stockpiling of bulk materials required for the process and the storage of the required equipment use in the operation.

"Consignment sale" means a sale of personal property by someone who is acting as an agent of another.

"Construction" means the building, rehabilitation, remodeling, renovation or repair of any structure, landscape, hardscape, or any portion thereof, including any associated tenant improvements.

"Construction and demolition (C&D) waste, debris, or material" means discarded materials resulting from construction, remodeling, repair, demolition, or salvage operations that are generally considered not to be water soluble and nonhazardous in nature, including but not limited to steel, glass, brick, concrete, asphalt material, pipe, gypsum, wallboard, ceiling tiles, ceramic tile, carpeting, and lumber from the construction or destruction of a structure as part of a construction or demolition project or from the renovation of a structure and/or landscaping, and including rocks, soils, tree remains, trees, and other vegetative matter that normally results from land clearing, landscaping and development operations for a construction project.

"Construction/demolition waste processing (project-specific)" means space designated during the term of the demolition or construction project, located either physically on the project site or on another property within a one-half mile radius of the project site boundary, where the project contractor shall divert construction and demolition debris for purposes of recycling, salvaging, and disposing of materials recovered from demolition of existing, or construction of new, buildings and structures on the project site. No materials shall be received from any other construction project, other than the designated project, for which the space was originally intended.

"Correctional facility" means a facility for the housing and care for individuals legally confined for violations of law.

"Cottage development, single-family" or "single family cottage development" means a single-family residential development of four to ten dwelling units arranged on small lots on at least two sides of a common open space with frontage onto a street of sufficient width to allow direct pedestrian access to the street. Vehicular access is via an abutting alley or private drive.

"Critical root zone (CRZ)" means the area of soil around a tree where the minimum area of roots considered critical to the structural stability and health of the tree are located. The CRZ is to be determined by measuring one foot per each inch of tree diameter at breast height, with a minimum of ten feet.

"Cultural center" means services to the public, such as, but not limited to museums, art galleries and libraries.

"Custom assembly" means the on-site production of goods by hand manufacturing that generally involves only the use of hand tools. Incidental direct sale to consumers of the goods produced on-site is permitted.

"Curb level" means the elevation obtained by averaging the points located where the side lot lines of a lot extended will intersect the nearest edge of the travelway of that street.

"Day care" means the provision of care for individuals, who are not related to the primary caregiver, for less than twenty-four hours per day. These classes are referenced:

1. Accessory to a single-family dwelling: Up to four individuals;

2. Day care home—Small: Five through seven individuals;

3. Day care home—Large: Eight through twelve individuals;

4. Class I: Thirteen through twenty-five individuals;

5. Class II: Twenty-six through fifty individuals;

6. Class III: Fifty-one through seventy-five individuals;

7. Class IV: More than seventy-five individuals;

8. Parents day out: Day care for pre-teenage children that is not open for more than twelve hours in any one week;

9. School day care: Day care centers of unlimited size for before, during and after school programs.

"Decibel A-weighted (dBA)" means a unit for describing the amplitude of sound as measured on a sound level meter using the A-weighting network.

"Demolition" means the decimating, razing, ruining, tearing down or wrecking in whole or in part, any facility, structure, foundation, landscaping, pavement or building, (wall, fence) whether in whole or in part, whether interior or exterior.

"Density" means a numerical ratio representing the total number of residential dwelling units on a lot divided by the horizontal area of the lot, expressed in terms of "units per acre."

"Detached accessory dwelling unit" means a detached dwelling unit separate from the principal single-family structure on any lot, or within any urban design overlay with development standards for detached accessory dwelling units. The dwelling shall be clearly subordinate in size, height, and purpose to the principal structure, it shall be located on the same lot as the principal structure and is detached from the principal structure. A detached accessory dwelling unit can be an independent structure, it can be a dwelling unit above a garage, or it can be attached to a workshop or other accessory structure on the same lot as the principal structure.

"Diameter breast height (DBH)" means the diameter in inches of a tree measured at four and one-half (4½) feet above the existing grade.

"Distributed antenna system (DAS)" means a system consisting of: (1) a number of remote communications nodes deployed throughout the desired coverage area, each including at least one antenna for transmission and reception; (2) a high capacity signal transport medium (typically fiber optic cable) connecting each node to a central communications hub site; and (3) radio transceivers located at the hub site (rather than at each individual node as is the case for small cells) to process or control the communications signals transmitted and received through the antennas.

"Distributive business/wholesale" means the sale or distribution of goods from the premises that may consist of the flexible use of the floor area for warehouse, assembly, showroom and office space within tenant areas, with the showroom and office area not exceeding fifty percent of the total floor area permitted on the parcel.

"Domestic animals/wildlife" means native and exotic animals and common domestic farm animals, defined as Class II and Class III wildlife (Tennessee Code Annotated 70-4-403) which are kept outdoors for any purpose other than agricultural business.

"Domesticated hens" means female chickens that may, where permitted, be kept and maintained for the non-commercial production of eggs, education, companionship, or recreation. Other types of fowl and poultry shall not be considered domesticated hens.

"Donation center, drop-off" means any lot, building, structure or premises used solely for the collection of clothing furniture, housewares, small electrical appliances, household textiles, toys, and other small household items. The center shall not pay for materials collected or sell any collected materials on the premises. Collected materials shall be stored in an enclosed location on-site until picked up and taken to a central sorting and distribution center. Types of drop-off donation centers range from storefront centers, which may include a drive-thru facility, to other enclosed facilities.

"Driving range" means an area equipped with distance markers, clubs, balls, and tees for practicing golf drives and putting, and which may include a snack-bar and pro-shop, but excludes miniature golf courses and "putt-putt" courses.

"Dwelling unit" means a single unit providing complete, independent living facilities for one family including permanent provisions for living, sleeping, eating, cooking and sanitation.

"Eave line" means the extension of a roof line beyond the vertical wall of a building.

"Elderly housing" means multi-family housing that is restricted to occupation by an "elderly person" as defined by 24 CFR 891.205, or "elderly family" as defined by 24 CFR 891.505. Elderly housing shall be subject to the same requirements under this Zoning Code as multi-family housing, except where a specific standard or requirement is otherwise provided. Elderly housing shall include one or more of the following:

1. A recorded declaration of land use restrictive covenants for low-income housing tax credits for the benefit of the Tennessee Housing Development Agency that restricts the housing to occupancy only by an elderly person or elderly family;

2. A recorded declaration of land use restrictive covenants for the benefit of the metropolitan development and housing agency that restricts the housing to occupancy only by an elderly person or elderly family;

3. A recorded use agreement between the owner of the property and the U.S. Department of Housing and Urban Development pursuant to Section 202 of the Housing Act of 1949 (12 U.S.C. 1701q), as amended; or

4. Documentary proof that the property has received an exemption from property taxes pursuant to Tenn. Code Ann. § 67-5-207.

"Electric vehicle" or "EV" means an automotive-type vehicle for on-road use that is no larger than a Class 2 vehicle according to the Federal Highway Administration, such as passenger automobiles, trucks, vans, neighborhood electric vehicles, and electric motorcycles, primarily powered by an electric motor that draws current from a rechargeable storage battery, fuel cell, photovoltaic array, or other source of electric current. Plug-in hybrid electric vehicles (PHEV) are electric vehicles having a second source of motive power. It does not include golf carts, electric scooters, electric bicycles, or other micromobility devices.

"Electric vehicle charging facility" means a site or facility whose principal use is the charging of electric vehicles (EVs). This use may include:

1. Electric vehicle supply equipment (EVSE) for electric vehicles;

2. Associated infrastructure such as transformers, switchgear, utility interconnection equipment, and battery energy storage systems;

3. Queuing areas, drive aisles, and circulation space for vehicles;

4. Accessory buildings used solely for staff support, such as restrooms, utility closets, and break areas;

5. Fencing, lighting, and security infrastructure;

6. Optional integration of renewable energy systems such as solar canopies and batteries;

7. Continuous operations; twenty-four hours a day, seven days a week.

This shall not include the following uses: "automobile repair," "automobile service," "automobile convenience," and "car wash."

"Electric vehicle supply equipment" or "EVSE" means the device or system designed and used for transferring electric energy to a plug-in electric vehicle, including all components such as connectors, conductors, enclosures, associated equipment, and related infrastructure that delivers electricity from the source to the vehicle.

"Electrical service lines" means an electrical line serving limited geographic areas of residential neighborhoods by providing electrical power directly to a residence, or group of residences, and not designed to extend service more than one-half mile.

"Electrical distribution lines" means an electrical line designed to distribute electric power to, and through, agricultural, residential, commercial, and industrial areas.

"Electrical transmission lines" means electrical power lines, feeder circuits, or networks designed to transmit electrical power for regional use.

"Eligible facilities request" means any request for modification of an existing tower or base station involving collocation of new transmission equipment; removal of transmission equipment; or replacement of transmission equipment that does not substantially change the physical dimensions of such tower or base station.

"Eligible support structure" means any tower or base station existing at the time the application is filed with metro. For purposes of this ordinance, the definition of "eligible support structure" shall include utility structures currently hosting fiber, cable and wire.

"Family" means one of the following:

1. An individual, or

2. Two or more persons related by blood, marriage or law, or,

3. A group of two or more unrelated persons living together in a dwelling unit, not to exceed four persons in a dwelling unit with three or fewer bedrooms, and not to exceed five persons in a dwelling unit with four or more bedrooms. Such group may include a combination of related and unrelated persons

4. A group of not more than eight unrelated persons with disabilities including three additional persons acting as support staff or guardians, who need not be related to each other or to any of the persons with disabilities, residing together in a home in accordance with Tennessee Code Annotated § 13-24-102. For purposes of this subsection, 'persons with disabilities' includes persons with a physical or mental impairment which substantially limits one or more of such person's major life activities, a record of having such an impairment, or being regarded as having such an impairment, but such term does not include current, illegal use of or addiction to a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)). For the purposes of this subsection, "persons with disabilities" does not include persons who pose a substantial likelihood of serious harm as defined in Tennessee Code Annotated § 33-6-501, or who have been convicted of serious criminal conduct related to such disability.

5. A group of not more than eight unrelated persons over the age of sixty-five, including two additional persons acting as house parents or guardians, living together as a single housekeeping unit.

6. Family, as defined herein, is subject to the occupancy limitations in Section 16.24.400.J of the Metropolitan Code of Laws. Where there is a conflict between the definition of family in this section and the overcrowding provisions in Section 16.24.400.J, the more restrictive limitation shall apply.

"Final site plan" means a detailed set of construction plans that fully demonstrate compliance with all applicable provisions of this code and accurately represent the final form of proposed construction, serving as the basis for the issuance of zoning permits and certificates of compliance.

"Financial institution" means any building, room, space or portion thereof where an establishment provides a variety of financial services and is a state or federally chartered bank, savings and loan association, industrial loan and thrift company licensed by the State of Tennessee under Title 45, Chapter 5 of Tennessee Code Annotated and providing only the services authorized under that chapter, or credit union, a mortgage company, or other financial institution whose services are insured by an agency of the United States government, but excluding alternative financial services.

"First floor elevation" means the height of the first floor of a building above the ground.

"Flea market" means the offering for sale of merchandise or goods to the general public on a temporary basis by two or more vendors, at least one of whom is not the owner of the property on which the offering is made. Excluded from the definition of "flea market" are establishments conducting business during regular hours throughout the year that meet the general definition of "retail".

"Flex loan" means any building, room, space or portion thereof where a written agreement providing open-end credit, either unsecured or secured by personal property, in which repeated non-commercial loans for personal, family or household purposes is contemplated, as regulated by Title 45, Chapter 12, of the Tennessee Code Annotated.

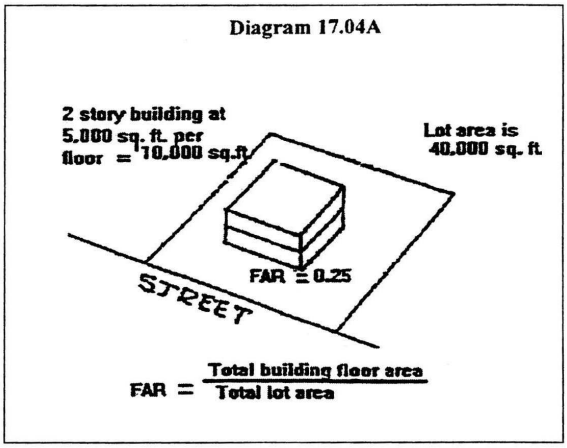
Flood, 100-year. "100-year flood" means a standard adopted by the Federal Emergency Management Agency (FEMA) to identify areas where there exists a one percent annual chance of a flood occurring.

"Floodplain" means land area, including the floodway of any river, stream or watercourse, susceptible to being inundated by water as identified by the 100-year flood.

"Floodway" means the channel of a stream that has current, direction and velocity to it during a flood, and in which debris may be carried.

"Floor area" means the total of the gross horizontal areas of all floors, including usable basements and cellars, below the roof and within the outer surfaces of the main walls of principal or accessory buildings (or the center lines of party walls separating such buildings or portions thereof) or within lines drawn parallel to and two feet within the roof line of any building or portion thereof without walls.

"Floor area ratio (FAR)" means the total floor area of all structures on a lot, divided by the total horizontal area of the lot. See Diagram 17.04A.



"Footprint" means the area delineated by the outer edge of the foundation of a building, any second-floor cantilevers, or carports, whichever is greater.

"Fraternity/sorority house" means living quarters for private social organizations serving students of colleges or universities.

"Frontage" means any portion of a lot that abuts a public street (excluding alleys) and "open space".

"Frontage, minor" means the frontage with lesser pedestrian importance.

"Frontage, principal" means the frontage of highest pedestrian importance.

"Front facade" means the front vertical face of a building that is substantially in one plane, has associated with it a primary entrance, and is composed from the following architectural components: exterior walls; columns or other vertical structural elements; windows; doors; roof edges; permanently roofed recesses; and arcades, balconies, or porches with permanent roofs supported by vertical structural supports.

"Fuel storage" means the storage of motor vehicle fuels for use by vehicles of an institution or business entity located on the same property.

"Garage sale" means sale of personal property by homeowner or occupant of real property.

"General plan" means an official public document adopted by the metropolitan planning commission in accordance with Sections 11.504(e) and 18.02 of the Charter of Metropolitan Government of Nashville and Davidson County to provide the overall basis for zoning development decisions. Individual subarea plans that

provide detailed guidance for specific areas are adopted by the commission and become a part of the general plan.

"Grade" means in the DTC zoning district the elevation of the sidewalk across a lot frontage measured in the build-to-zone.

"Greenway" means a linear park, alternative transportation route, or open space conservation area approved by the metro greenways commission that provides passive recreational opportunities, pedestrian and/or bicycle paths, and/or the conservation of open spaces or natural areas, as indicated in a greenway plan adopted by the commission.

"Grocery store" means a retail establishment that primarily sells food, including canned, packaged, and frozen foods; fresh fruits and vegetables; and fresh (raw) and prepared meats, fish, and poultry.

"Habitable space" means building space the use of which involves human presence with direct view of the fronting street, or public or private open space, but excluding parking garages, self-service storage facilities, warehouses, or similar.

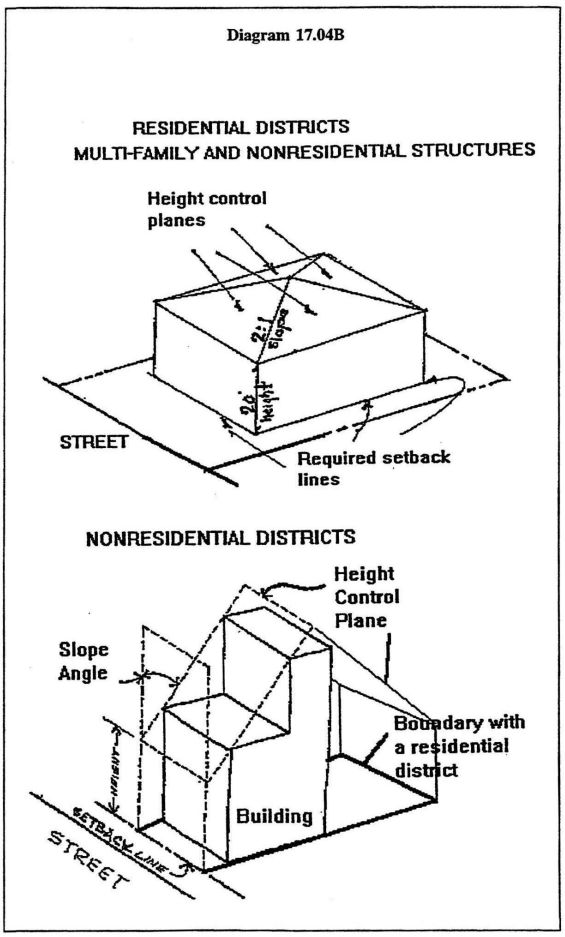
"Handicrafts" or "handcrafted" means an object that requires use of the hands, hand tools and human craft skills in its production, and is not mass produced.

"Hazardous operation" means a use that may present serious hazards to human life and health such as, but not limited to arsenals, atomic reactors, explosives and fireworks manufacture.

"Heavy equipment sales and service" means the retail or wholesale sale or rental of heavy motorized vehicles or equipment, along with incidental service or maintenance such as, but not limited to construction equipment rental yards, tractor-trailers, semi-trailers, boats, buses, recreational vehicles, farm equipment and moving trailer rental. (See "Automobile sales, new", "Automobile sales, used", "Automobile repair", "Automobile service", "Vehicular, rental/leasing", and "Vehicular sales and service, limited.")

"Height control plane" means an imaginary inclined plane that slopes over a lot to establish the maximum height of structures on that lot. The plane begins above grade at the height established in Tables 17.12.020B and 17.12.020C and slopes inwardly at the slope established by those tables. See Diagram 17.04B.

Diagram 17.04B



"Helistop" means a helicopter landing area for boarding and discharging the occupants of the craft. Maintenance or fueling is not permitted.

"Historic bed and breakfast homestay" means three or fewer furnished guest rooms for pay within a private, owner-occupied historically significant structure. Meals may be provided to overnight guests. The maximum stay for any guest shall be fourteen consecutive days.

"Historic home event" means the hosting of events such as, but not limited to, weddings or parties for pay in a private home which has been judged to be historically significant by the historical commission.

"Historically significant structure" means a structure that meets one of the following criteria:

1. The structure is individually listed or is eligible for listing in the National Register of Historic Places as determined by the metropolitan historic zoning commission of Nashville and Davidson County, or by the Tennessee Historical Commission; or,

2. The structure is within a district listed or eligible for listing in the National Register of Historic Places or is within an historic overlay district, such structure having been determined to contribute to the architectural character of the district by the metropolitan historic zoning commission of Nashville and Davidson County or by the Tennessee Historical Commission; or,

3. The structure is within a historic overlay district, or within a district that meets the criteria for designation as a historic overlay district, such structure having been determined to contribute to the architectural character of the district by the metropolitan historic zoning commission of Nashville and Davidson County.

"Home improvement sales" means the retail sale of a diverse range of hardware and related materials generally used in the maintenance, repair or construction of buildings or other structures, including lawn and garden supplies.

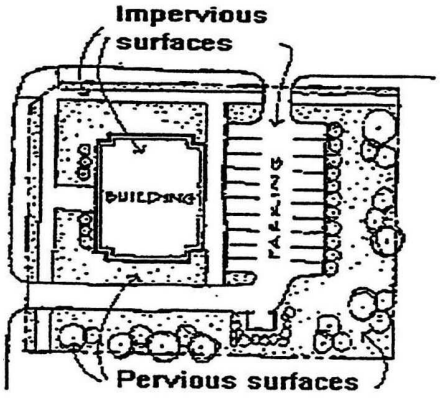
"Home occupation" means an occupation, service, profession or enterprise carried on by a resident member of a family within a dwelling unit.

"Hospice" means an establishment that provides for the physical and emotional needs of terminally ill individuals.

"Hotel" means any commercial establishment, or any portion of such establishment, (A) whose principal use provides that such structure is occupied or intended or designed for occupancy by transients for lodging or sleeping purposes within the area of the jurisdiction of the metropolitan government, and includes any hotel, inn, tourist court, tourist camp, tourist cabin, motel or any place meeting this definition, and (B) accepts on-site reservations for accommodations.

"Impervious Surface Ratio (ISR)" means a ratio derived by dividing the amount of the site that is covered by any material that substantially reduces or prevents the infiltration of stormwater by the total horizontal area of the lot. Impervious surfaces include, but are not limited to, roofs, streets, sidewalks and parking lots paved with asphalt, concrete, compacted sand, compacted gravel or clay. See Diagram 17.04C.

Diagram 17.04C



IMPERVIOUS SURFACE RATIO (ISR)

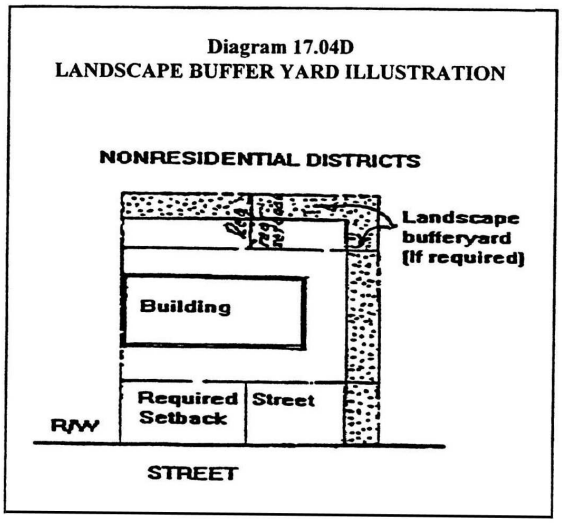
$$ISR = \frac{\text{Impervious surface area}}{\text{Area of the lot}}$$

"Incidental alteration" means modifications to a building or structure that are of a cosmetic nature, replacement of utilities, re-arrangement of internal partitions. The replacement of load-bearing walls is not permitted.

"Inventory stock" means the incidental storage of goods, chattels or products within the structure where sold at retail or wholesale.

"Kennel/stable" means any lot, building, structure or premises used for the boarding, breeding, training, and/or raising of domestic animal/wildlife (excluding livestock), whether by owners of such animals or by persons providing facilities and care, whether or not for compensation, but shall not apply to the keeping of animals in a municipal animal pound, pet store, a bona fide laboratory for scientific or experimental purposes (e.g. dental, veterinary, pharmaceutical or biological) or in a veterinary establishment for the purpose of observation and/or recovery necessary to veterinary treatment.

"Landscape buffer yard" means a required yard located at the perimeter of the lot containing landscaping, berms, walls or fences that shield uses on adjacent properties from those uses occurring on the subject property. See Diagram 17.04D.



"Landfill, construction/demolition" means the disposal of nonbiodegradable waste resulting from road building, construction, remodeling, repair or demolition of structures.

Landfill, sanitary. "Sanitary landfill" means the burial of nonhazardous and non-medical farm, residential, institutional, commercial or industrial waste.

"Landowner" means the legal or beneficial owner or owners of the land. The holder of an option or contract to purchase, a lessee having a remaining term of not less than fifty years in duration, or other person having an enforceable proprietary interest may be considered a "landowner" for the purposes of this title.

"Leading edge" means that edge of a building's front facade which projects farthest forward on the front portion of a lot. The leading edge may be measured at the forward-most edge of an arcade or of a porch with permanent roof supported by vertical structural supports, but may not be measured at the front-most edge of a projecting awning or stoop.

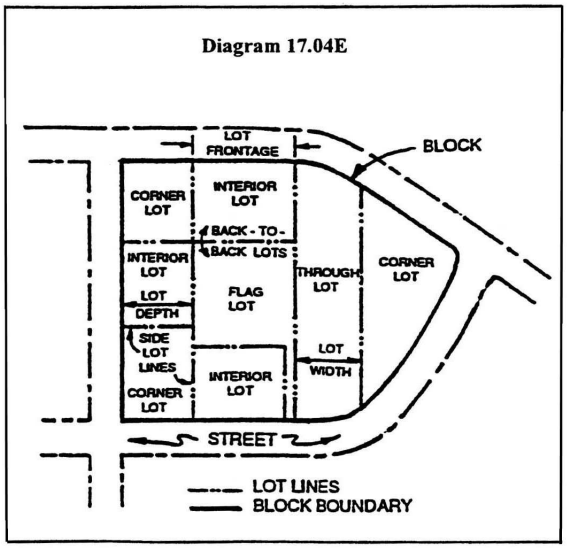
"Liner building" means a building specifically designed to mask a parking garage or structure from a frontage on a public street or public space.

"Listed species" means any plant species designated as endangered, threatened or a species of special concern by the Tennessee Department of Conservation in its "Revised List of Tennessee's Rare Plants" and all amendments thereto.

"Liquor sales" means the retail sale of alcoholic spirituous beverages as defined in Section 57-3-101 Tennessee Code Annotated to patrons or customers, in sealed packages, and not for consumption on the premises.

"Lot" means a tract, plot or portion of a subdivision or parcel of land intended as a unit for the purpose, whether immediate or future, for transfer of ownership or for building development. See Diagram 17.04E. Lot terms used are:

1. "Corner lot" means a lot situated at the intersection of two streets;
2. "Lot area" means the horizontal area included within the boundary lines of a lot; typically stated in terms of acreage (ac.) or square feet (sq. ft.);
3. "Lot depth" means the horizontal distance between the rear lot line (or some other lot line in cases where there is no rear lot line) and the midpoint of the front lot line, measured back from such midpoint in the mean direction of the side lot line.
4. "Through lot" means any lot that adjoins two street lines opposite to each other and parallel or within forty-five degrees of being parallel to each other. Any portion of a through lot that is not or could not be bounded by two such opposite street lines and two straight lines intersecting such street lines shall be subject to the regulations for an interior lot.
5. "Perimeter lot" means a lot which abuts the external boundary of a subdivision, or lot which contains less than the area required by the zoning district that is otherwise adjacent to the external boundary of a subdivision.



"Lot line" means a boundary of a lot. Lot line terms used are:

1. "Front lot line" means the lot line along which a front setback is designated or required.
2. "Lot frontage" means the length of a front lot line along a street or access easement.

3. "Lot width" means the horizontal distance between side lot lines measured at the minimum required front yard setback line.

4. "Rear lot line" means the lot line along which a rear setback is designated or required.

5. "Side lot line" means the lot line along which a side setback is designated or required.

"Major and Collector Street Plan" means a transportation plan required by the general plan and adopted by the planning commission pursuant to Section 13-3-402 and 13-4-302, Tennessee Code Annotated, showing, among other things, the general location, character and extent of arterial-boulevard, arterial-parkway and collector-avenue streets.

"Manufacturing, Artisan" means the shared or individual use of hand-tools, mechanical tools and electronic tools for the manufacture of finished products or parts including design, processing, fabrication, assembly, treatment, and packaging of products; as well as the incidental storage, sales and distribution of such products. Typical artisan manufacturing uses include, but are not limited to: electronic goods; food and bakery products; non-alcoholic beverages; printmaking; household appliances; leather products; jewelry and clothing/apparel; metal work; furniture; glass or ceramic production; paper manufacturing.

Manufacturing, heavy. "Heavy manufacturing" means the manufacture or compounding process of raw materials. These activities or processes would necessitate the storage of large volumes of highly flammable, toxic matter or explosive materials needed for the manufacturing process. These activities may involve outdoor operations as part of their manufacturing process. Typical heavy manufacturing uses include but are not limited to: tile or brick manufacturing; automobile, truck, and tire assembly; ammonia or chlorine manufacturing; metal casting or foundries; gas manufacturing; grain milling or processing; metal or metal ore production, refining, smelting, or alloying; petroleum or petroleum product refining; boat, pool and spa manufacturing; slaughtering of animals; glass manufacturing; paper manufacturing; and wood or lumber processing.

Manufacturing, light. "Light manufacturing" means the manufacture, predominately from previously prepared materials, of finished products or parts, including processing, fabrication, assembly, treatment and packaging of such products, and incidental storage, sales and distribution of such products, but excluding basic industrial processing and custom manufacturing. Typical light manufacturing uses include but are not limited to: electronic goods; food and bakery products; non-alcoholic beverages; paper imprinting; household appliances; leather products; jewelry; food and bakery products; and, clothing apparel.

Manufacturing, medium. "Medium manufacturing" means the processing and manufacturing of materials or products predominately from extracted or raw materials. These activities may include outdoor assembly and storage of products. Outdoor manufacturing of raw materials into compost, primarily for commercial resale, is a medium manufacturing activity. These activities do not necessitate the storage of large volumes of highly flammable, toxic matter or explosive materials needed for the manufacturing process. Typical medium manufacturing uses include but are not limited to: alcoholic beverages; glue; carpet; porcelain products for bathroom and kitchen fixtures; bleaching products; vegetable gelatin; dye stuffs; welding; furniture; and sporting goods;

"Master development plan" means a conceptual plan of development representing the intended integration of differing land uses and/or multiple structures within the framework of a unified design plan served by adequate streets and utilities. Often developed in phases, a master development plan forms the basis for subsequent approvals of detailed final site plans.

Editor's note—The types of development plans within this local jurisdiction that will cause property rights to vest consistent with Tennessee's Vested Property Rights Act of 2014 are found in Resolution RS2014-1330.

"Medical or scientific lab" means a facility for research, testing or investigation of a medical or scientific nature, but not for the production of a product.

"Medical waste" means a facility used to store and/or repackage medical waste for transportation to a processing facility.

"Mezzanine" means in the DTC zoning district a portion of a story. Mezzanine floors that cover more than fifty percent of the story below shall be counted as a full story.

"Microbrewery" means the production of beer, regardless of the percentage of alcohol by volume (ABV), in quantities not to exceed five thousand barrels per month, with a barrel containing thirty-one U.S. liquid gallons.

"Mineral extraction" means the extraction of metallic and nonmetallic minerals or materials, including rock crushing, screening and the accessory storage of explosives.

"Minor improvements" means improvements, including buildings and all other structures, that have a total assessed valuation of ten percent or less of the assessed valuation of the lot upon which they are located.

"Mobile home" means a portable or movable single-wide manufactured home designed and constructed to

permit long-term occupancy for dwelling purposes that is permanently mounted on a single chassis with or without a permanent foundation.

"Mobile storage unit" means the purchase, lease, or rental of any storage unit, trailer, or container that is either set on the ground or on wheels, and which is typically used for, but is not limited to the storage of equipment, excess inventory, layaway items, back-to-school merchandise, seasonal merchandise, records or clearance sale items. A mobile storage unit excludes containers belonging to a railroad or barge operation located in a railroad yard, on a railroad track, and on or near a navigable river.

"Mobile vendor" means a person who peddles, vends, sells, displays, or offers for sale goods, wares or merchandise at a temporary location and/or on a temporary or occasional basis. Notwithstanding the foregoing, vendors selling only food and/or beverages, vendors selling living plants and agricultural products, and street vendors licensed pursuant to [Section] 13.08.040 of the Metropolitan Code of Laws shall not be considered "mobile vendors". Further, a nonprofit organization that is exempt from taxation under the Internal Revenue Code of 1986 (as amended) selling goods, wares, or merchandise as part of a fundraising event shall not be considered a "mobile vendor", provided that a nonprofit organization shall not sell such items at more than two fundraising events per calendar year with a duration not to exceed five days.

"Motor freight" means facilities engaged in the shipment of goods from shippers to receivers for a charge including the services of other transportation establishments to effectuate delivery.

"Multi-copy" means services for instant reproduction of documents by the photocopy process for individual patrons.

"Multi-family" means three or more dwelling units on a single lot or parcel of land.

"Multimedia productions" means a facility for the staging and recording of video or audio productions such as, but not limited to music commercials, programs and motion pictures.

"Nano brewery" means the production of beer, regardless of the percentage of alcohol by volume (ABV), in quantities not to exceed one thousand two hundred fifty barrels per month.

"Native vegetation" means any indigenous tree, plant or shrub adapted to soil and climatic conditions occurring on-site.

"Natural gas compressor station" means a facility designed and constructed to compress natural gas that originates from an oil and gas well or collection of such wells operating as a midstream facility for delivery of oil and gas to a transmission pipeline, distribution pipeline, natural gas processing plant or underground storage field, including one or more natural gas compressors, associated buildings, pipes, valves, tanks and other equipment.

"Non-commercial community gardening" means a group of individuals growing and harvesting food crops and/or non-food, ornamental crops, such as flowers, for personal or group use, consumption, or donation. Community gardens may be divided into separate plots for cultivation by one or more individuals or may be farmed collectively by members of the group and may include common areas maintained and used by group members. Non-commercial community gardening refers to crops for use/consumption by growers only.

"Nonconforming structure" means a structure that was originally legally constructed but which now does not meet one or more of the standards or requirements (other than use) of the zoning district in which it is located.

"Nonconforming use" means a use originally legally established, but which now does not currently conform to the applicable use regulations of the zoning district in which it is located.

"Nonresidential drug treatment facility" means nonresidential drug treatment facilities are characterized by the dispensing of substitute narcotics for the treatment of drug addictions with little or no professional counseling on an outpatient basis.

"Nursing home" means a state licensed facility providing full-time convalescent or chronic care to individuals who, by reason of advanced age, chronic illness or infirmity are unable to care for themselves and require skilled nursing and related medical services.

Office, general. "General office" means the provision of executive, management, administrative or professional services, but not involving medical services.

Office, leasing/sales. "Leasing/sales office" means the use of a unit or dwelling as a leasing and or sales office for other units within that development.

"On-site agricultural sales" means property containing at least five acres of land and used for sale of seasonal agricultural items produced on the property and sold to the public through a roadside stand, farm stand, "cut your own" and/or "pick your own" activity. For purposes of this use "property" shall mean any contiguous, abutting, or adjacent property under the same ownership.

"Open space" means public or privately held land used for stormwater management, use that is not explicitly residential, mixed-use, commercial, or industrial, and

active or passive recreation, including, but not limited to parks, plazas, courtyards, playing fields, trails, greenways, and golf courses.

"Outpatient clinic" means a facility for examining and treating patients with medical problems on an outpatient basis, including ambulatory care or similar medical services that generally require a stay of less than twenty-four hours.

"Park" means any facility that is:

1. Open to the public for recreational uses, including, but not limited to, hiking, swimming, boating, camping;

2. Predominately kept in a natural state; or

3. Property of the local, state or federal government, or any department or agency thereof, specifically designated as a park, natural area or recreation area. However, the term "park" shall not include "greenways" as defined in Metropolitan Code of Laws Section 17.04.060(B).

"Park and ride lot" means the temporary storage of automobiles on a daily basis for persons traveling together to and from work either through carpools, vanpools, buspools or mass transit.

"Parking garage" means a "parking structure".

"Parking structure" means a parking facility consisting of two or more stories which requires ramp access. This does not include a single-story garage, carport or other covered parking area that is otherwise a surface parking lot. A parking structure may be part of a mixed-use building or be a stand alone building.

"Pawnshop" means any building, room, space or portion thereof where a pawnbroker regularly conducts business, as regulated by Title 45, Chapter 6, of the Tennessee Code Annotated.

"Pedestrian benefit zones" means the sixteen zones in which contributions in lieu of sidewalk construction may be collected, and where such contributions shall be spent for the safety and convenience of pedestrians. Pedestrian benefit zones are as follows:

Zone 1: Bounded by I-40 on the south; I-65 on the southeast; Cumberland River on the north; State Route 155 on the west. (North Nashville, Metro Center, Nations areas)

Zone 2: Bounded by Cumberland River and I-65 on the south; I-24 on the east; State Route 155 on the north and west. (Bordeaux area)

Zone 3: Bounded by Cumberland River on the south and east; State Route 155 on the north; I-24 on the east. (East Nashville, Parkwood areas)

Zone 4: Bounded by I-40 on the south; Stones River on the east; the Cumberland River on the north; I-24 on the west. (Spence Lane, Donelson areas)

Zone 5: Bounded by I-440, I-24, and State Route 155 on the south and east; I-40 on the north; I-65 on the west. (South Nashville, North Mill Creek areas)

Zone 6: Bounded by I-440 on the west and south; I-65 on the east; I-40 on the north. (Midtown area)

Zone 7: Bounded by the downtown interstate loop. (Downtown area)

Zone 8: Bounded by the county line on the south; I-65 on the east; I-440 and I-40 on the north; State Route 251, State Route 100, and Harpeth River on the west. (West Nashville, Green Hills areas)

Zone 9: Bounded by the county line on the west and south; Harpeth River, State Route 100, and State Route 251 on the east; I-40 on the north. (Bellevue, Pasquo, Harpeth River areas)

Zone 10: Bounded by I-40 on the south; State Route 155 on the east; Cumberland River on the north; county line on the west. (Newsom Station, Whites Bend, Cockrill Bend areas)

Zone 11: Bounded by Cumberland River and State Route 155 on the south; I-24 on the east and north; county line on the west. (Joelton, Beaman Park, Bells Bend areas)

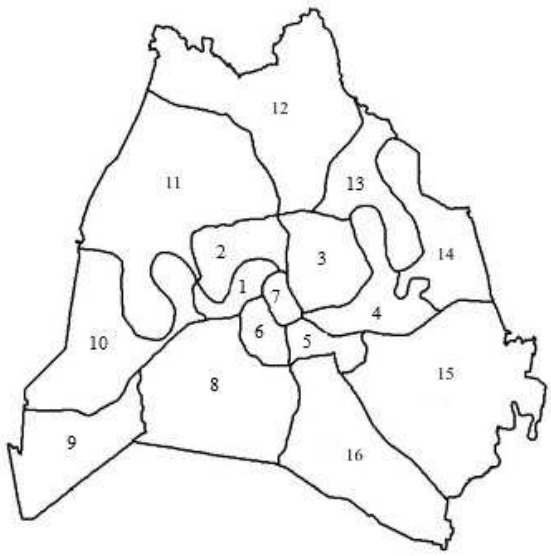
Zone 12: Bounded by State Route 155 on the south; I-65 on the east; county line on the north; and I-24 on the west. (Paradise Ridge, Union Hill, Goodlettsville areas)

Zone 13: Bounded by State Route 155 and Cumberland River on the south and east; county line on the north; I-65 on the west. (Madison, Neelys Bend, Rivergate areas)

Zone 14: Bounded by I-40 on the south; county line on the east; Old Hickory Lake and Cumberland River on the north and west; Stones River on the southwest. (Old Hickory, Lakewood, Hermitage areas)

Zone 15: Bounded by I-24 on the southwest; county line on the south and east; I-40 on the north; State Route 155 on the northwest. (Antioch, Priest Lake areas)

Zone 16: Bounded by county line on the south; I-24 on the east; I-440 on the north; I-65 on the west. (Grassmere, Southeast Nashville, Cane Ridge areas)



Pedestrian Benefit Zones

"Pedestrian passage" means a pedestrian connection between or through buildings or lots, accessible to the public.

"Pedestrian travelway" means the portion of a sidewalk or multi-use path intended to facilitate the unobstructed through movement of pedestrians and/or bicyclists.

"Permanently reside" means to occupy a home or unit as one's legal domicile, where the habitation is fixed and to which, whenever the person is absent, the person has a definite intention to return. Factors relevant to whether an individual permanently resides at a particular home or unit include, but are not limited to, receipt of mail, registration to vote, licensing for activities such as driving, and the licensing or registration of that individual's personal property.

"Personal care services" means services such as fitness centers, spas, tanning salons, beauty and barber care, and dry cleaning and laundry services not to include a laundry plant.

"Personal instruction" means services for training individuals or groups in arts, fitness, personal defense, crafts or other subjects of a similar nature.

"Personal wireless service facility (PWSF)" means any staffed or unstaffed location for the transmission and/or reception of radio frequency signals or other personal wireless communications, including commercial mobile services, unlicensed wireless services, wireless broadband services, and common carrier wireless exchange access services as defined in the Telecommunications Act of 1996, and usually consisting of an antenna or group of antennas, transmission cables, feed lines, equipment cabinets or shelters, and may include a tower. Facilities may include new, replacement, or existing towers, replacement towers, collocation on existing towers, base station attached concealed and non-concealed antenna, dual purpose facilities, concealed towers, and non-concealed towers (monopoles, lattice and guyed), so long as those facilities are used in the provision of personal wireless services as that term is defined in the Telecommunications Act.

"Porch" means an open air room appended to the mass of a building with floor and roof.

"Power/gas substation" means a facility that regulates electric current or natural gas pressure for distribution to individual neighborhoods.

"Preservation permit" means a certificate issued by the historic zoning commission denoting approval of changes in uses, buildings or structures to be made within a historic overlay district.

"Principal building" means a building that contains the principal use located on a lot.

"Principal business purpose" means a business purpose for which any one of the following applies:

(1) At least thirty-five percent of the business's displayed merchandise consists of books, magazines, periodicals or other printed matter, or photographs, films, motion pictures, video cassettes, compact discs, digital video discs, slides, or other visual representations, which are characterized by their emphasis upon the display of "specified sexual activities" or "specified anatomical areas";

(2) At least thirty-five percent of the wholesale value of the business's displayed merchandise consists of the foregoing enumerated items;

(3) At least thirty-five percent of the retail value of the business's displayed merchandise consists of the foregoing enumerated items;

(4) At least thirty-five percent of the business's revenues derive from the sale or rental, for any form of consideration, of the foregoing enumerated items;

(5) At least thirty-five percent of business's interior business space is used for the display, sale, or rental of the foregoing enumerated items;

(6) The business regularly features the foregoing enumerated items, and prohibits access by minors, because of age, to the premises, and advertises itself as offering "adult" or "XXX" or "X-rated" or "erotic" or "sexual" or "pornographic" material on signage visible from a public right-of-way.

"Principal pedestrian entrance" means the main point of pedestrian access to a building.

"Principal use" means a use that fulfills a primary function of an establishment, institution, household, or other entity.

"Printing and publishing" means the production and distribution of books, magazines, newspapers and other printed matter, including retail photocopying and blueprinting services, as well as record pressing and publishing, engraving and photoengraving.

"Putrescible waste" means material which is capable of undergoing the process of decomposition resulting in the formation of malodorous byproducts.

"Qualified collocation request" means collocation of PWSF on a tower or base station that creates a substantial change in the facility but is entitled to processing within ninety days under 47 U.S.C. § 332(c)(7).

"Radio/television/satellite tower" means towers and accessory buildings for transmitting and receiving radio, television, satellite and other broadcast signals, including radar surveillance.

"Recreation center" means recreational facilities such as community centers, playgrounds, parks, swimming pools and playing fields that are available to the membership of a club or the general public.

"Recycling collection center" means a drop-off facility for the temporary assemblage of small recyclable consumer items such as food and beverage containers, fabrics and paper.

"Recycling facility" means a facility, other than a facility open to the public to receive household waste and recyclable material, where any method, technique, or process is utilized to separate, process, modify, convert, treat or otherwise prepare non-putrescible waste so that component materials or substances may be used or reused or sold to third parties for such purposes. The use or reuse of a solid waste may not be used in a manner that would constitute solid waste disposal.

"Rehabilitation services" means the provision of treatment for addictive, mental or physical disabilities on either twenty-four hours a day or outpatient basis.

"Rehearsal hall" means the provision of an area for rehearsal of musical or artistic performances without the provision of spectator seating.

"Religious institution" means any structure or site used primarily for religious practices.

"Research service" means basic or applied research, or experimental study, testing or analysis in the natural sciences, including any educational uses associated with and accessory to such research.

"Residence for persons with disabilities, more than eight individuals" means a group of more than eight unrelated persons with disabilities, including two additional persons acting as support staff or guardians, living together as a single housekeeping unit. For purposes of this subsection, "persons with disabilities" includes persons with a physical or mental impairment which substantially limits one or more of such person's major life activities, a record of having such an impairment, or being regarded as having such an impairment; provided, however, such term does not include current, illegal use of or addiction to a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)). For the purposes of this subsection, "physical or mental impairment" includes drug addiction (other than addiction caused by current, illegal use of a controlled substance) and alcoholism pursuant to 24 C.F.R. § 100.201. For the purposes of this subsection, "persons with disabilities" does not include persons who pose a substantial likelihood of serious harm as defined in Tennessee Code Annotated § 33-6-501, or who have been convicted of serious criminal conduct related to such disability.

"Restaurant, fast-food" means any building, room, space, or portion thereof where food is sold for consumption on-site or off-site within a short period of time, orders are made at either a walk-up or counter, payment for food is made prior to consumption, and the packaging of food is done in disposable containers.

"Restaurant, full-service" means any building, room, space or portion thereof where food is sold for consumption on-site, customers are provided an individual menu, a restaurant employee serves the customers at the same table or counter at which items are consumed, or where seating turns over at a rate of thirty minutes or more. A restaurant shall not be considered a restaurant, fast-food or restaurant, take-out solely on the basis of incidental or occasional take-out sales.

"Restaurant, take-out" means any building, room, space or portion thereof where a limited variety of food or beverages are sold principally for off-site consumption, but which may include incidental seating for on-site consumption containing no more than twenty seats. Typical uses include bakeries, candy, nut, and confectionery stores, coffee houses, ice cream and frozen dessert stores, small delicatessens and similar establishments.

"Retail" means the sale of goods and/or services at retail. For purposes of calculating required parking, retail includes "retail, general" and "retail, convenience" and "retail, shopping center.

Retail, convenience. "Convenience retail" means an establishment engaged in the retail sale or rental of frequently or recurrently needed items for household use to a limited market area, provided that the establishment does not contain more space than the maximums shown in the following table:

Type of Establishment	Maximum Size (GFA)
General food stores	15,000
Drugstores, hardware stores, apparel/ cosmetic Stores	10,000
Coffee/juice stores, bookstores, retail bakeries, videotape rental stores	5,000
Flower shops, newsstands, and other stores	3,000

Convenience food stores may include accessory gasoline sales, provided that the pump facilities are capable of serving no more than four vehicles at one time.

Retail, general. "General retail" means an establishment providing general retail sales, services or rental from the premises, of goods and/or services not specifically classified in another commercial activity type.

Retail, shopping center. "Shopping center retail" means a single building containing at least twenty-five thousand square feet and containing two or more different individual stores engaged in general retail sales or convenience retail sales.

"Reuse" means (a) the on-site use of reprocessed construction and demolition or (b) the off-site redistribution of a material which would otherwise be disposed of, for use in the same or similar form as it was produced.

"Roof line" means a horizontal line intersecting the highest point or points of a roof.

"Rooming unit" means a residential unit that contains a bed and may contain a bathroom, microwave, television, or dorm-sized refrigerator, but where there is a common kitchen and communal area for all residents within the facility. For purposes of determining density, three rooming units in a facility shall be counted as one dwelling unit.

"Rope lighting" means lighting that is primarily used as a decorative lighting fixture, featuring small light bulbs linked together and encased in a PVC jacket to create a string of lights.

"Rural bed and breakfast homestay" means a rural bed and breakfast homestay shall contain six or fewer furnished rooms for pay within a private, owner-occupied structure which is on a single lot that exceeds five acres, and is located in an agriculturally zoned district, and authorized by the board of zoning appeals, according to Section 17.16.160.

"Safety service" means the conduct of publicly owned safety and emergency services such as, but not limited to fire stations, police stations and emergency medical and ambulance service.

"Salvage" means the controlled removal of construction or demolition waste/material from a building, construction, or demolition site for the purpose of recycling, reuse, or storage for later recycling, reuse, or proper storage for future recycling or reuse.

"Satellite dish" means a specialized antenna for the reception and/or transmission of broadcast signals to and from orbiting satellites.

"Scrap operation" means the storage, processing and/or sale from the premises of used or waste material, including automotive dismantlers and recyclers, where a person, firm, association, corporation, or trust resident or nonresident, is engaged in the business and/or providing facilities for the purpose of recovering parts from automobiles and trucks, which have been wrecked or otherwise rendered inoperable as transportation vehicles with the parts recovered being for resale and further reduce used automobiles and trucks to a condition capable of salvage for their metal scrap content by scrap processors.

"Screening" means visually shielding or obscuring a structure, use or equipment from public view by a liner building, fencing, wall, or densely planted vegetation.

"Security residence" means living quarters for one family for the purpose of providing security as an accessory to a principal use.

"Self-service storage" means the lease or rent of small storage units for the purpose of storing personal property.

"Service area" means an area located at grade that is for the purpose of loading and unloading vehicles.

"Setback" means that part of a lot extending open and unobstructed from the lowest level to the sky, except for permitted obstructions, along the length of a lot line for a depth or width set forth in the bulk regulations for the district in which the lot is located. Required setbacks are also referred to as yards. See Diagram 17.04F.

The following setback types are referenced:

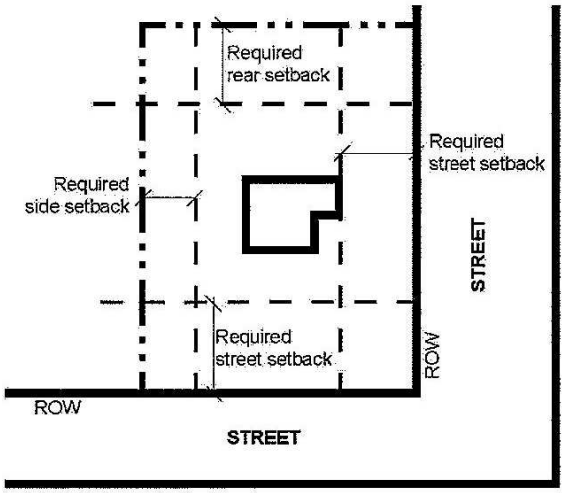
1. "Interior side setback" means a side setback that does not abut a street.

2. "Rear setback" means a setback extending for the full length of a lot line not abutting a street, on the opposite end of a lot from a front setback.

3. "Side setback" means a setback extending along a lot line from the front setback to the rear setback, or, in the case of a through lot or through corner lot, to another front setback.

4. "Street setback" means a setback extending along the full length of the lot line abutting a street.

Diagram 17.04F
SETBACK ILLUSTRATION



"Sex club" means any establishment, business, or club that allows members to engage in specified sexual activities or the exposure of specified anatomical areas, and which contains either rooms for couples or other adult-themed rooms or both for the use of members.

"Short term rental property (STRP)—Owner-occupied" means an owner-occupied residential dwelling unit containing not more than four sleeping rooms that is used and/or advertised through an online marketplace for rent for transient occupancy by guests.

"Short term rental property (STRP)—Not owner-occupied" means a residential dwelling unit that is not owner-occupied containing not more than four sleeping rooms that is used and/or advertised through an online marketplace for rent for transient occupancy by guests.

"Shrub" means a woody plant with a multiple stem capable of growing to a height of no more than fifteen feet.

"Sidewalk" means all Streetside Elements included in the Major and Collector Street Plan and Streetside Elements for local streets required by other standards of the metropolitan government located within the public right-of-way or a pedestrian easement.

"Sidewalk, On-site" means pedestrian facilities located outside of the public right-of-way.

"Sign" means any writing (including letter, work or numeral), pictorial representation (including illustration or decoration); emblem (including device, symbol or trademark); flag (including banner or pennant); inflatable structure; or any other figure of similar character, which is a structure or any part thereof, or is attached to, painted on, or in any other manner represented on a building or other structure; and is used to announce, direct attention to, or advise.

These terms regarding signs are referenced:

1. "Awning sign" means the application of words, lettering and/or logos to an awning.

2. Billboard. A "billboard" is defined as a sign that is used to advertise or inform by directing attention to a cause, event, campaign, business, profession, commodity, product, service or entertainment which is conducted, sold, distributed or offered elsewhere than upon the same premises as the billboard, or which directs attention to any brand name or trade name product which may be incidentally available on the same premises as the billboard.

3. "Building sign" means any sign attached to or supported by any building or other structure that has a purpose other than solely to support a sign. A building sign may be attached by means of projection, wall mounting or roof support subject to height restrictions.

4. "Canopy sign" means the application of words, lettering and/or logos to a canopy.

5. "Common signage plan" means a document indicating the integration of sign size, design, location or duration when more than one sign/ownership is involved on any zone lot.

6. "Display surface area" means the entire area within a single continuous perimeter enclosing the extreme limits of wording, representation, emblem, or any figure of similar character, together with any background materials, color or area defined by a border or frame, any of which forms an integral part of the display or serves to differentiate such display from the structure to which it is affixed.

7. "Ground sign" means a sign that has no attachment to any part of a building and meets one of the following criteria:

a. Mounted directly on and securely attached to a concrete slab at ground level; or

b. Mounted on and securely attached to one or more posts, columns, braces or structures other than buildings extended from ground level and anchored in the ground with a concrete foundation in compliance with the metropolitan building code.

8. "Hanging sign" means a ground sign with one vertical post and one or two arms from which a sign hangs. The sign is intended for buildings with a deep build-to zone and is placed perpendicular to the sidewalk.

9. "Informational sign" means an informational sign is for the purpose of a zone lot occupant, or occupants, to convey discreet informational items, direc-

tions or instructions for the safety, convenience and need to know for the use, or restriction of use, of a lot on a permanent basis.

10. "Landmark sign" means a sign that exemplifies the cultural, architectural, or commercial identity of Nashville and Davidson County, is iconic in its location, and contributes to the surrounding neighborhood character.

a. "Historic sign" means a landmark sign that exemplifies the cultural, architectural or commercial history of Nashville and Davidson County and was constructed more than fifty years before the date of application.

b. "Vintage sign" means a landmark sign that is iconic and culturally significant and was constructed between fifty and twenty-five years before the date of application.

c. "Replica sign" means a landmark sign that is an exact reproduction of an historic sign which no longer exists.

11. "Major sign" means a building-mounted sign indicating the name of a building and/or the primary building tenant. The sign is intended for building identification.

12. "Marquee sign" means a canopy sign that includes a section with changeable copy that relates to the principal use on the premises.

13. "Minor sign" means a sign that advertises individual tenants in a multi-tenant building. The sign may be building-mounted or projecting.

14. "Monument sign" means a permanent ground sign where the bottom of the display surface area, along its entire length, is attached to the ground or a continuous pedestal, not support poles.

15. "Multi-tenant sign" means a sign on which the names and locations of occupants in a multi-tenant building are identified along the street.

16. "On-premises sign" in the CC, CF and CS zone districts and effective January 1, 1998 in the CA, CL, SCC, SCR, ORI and MUI zone districts, except within an historic overlay district, means a sign that advertises or attracts attention to a specific event, activity, establishment, commodity, product, service or entertainment which is conducted, sold, distributed or offered on the same premises as the sign or offered elsewhere than upon the same premises as the sign, if the sign is accessory to the principal use.

"On-premises sign" in any other zone district, including property within an historic overlay district, is a sign that advertises or attracts attention to a specific event, activity, establishment, commodity, product, service or entertainment which is conducted, sold, distributed or offered on the same premises as the sign.

17. "Overall signage plan" means a plan which indicates the general location, maximum dimensions and structural types of all signs to be erected on the lot.

18. "Parking sign" means a sign indicating the location of parking facilities to both drivers and pedestrians.

19. "Portable sign" means any sign, unless otherwise permitted by this code, that is designed and constructed in such a way as to not require permanent attachment to the ground, a building, or other unmovable structure.

20. "Projection-mounted sign" means a building sign that is:

a. Attached to a wall and projects outward from the wall more than twelve inches; or

b. Suspended from any structure that constitutes a covering or shelter such as a canopy, portico or marquee. Usually, though not always, the face of a projecting sign will be perpendicular to or form a wide angle with the surface to which it is attached.

21. "Roof-mounted sign" means a building sign that is attached to or mounted on a roof in such a way that the top of the sign does not exceed the roof line.

22. "Signage" means area in square feet of the continuous perimeter of copy including any wording, numerals, emblem or representation which is used to announce, direct attention to or advertise.

23. "Sign setback line" means the spacing between a sign and a lot line or two signs.

24. Sign Structure, Permanent Ground. "Permanent ground sign structure" means a structure, including foundations, platforms, uprights, supports, frames, display surfaces, and/or other appurtenances, intended solely to support and display one or more signs and which meets the following requirements:

a. Pole or pylon sign structures are firmly anchored to the ground in compliance with the metropolitan building code standards; and

b. Ground sign structures include a concrete foundation and concrete slab platform at or near grade to which signs or other appurtenances to support signs can be securely attached.

25. "Temporary on-premises sign" means a permitted sign that announces an event, use or availability for the duration of that event, use or availability and limits the placement and removal of the sign to a limited period of days before and after the duration period.

26. "Tri-face billboard" means a non-internally illuminated billboard where the panel display face is made with triangular louvered narrow vertical panels that periodically rotate to display three different advertising messages in a predetermined sequence.

27. "Wall-mounted sign" means a building sign that conforms to the following:

a. That is attached to a wall (including parapet wall) or other structure that supports a roof, including any sign that is part of or attached to a canopy or awning and any sign attached to any side face of a marquee;

b. That does not project outward more than twelve inches from the surface to which it is attached; and

c. In which the sign face is parallel to the plane of the surface to which it is attached.

28. "Window sign" means any sign attached to or directly applied on a window or glass door; intended for viewing from the exterior.

"Single family" means one residential dwelling unit per structure.

"Single ownership" means the proprietary interest of a single landowner or person.

"Small cell facility" means a wireless service facility that either meets both of the following qualifications or is within a stealth design that is consistent with the design guidelines:

1. Each antenna is located inside an enclosure of no more than five cubic feet in volume or, in the case of an antenna that has exposed elements, the antenna and all of its exposed elements could fit within an enclosure of no more than five cubic feet, however, the maximum dimensions of the antenna shall not exceed 36" in height and 16" in diameter; and

2. Primary equipment enclosures are no larger than seventeen cubic feet in volume. The following associated equipment may be located outside of the primary equipment enclosure and, if so located, is not included in the calculation of equipment volume: Electric meter, concealment, telecommunications demarcation box, underground enclosures, back-up power systems, grounding equipment, power transfer switch, and cut-off switch.

"Small cell network" means a collection of interrelated small cell facilities designed to deliver wireless service.

"Small outdoor music event" means the provision of live acoustic music using small portable sound systems outside of permanent structures on commercially-zoned property where the performers are located within one thousand feet of any residentially-zoned property.

"Special exception (SE)" means uses that require authorization by the board of zoning appeals prior to the issuance of a zoning permit according to the provisions of Article III of Chapter 17.16 and Article VII of Chapter 17.40.

"Step-back" means a change in the vertical plane of multi-story buildings that preserves the pedestrian experience at sidewalk-level by setting the upper story building facade away from the street beyond the maximum building height allowed at the build-to-zone.

"Stoop" means a landing and its associated stair or ramp connecting a building entrance to the ground.

"Story" means a portion of a building between the surface of any floor and the surface of the floor above it, or, if there is no floor above it, the space between such floor and the ceiling above it. A basement or cellar shall not be deemed a story if the finished floor level directly above is not more than six feet above the average elevation of the adjacent finished grade. In the DTC zoning district "story" also means a level within a building by which height is measured.

"Story, half" (or "attic story") means a conditioned space that rests primarily underneath the slope of the roof, usually having dormer windows. The half story is identified by the ".5" in the description of maximum height (Example: 2.5). This space shall be considered a full story when its top wall plates, on at least two opposite exterior walls, are greater than four feet above the floor of such story. A dormer shall not occupy more than fifty percent of any roof face. The ridge of any dormer shall be at least two feet below the roof ridge, with its sidewalls inset at least two feet from the edge of the roof or the sidewalls of any other dormer and its front wall inset at least two feet from the wall below.

"Street" means a publicly maintained right-of-way, other than an alley, that affords a means of vehicular access to abutting property. The following are street, functional design type designations:

1. "Arterial street" means a street designated as either an "arterial-boulevard" or an "arterial-parkway" on the adopted Major and Collector Street Plan.

2. "Collector street" means a street designated as a "collector-avenue" on the adopted Major and Collector Street Plan.

3. "Local street" means a street with a low level of mobility that is used primarily for access to property and provides connectivity between collector and arterial streets.

4. "Minor local street" means a street that is a dead end or loop street providing service to no more than fifty single family residential lots or sixty-five multi-family units.

5. "Scenic arterial" means a street designated as either a "scenic arterial-boulevard" or a "scenic arterial-parkway" on the adopted Major and Collector Street Plan.

"Street, frontage classifications" refers to the character of the street and adjacent buildings, and is applied in conjunction with the street, functional design type designation.

1. "Street, neighborhood" means a smaller street of neighborhood-scale and character with limited connectivity within an area and little or no connectivity to the city. A neighborhood street is typically more residential than other streets within the subdistrict.

2. "Street, other" means an atypical street with limited lot access and limited pedestrian activity such as, but not limited to, interstate entrance and exit ramps and similar streets.

3. "Street, primary" means a street with significance within the neighborhood, the area, and perhaps the city and has high pedestrian and vehicular activity. Vehicular access to properties is significantly limited. In all aspects of building design, frontages, sidewalks, and open spaces, pedestrian safety, comfort, and accessibility are of highest importance.

4. "Street, secondary" means a support street. In comparison to a primary street, a secondary street has less significance within the neighborhood and the area. Vehicular access to properties is permitted and shall sufficiently accommodate pedestrian safety, comfort and accessibility.

5. "Street, tertiary" means a street of lesser importance than primary, secondary, or neighborhood streets and with little or no connectivity to the city. A tertiary street may function as "back of house" for a building with multiple street frontages.

"Street line" means a lot line abutting and coincident with a street right-of-way.

"String lighting" means a series of lights located along a coated wire.

"Structural root zone (SRZ)" means the area of soil around a tree where the minimum area of roots required to maintain the structural stability of the tree are located. The SRZ is to be determined by measuring one-half foot per each inch of tree diameter at breast height, with a minimum of six feet.

"Structure" means anything constructed above or below ground.

"Subdivision" means any subdivision of land as provided in Section 13-3-401 et seq. and Section 13-4-301 et seq., Tennessee Code Annotated.

"Substantial change" means a modification or collocation constitutes a "substantial change" of an eligible support structure if it meets any of the following criteria:

1. A telecommunications facility collocation on an existing structure within a public right-of-way increases the overall height of the structure, antenna and/or antenna array more than ten percent or ten feet, whichever is greater.

2. A telecommunications facilities collocation for towers not in a public right-of-way protrudes from the structure more than ten percent or twenty feet whichever is greater or the width of the structure at the elevation of the collocation, and for towers within a public right-of-way, protrudes from the structure more than six feet.

3. A telecommunications facility collocation on an existing structure fails to meet current building code requirements (including windloading).

4. A telecommunications facility collocation adds more than four additional equipment cabinets or one additional equipment shelter.

5. A telecommunications facility collocation requires excavation outside of existing leased or owned parcel or existing easements.

6. A telecommunications facility collocation defeats any existing concealment elements of the structure.

7. A telecommunications facility collocation fails to comply with all conditions associated with the prior approval of the structure except for modification of parameters as permitted in this section.

"Support structure" means anything constructed or erected, the use of which requires permanent location on the ground, or attachment to something having a permanent location on the ground, including alternative structures, but excluding antennas.

"Switch gear" means a high-voltage electrical device used to switch main feeder circuits and to provide fuse protection for distribution of currents to customers.

"Tank farm" means an open air facility containing aboveground large containers for the bulk storage of material in liquid, powder or pellet form.

"Tasting room" means an area within a distillery, including an artisan distillery, or a brewery, including a microbrewery, which serves and sells products produced by the distillery or brewery in association with tours of the facility.

"Telecommunications facility" means one or more antenna, tower, base station, mechanical and/or electronic equipment, conduit, cable, fiber, wire, and associated structures, enclosures, assemblages, devices and supporting elements that generate, transmit or produce a signal used for communication that is above ground and is proposed by an entity other than the Metropolitan Government, including but not limited to radio/tv/satellite and broadcast towers, telephone service, including new microwave or cellular towers, PWSF, DAS, small cell facilities and COW's. A DAS system that is completely enclosed within one building is not considered a telecommunications facility.

"Telephone service" means a facility providing telephone and telegraph services to the public, including central office exchanges, switching buildings, and microwave and cellular towers.

"Temporary festival" means the provision of rides, games, food and amusements outside of permanent structures. The use shall have a duration of no more than ten days in a month.

"Title loan" means any building, room, space or portion thereof where a business operates that makes loans in exchange for possession of the certificate of title to property or a security interest in titled property, as regulated by Title 45, Chapter 15, of the Tennessee Code Annotated.

"Tower" means any support structure built for the primary purpose of supporting any antennas and associated facilities for commercial, private, broadcast, microwave, public, public safety, licensed or unlicensed, and/or fixed or wireless services. A tower may be concealed or non-concealed. Non-concealed towers include:

Guyed. A style of tower consisting of a single truss assembly composed of sections with bracing incorporated. The sections are attached to each other, and the assembly is attached to a foundation and supported by a series of wires that are connected to anchors placed in the ground or on a building.

Lattice. A self-supporting tapered style of tower that consists of vertical and horizontal supports with multiple legs and cross bracing, and metal crossed strips or bars to support antennas.

Monopole. A style of freestanding tower consisting of a single shaft usually composed of two or more hollow sections that are in turn attached to a foundation. This type of tower is designed to support itself without the use of guy wires or other stabilization devices. These facilities are mounted to a foundation that rests on or in the ground or on a building's roof. All feed lines shall be installed within the shaft of the structure.

"Trade permit" means a permit issued by the Metropolitan Codes Department to perform electrical, plumbing, gas, low voltage, or HVAC work.

"Transient" means any person who exercises occupancy or is entitled to occupancy of any rooms, lodgings or accommodations for a period of less than thirty continuous days.

"Transmission equipment" means equipment that facilitates transmission of communication service (whether commercial, private, broadcast, microwave, public, public safety, licensed or unlicensed, fixed or wireless), including but not limited to radio transceivers, antennas, coaxial or fiber-optic cable, and regular and backup power supply.

"Transportation coordinator" means a person who is designated to conduct parking demand studies and monitor commuting patterns to ascertain and ensure that the parking supply for a land use is adequate to serve parking demand.

"Travelway" means that portion of a public right-of-way that is improved for use by self-propelled vehicles or bicycles, including paved or gravel areas and any other area intended for vehicle movement.

"Tree" means a woody, perennial plant with a single or multiple trunks capable of growing to a height of eight feet or more and includes the anatomical and structural components necessary to sustain the health of the tree, including but not limited to the bole or root flare, trunk, leader, crown, canopy, and structural roots.

Tree, canopy. "Canopy tree" means any self-supporting woody plant of a species that normally achieves an overall height at maturity of thirty feet or more.

"Tree density factor" means a number based on the basal area derived from the combination of the density of trees remaining on a site and the density of additional trees to be planted.

Tree, heritage. "Heritage tree" means any tree meeting the criteria established in 17.28.065 of this title.

Tree, historic and specimen. "Historic and Specimen tree" means any tree meeting the criteria established in Section 17.28.065 of this title.

Tree, prohibited. "Prohibited tree" means any tree which, by the nature of its fruit, root system, brittleness of wood, or susceptibility to disease, is not allowed as a replacement tree.

Tree, protected. "Protected tree" means any tree meeting the criteria established in Section 17.28.065 of this title.

Tree, replacement. "Replacement tree" means those trees required to be planted based on the difference between the required tree density factor and the actual tree density factor following all approved tree removal.

Tree, retained. "Retained tree" means a tree that is selected to be saved or preserved for purposes of being counted toward the required tree density for the property. To qualify as a retained tree, the tree shall not be listed on the most recent edition of the Tennessee Invasive Exotic Plant List and shall be in fair or better condition, with no major insect or pathological problems.

Tree, understory. "Understory tree" means any self-supporting woody plant of a species that normally achieves an overall height at maturity of fifteen to thirty feet and that can grow beneath larger canopy trees.

"Two-family" means:

1. Two attached dwelling units that share the floor of a unit with the ceiling of another unit or a common wall from grade to eave at the front façade which continues for eighty percent of the common side or twenty feet, whichever is greater; or

2. Two detached dwelling units on a single lot which are separated by at least six feet.

3. In historic zoning overlays, the manner or existence of attachment shall be determined by the metro historic zoning commission.

"Underground" means not visible from the surface of the earth.

"Unified plat of subdivision" means a property plat(s) approved by the planning commission and recorded by the register of deeds which either creates new lots or re-records existing lots for the purpose of achieving a coordinated and inter-related form of development and/or manner of operation, utilizing the plat to identify and establish by appropriate notes and legal cross-references those development or operational opportunities and/or limitations as authorized by this code and assigned to the subject lots by the owner(s) of the property.

"Use" means a function or operation that constitutes an activity occurring on the land.

"Useable open space" means public or privately held land used for active or passive recreation, including, but not limited to parks, plazas, courtyards, playing fields, trails, greenways, and golf courses.

"Utility companies" means any person, governmental body, organization, or entity of any type, and their agents, representatives, and employees, supplying electricity, natural gas, water, communications, or similar or associated services to the residential areas of Metropolitan Nashville and Davidson County.

"Utility equipment" means poles, towers, supports, wires, conductors, conduits, guys, stubs, cross arms, braces, transformers, insulators, cut-outs, switches, communication circuits, used or useful in supplying electricity, natural gas, water, communication or similar or associated services to the residential areas of Metropolitan Nashville and Davidson County.

"Vehicular rental/leasing" means the rental or leasing of automobiles, motorcycles, recreational vehicles, boats, recreational equipment, and light trucks and vans, including incidental parking and servicing of vehicles for rent or lease (e.g. rental car agencies and taxi-cab dispatch areas). No "Automobile Repair" or "Scrap Operation" activities may occur on-site and no abandoned vehicles shall be stored on the premises.

"Vehicular sales and service, limited" or "limited vehicular sales and service" means the retail or wholesale sale of motorcycles, trucks and vans, recreational vehicles, boats, or similar motorized recreational equipment, along with incidental service or maintenance such as, but not limited to boat dealers, motorcycle dealers, and recreational vehicle dealers. (See also "Automobile sales, new", "Automobile sales, used", "Automobile repair", "Vehicular rental/leasing", and "Heavy equipment sales and service.")

"Vocational school" means the offering of regularly scheduled instruction in technical, commercial or trade skills.

"Warehouse" means a facility used primarily for the bulk storage of goods and materials either for a private entity or the general public.

"Waste transfer" means a combination of structures, machinery or devices at a place or facility which receives solid waste taken from public or private collection vehicles or from individuals and which is placed in other transportation units for movement to another solid waste management facility. The facility may also provide for the sorting, processing and temporary storage of recyclable items.

"Water taxi station" means the provision of passenger loading and unloading facilities from watercraft. Ticket purchasing, restaurants and retail stores shall be permitted as accessory activities if the facility is located in a district that permits those uses.

"Wind energy facility (small)" means a wind energy facility consisting of one tower, one turbine, and having a rated capacity of not more than 100kW.

"Wind energy facility (utility)" means a wind energy facility consisting of two or more towers with turbines, or having a rated capacity of 100kW or more, and where the primary use of the facility is electrical generation to be sold to the wholesale electricity markets.

These terms regarding wind energy systems are referenced:

1. "Blade glint" means the intermittent reflection of the sun off the surface of the blades of a single or multiple wind turbine(s).

2. "Distance" means a measurement made in a straight line, without regard to intervening structures or objects, from the wind turbine's center toward the specified distance required by this title.

3. "Height" means the vertical distance from pre-development grade to the tip of the wind turbine blade at its highest point, or blade-tip height.

4. "Nacelle body" means the structure at the top of the wind turbine that is separate from the blades and comprises the rotor shaft, gearbox, and generator.

5. "Occupied building" means a residence, religious institution, hospital, school, day-care, community education facility, or library.

6. "Shadow flicker" means the effect when the blades of an operating wind turbine pass between the sun and an observer, casting a readily observable, moving shadow on the observer and his/her immediate environment

7. "Wind energy facility" means a wind turbine and all associated equipment, machinery and structures utilized to convert wind to electricity. This includes, but is not limited to, towers, transmission, storage, collection and supply equipment, substations, transformers, and service and access roads.

8. "Wind turbine" means a device that converts kinetic wind energy into rotational energy to drive an electrical generator. A wind turbine typically consists of a tower, nacelle body, and a rotor with two or more blades.

"Workforce housing" means housing that, on an annual basis, costs thirty percent or less than the estimated median household income for households earning more than sixty percent and not to exceed one hundred and twenty percent of the median household income for the applicable county based on the number of persons in the household, as established by Median Household Income in the Past 12 Months by Household Size (B19019) from the most recently available U.S. Census Bureau American Community Survey.

"Wrecker service" means the removing of a motor vehicle by towing, carrying, hauling or pushing from public or private property when such vehicle has been ordered to be impounded to a public or private impound lot. This shall not include an "automobile service" use that has a tow truck and services vehicles on-site. (See also "Automobile repair" and "Automobile service").

Zoning map, official. "Official zoning map" means a map, or series of maps and special overlays showing districts and special districts that are established under the provisions of and have been made a part of this title.

"Zoning permit" means written approval by the zoning administrator that is required before commencing any construction, reconstruction, alteration of any building or other structure or before establishing, extending or changing any use on any lot. (Ord. BL2025-1007 § 1, 2025; Amdt. A to Ord. BL2025-1006 § 1, 2025; Ord. BL2025-1006 § 1, 2025; Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2025-958 § 1, 2025; Ord. BL2024-687 § 1, 2025; Ord. BL2024-594 §§ 1, 2, 2025; Ord. BL2024-617 § 1, 2024; Ord. BL2024-467 § 1, 2024; Amdt. 1 to Ord. BL2024-184 § 1, 2024; Ord. BL2024-184 § 1, 2024; Ord. BL2023-120 § 1, 2024; Amdt. C to Ord. BL2022-1471 § 3, 2023; Amdt. B to Ord. BL2022-1471 § 3, 2023; Amdt. A to BL2022-1471 § 3, 2023; Ord. BL2022-1471 §§ 2, 3, 2023; Ord. BL2022-1346 §§ 1, 2, 2022; Ord. BL2022-1122 § 3, 2022; Ord. BL2022-1073 § 1, 2022; Ord. BL2019-32 § 1, 2019; Ord. BL2018-1455 § 1, 2019; Amdt. 1 to Ord. BL2018-1416 § 2, 2019; Ord. BL2018-1416 §§ 1, 2, 2019; Ord. BL2018-1279 §§ 1, 2, 2018; Ord. BL2017-903 § 1, 2017; Ord. BL2017-900 §§ I, II, 2017; Ord. BL2017-899 § 1, 2017; Ord. BL2017-859 § 1, 2017; Amdts. 7, 8 to Ord. BL2017-608 § 1, 2018; Ord. BL2017-608 § 1, 2018; Ord. BL2017-654 § 11, 2017; Ord. BL2016-493 § 4, 2017; Amdt. 1 to Ord. BL2016-492 § 2, 2017; Ord. BL2016-492 §§ 2—4, 2017; Ord. BL2016-415 § 1, 2016; Ord. BL2016-379 §§ 1, 2, 2016; Ord. BL2016-309 § 2, 2016; Amdt. 2 to Ord. BL2016-132 § 1, 2016; Amdt. 1 to Ord. BL2016-132 §§ 1, 2, 2016; Ord. BL2016-132 §§ 1, 2, 2016; Amdt. 1 to Ord. BL2016-117 §§ 1, 2, 2016; Ord. Chapter 17.08

ZONING DISTRICTS AND LAND USES

Sections:

17.08.010	**Zoning districts established.**
17.08.020	**Zoning districts described.**
17.08.030	**District land use tables.**

17.08.010 Zoning districts established.

Purpose and Intent. In order to implement the land use policies of the general plan, the following districts are established by this Code. The zoning districts may be referenced in this Zoning Code as follows:

A. Agricultural Districts: AG, AR2a.

B. Residential Districts:

1. Single-Family Districts:

a. RS80 (80,000 square foot lot).
b. RS40 (40,000 square foot lot).
c. RS30 (30,000 square foot lot).
d. RS20 (20,000 square foot lot).
e. RS15 (15,000 square foot lot).
f. RS10 (10,000 square foot lot).
g. RS7.5 (7,500 square foot lot).
h. RS7.5-A (7,500 square foot lot).
i. RS5 (5,000 square foot lot).
j. RS5-A (5,000 square foot lot).
k. RS3.75 (3,750 square foot lot).
l. RS3.75-A (3,750 square foot lot).

2. One and Two-Family Districts:

a. R80 (80,000 square foot lot).
b. R40 (40,000 square foot lot).
c. R30 (30,000 square foot lot).
d. R20 (20,000 square foot lot).
e. R15 (15,000 square foot lot).
f. R10 (10,000 square foot lot).
g. R8 (8,000 square foot lot).
h. R8-A (8,000 square foot lot).
i. R6 (6,000 square foot lot).
j. R6-A (6,000 square foot lot).

3. Multi-Family Districts:

a. RM2 (2 units an acre).
b. RM2-NS (2 units an acre).
c. RM4 (4 units an acre).
d. RM4-NS (4 units an acre).
e. RM6 (6 units an acre).
f. RM6-NS (6 units an acre).
g. RM9 (9 units an acre).
h. RM9-A (9 units an acre).
i. RM9-NS (9 units an acre).
j. RM9-A-NS (9 units an acre).
k. RM15 (15 units an acre).
l. RM15-A (15 units an acre).
m. RM15-NS (15 units an acre).
n. RM15-A-NS (15 units an acre).
o. RM20 (20 units an acre).
p. RM20-A (20 units an acre).
q. RM20-NS (20 units an acre).
r. RM20-A-NS (20 units an acre).
s. RM40 (40 units an acre).
t. RM40-A (40 units an acre).
u. RM40-NS (40 units an acre).
v. RM40-A-NS (40 units an acre).
w. RM60 (60 units an acre).
x. RM60-A (60 units an acre).
y. RM60-NS (60 units an acre).
z. RM60-A-NS (60 units an acre).
aa. RM80-A (80 units an acre).
bb. RM80-A-NS (80 units an acre).
cc. RM100-A (100 units an acre).
dd. RM100-A-NS (100 units an acre).

4. Design-Based Multi-Family Districts:

a. RN1 (houses, townhouses).
b. RN2 (houses, townhouses).
c. RL1 (houses, townhouses, small apartment buildings).
d. RL2 (houses, townhouses, small apartment buildings).
e. RL3 (houses, townhouses, small apartment buildings).

5. Mobile Home Park District: MHP.

C. Specific Plan District: SP.

D. Mixed-Use Districts:

1. MUN Mixed-Use Neighborhood.
2. MUN-A Mixed-Use Neighborhood Alternative.
3. MUN-NS Mixed-Use Neighborhood No STRP.
4. MUN-A-NS Mixed-Use Neighborhood Alternative No STRP.
5. MUL Mixed-Use Limited.
6. MUL-A Mixed-Use Limited Alternative.
7. MUL-NS Mixed-Use Limited No STRP.
8. MUL-A-NS Mixed-Use Limited Alternative No STRP.
9. MUG Mixed-Use General.
10. MUG-A Mixed-Use General Alternative
11. MUG-NS Mixed-Use General No STRP.
12. MUG-A-NS Mixed-Use General Alternative No STRP.
13. MUI Mixed-Use Intensive
14. MUI-A Mixed-Use Intensive Alternative
15. MUI-NS Mixed-Use Intensive No STRP.
16. MUI-A-NS Mixed-Use Intensive Alternative No STRP.

E. Office Districts:

1. OR20 Office/Residential (20 units an acre).

2. OR20-A Office/Residential Alternative (20 units an acre).

3. OR20-NS Office/Residential No STRP (20 units an acre).

4. OR20-A-NS Office/Residential Alternative No STRP (20 units an acre).

5. OR40 Office/Residential (40 units an acre).

6. OR40-A Office-Residential Alternative (40 units an acre).

7. OR40-NS Office/Residential No STRP (40 units an acre).

8. OR40-A-NS Office/Residential Alternative No STRP (40 units an acre).

9. ON Office Neighborhood.

10. OL Office Limited.

11. OG Office General.

12. OG-NS Office General No STRP.

13. ORI Office/Residential Intensive.

14. ORI-A Office/Residential Intensive Alternative.

15. ORI-NS Office/Residential Intensive No STRP.

16. ORI-A-NS Office/Residential Intensive Alternative No STRP.

F. Commercial Districts:

1. CN Commercial Neighborhood.

2. CN-A Commercial Neighborhood Alternative.

3. CN-NS Commercial Neighborhood No STRP.

4. CN-A-NS Commercial Neighborhood Alternative No STRP.

5. CL Commercial Limited.

6. CL-A Commercial Limited Alternative.

7. CL-NS Commercial Limited No STRP.

8. CL-A-NS Commercial Limited Alternative No STRP.

9. CS Commercial Service.

10. CS-A Commercial Service Alternative.

11. CS-NS Commercial Service No STRP.

12. CS-A-NS Commercial Service Alternative No STRP.

13. CA Commercial Attraction.

14. CA-NS Commercial Attraction No STRP.

15. CF Commercial Core Frame.

16. CF-NS Commercial Core Frame No STRP.

G. DTC Downtown Code.

H. Shopping Center Districts:

1. SCN Shopping Center Neighborhood.

2. SCN-NS Shopping Center Neighborhood No STRP.

3. SCC Shopping Center Community.

4. SCC-NS Shopping Center Community No STRP.

5. SCR Shopping Center Regional.

6. SCR-NS Shopping Center Regional No STRP.

I. Industrial Districts:

1. IWD Industrial Warehousing/Distribution.

2. IR Industrial Restrictive.

3. IG Industrial General. (Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2019-111 § 1(Exh. A, §§ 1, 2), 2020; Ord. BL2015-1153 §§ 1, 6, 7, 2015; Ord. BL2011-898 § 2, 2011; Ord. BL2009-586 § 1(Exh. A, §§ 4, 5), 2010; Ord. BL2005-762 § 1, 2005; § 1(2) of Amdt. 1 with Ord. 96-555 § 2.1, 1997)

17.08.020 Zoning districts described.

A. Agricultural Districts. The AG and AR2a districts are intended to implement the natural conservation or interim nonurban land use policies of the general plan. Natural conservation policy is applied to those areas of the county which are unsuitable for urban scale development due to severe environmental constraints. Interim non-urban policy is applied to those areas that are not intended to urbanize within the planning period of the general plan. Furthermore, some areas of very steep topography, potentially unstable soils or a propensity to flood are intolerant of development of significant intensity and are appropriate for agricultural zoning.

The AG and AR2a districts are designed for uses that generally occur in rural rather than urban areas. These districts permit very low density residential development generally on unsubdivided tracts of land where public sanitary sewer service and public water supply are least practical. Because of their rural character, these districts will better accommodate some of the more impactive special exception uses that must be located within the county. By application of effective locational and operational standards, it is the intent of this title to minimize the impacts of such uses on residential home sites scattered throughout these districts.

B. Residential Districts. The residential districts allow a range of densities from very low (less than one unit per acre) to as high as sixty units per acre. These districts offer a diversity of housing types (including single-family, two-family and multifamily developments) throughout all density ranges established by the general plan.

Residential districts are to be applied in a manner consistent with the general plan. Residential districts should be applied according to the compatibility of the associated density with the topographic and soil conditions that prevail in the area, or when so recommended by the general plan, the prevailing development pattern of the area.

Residential districts also permit a limited range of compatible and supportive community-related uses that typically desire to locate within a residential setting. As a general rule, progressively higher density districts

within each residential policy category of the general plan should be located along higher classifications of street and in closer proximity to mass transit corridors, retail services or employment opportunities.

Although it is intended that development in residential districts be served with sanitary sewers, some low-density districts may be appropriate in nonsewered areas of the county if topographic and soil conditions are suitable for individual sewage disposal fields. Except for low-density districts, it is the intent of this code that sufficient urban services and facilities, including sanitary sewers, be available to or provided concurrent with development.

1. Single-Family (RS and RS-A) Districts. Intended for single-family residential development at a variety of densities, these districts may be applied to preserve the character of developed residential areas that are predominately single-family in nature and recommended to remain so by the general plan. These districts also may be applied to establish single-family character in developing areas at densities recommended by the general plan.

a. RS80, RS40, RS30 Districts. Designed for low intensity single-family development, these districts are appropriate for implementing the residential low density policies of the general plan. These districts may also be appropriate within selected areas of natural conservation policy that are environmentally suitable and can be provided necessary support services.

b. RS20, RS15, and RS10 Districts. Designed for relatively low to moderate intensity single-family development, these districts are appropriate for implementing the residential low-medium policies of the general plan. These districts may also be appropriate within selected areas of natural conservation policy, with urban services. The RS20 and RS15 districts may be applied along edges of areas classified within residential low density policy that have suitable physical characteristics and good street access.

c. RS7.5, RS7.5-A, RS5, RS5-A, RS3.75 and RS3.75-A Districts. Designed for higher intensity single-family development, these districts are appropriate for implementing the residential medium density policies of the general plan. As a general rule, these districts should have good access to either arterial or collector streets with the RS3.75 and RS3.75-A districts located in proximity to mass transit service.

2. One and Two-Family (R and R-A) Districts. The R and R-A districts are intended either for established residential subdivisions where the pattern of development contains both one-and two-family structures and where maintaining a mixture of housing types is desirable or for the development of new general plan.

a. R80 and R40 Districts. Intended for low intensity one-and two-family development, these districts are appropriate for implementing the residential low density polices of the general plan. These districts may also be appropriate within selected areas of natural conservation policy that are environmentally suitable and can be provided necessary support services. The R40 district also may be appropriate for selected areas policied for low-medium density development.

b. R30 and R20 Districts. Intended for low to moderate intensity one-family and two-family development, these districts are appropriate for implementing the residential low-medium density policies of the general plan. These districts also may be appropriate within those areas of natural conservation policy that are environmentally suitable and have urban services.

c. R15, R10, R8 and R8-A Districts. Intended for medium intensity one-family and two-family development, these districts are appropriate for implementing the residential medium density policies of the general plan. The R8 and R8-A districts also may be applied to areas policed for medium-high density residential development. Generally, these districts should have good access to either arterial or collector streets.

d. R6 and R6-A Districts. Intended to provide for higher intensity one-family and two-family development, this district is appropriate for implementing the residential medium or medium-high density policies of the general plan. This district should have good access to arterial streets with preference given to locations with mass transit service.

3. Multifamily (RM) Districts. The RM districts are designed for a range of low to very high intensity residential development characterized by multi-family structures. The lower density districts are appropriate for tracts of land encumbered by severe environmental constraints. Districts at the higher end of the density range for each density category of the general plan are intended to be placed on higher classifications of streets and in closer proximity to mass transit corridors, retail services, or employment opportunities. High density districts also may be appropriate in certain nonresidential policy areas where residential development would implement the general plan. Owners are encouraged to plan and develop multifamily complexes capitalizing on the more flexible design opportunities of Article V of Chapter 17.40.

a. RM2, RM2-NS, RM4, and RM4-NS Districts. These districts are designed primarily for low intensity multi-family structures of one, two or three stories, and

are appropriate for implementing the residential low-medium density policies of the general plan. These districts also may be employed within selected areas of natural conservation policy that are environmentally suitable and have urban services. The RM4 district may be used in areas policied for medium density residential development. RM2-NS and RM4-NS are designed to allow the same standards and uses of the RM2 and RM4 districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

b. RM6, RM6-NS, RM9, RM9-NS, RM9-A, and RM9-A-NS Districts. Designed primarily for low to medium intensity multifamily development of two-story or three-story structures, these districts are appropriate for areas designated in the general plan to have low to moderate intensity residential development to meet the goals of preservation of open space or environmental features while creating opportunities walkable communities with housing choice and the ability to support transit. The RM9 or RM9-A district also may be appropriate for areas policied for lower intensity office and mixed-use development, or along mixed-use corridors. Generally, these districts should have good access to either arterial or collector streets. RM9-A is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and is an alternative to a zoning district that requires a site plan. RM6-NS, RM9-NS, and RM9-A-NS are designed to allow the same standards and uses of the RM6, RM9, and RM9-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

c. RM15, RM15-NS, RM15-A, RM15-A-NS, RM20, RM20-NS, RM20-A, and RM20-A-NS Districts. Designed for moderately high intensity multifamily structures, these districts are appropriate for areas designated in the general plan to have more intense residential development to meet the policy goals of encouraging transit and walkable communities, preserving open space and environmental features and providing a mix of housing types. These districts may also be used in areas envisioned to evolve from solely commercial to more mixed-use development along primary corridors and in mixed-use centers. These districts should have good access to arterial streets and public transportation service. RM15-A and RM20-A are designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and as an alternative to a zoning district that requires a site plan. RM15-NS, RM15-A-NS, RM20-NS, and RM20-A-NS are designed to allow the same standards and uses of the RM15, RM15-A, RM20, and RM20-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

d. RM40, RM40-NS, RM40-A, RM40-A-NS, RM60, RM60-NS, RM60-A, and RM60-A-NS Districts. These districts are designed for high intensity multifamily development, typically characterized by mid- and high-rise structures and structured parking. These districts are appropriate for areas designated in the general plan to have residential development at moderate to high intensities, and along to primary corridors to meet the policy goals of creating transit-oriented communities and diversity of housing choice. These districts may also be appropriate as a transition between more intense mixed-use centers and surrounding neighborhoods. These districts should have good access to arterial streets and public transportation service. RM40-A and RM60-A are designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and as an alternative to a zoning district that requires a site plan. RM40-NS, RM40-A-NS, RM60-NS, and RM60-A-NS are designed to allow the same standards and uses of the RM40, RM40-A, RM60, and RM60-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

e. RM80-A, RM80-A-NS, RM100-A, and RM100-A-NS Districts. These districts are designed for high intensity residential structures, typically characterized by mid- and high-rise structures and structured parking. These districts are appropriate for implementing strictly residential policies of the general plan in areas characterized by the highest levels of accessibility, mass transit opportunities and essential support services. RM80-A and RM100-A are designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and as an alternative to a zoning district that requires a site plan. RM80-A-NS, and RM100-A-NS are designed to allow the same standards and uses of the RM80-A and RM100-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

4. Design-Based Multi-Family Districts.

a. RN1 and RN2 Districts. Intended for residential development, generally in the form of houses or townhouses, with private or shared open space. These districts are appropriate for providing lower levels of density at strategic locations in urban and suburban areas-such as in transition zones near corridors, close to

community amenities like parks and schools, or in areas with good access to arterial streets. Preference is given to locations with mass transit service.

b. RL1, RL2 and RL3 Districts. Intended for residential development, generally in the form of houses, townhouses, or small apartment buildings, with private or shared open space. These districts are appropriate for providing moderate levels of density at strategic locations close to transit corridors.

5. Mobile Home Park (MHP) District. Designed for mobile home parks, this district may be used to implement the residential medium density policies of the general plan. This district should have good access to collector streets, preferably with access to public transportation service.

C. SP, Specific Plan District. The SP District is intended to implement the context sensitive development and land use compatibility provisions of the general plan for all land use policies. The district shall be used to promote site specific development in the location, integration, and arrangement of land uses, buildings, structures, utilities, access, transit, parking and streets. A site specific plan shall establish specific limitations and requirements, including any not addressed by this title, so as to respect the unique character and/or charm of abutting neighborhoods and larger community in which the property is located. A specific plan (SP) district may be applied to any property, or within any overlay district established by Chapter 17.36.

D. Mixed-Use Districts. The purpose of all mixed-use districts is to provide for and encourage a mix of compatible land uses that provide opportunities to live, work and shop within compact areas. Included among the common goals for these districts is the efficient use of land capitalizing on a high level of services, reduced reliance on the automobile with enhanced usage of mass transit, strong pedestrian relationships, and creative opportunities for the economical preservation and adaptive reuse of existing structures, most notably those which contribute to the historic resources of the community. A mixture of residential, office, personal service and retail shopping opportunities is encouraged within all mixed-use districts with individual components complimenting and reinforcing other uses within the district. Owners are encouraged to plan and develop mixed-use projects capitalizing on the more flexible design opportunities offered by Article V of Chapter 17.40.

To effectively implement the mixed use policies of the general plan, a variety of mixed-use districts are provided that offer a range of permitted uses and intensities of development. The lowest intensity districts encourage development at intensities commensurate with nearby residential areas and local shopping services. The higher intensity mixed-use districts, being more permissive in the allowable intensity of development and the range of nonresidential uses, are intended to be located in areas characterized by excellent mass transit opportunities and high levels of support services.

1. MUN, Mixed-Use Neighborhood District. MUN-NS, Mixed-Use Neighborhood District No STRP, MUN-A, Mixed-Use Neighborhood District Alternative, and Mixed-Use Neighborhood District Alternative No STRP. Designed to implement the lower intensity mixed-use policies of the general plan, this district also may be used as an alternative to commercial zoning along prominent streets, or to promote the preservation and adaptive reuse of existing buildings that contribute to the historical or architectural character of an area. Bulk standards are designed to maintain a residential-scale of development. At a minimum, these districts should have good access to collector streets and public transportation service. MUN-A is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and is an alternative to a zoning district that requires a site plan. MUN-NS, and MUN-A-NS are designed to allow the same standards and uses of the MUN and MUN-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

2. MUL, Mixed-Use Limited District, MUL-NS, Mixed Use Limited District No STRP, MUL-A, Mixed-Use Limited District Alternative, and MUL-A-NS, Mixed-Use Limited District Alternative No STRP. The MUL and MUL-A districts are intended to implement the moderate intensity mixed-use policies of the general plan. These districts also may be used in areas policied for concentrations of mixed commercial uses and for existing areas of commercial arterial development that are located in the vicinity of major intersections. The bulk standards permitted by this district, along with the range of allowable uses, are designed to promote the preservation and adaptive reuse of larger structures that contribute to the historical or architectural character of an area. These districts should be applied to areas that have good access to collector or arterial streets and public transportation service. MUL-A is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and is an alternative to a zoning district that requires a site plan. MUL-NS, and MUL-A-NS are designed to allow the same standards and uses of the MUL and MUL-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

3. MUG, Mixed-Use General District, MUG-NS, Mixed-Use General District No STRP, MUG-A, Mixed-Use General District Alternative, MUG-A-NS, Mixed-Use General District Alternative No STRP. The MUG and MUG-A districts are intended to implement the moderately high intensity mixed-use policies of the general plan, being appropriate near major concentrations of employment, commercial or institutional uses. These districts also may be used near the central business district, within regional activity centers, or in areas otherwise policied for concentrations of mixed commercial development with high levels of accessibility, including public transit service. The bulk regulations are designed to encourage consolidation of land and large scale development on or near arterial streets. MUG-A is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and is an alternative to a zoning district that requires a site plan. MUG-NS, and MUG-A-NS are designed to allow the same standards and uses of the MUG and MUG-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

4. MUI, Mixed-Use Intensive District, Mixed-Use Intensive District No STRP, MUI-A, Mixed-Use Intensive District Alternative, Mixed-Use Intensive District Alternative No STRP. The MUI and MUI-A districts permit a mixture of high intensity residential, office and compatible commercial uses in areas characterized by the highest levels of accessibility, mass transit opportunities and essential support services. The bulk standards for this district permit large scale buildings, and include incentives to locate off-street parking within structures. It is intended that this district be applied to areas near downtown in a manner consistent with the general plan and other adopted redevelopment plans, to selected segments of major traffic arteries extending from the downtown core area, or for selected portions of activity centers designated by the general plan. MUI-A is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and is an alternative to a zoning district that requires a site plan. MUI-NS, and MUI-A-NS are designed to allow the same standards and uses of the MUI and MUI-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

E. Office Districts. These districts are intended for office development at various scales and levels of intensity, ranging from low intensity structures providing neighborhood services immediately adjacent to residential areas to structures of moderately high bulk located along major street corridors. When conventional methods of buffering would be ineffective, low intensity office districts may be used as a land use transition separating a residential area from more intrusive commercial (or industrial) zoning, provided there is a clear market demand for additional office use opportunities.

1. OR20, Office/Residential District, OR20-NS, Office/Residential District No STRP, OR20-A, Office/Residential District Alternative, OR20-A-NS, Office/Residential District Alternative No STRP. The OR20 and OR20-A districts are designed for a mixture of compatible office and multifamily residential use at medium-high density levels of intensity. These districts are encouraged to locate in areas with good vehicular accessibility, preferably along collector or arterial streets, with access to public transportation services. OR20-A is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and is an alternative to a zoning district that requires a site plan. OR20-NS, and OR20-A-NS are designed to allow the same standards and uses of the OR20 and OR20-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

2. OR40, Office/Residential District, OR40-NS, Office/Residential District No STRP, OR40-A, Office/Residential District Alternative, and OR40-A-NS, Office/Residential District Alternative No STRP. The OR40 and OR40-A districts are designed for a mixture of office and multi-family uses at high density levels of intensity. These districts are encouraged to locate in areas characterized by high levels of accessibility, preferably along arterial streets, with access to public transportation services. OR40-A is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and is an alternative to a zoning district that requires a site plan. OR40-NS, and OR40-A-NS are designed to allow the same standards and uses of the OR40 and OR40-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

3. ON, Office Neighborhood District. The ON district is designed for low intensity office development, the ON district is appropriate for implementing the general plan's transitional office policies where the application of physical buffers would be ineffective or not feasible. Since this district often abuts residential areas, permitted uses and the associated bulk standards are limited accordingly.

4. OL, Office Limited District. The OL district is designed for moderate intensity office development, being appropriate for areas where concentration of office and /or mixed commercial areas are intended. If warranted, this district may be employed as a land use transition between higher density residential areas and noncompatible commercial or industrial uses.

5. OG, Office General District and OG-NS, Office General District No STRP. The OG district is designed for moderately high intensity office development and may be appropriate for use within regional activity centers, or areas policied for concentrations of office and commercial uses. The OG district should be served by an arterial street with mass transportation service. OG-NS is designed to allow the same standards and uses of the OG with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

6. ORI, Office/Residential Intensive District, ORI-NS, Office/Residential Intensive District No STRP, ORI-A, Office Residential Intensive District Alternative, ORI-A-NS, Office/Residential Intensive District Alternative No STRP. The ORI district is designed to provide adequate and suitable space in appropriate locations for high intensity office uses mutually compatible with high-density residential uses. A selective list of retail trade, business service and personal care service uses are permitted if the principal purpose is to serve the recurring needs of the occupants or employees of other permitted uses in these districts. These districts are appropriately located between districts characterized by less intense residential and office development and areas of more intensive commercial uses, or they are extensions along major traffic arteries from areas used for more intensive commercial purposes. ORI-A is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards and is an alternative to a zoning district that requires a site plan. ORI-NS and ORI-A-NS are designed to allow the same standards and uses of the ORI and ORI-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

F. Commercial Districts. Commercial districts are designed for establishments engaged in a variety of consumer sales and service uses, professional and business services, and recreational uses. Freestanding structures are common within these commercial districts, with most businesses desiring to be oriented toward major streets and thoroughfares.

1. CN, Commercial Neighborhood District, CN-NS, Commercial Neighborhood District No STRP, CN-A, Commercial Neighborhood District Alternative, CN-A-NS, Commercial Neighborhood District Alternative No STRP. The CN and CN-A districts will implement the local convenience and neighborhood retail policies of the general plan. These districts are designed to provide for the recurring shopping and personal service needs of nearby residential areas. The range of permitted uses is limited to those which are generally patronized on a frequent basis by neighborhood residents. The bulk and buffering standards are intended to insure good compatibility between the commercial uses and adjacent residential properties. CN-NS and CN-A-NS are designed to allow the same standards and uses of the CN and CN-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

2. CL, Commercial Limited District, CL-NS, Commercial Limited District No STRP, CL-A, Commercial Limited District Alternative, CL-A-NS, Commercial Limited District Alternative No STRP. The CL and CL-A districts are designed to provide for a limited range of commercial uses primarily concerned with retail trade and consumer services, general and fast food restaurants, financial institutions, administrative and consulting offices. The uses in this district serve a moderately wide market area, and therefore ease of automobile access is requisite. CL-NS and CL-A-NS are designed to allow the same standards and uses of the CL and CL-A districts with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

3. CS, Commercial Service District, CS-NS, Commercial Service District No STRP, CS-A, Commercial Service District Alternative, CS-A-NS, Commercial Service District Alternative No STRP. The CS and CS-A districts are intended to provide opportunities for a diverse range of commercial uses that include retail trade and consumer services, automobile sales and repair, small scale custom assembly, restaurants, entertainment and amusement establishments, financial, consulting and administrative services.

Business establishments in the CS and CS-A districts often serve a wide market area, and ease of automobile access is requisite. However, it is not intended that this district permit uses which generate truck traffic other than the stocking of products. Because of the diverse nature of uses found in these districts, bulk and buffering standards are designed to protect neighboring areas. CS-NS and CS-A-NS are designed to allow the same standards and uses of the CS and CS-A districts with the

exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

4. CA, Commercial Attraction District and CA-NS, Commercial Attraction District No STRP. The CA district provides a diverse range of amusement and recreational uses in association with overnight accommodations and a variety of retail and support services typically affiliated with the tourist industry. Bulk and parking standards are designed to reflect the high traffic generation rates commonly associated with uses found in this district. The CA district may be appropriate for selected areas policied for a regional activity center, or for concentrations of mixed commercial development. This district also may have limited application within super community scale retail concentrations, and in the vicinity of major intersections within existing arterial commercial areas. CA-NS is designed to allow the same standards and uses of the CA district with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

5. CF, Core Frame District and CF, Core Frame District, No STRP. The CF district is intended to implement the general plan's central business district land use policies for support services. The district is designed primarily for a diverse variety of business service functions along with retail trade and consumer service establishments and large parking structures that require locations in proximity to the central business district. CF-NS is designed to allow the same standards and uses of the CF district with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

G. DTC, Downtown Code District. The DTC district is designed for a broad range of residential and non-residential activities associated with an economically healthy, socially vibrant, and sustainable Downtown. Included among the common goals for the DTC district is the efficient use of land capitalizing on a high level of services, reduced reliance on the automobile with enhanced usage of mass transit, and the creation of a vibrant and safe pedestrian streetscape. The DTC district is intended to implement the policies of the general plan.

The purpose of the DTC district is to provide for and encourage a mix of compatible land uses that provide opportunities to live, work and shop within the neighborhoods of Downtown. In order to create a more sustainable Downtown, the DTC emphasizes regulating the height, bulk and location of a building and the context of the building in relationship to its surroundings or other nearby buildings.

H. Shopping Center Districts. Shopping center districts provide retail shopping opportunities within developments that are encouraged to function as planned centers. Designed to implement specific retail and mixed use policies of the general plan, the range of uses and scale are established in accordance with defined market objectives and locational criteria. Property owners are encouraged to plan and develop shopping centers capitalizing on the more flexible design opportunities offered by Article V of Chapter 17.40.

1. SCN, Shopping Center Neighborhood District and SCN-NS, Shopping Center Neighborhood District No Short Term Rental. The SCN district will implement the neighborhood retail polices of the general plan, being designed to provide sufficient space in planned development for local retail and service trades catering specifically to the recurring shopping needs of nearby residences. The range of permitted uses and restrictive bulk standards are reflective of the limited market base served by this district and its close proximity to residential areas. Guided by locational policies of the general plan, appropriate locations for this district will be at selected intersections of collector or arterial streets that are centrally located within the intended market area. SCN-NS is designed to allow the same standards and uses of the CA district with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

2. SCC, Shopping Center Community District and SCC-NS. Shopping Center Community District No STRP. The SCC district will implement the community and super community retail policies of the general plan. The SCC district is designed for retail and service trades catering to a community-scale market of approximately thirty-five thousand to one hundred thousand people with the range of permitted uses and bulk standards reflective of a community-scale market base. The SCC district is to be applied in a compact manner at major street intersections, centrally located within the intended market area, with preference given to arterial intersections in which both streets have at least four travel lanes. SCC-NS is designed to allow the same standards and uses of the SCC district with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

3. SCR, Shopping Center Regional District and SCR-NS, Shopping Center Regional District No STRP. The SCR district will implement the super community and regional activity center policies of the general plan. This district is designed for retail and service trades catering to a regional market area, with bulk standards and a broad range of permitted uses supporting the

development of shopping malls with large specialized retail anchors. Accessibility to and circulation within SCR districts is of particular importance due to the anticipated intensity of development and the relatively high rates of traffic generated by certain uses within a center. Preferred locations are at intersections of six-lane streets or at the interchange of a freeway and a four-lane (or greater) arterial street. This district should be served by a variety of public transit services. SCR-NS is designed to allow the same standards and uses of the SCR district with the exception of prohibiting Short term rental property—Owner occupied and Short term rental property—Not owner occupied uses from the districts.

I. Industrial Districts. The industrial districts will implement the various industrial policy objectives of the general plan. The range of permitted uses, bulk requirements and operational standards reflect the intended purpose of the respective district.

1. IWD, Industrial Warehousing/Distribution District. The IWD district implements those industrial policies of the general plan that provide opportunities for wholesaling, warehousing and bulk distribution uses. This district also may be used to implement major transportation policies of the general plan. By their nature, the principal uses of this district require relatively flat, large acreage tracts of land and may generate large volumes of heavy truck traffic, necessitating very good access to major arterial streets and the interstate system. Some businesses also may require direct rail or river access.

2. IR, Industrial Restrictive District. The IR district implements those industrial policies of the general plan that provide adequate opportunities for a wide range of light industrial uses at a small to moderate scale. Uses most suitable in this district are those which operate within completely enclosed buildings with limited outdoor storage. Potential impacts on abutting properties are minimized by the light industrial nature of the uses permitted in this district and high operational standards. Uses within this district should have a high level of access to the major street network.

3. IG, Industrial General District. The IG district implements those industrial policies of the general plan which provide opportunities for intensive manufacturing uses that are essential for the economic viability of the metropolitan area. Industrial uses associated with this district often require large, relatively flat sites with good access to the regional highway system, the Cumberland River or a rail line. Due to these special locational requirements, the integrity of this district is protected by a minimum lot size requirement and limiting the range of uses to those which are clearly supportive of the principal uses associated with the IG district. (Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2019-111 § 1(Exh. A, §§ 3, 4), 2020; Ord. BL2015-1153 §§ 2, 8—10, 16, 2015; Ord. BL2011-898 §§ 3—5, 2011; Ord. 2009-586 § 1(Exh. A, §§ 6, 7), 2010; Amdt. 1 to Ord. BL2005-762, 2005; Ord. BL2005-762 § 2, 2005; Ord. BL2003-1399 § 1, 2003; § 1(3) of Amdt. 1 with Ord. 96-555 § 2.2, 1997)

17.08.030 District land use tables.

A. General. The range of land uses permitted as of right, permitted subject to specific conditions, permitted subject to special exceptions standards, permitted as accessory to a principal use on the same lot, or permitted only within a special overlay district are established in the following district land use tables.

In addition to all other provisions of this title, land uses established by the district land use table as permitted with conditions (PC) shall comply with the specified provision of Chapter 17.16, Article II; special exception (SE) uses shall be subject to the provisions of Chapter 17.16, Article III; and uses permitted only within an overlay district shall be subject to the applicable provision of Chapter 17.36. In the event of any conflict between the district land use table and the text of regulation, the text shall control.

B. Multiple Uses. When two or more principal uses are proposed for the same lot, each principal use shall be subject to the applicable provision of this title.

C. New Uses. The zoning administrator is empowered to categorize new land uses not enumerated in this title according to the most comparable land use classification established by this title. The zoning administrator's decision may be appealed to the board of zoning appeals.

D. Key to the District Land Use Table. The following notations are utilized in the district land use table in conjunction with the zoning districts established by this title and the land uses associated with those districts. Lack of one of the following notations in a cell of the district land use table indicates that the specific land use category is not permitted within that corresponding zoning district.

P	—	Permitted by right
PC	—	Permitted subject to specific conditions (Chapter 17.16, Article II)
SE	—	Permitted by special exception (Chapter 17.16, Article III)
A	—	Permitted as accessory to a principal uses (Chapter 17.16, Article IV)
O	—	Permitted only within an overlay district

RESERVED*

*Editor's note—Ord. BL2016-133, § 6, passed Sept. 6, 2016, repealed Ch. 17.10, §§ 17.10.010—17.10.040, which pertained to inclusionary zoning and derived from Ord. BL2015-1139 § 3, 2015.

Chapter 17.12

DISTRICT BULK REGULATIONS

Sections:

17.12.010	**Purpose and general provisions.**
17.12.020	**District Bulk Tables.**
17.12.030	**Street setbacks.**
17.12.035	**Street setbacks within the urban zoning overlay district.**
17.12.040	**Other setbacks.**
17.12.050	**Accessory building floor area controls.**
17.12.060	**Building height controls.**
17.12.070	**Special floor area ratio (FAR) provisions.**
17.12.080	**Compact development.**
17.12.090	**Conservation development.**
17.12.100	**Single-family cottage developments.**
17.12.110	**Alternative minimum lot size and setbacks for attached housing.**
17.12.120	**Reserved.**

17.12.010 Purpose and general provisions.

A. Purpose and Intent. The purpose of this chapter is to establish appropriate standards relating to the size and placement of structures within each of the zoning classifications created by this title in order to assist in the achievement of the goals established in the general plan for the development of the community.

B. General Provisions. The required specifications for lot area, residential density, floor area ratio (FAR), impervious surface ratio (ISR), setbacks, building heights and separation between buildings are specified in this chapter on the basis of zoning district classification. Lots shall be created, and building and zoning compliance permits shall be issued only in compliance with these bulk regulations. (Ord. 96-555 § 3.1, 1997)

17.12.020 District Bulk Tables.

The bulk standards of this code are established by the District Bulk Tables of this section. The standards contained in these tables apply uniformly to all uses within the same zoning district classification, with the exception of uses that are permitted with conditions (PC), as special exceptions (SE) in the district land use table of Section 17.08.030 or as provided in the Downtown Code (Chapter 17.37), which may have higher standards. Alternative standards may be imposed by any planned unit development, historic or urban design overlay district as long as the standards are consistent with the purpose and intent of the overlay district.

A. District Bulk Table 17.12.020A establishes the bulk requirements for one-family and two-family dwellings in residential districts.

B. District Bulk Table 17.12.020B establishes the bulk requirements for multifamily and nonresidential structures in residential districts.

C. District Bulk Table 17.12.020C establishes the bulk requirements for all structures in AG, mixed-use and nonresidential districts.

D. District Bulk Table 17.12.020D establishes the bulk requirements for all structures in the alternative zoning districts for multi-family, mixed-use, office and commercial.

