DIVISION B. WATER MAIN INSTALLATIONS

Sec. 401-11. New Water Main Extensions, General.

Except as specifically provided by ordinance, all construction of water main extensions and water tap service in streets and ways not already supplied with water shall be in accordance with one of the plans set forth in Sections 401-12 to 401-16, inclusive.
(C.O. 401-11; reordained as C.M.C. 401-11, eff. Jan. 1, 1972)

Sec. 401-12. Plan 1, Payment of Entire Cost in Advance.

Any one or more property owners may request the superintendent to determine the feasibility and the estimated cost of the construction of a proposed water main extension to serve their premises. If the superintendent approves the proposed extension and determines the estimated construction cost, such property owners may deposit with the depart-

ment a sum equal to such estimated cost and the superintendent shall thereupon proceed with the construction. Any surplus in the deposit amount over and above the construction cost shall be refunded to the owner or owners or their agent. Should the construction cost exceed the deposit amount, the owner or owners shall pay this excess amount and no water taps shall be installed or water service rendered from the extension until the cost is paid in full.
(C.O. 401-12; reordained as C.M.C. 401-12, eff. Jan. 1, 1972)

Sec. 401-13. Plan 2, Construction by Owner.

The superintendent may permit the owner or owners of property to be served to arrange for the laying of water main extensions by private contract. In such cases, the plan for the water main must be approved by the superintendent and the political subdivisions and planning commissions having jurisdiction. Before starting a project the contractor shall furnish a bond as a guarantee for each project or section thereof and obtain all required street opening permits.

All material used must have been inspected by a water works representative. All work shall be done in accordance with water works specifications. Charges for inspection of material and construction shall be established by the superintendent and paid by the contractor.
(C.O. 401-13; a. Ord. No. 374-1967, eff. Oct. 27, 1967; reordained C.M.C. 401-13, eff. Jan. 1, 1972)

Sec. 401-14. Plan 3, Construction by Owner With Water Works Participation.

When the development of a subdivision requires the owner to lay water mains in existing dedicated streets or highways, the water works will participate in the cost by supplying materials not to exceed those stipulated here below.

The superintendent will determine the abutting front footage, not owned by the developer, but likely to be developed in the future and which can be assessed.

When the new main is to be 8-inch, the water works will furnish:

(a) Half as many lineal feet of water main as the amount above determined;

(b) All of the valves to be installed in the existing street except those the developer would be required to install if there had been a main in the existing street in front of his property; and

(c) When the property to be served is a corner lot or the new main must pass a corner lot, or lots, to reach the property to be served, the water works will furnish enough lineal feet of pipe, in no case to exceed 150 feet, to reach from the existing or proposed main on one street past the second side of the corner lot, or lots, to the back property line thereof, and any valves required to make the connection at the intersection of the mains.

When the water works directs the owner to install a new 12- or 16-inch main under the provisions of Section 401-18 in any political subdivision, the water works will furnish, in cash, the amount required for participation by the Hamilton County contract. The water works will also furnish, as determined by the superintendent, either pipe and valves or cash of the same monetary value as would have been furnished had the main been 8-inch.

Plan 3 is subject to all the requirements of Plan 2 unless specifically excepted in this section.

When a main is installed by Plan 3, charges shall be assessed against owners other than

the participating developer at an amount per lineal abutting foot of their property fixed by the superintendent as the average cost per lineal foot of laying 8-inch water mains in the city of Cincinnati during the preceding calendar year.

When a water main has been constructed in accordance with Plan 3, water tap connections to such extension shall be permitted only to serve premises for which the front foot charge was collected at the time of filing the petition, provided that the owners of other property may be permitted to make connections upon payment of sums respectively equal to the price per lineal foot fixed by the superintendent plus 10 percent, times the front footage of the abutting premises owned by them.