Table 17.12.020A

SINGLE-FAMILY AND TWO-FAMILY DWELLINGS

Zoning District	Minimum Lot Area (in sq. ft.)	Maximum Building Coverage	Minimum Rear Setback (in ft.)	Minimum Side Setback (in ft.)	Maximum Height
AG	5 acres	0.20	20	20	3 stories
AR2a	2 acres	0.20	20	20	3 stories
RS80, R80	80,000	0.20	20	20	3 stories

RM40, RM40-A, RM40-NS, RM40-A-NS, RM60, RM60-A, RM60-NS, RM60-A-NS, MUN, MUN-A, MUN-NS, MUN-A-NS, MUL, MUL-A, MUL-NS, MUL-A-NS, MUG, MUG-A, MUG-NS, MUG-A-NS, MUI, MUI-A, MUI-NS, MUI-A-NS, ON, OR40, OR40-A, OR40-NS, OR40-A-NS, ORI, ORI-A, ORI-NS, ORI-A-NS	3,750	0.60	20	3	3 stories
RN1, RN2, RL1, RL2, RL3	See Chapter 17.38	See Chapter 17.38	See Chapter 17.38	See Chapter 17.38	See Chapter 17.38
DTC	See Chapter 17.37	See Chapter 17.37	See Chapter 17.37	See Chapter 17.37	See Chapter 17.37

Note 1: For all zoning districts permitting multi-family uses, the rear and side setbacks for single-family cottage developments shall be a minimum of three feet. This note shall not apply to the DTC district or Design-Based Multi-Family districts.

Note 2: When a right-of-way dedication is required for an existing lot or parcel along an existing street that meets the minimum lot area or could be subdivided into two or more lots that would each meet the minimum lot area for the zoning district prior to the dedication of right-of-way, the minimum lot area shall be considered to be the area prior to the dedication. The newly created lots shall meet all other bulk standards of the Zoning Code based on the dimensions after the dedication of the right-of-way.

Note 3: Single-family and two-family dwellings in the RM9-A, RM9-A-NS, RM15-A, RM15-A-NS, RM20-A,

RM20-A-NS, RM40-A, RM40-A-NS, OR20-A, OR20-A-NS, OR40-A, OR40-A-NS, ORI-A, ORI-A-NS, MUN-A, MUN-A-NS, MUL-A, MUL-A-NS, MUG-A, MUG-A-NS, MUI-A, and MUI-A-NS shall use the build-to zone standards listed in Table 17.12.020D.

Note 4: In addition to the height restrictions in Section 17.12.060, the height of two detached dwelling units on a single lot cannot exceed a ratio of 1.0 horizontal to 1.5 vertical for each structure. The appropriate height shall be determined by the metro historic zoning commission for properties within a historic overlay. Notwithstanding the above provisions, two-family structures legally constructed prior to the effective date of this ordinance may remove the connector required under the previous definition of two-family, regardless of the height of the units.

Note 5: In RS3.75-A, RS5-A, RS7.5-A, R6-A and R8-A districts, the following standards shall apply:

a. Access and Driveways.
   1. Where existing, access shall be from an improved alley only. Where no improved alley exists, one driveway within the street setback may be permitted.
   2. For a corner lot, the driveway shall be located within thirty feet of the rear property line.
   3. Parking, driveways and all other impervious surfaces in the required street setback shall not exceed twelve feet in width.

b. Garages.
   1. Detached. The front of any detached garage shall be located behind the rear of the primary structure. The garage door of a detached garage may face the street.
   2. Attached. The garage door shall face the side or rear property line.

c. A minimum raised foundation of 18—36" is required.

Note 6: Maximum height to eave/parapet limited to 24 feet; maximum height to roof ridge line limited to 35 feet, excluding elevator or stair bulkheads and chimneys or flues. If fifty percent or more of the existing structures on the same block face and oriented to the same street are more than 35 feet in height, then the maximum height is limited to 3 stories in 45 feet. Any exposed foundation in an existing structure on the same block face and oriented to the same street shall count toward the height of that structure.

Note 7: Within the area bounded to the north by Interstate 65, to the west by Interstates 65 & 40, to the south by Interstate 40, and to the east by Interstate 24, the maximum allowed height shall be 3 stories in 45 feet. The eave and ridge height maximums established in Note 6 shall not apply to single-family and two-family permits within the area described in this note.

Note 8: For all districts, height shall be measured from the average grade plane post-development.

MHP	2.0 acres	9	See Ch. 17.16	See Ch. 17.16	See Ch. 17.16	See Ch. 17.16	See Ch. 17.16	No plane
DTC	See Ch. 17.37	See Ch. 17.37	See Ch. 17.37	See Ch. 17.37	See Ch. 17.37	See Ch. 17.37	See Ch. 17.37	See Ch. 17.37

Note 1: Street setbacks are listed in Table 17.12.030A and 17.12.030B.

Note 2: No maximum FAR applies to multifamily developments in the RM15, RM15-NS, RM20, RM20-NS, RM40, RM40-NS, RM60, RM60-NS, OR20, OR20-NS, OR40, OR40-NS districts.

Note 3: Within the urban zoning overlay district, any attached townhomes or rowhouses with alley access to required off-street parking, may have a zero-foot side setback (1) on internal lot lines between units, or (2) where the side of a unit is adjacent to an area having a minimum width of ten feet that is shown on the final site plan as an open space area or a required landscape buffer yard, provided that each unit has a private yard and no more than eight units are contained in any single-structure. This note shall not apply to the DTC district.

Note 4: [Reserved.]

Note 5: [Reserved.]

Note 6: Within the urban zoning overlay district, any proposed development that does not meet the setback standards within this table may apply for a special exception as provided for in Sections 17.12.035.A and 17.12.035.D. This note shall not apply to the DTC district.

Note 7: When a right-of-way dedication is required for an existing lot or parcel along an existing street that could be subdivided into two or more lots that would each meet the minimum lot requirements for the zoning district prior to the dedication of right-of-way, the minimum lot area shall be considered to be the area prior to the dedication. The newly created lots shall meet all other bulk standards of the Zoning Code based on the dimensions after the dedication of the right-of-way.

Note 8: In RS3.75-A, RS5-A, RS7.5-A, R6-A and R8A districts, the following standards shall apply:

a. Access and Driveways.
   1. Where existing, access shall be from an improved alley only. Where no improved alley exists, one driveway within the street setback may be permitted.
   2. For a corner lot, the driveway shall be located within thirty feet of the rear property line.
   3. Parking, driveways and all other impervious surfaces in the required street setback shall not exceed twelve feet in width.

b. Garages.
   1. Detached. The front of any detached garage shall be located behind the rear of the primary structure. The garage door of a detached garage may face the street.
   2. Attached. The garage door shall face the side or rear property line.

c. A minimum raised foundation of 18—36" is required.

Note 1: [Reserved.]

Note 2: Floor area bonuses are available (1) for the MUI and MUI-NS districts, and (2) within the urban zoning overlay district, for all mixed-use districts (See Section 17.12.060).

Note 3: Street setbacks are listed in Table 17.12.030B.

Note 4: For properties located within an adopted Redevelopment District an alternative standard for the maximum allowable building height at a setback line may be established as part of an adopted Redevelopment District plan.

Note 5: Development standards shall be as specifically listed in the site specific SP ordinance.

Note 6: Within the urban zoning overlay district, any proposed development that does not meet the setback standards within this table may apply for a special exception as provided for in Sections 17.12.035.A and 17.12.035.D.

Note 1: The area of any parcel dedicated as right-of-way as part of a related development process may be used to calculate FAR or density for the applicable property. No maximum FAR applies to multi-family developments in the RM9-A and RM9-A-NS thru RM40-A and RM40-A-NS and OR20-A, OR20-A-NS, OR40-A, OR40-A-NS, ORI-A, ORI-A-NS districts.

Note 2: Within the urban zoning overlay district, any attached townhomes or rowhouses with alley access to required off-street parking, may have a zero-foot side setback (1) on internal lot lines between units, or (2) where the side of a unit is adjacent to an area having a minimum width of ten feet that is shown on the final site plan as an open space area or a required landscape buffer yard, provided that each unit has a private yard and no more than eight units are contained in any single-structure.

Note 3: Alternative zoning districts shall have the following standards apply to the location of a building and its associated parking:

a. Sidewalks shall be constructed to the standard of the Major and Collector Street Plan or, if on a local street, to local street standards. The build-to zone for alternative zoning districts shall be measured from the Standard right-of-way line as established by the table entitled "Standard Street Right-of-Way Widths" in the Major and Collector Street Plan. Streets included in the Major and Collector Street Plan are not eligible for the in-lieu fee in Section 17.20.120.D.

b. A parcel located at the intersection of two public streets shall have a building occupy the corner of the parcel that is bounded by the two intersecting public streets subject to the "Notes" of this table, which apply to both frontages.

c. A primary entrance to the building shall be located along the building façade within the build-to zone.

d. Street Level Parking Decks. Parking decks located at street level shall have no less than seventy-five percent of the lineal street frontage devoted to office or nonparking commercial uses, or in districts that only permit residential uses, residential uses at a minimum depth of twenty feet. A minimum of fifty percent of that wall area shall be glazed. That floor area shall be excluded from the calculation of floor area ratio.

e. The zoning administrator may allow necessary adjustments to the build-to zone when existing utilities or utility easements are within the build-to zone and unusual circumstances require that the utilities cannot be relocated or easements reduced. Upon allowing an adjustment to the build-to zone, the zoning administrator may also allow adjustments to the rear setback and landscape buffer yard as

authorized by Table 17.24.230, to provide for a necessary building area. The zoning administrator may allow necessary adjustments to the build-to zone, rear setback and landscape buffer yard based on the nature of the existing and future land uses and site conditions in the general vicinity after receiving a written recommendation from the planning department and any relevant department or agency.

f. For first floor residential uses, a minimum raised foundation of 18—36" is required.

g. Glazing on the first floor of any public street frontage shall be a minimum of forty percent for nonresidential uses and a minimum of twenty-five percent for residential uses. Glazing on the upper floors of any public street frontage shall be a minimum of twenty-five percent.

h. In the UZO:

i. Where an improved alley exists, primary vehicular access shall be taken from the alley.

ii. Any unimproved alley abutting the property that would provide direct access to an improved alley or street shall be constructed as the primary vehicular access.

iii. A parcel that is sixty feet wide or greater shall have the front facade of the building extend across at least sixty percent of the parcel's frontage.

iv. A parcel less than sixty feet wide shall have the building's front facade extend across the full width of the parcel in mixed-use, office and commercial districts.

v. If an improved alley is not present or required, an opening of up to twenty-six feet wide shall be permitted, regardless of the requirements of subsections iii and iv above.

vi. Parking shall be permitted only at the sides and rears of buildings.

i. Outside of the UZO:

i. The front facade of the building shall extend across at least forty-five percent of the parcel's frontage or the building front façade shall be at least twenty-five feet in width, whichever is greater.

ii. A maximum of one module of parking (two rows and a drive aisle) shall be permitted between the building and the street.

17.12.030 Street setbacks.

A. Measurement: For single and two-family lots the street setback shall be measured from the street right-of-way line. For multi-family and non-residential districts and non-residential uses in the R/R-A, RS/RS-A, AR2a and AG districts the minimum street setback shall be measured from the Standard right-of-way line as established by the table entitled "Standard Street Right-of-Way Widths" in the Major and Collector Street Plan.

B. Street Classifications. All street classifications are as established in the "Subdivision Regulations of the Metropolitan Government of Nashville and Davidson County" and the "Major and Collector Street Plan" as adopted by the metropolitan planning commission.

C. Street Setbacks.

1. The minimum setback of a structure from an adjacent street shall be established by the following tables according to the zoning of the property and the classification of the street.

2. When the rear setback of a corner lot is oriented towards the rear setback of a neighboring lot, the required street setback along the street common to those two lots may be reduced by fifty percent. A corner residential lot created by plat prior to the effective date of the ordinance codified in this chapter may reduce the required setback of Table 17.12.030A by fifty percent along that street running parallel with the side of the residential structure. Lots zoned R20, RS20, R30, RS30, R40, RS40, R80, and RS80 shall be excluded from this subsection C.2 and shall provide the full required street setback of Table 17.12.030A for both streets; detached two-family residential uses within these zoning districts shall provide the full required contextual street setback for both streets.

3. In residential areas with an established development pattern the following standards shall apply:

a. The minimum required street setbacks for the R, RS and MHP districts shall be the average setback of the four nearest single-family or two-family houses on the same block face that are oriented to the same street and that follow the established development pattern.

b. When there are fewer than four single-family or two-family houses on the same block face that are oriented to the same street and that follow the established development pattern, then the minimum required street setback shall be the average setback of all single-family or two-family houses on the same block face that are oriented to the same street and that follow the established development pattern.

c. The existence of an established development pattern shall be determined by the zoning administrator who has the discretion to exclude any property that has a setback disproportionate to the other houses on the block face.

d. When there are no other single-family or two-family houses on the same block face, oriented to the same street and that follow the established development pattern, then the value provided in Table 17.12.030A shall determine the setback.

e. In the MUN and MUL districts, the average street setback of existing structures along the same block face may be applied to new construction on that block, if determined appropriate by the zoning administrator to maintain or reinforce an established form of character of development.

4. When a subdivision plat establishes a reservation of land for future right-of-way acquisition, the street setback shall be measured from the ultimate right-of-way line.

5. Double frontage lots are subject to the provisions of Section 17.24.060(B). Property abutting a street designated as a scenic arterial by the major street plan shall comply with the provisions of Section 17.24.070.

6. The front facade of a principal structure on a corner lot that has lot lines of unequal length abutting the streets shall be oriented to the shorter lot line, except where the zoning administrator determines that the longer lot line is more appropriate based on one or more of the following criteria:

a. The longer lot line of a lot zoned for office, mixed-use, commercial, or industrial use is located along an arterial street as shown on the adopted major street plan;

b. The proposed structure will contain multiple businesses with outside entrances;

c. The predominant character or pattern of adjoining development is or will be oriented to the street on which the longer lot line is located.

d. The previous principal structure on a residential lot was oriented to the street on which the longer lot line is located.

7. The front facade of all single-family principal structures constructed within the RS20, RS15, RS10, RS7.5, RS5, RS3.75, R20, R15, R10, R8, and R6 zoning districts shall face a public or private street unless the property is within a redevelopment district or zoning overlay that specifically includes a design review process to evaluate the appropriateness of an individual alternative front facade location.

Table 17.12.030A

STREET SETBACKS FOR SINGLE AND TWO-FAMILY STRUCTURES

Zoning Districts	Minor-Local and Local Streets	All[2] Other Streets

Note 1: SP Districts. Street setbacks shall be as specifically listed in the site specific SP ordinance.

Note 2: Properties abutting a street designated as a scenic arterial by the Major and Collector Street Plan shall comply with the provisions of Section 17.24.070. This note shall not apply to the DTC district.

Note 3: In no event shall any street setback provisions permit a principal building to be constructed within an area designated for street improvements on a major street plan adopted subsequent to the effective date of this note.

Note 4: The above street setback standards shall not apply within the Alternative Zoning Districts.

Note 5: For attached housing developed under Section 17.12.110, the minimum street setback shall be three feet from the right-of-way line but shall not vary by more than 20 percent from the standards set in Section 17.12.030.C(3). This note shall not apply to the DTC district.

Note 6: Within the urban zoning overlay district, any proposed development that does not meet the setback standards within this table may apply for a special exception as provided in Sections 17.12.035.A and 17.12.035.D. This note shall not apply to the DTC district.

(Ord. BL2024-346 § 2, 2024; Amdt. 1 to Ord. BL2023-1691 § 1, 2023; Ord. BL2023-1691 §§ 1, 2, 2023; Amdt. 1 to Ord. BL2022-1270 § 1, 2022; Ord. BL2022-1270 § 1, 2022; Ord. BL2019-111 § 1(Exh. BL2006-1047 § 2, 2006; Ord. BL2006-971 § 3, 2006; Ord. BL2005-762 §§ 5, 6, 2005; Ord. 2002-1013 § 1, 2002; Amdt. 1 with Ord. 2002-1012 § 1, 2002; Ord. 2001-858 § 1, 2001; Ord. BL99-117 § 1 (part), 2000; Ord. 98-1268 § 1 (part), 1998)

17.12.035 Street setbacks within the urban zoning overlay district.

A. This section establishes street setbacks within the mixed use, office, industrial, RM20, RM20-NS, RM40, RM40-NS, RM60, RM60-NS, or commercial zone districts for any property located within the urban zoning overlay district regardless of the minimum street setback requirements described in Tables 17.12.030A and 17.12.030B whenever one or more of the conditions listed below applies (1—4). However, in all districts, a principal or accessory structure may be located closer to the street or property line than as permitted by this section or by Tables 17.12.020B, 17.12.020C, and 17.12.030B based on the review and approval of a Special Exception by the Board of Zoning Appeals as provided in [subsection] 17.12.035.D below. The standards of this subsection shall not apply within the alternative zoning districts.

1. The setback of a principal building, fronting the same street, that is located on an abutting lot or a lot separated by an intervening public street or alley does not meet the minimum requirements of Tables 17.12.030A or 17.12.030B;

2. In the case of a corner lot, the setback of a principal building located on any other corner lot at the same street intersection does not meet the minimum requirements of Tables 17.12.030A or 17.12.030B;

3. In the case of a corner lot, there is no principal building located on any other corner lot at the same street intersection;

4. Two-thirds or more of the principal buildings located along the same or opposite block face do not meet the minimum requirements of Tables 17.12.030A or 17.12.030B; or

5. The owner of one or more contiguous lots that collectively include at least one corner lot and at least fifty percent or more of the street frontage along either block face furnishes the zoning administrator a written request to use the contextual street setback requirements.

B. The determination of the appropriate street setbacks within mixed use, office, industrial, RM20, RM20-NS, RM40, RM40-NS, RM60, RM60-NS, or commercial zone districts located within the urban zoning overlay district shall be made by following the criteria as outlined in subsection C of this section. For the purposes of this section, lots that are sixty feet wide or greater shall have the front façade of the building extend across at least twenty-five percent of the lot frontage or be at least twenty-five feet in width, whichever is greater. Lots that are less than sixty feet wide shall have the building extend across the full width of the lot in mixed use and commercial districts unless a driveway is required to access required parking, except that one or two family dwellings may have side yards a minimum of three feet in width. If a driveway is needed for service to accessory parking, an opening of up to twenty-six feet wide shall be permitted. Parking shall be permitted only at the sides and rears of buildings, and at the fronts of the buildings to the extent shown in Figure 17.12.035. A primary entrance to the building shall be located at the front setback line. The front façade may have projections and recesses to accommodate columns, entrances, covered patios, and similar features. The standards of this subsection shall not apply within the alternative zoning districts.

C. The following criteria shall be used to determine the street setback, as applicable. The standards of this subsection shall not apply within the alternative zoning districts.

1. If the site is within a zoning overlay district, redevelopment district or an area having a design plan adopted by metropolitan council that includes a master plan or design guidelines for the placement of buildings at this location such guidelines shall apply.

2. If the site is not within an area having an adopted design plan, master plan or design guidelines and the building types and setbacks of existing buildings are characteristic of development under a different zoning district than what the property is currently zoned and that implementation of the current zoning will change the development character within the district (e.g., the existing development is one- or two-family dwellings and the zoning is for multi-family dwellings), then the setbacks from Section 17.12.030 (Street Setbacks) shall apply.

3. If neither subsection (C)(1) nor (C)(2) applies, then the site shall comply with these contextual setback provisions. Setbacks shall be determined as follows:

a. Use of buildings and site features as context:

i. Consistency with like building type. Lots with buildings of the same building type as proposed are to be used as the contextual basis for street setbacks. Lots with buildings of a different building type are not to be

used as the contextual basis for street setbacks unless it can be demonstrated that the pattern of setbacks for both building types is fundamentally the same within a radius of five hundred feet. Civic buildings are not to be used as the contextual basis for street setbacks of non-civic buildings. Likewise, non-civic buildings are not to be used as the contextual basis for civic buildings.

ii. The determination of the appropriate street setback may take into account the presence of recorded easements or utility obstructions that prevent meeting any of the criteria above.

b. Contextual criteria:

i. Street setbacks shall be consistent with the predominant pattern of street setbacks of pre-1950 buildings (built before 1950) located within a distance of three lot widths along both sides of the same or intersecting street frontages, as applicable. If the predominant pattern is consistent with the setback requirements of the base zoning district, then Table 17.12.030A or Table 17.12.030B shall apply as applicable.

ii. If the lot is a corner lot, street setbacks shall be consistent with the street setbacks of any pre-1950 building that previously occupied the same corner lot. If that information is not available, street setbacks shall be consistent with the street setbacks of any pre-1950 building located on any of the other corner lots at the same intersection.

iii. If there are no pre-1950 buildings located on adjacent or nearby lots, street setbacks shall be consistent with the pattern of street setbacks shown at that location on record maps dating from 1950 or earlier.

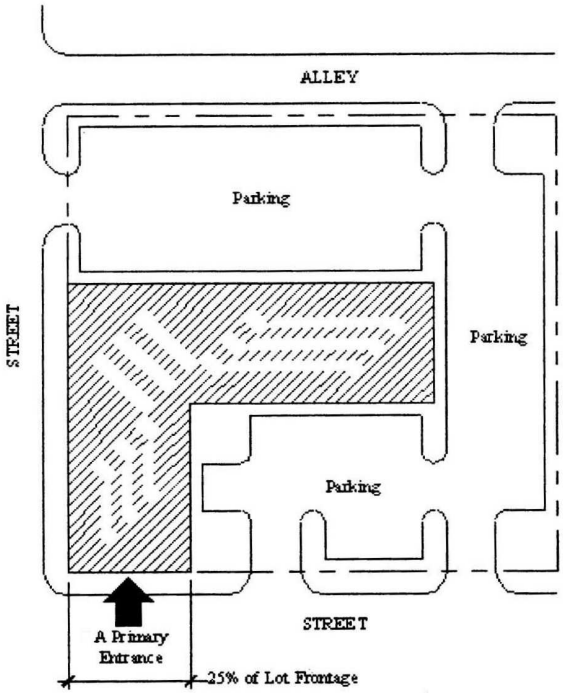
D. Special Setback Regulations for All Uses (Excluding Single-Family and Two-Family Dwellings) Within the Urban Zoning Overlay District:

1. In all districts, a principal or accessory structure may be located closer to the street or property line than as permitted by this section or by Tables 17.12.020B, 17.12.020C, and 17.12.030B based on the review and approval of a Special Exception by the Board of Zoning Appeals.

2. An applicant shall provide evidence to the board as provided in Section 17.12.060.F.3 that the proposed building setbacks shall not create an adverse impact on adjacent properties nor detract from a strong pedestrian-friendly environment.

3. The board shall consider a recommendation from the historic zoning commission and planning commission as provided in Section 17.12.060.F.4. (Ord. BL2019-111 § 1(Exh. A, § 18), 2020; Ord. BL2011-898 § 10, 2011; Amdt. 1 to Ord. BL2006-1047, §§ 3, 4, 2006; Ord. BL2006-1047 §§ 3, 4, 2006; Ord. BL2004-221 § 1 (part), 2004)

Figure 17.12.035



17.12.040 Other setbacks.

Within the DTC zoning district, see Chapter 17.37 for permitted encroachments into setback areas.

A. Railroads. In the IWD, IR and IG districts, no side or rear setback shall be required along a lot line adjacent to an operative railroad track.

B. Setbacks for Irregular-Shaped Lots. Wherever a lot is of such irregular shape that the setback provisions cannot be readily applied, the zoning administrator shall interpret the application of the setback provisions.

C. Party Walls. The side setback requirements may be waived when attached dwelling units are subdivided for sale along common party walls in the RM and mixed-use districts.

D. Building Separation. In the RM districts the minimum distance between two buildings on the same lot shall be ten feet or the minimum required by the building code, whichever is greater.

E. Permitted Setback Obstructions. The following structures or building components may be located within required setbacks. Except for screening walls, fences and hedges, the following features shall not be permitted within a required landscape buffer yard.

1. Accessory buildings.

a. Accessory buildings outside of the RN1, RN2, RL1, RL2, and RL3 zoning districts with a footprint of eight hundred fifty square feet or less and located to the

rear of a principal structure shall provide a minimum side setback equal to one-half of that required for the zoning district, but not less than three feet, and a minimum rear setback of at least three feet, except when garage doors or carport openings face or open directly to an alley, in which case the minimum rear setback shall be ten feet. Accessory buildings outside of the RN1, RN2, RL1, RL2, and RL3 zoning districts with a footprint of more than eight hundred fifty square feet shall provide the full setbacks of the zoning district;

b. Above ground swimming pools or in-ground swimming pools that extend more than twelve inches above ground level and are located to the rear of a principal structure shall provide a minimum side setback equal to one-half of that required for the zoning district, but not less than three feet. In-ground swimming pools that extend above ground level less than twelve inches shall provide a minimum setback of three feet;

2. Arbors and trellises;

3. Awnings, patio covers, or canopies projecting not more than six feet from a building wall over a required setback;

4. Chimneys projecting not more than three feet into the required setback, and not exceeding two percent of the overall setback area provided that a minimum setback of three feet to any property line shall be provided;

5. Clothes poles or clothes lines in rear setbacks of residential districts;

6. Within the urban zoning overlay district, covered or enclosed porches, between thirty inches and eight feet in height above grade, in the side and rear setback areas (but not closer than three feet from the property line);

7. Curbs and sidewalks;

8. Eaves, gutters or downspouts, projecting into or over required yards not more than twenty-four inches;

9. In nonresidential districts, elevated pedestrian walkways that cross lot lines or public ways;

10. Fire escapes or staircases, the riser of which shall be at least fifty percent open, subject to the following conditions:

a. In residential districts the encroachment may be up to three feet into the required yard as long as a minimum setback of two feet from the property is maintained,

b. In mixed-use and nonresidential districts, the total area of stairway coverage shall not exceed thirty percent of the area of such required yard;

11. Flagpoles having only one structural ground member;

12. Fountains;

13. Heating, ventilation and air conditioning units (including compressors and condensers) for single-family or two-family dwellings, provided exhaust air is directed vertically or otherwise away from the adjacent property line;

14. Mailboxes;

15. Open terraces, including natural plant landscaping;

16. Open, uncovered stoops, including handicap ramps;

17. For single family or duplex uses, parking spaces for the handicapped;

18. Recreational equipment in the rear setback in residential districts;

19. Sculpture or other similar objects of art;

20. Signs, subject to the provisions of Chapter 17.32;

21. Steps to the principal entrance and necessary landings, together with a railing no more than three feet high, and extending no more than six feet into the setback;

22. Street furniture such as benches, drinking fountains, trash receptacles (not dumpsters), ash trays, light standards or directional signs. Dumpsters may encroach on the required rear setback;

23. In-ground swimming pools extending twelve inches or less above ground level in side or rear setback areas;

24. Trees, shrubs, flowers, hedges or other features of natural growth;

25. Vehicular parking areas and associated driveways, except within landscape buffer yards or within the required street setback of the MUN, MUN-NS, MUL, MUL-NS, OR20, OR20-NS and OR40 districts;

26. Screening Walls or Fences. The maximum permitted height measured from finish grade level on the side of the wall or fence with the greatest vertical exposure shall be:

a. Two and one-half feet in height within ten feet of a street right-of-way. Open fences, such as chain link or those of a similar nature are permitted to be six feet in height. Electric fences are permitted only within the IWD, IR and IG districts and shall be no more than ten feet in height, subject to the provisions of Section 16.04.200,

b. Six feet in height within the remainder of the required front setback. Electric fences are permitted only within the IWD, IR and IG districts and shall be no more than ten feet in height, subject to the provisions of Section 16.04.200,

c. Eight feet in height within the required side or rear setback or within any platted common open space. Electric fences are permitted only within the IWD, IR and IG districts and shall be no more than ten feet in height, subject to the provisions of Section 16.04.200;

27. An uncovered deck that is located at least ten feet from the rear property line, does not encroach on required side setbacks and has a maximum deck elevation no greater than the average finished first floor elevation of the principal building as established by the front entrance;

28. Wells;

29. Utility transmission lines and associated structures, such as poles, provided that electric utility meters shall not be permitted in the required street setback unless expressly required by the power supplier for safety and access purposes;

30. Satellite dishes not exceeding eighteen inches in diameter; and,

31. Yard and service lighting fixtures and poles.

32. Covered front porches in residential districts extending no more than six feet into the required street setback, provided that the following are met:

a. The porch shall not be enclosed,

b. There shall be no enclosed space above the porch or enclosed habitable space below the porch,

c. The porch shall be located at least ten feet from the right-of-way.

F. Reserved. (Ord. BL2025-1007 § 3, 2025; Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2023-79 §§ 1, 2, 2024; Ord. BL2022-1581 § 1, 2023; Ord. BL2022-1346 § 3, 2022; Ord. BL2019-111 § 1(Exh. A, § 19), 2020; Ord. BL2017-898 §§ 1—3, 2017; Ord. BL 2009-586 § 1(Exh. A, § 17), 2010; Ord. BL2006-1283 § 3, 2007; Ord. BL2006-1087 § 2, 2006; Ord. BL2005-650 § 1, 2005; Ord. 2002-1015 § 1 (part), 2002; Ord. 2000-364 § 1 (part), 2000; Ord. 98-1268 § 1 (part), 1998; amended during 2-98 supplement; Ord. 96-555 § 3.4, 1997)

17.12.050 Accessory building floor area controls.

A. On all lots with a size of less than forty thousand square feet, the building coverage of an accessory structure other than a detached accessory dwelling unit located to the rear of the principal dwelling and complying with the district setbacks shall be limited to eight hundred fifty square feet or fifty percent of the building coverage of the principal dwelling, whichever is greater, but in no case shall exceed two-thousand five-hundred square feet. For regulations pertaining to detached accessory dwelling units, see Section 17.16.030.G.

B. These floor area controls shall not apply to accessory structures proposed on lots where agricultural activities and domestic animals/wildlife are permitted. (Ord. BL2025-1007 § 4, 2025; Ord. BL2005-650 § 1, 2005; Ord. 2002-1015 § 1 (part), 2002)

17.12.060 Building height controls.

A. Height Controls Established. No building or other structure shall penetrate the height control plane except as permitted by this section. Height controls shall be imposed from:

1. All setback lines in AG, AR2a and residential districts;

2. All street setback lines in nonresidential districts;

3. The boundary between an AG, AR2a, RS and RS-A, R and R-A, RM or MHP district and a nonresidential district;

B. Special Height Regulations for Accessory Structures outside of an Accessory Structure Overlay District.

1. On all lots with a lot size less than forty thousand square feet, accessory structures other than detached accessory dwelling units shall not exceed one story or sixteen feet in height.

2. On all lots with a lot size of at least forty thousand square feet, accessory structures other than detached accessory dwelling units located to the rear of the principal dwelling may be two stories or twenty-four feet in height provided that the full side and rear setbacks required by the applicable district are provided.

3. If not established in historic overlay districts, the zoning administrator shall establish height regulations based upon the recommendation of the historic zoning commission.

C. Special Height Regulations for Accessory Structures Within the Urban Zoning Overlay District.

1. On all lots with a size less than forty thousand square feet, an accessory structure other than a detached accessory dwelling unit located to the rear of the principal dwelling may have vertical walls rising no higher than sixteen feet from the side and rear setback lines. The roof on the structure shall rise from the side walls at a roof pitch no steeper than the predominant roof pitch of the principal dwelling, except that the vertical walls may extend to the underside of the roof at the gable end of a gabled roof. The top elevation of an accessory structure shall not exceed the top elevation of the principal dwelling.

2. On all lots with a lot size of at least forty thousand square feet, an accessory structure other than a detached accessory dwelling unit located to the rear of the principal dwelling may have vertical walls rising no higher than twenty-four feet in height exclusive of a

pitched roof, provided that the full side and rear setbacks required by the applicable district are provided. The top elevation of an accessory structure shall not exceed the top elevation of the principal dwelling.

3. If not established by the design standards of an historic overlay district, the zoning administrator shall establish height regulations based upon the recommendation of the historic zoning commission.

D. Special Height Regulations for Design-Based Multi-Family Districts.

1. Design-Based Multi-Family Districts subject to the provisions of Chapter 17.38.

E. Permitted Height Obstructions. In the mixed-use and nonresidential districts, the following structures shall be exempt from the height control standards of this section.

1. On-premises signs subject to the provisions of Chapter 17.32;

2. Chimneys or flues;

3. Elevator or stair bulkheads, roof water tanks, or cooling towers;

4. Flagpoles;

5. For religious institutions, ornamental towers, spires or belfries having no floor area within that portion of the tower exceeding the height limit or penetrating the height control plane;

6. Parapet walls not more than four feet high.

F. Special Height Restrictions Along Highways Designated Scenic Under T.C.A. Section 54-17-101 et seq.

1. For purposes of this subsection D, the following terms shall have the meanings shown:

a. "Coverage area" means the total surface area proposed to be covered by a structure.

b. "Natural elevation" means the average elevation of the coverage area prior to grading, to be computed by dividing the sum of the elevations of points taken at twenty-five foot intervals around the perimeter of the coverage area by the total number of such points.

c. "Measuring segment" means the full segment of scenic highway abutting the property on which the building is to be built.

d. "Measuring segment elevation" means the average elevation of the measuring segment, to be computed by dividing the elevations of points taken along the centerline of the measuring segment at twenty-five foot intervals divided by the total number of such points.

e. "Maximum building height" means the difference between the maximum elevation of a building, including any object to be affixed thereto, and the natural elevation.

2. The "maximum building height" of any building to be built within three hundred feet of, and on a parcel of property abutting, a road designated a scenic highway by Tenn. Code Ann. Section 54-17-101 et seq., as amended, shall not exceed the following:

a. For a building site having a natural elevation lower than the measuring segment elevation, maximum building height shall be no more than thirty-five feet higher than the measuring segment elevation.

b. For a building site having a natural elevation higher than the measuring segment elevation, maximum building height shall be no more than thirty-five feet higher than the natural elevation.

G. Special Height Regulations for All Uses (Excluding Single-Family and Two-Family Dwellings) Within the Urban Zoning Overlay District, but not including the DTC district:

1. In all districts, a principal or accessory structure may exceed the maximum height at the setback line and/or penetrate the height control plane as shown in Tables 17.12.020B and 17.12.020C, or the maximum height in the build to zone for thirty percent of the façade fronting each public street and/or the maximum heights specified in Table 17.12.020D, based on the review and approval of a Special Exception by the board of zoning appeals.

2. The top elevation of an accessory structure shall not exceed the top elevation of any principal building or structure located within the development.

3. An applicant shall provide evidence to the board that the proposed building height shall not create an adverse impact on air, light, shadow, or wind velocity patterns due to the configuration of the building relative to the maximum permitted height standards (including height control plane) and its juxtaposition to, and with, existing structures in the vicinity, or approved, but not yet built structures. In addition, the applicant shall demonstrate that the proposed building height contributes to, and does not detract from, a strong pedestrian-friendly streetscape.

4. The board shall consider a recommendation from the historic zoning commission, if the property is located within an historic overlay district, and a recommendation from the planning commission as provided in Section 17.40.300. The planning commission shall recommend on the proposed development's consistency with the goals, objectives and standards of any redevelopment district as well as the general plan, including any community, neighborhood or other design plan. (Ord. BL2025-1006 §§ 3, 4, 2025; Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2022-1346 § 4, 2022; Ord. BL2015-1153 §§ 16, 17, 2015; Ord. BL2015-1053 § 1, 2015; Ord. BL2012-183 § 4, 2012; Ord. BL2007-1431 § 1,

2007; Amdt. 1 to Ord. BL2006-1047, § 5, 2006; Ord. BL2006-1047 § 5, 2006; Ord. 2002-1015 § 1 (part), 2002; Amdts. 2, 8 with Ord. BL2000-364 § 1 (part), 2000; Amdt. 1 with Ord. BL2000-317 § 1, 2000; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; § 1(9) of Amdt. 1 with Ord. 96-555 § 3.5, 1997)

17.12.070 Special floor area ratio (FAR) provisions.

A. Plazas/Arcade Bonus. For properties located within the MUI, MUI-NS, MUI-A, MUI-A-NS district, a floor area development bonus is offered in return for the design and construction of pedestrian plazas and/or arcades that are accessible to the general public. Two categories of bonuses are offered to the property owner:

1. Design Plan Plaza/Arcade Bonus. A property owner electing to construct a pedestrian plaza or arcade in strict accordance with the design standards established by an Urban Design Overlay district shall derive the following increase in building floor area based on each square foot of plaza or arcade area provided.

District	Bonus Floor Area (in sq. ft.)
MUI, MUI-NS, MUI-A, MUI-A-NS	Plaza: 6.0
	Arcade: 3.0

2. Standard Plaza/Arcade Bonus. Properties not specifically designated by an urban design overlay district as qualifying for plaza and/or arcade bonuses under the provisions of subdivision (1) of this subsection, also may elect to provide a plaza and/or arcade in return for a floor area development bonus.

a. For qualifying plazas and arcades, the provision of one square foot of plaza or arcade area shall yield the following increase in developable floor area:

District	Bonus Floor Area (in sq. ft.)
MUI MUI-NS, MUI-A, and MUI-A-NS	Plaza: 3.0
	Arcade: 3.0

b. Design Criteria. To qualify for a standard plaza/arcade floor area bonus, the following design criteria shall be satisfied:

i. Plazas.

(A) The plaza shall provide a minimum depth of ten feet from the adjacent street and a minimum area of five hundred square feet.

(B) The floor of the building located at plaza level shall provide individual establishments such as restaurants or retail sales that open directly to the plaza. Up to fifty percent of the plaza area may be utilized as a sidewalk cafe.

(C) When feasible, pedestrian linkages shall be provided to plazas located on adjacent lots.

ii. Arcades.

(A) The arcade shall provide a minimum height of twenty-five feet and a minimum area of five hundred square feet.

(B) The arcade shall be located within five feet of the average level of the street. The floor of the building located at arcade level shall provide individual establishments such as restaurants or retail sales that open directly to the arcade.

B. Residential Bonus in the MUN and MUL Zoning Districts.

1. For property located within the urban zoning overlay district and within the MUN, MUN-NS, MUN-A, MUN-A-NS, MUL, MUL-NS, MUL-A, and MUL-A-NS zoning district, in any building where at least twenty-five percent of the floor area (exclusive of parking) is designed and constructed for residential occupancy, a bonus value of 1.0 may be applied to the permitted FAR of the zoning district. This bonus floor area shall be utilized for residential uses only. This bonus floor area shall not be combined with any other bonus allowed under this section or Section 17.36.090.

2. In any development that uses the floor area bonus of this section, the following uses shall be prohibited from the development:

a. Short term rental property — Owner Occupied

b. Short term rental property — Not Owner Occupied

C. Exemption in the MUI, MUI-NS, MUI-A, MUI-A-NS District. In the MUI, MUI-NS, MUI-A, and MUI-A-NS district, leasable space that is located at street level with a minimum depth of twenty feet, which is occupied by uses that have individual access to the street such as, but not limited to, either a bar, restaurant or retail use, shall be excluded as floor area for the purpose of calculating floor area ratio. A minimum of fifty percent of each storefront shall be glazed window area. Also excluded as floor area:

1. Below grade parking; and

2. Above grade parking decks of flat plate type construction that provide no less than twelve feet floor to ceiling clearance and have architectural cladding.

D. Parking Exemptions. In all districts the floor area used for the provision of off-street parking spaces or loading berths (and the driveways and maneuvering aisles for those spaces and berths) shall not be counted as floor area for the purpose of calculating floor area ratio when such spaces or berths are used to satisfy the parking demands for the principal use(s) on the parcel. When no parking is required, provision of off-street parking spaces shall not be counted as floor area for the

purpose of calculating floor area ratio when such spaces or berths do not exceed the parking maximum set by the UZO District standard in Table 17.20.030.

E. Street Level Parking Decks in the MUG, MUG-NS, ORI, ORI-NS, MUI, and MUI-NS Districts. Regardless of whether other special floor area ratio (FAR) provisions in this section are utilized, parking decks located at street level shall have no less than seventy-five percent of the lineal street frontage devoted to office or nonparking commercial uses at a minimum depth of twenty feet. A minimum of fifty percent of that wall area shall be glazed. That floor area shall be excluded from the calculation of floor area ratio.

F. Parking Garage Liner Buildings. Within the CF, CF-NS, ORI, ORI-NS, ORI-A, ORI-A-NS, and all mixed-use districts, parking garages fronting a public street or public space may be masked by a liner building that is a minimum of twenty feet deep. The floor area of any liner building shall be excluded from the calculation of the floor area ratio, provided the following requirements are satisfied:

1. The first twenty feet of depth of the liner building shall be occupied by office, residential, or other non-parking commercial uses.

2. For non-residential uses on the first floor, a minimum of forty percent of the front facade of the first floor shall be clear or lightly tinted windows and doors. The first floor transparent glazing area calculation shall be measured from the finished grade at the setback to the finished floor elevation of the second floor, or to a height of sixteen feet, whichever is less. Upper floors, regardless of use, shall have a minimum of twenty-five percent of glazing to be eligible for square footage calculation exemption.

3. For residential uses on the first floor, a minimum of twenty percent of the front facade of the first floor shall be openings. Openings shall be clear or lightly tinted windows or main entrance doors. The first floor opening area calculation shall be measured from the finished floor elevation of the first floor to the finished floor elevation of the second floor, or to a height of twelve feet, whichever is less. Upper residential floors shall have a minimum of twenty-five percent glazing to be eligible for square footage calculation exemption. Residential uses on the first floor shall have a minimum finished floor elevation one and one half feet above the finished grade at the setback.

The provisions of this subsection shall be enforced pursuant to the final site plan review procedures in Section 17.40.170. (Ord. BL2022-1412 § 1, 2022; Ord. BL2021-797 § 1, 2021; Ord. BL2019-111 § 1(Exh. A, § 20), 2020; Ord. BL2015-1153 § 5, 2015; Ord. BL2012-183 § 5, 2012; Ord. BL2009-586 § 1(Exh. A, §§ 18—25), 2010; Ord. BL2007-36 § 1, 2007; Ord. BL2007-1531 § 2, 2007; Ord. BL2006-975 § 1, 2006; Ord. 2002-1015 § 1 (part), 2002; Ord. BL2000-364 § 1 (part), 2000; Amdt. 1 (part) with Ord. 99-1754 § 4, 1999; Ord. 96-555 § 3.6, 1997)

17.12.080 Compact development.

A. Purpose and Intent. Compact development is a set of alternative zoning standards that may be utilized in the design of residential subdivisions. It is the purpose of this section to provide for the health and welfare of residents by creating the opportunity for a diversity of housing and recreational opportunities by creating usable open space and allowing for a mixture of residential lot sizes.

Applicability. Subdivisions proposed in the R/RS and R/RS-A zoning districts where less than ten percent of the site contains any, or a combination of, the natural areas as defined in Section 17.12.090 and meet one of the following standards may utilize the provisions of this section.

1. Proximal Option Minimum Site Area. Property located within 0.25 miles of any MCSP classified arterial or collector street shall have a minimum site area of no less than five times the minimum lot area for the base zoning district as established by Table 17.12.020A. For example, in the R10 district the minimum area for the subdivision would be fifty thousand square feet. (Ten thousand square feet minimum lot size times five.)

2. Distal Option Minimum Site Area. Property located more than 0.25 miles of any MCSP classified arterial or collector street shall have a minimum site area of no less than ten times the minimum lot area for the base zoning district as established by Table 17.12.020A. For example, in the R10 district the minimum area for the subdivision would be one hundred thousand square feet. (Ten thousand square feet minimum lot size times ten.)

B. Maximum Lot Yield. Eighty percent of the gross acreage shall be divided by the minimum lot size of the base zoning district to determine the maximum yield. For example, a one hundred thousand square foot RS5 zoned property shall only be permitted to have at most sixteen lots.

C. Design Flexibility. In order to accomplish the purpose of this section, flexibility in lot sizes may be proposed in exchange for the creation of open space on the site according to the following standards:

1. Utilization of the compact development shall result in the creation of open space. A minimum of fifteen percent of the site shall be placed in open space.

2. Lot Size Flexibility.

a. Subdivisions may reduce lots in size from the minimum required by the base zoning district an equivalent of two smaller zoning districts. For example, a subdivision in the R15 district may utilize the compact development standard to create lots equivalent in size to the R8 and R8-A district. In a similar fashion, a subdivision in the RS15 district may create lots equivalent in size to the RS7.5 and RS7.5-A district.

b. If additional usable open space is provided, beyond the minimum requirement, a subdivision may reduce the minimum lot size by an equivalent percentage beyond the two-zoning district reduction.

i. Subdivisions proposed in all R/RS districts where there are at least two smaller zoning districts, excluding RS7.5/RS7.5-A, RS5/RS5-A, and RS3.75/RS3.75-A may reduce their lot size no more than ten percent beyond the two-district district reduction with an additional dedication of ten percent useable open space (at least fifteen percent total useable open space), and shall be based on the reduced size zoning district. For example, if a subdivision in R10 utilizing the reduced lot size of the R6 district sets aside ten percent usable open space then the lot sizes may be reduced an additional five percent. The reduced lot size would be reduced from a minimum six thousand square feet lot to a minimum five thousand seven hundred square feet.

ii. Subdivisions proposed in R8/R8-A districts may reduce lots in size from the minimum required by the base zoning district by an additional equivalent percentage of the site that is in usable open space, with a maximum additional reduction of twenty percent. For example, a subdivision in a R8 district utilizing the R6 lot standards that dedicates an additional twenty percent useable open space (at least twenty-five percent total useable open space) may reduce the lot size to four thousand eight hundred square feet.

iii. Subdivisions in the R6/R6-A districts that have no district lot size reduction available, lots may be reduced in size by the equivalent percentage of the site that is in the open space, with a max reduction of thirty percent. For example, a subdivision in an R6 district dedicating an additional thirty percent useable open space (at least thirty-five percent total useable open space) may reduce lot size to four thousand two hundred square feet.

c. No lot shall be reduced to less than three thousand seven hundred fifty square feet.

3. Lots proposed for two-family dwellings shall meet the minimum lot size of the base zoning district (no reduction of lot area permitted) and shall comply with the standards of Section 17.16.030.D of this title.

4. Development in hillside and floodplain areas shall follow those standards as set out in Chapter 17.40.

5. Tree removal in a compact development shall follow the standards of Section 17.28.65 and Chapter 17.40.

6. The standards for the review of critical lots as provided in the adopted subdivision regulations shall apply.

7. The bulk standards and landscaping requirements of a comparable zoning district which most closely resembles the alternative lot sizes proposed for any given phase of development shall be employed for that phase of the subdivision, except for any standard that is addressed within this ordinance.

8. Perimeter lots that are reduced in size from the minimum lot size requirements required by the base zoning district and are abutting a conventional R/RS subdivision shall be required to utilize a twenty-foot standard B landscape buffer yard, unless located within the Urban Zoning Overlay, as per Chapter 17.24 Article III landscape buffer yard requirements. If the perimeter lots meet the minimum size of the base zoning district, no landscape buffer yard is required.

a. Landscape buffer yards shall be permitted within an access easement on individual lots, provided the easement connects to common open space that is accessible from the public right-of-way.

D. Open Space Standards. The required fifteen percent open space of a compact development may contain usable open space and stormwater features as required and described in this section.

1. Usable Open Space & Features. A minimum of five percent of a compact subdivision's total area shall be usable open space. One usable feature shall be installed for subdivisions containing between four and ninety-nine total residential units, plus an additional usable feature for every one hundred residential units, or portion thereof, in excess of the first ninety-nine units. Usable features shall not be located in regulatory no-disturb stormwater buffers or floodway as determined by metro water services. Any usable feature proposed to be located in floodplain shall not be fenced or contain impervious surfaces. Usable features, as approved by the Planning Commission or their designee, may include but are not limited to:

a. Paved greenway trails or trailhead facilities identified in the Metropolitan Parks and Greenways Master Plan and located within publicly accessible greenway conservation easements to the benefit of the Metropolitan Greenways Commission or Metro Parks;

b. Walking or bicycle trails;

c. Reflective, passive recreation areas such as picnic shelters, gazebos, or shared docks;

d. Playgrounds with benches and pedestrian scale lighting;

e. Dog parks with benches and pedestrian scale lighting;

f. Stormwater mitigation facilities such as bioretention, bioswale, or rain garden, designed as an amenity and provided in conjunction with other usable features mentioned in this section; a stormwater feature alone shall not count as usable open space;

g. Other active recreational or play facilities including but not limited to paved game courts such as tennis, basketball, or volleyball courts, swimming pools, baseball/softball diamonds or other facilities;

h. Historic or cultural sites with walkways and interpretive signage;

i. Unstructured open play areas for practice or pickup games;

j. Low impact recreation options (i.e. bocce ball, horseshoes, outdoor chess tables);

k. Conservation of natural features as defined in Section 17.12.090.

2. Stormwater Features. The following uses may count toward the open space stormwater feature component of this section:

a. Required stormwater mitigation measures such as reforestation;

b. Stormwater control measures, such as retention and detention basins, and other conventional stormwater facilities as approved by the planning commission, or their designee, and by metro water services.

3. If a property is located within 0.25 miles of local, state, or federal park, no minimum useable open space is required; however, the compact development subdivision is required to have at least ten percent total open space. For the purpose of this section greenways shall not be considered parks.

4. Compact development subdivisions shall attain a tree density factor of at least twenty-two units per acre using retained or replacement trees, or a combination of both.

5. Regardless of whether sidewalks are installed, street trees shall be required on new and existing streets.

a. If sidewalks are installed, street trees shall be planted within the grass strip/green zone for any sidewalk constructed, dependent on roadway classification and right-of way availability.

b. If no sidewalks are installed, street trees are required to be located within the right-of-way, dependent on roadway classification and right-of way availability.

c. Trees shall be installed according to the provisions of the Metro Nashville Street Tree Specifications prepared and maintained by metro water services in conjunction with Nashville Department of Transportation, Planning, and Codes.

d. Street trees shall be chosen from the Urban Forestry Recommended Tree List. Canopy trees shall be installed, except where conflicts with overhead electrical powerlines exist. In those instances, understory trees may be substituted.

e. Required street trees shall be depicted on a landscape plan. The landscape plan and specifications shall be prepared by, or under the direction of, and bear the seal of a professional landscape architect registered in Tennessee.

f. Trees installed pursuant to this section shall be eligible for credit toward tree density required by Chapter 17.28 of this title.

6. Configuration and Access. To the maximum extent practicable given the configuration, the open space shall be in a contiguous tract. When possible, usable open space shall be centrally located, directly accessible to the largest practicable number of lots within the subdivision, have street frontage and each lot shall be no more than one thousand three hundred twenty feet from usable open space as measured from the perimeter of the open space to individual lot lines. Non-adjacent lots shall be provided with pedestrian access to the usable open space via direct access or an access easement designated on the plat.

7. Ownership and Management.

a. Open space and street trees within a compact development shall be owned and maintained by an incorporated association for the mutual benefit of residents or property owners within the development and shall be adequately described on a recorded plat of subdivision approved by the planning commission. All property owners within a compact development subdivision shall be a member of the association which shall be responsible for the assessment of dues to cover the recurring costs of maintaining all open space areas and usable features. Articles of incorporation and bylaws shall be submitted and approved according to the subdivision regulations.

b. In limited circumstances where the open space is identified on the Greenways Master Plan or within the Parks Master Plan, the developer may offer the open space for dedication to metro parks subject to approval and acceptance by metro parks board and metro council as appropriate.

c. Open Space Management Plan. With the concept plan applicants shall submit a plan for the management of the open space, common open space, and street trees which allocates responsibility and guidelines for

maintenance and operation of the open space and any facilities located within the open space areas. If the open space is restricted via a conservation easement in the favor of a bona fide land trust or other permanently established organization legally able to accept such easements, a stewardship plan or other management plan associated with the conservation easement may be provided in lieu of the open space management plan.

d. Failure to maintain. When the failure of an association or other responsible party to properly maintain open space results in a public nuisance, the zoning administrator is empowered to initiate appropriate measures to eliminate the nuisance. If public funds are utilized to remove a nuisance and/or maintain open space, those costs shall be assessed proportionally against all property owners within the development in the form of a tax lien. This provision shall not apply to any open space that has been dedicated to and accepted by the metropolitan government.

E. For the purpose of this section (17.12.080), a property shall be determined to be located within 0.25 miles of an Arterial Boulevard, Collector Avenue, or park when fifty percent or greater area of the subject site lies within a buffer when measured from the edge of right-of-way or site boundary.

F. A property that is required to utilize Conservation Development, as stipulated by Section 17.12.090, that has since been modified to remove natural features after the adoption of this ordinance shall be prohibited from utilizing compact development as determined by staff.

1. All agricultural uses, including but not limited to commercial nurseries, botanical gardens, tree farms and grove operations shall be exempt, but only as to those trees and sites which were planted or managed for silvicultural or agricultural purposes or for the sale or intended sale in the ordinary course of business.

2. Any applicant that contests staff determination of the removal of natural features shall be required to provide an individual assessment that natural features disturbed or removed were done so prior to the adoption of this ordinance.

G. Application Requirements.

1. The subdivision concept plan (preliminary plat) shall clearly indicate that a compact development is proposed and shall be prepared in accordance with the procedures and requirements of the metro subdivision regulations.

2. All submittals shall clearly show and label the required open space and usable open space and features documenting that these requirements have been met.

3. Concurrent with the submittal of the concept plan, the applicant shall prepare and submit a site analysis map that identifies the natural areas as defined in Section 17.12.090. Documentation of, or determinations regarding the areas from appropriate metro, state or federal agencies or official maps or resources, if applicable, shall also be provided. (Amdt. 1 to Ord. BL2023-120 § 2, 2024; Ord. BL2023-120 § 2, 2024; Ord. BL2015-1153 § 16, 2015; Ord. 2002-1015 § 1 (part), 2002; Ord. 96-555 § 3.7, 1997)

17.12.090 Conservation development.

A. Purpose and Intent. Conservation development is a set of standards that shall be utilized in the design of subdivisions as provided in this section. The purpose of these standards is to:

1. Preserve unique or sensitive natural resources such as steep slopes; hillsides; streams, wetlands, floodways, and floodplains; problem soils; archaeological resources; and native forests or unique vegetation through the creation of natural open space.

2. Encourage the creation of lots on less environmentally sensitive areas of the site.

3. Provide flexibility in design of subdivisions within existing zoning districts to promote environmental resource protection.

B. Applicability. Subdivisions proposed in the R/R-A and RS/RS-A zoning districts that meet both of the following standards shall utilize the provisions of this section.

1. Minimum Site Area. The minimum site area of no less than ten times the minimum lot area for the base zoning district as established by Table 17.12.020A. For example, in the R10 district the minimum area for the subdivision would be one hundred thousand square feet. (Ten thousand square feet minimum lot size times ten).

2. Minimum Natural Area. A minimum of ten percent of the site contains any, or a combination of, the following:

a. Areas shown on FEMA maps as part of the 100-year floodplain or identified in local studies as confirmed by Metro Stormwater;

b. All perennial and intermittent streams, floodways, and associated buffers, as determined by Metro Stormwater or the State;

c. Areas of natural slopes of twenty percent or greater of at least ten thousand square foot contiguous area;

d. Areas containing problem soils as established by Section 17.28.050; wetlands, as determined by metro stormwater;

e. Habitat for federally or state listed or proposed rare, threatened, or endangered species;

f. Areas containing a Cedar Glade environment as established by Section 17.28.060;

g. Archaeological or historic sites, cemeteries, and burial grounds;

h. Protected, heritage, and historic and specimen trees, as defined by Section 17.28.065 of the Metro Zoning Code; or

i. For this section, the area calculated for protected, heritage, and historic and specimen trees, shall utilize the size of the tree protection zone, as defined within Section 17.28.065.

C. Maximum Lot Yield. The determination of the maximum lot yield shall be based on assigning twenty percent of the gross acreage of the site to open space and infrastructure. The remaining eighty percent of the gross acreage shall be divided by the minimum lot size of the base zoning district to determine the maximum yield. Yield shall not be based on the minimum lot size as described in Section D Lot Size Flexibility.

D. Conservation and Design Flexibility. In order to accomplish the purposes of this section, flexibility in lot sizes may be proposed in exchange for protection of the natural areas present on the site in natural open space according to the following standards:

1. Conservation Areas:

a. Subdivisions subject to the rural character subdivision regulations shall follow the procedures of those regulations for identification and protection of primary conservation lands in natural open space. In no case shall the standards of this section be construed to lessen the requirements for protection of primary conservation lands as identified in the rural character subdivision regulations or establish a lower minimum open space threshold for such developments. If less than twenty percent of the site is primary conservation land, then trees, if applicable, as specified in Section 17.12.090.B.2 shall be included as natural area required to be preserved in open space.

b. All other subdivisions shall set aside as natural open space those portions of the site containing natural areas for purposes of conserving those resources according to the following:

i. If less than or equal to twenty percent of the site contains these natural areas, then the entire area shall be set aside in natural open space.

ii. If more than twenty percent of the site contains natural areas, then a minimum of twenty percent of the site shall be set aside as natural open space.

> The applicant is encouraged, but not required, as part of this chapter, to set aside areas of common open space in excess of twenty percent in exchange for additional design flexibility.

2. Common open space may be provided for other purposes besides protection of natural areas, but such open space shall not contribute to the flexibility of lot sizes afforded by this section.

3. Lot Size Flexibility:

a. Subdivisions subject to the rural character subdivision regulations may reduce lots in size from the minimum required by the base zoning district by equivalent percentage of the site that is in the natural area protected in natural open space and such lots shall be reduced in lot area no more than the equivalent minimum lot size of two smaller base zoning districts. For example, a rural character subdivision in a RS20 district with twenty percent natural open space may create lots reduced in size by twenty percent. On a similar RS20 site with sixty percent natural open space, lots may be reduced the equivalent in size to a RS10 district, but no smaller.

b. All other subdivisions may reduce lots in size from the minimum required by the base zoning district by equivalent percentage of the site that is in the natural area protected in natural open space. For example, on a site zoned RS15 with ten percent of the site set aside as natural open space, the lots may be reduced in size by ten percent, or to a minimum of thirteen thousand five hundred square feet in area. On a site zoned RS15 with thirty-five percent of the site set aside as natural open space, the lots may be reduced in size by thirty-five percent, or to a minimum of nine thousand seven hundred fifty square feet.

4. In no case shall the minimum lot size be reduced below three thousand seven hundred fifty square feet.

5. Lots proposed for duplexes must meet the minimum lot size of the base zoning district (no reduction in area permitted) and shall comply with the standards of Section 17.16.030.D of this title.

6. Development in hillside and floodplain areas shall follow those standards as set out in Chapter 17.28. If the natural area preservation required in those sections is greater than the area required here, then that chapter shall prevail. In no case shall the required natural area preservation be less than that required in this section.

7. Tree preservation or removal proposed in a conservation development shall follow the standards of Section 17.28.065. If the tree or natural area preservation required in that section is greater than the area required here, then the requirements of that section shall prevail. In no case shall the required natural area preservation be less than that required in this section.

8. The standards for the review of critical lots as provided in the adopted subdivision regulations shall apply.

9. The bulk standards and landscaping requirements of a comparable zoning district which most closely resembles the alternative lot sizes proposed for any given phase of development shall be employed for that phase of the subdivision.

10. A standard C landscape buffer yard as per Chapter 17.24 Article IV Landscape Buffer Yard Requirements shall be required along the perimeter of the development when perimeter lots are reduced in size from the minimum lot size required by the base zoning district. If all perimeter lots meet the minimum size of the base zoning, no landscape buffer yard is required.

E. Natural Open Space. Open space provided for the purposes of protecting natural areas and in exchange for flexibility of design, as described above, shall be called natural open space and subject to the standards below. These standards are not applicable to common areas or open spaces that may be provided for other purposes.

1. All natural open space provided in accordance with this section shall be platted with the first phase of development that includes any lots utilizing alternative lot sizes as provided for above and shall be identified on the plat as protected natural open space. Consideration shall be given to the timing of platting of natural open space for large developments that contain natural area located in a portion of the site that may be inaccessible to the first phases of development.

2. Clearing, grading or disturbance of natural open space shall be prohibited, except for essential infrastructure. Roadways and other essential utilities necessary to serve the development may be permitted to cross a natural open space provided that this development minimizes impacts to this area. Preliminary grading and construction plans that demonstrate the limits of disturbance, feasibility of construction and overall impacts to the area at a level of detail beyond that normally required at the concept plan (preliminary plat) phase shall be required prior to approval of a plan incorporating such infrastructure. The portion of the natural open space that must be disturbed to accommodate essential infrastructure shall not contribute toward the required minimum natural open space or flexibility of lot size afforded by the previous section.

3. Protected natural open space shall be located and identified in the field by the applicant prior to the issuance of a tree removal or grading permit to ensure there is no disturbance of these areas during the construction process.

4. Configuration and Access. To the maximum extent practicable given the configuration of natural areas, the open space shall be in a contiguous tract. Consideration should be given to the preservation of natural area that adjoins neighboring areas of open space, other protected areas, and non-protected natural areas that would be candidates for inclusion as part of a future area of protected open space in an adjacent development. The open space shall be directly accessible to the largest practicable number of lots within the subdivision. Non-adjoining lots shall be provided with pedestrian access to the open space via direct access or an access easement designated on the plat.

5. Permitted Uses of Natural Open Space. The following uses may be located or installed within natural open space without affecting the contribution of those areas to flexibility of lot size afforded by the previous section:

a. Conservation of natural resources.

b. Paved greenway trails or trailhead facilities identified in the Metropolitan Parks and Greenways Master Plan and located within publicly accessible greenway conservation easements to the benefit of the metropolitan greenways commission or metro parks.

c. Walking or bicycle trails provided they are constructed of pervious paving materials.

d. Athletic courts and fields or playgrounds, provided that they meet the following:

i. All facilities are designed and constructed with a permeable base or groundcover; no impermeable surfaces shall be used;

ii. All facilities make up no more than five percent of the total natural open space area of the development or four thousand six hundred square feet, whichever is less; and

iii. No facility shall be constructed on wetlands as determined by metro stormwater; in known habitat for federally or state listed or proposed rare, threatened, or endangered species; in areas containing a protected Cedar Glade plant species as established by Section 17.28.060 of the Metro Zoning Code; on archaeological or historic sites, cemeteries, and burial grounds; or in an area that would require the removal of protected, heritage, and/or historic and specimen trees as defined by Section 17.40.450 of the Metro Zoning Code.

e. Passive recreation areas such as picnic shelters, gazebos, or shared docks.

f. Required stormwater mitigation measures such as reforestation that do not require grading.

g. Other conservation-oriented uses compatible with the purposes of this section.

6. Prohibited Uses of Natural Open Space.

a. Clearing, grading, disturbance, or tree removal except as specifically authorized in the permitted uses.

b. Roads, parking lots, impervious surfaces, and infrastructure.

c. Active recreational or play facilities that are designed and constructed with impermeable surfaces including but not limited to tennis courts, basketball courts, swimming pools, playgrounds, baseball/softball diamonds or volleyball courts or other facilities.

d. Impoundments, such as retention and detention basins, and other conventional stormwater facilities.

7. Ownership and Management.

a. Natural open space within a conservation development shall be owned and maintained by an incorporated association for the mutual benefit of residents or property owners within the development and shall be adequately described on a recorded plat of subdivision approved by the planning commission. All property owners within a conservation subdivision shall be a member of the association which shall be responsible for the assessment of dues to cover the recurring costs of maintaining all natural open space areas. Articles of incorporation and bylaws shall be submitted and approved according to the subdivision regulations.

b. In limited circumstances where the natural open space is identified on the Greenways Master Plan or within the Parks Master Plan, the developer may offer the open space for dedication to metro parks subject to approval and acceptance by metro parks board and metro council as appropriate.

c. Natural Open Space Management Plan. With the concept plan applicants shall submit a plan for the management of the open space and common facilities which allocates responsibility and guidelines for maintenance and operation of the open space and any facilities located within the open space areas. If the open space is restricted via a conservation easement in the favor of a bona fide land trust or other permanently established organization legally able to accept such easements, a stewardship plan or other management plan associated with the conservation easement may be provided in lieu of the open space management plan.

d. Failure to Maintain. When the failure of an association or other responsible party to properly maintain a natural open space results in a public nuisance, the zoning administrator is empowered to initiate appropriate measures to eliminate the nuisance. If public funds are utilized to remove a nuisance and/or maintain natural open space, those costs shall be assessed proportionally against all property owners within the development in the form of a tax lien. This provision shall not apply to any natural open space that has been dedicated to and accepted by the metropolitan government.

F. Application Requirements.

1. The subdivision concept plan (preliminary plat) shall clearly indicate that a conservation development is proposed and shall be prepared in accordance with the procedures and requirements of the metro subdivision regulations.

2. Concurrent with the submittal of the concept plan, the applicant shall prepare and submit a site analysis map that identifies the natural areas. Documentation of, or determinations regarding the areas from appropriate metro, state or federal agencies or official maps or resources, if applicable, shall also be provided.

3. Preliminary grading and construction plans that demonstrate the limits of disturbance, feasibility of construction and overall impacts to a natural area at a level of detail beyond that normally required at the concept plan (preliminary plat) phase shall be required prior to approval of a conservation plan. (Ord. BL2024-617 § 2, 2024; Ord. BL2022-1122 § 4, 2022; Amdt. 2 to Ord. BL2022-1121 § 1, 2022; Ord. BL2022-1121 § 1, 2022; Ord. BL2015-1153 §§ 15, 16, 2015; Amdt. 1 to Ord. BL2007-1365 § 1, 2007; Ord. BL2007-1365 § 1, 2007; Ord. 2002-1015 § 1 (part), 2002; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 3.8, 1997)

17.12.100 Single-family cottage developments.

In order to provide opportunities for individual ownership of small residential lots oriented onto a common open space, lots in cottage subdivisions shall be arranged subject to the following:

A. Applicability. Single-family cottage developments are permitted in all zoning districts that permit multi-family uses; see Chapter 17.37 for applicability in the DTC zoning district. See Chapter 17.38 for applicability and standards within the RN1, RN2, RL1, RL2, and RL3 zoning districts.

B. Density. Single-family cottage subdivisions shall be developed at a density consistent with the density requirements of the base zone district. Each individual single-family cottage development within a subdivision shall contain four to ten cottage units in small lots around a common open space.

C. Orientation. Cottage units shall be oriented to front, and have a main entry onto, the common open space. However, cottage lots abutting a street may front the street, but shall not have the rear of the unit facing the street. Cottage units fronting the street shall have a secondary entrance onto the common open space.

D. Bulk Standards. The following bulk standards shall apply:

1. Minimum lot sizes shall be waived. See Table 17.020.B.1 for other standards.

2. The common open space shall total at least 250 square feet per cottage unit, and shall have cottages abutting on at least two sides.

3. The common open space shall be accessible to all cottage units in the development.

4. Only one dwelling unit per lot shall be permitted.

5. The maximum building coverage, excluding covered porches, shall be 1,000 square feet.

6. The maximum height of a cottage shall be two stories.

7. Front, rear and side setbacks from the property lines shall be a minimum of three feet.

8. Cottage units abutting a public street shall meet the requirements of Table 17.12.030.A. Notwithstanding the base zoning district, cottage units abutting a public street within the UZO shall be subject to the contextual street setbacks specified in Section 17.12.035.

9. Where a proposed development cannot comply with the standards of this section, the zoning administrator may approve other standards provided that the intent of this section is met.

E. Parking Requirements. The requirements for the provision of parking for single-family cottage developments shall be as follows:

1. Parking shall be located on the cottage development property.

2. Parking shall meet the requirement for single-family residential units established in Table 17.20.030.

3. Parking shall be provided on each cottage lot, or in the form of shared parking cluster(s) in commonly owned space, or a combination of the two.

4. Parking clusters shall be no more than six adjoining spaces and shall not be visible from a public street. Parking shall be screened from adjacent residential uses by landscaping or architectural screening as specified in Section 17.24.150.B.

5. Parking shall not be permitted in an established front yard setback or required common open space.

6. Parking may be permitted between, or to the side of structures, only when it is setback a minimum of ten feet from the leading edge of the front facade of a cottage unit and is accessed by a side or rear alley, or a side or rear private driveway.

7. The zoning administrator may approve other methods for the provision of parking provided the intent of this section is met. (Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2009-586 § 1(Exh. A, § 26), 2010; Ord. BL2006-971 § 5, 2006)

17.12.110 Alternative minimum lot size and setbacks for attached housing.

In order to provide opportunities for individual home ownership in all zoning districts that permit multi-family uses (except in the DTC zoning district), lots in attached housing developments of at least three units may be arranged subject to all of the following:

A. Density. The attached housing shall be developed at a density consistent with the density requirements of the base zone district.

B. Bulk Standards. The following bulk standards shall apply:

1. The attached housing shall be developed at a Floor Area Ratio (FAR) consistent with the FAR of the base zone district.

2. Only one dwelling unit per lot shall be permitted.

3. The attached housing shall meet the standards contained in Table 17.12.020.B.1.

4. The minimum street setback shall be three feet from the right-of-way line but shall not vary by more than 20 percent from the standards set in Section 17.12.030.C(3).

C. Parking Requirements. The requirements for the provision of parking for attached housing shall be as follows:

1. Parking shall meet the requirements for multi-family residential units established in Table 17.20.030.

2. Parking shall be accessed by a side or rear alley or a side or rear private driveway and shall not be visible from the street. Parking shall be screened from adjacent residential uses by landscaping or architectural screening as specified in Section 17.24.150.B.

3. The zoning administrator may approve other methods for the provision of parking provided the intent of this section is met. (Ord. BL2009-586 § 1(Exh. A, § 27), 2010; Ord. BL2006-971 § 6, 2006)

17.12.120 Reserved.

Editor's note—Ord. BL2015-1152 § 1, passed July 21, 2015, repealed § 17.12.120, which pertained to transfer of development rights and derived from Amdt. 1 to Ord. BL2007-1369 § 1, 2007; Ord. BL2007-1369 § 1, 2007.

Chapter 17.16

LAND USE DEVELOPMENT STANDARDS

Sections:

Article I. General Provisions

17.16.010 Purpose and intent.

Article II. Uses Permitted With Conditions (PC)

17.16.020 Applicability.
17.16.030 Residential uses.
17.16.035 Institutional uses.
17.16.040 Educational uses.
17.16.050 Office uses.
17.16.060 Medical uses.
17.16.070 Commercial uses.
17.16.080 Communication uses.
17.16.090 Industrial uses.
17.16.100 Utility uses.
17.16.105 Transportation uses.
17.16.110 Waste management uses.
17.16.120 Recreation and entertainment uses.
17.16.130 Other uses.

Article III. Uses Permitted by Special Exception (SE)

17.16.140 Applicability.
17.16.150 General provisions.
17.16.160 Residential special exceptions.
17.16.170 Institutional special exceptions.
17.16.175 Commercial special exceptions.
17.16.180 Communication special exceptions.
17.16.185 Industrial special exceptions.
17.16.190 Transportation special exceptions.
17.16.200 Utility special exceptions.
17.16.210 Waste management special exceptions.
17.16.220 Recreation and entertainment special exceptions.
17.16.230 Other special exception uses.

Article IV. Uses Permitted as Accessory (A)

17.16.240 Applicability.
17.16.250 Residential accessory uses.
17.16.260 Institutional accessory uses.
17.16.270 Office accessory uses.
17.16.275 Medical accessory uses.
17.16.280 Commercial accessory uses.
17.16.290 Communication accessory uses.
17.16.300 Industrial accessory uses.
17.16.310 Waste management accessory uses.
17.16.320 Recreation and entertainment accessory uses.
17.16.330 Other accessory uses.

Article I. General Provisions

17.16.010 Purpose and intent.

A. In addition to the zone district bulk, landscaping, parking and other regulatory provisions of this title, supplemental development standards may apply to specific land uses when located in certain zone districts. The zoning district land use table references those specific uses which must comply with supplemental development standards as:

PC	-	Permitted with conditions
SE	-	Permitted by special exception
A	-	Permitted as accessory to another principal use

B. Land use development standards are necessary because certain land uses are more unique or impacting than other uses in the same zone district and therefore conditions are established to insure compatibility with surrounding land uses. Other uses require large land areas, have unique operating characteristics, or tend to dominate the area more intensely than do other uses permitted in the same zone district. Some uses are socially and economically necessary in a particular zone district even though the potential may exist for the use to be incompatible with existing and future development. The development standards are intended to lessen and minimize incompatible land use relationships. Because the potential impacts cannot be satisfactorily predetermined for every location, some land uses are permitted in a zone district only as a special exception. Finally, other uses are uniquely incidental to other principal land uses and are appropriate when certain minimum standards are satisfied.

C. No zoning permit shall be issued for any development or use of land listed as PC, SE or A in the zoning district land use table or the DTC zoning district land use table unless the use is in compliance with all applicable land use development standards. Where development standards of this chapter are in conflict with the minimum bulk regulations of Chapters 17.12 or 17.37, the more restrictive standard shall apply. (Ord. BL2009-586 § 1(Exh. A, § 28), 2010; Ord. 96-555 § 4.1, 1997)

Article II. Uses Permitted With Conditions (PC)

17.16.020 Applicability.

The land use development standards in this article apply to uses permitted with conditions, referenced as "PC" in the zoning district land use table, Section 17.08.030 or in Chapter 17.37.

For uses within the DTC zoning district designated as "permitted with conditions" (PC), these uses shall not be required to comply with the landscaping provisions or minimum distance requirements specified herein from a zoning district permitting residential use. However, these provisions shall apply where the DTC district abuts a R and R-A, RS and RS-A, or RM district, or a property with exclusively residential use regardless of its base zoning. (Ord. BL2015-1153 § 16, 2015; Amdt. 1 to Ord. BL2009-586 § (Exh. A, § 29.a), 2010; Ord. BL2009-586 § 1(Exh. A, § 29), 2010; Ord. 96-555 § 4.2 (part), 1997)

17.16.030 Residential uses.

(Refer to zoning district land use table)

A. Consignment Sale. A consignment sale shall be permitted provided the following conditions are met:

1. Consignment sale must be held or conducted in or upon real property, and must be accessory to the principal use of the land.

2. Lot Area. A minimum lot size of three acres shall be required for any consignment sale.

3. Within any calendar year, a maximum of two consignment sale events shall occur per lot. An event is defined as a consignment sale that may occur for one day, two days and at most three days per an event.

4. Parking. Adequate off-street parking shall be provided to reduce traffic congestion and the blocking of driveways to other private or public properties.

5. An auction of a decedent's personal estate and/or real property conducted by a licensed auctioneer shall not be counted as a consignment sale.

B. Mobile Home Dwelling. In the mobile home park (MHP) zone district, the following supplemental development standards shall apply.

1. Minimum size of park: Two acres under single ownership.

2. Maximum density: Nine homes per acre.

3. Landscape Buffer Yard. Where the perimeter of a mobile home park development abuts an R/R-A or RS/RS-A zone district, a minimum of landscape buffer yard Standard B-3 (fifteen feet) shall be applied, and where the development abuts a public street the minimum width of the buffer yard shall be C-2 (thirty feet).

4. Open Space. A minimum of ten percent of the total land area within the MHP, excluding roadways, drives, off-street parking areas and required setbacks, shall be designated as open space.

5. Mobile Home Park. Mobile home dwellings shall be permitted in a mobile home park on a two acre minimum tract under single ownership provided:

a. Minimum lot area: Four thousand square feet per each individual lot or lease plot.

b. Minimum lot width: Minimum of forty feet.

c. Setbacks:

1. Public/private street or private drive: Minimum of twenty feet.

2. Rear property or lease line: Minimum of ten feet.

3. Side property or lease line: Minimum of ten feet.

d. Maximum height of any structure within the MHP: Thirty feet.

e. Maximum floor area ratio (non-residential): .60.

f. Maximum impervious surface ratio: .70.

g. Street Standard. The mobile home park shall have direct access to an abutting improved public street designated or proposed as an arterial or collector street on the Major Street Plan. At a minimum, access and circulation within the park shall be provided by a paved driveway with a minimum width of twenty-four feet, permanently maintained by the landowner through conveyance of a private easement on a recorded property plat. If the paved driveway has visitor parking along it, the minimum pavement width of the driveway shall be increased to twenty-seven feet.

h. Sidewalk. A sidewalk with a minimum width of four feet shall be provided along one side of all private drives within the MHP.

i. Tenant Storage. A minimum of ninety cubic feet of enclosed tenant storage space shall be provided. The skirting of the undercarriage shall not be used for purposes of required tenant storage space.

j. Skirting of Undercarriage. Each mobile home unit's frame, axles, wheels, crawl space storage area, and utility connection shall be concealed from view through use of durable all-weather materials manufactured specifically for the purpose of covering the undercarriage area of the unit.

6. Board of Health Approval. A mobile home park development shall be reviewed and approved by the director of the metropolitan board of health in accordance with Chapter 10.40 of the Metropolitan Code of Laws and the rules and regulations promulgated by the metropolitan health department.

C. Security Residence. A residence shall be permitted provided the following conditions are met:

1. The residence is occupied by a security guard, the business owner or member of the owner's immediate family defined as grandmother, grandfather, mother, father, sister, brother, son, daughter, mother-in-law, father-in-law, sister-in-law, brother-in-law, son-in-law, daughter-in-law, aunt or uncle;

2. The residence must be accessory to the principal use of the land and either located directly above the business or within the same building as the business;

3. The residence may not be rented;

4. The residence must provide the required parking per Article II of Chapter 17.20;

5. Only one residence is permitted on the property;

6. No entrance to the residential unit, which would be visible from the street, may be added solely for the purpose of providing direct outside access to the street;

7. An instrument shall be recorded with the register's office covenanting that the residence is being established as an accessory use and may only be used under the conditions listed above.

D. Two-Family Dwellings. In the AG, AR2a, R80, R40, R30, R20, R15, R10, R8 and R8-A, and R6 and R6-A districts, two-family dwellings may be permitted on any lot legally created as prescribed by state law or within an approved subdivision final plat provided the lot meets the minimum lot size standard of the district.

E. Multi-family uses accessory to an artisan manufacturing use.

1. A maximum of two units per lot shall be permitted as an accessory use to Manufacturing, Artisan use.

2. Residential uses are supported by the Community Plan, as determined by the planning department.

F. Adaptive Residential Development. A residential use shall be permitted provided a minimum of forty percent of the existing or proposed building's gross floor area is devoted to residential uses, subject to the following conditions:

1. Applicability. The provisions of this section shall apply to any residential use permitted with conditions in a non-residential zoning district except when located within a Planned Unit Development Overlay district. If located within a Planned Unit Development Overlay district, residential uses are only permitted where the Council adopted preliminary master plan included residential uses as a permitted use.

2. Design Standards. Except as noted below, all other requirements and standards established by other chapters of this title, as well as any other applicable metropolitan government, state, or federal regulation, shall apply to the development and use of properties shown on the final site plan. In case of conflict between the standards of this section and other chapters of this Zoning Code, the provisions of this section shall control, except for council-approved plans such as specific plan districts, planned unit developments, urban design overlay districts, and redevelopment districts.

a. All Residential Uses. The standards of this section shall apply only to a building or portion thereof converted to residential use, any addition to an existing building for residential use, and any new construction building, where a minimum of forty percent of the building's gross floor area is devoted to residential use, as explicitly shown on the approved final site plan under the authority of Section 17.40.170(A) of this title. The standards of this section shall not apply to any building proposing to devote less than forty percent of the gross floor area to residential uses.

b. Single-Family and Two-Family Residential Uses. Single-family and two-family uses shall be permitted only in an existing building.

3. Residential Floor Area. In all non-residential districts that permit with conditions a residential use, no density or floor area ratio applies to those portions of a non-residential building converted to a residential use or to new residential construction.

4. Building Orientation. In any new or existing building, a primary building entrance shall be oriented to the street. On a corner lot, entrances shall be oriented to each street.

5. Driveway Access. For new construction, driveway access shall be determined in consultation with Nashville Department of Transportation with priority given to arterial and collector streets.

6. Parking. Parking spaces shall be required for any residential, commercial and/or retail use in accordance with Chapter 17.20. Outside of the UZO, no more than one and one-half spaces shall be required per a residential dwelling unit. If parking is provided in a new deck or structure, the ground floor of the parking facility abutting a public street shall contain commercial or retail uses for seventy-five percent of the street frontage. The commercial or retail area shall have a minimum depth of twenty feet, a minimum height of fourteen feet (floor to floor) for the first floor of the garage at street level, with each storefront having between fifty-five percent and eighty-five percent glazed window area along the garage wall facing the public street. Upper levels of structured parking visible from public streets shall either be lined with active uses or screened with architectural screening.

7. Multimodal Transportation Analysis. Multimodal transportation analysis shall be required per Section 17.20.140.

8. Landscaping. Notwithstanding Section 17.24.050(A), any single addition that increases the total building area by twenty-five percent or more of an existing building, in whole or in part, shall provide landscaping as required by this title. Where the number of parking spaces is increased by twenty-five percent, either through a parking lot expansion or the construction of a new parking lot, interior parking lot landscaping shall be required.

9. Final Site Plan Approval. A final site plan application shall be submitted for review and approval in a manner consistent with the procedures of Section 17.40.170(A) or 17.40.170(B), as applicable, and any supplemental information requested after review of the application. Final site plan applications shall be of sufficient detail to fully describe the ultimate form of development and demonstrate full compliance with all applicable standards. The zoning administrator, upon advice of the appropriate metropolitan government agencies, shall grant final site plan approval based on findings that the design, proportions, and articulation of the proposed residential use are compatible with, and do not impact, the abutting or adjacent uses.

10. Alternative Design Standards. Where a proposed residential development cannot comply with the standards of this section, the applicant shall be required to submit for review by the board of zoning appeals a special exception, in accordance with Sections 17.16.140 and 17.16.150 of this title. The minimum filing fee shall be equal to a commercial application as per the adopted board of zoning appeals fee schedule. In granting such approval of a special exception application, the board shall determine that the applicant has demonstrated that the relief being requested will not be injurious to surrounding properties, nor violates the adopted general plan. Any special exception approved by the board shall fully comply with the standards of Subsection 12 of this section. The board shall not act on any application without first considering a recommendation from the planning department.

11. Notice. Applicants seeking an adaptive residential development use shall provide mailed notice of the proposed use, including the total number of dwelling units proposed, to all property owners within one thousand feet of the subject property no more than twenty-one days following the application of any permit related to the proposed adaptive residential development. Properties owned by the applicant shall not be included in the distance measurement for public notice. In addition to notification of individual property owners, an incorporated condominium association registered with the metropolitan clerk as requesting notification shall also be notified.

12. Short Term Rental Property. Lots developed with an adaptive residential use that have a majority of their street frontage on local street as shown on the adopted Major and Collector Street Plan or are located outside of the Urban Services District shall not be eligible for short term rental property — owner occupied or short term rental property — not owner occupied permits. Properties that have an active short term rental property permit in good standing prior to August 1, 2024, shall be exempt from this prohibition.

G. Detached Accessory Dwelling Unit. A detached self-sufficient dwelling unit shall be allowed accessory to a principal structure subject to the following standards:

1. Applicability.

a. While the following conditions listed below apply to a detached accessory dwelling unit, they do not counteract or override the applicable life safety standards found in the code editions adopted by the Metropolitan Government of Nashville.

b. No other accessory structure shall exceed two hundred square feet when there is a detached accessory dwelling unit on the lot.

2. Lot Area. The lot area on which the detached accessory dwelling unit is to be placed shall comply with Table 17.12.020A or Chapter 17.38 for Design-Based Multi-Family districts, as applicable.

3. Ownership.

a. No more than one detached accessory dwelling unit shall be permitted on a single lot in conjunction with the principal structure.

b. The detached accessory dwelling unit cannot be divided from the property ownership of the principal dwelling.

c. Only one detached accessory dwelling unit shall be permitted and only when one single-family principal structure is present. When two principal structures are present, then no detached accessory dwelling unit is permitted.

d. The detached accessory dwelling unit shall be owned by the same person, or entity, as the principal structure and one of the two dwellings shall be owner-occupied.

4. Setbacks. The setbacks for a detached accessory dwelling unit shall meet the setbacks found in Section 17.12.040.E. for accessory buildings or Chapter 17.38 for Design-Based Multi-Family districts, as applicable.

5. Site Requirements. A detached accessory dwelling unit may only be located behind the principal structure in the rear buildable area of the lot.

6. Driveway Access.

a. On lots with no alley access, the lot shall have no more than one curb-cut from any public street for driveway access to the principal structure as well as the detached accessory dwelling unit.

b. On lots with alley access, any additional access shall be from the alley and no new curb cuts shall be provided from public streets.

c. Parking accessed from any public street shall be limited to one driveway for the lot with a maximum width of twelve feet.

7. Bulk and Massing.

a. The living space of a detached accessory dwelling unit shall not exceed seven hundred square feet for lots less than ten thousand square feet, or eight hundred fifty square feet for lots ten thousand square feet or greater and shall not exceed the size of the principal structure.

b. The detached accessory dwelling unit shall maintain a proportional mass, size, and height to ensure it is not taller and/or larger than the principal structure on the lot. The detached accessory dwelling unit height shall not exceed the height of the principal structure as measured to the eave line, with a maximum eave height of ten feet for single-story and seventeen feet for two-story detached accessory dwelling units as measured from average finished grade. Within the RN1, RN2, RL1, RL2, and RL3 zoning districts, the standards of Chapter 17.38 shall control height.

c. The roof ridge line of the detached accessory dwelling unit must be less than the primary structure and shall not exceed twenty-seven feet in height as measured from average finished grade. Within the RN1, RN2, RL1, RL2, and RL3 zoning districts, the standards of Chapter 17.38 shall control height.

8. Design Standards.

a. The detached accessory dwelling unit shall be of similar style, design and material color as used for the principal structure and shall use similar architectural characteristics, including roof form and pitch, to the existing principal structure.

b. The detached accessory dwelling unit may have dormers that relate to the style and proportion of windows on the detached accessory dwelling unit and shall be subordinate to the roofslope by covering no more than fifty percent of the roof.

c. Detached accessory dwelling units may have dormers that are setback a minimum of two feet from the exterior wall.

9. Historic Properties.

a. Metro Historic Zoning Commission Action. Any existing or proposed detached accessory dwelling unit in a historic overlay district shall comply with the adopted regulations and guidelines of the applicable historic overlay.

b. Detached accessory dwelling units with a second story dwelling unit shall enclose the stairs interior to the structure and properly fire rate them per the applicable life safety standards found in the code editions adopted by the Metropolitan Government of Nashville.

10. Restrictive Covenant. Prior to the issuance of a permit, an instrument shall be prepared and recorded with the register's office covenanting that the detached accessory dwelling unit is being established accessory to a principal structure and may only be used under the conditions listed in 17.16.030.G.

11. Location. Detached accessory dwelling units shall only be permitted within the Urban Services District, within a Detached Accessory Dwelling Unit overlay district within the General Services District outside of the Urban Services District, or as otherwise permitted through a Specific Plan.

12. Short Term Rental Property (STRP). Upon enactment of this section, on any single-family-zoned, Residential Neighborhood-zoned, or Residential Limited-zoned lot where a new detached accessory dwelling unit is built, or on any single-family-zoned, Residential Neighborhood-zoned, or Residential Limited-zoned lot where a new detached accessory dwelling unit is established via conversion of an existing accessory structure, short term rental property—owner occupied, is not a permitted use in the accessory dwelling unit.

13. Utilities. The detached accessory dwelling unit may be served by separate utility meter(s).

H. Design-Based Multi-Family.

1. Townhouses, house courts, townhouse courts, plex houses, and manor houses shall be permitted within the RN1 and RN2 zoning districts as regulated by Chapter 17.38.

2. Townhouses, house courts, townhouse courts, plex houses, manor houses, multiplexes, low-rise courtyard flats, and low-rise flats shall be permitted within the RL1, RL2, and RL3 zoning districts as regulated by Chapter 17.38. (Amdt. A to Ord. BL2025-1007 § 5, 2025; Ord. BL2025-1007 § 5, 2025; Ord. BL2025-1006 § 5, 2025; Ord. BL2025-1005 § 1(Exh. A), 2025; Amdt. B to Ord. BL2024-187 § 1, 2024; Amdt. A to Ord. BL2024-187 § 1, 2024; Ord. BL2024-187 § 1, 2024; Ord. BL2024-184 § 5, 2024; Amdt. 1 to Ord. BL2022-1531 § 1, 2023; Ord. BL2022-1531 § 1, 2023; Ord. BL2022-1508 §§ 2, 3, 2023; Ord. BL2017-980 § 1, 2017; Ord. BL2015-1153 §§ 15, 16, 2015; Ord. BL2015-

1121 § 6, 2015; Ord. BL2014-770 § 3, 2014; Ord. BL2014-769 §§ 2—7, 2014; Ord. BL2014-684 § 2, 2014; Ord. BL2011-80 § 1, 2012; Amdt. 1 to Ord. BL2011-900 § 3, 2011; Ord. BL2011-900 § 3, 2011; Ord. BL2009-586 § 1(Exh. A, § 30), 2010; Ord. BL2009-552 §§ 1, 2, 2009; Amdts. 1 and 2 with Ord. BL2004-492 § 2, 2005; Ord. 2002-1011 § 1 (part), 2002; Amdt. 1 with Ord. BL2000-477 § 1 (part), 2000; Ord. 99-1642 § 1 (part), 1999; Ord. 99-1616 § 1 (part), 1999; Ord. 98-1268 § 1 (part), 1998; Ord. 98-1267 § 2, 1998; Ord. 96-555 § 4.2(A), 1997)

17.16.035 Institutional uses.

(Refer to zoning district land use table)

A. Day Care Center—Up to 75.

1. Play Area. If an outdoor play area is provided, it shall be fenced and attached to the day care structure in a manner which minimizes noise impacts on neighboring residences.

2. Lot Area. Where a minimum lot size is required, the minimum lot area shall be the same as the principal activity, except when in the opinion of the zoning administrator circumstances warrant otherwise.

3. State Regulations. All requirements of the state that pertain to the use and operation of the facility shall be met.

4. Multi-Family Buildings. The zoning administrator may waive the above standards for multi-family housing developments of two hundred or more units if compliance would disqualify an otherwise reasonable location.

B. Day Care Center—Over 75.

1. Play Area. If an outdoor play area is provided, it shall be fenced and attached to the day care structure in a manner which minimizes noise impacts on neighboring residences.

2. Lot Area. Where a minimum lot size is required, the minimum lot area shall be the same as the principal activity, except when in the opinion of the zoning administrator circumstances warrant otherwise.

3. State Regulations. All requirements of the state that pertain to the use and operation of the facility shall be met.

4. Multi-Family Buildings. The zoning administrator may waive the above standards for multi-family housing developments of two hundred or more units if compliance would disqualify an otherwise reasonable location.

C. Day Care Home—Small.

1. Location. All day care home—Small uses shall be considered a conditionally permitted use and comply with the requirements of this subsection.

2. Play Area. If an outdoor play area is provided, it shall be fenced and attached to the day care structure in a manner which minimizes noise impacts on neighboring residences.

3. Lot Area. Where a minimum lot size is required, the minimum lot area shall be the same as the principal activity, except when in the opinion of the zoning administrator circumstances warrant otherwise.

4. State Regulations. All requirements of the state that pertain to the use and operation of the facility shall be met.

5. Multi-Family Buildings. The zoning administrator may waive the above standards for multi-family housing developments of two hundred or more units if compliance would disqualify an otherwise reasonable location.

D. Day Care Home—Large.

1. Play Area. If an outdoor play area is provided, it shall be fenced and attached to the day care structure in a manner which minimizes noise impacts on neighboring residences.

2. Lot Area. Where a minimum lot size is required, the minimum lot area shall be the same as the principal activity, except when in the opinion of the zoning administrator circumstances warrant otherwise.

3. State Regulations. All requirements of the state that pertain to the use and operation of the facility shall be met.

4. Multi-Family Buildings. The zoning administrator may waive the above standards for multi-family housing developments of two hundred or more units if compliance would disqualify an otherwise reasonable location. (Ord. BL2022-1073 § 3, 2022; Ord. 98-1268 § 1 (part), 1998)

17.16.040 Educational uses.

(Refer to zoning district land use table)

A. Community Education.

1. Campus Size. Minimum campus size shall be based on the total enrollment capacity of the following school types:

School Type	Minimum Campus Size*
Elementary (K—8)	5 acres + 1 acre/100 students
Middle (5—9)	10 acres + 1 acre/100 students
High (7—12)	15 acres + 1 acre/100 students

* Public park space which abuts the school site may be calculated to meet the minimum campus size, provided the metropolitan board of parks and recreation approves the site for shared use.

2. Setback. Where elementary and middle school structures and outdoor activity grounds abut a residential zone district or district permitting residential use, there

shall be a minimum setback of fifty feet. Where high school structures and outdoor activity grounds abut a residential zone district or district permitting residential use, there shall be a minimum setback of one hundred feet. Notwithstanding any other provision of the Metropolitan Code of Laws, no new community education facility, as defined in Metropolitan Code of Law Section 17.04.060(B), shall henceforth be constructed within two thousand feet of the property line of any landfill or other waste disposal facility.

3. Landscape Buffer Yard. Screening in the form of landscape buffer yard Standard B shall be applied along common property lines.

4. Street Standard. At a minimum, educational facilities shall have driveway access on streets that function at the minimum street standards below:

a. Elementary: Any street; on minor local streets, driveway access shall be permitted only if the minor local street intersects an arterial or collector street within the same block;

b. Middle: Collector street;

c. High: Arterial street; or the intersection of two collector streets.

5. Reduced Lot Size. The board of zoning appeals may permit school facilities on smaller lot sizes than set forth above provided extracurricular activities are not offered by the school. Indoor/outdoor interscholastic and intramural competitive sports and outdoor physical education facilities are prohibited. Playgrounds and nature study grounds shall be permitted. The reduced lot size shall not be less than the following enrollment capacities.

Enrollment Capacity	Minimum Lot Size
1 to 75	2 acres
75 or more	3 acres + 1 acre/100 students

a. Landscape Buffer Yard. Screening in the form of landscape buffer yard Standard A shall be applied along common property lines.

b. Street Standard. Reduced lot size educational facilities may have driveway access on any street, except on a minor local street driveway access shall be permitted only if the institution is located on a corner lot.

6. Community education facilities having a valid use and occupancy permit on the effective date of the ordinance codified in this code, and which cannot satisfy the locational or design standards of this section, may petition the board of zoning appeals as a special exception use under the provisions of Article III of this chapter.

7. Required School Site Dedications. All required school site dedications shall follow the zoning requirements in effect at the time the dedication requirement was approved by the metropolitan council through the adoption of an amendment to the official zoning map, or the current requirements of Section 17.16.040, whichever is the least restrictive.

8. Adaptive Reuse. Community education facilities shall be permitted to operate within an existing structure, regardless of lot size, subject to the following conditions:

a. A valid use and occupancy permit was issued for the structure for use as a community education facility or a religious institution at any point within the previous five year period.

b. The property upon which the structure is located has not been subdivided since the cessation of the previous use as a community education facility or religious institution in such a manner so as to reduce the lot size below the minimum lot size for community education facilities provided in this section.

B. Vocational School.

1. Landscape Buffer Yard. Screening in the form of landscape buffer yard B shall be applied along common property lines.

2. Setback. Whenever a vocational school structure intended for vehicle repair, truck driving, manufacturing, production, or industrial equipment abuts a residential zone district or district permitting residential use, there shall be a minimum setback of fifty feet.

3. Street Standard. At a minimum, a vocational school shall have driveway access on a collector street. (Ord. BL2015-1098 §§ 2, 3, 2015; Amdt. 1 with Ord. BL2002-1273 § 6, 2003; Amdt. 1, 2 with Ord. BL2002-1171 § 6, 2002; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.2(B), 1997)

17.16.050 Office uses.

(Refer to zoning district land use table)

A. Financial Institution. Financial institutions in the MUN, MUN-NS, MUN-A, MUN-A-NS, ON, CN, CN-NS, CN-A, and CN-A-NS zoning districts shall be limited to two thousand five hundred square feet of gross floor area per establishment.

B. General Office. A general office shall be limited to two thousand five hundred square feet of gross floor area per establishment.

C. Leasing/Sales Office. A leasing/sales office shall be limited to two thousand five hundred square feet of gross floor area per establishment.

D. Alternative Financial Services.

1. No alternative financial services establishment shall be located less than one thousand three hundred twenty linear feet from the property line of another

property upon which another alternative financial services establishment is located. No more than one such establishment shall be located upon a single parcel.

2. Alternative financial services establishments in the MUN, MUN-NS, MUN-A, and MUN-A-NS zoning districts shall be limited to two thousand five hundred square feet of gross floor area per establishment. (Ord. BL2021-721 § 2, 2021; Ord. BL2019-111 § 1(Exh. A, §§ 21, 22), 2020; Ord. BL2018-1279 § 3, 2018; Ord. BL2016-132 § 5, 2016; Amdt. 1 to Ord. BL2016-117 § 4, 2016; Ord. BL2016-117 § 4, 2016; Ord. BL2015-1153 § 15, 2015; Ord. BL2014-908 § 3, 2014; Ord. BL2008-169 § 3, 2008; Ord. 96-555 § 4.2(C), 1997)

17.16.060 Medical uses.

(Refer to zoning district land use table)

A. Medical Office. Medical offices shall be limited to two thousand five hundred square feet of gross floor area per establishment, with no more than two establishments per lot.

B. Veterinarian. The building footprint of veterinary offices and facilities shall be limited to four thousand square feet. The following shall apply:

1. Animal boarding shall occur within completely enclosed structures.

2. Landscape Buffer Yard. Outdoor exercise yards shall be completely fenced and used only between seven a.m. and seven p.m. Where such outdoor activities abut a residential zone district or district permitting residential use, landscape buffer yard Standard B shall apply along common property lines. A six-foot opaque vertical fence may substitute for landscaping; however the buffer yard width of landscape buffer yard Standard B shall still apply along common property lines.

3. Boarding Kennel. Kennels for the boarding of companion animals not undergoing medical treatment are permitted as an ancillary use subject to the following conditions.

a. No more than thirty percent of the gross floor area of the veterinary clinic may be used as a boarding kennel.

b. No outdoor kennels or runs are permitted.

c. No part of any building or structure in which animals are housed shall be closer than fifty feet from any existing residence located on an adjacent parcel.

d. Cages. For a kennel, each animal shall have sufficient space to stand up, lie down and turn around without touching the sides or top of cages. Cages are to be of material and construction that permits cleaning and sanitizing. Cage floors of concrete, unless radiantly heated, shall have a resting board or some type of bedding.

e. Watering of Animals. All animals shall have fresh water available at all times. Water vessels shall be mounted or secured in a manner that prevents tipping and shall be of the removable type.

f. On-Site Waste Collection. All on-site waste shall be housed either within the kennel building or an accessory structure, and all waste shall be disposed of in a sanitary fashion no less frequently than one time per week. The drainage of all liquid by-products from the kennel shall be discharged into a permitted sanitary sewer line or septic tank and shall not be disposed of by way of storm sewers, creeks, streams, or rivers.

g. Building Temperature. Enclosures must be provided which shall allow adequate protection against weather extremes. Floors of buildings, runs, and walls shall be of an impervious material to permit proper cleaning and disinfecting.

h. Security Residence. The building footprint of an accessory security residence, if provided, shall be in addition to the maximum permitted building footprint of the veterinary clinic. All standards of Section 17.16.030(C) shall be met.

C. Outpatient Clinic. Outpatient clinics shall be limited to clinics with no more than six thousand square feet, with use being limited to occupational health, which is to be defined as those clinics that provide outpatient services limited to the treatment of minor work-related injuries, physical examinations and drug and alcohol screenings. (Ord. BL2022-1328 § 2, 2022; Ord. 2001-744 § 1, 2001; Ord. BL2000-480 § 1, 2000; Amdt. 1 with Ord. BL2000-242 § 1 (part), 2000; Ord. 96-555 § 4.2(D), 1997)

17.16.070 Commercial uses.

(Refer to zoning district land use table)

A. After Hours Establishments.

1. Street Standard. At a minimum, after hours establishments shall have driveway access on an arterial street.

2. Setback/Location Restrictions. No after hours establishment shall be located within five hundred feet from the property line of any residential property. Distances shall be measured in a straight line from the closest point of the after hours establishment building to the closest point of the residential property line.

B. Animal Boarding Facility.

1. Setback. No part of any building or structure in which animals are housed shall be closer than two hundred feet, and no kennel run shall be located within one hundred feet, from any existing residence.

2. Building Temperature. Enclosures must be provided which shall allow adequate protection against weather extremes. Floors of buildings, runs and walls shall be of an impervious material to permit proper cleaning and disinfecting.

3. Cages. Each animal boarded at the facility shall have sufficient space to stand up, lie down and turn around without touching the sides or top of cages. Cages are to be of material and construction that permits cleaning and sanitizing. Cage floors of concrete, unless radiantly heated, shall have a resting board or some type of bedding.

4. Runs. Each run must have at least a six-foot high fence completely surrounding it. Fences must be maintained in escape-proof condition. Runs shall provide an adequate exercise area and protection from the weather. All animal quarters and runs are to be kept clean, dry and in a sanitary condition.

5. Watering of Animals. All animals shall have fresh water available at all times. Water vessels shall be mounted or secured in a manner that prevents tipping and shall be of the removable type.

6. On-Site Waste Collection. All on-site waste shall be housed either within the kennel building or an accessory structure, and all waste shall be disposed of in a sanitary fashion no less frequently than one time per week. The drainage of all liquid by-products shall be discharged into a permitted sanitary sewer line or septic tank and shall not be disposed of by way of storm sewers, creeks, streams or rivers.

C. Automated Teller Machine (ATM). Where a drive-up ATM kiosk abuts a residential zone district or district permitting residential use, a minimum setback of twenty feet shall be provided and landscape buffer yard Standard B shall be applied within the setback.

D. Automobile Convenience.

1. Minimum Street Frontage. Each parcel shall have a minimum street frontage of one hundred feet on each abutting street.

2. Gasoline Pumps. Gasoline pumps shall be at least twenty feet from any property line and a minimum of twenty feet from any public right-of-way.

3. Automatic Car Wash.

a. One automatic car wash, capable of washing only one car at a time, shall be located fifty feet away from any residential zone district or district permitting residential use.

b. All washing facilities shall be located within a building which is enclosed except those openings necessary for vehicular and pedestrian access. Such openings shall not face any adjacent residentially zoned property.

c. If located within one hundred feet of a residential zone district or district permitting residential uses, operation of the establishment shall be prohibited prior to eight a.m. or after ten p.m. on any day of the week.

4. Mini-Marts. Mini-marts may be permitted on the site of a service station, including restaurants co-located within the same building. A mini-mart in the IWD, IR or IG shall be limited to two thousand five hundred square feet of gross floor area, maximum. Parking shall be provided for each separate use pursuant to Chapter 17.20, Article II.

5. Equipment Rental. Rental of equipment such as trailers and trucks shall be permitted subject to the following restrictions:

a. The rental equipment does not occupy or interfere with the required parking for the gas station, mini-market (and/or restaurants);

b. The rental of the equipment is clearly incidental and secondary to the main activity on the site; and,

c. The storage of any rental equipment shall be located fifty feet away from any residential zoning district boundary or the property line of any property containing a residential use, and shall not be located abutting a public right-of-way.

6. Outdoor Loudspeakers. There shall be no outdoor loudspeakers or public address systems.

7. Refuse Storage and Disposal. Trash areas shall be provided and screened on at least three sides from public view by an opaque impact-resistant fence of sufficient height to screen the dumpster(s).

8. Vehicle Sales or Storage. No vehicle may be stored or parked on the premises for the purpose of offering it for sale.

E. Automobile Repair.

1. There shall be a physical separation of any automobile display area or any parking area from the public right-of-way. The separation shall be provided by one of the following options:

a. A solid wall that is no less than 24 inches in height and no more than 36 inches in height. The wall shall be constructed of concrete, stone, split-faced masonry or similar materials; or

b. A fence that is no less than 24 inches in height and no more than 36 inches in height that includes solid masonry pillars with wrought iron or similar materials between pillars.

2. Driveways shall be consolidated if required by the metro traffic engineer.

3. Chain link fence, barbed wire, razor wire or similar fencing is prohibited within 25 feet of a public right-of-way.

4. Fencing or walls within 25 feet of a public right-of-way shall not be more than 36 inches in height.

5. Service doors facing any district that permits residential uses or a legally occupied residential structure shall be screened by a solid wall or opaque fence with a minimum height of six feet and no more than ten feet, in addition to any required landscape buffer yard.

6. All buildings, structures, inoperable vehicles, outdoor storage and automobile repair uses shall be located a minimum of 25 feet from any district boundary that permits residential uses or a legally occupied residential structure, and all buildings, structures, inoperable vehicles, outdoor storage and automobile repair uses shall be screened from any district boundary that permits residential uses or a legally occupied residential structure by a solid wall or opaque fence with a minimum height of six feet and no more than ten feet, in addition to any required landscape buffer yard.

7. Inoperable vehicles, outdoor storage and automobile repair activities shall be located to the rear or side yard and shall not be visible from any public right-of-way.

8. Billboards and/or digital signs are not permitted. On-premises ground signs shall be limited as follows:

Lot Frontage in Feet	Max Number of Signs	Max Sign Area	Max Height
Less than 100	1	64 sq. ft.	20 ft.
100—299	1	100 sq. ft.	20 ft.
>300	2 (with minimum 100' separation)	100 sq. ft.	20 ft.

9. No automobile repair establishment shall be located less than one thousand three hundred twenty linear feet from the property line of another property upon which another automobile repair establishment, automobile sales, used establishment, or automobile services establishment is located.

10. Automobile repair uses shall not be located within the floodplain or floodway, as designated on the current Flood Insurance Rate Map (FIRM) or any water quality buffer, as defined in the Stormwater Management Manual.

F. Automobile Sales, Used.

1. There shall be a physical separation of any automobile display area or any parking area from the public right-of-way. The separation shall be provided by one of the following options:

a. A solid wall that is no less than 24 inches in height and no more than 36 inches in height. The wall shall be constructed of concrete, stone, split-faced masonry or similar materials; or

b. A fence that is no less than 24 inches in height and no more than 36 inches in height that includes solid masonry pillars with wrought iron or similar materials between pillars.

2. Driveways shall be consolidated if required by the metro traffic engineer.

3. Chain link fence, barbed wire, razor wire or similar fencing is prohibited within 25 feet of a public right-of-way.

4. Fencing or walls within 25 feet of a public right-of-way shall not be more than 36 inches in height.

5. Service doors facing any district that permits residential uses or a legally occupied residential structure shall be screened by a solid wall or opaque fence with a minimum height of six feet and no more than ten feet, in addition to any required landscape buffer yard.

6. All buildings, structures, inoperable vehicles, outdoor storage and automobile repair uses shall be located a minimum of 25 feet from any district boundary that permits residential uses or a legally occupied residential structure, and all buildings, structures, inoperable vehicles, outdoor storage and automobile repair uses shall be screened from any district boundary that permits residential uses or a legally occupied residential structure by a solid wall or opaque fence with a minimum height of six feet and no more than ten feet, in addition to any required landscape buffer yard.

7. Inoperable vehicles, outdoor storage and automobile repair activities shall be located to the rear or side yard and shall not be visible from any public right-of-way.

8. Billboards and/or digital signs are not permitted. On-premises ground signs shall be limited as follows:

Lot Frontage in Feet	Max Number of Signs	Max Sign Area	Max Height
Less than 100	1	64 sq. ft.	20 ft.
100—299	1	100 sq. ft.	20 ft.
>300	2 (with minimum 100' separation)	100 sq. ft.	20 ft.

9. No automobile sales, used establishment shall be located less than one thousand three hundred twenty linear feet from the property line of another property upon which another automobile repair establishment, automobile sales, used establishment, or automobile services establishment is located.

10. Automobile sales, used uses shall not be located within the floodplain or floodway, as designated on the current Flood Insurance Rate Map (FIRM) or any water quality buffer, as defined in the Stormwater Management Manual.

G. Bar or Nightclub. Establishments shall be limited to two thousand five hundred square feet of gross floor area per establishment, with no more than one establishment per lot.

H. Bed and Breakfast Inn. The bed and breakfast inn shall be limited to no more than ten guest rooms.

I. Beer and Cigarette Market.

1. Location.

a. No beer and cigarette market use shall be located on a parcel less than one thousand three hundred twenty linear feet from the parcel line of another parcel upon which another beer and cigarette market use is located. No more than one such establishment shall be located upon a single parcel. This subsection shall not apply to beer and cigarette market uses located within the CF, CF-NS, or DTC zoning districts.

b. Within the CF, CF-NS, and DTC zoning districts, no beer and cigarette markets shall be located on a parcel less than five hundred feet from the parcel line of another parcel upon which another beer and cigarette market use is located. No more than one such establishment shall be located upon a single parcel.

c. No beer and cigarette market use shall be located on a parcel that is less than one hundred feet from a parcel upon which a religious institution, school or its playground, a park, or a licensed day care home or center or its playground is located. This subsection shall not apply to beer and cigarette market uses located within the CF, CF-NS, or DTC zoning districts.

d. Beer and cigarette market establishments selling alcoholic beverages with an alcoholic content of eight percent alcohol by weight or less shall also meet the regulations of Section 7.08.090 of the Metropolitan Code. Where the regulations of this subsection conflict with the regulations of Section 7.08.090, the more restrictive regulations shall prevail.

2. Signage. Window signage, including signs placed within, affixed to, in contact with, or located within three feet of a window or other opening and intended to be seen from the exterior, shall be limited to covering no more than twenty-five percent of the aggregate window space of each street facing facade. Such signage shall be subject to all regulations and restrictions contained within Chapter 17.32 of the Metropolitan Code of Laws.

3. Lighting. Lighting placed around the perimeter of a window, door, or other opening, either internal or external to the structure, that creates illumination that is plainly visible from the exterior of the structure shall be prohibited.

J. Boat Storage.

1. In the CL and CL-NS zoning districts, screening in the form of a Landscape Buffer Yard Standard B shall be applied along all residential zone districts and districts permitting residential uses. A twenty-five foot vegetation buffer shall be provided between any storage building and the closest residential property line. The maintenance standards set forth in Section 17.24.080 shall be applicable to all required landscaping.

2. In the CL and CL-NS zoning districts, no building on the property may exceed eighteen feet in height.

3. In the CL and CL-NS zoning districts, a boat storage use must be located within two miles of a public boat launching ramp. Such boat launching ramp shall provide access to a lake maintained by the U.S. Army Corps of Engineers. The parcel of land upon which the boat storage facility is located must be within a planned unit development (PUD) overlay district explicitly allowing boat storage as a permitted use.

4. In the CS and CS-NS zoning districts, a boat storage use is not permitted within the Urban Zoning Overlay (UZO).

5. In the CS and CS-NS zoning districts, a boat storage use must be located on a lot that does not exceed four acres in size.

6. In the CS and CS-NS zoning districts, no more than one hundred boat slips shall be permitted.

K. Car Wash.

1. There shall be a physical separation of any automobile display area or any parking area from the public right-of-way. The separation shall be provided by one of the following options:

a. A solid wall that is no less than 24 inches in height and no more than 36 inches in height. The wall shall be constructed of concrete, stone, split-faced masonry or similar materials; or

b. A fence that is no less than 24 inches in height and no more than 36 inches in height that includes solid masonry pillars with wrought iron or similar materials between pillars.

2. Whether automatic, free, self-service or by hand, the car wash structure (including wash bays) and any outdoor vacuuming machines or areas, shall be located a minimum of fifty feet from any residential zoned district or district permitting residential uses.

3. All washing facilities shall be located within a structure which is enclosed except those openings necessary for vehicular and pedestrian access. Such openings shall not face any adjacent residentially zoned property.

4. Car washing facilities shall be separated from adjacent property other than street frontage by a masonry wall of not less than six nor more than eight feet height. If adjacent property is commercially developed and a solid wall already exists on the property line, the zoning administrator may modify or waive this requirement as necessary to achieve the purpose of this section.

5. For facilities without defined stalls, a stall shall be calculated based on one stall being the equivalent to each twenty linear feet of washing area lane.

6. If located within 100 feet if a residential zone district or district permitting residential uses, operation of the establishment shall be prohibited prior to eight a.m. or after ten p.m. on any day of the week.

7. There shall be no outdoor loudspeakers or public address systems.

8. No vehicles may be stored or parked on the premises for the purpose of offering for sale.

9. Billboards and/or digital signs are not permitted. On-premises ground signs shall be limited as follows:

Lot Frontage in Feet	Max Number of Signs	Max Sign Area	Max Height
Less than 100	1	64 sq. ft.	20 ft.
100—299	1	100 sq. ft.	20 ft.
>300	2 (with minimum 100' separation)	100 sq. ft.	20 ft.

L. Custom Assembly.

1. In the MUN, MUN-NS, CN, CN-NS, CN-A, CN-A-NS, CA, CA-NS, SCN, SCN-NS zone districts, these activities shall be limited to two thousand five hundred square feet of gross floor area, and conducted only in completely enclosed buildings. No outdoor storage of materials or finished products shall be permitted.

2. In the MUL, MUL-NS, CL, CL-NS, CL-A, and CL-A-NS zone districts, custom assembly shall be limited to five thousand square feet of gross floor area per establishment.

3. In all zone districts, structures used for custom assembly activities shall not have any openings facing any residential zone district other than those required for emergency egress.

M. Donation Center, Drop-off.

1. Hours of operation. The donation center shall generally operate during the hours of nine a.m. to six p.m., seven days a week. Notwithstanding the foregoing provision to the contrary, the hours of operation may be adjusted to assure a high level of donor service and to maintain the premises in a clean and orderly manner.

2. No retail sales shall be conducted at the center.

3. No sorting or distribution of collected materials may occur on-site.

4. No hazardous materials, autos or auto parts, bathroom or kitchen fixtures, guns, large appliances, mattresses and box springs, carpeting, construction materials, or office equipment shall be accepted for donation.

5. All collected materials shall be picked up from the center at least once a week.

6. Illegally dumped items shall be picked up nightly, seven days a week, or as required to maintain a neat and orderly appearance.

7. Street Standard. At a minimum, donation centers shall have driveway access on an arterial street.

N. Electric Vehicle Charging Facility.

1. Screening. Where electric vehicle charging facilities are located on a lot adjacent to a residential zoning district, there shall be screening in the form of a standard D-5 landscape buffer yard, as described in Figure 17.24.240D, applied along common property lines. If located within 100 feet of a residential zoning district, there shall be screening with an opaque fence or wall a minimum of six feet in height.

2. Lighting. Exterior lighting shall comply with the standards set forth in Section 17.28.100. In addition, if located within 100 feet of a residential zoning district, exterior lighting shall be directed away from adjacent properties.

O. Home Improvement Sales. Each establishment shall be limited to five thousand square feet of gross floor area. In the MUN, MUN-NS, SCN, and SCN-NS zone districts, each establishment shall be limited to ten thousand square feet of gross floor area, maximum.

P. Nano Brewery.

1. No outdoor storage shall be permitted.

2. All beer production activities shall be within completely enclosed structures.

3. Loading Docks: Loading docks shall not be oriented toward the street. Where the site abuts an R and R-A, RS and RS-A, RM, RM-NS, MUN, MUN-NS, MUN-A, MUN-A-NS, OR, or OR-NS zoning district, the building wall facing such lot shall not have any loading docks oriented towards these districts. Where these districts abut all sides, the loading dock shall be screened by a solid wall or opaque fence with a minimum height of six feet, in addition to any required landscape buffer yard. Chain link fencing, barbed wire and razor wire is prohibited along such districts permitting residential use.

4. Service Doors: Any service doors facing a public street or a zoning district permitting residential use shall be screened by a solid wall or opaque fence with a minimum height of six feet, in addition to any required landscape buffer yard. Chain link fencing, barbed wire and razor wire is prohibited along such public street or district permitting residential use.

5. Waste/By-Products. All by-products or waste from the production of the beer shall be disposed of off-site.

Q. Mobile Storage Unit.

1. Within any calendar year, a lot of record shall have a maximum of one storage event for all units located on that lot. An event is defined as a storage period totaling no more than ninety days for all units. The storage period begins the day the first unit is located on the site and terminates ninety days thereafter regardless of how recently additional units may have been added to the existing storage area. If all units are removed prior to the ninety-day period on a lot, the storage period shall have been deemed to have occurred for that calendar year.

2. All units shall be maintained in a good state of repair and appearance.

3. All units shall be located at the rear or side of a building where excess parking exists.

4. No unit shall be located in or prevent the use of a required parking space or drive aisle.

5. No unit shall be stacked on top of another unit.

6. No signage or advertising may be placed on the unit except the name and phone number of the rental or leasing company from whom the unit is being leased or rented.

R. Pawnshop.

1. In the MUN, MUN-NS, ORI, ORI-NS, CN, CN-NS, CN-A, and CN-A-NS zone districts, each establishment shall be limited to five thousand square feet of gross floor area, maximum.

2. In the IWD, IR and IG zone districts, each establishment shall be limited to two thousand five hundred square feet of gross floor area, maximum.

3. No pawnshop establishment shall be located less than one thousand three hundred twenty linear feet from the property line of another property upon which another pawnshop establishment is located.

S. Mobile Vendor. This use shall be allowed according to the following standards:

1. This use shall be allowed only within a permanent, enclosed structure.

2. No tables, crates, cartons, racks or other devices shall be used outdoors to increase the selling or display capacity of the mobile vendor outside the permanently, enclosed structure.

T. Restaurant, Fast-Food/Restaurant, Full-Service/Restaurant, Take-Out.

1. Each establishment shall be limited to five thousand square feet of gross floor area, maximum.

2. In the MUN and MUN-NS districts, a restaurant, take-out, must be located within a permanent, enclosed structure.

U. Retail.

1. In the MUN, MUN-NS, ORI, ORI-NS, CN, CN-NS, CN-A, and CN-A-NS zone districts, each establishment shall be limited to five thousand square feet of gross floor area, maximum.

2. In the MUL, MUL-NS, SCN, and SCN-NS districts, each grocery store shall be limited to fifty thousand square feet, maximum. All other retail uses shall be no larger than twenty thousand square feet.

3. In the SCC and SCC-NS districts, each grocery store shall be limited to one hundred thousand square feet, maximum. All other retail uses shall be no larger than forty thousand square feet.

4. In the IWD, IR and IG zone districts, each establishment shall be limited to two thousand five hundred square feet of gross floor area, maximum, unless the retail is accessory to a Manufacturing, Artisan use and a portion of the products are created or assembled on site.

V. Self-Service Storage.

1. Each storage unit shall be fully enclosed by walls and roof and shall not exceed six hundred square feet in area.

2. Outdoor storage shall not be permitted, except for the parking of recreational vehicles, boats and trailers.

3. Storage units shall not be used for the manufacture, processing or assembly of goods, the sale of goods or personal services on the premises, or customer pickup. Active use or activities such as the practice of musical instruments shall not be permitted within individual storage units or anywhere else on site.

4. Storage units shall not have service door openings within thirty-five feet of a residential zone district.

5. Service doors facing a public street or a residential zone district shall be screened by a solid wall or opaque fence with a minimum height of six feet, in addition to any required landscape buffer yard. Chain link fencing, barbed wire and razor wire is prohibited along such public street or residential zone district.

W. Short Term Rental Property Not Owner-Occupied. STRP not owner-occupied is permitted with conditions (PC) in MUN and MUN-A, MUL and MUL-A, MUG and MUG-A, MUI and MUI-A, OG, OR20 through OR40-A, ORI and ORI-A, CN and CN-A, CL and CL-A, CS and CS-A, CA, CF, DTC North, DTC South, DTC-West, DTC Central, SCN, SCC and SCR.

1. All STRP not owner-occupied activity must be permitted in accordance with Metropolitan Code § 6.28.030.

2. Single-family and one and two-family zoning districts, all property improvements shall comply with the Chapter 17.12 (District Bulk Regulations) for single-family or two-family uses, depending on the number of units on the property.

X. Vehicular Rental/Leasing. This use shall be allowed as provided in the DTC zoning district. In the CF, CF-NS, SCR, and SCR-NS districts the use shall be limited to renting and/or leasing passenger automobiles, sport utility vehicles, pick-up-trucks (¾ ton or less), and small cargo work vans and passenger vans (gross vehicle weight rating of not more than ten thousand pounds), including incidental parking and servicing of these vehicles for rental or lease. No motorcycle, recreational vehicles, boats, recreational equipment, moving vans or moving trucks shall be rented or leased from the property. In addition, no "Automobile Repair" or "Scrap Operation" activities may occur on-site and no inoperable vehicles shall be stored on the property.

Y. Vehicular Sales and Service, Limited

1. There shall be a physical separation of any automobile display area or any parking area from the public right-of-way. The separation shall be provided by one of the following options:

a. A solid wall that is no less than 24 inches in height and no more than 36 inches in height. The wall shall be constructed of concrete, stone, split-faced masonry or similar materials; or

b. A fence that is no less than 24 inches in height and no more than 36 inches in height that includes solid masonry pillars with wrought iron or similar materials between pillars.

2. Driveways shall be consolidated if required by the metro traffic engineer.

3. Chain link fence, barbed wire, razor wire or similar fencing is prohibited within 25 feet of a public right-of-way.

4. Fencing or walls within 25 feet of a public right-of-way shall not be more than 36 inches in height.

5. Service doors facing any district that permits residential uses or a legally occupied residential structure shall be screened by a solid wall or opaque fence with a minimum height of six feet and no more than ten feet, in addition to any required landscape buffer yard.

6. All buildings, structures, inoperable vehicles, outdoor storage and automobile repair uses shall be located a minimum of 25 feet from any district boundary that permits residential uses or a legally occupied residential structure, and all buildings, structures, inoperable vehicles, outdoor storage and automobile repair uses shall be screened from any district boundary that permits residential uses or a legally occupied residential structure by a solid wall or opaque fence with a minimum height of six feet and no more than ten feet, in addition to any required landscape buffer yard.

7. Inoperable vehicles, outdoor storage and automobile repair activities shall be located to the rear or side yard and shall not be visible from any public right-of-way.

8. Billboards and/or digital signs are not permitted. On-premises ground signs shall be limited as follows:

Lot Frontage in Feet	Max Number of Signs	Max Sign Area	Max Height
Less than 100	1	64 sq. ft.	20 ft.
100—299	1	100 sq. ft.	20 ft.
>300	2 (with minimum 100' separation)	100 sq. ft.	20 ft.

(Ord. BL2025-958 § 3, 2025; Amdt. 1 to Ord. BL2025-908 § 2, 2025; Ord. BL2025-908 § 2, 2025; Ord. BL2020-187 §§ 1, 2, 2020; Amdt. to Ord. BL2019-78 § 1, 2020; Ord. BL2019-78 § 1, 2020; Ord. BL2019-111 § 1(Exh. A, § 23), 2020; Ord. BL2019-6 § 1, 2019; Ord. BL2019-1633 §§ 2—5, 2019; Ord. BL2018-1457 §§ 2, 3, 2019; Ord. BL2018-1183 §§ 1, 2, 2018; Amdts. 4—6, 8 to Ord. BL2017-608 § 7, 2018; Ord. BL2017-608 § 7, 2018; Ord. BL2016-267 § 3, 2016; Ord. BL2015-1153 §§ 15, 16, 2015; Ord. BL2015-1121 § 5, 2015; Ord. BL2015-1038 § 1, 2015; Ord. BL2014-908 § 4, 2014; Ord. BL2013-418 §§ 8—12, 2013; Ord. BL2012-312 § 2, 2012; Ord. BL2012-249 § 3, 2012; Amdt. 1 to Ord. BL2012-158 § 3, 2012; Ord. BL2012-158 § 3, 2012; Ord. BL2009-586 § 1(Exh. A, § 31), 2010; Amdts. 1, 2, to Ord. BL2008-299 § 3, 2008; Ord. BL2008-299 § 3, 2008; Ord. BL2008-169 § 3, 2008; Ord. BL2008-167 § 3, 2008; Amdt. 1 to Ord. BL2008-150 § 2, 2008; Ord. BL2008-150 § 2, 2008; Amdt. 1 to Ord. BL2006-1283 § 4, 2007; Ord. BL2006-1283 § 4, 2007; Amdt. to Ord. BL2006-973, 2006; Ord. BL2006-973 § 3, 2006; Ord. BL2006-972 § 3, 2006; Ord. BL2003-92 § 2, 2004; Ord. BL2001-674 § 1 (part), 2001; Ord. BL99-117 § 1 (part), 2000; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.2(E), 1997)

17.16.080 Communication uses.

(Refer to zoning district land use table)

A. Printing and Publishing. Each establishment shall be limited to five thousand square feet of gross floor area, maximum.

B. Communications Hut.

1. Maximum Building Size. The gross floor area shall be limited to a maximum of five hundred square feet.

2. Height. Height shall be limited to one story.

3. Required Setbacks. A minimum setback of thirty feet from residentially zoned property or public rights-of-way is required and is measured from the building to the property line.

4. Lighting. All light and glare shall be directed on-site to ensure surrounding properties are not adversely impacted by increases in direct or indirect lighting levels.

5. Landscaping.

a. Perimeter Landscaping. Perimeter landscaping is required around the outside of the fenced area, or for sites without fencing around the communications hut, when the communication hut is visible from residentially zoned property, public rights-of-way or on metro property used by the public, such as parks, greenways, schools and housing developments.

b. Landscape Materials. One tree shall be preserved or planted for each one hundred feet perimeter landscaping. Trees planted to meet this requirement shall measure a minimum of two inches in caliper, and six feet in height, as applicable for the type of material specified. The remaining area within the perimeter landscape strip shall be planted with one continuous row of evergreen shrubs which shall be expected to mature at a height not greater than two and one-half feet. The remainder of the area within all perimeter strips not occupied by trees or shrubs shall be covered by organic or mineral mulches, other shrubs, groundcover plants or grassed lawns.

c. Maintenance. Landscaping shall be maintained as outlined in Section 17.24.080.

6. Integration into Site. The communications hut may be integrated into a larger site design with walls or other enclosures with the approval of the department of the Metropolitan Government of Nashville Davidson County that owns the property. In cases of approved site design integration, landscaping and setback requirements may be waived by the zoning administrator.

C. Telecommunications Facility.

1. Application requirements. An applicant for a telecommunications facility, including co-locating on an eligible support structure or adding transmission equipment to an alternative structure shall provide the codes department and the historic zoning commission, for applications within Historic Overlays and/or public rights-of-way abutting a Historic Overlay, with the following information at the time of application for the final site plan or building permit (for eligible facilities requests, it is not necessary to meet the requirements of d through g, below):

a. A schematic site plan, including schematic landscape plan for any application where landscaping is required, and an elevation view of the type of facility to be placed on the site. The site plan shall depict where the facility is to be located on the site and where additional co-located communication equipment, shelters or vaults will be or can be placed.

b. If the application is not for collocation, a statement justifying why collocation is not possible. Such statement shall include:

(i) Such structure and technical information and other justifications as are necessary to document the reasons why collocation is not possible; and

(ii) The applicant shall provide a list of all eligible support structures and alternative structures considered as alternatives to the proposed location. The applicant shall provide a written explanation why the alternatives considered were impossible due to technical or physical alternatives.

c. Identification of any radio frequencies that would be utilized on the telecommunications facility. If any frequency is later changed, notice of the new frequency shall be provided to the Information Technology Services (ITS) Department.

d. The applicant shall demonstrate that through location, construction, or stealthing, the proposed facility or network of facilities will have minimum visual impact upon the appearance of adjacent properties and the views and vistas from adjacent residential neighborhoods and pedestrian environment, while retaining viable opportunities for future collocation, provided applications for designs consistent with the design guidelines provided for in subsection 5.f of this section shall be deemed to have met the requirement of this subsection.

e. Documentation of the number of other users that can be accommodated within the design parameters of the telecommunications facility as proposed.

f. A statement indicating the owner's commitment to allow feasible shared use of the facility within its design capacity for collocation.

g. The proposed site plan and design plans meet or exceed all applicable standards, including without limitation those of the Federal Communications Commission (FCC), American National Standards Institute (ANSI), and Institute of Electrical and Electronics Engineers (IEEE) standards for power density levels and structural integrity, American Concrete Institute (ACI), American Standards Testing and Materials Institute (ASTM), the National Electrical Code, and the American Steel Institute. The telecommunications facility must comply with build-

ing codes and other federal, state, and local regulations, Applicant must also comply with Section 106 of the National Historic Preservation Act of 1966.

2. Collocation Requirements. Collocation or location on existing alternative structures is required where possible. Applicants for a new Telecommunications Facility must explore all collocation opportunities and opportunities to locate their antenna on existing alternative structures. Applicant shall utilize eligible support structures first and then alternative structures.

3. Removal of Abandoned Telecommunication Facilities: Any telecommunication facility that is replaced with a new or updated telecommunication facility, including conduit, wire or cable, or any telecommunication facility permitted under this chapter that is not operated as a personal communication system carrier application for a continuous period of twelve months shall be considered abandoned and the owner of such telecommunication facility shall notify the Codes Department of the abandonment and remove same within ninety days. Failure to do so shall be deemed to be a violation of these regulations. The owner of the antenna or tower may appeal the decision of the department of codes administration to the board of zoning appeals, but at such hearing shall be required to show just cause why the antenna or tower should not be considered abandoned and subject to removal.

4. Telecommunication facilities outside of the public right-of-way.

a. Landscape Requirements: Along all residential zone districts and districts permitting residential use, screening in the form of Landscape Buffer Yard Standard A shall be applied.

(i) The following plants are prohibited from being used in any district, to buffer a telecommunications facility, including a new microwave or cellular tower due to problems with hardiness, maintenance, or nuisance: Kudzu Vine, Purple Loosestrife, Japanese Honeysuckle, Shrub Honeysuckle, Autumn Olive, Common Privet, Tree of Heaven, Lespedeza, Garlic Mustard, Paulownia, Multiflora Rose, Siberian Elm, Silver Poplar, Mimosa, Mulberry and Silver Maple.

(ii) The maintenance standards set forth in Section 17.24.080 shall be applicable to all required landscaping.

b. New support structures or substantial changes to eligible support structures 150' and greater, shall be designed to accommodate a minimum of three PWSF providers. This number shall be inclusive of any emergency management communication systems.

c. A permit for a COW is limited to thirty days, but when circumstances reasonably warrant, the permit may be renewed.

d. Additional provisions for substantial changes to eligible support structures or placement of new telecommunications equipment on alternative structures.

(i) New telecommunications equipment placements on alternative structures, shall be designed with screening and other stealth elements so as to minimize the visual impact from a pedestrian viewpoint within any abutting public right-of-way, excluding alleys, even after any eligible facilities request. Once said alternative structure is approved and becomes an eligible support structure, any subsequent modifications must meet established design guidelines. The maximum height of a tower shall be determined by the height standards of Chapter 17.12.

(ii) Communication equipment or any new structure that is integrated as an architectural feature of a structure so that the purpose of the facility for providing wireless services is not readily apparent to a casual observer or which is concealed within a building or structure so that it is architecturally indiscernible may be permitted in all zoning districts subject to building permit procedures and standards. Architecturally indiscernible shall mean that the addition or feature containing the antenna is architecturally harmonious in such aspects including but not limited to material, height, bulk, scale and design with the building or structure to which it is to be a part.

e. Additional provisions for towers.

(i) Setbacks. A tower shall be set back from all property lines on which the tower is located by the distance equal to the height of the lowest engineered break point on the proposed structure or the height of the tower.

(ii) Lights. No lights shall be permitted on a tower except such lighting that is required by state or federal law.

(iii) Height. The maximum height of a tower shall be determined by the standards of Chapter 17.12. Guy wire anchors, if used, shall be set back a minimum of five feet from all property lines.

(iv) Final Site Plans: Final site plans for a tower shall be accompanied by a certification from a qualified structural engineer that the tower has sufficient structural integrity and equipment space to accommodate multiple users shall be required at the time of applying for a building permit.

(v) Notification. Prior to the issuance of a zoning permit, and immediately after receiving an application for a new tower, the zoning administrator shall notify the district councilmember that an application for a new tower has been submitted. Such notification shall only be required when a tower is proposed within a residential district, a district permitting residential uses (excluding the MUI, MUI-NS, MUI-A, MUI-A-NS, ORI, ORI-NS,

ORI-A, ORI-A-NS, CF, CF-NS, DTC, SCR, and SCR-NS districts), or within one thousand feet of the zoning boundary line of a residential district or a district permitting residential uses. Such notification shall also be required when a telecommunications facility is within a Historic Overlay District or right-of-way abutting a Historic Overlay District. Within thirty days from the date on which the tower application was filed, the district councilmember may hold a community meeting on the proposed tower. If a meeting is held, the applicant shall attend and provide information about the tower's safety, technical necessity, visual aspects, and alternative tower sites and designs considered.

(vi) When an application to construct a new tower is received, the department of codes administration shall consult with the district councilmember, and the councilmember may request that the applicant accommodate tornado sirens and their associated equipment to further the public interest, as well as equipment needed for First Net. The councilmember's request shall be submitted in writing to the applicant within fifteen business days from the date the application was submitted to the Department of Codes Administration, and the request shall be accompanied by a written statement from the mayor's office of emergency management that a siren is needed in the area where the tower is to be located and that the proposed tower site is suitable for a siren. The applicant shall make good faith efforts to comply with this request, provided that if such use materially increases the cost of the tower, requires utilization of land otherwise reserved for additional wireless carriers on the tower, or would otherwise delay the permitting of the proposed tower, the applicant shall not be required to consider such request. Because tornado sirens require additional tower space and have varying design qualities, applicants will be allowed a fifty percent increase in height over the otherwise applicable height limitation and will not be required to utilize camouflaged designs, but shall comply with all applicable landscaping standards set forth in this section. This subsection applies to tornado sirens only and is not applicable for other public safety tower uses.

5. Telecommunication facilities within public rights-of-way.

a. Support structures and above-ground transmission equipment are prohibited within the pedestrian travelway, but may be located within a grass strip/green zone or frontage zone. For substantial changes to eligible support structures or for new telecommunications use of an alternative structure, the eligible support structure or alternative structure shall be relocated outside of the pedestrian travelway and all above-ground utilities consolidated with the permit application. For eligible support structures that already have wireless telecommunications facilities on them, the structure need not be relocated unless it exceeds the zoning height limitation set in subsection 17.16.080.C.5.d., unless such structure is owned by the metropolitan government.

b. No new telecommunication facility support structure may be erected in the public right-of-way within 500' of an existing telecommunication support structure. The term "new telecommunications facility support structure" as used in this subsection shall not include a relocation and/or replacement of a pole pursuant to Section 17.16.080.C.5.a.

c. New telecommunication facilities or relocated telecommunication facilities pursuant to subsection 17.16.080.C.5.a. shall place all transmission equipment, excluding antennas and remote radio units, underground to the extent possible consistent with departmental regulations. To the extent transmission equipment cannot be placed underground, business justification, excluding cost, for this must be provided.

d. New telecommunication facility support structures may not be erected to a height greater than the height surrounding utility poles or street lights, whichever is greater. If no utility poles are present, the total height shall be built to a maximum height of 35', including antennas, lightning rods or other extensions. All new proposed structures, or a stealth telecommunications support structure replacing an existing support structure or alternative structure, within the ROW shall be designed for a minimum of two PWSF providers.

e. A permit for a COW is limited to five days, but when circumstances reasonably warrant, the permit may be renewed.

f. Telecommunication facilities shall be constructed consistent with the design requirements of the planning Department, and, where applicable, the historic zoning commission. The design guidelines will provide greater detail, description and examples of acceptable telecommunications facilities, including visual descriptions. The requirements in this section shall be in addition to those required by Chapter 6.26 of the Metropolitan Code.

6. Recommendations and other actions from departments of the metropolitan government. Prior to the consideration of a variance for or issuance of a permit for a telecommunication facility, the following departments of the metropolitan government shall submit recommendations or approvals to the zoning administrator that describe compliance with all applicable design guidelines or other regulations:

a. Metropolitan Development and Housing Agency (MDHA) shall provide a recommendation within a redevelopment district and/or public rights-of-way abutting a redevelopment district,

b. Metro historic zoning commission shall provide a preservation permit within a historic overlay,

c. Planning commission shall provide a recommendation for property within the downtown code, a planned unit development, urban design overlay, institutional overlay, specific plan, contextual overlay, or neighborhood landmark district,

d. The department of information technology services shall provide a recommendation on all permits, with regard to the issue of interference with metropolitan government facilities. (Ord. BL2019-111 § 1(Exh. A, § 24), 2020; Ord. BL2016-415 § 3, 2016; Ord. BL2014-747 § 3, 2014; Ord. BL2011-898 § 11, 2011; Ord. BL2009-586 § 1(Exh. A, § 32), 2010; Amdt. 1 to Ord. BL2009-462, § 1, 2009; Ord. BL2009-462, § 1, 2009; Ord. BL2003-1304 §§ 1, 2, 3, 4, 2003; Amdt. 1 with Ord. BL99-117 § 1 (part), 2000; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.2(F), 1997)

17.16.090 Industrial uses.

(Refer to zoning district land use table)

A. Artisan Distilleries.

1. The maximum volume of alcohol distilled on site, regardless of ABV is limited to thirty-eight thousand seven hundred fifty gallons per month.

2. The maximum volume of alcohol, regardless of ABV, on site shall not exceed fifty-five thousand gallons.

3. The milling of grain is not permitted on site.

B. Building Contractor Supply.

1. No outdoor storage shall be permitted.

2. Loading Docks. Where the site abuts a residential zone district or district permitting residential use, the building wall facing such lot shall not have any service door openings or loading docks oriented toward the residential zone district.

3. Landscape Buffer Yard. Where such facilities are on a lot adjacent to a residential zone district or district permitting residential use, there shall be screening in the form of landscape buffer yard Standard D applied along common property lines.

4. Maximum Building Size. The gross floor area shall be limited to twenty-five thousand square feet.

C. Distributive Business/Wholesale.

1. No outdoor storage shall be permitted.

2. Loading Docks. Where the site abuts a residential zone district or district permitting residential use, the building wall facing such lot shall not have any service door openings or loading docks oriented toward the residential zone district.

3. Landscape Buffer Yard. Where such facilities are on a lot adjacent to a residential zone district or district permitting residential use, there shall be screening in the form of landscape buffer yard Standard D applied along common property lines.

4. Maximum Building Size. The gross floor area shall be limited to twenty-five thousand square feet.

D. Manufacturing, Artisan.

1. Outdoor Storage. Any activity storing materials outdoors shall construct an opaque fence to screen the ground-level view from any public right-of-way or of any residential use. Materials shall not be piled or staked higher than the opaque fence.

2. Loading Docks. Where the site abuts a residential zone district or a district permitting residential use, the building wall facing such lot shall not have any service door openings or loading docks oriented toward the residential zone district or district permitting residential use.

E. Manufacturing, Light. All light manufacturing activities shall be within completely enclosed structures.

1. No outdoor storage shall be permitted.

2. Loading Docks. Where the site abuts a residential zone district or district permitting residential use, the building wall facing such lot shall not have any service door openings or loading docks oriented toward the residential zone district.

3. Landscape Buffer Yard. Where such facilities are on a lot adjacent to a residential zone district or district permitting residential use, there shall be screening in the form of landscape buffer yard Standard D applied along common property lines.

4. Maximum Building Size. The gross floor area shall be limited to forty thousand square feet.

F. Manufacturing, Medium. Any medium manufacturing activity storing materials outdoors shall construct an opaque fence to screen the ground-level view of any residential use located in a zoning district permitting residential uses. Materials shall not be piled or stacked higher than the opaque fence.

G. Tank Farm.

1. Setback. Where the tank farm abuts a residential zone district or district permitting residential use, a minimum setback of one hundred feet shall be provided.

2. Landscape Buffer Yard. Landscape buffer yard Standard D shall be applied within the above setback.

3. The tank farm shall comply with National Fire Protection Association standards.

4. A tank farm shall be permitted unlimited storage per Table 17.28.102 of this code provided all other conditions of this section and code are satisfied.

H. Warehouse.

1. Outdoor Storage. No outdoor storage shall be permitted.

2. Loading Docks. Where the site abuts a residential zone district or district permitting residential use, the building wall facing such lot shall not have any service door openings or loading docks oriented toward the residential district.

3. Landscape Buffer Yard. Where such facilities are on a lot adjacent to a residential zone district or district permitting residential use, screening in the form of landscape buffer yard Standard D shall be provided along common property lines.

4. Maximum Building Size. The gross floor area shall be limited to twenty-five thousand square feet.

5. Historic Eligibility. Only a nonresidential structure in the MUL, MUL-NS, MUL-A, MUL-A-NS, MUG, MUG-NS, MUG-A, MUG-A-NS, MUI, MUI-NS, MUI-A, and MUI-A-NS districts can be used for a warehouse and distributive business/wholesale use. The historical commission must have determined the structure is worthy of conservation, was constructed more than fifty years ago, and is being preserved with no additions, deletions or alterations which modify the building's square footage or significantly alters the building's exterior appearance (i.e. blocking out windows with brick or other material).

I. Sex Clubs.

1. No sex club shall be located within one thousand feet (measured property line to property line) of a residence, community education facility, day care, park, or religious institution.

2. Sex clubs shall be prohibited from all of the following:

a. Admitting members that are younger than twenty-one years of age;

b. Admitting any new member without the affirmative vote of a majority of the other members;

c. Accepting applications for membership without a current member's written recommendation; and

d. Granting membership within twenty-four hours from the time a membership application is filed. (Ord. BL2019-111 § 1(Exh. A, § 25), 2020; Ord. BL2016-327 § 2, 2016; Ord. BL2015-1121 § 3, 2015; Ord. BL2015-1099 § 3, 2015; Ord. BL2013-418 § 13, 2013; Ord. BL2011-898 § 12, 2011; Amdt. 1 to Ord. BL2010-647; Ord. BL2010-647 § 2, 2010; Ord. BL2006-972 § 3, 2006; Amdt. 1 with Ord. BL99-117 § 1 (part) 2000; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.2(G), 1997)

17.16.100 Utility uses.

(Refer to zoning district land use table)

A. Power/Gas Substation.

1. Setback. All buildings and vehicle loading areas shall be located a minimum of fifty feet from any residential zone district or district permitting residential use.

2. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied.

3. Street Standard. On minor local streets, driveway access shall be permitted only if the minor local street intersects an arterial or collector street within the same block.

B. Reservoir/Water Tank.

1. Setback. Where such facilities abut a residential zone district or district permitting residential use, a minimum setback of fifty feet shall be provided.

2. Landscape Buffer Yard. Landscape buffer yard Standard D shall be applied within the above setback.

C. Wind Energy Facility (small).

1. Applicability. The wind energy facility shall comply with the standards of this title; however, where a facility cannot comply, the applicant shall be required to submit for a special exception permit. The special exception permit request shall be accompanied by a written document that identifies and describes the facility's compliance with the standards. Where compliance is not possible, the document will detail why the standards cannot be met, and what alternative standards are proposed by the applicant.

2. Height. The height of any facility, whether building or tower-mounted, shall not exceed fifteen feet above the maximum building height allowed for the primary use in the subject zoning district as provided in this title.

3. Setback. The facility shall not be sited within (a) a distance equal to the height of the facility from any occupied buildings, or private ways that are not part of the wind energy facility; or (b) one point five times (1.5×) the facility's height from the nearest property line, whichever is greater.

4. Guy Wires. No guy wire anchors shall extend closer than five (5) feet to the property line. All outer and innermost guy wires must be must be marked and clearly visible to a height of six (6) feet above the guy wire anchors.

5. Signs and Advertising. An information sign identifying the facility owner, facility manufacturer, and a 24-hour emergency contact phone number, along with warning sign(s) shall be required on the facility. In addition, an educational sign may be provided about the facility and the benefits of renewable energy. All such signs shall comply with the base zoning district's sign

regulations for a non-residential use as provided in this title. No other advertising signs shall be allowed on or around the facility.

6. Lighting. No lighting of the facility shall be permitted, except warning lights as required by state or federal law.

7. Appearance. All components of the facility shall be in a neutral, non-reflective exterior color designed to blend with the surrounding environment.

8. Noise. The facility shall not generate noise in excess of 60 decibels (dBA) measured at the closest neighboring occupied building, except during short-term events such as utility outages and severe windstorms.

9. Separation Distance. The facility shall be located a minimum of 1,000 feet from any other wind energy facility.

10. Shadow, Blade Glint, and Flicker. The facility shall be sited to minimize shadow, blade glint, and flicker impacts on any property within a minimum distance of 600 feet of the site property line.

11. Utility Notification Plan. No wind energy facility shall be installed until the Nashville Electrical Service approves the applicant's site plan.

12. Emergency Plan. The facility shall have an automatic braking, governing, or feathering system to prevent uncontrolled rotation, overspeeding and excessive pressure on the tower structure, rotor blades and turbine components.

13. Site Plan. No wind energy facility shall be erected, constructed, installed or modified as provided in this section without first undergoing site plan review and obtaining a building permit. All plans and maps shall be prepared, stamped and signed by a professional engineer licensed to practice in Tennessee as a mechanical, structural, or civil engineer. The required site plan shall show, identify, display, dimension, and/or demonstrate the following:

a. All property lines and existing buildings/structures on site and within 600 feet of the site. For buildings/structures, the purpose of each will be labeled on the plan as well as the distance of each from the facility.

b. Location of the proposed tower, foundations, guy anchors, access roads, and associated equipment on the site parcel and within 600 feet of its boundary.

c. Any existing overhead utility lines;

d. Existing areas of tree cover, including average height of trees, on the site parcel and any adjacent parcels within a distance, measured from the wind turbine foundation, of 1.2 times the height of the wind turbine;

e. Location of each existing wind energy facility, regardless of size or operational condition that are within 2,000 feet of the proposed facility.

f. Proposed changes to the landscape of the site, grading, screening, vegetation clearing and planting, any required FAA lights;

g. Tower foundation blueprints or drawings signed by a professional engineer licensed to practice in the State of Tennessee as a mechanical, structural, or civil engineer demonstrating the facility is designed to meet the most stringent wind requirements;

h. A statement by an engineer licensed in the State of Tennessee certifying that the proposed wind turbine will meet the noise standard established by this section. The engineer shall be certified by the Institute of the Noise Control Engineering of the USA (INCE/USA).

i. One or three line electrical diagram detailing wind turbine, associated components, and electrical interconnection methods, with all National Electrical Code compliant disconnects and overcurrent devices;

j. Documentation of the wind energy facility's manufacturer and model, rotor diameter, tower height, tower type (freestanding or guyed), and foundation type/dimensions;

k. Photo visualizations of the facility pre- and post-construction shall be provided by the applicant in color showing how the facility will look, once installed. The visualizations will be from a minimum of three sight lines, including the nearest occupied building with a view of the wind facility, excluding buildings owned by the applicant or property owner.

l. An operation and maintenance plan shall be submitted for the facility. (Amdt. 1 to Ord. BL2009-477 § 3, 2009; Ord. BL2009-477 § 3, 2009; Ord. 96-555 § 4.2(H), 1997)

17.16.105 Transportation uses.

(Refer to zoning district land use table)

A. Airport, Medium or Large Commercial Service.

1. Minimum Area. The combined minimum area of all parcels shall be three thousand acres.

2. Setback. Where transportation facilities, excluding passenger car parking lots, abut a residential zone district or district permitting residential use, there shall be a minimum setback of five hundred feet.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied along common property lines.

4. Street Standard. At a minimum, airport land uses shall have driveway access on nonresidential collector streets. A traffic impact study shall demonstrate that the traffic generated will use only streets that function at, or better than, a level of service (LOS) D.

B. Park and Ride Lot.

1. Location. The park and ride lot shall be associated only with a nonresidential use located within a residential zoning district.

2. Street Standard. At a minimum, the parking lot shall have driveway access on a collector street.

3. Shared Parking Agreement. Pursuant to Section 17.20.010, a shared parking agreement shall be required for all "park and ride lots" in residential zoning districts. The nonresidential use, whose parking lot is proposed as a park and ride lot, must have a peak parking demand that falls outside of the hours of 6:30 a.m. to 6:30 p.m.

4. Lighting. All lots shall be lighted from dusk to dawn, and all light and glare shall be directed on-site.

5. Telephone. One public pay phone shall be provided on-site, in a visible area with lighting.

6. Waste Receptacles. Waste receptacles, at a rate of one receptacle per twenty-five parking spaces, shall be provided in the lot, in a fixed manner, to prevent trash from blowing onto public rights-of-way or into adjacent residential areas, and receptacle contents will be properly disposed of once a week. (Ord. BL2019-32 § 3, 2019; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998)

17.16.110 Waste management uses.

(Refer to zoning district land use table)

A. Construction/Demolition Landfill.

1. Lot Size. The minimum lot area shall be one acre.

2. Street Standard. Driveway access can be from any local street, provided that street is not bounded by any residential zoning district from the driveway access point to the street's intersection with a collector or arterial street or a street designated on the major street plan.

3. Setback. All buildings, structures, storage containers and areas, and vehicle loading/unloading areas shall be located a minimum of one hundred feet from any property line, two hundred fifty feet from any residential zoning district boundary, and five hundred feet from any residential structure, and further, the facility shall not be located less than two thousand feet from the property line of any school or park.

4. Landscape Buffer Yard. Along all adjacent residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied. In addition, the entire facility shall be enclosed by a chain-link-type fence constructed in conformance with Section 16.24.330 of the Metropolitan Code at least eight feet in height. The fence shall be patrolled each day to remove all windblown debris captured by the fence.

5. Recycling Facility. If located on the same lot as the construction/demolition landfill, a recycling facility shall be permitted as an accessory use provided it accepts construction/demolition waste only. The provisions of Section 17.16.110.D. shall not apply to an accessory use.

a. All loading, unloading, compacting, sorting, processing or storage shall take place within a completely enclosed building.

6. Approval of the Metropolitan Council. Approval by the metropolitan council in accordance with Tennessee Code Annotated § 68-211-701, et seq. shall be required.

B. Medical Waste.

1. Lot Size. The minimum site area shall be five acres.

2. Street Standard. Driveway access can be from any local street, provided that street is not bounded by any residential zoning district from the driveway access point to the street's intersection with a collector street or a street designated on the major street plan.

3. Setback. All buildings, structures, storage containers and areas, and vehicle loading/unloading areas shall be located a minimum of one hundred feet from any property line, two hundred fifty feet from any residential zoning district boundary, and five hundred feet from any residential structure, and further, the facility shall not be located less than two thousand feet from the property line of any school or park.

4. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied. In addition, the entire facility shall be enclosed by a chain-link-type fence at least eight feet in height. The fence shall be patrolled each day to remove all windblown debris captured by the fence.

5. All loading, unloading, compacting, sorting, processing or storage shall take place within a completely enclosed building.

C. Construction/Demolition Waste Processing (Project-Specific).

1. Applicability. The provisions of this section shall apply to any land use within Davidson County. No construction/demolition waste processing activity shall take place on any site that fails to comply with the provisions of this subsection.

2. Waste Reduction and Recycling Plan: The applicant shall submit a plan to the director of public works and the director of codes administration for their

joint review and approval describing and detailing how the project site and its construction and demolition waste will be gathered, separated, processed, and transported, including items a. through p. below. Additional information may be required by the reviewing agencies to ensure the property can safely and suitably handle the project's construction and demolition waste.

a. Waste Manager. The plan shall designate and identify a person who will be responsible for all construction demolition waste management, including their name, title, mailing address, e-mail address, fax number, and 24/7 phone number to respond and handle all concerns involving the site's recycling methods, processes, materials, and flow of debris on and off-site;

b. Waste Processing Location. The location where the project contractor shall divert construction and demolition debris for purposes of recycling, salvaging, and disposing of materials recovered from demolition of existing, or construction of new, buildings and structures on the project site.

c. Lot Size. There is no minimum lot size for properties with a nonresidential base zoning district. For those properties with an agricultural or residential base zoning district, the waste processing location shall be at least ten times the base zoning district, or a minimum of one acre, whichever is less.

d. Operation Timeline. The operating timeline for waste processing on the property from the initial start-up date to completion date, including any relevant milestone dates. A property shall have all waste processing equipment, materials, and ancillary items removed from it within ninety days of project completion, as defined in this title.

e. Hours of Operation. The hours of operation for all activities to occur on the property, including a statement of compliance with Chapter 16.44 (Noise Control) of the Metropolitan Code of Laws;

f. Materials and Storage. A completed waste reduction and recycling schedule in a form and content established by the director of public works, but at a minimum, it shall provide the following information for both the project-specific site and any off-site location:

i. The type and estimated quantity of materials, including putrescible waste, to be generated, recovered, reused, salvaged, separated and processed on-site as well as off-site, including those materials that will be sold on the premises or off-site;

ii. The on-site separation and storage method(s) to ensure salvaged materials are not contaminated before being reused on-site, transferred to an off-site location for further salvage or storage, or sold or given away to other entities;

iii. The method and frequency of collection for the materials noted above;

iv. The number of cubic yards to be stored on-site at any one time of processed and unprocessed materials;

v. The on-site storage method for each of the materials noted above;

vi. The on-site storage location for each of the materials noted above;

vii. The recycling facilities and landfills that will receive materials noted above;

viii. The hauling companies that will transport the materials noted above.

g. Sale of Materials. Materials from the site that have been recycled, salvaged, recovered, or excavated may be given away, sold on the premises, or removed for reuse.

h. Trash Dumpsters. The location of all trash dumpsters on the property for waste not to be recovered and/or generated.

i. Public Health and Environment. A description of the on-site storage method and off-site transport methods that will be used to prevent dirt and materials from creating drift or becoming airborne, producing odors, leaking, littering, or generating run-off due to wet conditions due to weather or man-made activities so as not to create a health hazard, public nuisance, or fire hazard. All activities shall comply with all rules and regulations of the Tennessee Department of Conservation and Environment, Metropolitan Government Stormwater Regulations, and all other applicable local, state and federal laws and regulations.

j. Security. A description of how the property will be secured to prevent illegal theft of materials and dumping, including lighting.

k. Signage. A large and prominent sign measuring at least thirty-two square feet in size shall be installed on the project site's primary street frontage. At a minimum, the sign shall identify the project name, contact name, 24/7 contact phone number, project completion date, quantity and type of materials to be recycled and salvaged. If an off-site recycling location shall be used, the same sign shall be installed at that location too. Sign(s) shall be approved by the Metro Planning Department, prior to the issuance of any grading or demolition permits.

l. Inactivity. A property shall be deemed inactive by the director of codes administration, if no activity has occurred on the property during any six consecutive months, regardless of the calendar year in which such inactivity occurred. Once deemed inactive, all waste processing activities shall cease until a new application

for the project specific waste processing has been submitted, reviewed, and approved by the reviewing agencies.

m. Waste Management Summary Report. Six months after the initial approval of the waste reduction and recycling plan, and every six months thereafter, the applicant shall submit to the directors of public works and codes administration a waste management summary report in a form and content established by the director of public works. At a minimum, the report shall provide the following information and documentation verifying the type and actual tonnage of materials generated, recovered, reused, salvaged, separated, discarded, and processed on-site as well as off-site.

n. Notification. Prior to the issuance of a zoning permit, and immediately after receiving an application for a new or relocated construction/demolition waste processing (project-specific) use, the zoning administrator, shall notify the district councilmember that an application for such use has been submitted. Such notification shall only be required when the use is proposed within an agricultural or residential zoning district, or within one thousand feet of an agricultural or residential zoning district boundary line.

o. Noncompliance. The directors of public works and codes administration shall determine if the applicant has complied with the approved waste reduction and recycling plan. If it is determined that the applicant has failed to comply with the applicant's waste reduction and recycling plan, the performance security shall be forfeited.

p. Performance Security. The submittal of a letter of credit or cashier's check as performance security to the director of public works in an amount specified by the director for the removal of waste processing equipment, materials, and ancillary items. All forfeited performance securities shall be used for the purposes of making the property safe for public health and well-being and to promote recycling within Davidson County.

D. Recycling Facility.

1. Lot Size. The minimum lot area shall be one acre.

2. Setback. All buildings, structures, storage containers and areas, and vehicle loading/unloading areas shall be located a minimum of one hundred fifty feet from any zoning district boundary that permits residential uses or a legally occupied residential structure.

3. Landscape Buffer Yard.

a. Along all residential zoning districts permitting residential use, opaque fencing at least eight feet in height shall be constructed in compliance with the terms of Section 17.24.210(G) of the landscape buffer yard requirements. The fencing requirements set forth herein shall supercede the setback requirements for screening walls and fencing contained in Section 17.12.040. Screening in the form of landscape buffer yard Standard D shall be applied outside any required opaque fencing.

b. For facilities not adjacent to a zoning district that permits residential uses, the entire facility shall be enclosed by a chain-link type fence at least eight feet in height. The fence shall be patrolled each day to remove all windblown debris captured by the fence.

4. Street Standard. Driveway access can be from any local street, provided that street is not bounded by any residential zoning district from the driveway access point to the street's intersection with a collector street or a street designated on the major street plan. A traffic impact study shall demonstrate that traffic generated to/from the site will only use streets where the existing level of service (LOS) is "D," and it is forecasted to remain at a LOS D or better with the proposed recycling facility traffic.

5. All compacting, sorting, processing or storage shall take place within a completely enclosed building. The term "completely enclosed building" means a structure with at least four walls and is totally enclosed when all doors are closed. The enclosed area(s) of a recycling facility shall have concrete floors or floors made of some other hard material that is easily cleanable. All loading and unloading shall take place:

a. On a partially enclosed loading dock when the loading dock connects directly to the completely enclosed building in which compacting, sorting, processing or storage takes place; or

b. Within a Completely Enclosed Building. If a recycling facility utilizes a loading dock for loading and unloading, the loading dock shall not be used for storage and shall be cleaned of all materials at the close of each business day. The areas around loading docks and other high-traffic areas shall be paved.

6. Hours of Operation. The hours of operation for any recycling facility located adjacent to a zoning district that permits residential uses shall be limited to 7:00 a.m. to 6:00 p.m.

7. Lighting. For any recycling facility located adjacent to a zoning district that permits residential uses, all light and glare shall be directed on-site to ensure that surrounding properties are not adversely impacted by increases in direct or indirect ambient lighting levels.

E. Sanitary Landfill.

1. Lot Size. The minimum lot area shall be one hundred acres.

2. Setback. All buildings, structures, storage containers and areas, and vehicle loading/unloading areas shall be located a minimum of one hundred feet from any property line, two hundred fifty feet from any residential

zoning district boundary, and five hundred feet from any residential structure, and further the facility shall not be located less than two thousand feet from the property line of any school or park.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied along common property lines.

4. Street Standard. At a minimum, driveway access shall be from a collector street. The collector street shall not be bounded by any residential zoning district from the driveway access point to the street's intersection with an arterial street. A traffic impact study shall demonstrate that traffic generated to/from the site will only use streets where the existing level of service (LOS) is "D," and it is forecasted to remain at a LOS D or better with the proposed landfill traffic.

5. Approval of the Metropolitan Council. Approval by the metropolitan council in accordance with Tennessee Code Annotated § 68-211-701, et seq. shall be required. (Ord. BL2017-799 §§ 3, 4, 2017; Ord. Bl2014-772 § 1, 2014; Ord. BL2010-635 § 3, 2010; Amdt. 1 to BL2010-634; Ord. BL2010-634 § 1, 2010; Ord. BL2004-156 § 1 (part), 2004; Amdt. 1 with Ord. BL2002-1273 §§ 1, 2, 2003; Amdt. 1, 2 with Ord. BL2002-1173 §§ 1, 2, 2002; Amdt. 1 (part) with Ord. BL99-86 § 1, 2000; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.2(I), 1997)

17.16.120 Recreation and entertainment uses.

(Refer to zoning district land use table)

A. Convention Center/Stadium/Arena.

1. Lot Size. The minimum lot area shall be fifteen acres.

2. Setback. Where the structure and related facilities, excluding passenger car parking lot, abut a residential zone district or district permitting residential use, there shall be a minimum setback of two hundred fifty feet.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied along common property lines.

4. Street Standard. At a minimum, primary access shall be from a nonresidential collector street which has primary access to a street designated on the major street plan.

5. Traffic Management Study. A traffic management study shall be required.

B. Driving Range.

1. Street Standard. At a minimum, driveway access shall be from a collector street.

2. Location. The driving range shall be located so that it is one hundred feet away from any residential zoning district boundary or the property line of any property containing a residential use.

3. Lighting. All light and glare shall be directed on-site to ensure surrounding properties are not adversely impacted by increases in direct or indirect ambient lighting levels.

4. Retail/Restaurant. A snack-bar and pro-shop shall be permitted on the same parcel as the principal use provided it is contiguous to the area where people stand to drive golf balls. The combined area of the snack-bar and pro-shop shall not exceed one thousand five hundred square feet. The snack-bar shall not provide any sit-down food service or alcoholic beverages.

5. Fencing. Adequate fencing shall be provided to ensure golf balls do not fly into abutting or adjacent properties and streets.

C. Park.

1. Location. Notwithstanding any other provision of the Metropolitan Code of Laws, no new park, as herein defined, shall henceforth be constructed within two thousand feet of the property line of any landfill or other waste disposal facility.

D. Small Outdoor Music Event.

1. Setback. The stage and sound amplification equipment shall not be oriented toward any residence located within three hundred feet of the property line upon which the small outdoor music event is to be held. Further, sound amplification equipment shall be oriented so that sound is directed away from the closest residential property. For purposes of this subsection, "sound amplification equipment" means small portable sound systems of maximum three hundred watts, microphones, and amplified acoustic musical instruments.

2. Noise. A maximum noise level of seventy-five decibels on the A-weighted scale shall be permitted to occur at the boundary line of the nearest residential property.

3. Limitations on Number of Events and Hours of Operation. No more than one small outdoor music event shall be held on the property in a calendar month, with a maximum of eight events per calendar year. All small outdoor music event activity shall take place only between the hours of 11:00 a.m. and 9:00 p.m. on weekdays, and between 11:00 a.m. and 10:00 p.m. on weekends and shall last a maximum of four hours. The applicant shall provide the zoning administrator with a list of the date(s) and time(s) of the scheduled small outdoor music event(s) prior to obtaining a permit. The permit holder shall annually update the information on file with the zoning administrator regarding the event

date(s) and time(s), and the zoning administrator shall be notified of any change in the date(s) and time(s) of events at least ten days prior to the event.

4. Attendance. Small outdoor music events shall be limited to a maximum of one hundred fifty people if the lot size is less than twenty thousand square feet in size.

5. Parking. Adequate off-street parking shall be provided.

6. Street Standard. At a minimum, primary street access for the event shall be from a nonresidential collector street.

7. Traffic and Parking Management Plan. A traffic and parking management plan shall be submitted at the time the application for the use permit is filed. At a minimum, such traffic and parking management plan shall include the number of vehicles expected, a list of the streets to be used for ingress and egress, and a list of surface parking areas to be used to accommodate the event.

8. Lighting. All light and glare shall be directed on-site to ensure surrounding properties are not adversely impacted by increases in direct or indirect ambient lighting levels.

9. Event Notification. The applicant shall provide written notice of every small outdoor music event to all properties located within six hundred feet of the subject property at least ten business days prior to the date of each event. Such notice can be via first class U.S. mail or hand delivery. An event notification plan shall be submitted by the applicant prior to obtaining a permit identifying the method by which notice regarding the small outdoor music event(s) is to be provided. Such notice shall include the following:

a. The date, location, and hours of the event;

b. The name, email address, and telephone number of the person(s) responsible for the event;

c. The telephone number of the zoning administrator's office for purposes of making complaints regarding the event; and

d. A statement that noise complaints during the event shall be made to the metropolitan police department.

10. Revocation of Permit. The zoning administrator shall have the authority to revoke a small outdoor music event permit upon the violation of any of the terms and conditions of the use permit or of the provisions of this section. Prior to taking action to revoke a small outdoor music event permit, the zoning administrator shall have received a petition documenting the violation(s) signed by owners/occupants representing a majority (fifty percent plus one) of the properties within the event notification area and a copy of the matter of record report from the metropolitan police department, provided that no petition shall be required whenever the zoning administrator determines that there has been a repeat violation of this section or has grounds to believe that a repeat violation has occurred within the past twelve months. Upon revocation, applicants shall not be permitted to apply for another small outdoor music event permit for a period of one year. Revocations may be appealed to the board of zoning appeals pursuant to Section 17.40.180 of the Metropolitan Code.

11. Spacing. Only one small outdoor music event permit shall be issued per street block face. Where a block face is over five hundred feet in length, no small outdoor music event shall be permitted within five hundred feet of another property having a valid permit for small outdoor music events, measured in a direct line along the block face from property line to property line and including any public right-of-way.

12. The conditions set forth herein shall not apply to any event on public property meeting the definition of small outdoor music event, nor shall they apply to such events on property that is not zoned CS, CS-NS, CS-A, CS-A-NS, CF, CF-NS, CA, CA-NS. (Ord. BL2019-111 § 1(Exh. A, § 26), 2020; Ord. BL2015-1153 § 15, 2015; Amdt. 1 to Ord. BL2014-651 § 3, 2014; Ord. BL2014-651 § 3, 2014; Amdt. 1 with Ord. BL2002-1273 § 7, 2003; Amdt. 1 (part) with Ord. 99-1644 § 1 (part), 1999; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.2(J), 1997)

17.16.130 Other uses.

(Refer to zoning district land use table)

A. Cemetery.

1. Lot Size. The minimum site area shall be ten acres. Private family cemeteries and cemeteries accessory to a religious institution shall be on a one-acre lot, minimum.

2. Street Standard. For cemetery developments of twenty-five acres or greater, primary access shall be from a collector or arterial street.

3. Landscape Buffer Yard. Where the perimeter of a cemetery abuts a residential zone district or district permitting residential use, there shall be screening in the form of landscape buffer yard Standard A along common property lines.

4. The following accessory uses shall be permitted: Mausoleums, columbariums, chapels, funeral homes and other facilities for burial and ceremonial purposes.

B. On-Site Agricultural Sales.

1. Maximum Size. Any stand or activity, including any structure, shall be allowed a maximum of three hundred square feet of indoor and outdoor area to display items, except no outdoor display area limitation

shall apply to agricultural products cut or picked by customers. The maximum floor area of any structure shall be one hundred square feet.

2. Stand. Any stand and/or structure shall be single-story, temporary/seasonal, readily removable, and not permanently affixed to the ground. Further, any stand and/or structure shall be at least fifteen feet from any public right-of-way.

3. Products. Items offered for sale or without charge shall be limited to those produced on the property such as raw unprocessed fruits, vegetables, nuts, seeds, herbs, flowers, ornamental plants, or trees, as well as jams, jellies, pickles, sauces, relishes, or handicrafts.

4. Parking. Adequate off-street parking shall be provided with an all-weather surface that minimizes ruts, potholes, and pooling of water. No portion of any required parking space shall be located within the right-of-way of a public street or require backing-up onto a public street.

C. Mineral Extraction.

1. Street Standard. At a minimum, this use shall have driveway access on a nonresidential collector street as specified in the Major and Collector Street Plan.

2. Setback. No mineral extraction activity, including the transport of material extracted, shall occur within five hundred feet of any property line, within one thousand two hundred fifty feet of a residential structure, or within two thousand feet of the property line of a park or community education facility with the exception that residential structures, parks or community education facilities on the opposite side of navigable water ways shall be excluded from the setback requirement.

3. Landscape Buffer Yard. Where the site abuts a residential zone district, screening in the form of landscape buffer yard Standard D shall be applied continuously within the setback area required in subdivision 2 of this subsection placed either on the property boundary or along the perimeter of the operation, or both. This screening shall consist of six feet in height densely planted shrubs and/or trees which are of an evergreen type that provide year-round screening, or an opaque wall or barrier of six feet in height. An earthen berm may supplement this screening. All screening shall be maintained in good condition at all times. Areas of hazardous equipment and quarry pits shall be completely enclosed by fencing.

4. Performance Standards. The operation shall minimize disturbances and adverse impacts on surrounding lands using best available current technology. The operation shall comply with the performance standards of the industrial zone district regulations and measures shall be taken to control windborne materials in accordance with Section 10.56.190 of the Metropolitan Code. The application shall demonstrate the methodology necessary to ensure that the operation complies with all applicable federal, state and local laws.

D. Asphalt Plant.

1. Street Standard. At a minimum, this use shall have driveway access on a nonresidential collector street as specified in the Major and Collector Street Plan.

2. Setback. No asphalt plant activity shall occur within one thousand two hundred fifty feet of a residential structure or within two thousand feet of the property line of a park or community education facility with the exception that residential structures, parks or community education facilities on the opposite side of navigable water ways shall be excluded from the setback requirement.

3. Landscape Buffer Yard. Where the site abuts a residential zone district, screening in the form of landscape buffer yard Standard D shall be applied continuously within the setback area required in subdivision 2 of this subsection placed either on the property boundary or along the perimeter of the operation, or both. This screening shall consist of six feet in height densely planted shrubs and/or trees which are of an evergreen type that provide year-round screening, or an opaque wall or barrier of six feet in height. An earthen berm may supplement this screening. All screening shall be maintained in good condition at all times. Areas of hazardous equipment shall be completely enclosed by fencing.

4. Performance Standards. The operation shall minimize disturbances and adverse impacts on surrounding lands using best available current technology. The operation shall comply with the performance standards of the industrial zone district regulations and measures shall be taken to control windborne materials in accordance with Section 10.56.190 of the Metropolitan Code. The application shall demonstrate the methodology necessary to ensure that the operation complies with all applicable federal, state and local laws.

E. Concrete Plant.

1. Street Standard. At a minimum, this use shall have driveway access on a nonresidential collector street as specified in the Major and Collector Street Plan.

2. Setback. No concrete plant activity shall occur within one thousand feet of a residential structure or within two thousand feet of the property line of a park or community education facility with the exception that residential structures, parks or community education facilities on the opposite side of navigable water ways shall be excluded from the setback requirement.

3. Landscape Buffer Yard. Where the site abuts a residential zone district, screening in the form of landscape buffer yard Standard D shall be applied continuously

within the setback area required in subdivision 2 of this subsection placed either on the property boundary or along the perimeter of the operation, or both. This screening shall consist of six feet in height densely planted shrubs and/or trees which are of an evergreen type that provide year-round screening, or an opaque wall or barrier of six feet in height. An earthen berm may supplement this screening. All screening shall be maintained in good condition at all times. Areas of hazardous equipment shall be completely enclosed by fencing.

4. Performance Standards. The operation shall minimize disturbances and adverse impacts on surrounding lands using best available current technology. The operation shall comply with the performance standards of the industrial zone district regulations and measures shall be taken to control windborne materials in accordance with Section 10.56.190 of the Metropolitan Code. The application shall demonstrate the methodology necessary to ensure that the operation complies with all applicable federal, state and local laws. (Amdt. 1 to Ord. BL2015-14 § 3, 2015; Ord. BL2015-14 § 3, 2015; Amdt. 1 to Ord. BL2015-13 § 1, 2015; Ord. BL2015-13 § 1, 2015; Amdts. 1, 2, to Ord. BL2012-182 § 3, 2012; Ord. BL2012-182 § 3, 2012; Ord. 96-555 § 4.2(K), 1997)

Article III. Uses Permitted by Special Exception (SE)

17.16.140 Applicability.

The land use development standards in this article apply to uses permitted by special exception, referenced as "SE" in the zoning district land use table, Section 17.08.030, or as otherwise provided in this title. Special exceptions are land uses subject to review by the board of zoning appeals (see Chapter 17.40, Article VII). Religious institutions and cultural centers having a valid use and occupancy permit on the effective date of the ordinance codified in this code, which do not satisfy the land use development standards of this article, may expand under the authority of the board of zoning appeals subject to demonstrating compliance with the general provisions. Community education facilities having a valid use and occupancy permit on the effective date of the ordinance codified in this Code, and which cannot satisfy the locational or design standards of Section 17.16.040(A) may expand under the authority of the board subject to demonstrating compliance with Section 17.16.150. (Ord. BL2004-492 § 3, 2005; Ord. 96-555 § 4.3 (part), 1997)

17.16.150 General provisions.

A. Burden of Proof. A special exception permit shall not be considered an entitlement, and shall be granted by the board of zoning appeals only after the applicant has demonstrated to the satisfaction of the board that all of the required standards are met.

B. Ordinance Compliance. The proposed use shall comply with all applicable regulations, including any specific standards for the proposed use set forth in this title, unless circumstances qualify the special exception for a variance in accordance with Chapter 17.40, Article VIII. Any accessory use to a special exception must receive express authorization from the board of zoning appeals.

C. Integrity of Adjacent Areas. A special exception use permit shall be granted provided that the board finds that the use is so designed, located and proposed to be operated that the public health, safety and welfare will be protected. The board shall determine from its review that adequate public facilities are available to accommodate the proposed use, and that approval of the permit will not adversely affect other property in the area to the extent that it will impair the reasonable long-term use of those properties. The board may request a report from the metropolitan planning commission regarding long-range plans for land use development.

D. Design and Architectural Compatibility. The operational and physical characteristics of the special exception shall not adversely impact abutting properties, including those located across street frontages. Site design and architectural features which contribute to compatibility include, but are not limited to, landscaping, drainage, access and circulation, building style and height, bulk, scale, setbacks, open areas, roof slopes, building orientation, overhangs, porches, ornamental features, exterior materials and colors.

E. Natural Features. Special exception uses in residential zone districts must comply with the nonresidential tree protection regulations and other natural site features shall be preserved to the greatest extent possible so as to minimize the intrusion of nonresidential structures and parking areas.

F. Historic Preservation. Features of historical significance shall not be adversely affected by the granting of any special exception. The metropolitan historic zoning commission shall be consulted regarding those features essential to preserve the historical integrity of a building or site of historical significance.

G. Traffic Impact. The applicant shall demonstrate how the proposed use will not adversely affect the safety and convenience of vehicular and pedestrian circulation in the area. The board of zoning appeals may require a traffic impact study for any special exception land use.

H. Repealed.

I. Hazard Protection. The proposed use shall reasonably protect persons and property from erosion, flooding, fire, noise, glare or similar hazards.

J. Special Conditions. Notwithstanding a finding by the board of zoning appeals that a special exception application satisfies the minimum development standards of this article, the board may restrict the hours of operation, establish permit expiration dates, require extraordinary setbacks and impose other reasonable conditions necessary to protect the public health, safety and welfare. (Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.3(A), 1997)

17.16.160 Residential special exceptions.

A. Rural Bed and Breakfast Homestay.

1. A rural bed and breakfast homestay shall be any geographically definable area of one agriculturally zoned lot which contains five or more acres for the principal structure as determined by the board of zoning appeals.

2. Owner-Occupied. The owner of the property must reside permanently in the home. Where there is more than one owner of the home, or where an estate, corporation, limited partnership or similar entity is the owner, a person with controlling interest, or possessing the largest number of outstanding shares owned by any single individual or corporation, shall reside permanently in the home. If two or more persons own equal shares that represent the largest ownership, at least one of the persons shall reside permanently in the home.

3. No more than one off-street parking space shall be provided for each guest room. The board shall determine the appropriate location of these spaces and require fencing, screening and landscaping to buffer and protect surrounding residential properties from any adverse impact caused by the off-street parking of vehicles.

4. No signs shall be permitted for advertising. An accessory residential sign, not to exceed the dimensions of one square foot of area, displaying the name and/or address of the owner may be permitted.

5. The bulk regulations of the district for a residence shall apply.

6. The owner shall maintain and make available to the zoning administrator a guest register for each calendar year.

7. Meal service shall be restricted to overnight guests only; no cooking facilities shall be permitted in any guest room.

8. The metropolitan fire marshal shall approve the structure for safety.

B. Historic Home Events.

1. Lot Size. The minimum bulk standard for the zone district shall apply.

2. Location. The events shall be within a historically significant structure, as determined by the historic zoning commission.

3. Parking. Where the minimum parking space standard requires additional parking area to be constructed, such area shall comply with the perimeter parking lot landscaping according to Chapter 17.24 of this code. In urban settings, the board of zoning appeals may consider on-street parking to satisfy the minimum parking standard, provided there is a finding of sufficient available public space.

4. Signs. Signs for advertising shall not be permitted.

5. Meals. Meal service shall be restricted to patrons of the special event only, and not to the general public.

6. Owner-Occupied. The owner of the property must reside permanently in the historic home. Where there is more than one owner of the home, or where an estate, corporation, limited partnership or similar entity is the owner, a person with controlling interest, or possessing the largest number of outstanding shares owned by any single individual or corporation, shall reside permanently in the historic home. If two or more persons own equal shares that represent the largest ownership, at least one of the persons shall reside permanently in the historic home.

7. Frequency of Events. The board of zoning appeals may limit the number and frequency of events to minimize disturbance to surrounding properties.

C. Multi-family.

1. In IWD and IR Districts.

a. Accessory to the Manufacturing, Artisan use.

i. A maximum of two units per lot shall be permitted as an accessory use to Manufacturing, Artisan use.

ii. Residential uses shall be supported by the Community Plan, as determined by the planning department.

iii. No hazardous materials or uses shall be located within an unsafe distance of the proposed residential use, as evidenced by the testimony presented to the board of zoning appeals. Notices shall be sent to all property owners within three hundred feet no later than thirty days prior to the board of zoning appeals hearing date notifying them of the proposed residential use, the board of zoning appeals hearing date, and requesting information regarding hazardous materials or uses located within an unsafe distance of the proposed residential use. The zoning administrator shall make a recommendation to the board of zoning appeals as to the adequacy of the distance between the proposed residential use and any hazardous materials.

b. Adaptive Residential Development. A multi-family use shall be permitted provided it is located within an existing structure located within the urban

services district having the majority of its frontage on an arterial street or collector street as shown on the adopted Major Street Plan and where a minimum of forty percent of the existing structure's gross floor area is devoted to residential uses, subject to the conditions below. Otherwise, all other requirements and standards established by other chapters of this title, as well as any other applicable metropolitan government, state or federal regulation, shall apply to the development and use of properties shown on the final site plan. In case of conflict between the standards of this section and other chapters of this Zoning Code, the provisions of this section shall control:

i. Structure Eligibility. All structures within the IWD and IR districts shall meet the following requirements to be eligible for the multi-family use:

(A) The structure must be determined to be worthy of conservation by the metro historical commission.

(B) The structure must be a minimum of fifty years old at the time of application for the special exception.

(C) The structure must be preserved with no additions, deletions, or alterations which would be inconsistent with the historic nature of the building or significantly alter the building's exterior appearance (i.e., blocking out windows with brick or other materials).

ii. Residential Floor Area. No density or floor area ratio shall apply to those portions of a non-residential building converted to a residential use.

iii. Building Orientation. A primary building entrance shall be oriented to the arterial street, to the extent feasible. On a corner lot, entrances shall be determined by the board of zoning appeals.

iv. Parking. Parking spaces shall be required for any residential, commercial and/or retail use in accordance with Chapter 17.20. In addition, no more than one and one-half spaces shall be required per a residential dwelling unit. Tandem residential parking may be no more than two cars in depth. If parking is provided in a new deck or structure, the ground floor of the parking facility abutting a public street shall contain commercial or retail uses for seventy-five percent of the street frontage. The commercial or retail area shall have a minimum depth of twenty feet, a minimum height of fourteen feet (floor to floor) for the first floor of the garage at street level, with each storefront having between fifty-five percent and eighty-five percent glazed window area along the garage wall facing the public street.

v. Traffic Impact Study. No traffic impact study shall be required, except the board of zoning appeals may require a study for developments of one hundred dwelling units or greater.

vi. Landscaping. Notwithstanding Section 17.24.050(A), any single addition that increases the total building area by twenty-five percent or more of an existing building, in whole or in part, shall provide landscaping as required by this title. Where the number of parking spaces is increased by twenty-five percent, either through a parking lot expansion or the construction of a new parking lot, interior parking lot landscaping shall be required.

vii. Viable Industrial Uses. The board of zoning appeals shall determine that the project will not displace viable industrial uses. The multi-family use shall not displace viable industrial uses.

viii. Hazardous Materials or Uses. No hazardous materials or uses shall be located within an unsafe distance of the proposed residential use, as evidenced by the testimony presented to the board of zoning appeals. Notices shall be sent to all property owners within three hundred feet no later than thirty days prior to the board of zoning appeals hearing date notifying them of the proposed residential use, the board of zoning appeals hearing date, and requesting information regarding hazardous materials or uses located within an unsafe distance of the proposed residential use. The zoning administrator shall make a recommendation to the board of zoning appeals as to the adequacy of the distance between the proposed residential use and any hazardous materials.

ix. Alternative Standards. Where a proposed residential development cannot comply with standards of this subsection, the board of zoning appeals may approve alternative standards. The board shall determine that the applicant has demonstrated that the relief being requested will not be injurious to surrounding properties, nor violates the adopted general plan. The board shall not act on any application requesting alternative standards without first considering recommendations from the planning commission and the historic zoning commission.

2. In the IG District.

a. Accessory to the Manufacturing, Artisan use.

i. A maximum of two units per lot shall be permitted as an accessory use to Manufacturing, Artisan use.

ii. Residential uses shall be supported by the Community Plan, as determined by the planning department.

iii. No hazardous materials or uses shall be located within an unsafe distance of the proposed residential use, as evidenced by the testimony presented to the board of zoning appeals. Notices shall be sent to all property owners within three hundred feet no later than thirty days prior to the board of zoning appeals hearing date notifying them of the proposed residential use, the board of zoning appeals hearing date, and requesting information regarding hazardous materials or uses located

within an unsafe distance of the proposed residential use. The zoning administrator shall make a recommendation to the board of zoning appeals as to the adequacy of the distance between the proposed residential use and any hazardous materials. (Ord. BL2022-1508 § 4, 2023; Ord. BL2015-1121 § 8, 2015; Ord. BL2005-701 § 1, 2005; Ord. BL2001-675 § 1 (part), 2001; Ord. 99-1616 § 1 (part), 1999; Ord. 96-555 § 4.3(B), 1997)

17.16.170 Institutional special exceptions.

(Refer to zoning district land use table)

A. Correctional Facility.

1. A master development plan shall be submitted for site plan review and approved by the board of zoning appeals.

2. Campus Size. Minimum campus size shall be twenty-five acres.

3. Setback. All buildings and outdoor security areas shall be located a minimum of one hundred feet from all property lines.

4. Landscape Buffer Yard. The perimeter of a prison shall have screening in the form of landscape buffer yard Standard D along all property lines; however landscape buffer yard Standard B may be used along the street frontage.

5. Street Standard. At a minimum, major transportation uses shall have driveway access on nonresidential collector streets.

B. Cultural Center.

1. Lot Size. The minimum lot area shall be three times the minimum lot area requirement of the zone district or two acres, whichever is less.

2. Setback. Where active outdoor areas abut a residential zone district or district permitting residential use, there shall be a minimum setback of one hundred feet.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard B shall be applied along common property lines.

4. Street Standard. At a minimum, primary access shall be from a collector street which has primary access to a street designated on the major street plan.

5. In IR and IG, the following additional restrictions apply:

a. Size is limited to 20,000 square feet, maximum.

b. A mixture of uses is supported by the Community Plan, as determined by the planning department.

c. No hazardous materials or uses are located within an unsafe distance of the proposed residential use, as evidenced by the testimony presented to the board of zoning appeals.

C. Day Care Center. Day care centers shall be classified according to the ranges below. For existing facilities in residential zone districts, a special exception permit shall be required for any proposed increase which upgrades the classification.

1. Class I—Thirteen to Twenty-Five Individuals.

a. Lot Size. The minimum lot size shall be one-half acre.

b. Street Standard. Driveways shall have access on any street, except on minor local streets driveway access shall only be permitted where the lot is located at the intersection of the minor local street and an arterial or collector street.

c. Landscape Buffer Yard. Where the outdoor play area abuts any portion of a residential zone district or district permitting residential use, screening in the form of landscape buffer yard Standard A shall be provided.

2. Class II—Twenty-Six to Fifty Individuals.

a. Lot Size. The minimum lot size shall be one acre.

b. Street Standard. At a minimum, driveways shall have access on a collector street.

c. Landscape Buffer Yard. Where the day care center abuts a residential zone district or district permitting residential use, there shall be screening in the form of landscape buffer yard Standard B along common property lines.

3. Class III—Fifty-One to Seventy-Five Individuals.

a. Lot Size. The minimum lot size shall be one and one-half acre.

b. Street Standard. At a minimum, driveways shall have access on a collector street.

c. Landscape Buffer Yard. Where the day care center abuts a residential zone district or district permitting residential use, there shall be screening in the form of landscape buffer yard Standard C along common property lines.

4. Class IV—More than Seventy-Five Individuals. A Class IV day care center shall be permitted only if the site qualifies as a preferred location under subdivision (8) of this subsection and satisfies the development standards of Class III.

5. Spacing. Regardless of classification, no day care center or day care home shall locate on the same street block face or on an opposing street block face. Where a block face is over one thousand feet in length, no day care center or day care home shall locate within one thousand feet of another day care center or day care home, measured in a direct line from property line to property line and including any public right-of-way.

6. Play Area. If an outdoor play area is provided, it shall be fenced and attached to the day care structure in a manner which minimizes noise impacts on neighboring residences.

7. All requirements of the state that pertain to the use and operation of the facility shall be met.

8. Preferred Locations. The land use development standards may be waived by the board of zoning appeals if the site meets any one of the criteria below. The minimum street standard may be waived only upon a favorable recommendation of the metropolitan traffic engineer. Preferred residential locations are where:

a. The day care center will be accessory to another institutional use; or

b. The day care center will be the principal use serving as an adaptive reuse of a vacant institutional facility or nonresidential structure; or

c. The day care center lot abuts and has common street frontage with a nonresidential or multifamily zone district; or

d. The day care center is within a large multifamily housing development of two hundred or more dwelling units.

D. Day Care Home—Large.

1. The day care home shall only be permitted in an occupied residence or accessory to another institutional use.

2. Lot Size. The minimum lot area shall be the same as the principal activity; except when in the opinion of the board of zoning appeals circumstances warrant otherwise.

3. Street Standard. Day care homes may have driveway access on any street; however, no more than one day care home shall locate on a residential minor local street and not within one hundred feet of the terminus of such street.

4. Spacing. Regardless of classification, no day care center or day care home shall locate on the same street block face or on an opposing street block face. Where a block face is over one thousand feet in length, no day care center or day care home shall locate within one thousand feet of another day care center or day care home, measured in a direct line from property line to property line and including any public right-of-way.

5. Play Area. If an outdoor play area is provided, it shall be fenced and attached to the day care structure in a manner which minimizes noise impacts on neighboring residences.

6. All requirements of the state that pertain to the use and operation of the facility shall be met.

7. The board of zoning appeals may waive the above standards for multifamily housing developments of two hundred or more units if compliance would disqualify an otherwise reasonable location.

E. Religious Institution. The following standards shall be applied to a religious institution located within a residential district to ensure compatibility with nearby residential uses.

1. Pre-Existing Facilities. A religious institution having a valid use and occupancy permit on the effective date of the ordinance codified in this chapter may expand under the authority of the board of zoning appeals subject to demonstrating compliance only with the general provisions of Section 17.16.150, and the off-site parking requirements of subsection (E)(2) of this section. The standards of subsection (E)(3) of this section shall not apply to pre-existing facilities.

2. Pre-Existing Facilities—Off-Site Parking. Approval of an off-site parking lot shall be contingent upon a demonstration that the following standards have been met:

a. The appellant shall demonstrate by a parking study, reviewed by the metropolitan traffic engineer, that the minimum number of parking spaces required by Chapter 17.20, Article II cannot be developed on the same zone lot containing the place of worship;

b. The amount of off-site parking shall not exceed the actual needs of the place of worship as demonstrated by the parking study;

c. There shall be no vacant property adjacent to the place of worship on the same block face;

d. The off-site parking area shall abut a street upon which the zone lot of the place of worship abuts and at least a portion of the off-site parking area shall be opposite the zone lot containing the place of worship;

e. Vehicular access shall be restricted to a street upon which the zone lot of the place of worship abuts;

f. All off-site parking spaces shall be within two hundred feet of the zone lot boundary of the place of worship;

g. On any given block, off-site parking associated with a place of worship shall be limited to a contiguous area;

h. Pedestrian cross walks shall be provided to connect the off-site parking area and the place of worship if determined necessary by the metropolitan traffic engineer;

i. All lighting shall be shielded so that substantially all directly emitted light falls within the property. No illumination in excess of one-half foot candle shall be permitted across the boundary of any residential property or a public street or alley. The parking area shall only be illuminated when in use; and

j. When not in use by the place of worship, the parking area shall be secured by a locked barrier that precludes vehicular access. Buses or other vehicles shall not be stored in the parking areas.

3. New Facilities. New religious institution facilities, constructed after the effective date of the ordinance codified in this chapter shall be subject to the following performance standards.

a. Minimum Site Size. Land area shall be provided at the rate of .005 acre for every seat in the sanctuary/assembly area. In areas considered by the board of zoning appeals to be predominately developed, and where assembling land to satisfy this site size standard is not practical, the board of zoning appeals may waive the minimum site size requirement, based on a determination that the proposed facility can be designed and operated in a manner which will not adversely impact abutting properties or the surrounding neighborhood.

b. Street Standard. A religious institution shall provide principle vehicular access via a street that at a minimum functions, or is otherwise classified, as indicated below:

i. Up to 50 seats: Any through or temporary dead-end street; principle driveway access may be derived from a permanent dead-end street if the facility is located at the intersection with a through street;

ii. 51 to 300 seats: Any through street or a temporary dead-end street;

iii. 301 to 1,000 seats: Any collector street;

iv. More than 1,000 seats: An arterial street, or two intersecting collector streets.

The board of zoning appeals may waive the above street standards based on a recommendation from the traffic engineer that the projected volume of traffic, to be generated by the proposed facility, can be safely and efficiently accommodated by the existing local street network without adversely impacting the surrounding neighborhood.

c. Landscape Buffers. Screening and buffering in the form of a standard B landscape buffer yard shall separate all structures and parking areas from an abutting residential property.

d. Cemetery. A cemetery, including columbariums, may be permitted by the board as an accessory use to a religious institution. (Ord. BL2022-1073 § 4, 2022; Ord. BL2015-1121 § 13, 2015; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.3(c), 1997)

17.16.175 Commercial special exceptions.

(Refer to zoning district land use table)

A. Kennel/Stable.

1. Setback. No part of any building or structure in which animals are housed shall be closer than two hundred feet, and no kennel run shall be located within one hundred feet, from any existing residence, other than one owned or occupied by an owner or operator of the kennel or stable. In the event more than ten horses are boarded on five acres or more, the building setback shall increase to two hundred feet from the property line.

2. Building Temperature. Enclosures must be provided which shall allow adequate protection against weather extremes. Floors of buildings, runs and walls shall be of an impervious material to permit proper cleaning and disinfecting.

3. Cages. For a kennel, each animal shall have sufficient space to stand up, lie down and turn around without touching the sides or top of cages. Cages are to be of material and construction that permits cleaning and sanitizing. Cage floors of concrete, unless radiantly heated, shall have a resting board or some type of bedding.

4. Runs. For a kennel, each run must have at least a six-foot high fence completely surrounding it. Fences must be maintained in escape-proof condition. Runs shall provide an adequate exercise area and protection from the weather. All animal quarters and runs are to be kept clean, dry and in a sanitary condition.

5. Stalls. Each horse shall have sufficient space to stand up, lie down and turn around without touching the sides of the stall. Stalls are to be of material and construction that permits cleaning and sanitizing.

6. Riding Ring. For a horse, no riding ring, including jumps and corrals, shall be located closer than fifty feet to any property line.

7. Trail Rides. No horse shall be ridden or walked along public rights-of-way for any length of time or duration.

8. Gates and Locks. All gates for entrance/exit to the stalls, riding rings, and other training area must be kept locked when not in use. All horses connected with the riding stable shall be enclosed by appropriate fencing so they shall not be permitted to run at large.

9. Watering of Animals. All animals shall have fresh water available at all times. Water vessels shall be mounted or secured in a manner that prevents tipping and shall be of the removable type.

10. On-Site Waste Collection. All on-site waste shall be housed either within the kennel building or an accessory structure, and all waste shall be disposed of in a sanitary fashion no less frequently than one time per week. The drainage of all liquid by-products from the kennel shall be discharged into a permitted sanitary sewer line or septic tank and shall not be disposed of by way of storm sewers, creeks, streams or rivers. (Amdt. 1 with Ord. 98-1268 § 1 (part), 1998)

17.16.180 Communication special exceptions.

(Refer to zoning district land use table)

(Ord. BL2016-415 § 4, 2016; Ord. BL2009-586 § 1(Exh. A, §§ 33, 34), 2010; Ord. BL2003-1304 §§ 5, 6, 2003; Ord. BL99-117 § 1 (part), 2000; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.3(D), 1997)

17.16.185 Industrial special exceptions.

A. Hazardous Operation.

1. Setback. All buildings used for handling, processing and/or storage of hazardous material shall be located a minimum of one hundred feet from all property lines and one thousand feet from any residential zone district.

2. Street Standard. At a minimum, hazardous operation uses shall have driveway access on nonresidential collector streets. A traffic impact study shall demonstrate that the truck traffic generated will use only streets that function at, or better than, a level of service (LOS) D.

3. Landscape Buffer Yard. Where the perimeter of a hazardous operation abuts a nonindustrial zone district, there shall be screening in the form of landscape buffer yard Standard D along common property lines.

4. The applicant shall demonstrate the capability to comply with all applicable federal, state and local regulations. In particular, the facility shall comply with the Explosive Materials Code (NFPA 495; Metropolitan Code of Laws, Chapter 10.64)

5. The permitted storage capacity of a hazardous operation shall be determined by the board of zoning appeals. (Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.3 (I), 1997)

17.16.190 Transportation special exceptions.

(Refer to zoning district land use table)

A. Airport.

1. Lot Size. The minimum lot area shall be one hundred acres.

2. Setback. Where transportation facilities, excluding passenger car parking lots, abut a residential zone district or district permitting residential use, there shall be a minimum setback of five hundred feet.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied along common property lines.

4. Street Standard. At a minimum, airport land uses shall have driveway access on nonresidential collector streets. A traffic impact study shall demonstrate that the traffic generated will use only streets that function at, or better than, a level of service (LOS) D.

B. Bus Station/Landport.

1. Setback. Where transportation facilities, excluding passenger car parking lots, abut a residential zone district or district permitting residential use, there shall be a minimum setback of one hundred feet.

2. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied along common property lines.

3. Street Standard. At a minimum, bus station/landport land uses shall have driveway access on nonresidential collector streets.

C. Bus Transfer Station.

1. Setback. All buildings and passenger loading areas, excluding passenger car parking lots, shall be located a minimum of fifty feet from any residential zone district or district permitting residential use.

2. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard B shall be applied along common property lines.

3. Street Standard. At a minimum, bus transfer station land uses shall have driveway access on any street which intersects at least a collector street.

D. Commuter Rail.

1. Setback. Where transportation facilities, excluding passenger car parking lots, abut a residential zone district or district permitting residential use, there shall be a minimum setback of five hundred feet.

2. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard C shall be applied along common property lines.

3. Street Standard. At a minimum, lightrail station land uses shall have driveway access on nonresidential collector streets. A traffic impact study shall demonstrate that the traffic generated will use only streets that function at, or better than, a level of service (LOS) D.

E. Helistop.

1. Location. To the greatest extent feasible, a helistop pad should be located adjacent to the flight corridor established by the FAA.

2. Accessory to a Hospital. In the OG, OG-NS, MUG, MUG-NS, MUG-A, MUG-A-NS, CS, CS-NS, CS-A, and CS-A-NS districts, a helistop shall be permitted only as an accessory use to a hospital.

3. Separation from Residential Properties. No helistop pad shall be located within five hundred feet of a residential property line.

4. Debris Control. A helistop facility shall be fenced to trap on-site debris. If an unpaved area is utilized as a helistop pad, the ground surface shall be wetted to minimize airborne dust generated during landings and take-offs.

5. A helistop shall have no adverse impact on the operation of sensitive equipment located on neighboring properties, including a recording studio and a live music venue.

6. Refueling facilities may be provided at a helistop located within the CF, CF-NS, IWD, IR and IG districts when operated by the Metropolitan Nashville Airport Authority.

F. Park and Ride Lot.

1. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard B shall be applied along common property lines.

2. Street Standard. At a minimum, the park and ride lot shall have driveway access on any street which intersects at least a collector street.

G. Railroad Station.

1. Setback. Where transportation facilities, excluding passenger car parking lots, abut a residential zone district or district permitting residential use, there shall be a minimum setback of five hundred feet.

2. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied along common property lines.

3. Street Standard. At a minimum, railroad station land uses shall have driveway access on nonresidential collector streets. (Ord. BL2019-111 § 1(Exh. A, § 27), 2020; Ord. BL2015-1153 § 15, 2015; Ord. BL2011-898 § 11, 2011; Ord. 96-555 § 4.3(E), 1997)

17.16.200 Utility special exceptions.

(Refer to zoning district land use table)

A. Safety Services.

1. Lot Size. The minimum lot area shall be three times the minimum lot area requirement of the zone district or two acres, whichever is less.

2. Setback. Facilities for the provision of safety services, excluding passenger car parking lots, shall be located fifty feet from any residential property line.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard C shall be applied along common property lines.

4. Street Standard. At a minimum, these uses shall have driveway access on a collector street which intersects at least a collector street.

B. Wastewater Treatment.

1. Lot Size. The minimum lot area shall be ten acres.

2. Setback. The facility, excluding passenger car parking lots, shall not be located within one thousand feet of any residential property line.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied along common property lines.

4. Street Standard. At a minimum, wastewater treatment plant land uses shall have driveway access on nonresidential collector streets.

C. Water Treatment Plant.

1. Lot Size. The minimum lot area shall be ten acres.

2. Setback. The facility, excluding passenger car parking lots, shall not be located within one hundred feet of any residential property line.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied along common property lines.

4. Street Standard. At a minimum, water treatment plant land uses shall have driveway access on nonresidential collector streets. (Ord. 96-555 § 4.3(F), 1997)

17.16.210 Waste management special exceptions.

(Refer to zoning district land use table)

The applicant shall submit to the board of zoning appeals a detailed description of the management procedures of the facility.

A. Waste Transfer.

1. Lot Size. The minimum site area shall be ten acres.

2. Street Standard. Driveway access can be from any local street, provided that street is not bounded by any residential zoning district from the driveway access point to the street's intersection with a collector street or a street designated on the major street plan. A traffic impact study shall demonstrate that traffic generated to/from the site will only use streets where the existing level of service (LOS) is "D," and it is forecasted to remain at a LOS D or better with the proposed waste transfer traffic.

3. Setback. All buildings, structures, storage containers and areas, and vehicle loading/unloading areas shall be located a minimum of one hundred fifty feet away from any residential zoning district boundary or residential structure.

4. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied. In addition, the entire facility shall be enclosed by a chain-link-type fence at least eight feet in height. The fence shall be patrolled each day to remove all windblown debris captured by the fence.

5. All loading, unloading, compacting, sorting, processing or storage shall take place within a completely enclosed building. (Ord. BL2017-799 § 5, 2017; Ord. BL2015-1153 § 16, 2015; Ord. Bl2014-772 § 2, 2014; Amdt. 1 to Ord. BL2010-634; Ord. BL2010-634 § 2, 2010; Amdt. 1 with Ord. BL2002-1273 §§ 3, 4, 2003; Amdt. 1, 2, with Ord. BL2002-1171 §§ 3, 4, 2002; Amdt. 1 (part) with Ord. BL99-86 § 2, 2000; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.3(G), 1997)

17.16.220 Recreation and entertainment special exceptions.

(Refer to zoning district land use table)

A. Camp.

1. Lot Size. The minimum lot area shall be ten acres plus one acre/fifty campers.

2. Setback. All structures and activity areas, including outdoor amphitheaters, ballfields, tennis courts, swimming pools, parking or unloading areas, shall be

located a minimum of one hundred fifty feet from any residential zoning district boundary or any residential structure.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard standard D shall be applied along common property lines.

4. Traffic Management Study. The traffic engineer may require a traffic management study to determine what, if any, improvements may be necessary to accommodate projected traffic to and from the camp facility.

5. Parking. Adequate off-street parking and loading/unloading areas shall be provided on-site, including all accessory uses.

6. Lighting. All light and glare shall be directed on-site to ensure surrounding properties are not adversely impacted by increases in direct or indirect ambient lighting levels. Lighting of outdoor amphitheater, ballfields or other outdoor recreation/activity areas shall be prohibited after ten p.m. any day of the week.

7. Outdoor Loudspeakers. There shall be no outdoor loudspeakers or public address systems, except as may be needed for emergency purposes.

8. Refuse Storage and Disposal. Trash areas shall be provided and screened on at least three sides from public view by an opaque impact-resistant fence of sufficient height to screen the dumpster(s).

9. Signs. One on-premise ground or pole mounted sign measuring no larger than ten square feet shall be permitted at each camp entrance setback fifteen feet from the street right-of-way. The maximum height of a ground mounted sign shall be three and one-half feet tall and a pole mounted sign shall be fifteen feet. All signs shall be either spotlighted or externally lit. On-premise temporary signs shall not be permitted.

10. Uses. All principal and accessory uses shall be identified on the special exception permit and labeled on the site plan along with the proposed square footage of each use, including the number of overnight accommodation units. Any changes to a principal or accessory use, including modifications or additions, shall be approved as an amendment to the special exception permit by the board of zoning appeals, as provided in Article VII of Chapter 17.40 of this title.

B. Commercial Amusement (inside).

1. Size is limited to twenty thousand square feet, maximum.

2. A mixture of uses is supported by the Community Plan, as determined by the planning department.

3. No hazardous materials or uses are located within an unsafe distance of the proposed residential use, as evidenced by the testimony presented to the board of zoning appeals.

C. Commercial Amusement (outside).

1. Applicable to all zoning districts where Commercial Amusement (outside) is a SE use:

a. Lighting. All light and glare shall be directed on-site to ensure surrounding properties are not adversely impacted by increases in direct or indirect ambient lighting levels.

b. The board of zoning appeals may stipulate, based on the zoning pattern and nature of the land uses in the immediate area, whether a maximum of sixty or seventy decibels noise level on the A-weighted scale shall be permitted to occur at the site boundary.

2. Applicable only to IWD and IR zoning districts:

a. Buildings. Any new structure constructed on the property shall be no greater in size than one thousand, five hundred square feet.

b. Setback. Where any building or outdoor storage area, excluding passenger car parking lots, abuts a residential zone district or district permitting residential use, there shall be a minimum setback of one hundred feet from the property line.

c. Landscape Buffer. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard standard A shall be applied along common property lines.

d. Street Standard. At a minimum, driveway access shall be from a collector street.

3. Applicable only to the North, South, and West Use Areas of the DTC zoning district:

a. Hours of Operation. All events including sound amplification shall only take place between the hours of 9:00 a.m. and 11:00 p.m. The board of zoning appeals may further restrict the hours and days of operation.

b. Traffic Management Study. A traffic management study shall be required.

c. Lot Area. A minimum lot size of one acre shall be required for a Commercial Amusement (outside) use.

d. Separation from Residential Properties. Prior to conducting a special exception hearing before the board of zoning appeals, the planning department shall determine if the subject lot proposed for the Commercial Amusement (outside) use is within five hundred feet of the property line of a lot with a residential use (including multifamily). If it is determined that the subject lot is within five hundred feet of a residential use, the special exception shall not be approved.

D. Country Club.

1. Lot Size. The minimum lot area shall be fifty acres.

2. Setback. Where any building or outdoor storage area, excluding passenger car parking lots, abuts a residential zone district or district permitting residential use, there shall be a minimum setback of one hundred feet from the property line.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard A shall be applied along common property lines.

4. Street Standard. At a minimum, driveway access shall be from a collector street.

E. Driving Range.

1. Street Standard. At a minimum, driveway access shall be from a collector street.

2. Location. In the AG and AR2a districts, a driving range shall only be permitted in a floodplain, as designated by the Army Corps of Engineers. In any residential district (RS80 thru RM60), a driving range shall only be permitted in conjunction with a golf course. The driving range shall be located so that it is one hundred feet away from any residential zoning district boundary or the property line of any property containing a residential use.

3. Lighting. All light and glare shall be directed on-site to ensure surrounding properties are not adversely impacted by increases in direct or indirect ambient lighting levels.

4. Retail/Restaurant. A snack-bar and pro-shop shall be permitted on the same parcel as the principal use provided it is contiguous to the area where people stand to drive golf balls. The combined area of the snack-bar and pro-shop shall not exceed one thousand five hundred square feet. The snack-bar shall not provide any sit-down food service or alcoholic beverages.

5. Fencing. Adequate fencing shall be provided to ensure golf balls do not fly into abutting or adjacent properties and streets.

F. Golf Course.

1. Lot Size. The minimum lot area shall be twenty-five acres.

2. Setback. Where any building or outdoor storage area, excluding passenger car parking lots, abuts a residential zone district or district permitting residential use, there shall be a minimum setback of one hundred feet from the property line.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard A shall be applied along common property lines.

4. Street Standard. At a minimum, driveway access shall be from a collector street.

5. Traffic Management Study. A traffic management study shall be required for professional tournaments.

G. Racetrack. In the AG and AR2a districts only, motor racing facilities shall be limited to those providing seating for over twenty-five thousand spectators.

1. Lot Size. The minimum lot area shall be twenty-five acres.

2. Setback. Where the track and related facilities, excluding passenger car parking lot, abut a residential zone district or district permitting residential use, there shall be a minimum setback of five hundred feet.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied along common property lines.

4. Street Standard. At a minimum, primary access shall be from a nonresidential collector street which has primary access to a street designated on the major street plan.

5. Traffic Management Study. A traffic management study shall be required.

H. Recreation Center.

1. Setback. Where any building or outdoor storage area, excluding passenger car parking lots, abuts a residential zone district or district permitting residential use, there shall be a minimum setback of one hundred feet from the property line.

2. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard standard A shall be applied along common property lines.

3. Street Standard. At a minimum, driveway access shall be from a collector street.

I. Rehearsal Hall.

1. Size is limited to twenty thousand square feet, maximum.

2. A mixture of uses is supported by the Community Plan, as determined by the planning department.

3. No hazardous materials or uses are located within an unsafe distance of the proposed residential use, as evidenced by the testimony presented to the board of zoning appeals.

J. Temporary Festival.

1. Setback. Amusement rides and other active, open-air activities shall be located one hundred feet from any residential zone district.

2. The board of zoning appeals shall stipulate, based on the zoning pattern and nature of land uses in the immediate area, whether a maximum of sixty or seventy decibels noise level on the A-weighted scale shall be permitted to occur at the site boundary.

3. The activity shall have a duration of no more than ten days in a month, and limited to four events per year. The board of zoning appeals may further restrict the hours and days of operation.

K. Theatre.

1. Size is limited to twenty thousand square feet, maximum.

2. A mixture of uses is supported by the Community Plan, as determined by the planning department.

3. No hazardous materials or uses are located within an unsafe distance of the proposed residential use, as evidenced by the testimony presented to the board of zoning appeals.

L. Zoo.

1. Lot Size. The minimum lot area shall be twenty-five acres.

2. Setback. Where any building or outdoor storage area and/or display, excluding passenger car parking lots, abuts a residential zone district or district permitting residential use, there shall be a minimum setback of one hundred feet from the property line.

3. Landscape Buffer Yard. Along all residential zone districts and districts permitting residential use, screening in the form of landscape buffer yard Standard C shall be applied along common property lines.

4. Street Standard. At a minimum, driveway access shall be from a collector street.

5. Traffic Impact Study. A traffic impact study shall be required. (Ord. BL2022-1216 § 3, 2022; Ord. BL2015-1121 §§ 10, 16, 18, 2015; Ord. BL2002-1226 § 1 (part), 2003; Amdt. 1 to Ord. 99-1644 § 1 (part), 1999; Ord. 98-1268 § 1 (part), 1998; Amended during 2-98 supplement; Ord. 96-555 § 4.3(H), 1997)

17.16.230 Other special exception uses.

(Refer to zoning district land use table)

A. Commercial Community Garden.

1. Landscape Buffer Yard. The board of zoning appeals shall have the authority to require landscape buffering for properties abutting a residentially zoned property;

2. Lighting. All lighting shall be shielded so that substantially all directly emitted light falls within the property. No illumination in excess of one-half foot candle shall be permitted across the boundary of any residential property or a public street or alley; and

3. On-Site Storage and Use of Compost and Organic Matter. All compost and/or organic matter on the site:

a. Shall not cover more than ten percent (10%) of the total area of the property;

b. Compost piles abutting adjacent properties must not be visible from adjacent property (shielded from view by shrubbery or an enclosure).

c. Shall be managed to prevent the harborage of rodents and pests.

d. Shall be maintained to prevent odors.

e. Shall be located to prevent leachate (the water that has come in contact with the compost) from flowing onto adjacent property or into natural or human-made storm channels.

4. Drainage. The site shall be designed and maintained to prevent water from irrigation and/or other activities and/or fertilizer from draining onto adjacent property.

5. Refuse Storage and Disposal. Trash areas shall be provided and screened on at least three (3) sides from public view by an opaque impact-resistant fence of sufficient height to screen the dumpster(s).

6. Parking. Where the minimum parking space standard requires additional parking area to be constructed, such area shall comply with the perimeter parking lot landscaping according to Chapter 17.24 of this Code. In urban settings, the board of zoning appeals may consider on-street parking to satisfy the minimum parking standard, provided there is a finding of sufficient available public space.

7. The board of zoning appeals shall have the authority to consider the potential impacts on riparian areas of urban streams in deciding whether a particular location is appropriate for a commercial community garden.

B. Mineral Extraction. The board of zoning appeals may approve accessory uses to the mineral extraction activity including, but not limited to, rock crushing, mineral screening, and any combination of uses necessary to extract and process minerals. Such accessory activities shall be located within the perimeter of operation. Concrete batching, and asphalt/cement mixing plants may be accessory uses in the IR zone district only.

1. Lot Size. The minimum lot area for mineral extraction shall be one hundred acres.

2. Street Standard. At a minimum, these uses shall have driveway access on nonresidential collector streets. A traffic impact study shall demonstrate that the truck traffic generated will use only streets that function at, or better than, a level of service (LOS) D.

3. Location. In the AG and AR2a zone districts, the location of these activities shall not be permitted within the urban services district.

4. Separation. In the AG and AR2a zone districts, a one-mile separation shall be required between any two mineral extraction sites, as measured from property lines.

5. Setback. The perimeter of operation shall comply with the following setback standards:

Zoning District	From any Property Line	From any Off-Site Residential Structure
IR	250 feet	500 feet
AG, AR2a	500 feet	1000 feet

6. Residential Encroachment. The issuance of a building permit for construction or use of any residential structure, after the zoning administrator has ruled that the proposed perimeter of operation complies with the above minimum setbacks from a residential structure, and where placement or conversion of the structure for residential purpose will be within the minimum setback of five hundred feet or one thousand feet, such construction or use shall not make the mineral extraction activity nonconforming.

7. Landscape Buffer Yard. The required setback area established in subdivision (5) of this subsection shall be an undisturbed open area, unobstructed from the ground to the sky, where natural vegetation is preserved and enhanced with other natural and artificial screening materials to buffer the use of the property. This area may be used for agricultural purposes.

a. Where the site abuts a residential zone district or district permitting residential use, screening in the form of landscape buffer yard Standard D shall be applied continuously within the setback area where the best opportunity exists to screen the operation, placed either on the property boundary, along the perimeter of operation, or both. This screening shall consist of six feet in height densely planted shrubs and/or trees which are of an evergreen type that provide year-round screening, or an opaque wall or barrier of six feet in height. An earthen berm may supplement this screening. All screening shall be maintained in good condition at all times. Areas of hazardous equipment and quarry pits shall be completely enclosed by fencing.

b. To the greatest extent possible in the AG and AR2a zone districts, the perimeter of operation shall be screened from the view of motorists and abutting property owners by earthen berms, walls, vegetation or other methods. The entrance to the site shall be designed to block the view of passing motorists, by using angled, off-setting walls, berms or permanent opaque fencing.

8. Performance Standards. The operation shall minimize disturbances and adverse impacts on surrounding lands using best available current technology. The operation shall comply with the performance standards of the industrial zone district regulations and measures shall be taken to control windborne materials in accordance with Section 10.56.190 of the Metropolitan Code of Laws. The application shall demonstrate the

methodology necessary to ensure that the operation complies with all applicable federal, state and local laws. Specifically, the following regulations or any subsequent amendments thereto shall apply:

a. Federal new source performance standards (NSPS, 40 CFR Part 60 Sub-part OOO); air pollution control (Tennessee Code Annotated 68-201): Permits required from metropolitan health department (Metropolitan Code of Laws, Chapter 10.56);

b. National pollutant discharge elimination system (NPDES, 33 US 1251): Permit required from Tennessee department of environment and conservation (Tennessee Code Annotated 69-3-108);

c. Quarrying and mining operations (Metropolitan Code of Laws, Chapter 10.52);

d. Explosive materials code (NFPA 495; Metropolitan Code of Laws, Chapter 10.64);

e. Tennessee blasting standards (Tennessee Code Annotated 68-105).

9. Pre-Blast Survey. A pre-blast survey of property within one-half mile of the perimeter of operation shall be conducted and made part of the application. The proposed blasting schedule shall also be submitted. For any property not included in the pre-blast survey, the applicant shall provide sufficient information to demonstrate that the property owner withheld authorization to conduct the survey.

10. Blasting. In addition to mitigating potential damage to surrounding properties from blasting, the operator shall comply with the following:

a. Prior to commencement of operations, the proposed blasting schedule shall be conveyed to every resident living within one-half mile of the proposed blasting site by certified mail and such proof of notification shall be made available for public inspection. Any subsequent change in blasting schedule shall be preceded by a similar notification to the residents and to the zoning administrator;

b. A record of blasting shall be maintained for three years and made available for public inspection. The log shall detail the location of blasts, seismograph readings for each blast, pattern and depth of the drill holes, the amount of explosives used per hole, and the order and length of delay in the blasts;

c. The minimum standards for ground vibration and, airblast overpressure set forth below shall not be exceeded at any time.

i. Ground vibration: .50 inches per second peak particle velocity for frequencies below forty Hertz and 2.0 inches per second peak particle velocity for frequencies greater than 40 hz; the charge weight delay shall be adjusted accordingly to insure compliance with this standard.

ii. Airblast overpressure: 129 peak dBL (linear)-0. 1 hz high-pass system; 128 peak dBL (linear)-2.0 hz high-pass system; 124 peak dBL (linear)-5 or 6 hz high-pass system.

d. All blasts shall be monitored by an independent geotechnical expert in the field of seismology using best available current technology in measurement instrumentation. Such devices shall be placed one each at all four points of the compass surrounding the excavation area. Such monitoring devices shall produce a hard copy record in graph form or equivalent suitable for filing with the department of codes administration as a permanent record. Blasting shall only occur between seven a.m. and seven p.m. Monday through Saturday and may be further restricted to minimize disturbance to surrounding properties.

11. Reclamation/Closure Plan. The application shall include plans for the final contours of the site after the operation is terminated so as to render the land suitable for a use consistent with the general plan for Nashville/Davidson County, specifying the fill material which shall be nontoxic, nonflammable and noncombustible. Water may serve as fill material. The applicant shall execute a performance bond in an amount necessary for restoration of the property to assure the stability, drainage and configuration necessary for the intended reuse of the site, including the removal of all structures and machinery.

C. Pond/Lake.

1. Lot Area. The pond/lake shall not occupy more than ten percent of the total lot area.

2. Site Plan. Plans for the proposed pond/lake shall be submitted to the stormwater division of the department of water and sewerage services, the zoning administrator, the health department, and the board of zoning appeals. The plans shall consist, at a minimum, of a plan view and a typical cross section of the proposed pond/lake. The plan view shall include the configuration of the pond/lake with the dimensions and maximum depth areas, distances to property lines, drainage easements, structures, outlet structures, septic systems, proposed overflow spillway, and proposed landscaping. The typical cross section shall identify the bank and bottom slopes, maximum depth, outlet and/or overflow structures with elevations and normal water level evaluation. A description of the soil type(s) and hydraulic conditions at the site shall be provided to determine the feasibility of the pond/lake.

3. Construction and Maintenance. Construction and maintenance of the pond/lake shall be in accordance with all applicable state and local regulations.

4. Notification. Prior to conducting a special exception hearing before the board of zoning appeals, and immediately after receiving an application for a pond/lake special exception, the zoning administrator or, if applicable, the executive director of the planning department shall notify the district councilmember that an application has been submitted.

5. The following types of ponds/lakes shall be exempt from the provisions of this section:

a. Landscape or ornamental ponds less that one thousand square feet in area and less than three feet in depth;

b. Ponds/lakes used for irrigation or water treatment of a golf course;

c. Farm ponds constructed on a working farm;

d. Detention and/or water quality ponds required by the stormwater division of the department of water and sewerage services;

e. Wildlife ponds and wetlands required by or constructed with the assistance of the Tennessee Department of Environment and Conservation; and

f. Ponds/lakes on property owned by the metropolitan government. (Ord. BL2009-479 § 3, 2009; Amdt. 1 with Ord. BL2004-220 § 1 (part), 2004; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; § 1 (10) of Amdt. 1 with Ord. 96-555 § 4.3(I), 1997)

Article IV. Uses Permitted as Accessory (A)

17.16.240 Applicability.

The land use development standards in this article apply to uses which are accessory to a principal use on the same property, referenced as "A" in the zoning district land use table, Section 17.08.030. While not all accessory uses have land use development standards, those listed in this article have unique characteristics that warrant minimum restrictions on use. (Ord. 96-555 § 4.4 (part), 1997)

17.16.250 Residential accessory uses.

(Refer to zoning district land use table)

A. Accessory Apartment. A self-sufficient housekeeping unit shall be considered to be accessory to a single-family residence subject to the following:

1. The single-family residence is owner-occupied and meets all regulations of the district;

2. There is free and clear access between the housekeeping units without going outdoors;

3. Only one meter per utility may be installed to service both units;

4. A maximum of twenty-five percent of the gross floor area, excluding garage and utility space, may be used for the accessory apartment;

5. No entrance, which would be visible from the street, may be added solely for the purpose of providing direct outside access to the street;

6. The second unit must be occupied by a family member defined as grandmother, grandfather, mother, father, sister, brother, son, daughter, mother-in-law, father-in-law, sister-in-law, brother-in-law, son-in-law, daughter-in-law, aunt or uncle;

7. That the covenants provided herein may be enforced by the department of codes administration of the metropolitan government; and

8. An instrument shall be recorded with the register's office covenanting that the apartment is being established as an accessory use and may only be used under the conditions listed above.

B. Domesticated hens.

1. Type and number. Except upon property zoned for agricultural use or for properties in the R/R-A and RS/RS-A districts of five acres or more in size, a parcel of land shall contain the maximum number of domesticated hens identified below. Only hens are allowed; roosters are expressly prohibited. There is no restriction on domestic hen breeds.

Max. # Poultry	Parcel Area (sq. ft.)	Acreage
2	0 to 5,009	0.0 to 0.11
4	5,010 to 10,236	0.12 to 0.23
6	10,237 or more	0.24 or more

2. Location. All domesticated hens shall be kept in the side and/or rear yards of a residential property subject to the setback standards contained in this subsection. No domesticated hens shall be kept in the front yard. If domesticated hens are to be kept in the side yard, neither the hens nor the covered henhouse required by Section 8.12.020 of the Metropolitan Code shall be visible from any public right-of-way. Rather, the hens and henhouse shall be entirely screened from view of the public right-of-way using opaque fencing and/or landscaping.

3. Setbacks. An enclosure shall be located twenty-five feet away from any residential structure (other than the permit holder's residence) located in a residential zone district and ten feet from any property line.

4. Permit required. A valid permit issued by the department of health pursuant to Section 8.12.020 of the Metropolitan Code shall be obtained and maintained at all times.

C. Garage Sale.

1. Garage sale must be held or conducted in or upon real property, which the person or persons holding or conducting the same occupy as his or her residence(s).

2. Personal property belonging to someone else, may be sold provided homeowner or occupant receives no fee or a percentage of the proceeds as compensation for selling the items or for the use of residence.

3. Within any calendar year, a maximum of two garage sale events shall occur per residence. An event is defined as a garage sale that may occur for one day, two days and at most three days per an event.

4. A consignment sale shall be prohibited, or any other offer for sale in connection with which any owner or occupant of real property undertakes to sell personal property, as an agent of another.

5. An auction of a decedent's personal estate and/or real property conducted by a licensed auctioneer shall not be counted as a garage sale event nor be considered a consignment sale.

D. Home Occupation. A home occupation shall be considered an accessory use to a residence subject to the following:

1. Location

a. A home occupation must be conducted entirely within the dwelling unit or accessory building.

b. The home occupation shall not occupy more than twenty percent of the total floor area of the principal structure and shall not occupy more than one thousand square feet of total floor area within the principal structure and area of any legally permitted accessory buildings.

2. Employees and Vehicles

a. No more than one part-time or full-time employee not living within the dwelling may work at the home occupation location.

b. No more than five employees may reside within the dwelling at a home occupation location.

c. Parking a commercial vehicle on the premises or on a street adjacent to residentially zoned property is prohibited. Vehicles associated with the home occupation shall be limited to one passenger vehicle such as a motorcycle, automobile, pick-up truck, sport utility vehicle, van or similar, with a maximum axle load capacity of one and one-half tons.

d. No truck deliveries or pick-ups, except by public or private parcel services, are permitted.

3. Customer Visits

a. Customer visits must occur by scheduled appointment and only between the hours of 8:00 a.m. and 7:00 p.m., Monday through Saturday.

b. Customer visits shall be limited to no more than three visits per hour and a maximum of six total visits per day.

c. The permit holder shall maintain and make available to the codes department a log or register of customer appointments for each calendar year.