Where service is granted from a water main by virtue of an easement as provided in Section 401-32, or by an ownership of a small frontage serving a larger tract, the Plan 3 or Plan 4 assessment shall be not less than 50 feet for parcels or lots comprising not more than one-half acre, not less than 75 feet for areas between one-half and one acre, not less than 100 feet for areas between one and two acres, and not less than 150 feet for areas between two and three acres. For areas in excess of three acres the superintendent shall be authorized to promulgate an assessment based upon benefits to be derived. If such bill is not paid within 90 days after the date of rendition, an additional charge of 10 percent thereof shall be added thereto. No connecting tap shall be permitted to be made in any such extension, whether located in or outside the city, until the owner of the property requesting the tap shall have paid the charges specified herein or obligated himself to do so.
(C.O. 401-14; a. Ord. No. 287-1957, eff. Aug. 2, 1957; a. Ord. No. 517-1964, eff. Jan. 15, 1965; a. Ord. No. 374-1967, eff. Oct. 27, 1967; reordained as C.M.C. 401-14, eff. Jan. 1, 1972; a. Ord. No. 409-1972, eff. Oct. 7, 1972; a. Ord. No. 17-1986, eff. Jan. 8, 1986)

Sec. 401-15. Plan 4, Construction Without Petition.

Whenever the director determines it is in the best interests of the water distribution system to construct a water main extension, either within the city or outside of the city, in instances where in the director's opinion an owner or developer cannot be required to construct the extension the director is authorized, with the approval of the city manager, to construct such extension without the filing of any petition therefor or the making of any advance payment or deposit. After the completion of any such extension, the director shall cause each premises abutting the street or road in which such extension is laid to be charged a deferred tap-in charge in an amount equal to that which it would have been charged under Plan 3, Section 401-14, except premises not likely to be subdivided and already served from a different water main. Owners of abutting premises for which a Section 401-32 water main agreement has been executed shall be required to pay their portion of the cost of construction. Owners of abutting premises may be permitted to make connections to Plan 4 water mains upon payment of the deferred tap-in charge, if any, in the manner provided under Plan 3, Section 401-14.
(C.O. 401-15; a. Ord. No. 287-1957, eff. Aug. 2, 1957; a. Ord. No. 221-1959, eff. July 24, 1959; a. Ord. No. 514-1964, eff. Jan. 15, 1965; a. Ord. No. 374-1967, eff. Oct. 27, 1967; reordained as C.M.C. 401-15, eff. Jan. 1, 1972; a. Ord. No. 255-1990, eff. June 20, 1990.)

Sec. 401-16. Plan 5, Assessment in Accordance with Revised Code.

The owners of property to be served by a proposed water main extension may petition for the construction of such extension and the

assessment of the cost thereof in accordance with the provisions of the Revised Code of Ohio.
(C.O. 401-16; reordained as C.M.C. 401-16, eff. Jan. 1, 1972)

Sec. 401-17. Property Owners Not to be Relieved from Payment.

No construction of water main extensions shall be proceeded with by the superintendent under Section 401-14 until the advance payments or deposits required by such section have been paid in full to the water department. If in any case, by reason of inadvertence or oversight, construction shall have been made without compliance with advance payment requirements, such inadvertence or oversight shall not relieve the benefited property owner from the obligation to pay the amount due. In such cases, no water tap connection shall be made or water service rendered unless and until the required payments or deposits are made.
(C.O. 401-17; reordained as C.M.C. 401-17, eff. Jan. 1, 1972)

Sec. 401-18. Size of Mains.

The size of the mains to be used in the construction of extensions as provided for in Sections 401-11 to 401-16, inclusive, shall in every case be determined by the superintendent.

When a developer or owner is installing a distribution main under any one of the above numbered plans, the superintendent may direct that the size be increased to 12-inch or 16-inch, if such would improve the system. The water works, in these cases, will pay a portion of the cost of installation as follows:

(a) Should a 12-inch water main be required, the water works' portion of the cost will be 40 percent of the reasonable and proper cost, as determined by the superintendent.

(b) Should a 16-inch water main be required, the water works' portion of the cost will be 51 percent of the reasonable and proper cost, as determined by the superintendent.

(C.O. 401-18; a. Ord. No. 17-1964, eff. Feb. 14, 1964; reordained as C.M.C. 401-18, eff. Jan. 1, 1972)

Sec. 401-19. Mains in Private Property or Easements.

No water main extension shall be constructed in private property or easements except:

(a) When the planning commission or such other appropriate authority having jurisdiction approves plans for the construction of garden apartments, condominiums, and/or planned unit developments with access to the houses by means other than a dedicated street, a water main may be laid and maintained in an easement provided it first meets the requirements of the director.

(b) Where the planning commission or such other appropriate public authority having jurisdiction has approved plans for a shopping center, a water main may be laid and maintained in an easement provided that it first meets the requirements of the director.

(c) Where the planning commission or such other appropriate public authority having jurisdiction has approved plans for a residential subdivision with small frontages serving panhandle lots, a water main may be laid and maintained in an easement provided it first meets the requirements of the director.