4. Outward Appearance

a. Signs, as defined in Section 17.32.030.B, exterior or interior displays of goods visible from the outside, or any exhibit that would indicate the dwelling unit or accessory building is being used for any purpose other than a residence are prohibited.

b. The residential character of the lot and dwelling must be maintained. A home occupation that requires a structural alteration of the dwelling to comply with a nonresidential construction code is prohibited. This prohibition does not apply to modifications to comply with accessibility requirements.

c. A home occupation may not produce noise, vibration, smoke, dust or other particulate matter, odorous matter, heat, glare, humidity, fumes, electrical interference, waste run-off, or other objectionable effects outside the dwelling unit or garage.

5. Activities

a. The storage of materials or goods shall be permitted in connection with a home occupation provided such storage complies with the following standards.

i. All materials or goods shall be stored completely within the space designated for home occupation activities.

ii. Only those materials or goods that are utilized or produced in connection with the home occupation may be stored within the dwelling unit or accessory building.

iii. All materials or goods shall be stored completely within the dwelling unit or accessory building.

iv. All flammable or combustible compounds, products or materials shall be maintained and utilized in compliance with Fire Code NFPA-30.

b. The following are permitted as home occupations that are allowed customer visits under subsection D.3:

i. Personal instruction, defined for the purposes of this section as services for training individuals or groups in academics, arts, fitness, personal defense, crafts, or other subjects of a similar nature;

ii. General office, defined for the purposes of this section as provision of executive, management, administrative, or professional services, but not involving medical services;

iii. Personal care services, defined for the purposes of this section as spa services and beauty and barber care. Personal care services do not extend to the care of or services for animals;

iv. Multimedia production, defined for the purposes of this section as staging and recording of video or audio productions that occur indoors and do not require sound to leave the premises; and

v. Artisan manufacturing, defined for the purposes of this section as the shared or individual use of hand tools, mechanical tools, and electronic tools for the manufacture of finished products or parts as well as the incidental storage, sales, and distribution of such products within the limitations of this section.

c. The following are not permitted as home occupations regardless of whether customer visits are allowed:

i. The manufacture or repair of automobiles and other transportation equipment.

ii. The repair of equipment that takes place outdoors.

iii. The outdoor storage of construction, scrap, or salvage materials.

iv. Animal grooming activities.

6. Permit Requirements

a. Home occupations that meet both of the following conditions are not required to acquire a permit for activity under this section:

i. The home occupation does not serve customers on the property; and

ii. The home occupation does not employ anyone who does not live within the dwelling.

b. Prior to issuance of a permit, the applicant shall provide the codes department with an affidavit verifying:

i. that the applicant has confirmed that operating the proposed home occupation would not violate any home owners association agreement or bylaws, condominium agreement, covenants, codes and restrictions, lease or any other agreement governing and limiting the use of the property proposed for the home occupation;

ii. that the property is the applicant's primary residence. Two documents indicating proof of primary residence shall be provided. Each document must be current and show the owner's name and address matching that of the property to be utilized for a home occupation. Acceptable documentation includes: (a) Tennessee Driver's license; (b) other valid State of Tennessee identification card; (c) Davidson County voter registration card; (d) current employer verification of residential address or a letter from the employer on company letterhead with original signature. (If the employer does not have letterhead, the signature of the employer must be notarized.); (e) current automobile, life or health insurance policy. (Wallet Cards not accepted); (f) paycheck/check stub, (g) work ID or badge, (h) Internal Revenue Service tax reporting W-2 form; or (i) a bank statement; and

iii. if the applicant is not the property owner, that the property owner is aware of the application and does not object to pursuit of the home occupation permit.

Further, the applicant shall provide proof of written notification to the owner of each adjacent property prior to filing the application. For each such adjacent property, proof of written notification shall be: (a) a signature of an owner; (b) a signed receipt of U.S. registered or certified mail addressed to an owner; or (c) notice from the U.S. Postal Service that registered or certified mail to an owner was refused or not timely accepted.

c. In single-family and two-family zoning districts, no more than one home occupation permit may be issued per lot.

d. The owner of the property: (1) must be a natural person or persons or trust; (2) may not be a limited liability entity, including without limitation a corporation or limited liability company; and (3) may not be an unincorporated entity, including without limitation a partnership, or joint venture.

e. The permit applicant must be the owner of the property, a relative of the owner of the property, or, if a renter, must have at least a one-year lease for the property. The applicant shall verify by affidavit that they comply with this subsection.

f. Only one permit may be issued per property owner, regardless of the number of properties owned by the property owner and regardless of whether the property owner is the applicant.

g. No person may be issued more than one permit.

7. Transferability and Enforcement

a. Permit Transferability. A permit issued for activities under this section shall not be transferred or assigned to another person, entity, or address, nor shall the permit authorize any person, other than the person named therein, to commence or carry on the business. Upon termination of the occupant's residency, the home occupation permit shall become null and void.

b. Revocation of Permit. Upon the filing of two or more verified complaints within a calendar year regarding a permit issued for activities under this section, the zoning administrator, or his or her designee, shall notify the permit holder in writing of such complaints and the zoning administrator, or his or her designee, will determine whether such complaints are valid. If it is determined that violations have occurred, the zoning administrator may revoke a permit as provided in Section 17.40.590. Once a permit has been revoked pursuant to this subsection, no home occupation permit shall be issued to the applicant for the same property for a period of one year from the date of the revocation. The permit holder may appeal the zoning administrator's decision to the board of zoning appeals for a public hearing as provided in this title. Other violations of this Subsection D are punishable by a fine of fifty dollars per day, per violation.

8. Permit expiration and renewal

a. A home occupation permit shall expire three hundred sixty-five days after it is issued unless it is renewed prior to its expiration.

b. The codes department may promulgate additional regulations by which a renewal application may be submitted.

c. The renewal application must include a statement verified by affidavit that the home occupation remains in compliance with Section 17.16.250.D.

9. Sunset date. The provisions of this subsection D shall expire and be null and void on January 7, 2023 unless extended by resolution of the metropolitan council.*

E. Short Term Rental Property Owner-Occupied. STRP owner-occupied is permitted as an accessory use in all zoning districts that allow residential use excluding NS districts provided a permit has been issued for operation of the property as an STRP pursuant to this section. In IWD, IR and IG, STRP is permitted as an accessory use to a multi-family use associated with Manufacturing, Artisan use.

1. All STRP owner-occupied activity must be permitted in accordance with Metropolitan Code § 6.28.030. (Res. RS2022-1380 § 1, 2022; Ord. BL2021-798 §§ 1, 2, 2021; Ord. BL2020-187 §§ 1, 2, 2020; Amdts. 1—5 to Ord. BL2019-48 § 1, 2020; Ord. BL2019-48 § 1, 2020; Ord. BL2019-6 § 2, 2019; Ord. BL2019-1633 §§ 6—10, 12, 13, 2019; Amdts. 5, 8, 9 to Ord. BL2017-608 § 6, 2018; Ord. BL2017-608 §§ 5, 6, 2018; Ord. BL2017-653 § 1, 2017; Amdt. 1 to Ord. BL2016-492 § 5, 2017; Ord. BL2016-492 § 5, 2017; Ord. BL2016-309 § 3, 2016; Ord. BL2015-1153 § 16, 2015; Ord. BL2015-1121 § 20, 2015; Ord. BL2014-909 § 3, 2015; Ord. BL2013-629 § 2, 2014; Amdt. 1 to Ord. BL2011-47 § 4, 2012; Ord. BL2011-47 § 4, 2012; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; § 2(2) of Amdt. 1 with Ord. 96-555 § 4.4(A), 1997)

17.16.260 Institutional accessory uses.

(Refer to zoning district land use table)

A. Day Care—Parents Day Out. Day care for preteenage children, for not more than twelve hours in any one week, shall be an accessory use to any institutional principal use.

B. Monastery or Convent. Such uses shall be an accessory use to a religious institution principal use.

C. School Day Care. Day care centers of unlimited size for before, during and after school programs shall be an accessory use to community education and college or university principal uses. (Ord. 96-555 § 4.4(B), 1997)

17.16.270 Office accessory uses.

(Refer to zoning district land use table)

A. Leasing/Sales Office. A tenant-leasing office is permitted as an accessory use to a multifamily development. Such office may include clubhouse, laundry and recreational facilities, and other such conveniences associated with a residential development. A developing subdivision of five or more residential lots may use a residential structure as a temporary sales office. (Ord. 96-555 § 4.4(c), 1997)

17.16.275 Medical accessory uses.

(Refer to zoning district land use table)

A. Medical Appliance Sales.

1. This use shall be located within the same building as the principal office use.

2. The leasable floor area for the accessory use may have one access point from within the office building as well as one outside entrance/exit.

3. This use shall occupy no more than ten percent of the gross floor area within the principal office building. (Ord. 98-1268 § 1 (part), 1998)

17.16.280 Commercial accessory uses.

(Refer to zoning district land use table)

A. Business Service.

1. This use shall be located within the same building as the office principal use.

2. The leasable floor area for the accessory use shall be accessible only from inside the office building. There shall be no signage advertising the service(s) to the general public on the exterior of the office building.

3. This use shall occupy no more than ten percent of the gross floor area within the principal office building.

B. Inventory Stock. The indoor storage of inventory stock shall be accessory to nonresidential principal uses.

C. Restaurant, Fast-Food/Restaurant, Full-Service/Restaurant, Take-Out.

1. This use shall be located within the same building as the office principal use.

2. The leasable floor area for the accessory use shall be accessible only from inside the office building. There shall be no signage advertising the service(s) to the general public on the exterior of the office building.

*Editor's note—Section 1 of Res. RS2022-1380, passed Feb. 15, 2022, states: That the existing provisions of Section 17.16.250.D of the Metropolitan Code of Laws are hereby extended indefinitely until otherwise acted on by the Metropolitan Council.

3. This use shall occupy no more than ten percent of the gross floor area within the principal office building.

D. Retail.

1. This use shall be located within the same building as the office principal use.

2. The leasable floor area for the accessory use shall be accessible only from inside the office building. There shall be no signage advertising the service(s) to the general public on the exterior of the office building.

3. This use shall occupy no more than ten percent of the gross floor area within the principal office building.

E. Personal Care Services.

1. This use shall be located in the same building as the principal use.

2. In total, all personal care uses shall occupy no more than ten percent of the gross floor area within the principal building. (Ord. BL99-117 § 1 (part), 2000; Ord. 96-555 § 4.4(D), 1997)

17.16.290 Communication accessory uses.

(Refer to zoning district land use table)

A. Amateur Radio Antenna. In all residential zone districts, transmission and reception antennae may be attached to a single tower accessory to any residential dwelling. The following restrictions shall apply.

1. Antennae may be mounted on a single tower or pole, or attached to the dwelling or accessory structure provided only one such support or attachment shall be permitted per lot. Guy wires shall not extend beyond the property boundary.

2. The maximum height of antennae shall be sixty feet, as measured from finished grade at the base of the support structure.

3. The tower or pole support shall be located to the rear of the dwelling and shall be set back from all property lines a distance equal to one-half the height of the entire structure, including antennae.

B. Multi-Media Production. This use shall be accessory to a college or university.

C. Satellite Dish. In all residential zone districts, a single satellite earth station antenna shall be permitted only as an accessory use to a residential dwelling. A ground-mounted antenna exceeding three and one-half feet in diameter shall be located behind the rear wall of the residence, shall comply with all minimum required setbacks and shall not exceed sixteen feet in height from grade. (Ord. 96-555 § 4.4(E), 1997)

17.16.300 Industrial accessory uses.

(Refer to zoning district land use table)

A. Fuel Storage. The storage of petroleum fuel, oils and lubricants may be an accessory use to activities in nonresidential zone districts provided that the quantity of stored fuels does not exceed what is incidental and necessary to conduct the business. Such fuels shall be quantified, stored, handled and used in compliance with the metropolitan fire code.

B. Tasting Room.

a. This use shall be located within the same building as the distillery or brewery, or within the same building as the office of the distillery or brewery.

b. The floor area used for the public portion of the tasting room shall be accessible only from inside the building.

c. The tasting room shall be limited to a maximum of no more than one thousand five hundred square feet gross floor area or ten percent of the gross floor area of the distillery or brewery, whichever is greater.

d. The hours and days of operation shall be limited to the hours and days of the distillery or brewery operating schedule.

e. Signage advertising the tasting room shall be no greater than sixteen square feet in size.

f. In a tasting room associated with a distillery, only liquor produced by the distillery may be served or sold.

g. In a tasting room associated with a brewery, only beer produced by the brewery may be served or sold, food may be served.

h. A minimum of five parking spaces shall be required. (Amdt. 1 to Ord. BL2012-204 § 3, 2012; Ord. BL2012-204 § 3, 2012; Ord. 96-555 § 4.4(F), 1997)

17.16.310 Waste management accessory uses.

(Refer to zoning district land use table)

A. Medical Waste. The storage and preparation for shipment of medical wastes shall be accessory to healthcare.

B. Recycling Collection Center. The collection and temporary storage of small recyclable items such as cans, glass and plastic containers, cardboard and paper shall be considered an accessory use to any nonresidential principal use, provided that all storage is within totally enclosed weather-resistant containers and the lot is kept debris-free. (Ord. 96-555 § 4.4(G), 1997)

17.16.320 Recreation and entertainment accessory uses.

(Refer to zoning district land use table)

A. Rehearsal Hall. This use shall be accessory to a college or university.

B. Stadium/Arena/Convention Center. This use shall be accessory to a college or university. (Ord. 96-555 § 4.4(H), 1997)

17.16.330 Other accessory uses.

(Refer to zoning district land use table)

A. Agricultural Activity.

1. Zone Districts. An agricultural activity shall only be permitted as an accessory use in the RS80, RS40, RS30 and RS20 and R80, R40, R30, and R20 residential zoning districts.

2. Location. The property containing the residence and agricultural activity shall not be located within the urban services district.

3. Lot Size. The minimum lot size shall be five acres.

4. Operation. An agricultural activity shall not include any roadside stand, nor shall a "cut your own" or "pick your own" activity of any items grown, produced or raised on or off-site be offered, whether such stand or offering is supervised or unsupervised, and whether the item(s) are offered for sale or not.

B. Domestic Animals/Wildlife. Native and exotic animals and common domestic farm animals, defined as Class II and Class III wildlife (Tennessee Code Annotated 70-4-403), which are kept outdoors for any purpose other than agricultural business, shall be an accessory use to a residence. The following land use development standards shall apply.

1. Zone Districts. Such animals shall only be permitted as an accessory use in the RS80, RS40, RS30, RS20 and R80, R40, R30 and R20 residential zone districts.

2. Location. The property containing the residence and farm animals/wildlife shall not be located within the urban services district.

3. Lot Size. The minimum lot size shall be five acres.

4. All pens, runs, paddocks, pastures and other open outdoor areas shall be fully enclosed by fencing. Barns, stables, stalls, and similar shelters shall not be located within two hundred fifty feet of a residential structure in a residential zone district.

5. Such accessory use shall obtain all necessary permits from the Tennessee Wildlife Resources Agency, Tennessee Department of Agriculture, and/or the metropolitan department of health pursuant to Title 8 of the Metropolitan Code of Laws. (Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 4.4(I), 1997)

Chapter 17.20

PARKING, LOADING AND ACCESS

Sections:

Article I. General Provisions

17.20.010 Purpose and intent.
17.20.020 Applicability.

Article II. Parking and Loading Requirements

17.20.030 Parking requirements established.
17.20.040 Adjustments to required parking.
17.20.050 Handicapped parking.
17.20.060 Parking area design standards.
17.20.070 Queuing requirements for drive-through facilities.
17.20.080 Off-site parking.
17.20.090 Deferred parking.
17.20.100 Shared parking.
17.20.110 Parking reduction for preservation of protected and heritage trees.
17.20.120 Provision of sidewalks.
17.20.125 Right to appeal and seek variances.
17.20.130 Loading space requirements.
17.20.135 Bicycle parking.

Article III. Access Management

17.20.140 Multimodal transportation analysis.
17.20.150 Protection of residential areas.
17.20.160 Access from nonarterial streets.
17.20.170 Access from arterial streets.
17.20.180 Visibility.
17.20.190 Measurement of distances.

Article I. General Provisions

17.20.010 Purpose and intent.

The purpose of this chapter is to establish standards for vehicular parking, loading and access in a manner which provides for reasonable utilization of land without adversely impacting abutting properties or the community as a whole. The requirements and standards of this chapter are intended to ensure the provision of adequate and functional loading facilities for all land uses, to allow full utilization of land commensurate with sufficient levels of roadway service, and to provide reasonable vehicular access to property while at the same time protecting the operational integrity and safety of public streets. (Ord. 96-555 § 5.1, 1997)

17.20.020 Applicability.

A. New Development. New development occurring after the effective date of the ordinance codified in this title shall comply with all parking, loading and access management provisions of this chapter.

B. Change in Legally Nonconforming Development. Developments with legally nonconforming parking and loading areas on the effective date of the ordinance codified in this title shall not increase the level of nonconformance by reducing the number of existing parking or loading spaces. The following provisions shall apply to any expansion or change in use:

1. If any existing, nonconforming property has a building expansion or change of use occur such that there is an associated increased parking or loading requirement in this title of less than twenty-five percent over what was required by this title before the expansion or change of use, only the number of parking or loading spaces required by the expansion or change of use shall be added.

2. If any existing, nonconforming property has a building expansion or change of use occur such that there is an associated increased parking or loading requirement in this title of twenty-five percent or more over what was required in this title before the expansion or change of use, all required parking and loading shall be provided.

C. Downtown Code. For properties zoned DTC district, see Chapter 17.37, Downtown Code (DTC) for parking, loading and access management provisions.

D. For properties zoned RN1, RN2, RL1, RL2, or RL3 districts, see Chapter 17.38 for additional parking dimensional standards. (Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2009-586 § 1(Exh. A, § 35), 2010; Ord. 96-555 § 5.2, 1997)

Article II. Parking and Loading Requirements

17.20.030 Parking requirements established.

The number of parking spaces required for each land use classification of this Zoning Code is established in Table 17.20.030. Each parking space designated therein must be available for use primarily to the occupants, tenants and/or residents of the related land use, unless otherwise specified in a shared parking arrangement approved pursuant to Section 17.20.100.

A. Nonclassified Uses. For uses not specifically classified in Table 17.20.030, the zoning administrator shall apply the parking requirements for a similar listed use.

B. Multiple Uses. Lots containing more than one use shall provide parking and loading in an amount equal to the total of the requirements for all of the uses, unless a shared parking arrangement is approved pursuant to Section 17.20.100, shared parking.

C. Fractions. Any fraction less than one-half shall be disregarded and any fraction of one-half or more shall be rounded upward to the next highest full number.

D. Bench Seating. Where seating consists of benches or pews, the equivalent number of seats shall be determined using the standards of the metropolitan building code.

E. Floor Area. For parking requirements that are based on the amount of square footage in buildings, calculations shall be on a gross floor area basis.

F. Parking Study. Several uses listed in Tables 17.20.030 and 17.20.070 have a large variability in parking and/or loading demand, making it impossible to specify a single parking or loading requirement. The parking or loading requirement for such uses shall be established by the metropolitan traffic engineer based upon a parking and/or loading study. The board of zoning appeals may grant a parking reduction to the minimum parking requirement for existing religious institutions within residential districts which have a valid use and occupancy permit on the effective date of the ordinance codified in this chapter. This reduction will be based on a parking study demonstrating that the parking requirement is excessive due to carpooling, van-pooling, mass transit, and/or pedestrian movement between the religious institution and the surrounding residential neighborhood.

G. Exemptions for Pedestrian Walkways. Retail malls which contain multiple tenants where shops are predominantly served by interior pedestrian walkways may base their parking requirement on gross leasable area within the mall.

H. Mixed-Use Projects. In a mixed-use project where a traffic impact study demonstrates that there is a reduction in the number of trips due to pedestrian linkages between land uses, the applicant may claim a similar reduction in required parking based upon a parking study reviewed by the traffic engineer and authorized by the board of zoning appeals or metropolitan planning commission as applicable. (Ord. BL2025-1007 § 6(Exh. B), 2025; Ord. BL2022-1412 § 2, 2022; Ord. BL2022-1073 § 5, 2022; Ord. BL2019-32 § 4, 2019; Amdt. 1 to Ord. BL2018-1288 § 1, 2018; Ord. BL2018-1288 § 1, 2018; Ord. BL2017-899 § 3, 2017; Ord. BL2017-654 § 12, 2017; Ord. BL2015-1121 § 4, 2015; Ord. BL2015-1210 § 3, 2015; Ord. BL2008-327 § 1, 2008; Ord. BL2006-1087 § 3, 2006; Ord. BL2006-973 § 4, 2006; Ord. BL2006-972 § 4, 2006; Ord. BL2002-1016 § 1, 2002; Ord. BL2000-477 § 1 (part), 2000; Amdt. 4 to Ord. BL2000-364 § 1 (part), 2000; Ord. BL99-117 § 1 (part), 2000; Amdt. 1 (part) with Ord. 99-1644 § 1 (part), 1999; Ord. 98-1321 § 1 (part), 1998; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 5.3(A), 1997)

HOW TO DETERMINE PARKING REQUIREMENTS AND OPTIONS

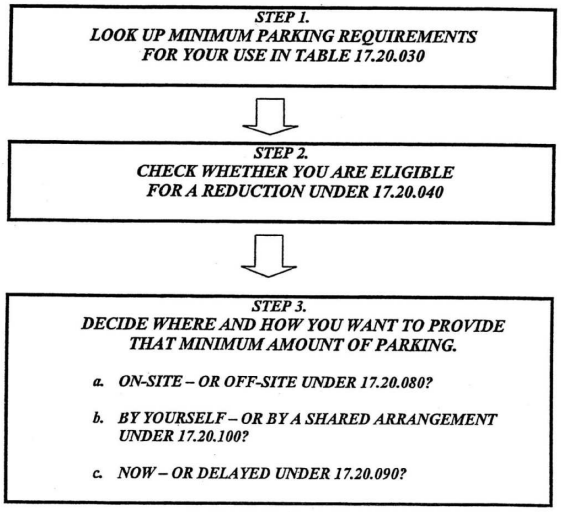


TABLE 17.20.030: PARKING REQUIREMENTS	
Land Use	**Minimum Parking Spaces Outside the UZO UZO District: See Section 17.20.040.G (exemptions are optional for calculating maximums. If not utilizing the exemptions, the standards are applied to the entire square footage of the use)**
Residential Land Uses	
Single-family	2 spaces (no maximum limit in UZO)
Two-family	2 spaces per unit (no maximum limit in UZO)
Multifamily	1 space per bedroom up to 2 bedrooms; .5 spaces per bedroom for each additional bedroom UZO district: Studio and/or 1 bedroom: 1 per unit; 2 bedroom or more: 1.5 per unit
Elderly housing	.5 spaces per unit
Mobile home dwelling	2 spaces, plus 1 guest space for every 4 units for guest parking
Accessory apartment	1 space
Boardinghouse	1 space per each rental unit, plus 1 additional space for owner or manager
Detached accessory dwelling unit	1 space (no maximum limit in UZO)
Historic bed and breakfast homestay	1 space per guestroom, plus 2 spaces per dwelling unit
Historic home events	To be determined by traffic engineer (Section 17.20.030F)
Home occupation	Same as principal use
Rural bed and breakfast homestay	1 space per room
Security residence	1 space
Institutional Land Uses	
Correctional facility	Established by the traffic engineer (Section 17.20.030F)
Cultural center	1 space per 300 square feet UZO district: 1 space per 1,000 square feet for museum; 1 space per 300 square feet for all others
Day care center	1 space for each 5 individuals accommodated, up to 50 individuals; for more than 50 individuals accommodated, 10 spaces plus 1 space per 10 individuals
Day care home—Large	1 space plus requirement for principal use, plus 2 spaces for patrons
Day care home—Small	1 space plus requirement for principal use, plus 1 space for patrons
Day care—Parent's day out	Established by the traffic engineer (Section 17.20.030F)
School day care	Same as day care center
Monastery or convent	1 space per bedroom UZO district: 1 space per 2 beds
Orphanage	1 space per employee UZO district: 1 space per 1,000 square feet
Religious institution	1 space per 4 seats in the sanctuary or equivalent worship space UZO district: 1 space per 6 seats in worship area or 1 space per 100 square feet in worship area without seats
Educational Uses	
Business school	1 space per 200 square feet
College or university	Established by the traffic engineer (Section 17.20.030F)
Community education	1 space per staff member, plus 10 visitor spaces (elementary and middle schools); plus 1 space per each 5 students (high schools)
Dormitory	1 space per each 2 rooming units
Fraternity/sorority house	Same as multifamily; plus 1 space per 300 square feet of meeting area
Personal instruction	1 space per 200 square feet
Vocational school	1 space per 200 square feet

TABLE 17.20.030: PARKING REQUIREMENTS	
Land Use	**Minimum Parking Spaces Outside the UZO UZO District: See Section 17.20.040.G (exemptions are optional for calculating maximums. If not utilizing the exemptions, the standards are applied to the entire square footage of the use)**
Office Uses	
Financial institution	1 space per 200 square feet UZO district: First 2,000 square feet: exempt; 1 space per 500 square feet for floor space in excess of 2,000 square feet
General office	1 space per 300 square feet UZO district: First 2,000 square feet: exempt; 1 space per 500 square feet for floorspace in excess of 2,000 square feet
Sales/leasing office	1 space per 200 square feet
Medical Uses	
Assisted care living	1 space per 3 beds
Hospice	1 space per bedroom
Hospital	2 spaces per bed
Medical appliance sales	1 space per 200 square feet
Medical office	1 space per 200 square feet UZO district: First 2,000 square feet: exempt; 1 space per 400 square feet for floorspace in excess of 2,000 square feet
Medical or scientific lab	1 space per 300 square feet UZO district: 1 space per 500 square feet
Nonresidential drug treatment facility	1 space per 150 square feet
Nursing home	1 space per 3 beds UZO district: 1 space per 5 beds
Outpatient clinic	1 space per 200 square feet
Rehabilitation services	1 space per 3 beds
Residence for the handicapped	1 space per 3 beds UZO district: 1 space per 5 beds
Veterinarian	1 space per 300 square feet UZO district: 1 space per 300 square feet
Commercial Uses	
After hours establishment	1 space per 75 square feet
Agricultural business	Established by the traffic engineer (Section 17.20.030F)
ATM (principal use only)	5 spaces
Automobile convenience	1 space for each pump plus 1 space for each 200 square feet
Automobile parking	None
Automobile repair	2 spaces, plus 4 spaces per service bay
Automobile sales, new and used	1 space per 250 square feet of enclosed sales area plus 1 space per 1,000 square feet of outdoor vehicle display area plus 2 spaces per service bay or stall UZO district: 1 space per 500 square feet of enclosed sales area plus 1 space per 2,500 square feet of outdoor vehicle display area plus 2 spaces per service bay or stall
Automobile service	4 spaces for each of the first four service bays or stalls, plus 2 spaces for each additional service bay or stall
Automobile service, oil change	2 spaces per bay or stall
Automobile service, oil change service	4 spaces for up to the first 4 stalls and 1 space for each additional stall
Bar or nightclub	1 space per 75 square feet
Bed and breakfast inn	1 space per bedroom
Business service	1 space per 200 square feet
Carpet cleaning	1 space per 500 square feet

TABLE 17.20.030: PARKING REQUIREMENTS	
Land Use	**Minimum Parking Spaces Outside the UZO UZO District: See Section 17.20.040.G (exemptions are optional for calculating maximums. If not utilizing the exemptions, the standards are applied to the entire square footage of the use)**
	UZO district: 1 space per 800 square feet
Car wash (full service)	2 spaces for each stall (excluding the actual stall itself), plus 1 space per employee UZO district: 1 space per 1,000 square feet
Car wash (self service)	2 spaces for each stall (excluding the actual stall itself)
Custom assembly	1 space per 400 square feet
Donation center, drop-off	1 space per 200 square feet
Funeral home	1 space per 3 permanent seats plus 1 space per 25 square feet for temporary seats. If no chapel is provided, 1 space per 500 square feet UZO district: 1 space per 3 permanent seats and if no chapel, 1 space per 500 square feet
Furniture store	1 space per 200 square feet of display area; 1 space per 1,000 square feet of storage area UZO district: 1 space per 1,000 square feet
Home improvement sales	1 space per 200 square feet UZO district: 1 space per 500 square feet
Hotel/motel	1 space per rooming unit, plus 1 space per 2 employees UZO district: 1 space per rooming unit plus 1 space per 4 employees plus required spaces for accessory uses
Inventory stock	1 space per 1,000 square feet
Kennel	1 space per 400 square feet
Laundry plants	1 space per 500 square feet
Liquor sales	1 space per 200 square feet UZO district: 1 space per 400 square feet
Major appliance repair	1 space per 500 square feet UZO district: 1 space per 800 square feet
Personal care services	1 space per 200 square feet UZO district: First 2,000 square feet: exempt; 1 space per 200 square feet for floorspace in excess of 2,000 square feet
Restaurant, fast-food	1 space per 100 square feet
Restaurant, full-service	1 space per 100 square feet UZO district: First 1,000 square feet: exempt; 1 space per 150 square feet for floorspace in excess of 1,000 square feet
Restaurant, take-out	10 spaces UZO district: Exempt
Retail	1 space per 200 square feet UZO district: General Retail: First 2,000 square feet: exempt; 1 space per 200 square feet for 2,000 to 50,000 square feet and 1 space per 250 square feet for 50,000 to 100,000 square feet and 1 space per 300 square feet for 100,000 to 400,000 square feet and 1 space per 350 square feet for greater than 400,000 square feet Convenience Retail: First 2,000 square feet: exempt; 1 space per 250 square feet thereafter;

TABLE 17.20.030: PARKING REQUIREMENTS	
Land Use	**Minimum Parking Spaces Outside the UZO UZO District: See Section 17.20.040.G (exemptions are optional for calculating maximums. If not utilizing the exemptions, the standards are applied to the entire square footage of the use)**
	Shopping Center Retail: 1 space per 250 square feet for less than 400,000 square feet and 1 space per 225 square feet for 400,000 to 600,000 square feet and 1 space per 200 square feet for greater than 600,000 square feet; Outdoor (except vehicle sales, limited): 1 space per 1,000 square feet of lot area Mobile vendors: 6 spaces for up to 1,200 square feet; 1 space for each additional 200 square feet
Riding stable	Established by the traffic engineer
Self-service storage	4 spaces
Vehicular sales, limited Vehicular rental/leasing	1 space per 250 square feet of enclosed sales area plus 1 space per 1,000 square feet of outdoor vehicle display area plus 2 spaces per service bay or stall UZO district: 1 space per 500 square feet of enclosed sales area plus 1 space per 2,500 square feet of outdoor vehicle display area plus 2 spaces per service bay or stall
Wrecker service	1 space per 200 square feet UZO district: 1 space per 250 square feet of office space
Communication Uses	
Amateur radio antenna	None
Audio/video tape transfer	1 space per 300 square feet
Multi-media production	Established by the traffic engineer (Section 17.20.030F)
Printing and publishing	1 space per 750 square feet
Radio/TV/satellite tower	None
Radio/TV studio	1 space per employee UZO district: 1 space per 400 square feet
Satellite dish	None
Telephone services	None
Industrial Uses	
Building contractor supply	1 space per 1,000 square feet
Distributive business/wholesale	1 space per 1,000 square feet
Fuel storage	None
Heavy equipment sales and service	1 space per 1,000 square feet of building area
Manufacturing, artisan	1 space per 1,500 square feet
Manufacturing, heavy	1 space per 1,500 square feet
Manufacturing, light	1 space per 1,500 square feet
Manufacturing, medium	1 space per 1,500 square feet
Natural gas compressor station	1 space per employee
Research service	1 space per 500 square feet UZO district: 1 space per 800 square feet
Scrap operation	1 space per employee, plus 1 space per 5,000 square feet of lot area UZO district: 1 space per 5,000 square feet of lot area
Tank farm	1 space per employee
Warehouse	1 space per 2,500 square feet
Transportation Uses	
Airport, medium or large commercial service and associated uses	Established by the traffic engineer (Section 17.20.030F)
Airport/heliport	Established by the traffic engineer (Section 17.20.030F)

TABLE 17.20.030: PARKING REQUIREMENTS	
Land Use	**Minimum Parking Spaces Outside the UZO UZO District: See Section 17.20.040.G (exemptions are optional for calculating maximums. If not utilizing the exemptions, the standards are applied to the entire square footage of the use)**
Boat dock (commercial)	1 space per slip or berth UZO district: 1 space per 5 berths plus 1 space per 500 square feet of dry storage
Bus station/landport	Established by the traffic engineer (Section 17.20.030F)
Bus transfer station	None
Commuter rail	Established by the traffic engineer (Section 17.20.030F)
Helistop	5 spaces
Motor freight	1 space per 1,000 square feet of indoor storage area
Park and ride lot	None
Railroad station	Established by the traffic engineer (Section 17.20.030F)
Railroad yard	1 space per employee
Water taxi station	Established by the traffic engineer (Section 17.20.030F)
Utility Uses	
Power plant	1 space per 400 square feet for office use plus 1 space per 2,000 square feet for other uses
Power/gas substation	None
Reservoirs/water tank	None
Safety services	1 space per 500 square feet
Wastewater treatment	Established by the traffic engineer (Section 17.20.030F)
Water/sewer pump station	None
Water treatment plant	Established by the traffic engineer (Section 17.20.030F)
Collection center	1 space per employee
Construction/demolition landfill	1 space per employee
Medical waste	1 space plus 1 per employee UZO district: 2 spaces per 3 employees
Recycling collection center	1 space per employee UZO district: 2 spaces per 3 employees
Sanitary landfill	1 space plus 1 per employee UZO district: 2 spaces per 3 employees
Waste transfer	1 space per employee UZO district: 2 spaces per 3 employees
Recreation and Entertainment Uses	
Adult entertainment	1 space per 75 square feet
Camp	Established by the traffic engineer (Section 17.20.030F)
Club	Established by the traffic engineer (Section 17.20.030)
Commercial amusement (inside)	1 space per 200 square feet
Commercial amusement (outside)	Established by the traffic engineer (Section 17.20.030F)
Country club	1 space per 300 square feet
Drive-in movie	1 space per employee
Driving range	Established by the traffic engineer
Fairground	Established by the traffic engineer (Section 17.20.030F)
Golf course	Established by the traffic engineer (Section 17.20.030F)
Greenway	Established by the traffic engineer (Section 17.20.030F)
Public park	Established by the traffic engineer (Section 17.20.030F)
Racetracks	Established by the traffic engineer (Section 17.20.030F)
Recreation center	Established by the traffic engineer (Section 17.20.030F)
Rehearsal hall	1 space per 3 seats
Stadium/arena/convention center	Established by the traffic engineer (Section 17.20.030F)
Temporary festival	Established by the traffic engineer (Section 17.20.030F)

TABLE 17.20.030: PARKING REQUIREMENTS	
Land Use	**Minimum Parking Spaces Outside the UZO UZO District: See Section 17.20.040.G (exemptions are optional for calculating maximums. If not utilizing the exemptions, the standards are applied to the entire square footage of the use)**
Theater	1 space per 3 seats—Established by the traffic engineer for facilities with a capacity of more than 500 spectators
Zoo	Established by the traffic engineer (Section 17.20.030F)
Other Uses	
Cemetery	1 space per employee
Domestic animals/wildlife	None
Hazardous operations	Established by the traffic engineer (Section 17.20.030F)
Mineral extraction	Established by the traffic engineer (Section 17.20.030F)

17.20.040 Adjustments to required parking.

Notwithstanding the provisions of Section 17.20.030:

A. No parking shall be required for uses located in the DTC district.

B. No parking shall be required for existing structures in the CF, CF-NS, MUI, MUI-NS, MUI-A, or MUI-A-NS districts which were constructed prior to December 24, 1974.

C. For uses located within the CF, CF-NS, MUI, MUI-NS, MUI-A, or MUI-A-NS districts within the I-40/I-65/I-265 loop south of the CSX railroad, and north of, or having frontage on, Gateway Boulevard, and which are located within a council-approved redevelopment district, the off-street parking requirement shall be one-quarter the requirement set forth in Table 17.20.030.

D. For uses located within the CF, CF-NS, MUI, MUI-NS, MUI-A, or MUI-A-NS districts within the I-40/I-65/I-265 loop, south of properties fronting on Gateway Boulevard, and which are located within a Council approved redevelopment district, the off-street parking requirement shall be one-half the requirement set forth in Table 17.20.030.

E. Within the urban zoning overlay district, for uses not eligible for a parking reduction or exemption pursuant to Sections 17.20.040A through 17.20.040D, the minimum amount of required parking shown in Table 17.20.030 shall be adjusted as follows. The combined effect of all applicable adjustments in this section shall not reduce the off-street parking required by Table 17.20.030 by more than twenty-five percent.

F. On-street parking on narrow streets within the urban zoning overlay district: Unless otherwise posted and pursuant to other limitations set forth in Section 17.20.040, on-street parking may be used to meet minimum parking requirements for properties on only one side of non-arterial streets within the urban zoning overlay district that are less than twenty-six feet wide (curb to curb). For streets that are oriented northerly to southerly, properties abutting the easterly side qualify. For streets that are oriented easterly to westerly, properties abutting the northerly side qualify.

G. UZO parking standards and requirements shall be construed as parking maximum requirements within the UZO and parking minimum requirements within any UDOs outside the UZO or within any SP which references UZO standards as a minimum or within any Neighborhood Landmark Overlay districts applied after November 15, 2022, within the UZO. No parking shall be required within the UZO, except as noted above. The UZO parking standard shall also be used to determine floor area ratio exemptions as set out in Section 17.12.070.D of this Ordinance for uses that are not required to provide parking.

Adjustment	Criteria	Parking Adjustment
Transit	Resident or nonresident use (other than an after hours establishment) is located within 660 feet of a public transit route.	10% reduction
Pedestrian Access	Nonresidential use is located where residents of all residential and mixed-use areas within 1,320 feet of the subject property can walk to and from the nonresidential use on a continuous sidewalk system (ignoring intervening streets)	10% reduction

Adjustment	Criteria	Parking Adjustment
Public Parking Lots	Nonresidential use is located within 660 feet of a parking lot that is available for use by the public without charge (either directly or through a validation program in which the subject use participates).	10% reduction
On-Street Parking	Single-family or duplex residential use is located along one or more public street frontages where public parking is permitted.	One legal on-street parking space (to a maximum of two parking spaces) can be substituted for every required off-street parking space provided the on-street space is located on a public right-of-way immediately abutting the property or tenant space seeking the parking adjustment. Where a partial space straddles an extension of a side property line, the space may be counted by the abutting property owner in front of whose property 50% or more of the space is located.
	Multifamily residential or nonresidential use is located along one or more public street frontages where public parking is permitted.	One legal on-street parking space can be substituted for ½ of every required off-street parking space provided the on-street space is located on a public right-of-way immediately abutting the property or tenant space seeking the parking
Contextual Front Setbacks	Residential or nonresidential use builds within ten feet of the rights-of-way in accordance with the contextual front setback provision contained in Section 17.12.035(A)(3) (Major new investment provision).	10% reduction

(Ord. BL2022-1412 § 3, 2022; Ord. BL2020-117 § 1, 2020; Ord. BL2019-111 § 1(Exh. A, § 28), 2020; Ord. BL2011-898 § 11, 2011; Ord. BL2009-586 § 1(Exh. A, § 36), 2010; Ord. BL2008-327 § 2, 2008; Ord. 2002-1017 § 1, 2002; Ord. BL2000-364 § 1 (part), 2000; Amdt. 2 with Ord. 99-1614 § 1, 1999; Ord. 96-555 § 5.3(B), 1997)

17.20.050 Handicapped parking.

An appropriate number of parking spaces shall be specifically designated, located and reserved for vehicles licensed by the state for use by the handicapped. (Ord. 96-555 § 5.3(C), 1997)

17.20.060 Parking area design standards.

A. Standard and Compact Spaces. Parking spaces shall be classified as standard or compact spaces with required dimensions in accordance with Table 17.20.060. No development shall be allowed to have more than thirty percent of the total required parking as compact spaces.

B. Parking Space and Aisle Dimensions. The minimum required dimensions of parking spaces and aisles are established in Table 17.20.060. For parking angles not shown in the table, dimensions shall be interpolated by the metropolitan traffic engineer. Minor deviations from these standards may be approved by the traffic engineer for parking structures. The dimensions for a sixty-five degree parking layout are graphically shown in Figure 17.20.060.

C. Parallel Parking. Parallel parking spaces shall have a minimum length of twenty-three feet and a minimum width of eight feet.

D. Residential Parking. Required parking spaces for a single-family or two-family dwelling unit shall be a minimum of eight feet wide and twenty feet long. Required parking spaces may be placed end to end. Garage doors opening toward a public street shall be a minimum of twenty feet from the property line. Within the urban zoning overlay district, no off-street parking area or loading area shall be located within any required street setback area, unless it is located on a driveway in accordance with Section 17.20.060G.

E. Use of Parking Areas. Required parking spaces and associated aisles and maneuvering areas shall be reserved for vehicle use at all times.

F. Off-street Parking Standards. The following standards shall apply to all off-street parking areas.

1. No parking space shall open directly onto a public street (single-family and two-family dwellings and townhomes are exempt).

2. Except for single-family and two-family dwellings, aisles, driveways and joint access easements shall not be used for parking vehicles.

3. Required parking spaces for all uses except single-family and two-family dwellings shall be designed to permit entry and exit without moving any other vehicle.

4. No parking space shall be located so as to block designated emergency access.

5. No portion of any required parking space shall be located within the right-of-way of a street or alley.

6. For parking areas with ten or more spaces, a minimum queuing distance of twenty feet shall be provided along all access drives between the street right-of-way line and the nearest parking space.

7. The zoning administrator or planning commission, as applicable, may request the traffic engineer to review site plans for on and off-site traffic circulation.

G. Paving and Marking. Permanent parking areas containing five or more spaces shall be surfaced with asphalt or concrete, or other hard-surfaced dustless materials, and shall be constructed to provide for adequate drainage. Each space shall be marked by a single or double stripe, with stall width measured centerline to centerline. Single-family and two-family dwellings shall be exempt from this requirement. All private driveways and parking areas shall also conform to the requirements of Section 13.12.200.

H. Curbs. Curbs or other equivalent means shall be provided to prevent any vehicle using a parking area from encroaching on any public right-of-way, on-site sidewalk, required landscaping area or adjacent property.

17.20.070 Queuing requirements for drive-through facilities.

The minimum number of queue spaces, including the vehicle being serviced, shall be provided according to Table 17.20.070. Each queue space shall be a minimum of twenty feet in length. Unless otherwise indicated in the table, queuing shall be measured from the point of ultimate service to the end of the queuing lane. Each queue lane shall be clearly defined and designed so as not to conflict or interfere with other traffic using the site. Each land use in Table 17.20.070 shall have a bypass lane with a minimum width of twelve feet and shall be clearly distinguished from the queuing lane by markings. Queuing vehicles shall not stand within a public street or alley rights-of-way.

Table 17.20.070
QUEUING REQUIREMENTS FOR DRIVE-THROUGH FACILITIES

Land Use	Min. Number of Queue (Drive-Through) Spaces
Bank teller lane	5
ATM	3
Restaurant, drive through	5

Car wash (self-service)	3
Car wash (automobile convenience)	3
Automotive service oil change station	3
Retail	4
Automobile convenience, gasoline pump island	30 feet away from any driveway ramp

(Ord. BL2006-972 § 5, 2006; Ord. 98-1321 § 1 (part), 1998; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 5.3(E), 1997)

17.20.080 Off-site parking.

All required parking spaces shall be located on the same lot as the principal use, provided that the zoning administrator or planning commission (as applicable) may permit all or a portion of the required parking spaces to be located on a remote and separate lot from the lot on which the principal use is located, based on the following provisions.

A. Qualifying Districts. Land uses on lots which contain existing buildings on the effective date of the ordinance codified in this chapter located within any of the commercial, industrial, office, ORI, ORI-NS, ORI-A, ORI-A-NS, mixed-use or shopping center districts or within a planned unit development (PUD) or urban design overlay district, may qualify for locating required parking on a separate lot. Land uses on lots which develop after the effective date of the ordinance codified in this chapter located within the mixed-use districts may also qualify for locating required parking on a separate lot. Any lot utilized to satisfy the parking requirements of an off-site land use must be zoned for automotive parking uses in the zoning district land use table of Section 17.08.030 and be connected to the principal use by a continuous sidewalk system. In a planned unit development, institutional overlay, or shopping center district both lots must be part of the same master development plan or a unified plat of subdivision as authorized by Chapter 17.40, Article V.

B. Separation.

1. The nearest property line of any off-site parking area required for a residential use shall not be located more than two hundred feet away from the residential use as measured from the nearest property line of the residential use.

2. The nearest property line of any off-site parking area for a nonresidential use:

a. Shall not be located more than five hundred feet away from the nonresidential use as measured from the nearest property line of the nonresidential use; and

b. Shall not be separated from the nonresidential use by any street with more than four travel lanes.

3. Properties in the MUI, MUI-NS, MUI-A, MUI-A-NS, CF, CF-NS, SCR, SCR-NS districts, and all religious institutions subject to Section 17.16.170(E)(2), shall be exempt from the above maximum separation provisions.

4. Within the qualifying districts, the above distance standards may be increased for those land uses identified in Table 17.20.030 in which the traffic engineer must establish the parking requirement, provided that the location of the off-site parking lot is recommended by the traffic engineer.

C. Common Ownership. Any off-site parking area shall be under the same ownership as the principal use to which it is accessory, or otherwise secured by a lease of no less than, three years with a guaranteed renewal option or the lease is equal to the term of any lease for the principal use, whichever is greater, and all necessary legal instruments shall be executed and recorded with the Register of Deeds against all parcels involved. Copies of all recorded lease agreements shall be provided to the zoning administrator prior to the issuance of zoning permits. All renewal agreements pertaining to off-site parking contained within the lease shall be provided to the zoning administrator prior to the end of a lease term. This is to ensure that the required number of spaces shall remain available throughout the life of the principal use.

D. Approval Criteria. The zoning administrator or planning commission (as applicable) shall base the decision to approve or disapprove a request for off-site parking on the recommendation of the metropolitan traffic engineer. (Ord. BL2019-111 § 1(Exh. A, §§ 29, 30), 2020; Ord. BL2011-898 § 11, 2011; Ord. 2002-1019 § 1, 2002; Ord. BL2000-364 § 1 (part), 2000; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 5.3(F), 1997)

17.20.090 Deferred parking.

To avoid requiring more parking spaces than actually are needed to serve a development and to reduce the visual and drainage impacts caused by large impervious areas, the zoning administrator or planning commission (as applicable) may allow some portion of the parking spaces required by this Zoning Code to be deferred if the conditions and requirements of this article are satisfied.

A. Criteria for Approval. As a condition precedent to obtaining a partial deferral, the developer shall demonstrate to the traffic engineer through a parking study that there is not a present need for the number of required parking spaces deferred. Based upon the favorable recommendation of the traffic engineer, the zoning administrator or planning commission (as applicable) may approve a deferred parking site plan. No deferred parking plan shall be approved unless the property contains sufficient land area upon which required parking can be constructed as a surface parking lot.

B. Implementation of Deferred Parking. If the justification for deferred parking is approved, the following provisions shall apply.

1. Deferred Parking Plan. A deferred parking site plan shall be prepared according to the following requirements.

a. The deferred parking plan shall be designed to contain sufficient space to meet the full parking requirements of this Zoning Code. The developer shall illustrate the layout for the full number of parking spaces, and shall designate which parking spaces are to be deferred. (See Figure 17.20.090)

b. Deferred parking spaces shall not be assigned to areas required for landscaping, or buffer yards, or areas that would otherwise be unsuitable for parking spaces because of the physical characteristics of the land or other requirements of this title.

c. The plan shall include a landscaping plan for the deferred parking area.

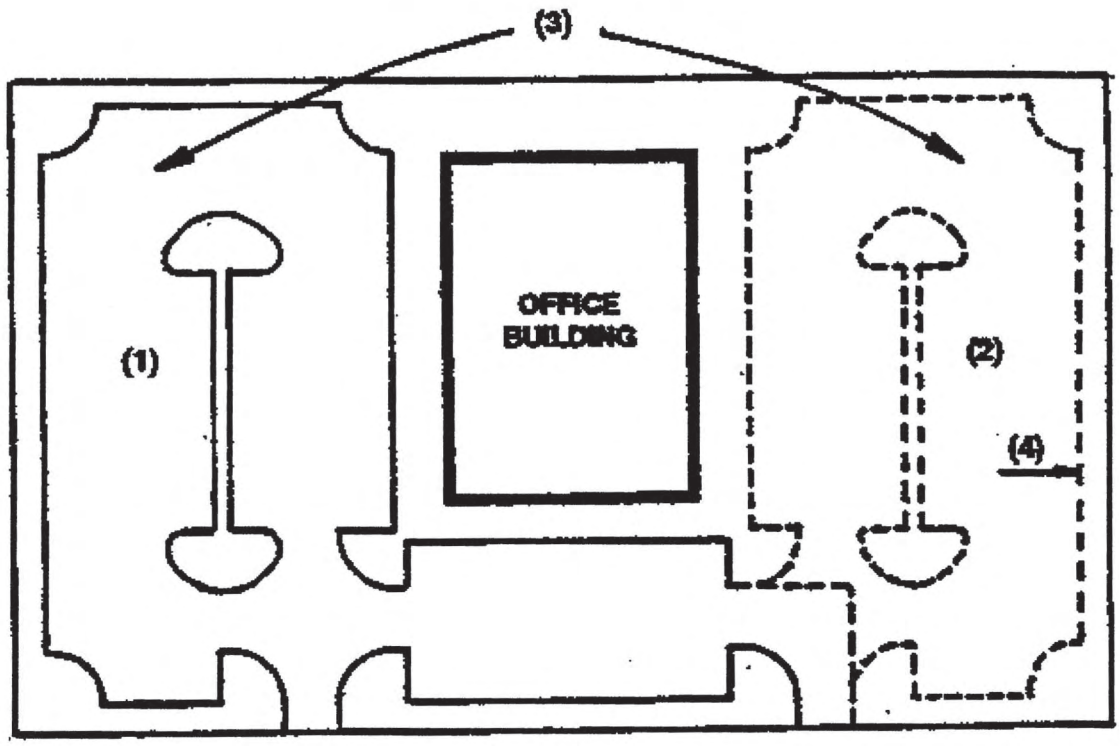
d. The plan shall be accompanied by a written commitment agreement specifying that any time after the date of issuance of the certificate of compliance, the deferred spaces shall be converted to parking spaces that conform to this Zoning Code at the developer's expense should the zoning administrator determine that the additional spaces are needed. The zoning administrator shall establish a reasonable time period for the property owner to bring the development into full compliance with the parking requirement. The developer or owner shall apply to the zoning administrator for renewal on a yearly basis. Alternatively, the developer may at any time request that the zoning administrator approve a permit allowing conversion of the deferred spaces to operable parking spaces. This written agreement will be noted on a recorded plat and in any restrictive covenants, and shall be referenced on the site plan.

e. The deferred or shared parking site plan shall contain the following note: Any expansion or change of use on this site shall conform to all parking requirements of this title.

2. Monitoring Deferred Parking. In order to effectively ensure that parking demand for developments with approved deferred parking site plans does not increase to levels where the total required parking spaces are needed, the owner must designate an employee or otherwise establish a transportation coordinator position to monitor and enforce proposed commuting patterns. Retail and restaurant land uses in the district land use table in Section 17.08.030 with less than one hundred employees will not require a transportation coordinator position.

3. Required Road Improvements. The approval of a deferred parking agreement shall not relieve or diminish any obligation by the developer to provide necessary infrastructure improvements required by ordinance or by a condition of development approval. (Ord. 98-1321 § 1 (part), 1998; Ord. 96-555 § 5.3(G), 1997)

Figure 17.20.090
DEFERRED PARKING



(1) ACTUAL PARKING LOT TO BE CONSTRACTED.
(2) UNBUILT PARKING LOT : PARKING LOT WILL BE BUILT IF SPACES ARE NEEDED AT A LATER TIME.
(3) (1) + (2) = THE TOTAL NUMBER OF PARKING SPACES WHICH WOULD BE MEET THE FULL REQUIREMENTS OF THE ZONING CODE.
(4) DEFERRED PARKING MAY NOT ENCROACH INTO ANY SETBACKS REQUIIRED BY ZONING CODE.

17.20.100 Shared parking.

Within the urban zoning overlay district, the zoning administrator or planning commission (as applicable) may approve a shared parking plan for a mixed use project when uses are located near one another and have different peak parking demands and operating hours, or other characteristics that would enable them to share parking areas without resulting in significantly higher on-street parking in surrounding areas or unauthorized use of other parking facilities, based upon a favorable recommendation of a shared parking study and site plan from the metropolitan traffic engineer. (See Figure 17.20.100) Shared parking arrangements shall be subject to the requirements set forth below.

Outside of the urban zoning overlay district, the zoning administrator or planning commission (as applicable) may approve a shared parking plan for a mixed use project when uses are located near one another and have different peak parking demands and operating hours, based upon a favorable recommendation of a shared parking study and site plan from the metropolitan traffic engineer. (See Figure 17.20.100) Shared parking arrangements shall be subject to the following requirements:

A. Agreements. In cases where the uses for which shared parking is requested are located on lots under different ownership, a three party agreement between the metropolitan government and owners shall be required and subject to approval by the metropolitan government's legal counsel. Any applicable easements and joint access corridors which tie the shared parking concept together will be required to be recorded on a final plat and in any restrictive covenants, and shall be referenced on the site plan.

B. Parking Zone Lot. Owners of multiple adjacent properties may petition to have their parcels considered as a single parcel (a "parking zone lot") for purposes of compliance with parking requirements, provided that the parking zone lot includes a sufficient number of spaces to meet the sum of the minimum off-street parking space requirements for each use within the parking zone lot. Such requests shall be reviewed and approved through the site plan approval process (Section 17.40.170(c)(2)). Documentation of an approved parking zone lot shall be recorded with the register of deeds. The approved parking zone lot may be amended or terminated through the site plan process upon (1) a petition filed by a majority of the owners whose properties include at least seventy-five percent of the square footage included in the approved parking zone lot prior to amendment or termination, and (2) submission of evidence that each use has made alternative provisions to satisfy its minimum off-street parking required by this code.

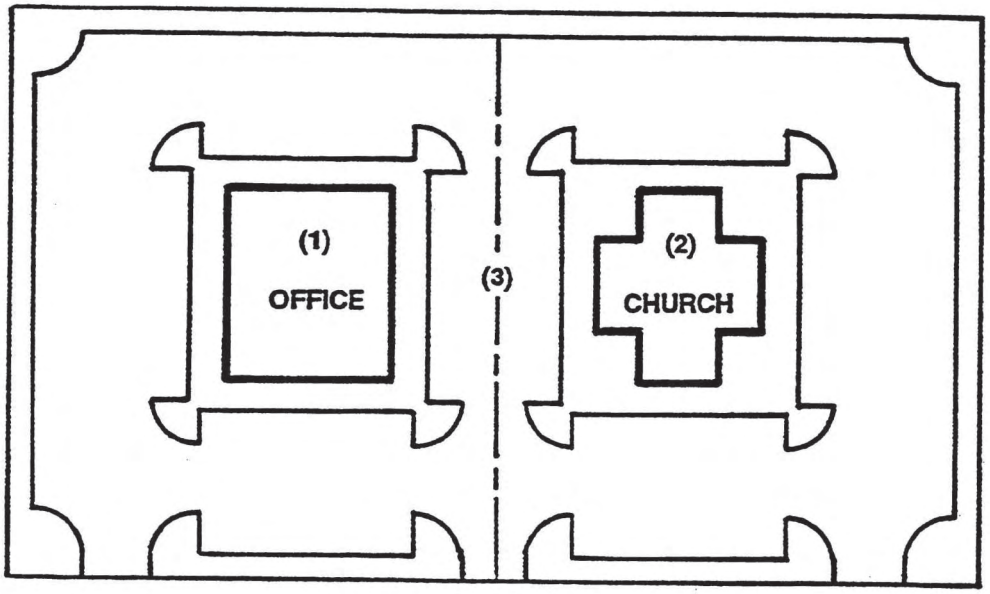
C. Criteria. In reviewing an application for a reduction in the minimum number of required parking spaces, the following shall be considered:

1. Characteristics of each use and projected peak parking demand, including hours of operation;

2. Potential reductions in vehicle movements afforded by multipurpose use of spaces by employees, customers or residents; and

3. Potential improvements in access, design, open space preservation and circulation afforded. (Ord. BL2000-364 § 18 (part), 2000; Ord. 96-555 § 5.3(H), 1997)

Figure 17.20.100
SHARED PARKING



(1) PEAK DEMAND IS ON WEEKDAYS.

(2) PEAK DEMAND IS ON SUNDAYS.

(3) ALTERNATING PEAK DEMAND WILL ALLOW SHARED PARKING CONCEPT TO WORK.

17.20.110 Parking reduction for preservation of protected and heritage trees.

A. A reduction of required parking spaces may be allowed when the reduction would result in the preservation of a protected tree with a trunk of twelve inches in diameter or greater or a heritage tree.

B. The reduction in required parking spaces shall not exceed the number of parking spaces required to prevent removal of protected or heritage trees, or the number in Table 17.20.110, whichever is less.

Table 17.20.110
MAXIMUM PARKING REDUCTION

Required Parking Spaces	Maximum Reduction
1—4	1
5—9	2
10—19	4
20 or more	20 percent

(Ord. BL2018-1416 § 3, 2019; Ord. 96-555 § 5.3(I), 1997)

17.20.120 Provision of sidewalks.

Purposes. Nashville's population and built environment has grown and continues to grow rapidly. Sidewalks are required to facilitate safe and convenient pedestrian movements for residents, employees and/or patrons, and to reduce dependency on the automobile, thus reducing traffic congestion on the community's streets and protecting air quality. The designation of an accessible and safe path for walking increases homeowner and community health and social connections.

Sidewalk networks minimize conflicts between vehicular and pedestrian movement along corridors and within and around centers identified in the General Plan (2015). Sidewalks offset a portion of the vehicular traffic consequences of population growth and increased density.

In consideration of these reasons, the sidewalk requirements below are aimed at creating a safe and convenient sidewalk network along the streets, corridors and centers identified in Nashville's General Plan (2015):

Nashville Next, Nashville's Strategic Transit Plan (2016): nMotion, and Nashville's Strategic Plan for Sidewalks and Bikeways (2017): WalknBike, where the impact of Nashville's growth is greatest.

These provisions are not intended to and shall not decrease the allowable floor area ratio for development.

A. Applicability.

1. Multi-family or non-residential development or redevelopment. All provisions of this section shall apply to the development or redevelopment of multi-family or nonresidential property when the property is located within the urban services district, or within a center designated in the general plan, or any of the property frontage is within a quarter-mile of the boundary of a center designated in the general plan, or the property is on a street in the major and collector street plan. Properties on the opposite side of navigable waterways or controlled access highways from a center designated in the general plan are not subject to this provision. For the purposes of this subsection, there shall be a presumption that the current appraised value of all structures on the lot is that established by the office of the metropolitan tax assessor. Development or redevelopment of multi-family or nonresidential property shall include one of more of the following:

a. Construction of a new structure on a vacant lot, including lots on which all structures have been or are planned to be demolished; or

b. The cost of any one renovation equal to or greater than fifty percent of the current appraised value of all structures on the lot, or the value of multiple renovations during any five-year period equal to or greater than seventy-five percent of the current appraised value of all structures on the lot; or

c. The cost of any one expansion equal to or greater than twenty-five percent of the current appraised value of all structures on the lot, or the value of multiple expansions during any five-year period equal to or greater than fifty percent of the current appraised value of all structures on the lot; or

d. The total building square footage of any one expansion is equal to or greater than twenty-five percent of the total square footage of all structures on the lot, or the total building square footage of multiple expansions during any five-year period is equal to or greater than fifty percent of the total square footage of all the structures on the lot.

2. Single-family or two-family construction. All provisions of this section shall apply to the construction of new single-family or attached or detached two-family structure(s) when the property is within the Urban Zoning Overlay, or within a center designated in the general plan, or any of the property frontage is within a quarter-mile of the boundary of a center designated in the general plan, or the property is on a street in the major and collector street plan in the urban services district (arterial and collector streets). Properties on the opposite side of navigable waterways or controlled access highways from a center designated in the general plan are not subject to this provision.

3. Waiver requests for all development types. Notification of a waiver request shall be sent to the appropriate district councilmember, by way of the

metropolitan council office, by the metropolitan department of codes administration. Building permit(s) shall not be issued until at least five business days from the date notification was sent to the metropolitan council office.

The zoning administrator may waive, in whole or in part, the requirements of this section upon request by the property owner or its agent under the following circumstances:

a. Where there is an existing substandard sidewalk, insufficient right-of-way, existing physical features on the property such as utilities, a ditch or drainage ditch, historic wall(s) or stone wall(s), tree(s), steep topography, or other hardship, the zoning administrator may approve an alternative design, or eliminate the sidewalk requirement in whole or in part if it is determined that a new sidewalk would not further the goal of extending or completing a sidewalk network. In addition to the executive director of the planning department, the zoning administrator shall consult with the director of public works and the director of water services, or their designees, prior to making any final determination.

b. In unique situations where a public sidewalk is required by subsection 17.20.120 A.1. or A.2. and installation is required by subsection C of this section, the zoning administrator may allow the building permit applicant to make the in-lieu contribution for all or a portion of the street frontage(s) as an alternative to construction. In addition to the executive director of the planning department, the zoning administrator shall consult with the director of public works and the director of water services, or their designees, prior to making any final determination. This provision shall be limited to unique situations that are not typical.

c. For properties eligible for public incentives for affordable housing from the metropolitan government, where the appropriately designated metropolitan government department has provided the property owner with a letter indicating that said property or properties will be utilizing public funds for land or construction of the structure, the zoning administrator may waive the requirements of Section 17.20.120 A., C., and/or D., or, rather than waive the sidewalk requirements, the zoning administrator may only require sidewalks at key locations if recommended by the executive director of the planning department, or his or her designee.

d. Where reconstruction is required due to circumstances beyond the control of the property owner, including, but not limited to, natural disaster, fire, or accident, the zoning administrator may waive the requirement for new sidewalk construction.

e. For properties within Historic Zoning Overlay Districts, where new sidewalks would be detrimental to the historic nature of the street, and the waiver has been recommended by the executive director of the metropolitan historical commission, or his or her designee, the zoning administrator may waive the requirement for new sidewalk construction.

f. Where a greenway exists or is reasonably expected to be constructed within six years that would provide similar connectivity, and the waiver has been recommended by the executive director of the metropolitan planning department, or his or her designee, the zoning administrator may waive the requirement for new sidewalk construction.

g. For properties situated on corner lots in R and RS zoned districts, where new construction of sidewalks is determined to be inappropriate, the zoning administrator may permit alternative requirements. The zoning administrator shall consider the amount of street frontage and classification of fronting streets when making a determination. In addition to the executive director of the planning department, the zoning administrator shall consult with the director of public works and the director of water services, or their designees, prior to making any final determination.

B. On-Site Sidewalk Installation For Multi-Family and Nonresidential Development. A continuous, all-weather internal sidewalk network, constructed to a minimum width of five feet, shall connect all pedestrian building entryways to parking areas and all public rights-of-way. Sidewalks shall be designed and constructed to be distinguishable from driving surfaces.

C. Public Sidewalk Installation. The provisions of this subsection apply to all property frontage, regardless of whether sidewalks are provided in public right-of-way or pedestrian easements.

1. Construction of new sidewalks is required along the entire property frontage under any one or more of the following conditions, unless the property abuts a sidewalk segment that the department of public works has funded and scheduled for construction:

a. When there is existing sidewalk in need of repair or replacement.

b. To extend the existing sidewalk, or sidewalk required as part of an existing final development plan for a specific plan zoning district or issued permit within any other zoning district, on an abutting development.

c. Existing sidewalk present on the same block face.

d. Multi-family or nonresidential properties within the Urban Zoning Overlay.

e. Multi-family or nonresidential properties along a street in the major and collector street plan.

2. Sidewalk Design Standards.

a. Sidewalk dimensions and required elements shall comply with the major and collector street plan or, for a street not in the major and collector street plan, the adopted standards of the metropolitan government. Design of sidewalks shall comply with approved standards established by the department of public works.

b. Obstructions are prohibited within the required pedestrian travelway, but may be located within a grass strip/green zone or frontage zone. Prior to the issuance of use and occupancy permits, existing obstructions shall be relocated outside of the required pedestrian travelway.

c. For multi-family and nonresidential development or redevelopment, street trees shall be required within the grass strip/green zone or frontage zone for any sidewalk constructed within a center designated in the general plan.

i. Trees shall be installed according to the provisions of the Metro Nashville Street Tree Specifications prepared and maintained by Metro Water Services in conjunction with Metro Public Works, Planning and Codes.

ii. Street trees shall be chosen from the Urban Forestry Recommended Tree List. Canopy trees shall be installed, except where conflicts with overhead electrical power lines exist. In those instances, understory trees may be substituted.

iii. The owner of the property frontage along which the street trees are installed shall maintain the trees installed per this title according to the provisions of the Metro Nashville Street Tree Specifications. The owner of the property frontage shall execute and record a restrictive covenant agreeing to these maintenance responsibilities.

iv. Required street trees shall be depicted on a landscape plan, which shall be submitted with construction drawings for the sidewalks. The landscape plan and specifications shall be prepared by, or under the direction of, and bear the seal of a professional landscape architect registered in Tennessee.

v. Trees installed pursuant to this section shall be eligible for credit toward the tree density required by Chapter 17.28 of this title.

D. Contribution to the fund for the pedestrian benefit zone as an alternative to sidewalk installation.

1. When a public sidewalk is required by subsection A, but installation is not required by subsection C of this section, the building permit applicant may make a financial contribution to the fund for the pedestrian benefit zone in lieu of construction. The value of the contribution shall be the average linear foot sidewalk project cost, including new and repair projects, determined by July 1 of each year by the department of public works' review of sidewalk projects contracted for or constructed by the metropolitan government. The contribution in-lieu of construction shall be no more than three percent of the total construction value of the permit.

2. Any such contributions received by the metropolitan government shall be assigned and designated for implementation of the strategic plan for sidewalks and bikeways, as approved by the planning commission. The applicant's payment shall be allocated within ten years of receipt of the payment within the same pedestrian benefit zone as the property to be developed; otherwise, the payment shall be refunded to the building permit applicant.

3. Contribution to the pedestrian network as an alternative to sidewalk installation required under this section shall be received by the department of public works, and written confirmation of the contribution shall be sent to the department of codes administration prior to the issuance of a building permit.

E. Dedication of Right-of-Way and Easements Required. Dedication of right-of-way and/or public pedestrian easement is required to permit present or future installation of a public sidewalk built to the current standards of the metropolitan government.

F. Improvements required or elected on public rights-of-way and/or public pedestrian easements under subsection C of this section shall be reviewed for compliance by the department of public works. No building permit shall be issued by the department of codes administration until the department of public works has released the building permit. Prior to the department of codes administration authorizing final use and occupancy, the department of public works shall inspect and approve the sidewalk improvements in the public rights-of-way and/or public pedestrian easements. (Ord. BL2022-1122 § 5, 2022; Ord. BL2020-288 § 1, 2020; Ord. BL2019-1659 § 1, 2019; Ord. BL2016-493 § 1, 2017; Ord. BL2004-491 § 1, 2005; Amdt. 1 with Ord. BL2004-289 § 1, 2004; Amdt. 1 with Ord. BL2000-479 § 1, 2000; Ord. 96-555 § 5.3(J), 1997)

Editor's note—Section 17.20.120 is no longer enforced and is subject to a permanent injunction. See Agreed Entry of Judgment and Injunction entered 9/22/23 in *Knight, et al., v. Metropolitan Government,* U.S. District Court, M.D. Tenn., Case No. 3:20-cv-00922.

17.20.125 Right to appeal and seek variances.

The provisions of Section 17.20.120 may be varied or interpretations appealed in conformance with Chapter 17.40, Administration and Procedures. The board of zoning appeals may require a contribution to the pedestrian network consistent with subsection 17.20.120.D., an alternative sidewalk design, or other appropriate mitiga-

tion for the loss of the public improvement as a condition to a variance. The board of zoning appeals shall not accept an application until the zoning administrator has made a determination on the requirement as set forth in this chapter. (Ord. BL2019-1659 § 2, 2019; Ord. BL2016-493 § 2, 2017; Amdt. 1 with Ord. BL2004-289 § 2, 2004)

17.20.130 Loading space requirements.

A. The number of loading spaces required for each land use classification of the Zoning Code is established in Table 17.20.130

Table 17.20.130
NUMBER OF LOADING SPACES REQUIRED

Land Use	Gross Floor Area (Square Feet)	Loading Spaces (10 by 25 feet)	Loading Spaces (10 by 50 feet)
Institutional, educational, medical, communication, office	10,000—99,999	1	0
	100,000—149,999	0	1
	150,000 and over	0	2
Commercial, recreational and entertainment	2,000—9,999	1	0
	10,000—25,000	0	1
	Over 25,000	0	2
Industrial, transportation, utility, waste management	0—1,999	1	0
	2,000—10,000	0	1
	Over 10,000	0	2
Other uses	Based on a recommendation from the traffic and parking engineer subject to approval by the zoning administrator.		

B. Size of Loading Spaces Provided. The minimum dimensions of loading spaces, open or enclosed, shall be twelve feet in width by fifty-five feet in length, with a minimum vertical clearance of fifteen feet. Where tractor-trailer units will be using the facility, the minimum length shall be sixty-five feet.

C. Paving Standards. All open loading spaces shall be surfaced with concrete, or other hard-surfaced dustless materials, and shall be constructed to provide for adequate drainage.

D. Use of Loading Spaces. Required loading spaces and associated aisles and maneuvering areas shall be used for vehicle loading/unloading only.

E. Layout. All loading spaces shall comply with the following design requirements.

1. No loading space shall be located within the right-of-way of a public street. Any loading space or door shall be set back far enough from the right-of-way so that no portion of the right-of-way is occupied by trucks or other vehicles while loading or unloading.

2. The location of the loading space shall not interfere with the free circulation of vehicles in the off-street parking area. Where loading spaces are directly adjacent to or integrated with an off-street parking lot, the metropolitan traffic engineer may require installation of physical barriers or other means of separating loading spaces from parking areas and pedestrian traffic.

3. No loading space shall be located so as to block access by emergency vehicles. (Ord. 99-1643 §§ 1, 2, 1999; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 5.3(K), 1997)

17.20.135 Bicycle parking.

A. Space Required. Bicycle parking shall be provided for all principal uses located within the Urban Zoning Overlay district or an Urban Design Overlay district.

1. Bicycle parking shall be required as provided in Table 17.20.135 for any new building or structure and any addition or enlargement of an existing building of more than fifty percent of the gross floor area. For additions or enlargements, the bicycle parking requirement shall apply only to the additional building floor area.

B. Unless otherwise expressly stated in Table 17.20.135, a minimum of two publicly available bicycle spaces shall be provided for every use. Unless specified in Table 17.20.135, residential uses shall not be required to provide bicycle parking.

C. One vehicle parking space required by Section 17.20.030 may be used as a space for providing bicycle parking.

D. Where subsurface conditions or below-ground infrastructure make bicycle parking difficult or infeasible, the zoning administrator, based on a recommendation from the planning department, may reduce or waive the

required bicycle parking and/or may approve different design and location standards for required bicycle parking spaces.

E. Required bicycle parking spaces design and location standards shall meet the recommendations of the Association of Pedestrian and Bicycle Professionals (APBP) Bicycle Parking Guidelines.

1. The required publicly available bicycle parking spaces shall be located in a convenient and visible area within fifty feet of a principal entrance or other approved location by the zoning administrator with guidance from the department of public works and shall permit the locking of the bicycle frame and one wheel to a rack or fixture and shall support a bicycle in a stable position without damage to the wheels, frame or components.

2. Required bicycle parking spaces shall not be located on a residential balcony.

Table 17.20.135
BICYCLE PARKING REQUIREMENTS

Use	Minimum Bicycle Parking Requirement
Residential, Multi-Family	2 spaces or 1 space per 4 dwelling units, whichever is greater, provided the requirement for the residential, multi-family use shall not exceed 50 spaces. 2 of the required spaces or 20% of the total spaces, whichever is greater, shall be publicly available
Boardinghouse	2 spaces or 1 space per 4 rental units, whichever is greater, provided the requirement shall not exceed 20 spaces
Community Education	1 space per classroom
General Office	2 publicly available spaces per establishment or 1 space per 15,000 square feet, whichever is greater
Restaurant, fast food	4 publicly available spaces per establishment
Restaurant, full-service	4 publicly available spaces per establishment
Retail	2 publicly available spaces per establishment or 1 space per 5,000 square feet, whichever is greater

Fractions: Any fraction less than one-half shall be disregarded and any fraction of one-half or more shall be rounded upward to the next highest full number. (Ord. BL2014-714 § 1, 2014)

Article III. Access Management

17.20.140 Multimodal transportation analysis.

A. The purpose of a multimodal transportation analysis is to evaluate the impact of a proposed development on the safety, operations, and condition of the adjacent transportation network, and to identify what transportation mitigations, if any, are necessary to offset the impact caused by additional trips generated by the proposed development.

1. Elements of the adjacent transportation network to be evaluated may include intersection operational performance, multimodal connectivity, and safety of the transportation network for all road users.

2. Transportation mitigations may include, but are not limited to, the provision of roadway traffic operations and capacity facilities; modifications to the roadway network that increase safety; micromobility enhancements; the addition or enhancement of bicycle, pedestrian, and transit facilities; and/or development of programs to encourage an appropriate mix of travel modes and complete streets where appropriate.

B. Requirements for a Multimodal Transportation Analysis. A multimodal transportation analysis shall be required by the planning department for applications to the metropolitan planning commission (MPC) or the Nashville Department of Transportation and Multimodal Infrastructure (NDOT) for all other development which contains:

1. Residential developments with more than seventy-five dwelling units; or

2. Nonresidential developments of more than fifty thousand square feet; or

3. Combinations of residential and nonresidential uses expected to generate seven hundred fifty trips or more per day, or one hundred or more peak-hour trips; or

4. In the opinion of NDOT, a multimodal transportation analysis is needed for developments not meeting the above thresholds.

NDOT shall set requirements for the level of analysis, modes of transportation considered, and analysis methodology for applicants meeting any of the above thresholds.

C. Levels of Multimodal Transportation Analysis Required.

1. Level 1. A level 1 multimodal transportation analysis is required for smaller scale projects that are not anticipated to have a significant impact on the overall transportation system but will have impacts at the site access.

a. A level 1 multimodal transportation analysis shall be required in cases where the proposed development will create a through connection between collector roadways and/or roadways of greater functional classification based on the Major and Collector Street Plan.

b. The project access points to public roadways, public alleys, private driveways, and joint access easements will be evaluated, and this includes those loca-

tions that the planning department or NDOT determines are necessary to provide for an adequate review of the proposed project's impact.

c. The multimodal infrastructure and the safety of all modes of transportation in the vicinity of the project will also be analyzed as part of a level 1 analysis.

2. Level 2. A level 2 multimodal transportation analysis is required for larger scale development projects that are anticipated to have a significant transportation impact on the overall transportation system. A level 2 multimodal transportation analysis will evaluate impacts at site access points and appropriate nearby intersections as well as impacts to the multimodal transportation network and safety for all modes of transportation.

a. A level 2 analysis will include an analysis of the project's access points, all roadways serving the project; and, all intersections up to the first collector roadway, or the first roadway of higher functional classification, and the intersections of these roadways with arterial roadways based on the major and collector street plan.

b. Elements that may be considered by NDOT during review of a level 2 multimodal transportation analysis request include parking supply, existing or planned multimodal infrastructure adjacent to the development, proximity to transit, population density of the area adjacent to the development, and traffic congestion.

c. The study area includes intersections and transportation facilities that the planning department and NDOT determine are necessary to provide for an adequate review of the proposed project's impacts.

D. Rezoning Analysis. The purpose of a rezoning analysis is to analyze the capacity of the existing transportation system to accommodate potential new development in the absence of mitigation measures.

1. A rezoning analysis compares the typical and maximum potential trip generation of representative uses permitted in the existing zoning with the typical and maximum representative uses permitted under the requested zoning or through design-based districts.

2. Completing a rezoning analysis does not preclude the need to complete a more thorough multimodal transportation analysis upon submission of development plans for the subject property(s) and/or requests for the issuance of permits for construction.

3. Specific mitigation measures will be identified through the detailed multimodal transportation analysis process.

E. Multimodal Transportation Analysis Scoping. Upon determination that a new development meets the threshold for a multimodal transportation analysis, the applicant must contact NDOT and submit a Scoping Evaluation Form for review. The purpose of the form is to provide NDOT with basic information about a new development, set analysis parameters, and guide the applicant through a preliminary assessment of the transportation network within the study area. NDOT shall review and provide comments or approval of a submitted scoping document within ten business days of submittal.

F. Phased Development.

1. If a development is phased, the sequence and timing of a development shall be incorporated into the multimodal transportation analysis.

2. An overall multimodal transportation analysis may be required with additional analysis for individual phases of construction.

3. Completing a multimodal transportation analysis for one phase of development does not preclude the need to complete additional analysis upon submission of development plans for the subject property(s) and/or requests for the issuance of permits for construction.

G. Waiver of a Multimodal Transportation Analysis. A property owner or their representative who demonstrates that a development will not have a significant impact on the transportation system may request a waiver of a multimodal transportation analysis.

1. A request to waive a multimodal transportation analysis shall be made by a property owner or their representative in writing to NDOT and for applications to the planning commission, the planning department. Sufficient documentation shall be included that supports the waiver request.

2. A copy of the request to waive a multimodal transportation analysis shall concurrently be sent by the property owner or their representative to the member(s) of the metropolitan council in whose district(s) the development is located.

3. NDOT will make a decision on the waiver request within fifteen business days, and for applications to the planning commission, will consider a recommendation from the planning department.

H. Approval of Multimodal Transportation Analysis.

1. If a multimodal transportation analysis is required per Subsection B above, the multimodal transportation analysis and transportation mitigation strategies should be reviewed and approved by NDOT prior to the planning commission review. The planning department may recommend deferral as a staff recommendation to the planning commission for applications without an approved multimodal transportation analysis.

2. The multimodal transportation analysis shall be approved by NDOT and, for applications to the planning commission, the planning department, with all applicable performance requirements incorporated into any site and building plans.

3. NDOT shall review and provide comments or approval of a submitted multimodal transportation analysis within twenty business days of submittal.

I. Applicability of a Multimodal Transportation Analysis. A previously approved multimodal transportation analysis may require revision if the following criteria are met:

1. Zoning approval or permit approval not obtained within sixty months (five years) of multimodal transportation analysis approval; or

2. Changes in access points from proposed development are made from site plan submitted as part of approved multimodal transportation analysis; or

3. Increase in daily or peak hour trips resulting from a change in proposed land use types or intensities.

4. Developments meeting the above criteria shall revise and resubmit a multimodal transportation analysis. If a multimodal transportation analysis is required for a submitted planning application, the planning department may recommend deferral as a staff recommendation to the planning commission for applications with a multimodal transportation analysis meeting any of the above criteria without approval from NDOT.

J. Implementation of Multimodal Transportation Analysis Recommendations.

1. The multimodal transportation analysis may consider the capital improvements budget and improvements for which council has adopted a resolution appropriating funds.

2. Any required improvements which have not been funded or otherwise completed by the metropolitan government shall be completed by the developer prior to the issuance of a use and occupancy permit by the zoning administrator.

3. When it can be demonstrated that a development will only partially contribute to the need for additional off-site improvements, NDOT or planning department (as applicable) may require a pro-rata contribution.

4. Prior to the issuance of a ROW permit and per Section 13.20.050 of this Code, the applicant's contractor shall be required to obtain a performance bond executed by the contractor and its surety or sureties, guaranteeing the execution of transportation infrastructure follows NDOT requirements and the payment of all legal debts pertaining to the performance of the work. Surety(ies) shall be authorized to do business in the State of Tennessee and be listed on the United States Department of the Treasury Financial Management Service list of approved bonding companies. (Ord. BL2023-2010 § 1, 2023; Ord. BL2017-721 § 1, 2017; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 5.4(A), 1997)

17.20.150 Protection of residential areas.

In order to minimize deterioration and destabilization of residential areas, access for nonresidential properties which abut residential-zoned areas shall be designed so as to minimize the intrusion of nonlocal traffic onto residential local and minor local streets. (Ord. 96-555 § 5.4(B), 1997)

17.20.160 Access from nonarterial streets.

Driveways providing vehicular access from streets which function and/or are designated by the planning commission as nonarterial streets shall comply with the following provisions.

A. Driveway Location. The following provisions apply to the location of driveways providing access to and from nonarterial streets.

1. A driveway providing access to a single-family or two-family lot from a minor local or local street shall be located at least fifteen feet from a street intersection; a driveway accessing a collector street shall be at least fifty feet from an intersection.

2. A driveway providing access to a use other than a single-family or two-family dwelling shall be located at least fifty feet from a street intersection. A driveway shall be at least one hundred feet from the intersection of a collector street.

3. A driveway other than for a single-family or two-family dwelling shall be located at least thirty feet from another driveway.

B. Deviations. The metropolitan traffic engineer may authorize deviations from the provisions of this section, based upon a demonstration by the applicant that improvement of the property is impractical under the standards of this section and a determination that granting the requested deviation will not be contrary to public health, safety and welfare. (Ord. 96-555 § 5.4(c), 1997)

17.20.170 Access from arterial streets.

Driveways providing vehicular access from streets which are designated by the planning commission on the adopted major street plan as arterial streets shall comply with the following provisions.

A. Number of Driveways. Table 17.20.170 sets forth the maximum number of driveways based on the amount of lot frontage along an arterial classification of street. Driveways shall be a minimum of thirty feet apart. The traffic engineer may require a greater minimum distance between driveways if it is in the best interest of public safety. When appropriate, all new driveways shall be placed directly across from driveways on the opposite side of the street to enhance traffic flow and public safety.

B. Driveway Separation from Intersecting Streets. To protect the safety of the motoring public, the following standards shall apply:

1. Along the frontage of an arterial street, no driveway ramp shall be located within one hundred eighty-five feet of a street intersection.

2. Along any classification of street, no driveway ramp shall be located within two hundred fifty feet of a controlled access highway ramp.

3. A platted lot existing on the effective date of the ordinance codified in this title, which does not have sufficient street frontage to satisfy the separation requirements of this section, may be granted one driveway ramp provided that it is located as far from the intersection as is reasonably feasible and does not create a hazard to the motoring public.

C. Building Permit Restrictions. If an undeveloped lot or unplatted parcel has less street frontage than the minimum spacing required in subsections A and B of this section and is adjacent to another lot under common ownership on the effective date of the ordinance codified in this title, establishment of a joint access driveway may be required by the traffic engineer.

D. Alternative Access. Where the configuration of properties located on arterial streets precludes spacing of driveway access in accordance with the requirements of this section due to topography or prior site development layout, the metropolitan traffic engineer shall be authorized to require joint access driveways or cross access corridors (See Figure 17.20.170). The following provisions set forth standards for joint use driveways and cross access corridors for reduced spacing situations.

Table 17.20.170
MAXIMUM NUMBER OF DRIVEWAYS

Lot Frontage	Maximum Number of Driveways
Up to 150 feet	1
150 to 299 feet	2
Each additional 300 feet	1

1. Joint Use Driveways. Wherever feasible, the metropolitan traffic engineer may require the establishment of a joint use driveway serving two or more abutting properties. If a proposed development abuts an existing development which contains an existing joint access driveway, the vehicular circulation of the proposed development shall be designed to connect to the abutting access and circulation areas. If a proposed development abuts an existing undeveloped property, the vehicular circulation of the proposed development will contain a joint access driveway which is designed to connect to the abutting property at a later date.

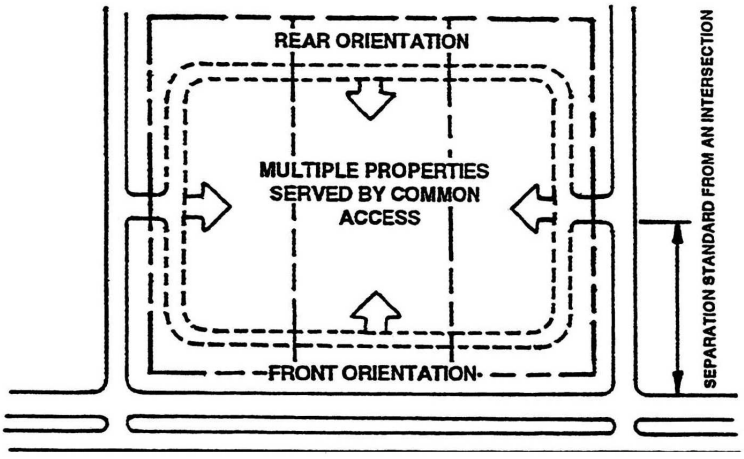
2. Cross Access Corridors. The metropolitan traffic engineer shall be authorized to designate cross access corridors on properties adjacent to arterials. The developments within the affected cross access area shall be designed so as to provide for mutually coordinated parking, access and circulation systems. Such designation shall be referenced on a plat of subdivision. Additionally, if a development within the cross access area abuts an existing developed property which is not in the cross access area, but has an abutting joint access driveway, it shall be designed to tie into the abutting access and circulation system.

3. Recording Easements. Wherever cross access corridors or joint use driveways are provided in accordance with this section, the site plan shall not be approved unless the plan grants an easement for cross access to and from abutting properties. Such easement shall be recorded by the applicant in the public records of Metropolitan Nashville and Davidson County and constitute a covenant running with the land.

4. Closing of Interim Driveways. Wherever a permanent joint use driveway or cross access easement is constructed in accordance with this section, all preceding interim driveways shall be closed and eliminated. In the case of a joint use driveway, the property owner shall enter into a written agreement with the metropolitan government, recorded in the public records of Metropolitan Nashville and Davidson County and running with the land, that existing driveways shall be closed and eliminated after the construction of both sides of a joint use driveway.

5. Where Unified Access and Circulation is Not Practical. The metropolitan traffic engineer shall be authorized to waive the requirements of this subsection when abutting properties have been developed in such a manner that it is clearly impractical to create a unified access and circulation system with all or part of the affected areas. (Ord. 96-555 § 5.4(D), 1997)

Figure 17.20.170
JOINT USE DRIVEWAY AND CROSS ACCESS CORRIDOR



17.20.180 Visibility.

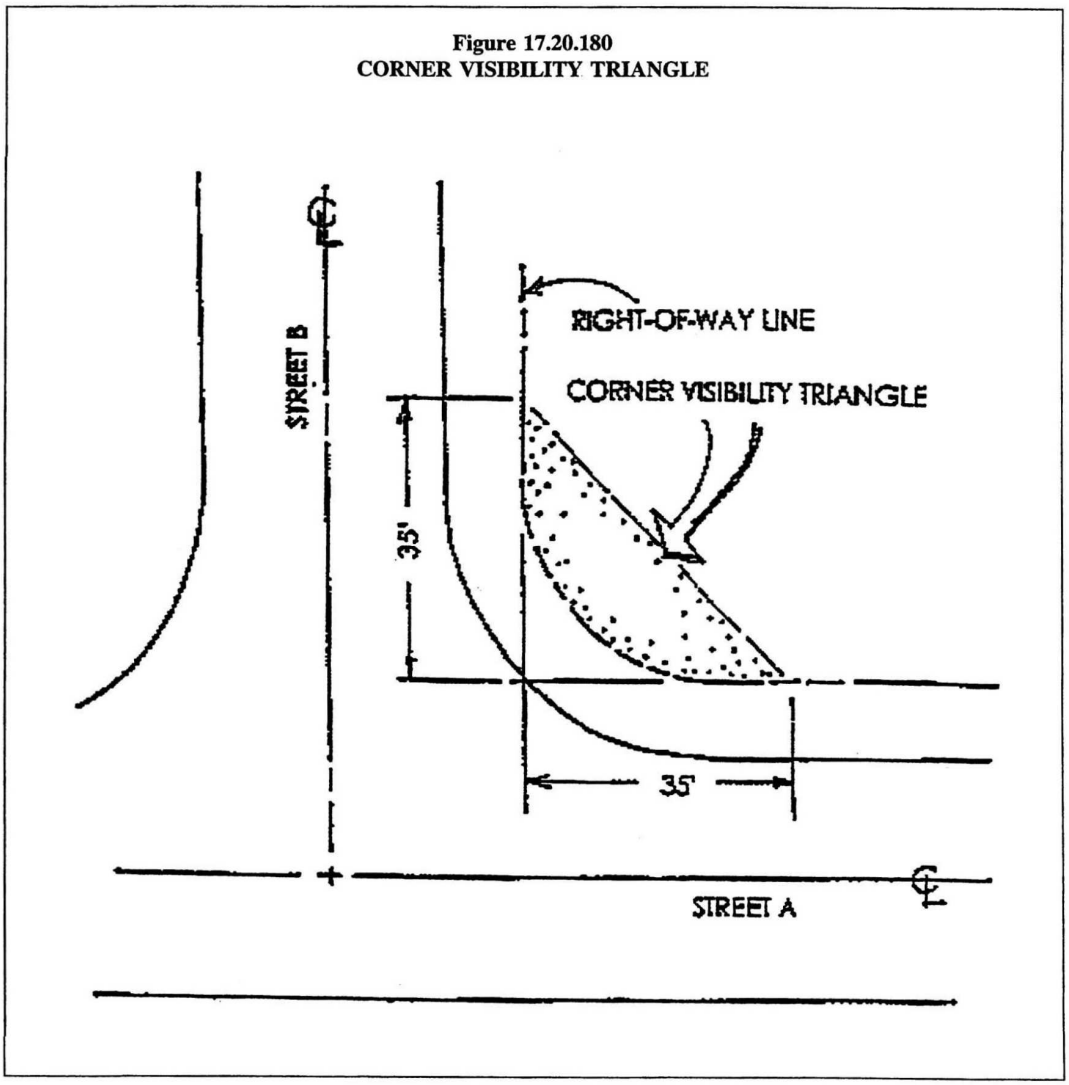
In order to safely accommodate vehicular movements to and from public streets, the sight distance and visibility provisions in the traffic and parking code and the following provisions shall be required.

A. At street intersections nothing shall be erected that will obstruct vision at any point above the center line grades of the intersecting streets within the triangular area formed by the right-of-way lines and a straight line joining the right-of-way lines at points which are thirty-five feet distant from the intersection of the right-of-way lines and measured along such right-of-way lines. Development within the urban zoning overlay district and in the DTC, CF, CF-NS, MUI, and MUI-NS districts shall be exempt from this provision. (See Figure 17.20.180)

B. In all zoning districts, no fence, wall, hedge, or other planting or structure shall be allowed on private property that will obstruct vision at any point where private driveways intersect a public street in such a manner as to interfere with traffic visibility of any driver using an authorized driveway, alley or roadway.

(Ord. BL2019-111 § 1(Exh. A, § 31), 2020; Ord. BL2000-364 § 1 (part), 2000; Ord. 96-555 § 5.4(E), 1997)

Figure 17.20.180
CORNER VISIBILITY TRIANGLE



17.20.190 Measurement of distances.

For the purposes of this article, distances shall be measured in the following manner.

A. Distance Between Driveways. Distances between driveways shall be measured along the right-of-way line from the nearest points of intersection of the driveways with the right-of-way line. In the event that the curb return of a driveway begins outside of the right-of-way, the point of intersection of the extension of the driveway curb or edge shall be used for measurement purposes.

B. Distance from Intersection. The distance from street intersections shall be measured from the nearest intersection of the existing right-of-way lines or extensions thereof. For streets designated to be widened at a future time by the adopted major street plan, measurement shall be made from the ultimate right-of-way.

C. Distance from an Interstate Ramp. The distance from interstate ramps shall be measured from that point where the centerline of the right-of-way for the interstate ramp intersects the right-of-way for the arterial street serving the lot. (Ord. 96-555 § 5.4(F), 1997)

Chapter 17.24

LANDSCAPING, BUFFERING AND TREE REQUIREMENTS*

Article I. General Provisions

17.24.010 Purpose and intent.

The general purpose of this chapter is to set standards for landscaping, buffering, and tree requirements in order to implement the precepts of the general plan and the associated subarea plans, as well as the requirements of the various zone districts set out previously, including properties zoned DTC district as set forth in Chapter 17.37. This chapter further establishes standards for screening and landscaping parking areas to reduce their impact on adjacent properties and public thoroughfares, as well as to mitigate the environmental impacts of large areas of unbroken pavement; establishes standards for buffering between different zone districts or selected land uses to mitigate the results of differing activities; and sets standards for plant materials, maintenance of required plants, planning in scenic easements and standards for the screening of unsightly areas. (Ord. BL2022-1122 § 6, 2022; Ord. BL2018-1416 § 4, 2019; Ord. BL2009-586 § 1(Exh. A, § 37), 2010; Ord. 96-555 § 6.1, 1997)

17.24.020 Landscape plan required.

A landscape plan shall accompany any application for final site plan approval under Section 17.40.170, unless exempted by Section 17.24.050, Exceptions. The plan shall show location, size, spacing, species, form and quality of all existing and proposed materials intended to fulfill the requirements of this chapter. The plan shall also show topography, location of all utilities, and either an under-ground sprinkler system or hose bib attachments. The plans and specifications submitted pursuant to this section shall be prepared by, or under the direction of, and bear the seal of a professional landscape architect registered in Tennessee for all developments which include five thousand square feet or more of permanent structures. Plans and specifications submitted pursuant to this section for developments with less than five thousand square feet of permanent structures shall be exempt from the landscape architect seal requirement. (Ord. BL2018-1416 § 5, 2019; Ord. BL2008-328 § 5, 2009; Ord. 2001-750 § 1, 2001; Ord. 96-555 § 6.2(A), 1997)

17.24.030 Plant standards.

A. Minimum Quality and Size Standards.

1. Newly planted landscape plant materials shall conform to the latest version of the American Standard for Nursery Stock, ANSI Z60.1-2014.

2. Type 1, 2, and 3 Trees, shall meet the planting and size requirements as defined in ANSI Z60.1.

a. Canopy trees shall be a minimum of two inches in caliper at the time of planting, as determined in the American Standard for Nursery Stock, ANSI Z60.1-2004.

b. Understory trees shall have a caliper of two inches in caliper at time of planting, as determined in the American Standard for Nursery Stock, ANSI Z60.1. For

*Editor's note—Ord. BL2018-1416, § 4, adopted July 17, 2019, amended the title of Ch. 17.24 to read as herein set out. Formerly, said chapter was entitled "Landscaping, Buffering and Tree Replacement."

multi-stem varieties caliper shall be determined by taking one-half of the caliper of the three largest required trunks.

c. Evergreen trees shall be a minimum of six feet in height and a minimum of two inches in caliper at the time of planting.

d. Except where required to be taller, shrubs shall be a minimum of eighteen inches in height above ground level at the time of planting and shall typically grow to a minimum height of thirty inches for perimeter shrubs and five to six feet for buffer shrubs within four years.

3. Plant material used to meet the requirements of this Code shall be selected from the Urban Forestry Recommended and Prohibited Tree and Shrub List, unless otherwise approved by the planning or codes departments, as applicable.

4. Plants listed on the current edition of the Invasive Exotic Pest Plants of Tennessee, as published by the Tennessee Exotic Pest Plant Council, shall not be planted nor credited toward the minimum requirements of this Code.

B. Plant Diversity.

1. To maintain forest health, engender climate adaptation, and provide protection against disease and blight, tree plantings shall meet the following requirements:

a. Tree diversity:

Number of Trees	Minimum Number of Different Genera in Roughly Equal Proportions
Less than 20	2 Genera
20—39	3 Genera
40 or more	4 Genera

i. Native species incorporation: Approximately fifty-one percent of the trees planted (excluding ground cover and shrubs) shall be native species of the Southeastern USA Plains Level II Ecoregion.

ii. Plantings required by adopted streetscape plans or sites located along an Arterial Boulevard as defined by the Major and Collector Street Plan may adjust diversity requirements as approved by planning or codes staff, as applicable.

C. Stabilization. Landscape planting areas shall be stabilized and maintained with seed, sod, ground covers, mulches, or other approved materials to prevent soil erosion and allow rainwater infiltration. When possible, native ground cover shall be utilized.

D. Planting in Easements.

1. Groundcover may be planted or installed within any utility or drainage easement. Trees and shrubs may require approval by the easement holder.

2. In areas that require canopy trees where overhead utilities prevent the use of canopy trees, understory trees may be substituted. Multi-stemmed understory trees may be used provided they meet the minimum size at time of planting.

E. Planting Near Light Poles and Transformers. Trees shall be a minimum of fifteen feet from light poles and transformers. Trees may be clustered or moved to a more appropriate location if light poles or transformers conflict with tree locations, as long as all other tree location requirements are met.

F. Planting Near Fire Hydrants. Tree locations near fire hydrants shall comply with the Fire Code, as applicable. Shrubs shall be a minimum of five feet from a fire hydrant. (Ord. BL2024-683 § 1, 2025; Ord. 2001-750 § 2 (part), 2001; Ord. 96-555 § 6.2(C), 1997)

17.24.040 Spacing standards.

Unless specific minimums or maximums are set out in the following articles, landscape plantings required under this chapter may appear to be irregularly planted and spaced at random. (Ord. 2001-750 § 2 (part), 2001; Ord. 96-555 § 6.2(D), 1997)

17.24.050 Exceptions.

The requirements of this chapter shall not apply to:

A. Improvements or repairs to interior and exterior features of existing structures, including the conversion of a non-residential building to residential use either in whole or in part, as provided by this title.

B. Construction previously authorized by a building permit, a final site plan of a planned unit development approved by the planning commission, or an approved subdivision construction plan, any one of which remains valid on the effective date of the ordinance codified in this title. Any development whose permit or approval expires shall not be exempt.

C. Reserved.

D. In the event of emergencies, which may include but are not limited to snow, ice and rain storms, tornadoes, floods, and similar natural disasters which cause excessive tree damage throughout the community, the mayor may invoke additional exceptions as necessary to deal with the emergency.

E. The interior planting requirements of Section 17.24.160 shall not apply to service loading areas or to tractor trailer staging, loading and parking areas. (Ord. BL2008-328 § 1, 2009; Ord. BL2004-492 § 4, 2005; Ord. 2001-750 § 2 (part), 2001; Ord. BL99-117 § 1 (part), 2000; Amdt. 1 (part), with Ord. 99-1754 § 5, 1999; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 6.2(B), 1997)

17.24.060 Special screening requirements.

Screening of unsightly areas shall be accomplished as follows:

A. Dumpsters and other trash receptacles for all structures other than single-family and two-family residences shall be screened by an enclosure from public streets and from properties which are zoned or policied for residential use. The following design standards shall apply:

1. Receptacles shall be placed on a concrete pad, constructed from steel reinforced concrete and a minimum of eight inches thick.

2. Enclosures shall consist of a fence or wall constructed of opaque-type materials, such as wood, masonry, or other permanent materials, which prevent direct visibility of the receptacle. Evergreen plants may be used in part to meet the requirement of opacity.

3. Enclosures shall be constructed to a minimum height of one foot higher than the height of the enclosed receptacle, or six feet in height, whichever is higher.

4. Enclosures shall be constructed in such a manner that all structural members, including braces, posts, poles, and other projections, are located within the interior of the enclosure.

5. Unless the service opening is oriented away from adjacent public streets and residential properties, enclosures shall have a service access gate meeting the following design standards:

a. Access gates shall be of sufficient size to remove the receptacle from the enclosure.

b. Access gates shall be constructed of opaque-type materials which prevent direct visibility of the receptacle.

c. Access gates shall be constructed with a latch to keep the access gate closed when the receptacle is not in use.

d. Access gates shall not open directly onto public streets or sidewalks.

6. Enclosures may have an additional side door for accessing the receptacle. This additional side door may be up to three feet in width and may be secured or unsecured.

7. Receptacles shall be located in the rear of the building or structure which they service. If a receptacle cannot be placed behind the building or structure it services, the location shall be determined by the department of codes administration.

8. Receptacles must remain readily accessible to the Nashville Fire Department.

9. When used as an alternative to traditional dumpsters or other trash receptacles, below grade (deep well) refuse collection and recycling systems shall be screened by a decorative wall, solid fence, or year-round landscaping. The wall, fence, or plantings must be of a height equal to or greater than the height of the refuse collection and recycling equipment being screened.

B. On sites which are developed at the time of adoption of the ordinance codified in this chapter which are subsequently upgraded, dumpsters shall be screened to meet the standards set out in this subsection if:

1. Any single expansion of the site increases the total building area by twenty-five percent or more;

2. Multiple expansions within a five-year period increase the total building area by twenty-five percent or more;

3. The value of any single expansion is more than twenty-five percent of the existing value of improvements;

4. The total value of all improvements increases by fifty percent or more as a result of multiple expansions over a five year period.

C. Landscape Buffer Yard Required for Double Frontage Lot. In cases where residential lots are developed with frontage and access to a street within the subdivision and the rear of the lot is oriented toward a public right-of-way, the rear of such double frontage lots shall be screened from the public right-of-way by a landscape buffer yard according to the following standards:

Street Type	Buffer Standard
Local street	Standard A
Collector street	Standard B
Arterial street	Standard C

D. Mechanical equipment, antennae or satellite dishes exceeding eighteen inches in diameter shall not be located within required landscape buffer yards or required front or side setbacks. Mechanical equipment or satellite dishes exceeding eighteen inches in diameter located atop a building shall be screened from all abutting public streets and residential properties by enclosure within the roof form of the building or a screen.

E. Parking areas servicing multifamily and non-residential uses which have ten or more parking spaces and are located adjacent to residentially zoned properties with-out an intervening street shall be screened by a permanent opaque fence or wall at least six feet in height, in addition to the parking area perimeter landscaping or landscape buffer yards required.

F. The exterior service area of a commercial or industrial building, if oriented toward a public street, shall be screened as follows:

1. When oriented to a minor local, local or collector street, screen with a Standard A landscape buffer yard.

2. When oriented to an arterial street on the adopted major street plan, screen with a Standard B landscape buffer yard.

G. In addition to the requirements imposed by Sections 17.24.130 through 17.24.170 and Sections 17.24.180 through 17.24.240 of this chapter, areas used for the temporary or permanent storage of inoperable or damaged vehicles shall be screened from properties zoned residential and from public streets by means of an opaque fence or wall not less than six feet in height.

H. Limitation on Outdoor Storage in all Shopping Center and Mixed-Use Districts. In all shopping center and mixed-use districts, outside display and sales shall be limited to the incidental display of goods for sale or rent by an establishment having activities that occur principally within a building on the same lot, or to the display of new or used vehicles (where permitted by the district).

I. Outdoor Recreational Facility. An outdoor recreational facility, including swimming pools, tennis or basket-ball courts (golf course fairways excepted), when located adjacent to property with a residential zoning classification, shall provide a Standard C landscape buffer yard to shield the adjacent property. (Ord. BL2020-405 § 1, 2020; Ord. BL2018-1316 § 1, 2018; Amdt. 1 with Ord. 2001-750 § 3, 2001; Ord. 99-1643 § 3, 1999; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 6.2(E), 1997)

17.24.070 Scenic landscape easements.

Property abutting a street designated a scenic arterial by the major street plan shall comply with the following requirements:

A. The area of a lot located within ten feet of the right-of-way of a designated scenic arterial shall be designated as a "scenic landscape easement" and shall be planted with a Standard A landscape buffer yard. Existing vegetation may be used, in part or in whole to meet this requirement.

B. No grading, cutting of trees or brush exceeding one inch in diameter, or disturbance of prominent natural features shall be performed within a scenic landscape easement except for minimal disturbance necessary to permit streets, driveways or utility corridors. Only those improvements allowed in a landscape buffer yard shall be permitted within the scenic arterial easement. (Ord. 96-555 § 6.2(F), 1997)

17.24.075 Plans for street trees and streetscape.

Upon creation of a plan for street trees and streetscape for a specific geographic area within Davidson County, the metropolitan planning commission shall adopt the plan.

A. Review and enforcement. Compliance with a street tree/streetscape plan shall be reviewed and enforced by the urban forester according to the provisions of this section. Where street trees required by an adopted plan are to be located within the public right-of-way, the urban forester shall consult with the director of public works and/or the director of water services, or their designees, in review and enforcement of the plan. A street tree/streetscape plan shall be designated as a layer in GIS and mapping systems, and all parcels affected by a street tree/streetscape plan shall be flagged on all permitting.

B. Applicability.

1. Multi-family or non-residential development or redevelopment. All provisions of this section shall apply to the development or redevelopment of multi-family or non-residential property which includes one or more of the following:

a. Construction of a new structure on a vacant lot, including lots on which all structures have been or are planning to be demolished; or

b. The cost of any one renovation equal to or greater than fifty percent of the current appraised value of all structures on the lot, or the value of multiple renovations during any five-year period equal to or greater than seventy-five percent of the current appraised value of all structures on the lot; or

c. The cost of any one expansion equal to or greater than twenty-five percent of the current appraised value of all structures on the lot, or the value of multiple renovations during any five-year period equal to or greater than fifty percent of the current appraised value of all structures on the lot; or

d. The total building square footage of any one expansion is equal to or greater than twenty-five percent of the total square footage of all structures on the lot, or the total building square footage of multiple expansions during any five-year period is equal to or greater than fifty percent of the total square footage of all the structures on the lot.

2. Single-family or two-family construction. All provisions of this section shall apply to the construction of new single-family or new attached or detached two-family structure(s) on a vacant lot, including lots on which all structures have been or are planned to be demolished.

C. Installation and maintenance.

1. Trees shall be installed according to the provisions of the Metro Nashville Street Tree Specifications prepared and maintained by Metro Water Services in conjunction with Metro Public Works, Planning and Codes.

2. The owner of the property frontage along with the street trees are installed shall maintain the trees installed per this title according to the provisions of the Metro Nashville Street Tree Specifications. The owner of the property frontage shall execute and record a restrictive covenant agreeing to these maintenance responsibilities.

3. Trees installed pursuant to this section shall be eligible for credit toward the tree density required by Section 17.28.065 Trees.

D. Modifications and amendments. The urban forester shall have the authority to grant minor modifications to the adopted street tree plan including, but not limited to, adjustments in spacing or planting location that do not alter the overall concept of the adopted street tree/streetscape plan. Minor modifications may be granted based on existing physical site conditions such as utilities, a ditch or drainage ditch, historic wall(s) or stone wall(s), existing trees, or steep topography. Modifications that alter the overall concept of the adopted plan shall be considered major and require amendment of the plan by the metro planning commission.

E. Waivers and compliance. The zoning administrator may waive, in whole or in part, the requirements of this section upon request by the property owner or its agent due to existing physical features on the property such as utilities, a ditch or drainage ditch, historic wall(s) or stone wall(s), existing trees, steep topography, or other hardship. In addition to the urban forester, the zoning administrator shall consult with the executive director of the planning department, or their designee, and where appropriate the director of public works and/or the director of water services, or their designees, prior to making any final determination.

F. Appeals to the board of zoning appeals. The provisions of this section may be varied or interpretations appealed in conformance with Chapter 17.40, Administration and Procedures. The board of zoning appeals may require a contribution to the tree bank, as provided for in Section 17.40.480 of this title, or other appropriate mitigation for the loss of the trees required by the street tree/streetscape plan as a condition of the variance. The board of zoning appeals shall not accept an application until the zoning administrator has made a determination on the requirement as set forth in this chapter. (Ord. BL2022-1122 § 7, 2022; Amdt. 1 to Ord. BL2021-619 § 1, 2021; Ord. BL2021-619 § 1, 2021)

17.24.080 Maintenance of required landscape materials.

The property owner shall maintain landscaping required by this chapter in accordance with the following standards:

A. Use of Required Landscape Area. No required landscape area shall be used for accessory structures, garbage or trash collection, parking, or any other functional use contrary to the intent and purpose of this article.

B. Watering. All required landscaping, excluding trees planted or preserved on residential property in accordance with Section 17.28.065.C of this title, shall be watered by one of the following methods:

1. An underground sprinkler system;

2. An outside hose attachment within one hundred feet of all landscaping.

C. Replacement of Dead Materials. The property owner shall replace required plants which die. Replacements shall be installed at the earliest possible time within a planting season, and replacements shall be as shown on the approved landscape plan. (Ord. BL2022-1122 § 8, 2022; Ord. BL2008-328 § 2, 2009; Ord. 2001-750 § 4, 5, 2001; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 6.2(G), 1997)

Article II. Parking Area Screening and Landscaping*

17.24.130 Purpose and intent.

The purpose of this article is to lessen the visual and environmental effects that large parking areas can have on the community through the use of minimum landscaping standards. To those ends, this article establishes the minimum standards by which parking areas will be screened from adjacent public streets or from adjacent properties. In addition, this article delineates standards for landscaping within the interiors of parking areas. (Ord. 96-555 § 6.4(A), 1997)

17.24.140 Applicability.

The following requirements are cumulative, not exclusive.

A. Perimeter Parking Area Landscaping Required. The perimeter parking area landscaping requirements of this article shall apply to all off-street parking facilities adjacent to a public street or to a property line which:

1. Have five or more parking spaces; or

2. Are larger than one thousand seven hundred fifty square feet in area.

Within the urban zoning overlay district, parking areas within the CF and CF-NS zoning districts shall be exempt from the side property line planting requirements of this article. Perimeter parking area landscaping may be waived along interior property lines for property located within an approved planned unit development (PUD) district or within a unified plat of subdivision if the planning commission finds that any potential negative impacts of the parking area will be mitigated through other means.

B. Interior Parking Area Landscaping Required. The interior parking area landscaping requirements of this article shall apply to all off-street parking facilities which:

1. Have ten or more parking spaces; or

2. Are over three thousand five hundred square feet in area.

Principal use parking areas located in the CF and CF-NS districts on properties with less than one hundred feet of public street frontage or with less than twelve thousand square feet in total area shall be exempt from the interior planting requirements of this title.

C. All trees planted or preserved to satisfy the requirements of this article shall count towards the tree density requirements of Article II.