As used herein, the term "panhandle lot" shall mean a lot which utilizes a strip of ground, not a building site, to provide access to or legal frontage on a public street.

In addition to such other requirements as may be imposed or promulgated by the director from time to time by rule or regulation of the water works regarding water mains in panhandle lots, the minimum number of lots to be served, and the length and location of the water main shall be reviewed and determined by the director.

Installation under these exceptions must comply with all the regulations of Plan 2, Construction by Owner, Section 401-13.
(C.O. 401-19; a. Ord. No. 221-1959, eff. July 24, 1959; reordained as C.M.C. 401-19, eff. Jan. 1, 1972; a. Ord. No. 255-1983, eff. June 8, 1983)

Sec. 401-20. Mains in Unimproved Streets.

No water main extension shall be laid in any unimproved street, whose profile is such that in case of the improvement of the street, it would be necessary to relay the main to conform to the established grade.
(C.O. 401-20; reordained as C.M.C. 401-20, eff. Jan. 1, 1972)

Sec. 401-21. Use of Plan 3 Prohibited Where Territory Not Capable of Development.

No water main extension shall be constructed under the provisions of Plan 3 where, owing to the topography of territory abutting the street, or to other conditions, further property development along such street is precluded or is unlikely.
(C.O. 401-21; reordained as C.M.C. 401-21, eff. Jan. 1, 1972)

Sec. 401-22. Record of Outstanding Charges to be Filed with the County Auditor.

The superintendent shall maintain a record of all charges outstanding against premises abutting streets improved with water main extensions in accordance with Plan 3 or Plan 4. Such record shall be suitably indexed as to streets and parts of streets, and shall at all times be available for public inspection. With the consent of the county auditor of Hamilton county, a duplicate copy of such record shall be kept on file in the office of the county auditor for the convenience of title examiners and prospective purchasers of real estate. As charges are paid or as new charges are imposed, the necessary notations shall be made in the record by way of amendment or supplement. Such notations by way of amendment or supplement shall be copied into the county auditor's duplicate record at intervals of not more than 30 days. The record shall at all times be accompanied by a statement from the superintendent indicating the date to which the record has been carried.
(C.O. 401-22; reordained as C.M.C. 401-22, eff. Jan. 1, 1972)

Sec. 401-23. Cases of Inadvertence or Oversight.

In the case of water main extensions completed on or after January 1, 1928, in accordance with rules and regulations of the department heretofore in effect, paralleling the provision of Plan 3 as provided for by Section 401-14, where, by inadvertence or oversight, water tap connections have been made to a building without the previous collection of the amounts chargeable in accordance with said plan, the superintendent shall bill the owner of such premises for the amounts due and payable. If the amount of such charges shall not be paid at or before the next regular water payment date occurring not less than 30 days after the date of such billing, the water supply for such premises shall be shut off as in the case of unpaid water bills and shall not be turned on again until the amount of such bill shall be paid or provided for. In the case of amounts in excess of $25, the superintendent shall be authorized, on application of the property owner, to allow pay-

ment to be made in not more than four quarterly payments, no payment, however, except the final one, to be less than $10.

Sec. 401-24. Owner Requested Replacement of Existing Water Mains.

When one or more owners propose redevelopment of properties along existing water mains located in public rights-of-way or easements, such owner or owners may request that the director evaluate the sufficiency and capacity of the existing water mains to provide adequate water service to the proposed redevelopment as described in plans provided to the department. If the director determines that an existing water main of 6" or less in diameter cannot meet the requirements for the redevelopment based on review of current requirements, including, without limitation, Chapter 401, the rules and regulations, and applicable building code and fire protection standards, the director may authorize the main to be replaced in accordance with rules and regulations promulgated by the director to implement this section, which may specify allocation of the replacement cost and performance between the department and the owner.

DIVISION C. SERVICE BRANCHES

Sec. 401-31. Application for Water Service Connection.

Application for water service branches and water meter service may be made by any property owner or by his authorized agent, or by any certified person as defined in Section 401-41. Application for the service branch and the meter service must be made concurrently except as in (a), (b), and (c) below.

(a) When it is necessary to install a water service branch to vacant property in order to precede the paving of a highway, the owner, the owner's agent, the political subdivision paving the street, or its agent, may make application for a water service branch only.

(b) Where water service branches are to be installed to lots within a subdivision, prior to paving the proposed streets, or to lots within a proposed approved subdivision fronting on an existing street or roadway, applications may be made for service branches only, by the owner, the owner's agent or the contractor.

(c) Where a water service branch is to provide fire protection service only, the application for such service branch must be made by a certified person.

By making application for water service branches, or by using or permitting the use of such branches, the owner and any other person using the service branch agree to be bound by all the provisions of this chapter and all lawful rules and regulations of the department.
(C.O. 401-31; a. Ord. No. 180-1960, eff. June 17, 1960; reordained as C.M.C. 401-31, eff. Jan. 1, 1972; a. Ord. No. 12-178, eff. Feb. 10, 1978)

Sec. 401-32. Property Served Must Abut Roadway.

It is the obligation of the owner desiring service to install distribution mains across all of the owner's abutting frontage and, if necessary, to extend a distribution main to that frontage from an existing main.

No service branch shall be installed to serve any premises unless the premises abuts a street or road in which a distribution main has been installed. And no service branch shall be installed to serve any premises if distribution mains have not been installed across all frontage of the premises abutting streets or roads, unless the owner of such premises has paid the owner's portion of the cost, as determined by the director, of extending a distribution main across the entire abutting frontage of the premises. Provided, however, if the owner executes the agreement required and described below, and:

(a) If the premises to be served abuts no street or road, then the director may permit the premises to be served by a service branch laid in a permanent easement satisfactory to the director permitting installation and maintenance of the branch, running from the premises to a street or road in which a distribution main has been installed; or

(b) If the premises to be served abuts a street or road in which distribution mains have been installed across part of but not the entire frontage of the premises, and, in the opinion of the director, it is not then feasible, or not in the best interests of the water distribution system, to extend water mains across the remaining abutting frontage of such premises, then the director may permit the premises to be served by a service branch from the main in the abutting frontage; or

(c) If the premises to be served abuts a street or road in which distribution mains have not been installed across any frontage of the premises, and, in the opinion of the director, it is not then feasible, or not in the best interests of the water distribution system, to extend distribution mains across any part of the frontage of the premises, then the director may permit the premises to be served by a service branch laid in a permanent easement satisfactory to the director, permitting installation and maintenance of the branch, running from the premises to a street or road in which a distribution main has been installed.

In each instance provided in (a), (b) and (c) above, the owner of the premises shall execute an agreement on behalf of himself, his or her heirs, successors and assigns, in the form prescribed by the director, which shall be recorded at the expense of the owner in the recorder's office of Hamilton county, and which shall provide:

(1) That the owner shall within a reasonable time (no greater than 90 days) following written request of the director, construct a distribution main in all streets or roads upon which the premises abuts at the date of the agreement (or thereafter abuts, if there is no then existing abutting frontage), or pay his or her portion of the cost of such construction, as determined by the director, or, if sufficient in the view of the director, upon request of the proper governmental authority join in a petition for construction of such water main on an assessment basis; and that if such petition is requested but construction does not result therefrom in a reasonable period of time (no greater than 180 days), then the director may require the owner to construct or pay for the construction of the required distribution mains;

(2) That a failure of the owner of the premises to observe the terms of the agreement shall be grounds for the termination of water service; and

(3) That in any instance where the owner is permitted service by a service branch laid in a permanent easement, if at some future time a distribution main is installed across abutting frontage of the premises, the owner shall at the owner's expense relocate the water meter and service branch to that abutting frontage in a manner approved by the director, within 90 days of notice by the director.

As used in this section, "frontage" includes all frontage of a premises abutting any street or road, including a limited-access highway; an easement for ingress and egress or for utilities does not constitute "frontage" on a street or road.

Sec. 401-33. Installation of Service Branch.

When a service branch is installed, the tap connection to the water main and so much of the branch as is within the highway to its property line shall be installed in accordance with (a) and (b) below:

(a) The department shall install a service branch, except under (b) hereof, and the service branch shall remain the property of the department.

(b) It shall be the obligation of every developer or subdivider whose development includes the extension of the Cincinnati Water Works System to provide a separate water branch for every lot or facility abutting proposed streets or rights-of-way within the development, which water service branch shall be installed from the water main to the right-of-way or property line and shall become the property of the department upon acceptance.