D. Required parking area screening and landscaping shall not be permitted in utility or drainage easements unless approved by the affected utility and, if approved, the property owner shall execute and record a restrictive covenant agreeing to full replacement of plant materials which may be removed by the utility in the exercise of its rights within the easement. (Ord. BL2019-111 § 1(Exh. A, § 32), 2020; Ord. 2001-750 § 11, 2001; Ord. BL2000-364 § 1 (part), 2000; Ord. 96-555 § 6.4(B), 1997)

17.24.150 Perimeter screening requirements.

Unless supplanted by more stringent standards in Article IV of this chapter, Landscape Buffer Yard Requirements, the perimeters of parking lots shall be landscaped as follows (See Figure 17.24.150-1):

A. Parking Areas Adjacent to Public Streets. Parking areas adjacent to public streets shall be separated from the edge of the right-of-way by a perimeter landscape strip which shall be landscaped per the standards set out in subsection C of this section. The public right-of-way and areas reserved for future rights-of-way in compliance with the adopted major street plan shall not be used to satisfy the requirements of this article. Perimeter landscape strips shall be continuous and unbroken except for driveways or sidewalks required to access the parking area. No single driveway/sidewalk penetration shall exceed thirty-five feet.

1. Perimeter landscape strips adjacent to public streets with four or more travel lanes (as classified by the major street plan) shall be a minimum of ten feet in width, unless: (a) the strip includes a permanent finished wall no less than thirty inches in height; or (b) the required trees are planted in islands between the parking spaces. In such cases the perimeter landscape strip may be reduced to five feet in width. (See Figure 17.24.150-2)

2. Perimeter landscape strips adjacent to public streets with less than four travel lanes (as classified by the major street plan) shall be a minimum of five feet in width, unless: (a) the strip includes a permanent finished wall no less than thirty inches in height; or (b) the required trees are planted in islands between the parking spaces. In such cases the perimeter landscape strip may be reduced to two and one-half feet in width. (See Figure 17.24.150-2)

*Editor's note—Ord. BL2022-1122 § 10, passed May 17, 2022, repealed Art. II, §§ 17.24.090—17.24.120, and renumbered Arts. III and IV as Arts. II and III. The former Art. II pertained to tree protection and replacement and derived from Ord. 96-555 § 6.3(A)—(D), 1997, as amended. See the Ordinance List and Disposition Table for complete derivation. The user's attention is directed to § 17.28.065.

3. Permanent landscape strips which use walls or earthen berms are desirable for the reliability of the screening effect they provide. Berms shall not have slopes steeper than 2:1 (horizontal to vertical). Berms with slopes flatter than 4:1 may be stabilized with lawn grasses, and berms with slopes in the range 2:1 to 4:1 shall be stabilized by a continuous perennial plant groundcover which does not require mowing in order to maintain a neat appearance. The wall or combination of berm and perennial groundcover shall be a minimum of two and one-half feet in height.

B. Parking Areas Adjacent to Side Property Lines. A perimeter landscape strip shall separate a driveway or parking area from an adjacent side property line by one of the following standards: (a) a five-foot (minimum) wide planting strip shall be provided if required trees are to be planted within the strip; (b) a two and one-half foot (minimum) planting strip may be provided to accommodate shrubs if all required trees are planted within tree islands located adjacent to the property line; or (c) two adjacent properties may share equally in the establishment of a seven-foot (minimum) planting strip along the common property line. In instances where the common perimeter planting strip is part of plan for shared access, each owner may count the respective area contributed toward that common planting strip toward the interior planting requirements for the lot. All landscaping strips shall be planted to satisfy the planting requirements of subsection C of this section.

C. Landscape Materials. A minimum of one tree shall be preserved or planted for each fifty feet of parking area perimeter, or portion thereof; for principal use parking areas located with the DTC, and CF, and CF-NS zoning districts, street trees shall be installed at a rate of one tree per thirty feet of street frontage. Trees planted to meet this requirement shall measure a minimum of two inches in caliper, and six feet in height, as applicable for the type of material specified. The remaining area within the perimeter landscape strip which fronts on a street right-of-way shall be planted with one continuous row of evergreen shrubs which shall be expected to mature at a height not greater than two and one-half feet, except as modified for berms or walls. The remainder of the area within all perimeter strips not occupied by trees or shrubs shall be covered by organic or mineral mulches, other shrubs, groundcover plants or grassed lawns. The use of concrete, asphalt or other impervious surfaces shall be prohibited.

D. Corner Visibility. Trees and other landscaping required in the perimeter strip shall be maintained to assure unobstructed corner visibility pursuant to Section 17.20.180, Visibility.

E. Adjacent Parking Areas with Shared Access. Parking areas on adjacent properties, which are designed to share a common access from the public right-of-way and a vehicular travelway along their common property line shall be exempt from the requirement for a parking area perimeter landscape strip along their common property line, upon the recording of an easement agreement which provides for the mutual right of ingress and egress for both property owners. (See Figure 17.24.150-3)

Figure 17.24.150-1
PERIMETER LANDSCAPE STANDARDS

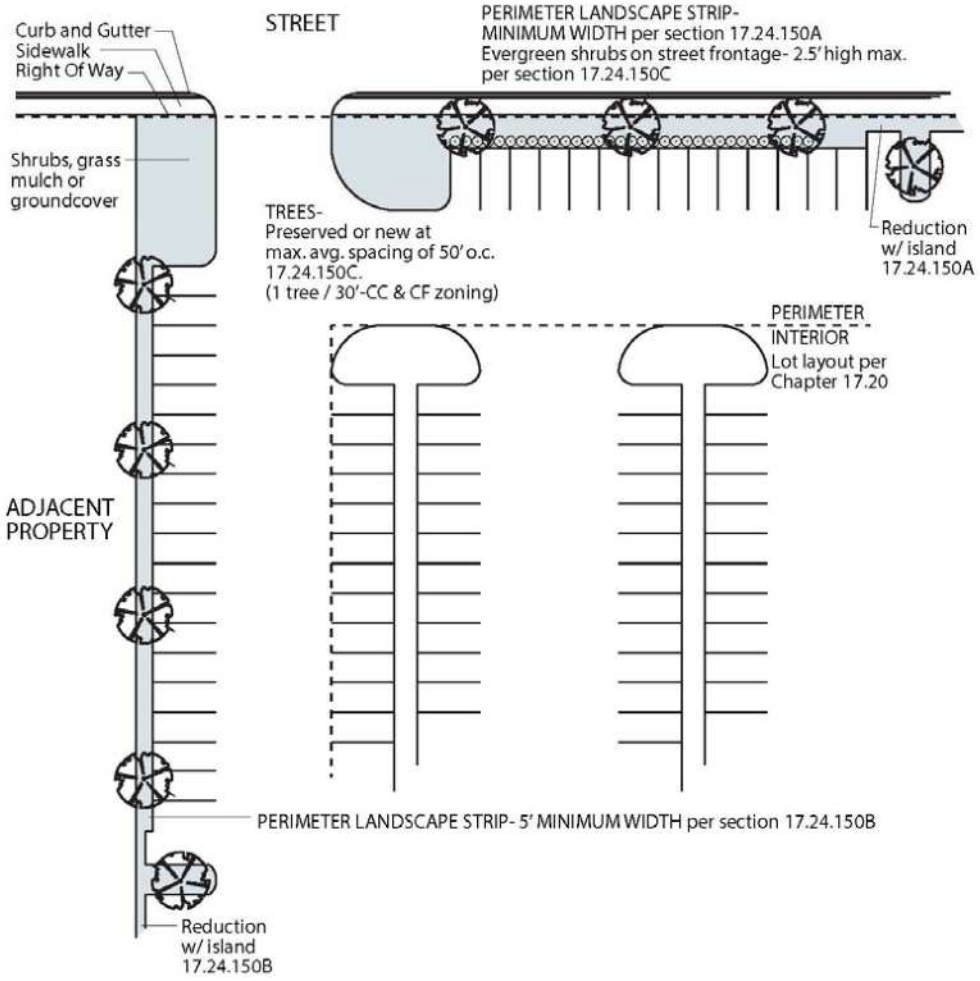

Figure 17.24.150-2
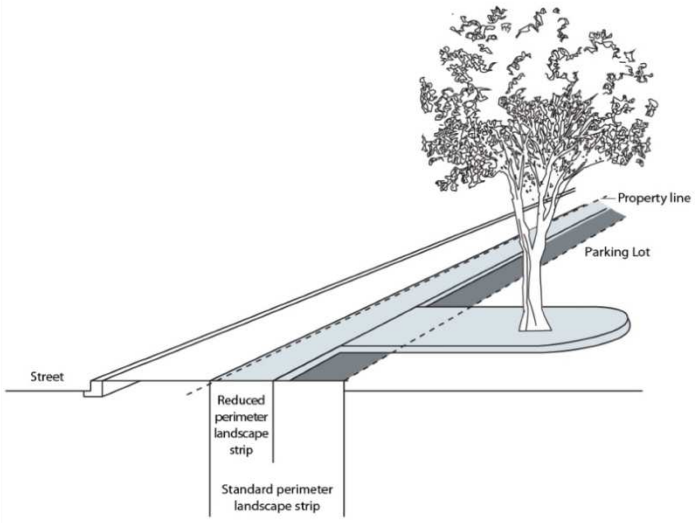
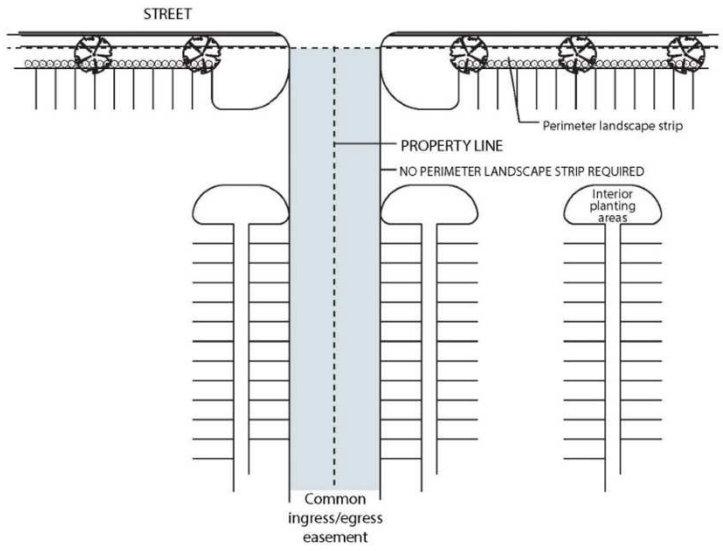
REDUCTION OF PERIMETER LANDSCAPE STRIP



The perimeter landscape strip may be reduced to half the standard depth if the required trees are planted in islands between parking spaces. 17.24.150A

Figure 17.24.150-3
WAIVER OF LANDSCAPE STRIP



PERIMETER LANDSCAPE STRIP WAIVED WITH COMMON ACCESS AGREEMENT 17.24.150E

(Ord. BL2019-111 § 1(Exh. A, § 33), 2020; Ord. BL2018-1416 § 9, 2019; Ord. BL2000-364 § 1 (part), 2000; Ord. 98-1323 § 1, 1998; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 6.4(C), 1997)

17.24.160 Interior planting requirements.

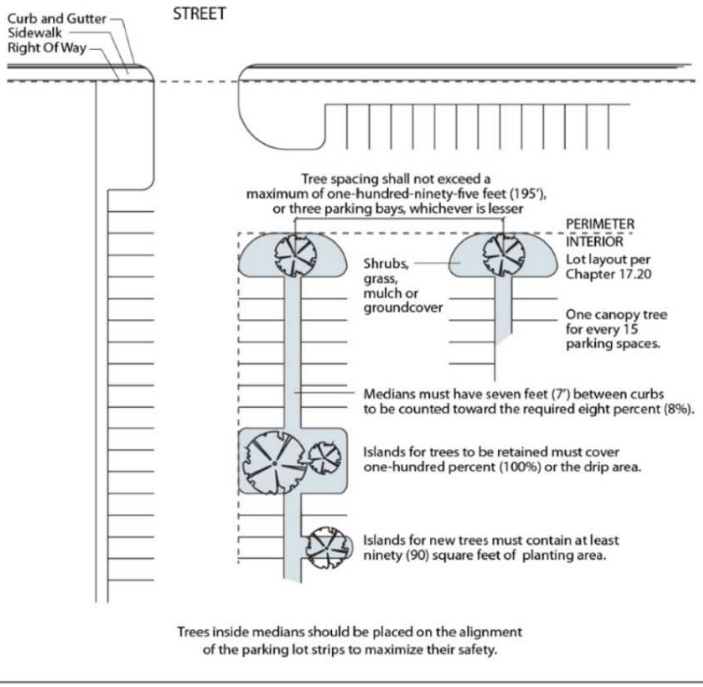
A. General Requirements. Except for parking lots containing fewer than thirty spaces within the urban zoning overlay district, at least eight percent of the gross area of the parking area shall be landscaped and interior planting areas are to be located within or adjacent to the parking area as tree islands, at the end of parking bays or inside seven foot wide or greater medians (where the median area is to be included as a part of the calculations for the interior planting area). Parking lots containing fewer than thirty parking spaces within the urban zoning overlay district shall be exempt from the eight per-cent landscaping requirement and the seven foot median requirement, but shall be required to install trees as described below. Interior planting areas shall be located so as not to impede stormwater runoff and provide shade in large expanses of paving and contribute to orderly circulation of vehicular and pedestrian traffic.

1. Trees shall be required at the minimum of one canopy tree for every fifteen parking spaces. All vehicular use areas located within the same block which serve one or more businesses or uses of land or share unified ingress and egress shall be considered as a single vehicular use area for the purpose of computing the required rate of trees, notwithstanding ownership. Required trees shall be at least six feet in height and two inch caliper. (See Figure 17.24.160) For principal use parking areas located in the CF and CF-NS districts not otherwise exempt from the interior planting requirements, street frontage trees planted to satisfy the requirements of Section 17.24.150 shall count towards the interior planting requirements of this section.

B. Minimum Size of Interior Planting Areas.

1. Outside the urban zoning overlay district, and for parking lots containing thirty or more parking spaces within the urban zoning overlay district, a minimum of ninety square feet of planting area shall be required for each new canopy tree (See Figure 17.24.160), and a minimum planting area of one hundred percent of the drip line area of the tree shall be required for all existing trees to remain. If the applicant can demonstrate that conditions allow that the tree will be preserved with an area less than one hundred percent, lesser area may be approved by the urban forester. (See Figure 17.24.160)

Figure 17.24.160
INTERIOR LANDSCAPE STANDARDS



2. For parking lots containing fewer than thirty parking spaces within the urban overlay zoning district, a minimum planting or tree grate area of one hundred percent of the drip line area of the tree shall be required for all new and existing trees. If the applicant can demonstrate that the tree can remain healthy with an area less than one hundred percent, lesser area may be approved by the urban forester. (See Figure 17.24.160) (Ord. BL2019-111 § 1(Exh. A, § 34), 2020; Ord. BL2018-1416 § 10, 2019; Ord. BL2009-586 § 1(Exh. A, § 38), 2010; Amdt. 1 with Ord. 2001-750 § 32, 2001; Ord. BL2000-364 § 1 (part), 2000; Ord. 98-1323 § 2, 1998; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 6.4(D), 1997)

17.24.170 Nonconforming parking areas.

When the gross area of a nonconforming parking area is increased, compliance with this article and the DTC is required as follows:

A. Expansion by Twenty-Five Percent or Less. When a parking area is expanded by not more than twenty-five percent, only the expanded area must be brought into compliance with this article and the DTC.

B. Expansion by More than Twenty-Five Percent. When a parking area is expanded by more than twenty-five percent, the entire parking area (pre-existing and expanded) shall be brought into compliance with this article and the DTC.

C. Repeated Expansions. Repeated expansions of a parking area over a period of time commencing with the effective date of the ordinance codified in this title shall be combined in determining whether the twenty-five percent threshold has been reached. (Amdt. 3 to Ord. BL2009-586 § 1(Exh. A, § 37.A), 2010; Ord. 96-555 § 6.4(E), 1997)

Article III. Landscape Buffer Yard Requirements

17.24.180 Purpose and intent.

The purpose of this article is to protect the value and integrity of property from the potential adverse effects of noncompatible land uses. To that end, this article requires that landscape buffer yards be provided at the boundaries of selected zoning districts. The landscape buffer yard standards of this article are also employed by other chapters of this title to accomplish special screening and buffering objectives. The width of the landscape buffer yard and the intensity of plantings required may vary depending upon the relative intensities of the abutting zone districts or the activity itself. In most cases, the property owner may choose among a number of buffer yard widths and plantings to satisfy the requirement. (Ord. 96-555 § 6.5(A), 1997)

17.24.190 Exemptions.

No landscape buffer yard shall be required in the following situations:

A. When a zoning boundary falls along a public street containing four or more travel lanes, or along an elevated railroad bed, utility line easement of fifty feet wide or greater, navigable river, or controlled access highway.

B. When a zoning boundary falls along a public street or alley within the urban zoning overlay district.

C. When a zoning boundary falls along an alley in the urban zoning overlay district and uses on both sides of the alley are residential. In all other situations, a minimum B-5 buffer may be substituted for the required buffer. (Ord. BL2009-586 § 1(Exh. A, § 39), 2010; Amdt. 2 to Ord. BL2005-712, 2005; Ord. BL2005-712 § 2, 2005; Ord. 2002-1020 § 1, 2002; Ord. 98-1268 § 1 (part), 1998)

17.24.200 Determination of landscape buffer yard requirements.

Generally, a landscape buffer yard shall be located at the perimeter of the building site along zoning district boundaries, or otherwise coincident with the edge of a specified facility that is to be screened, and shall not be located in any portion of a public right-of-way. When a zoning district boundary falls along a public street of less than four travel lanes, a B-2 landscape buffer yard may be substituted in lieu of the standard buffer required by Table 17.24.230. In applying the buffer standards of Table 17.24.230, the zoning administrator may take into consideration the future zoning designation of the abutting property as envisioned by the general plan to the extent that existing land uses are reasonably protected by an effective buffer. When the gross floor area of a building legally existing on the effective date of the ordinance codified in this section is enlarged by more than twenty-five percent, that perimeter portion of the property in proximity to the area of expansion shall be brought into conformance with the landscaping buffer yards standard of this code to the greatest extent considered reasonable by the zoning administrator. When incremental expansions occur over time, the total of all expansions shall be used by the zoning administrator in applying the provisions of this section. The following procedure shall be followed to determine the standard of landscape buffer yard required along a zoning district boundary:

A. Identify the zone district for the proposed site as well as for the abutting site(s);

B. Determine the landscape buffer yard standard required on each building site boundary (or portion thereof) by referring to Table 17.24.230;

C. Select the desired width/screening option from those listed in Section 17.24.240, landscape buffer yard standards. Any of the listed width or screening variations shall satisfy the requirement between abutting zone districts. (Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 6.5(C), 1997)

17.24.210 Landscape buffer yard design and materials.

A. Existing Native Plant Material. The use of existing plant material is strongly encouraged in landscape buffer yards. Existing natural groundcover should be retained where possible by avoiding scraping, grading and sodding within the landscape buffer yard. Where the planting requirements of Section 17.24.240, landscape buffer yard standards, require additional trees or shrubs to be installed in an existing natural area, installation should minimize disturbances to native species.

B. Trees. Where the planting requirements of Section 17.24.240 indicate that additional trees shall be installed, required trees shall be a minimum of six feet in height or two inches in caliper, as appropriate. At least one-half of the required trees shall be locally adapted natural evergreen species. Trees shall be distributed throughout the yards, so that there are no horizontal gaps between trees greater than thirty feet as measured parallel to the property line. Required canopy trees shall have an expected mature height of thirty feet or greater. Required understory trees shall have an expected mature height of at least fifteen feet. All trees shall count towards satisfying the tree density requirements of Article II of this chapter.

C. Shrubs. Shrubs planted to meet the minimum standards of this article shall be a minimum of one and one-half feet in height when planted and at least one-half shall be expected to reach five feet or greater in height within five years of planting. At least one-half of the required shrubs shall be locally adapted evergreen species. Shrubs planted on berms may have a lesser mature height provided that the combined height of the berm and plantings after five years is at least five feet. Shrubs shall be planted in such a way as to form continuous coverage with no shrub being greater than five feet from another as measured parallel to the property line. Shrubs may be planted in staggered rows or any other pattern which still achieves the desired continuous coverage. Pedestrian areas and other places where surveillance for the purpose of preventing crime is a design objective may be planted with the smaller of the required shrubs, but at least fifty percent of the shrubs installed to meet the requirements of this title shall be capable of attaining five feet in height at maturity.

D. Utility and Drainage Easements. Required landscape buffer yards shall not be permitted in utility or drainage easements unless approved by the affected utility and, if approved, the property owner shall execute and record a restrictive covenant agreeing to full replacement of plant materials which may be removed by the utility in the exercise of its rights within the easement.

E. Parking Area Landscaping. Perimeter plantings required for parking area landscaping may be counted toward satisfying landscape buffer yard requirements when the perimeter planting area coincides with the yard.

F. Compatibility of Landscaping Materials. Supplemental plantings should be chosen to enhance the existing vegetation within the landscape buffer yard. The species used in the supplemental plantings should be species that occur naturally in the landscape, and should be selected for their noninvasive properties.

G. Opaque Fences.

1. Outside of the urban zoning overlay district, when utilized to satisfy a screening requirement of this title, opaque fences shall be constructed of permanently affixed materials that comprise an integral part of the fence itself. The use of nonrigid plastic or fabric material shall not qualify as an opaque fence.

2. Within the urban zoning overlay district, when walls or fences are used as part of landscape buffer yards, the following materials shall be used and the landscaping shall be installed on the side of the wall facing the less intensive use:

a. Fences provided in Landscape Buffer Yards A and B may only be constructed of natural wood. Sheet plastic, sheet metal, corrugated metal, and plywood fencing shall not be allowed. The finished side of fences shall face the lower intensity use.

b. Walls provided in Landscape Buffer Yards B, C, and D may only be constructed of brick, stone, stucco over concrete block, split-faced or fluted block. Walls shall not be constructed of industrial waste materials (tires, pallets, etc.). (Ord. 2001-750 §§ 12—14, 2001; Ord. BL2000-364 § 1 (part), 2000; Ord. 96-555 § 6.5(D), 1997)

17.24.220 Other uses within landscape buffer yards.

A. Trails. Sidewalks or bike trails may occur within landscape buffer yards provided that the required effect of the yard is not compromised. In no event, however, shall the following uses be permitted in landscape buffer yards: playfields, stables, swimming pools, golf courses,

tennis courts, and other recreational facilities; parking areas and other vehicular use areas; dumpsters, equipment storage and other open storage; buildings or overhangs.

B. Stormwater Retention/Detention Facilities. Surface stormwater retention/detention facilities shall not be permitted to encroach into landscape buffer yards. Subterranean facilities which are designed in a manner so as not to interfere with the proper installation and maintenance of the yard are allowed.

C. Buffer yards shall be continuous and unbroken except for driveways or sidewalks required to access parking areas or streets. Driveway/sidewalk penetrations shall cross the buffer yard as close to perpendicular as possible and shall not exceed twenty-five percent of the entire buffer yard, with no single penetration to exceed thirty-five feet. (Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 6.5(E), 1997)

17.24.230 Table of landscape buffer yard requirements.

Landscape buffer yards shall be provided along zoning district boundaries to standards established by Table 17.24.230.

Table 17.24.230 TABLE OF LANDSCAPE BUFFER YARD REQUIREMENTS

Note 1: The zoning administrator may allow a necessary adjustment to the landscape buffer yard located along a rear property line to provide for necessary building area after determining an adjustment to a required build-to zone is necessary as permitted by Table 17.12.020.D. The zoning administrator may allow a necessary adjustment to the landscape buffer yard based on the nature of the existing and future land uses and site conditions in the general vicinity after receiving a written recommendation from the planning department.

Note 2: Per district standards, these apply only to Townhouse Court, Manor House, Multiplex, Low-rise Courtyard, and Low-rise Flats that share a side and/or rear property line with R- and RS-zoned land.

(Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2019-111 § 1(Exh. A, § 35), 2020; Ord. BL2018-1416 § 12, 2019; Ord. BL2015-1153 § 15, 2015; Ord. BL2013-567 § 2, 2013; Ord. BL2011-898 § 11, 2011; Amdt. 2 (part) with Ord. 98-1323 § 3, 1998; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; § 1(11) of Amdt. 1 with Ord. 96-555 § 6.5(F), 1997)

[The next page is CD17.24:17]

17.24.240 Landscape buffer yard standards.

A. Application of Landscape Buffer Yard Standards. The specifications contained in Figures 17.24.240A through 17.24.240D, set out at the end of this chapter, shall be used to select the desired landscape buffer yard option for the building site. These yard requirements are stated in terms of minimum yard width and the density of required plant material per linear foot of yard. To determine the total number of plants required, the length of each side of property requiring a landscape buffer yard shall be divided by one hundred and multiplied by the number of plants shown in the illustration.

Figure 17.24.240A
STANDARD A- LANDSCAPE BUFFER YARDS

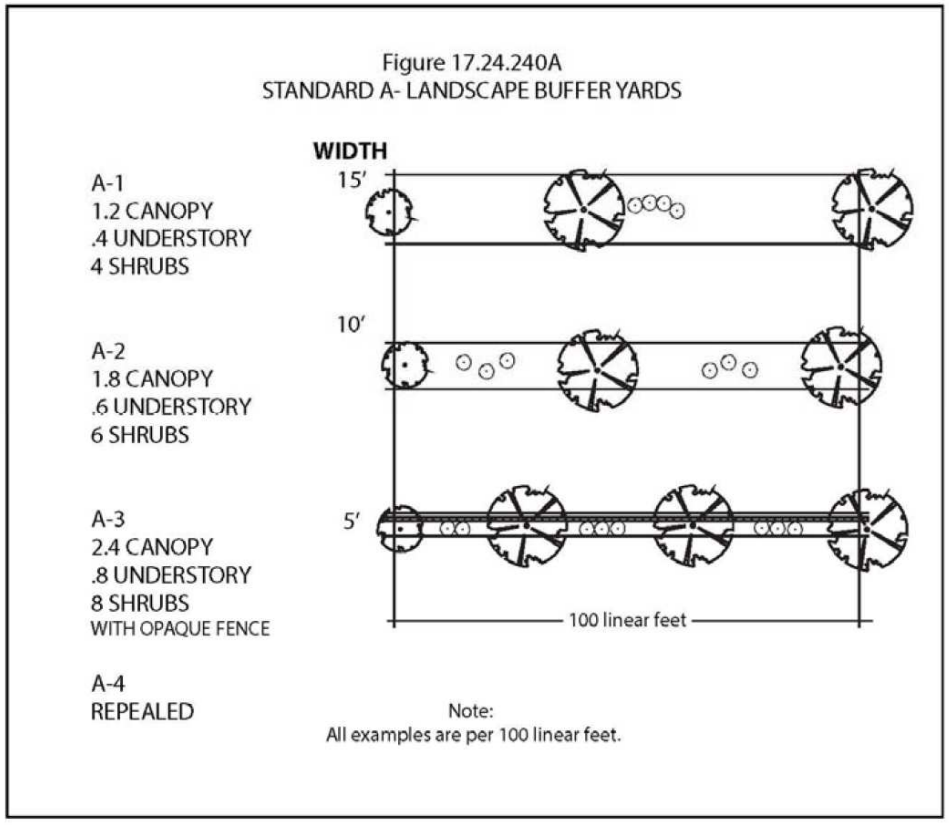

Figure 17.24.240B
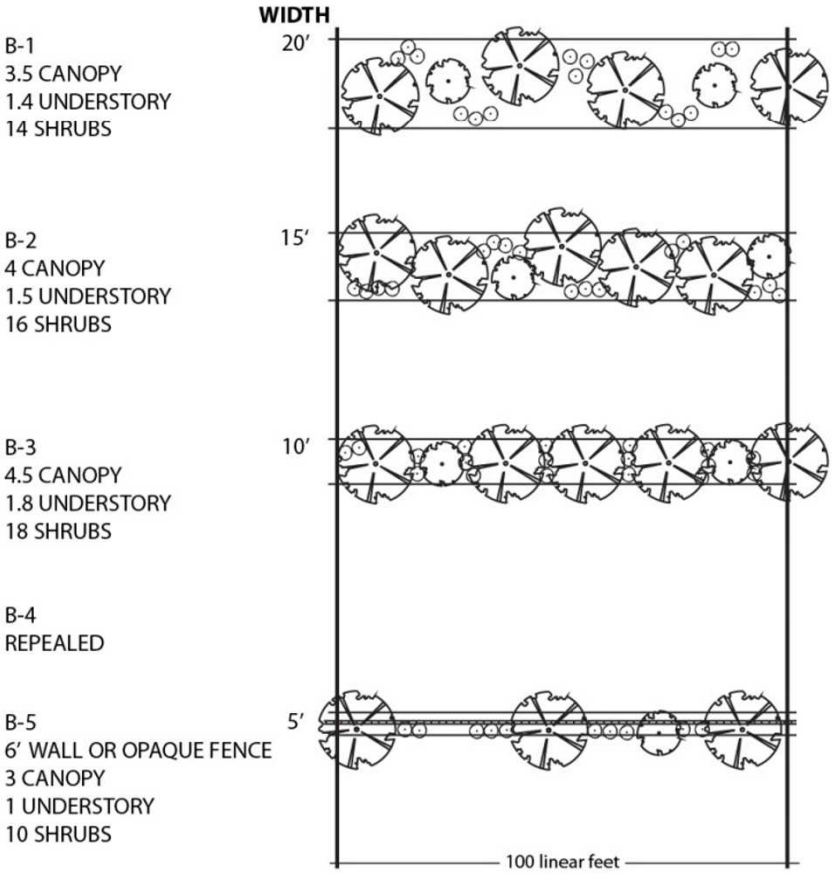
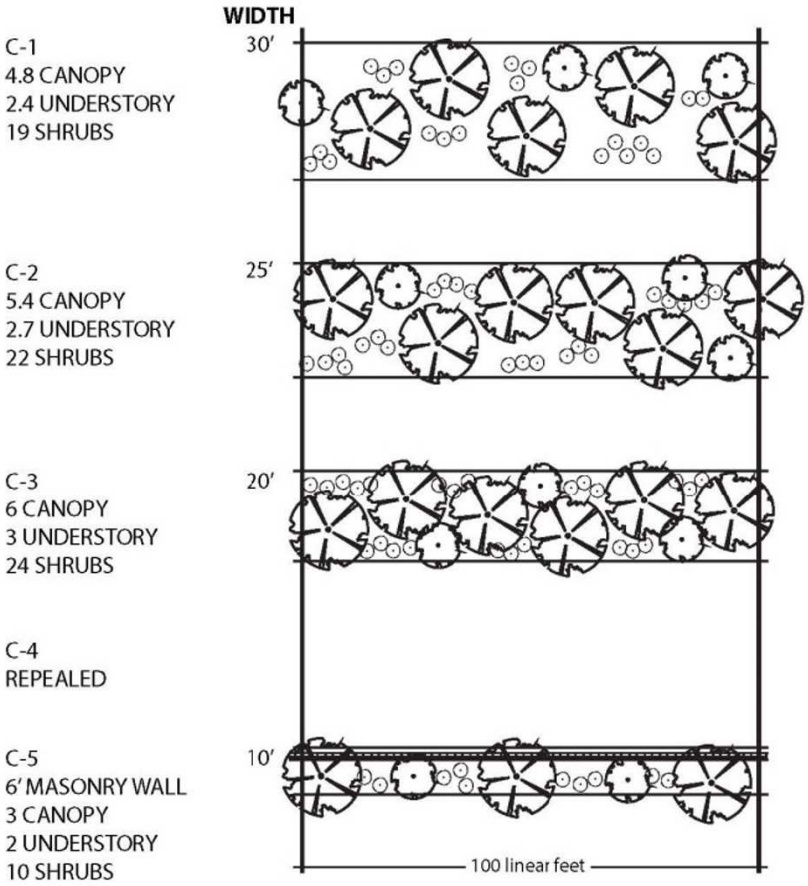
STANDARD B- LANDSCAPE BUFFER YARDS



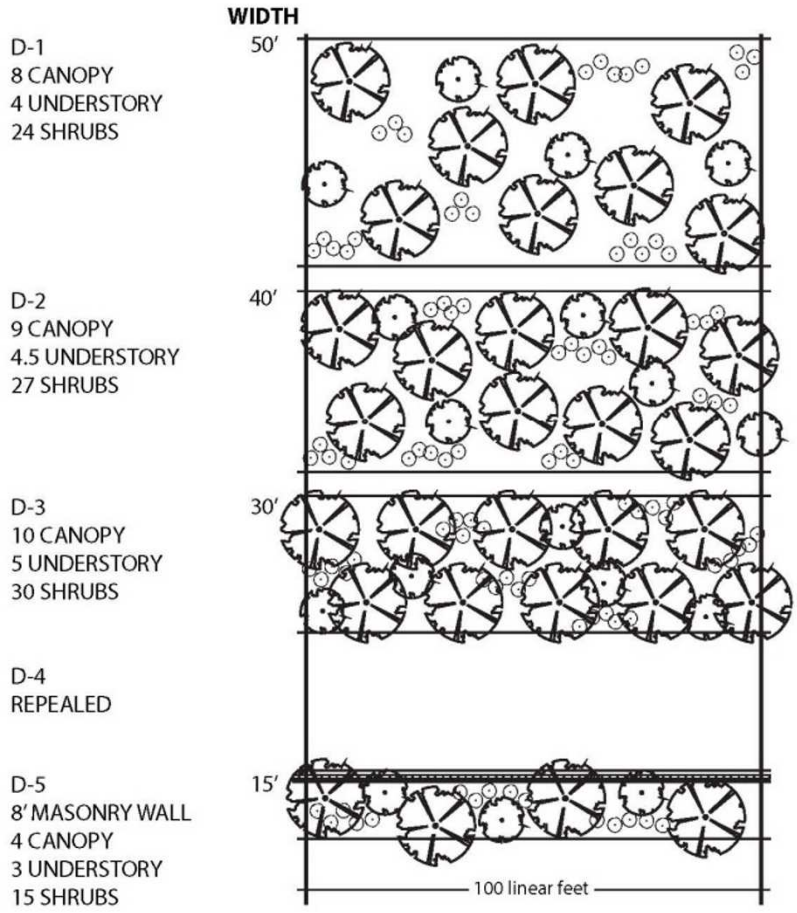
Note: Landscape Buffer Yard B-5 is only available within the urban zoning overlay district.
all examples are per 100 linear feet.

Figure 17.24.240C
STANDARD C- LANDSCAPE BUFFER YARDS



Note: Landscape Buffer Yard C-5 is only available within the urban zoning overlay district.
all examples are per 100 linear feet.

Figure 17.24.240D
STANDARD D- LANDSCAPE BUFFER YARDS



Note: Landscape Buffer Yard D-5 is only available within the urban zoning overlay district.
all examples are per 100 linear feet.

B. Allowable Design Variations. The landscape buffer yard is normally calculated as parallel to the property line. However, design variations, especially when used to incorporate native vegetation into the yard area, shall be considered. The edges of the landscape buffer yard may meander provided that:

1. The total area of the yard is equal to or greater than the total area of the required landscape buffer yard; and

2. The yard measures no less than the minimum width permitted by the applicable landscape buffer yard standard at all points along the perimeter of the property line requiring a landscape buffer yard.

C. Fractional Requirements. When the requirements of this article result in a fractional number of plantings, the fraction shall be rounded to one.

D. Planned Unit Development Districts. Notwithstanding any other provision of this title to the contrary, the landscaping buffer yard requirements for a PUD originally approved by the metropolitan council under a previous Zoning Code shall be provided as required by this code or as required in the originally approved PUD, whichever is greater. If a PUD approved under a previous Zoning Code provides for commercial and/or industrial uses within such PUD, and the underly-

ing base zoning of the property on which the PUD district exists is an agricultural or residential zoning district, then the commercial and/or industrial zoning district which best accommodates the land uses permitted within the PUD shall be the "Zoning District Providing Buffer Yard" for the purposes of Table 17.24.230.

E. Yard Exceeds Twenty Percent of Lot Area. In circumstances where the ground area required for the landscape buffer yard exceeds twenty percent of the total lot area, the width and the number of trees and shrubs within the yard may be reduced up to fifty percent provided that a solid wall or closed wooden fence at least six feet in height is provided along the length of the reduced landscape buffer yard.

F. Grading and Use of Berms. Proposals for grading within a landscape buffer yard shall demonstrate superior enhancement of the buffer function compared to retention of the existing grades. Grading should not endanger or remove existing trees which occur within a landscape buffer yard, unless the proposal clearly demonstrates an enhanced buffer. The use of earthen berms within a landscape buffer yard is encouraged when disturbance to existing vegetation can be minimized. Where berms are incorporated into the yard, the required plantings may have a lesser mature height, provided that the combined height of the berm and plantings will equal the required mature heights of plantings as set forth in Section 17.24.210B and C.

G. Waiver of Landscape Buffer Yard. Landscape buffer yard requirements may be waived by a demonstration of unusual site grade conditions which would clearly negate the effects of the required yard. The applicant shall furnish sections or profiles (drawn to scale) through the property line along the yard which is proposed for waiver. These drawings shall demonstrate the existing and proposed grades on both sides of the property line, as well as the principal structures on both properties. The sections or profiles shall show the line of sight for a pedestrian (taken at four and one-half feet above grade) from principal entrances and from the highest point on the site to be buffered. Such profiles or sections shall clearly demonstrate that the effect of the change in grade would negate the effect of a mature landscape buffer yard thirty feet in height. (Ord. BL2018-1416 § 11, 2019; Ord. 2001-750 §§ 15—31, 2001; Ord. BL2000-364 § 1 (part), 2000; Amdt. 2 (part) with Ord. 98-1323 § 4, 1998; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 6.5(G), 1997)

Chapter 17.28

ENVIRONMENTAL AND OPERATIONAL PERFORMANCE STANDARDS

Sections:

Article I. Environmental Performance Standards

17.28.010 Purpose and intent.
17.28.020 Applicability.
17.28.030 Hillside development standards.
17.28.040 Floodplain/floodway development standards.
17.28.050 Problem soil—Requirements.
17.28.060 Protection of Cedar Glade plant communities.
17.28.065 Trees.

Article II. Operational Performance Standards

17.28.070 Purpose and intent.
17.28.080 Applicability.
17.28.090 Reserved.
17.28.100 Lighting.
17.28.101 Air pollution control.
17.28.102 Storage capacity of flammable and combustible liquids, liquid gases and gases.
17.28.103 Underground utilities.
17.28.104 Compliance certification.

Article I. Environmental Performance Standards

17.28.010 Purpose and intent.

The purpose of this article is to establish standards for development in environmentally sensitive areas, in a manner which provides for reasonable use of the land while retaining to the maximum extent possible the environmentally sensitive portions in a predeveloped state. This article is predicated on the concept that land use policy decisions and zoning decisions must be made in the context of the land's characteristics. The choice of residential land uses should be based on site-specific characteristics which coincide with the many available varieties of housing. Commercial land use decision-making, conversely, is likely driven more by market forces, such as location or access, than by site characteristics. It is the intent of this article to offer incentives to minimize environmental disturbance. The requirements and standards of this article are intended to promote low-impact development in the sensitive hillsides and areas of special flood hazard of the community through incentives to preserve these lands in an undeveloped state, to insure protection of special vegetative assets and to promote well-conceived development which recognizes the problem soils of the community. (Ord. 96-555 § 7.1(A), 1997)

17.28.020 Applicability.

A. Hillside Development Standards. The hillside development standards apply to new construction on land in an undeveloped state where natural slopes are of fifteen percent or greater.

B. Special Flood Hazard Development Standards. The floodplain development standards apply to new construction where there are special flood hazard areas, as described in the Nashville stormwater management manual. Nothing contained in the official maps of special flood hazard shall prohibit the application of these regulations to lands which can be demonstrated by competent engineering survey to lie within any one hundred-year floodplain; conversely, any lands which can be demonstrated by competent engineering to lie beyond the floodplain shall not be subject to these regulations.

C. Problem Soils Requirements. The problem soil development standards apply to predevelopment conditions for new development located within the listed soil types as identified in the Davidson County Soil Survey (USDA, Soil Conservation Service).

D. Protection of Cedar Glade Plant Communities. The standards for Cedar Glade plant communities apply to predevelopment conditions for new residential construction located within Cedar Glades as identified by the Tennessee Department of Environment and Conservation.

E. Trees are acknowledged to be an important part of the natural environment and as such shall be protected and replaced as provided in this chapter.

F. Exemptions. The provisions of this article shall not apply to:

1. Any construction, development or use initiated pursuant to any valid building permit or approved final site plan issued or approved prior to the adoption of the ordinance codified in this title;

2. Any essential public utility facility, system or road initiated to provide utility services or access to a property;

3. Repairs or replacement to an existing structure or building that does not increase impervious surface area of the site more than twenty-five percent of the existing area or multiple increases of not more than fifty percent in any five-year period;

4. The construction of a single-family or two-family dwelling unit on a platted lot existing at the time of the enactment of the ordinance codified in this title; a lot depicted on a preliminary plat of subdivision having a valid approval by the planning commission on the effective date of the ordinance codified in this title; and subsequently recorded in compliance with that preliminary approval shall also be exempt. (Ord. BL2022-1122 § 9, 2022; § 5(1) of Amdt. 1 with Ord. 96-555 § 7.1(B), 1997)

17.28.030 Hillside development standards.

A. Residential Districts. The development of residentially zoned property shall minimize changes in grade, cleared area, and volume of cut or fill on those hillside portions of the property with twenty percent or greater natural slopes. Approval of a final site plan for a "critical lot" established by the subdivision regulations shall be based upon a demonstration that the proposal takes into consideration factors such as, but not limited to, soil conditions, degree of slope and feasibility of construction. The standards for review of critical lots from the adopted subdivision regulations shall apply.

1. Single or Two-Family Lots. The following provisions of this section shall not apply to single or two-family lots equal to or greater than one acre in size. For lots of less than one acre, any natural slopes equal to or greater than twenty-five percent shall be platted outside of the building envelope and preserved to the greatest extent possible in a natural state. The planning commission may authorize the creation of a single or two-family lot of less than one acre in size with natural slopes equal to or greater than twenty-five percent subject to the following standards and conditions:

a. The resulting lot shall be designated as a "critical lot" on the final plat of subdivision approved by the metropolitan planning commission and the department of public works;

b. For natural slopes that generally rise away from the fronting street, the building envelope width shall be as approved on all preliminary plats approved prior to March 1, 2006. After March 1, 2006, a building envelope on less than twenty percent natural slope and a minimum width of seventy-five feet at the building line shall be provided, or

c. For natural slopes that are generally parallel with fronting street, the building envelope width shall be as approved on all preliminary plats approved prior to March 1, 2006. After March 1, 2006, a building envelope on less than twenty percent natural slope and a minimum width of seventy-five feet at the building line shall be provided, or

d. For natural slopes that generally fall away from the fronting street, a building envelope on less than twenty-five percent natural slope shall be provided;

e. A certified engineer can demonstrate, through the use of special design and construction techniques, that a residential structure will be constructed on the lot in a manner which effectively minimizes disturbance of the hillside and optimizes the preservation of mature trees and will not adversely impact the storm water runoff on down slope or adjacent properties;

f. All specially noted design, construction and drainage standards shall be incorporated into the preliminary and final subdivision plat approvals, and recorded in the form of a covenant running with the land; and

g. The clearing of trees exceeding eight inches in diameter from those natural slopes equal to or greater than twenty-five percent shall be minimized by sensitive construction techniques.

2. Single and/or two-family subdivisions in areas characterized by twenty percent or greater slopes shall employ the conservation development provisions of Section 17.12.090. In general, lots so created shall be grouped on those portions of the site that have natural slopes of less than twenty percent. The planning commission may authorize lots on natural slopes ranging up to twenty-five percent, subject to the special standards and conditions noted above. Large contiguous areas containing natural slopes in excess of twenty-five percent should be recorded as either common or natural open space and permanently maintained in a natural state.

3. All Other Development in Residential Districts. For any multifamily or nonresidential form of development occurring within a residential district (the RM40, RM40-NS, RM40-A, RM40-A-NS, RM60, RM60-NS, RM60-A, RM60-A-NS, RM80-A, RM80-A-NS, RM100-A, and RM100-A-NS districts excepted), manipulation of the natural slopes by grading shall result in an effective impervious surface ratio (ISR) for those portions disturbed as shown in Table 17.28.030A.

a. That portion of a multifamily development site containing large contiguous areas of natural slopes of twenty-five percent or greater should be permanently maintained in a natural state. The clearing of trees exceeding eight inches in diameter from those natural slopes shall be minimized by sensitive construction techniques.

b. The use of retaining walls, rip rap or hydraulically applied concrete to stabilize slopes within multifamily developments shall be screened as follows:

i. When oriented towards a lot or parcel zoned R/R-A or RS/RS-A, apply the next higher landscape buffer yard standard from Section 17.24.240;

Table 17.28.030A
ISR ADJUSTMENTS (RESIDENTIAL DISTRICTS)

Natural Slope (%) ISR	Standard ISR		Adjustment Factor		Effective ISR
< 15%	Table 17.12.020B	×	1.0	=	Effective ISR
15 < 20%	Table 17.12.020B	×	0.66	=	Effective ISR
20 < 25%	Table 17.12.020B	×	0.33	=	Effective ISR
25% +	Table 17.12.020B	×	0.0	=	0

* For the purposes of calculation, slopes may be averaged for the entire lot area employing slope contour intervals of two feet.

ii. When oriented towards another lot or parcel with an RM zoning classification, apply landscape buffer yard Standard A from Section 17.24.240; and

iii. When oriented towards a public street, apply landscape buffer yard Standard B from Section 17.24.240.

B. Nonresidential Sites.

1. In all nonresidential zoning districts except CF, CF-NS, MUI, MUI-NS, MUI-A, and MUI-A-NS, manipulation of the natural slopes by grading shall result in effective impervious surface ratio (ISR) adjustments for those portions disturbed as shown in Table 17.28.030B.

2. Grading standards for hillside sites in nonresidential zone districts are as follows:

a. For lots or parcels containing natural slopes of twenty percent or greater, approval of a final site plan shall be based upon a demonstration that the development plan minimizes unnecessary disturbance to those slopes in the placement and orientation of building and parking areas. Architectural and engineering features which reduce unnecessary encroachment on steep slopes may include, but are not limited to, the use of retaining walls and structural foundations to return to natural grade.

b. The use of retaining walls, rip rap or hydraulically applied concrete to stabilize slopes on nonresidential sites shall be screened as follows:

i. When oriented towards a lot or parcel zoned R and R-A, RS and RS-A or RM, apply the next higher landscape buffer yard standard from Section 17.24.240; and

ii. When oriented towards a public street, apply landscape buffer yard standard B from Section 17.24.240.

Table 17.28.030B
ISR ADJUSTMENT (NONRESIDENTIAL DISTRICTS)

Natural Slope (%)	Standard ISR		Adjustment Factor		Effective ISR
< 15%	Table 17.12.020C	×	1.0	=	Effective ISR
15 < 20%	Table 17.12.020C	×	0.66	=	Effective ISR
20 < 25%	Table 17.12.020C	×	0.33	=	Effective ISR
25% +	Table 17.12.020C	×	0.0	=	0

* For the purposes of calculation, slopes may be averaged for the entire lot area employing slope contour intervals of two feet.

(Ord. BL2022-1121 § 5, 2022; Ord. BL2019-111 § 1(Exh. A, §§ 36, 37), 2020; Ord. BL2015-1153 § 16, 2015; Ord. BL2011-898 §§ 11, 13, 2011; Ord. BL2009-586 § 1(Exh. A, § 40), 2010; Amdt. 1 to Ord. BL2006-1045 § 1, 2006; Ord. BL2006-1045 § 1, 2006; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; § 5(2), (3) of Amdt. 1 with Ord. 96-555 § 7.1(C), 1997)

17.28.040 Floodplain/floodway development standards.

A. Limited encroachments into the preserved floodplain may be authorized as a variance by the stormwater management commission, as set forth in Section 15.64 of the Metropolitan Code of Laws. Such variances shall be approved only if the committee finds that the encroachment reduces the flood danger or would improve and enhance the environmental quality of the affected floodplain section. Variances shall not be approved for greater than twenty percent of the floodplain area required to be preserved.

B. All development shall be undertaken consistent with the flood insurance standards and requirements of the Federal Emergency Management Agency, as necessary, to maintain the eligibility of the National Flood Insurance Program within Davidson County. Notwithstanding any provision herein to the contrary, all development alterations or improvements that would otherwise be subject to Chapter 15.64 of this Code shall comply with the provisions of that chapter and the regulations and technical guidelines promulgated by the department pursuant to that chapter.

C. Residential Development. Residential development on property encumbered by natural floodplain or floodway on the effective date of the ordinance codified in this section shall comply with the following, except for the installation of streets and utilities where required by the planning commission to alleviate an undue hardship:

1. Single or Two-Family Lots. Land area designated as natural floodplain or floodway on the effective date of said section may be included within a residential lot, but if manipulated, shall not be counted towards satisfying the minimum lot size requirements of the base zoning district. Any residential lot, or any portion of a residential lot, containing natural floodplain shall be designated as a "critical lot" and minimum finished floor elevations shall be established on the final plat of subdivision approved by the metropolitan planning commission and the department of water and sewerage services.

2. Grouped lots. A single and/or two-family subdivision proposed on property containing natural floodplain and floodway areas shall employ the conservation development Section 17.12.090 or the Planned Unit Development (PUD) cluster lot option of Section 17.36.070. Residential lots under the conservation development or PUD cluster lot option may be grouped within the manipulated areas of the natural floodplain. Any residential lot, or any portion of a residential lot, containing natural floodplain shall be designated as a "critical lot" and minimum finished floor elevations shall be established on the final plat of subdivision approved by the metropolitan planning commission and the department of water and sewerage services. Protected floodway and floodplain areas shall not be excluded from the calculation of gross land area for purposes of determining lot yield pursuant to Section 17.12.090. (Ord. BL2023-1888 § 25, 2023; Ord. BL2022-1121 § 6, 2022; Ord. BL2016-513 §§ 32—36, 2017; Ord. BL2011-898 § 11, 2011; Ord. BL2009-586 § 1(Exh. A, § 41), 2010; Amdt. 1 to Ord. BL2002-1021 § 1, 2003; Ord. BL99-117 § 1 (part), 2000; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 7.1(D), 1997)

17.28.050 Problem soil—Requirements.

On lots or parcels identified as containing Bodine-Sulfura, Dellrose Cherty Silt Loam, Newark or Taft Silt loam soils, applications for final site plan approval shall be accompanied by a geotechnical report. Both the geotechnical report and the site plan shall be certified by a qualified engineer licensed in the State of Tennessee. The qualifying engineer shall certify that the construction techniques proposed adequately mitigate any potential soil hazards identified by the report. (Ord. 96-555 § 7.1(E), 1997)

17.28.060 Protection of Cedar Glade plant communities.

A residential subdivision or multifamily development proposed on land containing a designated Cedar Glade environment shall make all reasonable effort to preserve that environment through the use of conservation development afforded by this title. (Ord. BL2022-1121 § 7, 2022; Ord. 96-555 § 7.1(F), 1997)

17.28.065 Trees.

A. Designation of Tree Types.

1. Designation of Protected Trees. A protected tree is any existing tree with at least a six-inch diameter at breast height (DBH); or any existing tree two inches in DBH or larger located in the public right-of-way. To qualify as a protected tree, the tree shall not be listed on the most recent edition of the Tennessee Invasive Exotic Plant List and shall be in fair or better condition with no major insect or pathological problems.

2. Designation of a Heritage Tree.

a. A heritage tree is any tree that meets the one or more of the following criteria:

i. Any tree with a DBH that meets or exceeds the following sizes:

TREE TYPE	DBH	EXAMPLES but not limited to:
Deciduous Canopy	24"	Oak, Maple, Poplar, Planetree, Ginko

TREE TYPE	DBH	EXAMPLES but not limited to:
Evergreen Tall	10"	Am Holly, So. Magnolia, Pine, Spruce, Cedar
Deciduous Understory	8"	Redbud, Dogwood, Flowering Cherry, Jap. Magnolia, Jap. Maple
Evergreen Low	8"	Dwf. Magnolia, Hemlock, Hybrid Holly, Cherry Laurel (tree form)

ii. Any tree registered in the metro historic or specimen tree program; or

iii. Any tree listed on the Tennessee Champion Tree list or the Tennessee Landmark and Historic Tree Registry as maintained by the Tennessee Division of Forestry.

b. In addition to the criteria listed above, to qualify as a heritage tree the tree shall meet all of the following:

i. Shall not be listed on the most recent edition of the Tennessee Invasive Exotic Plant List;

ii. Must have a life expectancy of greater than fifteen years;

iii. Must have a structurally sound trunk without extensive decay;

iv. Must have no more than one major and several minor dead limbs; and

v. Must have no major insect or pathological problems.

3. Designation of Historic and Specimen Trees. Historic and Specimen Trees program is a volunteer program in which trees shall be designated by the Metropolitan Beautification and Environment Commission based on advice from the Metropolitan Tree Advisory Committee and consent of the property owner. No historic or specimen tree shall be removed without a finding by the Metropolitan Beautification and Environment Commission that the tree is a hazard or a determination that it is not economically or practically feasible to develop the parcel without removing the tree. All trees in the Historic and Specimen Trees program shall also be designated as Heritage trees as defined in Section 17.28.065 Trees.

B. Tree Preservation.

1. It is the intent of this section to minimize the removal of trees and to ensure that property owners and developers take reasonable measures to design and locate the proposed improvements so that the number of trees to be removed is minimized. In particular, the design shall attempt to preserve protected, heritage, and specimen and historic trees, which meet the criteria set forth in Section 17.28.065.A, designation of tree types. For purposes of this chapter, the term 'retained tree' means a tree that is selected to be saved or preserved for purposes of being counted toward the required tree density for the property and which is not listed on the most recent edition of the Tennessee Invasive Exotic Plant List and which is in fair or better condition, with no major insect or pathological problems.

2. Any tree with a diameter at breast height (DBH) of twenty-four inches or more, or that qualifies as a heritage tree under Section 17.28.065.A of this title, shall be survey located and depicted on the final site plan.

C. Replacement of Trees.

1. Trees removed pursuant to Section 17.40.470, tree removal permit procedures, shall be replaced at the expense of the property owner or developer to meet the required tree density standard.

2. Any retained tree that is removed without a tree removal permit shall be replaced on an inch for inch basis as specified Section 17.28.065.D.

3. Tree Density.

a. Each property, other than those residential properties provided for below. of this section, shall attain a tree density factor of at least twenty-two units per acre using retained or replacement trees, or a combination of both.

b. Residential properties shall attain the following tree density factors:

i. Property within a single and/or two-family residential subdivision for which the preliminary site plan is filed with the planning commission after the date of enactment of this subsection shall attain a tree density factor of at least fourteen units per acre using retained or replacement trees, or a combination of both, excluding the area of the building lots. Proof of compliance with this requirement shall be provided prior to the release of any applicable public infrastructure bonds.

ii. Requirements for individual single and two-family residential lots.

(1) Individual single and two-family lots, other than those lots zoned AG or AR2a, shall include at least one two-inch caliper tree for each thirty feet of lot frontage (or portion thereof), excluding alley frontage. Such trees must be chosen from the Urban Forestry Recommended and Prohibited Tree and Shrub List, and shall be of a form and quality set out in the American Standard for Nursery Stock (ANSI Z60.1, latest edition).

(2) Individual single and two-family lots on a cul-de-sac shall attain a tree density factor of at least two two-inch caliper trees for each thirty feet of lot frontage (or portion thereof). Such trees must be chosen from the Urban Forestry Recommended and Prohibited Tree and Shrub List, and shall be of a form and quality set out in the American Standard for Nursery Stock (ANSI Z60.1, latest edition).

(3) If the width of an individual single or two-family lot is less than twenty-five percent of the average lot depth, the lot shall attain a tree density factor of at least seven units per acre using retained or replacement trees, or both.

(4) Proof of compliance with this subsection shall be provided prior to the issuance of a certificate of occupancy.

iii. Alternative tree density requirements for single and two-family residential lots. In lieu of the requirements of subsection 2.a.ii of this section, a home builder may petition the urban forester for credit for retaining existing trees on the building lot, provided that the overall tree density, including both replacement and retained trees, is not less than seven units per acre. Retained trees used to satisfy this requirement shall be protected according to Section 17.28.065.A. Proof of compliance with this requirement shall be provided prior to the issuance of a certificate of occupancy.

c. Compliance with this subsection 3., tree density, shall be calculated using gross acreage of the property but shall not include the following:

i. The portion of the land area currently or proposed to be covered by buildings;

ii. The fenced area of any athletic field;

iii. The area of a lake or pond which is covered by water year round; and

iv. Open areas of golf facilities.

v. Natural areas preserved in open space pursuant to Section 17.12.090 Conservation Development.

d. Retained and replacement trees shall contribute toward the tree density.

e. Tree density schedules shall be calculated according to the following schedules.

Retained Tree Schedule

UNITS represents basal area

DBH refers to diameter at breast height

DBH	UNITS	DBH	UNITS	DBH	UNITS	DBH	UNITS
6	1.8	20	6.0	34	11.9	48	28.8
8	2.4	22	6.6	36	12.6	50	30.0
10	3.0	24	8.4	38	13.3	52	31.2
12	3.6	26	9.1	40	20.0	54	35.1
14	4.2	28	9.8	42	23.1	56	36.4
16	4.8	30	10.5	44	26.1	58	37.7
18	5.4	32	11.2	46	27.6	60	42.0

Heritage Tree Schedule

UNITS represents basal area

DBH refers to diameter at breast height

DBH	UNITS	DBH	UNITS	DBH	UNITS
8	3.2	14	5.6	20	8.0
10	4.0	16	6.4	22	8.8
12	4.8	18	7.2	24*	9.6

*Greater than 24" equals DBH × 0.5 per inch.

Replacement Tree Schedule

UNITS represents basal area

CAL refers to caliper size (a tree's diameter measured six inches from the top of the root ball)

Canopy Trees							
CAL	UNITS	CAL	UNITS	CAL	UNITS	CAL	UNITS
2	0.5	5	0.9	8	1.3	11	1.9
3	0.6	6	1.0	9	1.5	12	2.1
4	0.7	7	1.2	10	1.7	14	2.3

Understory and Columnar Trees							
CAL	UNITS	CAL	UNITS	CAL	UNITS	CAL	UNITS
2	0.25	5	0.5	8	0.7	11	1.0
3	0.3	6	0.5	9	0.8	12	1.1
4	0.4	7	0.6	10	0.9	14	1.2

4. Existing prohibited trees may be counted for full credit of the tree density requirement if in the opinion of the urban forester, they are healthy existing trees.

5. Single-trunk replacement trees shall be (i) a minimum width of two-inch calipers; (ii) a minimum height of six feet; and (iii) shall consist of recommended species listed in the Urban Forestry Recommended and Prohibited Tree and Shrub List.

6. A retained tree moved from one location to another on the site may be given credit upon approval of the urban forester.

7. Except for sites located within the Downtown Code (DTC) zoning district, credit toward the required tree density may be given for the installation of street trees that meet the following criteria:

a. Street trees shall be chosen from the Urban Forestry Recommended and Prohibited Tree and Shrub List and shall be a minimum of two-inch caliper and a minimum of six feet in overall height. Canopy trees shall be installed except where conflicts with overhead utility lines exist; in those instances, understory trees may be substituted.

b. Street trees installed for tree density credit shall be depicted on the landscape plan.

c. The proposed location of street trees and planting area dimensions and standards shall be subject to review and approval by the urban forester and metro public works.

d. The owner of the property frontage along which the street trees are installed shall maintain street trees installed per this title to International Society of Arboriculture standards.

8. Subdivision developments, other than single and two-family residential subdivisions required to meet the tree density requirements of subsection 2. of this section, shall be exempt from the tree replacement provisions of this title during the phases of construction to install streets, utilities and drainage structures required to be installed or bonded prior to recording of a final plat, so long as: (1) the tree survey includes the area to be disturbed by the construction of streets, utilities and required drainage facilities; and (2) the removal of protected and heritage trees, as set forth in subsection 17.28.065, is confined to the area of disturbance determined by the planning commission to be the minimum area necessary to install the infrastructure required by the subdivision regulations; and (3) so long as no protected and heritage trees, as set forth in subsection 17.28.065, are to be removed outside of the agreed upon disturbed area. Development of individual parcels within the subdivision must comply with the tree replacement provisions unless exempted by other provisions of this title.

9. Existing developments not otherwise exempted shall comply with the tree replacement provisions of this title when undergoing expansions as follows:

a. No additional compliance is required if there is no enlargement of the lot, or in the improved portion of the existing lot, and either:

i. The value of any one expansion is less than twenty-five percent, or the value of multiple expansions during any five-year period is less than fifty percent, of the value of all improvements on the lot prior to expansion; or

ii. The total building square footage of any one expansion is less than twenty-five percent, or the total building square footage of multiple expansions during any five-year period is less than fifty percent of the total building square feet of all improvements on the lot prior to expansion.

b. When the previously improved portion of a lot is enlarged, or additional area is incorporated into the lot, only the additional area or expanded area of improvement is required to be brought into compliance with the tree replacement requirements, if either:

i. The value of any one expansion is less than twenty-five percent, or the value of multiple expansions during any five-year period is less than fifty percent of the value of all improvements on the lot prior to expansion; or

ii. The total building square footage of any one expansion is less than twenty-five percent, or the total building square footage of multiple expansions during any five-year period is less than fifty percent of the total building square footage of all improvements on the lot prior to expansion.

c. Total compliance is required if exemption cannot be claimed under other provisions of this section.

10. Any replacement tree planted for credit shall be replaced by a tree of equal or greater diameter than originally planted if the tree dies. Under no circumstances shall any replacement tree, planted for credit, be removed by the owner or developer without the prior permission of the urban forester. All trees and shrubs required by this code shall be inspected within three years of initial planting. Notwithstanding the foregoing provision of this subsection to the contrary, there is no requirement that a replacement tree planted for credit be replaced if the tree dies as a result of a natural disaster or other act of God. For purposes of this section, 'natural disaster' shall not include drought.

11. Where construction work will be completed under a phased schedule, site work and tree removal for the entire tract may be completed at one time and replacement or addition of trees can be deferred for a maximum of five years, so long as each phase is in compliance with the tree density requirements upon completion of that phase, and so long as the entire site is in compliance with the tree density requirements within five years, or upon completion of the entire project, whichever occurs first.

12. Notwithstanding any provisions of this title to the contrary, the board of zoning appeals may hear and decide appeals from any order, requirement, decision or determination made by the urban forester in carrying out the enforcement of this chapter.

D. Protection of Trees During Development Activities.

1. General. To assure the health and survival of retained trees, the following kinds of tree injuries shall be prohibited during all development activities:

a. Mechanical injuries to roots, trunk and branches;

b. Injuries by chemical poisoning or soil flooding;

c. Injuries by grade changes;

d. Injuries by excavations, trenching, or soil compaction; and

e. Injuries by paving or other soil covering or material storage.

2. Tree Protection Zone. A tree protection zone shall be established around each retained tree, tree preservation area, and natural area, as required, as shown in Figure 17.28.065.D. The tree protection zone shall be comprised of two distinct areas.

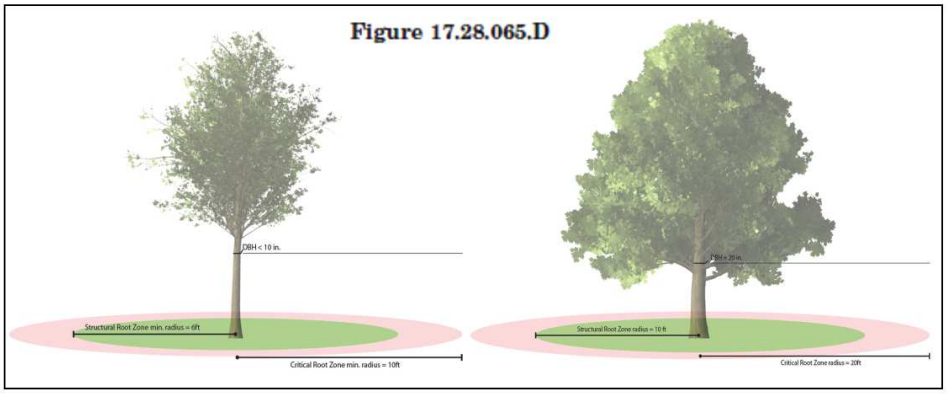
a. The structural root zone (SRZ) is to be determined by measuring one-half foot per each inch of tree diameter at breast height. If the SRZ is less than six feet, then the SRZ shall be a minimum of six feet.

1. No area within the SRZ shall be disturbed or modified.

b. The critical root zone (CRZ) shall be directly adjacent to the SRZ and is to be determined by measuring one foot per each inch of tree diameter at breast height. If the CRZ is less than ten feet, the protection zone shall be a minimum of ten feet.

1. The configuration of the CRZ may be adjusted up to twenty percent upon approval of planning or codes staff, as applicable. This may include pre-existing site conditions such as structures, foundations, or utilities. It may also include tree characteristics such as species and tolerance to stress and construction activities.

Figure 17.28.065.D



[2. Reserved.]

3. Development Prohibited within the Tree Protection Zone. All development activities shall be prohibited within the tree protection zone provided for any protected trees, including any construction of buildings, structures, paving surfaces, and storm-water retention/detention ponds. All temporary construction activities shall also be prohibited within tree protection areas, including all digging, concrete washing, storage of construction material, and parking of construction vehicles.

4. Development Prohibited within the Natural Areas. All development activities shall be prohibited within any tree protection zone established for a natural area preserved in open space pursuant to Section 17.12.090 Conservation Development.

5. Fencing of Tree Protection Zone or Natural Area Open Space. Prior to the commencement of grading or construction, the developer shall enclose the entire tree protection zone or natural area open space within a fence as follows:

a. Chain link fencing at least four feet in height and secured using appropriate posts spaced not more than ten feet apart.

b. During construction, each tree protection zone shall be identified with temporary signs to clearly demarcate the extent of the zone. Signs shall be made of a recyclable material and installed on the tree protection fence, visible on all sides of the fenced-in area at a rate of at least one sign for every one hundred linear feet. The size of each sign must be a minimum of two feet by two feet and shall contain the following language in English and Spanish: "TREE PROTECTION ZONE: KEEP OUT. ZONA DE LA PROTECCION DEL ARBOL. NO SE PERMITE ENTRAR". The owner shall maintain the protective barrier during the entire construction process and shall make certain that it is observed by the contractor.

c. The location of tree fence shall be coordinated with any required silt fence. Tree fence shall be located toward the tree with the silt fence outside to prevent erosion inside a tree preservation area.

d. Tree fence shall be maintained until applicable staff has completed a final inspection and released the project. For the purposes of this section, "applicable staff" means the urban forester or staff designated by the urban forester.

6. Tree Protection Zone Encroachment.

a. Utility Excavation. Excavating or trenching shall not be permitted within the tree protection zone. Utilities shall be located away from the tree protection zone. If trees are damaged or destroyed during excavation or trenching, the damaged or destroyed trees shall be replaced in accordance with Section 17.28.065. Placing of utilities through the use of tunnelling may be permitted with approval from planning or codes staff, as applicable. Applicable staff may propose rules and regulations governing and/or limiting utilities in the tree protection zone.

b. Sodding and Groundcover. Placement of sod or other groundcovers and the preparation of the ground surface for such covers shall be permitted within the tree protection zone, so long as tree roots in the area are not damaged by the method of preparation.

c. Tree Care. Pruning of branches or roots or removal of dead limbs on a tree/s located within the tree protection zone shall be permitted. An ISA certified arborist shall be required to supervise all operations related towards tree care. All tree care activities shall be done without the use of heavy machinery or vehicles within the tree protection zone. Prior to tree care activities, planning or codes staff, as applicable, shall be informed in writing.

7. Inspections.

a. All retained trees, pursuant to a tree survey, shall be inspected by applicable staff one year following completion of the project to ensure that they are surviving in a healthy condition.

b. Retained trees which require replacement shall be determined by planning or codes staff, as applicable.

c. Any retained tree which is damaged during construction, or with damage occurring as a result of construction, shall be replaced as provided in Section 17.28.065. Trees planted to replace damaged or removed protected trees shall not be counted toward the site TDU.

d. The owner shall be notified in writing of staff's determinations.

8. Tree Protection Violations.

a. Civil penalties shall be assessed in the event of injury, damage, or removal of trees within the tree protection zone. Penalties shall be assessed at fifty dollars per violation, per day. Each tree, in which a violation occurred, shall be considered an individual violation. No notice of violation shall be required prior to the assessment of civil penalty pursuant to this subsection.

b. In the event disturbance occurs, all trees within the tree protection zone shall no longer be counted for TDU requirements unless an assessment has been provided by an ISA certified arborist and approved by applicable staff.

c. Any injury, damage, or removal of tree shall be determined as removal without a permit and shall be replanted in accordance with Section 17.28.065.

d. A site shall be considered in compliance with the submittal of a revised landscape plan and planting deadline approved by planning or codes staff, as applicable. In the event that replacement trees are not planted by the agreed-upon deadline, civil penalties previously assessed shall resume until final inspection of replacement trees.

E. Less Desirable Trees. The urban forester shall compile a list of plants which are considered less desirable in the area of the metropolitan government. Upon adoption following public hearing and comment by the metropolitan planning commission, such list shall have the force and effect of regulation. The metropolitan beautification and environment commission, upon advice of the tree advisory board, may add or delete trees from such list from time to time following public hearing. Once such list of less desirable plants is duly adopted, the plants included therein may not be used to satisfy the requirements of Section 17.28.065.C, except as specifically permitted therein. Use of such trees in excess of the requirements of sections listed above is not prohibited.

(Amdt. 1 to Ord. BL2024-687 § 2, 2025; Ord. BL2024-687 § 2, 2025; Ord. BL2022-1122 § 11, 2022)

Article II. Operational Performance Standards

17.28.070 Purpose and intent.

The operational performance standards included in this article are intended to protect the health, safety and welfare of the citizens of Metropolitan Nashville and Davidson County by regulating potential hazardous or nuisance characteristics of land uses permitted by this title. (Ord. 96-555 § 7.2(A), 1997)

17.28.080 Applicability.

A. In case of conflict between the operational performance standards set forth herein and any rules or regulations adopted by any other applicable governmental agency, the more restrictive shall apply.

B. When an existing land use or structure is expanded, enlarged or otherwise reconstructed after the effective date of the ordinance codified in this title, the applicable performance standards shall apply to the expanded, enlarged or reconstructed portion, with the exception of undergrounding utilities; see Section 17.28.103 of this chapter.

C. The following performance standards are regulated by other codes:

1. Title 10, Chapter 10.56 of the metro code (Air Pollution Control) regulates smoke, particulate matter, demolition and odors, and is administered by the metropolitan health department.

2. Title 10, Chapter 10.64 of the metro code (Fire Prevention Code) regulates fire, hazardous materials, and explosive hazards, and is administered by the metropolitan fire marshal.

D. The following activities are exempt from the operational performance standards of this article:

1. Temporary construction, excavation and grading;

2. Demolition activities which are necessary and incidental to the development of facilities on the same lot, on another of several lots being developed at the same time, or on the public right-of-way or easement for a community facility. (Ord. BL2005-628 § 2, 2005; Ord. 96-555 § 7.2(B), 1997)

17.28.090 Reserved.

Editor's note—Ord. BL2019-1631, § 1, adopted August 20, 2019, repealed § 17.28.090, which pertained to noise and derived from Ord. 96-555 § 7.2(C), 1997. The user's attention is directed to Title 9, Noise and Amplified Sound.

17.28.100 Lighting.

A. Definitions Specific to this Section. When used in this chapter, the following words and terms shall have the meanings ascribed to them in this section. In the event of a conflict between a definition in this section and Section 17.04.060, the definition in this section will control.

"Ambient lighting" means the general overall level of lighting in an area.

"Architectural lighting means outdoor lighting directed at buildings, facades, structures, monuments, and other architectural features.

"Canopy" means a roofed structure with at least one side open for pedestrian and/or vehicle access that typically provides protection from the sun or weather and is associated with providing goods or services.

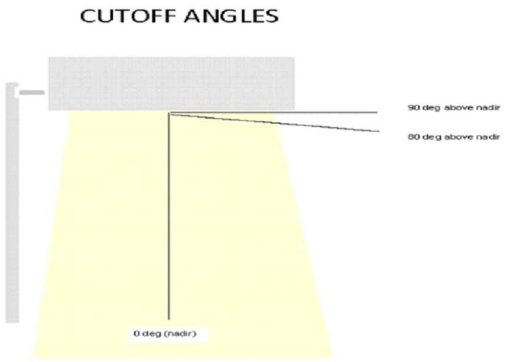
"Commercial" means any lot, however zoned, in any zoning district that does not have as its primary use a single-family or two-family residential dwelling or land used for agricultural purposes or a townhouse, house court, townhouse court, plex house, or manor house.

"Correlated color temperature (CCT)" means measured in degrees Kelvin (K), the absolute temperature of a blackbody whose chromaticity most nearly resembles that of the light source. For the purpose of this section, "CCT" is used as a simplified way to characterize the spectral properties of a light source and estimate the overall appearance of the light to the human eye.

"Floodlight" means a light designed for lighting a scene or object to a luminance greater than its surroundings.

"Foot-candle" means a unit of measure of illuminance equal to one lumen of light spread over an area of one square foot.

"Full cutoff luminaire" means a luminaire having zero intensity at or above horizontal (90°) and limited to a value not exceeding ten percent of lamp lumens at or above eighty degrees. Such luminaire is determined by a photometric test and certified by the manufacturer. See diagram below:



"Glare" means lighting entering the eye directly from luminaires or indirectly from reflective surfaces that causes visual discomfort or reduced visibility.

"IES" means Illuminating Engineering Society of North America.

"Illuminance" means the total luminous flux incident on a surface, per unit area.

"Illuminance grid plot" means a photometric report indicating the average horizontal illumination delivered to each of the squares of a gridded area illuminated by one or more luminaires.

"Initial lumen" means the measurement of a lamp's lumen output at the time the lamp is burned for the first time. As a light ages, the amount of light produced is reduced.

"Installed height" means the height above grade of the lowest light emitting point of an installed luminaire.

"ISO foot-candle plots" means a plot that graphically represents a particular luminaire's lighting pattern, in illuminance, as the light strikes a horizontal surface. It includes foot-candle calculations shown with the luminaire at various mounting heights. Contour lines are drawn through illuminance values.

"Kelvin" means a unit increment of temperature used as a color temperature scale of a light bulb (see definition of "correlated color temperature (CCT)" in this section).

"LED (light emitting diode)" means an electronic semiconductor device that emits light when an electrical current is passed through it.

"Lamp" means the source of light being emitted from a luminaire, such as a bulb, LED, and/or a refractive pane.

"Light" means electromagnetic radiation within a range of wavelengths sufficient for visual perception by the normal unaided human eye.

"Light level" has the same meaning as Illuminance.

"Light output" means luminous flux (see definition of "luminous flux" in this section). The amount of light which is emitted by a lamp or luminaire.

"Light pole" means a pole on which a luminaire is mounted.

"Light spill" means unwanted transmission of light onto adjacent areas that may affect sensitive receptors such as residential properties or ecological sites.

"Light trespass" means light that falls on property other than that of the owner of the light source.

"Lighting installation" means an arrangement of one or more luminaires including any mounting hardware, brackets, and supporting structures.

"Lighting plan" means an overall plan that describes the outdoor lighting.

"Lumen" means a unit of measure of luminous flux.

"Luminaire, light luminaire" means the complete lighting assembly (including the lamp(s), housing, ballasts, photocells, globes, reflectors or refractors, lenses, sensors and shield(s) and excluding the support assembly or pole, mounting bracket and base) consisting of one or more lamps, together with the attachment parts designed to distribute light, position and connect the lamp to the power supply.

"Luminous flux" means the power emitted from a source of electromagnetic radiation, such as a light bulb, in the form of visible light. Luminous flux is measured in lumens and is typically specified by the manufacturer for a given lamp or luminaire.

"Municipal stadium" means a structure:

1. With seats for not less than thirty thousand spectators;

2. Constructed after July 7, 1977;

3. Used primarily for sporting events and other related activities; and

4. Currently financed or was financed by general obligation bonds, revenue bonds or other indebtedness issued by the metropolitan government or the sports authority.

"Nadir" means the direction pointing directly downward from the light source of the luminaire that originates from a horizontal plane at the lowest point on the luminaire. See diagram above.

"Neon light" means colored fluorescent or gas discharge tubular which can be bent into various forms for use decoratively or as signs.

"New construction," subject to the exemption described in subsection 4 of this definition, means:

1. Site preparation for, and construction of, entirely new structures (including new poles) and subsequent replacement of such new structures or any part thereof.

2. Enlargement of any existing structure by the more restrictive of fifty percent of the area of the footprint of the building or fifty percent of the gross square footage of such existing structure (regardless of the number of other structures on the same site).

3. Adding new exterior lighting fixture(s), pole(s) or other amenity(ies) to existing structure(s) or pole(s) to which such fixture(s) were or are to be attached.

4. New construction does not mean the replacement of lamps in lighting fixtures, poles, or other amenities that existed prior to the passage of this ordinance.

"Open space and open space lot" means a parcel of land in a predominately undeveloped condition that is protected from development.

"Organized sporting event" means a prearranged sports or recreational event involving at least one group or team with a roster and schedule.

"Outdoor lighting" means light generated from an indoor or outdoor source that provides illumination to any exterior surface, building, sign, structure, device, or other outdoor feature (including land) which is visible to an observer located outdoors. For the purposes of this section, the light source inside an internally illuminated sign is not considered outdoor lighting.

"Photometric plan" means a technical plan that will indicate light distribution and the performance of lighting fixtures. It will explain the distribution of the proposed lighting and its effects on the area surrounding the site.

"Playing field" means an open outdoor field or court used for, but not limited to, playing sports such as baseball, soccer, football, tennis, volleyball, and basketball.

"Residential" means any zoning lot in a residential or agricultural zoning district that has as its primary use a single-family home or duplex or a townhouse, house court, townhouse court, plex house, or manor house.

"Street lighting" means one or more luminaires or light installations designed to illuminate a private roadway or intersection.

"Sidewalk lighting" means free-standing lighting for the illumination of sidewalks and walkways.

"Uplighting" means lighting applications which direct light above a horizontal plane.

B. Application of Provisions. This section shall be applicable to the following lighting applications:

1. Residential and Agricultural: All exterior lighting, excluding freestanding floodlights, is subject to subsection E.4 only. Freestanding floodlights shall be subject to subsections E.1.d, E.2, and E.4.

2. Commercial: For new construction only and the subsequent maintenance of all new construction: any outdoor lighting luminaire.

3. Public Utility Rental Lighting: Security lighting installed by the local public utility through a rental program is subject to Sections D, E1,E2, and F.

C. Exempt Outdoor Lighting. The following lighting is exempt from the provisions of these outdoor lighting regulations for new construction in any zoning district as of the effective date hereof, provided such activities are permitted by this title:

1. Temporary lighting for theatrical, television, performance areas and construction sites, specifically excluding upward-facing searchlights used to advertise the location of an event.

2. Lighting that is otherwise required for a life-safety purpose within the Metropolitan Code.

3. Lighting that is only erected or used under emergency conditions.

4. Lighting located within the following Downtown Code Subdistricts: Core Historic, Core, Upper Broadway, 2nd and Broadway, SoBro, except that such lighting shall be subject to the provisions of subsections D.3., D.4., and D.5. of this section.

5. Lighting located at a Municipal Stadium, except that such lighting shall be subject to the provisions of subsections D.3. and D.5. of this section. However, the provisions of D.5. shall not be applicable during an event, game, performance or other organized function at the municipal stadium.

6. Lighting on property owned by the Metropolitan Nashville Airport Authority and lighting otherwise required by the Federal Aviation Administration.

D. Prohibited Outdoor Lighting. The following lighting shall not be permitted for new construction in any zoning district as of the effective date hereof:

1. Strobe lights and laser lights, including laser light shows and aerial laser lights.

2. Flashing lights unless temporarily triggered by a security system and extinguished within thirty minutes or at a time of security response.

3. Any lighting luminaire that is construed as or confused with a traffic signal or traffic control device.

4. Lighting that contributes to or causes disabling or distracting glare onto a public roadway.

5. The use of uplighting, except when lighting a flag or other government endorsed symbol.

E. Illumination Standards:

1. Light Intensity and Uniformity:

a. The maximum illuminated surface light level at any point outdoor parking lots, automobile convenience stations and drive-in/drive-through canopies is ten foot-candles, measured horizontally at ground level.

b. The total installed initial luminaire lumens of all exterior lighting systems on the site shall not exceed the allowed total initial site lumens. The allowed total initial site lumens shall be the sum of 7,000 base lumens for all entrances and facades plus 2.5 lumens per square foot of hardscape.

c. As an alternative to compliance with the foregoing provisions of this section, an applicant may choose to comply with The International Dark Sky Association (IDA) model legislation of June 2011 (located at https://www.darksky.org/wp-content/uploads/bsk-pdf-manager/16_MLO_FINAL_JUNE2011.PDF.) except no special permit referenced in section VI.B of the model legislation shall be required. For special uses outlined in section VI.B of the model legislation that cannot comply with the technical requirements, a letter from an engineer licensed with the State of Tennessee shall be submitted to the department of codes administration confirming that the project has sustained reasonable effort to mitigate the effects of light on the environment and surrounding properties, supported by a signed statement describing the mitigation measures. Lighting zones in the model legislation shall correlate to the Transect Category for the site as designated in the Community Plans of NashvilleNext as follows:

T1 Natural	LZ-0
T2 Rural	LZ-1
T3 Suburban	LZ-2
T4 Urban	LZ-2
T5 Center D District	LZ-3
T6 Downtown	LZ-4

d. Light Direction and Control. Lighting applications shall meet the following requirements:

Lighting Application	**Maximum Inclination Above Nadir**
Architectural lighting	90 degrees
Floodlighting	90 degrees
Sidewalk lighting	90 degrees

2. Correlated Color Temperature (CCT): All lighting sources, except for public playing fields and lighting on public property necessary for the proper functioning of security cameras, must have a correlated color temperature (CCT) at or below three thousand degrees Kelvin (3000° K).

3. Permitted Hours of Outdoor Lighting:

a. Commercial: No more than fifty percent of exterior lighting shall be permitted to be illuminated, or lighting shall be dimmed by thirty percent illuminance except for one hour before start of business, during regular business hours as determined by said business, and one hour following close of business unless exempt for safety or security concerns. Motion detectors may be

used to restore lighting to one hundred percent for safety. All outdoor lighting shall be turned off during daylight hours.

b. Property Used for Governmental and Public Purposes: Any zoning lot in any zoning district used for governmental or public purposes, except for street lighting, shall comply with the permitted hours and security lighting limitations for commercial lighting zones. Outdoor lighting of the playing field of an organized sporting event on public property may remain illuminated until one hour after the conclusion of an event.

4. Light Trespass:

a. All site lighting shall be shielded so that substantially all directly emitted light falls within the property line. No illumination in excess of one-half foot-candle shall be permitted across the boundary of any adjacent residential property or the mid-line of a public street.

b. No illumination shall produce direct, incident or reflected light that interferes with the safe movement of motor vehicles on public streets. Lighting prohibited by this provision shall include, but not be limited to any light that may be confused with or construed as a traffic-control device.

c. Rope lighting shall not be used on a building, sign, or any property with non-residential zoning located adjacent to an arterial or collector street as identified on the Major and Collector Street Plan. This provision shall not apply to properties zoned as DTC.

F. Luminaire Standards:

1. Full Cutoff Requirement: All lighting regulated by this chapter shall be full cutoff.

2. Photocell/Timer Requirement for Parking Lot Lights: Parking lot lighting shall include photocells or timers as needed to regulate the hours of operation as required by this chapter and to prevent operation during daylight hours.

3. Canopy Requirement: All canopies must be skirted with a skirt depth of eight inches or greater or use other means to limit light spill to within ten feet of the area covered by the canopy.

G. Procedural Requirements:

1. Plan Submission: For land development, redevelopment and new zoning applications where outdoor lighting is proposed, prior to final approval by Metro Plans Inspection a letter from an engineer licensed with the State of Tennessee shall be submitted to the department of codes administration confirming that the plan complies with the requirements of this section. Engineer review shall be based on the following information:

a. A site plan complete with all structures, parking spaces, building entrances, traffic areas (both vehicular and pedestrian), vegetation that might interfere with lighting, and all adjacent uses. The site plan shall show and identify the location of each existing and proposed luminaire and shall specify its installed height, pole foundations, and method of mounting.

b. Iso-foot-candle plots for individual lighting installations, or ten feet by ten feet illuminance grid plots for multi-luminaire lighting installations which shall demonstrate compliance with all applicable requirements set forth in this chapter. The plots shall indicate the location of each existing and proposed luminaire, the installed height of said luminaires, and the overall light levels in foot-candles and initial lumens on the entire zoning lot and at the property lines.

c. A summary table identifying the maximum and minimum light levels in foot-candles and initial lumens for all, but not limited to, parking areas, street or building entryways, signs, street lighting, canopies, architectural lighting and walkways.

d. A description of each luminaire identified in the site plan including, but not limited to:

i. Manufacturer with website.

ii. Lamp type.

iii. Bulb type including CCT (Kelvin).

iv. Model number.

v. Photograph or catalog cut.

vi. Photometric plan.

vii. Light output in initial lumens.

viii. Shielding or glare reduction devices.

ix. Energy reduction and on/off control devices.

2. Post Approval Alterations: Post approval alterations to lighting plans or intended substitutions for approved lighting equipment shall be submitted to the zoning inspector after review by a qualified engineer at the expense of the applicant and approval prior to issuance of an use and occupancy permit, with all plan submission requirements set forth in this chapter, prior to installation.

3. Inspections: The department of codes administration shall have the right to conduct a post installation inspection to verify compliance with the requirements of this chapter and, if appropriate, to require remedial action within thirty days at the expense of the applicant.

4. Violations of this chapter shall be punishable as provided by Chapter 17.40, Article XIII of the Metropolitan Code.

5. Variances: Variances to the requirements of this chapter may be granted by the board of fire and building code appeals as provided in Chapter 2.80 of the Metropolitan Code. (Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2022-1088 §§ 2, 3, 2022; Ord. BL2021-974 § 1, 2021; Amdt. 2 to Ord. BL2020-535 § 2, 2021;

Ord. BL2020-535 § 2, 2021; Ord. BL2017-903 § 2, 2017; Ord. BL2013-403 § 1, 2013; Ord. 96-555 § 7.2(D), 1997)

17.28.101 Air pollution control.

In all districts, all material storage and manufacturing activities must comply with the air pollution regulations contained in Chapter 10.56 "Air Pollution Control" of the Metropolitan Code of Laws and the regulations adopted pursuant thereto by the metropolitan health department, pollution control division. (Amdt. 1 with Ord. 98-1268 § 1 (part), 1998)

17.28.102 Storage capacity of flammable and combustible liquids, liquid gases and gases.

Table 17.28.102
STORAGE CAPACITY OF FLAMMABLE AND COMBUSTIBLE LIQUIDS, LIQUID GASES, AND GASES

In the table below, all storage amounts are based on up to two acres of land. Properties of over two acres may increase the allowable storage provided in the table by an equal percentage of property in excess of two acres.

All storage of flammable liquids, liquid gases or gases must be referred to the metropolitan fire marshal for a determination that the storage will comply with the Metropolitan Fire Code, as amended, prior to issuance of a permit.

	LIQUIDS				LIQUID GASES		GASES	
	Above Ground		Below Ground					
ZONING DISTRICTS	Less than 100 F Flash Point	100-300 F Flash Point	Less than 100 F Flash Point	100-300 F Flash Point	Above Ground	Below Ground	Above Ground	Below Ground
CS, CS-NS, CS-A, CS-A-NS, CF, CF-NS	5,000 gal.	20,000 gal.	10,000 gal.	80,000 gal.	5,000 gal.	20,000 gal.	100,000 SCF	300,000 SCF
IWD, IR	10,000 gal.	30,000 gal.	Unlimited	Unlimited	30,000 gal.	50,000 gal.	300,000 SCF	Unlimited Except no more than 1 million SCF per acre within 300 feet of any more restrictive zoning district boundary
IG	Unlimited Except no more than 50,000 gal. per acre shall be stored within 300 feet of a district boundary.	Unlimited Except no more than 50,000 gal. per acre shall be stored within 300 feet of a district boundary.	Unlimited	Unlimited	Unlimited Except no storage shall be permitted within 100 feet of a district boundary.	Unlimited Except no storage shall be permitted within 100 feet of a district boundary.	Unlimited Except no storage shall be permitted within 100 feet of a district boundary.	Unlimited Except no storage shall be permitted within 100 feet of a district boundary.

(Ord. BL2019-111 § 1(Exh. A, § 38), 2020; Ord. BL2015-1153 § 15, 2015; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998)

17.28.103 Underground utilities.

A. Applicability. These standards shall apply to any application for residential development submitted to the metropolitan government for approval, wherein a new public or private street is to be constructed now or in the future, or where an existing public or private stub street, is to be extended, as follows:

1. Any application for a new or amended preliminary planned unit development;

2. Any new or amended preliminary SP plan;

3. Any new or amended preliminary urban design overlay district; or

4. Any new or revised preliminary subdivision plat; and in the case of a proposed revised preliminary plat, these provisions shall only apply to those plats deemed to be a major modification by the executive director of the metro planning department, as provided in the Subdivision Regulations.

B. Utility Services.

1. A public utility easement shall be provided along all public and private streets and alleys by the property owner.

2. All public and private utility services installed shall be underground, including the conduit (raceway) from service equipment, except as provided in subsections C, D, and F of this section. Such conduit (raceway) shall be placed underground to the curbline and/or utility right-of-way, including but not limited to, electric, telephone, communication, exterior lighting and television cable.

3. Related equipment excluding electric utility meters shall be above ground, preferably within the furnishing zone between the curb and sidewalk, within the public utility easement, or within the required street setback; electric utility meters shall be above ground, not located within the required street setback, and located on or within three feet of the serviced structure unless otherwise expressly required by the power supplier for safety and access purposes. Equipment placed in the street right-of-way shall be subject to all applicable laws and ordinances.

C. Previously Approved Streets and Utilities. Where a subdivision abuts an existing public or private street, or one shown on an approved final plan with an overlay district, recorded final plat, or on the Metropolitan Government Official Street and Alley Map, then no undergrounding shall be required of existing utilities or new utilities proposed along that existing portion of the public or private street, unless underground utilities already exist.

D. Exemptions. The following items shall be exempt from complying with the provisions of this section.

1. Any residential lot or parcel greater than forty thousand square feet in size.

2. Above-ground utility equipment installed, maintained, and utilized by utility companies for a period not to exceed thirty days in order to provide emergency utility services. The time limitation may be extended, if warranted, by the metro planning commission.

3. Utility equipment utilized exclusively for street lighting purposes.

4. Utility equipment utilized exclusively for vehicular and pedestrian traffic control purposes.

5. Utility equipment appurtenant to underground facilities and which meet the requirements of subsection (B)(3) of this section, such as service-mounted, pedestal-mounted, or pad-mounted transformers, terminal boxes, meters, cross boxes, cabinets, vaults, electronic enclosures, pedestals, flush-to-grade hand holes, splice closures.

6. Temporary utility equipment utilized or to be utilized exclusively in conjunction with construction projects, seasonal, or special event installations. Upon installation of permanent utility service, above-ground service shall be removed.

7. Fire hydrants, fireplugs, and other utility equipment utilized exclusively for firefighting purposes.

8. Overhead wires attached to the exterior surface of a building by means of a bracket or other fixture and extending from one location on the building to another location on the same building, or to an adjacent building or to the alley, without crossing any public street.

9. Antennas, associated equipment and supporting structures, used by a utility for furnishing communication services.

10. Electrical distribution lines on major streets as shown on the Major Street Plan, electrical transmission lines, or switch gear.

11. Equipment installed by the utility which should not be installed underground for engineering, safety, or environmental regulatory reasons.

12. Utility lines where severe disruption of existing improvements, diminished quality of service, or undue difficulty in repair would occur. Such exemption shall require the review and approval of the metropolitan planning commission.

13. Utility lines where an affected adjoining property owner will not consent to modification of easements. Such exemption shall require the review and approval of the metropolitan planning commission.

E. Variance. A property owner and/or developer may appeal to the board of zoning appeals indicating why undergrounding utilities are not feasible in accordance

with the procedures set forth in Section 17.40.350 of this Code. The board shall not act upon such a request without first receiving a recommendation from the metropolitan planning commission, as provided in Section 17.40.340 of this Code.

F. Alleys. Where a subdivision proposes alleys, utilities may be located above or below ground in these alleys. If utilities are located above ground, then all utilities serving the proposed lots shall be placed in the alleys, except any street light system. Utilities connecting one alley to another alley may cross a public or private street above ground.

G. Property Owner Responsibility. The property owner and/or developer installing, requesting, or requiring the construction of the improvement, and not the metropolitan government or the utility, shall be responsible for the cost of placing utility lines underground and shall make the necessary arrangements with the serving utility companies. The utility shall have no obligation to underground facilities unless and until it receives full payment for costs to do so.

H. Non-Conforming Utility Equipment. Any utility equipment approved or installed and operating prior to the effective date of the ordinance codified in this section may be maintained in its present condition and may be upgraded to conform to new technologies and regulatory requirements.

I. Existing City Franchises Not Affected. The provisions of this section do not waive any right enjoyed by the metropolitan government with respect to any franchisee, nor waive the obligations created by any franchise. If any provision of this section conflicts with any provision of a franchising agreement or ordinance, said franchise provision shall control. The provisions of this section likewise are not intended to create any conflict with the rights granted pursuant to T.C.A. §§ 65-21-201, et seq. and 65-21-107.

J. Relationship to Other Requirements. In case of conflict between the standards of this section and any other standards, rules, or regulations adopted by any other applicable metropolitan government department or agency, the provisions of this article shall control.

K. Severability. If any portion of this section is held to be invalid or unconstitutional by any court of competent jurisdiction, such holding shall not affect any other portion of this section. (Ord. BL2022-1581 § 2, 2023; Ord. BL2018-1403 § 1, 2019; Ord. BL2005-628 § 3, 2005)

17.28.104 Compliance certification.

In all districts, any request for a zoning permit for manufacturing or other uses shall be accompanied by a certification from a licensed registered professional engineer of the state which states that the proposed activity can comply with the applicable performances standards. If the zoning administrator has reasonable belief that a violation may occur despite the opinion of the engineer, then the zoning administrator, may reject the application, citing the reasons. (Amdt. 1 with Ord. 98-1268 § 1 (part), 1998)

*__Editor's note—__Ord. BL2016-309, § 5(Exh.), passed August 16, 2016, repealed the former Ch. 17.32, §§ 17.32.010—17.32.160, and enacted a new Ch. 17.32 as set out herein. The former Ch. 17.32 pertained to similar subject matter and derived from Ord. 96-555, 1997, as amended. See the Ordinance List and Disposition Table for complete derivation.

17.32.010 Purpose and intent.

A. Safety. Construct and display signs in a manner that allows pedestrians and motorists to identify, interpret and respond in an efficient and discerning manner to the following:

1. Information related to public traffic control, directions and conditions;

2. Movement of all other pedestrians and vehicles that impact traffic on a given travelway; and

3. Information other than public traffic related when displayed in a manner which is clear, concise and noncompeting with public traffic information.

B. Protection of Minors. Prohibit the location of signs that are harmful, or potentially harmful, to minors that include nudity or sexual activity through the exposure and/or exaggerated representation of genitals, buttocks and/or breasts.

C. Graphic Continuity and Aesthetics. Organize signs in a manner that reduces visual clutter and integrates signs with all other elements of the site and environs by limiting the size, location and design of signs so that pedestrians and motorists have an equal right to view buildings, structures and natural features in the foreground and background.

D. Protection of Future Public Right-of-Way. Limit the location of signs so that reasonable expansion of the public right-of-way can occur in conformance with the capital improvements program and without disturbance of existing conforming signs.

E. Activities and Services Identification. Based on a communities need to know, provide for signs that identify the marketplace and the opportunities provided by the community. (Ord. BL2016-309 § 5(Exh.), 2016)

17.32.020 General provisions.

A. Interpretation. These sign regulations are intended to complement the various codes and ordinances of the metropolitan government. Wherever there is inconsistency between these sign regulations and other regulations of the metropolitan government, the more stringent shall apply. Reference is made but not limited to the following regulations:

1. Building code;

2. Electrical code;

3. Major street plan;

4. Zoning title and performance standards;

5. Metropolitan Code Section 13.08.050 (sign in public right-of-way);

6. Metropolitan Code Section 12.48.090A (Bus benches and signs);

7. Metropolitan Code Section 17.04.060 (specified anatomical areas);

8. Historic district regulations;

9. State of Tennessee Outdoor Advertising Regulations;

10. Traffic and parking code.

B. Design, Construction and Maintenance. All signs shall be designed, constructed and maintained in accordance with the following standards:

1. Compliance with Codes. All signs must comply with all the provisions of the Metropolitan Code.

2. Permanency Required. All signs shall be constructed of permanent materials and shall be permanently affixed to the ground or building unless otherwise exempted in this chapter.

3. Maintenance. All signs shall be maintained in good surface and structural condition, with all panels in place, complete, and intact, and in compliance with all building and electrical codes. (Ord. BL2023-1858 § 1, 2023; Ord. BL2016-309 § 5(Exh.), 2016)

17.32.030 Rationale, definition, system for regulation and overall use.

A. Rationale. The word "sign" is chosen to signify all nonverbalized communication in public viewed areas because of its traditional use. The word "graphic" is synonymous with sign and the two may be used interchangeably within the context of this sign code. An on-premises sign shall not be a principal use.

B. Definition. The definition of "sign" as provided hereinafter is all-inclusive. A sign is any writing (including letter, work or numeral), pictorial representation (including illustration or decoration); emblem (including device, symbol or trademark); flag (including banner or pennant); inflatable structure; or any other figure of similar character, which is:

1. A structure or any part thereof, or is attached to, painted on, or in any other manner represented on a building or other structure; and

2. Used to announce, direct attention to, or advise.

C. System for Regulation. Regulation of signs is based on size, location, method of attachment, duration and design/lighting. The following distinctions apply to the regulation of signs:

1. Regulation based on size;

2. Regulation based on location;

3. Regulation based on method of attachment:

a. On-premises ground sign,

b. On-premises building sign;

4. Regulation based on duration:

a. On-premises temporary sign,

b. On-premises permanent sign;

5. Regulation based on design/method of lighting:

a. Illuminated sign,

b. Nonilluminated sign.

Regulations apply to signs with respect to specific permissiveness and provisions in each use district or group of related districts. Regulations are generally more restrictive in residential districts than in commercial and industrial. Additional regulations may further apply to areas of special design control such as, but not limited to:

1. Airport district;

2. Historic districts;

3. Floodplain districts;

4. Redevelopment districts;

5. Urban design overlay districts.

D. Overall Use. The use of on-premises temporary signs is permitted wherever there is a need to display information for a limited period of time. The use of permanent on-premises ground or on-premises building signs is permitted wherever there is a need to display information as provided for in this chapter, where there is a principal use. (Ord. BL2016-309 § 5(Exh.), 2016)

17.32.040 Exempt signs.

The following on-premises signs are exempt from the operation of these sign regulations provided they are not placed or constructed to be in violation of Section 17.20.180, Visibility, or so as to create a hazard of any kind through the obstruction of vision by motorists and pedestrians.

A. Within nonresidential districts, signs that are displayed for the safe direction of the public on the property, such as signs which identify entrances, exits, drive-thru windows, or signs of a similar nature. Such signs shall not exceed six square feet in area, provided that such sign, or combination of such signs, does not constitute a sign prohibited by Section 17.20.180 of this title and shall adhere to the height and setback provisions for permanent, on-premises ground signs;

B. Signs necessary to promote health, safety and welfare, and other regulatory, statutory, traffic control or directional signs erected on public property with permission as appropriate from the state, the United States of America, or the Metropolitan Government of Nashville and Davidson County;

C. Legal notices and official instruments;

D. Holiday lights and decorations;

E. Public warning signs to indicate the dangers of trespassing, swimming, animals or similar hazards for nonresidential uses;

F. Works of art that do not constitute advertising;

G. Signs carried by a person when the person does not receive any financial compensation;

H. In districts other than commercial and industrial districts, non-commercial flags of eight square feet or less in size when mounted on permanent poles attached to the ground or building;

I. In commercial and industrial districts flags of eight square feet or less in size that are mounted on individual poles. The poles shall be separated by a minimum distance of twenty-five feet, except that four poles may be clustered at one location per street frontage. If the option to cluster is exercised no other poles shall be erected along that street frontage. The flags may contain a logo and shall be subject to the height and front setback requirements for the respective district;

J. Temporary signs which do not exceed twelve square feet in area, up to 120 days prior to an election, and removed within seven days after the election;

K. Flags and bunting, up to thirty days prior to and removed within seven days following the celebration, convention or commemoration type event;

L. Temporary displays and signs behind storefront windows which are not affixed permanently to the glass, nor intended for permanent display, and non-illuminated, provided that such temporary signs do not cover more than twenty-five percent of the total surface area of the storefront window;

M. Memorial signs or tablets when cut into any masonry surface or when constructed of bronze or other incombustible materials and attached to the surface of a building;

N. Signs incorporated into machinery or equipment by a manufacturer or distributor, such as those customarily affixed to vending machines, newspaper racks, telephone booths, fee collection boxes, and gasoline pumps;

O. In residential districts, any non-commercial sign of a type described below which does not exceed one square foot in area:

1. A sign located on the front of house itself, one sign per lot,

2. A mailbox sign (one sign per dwelling unit).

P. Temporary or permanent signs identifying safety or traffic-control measures on private property, such as "stop," "yield," and similar signs, the face of which meet the standards of the "Manual for Uniform Traffic Control Devices" and which do not exceed six square feet in area per sign;

Q. Temporary signs which do not exceed six square feet in area, are limited to one per lot, which are erected no sooner than four days before any yard sale event, and are removed within two days after the event;

R. Temporary signs on active construction sites in residential districts which do not exceed six square feet in area and six feet in height, which are limited to one per lot, and which are installed after issuance of a building permit and removed prior to the issuance of a certificate of compliance. If a sign is displayed pursuant to this section, but construction is discontinued for a period of more than sixty days, the message shall be removed, pending continuation of construction activities;

S. Temporary signs on active construction sites in nonresidential districts which are equal to or less than thirty-two square feet in area and ten feet in height, which must be spaced at least one hundred feet apart, and which are installed after issuance of a building permit and removed prior to the issuance of a certificate of compliance. Construction-related signs that are thirty-two square feet or more in area and ten feet in height must comply with the district requirements for a permanent sign. If a sign is displayed pursuant to this section, but construction is discontinued for a period of more than sixty days, the message shall be removed, pending continuation of construction activities;

T. Temporary signs on real property that is for sale or will be for sale within thirty days, in residential districts which do not exceed six square feet in area per sign, which do not exceed six feet in height for ground signs, and which are limited to one ground sign per street frontage and one building sign with wall attachment per dwelling unit;

U. Temporary signs on real property that is for sale or will be for sale within thirty days, in nonresidential districts which are less than thirty-two square feet in area per sign, which do not exceed ten feet in height for ground signs, and which are limited to one ground sign per street frontage and one building sign with wall attachment per building facade if the entire building is for sale or lease or one building sign with wall attachment per leasable area if subunits of the building are for lease or rent;

V. Temporary signs, less than thirty-two square feet in area and limited to one sign on the site of an event, may be erected no sooner than fourteen days before an event held by a public or nonprofit organization, and must be removed within seven days after the event;

W. An on-premises ground or on-premises building sign oriented toward a drive-through lane. The total sign area shall not exceed sixty square feet and a maximum height of ten feet. The sign shall be located within thirty feet of the point at which orders are taken from the motor vehicle;

X. Signs located within a building that are not oriented so as to be viewed from the exterior of the building. Signs located within a ten acre lot, that are not visually oriented toward a public right-of-way;

Y. Signs located on athletic fields, if oriented toward the field of play;

Z. Temporary signs to be erected no longer than seventeen days prior to an auction and to be removed within twenty-four hours after an auction. Any such sign

shall not exceed twenty-four square feet in size in residential districts and thirty-two square feet in all other districts.

AA. In commercial districts, inflatable moving figures made to resemble the human form used to draw attention to an event or business, provided such inflatable figures are attached to a fixed base, do not exceed twenty feet in height from the ground, are not located within one thousand feet of a residential structure, are only used/displayed during daylight hours, and area kept in a good state of repair with a properly-functioning blower motor and material that is not worn or tattered. In addition, a maximum of one inflatable figure shall be allowed on any parcel regardless of its size or the number of businesses located or operating on that same parcel. The foregoing exemption for inflatable moving figures shall not apply for commercial properties with frontage along Lebanon Road, McGavock Pike, Elm Hill Pike, or Donelson Pike.

BB. In the agricultural districts, signs erected during the time that agricultural products are for sale that do not exceed sixteen square feet in area, are not illuminated, and are not a prohibited sign as set forth in Section 17.32.050. (Amdt. 1 to Ord. BL2016-309 § 5, 2016; Ord. BL2016-309 § 5, 2016)

17.32.050 Prohibited signs.

It is unlawful to erect, cause to be erected, maintain or cause to be maintained, any sign not expressly authorized by, or exempted from, this title. Any prohibited sign(s) may be removed by the zoning administrator or his designee after notice to the property owner or occupant to remove such sign(s) within three days. The following signs are expressly prohibited:

A. Signs that are in violation of any other code adopted by the metropolitan government as stipulated in Section 17.32.020;

B. Signs or sign structures that interfere in any way with free use of any fire escape, emergency exit or standpipe, or that obstruct any window to such an extent that light or ventilation is reduced to a point below that required by any provision of this title or other ordinance of the Metropolitan Code;

C. Signs that resemble any official sign or marker erected by any governmental agency, or that by reason of position, shape or color, would conflict with the proper functioning of any traffic sign or signal, or be of a size, location, movement, content, color or illumination that may be reasonably confused with or construed as, or conceal, a traffic-control device;

D. Signs that contain any lighting or control mechanism that causes unreasonable interference with radio, television or other communication signals;

E. Signs placed upon benches, bus shelters or waste receptacles, except as may be authorized pursuant to Metropolitan Code Section 12.48.090;

F. Signs erected on public property, or on private property (such as private utility poles) located on public property, other than signs erected by public authority for public purposes or as otherwise authorized by the metropolitan council;

G. 1. Signs with any copy, graphics, or digital displays that change messages by electronic or mechanical means, where the copy, graphics, or digital display does not remain fixed, static, motionless, and non-flashing for a period of eight seconds with all copy changes occurring instantaneously without any special effects.

2. Signs with any copy, graphics, or digital displays that change messages by electronic or mechanical means, other than tri-face billboards, shall not be permitted in the CA, CA-NS, CS, CS-NS, CF, CF-NS SCR, SCR-NS, IWD, IR and IG districts unless the following distance requirements are satisfied, based upon the overall height of the sign:

a. Signs four feet or less in height shall not be less than one hundred feet from any agriculturally or residentially-zoned property.

b. Each additional foot in height, or portion thereof, above four feet shall be setback an additional twenty-five feet from any agriculturally or residentially-zoned property. For example, a sign between five and six feet in height shall not be less than one hundred fifty feet from any agriculturally or residentially-zoned property.

3. Sign display areas with varying light illumination and/or intensity, blinking, bursting, dissolving, distorting, fading, flashing, oscillating, rotating, scrolling, sequencing, shimmering, sparkling, streaming, traveling, tracing, twinkling, simulated movement, or convey the illusion of movement.

4. Free-standing and wall-mounted digital display billboards, including the conversion of existing billboards to digital billboards, less than two thousand feet apart. The spacing distance shall be measured along the roadway that the billboard is located and shall be measured from billboard to billboard regardless of the side of the roadway on which the billboard is located, the billboard's orientation on that roadway or the public street classification.

5. Notwithstanding the foregoing provisions of this subsection, any digital billboards not in compliance with the applicable provisions of Section 17.32.150 are also prohibited.

6. Notwithstanding the foregoing provisions of this subsection signs with any copy, graphics, or digital displays that change messages by electronic or mechani-

cal means shall not be permitted in the CS zoning district for uses classified as Automobile repair, Automobile sales, used; Car wash and Vehicular sales and services limited.

H. 1. Video, continuous scrolling messages, and animation signs, except in the commercial attraction (CA and CA-NS) districts.

2. LED message boards and digital display signs in the AG, AR2a, R, R-A, RS, RS-A, RM, RM-NS, RM-A, RM-A-NS, MUN, MUN-NS, MUN-A, MUN-A-NS, MUL, MUL-NS, MUL-A, MUL-A-NS, MUG, MUG-NS, MUG-A, MUG-A-NS, MUI, MUI-NS, MUI-A, MUI-A-NS, MHP, ON, OL, OG, OG-NS, OR20, OR20-NS, OR20-A, OR20-A-NS, OR40, OR40-NS, OR40-A, OR40-A-NS, ORI, ORI-NS, ORI-A, ORI-A-NS, CN, CN-NS, CN-A, CN-A-NS, CL, CL-NS, CL-A, CL-A-NS, CS- A, CS-A-NS, SCC, SCC-NS, SCN, and SCN-NS districts, provided that this prohibition shall not apply to signs existing as of January 1, 2014, that are located on property zoned MUI-A or MUI-A-NS along an arterial street within the urban zoning overlay district and have a surface area in excess of 1,200 square feet.

I. Signs that incorporate projected images, emit any sound that is intended to attract attention, or involve the use of live animals;

J. Signs that emit audible sound, odor or visible matter such as smoke or steam;

K. Signs, within ten feet of public right-of-way or one hundred feet of traffic-control lights, that contain red or green lights that might be confused with traffic-control lights;

L. Signs that are of such intensity or brilliance as to cause glare or impair the vision of any motorist, cyclist or pedestrian using or entering a public way;

M. Blank on-premises temporary signs;

N. Strings of incandescent light bulbs with wattage in excess of ten watts per bulb that are used on commercially developed parcels for commercial purposes other than temporary holiday decorations;

O. Signs, commonly referred to as wind signs, consisting of one or more flags which are not otherwise exempted, pennants, ribbons, spinners, streamers or captive balloons which are less than ten feet in their greatest dimension, or other objects or material fastened in such a manner as to move upon being subjected to pressure by wind;

P. Signs that are painted, pasted, or printed on any curbstone, flagstone, pavement, or any portion of any sidewalk or street, except house numbers and traffic-control signs;

Q. Signs attached to, suspended from or painted on any motor vehicle, trailer or other equipment in:

1. Residential Districts. Signs attached to, suspended from or painted on any motor vehicle, trailer or other equipment, including but not limited to trucks, recreational vehicles, boats, automobiles, truck campers, travel trailers, mobile homes, motorcycles, lawn implements, implements of husbandry, etc., parked on any street or on any private or public property and which are marked to attract the attention of the public for the purpose of selling, advertising, displaying or other commercial purposes are prohibited.

2. Nonresidential Districts. All motor vehicles, trucks, trailers and other types of equipment which have company logos or business signs attached to, suspended from or painted thereon and which are regularly parked on the premises shall be confined to the portion of the property behind the front line of the building except while being actively loaded or unloaded, unless parking on the property behind the front line is not possible, in which event such vehicles, trailers and equipment shall be parked in as remote a location as possible away from the public streets and public view. The parking of such vehicles to augment tenant identification or to attract the attention of the public for the purpose of selling, advertising, displaying, demonstrating or for any other purpose related to the promotion of business or other activity on the premises is prohibited;

R. Signs displaying copy that is harmful to minors as defined by this title;

S. Portable signs as defined by this title. (Ord. BL2019-111 § 1(Exh. A, §§ 39, 40), 2020; Ord. BL2016-309 § 5(Exh.), 2016)

17.32.060 Permitted on-premises temporary signs.

On-premises temporary signs are allowed throughout Nashville and Davidson County, subject to the restrictions imposed by this section and other relevant parts of this title.

A. Sign Types Allowed. A temporary sign may be an on-premises ground or on-premises building sign, but may not be constructed of or operated by electrical, electronic or mechanical parts. Banners are defined as being temporary signs.

B. Removal of Illegal On-Premises Temporary Signs. Any temporary sign not complying with the requirements of this section is illegal and subject to immediate removal.

C. Restrictions on On-Premises Temporary Signs. Any on-premises temporary sign may display any message so long as it is:

1. Not harmful to minors as defined by this title;

2. Posted during, or up to thirty days prior to, a period in which:

a. An owner, either personally or through an agent, is actively attempting to sell, rent or lease the property on which the sign is located,

b. A business in a nonresidential district is opening, changing use, changing location, or going out of business.

Such message may be displayed for a period of not more than sixty days or until installation of permanent signs, whichever shall occur first;

3. Posted during, or up to thirty days prior to, a period in which: the property is hosting an event such as a fair, carnival, circus, revival, sporting event, flea market, or any public, charitable, educational or religious event or function. Such message shall be erected no sooner than fourteen days before the event, and removed within seven days after the event;

4. Posted during, or up to thirty days prior to, a period in which a vacant lot, or a temporary structure, such as a tent, is being used to offer goods for sale. Such message may be displayed for a period not exceeding thirty days, and not more than once a quarter on a yearly basis.

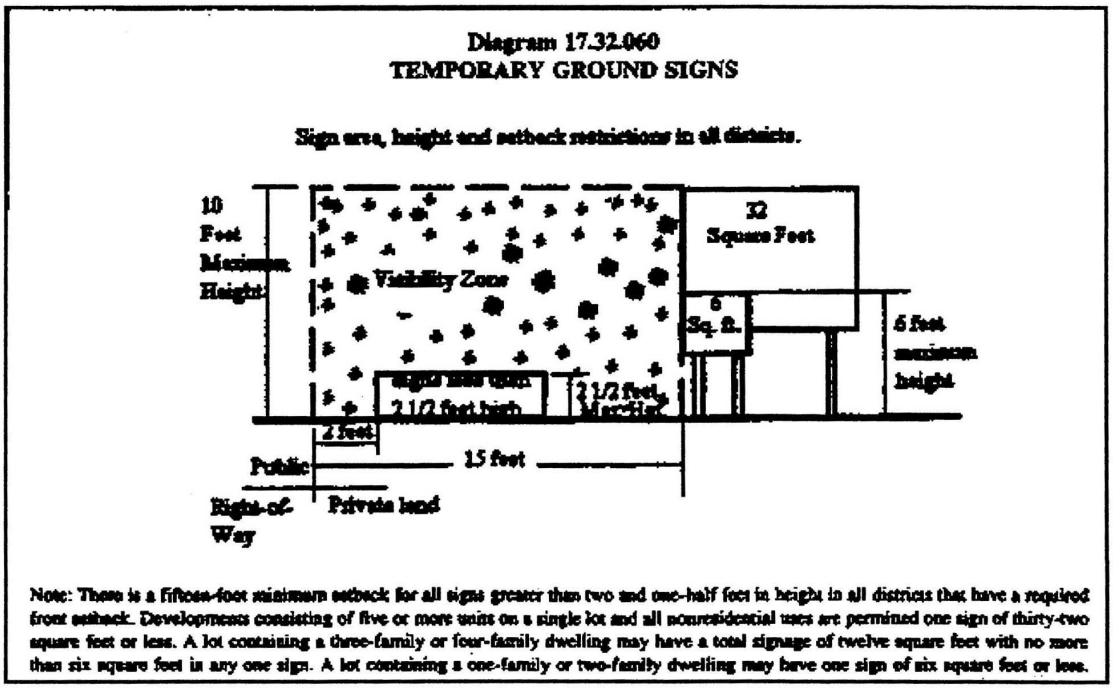
D. Open Space Requirements for On-Premises Temporary Signs. On-premises temporary signs shall comply with the front yard requirements, as illustrated in Diagram 17.32.060 and shall not be permitted in a required side or rear setback.

E. Permissible Size, Height and Number.

1. Single-Family and Duplex Residences. Any lot occupied by a one-family or two-family residence may display one on-premises temporary sign with a maximum sign area of six square feet and a maximum height of six feet.

2. Triplex and Quadruplex Residences. Any lot occupied by a three-family or four-family residence may display not more than two on-premises temporary signs with an aggregate sign area of not more than twelve square feet. No individual sign shall exceed six square feet in area nor six feet in height.

3. All Other Uses. All other lots may display one square foot of on-premises temporary signage per ten feet of frontage to a maximum of thirty-two square feet. Lots with frontage on more than one side may apply this provision to one additional side. No on-premises sign shall exceed ten feet in height.



(Ord. BL2016-309 § 5(Exh.), 2016)

17.32.070 Permanent on-premises signs.

A. Sign Types Allowed. A permanent on-premises sign may be permitted as a ground or building sign subject to the restrictions imposed by this section and other relevant restrictions imposed by this title.

B. Setback and Height Restrictions. The maximum height and street setback requirements for signs in nonresidential and mixed-use districts shall be as established by Figure 17.32.070, Permanent Ground Signs.

C. Sign construction materials. All permanent on-premises signs shall be constructed of a rigid, weatherable material such as hard plastic, wood, MDO plywood, aluminum, steel, PVC, and/or Plexiglas. On-premises permanent signs shall not be constructed of non-rigid materials including, but not limited to, vinyl, fabric, canvas, or corrugated plastic. The provisions of this subsection shall not apply to approved, permitted canopies, awnings, and porticoes.

D. Guidance for the Use of Signs.

1. An on-premises sign is for the purpose of conveying information in clear, concise, safe and compatible units to general motorists and pedestrians on travelways and within each site.

2. Size, location, method of attachment and design/lighting are regulated in general based on districts and the type of activity therein. Permanent on-premises signs are subject to the common signage plan requirements.

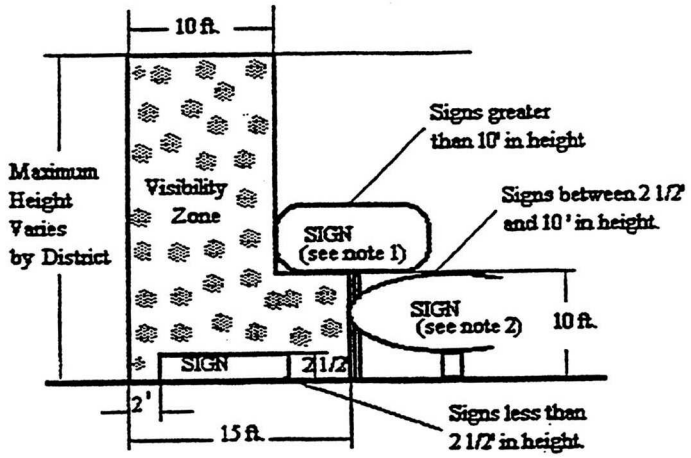
3. On-premises building signs shall not extend above the roof line of the structure. On-premises wall signs shall not extend above the top of the wall or parapet more than twenty-five percent of the height of such sign, to a maximum of eighteen inches for a solid panel sign, or fifty percent of the height of the letter for individual mounted letters. The above restrictions shall not apply to the commercial amusement (CA and CA-NS) districts provided that the sign(s) is not readily visible from a public street external to the development or residentially zoned property abutting the subject property.

4. No permanent on-premises ground sign may be located in a required rear setback.

5. With regard to multiple frontage (frontage on more than one street) the amount of on-premises ground signage is computed by adding all of the frontage along each street and applying the total to the table under the appropriate district; the total on-premises ground sign area that is oriented toward a particular street may not exceed the portion of the lot's total ground sign area allocation that is derived from that street. No on-premises ground sign on one street frontage on the same lot shall be closer than one hundred feet to an on-premises sign fronting on another street, computed as the sum of distance measured continuously along the rights-of-way through a common point or points. On-premises ground signs in excess of two hundred eighty-eight square feet shall require even greater spacing as specified under each district or group of districts. On-premises building signage does not require additional computation for multiple frontage since the signage area is based solely on number of principal buildings, number of occupants and percent of building facade.

6. A single tenant or multitenant sign may be considered an on-premises sign when located within the boundaries of the same approved master development plan or unified plat of subdivision.

Figure 17.32.070
PERMANENT GROUND SIGNS



Setback restrictions in nonresidential and mixed-use districts.
Note 1: There is a minimum ten foot setback for signs with more than ten feet of ground clearance in all districts which require a front setback.
Note 2: There is a minimum fifteen foot setback for signs with more than two and one-half feet but less than ten feet of ground clearance in all districts that require a front setback.

(Ord. BL2019-111 § 1(Exh. A, § 41), 2020; Ord. BL2016-309 § 5(Exh.), 2016)

17.32.080 On-premises signs in residential districts.

Permanent on-premises ground and on-premises building signs at the entrance to a residential development are permitted subject to the following restrictions:

A. Each residential development containing three through fifteen dwelling units and approved under one plat shall be permitted one on-premises identification sign, with a maximum size of six square feet, at the development entry from a public street. The provisions of subsection B of this section, subdivisions (4), (5), (6) and (7) shall apply.

B. Each residential development containing at least sixteen units and approved under one plat shall be permitted up to thirty-two square feet per development entry, to a maximum of three, from a public street. The on-premises signage at each development entry may be one of the following:

1. A double-sided sign located perpendicular to the public street and containing up to thirty-two square feet for the one sign face;

2. A single-sided sign located parallel to the public street and containing up to thirty-two square feet for the one sign face. Displaying a sign on the opposite face, if the total number permits, will be counted as one additional sign;

3. A flared wall, or similar, to which two single-sided signs are attached or imbedded and each sign does not exceed sixteen square street;

4. The leading edge or face of the sign or any building or other structure to which the sign is attached must be set back from the public right-of-way a minimum of fifteen feet;

5. No residential identification sign may exceed six feet in height;

6. All residential identification signs may be illuminated by direct and steady means only;

7. Each residential identification sign shall be maintained perpetually by the developer, sign owner, owners' association or some other person who is legally accountable under an approved maintenance agreement. Signs that are not maintained shall be removed by the developer or owner.

C. One flat-mounted on-premises building sign of a maximum of thirty-two square feet in area, for each street frontage, may be placed on the street facing facade of a building that contains a minimum of sixteen units, provided that it is:

1. Illuminated by direct and steady means only;

2. Does not extend more than six inches from the facade of the building. (Ord. BL2016-309 § 5(Exh.), 2016)

17.32.090 Community facility on-premises signs.

A. Signs located at community facilities in residential districts shall conform to the size provisions applicable to the ON district. The maximum height of a ground sign shall be eight feet; the minimum street setback shall be fifteen feet; the sign shall not encroach required side setbacks of the district; and only one such ground sign shall be permitted per street frontage.

B. All Other Districts. Community facilities shall be permitted the signage of the district occupied by the community facility. (Ord. BL2016-309 § 5(Exh.), 2016)

17.32.100 Informational signs for large sites.

A. Sites larger than five acres shall be allowed an additional informational sign, in addition to other on-premises signs. An informational sign may convey non-commercial information, directions or instructions for the safety, convenience and need to know for the use, or restriction of use, of a lot on a permanent basis.

B. All signs of this nature shall be designated on the common signage plan for the property.

C. The provisions of Section 17.32.050, Prohibited signs, shall apply to prohibited signs.

D. Sign Types Allowed. A sign of this nature may be a ground or building sign, and shall be permitted in addition to other on-premises signs.

E. Permissible Number, Size and Height. The following standards shall apply to all such signs except for those utilized in the commercial attraction (CA and CA-NS) districts when not readily visible from a public street external to the development or residentially zoned property abutting the subject property:

1. Developments with improved land area of five acres or more shall be permitted two informational signs per five acres of improved area. Any fractional values shall be discarded.

2. The maximum size of any one informational sign shall be thirty-two square feet.

3. The maximum height of any informational ground sign above grade shall be ten feet.

4. Copy height shall be limited to a maximum of six inches.

5. Copy may include one logo per face provided that the logo does not exceed twenty percent of the total sign area.

F. Required Setbacks.

1. An informational sign shall not be located within fifty feet of a side or rear lot line.

2. An informational sign shall not be located within one hundred feet of a front lot line. (Ord. BL2019-111 § 1(Exh. A, § 42), 2020; Ord. BL2016-309 § 5(Exh.), 2016)

17.32.110 On-premises signs—MUN, MUN-NS, MUN-A, MUN-A-NS, MUL, MUL-NS, MUL-A, MUL-A-NS, ON, OL, OG, OG-NS, OR20, OR20-NS, OR20-A, OR20-A-NS, OR40, OR40-NS, OR40-A, OR40-A-NS, CN, CN-NS, CN-A, CN-A-NS, CL-A, CL-A-NS, CS-A, CS-A-NS, SCN, SCN-NS districts.

A. Based on whether an on-premises sign is an on-premises ground or on-premises building sign, refer to the subsection under the appropriate type for computation of sign area.

B. All on-premises ground and on-premises building signs must be approved under an overall signage plan.

C. The number, area, spacing and height of permanent on-premises ground signs shall be determined according to Table 17.32.110, except that land uses classified as Car wash shall be further restricted as specified in Section 17.16.070.

Table 17.32.110

Lot Frontage in Feet	Max. No. of Signs	Max. Area of Any One Sign in Sq. Ft.	Max. Total Area of All Signs in Sq. Ft.	Min. Side Setback (See Note 1)	Min. Setback to Other Ground Signs on the Same Lot	Max. Height in Feet
Less than 50	1	32	32	2 ft.	NA	20 ft.
50—99	1	40	40	2 ft.	NA	20 ft.
100—199	1	48	48	10 ft.	NA	20 ft.
200—299	1	64	64	25 ft.	NA	20 ft.
300—399	2	96	96	25 ft.	100 ft.	20 ft.
400—499	3	128	128	25 ft.	100 ft.	20 ft.
500—599	3	160	160	25 ft.	100 ft.	20 ft.
600 or more	3	192	192	25 ft.	100 ft.	20 ft.

Note 1: Where a side lot line abuts a street or a controlled access highway the minimum side setback shall be ten feet.

D. Each multitenant principal building may display not more than two on-premises building signs with a combined sign area of not more than thirty-two square feet.

E. In addition to the principal building signage each occupant of a multiple occupancy complex may display not more than two on-premises building signs on any exterior viewed portion of the complex that is part of the occupant's unit. The total sign area shall not exceed fifteen percent of the facade area for the public entry side or a maximum of one hundred ninety-two square feet, whichever is less. Occupants with a second public entry may divide their permitted signage, but a signage bonus is not given for an additional entry.

F. Where there is only one occupant of a principal building, or where the owner of a multitenant building so chooses, not more than two on-premises building signs may be displayed on any exterior viewed portion of the building, not to exceed a combined sign area equal to fifteen percent of the facade area upon which the sign(s) is displayed to a maximum of one hundred ninety-two square feet. If the owner of a multitenant building chooses this option then no building signage shall be allowed under subsection E of this section. (Ord. BL2019-111 § 1(Exh. A, § 43), 2020; Ord. BL2016-309 § 5(Exh.), 2016)

17.32.120 On-premises signs—ORI, ORI-NS, ORI-A, ORI-A-NS, MUG, MUG-NS, MUG-A, MUG-A-NS, MUI, MUI-NS, MUI-A, and MUI-A-NS districts.

A. Based on whether an on-premises sign is an on-premises ground or on-premises building sign, refer to the subsection under the appropriate type for computation of sign area.

B. All on-premises ground and on-premises building signs must be approved under an overall signage plan.

C. The number, area, spacing and height of permanent on-premises ground signs shall be determined according to Table 17.32.120, except that land uses classified as Car wash shall be further restricted as specified in Section 17.16.070.

Table 17.32.120

Lot Frontage in Feet	Max. No. of Signs	Max. Area of Any One Sign	Max. Total Area of All Signs	Min. Side Setback (See Note)	Min. Setback to Other Ground Signs on the Same Lot	Max. Height in Feet
Less than 50	1	48 sq. ft.	48 sq. ft.	10 ft.	NA	20 ft.
50—99	1	64 sq. ft.	64 sq. ft.	15 ft.	NA	20 ft.
100—199	1	96 sq. ft.	96 sq. ft.	25 ft.	NA	20 ft.
200—299	1	128 sq. ft.	128 sq. ft.	50 ft.	NA	20 ft.
300—399	2	160 sq. ft.	160 sq. ft.	50 ft.	100 ft.	20 ft.
400—499	2	192 sq. ft.	192 sq. ft.	50 ft.	100 ft.	20 ft.
500 or more	3	288 sq. ft.	288 sq. ft.	50 ft.	100 ft.	20 ft.

Note: Where a side lot line abuts a street or a controlled access highway the minimum side setback shall be ten feet.

D. Each multitenant principal building may display not more than two on-premises building signs with a combined sign area of not more than forty-eight square feet.

E. In addition to the principal building signage each occupant of a multiple occupancy complex may display not more than two on-premises building signs on any exterior viewed portion of the complex that is part of the occupant's unit (not including common or jointly owned area). The total on-premises sign area shall not exceed fifteen percent of the facade area of such exterior portion.

F. Where there is only one occupant of a principal building, or where the owner of a multitenant building so chooses, not more than two on-premises building signs may be displayed on any exterior viewed portion of the building, not to exceed a combined sign area equal to fifteen percent of the facade area upon which the sign(s) is displayed to a maximum of two hundred eighty-eight square feet. If the owner of a multi-tenant building chooses this option then no building signage shall be allowed under subsection E of this section. (Ord. BL2019-111 § 1(Exh. A, § 44), 2020; Ord. BL2016-309 § 5(Exh.), 2016)

17.32.130 On-premises signs—CL, CL-NS, CS, CS-NS, CA, CA-NS, CF, CF-NS, SCC, SCC-NS, SCR, SCR-NS, IWD, IR and IG districts.

A. Based on whether an on-premises sign is an on-premises ground or on-premises building sign, refer to the subsection under the appropriate type for computation of sign area.

B. Any lot may have some or all of its permitted area for on-premises ground signage transferred to on-premises building signage and the individual on-premises sign size increased accordingly.

C. All on-premises ground and on-premises building signs must be approved under an overall signage plan.

D. The number, area, spacing and height of permanent on-premises ground signs shall be determined according to Table 17.32.130.D, except that land uses classified as Automobile repair, Automobile sales, used; Car wash and Vehicular sales and services limited shall be further restricted as specified in Section 17.16.070.

Table 17.32.130D

Lot Frontage in Feet	Max. No. of Signs (See Note 2)	Max. Area of Any One Sign	Max. Total Area of All Signs	Min. Side Setback (See Note 1)	Min. Setback to Other Ground Signs on the Same Lot	Max. Height in Feet (See Note 2)
Less than 50	1	150 sq. ft.	150 sq. ft.	2 ft.	NA	40 ft.
50—99	1	198 sq. ft.	198 sq. ft.	2 ft.	NA	40 ft.
100—199	1	288 sq. ft.	288 sq. ft.	10 ft.	NA	40 ft.
200—299	2	288 sq. ft.	288 sq. ft.	10 ft.	NA	40 ft.
300—399	2	384 sq. ft.	384 sq. ft.	25 ft.	100 ft.	40 ft.
400—499	3	480 sq. ft.	480 sq. ft.	25 ft.	100 ft.	40 ft.
500 or more	3	480 sq. ft.	576 sq. ft.	25 ft.	100 ft.	40 ft.

Note 1: Where a side lot line abuts a street or a controlled access highway the minimum side setback shall be ten feet.

Note 2: The CL and CL-NS districts any lot within one thousand feet of a controlled access highway interchange may have one additional on-premises ground sign of not more than two hundred eighty-eight square feet with a maximum height of fifty feet provided:

a. The additional on-premises ground sign is oriented to the controlled access highway and adheres to all other provisions of this title; and

b. The other on-premises ground sign is oriented to the street of principal access, is spaced at least one hundred feet from any other ground sign on the lot, and is restricted to the maximum height permitted in the CS and CS districts; and

c. Further, that up to forty square feet of the ground sign oriented to the street of principal access may be transferred to this sign area when noted on the signage plan; and

d. This additional on-premises sign is available only at interchanges when a highway logo sign is not present.

Note 3: In addition to the number of ground signs permitted by Table 17.32.130D. [formerly 8.13], properties directly abutting a controlled access highway may install an additional on-premise ground sign along the frontage of that highway at the rate of one sign per one thousand feet of highway frontage. Such signs shall be spaced a minimum of one thousand feet apart. A sign oriented to a controlled access highway may be as large as the greater of (1) the maximum size of a sign otherwise permitted by Table 17.32.130D, or (2) the maximum size of a sign otherwise permitted by Table 17.32.130D as determined by substituting "Controlled Access Highway Footage Frontage in Feet," in lieu of "Lot Frontage in Feet." The maximum height of a highway oriented sign shall be, fifty feet as measured from the average grade of the sign foundation, or thirty feet above the finished elevation of the nearest travel lane of the highway, whichever is greater. In the commercial attraction district, the maximum area of any one sign shall be nine hundred square feet, the maximum total area of all signs shall be two thousand square feet, and the maximum height of a highway oriented sign shall be eighty feet as measured from the average grade of the sign foundation, or sixty feet above the finished elevation of the nearest travel lane of the highway, whichever is greater.

E. On-Premises Ground Signs Based on Ground Floor Area. The chart below offers an option to utilizing frontage to calculating the square footage for one on-premises ground sign to be located only at the primary entrance. On-premises ground signs located on other frontage must be determined by Table 17.32.130D.

Table 17.32.130E

Ground Floor Area	Allowable Square Footage per 1,000 Square Feet of Ground Floor Area
22,000—29,999	6
30,000—49,999	5
50,000—99,999	4
100,000 or more	3

No on-premises ground sign whose display surface area is generated by ground floor area shall exceed four hundred eighty square feet in area.

F. On-Premises Building Signs. On-premises building signs shall be subject to the following restrictions:

1. Each facade of a principal building shall be restricted to a maximum building signage of fifteen percent of the area of the facade.

2. This area may be increased by transferring all or part of the permitted on-premises ground sign area to on-premises building signage. A twenty percent bonus of the amount transferred may also be applied to the total on-premises building signage. (Ord. BL2019-111 § 1(Exh. A, §§ 45, 46), 2020; Ord. BL2016-309 § 5(Exh.), 2016)

17.32.140 On-premises signs—DTC district.

See Section 17.37 (Downtown Code) for standards on signage within the DTC district. (Ord. BL2016-309 § 5(Exh.), 2016)

17.32.145 Landmark signs.

A. A landmark sign must meet all of the following criteria:

1. Materials, technology, and design: Representative of excellence in a particular period of construction; and/or is unique in that it demonstrates extraordinary aesthetic quality, creativity or innovation.

2. Integrity: Retains the majority of its character-defining features (materials, technologies, structure, colors, shapes, symbols, text, and/or art) that have historical significance, or are integral to overall sign design, or convey historical or regional context. If character-defining features have been altered or removed, the majority are potentially restorable to their historic function and appearance.

3. Safety: Structurally safe or can be made safe without substantially altering its historical appearance.

4. Location: The sign is not an off-site sign or billboard, as defined in the Zoning Code.

5. Regionalism: The sign is unique, or was originally associated with a chain or franchise business that is either a local or regional chain or franchise only found in Nashville or the southeastern United States; or there is national interest or scholarly documentation to support its preservation.

B. An historic sign must be constructed more than fifty years before the date of application and must meet all of the criteria for landmark sign designation and must meet all of the following criteria:

1. An historic sign may be repaired, restored, and/or adaptively reused if there is sufficient surviving fabric or sufficient historical documentation (photographs, postcards, permits, or other records) on which to base the treatment concept. An existing historic sign may be repaired, restored, or rehabilitated either in place, or off-site and then re-erected on site.

2. An historic sign may be repaired or restored to any past appearance prior to fifty years before the date of application. If the owner of an historic sign can provide documentation or physical evidence that the original design included intermittent lighting features (e.g., flashing, blinking, chasing or sequentially lit elements which create the appearance of movement) or moving parts, those sign elements may be repaired and restored.

3. An historic sign that will be adaptively reused must retain, repair, or restore the majority of the character-defining features (e.g., materials, technologies, structure, colors, shapes, symbols, text, typography and/or artwork) that have historical significance, or are integral to the overall design of the sign, or convey historical or regional context. Changes to character-defining text are not allowed; any or all text that is not character defining can be changed. Changes to text must either match or be compatible with existing text or the text being replaced, in terms of materials, letter size, font, and color.

C. A vintage sign must meet all of the criteria for landmark sign designation and must meet all of the following criteria:

1. Age: Constructed between fifty and twenty-five years before the date of application. Applications for signs constructed within twenty-five years of the date of application may be considered on the cultural and iconic contribution to the surroundings.

D. Replica sign:

1. A replica sign is permissible when based on sufficient historical documentation of the sign and its location. A sign can be replicated only once. Replicas of replicas are not permitted. A replica sign must use

historical materials and technologies, or use contemporary materials and technologies that visually match historical ones.

E. Guidelines for relocating a landmark sign:

1. A designated landmark sign may be relocated as follows:

a. To another location on the premises.

b. To another location that houses the same or similar business.

c. To an area of similar character within a one mile radius of the present location.

d. To the original location.

2. A designated landmark sign shall not be relocated to a R, R-A, RS, RS-A, RM, RM-NS, RM-A, or RM-A-NS zoned property.

3. A designated landmark sign shall not be relocated within one hundred fifty feet of a primary structure on R, R-A, RS, RS-A, RM, RM-NS, RM-A, or RM-A-NS zoned property.

4. All relocations are subject to the following:

a. The sign must be located no less than twenty feet from the face of the curb or edge of pavement. Where there is no curb, the measurement shall be taken from the street property line.

b. Projecting signs that project into the public right-of-way shall follow the rules and procedures of metro government, and shall follow the sign permitting process.

F. Sign calculations for a landmark sign:

1. Where the landmark sign does not identify the business occupying the premises, and is not used by an owner or occupant of the premises to advertise a business currently occupying the premises, the landmark sign shall not count against the total allowable sign area for the premises and shall not count against the number of signs allowed for the premises.

2. Where the landmark sign does identify the business occupying the premises or is used or adaptively reused by an owner or occupant of the premises to advertise a business currently occupying the premises, fifty percent of the square footage of the landmark sign shall count toward the total allowable sign area and shall count against the number of signs allowed for the premises.

3. One hundred percent of the square footage of a replica sign shall count toward the total allowable sign area for the premises and shall count against the number of signs allowed for the premises. (Ord. BL2019-111 § 1(Exh. A, §§ 47, 48), 2020; Ord. BL2016-309 § 5(Exh.), 2016)

17.32.150 Billboards.

A. Districts Permitting Billboards. Billboards shall be permitted in the CL, CL-NS, CS, CS-NS IWD, CF, CF-NS, IR, and IG districts subject to the provisions of this chapter and this title. However, billboards are prohibited on any property within a planned unit development (PUD) overlay district, regardless of the underlying zoning district, unless expressly permitted as part of an approved development plan by the metropolitan council; and in the CS and CS-NS districts for uses classified as Automobile repair, Automobile sales, used; Car wash and Vehicular sales and services limited. Type I billboards are prohibited in the CL and CL-NS districts. Type II billboards in the CL and CL-NS districts shall be limited to those areas of a lot which are within three hundred feet of the right-of-way of a controlled access highway, and all billboards shall be oriented towards that highway.

B. Regulations. Billboards are permitted in addition to other signs authorized by this title subject to the following restrictions:

1. There shall be two types of billboards based on the display surface area of the billboard:

a. Type I with a display surface area of seventy-five square feet or less; and

b. Type II with a display surface area of more than seventy-five square feet and less than six hundred seventy-five square feet.

2. The maximum display surface area for each type may be exceeded by thirty percent for embellishments to the standard rectangular sign, provided the embellishments do not project more than five feet above the top nor more than three feet beyond the sides and two feet beyond the bottom of the standard rectangular sign.

3. A billboard face shall consist of a single panel. Multiple panel faces, such as stacked or side-by-side, are not permitted.

4. One face of two back-to-back billboards of the same shape and dimensions, excluding embellishments, shall be used in computing the total display surface area when the signs are no more than fifteen feet apart when parallel to one another or are placed at an angle between signs that does not exceed twenty degrees. No copy shall be permitted between the back-to-back faces.

5. Minimum yards shall be provided as established by this table in all districts:

	Type I	**Type II**
Front	5 feet greater than on-premises ground sign in the same district	20 feet
Rear	20 feet	20 feet

	Type I	Type II
Side	Same as an on-premises ground sign	10 feet

6. There is established a maximum height limit of fifty feet above grade either at the base of the billboard or the nearest curb level of the surface street to which the billboard is oriented, whichever provides the greatest height. If the billboard is oriented to, and located within three hundred feet of a controlled access highway, a height of thirty feet above the elevation of the nearest travelway of the controlled access highway shall be permitted.

For Type I displays: There is established a maximum height limit of twenty feet above grade either at the base of the display or the nearest curb level of the surface street to which the display is oriented, whichever provides the greatest height.

7. Spacing between billboards located on the same side of a public street or controlled access highway shall be as indicated in the following table:

	Type I (Wall-mounted)	Type I (freestanding)	Type II (freestanding)
Type I (wall-mounted)	250 ft.	250 ft.	250 ft.
Type I (freestanding)	250 ft.	1,000 ft.	1,000 ft.
Type II (freestanding)	250 ft.	1,000 ft.	1,000 ft.

Note: The spacing between any Type I (freestanding) or Type II (freestanding) billboard and an existing Type II (wall-mounted) billboard shall be one thousand feet.

a. The spacing requirements shall be applied separately to each side of a public street, but continuously along the side of a street to all signs oriented toward that street in either direction whether the signs are in the same block or are in different blocks separated by an intersecting side street. (See Figure 17.32.150-1)

b. No billboard shall be closer than two hundred fifty (250) feet from any other billboard regardless of location. (See Figure 17.32.150-2)

c. No minimum spacing shall be required between any two wall-mounted signs placed on opposite sides of a building.

d. Type I billboards shall not be located within twenty feet of an on-premises ground sign on the same lot.

8. No Type II billboard located along a particular street shall be closer than five hundred feet from the nearest property line of any property that is zoned residential and has frontage on either side of such street. The distance for Type I billboards shall be two hundred fifty feet.

9. No billboard located along a particular street shall be closer than two hundred feet from the nearest property line of any residentially zoned property that does not front on said street.

10. No billboard shall be permitted whenever property zoned residential would be between the billboard and the roadway toward which it is oriented.

11. Type I billboards shall be permitted a spacing of two hundred fifty feet, measured airline distance, to a structure listed on the National Register of Historic Places. Type II billboards shall be permitted a spacing of five hundred feet, measured airline distance, to a structure listed on the National Register of Historic Places.

12. Type II billboards shall be located only on lots that have frontage on public streets with four or more travel lanes or that are located within three hundred feet and oriented to a limited access highway. Paired one-way streets with a minimum of two travel lanes in each direction shall be considered a four-lane road in applying this provision.

13. No billboard shall be permitted along any public street or highway that has been designated as a scenic route in the adopted major street plan of the metropolitan government.

14. Billboards shall be subject to the provisions contained in Section 17.32.050, Prohibited signs.

15. All billboards shall be of monopole-type construction. Type II billboards shall not be attached to the walls of buildings. Billboards shall not be located on the roofs of buildings.

16. The brightness and surface illumination shall not exceed two hundred-foot lamberts for a billboard having internal illumination or seventy-five footcandles for a billboard having indirect illumination. Billboards located within five hundred feet of property classified in a residential district shall not be illuminated between the hours of twelve a.m. and six a.m.

Figure 17.32.150-1
SPACING OF SIGNS

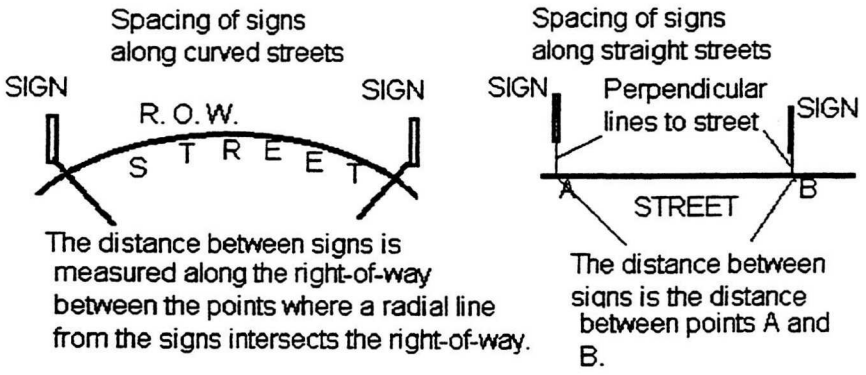


Figure 17.32.150-2
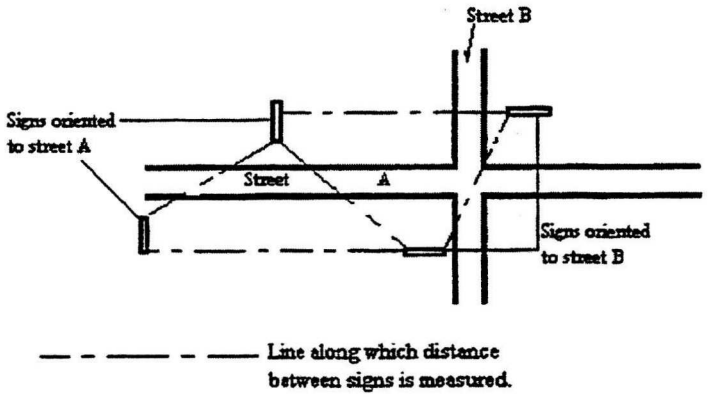
MEASUREMENT OF DISTANCE BETWEEN SIGNS ORIENTED TOWARD DIFFERENT STREETS



(Ord. BL2019-111 § 1(Exh. A, § 49), 2020; Ord. BL2019-1635 § 1, 2019; Ord. BL2016-309 § 5(Exh.), 2016)

17.32.160 Computations.

The following determinants shall control the calculation of sign area, height, and placement.

A. Distance Between Signs. The minimum required distance between signs shall be measured along street rights-of-way from the closest parts of any two signs.

B. Facade Area. The facade area for the purpose of calculating permitted on-premises building sign area may be determined as follows:

1. When architectural elevations are provided that accurately and to scale depict the facade of the structure, the area of the facade shall be calculated as the true structural building facade exclusive of roofs, parapets, and false facia. Parapets of a uniform height on three sides of a structure and of a similar and uniform building material may be included in the facade areas, but decorative parapet extensions of irregular height are excluded.

2. When architectural plans are not provided, it shall be assumed that the height of the facade of the first floor is twelve feet, and that the height of the facade of all stories above the first floor is ten feet per floor. Facade area shall be calculated based on the following formula:

[Facade length × 12 ft. (first floor)] + [facade length × 10 ft. per each additional floor] = facade area

C. Sign Area. The area of a sign shall be computed by means of the smallest square, circle, rectangle, triangle or combination thereof which will encompass the extreme limits of the writing, representation, emblem, or other display, together with any material or color forming an integral part of the background of the display or used to differentiate the sign from the backdrop or structure against which it is placed, but not including any supporting framework, bracing, or decorative fence or wall, when such fence or wall otherwise meets the provisions of this title, and is clearly incidental to the display itself.

D. Building-Mounted Letters and Pictures. Where a sign is composed of letters or pictures attached directly to a facade, window, door or marquee, and the letters or pictures are not enclosed by a border or trimming, the sign area shall be the area within the smallest rectangle, parallelogram, triangle, circle or semicircle or combination thereof, the sides of which touch the extreme points of the letters or pictures.

E. Four-Sided On-Premises Sign. Where four sign faces are arranged in a square, rectangle or diamond, the area of the on-premises sign shall be the area of the two largest faces.

F. Triangular On-Premises Sign. Where the inside angle of the edge nearest the street is greater than twenty degrees, the area of the sign shall be the area of the two largest faces.

G. Multiple-Face On-Premises Sign. For a multiple-faced on-premises sign, the sign area shall be computed by including all sign faces visible from any one point. When two identical sign faces are placed back to back so that both faces cannot be viewed from any point at the same time, and when such signs are part of the same sign structure and not more than forty-two inches apart, the sign area shall be computed by the measurement of one of the faces. If the forty-two inch space is used for any message, it will be counted as a sign face.

H. Height. Sign height shall be computed as the distance from the base of the sign at the normal grade to the top of the highest attached component of the sign, or the nearest curb level of the surface street providing access to the site, whichever provides the greatest height. Normal grade shall be construed to be the existing grade prior to construction or the newly established grade after construction exclusive of any filling, berming, mounding or excavating solely for the purpose of locating the sign.

I. Maximum On-Premises Sign Area. The permitted sum of the area of all individual on-premises signs on a lot shall be computed by applying the formula under each district to the lot frontage or ground floor area, and building facade, as appropriate, for the zoning district in which the lot is located. Lots fronting on two or more streets are allowed the permitted on-premises ground sign area for each street frontage; however, the total on-premises ground sign area that is oriented toward a particular street may not exceed the portion of the lot's total on-premises ground sign area allocation that is derived from that street or from the total ground floor area.

Chapter 17.36

OVERLAY DISTRICTS

Sections:

Article I. Overlay Districts Established

17.36.010 Purpose and intent.
17.36.020 Applicability.
17.36.020A Definitions.

Article II. Planned Unit Development (PUD) District

17.36.030 Purpose and intent.
17.36.040 General provisions.
17.36.050 Minimum performance standards.
17.36.060 General development standards.
17.36.070 Residential standards.
17.36.080 Nonresidential and mixed-use standards.
17.36.090 Development bonuses.

Article III. Historic Overlay Districts

17.36.100 Purpose and intent.
17.36.110 Historic overlay districts established.
17.36.120 Historic districts defined.

Article IV. Greenway Overlay District

17.36.130 Purpose and intent.
17.36.140 Applicability.
17.36.150 General provisions.
17.36.160 Dedication incentives.

Article V. Floodplain Overlay District

17.36.170 General provisions.
17.36.180 Official floodplain map.
17.36.190 Permitted land uses.
17.36.200 Development standards.
17.36.210 Floodplain alterations.
17.36.220 Report to stormwater management commission.

Article VI. Airport Overlay District

17.36.230 General provisions.
17.36.240 Applicability.

Article VII. Adult Entertainment Overlay District

17.36.250 Purpose and intent.
17.36.260 Locational standards.

Article VIII. Urban Design Overlay District

17.36.270 Purpose and intent.
17.36.280 Overlay designation.
17.36.290 Design guidelines.
17.36.300 Permitted land uses.
17.36.310 Development incentives.
17.36.320 Variation of conventional standards.

Article IX. Institutional Overlay District

17.36.330 Purpose and intent.
17.36.340 Master development plan.
17.36.350 Development standards.

Article X. Impact Overlay District

17.36.360 Objectives of the impact overlay district.
17.36.370 Effect of zone changes on impact area policies.
17.36.380 I-440 Impact Area 1.
17.36.390 I-440 Impact Area 2.

Article XI. Neighborhood Landmark District

17.36.400 Purpose and intent.
17.36.410 District established.
17.36.420 District defined.

Article XII. Urban Zoning Overlay District

17.36.430 Purpose and intent.
17.36.440 Applicability.

[Article XIII. Contextual Overlay District]

17.36.450 Purpose and intent.
17.36.460 Overlay designation.
17.36.470 Design guidelines.
17.36.480 Permitted land uses.
17.36.490 Variation of conventional standards.
17.36.500 Contextual overlay district.

[Article XIV. Corridor Design Overlay District]

17.36.510 Purpose and intent.
17.36.520 Overlay designation.
17.36.530 Applicability of standards.
17.36.540 Variations to conventional standards.
17.36.550 Permitted land uses.
17.36.560 Corridor design overlay district.

Article XV. Residential Accessory Structure Overlay

17.36.570 Purpose and intent.
17.36.580 Overlay designation.
17.36.590 Guidelines.
17.36.600 Permitted land uses.
17.36.610 Variation of conventional standards.
17.36.620 Residential accessory structure overlay district.

Article XVI. Two-Story Residential Overlay

17.36.630 Purpose and intent.
17.36.640 Overlay designation.
17.36.650 Guidelines.
17.36.660 Permitted land uses.
17.36.670 Variation of conventional standards.
17.36.675 Two-story residential overlay district.

Article XVII. Detached Accessory Dwelling Unit (DADU) Overlay District

17.36.680 Purpose and intent.
17.36.690 Overlay designation.
17.36.700 Design guidelines.
17.36.710 Permitted land uses.
17.36.720 Bulk provisions.
17.36.730 Detached Accessory Dwelling Unit Overlay District.

Article XVIII. Commercial Compatibility Overlay

17.36.740 Purpose and intent.
17.36.750 Overlay designation.
17.36.760 Permitted land uses.
17.36.770 Variation of conventional land use development standards.
17.36.780 Commercial compatibility overlay district.

Article I. Overlay Districts Established

17.36.010 Purpose and intent.

Overlay districts are established by this title as a means of addressing specific aspects of land use control or development design that transcend conventional zoning district provisions. Included is an overlay district that permits greater design flexibility than otherwise permitted by the conventional standards of this code; overlay districts intended to protect the historic attributes of the community; an overlay to promote the development and operation of a comprehensive greenway system; a special overlay to protect the operational integrity and safety of the Nashville International Airport; an overlay district designed to regulate the location of adult entertainment establishments; a special urban design overlay; an institutional overlay to allow colleges and universities to grow in a sensitive and planned manner; and an urban zoning overlay district intended to preserve and protect existing development patterns that predate the mid-1950's and ensure the compatibility of new development. (Ord. BL2000-364 § 1 (part), 2000; Ord. 96-555 § 9.1(A), 1997)

17.36.020 Applicability.

An overlay district shall represent a mapped geographic area applied to the official zoning map according to the amendment procedures of Chapter 17.40, Article III. Overlay districts may be applied over any zoning district established by this title, and may encompass one or more of those districts. Unless expressly stated otherwise in this chapter, all lands encumbered by an overlay district shall conform to all other applicable provisions of this title. (Ord. 96-555 § 9.1(B), 1997)

17.36.020A Definitions.

The following definitions apply within Overlay Districts:

"Concrete masonry unit" means standardized building block composed of Portland cement, aggregates, and water. Commonly referred to as "CMU".

"Fiber cement products" means manufactured thin sections of hydraulic cementitious matrices and discrete nonasbestos fibers. These products may be commonly referred to by a trade or brand name: Hardie Board. (Ord. BL2021-1022 § 1, 2022)

Article II. Planned Unit Development (PUD) District

17.36.030 Purpose and intent.

The planned unit development (PUD) district is an alternative zoning process that allows for the development of land in a well-planned and coordinated manner, providing opportunities for more efficient utilization of land than would otherwise be permitted by the conventional zoning provisions of this title. The PUD district may permit a greater mixing of land uses not easily accomplished by the application of conventional zoning district boundaries, or a framework for coordinating the development of land with the provision of an adequate roadway system or essential utilities and services. In return, the PUD district provisions require a high standard for the protection and preservation of environmentally sensitive lands, well-planned living, working and shopping environments, and an assurance of adequate and timely provision of essential utilities and streets. (Ord. 96-555 § 9.2(A), 1997)

17.36.040 General provisions.

A. Applicability. A planned unit development (PUD) district may be applied over any zoning district established by Section 17.08.010 of this title.

B. Unified Control Required. All land area proposed for inclusion in a planned unit development district shall be under unified control at the time of application and

approval of a Master Development Plan. Upon establishment of the overlay district, the PUD district shall be recorded in accordance with Section 17.40.120(A)(6).

C. Master Development Plan. The development concept of all land areas encompassed by a PUD district shall be adequately described by a master development plan comprised of scaled drawings and associated reports. At a minimum, the master development plan shall adequately describe:

1. The overall boundary and area of the overlay district, including underlying zoning districts;

2. The general location, orientation and size of principal structures and associated parking areas; development approaches to be employed to comply with Chapter 15.64, the "Ordinance for Storm Water Management;" landscape and buffer areas required by Chapter 17.24, the location, size and general treatment of environmentally sensitive areas as defined by Chapter 17.28; the general location and size of existing and proposed water mains and sewer trunk lines required to service the development; and general traffic routes (external and internal) to and from the development with major access points identified;

3. Tabular data sufficient to demonstrate compliance with all applicable provisions of this title, including the range and scope of proposed land uses, proposed densities, floor area ratios or impervious surface ratios as applicable to development type; and land areas devoted to each type of general land use and phase of development;

4. Full identification, description and supporting rationale for any proposed exception from the typical design standards of this title and the subdivision regulations as authorized by Section 17.36.060G;

5. A proposed development schedule if the project is to be phased;

6. A traffic impact study if required by Chapter 17.20; identification of any proposed improvements to existing streets, off-site utility systems or the drainage network considered necessary to support the proposed scope of development, with intended assignments of responsibility for providing those improvements; and

7. A boundary plat prepared in accordance with accepted surveying practices describing the boundary of the proposed overlay district and all existing properties therein, complete with map and parcel numbers.

D. Final Site Plan. All final site plans shall conform to the general development concept of an approved master development plan. A final site plan shall consist of a detailed set of construction plans that fully demonstrate compliance with all applicable provisions of this title and accurately represent the resulting form of construction. Applications shall include all necessary

drawings, specifications, studies or reports as required by a submittal checklist adopted by the planning commission. An approved final site plan shall serve as the basis for issuance of zoning permits, certificates of compliance, and the subdivision of land.

E. Professional Design. One or more of the following design professionals shall certify direct involvement in the preparation of a PUD master development plan. A final site plan shall be certified by a civil engineer.

1. Architect;
2. Civil engineer;
3. Landscape architect;
4. Urban planner. (Ord. 96-555 § 9.2(B), 1997)

17.36.050 Minimum performance standards.

In addition to satisfying all other applicable provisions of this title, approval of a proposed master development plan shall be based upon findings that the following design and development objectives have been satisfied.

A. Protection of Environmentally Sensitive Areas. If encompassing environmentally sensitive areas as defined by Chapter 17.28, approval of a PUD master development plan shall be based upon a finding that the proposed development plan will result in greater protection and preservation of those areas than otherwise would result from development at the minimum protection standards of Chapter 17.28. Areas to be protected shall include undisturbed hillsides of twenty percent or greater slopes, nonmanipulated floodway and floodplain areas, problem soils, streams, creeks and major drains, designated wetlands, and areas containing protected Cedar Glade plant species.

B. Adequate Streets, Utilities and Drainage. Approval of a PUD shall be based upon a finding that streets, utilities and drainage features will be of adequate capacity to serve the proposed development. As part of a master development plan proposal, a property owner may offer to upgrade or otherwise provide adequate facilities to support the proposed intensity of development. Public facilities already included in an adopted capital improvements budget may be considered a demonstration of adequate capacity if properly timed with anticipated construction of the development.

C. Coordinated Vehicular Access. The approval of a master development plan shall be based on a finding that the vehicular access and internal circulation shall adequately support the operational needs of the development itself in a manner that maintains and protects the operational integrity of the community's major streets and highways to standards equal to or greater than otherwise required by Chapter 17.20. Further, the traffic circulation system for a master development plan shall be designed in a manner that directs commercial traffic away from residential streets.

D. Integrity of Adjacent Areas. The approval of a proposed master development plan shall be based on a finding that the project is designed and will be developed in a manner that will not impair the reasonable long-term use of nearby properties in fulfillment of the land use policies of the general plan.

E. Integrity of an Adopted Greenway Plan. Approval of a PUD master development plan that encompasses land area lying within the greenway overlay district shall be based upon a finding that the plan is designed in a manner that affords an opportunity for eventual implementation of the greenway plan. A master development plan shall take all reasonable measures to protect the visual and operational integrity of an existing or proposed greenway corridor by means of sensitive orientation and placement of improvements to the land, and the protection of mature vegetation and natural land forms. If development bonuses permitted by Section 17.36.090 are utilized, those areas of a master development plan lying within the greenway overlay district shall be dedicated for use as a component of the greenway network.

F. Preservation of Historic and/or Archaeological Sites. All reasonable measures shall be taken to incorporate features of historical and/or archaeological significance into the design and development of a PUD master development plan in a manner that contributes to the protection and preservation of those features. (Ord. 96-555 § 9.2(C), 1997)

17.36.060 General development standards.

A. Relationship to Other Requirements. Unless explicitly authorized otherwise by the approved master development plan under the authority of subsection G of this section, all requirements and standards established by other chapters of this title, as well as any other applicable metro, state or federal regulation, shall apply to the development and use of properties located within a PUD district. All development within a PUD district shall conform to Chapter 15.64, the "Ordinance for Storm Water Management" and the subdivision regulations. In case of conflict between the standards of this article and other chapters of this Zoning Code, the provisions of this article shall control.

B. Permitted Land Uses. Land uses permitted within a PUD district shall be established by the underlying zoning district(s). Any land use classified as a "P" or "PC" by the district land use table (Section 17.08.030) shall be permitted within a corresponding PUD district. Special exception uses ("SE") may be permitted within a

PUD district if approved initially as part of the master development plan by the metropolitan planning commission and council, or thereafter by the board of zoning appeals upon consideration of a recommendation by the planning commission.

C. Land Use Allocation. The overall intensity or scope of any given land use permitted within a PUD district by an underlying zone district shall be established by applying the land area within that district classification to the applicable bulk standards of Tables 17.12.020A, 17.12.020B or 17.12.020C. Although the locational arrangement of land uses within a PUD district may vary from the conventional zoning boundaries underlying the overlay, the overall range or scope of any type of land use shall not exceed that permitted by the underlying district corresponding to that use except when utilizing the development bonus provisions offered by this chapter. In the case of residential development, the number of permitted dwelling units and structure type shall be established by the corresponding zoning district(s) within the PUD district.

D. Residential Density. The maximum overall residential density of a master development plan shall be established by applying the minimum lot size requirements of Table 17.12.020A, the maximum density of Table 17.12.020B, or the maximum floor area ratio standard of Table 17.12.020C (as applicable) to the gross land area encompassed by the underlying zoning district(s) and by deducting fifteen percent of the gross land area for streets and dividing the remaining eighty-five percent of the gross land area by the minimum lot area of the actual zone district. Density shall be calculated on a pro-rata basis if the PUD district overlays more than one residential zoning district. A maximum density shall be assigned to each residential component of the master development plan and recorded by plat or equivalent instrument prior to commencing development of the first phase.

E. Floor Area Ratio (FAR). The maximum overall floor area permitted within a PUD master development plan shall be established by applying the maximum floor area ratio standards of Tables 17.12.020B or 12.12.020C (as applicable) to the gross land area encompassed by the underlying zoning district(s), excluding the public rights-of-way of existing streets and alleys. When more than one zoning district exists within a PUD district, floor areas shall be calculated on a pro-rata basis. If land uses are redistributed across district boundaries, maximum floor areas shall be assigned to each component of the master development plan and recorded by plat or equivalent instrument prior to commencing development of the first phase.

F. Impervious Surface Ratio (ISR). The overall area of impervious surface permitted within a master development plan shall not exceed that amount allocated to the gross land area of the underlying zoning district(s) as established by Tables 17.12.020B and 17.12.020C, exclusive of existing public street or alley rights-of-way. When a PUD district includes more than one underlying zoning district, the accumulative total of all impervious surfaces within a PUD master development plan shall not exceed the maximum impervious surface ratio(s) permitted by the underlying zoning district(s) on a pro-rata basis. If land uses are redistributed across district boundaries, the maximum permitted impervious surface ratio shall be established for each component of the master development plan and recorded by plat or equivalent instrument prior to commencing development of the first phase.

G. Alternative Design Standards. In the approval of a PUD master development plan, the council may authorize the establishment of alternative design standards based on a finding that those standards would serve to enhance the general development concept of the PUD district, would equal or exceed the standard design objectives of this title, and would not impair the reasonable long-term use of other properties in fulfillment of the land use policies of the general plan. Alternate design standards may be approved in lieu of the following provisions of this title for those portions of a master development plan not situated along the perimeter of a PUD district:

1. The setback and building height standards of Tables 17.12.020A, 17.12.020B or 17.12.020C;

2. The street setback standards of Section 17.12.030; and

3. The landscape buffer yard standards of Chapter 17.24.

H. Common Open Space. Areas of common open space required by this chapter shall be fully described on the master development plan, any applicable final site plan, and a recorded plat of subdivision. Common open space shall be maintained according to the provisions of Section 17.40.120 of this title.

I. Staged Development. Final site plan construction may occur in stages provided that a staging plan is reflected on the approved master development plan, each phase of development adheres to the applicable standards of this title independently, and streets and associated utilities are provided in a manner supportive of subsequent phases of development. If improvements to the existing street network or utility system are to be phased, an implementation schedule and funding program prorated to each contributing phase of development shall be prepared by the landowner for planning commission

approval with the first phase of development. (Ord. BL99-117 § 1 (part), 2000; Ord. 96-555 § 9.2(D), 1997)

17.36.070 Residential standards.

A. Clustering Single-Family and Two-Family Lots.

1. Residential lots within a PUD district may be grouped to a greater extent than allowed by the conservation development provisions of Section 17.12.090 in return for extraordinary protection of environmentally sensitive areas in a natural state. With proper environmental protection, a PUD master development plan may recapture up to one hundred percent of the average density achievable by similarly zoned land with no environmental constraints. The actual achievable density for any given master development plan may be less depending upon the extent of environmentally sensitive areas to be protected and the minimum lot requirements established below.

2. Recreational facilities.

a. Any property owner or developer of a subdivision clustering single-family and two-family lots within a PUD district as provided in subsection A.1. of this section shall install and/or construct recreational facilities on a portion of the required undeveloped common open space. For purposes of this section, "recreation facilities" means active play facilities (including but not limited to tennis courts, basketball courts, swimming pools, playgrounds, baseball/softball diamonds or volleyball courts) and passive amenities (including but not limited to walking trails, picnic shelters or gazebos, shared docks, and similar passive recreation amenities). Proposed recreation facilities shall be defined on the Master Development Plan and shall be demonstrated appropriate to the intended demographics of the single-family and two-family portion of a PUD.

b. Recreational facilities required pursuant to this subsection shall be located within usable open space areas and shall not be constructed within the following areas:

(1) Natural areas with slope greater than fifteen percent;

(2) Within the floodplain;

(3) Within a sinkhole; or

(4) Within areas that would impact cultural resources.

Editor's note—The word "usable" was misspelled by staff in the original bill. The dictionary spelling is "useable."

c. At a minimum, recreational facilities shall be constructed and/or installed in accordance with the following schedule:

(1) Residential developments containing fewer than twenty-five units shall be exempt from the requirement to install recreation facilities.

(2) One recreational facility shall be installed for developments containing between twenty-five and ninety-nine total residential units, plus an additional recreational facility for every one hundred residential units in excess of the first ninety-nine units.

B. Common Open Space. Except for those portions of a master development plan required for the installation of streets and essential utilities, the following areas shall be designated as common open space and protected by a recorded plat in accordance with Section 17.40.120.

1. Large contiguous areas of natural slopes of twenty percent or greater in all districts. The planning commission may authorize the creation of lots within natural slopes ranging up to twenty-five percent subject to the standards and conditions set out in Section 17.28.030;

2. Areas classified as natural floodway in a predevelopment state;

3. Two-thirds of the area classified as natural floodplain in a predevelopment state;

4. Areas containing protected Cedar Glade plant species as established by Section 17.28.060;

5. Streams, creeks and major drainage features;

6. Areas classified as wetlands; and

7. Landscape buffer yards as required by Chapter 17.24, Article IV.

Notwithstanding the above, a minimum of fifteen percent of the gross land area shall be designated as common open space for single and two-family development. Whenever feasible, areas of common open space within a master development plan should be interconnected in a cohesive and continuous manner.

C. Minimum Lot Sizes. The minimum size of lots created for single-family and/or two-family development may be less than the standard lot sizes normally required for the underlying zoning district(s) by Table 17.12.020A, subject to the following restrictions.

1. The minimum size of perimeter lots oriented towards an existing street shall be at least ninety percent of the minimum size required by Table 17.12.020 A for the actual zoning of the property. If, however, the opposite property has previously developed with smaller lot sizes, or has a currently approved plan of development with smaller lots sizes, the planning commission may permit the perimeter lots to be of a comparable size to those opposite lots within the overall size limitations established by this section.

2. Perimeter double-frontage lots oriented to an internal street may be reduced in size the equivalent of one zoning district provided that a standard C landscape buffer yard is provided within common open space along that boundary. Alternatively, perimeter double

frontage lots may be reduced in size the equivalent of two districts with the installation of a standard D landscape buffer yard.

3. Perimeter lots otherwise abutting a conventional R/R-A or RS/RS-A subdivision may be reduced in size the equivalent of one zoning district with the installation of a standard B landscape buffer yard located within common or natural open space, as applicable. Perimeter lots may be reduced in size the equivalent of two zoning districts with the installation of a standard C landscape buffer yard.

D. Required Setbacks. The minimum yard and street setback requirements for all residential lots shall be those established by Chapter 17.12 for the alternative zoning district assigned to that particular phase by the adopted master development plan, unless explicitly established otherwise according to Section 17.36.060G. The minimum rear yard setback for double frontage lots along the perimeter of a master development plan shall be no less than the standard street setback requirement of Chapter 17.12. (Ord. BL2022-1121 §§ 8, 9, 2022; Ord. BL2015-1153 § 16, 2015; Amdt. 1 to Ord. BL2007-1449 § 1, 2007; Ord. BL2007-1449 § 1, 2007; Ord. 98-1268 § 1 (part), 1998; § 1(12) of Amdt. 1 with Ord. 96-555 § 9.2(E), 1997)

17.36.080 Nonresidential and mixed-use standards.

Land uses within a single PUD district may cross underlying zoning district boundaries when determined appropriate by the metropolitan council. The location of land uses within the PUD district shall be established by the approved master development plan. The following standards apply to development in a PUD district containing nonresidential and mixed-use zoning districts.

A. Internal Compatibility. Approval of a master development plan containing a mixture of land uses shall be based on a finding that:

1. The land uses within the master development plan are arranged and designed in a complimentary and compatible manner;

2. Noncompatible land uses are effectively buffered or otherwise protected utilizing the landscape buffer yard provisions of Chapter 17.24 to the extent necessary to insure full use and enjoyment of all property within the district;

3. The vehicular circulation system throughout the master development plan directs traffic in an efficient, safe and nonintrusive manner; and

4. The individual land use components of the master development plan are interconnected by safe and convenient pedestrian linkages.

B. External Compatibility. If land uses within a master development plan cross underlying district boundaries, approval of the master development plan shall be based upon a finding that land uses are arranged and designed in a manner that does not unreasonably impair the long-term use of properties adjoining the PUD district as established by the general plan. (Ord. 96-555 § 9.2(F), 1997)

17.36.090 Development bonuses.

A development bonus may be awarded by the council to a master development plan from which there is an offer of public dedication and subsequent acceptance of land to satisfy or further a recognized community need or the provision of affordable housing.

A. Public Dedications. For each form of contribution established below, a twenty-five percent increase above the conventional density or floor area ratio (FAR) standard established by Tables 17.12.020A, 17.12.020B or 17.12.020C may be awarded. Calculation of the development bonus shall be limited to the land area being dedicated for public use. All corresponding development accrued from the bonus provisions shall be assigned to suitable locations elsewhere within the same PUD master development plan. The following forms of contribution may qualify for a development bonus:

1. A platted dedication of street right-of-way in excess of that required by the subdivision regulations for the purpose of accommodating future street widening;

2. The dedication of land (by title) for a needed public facility, such as a school site, park, library, fire hall or other safety service use;

3. The dedication of land (by easement or title) for drainage mitigation measures exceeding those otherwise required by this title or Chapter 15.64, "An Ordinance for Storm Water Management;"

4. The dedication of a site (by use easement or title) identified by the historical commission as being of special historic or archaeological value to the community; or

5. The dedication of land (by use easement or title) within a greenway overlay district to implement a greenway master plan.

B. [Reserved.] (Ord. BL2016-133 § 2, 2016; Ord. BL2006-975 § 2, 2006; Ord. 96-555 § 9.2(G), 1997)

Article III. Historic Overlay Districts

17.36.100 Purpose and intent.

The historic overlay district provisions are established by this title to insure the ongoing preservation of structures of historic value to Metropolitan Nashville

and Davidson County pursuant to the authority contained in Section 13-7-401 of the Tennessee Code Annotated. The provisions of this title are intended:

A. To preserve and protect the historical and/or architectural value of buildings, structures or areas of significant importance;

B. To regulate exterior, and in some cases interior, design, arrangement, texture and materials proposed to be used within the historic districts to ensure compatibility.

C. To create an aesthetic appearance which complements the historic buildings or other structures;

D. To stabilize and improve property values;

E. To foster civic beauty;

F. To strengthen the local economy; and

G. To promote the use of historic districts for the education, pleasure and welfare of the present and future citizens of Nashville and Davidson County. (Ord. BL2018-1417 § 1, 2019; Ord. 96-555 § 9.3(A), 1997)

17.36.110 Historic overlay districts established.

The following classifications of historic overlay districts are made a part of this title, each classification having separate and unique regulations and guidelines established according to the provisions of Chapter 17.40, Article IX.

A. Historic Preservation (HP) District. The boundaries shall be shown on the zoning map or on special overlays thereto which are made a part of this Zoning Code and noted by name on such maps, in which no structure shall be constructed, altered, repaired, relocated or demolished in whole or in part in this district unless the action complies with the requirements set forth in this title.

B. Neighborhood Conservation (NC) District. The boundaries shall be shown on the zoning map or on special overlays thereto that are made a part of this Zoning Code and noted by name on such maps, in which no structure shall be constructed, relocated, demolished in part or whole, increased in habitable area, or changed in height unless the action complies with the requirements set forth in this title.

C. Historic Landmark (HL) District. The boundaries shall be shown on the zoning map or on special overlays thereto that are made a part of this Zoning Code and noted by name on such maps, in which no structure shall be constructed, altered, repaired, relocated or demolished in whole or in part unless the action complies with the requirements set forth in this title.

D. Historic Bed and Breakfast Homestay (HB) District. The boundaries shall be shown on the zoning map or on special overlays thereto that are made a part of this Zoning Code and noted by name on such maps, in which no structure shall be constructed, altered, repaired, relocated or demolished in whole or in part unless the action complies with the requirements set forth in this title.

E. Historic Landmark Interiors (HI) District. The boundaries shall be shown on the zoning map or on special overlays thereto that are made a part of this Zoning Code and noted by name on such maps, in which no interior feature shall be constructed, altered, repaired, relocated or demolished in whole or in part within an interior space unless the action complies with the requirements set forth in this title.

F. Historic Landmark Signage (HS) District. The boundaries shall be shown on the zoning map or on special overlays thereto that are made a part of this zoning code and noted by name on such maps, in which no signage shall be constructed, altered, repaired, relocated or demolished in whole or in part unless the action complies with the requirements set forth in this title. (Ord. BL2021-843 § 1, 2021; Ord. BL2018-1417 § 2, 2019; Ord. BL2005-701 § 2, 2005; Ord. 96-555 § 9.3(B), 1997)

17.36.120 Historic districts defined.

A. Historic Preservation and Neighborhood Conservation Districts. These districts are defined as geographical areas which possess a significant concentration, linkage or continuity of sites, buildings, structures or objects which are united by past events or aesthetically by plan or physical development, and that meet one or more of the following criteria:

1. The district is associated with an event that has made a significant contribution to local, state or national history; or

2. It includes structures associated with the lives of persons significant in local, state or national history; or

3. It contains structures or groups of structures that embody the distinctive characteristics of a type, period or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or

4. It has yielded or may be likely to yield archaeological information important in history or prehistory; or

5. It is listed or is eligible for listing in the National Register of Historic Places.

B. Historic Landmark. An historic landmark is defined as a building, structure, site or object, its appurtenances and the property it is located on, of high historical, cultural, architectural or archaeological importance; whose demolition or destruction would

constitute an irreplaceable loss to the quality and character of Nashville and Davidson County; and that meets one or more of the following criteria:

1. The historic landmark is associated with an event that has made a significant contribution to local, state or national history;

2. It is associated with the lives of persons significant in local, state or national history;

3. It embodies the distinctive characteristics of a type, period or method of construction, or that represents the work of a master, or that possesses high artistic value;

4. It has yielded or may be likely to yield archaeological information important in history or prehistory; or

5. It is listed or is eligible for listing in the National Register of Historic Places.

C. Historic Bed and Breakfast Homestay.

1. An historic bed and breakfast homestay is defined as a building or structure containing three or fewer furnished guest rooms for pay within a private, owner-occupied historically significant structure. Meals may be provided to overnight guests, and the maximum stay for any guest shall be fourteen consecutive days. An historic bed and breakfast homestay shall meet one or more of the following criteria:

a. The historic bed and breakfast homestay is associated with an event that has made a significant contribution to local, state or national history;

b. It is associated with the lives of persons significant in local, state or national history;

c. It embodies the distinctive characteristics of a type, period or method of construction, or that represents the work of a master, or that possesses high artistic value; or

d. It is listed or is eligible for listing in the National Register of Historic Places.

2. In addition to the criteria listed in subsection C.1. of this section, the historic bed and breakfast homestay shall satisfy the following conditions:

a. Exterior work proposed to be done will be subject to design review guidelines adopted by the metropolitan historic zoning commission for determining the architectural compatibility and historical significance of such work. The design review guidelines for neighborhood conservation districts shall apply to historic bed and breakfast homestays. The metropolitan historic zoning commission's approval of work shall be granted in writing as a condition for issuance of a zoning permit.

b. Owner-occupied. The owner of the property must reside permanently in the historic home. Where there is more than one owner of the home, or where an estate, corporation, limited partnership or similar entity is the owner, a person with controlling interest, or possessing the largest number of outstanding shares owned by any single individual or corporation, shall reside permanently in the historic home. If two or more persons own equal shares that represent the largest ownership, at least one of the persons shall reside permanently in the historic home.

c. No more than one off-street parking space shall be provided for each guest room. The commission shall advise on the appropriate location and potential adverse impacts caused by the off-street parking of vehicles, and may recommend fencing, screening and landscaping to buffer and protect surrounding residential properties.

d. Signage. Any sign, as defined in M.C.L. 17.32.030.B, on a property used for a historic bed and breakfast homestay shall be governed by the provision of M.C.L Chapter 17.32 Sign Regulations. An accessory residential sign, not to exceed the dimensions of one square foot of area, may be permitted.

e. The bulk regulations of the district for a residence shall apply. Overnight guest rooms may be located within historically significant accessory structures.

f. The owner shall maintain and make available to the zoning administrator a guest register for each calendar year.

g. Meal service shall be restricted to overnight guests only; no cooking facilities shall be permitted in any guest room.

h. The metropolitan fire marshal shall approve the structure for safety.

D. Historic Landmark Interiors. An historic landmark interior is defined as the public interior space of a building or structure of high historical, cultural, and architectural value; where alteration, demolition or destruction would constitute an irreplaceable loss to the quality and character of Nashville and Davidson County; and that meets one or more of the following criteria:

1. The historic landmark interior is associated with an event that has made a significant contribution to local, state or national history;

2. It is associated with the lives of persons significant in local, state or national history;

3. It embodies the distinctive characteristics of a type, period, or method of construction;

4. It is a historic landmark; or,

5. It is listed or is eligible for listing in the National Register of Historic Places.

E. Historic Landmark Signage.

1. Signage must meet all of the following criteria to qualify as a Historic Landmark Sign (HS):

a. Materials, technology, and design. The signage must be representative of excellence in a particular period of construction; and/or must be unique in that it demonstrates extraordinary aesthetic quality, creativity or innovation.

b. Integrity. The signage design must retain the majority of its character-defining features (materials, technologies, structure, colors, shapes, symbols, text, and/or art) that have historical significance, or are integral to overall sign design, or convey historical or regional context. If character-defining features have been altered or removed, the majority must be potentially restorable to their historic function and appearance. This overlay shall not regulate the content or message of the signage.

c. Location. The sign shall not be [a] billboard, as defined in the Zoning Code.

d. Age. The sign must have been constructed more than thirty years before the date of application.

2. Sign calculations for a landmark sign:

a. Fifty percent of the square footage of the landmark sign shall count toward the total allowable sign area and shall count against the number of signs allowed for the premises.

b. Sign calculations shall be determined and confirmed by the Codes Department. (Ord. BL2024-154 § 1, 2024; Ord. BL2021-843 § 2, 2021; Ord. BL2018-1417 § 3, 2019; Amdt. 1 to Ord. BL2016-309 § 4, 2016; Ord. BL2016-309 § 4, 2016; Ord. BL2005-701 § 2, 2005; Ord. 96-555 § 9.3(C), 1997)

Article IV. Greenway Overlay District

17.36.130 Purpose and intent.

The greenway overlay district is established for the purpose of identifying on the official zoning map those properties which an adopted greenway master plan has determined appropriate for inclusion in a community-wide greenway system. The provisions of the greenway overlay district are intended to facilitate the implementation and ongoing utilization of a countywide greenway system through appropriate design and development of properties within the district, and to encourage active participation in the implementation of an adopted greenway plan through the use of development incentives. (Ord. 96-555 § 9.4(A), 1997)

17.36.140 Applicability.

In accordance with Chapter 17.40, Article III, the greenway overlay district may be applied to any property included within a greenway master plan adopted by the metropolitan greenways commission. The provisions of this article shall apply to those portions of a property lying within a greenway overlay district. (Ord. 96-555 § 9.4(B), 1997)

17.36.150 General provisions.

A. Properties encompassed by a mapped greenway overlay district are encouraged to utilize the conservation development option (Section 17.12.090) or planned unit development (Article II of this chapter) provisions of this title, thereby protecting the functional integrity of the adopted greenway master plan.

B. In consideration of a subdivision plat utilizing the conservation development provisions of Section 17.12.090 or a PUD master development plan containing property within a greenway overlay district, the planning commission shall solicit a recommendation from the metropolitan greenways commission staff regarding the objectives of the adopted greenway plan as they relate to the subject property. The planning commission shall base its approval or disapproval on the extent to which a property owner has taken all reasonable measures to orient development in a manner which protects the value of those areas within the district for incorporation into a greenway system. (Ord. BL2022-1121 § 10, 2022; Ord. 96-555 § 9.4(C), 1997)

17.36.160 Dedication incentives.

Development incentives are established by this section to encourage participation in the implementation of a comprehensive greenway network. In return for a development bonus, the landowner shall locate all development outside the overlay district, design and orient all development in a manner which protects the functional and operational integrity of the greenway network, and dedicate all areas within the overlay district for public use by conveyance of easements, property title or equivalent means. The following incentives may be applied to properties lying within a mapped greenway overlay district, and are to be considered bonuses granted above and beyond all other cluster incentives established elsewhere in this title.

A. Multifamily development in the RM and mixed-use districts may achieve a twenty-five percent bonus in achievable density derived from that amount of land area dedicated for public greenway use. Area dedicated for public greenway use in a PUD development may count one and one-half times towards satisfying the minimum common open space requirement of Section 17.36.070B; all protected trees within the area of dedication may count one and one-half times in satisfying the tree density requirements of Section 17.28.065.

B. Nonresidential development may be granted a floor area ratio (FAR) bonus of twenty-five percent for that amount of land area dedicated for public greenway use. All protected trees within the area of greenway dedication may count one and one-half times in satisfying the tree density requirements of Section 17.28.065.

C. Nonresidential development may be granted a floor area ratio (FAR) bonus of twenty-five percent for that amount of land area dedicated for public greenway use. All protected trees within the area of greenway dedication may count one and one-half times in satisfying the tree density requirements of Section 17.28.065. (Ord. BL2022-1122 § 12, 2022; Ord. BL2022-1121 § 11, 2022; Ord. BL2015-1153 § 16, 2015; Ord. 96-555 § 9.4(D), 1997)

Article V. Floodplain Overlay District

17.36.170 General provisions.

In addition to the floodplain and floodway protection provisions of Chapter 17.28, the alteration or development of land subject to flooding shall be regulated by Chapter 15.64 of the Metropolitan Code of Laws ("An Ordinance for Storm Water Management"), the purposes being to prevent the obstruction of watercourses and the protection of lives and property from the hazards of flooding. Regulation of flood-prone properties further allows for the reasonable protection of this community's natural ecosystems and wetlands areas, and qualifies Metropolitan Nashville and Davidson County for flood insurance under Public Law 1016, 84th Congress (as amended or superseded). (Ord. 96-555 § 9.5(A), 1997)

17.36.180 Official floodplain map.

The Federal Emergency Management Agency Flood Insurance Rate Maps, along with specific basin studies that have been approved by the director of the department of public works shall constitute the official floodplain map for the Metropolitan Government of Nashville and Davidson County. In addition, the floodplain regulations of this title and Chapter 15.64 of the Metropolitan Code of Laws shall apply to lands which can be demonstrated to lie within a floodplain. Conversely, any lands which can be demonstrated by competent engineering to lie beyond the floodplain shall not be subject to these regulations. In cases of discrepancy, the official floodplain map maintained by the department of public works shall take precedence over generalized floodplain boundaries referenced on the official zoning map. (Ord. 96-555 § 9.5(B), 1997)

17.36.190 Permitted land uses.

Land uses permitted within the floodplain overlay district shall be established by the underlying base zone district according to the district land use table (Section 17.08.030) or an adopted PUD master development plan (if applicable). (Ord. 96-555 § 9.5(C), 1997)

17.36.200 Development standards.

All development within the floodplain overlay district shall be in conformance with Chapter 17.28, Article I of this title, Chapter 15.64 of the Metropolitan Code of Laws, and the subdivision regulations of Nashville and Davidson County. (Ord. 96-555 § 9.5(D), 1997)

17.36.210 Floodplain alterations.

Alterations of floodplain land and drainage channels shall be in accordance with applicable provisions of Chapter 15.64, "Stormwater Management." (Ord. BL2016-513 § 37, 2017; Ord. 96-555 § 9.5(E), 1997)

17.36.220 Report to stormwater management commission.

A request for a variance to the requirements of Chapter 15.64, Stormwater Management, shall be considered by the stormwater management commission according to the provisions of Chapter 15.64 of the Metropolitan Code of Laws. Prior to consideration of a variance, the stormwater management commission shall solicit a report from the zoning administrator and the planning department regarding the applicability of Chapter 17.28, Article I, or any other provision of this title. (Ord. BL2023-1888 §§ 26, 27, 2023; Ord. BL2016-513 § 38, 2017; Ord. 96-555 § 9.5(F), 1997)

Article VI. Airport Overlay District

17.36.230 General provisions.

The maximum height of all structures within the airport overlay district shall be regulated in order to prevent obstructions to aircraft navigation associated with the Nashville International Airport, thus protecting the health, safety and general welfare of the traveling public and this community. The provisions of this title are a supplement to the provisions of the Federal Aviation Act of 1958, 49 U.S.C. 1101 et seq., and Title 14, Code of Federal Regulations, Part 77 (as amended), all of which are incorporated into this code by reference. (Ord. 96-555 § 9.6(A), 1997)

17.36.240 Applicability.

Properties subject to the airport overlay district provisions and the specific height controls encumbering those proper-ties shall be referenced on maps maintained and

periodically updated by the Metropolitan Nashville Airport Authority. In cases of discrepancy, the specific airport overlay district boundaries depicted on maps maintained by the Metropolitan Nashville Airport Authority shall take precedence over generalized boundaries referenced on the official zoning map. Within the overlay district, the maximum permitted height of structures shall be as prescribed by the Metropolitan Nashville Airport Authority, or the applicable standard of the base zone district or land use, whichever is less. (Ord. 96-555 § 9.6(B), 1997)

Article VII. Adult Entertainment Overlay District

17.36.250 Purpose and intent.

The adult entertainment overlay district is intended to provide adequate locational opportunities for adult entertainment establishments within the downtown area of Nashville and Davidson County while reasonably directing such uses to locations that minimize disruption both to the general community and specific land uses noted below. (Ord. 96-555 § 9.7(A), 1997)

17.36.260 Locational standards.

A. All adult entertainment establishments shall be located within a contiguous adult entertainment overlay district, being authorized within those zoning districts classified as "O" in the district land use table of Section 17.08.030 of this code under "Adult entertainment."

B. Within the overlay district, no adult entertainment establishment shall be located within five hundred feet (measured property line to property line) of:

1. A religious institution;

2. A facility engaged primarily in community education;

3. A day care center or day care home;

4. A college or university; or

5. A park.

C. No adult entertainment establishment shall locate within an adopted redevelopment district unless that redevelopment district specifically authorizes adult entertainment uses as a permitted land use.

D. No establishment classified as adult entertainment shall locate within one hundred fifty feet (measured property line to property line) of any other adult entertainment establishment. (Ord. BL2004-490 § 1, 2005)

Article VIII. Urban Design Overlay District

17.36.270 Purpose and intent.

The purpose of the urban design overlay district is to allow for the application and implementation of special design standards with the intent of achieving a sense of place by fostering a scale and form of development that emphasizes sensitivity to the pedestrian environment, minimizes intrusion of the automobile into the urban setting, and provides for the sensitive placement of open spaces in relationship to building masses, street furniture and landscaping features in a manner otherwise not insured by the application of the conventional bulk, landscaping and parking standards of this title. Application of this special overlay district shall be limited to areas requiring specialized design standards either to maintain and reinforce an established form or character of development, or to achieve a specific design objective for new development. Any application for an urban design overlay district shall include design goals and objectives that embody this purpose and intent. (Ord. 2001-856 § 1 (part), 2001; Ord. 96-555 § 9.8(A), 1997)

17.36.280 Overlay designation.

An urban design overlay district shall be created according to the procedures of Chapter 17.40, Article III and depicted as a geographical area on the official zoning map. (Ord. 96-555 § 9.8(B), 1997)

17.36.290 Design guidelines.

An ordinance creating an urban design overlay district shall include a design plan and associated design criteria of sufficient detail to demonstrate how the design goals and objectives will be accomplished. (Ord. 2001-856 § 1 (part), 2001; Ord. 96-555 § 9.8(C), 1997)

17.36.300 Permitted land uses.

The range of land uses permitted within an urban design overlay district shall be those afforded by the underlying zoning district(s) as established by the zoning district land use table of Section 17.08.030. While all land uses classified as 'A', 'P', or 'PC' by the underlying zoning district(s) shall be permitted within the urban

design overlay district, the urban design overlay guidelines may provide alternative development standards for specific land uses as necessary to achieve the overall design intent of the district. (Ord. BL2005-702 § 1, 2005; Ord. 96-555 § 9.8(D), 1997)

17.36.310 Development incentives.

To promote the inclusion of properties within an urban design overlay district for the purpose of achieving specified design objectives, the enacting ordinance may establish development incentives. (Ord. 2001-856 § 1 (part), 2001; Ord. 96-555 § 9.8(E), 1997)

17.36.320 Variation of conventional standards.

Variations to the conventional standards of the underlying zoning district(s) as established in Chapter 17.12, Sections 17.12.020 through 17.12.060; Chapter 17.16, Sections 17.16.020 through 17.16.330; the parking, loading and access standards of Chapter 17.20, excluding subsection B of Section 17.20.060, Section 17.20.120, Sections 17.20.140 through 17.20.170 and Section 17.20.190; the landscaping and buffering standards of Chapter 17.24, excluding Article II; and more strict variations to the sign standards of Chapter 17.32 may be incorporated within the specific standards of an overlay district if deemed necessary to achieve stated design objectives of the district. (Ord. BL2005-702 § 2, 2005; Ord. 99-1615 § 1 (part), 1999)

Article IX. Institutional Overlay District

17.36.330 Purpose and intent.

The purpose of the institutional overlay district is to provide a means by which colleges and universities situated wholly or partially within areas of the community designated as residential by the general plan may continue to function and grow in a sensitive and planned manner that preserves the integrity and long-term viability of those neighborhoods in which they are situated. The institutional overlay district is intended to delineate on the official zoning map the geographic boundaries of an approved college or university master development plan, and to establish by that master development plan the general design concept and permitted land uses (both existing and proposed) associated with the institution. (Ord. BL2003-1399 § 4, 2003; Ord. 96-555 § 9.9(A), 1997)

17.36.340 Master development plan.

Application of the institutional overlay district of this title shall be limited to those land areas encompassed by a college or university master development plan as approved by the council pursuant to the procedures of Section 17.40. At a minimum, an approved master development plan shall be comprised of scaled drawings and accompanying reports which adequately describe the extent of the existing (if applicable) and proposed campus of the institution along with long-range growth objectives and an assignment of institutionally related land uses. The master development plan and accompanying documentation shall be sufficient in detail to provide the public with a good understanding of the developed campus's impact on the adjoining neighborhood(s). The master development plan shall distinguish between the following types of generalized campus activities: academic areas, such as classrooms and labs; general administrative offices; support services, such as major parking areas, food services and bookstores; campus-related residential areas, including dormitories, fraternities and sororities; operational areas, such as maintenance buildings, power plants and garages; and athletic areas, including gymnasiums, intramural facilities, stadiums and tracks. In the approval of a master development plan, the council shall require the inclusion of a phasing plan to insure that campus expansion occurs in a manner that can be supported by adequate public services and minimizes disruption to the surrounding residential community. (Ord. BL2003-1399 § 5, 2003; Ord. 96-555 § 9.9(B), 1997)

17.36.350 Development standards.

In addition to other applicable provisions of this code, the following development standards shall apply to new construction associated with the implementation of a campus master development plan.

A. Street Standard. Unless otherwise precluded by the placement and operation of existing campus facilities, principal driveway access shall be from collector or arterial streets.

B. Traffic Impact Study. The traffic impact study requirements of Section 17.20.140. A traffic impact study prepared for any campus master development plan shall be subsequently updated at least every five years. Traffic generated by institutional-related uses built subsequent to the initial approval of a campus master plan under this title shall not cause the level of service on any local residential street to fall below level of service C.

C. Within the boundaries of an approved campus master development plan, existing land uses and structures may continue in conformance with the base zoning district(s) until construction under an approved final site plan is undertaken in conformance with Section 17.40.140(D). Residential properties located within the boundaries of the campus master development plan owned by the institution, or an agent or subsidiary of the institution, shall continue to be used for residential

purposes within the limitations of the base zoning district, unless otherwise provided for in the master development plan. Such residential properties shall be maintained in a safe, clean and orderly condition as required by all applicable codes and regulations.

D. Within the boundaries of an approved campus master development plan, applications for final site plans for institutional-related uses shall be approved only in areas: 1) contiguous to the existing campus as of the date of the application; 2) in accordance with an approved phasing plan; and 3) in a manner that does not further fragment the pattern of residentially used parcels from the residential area outside of the existing campus (See Figure 17.36.350). Each plan phase shall be supported by adequate infrastructure improvements. The introduction of an institutional-related use adjacent to an existing and improved residential lot not owned by, or contractually obligated to, the institution shall incorporate a landscape buffer yard to protect that residential lot. The introduction of parking in these locations should be avoided. For the purpose of determining an adequate buffer, a new parking facility shall be treated as an institutional-related use that is least compatible with residential use. The planning commission shall require an adequate buffer yard under the standards of Table 17.24.230 sufficient to maintain the residential integrity of the residential property not owned by, or contractually obligated to, the institution.

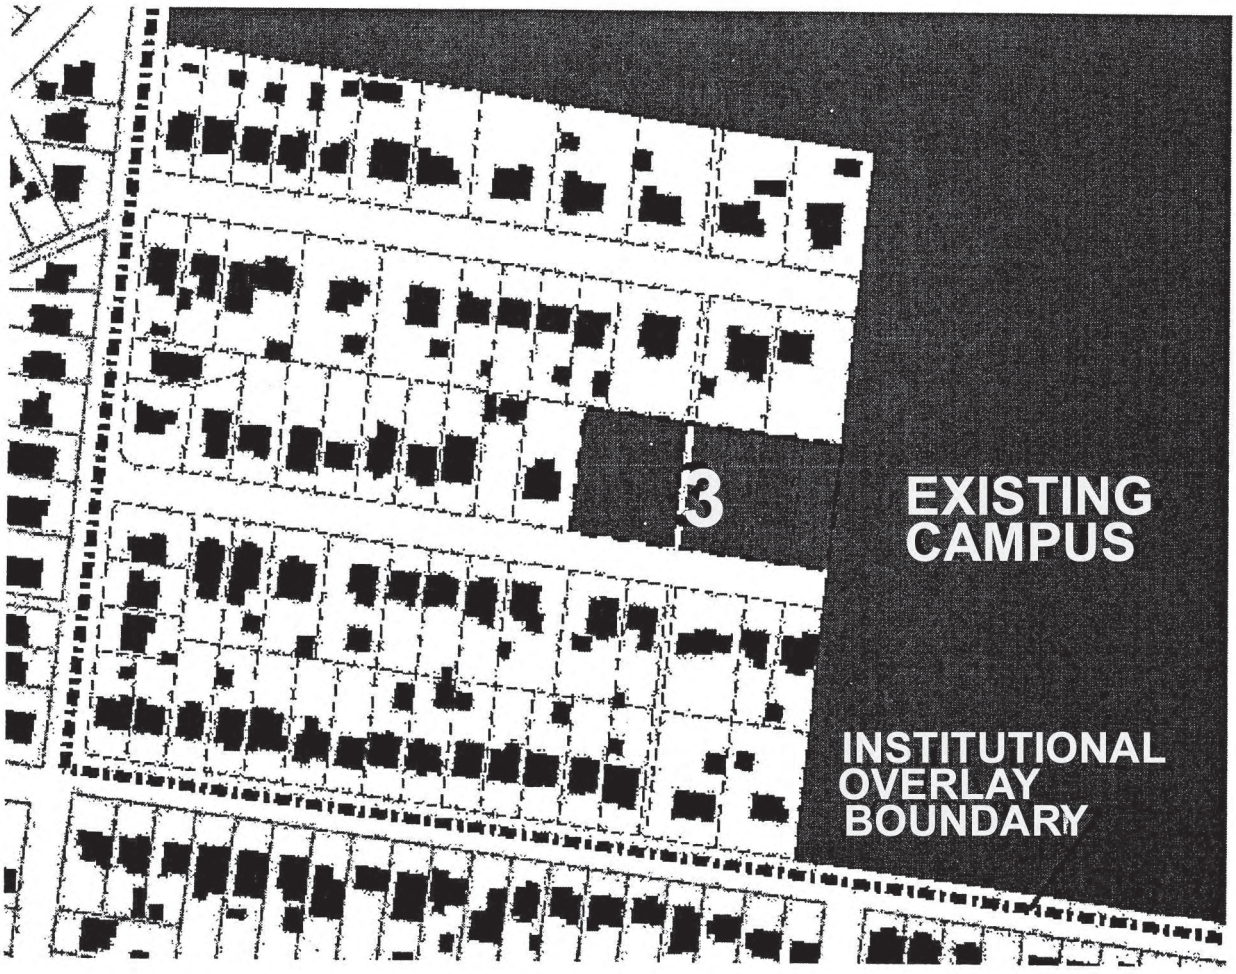
Inappropriate Application

Figure 17.36.350 (Continued)



Inappropriate Application

(Ord. BL2003-1399 § 6, 2003; Ord. 96-555 § 9.9(C), 1997)

Article X. Impact Overlay District

17.36.360 Objectives of the impact overlay district.

The objectives of the special impact overlay district are as follows:

A. To avoid adverse impacts caused by land use changes occasioned by the introduction of a major public facility, such impacts including both adverse influence on other land or on public facilities; and

B. To insure a thorough analysis of all zoning district amendments within areas subject to adverse impacts from a major public facility. (Ord. 96-555 § 9.10(A), 1997)

17.36.370 Effect of zone changes on impact area policies.

All zone changes shall comply with the land use policies contained herein. A set of all maps delineating impact areas and subareas created in this chapter shall be filed in the office of the metropolitan clerk upon adoption

of such policies and maps. The applicability of policies adopted in this chapter to zone change proposals within impact areas shall be determined by the metropolitan council. In its recommendation to the council on zone change proposals within impact areas, the metropolitan planning commission shall advise the council on the applicability of the impact area policies. Whenever the metropolitan council determines that a zone change proposal within an impact area is not subject to the impact area policies, it shall consider such zone change proposal in the same manner that zone change proposals outside of impact areas are considered. (Ord. 96-555 § 9.10(B), 1997)

17.36.380 I-440 Impact Area 1.

The following policies shall be applicable to I-440 Impact Area 1.

A. Overview and Applicability. Policies are presented in two parts: Those applicable throughout Impact Area 1 and those applicable only within specific subareas of Impact Area 1. The policies shall apply to zone change proposals that have been determined by the metropolitan council to be related to the presence and/or operational effects of Interstate 440.

B. Adoption of Impact Area Maps. The maps attached to the ordinance codified in this chapter and on file in the office of the metropolitan clerk, delineating Impact Area 1 and its subareas are adopted as part of this chapter and may be viewed upon request at the office of the metropolitan clerk.

C. Impact Area 1-Areawide Policies. The policies set forth herein shall apply within Impact Area 1 delineated on Map 1.

1. The design of Interstate 440 addressed the objectionable visual and auditory impacts typically cited as reasons why property near a major highway is unsuitable for residential use, particularly one-family and two-family housing. Therefore, areas in close proximity to Interstate 440 will remain suitable and appropriate for residential use, and zoning policy should be to vigorously support the preservation and protection of the existing stable housing and neighborhoods adjoining the Interstate 440 corridor with particular emphasis on areas presently zoned for one-family and two-family type housing.

2. As reflected in Concept 2010: A General Plan for Nashville and Davidson County, adopted land use policy does not support the introduction of any nonresidential base or overlay zoning district in the portion of the impact area that is on the out-of-town side of Interstate 440. Any such rezoning is inappropriate and should be avoided.

3. Planned unit development overlay zoning provides the best opportunity to address site design, buffering, traffic access and other development considerations that may be of concern to adjoining property owners. Generally, PUD overlay zoning should be used in order to achieve a harmonious relationship among existing and new development.

4. In general, all rezoning to permit new residential and nonresidential development should be subject to the availability of sufficient traffic, utility and drainage capacity to ensure an adequate level of service after the new development has been added. Further, zone changes to accommodate unforeseen development should be avoided when such development would usurp traffic and utility system capacity intended to support planned growth in the area.

D. Impact Area 1-Subarea Policies. The policies set forth in this subsection shall be applicable only within the specific subarea referenced.

1. Subarea 1-A Policies (Map 1-A). Base zoning district changes to higher density or nonresidential zone districts are inappropriate. Residential planned unit developments are appropriate. Such developments that contain other than one-family or two-family type housing structures should be limited to locations along the fringes of this area and careful consideration should be given to design so adjoining one-family and two-family development is not adversely affected.

2. Subarea 1-B Policies (Map 1-B). Nonresidential zoning changes should be limited to ON or OL zoning only for minor boundary adjustments, where appropriate, along existing ORI and ON or OL district boundaries. Higher density residential zoning is not appropriate unless accessibility is substantially improved to major arterial streets other than West End Avenue, such as Charlotte Pike, and traffic studies conducted by the metropolitan planning commission and metropolitan traffic and parking commission determine that satisfactory levels of traffic service can be maintained with the higher densities in this subarea.

3. Subarea 1-C Policies (Map 1-C). For portions of the subarea presently zoned ORI, any changes to any base or overlay zone districts which permits a broader range of nonresidential land uses in inappropriate. Limited expansion of nonresidential zoning into Subarea 1-B or 1-F to facilitate good site design for office development fronting along West End Avenue is appropriate only when it is consistent with the policies for the affected subarea and does not materially deteriorate traffic conditions on West End Avenue.

4. Subarea 1-D Policies (Map 1-D). Rezoning to any nonresidential base or overlay district is inappropriate. High-density residential development should be limited

to the frontage of West End Avenue and should not extend to the frontage of streets parallel to and one block removed from West End Avenue. In areas zoned for one-family or two-family type residential uses, residential planned unit developments with one-family and two-family type housing only are appropriate; changes to higher density base districts in these areas are not appropriate. Residential uses along secondary streets should be protected by preserving the primary function of these streets of serving institutionally and residentially generated traffic from this and adjoining areas.

5. Subarea 1-E Policies (Map 1-E). Rezoning any portion of this subarea to any nonresidential base or overlay district would be inappropriate. Residential base zoning district changes to permit higher densities should be based on a detailed traffic study conducted by the metropolitan traffic and parking commission and the metropolitan planning commission that determines that traffic from additional development in the area together with that generated from currently projected development of 2000 outside of this area can be satisfactorily accommodated within available transportation system capacity. Planned unit development overlay zoning should be used to accommodate residential developments with site designs and housing types not achievable through conventional subdivisions. Development in this area should not result in excessive traffic on secondary streets in adjoining existing residential areas. Whenever roadway improvements and studies allow for consideration of additional development beyond that permitted by present zoning, the densities established for residential medium density and use policy categories should be used to determine the maximum amount of residential development that would be appropriate in this area.

6. Subarea 1-F Policies (Map 1-F). A change in existing zoning to higher density residential or nonresidential base or overlay districts is appropriate only when all of the following conditions listed for each type of zone change are met:

a. In the case of a proposal for nonresidential zoning: (i) the proposal abuts existing nonresidential zoning property that has frontage on West End Avenue or Hillsboro Pike, (ii) the property proposed for rezoning is needed together with one or more parcels in the abutting nonresidential zone district in order to provide a development site with adequate depth and the entire development site is submitted for approval as a commercial planned unit development overlay district with the bulk and service characteristics of the proposed use designed to avoid adverse effects on adjoining residentially zoned areas and residentially used streets; for any such PUD along Hillsboro Pike, the intensity of development should not exceed that permitted in the OL base zone district;

b. In the case of a proposal for higher density residential zoning: The proposal is submitted for approval as a residential planned unit development overlay district and the proposed site: (i) is contiguous to an existing zone district which permits residential development of equal or greater density, (ii) has frontage on a collector or higher order street, (iii) is in the vicinity of an interstate highway interchange, and (iv) is located along the mapped boundary between two residential land use policy categories of the general plan, one of which is either medium-high or high density; or

c. In the case of residential development proposals in locations other than specified in subdivision (b), the proposal is submitted as a residential planned unit development and the following conditions are met: (i) existing base district zoning is not changed; (ii) the metropolitan planning commission and the metropolitan council strictly adhere to the metropolitan zoning requirements when proposals containing multifamily structures are submitted for consideration, and (iii) careful consideration is given to design and landscape buffering in all such proposals to protect adjoining residential uses.

7. Subarea 1-G Policies (Map 1-G). Rezoning to any nonresidential base or overlay district is inappropriate in this area. Base district zoning changes to permit higher densities should be avoided. Residential planned unit development overlay zoning may be considered in the area between Interstate 440 and Sharondale Drive provided: (a) such developments contain only one-family and/or two-family type housing; and (b) the conditions hazardous to traffic and pedestrians along Sharondale Drive are first remedied. The area should be protected from heavy volumes of traffic resulting from any extensive development in adjoining areas, particularly Subarea 1-E.

8. Subarea 1-H Policies (Map 1-H). Zone changes which would permit nonresidential development are inappropriate. Residential development with mixed building types or multifamily structures are appropriate along both margins of Hillsboro Pike. All of the following conditions shall apply to any such development proposed along the west margin of Hillsboro Pike: (a) it is submitted as a planned unit development; (b) the proposed density does not exceed that permitted in the R10 base zone district; (c) it does not extend to a depth in excess of three hundred feet from the right-of-way line of Hillsboro Pike; (d) it is developed in a manner which is compatible with the character of existing adjoining residential development; and (e) it will not materially deteriorate traffic conditions on Hillsboro Pike.

9. Subarea 1-I Policies (Map 1-I). Rezoning to allow higher intensity office development or a greater diversity of commercial activities is inappropriate. Rezoning to

improve the depth of shallow building sites fronting on Hillsboro Pike may be considered along the eastern and western edges of this subarea and should be guided by the policies established for Subareas 1-F and 1-J.

10. Subarea 1-J Policies (Map 1-J). Residential base zone district changes to higher density zones should be avoided. Residential planned unit developments may be permitted in areas where lot sizes are substantially greater than minimum zoning requirements and prevailing lot sizes such as the lots fronting the west margin of Hazelwood Drive and lots fronting both sides of Cedar Lane west of Hazelwood Drive. Such PUDs should be limited to one-family and two-family type housing except where they would be between existing multifamily developments. Rezoning to nonresidential zones should be limited to commercial planned unit developments to improve the developability of shallow lots fronting on Hillsboro Pike provided: (a) the intensity of the development in the PUD does not exceed that permitted in the base zone of the lot fronting on Hillsboro Pike, (b) generous buffering is provided to protect adjacent residential uses, and (c) access is not oriented to the adjoining residential areas.

11. Subarea 1-K Policies (Map 1-K). Zone changes to permit nonresidential development are inappropriate. The application of residential planned unit development overlay zoning is appropriate in this subarea. The metropolitan planning commission and the metropolitan council should strictly adhere to the requirements in Article II of this chapter when proposals containing multifamily structures are submitted for consideration. In addition, careful consideration should be given to design and landscape buffering in all such proposals to protect adjoining residential uses.

12. Subarea 1-L Policies (Map 1-L). Residential base district zoning changes to higher density zones should be avoided. Reduced site size residential planned unit developments should be considered and should be limited to one-family and two-family type housing structures. No rezoning to nonresidential base or overlay zone districts should be permitted. (Ord. 96-555 § 9.10(C), 1997)

17.36.390 I-440 Impact Area 2.

The following policies shall be applicable to I-440 Impact Area 2.

A. Overview and Applicability. Policies are presented in two parts: Those applicable throughout Impact Area 2 and those applicable only within specific subareas of Impact Area 2. The policies shall apply to zone change proposals that have been determined by the metropolitan council to be related to the presence and/or operational effects of Interstate 440.

B. Adoption of Impact Area Maps. The maps attached to the ordinance codified in this section and on file in the office of the metropolitan clerk delineating Impact Area 2 and its subareas are adopted as part of this title and may be viewed upon request at the office of the metropolitan clerk.

C. Impact Area 2-Areawide Policies. The policies set forth in this section shall apply within Impact Area 2 as delineated on Map 2.

1. Proximity to Interstate 440, in and of itself, does not make an area unsuitable for residential use, since the design of the interstate incorporates features which minimize the facility's negative auditory and visual impacts.

2. Where Concept 2010: A General Plan for Nashville and Davidson County, identifies an area to be conserved for residential use, zoning should reflect that policy at the density indicated. Where the land use policy map identifies an area for nonresidential use, but the zoning has remained residential, changes in zoning should be considered in terms of a managed transition that will create minimum conflicts between uses.

3. Conflicts between new and existing uses may best be resolved by the use of planned unit development overlay zoning, because it provides the opportunity to address site design, buffering, traffic and other considerations.

4. Zone changes should be subject to the availability of street, utility and drainage capacity.

D. Impact Area 2-Subarea Policies. The policies set forth in this subsection shall be applicable only within the specific subarea referenced.

1. Subarea 2-A Policies (Map 2-A). Retain the current R6 and R6-A base zone throughout the subarea.

2. Subarea 2-B Policies (Map 2-B). The R6 and R6-A base zone should be maintained. There should be no expansion of the small CS and CS-A strip. Residential planned unit developments of mixed structure types should be considered, if an amendment to the general plan is considered simultaneously.

3. Subarea 2-C Policies (Map 2-C). Expansion of nonresidential or introduction of higher density residential zoning districts would be inappropriate, except the lots abutting the west margin of Hester Avenue may be considered for nonresidential if combined with the Nolensville Pike lots with all access to Nolensville Pike and the Nolensville Pike portion reclassified to CS and CS-A. Reduced site size residential planned unit developments at densities allowed in the base zoning district would be acceptable south of Vivelle Avenue.

4. Subarea 2-D Policies (Map 2-D). Expansion of nonresidential zoning or introduction of higher density residential zoning would not be appropriate. Residential planned unit development should be considered.

5. Subarea 2-E Policies (Map 2-E). Zone changes to industrial uses would be inappropriate. If a mixed-use zoning district is made available, its application to this area would not be contrary to this policy.

6. Subarea 2-F Policies (Map 2-F). Expansion of the existing RM20, ON, OL, CN and CN-A, CL and CL-A, CS and CS-A zoning districts would not be appropriate. While the R6 base zone should be retained, application of the residential planned unit development overlay, along the southern, western and northern boundaries, would be appropriate if building types are similar to those in the subarea.

7. Subarea 2-G Policies (Map 2-G). Expansion of the existing CS and CS-A, IWD and RM20 zoning districts is not appropriate. Expansion of the ON or OL zoning districts should be confined to parcels fronting the south margin of Thompson Lane, from the existing OL to the west margin of Dobbs Avenue, and should be allowed only in an orderly progression. Use of residential planned unit development overlays would be appropriate in the development of the large vacant tracts within the R10 base zone. (Ord. BL2015-1153 § 15, 2015; Ord. 96-555 § 9.10(D), 1997)

Article XI. Neighborhood Landmark District

17.36.400 Purpose and intent.

The neighborhood landmark district provisions are established by this title to preserve and protect neighborhood features that are important to maintain and enhance the neighborhood character. Neighborhood features are defined as buildings, structures, objects, sites, and areas of historic, cultural, civic, neighborhood, or architectural value and/or importance to Metropolitan Nashville and Davidson County. The provisions of this title are intended:

A. To regulate exterior design, arrangement, texture, and materials proposed to be used within the neighborhood landmark districts to ensure protection of the identified feature and compatibility with surrounding uses;

B. To create an aesthetic appearance which complements the existing buildings, structures, objects, sites, and areas of value or importance on-site;

C. To stabilize and improve property values;

D. To foster civic beauty;

E. To enhance a neighborhood by providing a strong sense of place;

F. To protect the neighborhood character and context by preserving existing neighborhood fabric while permitting reasonable use of a property;

G. To strengthen the local economy; and

H. To promote the use of neighborhood landmark districts for the education, pleasure and welfare of the present and future citizens of Nashville and Davidson County. (Ord. BL2000-365 Exh. A (part), 2000)

17.36.410 District established.

Neighborhood Landmark (NL) District. The boundaries shall be shown on the zoning map or special overlays thereto that are made a part of this Zoning Code and noted by name on such maps, in which no feature shall be constructed, altered, repaired, relocated or demolished in whole or in part, increased in size, or changed in height unless the action complies with the requirements set forth in this title. (Ord. BL2000-365 Exh. A (part), 2000)

17.36.420 District defined.

A neighborhood landmark is defined as a feature, its appurtenances and the property it is located on which has historical, cultural, architectural, civic, neighborhood, or archaeological value and/or importance; whose demolition or destruction would constitute an irreplaceable loss to the quality and character of a neighborhood within Nashville and Davidson County, and that meets one or more of the following criteria:

1. It is recognized as a significant element in the neighborhood and/or community;

2. It embodies characteristics that distinguish it from other features in the neighborhood and/or community;

3. Rezoning the property on which the feature exists to a general zoning district inconsistent with surrounding or adjacent properties such as, office, commercial, mixed-use, shopping center, or industrial zoning district would significantly impact the neighborhood and/or community;

4. Retaining the feature is important in maintaining the cohesive and traditional neighborhood fabric;

5. Retaining the feature will help to preserve the variety of buildings and structures historically present within the neighborhood recognizing such features may be differentiated by age, function and architectural style in the neighborhood and/or community; and

6. Retaining the feature will help to reinforce the neighborhood and/or community's traditional and unique character. (Ord. BL2000-365 Exh. A (part), 2000)

Article XII. Urban Zoning Overlay District

17.36.430 Purpose and intent.

The primary intent of the urban zoning overlay district is to preserve and protect existing development patterns that predate the mid-1950's in portions of metro Nashville that were originally developed before that time and to ensure the compatibility of new development in those older portions of the city. In addition, the urban zoning overlay district is intended to promote reinvestment in areas of metro Nashville originally developed before the mid-1950s by modifying development standards that could add unnecessary expense without improving the safety or compatibility of resulting development. The urban zoning overlay district is also intended to implement provisions of adopted plans that call for particular areas to evolve to a development pattern characterized predominantly by lot sizes, street patterns, and alley systems commonly used before the mid-1950s. (Ord. BL2000-364 § 1, 2000)

17.36.440 Applicability.

The provisions of the urban zoning overlay district shall apply to all properties located within a mapped area indicated on a zoning overlay map adopted pursuant to the provisions of Article III of Section 17.40, excluding planned unit developments adopted prior to the effective date of the establishment of the urban zoning overlay district and properties zoned DTC district. However, the UZO District maximum parking space standard shall apply within the DTC. Petitions should contain a minimum of one hundred sixty acres of land in order to avoid piecemeal application of the district and should be for areas characterized predominantly by lot sizes, street patterns, and alley systems commonly used before the mid-1950s or for areas where an adopted plan calls for the evolution of such a development pattern. When properties included in a petition are within the area defined by the 1956 limits of the City of Nashville, they should be contiguous to a previously adopted urban zoning overlay district. For purposes of determining applicability of the urban zoning overlay district provisions within any other overlay district, the urban zoning overlay district provisions shall be treated as base zoning district provisions. (Ord. BL2022-1412 § 4, 2022; Ord. BL2009-586 § 1(Exh. A, § 44), 2010; Amdt. 10 with Ord. BL2000-364 § 1, 2000)

[Article XIII. Contextual Overlay District]

17.36.450 Purpose and intent.

The contextual overlay district provides appropriate design standards for residential areas necessary to maintain and reinforce an established form or character of residential development in a particular area. (Ord. BL2014-771 § 1, 2014)

17.36.460 Overlay designation.

A contextual overlay district shall be created according to the procedures of Chapter 17.40, Article III and depicted as a geographical area on the official zoning map. (Ord. BL2014-771 § 1, 2014)

17.36.470 Design guidelines.

A. Street Setback. The minimum required street setback shall be the average of the street setback of the two developed lots abutting each side of the lot. When one or more of the abutting lots is vacant, the next developed lot on the same block face shall be used. The minimum provided in [Section] 17.12.030A and the maximum provided in [Section] 17.12.030C.3 shall not apply. Where there is only one abutting lot on the same block face, it shall be used for this calculation. When the subject lot is on a corner, the minimum required street setback shall be calculated and met for each street.

B. Height.

1. The maximum height, including the foundation, of any primary structure shall not be greater than thirty-five feet or one hundred twenty-five percent of the average height of the principal structures on the two lots abutting each side of the lot, whichever is less. When one of the abutting lots is vacant, the next developed lot on the same block face shall be used. Where there is only one abutting lot on the same block face, it shall be used for this calculation. When the subject lot is on a corner, the maximum height shall be calculated for each street and limited to thirty-five feet or one hundred twenty-five percent of the average height of the lesser value. When one hundred twenty-five percent of the average of the abutting structures is less than twenty-seven feet, a maximum height of one and one-half stories in twenty-seven feet shall be permitted.

2. The maximum height, including the foundation, of any accessory structure shall not be greater than twenty-seven feet.

3. For the purposes of this section, height shall be measured from grade or, if present, the top of a foundation which shall not exceed three feet above grade, to the roof line.

4. For the purposes of this section, "one-half story" means a partial story under a gable, hip, or gambrel roof, the wall plates of which, on at least two exterior walls, are not more than four feet above the floor of such story. A dormer shall not occupy more than fifty percent of the roof area. The floor area of said half story shall not exceed three-quarters of the floor area of the floor

immediately below it. A half story containing an independent dwelling unit or accessory apartment shall be deemed a full story.

C. Maximum building coverage. The maximum building coverage (excluding detached garages and other accessory buildings) shall be a maximum of one hundred fifty percent of the average of the building coverage (excluding detached garages and other accessory buildings) of the two abutting lots on each side. When the abutting lot is vacant, the next developed lot shall be used. Where there is only one abutting lot on the same block face, it shall be used for this calculation. When the subject lot is on a corner, the maximum building coverage shall be calculated and met for each street.

D. Access and driveways, garages and parking areas.

1. Access and Driveways.

a. Where existing, access shall be from an improved alley. Where no improved alley exists, a driveway within the street setback may be permitted.

b. For a corner lot, the driveway shall be located within thirty feet of the rear property line.

c. Driveways are limited to one driveway ramp per public street frontage.

d. Parking, driveways and all other impervious surfaces in the required street setback shall not exceed twelve feet in width.

2. Garages.

a. Detached. The front of any detached garage shall be located behind the rear of the primary structure. The garage door of a detached garage may face the street.

b. Attached. The garage door shall face the side or rear property line. (Ord. BL2024-184 § 6, 2024; Ord. BL2014-771 § 1, 2014)

17.36.480 Permitted land uses.

The range of land uses permitted within a contextual overlay district shall be those permitted by the underlying zoning district(s) as established by the zoning district land use table of Section 17.08.030. (Ord. BL2014-771 § 1, 2014)

17.36.490 Variation of conventional standards.

The contextual overlay district varies the conventional standards of the underlying zoning district(s) as established in Chapter 17.12, Sections 17.12.020 through 17.12.060; the parking, loading and access standards of Chapter 17.20; and the nonconforming lot area requirements of Section 17.40.670. (Ord. BL2014-771 § 1, 2014)

17.36.500 Contextual overlay district.

A. Application for a Contextual Overlay District. Lots included in a district must be contiguous and continuous throughout the residential portion of a complete block face(s).

B. Historic Overlay District. A contextual overlay shall not be applied in an adopted historic overlay district. Adoption of a historic overlay district shall supersede an adopted contextual overlay and only the requirements of the historic overlay district shall apply.