Any such developer or subdivider shall be responsible for the proper installation, altering or repairing of such service branches in accordance with the ordinances of the City of Cincinnati and the rules and regulations of the superintendent of water works, and shall furnish a bond indemnifying the City of Cincinnati for any loss it might sustain through the fault of the developer, the developer's agents or contractors, or for the failure of the developer, the developer's agents or contractors, to properly install, alter, repair, or connect such water service branches, or for failure to perform any other act in accordance with the ordinances of the City of Cincinnati and the rules and regulations of the superintendent of water works. The bond shall be in a form prescribed by the city solicitor and shall be signed by the developer and a corporate surety authorized to do business in the State of Ohio.

The bond shall be set in an amount to be determined by the Director of the Greater Cincinnati Water Works ("Director") or his or her designee. Such determination shall be based on costs for construction and materials related to water service branch installation, alteration or repair, and other factors that may be determined relevant by the Director. The determination of the amount of the bond will be left to the discretion of the Director and will be final.

No water service branch shall be used for water supply purposes without a water meter. Branches intended for fire protection purposes shall be subject to Division K of this chapter and any rules and regulations conformable thereto as may be promulgated by the superintendent.

(C.O. 401-33; a. Ord. No. 374-1967, eff. Oct. 27, 1967; reordained as C.M.C. 401-33, eff. Jan. 1, 1972; a. Ord. No. 14-1974, eff. Jan. 9, 1974; Ord. No. 352-2005, eff. Oct. 20, 2005)

Sec. 401-34. Building Permits Not to be Approved Unless City Water is Available.

No permit for the erection of a building intended for human occupancy shall be approved by the building commissioner until the water works has certified the availability of city water, or the commissioner of health has approved some other source.

(C.O. 401-34; a. Ord. No. 180-1960, eff. June 17, 1960; reordained as C.M.C. 401-34, eff. Jan. 1, 1972)

Sec. 401-35. Requirements of Service Branches and Meters.

The superintendent shall establish minimum requirements for service branches

and meters. Applications for water service must include full information as to the size, occupancy and commercial or manufacturing processes to be served, except in the case of branches to vacant property preceding highway improvements.
(C.O. 401-35; a. Ord. No. 180-1960, eff. June 17, 1960; reordained as C.M.C. 401-35, eff. Jan. 1, 1972)

Sec. 401-36. Water Branches Not to be Laid in Sewer Trenches.

No water service branch shall at any time be laid in the same trench with a sewer connection. In extreme cases, shelving will be permitted, in which cases, the shelf shall be 18 inches wide and the water service pipe so staked as to prevent its slipping into the sewer trench.
(C.O. 401-36; reordained as C.M.C. 401-36, eff. Jan. 1, 1972)

Sec. 401-37. Interconnected Service Branches.

When city water is supplied through two or more interconnecting service branches, each branch shall be separately metered and each branch shall be equipped with a check valve which is installed to prevent the water from flowing back into the city mains. If the interconnected services are for fire protection only, each branch shall be equipped with a separate detector check assembly. If a fire protection service is interconnected with a branch supplying domestic or commercial water, each service shall be fully metered and equipped with an approved check valve.

Where an area is also supplied with water obtained from a source other than that provided by the Cincinnati Water Works, the two supplies may not be interconnected unless the method of connection has been approved by the Cincinnati Water Works and the Ohio State Environmental Protection Agency.
(C.O. 401-37; a. Ord. No. 374-1967, eff. Oct. 27, 1967; reordained as C.M.C. 401-37, eff. Jan. 1, 1972)

Sec. 401-38. Replacement and Repair of Service Branches.

Where a service branch is installed, the department shall repair and maintain it or replace it with a branch of the same size, without charge, from the main to and including:

(a) The valve, where the valve is not beneath the street paving or the street curb.

(b) To a point behind the curb or beyond the edge of the street paving where the valve is in the paving.

(c) To a point on the private property side of a retaining wall where such retaining wall has been installed by a public entity as part of a highway improvement.

A property owner desiring a service branch of a size different from the existing branch shall make application and pay for it in the same manner as for any other new water service connection.
(C.O. 401-38; a. Ord. No. 374-1967, eff. Oct. 27, 1967; a. Ord. No. 177-1969, eff. June 6, 1969; reordained as C.M.C. 401-38, eff. Jan. 1, 1972)

Sec. 401-39. Maintenance of Service Branch by Property Owner.