C. Planning Commission Recommendation. The planning commission shall review a proposed contextual overlay district application for conformance with the General Plan. The planning commission shall act to recommend approval, approval with conditions or disapproval of the application. Within ten working days of an action, the commission's resolution shall be transmitted in writing to the applicant, the metro clerk, the zoning administrator and all other appropriate governmental departments.

D. Council Consideration. The metropolitan council shall consider an ordinance establishing a contextual overlay district according to the procedures of Article III of Chapter 17.40 (Amendments). All property owners within and proximate to a proposed contextual overlay district shall be notified according to the procedures of Article XV of Chapter 17.40.

E. Final Site Plan Approval. For property located within a contextual overlay district, a final site plan application shall be submitted for review and approval by the Zoning Administrator in a manner consistent with the procedures of Section 17.40.170A. The applicant is required to submit all necessary information to the Zoning Administrator and to certify the accuracy of the submitted information.

F. Modifications to Design Standards Not Permitted. Contextual Overlay Districts shall be adopted with the standards outlined in [Section] 17.36.470 (Design guidelines). Modifications to these standards shall not be permitted. Variance requests shall follow the process outlined in Chapter 17.40.

G. Changes to a Contextual Overlay District Boundary. A proposed change in the geographic boundary of a contextual overlay district on the official zoning map shall be considered by the council according to the procedures of Article III of Chapter 17.40 (Amendments). (Ord. BL2014-771 § 1, 2014)

[Article XIV. Corridor Design Overlay District]

17.36.510 Purpose and intent.

The corridor design overlay district provides appropriate design standards for commercial, office and mixed-

use development along corridors necessary to provide incremental improvements to the aesthetics of Nashville's commercial districts and corridors. Application of this overlay district shall be limited to areas requiring transitional standards. (Ord. BL2019-1540 § 1, 2019)

17.36.520 Overlay designation.

A corridor design overlay district shall be created according to the procedures of Chapter 17.40, Article III and depicted as a geographical area on the official zoning map. (Ord. BL2019-1540 § 2, 2019)

17.36.530 Applicability of standards.

A. Signage standards apply to any and all new signs, and do not apply to panel changes to existing signs.

B. Landscaping standards apply to new parking lots, and to the expansion area of existing parking lots that are expanded by ten spaces or more.

C. Landscaping standards do not apply to existing parking lots, or re-surfacing or re-striping of existing parking lots.

D. Building materials standards apply to additions greater than fifty percent of the existing building's square footage, and new buildings. (Ord. BL2019-1540 § 3, 2019)

17.36.540 Variations to conventional standards.

Variations to the conventional standards of the underlying zoning district(s) are:

A. Properties in the corridor design overlay district are subject to the following variations regarding signage:

1. All standards of [Chapter] 17.32 Signage Regulations shall apply according to the zoning district of the property, except Table 17.32.130D.

2. In place of Table 17.32.130D, Table 17.32.120 shall apply. Any references to Table 17.32.130D shall be substituted with Table 17.32.120.

3. All notes from Table 17.32.130D shall apply to properties in CL, CL-NS, CS, CS-NS, CA, CA-NS, CF, CF-NS, SCC, SCC-NS, SCR, SCR-NS, IWD, IR and IG districts.

4. Any uses permitted with conditions are allowed one-half the maximum sign area allowed in [Section] 17.16.070. All other standards of [Section] 17.16.070 shall apply to uses permitted with conditions.

B. Properties in the corridor design overlay district are subject to the following variations regarding perimeter screening:

1. All standards of [Section] 17.24.150 shall apply, with the exception that trees shall be installed at a rate of one tree per thirty feet regardless of zoning district or elevation relative to the public street.

C. Properties in the corridor design overlay district are subject to the following variations regarding building materials:

1. Each building facade facing a public street or private drive shall be considered a primary facade as specified in Figure 17.36.540.C and is subject to all regulations regarding primary facades. The presence or absence of parking between the primary facade and the street or drive does not influence the designation as a primary facade. Any and all primary facades are subject to all regulations regarding primary facades.

2. For all calculations related to materials, the primary facade shall be calculated as the entire width of the building multiplied by the entire height of the building, less the width and height of each window or door system. The calculations below are based on the remaining non-glazed facade.

3. At least seventy-five percent of the primary facade shall be clad in material(s) selected from the following list: brick, brick veneer, stone, cast stone, and/or architecturally treated concrete masonry units, fiber cement products, and/ or material(s) substantially similar in form and function.

i. Concrete masonry units shall be spilt-face or otherwise treated with texture or visual interest.

ii. Materials changes shall occur along horizontal lines, not vertical lines.

4. All other building facades, including those facing interior property lines, rear property lines, loading lanes, etc. - are not primary facades therefore alternative materials not listed in 17.36.540.C.3 may be used. If used on non-primary facades, concrete masonry units shall be split-face or otherwise treated with texture or visual interest.

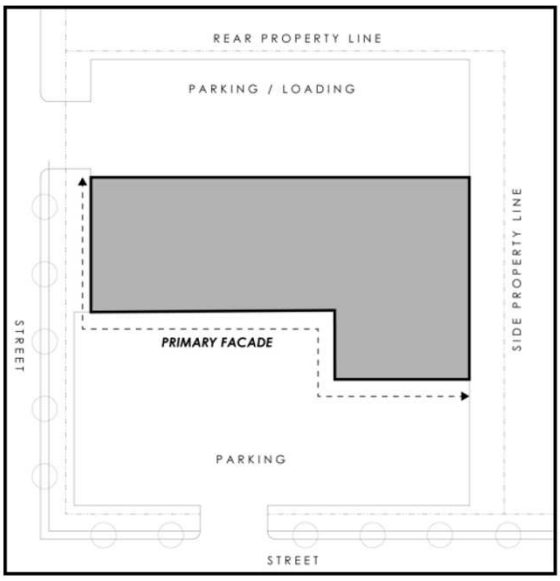


Figure 17.36.540.C.

(Ord. BL2021-1022 §§ 2, 3, 2022; Ord. BL2019-111 § 1(Exh. A, § 50), 2020; Amdt. 1 to Ord. BL2019-1540 § 4, 2019; Ord. BL2019-1540 § 4, 2019)

17.36.550 Permitted land uses.

The range of land uses permitted within a corridor design overlay district shall be those permitted by the underlying zoning district(s) as established by the zoning district land use table of Section 17.08.030. (Ord. BL2019-1540 § 5, 2019)

17.36.560 Corridor design overlay district.

A. Planning Commission Recommendation. The planning commission shall review a proposed corridor design overlay district application for conformance with the General Plan. The planning commission shall act to recommend approval, approval with conditions or disapproval of the application. Within ten working days of an action, the commission's resolution shall be transmitted in writing to the applicant, the metro clerk, the zoning administrator and all other appropriate governmental departments.

B. Council Consideration. The metropolitan council shall consider an ordinance establishing a corridor design overlay district according to the procedures of Article III of Chapter 17.40 (Amendments). All property owners within and proximate to a proposed corridor design overlay district shall be notified according to the procedures of Article XV of Chapter 17.40.

C. Final Site Plan Approval. For property located within a corridor design overlay district, a final site plan application shall be submitted for review and approval by the zoning administrator in a manner consistent with the procedures of Section 17.40.170A. The applicant is required to submit all necessary information to the zoning administrator and to certify the accuracy of the submitted information.

1. The plans and specifications submitted pursuant to this section shall be prepared by, or under the direction of, and bear the seal of a professional landscape architect, architect, engineer, or land planner registered in Tennessee. The presence of this seal indicates full compliance with the provisions of the corridor design overlay district.

2. Before the issuance of a use and occupancy permit, as-built drawings shall be submitted to certify compliance with the standards of this section. The as-built drawings shall be prepared by, or under the direction of, and bear the seal of a professional landscape architect, architect, engineer, or land planner registered in Tennessee. The presence of this seal indicates full compliance with the provisions of the corridor design overlay district.

D. Modifications to Design Standards. The zoning administrator shall have the authority to grant modifications to the standards of the corridor design overlay district that do not exceed twenty percent of any signage standard, landscaping requirement, or dimensional requirement relating to building materials. At the zoning administrator's discretion, any modification may be referred to the board of zoning appeals for review and action.

E. Changes to a Corridor Design Overlay District Boundary. A proposed change in the geographic boundary of a corridor design overlay district on the official zoning map shall be considered by the council according to the procedures of Article III of Chapter 17.40. (Amendments). (Ord. BL2019-1540 § 6, 2019)

Article XV. Residential Accessory Structure Overlay

17.36.570 Purpose and intent.

The residential accessory structure overlay district provides appropriate design standards and bulk regulations for accessory structures in residential areas necessary to maintain and reinforce an established form or character of residential development in a particular area. (Ord. BL2020-151 § 1, 2020)

17.36.580 Overlay designation.

A residential accessory structure overlay district shall be created according to the procedures of Chapter 17.40, Article III and depicted as a geographical area on the official zoning map. (Ord. BL2020-151 § 2, 2020)

17.36.590 Guidelines.

A. Number. A maximum of two accessory structures may be constructed on a lot.

B. Location. Accessory structures shall not be erected in any required setback and must be located to the rear of the principle structure.

C. Size. The combined gross floor area of all accessory structures on a lot shall be no more than thirty percent of the total gross floor area of the principal structure or one thousand two hundred square feet, whichever is less.

D. Height. Accessory structures shall not exceed one story or sixteen feet in height, whichever is less. The top elevation of an accessory structure shall not exceed the top elevation of the principal structure.

E. Materials. Accessory structures greater than one hundred fifty square feet in gross floor area must be constructed in a like manner to the principal building in terms of roof style and building materials. Alternative materials that are not metal, plastic, vinyl, or concrete masonry units may be used as primary siding materials for accessory structures greater than one hundred fifty square feet in gross floor area. Metal, plastic, vinyl, or concrete masonry units may be used if that same material is the primary material on the principal structure. (Ord. BL2021-1022 § 4, 2022; Ord. BL2020-151 § 3, 2020)

17.36.600 Permitted land uses.

The range of land uses permitted within a residential accessory structure overlay district shall be those permitted by the underlying zoning district(s) as established by the zoning district land use table of Section 17.08.030. (Ord. BL2020-151 § 4, 2020)

17.36.610 Variation of conventional standards.

The residential accessory structure overlay district varies the conventional standards of the underlying zoning district(s) as established in Chapter 17.12, Sections 17.12.050 and 17.12.060. (Ord. BL2020-151 § 5, 2020)

17.36.620 Residential accessory structure overlay district.

A. Application for a Residential Accessory Structure Overlay District. Lots included in a district must be contiguous.

B. Historic Overlay District. A residential accessory structure overlay district shall not be applied in an adopted historic overlay district. Adoption of a historic overlay district shall supersede an adopted residential accessory structure overlay district and only the requirements of the historic overlay district shall apply.

C. Contextual Overlay District. A residential accessory structure overlay district shall not be applied in an adopted contextual overlay district. Adoption of a contextual overlay district shall supersede an adopted residential accessory structure overlay district and only the requirements of the contextual overlay district shall apply.

D. Urban Design Overlay District. A residential accessory structure overlay district shall not be applied in an adopted urban design overlay district. Adoption of an urban design overlay district shall supersede an adopted residential accessory structure overlay district and only the requirements of the urban design overlay district shall apply.

E. Urban Zoning Overlay. A residential accessory structure overlay district shall not be applied in the adopted urban zoning overlay district. Expansion of the urban zoning overlay district shall supersede an adopted residential accessory structure overlay district and only the requirements of the urban zoning overlay district shall apply.

F. Eligible Zoning Districts. Residential accessory structure overlay districts shall only be applicable in single family (RS and RS-A) and one- and two-family (R and R-A) residential zoning districts. Residential accessory structure overlay districts shall not be applied to property within specific plan (SP) zoning districts.

G. Planning Commission Recommendation. The planning commission shall review a proposed residential accessory structure overlay district application for conformance with the general plan. The planning commission shall act to recommend approval, approval with conditions or disapproval of the application. Within ten working days of an action, the commission's resolution shall be transmitted in writing to the applicant, the metro clerk, the zoning administrator and all other appropriate governmental departments.

H. Council Consideration. The metropolitan council shall consider an ordinance establishing a residential accessory structure overlay district according to the procedures of Article III of Chapter 17.40 (Amendments). All property owners within and proximate to a proposed residential accessory structure overlay district shall be notified according to the procedures of Article XV of Chapter 17.40.

I. Final Site Plan Approval. For property located within a residential accessory structure overlay district, a final site plan application shall be submitted for review and approval by the zoning administrator in a manner consistent with the procedures of Section 17.40.170A. The applicant is required to submit all necessary information to the zoning administrator and to certify the accuracy of the submitted information.

J. Modifications to Design Standards Not Permitted. Residential accessory structure overlay districts shall be adopted with the standards outlined in 17.36.590 (Guidelines). Modifications to these standards shall not be permitted. Variance requests shall follow the process outlined in Chapter 17.40.

K. Changes to a Residential Accessory Structure Overlay District Boundary. A proposed change in the geographic boundary of a residential accessory structure overlay district on the official zoning map shall be considered by the council according to the procedures of Article III of Chapter 17.40 (Amendments). (Ord. BL2020-316 § 3, 2020; Ord. BL2020-151 § 6, 2020)

Article XVI. Two-Story Residential Overlay

17.36.630 Purpose and intent.

The two-story residential overlay district provides appropriate building height standards in residential areas necessary to maintain and reinforce the established form and character of residential development in a particular area. (Ord. BL2022-1509 § 1, 2023)

17.36.640 Overlay designation.

A two-story residential overlay district shall be created according to the procedures of Chapter 17.40, Article III and depicted as a geographical area on the official zoning map. (Ord. BL2022-1509 § 1, 2023)

17.36.650 Guidelines.

A. Principal Structures. Principal structures shall not exceed two stories in thirty-five feet in height as measured from the finished grade. (Amdt. 1 to Ord. BL2022-1509 § 1, 2023; Ord. BL2022-1509 § 1, 2023)

17.36.660 Permitted land uses.

The range of land uses permitted within a two-story residential overlay district shall be those permitted by the underlying zoning district(s) as established by the zoning district land use table of Section 17.08.030. (Ord. BL2022-1509 § 1, 2023)

17.36.670 Variation of conventional standards.

The two-story residential overlay district varies the conventional standards of the underlying zoning district(s) as established in Chapter 17.12, Sections 17.12.020 and 17.12.060. (Ord. BL2022-1509 § 1, 2023)

17.36.675 Two-story residential overlay district.

A. Application for a Two-Story Residential Overlay District. Lots included in a district must be contiguous.

B. Historic Overlay District. A two-story residential overlay district shall not be applied in an adopted historic overlay district. Adoption of a historic overlay district shall supersede an adopted two-story residential overlay district and only the requirements of the historic overlay district shall apply.

C. Contextual Overlay District. A two-story residential overlay district shall not be applied in an adopted contextual overlay district. Adoption of a contextual overlay district shall supersede an adopted two-story residential overlay district and only the requirements of the contextual overlay district shall apply.

D. Urban Design Overlay District. A two-story residential overlay district shall not be applied in an adopted urban design overlay district. Adoption of an urban design overlay district shall supersede an adopted two-story residential overlay district and only the requirements of the urban design overlay district shall apply.

E. Urban Zoning Overlay. A two-story residential overlay district shall not be applied in the adopted urban zoning overlay district. Expansion of the urban zoning overlay district shall supersede an adopted two-story residential overlay district and only the requirements of the urban zoning overlay district shall apply.

F. Eligible Zoning Districts. Two-story residential overlay districts shall only be applicable in single family (RS and RS-A) and one- and two-family (R and R-A) residential zoning districts. Two-story residential overlay districts shall not be applied to property within specific plan (SP) zoning districts.

G. Planning Commission Recommendation. The planning commission shall review a proposed two-story residential overlay district application for conformance with the general plan. The planning commission shall act to recommend approval, approval with conditions or disapproval of the application. Within ten working days of an action, the commission's resolution shall be transmitted in writing to the applicant, the metro clerk, the zoning administrator, and all other appropriate governmental departments.

H. Council Consideration. The metropolitan council shall consider an ordinance establishing a two-story residential overlay district according to the procedures of Article III of Chapter 17.40 (Amendments). All

property owners within and proximate to a proposed two-story residential overlay district shall be notified according to the procedures of Article XV of Chapter 17.40.

I. Final Site Plan Approval. For property located within a two-story residential overlay district, a final site plan application shall be submitted for review and approval by the zoning administrator in a manner consistent with the procedures of Section 17.40.170A. The applicant is required to submit all necessary information to the zoning administrator and to certify the accuracy of the submitted information.

J. Modifications to Design Standards Not Permitted. Two-story residential overlay districts shall be adopted with the standards outlined in 17.36.650 (Guidelines). Modifications to these standards shall not be permitted. Variance requests shall follow the process outlined in Chapter 17.40.

K. Changes to a Two-Story Residential Overlay District Boundary. A proposed change in the geographic boundary of a two-story residential overlay district on the official zoning map shall be considered by the council according to the procedures of Article III of Chapter 17.40 (Amendments). (Ord. BL2024-595 § 1, 2024; Ord. BL2022-1509 § 1, 2023)

Article XVII. Detached Accessory Dwelling Unit (DADU) Overlay District

17.36.680 Purpose and intent.

The Detached Accessory Dwelling Unit (DADU) overlay district provides additional housing options in the General Services District (GSD), outside of the Urban Service District (USD). Any DADU Overlays previously adopted may remain in effect until the metropolitan council adopts an ordinance canceling all or part of such DADU overlay district. (Ord. BL2025-1007 § 7, 2025; Ord. BL2021-784 § 1, 2021; Ord. BL2021-620 § 1, 2021)

17.36.690 Overlay designation.

A DADU overlay district shall only be created within the GSD, outside of the USD, according to the procedures of Chapter 17.40, Article III and depicted as a geographical area on the official zoning map. Any DADU Overlay previously adopted may remain in effect until the metropolitan council adopts an ordinance canceling all or part of such DADU overlay district. (Ord. BL2025-1007 § 8, 2025; Ord. BL2021-784 § 2, 2021; Ord. BL2021-620 § 1, 2021)

17.36.700 Design guidelines.

A detached self-sufficient dwelling unit shall be allowed accessory to a principal structure subject to the standards set forth in Section 17.16.030.G of this zoning code. (Ord. BL2021-620 § 1, 2021)

17.36.710 Permitted land uses.

The range of land uses permitted within a DADU overlay district shall be those permitted by the underlying zoning district(s) as established by the zoning district land use table of Section 17.08.030 and detached accessory dwelling unit. On any lot where a new detached accessory dwelling unit is built, or on any lot where a new detached accessory dwelling unit is established via conversion of an existing accessory structure, short term rental property-owner occupied, is not a permitted use in the accessory dwelling unit. (Ord. BL2025-1007 § 9, 2025; Ord. BL2024-184 § 7, 2024; Amdt. 1 to Ord. BL2021-620 § 1, 2021; Ord. BL2021-620 § 1, 2021)

17.36.720 Bulk provisions.

The bulk provisions of the base zoning district shall apply. (Ord. BL2021-620 § 1, 2021)

17.36.730 Detached Accessory Dwelling Unit Overlay District.

A. Application of a DADU overlay.

1. A DADU overlay may be applied to properties zoned AR2a, AG, R/R-A, RS/RS-A or properties where a DADU is a legally permitted use prior to the establishment of the overlay.

2. A DADU overlay shall consist of a minimum of 30 contiguous lots. For the purposes of this overlay, lots on opposing block faces and opposite sides of alleys shall be considered contiguous.

3. Properties within a DADU overlay shall not share lot lines with single-family residential zoned properties that are not in the overlay district.

B. Planning Commission Recommendation. The planning commission shall review a proposed DADU overlay district application for conformance with the General Plan. The planning commission shall act to recommend approval or disapproval of the application. Within ten working days of an action, the commission's resolution shall be transmitted in writing to the applicant, the metro clerk, the zoning administrator and all other appropriate governmental departments.

C. Council Consideration. The metropolitan council shall consider an ordinance establishing a DADU overlay district according to the procedures of Article III of this chapter (Amendments). All property owners within and

proximate to a proposed DADU overlay district shall be notified according to the procedures of Article XV of this chapter.

D. Final Site Plan Approval. For property located within a DADU overlay district, a final site plan application shall be submitted for review and approval by the Zoning Administrator in a manner consistent with the procedures of Section 17.40.170A. The applicant is required to submit all necessary information to the Zoning Administrator and to certify the accuracy of the submitted information.

E. Changes to a DADU Overlay District Boundary. A proposed change in the geographic boundary of a DADU overlay district on the official zoning map shall be considered by the council according to the procedures of Article III of this chapter (Amendments). (Ord. BL2025-1007 § 10, 2025; Amdt. 1 to Ord. BL2021-620 § 1, 2021; Ord. BL2021-620 § 1, 2021)

Article XVIII. Commercial Compatibility Overlay

17.36.740 Purpose and intent.

The commercial compatibility overlay district provides prohibitions and regulations on certain non-residential uses along collector and local streets in close proximity to residential lots to create a commercial development pattern that is compatible and harmonious with adjacent residential neighborhoods. (Ord. BL2025-909 § 2, 2025)

17.36.750 Overlay designation.

A commercial compatibility overlay district shall be created according to the procedures of Chapter 17.40, Article III and depicted as a geographical area on the official zoning map. (Ord. BL2025-909 § 3, 2025)

17.36.760 Permitted land uses.

The range of land uses permitted within a commercial compatibility overlay district shall be those permitted by the underlying zoning district(s) as established by the zoning district land use table of Section 17.08.030 with the exception that alternative financial services and beer and cigarette market uses shall be prohibited. The locations of automobile repair, car wash, and liquor sales shall be subject to a 2,640-linear foot distance requirement from the property line of any other property upon which the same use is located. Such uses newly proposed in a commercial compatibility overlay district shall be subject to the above distance requirements from any such uses currently existing both inside and outside of a commercial compatibility overlay. (Ord. BL2025-909 § 4, 2025)

17.36.770 Variation of conventional land use development standards.

Variations to the conventional land use development standards are:

A. Automobile convenience uses are subject to the following conditions:

1. All standards and conditions of Section 17.16.070, Subsection D shall apply except for Subsections D.3 and D.5.

2. There shall be no more than eight gasoline pumps per establishment

3. No car wash shall be permitted.

4. No equipment rental shall be permitted.

5. Except for access points, the use shall be fully screened from adjacent parcels zoned RS, R, or RM by an appropriate buffer yard as determined by Table 17.24.230 and an eight-foot tall opaque fence or masonry wall.

B. Automobile parking uses are subject to the following conditions:

1. Chain link fence, barbed wire, razor wire or similar fencing shall be prohibited.

2. No inoperable vehicles shall be stored on the premises overnight.

3. Except for access points, the parking area shall be fully screened from adjacent parcels zoned RS, R, or RM by an appropriate buffer yard as determined by Table 17.24.230 and an eight-foot tall opaque fence or masonry wall.

C. Automobile repair, automobile service, and car wash uses are subject to the following conditions:

1. Chain link fence, barbed wire, razor wire or similar fencing shall be prohibited.

2. Outdoor storage or outdoor display of product shall be prohibited.

3. Service doors shall be oriented away from any parcel that contains a residential dwelling unit.

4. Except for access points, the use shall be fully screened from adjacent parcels zoned RS, R, or RM by an appropriate buffer yard as determined by Table 17.24.230 and an eight-foot tall opaque fence or masonry wall.

D. Bar or nightclub uses are subject to the following conditions:

1. All standards and conditions of Section 17.16.070, Subsection G shall apply.

2. Outdoor service or seating areas must be at least one hundred feet from the nearest property line of any parcel zoned RS or R and ten feet from the nearest property line of any other parcel.

3. Outdoor sound amplification is not permitted between the hours of nine p.m. and ten a.m.

4. Operation of the establishment shall be prohibited between the hours of twelve a.m. and nine a.m.

5. Except for access points, the use shall be fully screened from adjacent parcels zoned RS, R, or RM by an appropriate buffer yard as determined by Table 17.24.230 and an eight-foot tall opaque fence or masonry wall.

E. Club uses are subject to the following conditions:

1. No more than one establishment is permitted per lot.

2. Outdoor service or seating areas must be at least one hundred feet from the nearest property line of any parcel zoned RS or R and ten feet from the nearest property line of any other parcel.

3. Outdoor sound amplification is not permitted between the hours of nine p.m. and ten a.m.

4. Operation of the establishment shall be prohibited between the hours of twelve a.m. and nine a.m.

5. Except for access points, the use shall be fully screened from adjacent parcels zoned RS, R, or RM by an appropriate buffer yard as determined by Table 17.24.230 and an eight-foot tall opaque fence or masonry wall.

F. Commercial amusement, inside uses are subject to the following conditions:

1. No more than one establishment is permitted per lot.

2. Outdoor service or seating areas must be at least one hundred feet from the nearest property line of any parcel zoned RS or R and ten feet from the nearest property line of any other parcel.

3. Outdoor sound amplification is not permitted between the hours of nine p.m. and ten a.m.

4. Operation of the establishment shall be prohibited between the hours of twelve a.m. and nine a.m.

5. Except for access points, the use shall be fully screened from adjacent parcels zoned RS or R by an appropriate buffer yard as determined by Table 17.24.230 and an eight-foot tall opaque fence or masonry wall. (Amdt. 1 to Ord. BL2025-909 § 5, 2025; Ord. BL2025-909 § 5, 2025)

17.36.780 Commercial compatibility overlay district.

A. Application of the Commercial Compatibility Overlay District. Lots and parcels included in a district must have some portion of their frontage along one or more collector avenues as identified in the Major and Collector Street Plan or along one or more local streets, be contiguous, and be located within one hundred feet of a lot or parcel zoned RS, R, or RM. Each district shall consist of no more than fifty total acres.

B. Eligible Zoning Districts. Commercial compatibility overlay districts shall only be applicable in mixed use, office, commercial, and shopping center zoning districts. Commercial compatibility overlay districts shall not be applicable to the DTC zoning district.

C. Planning Commission Recommendation. The planning commission shall review a proposed commercial compatibility overlay district application for conformance with the General Plan. The planning commission shall act to recommend approval, approval with conditions, or disapproval of the application. Within ten working days of an action, the commission's resolution shall be transmitted in writing to the applicant, the metropolitan clerk, the zoning administrator, and all other appropriate governmental departments.

D. Council Consideration. The metropolitan council shall consider an ordinance establishing a commercial compatibility overlay district according to the procedures of Article III of Chapter 17.40 (Amendments). All property owners within and proximate to a proposed Commercial Compatibility Overlay district shall be notified according to the procedures of Article XV of Chapter 17.40.

E. Changes to a Commercial Compatibility Overlay District Boundary. A proposed change in the geographic boundary of a commercial compatibility overlay district on the official zoning map shall be considered by the Council according to the procedures of Article III of Chapter 17.40 (Amendments). (Ord. BL2025-909 § 6, 2025)

Chapter 17.37

DOWNTOWN CODE (DTC)

Sections:

17.37.010 Downtown Code (DTC) adopted.

17.37.010 Downtown Code (DTC) adopted.

The metropolitan government adopts the DTC to be applicable throughout the metropolitan government. A copy of such DTC is attached to the ordinance codified in this section and made a part hereof, the same as if copied verbatim herein. (Ord. BL2025-799 § 1(Exh. A), 2025; Amdt. 1 to Ord. BL2025-761 § 1(Exh. A), 2025; Ord. BL2025-761 § 1(Exh. A), 2025; Ord. BL2024-452 § 1(Exh. B), 2024; Ord. BL2022-1472 § 1, 2022; Ord. BL2022-1412 § 5, 2022; Ord. BL2022-1216 § 2, 2022; Ord. BL2021-923 §§ 1—5, 2021; Ord. BL2021-869 § 1, 2021; Ord. BL2021-868 § 1, 2021; Ord. BL2020-334 §§ 1, 2, 2020; Ord. BL2017-827 § 1, 2017; Ord. BL2016-133 § 3, 2016; Amdt. 1 to Ord. 17.38.010 Design-Based Multi-Family adopted.

The metropolitan government adopts Design-Based Multi-Family to be applicable throughout the metropolitan government. A copy of such standards is attached to the ordinance codified in this section and made a part hereof, the same as if copied verbatim herein. (Ord. BL2025-1005 § 1(Exh. A), 2025)

Editor's note—The Design-Based Multi-Family standards, as attached to Substitute BL2025-1005, § 1(Exh. F), passed Dec. 4, 2025, effective April 1, 2026, have been copied verbatim to read as herein set out.

17.38.010.A Residential Neighborhood.

1. **Intent.** Intended for residential development, generally in the form of houses or townhouses, with private or shared open space. This district is appropriate for providing lower levels of density at strategic locations in urban and suburban areas—such as in transition zones near corridors, close to community amenities like parks and schools, or in areas with good access to arterial streets. Preference is given to locations with mass transit service.

2. **Zones.**

Zones	Context
Residential Neighborhood 1 (RN1)	Suburban
Residential Neighborhood 2 (RN2)	Urban

3. **Allowed Building Types.**

Single Family
Two Family
Townhouse
House Court
Townhouse Court
Plex House
Manor House (RN2 only)

Note 1: Detached Accessory Dwelling Units allowed with Single Family Building Types with conditions from Section 17.16.30.G, except for lot area, height, and setbacks, which are regulated by this chapter.

Note 2: Not-owner occupied Short Term Rentals are prohibited. Owner-occupied Short Term Rentals allowed with Single Family Building Type only per Section 6.28.30.

Note 3: Non-residential uses are permitted per Table 17.08.030 and are subject to the bulk standards for R6 in Table 17.12.020B.

4. **Lot.**

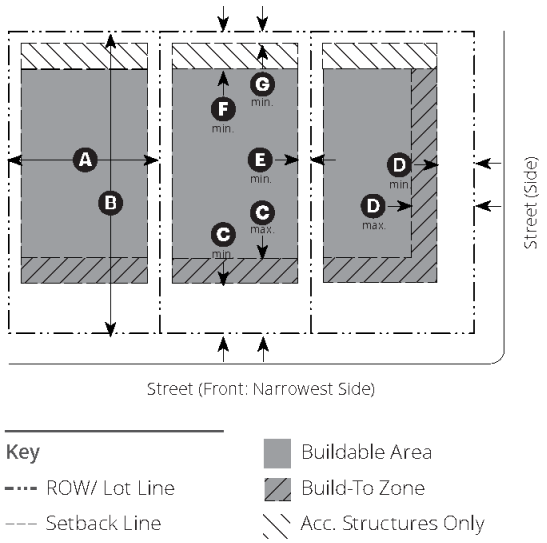
Lot Size		RN1	RN2
Area		6,000 sf min.	5,000 sf min
Width	A	60' min.	40' min.
Depth	B	90' min.	90' min.
RN minimum lot area, lot width, and lot depth requirements shall be waived if in compliance with Section 17.40.670 and one of the following conditions are met: • The site has access to a side street or improved alley. • The width of the primary structure's main body is at least 18 feet wide, and the highest roofline of the primary structure does not exceed a ratio of 1.0 horizontal to 1.5 vertical.			

5. **Building Placement.**

Setback		RN1	RN2
Front (Build-To Zone)	C	20' min.; 30' max.	10' min.; 25' max
Side Street (Build-To Zone)	D	15' min.; 25' max.	5' min.; 15' max.
Side	E	5' min.	5' min.
Rear			
Main Building	F	15' min.	15' min.
Accessory Structure(s)	G	5' min.	5' min.
Build-to shall align with the contextual setback (see Section 17.12.030.c(3)) when (1) the lot depth beyond the contextual setback is equal to or greater than the minimum lot depth required of the district or (2) the contextual setback is less than the build-to zone maximum. Otherwise, the build-to zone maximum is used.			
Facade Zone		**RN1**	**RN2**
Main building shall define required % of the linear length of the Front Build-To Zone		50% min.	50% min.
Main building shall define required % of the linear length of the Side Street Build-To Zone		30% min.	30% min.
Encroachments into Setbacks			
Private Frontage Types may encroach into front and side street setbacks; and shall not be located in side or rear setbacks.			
Architectural features may encroach up to 3 feet toward shared interior property lines, and up to 5 feet in all other building setbacks. Architectural features cannot cross property lines.			
Fences, freestanding landscape walls, shrubs, and landscaping may encroach up to 3 feet into front or side street setbacks; and are allowed within side and rear setbacks.			
Stormwater features may encroach into setbacks.			
Encroachments are not allowed within utility easement area, ROW, alley, or across a property line.			

Landscape Buffer
See Table 17.24.230 for landscape buffer yard requirements.
Landscape buffer yards within RN vary by building type.
No landscape buffer yard is required between properties zoned RN, regardless of building type.
No landscape buffer yard is required between properties zoned RN and RL.

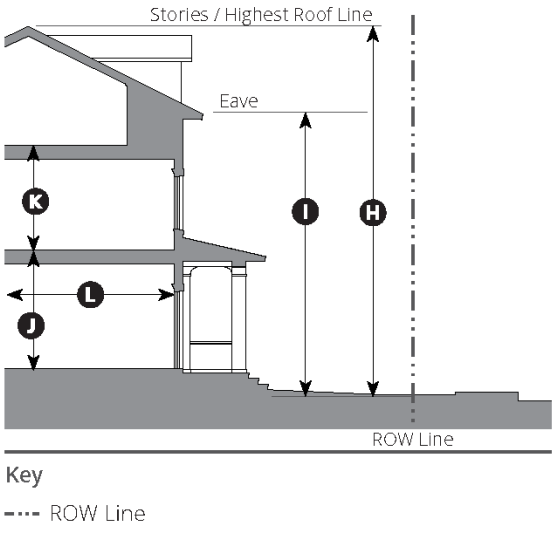
Figure: 17.38.010.A(1). For A, B, C, D, E, F, and G see lettered sections in 17.38.010.A Table 4 and Table 5 for minimum and maximum requirements.



6. **Building Form.**

Height		**RN1**	**RN2**
Main Building			
Stories		2.5 max.	3 max.
See Section 17.38.020 for additional height standards. Building type standards may further limit height. Height shall be measured from the average grade plane post-development.			
Highest Roof Line (H)	H	Maximums are set by building type.	
Highest Eave (I)	I		
Accessory Structure(s)			
Stories		2 max.	2 max.
Highest Roof Line		30' max.	30' max.
Highest Eave		24' max.	24' max
Floor-to-Floor		**RN1**	**RN2**
Ground Floor	J	9' min.	9' min.
Upper Floors	K	8' min.	8' min
Ground Floor Residential or Active Space		**RN1**	**RN2**
Depth of active ground floor use along front and side street façade	L	10' min.	10' min.
Coverage		**RN1**	**RN2**
Building Coverage		0.4 max.	0.5 max.
See Section 17.28 for Environmental Performance Standards.			

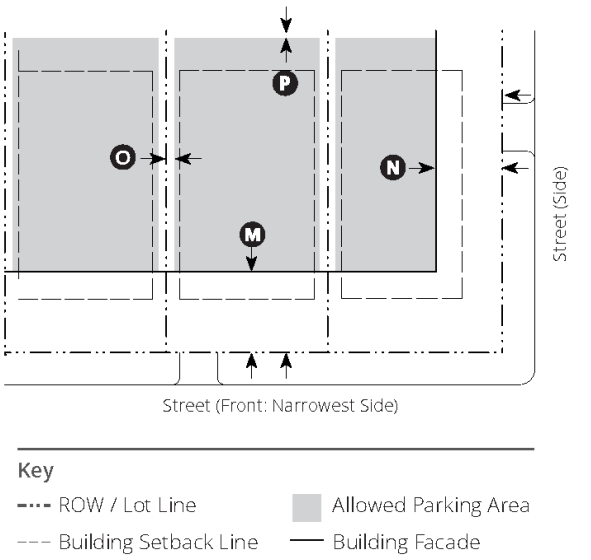
Figure: 17.38.010.A(2). For H, I, J, K, and L, see lettered sections in 17.38.010.A Table 6 for minimum and maximum requirements.



7. **Parking Location.**

Setback		**RN1**	**RN2**
Front	M	10' behind facade	10' behind facade
Side Street	N	10' behind facade	10' behind facade
Side	O	3' min.	3' min.
Rear	P	3' min.	3' min.
Dimensional Standards			
15 feet maximum width for driveway curb cuts; unless required to be wider by the fire department.			
Driveway curb cuts along an alley may be greater than 12 feet in width.			
Parking shall meet the dimensional standards set forth in Section 17.20.060 of the Metropolitan Code.			
Parking lot perimeter screening and interior planting requirements per Sections 17.24.140 and 17.24.160.			

Figure: 17.38.010.A(3). For M, N, O, and P, see lettered sections in 17.38.010.A Table 7 for requirements.



(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.010.B Residential Limited.

1. **Intent.** Intended for residential development, generally in the form of houses, townhouses, or small apartment buildings, with private or shared open space. This district is appropriate for providing moderate levels of density at strategic locations close to transit corridors.

2. **Zones.**

Zones	Context
Residential Limited 1 (RL1)	Suburban
Residential Limited 2 (RL2)	Urban
Residential Limited 3 (RL3)	Center

3. **Allowed Building Types.**

Allowed Building Types	Eligible for Voluntary Attainable Housing Incentive
Single Family	No
Two Family	No
Townhouse	Yes
House Court	No
Townhouse Court	Yes
Plex House	Yes
Manor House	Yes
Multiplex	Yes
Low-rise Courtyard Flats	Yes
Low-rise Flats (RL3 only)	Yes

Note 1: Detached Accessory Dwelling Units allowed with Single Family Building Types with conditions from Section 17.16.30.G, except for lot area, height, and setbacks, which are regulated by this chapter.

Note 2: Not-owner occupied Short Term Rentals are prohibited. Owner-occupied Short Term Rentals allowed with Single Family Building Type only per Section 6.28.30.

Note 3: Non-residential uses are permitted per Table 17.08.030 and are subject the bulk standards for R6 in Table 17.12.020B.

4. **Lot.**

Lot Size		RL1	RL2	RL3
Area		5,000 sf min.	5,000 sf min.	5,000 sf min.
Width	A	50' min.	40' min.	40' min.
Depth	B	90' min.	90' min.	90' min.
Minimum lot area, lot width, and lot depth requirements shall be waived if in compliance with Section 17.40.670 and one of the following conditions are met: • The site has access to a side street or improved alley. • The width of the primary structure's main body is at least 18 feet wide, and the highest roofline of the primary structure does not exceed a ratio of 1.0 horizontal to 1.5 vertical.				

5. **Building Placement.**

Setback		RL1	RL2	RL3
Front (Build-To Zone)	C	10' min.; 25' max.	10' min.; 25' max.	5' min.; 15' max.
Side Street (Build-To Zone)	D	10' min.; 25' max.	10' min.; 20' max.	5' min.; 15' max.
Side	E	5' min.	5' min.	5' min.
Rear				
Main Building	F	10' min.	10' min.	10' min.
Accessory Structure(s)	G	5' min.	5' min.	5' min.
Setbacks should align with the contextual setback (see Section 17.12.030.c(3). If the contextual setback is greater than the max setback for the district, then the district max shall apply.				
Facade Zone				
Main building shall define required % of the linear length of the Front Build-To Zone		50% min.		
Main building shall define required % of the linear length of the Side Street Build-To Zone		30% min.		
Encroachments into Setbacks				
Private Frontage Types may encroach into front and side street setbacks; and shall not be located in side or rear setbacks.				
Architectural features may encroach up to 5 feet into building setbacks. Architectural features cannot cross property lines.				
Fences, freestanding landscape walls, shrubs and landscaping may encroach up to 3 feet into front or side street setbacks; and are allowed within side and rear setbacks.				
Stormwater features may encroach into setbacks.				
Encroachments are not allowed within utility easement area, ROW, alley, or across a property line.				
Landscape Buffer				
See Table 17.24.230 for landscape buffer yard requirements.				
No landscape buffer yard is required between properties zoned RN and RL.				

Figure: 17.38.010.B(1). For A, B, C, D, E, F, and G see lettered sections in 17.38.010.B Table 4 and Table 5 for minimum and maximum requirements.

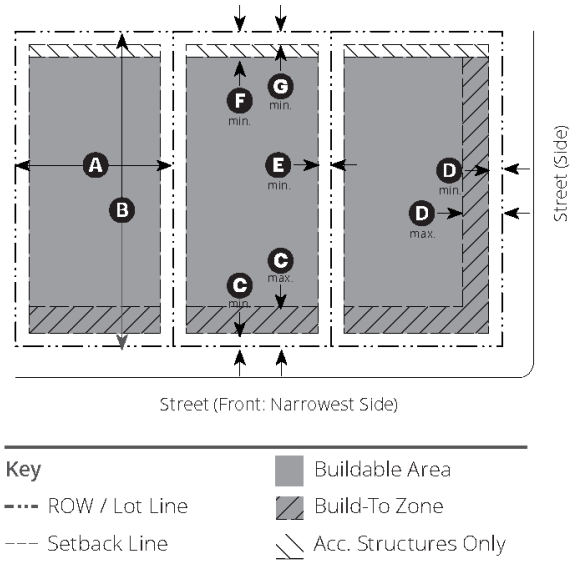


Figure: 17.38.010.B(2). For H, I, J, K, and L, see lettered sections in 17.38.010.B Table 6 for minimum and maximum requirements.

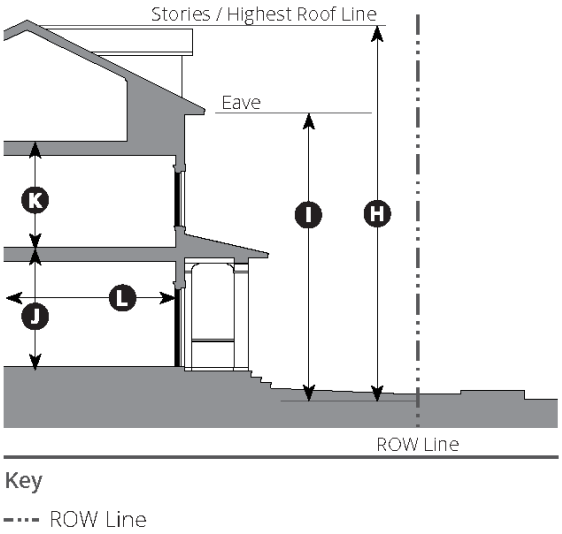


6. **Building Form.**

Height		**RL1**	**RL2**	**RL3**
Main Building				
Stories		2.5 max.	3 max.	4 max.
See Section 17.38.020 for additional height standards. Building type standards may further limit height. Height shall be measured from the average grade plane post-development.				
Highest Roof Line (H)	H	Maximums are set by building type.		
Highest Eave (I)	I			
Accessory Structure(s)				
Stories		2 max.	2 max.	2 max.
Highest Roof Line		30' max.	30' max.	30' max.
Highest Eave		24' max.	24' max.	24' max.
Floor-to-Floor		**RL1**	**RL2**	**RL3**
Ground Floor	J	9' min.	9' min.	9' min.
Upper Floors	K	8' min.	8' min.	8' min.
Ground Floor Residential or Active Space		**RL1**	**RL2**	**RL3**
Depth of active ground floor use along front and side street façade	L	10' min.	10' min.	10' min.
Coverage		**RL1**	**RL2**	**RL3**
Building Coverage		0.6 max.	0.6 max.	0.6 max.
See Section 17.28 for Environmental Performance Standards.				

7. **Parking Location.**

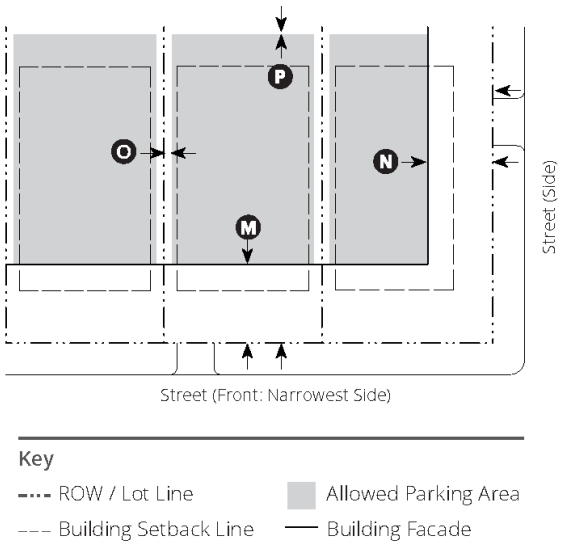
Setback		RL1	RL2	RL3
Front	M	10' behind facade	10' behind facade	10' behind facade
Side Street	N	10' behind facade	10' behind facade	10' behind facade
Side	O	3' min.	3' min.	3' min.
Rear	P	3' min.	3' min.	3' min.
Dimensional Standards				
15 feet maximum width for driveway curb cuts; unless required to be wider by the fire department.				
Driveway curb cuts along an alley may be greater than 12 feet in width.				
Parking shall meet the dimensional standards set forth in Section 17.20.060 of the Metropolitan Code.				
Parking lot perimeter screening and interior planting requirements per Sections 17.24.140 and 17.24.160.				

8. **Voluntary Attainable Housing Incentive (RL).** Buildings that comply with the requirements of the voluntary housing incentive program, as approved by Ordinance No. BL2025-1008, including any amendments, and the attainable housing requirements of Table 17.38.010.B-1 are eligible for incentives listed in Table 17.38.010.B-1. All units must be built and maintained to uniform standards in design, construction, and operations. Income-qualified units must be comparable to unrestricted units. All other District and Building Type standards apply.

Table 17.38.010.B-1

(a) Attainable Housing Requirements			
		Option 1	Option 2
Set-aside	Percentage of units within the building	10%	5%
Income qualification	Maximum % of AMI of residents	80%	60%
(b) Building Form and Parking Incentives			
Height	Additional stories	2 max.	
Units	No maximum unit count		
Parking	No parking required for income-qualified units		

Figure: 17.38.010.B(3). For M, N, O, and P, see lettered sections in 17.38.010.B Table 7 for requirements.



(Amdt. C to Ord. BL2025-1005 § 1(Exh. F), 2025; Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.010.C Administration.

1. **Design sites.** Multiple building types may be accommodated on a single parcel with a showing that each building can accommodate a lot that meets the requirements of the zoning district. See Table 17.38.010.C-1. The planning department may require subdivision for large or complex sites where right of way or public utility infrastructure is necessary for the public welfare.

Application for a design site shall be made with the Planning Department before submitting a final site plan to the Codes Department. Such application shall include a plan showing building, lot, and open space layouts, any public dedications and reservations as required by the Major and Collector Street Plan, and the provisions of the base zoning requirements requested to be modified.

2. **Dedications.** When a right-of-way dedication is required for an existing lot or parcel along an existing street, the minimum lot area shall be considered to be the area prior to the dedication. Sidewalks shall be constructed to the standard of the Major and Collector Street Plan or, if on a local street, to local street standards.

3. **Modifications.** Based on site-specific issues, modifications to the standards of 17.38.010 or 17.38.020 may be necessary. Any standard may be modified other than lot size, unit count, total building coverage, and land uses, insofar as the intent of the standard is being met; the modification results in better urban design for the neighborhood as a whole; and the modification does not impede or burden existing or future development of adjacent properties. Planning commission or planning department staff may approve modifications as follows:

A. The planning department staff may approve minor modifications, those containing deviations of 25 percent or less of a numerical standard or locational or access requirements in order to accommodate other life, health and safety requirements or to retain existing structures.

B. Major modifications, deviations of more than 25 percent, will be considered by the planning commission.

C. Application for a modification to the standards shall be made with the Planning Department before submitting a final site plan to the Codes Department. Such application shall include a plan showing building, lot, and open space layouts, any public dedications and reservations as required by the Major and Collector Street Plan, and the provisions of the base zoning requirements requested to be modified.

4. **Variances.** The zoning administrator shall include the recommendation of the planning department with any request for variance.

5. **Setbacks for Irregular Lots.** Wherever a lot is of such irregular shape that the setback provisions cannot be readily applied, the zoning administrator shall interpret the application of the setback provisions.

6. **Encroachment into Setbacks.**

A. Other permitted setback encroachments per Sections 17.12.040 and 17.38.030.

B. The zoning administrator may allow necessary adjustments to the build-to zone when existing utilities or utility easements are within the build-to zone and unusual circumstances require that the utilities cannot be relocated or easements reduced. Upon allowing an adjustment to the build-to zone, the zoning administrator may also allow adjustments to the rear setback and landscape buffer yard as authorized by Table 17.24.230, to provide for a necessary building area. The zoning administrator may allow necessary adjustments to the build-to zone, rear setback and landscape buffer yard based on the nature of the existing and future land uses and site conditions in the general vicinity after receiving a written recommendation from the planning department and any relevant department or agency.

Table 17.38.010.C-1: Example of Multiple Buildings on an Existing Lot

Step 1: Determine Applicability	
Multiple buildings are allowed on an existing lot only in the Residential Neighborhood (RN) and Residential Limited (RL) zoning districts. See Zoning Map to identify if applicable zoning districts apply to the development site.	Step 2: Apply Design Sites	
When siting multiple buildings on an existing lot, each existing lot shall be divided into hypothetical lots, or design sites, that meet the standards of the applicable zone district. Each design site is required to front onto the adjacent street. Where there are two adjacent streets, the design site(s) may front on either in compliance with the standards. Select only one primary building type for each design site from the allowed building types for the zoning district.	Step 3: Apply Building Types	
Apply a building type on each design site in compliance with the required setbacks and other standards of the Residential Neighborhood (RN) or Residential Limited (RL) zoning district, and applicable building type standards. Select and apply building frontage type(s) to each building/ unit entry.	Key Parcel Line — Design Site Line Principal Building — Accessory Building	

(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.A Purpose.

This Section sets forth standards for the development of individual design-based building types to achieve the intended physical character of each zone and provide for housing opportunities within neighborhoods. (Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.B Building Types.

1. Each lot shall have only one principal building type, except as follows:

A. The House Court and Townhouse Court may allow multiple units per Subsection 17.38.020.H (House Court) and Subsection 17.38.020.I (Townhouse Court).

B. More than one building type is allowed on a lot that identifies multiple design sites that meet the standards of the underlying zoning district and this Section. See Table 17.38.010.C-1 (Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.C Interpreting Standards.

1. When standards of the underlying zoning district and building type conflict, the most restrictive standard controls. If an attainability incentive is sought, the bonus is applied to the most restrictive standard.

2. Width and depth standards do not specify an orientation to the lot or street. (Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.D Definitions.

Architectural features: An exterior building element intended to provide ornamentation to the building massing, including, but not limited to, eaves, cornices, bay windows, window and door surrounds, chimneys, light fixtures, and balconies.

Lot: For the purposes of this section, lot includes lots as defined in Section 17.04.060, as well as design sites, as illustrated in Table 17.38.010.C-1.

Main Body: The primary volume or massing of a principal building, typically excluding projections like architectural features, attached garages, building frontage types, or secondary wings.

Secondary Wing: A structure that extends at least five feet from and is secondary to the main body of a principal building.

Townhouse: A small-to-large-sized, typically attached, building with a rear yard comprising of at least three townhouses placed side-by-side. Each townhouse consists of one unit, unless otherwise noted. This type is typically located within moderate-to-high intensity neighborhoods, or on or near a neighborhood's main street.

Townhouse, Lot: An individual parcel of land designated for a single townhouse dwelling unit within a run of attached units. Each lot typically includes the dwelling unit, private yard or open space (if applicable), and may share one or more side lot lines with adjoining townhouse lots through common walls.

Townhouse, Run: A series of individual, consecutive townhouses attached by a shared vertical wall, the number of which is determined by the zone. (Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.E Overview.

Table 17.38.020.E-1 (Building Types Overview) provides an overview of the allowed building types.

Table 17.38.020.E-1: Building Types Overview

Building Type	
	Single Family 17.38.020.F. A building consisting of one unit within a single-building, scaled to fit within lower-intensity neighborhoods. A detached accessory dwelling may be allowed.
	Two Family 17.38.020.F. A building consisting of two units within a single-building massing. This type has the appearance of a single-family home and is scaled to fit within lower-intensity neighborhoods.
	Townhouse 17.38.020.G. A small-to-large-sized, typically an attached building with a rear yard that consists of at least 3 Townhouses placed side-by-side. Each Townhouse generally consists of 1 unit. This type is typically located within moderate-to-high intensity neighborhoods, or on or near a neighborhood main street.
	House Court 17.38.020.H. A group of detached buildings arranged to define a shared court that is typically perpendicular to the street. The shared court is common open space and takes the place of a private rear yard. This type is scaled to fit within low-to-moderate-intensity neighborhoods and in non-residential contexts.
	Townhouse Court 17.38.020.I. A group of attached buildings arranged to define a shared court that is typically perpendicular to the street. The shared court is common open space and takes the place of a private rear yard. This type is scaled to fit within moderate-intensity neighborhoods and in non-residential contexts.

Building Type	
	Plex House 17.38.020.J. A detached building that consists of 3 to 6 side-by-side and/or stacked units, typically with one shared entry at the front and/or individual entries along the front or side. This type has the appearance of a single-family house in a single cohesive building form and is scaled to fit into low- to moderate-intensity neighborhoods.
	Manor House 17.38.020.K. A detached building that consists of 6 to 10 side-by-side and/or stacked units, typically with one shared entry and sometimes secondary individual entries at the front or side. This type features a single cohesive building form and is scaled to fit within moderate-intensity neighborhoods or as a small portion of lower-intensity neighborhoods.
	Multiplex 17.38.020.L. A detached building that consists of 10 to 25 side-by-side and/or stacked units, typically with one shared entry and sometimes secondary individual entries at the front or side. This type is scaled to fit within moderate-intensity neighborhoods and/or to transition between low-intensity neighborhoods to corridors.
	Low-rise Courtyard Flats 17.38.020.M. A building that consists of 10 to 25 side-by-side and/ or stacked units, accessed from one or more shared courtyards. The shared court is common open space and takes the place of a rear yard. Shared entries and/or individual entries are accessed off the court or front street. This type is scaled to fit within moderate-intensity neighborhoods and/or to transition between low-intensity neighborhoods to corridors.
	Low-rise Flats 17.38.020.N. A building that consists of stacked units. The building may be attached or detached from adjacent buildings. This type is intended to provide residential uses or a vertical mix of ground floor nonresidential and upper floor residential uses. This type is typically used to transition between moderate-intensity neighborhoods to corridors, or along corridors and in centers.

(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.F Single Family/Two Family.

A Two Family Side-by-Side with separate entrances.

A Single Family Home

A Two Family Stacked.

General Note: Photos on this page are illustrative, not regulatory.

1. **Description.**

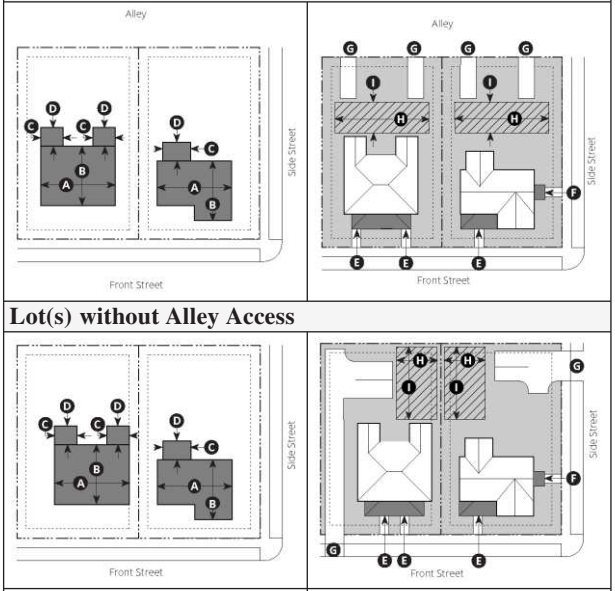
Single Family. A building consisting of one unit within a single-building, scaled to fit within lower-intensity neighborhoods. A detached accessory dwelling may be allowed.

Two Family. A building consisting of two units within a single-building massing. This type has the appearance of a medium-to-large single-family home and is scaled to fit within lower-intensity neighborhoods.

Figure 17.38.020.F(1). For A, B, C, and D see lettered sections in 17.38.020.F Table 3.

Figure 17.38.020.F(2). For E and F see lettered sections in 17.38.020.F Table 5. For G, see lettered section in 17.38.020.F Table 6. For H and I, see lettered section in 17.38.020.F Table 7.

Lot(s) with Alley Access



Lot(s) without Alley Access

2. **Number of Units.**

Units per Building	2 max.
Buildings per Lot	1 max.

3. **Building Size and Massing.**

Height			
Main Body	**RN1/RL1**	**RN2/RL2/RL3**	
Stories	2 stories max.	2.5 stories max.	
Height to Highest Roof Line	30' max.	35' max.	
Height to Highest Eave	24' max.	28' max.	
Secondary Wing(s)			
Stories	0.5 stories less than primary building		
Building Footprint			
Main Body			
Width	48' max.	48' max.	A
Depth	40' max.	40' max.	B
Secondary Wing(s)			
Width	15' max.	15' max.	C
Depth	25' max.	25' max.	D
Each side of a building may have a maximum of one secondary wing and a maximum of two secondary wings along the rear.			

4. **Allowed Frontage Types.**

Porch Projecting	17.38.030.D
Porch Engaged	17.38.030.E
Dooryard	17.38.030.F
Stoop	17.38.030.G

5. **Pedestrian Access.**

Principal Pedestrian Entrance		
Interior Lot	Front street	E
Corner Lot	Units on a corner may enter from the side street	F

6. **Vehicle Access and Parking.**

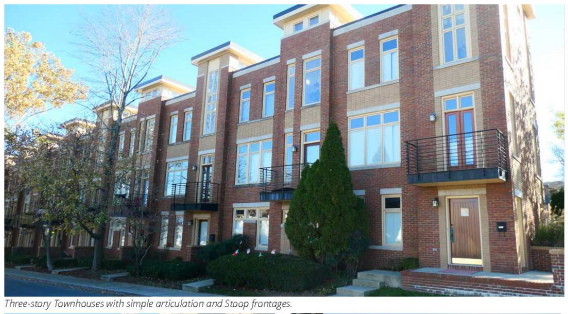
Access	G
Maximum of 1 driveway curb cut every 75 feet of street frontage.	
If alley is present, parking shall only be accessed from alley.	
If side street is present but no alley, parking shall be accessed only from side street.	

7. **Common Open Space.**

Width	15' min.	H
Depth	15' min.	I
Common Open Space requirement may be substituted with two 8' × 15' private open spaces.		
Required front and side street setbacks shall not be included in the minimum open space area calculation.		
Driveways and parking are not allowed within a required open space.		
Required open space shall be located behind the main body of the building.		

(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.G Townhouse.



Three-story Townhouses with simple articulation and Stoop frontages.

Townhouses with minimal separations between them.

Townhouses with a Stoop frontage type.

General Note: Photos on this page are illustrative, not regulatory.

1. **Description.** A small-to-large-sized, typically an attached, building with a rear yard that consists of at least three Townhouses placed side-by-side. Each Townhouse generally consists of one unit. This type is typically located within moderate-to-high intensity neighborhoods, or on or near a neighborhood main street.

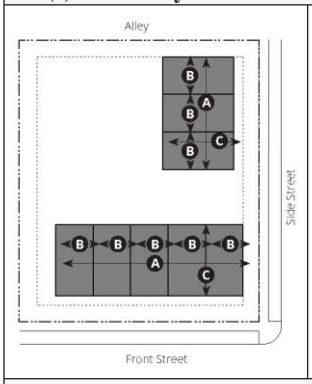
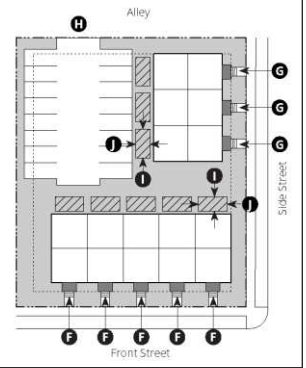
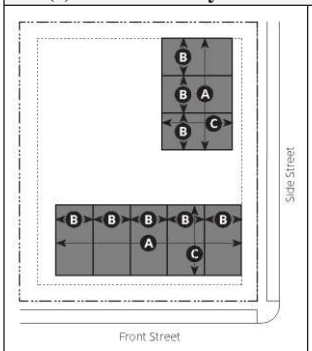
For F and G see lettered sections in 17.38.020.G Table 5. For H, see lettered section in 17.38.020.G Table 6. For I and J, see lettered section in 17.38.020.G Table 7.

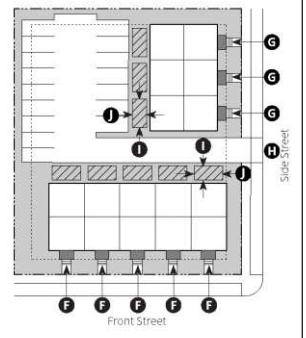
Lot(s) with Alley Access

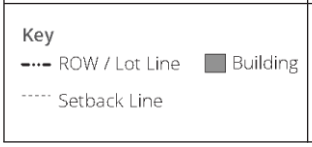


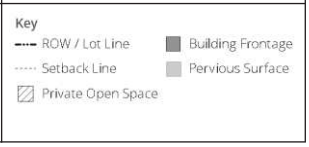


Lot(s) without Alley Access









2. Number of Units.

	RN1/RL1	RN2/RL2/RL3
Units per Townhouse	1 max.*	1 max.*
Townhouses in a Run	3 min.; 5 max.	3 min.; 8 max.
*One townhouse per run may consist of up to 3 stacked units.		

3. Building Size and Massing.

Height			
Main Body	**RN1/RL1**	**RN2/RL2/RL3**	
Stories	2.5 stories max.	3 stories max.	
Height to Highest Roof Line	35' max.	45' max.	
Height to Highest Eave	28' max.	35' max.	
Secondary Wing(s)			
Stories	0.5 stories less than primary building		
Building Footprint			
Main Body	**RN1/RL1**	**RN2/RL2/RL3**	
Maximum Width per Run	90' max.	160' max.	A
Townhouse Width	18' min.; 30' max.		B
Townhouse Depth	40' max.	40' max.	C
Secondary Wing(s)			
Width	75% of main body width max.		D
Depth	25' max.		E
Sides and rear of a building may have a maximum of one secondary wing. Secondary wings may not be used to attach buildings or units.			

4. Allowed Frontage Types.

Porch Projecting	17.38.030.D
Porch Engaged	17.38.030.E
Dooryard	17.38.030.F
Stoop	17.38.030.G

5. Pedestrian Access.

Principal Pedestrian Entrance		
Interior Lot	Front street	F
Corner Lot	Units facing a side street must enter from the side street	G
Ground floor units shall have an individual entry facing a street.		

6. **Vehicle Access and Parking.**

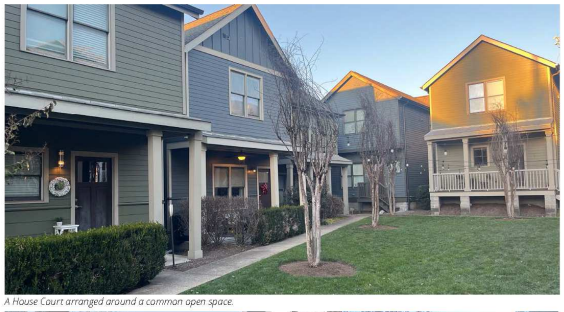
Access	H
Maximum of 1 driveway curb cut every 75 feet of street frontage.	
If alley is present, parking shall only be accessed from alley.	
If side street is present but no alley, parking shall be accessed only from side street.	

7. **Private Open Space.**

Width	8' min.	I
Depth	8' min.	J
Required front and side street setbacks shall not be included in the minimum private open space area calculation.		
Driveways and parking are not allowed within a required private open space.		
Required private open space shall be located behind the main body of each building.		

(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.H House Court.



A House Court arranged around a common open space.

A modern style House Court with a usable green space.

A two-story House Court along a set of connected green spaces.

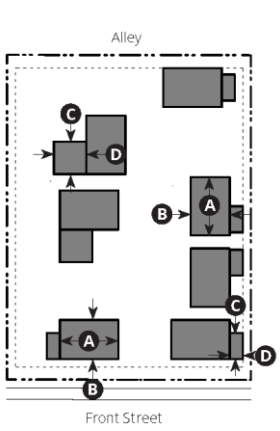
General Note: Photos on this page are illustrative, not regulatory.

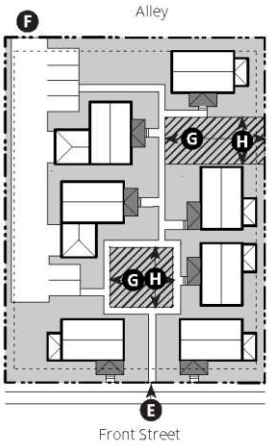
1. **Description.** A group of detached buildings arranged to define a shared court that is typically perpendicular to the street. The shared court is common open space and takes the place of a private rear yard. This type is scaled to fit within low-to-moderate-intensity neighborhoods and in non-residential contexts.

Figure 17.38.020.H(1). For A, B, C, and D, see lettered sections in 17.38.020.H Table 3.

Figure 17.38.020.H(2). For E, see lettered section in 17.38.020.H Table 5. For F, see lettered section in 17.38.020.H Table 6. For G and H, see lettered sections in 17.38.020.H Table 7.

Lot(s) with Alley Access





Lot(s) without Alley Access

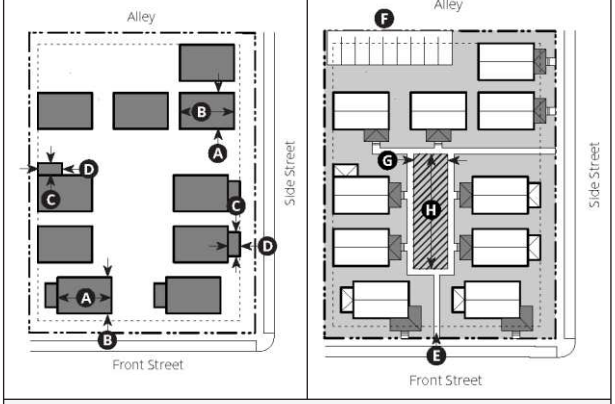
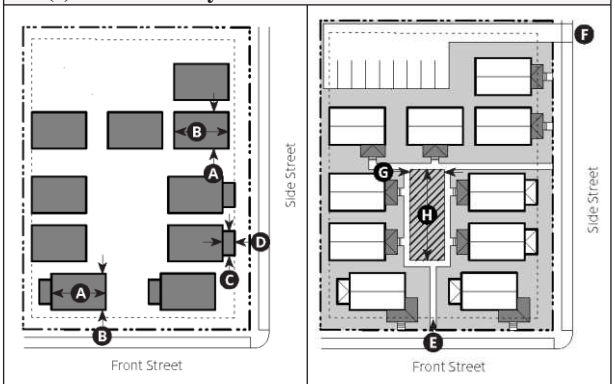
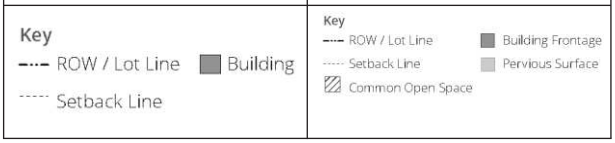
Lot(s) with Alley Access



Lot(s) without Alley Access





2. **Number of Units.**

Units per Building	1 max.*
Buildings per Lot	3 min.; 12 max.
*Up to one building in the House Court may have 2 units.	

3. **Building Size and Massing.**

Height		
Main Body	**RN1/RL1**	**RN2/RL2/RL3**
Stories	2 stories max.	2.5 stories max.
Height to Highest Roof Line	30' max.	35' max.
Height to Highest Eave	24' max.	28' max.
Secondary Wing(s)		
Stories	0.5 stories less than primary building	
Building Footprint		
Main Body		
Width	32' max.	A
Depth	24' max.	B
Secondary Wing(s)		
Width	20' max.	C
Depth	25' max.	D
Each building may have a maximum of one secondary wing along the side or rear.		

4. **Allowed Frontage Types.**

Porch Projecting	17.38.030.D
Porch Engaged	17.38.030.E
Dooryard	17.38.030.F
Stoop	17.38.030.G

5. **Pedestrian Access.**

Common open space shall be accessible from front street	E
Units on corner or along a side street may enter from either the common open space or side street.	
Units interior to the lot shall enter off the common open space or pedestrian passage.	
Units with frontage on a street shall provide an entry from that street.	
Pedestrian passages shall link all buildings to the public ROW, common open space, and parking areas.	
Pedestrian Passage Width	
For the first 30' from the front street	8' min.
After the first 30' in length	12' min.
Pedestrian passages shall include a 4' minimum width walkway to units and may include low landscaping and stormwater detention.	

6. **Vehicle Access and Parking.**

Access	Ⓕ
Maximum of 1 driveway curb cut every 75 feet of street frontage.	
If alley is present, parking shall only be accessed from alley.	
If side street is present but no alley, parking shall be accessed only from side street.	
Spaces may be individually accessible by the units and/or a common parking area located at the rear side of lot.	
Shared driveways allowed per access easements.	

7. **Common Open Space.**

Width	20' min.	Ⓖ
Depth	50' min.	Ⓗ
All common open spaces provided shall meet the minimum required dimensions.		
Required front and side street setbacks shall not be included in the minimum common open space area calculation.		
Driveways and parking are not allowed within a required common open space.		
50 percent of common open space may be used for storm-water management.		

(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.I Townhouse Court.

A Townhouse Court along a set of connected green spaces.

Townhouse Court along a set of connected green spaces.

Townhouse Court along a pedestrian passage.

General Note: Photos on this page are illustrative, not regulatory.

1. **Description.** A group of attached buildings arranged to define a shared court that is typically perpendicular to the street. The shared court is common open space and takes the place of a private rear yard. This type is scaled to fit within moderate-intensity neighborhoods and in non-residential contexts.

Figure 17.38.020.I(1). For A, B, C, D and E, see lettered sections in 17.38.020.I Table 3.

Townhouse Width	18' min.	30' max.	B
Townhouse Depth	40' max.	40' max.	C
Secondary Wing(s)			
Width	75% of main body width max.		D
Depth	25' max.		E
Sides and rear of a building may have a maximum of one secondary wing. Secondary wings may not be used to attach buildings or units.			

4. **Allowed Frontage Types.**

Porch Projecting	17.38.030.D
Porch Engaged	17.38.030.E
Dooryard	17.38.030.F
Stoop	17.38.030.G
Terrace	17.38.030.H
Terrace frontage only allowed when used to access multiple unit entrances on sloped sites.	

5. **Pedestrian Access.**

Common open space shall be accessible from front street		F
Units at the front of the lot shall provide an entry from front street.		
Units interior to the lot, shall enter off the common open space.		
The principal pedestrian entrance into each unit shall not be through a garage.		
Units on a corner may enter from the side street.		
Pedestrian passages shall link all buildings to the public ROW, Common Open Space, and parking areas.		
Pedestrian Passage Width		
For the first 30' from the front street	8' min. clear	
After the first 30' in length	12' min. clear	
Pedestrian passages shall include a 4' minimum width walkway to units and may include low landscaping and stormwater detention.		

6. **Vehicle Access and Parking.**

Access	G
Maximum of 1 driveway curb cut every 75 feet of street frontage.	
If alley is present, parking shall only be accessed from alley.	
If side street is present but no alley, parking shall be accessed only from side street.	

7. **Common Open Space.**

Width	20' min.	H
Depth	75' min.	I
Required front and side street setbacks shall not be included in the minimum common open space area calculation.		
Driveways and parking are not allowed within a required common open space.		
50 percent of common open space may be used for stormwater management.		

(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.J Plex House.

A Plex House uses a large projecting porch that all units may share.

A Plex House with a raised porch entry.

A Plex House with single ground floor entrance.

General Note: Photos on this page are illustrative, not regulatory.

1. **Description.** A detached building that consists of three to six side-by-side and/or stacked units, typically with one shared entry at the front and/or individual entries along the front or side. This type has the appearance of a single-family house in a single cohesive building form and is scaled to fit into low- to moderate-intensity neighborhoods.

Figure 17.38.020.J(1). For A, B, C, and D, see lettered sections in 17.38.020.J Table 3.

Figure 17.38.020.J(2). For E, F, and G, see lettered section in 17.38.020.J Table 5. For H, see lettered section in 17.38.020.J Table 6. For I and J, see lettered sections in 17.38.020.J Table 7.

Principal Pedestrian Entrance		E
Interior Lot	Front Street	
Corner Lot	Units on a corner may enter from the side street	
Each unit may have an individual entry.		F

6. **Vehicle Access and Parking.**

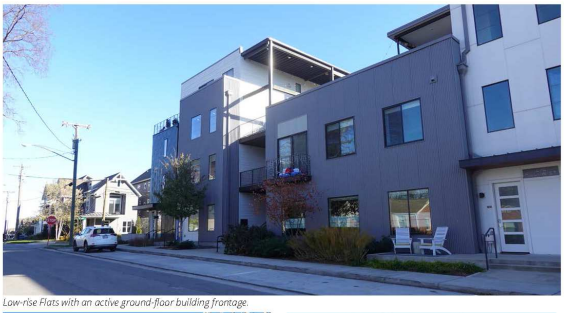
Access	G
Maximum of 1 driveway curb cut along street frontage.	
If alley is present, parking shall only be accessed from alley.	
If side street is present but no alley, parking shall be accessed only from side street.	

7. **Courtyard.**

Courtyard Width		H
Buildings up to 2 stories	25' min.	
Buildings more than 2 stories	35' min.	
Courtyard Depth		I
Buildings up to 2 stories	50' min.	
Buildings more than 2 stories	70' min.	
For determining size of courtyard, building height shall be measured at the highest story along courtyard.		
Courtyards shall open on a street or shall be connected to street with a pedestrian passage.		
Street facing facades over 90 feet in length shall be broken down with at least one courtyard along the street.		
Building shall define at least two walls of a courtyard.		
Side(s) of courtyard not defined by building may be defined by a 2'-6" to 6' tall wall, hedge, or fence with entry gate/ door, no greater than 36" in height.		
Shared courtyard(s) may be used for stormwater management if designed as integral site element (rain garden or bioswale) and does not visually detract from the frontage of each building facing the courtyard.		
Driveways and parking not allowed within a required courtyard.		

(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.020.N Low-rise Flats.



Low-rise Flats with an active ground-floor building frontage.

Low-rise Flats on a street corner.

Low-rise Flats on a street corner.

General Note: Photos on this page are illustrative, not regulatory.

1. **Description.** A building that consists of stacked units. The building may be attached or detached from adjacent buildings. This type is intended to provide residential uses or a vertical mix of ground floor nonresidential and upper floor residential uses. This type is typically used to transition between moderate-intensity neighborhoods to corridors, or along corridors and in centers.

Figure 17.38.020.N(1). For A, B, C, and D, see lettered sections in 17.38.020.N Table 3.	**Figure 17.38.020.N(2).** For E and F, see lettered section in 17.38.020.N Table 5. For G, see lettered section in 17.38.020.N Table 6. For H and I, see lettered sections in 17.38.020.N Table 7.

5. **Pedestrian Access.**

Principal Pedestrian Entrance		E
Interior Lot	Front Street	
Corner Lot	Units on a corner may enter from the side street	
Each unit may have an individual entry.		F

6. **Vehicle Access and Parking.**

Access	G
Maximum of 1 driveway curb cut along street frontage.	
If alley is present, parking shall only be accessed from alley.	
If side street is present but no alley, parking shall be accessed only from side street.	

7. **Common Open Space.**

Width	30' min.	H
Depth	30' min.	I
Common open space may be located in front of the building main body so long as it is fronted by the principal pedestrian entrance.		
Front, side street, and side setbacks may be included in common open space when the entire open space is treated as one contiguous entrance plaza.		
Driveways and parking are not allowed within a required common open space.		

(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.030.A Purpose.

This Section sets forth standards applicable to all frontages. Frontages are the components of a building that provide the transition and interface between the public realm (street and sidewalk) and the private realm (yard or building). (Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.030.B Frontage Types.

1. The names of the Frontage Types indicate their particular configuration or function and are not intended to limit uses within the associated building. For example, a porch may be used by non-residential uses as allowed by the zone.

2. Each building shall have at least one Frontage Type along each street frontage or along a civic space.

3. Frontage Types not listed in Item 4 (Allowed Frontage Types) of the building type are not allowed on that building type.

4. Each building may have multiple Frontage Types in compliance with the allowed types in Item 4 (Allowed Frontage Types) of each building type.

5. Each Frontage Type shall be located in compliance with the Building Placement standards of the zone.

6. Frontage Types may encroach into front and side street setbacks; and shall not be located in side or rear setbacks per Encroachments standards of the zone.

7. Standards in this Section are stated for the front of a lot and are to be adjusted for side street facades in compliance with the setbacks of the zone. (Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.030.C Overview.

Table 17.38.030.C-1 (Frontage Types Overview) provides a summary of the allowed Frontage Types.

Table 17.38.030.C-1 Frontage Types Overview

Frontage Type	
	**Porch Projecting 17.38.030.D.** The main facade of the building is set back from the front lot line with a covered structure encroaching into the front setback. The resulting setback area can be defined by a fence or hedge to spatially maintain the edge of the street. The Porch may be one or two stories, is open on three sides, with all habitable space located behind the building setback line.
	**Porch Engaged 17.38.030.E.** A portion of the main facade of the building is set back from the front lot line to create an area for a covered structure that projects from the facade that is set back. The resulting yard may be defined by a fence or hedge to spatially maintain the edge of the street. The Porch may be one or two stories and typically has two adjacent sides that are engaged to the building, while the other two sides are open.
	**Dooryard 17.38.030.F.** The main facade of the building is set back from the front lot line, which is defined by a low wall, hedge, or other allowed screening, creating a small private area between the sidewalk and the facade. Each Dooryard is separated from adjacent Dooryards. The Dooryard may be raised or at grade.
	**Stoop 17.38.030.G.** The main facade of the building is near the front lot line with steps to an elevated entry. The Stoop is elevated above the sidewalk to provide privacy along the sidewalk-facing rooms. Stairs or ramps from the Stoop may lead directly to the sidewalk or may be parallel to the sidewalk.
	**Terrace 17.38.030.H.** The main facade is at or near the front lot line with steps leading to an elevated area providing public circulation along the facade. This type is used to provide outdoor areas along the sidewalk for housing or to accommodate an existing or intended grade change for non-residential uses.

(Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

Depth of Recessed Entries	6' max.	C
Height of Dooryard Fence/ Wall above Finish Level	36" max.	D

3. **Pedestrian Access.**

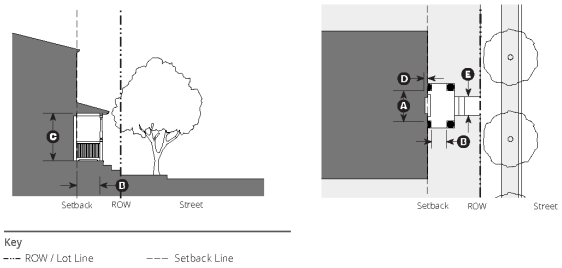
Walkway and Stair Width	3' min.	E

4. **Miscellaneous.** Each Dooryard shall provide access to only one ground floor entry. (Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.030.G Stoop.

General Note: Photos on this page are illustrative, not regulatory.

Figure 17.38.030.G(1). For A, B, and C, see lettered sections in 17.38.030.G Table 2. For D, see lettered section in 17.38.030.G Table 3.



1. **Description.** The main facade of the building is near the front lot line with steps to an elevated entry. The Stoop is elevated above the sidewalk to provide privacy along the sidewalk-facing rooms. Stairs or ramps from the Stoop may lead directly to the sidewalk or may be parallel to the sidewalk.

2. **Size.**

Width, Clear	5' min.	A
Depth, Clear	5' min.	B
Height, Clear	8' min.	C
Depth of Recessed Entries	6' max.	D

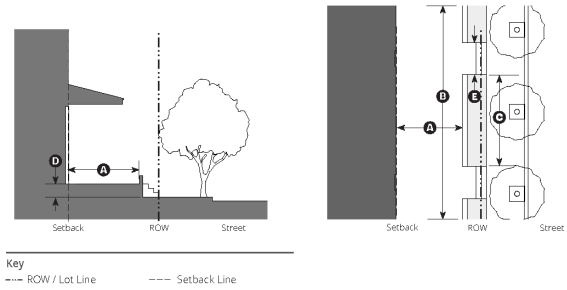
3. **Pedestrian Access.**

Walkway and Stair Width	3' min.	E

4. **Miscellaneous.** Entry doors are covered or recessed to provide shelter from the elements. All doors shall face the street. (Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

17.38.030.H Terrace.

Figure 17.38.030.H(1). For A, B, and C, see lettered sections in 17.38.030.H Table 2. For D, see lettered section in 17.38.030.H Table 3.



1. **Description.** The main facade is at or near the front lot line with steps leading to an elevated area providing public circulation along the facade. This type is used to provide outdoor areas along the sidewalk for housing.

2. **Size.**

Depth, Clear	8' min. residential 12' min. non-residential	A
Length of Terrace	150' max.	B
Distance between Stairs	50' max.	C
Height of Terrace above street level	24" max.	D

3. **Pedestrian Access.**

Walkway and Stair Width	3' min.	E

4. **Miscellaneous.** Where the Frontage Type requires the ground floor to be flush with the sidewalk, the Terrace shall be considered to be the sidewalk. A Terrace may be utilized to group several entries at a common elevation. Low walls used as seating are allowed. (Ord. BL2025-1005 § 1(Exhs. A, F), 2025)

Chapter 17.40

ADMINISTRATION AND PROCEDURES

Sections:

Article I. Zoning Administrator

17.40.010 Authority and responsibilities.
17.40.020 Board of zoning appeals support.

Article II. Official Zoning Map

17.40.030 Official zoning map established.
17.40.040 Zoning district boundaries.

Article III. Amendments to Zoning Code or Official Zoning Map

17.40.050 Authority.
17.40.055 Inclusionary housing incentive.
17.40.060 Applications.
17.40.070 Planning commission recommendation.
17.40.075 Submission of amendatory ordinances to the department of law.
17.40.080 Enactment.
17.40.090 Mapping of amendment.
17.40.100 Reapplications.
17.40.105 Specific plan—Purpose and intent.
17.40.106 Development plan.

Article IV. Overlay District Procedures

17.40.110 Generally.
17.40.120 Planned unit development (PUD) overlay.
17.40.130 Urban design overlay district.
17.40.140 Institutional overlay district.
17.40.150 Impact overlay district.
17.40.160 Neighborhood landmark (NL) district.

Article V. Site Plan Review and Approval

17.40.165 Applicability.
17.40.170 Final site plan.
17.40.175 Notice of final site plan.

Article VI. Board of Zoning Appeals

17.40.180 Powers.
17.40.190 Membership.
17.40.200 Terms of office.
17.40.210 Hearing required.
17.40.220 Assistance.
17.40.230 Conflict of interest.
17.40.240 Action by the board.
17.40.250 Time limits for permits.
17.40.260 Appeal of final site plan action.
17.40.270 Conditions.
17.40.275 Applicant.

Article VII. Special Exception Uses

17.40.280 Authority.
17.40.290 Applications.
17.40.300 Planning commission report.
17.40.310 Public hearing required.
17.40.320 Findings of fact.

Article VIII. Variances

17.40.330 Authority.
17.40.340 Limits to jurisdiction.
17.40.350 Applications.
17.40.360 Hearing required.
17.40.370 Review standards.
17.40.380 Special hillside exception.
17.40.390 Findings of fact.

Article IX. Historic Zoning Commission

17.40.400 Membership.
17.40.410 Powers and duties.
17.40.420 Preservation permit.
17.40.430 Moratorium for proposed historic overlay districts.

Article X. Tree Protection and Replacement Procedures

17.40.440 General.
17.40.450 Reserved.
17.40.460 General exemptions.
17.40.470 Tree removal permit procedures.
17.40.480 Off-site plantings.

Article XI. Sign Procedures

17.40.490 Permits and compliance tag.
17.40.500 Overall signage plan.
17.40.510 Unsafe, illegal, dilapidated and abandoned signs.

Article XII. Permits and Certificates of Compliance

17.40.520 Applicability.
17.40.530 Zoning permit application.
17.40.540 Final site plan authority.
17.40.545 Design-based multi-family design sites authority.
17.40.550 Permits within an historic overlay district.
17.40.560 Permits within the floodplain overlay district.
17.40.570 Permits within the airport overlay district.
17.40.580 Certificate of compliance.

Article XIII. Enforcement

17.40.590 Authority.
17.40.600 Notification.
17.40.610 Violations.
17.40.620 Penalties.
17.40.630 Remedies.

Article XIV. Nonconforming Uses, Structures, Lots and Signs

17.40.640 General.
17.40.650 Nonconforming uses.
17.40.660 Nonconforming structures.
17.40.670 Nonconforming lot area.
17.40.680 Nonconformance to operational performance standards.
17.40.690 Nonconforming signs.

Article XV. Public Notification

17.40.700 Applicability.
17.40.710 Notice by newspaper.
17.40.720 Notice by mail.
17.40.730 Public notice signs.

Article XVI. Application Fees

17.40.740 Generally.
17.40.750 Fees established by the zoning administrator.
17.40.760 Fees established by the planning commission.
17.40.770 Fees established by the board of zoning appeals.

Article XVII. Inclusionary Housing

17.40.780 Purpose and applicability of inclusionary housing provisions.
17.40.790 Requirements for inclusionary housing.
17.40.800 Standards for construction and occupancy of affordable and/or workforce housing.
17.40.810 Enforcement.
17.40.820 Sunset provisions.

Article I. Zoning Administrator

17.40.010 Authority and responsibilities.

The zoning administrator is granted the following authority and responsibilities by this title except as otherwise provided in the Metropolitan Code:

A. Interpretation and Administration. The zoning administrator shall interpret and administer the provisions of this Zoning Code;

B. Application Processing and Review. The zoning administrator shall process and review applications for all zoning permits and selected final site plans to insure compliance with the provisions of this title and with approvals granted by other departments, commissions and/or boards, as applicable;

C. Zoning Permits and Certificates of Compliance. The zoning administrator is authorized to issue zoning permits and to certify zoning compliance by the issuance of a certificate of compliance;

D. Enforcement of this Title. The zoning administrator shall enforce the provisions of this title;

E. Information and Advisement. The zoning administrator is responsible for informing and advising the general public regarding the provisions of this title;

F. Recordkeeping. The zoning administrator shall maintain current and permanent records relative to the adoption, amendment, administration and enforcement of this Zoning Code; and

G. Right of Entry Upon Land. The zoning administrator is authorized to enter upon any land within the jurisdiction of this title in fulfillment of all associated responsibilities and duties.

H. Construction, Application and Enforcement Consistent with Federal Law. The provisions of this title shall in every instance be construed, applied and enforced in a manner consistent with applicable federal law, including without limitation the Fair Housing Act ("FHA"), 42 U.S.C. § 3601 et seq.; the Americans with Disabilities Act ("ADA"), 42 U.S.C. § 12132 et seq.; and the Religious Land Use and Institutionalized Persons Act ("RLUIPA"), 42 U.S.C. § 2000cc et seq. Notwithstanding any other provision of this title to the contrary, the zoning administrator shall make reasonable accommodations in the provisions of this chapter and the rules, policies and practices of his office so that rights established or recognized under RLUIPA are protected and handicapped or disabled persons, or providers of housing for handicapped or disabled persons, are not discriminated against and are afforded an equal opportunity to use and enjoy dwellings. Before approving or denying a request for a reasonable accommodation under this chapter, the zoning administrator shall consult with the department of law and consider advice offered by any other metropolitan department having relevant jurisdiction or duties under the Metropolitan Charter or Code of Laws with respect to the request and any conditions that may be necessary to protect public health and safety.

I. Procedure for Obtaining Reasonable Accommodation.

1. For purposes of this section "person" shall mean an individual, group or institution. Any person who has a handicap or disability recognized by federal law, provides housing for such a person or whose religious exercise is burdened by a provision of this title, or a representative of any such person, may request in writing a reasonable accommodation as contemplated in this section. The right to request a reasonable accommodation shall be prominently displayed in the public area under the supervision of the zoning administrator and on the publicly accessible portion of any Internet website maintained by the metropolitan government and devoted to local codes enforcement and zoning matters. The zoning administrator shall make, and document in writing, specific findings of fact in support of every decision to grant or deny an accommodation sought under this paragraph and issue a determination within thirty days of the request being made. The zoning administrator's decision shall be reviewable by the board of zoning appeals upon the filing of a notice of appeal by any person or entity aggrieved by the decision. In addition, written notice of the zoning administrator's decision to grant or deny a reasonable accommodation shall be given to the council member whose district contains the parcel containing the reasonable accommodation and be mailed to all property owners within one thousand feet of the subject property within five business days of the zoning administrator's decision, and such notice must include information about the reasonable accommodation and the procedures to file a notice of appeal. Any appeal brought under this subsection must be in writing and filed with the board of zoning appeals not more than thirty days after issuance of the zoning administrator's decision. Documents comprising the record of any determination made with respect to the grant or denial of a request for an accommodation by the zoning administrator or the board of zoning appeals shall be kept on file for not less than three years from the date of final decision and available for public inspection upon reasonable notice.

2. The preceding paragraph shall not affect the existing procedures for initially requesting a demolition permit to demolish a structure listed or eligible for listing on the National Register of Historic Places or a structure meeting the criteria of T.C.A. § 7-51-1201 or structure within an historic overlay district. The procedures under Sections 16.28.190 and 17.40.410 shall continue to control the demolition of these historic structures except that the executive director of the historical commission and the historical commission shall make reasonable accommodations in the rules, policies, and practices of their offices concerning the demolition of historic structures so that handicapped or disabled persons or a provider of housing for a handicapped or disabled person are not discriminated against. They shall make, and document in writing, specific findings of fact in support of every decision to grant or deny an accommodation sought under this section. Their decisions shall be reviewable by the board of zoning appeals upon the filing of a notice of appeal by any person or entity aggrieved by the decision. Any appeal brought under this paragraph must be in writing and filed with the board of zoning appeals not more than thirty days after issuance of the their decision. Documents comprising the record of any determination made with respect to the grant or denial of a request for an accommodation by the executive director of the historical commission or the historical commission shall be kept on file for not less than three years from the date of final decision and available for public inspection upon reasonable notice.

3. The department of law shall advise the zoning administrator, the executive director of the historical commission, the historical commission and the board of zoning appeals concerning their duty to make reasonable accommodations for handicapped or disabled persons.

(Ord. BL2023-138 § 1, 2024; Ord. BL2022-1473 § 1, 2022; Ord. BL2022-1088 § 4, 2022; Ord. BL2012-313 §§ 1, 2, 2012; Ord. BL2008-333 § 1, 2009; Amdt. 3 with Ord. BL2000-364 § 1 (part), 2000; Ord. 96-555 § 10.1(A), 1997)

17.40.020 Board of zoning appeals support.

The zoning administrator is authorized by this title to provide support services to the board of zoning appeals and shall enforce all actions of that board. (Ord. 96-555 § 10.1(B), 1997)

Article II. Official Zoning Map

17.40.030 Official zoning map established.

The boundaries of zoning and overlay districts established by this title shall be depicted on the official zoning map of the Metropolitan Government of Nashville and Davidson County which is incorporated into the provisions of this title. The official zoning map shall be maintained by the metropolitan clerk. The metropolitan planning commission shall assist the metropolitan clerk in maintaining and updating the official zoning map. (Ord. 96-555 § 10.2(A), 1997)

17.40.040 Zoning district boundaries.

A. Zoning district boundaries depicted on the official zoning map shall be interpreted as follows:

1. Centerlines. Unless specified otherwise by the amending ordinance, district boundaries aligned along streets, alleys, controlled access highways, railroads,

watercourses, or pronounced topographic features shall be interpreted to fall along the centerlines of those features.

2. Lot or Deed Property Lines. District boundaries indicated on the official zoning map as approximately following platted lot lines or deeded property lines shall be interpreted as being coincident with those lines.

3. Uncertainties. In a case of uncertainty, the location of a district boundary shall be determined by the zoning administrator, subject to appeal to the board of zoning appeals.

B. Overlay district boundaries depicted on the official zoning map shall be interpreted as follows:

1. Overlay District Lines. Unless specified otherwise by the amending ordinance, overlay district boundaries indicated on the official zoning map that approximately follow zoning district lines shall be interpreted as being coincident with those zoning district lines.

2. Administrative Mapping Errors. Where it is determined that due to an administrative error, the official zoning map either depicts an overlay district boundary which encompasses property that was never intended to be included within the overlay district boundary or fails to depict property which was intended to be included within an overlay district boundary, and such determination is supported by official documentation, the planning commission shall modify the official zoning map for the metro clerk to accurately reflect the proper overlay district boundary. (Ord. 99-1756 §§ 1, 2, 1999; Ord. 96-555 § 10.2(B), 1997)

Article III. Amendments to Zoning Code or Official Zoning Map

17.40.050 Authority.

The metropolitan council may amend the text of this Zoning Code or the official zoning map in accordance with the following provisions. (Ord. 96-555 § 10.3(A), 1997)

17.40.055 Inclusionary housing incentive.

As an incentive to encourage developers and property owners to meet the affordable and workforce housing goals set forth in this title, all proposed residential development that seeks to increase development entitlements beyond that permitted by the current base zoning district shall comply with Section 17.40.780 (inclusionary housing). (Ord. BL2016-133 § 4, 2016)

17.40.060 Applications.

A. An application to amend the official zoning map to apply a planned unit development or urban design overlay district shall be filed with the metropolitan planning commission. All other applications to amend the official zoning map or these zoning regulations shall be filed either with the planning commission or the metropolitan clerk. An application may be initiated by the property owner, the metropolitan planning commission, or a member of the metropolitan council. All applications to amend the official zoning map filed with the metropolitan clerk shall be immediately forwarded to the planning commission and a copy sent to the metropolitan council office. No application initiated by a property owner or an agent of the property owner to amend the official zoning map or to apply a planned unit development, a neighborhood design overlay, or an urban design overlay to the property shall be accepted by the metropolitan planning commission or the metropolitan clerk if the metropolitan government has a valid lien on the property and/or if the property owner is delinquent in the payment of property taxes.

B. An application to amend the official zoning map of property owned by the metropolitan government may be initiated only by the mayor, the head of the department or agency to which the property is assigned, the director of public property administration, or the district member(s) of the metropolitan council representing the council district(s) where the property is located. If the application is initiated by the district council member, it must be accompanied by a preliminary report from the department or agency to which the property is assigned; and if such application is made on behalf of any board or commission, the application must first be authorized by a resolution of the board or commission. (Ord. BL2021-722 § 1, 2021; Ord. BL2005-713 § 1, 2005; Ord. BL2004-489 § 1, 2005; Amdt. 1 with Ord. BL2000-362 § 1, 2000)

17.40.070 Planning commission recommendation.

The planning commission shall review and make recommendations to the metropolitan council on proposed amendments to this Zoning Code and the official zoning map as provided in Section 18.02 of the Metropolitan Government Charter. A recommendation by the planning commission shall become null and void after a period of two years, unless superseded earlier by a subsequent recommendation. In its recommendation to the council, the planning commission shall provide an assessment of what effects a proposed zone change could have on the public school system and any street expected to carry twenty-five percent or more of the projected traffic in either the a.m. or p.m. peaks. (Ord. 96-555 § 10.3(C), 1997)

17.40.075 Submission of amendatory ordinances to the department of law.

All ordinances to amend the official zoning map or the Zoning Code shall be submitted to the metropolitan department of law for review at the time they are filed with the metropolitan clerk. The director of the department of law shall, no later than ten days prior to the date such ordinance is initially set for third reading before the metropolitan council, provide to each member of the metropolitan council and to the director of the council office an opinion as to whether or not the enactment of such ordinance may expose the metropolitan government to any liability for violation of federal, state or local law. (Amdt. 1 to Ord. BL2008-245 § 1, 2008; Ord. BL2008-245 § 1, 2008)

17.40.080 Enactment.

Enactment of an amendatory ordinance shall become effective in a manner consistent with the Metro Charter. Material testimony and evidence offered at public hearing may be considered by the council in its deliberations. Upon enactment of an amendment to this title, a notice of such shall be published in a newspaper of general circulation in Metropolitan Nashville and Davidson County within five days following such enactment announcing the new zoning classification and property affected. The change shall become effective on the date

of announcement. (Ord. 98-1268 § 1 (part), 1998; § 4(1) of Amdt. 1 with Ord. 96-555 § 10.3(D), 1997)

17.40.090 Mapping of amendment.

Upon enactment of an amendment to the official zoning map, the planning commission shall modify the map for the metro clerk accordingly, noting the amendatory ordinance number. (Ord. 96-555 § 10.3(E), 1997)

17.40.100 Reapplications.

A reapplication for the same or substantially same amendment to the official zoning map previously disapproved by the council shall not be accepted by the planning commission nor the metro clerk for a period of one year following council's last action. The council may reinitiate a rezoning bill at any time, however. (Ord. 96-555 § 10.3(F), 1997)

17.40.105 Specific plan—Purpose and intent.

The specific plan (SP) district is an alternative zoning process that may permit any land uses, mixture of land uses, and alternative development standards, of an individual property or larger area, to achieve consistency with the general plan. In return, a SP district requires the specific plan to be designed such that, at a minimum, the location, integration and arrangement of land uses, buildings, structures, utilities, access, transit, parking, and streets collectively avoid monotony, promote variety, and yield a context sensitive development. The specific plan cannot vary Section 17.40.055 (inclusionary housing incentive) and must comply with the building, fire and life safety codes adopted by the metropolitan government. (Ord. BL2016-133 § 5, 2016; Ord. BL2013-516 § 1, 2013; Amdt. 1 to Ord. BL2005-762, 2005; Ord. BL2005-762 § 7, 2005)

17.40.106 Development plan.

A. Pre-application Conference. Prior to the submittal of a rezoning application for the SP district, applicants are encouraged to meet with the executive director of the planning department or designee for guidance on the proposed development plan and its consistency with the principles and objectives of the general plan.

B. Application Submittal. An application shall be submitted by the property owner, the metropolitan planning commission, or a member of the metropolitan council and shall be accompanied by a development plan in a form and content established by the planning commission, along with all applicable processing fees. The development plan shall consist of written text, exhibits, and plans in a report format that describes existing conditions, the purpose and intent of the SP, the plan's consistency with the principles and objectives of the general plan, a list of allowable land uses, height and size of proposed building types, and development standards and a conceptual site plan, regulatory plan, or site-specific plan for the development. All items must be submitted, at the time of application, for the rezoning application to be deemed complete for review. Any omission of a required submittal item shall be identified, and its reason for omission explained in the development plan, including any application submittal waivers granted by the executive director of the planning department or designee.

C. Metropolitan Development and Housing Agency (MDHA) and/or Metro Historic Zoning Commission Action.

1. Any existing or proposed SP district located in whole or in part within a redevelopment district or a historic overlay district shall first be referred to and reviewed by MDHA and/or the metropolitan historic zoning commission for conformance with the relevant plan or guidelines. Any existing or proposed property for SP district which is, in whole or in part, listed on the National Register of Historic Places, identified as eligible for the National Register of Historic Places, or identified as worthy of conservation shall first be referred to and reviewed by the metropolitan historic zoning commission staff to determine the effects of the proposed SP district on the historic properties. Each agency shall provide a written recommendation to the planning commission on any aspects of the proposed SP district that would be in conflict with the adopted requirements, guidelines, or standards. Adoption of a SP district shall not relieve any property owner from full compliance with the adopted regulations and guidelines of the applicable redevelopment or historic overlay guidelines. Within a SP district, all development shall be consistent with the requirements of the SP district as well as any adopted redevelopment or historical overlay district, whichever is more restrictive.

2. Any existing or proposed SP district which includes existing or proposed property for SP district which is, in whole or in part, (i) listed on the National Register of Historic Places or (ii) identified as eligible for the National Register of Historic Places shall first be referred to and reviewed by the metropolitan historical commission staff to determine the effects of the proposed SP district on any historic properties. The MHC shall provide a written report to the metropolitan council regarding the effects of the proposed SP district on the historic properties.

D. Metro Planning Commission Action. The planning commission shall review a proposed SP district application for conformance and consistency with the development plan's stated purpose and intent and the

principles and objectives of the general plan. The planning commission shall act to provide a recommendation on the application. Within ten working days of an action, the commission's resolution shall be transmitted in writing to the applicant, the metro clerk, the zoning administrator and all other appropriate governmental departments.

E. Council Consideration. The metropolitan council shall consider an ordinance establishing a SP district and its associated development plan according to the procedures of Article III of this chapter (Amendments to the Official Zoning Map).

F. Changes to a SP District. An application to modify a SP district, in whole or in part, shall be filed with, and considered by, the planning commission according to the provisions of this section. The metropolitan council shall approve any proposed change in the geographic boundary of a SP district, the modification of specific performance criteria, development standards, land uses, development types or other requirements as shown, described, illustrated, identified, or noted on the last council-approved development plan. These changes shall be considered by the metropolitan council according to the procedures of Article III of this chapter (Amendments to the Official Zoning Map). That portion of a SP plan being amended by the metropolitan council shall adhere to all provisions of this code.

G. Final Site Plan. All final site plans shall conform to the SP development plan, and shall be submitted in conformance with Section 17.40.170.B. of this title. Approval shall be based on a finding that the final site plan conforms to the approved development plan. Where the development plan approved by the metropolitan council is of such detail for a specific land use, phase, or area of development that the submittal of a final site plan would essentially duplicate the applicable portion of the approved development plan, the executive director of the planning department or designee may waive the submittal of a final site plan. In such cases, an applicant shall proceed to the Codes Department and apply for all required construction permits.

H. Development Approvals and Permits. Approval of a SP district does not relieve a property owner of any subdivision plat, final site plan, building permit, or other metro department reviews and approvals. Except as specifically provided for in the individual SP ordinance, all development shall be undertaken in conformance with adopted departmental rules and procedures. Where specific amendments to departmental rules and procedures have been included in the adopted SP ordinance, all reviews and permits shall only be issued in conformance with the provisions of the approved SP development plan; however, no rule or procedure amendment shall be implemented if it would vacate or violate any federal or state requirement and all applications must fully comply with Chapter 15.64, "An Ordinance for Stormwater Management" as well as the adopted subdivision regulations.

I. Review of a Development Plan.

1. Authorization to Review. The metropolitan planning commission is authorized to review any SP, or portion thereof, to determine whether development activity has occurred within four years from the date of the latter of initial enactment, subsequent amendment, or re-approval by the metropolitan council, and, if determined inactive in accordance with subsection 4.a. of this section, to recommend legislation to the council to re-approve or amend the SP or rezone the property.

2. Initiation. Review of a SP or portion thereof to determine inactivity may be initiated by the metropolitan planning commission

a. On its own initiative,

b. By written request of a member of the metropolitan council, or

c. By written request of a property owner within the area of the SP requested for review.

d. Notice of Review. Within five business days of the initiation of a review, the planning commission shall send written notice to the district councilmember(s) for the district(s) in which the SP is located, to the zoning administrator, and to the owner(s) of property in the portion of the SP to be reviewed.

3. Metropolitan Planning Commission Procedure. Within ninety days from the initiation of its review, the planning commission shall hold a public hearing in accordance with the planning commission's adopted Rules and Procedures to concurrently consider if the SP or portion thereof should be classified as inactive and, if found inactive, provide a recommendation to the metropolitan council on legislation to re-approve or amend the SP or rezone the property.

a. Determination of Inactivity. To determine that a SP or portion thereof is inactive, the planning commission shall establish each of the findings below. The planning commission may also take into consideration the aggregate of actions, if any, taken within the prior twelve months to develop the portion of the SP under review.

i. Four or more years have elapsed since the latter of:

(1) The effective date of the initial enacting ordinance of the SP,

(2) The effective date of any ordinance approving an amendment to the SP,

(3) The effective date of any ordinance re-approving or amending a SP after it has been reviewed and decided in accordance with subsection 5.a. or b. of this section, or

(4) The deadline for action by the metropolitan council in accordance with subsection 5.d. of this section, and

ii. Construction has not begun on the portion of the SP under review; construction shall mean physical improvements such as, but not limited to, water and sewer lines, footings, and/or foundations developed on the portion of the SP under review; clearing, grading, the storage of building materials, or the placement of temporary structures shall not constitute beginning construction, and

iii. Neither right-of-way acquisition from a third party nor construction has begun on off-site improvement(s) required to be constructed by the metropolitan council as a condition of the SP approval.

b. Recommendation to Metropolitan Council. If the planning commission determines that the SP or portion thereof under review is inactive, the commission shall recommend legislation to the metropolitan council to re-approve or amend the SP or rezone the property, or portion thereof that is determined to be inactive. In recommending legislation, the planning commission shall:

i. Determine whether the existing SP is consistent with the goals, policies, and objectives of the General Plan and any applicable specific redevelopment, historic, neighborhood, or community plans adopted by the metropolitan government.

ii. Recommend legislation to re-approve or amend the SP or rezone the property, including as required:

(1) The appropriateness of the continued implementation of the development plan or phase(s) as adopted, based on current conditions and circumstances; and

(2) Any recommendation to amend the development plan or individual phase(s) to properly reflect existing conditions and circumstances, and the appropriate base zoning classification(s) should the SP district be removed, in whole or in part, from the property.

c. When Inactivity is Not Established. If the planning commission determines that the SP or portion thereof under review does not meet the criteria of Section 17.40.106.I.3.a. for inactivity, the SP review is concluded, the limitations of subsection 5. are terminated, and a re-review of the SP shall not be initiated in the manner of subsection 2. of this section for twelve months following the commission's determination.

4. Metropolitan Council Consideration. The procedures of Article III of this chapter (Amendments) shall apply to metropolitan council consideration of ordinance(s) to:

a. Re-approve the existing SP,

b. Amend the SP, or

c. Rezone the property.

d. Decline to take action by ordinance. If the metropolitan council does not act to re-approve or amend the SP or rezone the property within six months of receipt of the planning commission's recommended legislation, the property may be developed in accordance with the development plan last approved by the metropolitan council, or subsequently revised by the planning commission.

5. No specific plan application, grading permit, nor any building permit for new building construction shall be submitted, reviewed or issued within the SP or portion thereof for which a review has been initiated until the earlier of:

a. The metropolitan council's final action to re-approve or amend the SP or rezone the property, or

b. Six months following the planning commission's submission of a recommendation to the metropolitan council, or the deadline for that submission should the commission fail to act. (Ord. BL2019-1636 § 1, 2019; Ord. BL2016-266 §§ 2, 3, 2016; Amdt. 1 to Ord. BL2013-516 §§ 3, 6, 2013; Ord. BL2013-516 §§ 2—6, 2013; Amdt. 1 to Ord. BL2005-762, 2005; Ord. BL2005-762 § 7, 2005)

Article IV. Overlay District Procedures

17.40.110 Generally.

All overlay districts established by this title shall be made a part of the official zoning map in accordance with the procedures of Article III of this chapter. The following provisions shall apply to the administration of those overlay districts. (Ord. 96-555 § 10.4(A), 1997)

17.40.120 Planned unit development (PUD) overlay.

The following provisions apply to all planned unit development (PUD) districts. No zoning permits shall be issued within a PUD district prior to approval of a master development plan according to the procedures of this article and a final site plan according to the procedures of Article V of this chapter.

A. Master Development Plan. The development and use of all land within a planned unit development (PUD) district shall be in keeping with an approved master development plan and the applicable provisions of its associated zoning district(s).

1. Application Requirements. A master development plan application shall be submitted by the landowner (or an authorized agent) in form and content established

by the planning commission, along with a processing fee assessed according to schedules adopted by the planning commission. Within five business days from receiving a master development plan application, the planning commission shall send written notice to the district councilmember for the district(s) in which the property that would be subject to the master development plan is located as to the substance of the proposed development. The development concept of all land areas encompassed by a proposed master development plan shall be adequately described on scaled drawings and in associated reports. Applications shall define the general form and scope of proposed development in sufficient detail to demonstrate compliance with all development and performance standards of Chapter 17.36, Article II. At a minimum, the master development plan application shall adequately describe:

a. All land area to be encompassed by the planned unit development district and its associated master development plan;

b. The general orientation and size of principal structures and associated parking areas; development approaches to be employed to comply with Chapter 15.64, "An Ordinance for Storm Water Management"; landscape and buffer areas required by Chapter 17.24; the location, size and general treatment of environmentally sensitive areas as defined by Chapter 17.28; the general location and size of existing and proposed water mains and sewer trunk lines required to service the development; and general traffic routes (external and internal) to and from the development with major access points identified;

c. Tabular data sufficient to demonstrate compliance with all applicable provisions of this title, including the range and scope of proposed land uses, densities, floor area ratios or impervious surface ratios as applicable to development type; and land areas devoted to each type of general land use and phase of development;

d. A proposed development schedule if the project is to be phased; and

e. A traffic impact study if required by Section 17.20.140; identification of new streets and proposed improvements to existing streets, off-site utility systems or the drainage network considered necessary to support the proposed scope of development, with intended assignments of responsibility for providing those improvements.

2. Incomplete Applications. If the planning department determines that the application fails to satisfy the minimum requirements of an adopted submittal checklist, the applicant shall be notified in writing within ten working days that the application has been rejected, with the notification stating the reason(s) for rejection.

3. Written Report. The staff of the planning commission shall review all applications and submit a written report to the planning commission to serve as a basis for action. The report shall adequately describe the location, nature and scope of the proposed master development plan, and the manner in which the plan demonstrates conformance with the development and performance standards of Chapter 17.36, Article II and other applicable provisions of this title.

4. Planning Commission Action. The planning commission shall act to approve, conditionally approve, or disapprove a complete application. In its recommendation to the council, the planning commission shall provide an assessment of what effects a proposed planned unit development could have on the public school system and any street expected to carry twenty-five percent or more of the projected traffic in either the a.m. or p.m. peaks. Within ten working days of an action, the commission's resolution shall be transmitted in writing to the property owner, the metro clerk, the zoning administrator and all other appropriate governmental departments.

a. Approval. Approval of a PUD master development plan shall be based on findings that the performance standards of Chapter 17.36, Article II and all other applicable provisions of this title have been satisfied.

b. Conditional Approval. If the planning commission approves a master development plan subject to conditions, all conditions shall be transmitted in writing to the applicant. The application will not be considered approved until the applicant concurs with all conditions in writing and provides all prescribed amendments to the application.

c. Disapproval. If the planning commission acts to disapprove a master development plan application, the reasons for that disapproval shall be stated in writing and transmitted to the applicant.

5. Council Consideration. The metropolitan council shall consider an ordinance establishing a planned unit development (PUD) district and its associated preliminary master development plan according to the procedures of Article III of this chapter (Amendments). Testimony and evidence material to the standards of Chapter 17.36, Article II may be considered by the council in its deliberations.

6. Recording PUD District. Within sixty days of enactment of an adopting ordinance by the council, all property owners within the PUD district shall record with the register of deeds a boundary plat or suitably comparable document identifying that the affected properties are subject to the provisions of the PUD overlay district.

B. Final Site Plan. The planning commission shall process, review and act to approve, approve with conditions or disapprove a final site plan application for all properties within a planned unit development district according to the procedures of Article V of this chapter.

C. Final Approval by Stages. If so reflected on the master development plan, the planning commission may allow the staging of final development. Each phase of development shall adhere to all applicable provisions and standards of this title. If the provision of required infrastructure is to be phased, an implementation schedule and associated cost sharing formula may be required by the planning commission prior to or concurrent with the first phase of development.

D. Transfer of Ownership. Property may be subdivided in a manner consistent with a master development plan. All subdivision of property shall conform with the subdivision regulations of Nashville and Davidson County.

E. Common Open Space Maintenance. When provided, common open space shall be maintained subject to the following provisions:

1. Responsibility. Common open space areas shall be owned and maintained by an incorporated association for the mutual benefit of residents or property owners within the PUD district and shall be adequately described on a recorded plat of subdivision approved by the planning commission. All property owners within the PUD district shall be a member of the association which shall be responsible for the assessment of dues to cover the reoccurring costs of maintaining all common elements. Common open areas may be offered for dedication to the metropolitan government subject to approval by the planning commission and the metropolitan council.

2. Failure to Maintain. When the failure of an association to properly maintain a common open space results in a public nuisance, the zoning administrator is empowered to initiate appropriate measures to eliminate the nuisance. If public funds are utilized to remove a nuisance and/or maintain common open space, those costs shall be assessed proportionally against all properties within the development in the form of a tax lien. This provision shall not apply to any open space that has been dedicated to and accepted by the metropolitan government.

F. Changes to a Planned Unit Development District.

1. Modification of Master Development Plan. Applications to modify a master development plan in whole or in part shall be filed with and considered by the planning commission according to the provisions of subsection A of this section. If approved by the commission, the following types of changes shall require concurrence by the metropolitan council in the manner described:

a. Land area being added or removed from the planned unit development district shall be approved by the council according to the provisions of Article III of this chapter (Amendments);

b. Modification of special performance criteria, design standards, or other requirements specified by the enacting ordinance shall be authorized by council ordinance;

c. A change in land use or development type beyond that permitted by the specific underlying zoning district shall be authorized only by council ordinance; or

d. An increase in the total number of residential dwelling units above the number last authorized by council ordinance or, for a PUD district enacted by council ordinance after September 1, 2006, an increase in the total number of residential dwelling units above the number last authorized by council ordinance or above the number last authorized by the most recent modification or revision by the planning commission; or

e. When a change in the underlying zoning district is associated with a change in the master development plan, council shall concur with the modified master development plan by ordinance.

e.[f.] Any modification to a master development plan for a planned unit development or portion thereof that meets the criteria for inactivity of Section 17.40.120.H.4.a.

2. Changes to a Final Site Plan. Applications to modify a previously approved final site plan shall follow the procedures of Section 17.40.170.

3. Addition of a Special Exception Use. The addition or relocation of a special exception use otherwise permitted by the underlying base zone district shall be considered by the board of zoning appeals according to the applicable provisions of Chapter 17.16, Article III and Article VII of this chapter and may be approved upon consideration of a recommendation from the planning commission.

4. Subsequent Change in Zoning District. Following adoption of a PUD district, no subsequent change in zoning district classification shall occur within that PUD without concurrent reapproval of the master development plan by the planning commission and council.

5. Cancellation of a PUD District. Cancellation of a PUD district may be initiated by the planning commission, the metropolitan council, or a property owner within the PUD district. A PUD district shall be canceled by ordinance according to the provisions of Article III of this chapter.

G. Status of Earlier Planned Unit Developments (PUDs). The following provisions shall apply to a planned unit development (PUD) approved under the authority of a previous Zoning Code and remaining a part of the official zoning map upon the enactment of this title.

1. The planned unit development (PUD) shall be recognized by this title according to the master development plan and its associated conditions specified in the PUD ordinance last approved by the metropolitan council prior to the effective date of the ordinance codified in this title.

2. The planning commission may consider and approve minor modifications to a previously approved planned unit development subject to the following limitations. All other modifications shall be considered by the planning commission as an amendment to the previously approved planned unit development and shall be referred

back to the council for approval according to the procedures of Section 17.40.120(A)(5). That portion of a planned unit development master plan being amended by the council shall adhere to all provisions of this code:

a. In the judgment of the commission, the change does not alter the basic development concept of the PUD;

b. The boundary of the planned unit development overlay district is not expanded;

c. There is no change in general PUD classification (e.g. residential to any classification of commercial or industrial PUD; any change in general classification of a commercial PUD; or any change in general classification of an industrial PUD);

d. There is no deviation from special performance criteria, design standards, or other specific requirements made part of the enacting ordinance by the council;

e. There is no introduction of a new vehicular access point to an existing street, road or thoroughfare not previously designated for access;

f. There is no increase in the total number of residential dwelling units originally authorized by the enacting ordinance;

g. There is no change from a PUD approved exclusively for single-family units to another residential structure type;

h. The total floor area of a commercial or industrial classification of PUD shall not be increased more than ten percent beyond the total floor area last approved by the council;

i. If originally limited to office activities, the range of permitted uses in a commercial PUD shall not be expanded to broader classifications of retail, commercial or industrial activities, unless such activities are otherwise permitted by the underlying base zone district. The permitted uses within the planned unit development shall be those specifically authorized by the council through the adopted master development plan, or by the existing base zone district beneath the overlay, whichever is more permissive.

j. If originally limited to office, retail and other general commercial activities, the range of permitted uses in a commercial PUD shall not be expanded to include industrial activities, unless such activities are otherwise permitted by the underlying base zone district. The permitted uses within the planned unit development shall be those specifically authorized by the council through the adopted master development plan, or by the existing base zone district beneath the overlay, whichever is more permissive.

k. If originally limited to commercial activities, the range of permitted uses in a commercial PUD shall not be expanded to broader classifications of retail, commercial or industrial activities, unless such activities are otherwise permitted by the underlying base zone district. The permitted uses within the planned unit development shall be those specifically authorized by the council through the adopted master development plan, or by the existing base zone district beneath the overlay, whichever is more permissive.

l. In the determination of the commission, the nature of the change will have no greater adverse impact on those environmentally sensitive features identified in Chapter 17.28 of this code than would have occurred had the development proceeded in conformance with the previous approval.

m. In the judgment of the commission, the planned unit development or portion thereof to be modified does not meet the criteria for inactivity of Section 17.40.120.H.4.a.

3. Application of Code Standards.

a. Where modifications to a previously approved planned unit development are deemed to be minor, as determined under subsection (G)(2)(a) through (k) of this section, the parking and loading standards of Chapter 17.20, and the landscaping standards of Chapter 17.24 shall apply to all new development commencing under building permits issued after the effective date the ordinance codified in this chapter. All other chapters shall be applicable to the extent not inconsistent with the terms and conditions of the previously approved planned unit development.

b. Where modifications to a previously approved planned unit development are not deemed to be minor, as determined under subsection (G)(2)(a) through (k) of this section, all chapters of this code shall be applicable. Notwithstanding the foregoing, when legislation modifying the planned unit development is approved by the metropolitan council that expressly includes provisions that are not consistent with the chapters of this code, such express provisions shall govern however, the removal of any building, fire and life safety codes adopted by the metropolitan government shall be prohibited.

H. Periodic Review of Planned Unit Developments.

1. Authorization to Review. The metropolitan planning commission is authorized to review any planned unit development overlay district (PUD), or portion thereof, to determine whether development activity has occurred within six years from the date of the latter of initial enactment, subsequent amendment, or re-approval by the metropolitan council, and, if determined inactive in accordance with subsection 4.a. of this section, to recommend legislation to the council to re-approve, amend or cancel the PUD and make conforming changes to the base zoning if necessary.

2. Initiation. Review of a PUD or portion thereof to determine inactivity may be initiated by the metropolitan planning commission

a. On its own initiative,

b. By written request of a member of the metropolitan council, or

c. By written request of a property owner within the area of the PUD overlay requested for review.

d. Notice of Review. Within five business days of the initiation of a review, the planning commission shall send written notice to the district councilmember(s) for the district(s) in which the PUD is located, to the zoning administrator, and to the owner(s) of property in the portion of the PUD overlay district to be reviewed.

3. Metropolitan Planning Commission Procedure. Within 90 days from the initiation of its review, the planning commission shall hold a public hearing in accordance with the planning commission's adopted Rules and Procedures to concurrently consider if the PUD or portion thereof should be classified as inactive and, if found inactive, provide a recommendation to the metropolitan council on legislation to re-approve, amend or cancel the PUD and make conforming changes to the base zoning district if necessary.

a. Determination of Inactivity. To determine that a PUD or portion thereof is inactive, the planning commission shall establish each of the findings i. through iii. below. The planning commission may also take into consideration the aggregate of actions, if any, taken by the owner of the PUD within the prior 12 months to develop the portion of the PUD under review.

i. Six or more years have elapsed since the latter of

(1) The effective date of the initial enacting ordinance of the PUD,

(2) The effective date of any ordinance approving an amendment to the PUD,

(3) The effective date of any ordinance re-approving or amending a PUD after it has been reviewed and decided in accordance with subsection 5.a. or b. of this section, or

(4) The deadline for action by the metropolitan council in accordance with subsection 5.d. of this section, and

ii. Construction has not begun on the portion of the PUD under review; construction shall mean physical improvements such as, but not limited to, water and sewer lines, footings, and/or foundations developed on the portion of the PUD under review; clearing, grading, the storage of building materials, or the placement of temporary structures shall not constitute beginning construction, and

iii. Neither right-of-way acquisition from a third party nor construction has begun on off-site improvement(s) required to be constructed by the metropolitan council as a condition of the PUD approval.

b. Recommendation to Metropolitan Council. If the planning commission determines that the PUD or portion thereof under review is inactive, the commission shall recommend legislation to the metropolitan council to re-approve, amend, or cancel the PUD, or portion thereof that is determined to be inactive, including conforming changes to the base zoning district if necessary. In recommending legislation, the planning commission shall:

i. Determine whether the existing PUD is consistent with the goals, policies, and objectives of the General Plan and any applicable specific redevelopment, historic, neighborhood, or community plans adopted by the metropolitan government.

ii. Recommend legislation to re-approve, amend, or cancel the existing overlay district, including as required:

(a) The appropriate base zoning district(s), if different from current base zoning, to retain and implement the PUD overlay district as it exists.

(b) Any amendment(s) to the inactive PUD's master development plan and base zoning district(s) to reflect existing conditions and circumstances, including the land use policies of the general plan and the zoning of properties in the area.

(c) Base zoning district(s) consistent with the adopted general plan, should the PUD overlay district be recommended for cancellation.

Failure of the planning commission to act within 90 days from the initiation of a review shall be considered a recommendation to re-approve by ordinance the existing PUD overlay district without alteration.

c. When Inactivity Not Established. If the planning commission determines that the PUD or portion thereof under review does not meet the criteria of Section 17.40.120.H.4.a for inactivity, the PUD review is concluded, the limitations of subsection 5 are terminated, and a re-review of the PUD shall not be initiated in the manner of subsection 2 of this section for 12 months following the commission's determination.

4. Metropolitan Council Consideration. The procedures of Article III of this chapter (Amendments) shall apply to metropolitan council consideration of ordinance(s) to:

a. Re-approve the existing PUD master plan and apply the appropriate base zoning district(s), if different from current base zoning,

b. Amend the PUD master plan, or

c. Cancel the PUD overlay district, including any change(s) to the underlying base zoning district.

d. Decline to take action by ordinance. If the metropolitan council does not act to re-approve, amend, or cancel the PUD within six months of receipt of the planning commission's recommended legislation, the property may be developed in accordance with the master development plan last approved by the metropolitan council, or subsequently revised by the planning commission.

5. No planned unit development application, grading permit, nor any building permit for new building construction shall be submitted, reviewed or issued within the PUD overlay district or portion thereof for which a review has been initiated until the earlier of:

a. The metropolitan council's final action to re-approve, amend or cancel the PUD overlay district, or

b. Six months following the planning commission's submission of a recommendation to the metropolitan council, or the deadline for that submission should the commission fail to act. (Ord. BL2016-266 § 1, 2016; Amdt. 1 to Ord. BL2012-264 § 1, 2013; Ord. BL2012-264 § 1, 2013; Ord. BL2007-1367 §§ 1—3, 2007; Amdts. 1, 2 to Ord. BL2006-1051 § 1, 2006; Ord. BL2006-1051 § 1, 2006; Ord. BL2005-553 § 1, 2005; Ord. BL99-117 § 1 (part), 2000; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; § 4(2) of Amdt. 1 with Ord. 96-555 § 10.4(B), 1997)

17.40.130 Urban design overlay district.

A. Application for an Urban Design Overlay District. The applicable goals and objectives of a proposed urban design overlay district shall be established. An urban design overlay district application shall also include a detailed design plan and all associated design criteria required to implement that plan. The form and content of an urban design overlay district application shall be established by the planning commission. Applications shall be filed with the planning commission.

B. Planning Commission Recommendation. The planning commission shall review a proposed urban design overlay district application for conformance with the stated design goals and objectives. The planning commission shall act to recommend approval, approval with conditions or disapproval of the application. Within ten working days of an action, the commission's resolution shall be transmitted in writing to the applicant, the metro clerk, the zoning administrator and all other appropriate governmental departments.

1. Approval. Approval of a proposed urban design overlay shall be based on findings that the stated design goals and objectives have been satisfied.

2. Conditional Approval. The planning commission may recommend approval of an urban design overlay district application subject to any conditions deemed necessary to fulfill the goals and objectives. All conditions shall be transmitted in writing to the applicant. The application will not be considered approved until the applicant concurs with all conditions in writing and provides all prescribed amendments to the application.

3. Disapproval. If the planning commission acts to disapprove an application, the reasons for that disapproval shall be stated in writing and transmitted to the applicant.

C. Council Consideration. The metropolitan council shall consider an ordinance establishing an urban design overlay district and its associated design plan according to the procedures of Article III of this chapter (Amendments). All property owners within and proximate to a proposed urban design overlay district shall be notified according to the procedures of Article XV of this chapter. Testimony and evidence material to the standards of Chapter 17.36, Article VIII may be considered by the council in its deliberations.

D. Final Site Plan Approval. For property located within an urban design overlay district, a final site plan application shall be submitted for review and approval by the planning commission in a manner consistent with the procedures of Section 17.40.170B. Final site plan applications shall be of sufficient detail to fully describe the ultimate form of development and demonstrate full compliance with the design plan and all applicable design standards established by the overlay district. Final site plan approval by the planning commission shall be based on findings that all design standards of the overlay district and other applicable requirements of this code have been satisfied.

E. Changes to an Urban Design Overlay District. An application to modify an approved urban design overlay district shall be filed with the planning commission. The planning commission shall review all proposed changes according to the procedures of subsection B of this section. A proposed change in the geographic boundary of an urban design overlay district on the official zoning map shall be considered by the council according to the procedures of Article III of this chapter (Amendments). (Ord. 2001-856 § 1 (part), 2001; § 4(3) of Amdt. 1 with Ord. 96-555 § 10.4(C), 1997)

17.40.140 Institutional overlay district.

A. New Applications. An application to establish an institutional overlay district shall be filed with the planning commission in form and content established by the planning commission, and include a campus master development plan as defined in Chapter 17.36, Article IX. The application shall include properties owned by the institution that are nearby the proposed institutional

overlay district if existing or planned uses on those properties may have an impact on the residential area adjoining the proposed institutional overlay district.

B. Planning Commission Action. The planning commission shall review an application to apply the institutional overlay district and the associated campus master development plan. The planning commission shall act to recommend approval, approval with conditions or disapproval of the application Within ten working days of an action, the commission's resolution shall be transmitted in writing to the applicant, the metro clerk, the zoning administrator and all other appropriate governmental departments.

1. Approval. The planning commission's recommendation of approval of a proposed institutional overlay district and the associated campus master development plan shall be based on findings that the master plan is compatible with the surrounding neighborhood and the essential infrastructure is adequate to support the proposed pattern and intensity of development. A recommendation of approval of the master plan shall further require a finding by the planning commission that the master plan arranges campus-related land uses in a manner that preserves the integrity and long-term viability of nearby residential areas, and provides for methods of implementing the master plan in a manner that minimizes disruption and inconvenience to other landowners within the overlay district and the surrounding community in general.

2. Conditional Approval. The planning commission may recommend approval of the institutional overlay district and the associated campus master development plan subject to conditions. All conditions shall be transmitted in writing to the applicant. The institutional overlay district and associated campus master development plan shall not be considered recommended for approval until the applicant concurs with all conditions in writing and provides all prescribed amendments to the master plan and/or application.

3. Disapproval. If the planning commission recommends disapproval of the proposed institutional overlay district and associated campus master development plan, the reasons for that recommendation of disapproval shall be stated in writing and transmitted to the applicant.

C. Council Consideration. An institutional overlay district and associated campus master development plan shall be approved upon adoption of an ordinance by the metropolitan council, following a recommendation from the planning commission, according to the procedures of Article III of this chapter (Amendments). Testimony and evidence material to the provisions of Chapter 17.36, Article IX may be considered by the council in its deliberations.

D. Final Site Plan Approvals. A final site plan application for property lying within an institutional overlay district shall be reviewed and acted on by the planning commission according to the procedures of Section 17.40.170(B). Approval shall be based on a finding that the final site plan conforms with the approved campus master development plan and all other applicable provisions of this title.

E. Changes to an Institutional Overlay District. An application to modify an approved campus master development plan and/or institutional overlay district shall be filed with the planning commission. The planning commission shall review all proposed changes according to the procedures of subsection B of this section. Changes shall be considered as follows:

1. Minor Modifications. The planning director shall have the authority to grant minor modifications to the approved campus master development plan that do not exceed ten percent within the modification area of any square footage limitation, building setback, lot coverage, landscaping requirement, parking requirement, or dimensional requirement relating to fences or walls. At the planning director's discretion, any minor modification may be referred to the planning commission for review and action as set forth in Section 17.40.140(B).

2. Major Modifications. All other modifications to the institutional overlay district and approved campus master development plan shall be considered major modifications except that it shall not be considered a major modification to rearrange proposed campus buildings unless the rearrangement results in buildings being placed more than ten percent closer to the existing campus boundary or the overlay district boundary. Major modifications shall be considered by the metropolitan council in accordance with Article III of this chapter (Amendments), following review and recommendation by the planning commission as set forth in Section 17.40.140(B). (Ord. BL2003-1399 § 7, 2003; §4(4) of Amdt. 1 with Ord. 96-555 § 10.4(D), 1997)

17.40.150 Impact overlay district.

A. Amendment Procedures. Whenever the metropolitan council determines that an existing or a proposed and funded public facility, such as a freeway, may stimulate secondary land use changes that would be damaging to a broader community, special procedures shall be established and implemented in accordance with this article to apply to a specifically defined impact overlay district.

B. Procedures for Creation and for Abolishing Impact Overlay District.

1. An impact overlay district is a geographic entity of definite physical boundaries overlaying a previously established zoning district and any other zoning overlays in which the metropolitan council has determined that a public facility may introduce interest in zoning district changes that would have a deleterious secondary impact on other development or on a public facility.

2. Procedures for Adopting an Impact Overlay District. The metropolitan council by resolution, or the metropolitan mayor, may request the metropolitan planning commission, or the metropolitan planning commission on its own may initiate the identification of an impact area which may be subject to zoning district changes in the vicinity of a public facility that has one or more of the following characteristics: Existing; is proposed and funded and authorized; or its specific location is fixed by an adopted plan by a governmental body. Within sixty days from the receipt of such request or resolution and after conducting a public hearing in the area under consideration, the metropolitan planning commission shall submit to the metropolitan council a report regarding the proposed impact area containing either:

a. An unfavorable recommendation to the establishment of an impact overlay district; the report shall contain a justification for such recommendation in terms of the objective of this article and Article X of Chapter 17.36; or

b. A favorable recommendation shall contain a factual connection between the public facility and potentially damaging land use changes in terms of the objectives of this article and Article X of Chapter 17.36. The planning commission shall delineate a proposed impact overlay district that in its judgment will include all but not exceed the territory closely linked to the public facility.

Unless the metropolitan council grants an extension for a definite period of time, if after the sixty-day period the planning commission has not made a recommendation, the metropolitan council may proceed to delineate an impact overlay district and submit it by resolution to the metropolitan planning commission for a recommendation. The planning commission has thirty days after the effective date of the resolution to make a recommendation to the metropolitan council regarding the area proposed by resolution. If the planning commission does not make a recommendation within thirty days, the council may proceed as if the area had a favorable recommendation from the planning commission.

The adoption of an impact overlay district shall be by an amending ordinance in accordance with the applicable provisions of this chapter (Article III). The boundary of an adopted impact overlay district shall be placed by the metropolitan clerk directly on the official zoning map overlaying the existing zoned districts and overlays. Existing impact overlay districts may be amended through the same procedure.

3. Procedures for Abolishing an Impact Overlay District. The metropolitan council by resolution, or the metropolitan mayor may request the metropolitan planning commission, or the metropolitan planning commission on its own may initiate an evaluation of an adopted impact overlay district and a recommendation for its continuation or its discontinuation. Within sixty days from the receipt of such request or resolution, the metropolitan planning commission shall submit to the metropolitan council a report containing:

a. A recommendation action regarding the continuance or discontinuance of the impact overlay district; and

b. Factual evidence that the impact overlay procedure is ineffective and unnecessary and should be discontinued or is effective and necessary and should be continued.

If the planning commission fails to report within sixty days of an introduction of an amending ordinance to abolish an impact area, the council may proceed as if the commission has disapproved the abolishing of the impact overlay district.

C. Effect of an Impact Overlay District. Any proposed amendment to a zoning district or any zoning overlay within an adopted impact overlay district shall adhere to the procedures contained herein in addition to all other applicable provisions of this title.

D. Impact Overlay District Policies.

1. Within sixty days after the effective date of the adopted impact overlay district, the planning commission shall submit an impact area policy outlining the problems of the impact area, objectives pertaining to the resolution or management of such problems, and policies for the development of the impact area. The recommended impact area policy shall be consistent with the long-range, general comprehensive plan for Nashville-Davidson County. Upon consideration of the recommended policy, the metropolitan council may adopt by ordinance an impact overlay district policy as a part of this zoning title. The metropolitan council may amend the impact overlay district policy by ordinance after a recommendation by the metropolitan planning commission.

2. Within two weeks of the effective date of the adopted impact overlay district, the planning commission shall hold a public meeting in the area affected for the purpose of establishing a citizen participation procedure in the development of the recommended

impact area policy. Prior to submitting an impact overlay district policy to the metropolitan council, the planning commission shall hold at least one public hearing regarding such policy in the area affected. The metropolitan council shall hold a public hearing on the recommended policy in a manner similar to any other amendments to this title.

E. Procedure for Zoning District and Overlay Amendments within an Impact Overlay District. All amendments to the zoning districts and overlays specific to an impact overlay district shall be considered by the following procedure:

1. The metropolitan planning commission shall review the proposed zone change in terms of the adopted impact overlay district policy adopted by the metropolitan council; it shall report, in writing, to the metropolitan council the relevant neighborhood and community implications of the proposed zone change, the consistency of the proposed zone change with the impact overlay district policy, and provide its recommendation regarding the proposed zone change; and

2. The metropolitan council shall proceed to consider a proposed zone change in an impact overlay district in accordance with the applicable provisions of this title, except that it shall not adopt a zone change inconsistent with the or without an adopted impact overlay district policy. The adoption of a zoning amendment disapproved by the metropolitan planning commission shall not by itself be construed as acting inconsistent with the adopted impact overlay district policy. (Ord. 96-555 § 10.4(E), 1997)

17.40.160 Neighborhood landmark (NL) district.

The following provisions apply to all Neighborhood Landmark (NL) overlay districts.

A. Application Requirements. An application to establish a NL district shall be submitted by the property owner (or authorized agent) in form and content established by the planning commission, along with all applicable processing fees. The application shall be accompanied by a development plan consisting of scaled drawings, written text, and any reports necessary to demonstrate compliance with the purpose and intent of the NL district, to demonstrate how the proposal will protect the character of the district and neighborhood, and to ensure compatibility with surrounding uses. The application shall detail the following, as applicable:

1. The overall NL district boundary including underlying zoning districts;

2. How the proposed NL district meets the criteria for an NL district as described in Section 17.36.420 of the Zoning Ordinance, to be described in a written statement;

3. The location, orientation, and size of all existing and proposed structures, features and other elements and associated parking spaces;

4. The location of any structures on any property adjacent to the boundaries of the district;

5. The type, location, number, and size of all existing and proposed vegetation and landscaping;

6. The location, width, height, and type of any existing and proposed fence or wall;

7. The number, location, width, height, type and lighting of any existing or proposed sign(s);

8. The location of any accessory structures for refuse collection, recycling, or feature maintenance;

9. The existing and proposed location of any water mains and sewer lines required to serve the property;

10. The location of all existing and proposed access points, loading areas, and drive-thru lanes;

11. The location and name of all existing streets and alleys;

12. The anticipated traffic impacts of the proposed development, as documented in a traffic impact study or access study, if deemed necessary by Metro Public Works;

13. Tabular data identifying the specific existing and proposed uses and square footage; proposed densities; floor area ratios; impervious surface ratios; feature height(s); and parking spaces; and

14. A proposed development schedule.

B. Relationship to Other Requirements. Unless explicitly authorized otherwise by the approved NL District and development plan, all requirements and standards established by other chapters of this title, as a well as any other applicable metro, state or federal regulation, shall apply to the development and use of properties located within a NL district. All development within a NL district shall conform to Chapter 15.64, the "ordinance for storm water management" and the subdivision regulations. In case of conflict between the standards of this article and other chapters of this Zoning Code, the provisions of this article shall control.

C. Permitted Land Uses. All uses classified as a "A", "P" or "PC" by the underlying zoning district(s) shall be permitted within the NL district. Additional uses, including uses prohibited by the underlying zoning district(s), may be permitted subject to certain conditions as described in the development plan, provided they are determined by the planning commission to be compatible with, and sensitive to, abutting properties

and the overall neighborhood fabric and appropriate to preserve and maintain the district, and approved by the metropolitan council.

D. Alternative Design Standards. In addition to permitted uses, the approval of an NL district development plan may establish alternative design standards. A finding must be made that those standards would serve to enhance and provide a strong sense of place, permit the reasonable use of the property, and not impair the continued use and enjoyment of abutting properties in fulfillment of the land use policies of the general plan. Alternative design standards may be approved in lieu of otherwise applicable code provisions to the following provisions of this title.

1. Minimum lot area, maximum building coverage, setback and building height standards of Tables 17.12.020A, 17.12.020B, and 17.12.020C;

2. Street setback standards of Tables 17.12.030A and 17.12.030B provided any new setback does not conflict with any adopted major street plan as contained in the general plan;

3. Landscape buffer yard standards of Chapter 17.24;

4. Parking, loading, and access standards of Chapter 17.20; and

5. Sign regulations of Chapter 17.32.

E. Design Standards. To ensure compatibility of a NL district with surrounding uses and streetscape, the NL District development plan should adequately address the following design elements at a minimum:

1. Building Mass and Scale. The mass and scale of any new construction or alterations to a feature shall be consistent with the principal features, if any, on-site and in relation to existing and surrounding uses, buildings, structures, and streetscape.

2. Parking. The number of any required parking spaces shall be established recognizing any available on-street and alternative parking available in the area. New parking spaces shall be located so as not to disrupt the continuity of the existing neighborhood context, building rhythm, and streetscape. New parking spaces shall be located to the side and rear of the feature to the extent possible.

3. Lighting. Lighting shall be designed and located at a pedestrian scale consistent with pedestrian movements and the neighborhood. Lighting shall be concealed or shielded to avoid glare and off-site impacts on abutting properties. Lighting poles and fixtures shall be compatible with the function and design of the feature and abutting properties.

4. Signs. Any sign, where permitted as part of the development plan, shall be consistent with the context, scale, and character of the neighborhood and streetscape. The mass and scale of the feature and the neighborhood context shall be considered in any sign size and design to ensure appropriate sign proportions and sensitivity to surrounding properties.

5. Landscaping. Landscaping shall enhance and reinforce the distinguishing characteristics of the feature and appropriately buffer development within the district from adjacent properties.

F. Staff Recommendation. The staff of the planning commission shall review all applications to establish an NL district or amend an existing district and submit a written report to the planning commission to serve as a basis for action. The report shall adequately describe the location, nature, and scope of the proposed neighborhood landmark development plan, and the manner in which the plan demonstrates conformance with the development and performance standards of Chapter 17.36, Article XI and other applicable provisions of this title.

G. Metro Historic Zoning Commission Action. Any feature located within an historic overlay district, listed on the national register of historic places, or eligible for the national register of historic places, shall first be referred to and reviewed by the metropolitan historic zoning commission. The commission shall provide a written recommendation to the planning commission on any alterations proposed to the feature which would be subject to any applicable historical design review guidelines.

H. Planning Commission Action. The planning commission shall act to provide a recommendation on the application according to the procedures of Article III of this chapter (Amendments to the Official Zoning Map).

1. Findings for approval. In recommending approval of a neighborhood landmark district, the planning commission shall find that:

a. The feature is a critical component of the neighborhood context and structure;

b. Retention of the feature is necessary to preserve and enhance the character of the neighborhood;

c. Adaptive reuse, as described in the development plan, will facilitate protection and preservation of the identified feature;

d. The proposed use(s) in the development plan is compatible with and sensitive to abutting properties and the overall neighborhood fabric and appropriate to preserve and maintain the district; and

e. All other provisions of Chapter 17.36, Article XI; Section 17.40.160, and this title have been satisfied.

Absent a finding that the proposed feature meets all of the criteria for consideration, the planning commission shall recommend disapproval.

2. Conditions. The planning commission may recommend approval of a NL district and development plan subject to conditions. Conditions shall be adopted that serve to minimize or mitigate potential impacts of a proposed use or development on the neighborhood character and abutting properties, protect the continuity of the existing building rhythm and streetscape in the neighborhood, enhance the pedestrian realm, and/or to otherwise achieve the purpose and intent of the NL district as described in Chapter 36, Article XI of this title.

I. Council Consideration. The metropolitan council shall consider an ordinance establishing a NL district and its associated development plan according to the procedures of Article III of this chapter (Amendments to the Official Zoning Map).

J. Development Permits. All zoning, building and other land development permits shall only be issued in conformance with the provisions of the approved NL District development plan. For previously approved NL Districts that do not have an approved development plan and approved uses in place, no zoning permits, building permits or other land development permit of any kind that would alter the character of the district shall be issued within a NL district prior to approval of a neighborhood landmark development plan according to the procedures of this article and chapter. This provision shall not be intended to prevent the issuance of any permit necessary to stabilize any condition of imminent danger to life safety.

K. Changes to a Neighborhood Landmark District. Applications to modify a NL District and/or its associated development plan in whole or in part shall be filed with the planning department, and shall be submitted in accordance with the requirements of Section 17.40.160.A of this title. The planning executive director may waive specific application details or requirements as appropriate based on the type of modification proposed.

1. Amendments. The following types of changes shall be considered amendments to an NL district and require concurrence by the metropolitan council according to the provisions of Subsection I of this section:

a. Expansion or modification of the boundary of an existing NL district; and

b. Change in the use(s) or addition of new use(s) for an existing NL district with an approved development plan.

2. Existing NL Districts without an approved development plan. Submittal of a development plan to establish permitted uses for an existing NL district that lacks an approved development plan shall be considered an amendment to the district and shall require concurrence by the metropolitan council.

3. Revisions. All other modifications to an approved NL District and the associated development plan shall be considered revisions subject to the planning commission's review and action as set forth in this section.

4. Minor modifications. The planning executive director shall have the authority to grant minor modifications to an approved NL District development plan that do not exceed 10% of any square footage limitation, building setback, lot coverage, landscaping requirement, parking requirement, or dimensional requirement relating to fences or walls. At the planning executive director's discretion, any minor modification may be referred to the planning commission for consideration in accordance with this section.

L. Removal of Feature. If the feature identified as a neighborhood landmark is removed or destroyed, only those uses permitted by the base zoning district shall be permitted. Uses approved for the NL district beyond those permitted by the base zoning shall no longer be permitted.

M. Cancellation. In the event a building permit and/or certificate of use and occupancy has not been issued for a feature within two years from and after the effective date of the Council ordinance establishing the NL district and approving the associated development plan, the metropolitan council, the planning commission, or a property owner within the NL district may initiate cancellation of the district. An NL district shall be cancelled by ordinance according to the provisions of Article III of this chapter. (Ord. BL2018-1317 § 1, 2018; Amdts. 1, 2 with Ord. BL2000-365, Exh. A (part), 2000)

Article V. Site Plan Review and Approval

17.40.165 Applicability.

Prior to the issuance of a zoning permit for new construction, the property owner shall demonstrate compliance with all applicable provisions of this title. (Ord. 96-555 § 10.5(A), 1997)

17.40.170 Final site plan.

The construction of any permanent structure shall be in conformance with a final site plan approved in accordance with the following procedures.

A. Final Approval by the Zoning Administrator. Prior to approval, the zoning administrator shall review final site plan applications in all zoning districts except those cited in subsection B of this section to verify conformance with the provisions of this title and any other applicable regulation. Final site plan applications shall be submitted in form and content established by the zoning administrator, and shall specifically describe

the nature and scope of development to serve as the basis for the issuance of permits by the department of codes administration and any other applicable metro department.

B. Final Approval by the Planning Commission. Planning Commission approval shall be required for a final site plan within a SP district, landmark sign designation or within the overlay districts known as planned unit development (PUD), urban design, and institutional.

1. Application for Final Approval. A final site plan application filed with the planning commission shall consist of a detailed set of construction plans that fully demonstrate compliance with all applicable provisions of this title and accurately represent the resulting form of construction. Applications shall include all necessary drawings, specifications, studies or reports as required by a submittal checklist adopted by the planning commission.

2. Final Report. A written report from the staff of the planning commission shall be submitted to the commission prior to consideration of a final site plan. The report shall adequately describe the location, nature and scope of the final site plan, and its conformance with applicable codes and regulations.

3. Bases for Final Site Plan Approval. Approval of a final site plan shall be based on demonstrated compliance with all applicable provisions of this title. For property located within a planned unit development (PUD) district, the final site plan shall conform to the general development concept and approval provisions of the master development plan.

4. Planning Commission Action. The planning commission shall act to approve, conditionally approve or disapprove a final site plan application.

5. Permits and Certificates. Upon satisfaction of all conditions of approval, an approved final site plan shall be forwarded by the planning commission to the zoning administrator to form the basis for zoning permits. No zoning permit shall be issued prior to approval of the final site plan by the planning commission, nor shall a certificate of zoning compliance be issued unless all construction is in compliance with the final site development plan approved by the planning commission.

6. If the approved site plan for landmark sign designation has not been fulfilled six months after designation is granted, the designation shall be removed. The applicant may reapply for designation.

C. Final Approval by the Planning Department. Planning department approval shall be required for a final site plan within the DTC zoning district.

1. Application for Final Approval. A final site plan application filed with the planning department shall consist of a detailed set of construction plans that fully demonstrate compliance with all applicable provisions of this title and accurately represent the resulting form of construction. Applications shall include all necessary drawings, specifications, studies or reports as required by a submittal checklist adopted by the planning department.

2. Basis for Final Site Plan Approval. Approval of a final site plan shall be based on demonstrated compliance with all applicable provisions of this title and shall also be subject to review and approval by the Nashville Department of Transportation and Multimodal Infrastructure based on demonstrable compliance with all applicable provisions.

3. Planning Department Action. The planning department shall act to approve, conditionally approve or disapprove a final site plan application.

4. Overlapping Requirements. If a final site plan is also required by Section 17.40.170.B, the procedures within this section shall control.

D. Development Under a Unified Plat of Subdivision. Applicants seeking design flexibility may use a unified plat of subdivision to identify and delineate the boundary of all properties to be considered as one "unified" piece of property for purposes of complying with certain floor area ratio (FAR), impervious surface ratio (ISR), landscaping, parking, sign, and street setback standards. Such plat shall be reviewed and approved by the planning commission via the Subdivision Regulations final plat procedures. Once the unified plat is approved and recorded by the planning commission, a final site plan can be approved. Properties eligible for a unified plat are those located in any zoning district (except R/R-A and RS/RS-A) or within a planned unit development, institutional, or urban design overlay district. The zoning administrator and/or the planning commission may authorize the following design flexibility on the final site plan, provided that all standards of this title are satisfied within the boundary of the unified plat of subdivision as approved by the planning commission, and suitably noted both on the final site plan and the recorded unified plat."

1. A permanent on-premises sign may be located on a different lot subject to the number, size and spacing standards of Chapter 17.32.

2. The parking requirements of Chapter 17.20, Article II may be satisfied on a different lot than that containing the principal use or through a shared parking arrangement.

3. The perimeter parking lot landscaping standards of Section 17.24.150B may be waived along internal lot lines.

4. The overall area of impervious surface (ISR) permitted within the unified plat of subdivision may be redistributed among the lots of that plat provided that the department of public works determines that each final site plan conforms to the requirements of Chapter 15.64, "An Ordinance for Storm Water Management."

5. The zoning administrator and/or planning commission may vary the street setback standards of Tables 17.12.030A and 17.12.030B if deemed appropriate to maintain the existing character of a developed area.

6. The overall floor area ratio (FAR) permitted within a unified plat of subdivision may be redistributed among the lots of that plat. (Ord. BL2022-1472 § 2, 2022; Ord. BL2015-1153 § 16, 2015; Ord. BL2015-1053 §§ 3, 4, 2015; Ord. BL2011-922 § 3, 2011; Ord. BL2009-586 § 1(Exh. A, §§ 46, 47), 2010; Ord. BL2007-36 § 2, 2007; Ord. BL2005-762 §§ 7, 8, 2005; Ord. BL2000-364 § 1 (part), 2000; Ord. 98-1268 § 1(part), 1998; Ord. 96-555 § 10.5(B), 1997)

17.40.175 Notice of final site plan.

A. Prior to the approval of a final site plan or issuance of a zoning permit for new construction, the applicant shall provide written notice to the district council member in whose council district the subject property or properties included in the final site plan is located in if the following characteristics are met:

1. The final site plan includes five or more dwelling units.

2. The property or properties included in the final site plan have maintained the same zoning district for four or more years prior to the application for a final site plan.

3. The property or properties included in the final site plan are located within one thousand feet of a property zoned RS, R, or RM.

4. Final site plans that include properties zoned DTC shall be excluded from this requirement.

B. The written notice shall include the total number of dwelling units proposed. (Ord. BL2025-820 § 1, 2025)

Article VI. Board of Zoning Appeals

17.40.180 Powers.

The metropolitan board of zoning appeals, also referred to as the "board," shall be vested with the following powers.

A. Administrative Appeals. Pursuant to Section 13-7-207(1), Tennessee Code Annotated, the board shall hear and decide appeals from any order, requirement, decision or determination made by the zoning administrator or the urban forester in carrying out the enforcement of this Zoning Code, whereby it is alleged in writing that the zoning administrator or the urban forester is in error or acted arbitrarily.

B. Variances. Pursuant to Section 13-7-207(3), Tennessee Code Annotated, the board shall hear and act upon applications for variances to alleviate hardships created by not being able to comply with this Zoning Code from findings based on the criteria set forth in Section 17.40.370.

C. Special Exception Use Permits. Pursuant to Sections 13-7-206 and 13-7-207(2), Tennessee Code Annotated, the board shall hear and act upon applications for special exception use permits. The board may reconsider a previously approved special exception use at any time for just cause.

D. Changes to Nonconforming Uses or Structures. The board shall determine the appropriateness of proposed changes to nonconforming uses or structures.

E. Right of Entry Upon Land. With just cause, the board may enter upon any land within its jurisdiction to make examinations and surveys and place or remove public notices as required by this Zoning Code.

F. Reasonable Accommodation. The decision of either the zoning administrator, the executive director of the historical commission, or of the historical commission itself, to grant or deny a handicapped or disabled person or a provider of housing for a handicapped or disabled person, a reasonable accommodation shall be reviewable by the board of zoning appeals upon the filing of a notice of appeal with the board of zoning appeals by any person or entity aggrieved by that decision. The notice of appeal must be filed with the board of zoning appeals no more than thirty (30) days after issuance of the zoning administrator's decision. (Ord. BL2008-333 § 2, 2009; Ord. 96-555 § 10.6(A), 1997)

17.40.190 Membership.

The board shall consist of seven members. Board members shall be appointed by the mayor and confirmed by a majority vote of the entire membership of the metropolitan council. No person holding any public office or position in metropolitan government shall be eligible for membership on the board. Board members shall serve without compensation. Members of the board serving on the effective date of the ordinance codified in this title shall serve the remainder of their appointed terms and may be considered for reappointment if eligible. (Ord. 96-555 § 10.6(B), 1997)

17.40.200 Terms of office.

Board members shall each serve for a five-year term, or until their successors are appointed. No member shall

serve more than two consecutive five year terms. Board members may be removed from office by the mayor for continued absence or other just causes. Any member being so removed shall be provided, upon request, a public hearing on the removal decision before the metropolitan council. Vacancies shall be filled for unexpired terms in the manner herein provided for initial appointments. Board members shall annually elect a chair and vice-chair from among their membership. (Ord. 96-555 § 10.6(C), 1997)

17.40.210 Hearing required.

Within sixty days following receipt of an application for a variance or special exception and prior to action, the board shall conduct a public hearing according to the public notice provisions of Article XV of this chapter. (Ord. 96-555 § 10.6(D), 1997)

17.40.220 Assistance.

The board may request the assistance of any department or agency of the metropolitan government regarding any matter under consideration. (Ord. 96-555 § 10.6(E), 1997)

17.40.230 Conflict of interest.

A board member with either a direct or indirect interest in property affected by the consideration of the board shall be disqualified from any participation in the proceedings on that matter. (Ord. 96-555 § 10.6(F), 1997)

17.40.240 Action by the board.

Four board members shall constitute a quorum and concurrence of at least four members shall be necessary to deny or grant any application. In the event that five or more members are present, failure to receive four affirmative votes within thirty days of the hearing shall be deemed a denial. In the event there are only four members present and there are not four affirmative votes, then the application shall be readvertised for the next regular meeting. (Ord. 96-555 § 10.6(G), 1997)

17.40.250 Time limits for permits.

All permits for variances or special exception uses authorized by the board must be obtained within two years from the date of approval. (Ord. 96-555 § 10.6(H), 1997)

17.40.260 Appeal of final site plan action.

A final site plan action by the zoning administrator may be appealed by the applicant to the board of zoning appeals. The approval of a final site plan by the zoning administrator may be appealed to the board of zoning appeals by a nonapplicant within thirty days following commencement of construction as defined by Section 17.04.030(A)(1). (Ord. 96-555 § 10.6(I), 1997)

17.40.270 Conditions.

In granting a variance, special exception permit, hillside exception or change to a nonconforming use or structure, the Board may impose conditions, restrictions or time limits considered necessary to protect surrounding properties and better carry out the general intent of this title. (Ord. 96-555 § 10.6(J), 1997)

17.40.275 Applicant.

An applicant may be an owner, optionee, agent, trustee, lessee, government official or department. (Ord. 98-1268 § 1(part), 1998)

Article VII. Special Exception Uses

17.40.280 Authority.

The metropolitan board of zoning appeals shall hear and decide requests for special exceptions in accordance with the provisions of this Zoning Code. Special exceptions shall be regulated in a manner consistent with Section 13-7-206, Tennessee Code Annotated. The specific location of an asphalt plant, waste transfer facility, airport runway, hazardous operation and wastewater treatment facility shall first be approved by a resolution adopted by the metropolitan council prior to the public hearing by the board of zoning appeals. If the metropolitan council does not approve or disapprove the specific location, upon finding that the proposed use is consistent or not consistent with the conditions specified in Chapter 17.16, Article III, within sixty days of the date of notification by the zoning administrator to the council and the district councilmember that such an application has been filed, council approval shall be waived and the board of zoning appeals may proceed to consider the application. (Ord. BL2018-1122 § 1, 2018; Ord. BL2017-799 § 6, 2017; Ord. BL2005-701 § 3, 2005; Ord. BL2000-172 § 1, 2000; Ord. 96-555 § 10.7(A), 1997)

17.40.290 Applications.

Special exception applications shall be filed by the applicant in form and content established by the board of zoning appeals. The application shall contain sufficient information to demonstrate full compliance with all applicable standards of Chapter 17.16, Article III (Special Exception Uses). Within three business days from the date the application for a special exception is filed, the zoning administrator shall notify the district councilmember in writing as to the substance of the request, whether construction on the property necessitat-

ing the special exception has commenced, and whether the property owner has been cited for a violation of the Zoning Code which led to the filing of the application. (Ord. BL2005-910 § 1, 2006; Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 10.7(B), 1997)

17.40.300 Planning commission report.

Special exception uses that would otherwise require final site plan approval by the planning commission pursuant to Section 17.40.170B may be considered and approved by the board upon consideration of a recommendation from the planning commission. All other special exception use applications shall be transmitted from the board of zoning appeals to the planning department for review and a report. Upon receipt of a complete application from the board, the planning department shall review the application and report to the board following a twenty-eight-day review period. In its review, the planning department shall advise on the nature of existing and future land uses in the general vicinity of the proposed special exception use. (Ord. 96-555 § 10.7(C), 1997)

17.40.310 Public hearing required.

Within sixty days following the filing of a complete application, the board of zoning appeals shall hold a public hearing pursuant to the procedures of Article XV of this chapter (Public Notification). For special exception uses requiring review and a report from the planning department, the public hearing shall be held after receipt of the planning department report. If desired, the board may request an official interpretation of the general plan from the planning commission. Testimony and evidence material to the general and specific standards of Chapter 17.16, Article III may be considered by the board in its deliberations. (§ 4(5) of Amdt. 1 with Ord. 96-555 § 10.7(D), 1997)

17.40.320 Findings of fact.

An approval of a special exception land use by the board of zoning appeals shall state the section of this title under which the permit was considered, and findings of facts relating to the applicable approval standards. In the case of a denial, the findings shall specifically identify the standards not satisfied. (Ord. 96-555 § 10.7(E), 1997)

Article VIII. Variances

17.40.330 Authority.

The metropolitan board of zoning appeals may grant variances from the strict application of the provisions of this Zoning Code based upon findings of fact related to the standards in this article. (Ord. 96-555 § 10.8(A), 1997)

17.40.340 Limits to jurisdiction.

A. The board shall not grant variances to the following sections and tables:

Sections/Tables

Section 17.08.030 (land uses)

Tables 17.12.020 A—D (minimum lot area)

Tables 17.12.020 A—D (density)

Tables 17.12.020 A—D (floor area ratio [FAR])

Section 17.12.080 (compact development)

Section 17.12.090 (conservation development)

Section 17.16.030.F (adaptive residential use)

Section 17.16.070.U (Operating a not owner-occupied short term rental property without a permit)

Section 17.16.250.E (Operating an owner-occupied short term rental property without a permit)

Section 17.36.070.C (PUD minimum lot size)

Section 17.37 (Downtown Code (DTC))

B. The board shall not grant variances within the following sections, tables, zoning districts, or overlay districts without first considering a recommendation from the planning commission.

Sections/Tables

Section 17.20.120 (Provision of sidewalks)

Section 17.24.075 (Plans for street trees and streetscape)

Section 17.28.103 (Underground utilities)

Zoning Districts

RN1, RN2

RL1, RL2, RL3

SP District

Overlay Districts

PUD

UDO

Institutional

C. The board shall not grant variances within the following sections, tables, zoning districts, or overlay districts without first considering a supplemental review by the Planning Commission and the Director of the Information Technology Services (ITS) Department or his designee, including an approved consultant.

Sections/Tables

Section 17.16.080.C (Telecommunication facility)

(Ord. BL2025-1005 § 1(Exh. A), 2025; Ord. BL2023-120 § 3, 2024; Ord. BL2022-1121 § 12, 2022; Ord. BL2021-868 § 2, 2021; Amdt. 1 to Ord. BL2021-796 § 6, 2021; Ord. BL2021-796 § 6, 2021; Ord. BL2021-619 § 2, 2021; Ord. BL2019-6 § 3, 2019; Ord. BL2016-493 § 3, 2017; Ord. BL2016-415 § 7, 2016; Ord.

BL2009-586 § 1(Exh. A, § 48), 2010; Ord. BL2005-762 § 9, 2005; Ord. BL2005-628 § 4, 2005; Ord. BL2004-492 § 5, 2005; Ord. 96-555 § 10.8(B), 1997)

17.40.350 Applications.

A written application for a variance shall be filed with the board by the landowner or agent on forms provided by the board. An applicant shall state why the variance is being requested, what function the variance would accomplish and what specific and unique circumstances exist that would authorize consideration by the board under the review standards of this article. The application shall contain site plan information as required for a zoning permit. Within three business days from the date the application for a variance is filed, the zoning administrator shall notify the district councilmember in writing as to the substance of the request, whether construction on the property necessitating the variance has commenced, and whether the property owner has been cited for a violation of the Zoning Code which led to the filing of the application. (Ord. BL2005-910 § 1, 2006; Ord. 96-555 § 10.8(C), 1997)

17.40.360 Hearing required.

Not more than sixty days after filing, the board of zoning appeals shall hold a public hearing on an application for a variance. Notice of such public hearing shall be given pursuant to Article XV of this chapter. Testimony and evidence material to the review standards or requirements of Sections 17.40.370 or 17.40.380 may be considered by the board in its deliberations. (§ 4(6) of Amdt. 1 with Ord. 96-555 § 10.8(D), 1997)

17.40.370 Review standards.

In accordance with Tennessee Code Annotated Section 13-7-207, the board shall not grant a variance without an affirmative finding of fact on each of the following standards based on evidence presented by the applicant.

A. Physical Characteristics of the Property. The exceptional narrowness, shallowness or shape of a specific piece of property, exceptional topographic condition, or other extraordinary and exceptional condition of such property would result in peculiar and exceptional practical difficulties to, or exceptional or undue hardship upon the owner of such property upon the strict application of any regulation enacted by the ordinance codified in this title.

B. Unique Characteristics. The specific conditions cited are unique to the subject property and generally not prevalent to other properties in the general area.

C. Hardship Not Self-Imposed. The alleged difficulty or hardship has not been created by the previous actions of any person having an interest in the property after the effective date of the ordinance codified in this title.

D. Financial Gain Not Only Basis. Financial gain is not the sole basis for granting the variance.

E. No Injury to Neighboring Property. The granting of the variance will not be injurious to other property or improvements in the area, impair an adequate supply of light and air to adjacent property, or substantially diminish or impair property values within the area.

F. No Harm to Public Welfare. The granting of the variance will not be detrimental to the public welfare and will not substantially impair the intent and purpose of this Zoning Code.

G. Integrity of Master Development Plan. The granting of the variance will not compromise the design integrity or functional operation of activities or facilities within an approved planned unit development. (Ord. 96-555 § 10.8(E), 1997)

17.40.380 Special hillside exception.

Requests for exceptions from the hillside development standards of Chapter 17.28 shall be administered and decided in conformance with the requirements of this article. The board shall have no authority to vary lot areas within platted residential developments utilizing compact or conservation development provisions of Chapter 17.12.

A. Application Requirements. At a minimum, an application requesting a variance from the hillside development standards shall include the following information:

1. A report, prepared and endorsed by a qualified professional engineer licensed in the State of Tennessee, that includes at a minimum the following information:

a. A report on the soils, geology and hydrology characteristics of the site;

b. Recommended grading procedures; and

c. Recommended measures to mitigate potential geologic or hydrologic impacts on the proposed development and any potentially affected adjacent property.

2. An engineering report prepared by a qualified professional engineer registered in the State of Tennessee that demonstrates conclusively that:

a. Proposed construction methods will improve or at a minimum not adversely impact the natural stability of the slope;

b. Construction techniques are being employed that will minimize disruption of the existing topography and vegetation; and

c. Existing geological constraints of the site, including soils and hydrology, are adequately addressed in the design of the project.

B. Standards for Granting the Exception. Before granting an exception, the board of zoning appeals shall find that the written petition conforms to the application requirements of this article and that the preponderance of evidence shows that hillside development is appropriate. (Ord. BL2023-120 § 4, 2024; Ord. BL2022-1121 § 13, 2022; Ord. 96-555 § 10.8(F), 1997)

17.40.390 Findings of fact.

Any board decision on a variance or hillside exception shall indicate the section of this Zoning Code under which the variance or exception is being considered and include substantive findings of fact relating to the specified review standards. In the approval of a variance or exception, findings shall specifically identify the unique characteristics of the property and the precise nature of the hardship. In the denial of a variance or exception request, findings shall specifically identify the standards that were not met. (Ord. 96-555 § 10.8(G), 1997)

Article IX. Historic Zoning Commission

17.40.400 Membership.

The historic zoning commission is established by this code.

A. The commission shall consist of nine members who are residents of Davidson County with a composition as follows:

1. One registered architect;

2. One member of the Metropolitan Planning Commission;

3. One member representing the Metropolitan Historical Commission of Nashville;

4. Four members selected from the community, two of whom shall reside within an historic overlay district; and,

5. Two members, each of whom must be one of the following:

a. A property owner of real property lying within the area to which the Downtown Code applies where such property is either listed in the National Register of Historic Places or is within an historic overlay district; or

b. A person whose principal place of business is located on real property lying within the area to which the Downtown Code applies where such property is either listed in the National Register of Historic Places or is within an historic overlay district; or

c. A person having a business interest in real property lying within the area to which the Downtown Code applies where such property is either listed in the National Register of Historic Places or is within an historic overlay district.

B. Members shall be appointed by the mayor and confirmed by the metropolitan council, serving five-year terms without compensation. Those members serving on the effective date of the ordinance codified in this title shall serve the remainder of their appointed terms and may be considered for reappointment if eligible. A member may be removed for just cause by the council following a public hearing. The mayor may appoint a replacement for the remainder of the term subject to council concurrence. The historic zoning commission shall elect from its members its own chairperson and other officers deemed appropriate to carry out its purpose. The commission shall adopt rules of order and establish regular meeting dates. At least five members of the commission shall constitute a quorum for the transaction of its business. The concurring vote of four members of the commission shall constitute final action of the commission on any matter before it. (Ord. BL2012-280 § 1, 2012; Amdt. 1 to Ord. BL2012-181 § 1, 2012; Ord. BL2012-181 § 1, 2012; Ord. 96-555 § 10.9(A), 1997)

17.40.410 Powers and duties.

A. Creation of Historic Overlay Districts. The historic zoning commission shall review applications calling for the designation of historic overlay districts according to the standards contained in Chapter 17.36, Article III, referring written recommendations to the metropolitan council. Establishment of an historic overlay district on the official zoning map shall be in accordance with Section 18.02 of the Metropolitan Charter and Article III of this chapter.

B. Establishment of Design Review Guidelines. The historic zoning commission shall adopt design guidelines for each historic overlay district and apply those guidelines when considering preservation permit applications. Design guidelines relating to the construction, alteration, addition and repair to, and relocation and demolition of structures and other improvements shall be consistent with the National Historic Preservation Act of 1966, as amended. A public hearing following the applicable public notice requirements of Article XV of this chapter shall precede the adoption of all design review guidelines by the historic zoning commission. Testimony and evidence material to the type of historic overlay under consideration may be considered by the commission in its deliberations.

C. Design and Demolition Review. The historic zoning commission shall make the following determinations with respect to historic overlay districts:

1. The appropriateness of the exterior architectural design and features of, and appurtenances related to, any new structure or improvement;

2. The appropriateness of the exterior architectural design and features of any addition to the existing structure;

3. The appropriateness of exterior alterations and repairs to an existing structure;

4. The appropriateness of relocating any building out of, into, or within the boundaries of an historic overlay district; and

5. The appropriateness of the maximum size of buildings and structures on a lot and the buildable area within which a building can be located, including setbacks and height; and

6. The appropriateness of demolishing any structure or other improvement. As a condition of any permission to demolish a structure or other improvement, the historic zoning commission may require historical documentation in the manner of interior and exterior photographs, architectural measured drawings of the exterior, or other notations of architectural features, all at the expense of the commission;

7. The historic zoning commission may take into consideration the historical or architectural significance of the subject structure or improvement; and the impact of the proposed undertaking on the historic character and integrity of the district as a whole.

D. Historic Property Review Board. The historic zoning commission shall carry the responsibilities and perform the duties of the historic property review board as established in T.C.A. § 67-5-218.

E. Right of Entry Upon Land. In performance of its duties, the commission and its staff may access the grounds of any land within its jurisdiction to make examinations and surveys or post public notices as required by this Zoning Code; however, this code does not empower right of entry into a building without the consent of the owner.

F. Use of Land. The use of property located within an historic overlay district shall be governed solely by the associated base zoning district or an approved PUD master development plan.

G. Compliance with T.C.A. § 7-51-1201 et seq. For the purposes of complying with T.C.A. § 7-51-1201 et seq., the historic zoning commission shall make the determination of whether a structure for which a demolition permit has been applied for meets the criteria of T.C.A. § 7-51-1201. If the historic zoning commission determines that the structure at issue meets the criteria of T.C.A. § 7-51-1201, it shall initiate legislation to allow the Metropolitan Council the opportunity to approve or disapprove the demolition in accordance with T.C.A. § 7-51-1201 et seq. (Ord. BL2019-3 § 2, 2021; Ord. BL2007-45 § 1, 2008; Ord. BL2005-864 § 1, 2006; § 4(7) of Amdt. 1 with Ord. 96-555 § 10.9(B), 1997)

17.40.420 Preservation permit.

A. Permit Required. Any person undertaking any action for or with respect to any structure located within any of the historic overlay districts listed in [Section] 17.36.110 shall first obtain a preservation permit from the historic zoning commission. No person may undertake any action for or with respect to any structure located within any of the historic overlay districts listed in [Section] 17.36.110 without first obtaining a preservation permit. These actions include exterior alteration, repair, relocation, demolition in whole or in part, or new construction. In the case of Historic Landmark Interior (HI) designations, these actions include interior renovations, alterations, repairs, or demolition in whole or in part. The design and demolition review of the historic zoning commission shall be memorialized in the preservation permit. The preservation permit must be followed from commencement through completion of the work.

B. Consideration of Applications. The historic zoning commission shall meet within fifteen working days after receipt of an application for a preservation permit that includes sufficient data for review. Failure of the commission to act within thirty days after receipt of a sufficient application shall be deemed an approval except when a mutual agreement has been made to extend the time limit. The commission may conduct a public hearing prior to final action on any application.

C. Preservation Permit. Upon approval of an application, the historic zoning commission shall issue a preservation permit to the applicant and transmit a copy to the zoning administrator. A certificate of zoning compliance shall be issued only if work is in conformance with the preservation permit.

D. Disapproval by the Historic Zoning Commission. With the disapproval of an application, the historic zoning commission shall state in writing to the applicant the bases for that action in terms of the applicable design guidelines. The notice of disapproval may also be transmitted to the zoning administrator.

E. Determination of Economic Hardship. In reviewing an application to remove an historic structure, the historic zoning commission may consider economic hardship based on the following information:

1. An estimated cost of demolition and any other proposed redevelopment as compared to the estimated cost of compliance with the determinations of the historic zoning commission;

2. A report from a licensed engineer or architect with experience in rehabilitation as to the structural soundness of the subject structure or improvement and its suitability for rehabilitation;

3. The estimated market value of the property in its current condition; its estimated market value after the proposed undertaking; and its estimated value after compliance with the determinations of the historic zoning commission.

4. An estimate from an architect, developer, real estate consultant, appraiser, or other real estate professional experienced in rehabilitation as to the economic feasibility of rehabilitation or reuse of the existing structure.

5. Amount paid for the property, the date of purchase, and the party from whom purchased, including a description of the relationship, if any, between the owner of record or applicant and the person from whom the property was purchased, and any terms of financing between the seller and buyer.

6. If the property is income-producing, the annual gross income from the property for the previous two years; itemized operating and maintenance expenses for the previous two years; and depreciation deduction and annual cash flow before and after debt service, if any, during the same period.

7. Any other information considered necessary by the commission to a determination as to whether the property does yield or may yield a reasonable return to the owners.

8. Hardship Not Self-Imposed. The alleged difficulty or hardship has not been created by the previous actions or inactions of any person having an interest in the property after the effective date of the ordinance codified in this title. (Ord. BL2018-1418 § 1, 2019; Ord. BL2012-88, § 1, 2012; Ord. 96-555 § 10.9(C), 1997)

17.40.430 Moratorium for proposed historic overlay districts.

There shall be a moratorium period on the granting of permits for demolition, relocation, new construction, exterior alterations, additions to structures or improvements on land recommended for designation as a historic overlay district. The moratorium period shall begin with the filing of an ordinance to designate an historic overlay district and end once the ordinance establishing the overlay district has been approved, rejected, withdrawn, deferred for a total amount of time equaling ninety days, or indefinitely deferred by the metropolitan council. (Ord. BL2021-842 § 3, 2021; Ord. 96-555 § 10.9(D), 1997)

Article X. Tree Protection and Replacement Procedures

17.40.440 General.

Unless exempt from the provisions of this chapter, no person shall remove or in any way damage any retained, protected or heritage tree without first obtaining a permit from the zoning administrator. Any tree which is damaged, destroyed or removed without the required tree permit shall be repaired according to accepted International Society of Arboriculture practices, or replaced with the equivalent density units of replacement trees as provided in Chapters 17.24 and 17.28. (Ord. BL2022-1122 § 13, 2022; Ord. BL2018-1416 § 13, 2019; Ord. 96-555 § 10.10(A), 1997)

17.40.450 Reserved.

Editor's note—Ord. BL2022-1122 § 14, passed May 17, 2022, repealed § 17.40.450, which pertained to designation of tree types and derived from Ord. 96-555 § 10.10(B), 1997; Ord. BL2018-1416 § 14, 2019. The user's attention is directed to § 17.28.065.

17.40.460 General exemptions.

The following uses or activities shall be exempt from the tree removal requirements of this article.

A. Commercial Growers. All commercial nurseries, botanical gardens, tree farms and grove operations shall be exempt from the provisions of this article, but only as to those trees and sites which were planted or managed for silvicultural or agricultural purposes or for the sale or intended sale in the ordinary course of business.

B. Surveyors and Engineers. A Tennessee-licensed land surveyor or engineer in the performance of duties, provided such alteration or removal is limited to a swath of three feet or less in width and does not include any historic or specimen trees. (Ord. 96-555 § 10.10(C), 1997)

17.40.470 Tree removal permit procedures.

The application procedures and standards for review of tree removal permit applications shall be as follows:

A. Application Requirements. Any person desiring a tree removal permit, including any person or entity engaged in the business of tree removal services on commercial property, shall make written application to the zoning administrator upon forms provided by the zoning administrator along with the following information:

1. The application shall include the name, address and telephone number of the landowner and/or agent.

2. Except for development approved pursuant to Section 17.12.090 Conservation Development each application for a tree removal permit shall be accompanied

by a tree survey based upon current information. An application for a tree removal permit for a Conservation Development approved pursuant to Section 17.12.090 shall submit a tree survey for any trees located outside of the natural areas required to be preserved in open space. The survey shall show the location, size and type of retained, protected and heritage trees upon the site, including common or scientific names. The survey shall indicate which retained, protected and heritage trees are intended for removal and/or grubbing and which will be left undisturbed. A final site plan prepared to the same scale shall be submitted which illustrates the following:

a. The locations of existing and proposed buildings, layout of roads, utilities, parking areas for vehicles, storage areas for construction materials, and other items that disturb or compact the soil in tree root zones.

b. Existing and proposed grades and subsequent erosion control measures to prevent siltation over the roots of protected and heritage trees and appropriate tree protection fencing for those trees.

c. For a conservation development approved pursuant to Section 17.12.090 survey plans shall locate and label all natural areas to be preserved and show and label the limits of disturbance.

d. For a conservation development approved pursuant to Section 17.12.090, the site analysis plan shall be included with the submittal.

3. Each application for a tree removal permit shall include a plan for disposal of the tree.

4. The application and accompanying documents shall be submitted in copies sufficient to administer this article.

5. The filing of an application shall be deemed to extend permission to the urban forester to inspect the subject site if necessary for purpose of evaluating the application.

6. Tree permits allowing for pruning or removal of trees necessitated by the installation and/or on-going maintenance of public utilities and communications facilities may be issued by the urban forester to public utilities and communications facilities for a period of one year and may be renewed annually subject to continued compliance with the conditions of this article.

B. Tree Removal Permit Review Criteria. No permit for the removal of a retained, protected or heritage tree shall be granted unless the petitioner demonstrates one or more of the following conditions:

1. The site has received development, site plan or subdivision approval.

2. The tree is located in such proximity to an existing structure that the safety, utility or structural integrity of the structure is materially impaired.

3. The tree materially interferes with the installation, servicing or functioning of existing or infrastructure, utility lines or services for which there is no feasible relocation alternative.

4. The tree creates a substantial hazard to motor, bicycle or pedestrian traffic by virtue of physical proximity to traffic or impairment of vision.

5. The tree is diseased, insect ridden or weakened by age, abuse, storm or fire and is likely to cause injury or damage to people, buildings or other improvements.

6. The removal of the tree is necessary to promote the growth of surrounding protected and heritage trees. Under this provision, the applicant must demonstrate a preference for protecting heritage trees. Trees removed pursuant to this subsection are exempt from tree replacement requirements.

7. Any law or regulation requires the removal.

8. The site will maintain the required tree density after the removal of specified trees either with retained trees or with the installation of replacement trees in accordance with Section 17.28.065.C Replacement of Trees.

C. Tree Removal Permit Review Procedures.

1. Applications that involve subdivision review or any form of site plan review before the planning commission, shall be reviewed by the planning commission in accordance with the applicable review procedures.

2. Applications that do not involve final site plan review, but only the issuance of grading or building permits shall be reviewed by the zoning administrator and urban forester in accordance with the review procedures already in effect for the review and approval of such permits.

3. The filing of an application shall be deemed to extend permission to the urban forester to inspect the subject site if necessary for purpose of evaluating the application.

4. Unless otherwise specified, a tree removal permit shall automatically expire and become void if the work authorized by such permit is not commenced within six months after the date of the permit or if, once commenced, removal work is suspended, discontinued, or abandoned for a period equal to or greater than six months.

5. Tree removal authorized by the approval of a final site plan or by approved subdivision construction plans shall remain valid concurrent with the approved plans.

6. Notice of commencement and completion of the work or other activity authorized by the tree permit shall be made by signed affidavit to the urban forester as stated on the permit issued. (Ord. BL2022-1122 § 15, 2022; Ord. BL2022-1121 § 14, 2022; Amdt. 1 to Ord.

BL2018-1416 § 15, 2019; Ord. BL2018-1416 § 15, 2019; Ord. BL2004-371 § 1, 2004; Ord. BL2004-244 § 1, 2004; Ord. 96-555 § 10.10(D), 1997)

17.40.480 Off-site plantings.

In the event that the urban forester determines that: (a) the site is located in the MUI, MUI-NS, CF, CF-NS district, or in any other district that may not provide for adequate required yard space to accommodate the total number of required replacement trees; or (b) the unique soil types, topography and/or unusual nature of the site would not assure growth of trees, the applicant may contribute to the tree bank an amount of money equal to the costs of providing the required density, according to a schedule promulgated by the urban forester and approved by resolution of the council.

The tree bank shall be a fund set up to receive monies from owners or developers who, for various reasons, remain unable to successfully plant and maintain trees on the site under development, with such monies to be used for the planting and maintaining of public trees. This article shall not apply to sites containing surface parking lots in the CF, CF-NS, MUI, MUI-NS districts. (Ord. BL2019-111 § 1(Exh. A, § 51), 2020; Ord. 96-555 § 10.10(E), 1997)

Article XI. Sign Procedures

17.40.490 Permits and compliance tag.

A. Exempt from Permits. No zoning permit or building permit is required for the following:

1. Exempt signs (Chapter 17.32) which are not otherwise regulated by size, height, setback, number or duration of placement; or

2. The painting, repainting or cleaning of a sign structure, or the changing of copy on a sign designed for changeable copy.

B. Permits Required. No sign shall be constructed, installed or altered without first obtaining a zoning permit, a building permit and all other applicable permits. Application shall be made by the owner of the property on which the sign is to be displayed or by the owner's legal representative.

C. Applications. In applying for a zoning permit and a building permit to install a sign, the applicant shall submit the following information:

1. A site plan drawn to appropriate scale depicting the location of the proposed sign and all relevant features of the site, including location and size of other regulated signs; and

2. Drawings and specifications, including elevations depicting the sign faces, dimensions, anchorage, materials and other data necessary to determine compliance with the requirements of this title and with the requirements of the metropolitan building code and the metropolitan electrical code.

D. Compliance Tag. Upon installation of a sign, the installer shall certify to the department of codes administration that the sign was constructed in conformance with all applicable regulations. Upon issuance of a certificate of compliance, a compliance tag provided by the department of codes administration shall be permanently affixed and displayed on the sign. (Ord. 96-555 § 10.11(A), 1997)

17.40.500 Overall signage plan.

A. General Procedures. Prior to issuance of a zoning permit for a permanent on-premises sign, an overall signage plan indicating the general locations, maximum dimensions and structural type of all signs to be located on the lot shall be filed with the zoning administrator. An authorization form for submittal of the overall signage plan shall be signed by all owners of the lot or their authorized agents. In case of conflict between the overall signage plan and any ordinance of the metropolitan government, the ordinance shall apply.

B. Common Signage Plan. When more than one use or business is located on a lot, the overall signage plan for the lot shall be a common signage plan which shall provide for consistency among signs on the premises with regard to at least four of the following: Material; location of each sign on the building; sign proportions; color scheme; lighting; lettering or graphic style. The common signage plan shall establish an allowable area of signage for existing and future tenants with regard both to on-premises building and on-premises ground signs. The common signage plan shall be approved by the zoning administrator prior to issuance of any permits. For a development existing prior to the effective date of the ordinance codified in this chapter, a common signage plan must be submitted and approved if a new sign is to be added to the property. The common signage plan shall indicate existing nonconforming signs as well as the amount and location of on-premises signage to be allocated to each tenant under the new plan. If existing on-premises building signage exceeds an amount permitted by this title, a new or replacement tenant shall be allowed its share of on-premises building signage based on the approved common signage plan.

C. Amending Signage Plans. Any overall signage plan, including a common signage plan, may be amended by filing a new plan which complies with all requirements of this title and includes a schedule for bringing any existing signs not in conformance with the proposed amended plan into compliance.

D. Nonconforming Signs. Signs legally installed after the effective date of the ordinance codified in this chapter and subsequently made nonconforming because of an amendment to an overall or common signage plan shall be brought into compliance with the amended plan within six months. (Ord. 96-555 § 10.11(B), 1997)

17.40.510 Unsafe, illegal, dilapidated and abandoned signs.

A. Unsafe Signs. Should any sign be determined unsafe by the zoning administrator, upon receipt of written notice the sign owner shall: (1) remove the sign forthwith in the case of immediate danger, or otherwise within ten days; or (2) bring the sign into compliance with all provisions of this title within the same period. If such order is not complied with within ten days, in addition to other remedies the zoning administrator may have such sign removed at the expense of the owner.

B. Illegal Signs. Any sign that was illegal under the sign regulations that preceded the ordinance codified in this title shall be illegal after the effective date of the ordinance codified in this title. Any sign which was erected without the required permits shall be deemed a continuing violation and shall not be considered under the provisions regarding nonconforming signs.

1. Signs constructed, erected or altered without a permit as required by this article or by the provisions of prior regulations shall be illegal.

2. An illegal sign and its appurtenances shall be removed in no more than ten days after written notice by the zoning administrator, or brought into compliance with all provisions of this title within the same period. If such order is not complied with within ten days, in addition to other remedies the zoning administrator may have such sign removed at the expense of the owner.

C. Dilapidated Signs. All signs regulated by this title, including the panels constituting the signs, together with all supports, braces, guys and anchors, shall be maintained in good repair, so that all sign panels are affixed in place within the sign cabinet, frame, or similar structure and are complete and intact. In addition to any other available remedies, the zoning administrator may order the removal of any sign that is not maintained in accordance with this code, including the provisions of the metropolitan building code and the metropolitan electric code.

D. Abandoned Signs. The zoning administrator shall notify in writing the owner or lessee of the sign that has been determined to be abandoned. The notice shall contain a removal order giving ten days for compliance. If the sign and its appurtenances are not removed within ten days, in addition to other remedies the zoning administrator may have the sign removed at the expense of the owner. (Ord. BL2023-1858 § 2, 2023; Ord. 96-555 § 10.11(C), 1997)

Article XII. Permits and Certificates of Compliance

17.40.520 Applicability.

An application for a zoning permit must be filed with the zoning administrator prior to any person or entity commencing any construction or alteration of a structure, initiating a change in the use of the property or for a telecommunication facility, including collocation. No building permit shall be issued except upon presentation of a valid zoning permit. However, an application for a telecommunications facility building permit for routine maintenance or for like-for-like replacements of equipment, consistent with departmental regulations, shall be submitted within ten days of such work being performed and include verification that the work performed was for routine maintenance or for like-for-like replacements of equipment, consistent with departmental regulations. If an applicant contends that they are exempt from this permitting requirement by virtue of TCA Section 13.24.305 due to the fact that they are placing an antenna or related equipment for an existing wireless telecommunications support structure, they shall submit documentation evidencing their eligibility for such exemption. (Ord. BL2016-415 § 5, 2016; Ord. 2001-821 § 1, 2001; Ord. 96-555 § 10.12(A), 1997)

17.40.530 Zoning permit application.

The application requirements for a zoning permit shall be established by the zoning administrator in a form and content appropriate to demonstrate that all structures or use of property will be done in compliance with all applicable provisions of this code. No zoning permit shall be issued:

A. Prior to approval of a final site plan by the planning commission for properties requiring the commission's approval under Section 17.40.170 B.

B. For development within a floodplain overlay district prior to approval of a grading and drainage plan by the department of public works;

C. For erection of a structure within the airport overlay district prior to approval by the Metropolitan Nashville Airport Authority;

D. For an adult entertainment establishment unless all locational standards established by Chapter 17.36, Article VII are satisfied;

E. For a special exception use prior to approval by the board of zoning appeals; or

F. For any manufacturing use or other use, where a compliance certification is required pursuant to Section

17.28.103 of this code. (Ord. BL2009-586 § 1(Exh. A, § 49), 2010; Amdt. 1 with Ord. 98-1268 § 1 (part), 1998; Ord. 96-555 § 10.12(B), 1997)

17.40.540 Final site plan authority.

No zoning permit for construction that creates new floor area shall be issued by the zoning administrator prior to the approval of a final site plan and satisfaction of all applicable conditions (if any). If final site plan approval is conditioned upon the provision of public streets or utilities, no zoning permit shall be issued prior to the approval of a plat of dedication by the planning commission and the posting of any associated bonds (if necessary). (Ord. 96-555 § 10.12(C), 1997)

17.40.545 Design-based multi-family design sites authority.

The zoning administrator shall not issue any zoning, building or demolition permit for the construction, alteration, repair, demolition or relocation of a building or other structure within any design site within a design-based multi-family zoning district without prior approval of the planning department. Refer to Section 17.38.010.C - Administration for design sites requirements. (Ord. BL2025-1005 § 1(Exh. A), 2025)

17.40.550 Permits within an historic overlay district.

The zoning administrator shall not issue any zoning, building or demolition permit for the construction, alteration, repair, demolition or relocation of a building or other structure within any historic overlay district, or for the construction, demolition, relocation or additions increasing habitable area of a building or other structure within an NC overlay district, without prior approval of the historic zoning commission. (Ord. BL2021-843 § 3, 2021; Ord. 96-555 § 10.12(D), 1997)

17.40.560 Permits within the floodplain overlay district.

Grading permits for property within the floodplain overlay district shall be in strict accordance with the requirements of Chapter 15.64, "An Ordinance for Storm Water Management" and Chapter 17.28, Article I of this code. Grading permits issued by the department of public works shall be consistent with an approved PUD master development plan (if applicable) and with a final site plan. (Ord. 96-555 § 10.12(E), 1997)

17.40.570 Permits within the airport overlay district.

No zoning permit shall be issued for construction within the airport overlay district prior to review and approval of the application by the Metropolitan Nashville Airport Authority. (Ord. 96-555 § 10.12(F), 1997)

17.40.580 Certificate of compliance.

Following issuance of a zoning permit, no structure or zone lot shall be used or occupied until the zoning administrator has certified in a final inspection that the property is in full compliance with all applicable provisions of this Zoning Code. The certificate of compliance shall be posted within the building in a manner viewable by the public. Issuance of a certificate of compliance shall not be construed as waiving any provision of this Zoning Code. (Ord. 96-555 § 10.12(G), 1997)

Article XIII. Enforcement

17.40.590 Authority.

The zoning administrator is responsible for the enforcement of all provisions of this title and is authorized to stop work that has commenced without obtaining a required zoning permit or is otherwise not in keeping with an approved final site plan or zoning permit. (Ord. 96-555 § 10.13(A), 1997)

17.40.600 Notification.

If the zoning administrator has reason to believe that there is a violation of this title, the owner or the persons or entities determined to be in violation by the zoning administrator shall be notified. If necessary, governmental agencies or independent experts may be retained to perform tests to determine the existence and extent of a violation, with all associated costs assessed to the owner or the persons or entities determined to be in violation by the zoning administrator if a violation is verified.

Whenever the zoning administrator determines that there has been a repeated or continuing violation of the same provision of the zoning code by the same property owner and that the property owner was previously notified of the existence of the zoning violation, and that such notice occurred more than forty-five days in advance of the zoning administrator's determination under this subsection, the zoning administrator may forego additional notifications and immediately institute the appropriate proceeding at law or in equity to restrain, enjoin, correct or abate such zoning violation; provided however, that the foregoing shall not apply if the property owner has an active application with the board of zoning appeals for a variance or special exception directly related to the violation on the property being cited. (Amdt. 1 to Ord. BL2025-949 § 1, 2025; Ord. BL2025-949 § 1, 2025; Ord. 2001-820 §§ 1,2,3 and 4, 2001; Ord. 96-555 § 10.13(B), 1997)

17.40.610 Violations.

Any violation of this title shall be a misdemeanor offense punishable by law. Each day of a violation shall constitute a separate offense. (Ord. 96-555 § 10.13(C), 1997)

17.40.620 Penalties.

Any violation of this title shall be assessed as a civil penalty at the rate of five hundred dollars per day. In addition, the zoning administrator is authorized to impose triple fees for a zoning permit when work has commenced or occupancy occurs without obtaining a required zoning permit. (Ord. 96-555 § 10.13(D), 1997)

17.40.630 Remedies.

The zoning administrator may, in addition to other remedies, institute injunction, mandamus or other appropriate action to correct or abate a violation of this title. Where a violation exists, the zoning administrator may request that utility service be curtailed until the violation is corrected or abated. (Ord. 96-555 § 10.13(E), 1997)

Article XIV. Nonconforming Uses, Structures, Lots and Signs

17.40.640 General.

In order to protect the health, safety and general welfare of the community, land uses and/or structures which existed legally upon the effective date of the ordinance codified in this title, but which are not in conformance with all the applicable provision of this title, shall be subject to the provisions of this article to the fullest extent permitted by the Tennessee Code Annotated.

Nonconforming uses and structures shall be subject to the following limitations and controls in order to protect and preserve the full use and enjoyment of nearby properties. While legally nonconforming uses are generally permitted to continue by this title, further investment in such uses may be limited so as to encourage a relocation of the use to an appropriately zoned area. In the case of a few highly impactive uses, a reasonable period of time is established in which to bring the property into compliance with this title. It is the intent of this title to discourage increases in the existing degree of land use or structural nonconformance.

The following provisions apply to legally nonconforming uses of land, nonconforming improvements to the land, pre-existing lots or parcels of substandard size, uses nonconforming with respect to operational performance standards, and nonconforming signs. These provisions shall be applied in a manner consistent with Tennessee Code Annotated Section 13-7-208. (Ord. 96-555 § 10.14(A), 1997)

17.40.650 Nonconforming uses.

A. Continuing a Legally Nonconforming Use. A nonconforming use may continue subject to the following provisions:

1. Land with Minor Improvements. In all residential districts, a nonconforming use of land with minor improvements shall cease within three years from the date of the ordinance codified in this title.

2. Special Conditions for Scrap Operations. In all districts except IR and IG, nonconforming scrap operations shall conform to the buffering and operational provisions of Chapters 17.24 and 17.28 within three years of the date of the ordinance codified in this title.

B. Inactivity of a Nonconforming Use. When a nonconforming use has been inactive for a period of thirty continuous months, the land and its associated improvements shall thereafter be used only in accordance with the provisions of this title. An intent to resume activity shall not qualify the property for a continuation of the nonconforming use. For the purposes of this subsection, the thirty month period of continuous ceased operation shall be tolled by:

1. The period in which the use of the property is the subject matter of any action in a court of competent jurisdiction until such time that a final settlement, order, decree, or judgment has been rendered. For purposes of this subsection, "use of the property" shall mean a function or operation that constitutes an activity occurring on the property. Other litigation that does not pertain to the issue of use of the property, including but not limited to bankruptcy litigation, marital or estate asset distribution litigation, or a landlord/tenant dispute, shall not operate to toll the thirty month period of continuous ceased operation.

2. The period during which a property was significantly damaged as a result of the severe rain event that occurred on May 1 and May 2, 2010, provided that in no event shall the period of inactivity exceed sixty months from the date of damage in order for the property to maintain status as a protected nonconforming use.

C. Change of Nonconforming Use. A change in land use classification as defined by the district land use table of Chapter 17.08 shall be subject to the following provisions:

1. When a nonconforming use is changed to a conforming use, all nonconforming protections offered by this code are forfeited.

2. On land with minor improvements, a nonconforming use of land may be changed only to a conforming use.

3. In all residential districts, a change in nonconforming use shall be subject to the following provisions:

a. The nonconforming use of a building designed and constructed for residential activities may be changed only to a conforming use.

b. The nonconforming use of a building designed and constructed for nonresidential activities may be changed to another nonconforming use upon a determination by the board of zoning appeals that the new nonconforming use will be more compatible with surrounding land uses than the existing nonconforming use.

4. In all mixed-use and nonresidential districts, an existing nonconforming use may be changed to a new non-conforming use upon a determination by the board of zoning appeals that the new nonconforming use will be more compatible with surrounding land uses than the existing non-conforming use.

D. Alteration of a Structure Containing a Nonconforming Use. For any use not otherwise protected by Tennessee Code Annotated Section 13-7-208 and subsection E. below, alterations other than incidental shall be permitted only though the issuance of a permit by the board of zoning appeals, but the floor area ratio (FAR) of the expanded use together with all other uses on the lot shall not exceed the maximum FAR currently permitted in the base zoning district.

E. Damage or Destruction of a Structure Containing a Nonconforming Use. For uses not otherwise protected by Tennessee Code Annotated Section 13-7-208, damage or destruction of a building or other form of structure (except a sign) occupied or used by a nonconforming use may be restored pursuant to the following provisions:

1. On land with minor improvements, the nonconforming use shall cease upon damage or destruction in the amount of twenty-five percent or more of the assessed valuation of all buildings, structures and other improvements on the property.

2. In a residential district, a nonconforming use shall cease if fifty percent or more of the floor area of the building or structure is damaged or destroyed. When damage if to less than fifty percent of the floor area, the building may be restored within one year of the date of the damage. A structure containing a two-family nonconforming use within an RS and RS-A district many be restored within two years regardless of percentage of damage or destruction.

3. In any non-residential district, any single-family dwelling that is damaged or destroyed may be restored within one year of the date of damage, regardless of the percentage of damage or destruction. The setbacks of the original dwelling shall apply to any reconstructed residential dwelling.

4. Use of Alternate Formula. If requested by the property owner, the board of zoning appeals may substitute percentage of reconstruction cost for percentage floor area damaged. In estimating reconstruction costs, value of the land shall be excluded. Reconstruction cost data shall be provided by the property owner.

5. Nonconforming use structures damaged or destroyed by flood. Notwithstanding the foregoing, a structure containing an industrial, commercial, business, or residential nonconforming use that was destroyed or significantly damaged as a result of the severe rain event that occurred on May 1 and May 2, 2010, may be restored within sixty months from the date of damage, regardless of percentage of damage or destruction. Otherwise, the structure shall be subject to all provisions of this title. (Ord. BL2015-1153 § 16, 2015; Amdt. 1 to Ord. BL2012-92, §§ 1, 2, 2012; Ord. BL2012-92, §§ 1, 2, 2012; Amdts. 1 and 2 to Ord. BL2007-1543 § 1, 2007; Ord. BL2007-1543 § 1, 2007; Amdt. 1 with Ord. BL2005-631 § 1, 2005; Ord. 96-555 § 10.14(B), 1997)

17.40.660 Nonconforming structures.

The following provisions shall apply to all nonconforming structures not otherwise protected by Tennessee Code Annotated Section 13-7-208.

A. Continuation of Use. The use of a nonconforming structure may be continued except as otherwise provided in this article.

B. Repairs and Alterations. Repairs and incidental or structural alterations may be made to a nonconforming structure provided there is no increase in the degree of non-conformity.

C. Enlargements or Conversions. A nonconforming structure may be enlarged or converted to another permitted use, provided there is no increase in the degree of non-conformity.

D. Damage or Destruction of Nonconforming Structures.

1. A nonconforming structure damaged by any involuntary means to less than fifty percent of its total floor area may be reconstructed. If damage exceeds fifty percent of the total floor area, the structure shall be reconstructed in accordance with all applicable provisions of this title. If requested by the property owner, the board of zoning appeals may consider percentage of reconstruction cost in lieu of percentage of floor area damaged or destroyed. The value of land shall be excluded.

2. Notwithstanding the foregoing and regardless of the percentage of floor area damaged or destroyed, any nonconforming structure damaged or destroyed by the March 3, 2020, tornado may be reconstructed so long as there is not a substantial increase in the degree of non-conformity and the building permit is issued on or before March 3, 2025.

3. A nonconforming structure utilized for the single family use or two family use that is damaged or destroyed by any involuntary means may be fully reconstructed so long as there is not a substantial increase in the degree of non-conformity of the structure. (Amdt. 1 to Ord. BL2021-975 § 1, 2021; Ord. BL2021-975 § 1, 2021; Ord. BL2020-277 § 1, 2020; Ord. 96-555 § 10.14(C), 1997)

17.40.670 Nonconforming lot area.

The following provisions shall apply to legally created lots less than the required minimum lot area.

A. Single Family Structures in Residential and Agricultural Districts. Within the R and R-A, RS and RS-A, RM, RM-NS, RM-A, RM-A-NS, AR2a and AG districts, a single-family structure may be constructed on a legally created lot that contains less than the minimum lot area required by Tables 17.12.020A, 17.12.020B, 17.12.020C or 17.12.020D, provided the lot contains a minimum area of three thousand seven hundred fifty square feet and existed prior to the effective date of the ordinance codified in this title. Single Family Structures in R and R-A, RS and RS-A, RM, RM-A districts shall comply with the bulk standards of the district within the same classification of zoning district (R/R-A and RS/RS-A, RM or RM-A) in which the lot area would be conforming. If the application of these bulk standards results in a change in the minimum side setback, then the height of the single family structure shall be limited to 35 feet, including foundation height. Lots less than 5,000 square feet shall build to the 3' side setback for at least 25% of the depth of the structure beginning at the street setback.

B. Two Family Structures in Agricultural Districts. A two-acre or larger lot (or parcel) in the AG district legally created prior to the effective date of the ordinance codified in this title shall be permitted a two-family structure.

C. Industrial Districts. A nonconforming lot in a IWD, IR or IG district that was legally created prior to the effective date of the ordinance codified in this title shall have all development and use opportunities otherwise afforded by this title. (Ord. BL2019-111 § 1(Exh. A, § 52), 2020; Ord. BL2015-1153 § 16, 2015; Ord. BL2013-419 § 1, 2013; Ord. BL2011-898 § 14, 2011; § 1(13) of Amdt. 1 with Ord. 96-555 § 10.14(D), 1997)

17.40.680 Nonconformance to operational performance standards.

The following provisions shall apply to all uses not otherwise protected by Tennessee Code Annotated Section 13-7-208.

A. Conforming Uses. Any otherwise conforming use which is in violation of the operational performance standards of Chapter 17.28 on the effective date of the ordinance codified in this title shall comply with those standards within ten years.

B. Nonconforming Uses. Any nonconforming use which is also in nonconformance with an operational performance standard of Chapter 17.28 on the effective date of the ordinance codified in this title shall comply with the applicable standard within five years from the date of the ordinance codified in this title. (Ord. 96-555 § 10.14(E), 1997)

17.40.690 Nonconforming signs.

The following provisions shall apply to legally permitted signs that were in compliance with all applicable regulations in effect at the time of installation, but are made nonconforming by the adoption of the ordinance codified in this title.

A. Any sign prohibited by Chapter 17.32, including structures, posts, cables, bases to ground level and electrical wiring, shall be completely removed within sixty days of the effective date of the ordinance codified in this title.

B. An existing on-premises sign may remain exempt from full compliance with the provisions of this title provided the sign does not obstruct a "visibility area" as defined by Chapter 17.20, Article III of this code, is maintained in good condition at all times, and is not abandoned. If qualifying for exemption in all other respects, a sign obstructing a visibility area may be raised in its current location to conform with the requirements of Chapter 17.20, Article III and remain exempt. An existing sign obstructing a visibility area in a CS and CS-A or CL and CL-A district is exempted if, without structural modification, the bottom edge of that sign has a minimum vertical ground clearance of eight feet or the front edge of the sign is at least ten feet from the front property line.

C. A sign shall be brought into compliance with the provisions of this title if at any time the sign is altered, repaired, restored or rebuilt to the extent that the cost exceeds fifty percent of the estimated replacement cost of the sign (in current dollar value). If the alteration or repair is caused by involuntary damage or casualty, or is desired by the owner of the business existing on the effective date of the ordinance codified in this title, the

fifty-percent standard will not apply and the sign may be altered or repaired to any extent. All permits within any six consecutive calendar months shall be aggregated for purposes of measuring the fifty percent standard.

D. For single-tenant lots, a nonconforming sign shall be brought into compliance with this title when the principal land use on the lot is changed to a different use as described by the district land use table.

E. For multi-tenant lots, each tenant may replace, alter, repair or restore an associated sign of a size not to exceed fifteen percent of the facade area of the building occupied by the tenant. Use of this provision must be noted on the overall signage plan. (Ord. BL2015-1153 § 15, 2015; Ord. 96-555 § 10.14(F), 1997)

Article XV. Public Notification

17.40.700 Applicability.

All public hearings required by this title shall be preceded by public notice as provided by this article. (Ord. 96-555 § 10.15(A), 1997)

17.40.710 Notice by newspaper.

No council public hearing pertaining to an amendment to the official zoning map or zoning code shall be conducted unless notice has been given in a newspaper of general circulation in Davidson County no less than twenty-one days prior to the public hearing. The notice shall specify the date, time, location and nature of the public hearing. (Amdt. 1 to Ord. BL2015-1100 § 2, 2015; Ord. BL2015-1100 § 2, 2015; Ord. 96-555 § 10.15(B), 1997)

17.40.720 Notice by mail.

A. No public hearing shall be conducted unless, at least twenty-one days prior to the public hearing, the owner(s) of the subject property and all other property owners within one thousand feet of the subject property have been given notice of the time, date and place of the public hearing. Properties owned by the applicant shall not be included in the distance measurement for public notice. For a public hearing conducted by the board of zoning appeals, the appellant shall be notified by certified mail. In addition to notification of individual property owners, an incorporated condominium association registered with the metropolitan clerk as requesting notification shall also be notified. The provisions of this article shall not apply to the adoption or subsequent amendment of this title, or to amendments of the official zoning map involving floodplain or airport overlay districts.

B. For the revision of existing design guidelines for historic overlays, property owners within one hundred and fifty feet shall be provided written notice.

C. The planning department shall have the responsibility for the preparation and mailing of written notices regarding the public hearing for amendments to the official zoning map initiated by a member or members of council that fall within the fee waiver exceptions in Section 17.40.740.C of the Metropolitan Code. The planning department shall also be responsible for all costs associated with the preparation and mailing of such written notices for three zoning applications per councilmember applicant each fiscal year. The planning department shall make reasonable efforts to combine public hearing written notices into one mailing to limit postage costs.

D. 1. For the subject property where the tax records reflect a mailing address that is different than the address of the subject property, then notification shall also be mailed to the address of the property. The following properties shall be exempt from this requirement:

a. Properties included in the application of an Overlay District as listed in Chapter 17.36, excluding Planned Unit Development Overlays.

b. Properties included in an application to rezone ten or more parcels filed by a member of the metropolitan council in their official capacity.

2. If the subject property is designated as multi-family or mobile home park, in the official tax record, one sign shall be posted by the applicant at each ingress/egress onto the multi-tenant property. The signage shall comply with the requirements of subsections 17.40.730.B, 17.40.730.C.3, and 17.40.730.D and must be positioned in a manner to best inform the public residing at the multi-tenant property without creating a safety hazard.

E. Historic Zoning Commission Preservation Permits. No action shall be taken by the historic zoning commission on a preservation permit application under Section 17.40.420 that is subject to commission review as defined in the historic zoning commission rules unless, at least eleven days prior to consideration of the application by the commission, the permit applicant provides written notice by U.S. Mail of the date, time, and place of the commission meeting to all property owners within two hundred fifty feet of the subject property. The applicant shall be responsible for the costs associated with the preparation of the written notices and shall be responsible for the mailing of such written notices. (Amdt. 1 to Ord. BL2021-621 § 1, 2022; Ord. BL2021-621 § 1, 2022; Ord. BL2021-844 § 1, 2021; Ord. BL2019-1637 § 1, 2019; Ord. BL2016-349 § 1, 2016;

Ord. BL2016-218 § 1, 2016; Ord. BL2015-1140 § 1, 2015; Ord. BL2014-715 § 1, 2014; BL2004-121 § 1, 2004; § 3(1) of Amdt. 1 with Ord. 96-555 § 10.15(C), 1997)

17.40.730 Public notice signs.

Public notice signs shall be posted in accordance with the following provisions on any property subject to council consideration of an amendment to the official zoning map, or to the consideration of a variance, hillside exception or a special exception use permit by the board of zoning appeals. Notwithstanding, the following provisions shall not apply to a change in zoning district title or the specific provisions therein upon the adoption or subsequent amendment of this title. Public notice signs shall be posted in accordance with subsection E of this section on any property subject to consideration of certain preservation permit applications under Section 17.40.420 by the historic zoning commission.

A. General Requirements. Public notice signs shall be posted on any property subject to the public hearing provisions of this title. Public notice signs shall be installed by the owner or owner's representative of the property for which the public hearing is required, unless the applicant is a member of the metropolitan council or a department of the metropolitan government. Where the applicant is a member of the metropolitan council or a department of the metropolitan government, then the applicant or the appropriate department of the metropolitan government will be responsible for posting applicable public notice signs.

B. Display Period. Public notice signs shall be installed on affected properties no less than twenty-one days prior to an established public hearing date, and shall be removed promptly by the landowner following closure of the public hearing.

C. Number and Placement of Public Notice Signs. Public notice signs shall be posted according to the following standards:

1. Number. One sign shall be posted along each three hundred feet of public street frontage. In cases involving large area rezonings initiated by the planning commission or the council, greater spacing intervals may be utilized as appropriate.

2. Location. Whenever practical, signs shall be located within ten feet of a public street right-of-way and positioned in a manner to best inform the motoring public without creating a safety hazard.

3. Size and Content. All public notice signs shall be of adequate size and design to be clearly visible and legible to the motoring public. At a minimum, a public notice sign shall specify the time, date and location of the scheduled public hearing, the general nature of the hearing, and a phone number for additional information.

D. The planning department shall have the responsibility for the preparation of public notice signs for amendments to the official zoning map initiated by a member or members that fall within the fee waiver exceptions in Section 17.40.740.C of the Metropolitan Code. The planning department shall also be responsible for all costs associated with the preparation of such signs for three zoning applications per councilmember applicant each fiscal year.

E. Historic Zoning Commission Preservation Permits. Public notice signs shall be posted on any property subject to a preservation permit application that is subject to commission review as defined in the historic zoning commission rules. The public notice sign shall be installed on affected properties no less than eleven days prior to the consideration by the historic zoning commission. One double-sided 24" (vertical) × 36" (horizontal) sign shall be posted for every fifty feet of public road frontage, excluding alleys, and whenever practical be located within ten feet of the right of way and positioned in a manner to best inform the monitoring public without creating a safety hazard. A sign placed pursuant to this subsection shall contain at a minimum the time, date and location of the scheduled public hearing at the historic zoning commission, the general nature of the hearing, and a phone number for additional information. The applicant shall be responsible for the cost of preparation of these public notice signs, the placement of the signs in accordance with this provision, and providing proof of compliance to the historic zoning commission. (Amdt. 1 to Ord. BL2021-621 § 3, 2022; Ord. BL2021-621 §§ 2, 3, 2022; Ord. BL2016-218 § 2, 2016; Ord. BL2015-1100 § 1, 2015; Ord. BL2014-715 § 2, 2014; Ord. BL2014-685 § 1, 2014; § 3(2) of Amdt. with Ord. 96-555 § 10.15(D), 1997)

Article XVI. Application Fees

17.40.740 Generally.

Standardized fee schedules may be established to partially defray the processing and administration costs associated with each type of application associated with this title. A fee schedule established by this article shall be authorized by passage of a resolution by the council. All application fees shall be paid to the metropolitan government by the applicant at the time of filing. A fee structure established under authority of the preceding code and in effect upon the effective date of the ordinance codified in this title shall remain in effect

until superseded by a fee structure established under authority of this title. Fees shall be waived for the following:

A. Applications initiated by any federal or state agency, any department of the metropolitan government, or the metropolitan development and housing agency;

B. Any large area rezoning initiated by the planning commission to implement the general plan.

C. Any rezoning request initiated by a member or members of council for the purpose of:

1. Rezoning the property from a greater intensity residential use to a lesser intensity residential use (i.e., an "R" district to an "RS" district);

2. Rezoning the property from an office, commercial, or industrial district to a residential or residential single-family district;

3. Applying the urban design overlay district, historic preservation district, neighborhood conservation district, urban zoning overlay district, contextual overlay district, corridor design overlay district, residential accessory structure overlay district, two-story residential overlay district, detached accessory dwelling unit overlay district, or commercial compatibility overlay district as provided in Chapter 17.36;

4. An amendment to or cancellation of a planned unit development (PUD) district after the planning commission has determined the PUD to be inactive in accordance with Section 17.40.120.H.; or

5. For any other rezoning request initiated by a member of council, provided that each member of council shall be entitled to no more than three such fee waivers per fiscal year unless the rezoning request is consistent with subsections C.1 through C.4 of this section.

D. Up to two applications per fiscal year submitted to the board of zoning appeals by a member or members of council that have an identified community benefit and meet at least one of the following requirements:

1. The application is not for the benefit of an individual property owner or development.

2. The property owner demonstrates an inability to pay the required fee for the application. (Ord. BL2025-909 § 7, 2025; Ord. BL2024-335 § 1, 2024; Ord. BL2022-1509 § 3, 2023; Amdt. 2 to Ord. BL2021-620 § 2, 2021; Ord. BL2021-620 § 2, 2021; Ord. BL2020-151 § 7, 2020; Ord. BL2019-1540 § 7, 2019; Ord. BL2016-218 § 3, 2016; Ord. BL2014-771 § 7, 2014; Ord. BL2014-715 § 3, 2014; Ord. BL2012-229 § 1, 2012; Ord. BL2010-725 § 1, 2010; Ord. BL2006-1173 § 1, 2006; Ord. BL2004-409 § 1, 2005; Ord. 96-555 § 10.16(A), 1997)

17.40.750 Fees established by the zoning administrator.

A. The zoning administrator may develop for metropolitan council consideration fee schedules appropriate to partially or totally defray costs associated with the processing and review of final site plan applications for properties not subject to approval by the planning commission, and for all other permits reviewed under the jurisdiction of the zoning administrator.

B. Telecommunications Facility.

1. In addition to the fee schedule in subsection A. of this section, metro may require, in its sole discretion, a supplemental review by the Director of the Information Technology Services (ITS) Department or his designee, including an approved consultant, for any application for a telecommunication facility where new placement of telecommunications equipment on an alternative structure or new vertical support structures are sought or the complexity of the analysis requires technical expertise, and/or shall require the same for any request for a variance to Section 17.16.080.C., and all the costs of such review, in an amount not to exceed three thousand five hundred dollars, shall be borne by the applicant.

2. Based on the results of the supplemental review, the zoning administrator may require changes to or supplementation of the applicant's submittal(s).

3. The supplemental review may address any or all of the following:

a. The accuracy and completeness of the application and any accompanying documentation, including the impossibility of co-locating.

b. The applicability of analysis techniques and methodologies.

c. The validity of conclusions reached.

d. Whether the proposed telecommunications facility complies with the applicable approval criteria and standards of the Zoning Code and other applicable law. (Ord. BL2016-415 § 6, 2016; Ord. BL2001-675 § 1 (part), 2001; Ord. 96-555 § 10.16(B), 1997)

17.40.760 Fees established by the planning commission.

The planning commission may develop for metropolitan council consideration fee schedules appropriate to partially or totally defray costs associated with the processing and review of the following types of applications:

A. A change in zoning district classification on the official zoning map;

B. A change in the text of the zoning regulations;

C. Applying, canceling or modifying a planned unit development (PUD) or an overlay district;

D. A final site plan;

E. The noticing by mail, advertising in a newspaper of general circulation, and posting signs for a public hearing deferred by the planning commission or the metropolitan council; and,

F. A mandatory referral for an encroachment of the public right-of-way, a street name change, or the abandonment of a public street, alley or easement. (Ord. BL2001-675 § 1 (part), 2001; Ord. 96-555 § 10.16(C), 1997)

17.40.770 Fees established by the board of zoning appeals.

The board of zoning appeals may develop for metropolitan council consideration fee schedules appropriate to partially or totally defray costs associated with the processing and review of the following types of applications:

A. A variance to a provision of this title;

B. A special exception use;

C. A change to a nonconforming use or structure;

D. Any other application in which the board is required or requested to act. (Ord. BL2024-335 § 2, 2024; Amdt. 1 to Ord. BL2008-285 § 1, 2008; Ord. BL2008-285 § 1, 2008; Ord. BL2001-675 § 1 (part), 2001; Ord. 96-555 § 10.16(D), 1997)

Article XVII. Inclusionary Housing

17.40.780 Purpose and applicability of inclusionary housing provisions.

A. Purpose. The purposes of this section are to promote the public health, safety and welfare by increasing the production of inclusionary housing units to meet existing and anticipated housing and employment needs; mitigating the impacts of increasing housing cost and provide housing affordable to low and moderate income households; providing for a range of housing choices throughout the city to avoid the concentration of poverty; and to provide a mechanism by which residential development can contribute in a direct way to increasing the supply of affordable and workforce housing in exchange for additional development entitlements other than those otherwise permitted as a matter of right.

B. Applicability.

1. When additional residential development entitlements are gained through an amendment to the official zoning map or when public resources or property is provided for a residential development, the rental residential units shall be subject to the provisions of this section as long as adequate financial incentives from the Metropolitan Government of Nashville and Davidson County are available. On projects where a funding cap limits the financial incentives available to less than the value calculated based on the difference between the market rate rent and the selected workforce rent, the set aside may be adjusted annually to align the needed incentive with the funding available. A property owner or developer with for-sale residential units may participate in the incentives of this section.

2. For residential uses, developments fewer than five units are exempt. For the purposes of this subsection, "development" shall include any residential or mixed use development at one or more adjoining sites with common ownership or under common control, within a period of five years from the first date of the issuance of a building permit for construction.

3. Inclusionary housing shall not be provided and no financial incentives shall be granted if the average unit sale price or rental rate is less than, or within 5% above 100% Median Household Income (MHI) market prices or rental rates for Nashville and Davidson County and the Inclusionary Housing Plan demonstrates that the census tract average market rate prices or average rental rates for comparable units are affordable to a household at 100% MHI. (Ord. BL2016-133 § 1, 2016)

17.40.790 Requirements for inclusionary housing.

A. Construction. The set aside for affordable or workforce housing shall be:

	Rental at 60% MHI or less	Rental at Greater than 60% MHI to 80% MHI	Rental at Greater than 80% MHI to 100% MHI (available in the UZO only)	For-sale at Greater than 60% MHI to 80% MHI	For-sale at Greater than 80% MHI to 100% MHI (available in the UZO only)
Single-family and Two-family uses	12.5% of total residential units	15% of total residential units	17.5% of total residential units	10% of total residential units	15% of total residential units
Multi-family uses less than 3 stories	12.5% of total residential floor area	15% of total residential floor area	17.5% of total residential floor area	10% of total residential floor area	15% of total residential floor area

	Rental at 60% MHI or less	Rental at Greater than 60% MHI to 80% MHI	Rental at Greater than 80% MHI to 100% MHI (available in the UZO only)	For-sale at Greater than 60% MHI to 80% MHI	For-sale at Greater than 80% MHI to 100% MHI (available in the UZO only)
Multi-family uses (3 to 6 stories)	10% of total residential floor area	12.5% of total residential floor area	15% of total residential floor area	n/a	n/a
Multi-family uses (≥ 7 stories)	7.5% of total residential floor area	10% of total residential floor area	12.5% of total residential floor area	n/a	n/a
The office of economic opportunity and empowerment with assistance from the finance department may approve a mixture of MHI levels, provided the mixture is equivalent to the set asides above. The equivalency of the mixture of MHI levels and the approval shall be documented in the inclusionary housing plan.					
For the purposes of this Article, the residential floor area shall be the net leasable residential floor area.					

B. In Lieu Construction.

1. In lieu of meeting the inclusionary housing incentives on site, construction at the same rates included in subsection A of this section may be provided within the following distances from the development that is providing inclusionary housing:

i. One mile along the corridor, if the development that is providing inclusionary housing is on a multimodal corridor designated in the Major and Collector Street Plan, excluding expressways, freeways and ramps.

ii. A half mile, if the development that is providing inclusionary housing is not on a multimodal corridor designated in the Major and Collector Street Plan, excluding expressways, freeways and ramps.

iii. In lieu construction shall not be permitted at an alternate location if the inclusionary housing plan demonstrates that the alternate location's census tract market rate prices or rental rates for comparable units are affordable to a household at 100% MHI.

2. Use and occupancy permits for the affordable and/or workforce units shall be issued prior to the issuance of any use and occupancy permit for principal project.

C. In Lieu Contribution. There is hereby established a housing incentives fund to be maintained as an administrative account by the finance department for the purpose of funding the incentives grant program. In lieu of meeting the inclusionary housing incentives for rental units on site, prior to the issuance of building permits, an in lieu contribution may be provided to the housing incentives fund as follows:

Within the UZO	Outside of the UZO
Per square foot equivalent of 50% of the affordable sales price at 100% MHI for Davidson County 12.5% of the total residential floor area in a rental project.	Per square foot equivalent of 50% of the affordable sales price at 80% MHI for Davidson County 10% of the total residential floor area in a rental project.
The affordable sales price shall be determined by the Office of Economic Opportunity and Empowerment with assistance from the Finance Department annually based on: a. A maximum down payment of 5.0%, b. Current Year MHI thresholds adjusted for household size published by HUD, c. Prior six-month average rate of interest based on the Fannie Mae Yield on 30-year mortgage commitments (price at par) plus one-half point (0.5%) spread, d. 30-year mortgage term, e. Any homeowner fees, taxes and insurance, and f. Typical unit size.	

(Ord. BL2016-133 § 1, 2016)

17.40.800 Standards for construction and occupancy of affordable and/or workforce housing.

A. With the building permit application, the owner/developer shall submit an inclusionary housing plan, which documents the following:

1. Number of total residential units provided under the site plan.

2. Whether the development uses public resources or public property.

3. Number of affordable or workforce housing units provided.

4. Income levels of targeted families for affordable or workforce housing units.

5. The proposed rents or sales prices and guarantee of limits on future rent increases or sales prices.

6. Location of affordable or workforce housing units.

7. Sizes of affordable or workforce housing units.

8. Bedroom counts of affordable or workforce housing units.

9. Market rate pricing or rental rates for comparable units within the census tract for the project site and, if applicable, the in lieu site.

10. The party responsible for compliance reports, with approval from the office of economic opportunity and empowerment with assistance from the finance department.

B. To ensure livability, inclusionary housing units shall be at least eighty percent of the average size of market rate units and the breakdown of bedroom counts of inclusionary housing units shall be similar to the breakdown of bedroom counts for the market rate units in the project. After the inclusionary housing square footage is allocated according to the distribution of market rate units, any remaining square footage too small for construction of a unit shall utilize the in lieu contribution option.

C. Exteriors of inclusionary housing units shall closely resemble the exteriors of other units in a project.

D. The owner shall ensure to the satisfaction of the metropolitan government that the inclusionary housing units will:

1. Be occupied by eligible households.

2. Be maintained as rental inclusionary housing units for a minimum of fifteen years from the date of initial occupancy and/or be maintained as for-sale inclusionary housing unit for thirty years from the date of initial occupancy. (Ord. BL2016-133 § 1, 2016)

17.40.810 Enforcement.

A. Prior to the issuance of the first building permit, all standards for construction and Occupancy shall be documented on the building permit plans.

B. Prior to the issuance of the use and occupancy permit, all standards for construction and Occupancy shall be satisfied and documentation provided to the codes department.

C. During the applicable period, the owner, developer or designee shall provide a compliance report to the office of economic opportunity and empowerment in the form and manner determined by the office of economic opportunity and empowerment with assistance from the finance department. The party responsible for compliance reports shall be approved by the office of economic opportunity and empowerment and noted inclusionary housing plan. For for-sale developments, individual owners are not permitted to be the party responsible for compliance reports. (Ord. BL2016-133 § 1, 2016)

17.40.820 Sunset provisions.

A. The provisions of Article XVII (Inclusionary Housing) shall expire and be null and void as of December 31, 2019, unless extended by resolution of the metropolitan council. This provision, commonly known as a "sunset provision," is included to ensure that the effectiveness and necessity of this section is reviewed by the metropolitan council after its adoption.

B. Two years after its passage, the planning department shall conduct a study of the impact of Article XVII (Inclusionary Housing) and related incentives. This study shall include an assessment of the economic impact, impact on affordable housing and whether the incentives should be recalibrated. The study shall be delivered to the metropolitan council no later than six months before the sunset date. (Amdt. 1 to Ord. BL2016-133 § 1, 2016; Ord. BL2016-133 § 1, 2016)