That the portion of a water branch from points described in (a), (b), and (c) of Section 401-38 into the premises served, shall be maintained in proper condition by the owner. Failure to repair a leak or leaks in the time allotted on notice shall be sufficient cause to justify the department in discontinuing the

service. When service has been discontinued for failure to repair leaks, it will not be restored until the department has been notified and is satisfied, after inspection, that repairs have been properly completed. In the case of a Lead Service Line as defined in this chapter, the owner shall comply with the requirements of 401-130 and shall temporarily repair and then permanently replace leaking or damaged Lead Service Lines.
(C.O. 401-39; a. Ord. No. 374-1967, eff. Oct. 27, 1967; a. Ord. No. 177-1969, eff. June 6, 1969; reordained as C.M.C. 401-39, eff. Jan. 1, 1972; a. Ord. No. 185-2017, § 2, eff. July 28, 2017)

Sec. 401-40. Disconnection of Service Branch by Department.

The department is authorized to disconnect a service branch from the water main and remove the water meter:

(a) Upon application by the owner or authorized agent when use of the service branch is no longer required;

(b) When a water bill is delinquent and records indicate that the service branch has been unused for at least one year;

(c) When after shut-off of water service by the department for non-payment of a water bill or other authorized reason, the water service is recommenced by private action without authorization from the department, for the benefit of the property served;

(d) When a fire protection service branch has no piping or equipment connected thereto which could make its use possible, and has been unused for at least one year;

(e) When conditions render impractical any future use of an existing unused service branch;

(f) When a non-copper service branch installed before 1928 has never been used; or

(g) When the director determines that disconnection is otherwise necessary physically to protect the water system or prevent theft or unauthorized use of water.

Disconnections in the instances specified in paragraphs (b) through (g), above, shall only be made after giving the owner at least seven days advance written notice, and if the property is known to be occupied by other than the owner and owner's family, after posting notice conspicuously upon the property of the department's intent to disconnect, at least seven days in advance of disconnection.

Cost of disconnection shall be charged to the owner, in accordance with department rules and regulations, only in the instance specified in paragraph (c), above, or when disconnection is otherwise necessary to prevent theft or unauthorized use of water.

Water service may be re-established for a service branch disconnected or ordered to be disconnected only upon conformance with all regulations and specifications for new service, including modifications to the branch if necessary, and including payment of charges for a new branch. Provided, that for a service branch ordered to be disconnected but not yet physically disconnected, otherwise conforming to all regulations and specifications, the service branch may be re-established upon payment of one-half of the charge for a new branch.

DIVISION D. CONNECTIONS, PLUMBERS' REGULATIONS

Sec. 401-41. Only Certified Persons to Install Service Branch from Property Line to and Including Meter.

No person other than a person holding a current certificate of competency issued by the superintendent of water works as hereinafter provided or a person in the employ or working under the supervision of such a certified person shall install, alter, repair, or make any connection with any water service branch or water supply pipe, or operate any curb cock or install any water meter.

Any person desiring a certificate of competency shall apply therefor to the superintendent of water works on a form furnished by the superintendent, and shall be examined by the superintendent of water works, or a designated representative, to determine whether such person is competent to:

(a) Install the service branch from the property line to and including the water meter, or

(b) Install fire protective systems from the property line to and including all necessary appurtenances.

Persons may qualify in either, or both, of these categories.

Part of such examination for (a) above must include the holding of a master plumber's license for any political subdivision in which the applicant desires to do business, if such political subdivision requires a license for such work.

If upon examination the person is determined to be competent, a certificate of competency shall, upon furnishing the bond hereinafter required, be issued in the name of the superintendent, which certificate shall be good until revoked or voluntarily surrendered.

Before any certificate of competency is issued to any person pursuant to this section such person shall furnish to the superintendent of water works a bond in the penal sum of $1,000 indemnifying the city of Cincinnati for any loss it might sustain through the fault of the person to be certified, or such person, agent or employee in installing or repairing any water service branch or meter. The bond shall be in a form prescribed by the city solicitor and shall be signed by the applicant and a corporate surety authorized to do business in the state of Ohio.

Nothing contained in this section shall be construed to authorize any person to whom a certificate of competency is issued to perform any other plumbing work in any part of Hamilton county, including the city of Cincinnati, without first complying with the governmental regulations, if any, in effect in such part of the county.

A certificate of competency issued to any person pursuant to this section may be revoked if such person or any of such person's employees or agents violates any of the provisions of this chapter, any provision of the rules and regulations of the superintendent of water works, or fails to repair or restore, or pay for the repair or restoration of any damage done to or defective work done on the Cincinnati water works system by such person, or such person's agents or employees in the carrying out of any work for which a certificate of competency is required. Where a certificate of competency has been revoked, a new one shall not be re-issued for 90 days, and, if the cause for revocation included the failure of the certified person to correct or repair any damages

to or defective work on the system, a new certificate shall not be issued until such damages or defective work is repaired.

Sec. 401-43. Buildings to Have Separate Meters.

No person shall connect water into more than one building from one meter, except where such installation is determined to be for a single purpose in the best interests of the system, and where such exceptions are clearly defined in the rules promulgated by the superintendent.
(Sec. 401-43; ordained by Ord. No. 180-1960, eff. June 17, 1960; a. Ord. No. 374-1967, eff. Oct. 27, 1967; reordained as C.M.C. 401-43, eff. Jan. 1, 1972)

Cross reference—Penalty, § 401-999.

Sec. 401-44. Connecting Unused Pipes or Altering Existing Pipes.

No plumber or other person shall make any attachments to an old pipe or other fixture which has been shut off by the rules of the water works, or which is out of use, without having first obtained a permit to do so, nor shall any plumber or other person make any alteration in any way of the conduit pipes or other fixtures attached to the water works, so as to conduct water into adjoining premises, without a written permit to do so signed by the proper officer of the water works.
(Sec. 401-44; ordained by Ord. No. 180-1960, eff. June 17, 1960; reordained as C.M.C. 401-44, eff. Jan. 1, 1972)

Sec. 401-52. Number of Meters.

The supply of water from the service connection may be measured by one or more meters. When more than one meter is used, they shall be set in an area not under the control of any tenant or owner and accessible to the water works at all times. The service charge for each meter shall be based on the size of each meter, as provided for in this chapter, except that in all cases, the meter or meters must satisfy the minimum requirements for service branches and meters, as provided for by Section 401-35, herein,

and each separate service shall be subject to the same rules and regulations as a service where one branch serves a single meter.

All meters shall remain the property of the department. After a meter has been installed and placed in service, it shall be fully maintained in proper condition by the department without charge, except that in the case of damage by freezing, hot water, or other neglect, a charge as determined by the superintendent shall be made.
(C.O. 401-53; a. Ord. No. 353-1960, eff. Nov. 11, 1960; reordained as C.M.C. 401-53, eff. Jan. 1, 1972)

Sec. 401-54. Setting of Meters.

Meters shall be properly set in accordance with the specifications of the superintendent in a convenient location readily accessible for reading and maintenance and shall be properly protected from damage.
(C.O. 401-54; a. Ord. No. 119-1967, eff. Apr. 12, 1967; reordained as C.M.C. 401-54, eff. Jan. 1, 1972)

No person except an authorized water works employee shall remove a water meter without the permission of the superintendent. Where a meter is found to have been unlawfully removed, the water shall be shut off forthwith and proper charges made for estimated amount of water used. The water shall not be turned on again until the meter is reinstalled or a payment equal to the cost of the meter, testing, and installation is paid to the Cincinnati water works.
(C.O. 401-57; a. Ord. No. 374-1967, eff. Oct. 27, 1967; renumbered to C.M.C. 401-56, eff. Jan. 1, 1972)

Cross reference—Penalty, § 401-999.

Sec. 401-57. Department to Have Access to Meter.

Authorized employees of the department shall have the right, at any reasonable time, to enter any premises where a meter is installed, for the purpose of reading, examining or testing the same on the premises, or for the purpose of removing the same from the premises for examination, testing, repair or replacement.
(C.O. 401-58; renumbered to C.M.C. 401-57, eff. Jan. 1, 1972)

The superintendent shall, at the request of any consumer and upon payment by such a consumer of the prescribed charge, install an Electronic Meter Reading System (includes the water meter, Meter Interface Unit (MIU), transmitter, wiring, telephone connections, direct reading remote unit, and touchpad) which will permit the reading of the consumer's water meter without entering the building in which the meter is located. The location of the Electronic Meter Reading System shall be subject to the approval of the superintendent in order to insure safe and reasonable access for verification of readings or maintenance purpose.
(Sec. 401-60; ordained by Ord. No. 204-1967, eff. June 21, 1957; renumbered to C.M.C. 401-59, eff. Jan. 1, 1972; a. Ord. No. 20-1992, eff. Feb. 14, 1992; a. Ord. No. 303-1996, eff. Oct. 25, 1996)

Sec. 401-60. Charges.

The superintendent is hereby authorized to fix reasonable charges, subject to approval of the city manager, for pipe, cocks, meters, metering devices, fittings, remote meter registers and appurtenances to be furnished for water service installations and to establish standard specifications therefor.
(Sec. 401-60a; ordained by Ord. No. 204-1957, eff. June 21, 1957; renumbered to C.M.C. 401-60, eff. Jan. 1, 1972)

DIVISION F. WATER FOR TEMPORARY USES

Sec. 401-61. Water for Temporary Use.

Where water is required for temporary use on premises not supplied, or insufficiently supplied, with metered water, application shall be made to the water works for a special permit to use water from a fire hydrant or other available source. All arrangements for such use require the approval of an authorized officer of the water works. The director is authorized to require temporary meters for such use, and to establish charges for such temporary meters and charges for permits issued for temporary use. Such charges shall be published periodically.
(C.O. 401-61; reordained as C.M.C. 401-61, eff. Jan. 1, 1972; a. Ord. No. 63-1989, eff. Feb. 15, 1989)

Sec. 401-62. Use of Water Without a Permit.

It shall be prima facie unlawful to use, or be connected to use, water from a fire hydrant or other available source unless a properly authorized temporary use permit is securely attached to the connection in a conspicuous place near the point of connection. This shall not apply to service branches for new construction.

No person shall remove, obliterate, deface or obscure a temporary use permit, except the permittee at the completion of use; nor shall any person place a permit upon a connection for which said permit was not issued.

Each day's violation of any part of this section shall constitute a separate offense under Section 401-999.

The superintendent shall be authorized to remove and confiscate any unlawful hose, connection or permit found attached to a fire hydrant or other available source of water. When such is done, or when water is used without a permit, the superintendent shall

be authorized to double the charges provided by Section 401-63 and the violator shall be required to pay them.
(Section 401-61a; ordained by Ord. No. 148-1961, eff. June 2, 1961; a. Ord. No. 374-1967, eff. Oct. 27, 1967; renumbered to C.M.C. 401-62, eff. Jan. 1, 1972)
Cross reference—Penalty, § 401-999.

Sec. 401-63. Charge for Unmetered Water.

Unmetered water shall be paid for on the basis of meter rates, according to the estimated amount used or to be used. The superintendent of water works shall be authorized to provide by rule for the method of fixing charges in the case of particular types of unmetered uses.
(C.O. 401-62; renumbered to C.M.C. 401-63, eff. Jan. 1, 1972)

Sec. 401-65. Special Meters.

In the case of a large construction project, the superintendent shall be authorized to require the use of a special meter to register water consumed. The meter will in such cases be furnished by the department without charge; provided that the permittee shall be chargeable for the cost of repairs in case the meter shall be damaged, and for the cost of the meter itself if it is not returned promptly after discontinuance of its use.

DIVISION G. APPLICATIONS FOR WATER SERVICE

Sec. 401-71. Service Contract To Be Made by Owner.

Inasmuch as water service is a substantial and valuable benefit to land, a written water service contract for any water service, which for the purposes of this section includes fire protection service, shall be entered into by the owner of any real estate upon original establishment of an account or promptly upon obtaining title to the real estate or upon transfer of an existing account to a different account holder or customer. Failure to sign and return the contract to the Cincinnati water works within 30 calendar days thereafter may be cause for refusal or termination of water service to the premises.

If service has been terminated under the provisions of this section, a reconnection charge must be paid prior to restoration of water service. Service can then only be restored by an authorized employee of the Cincinnati water works after the written service contract has been duly filed at the department office. The Cincinnati water works shall not be responsible for any inaccuracy in the water service contract due to wrongful information given, or errors in receiving such information by telephone.

The account holder for each water supply service shall be the owner. For each water supply service, the owner shall state the name and address to which statements of account shall be mailed for payment. The party to whom the statements are mailed shall be known as the "customer."

Sec. 401-73. Customer to be Free of Indebtedness for Services Billed by the Department.

No application for water service shall be allowed and no water shall be supplied to any applicant, customer or consumer, where it is apparent that the applicant, customer or consumer is indebted for services, materials, damages, fines, penalties or other charges billed by the department, whether such services were performed and delivered by the Water Works or through any other city of Cincinnati department with jurisdiction and for whom the Water Works provides billing and collection services. This section shall apply whether the indebtedness for services, materials, damages, fines, penalties or other charges was incurred at the premises served or at any other premises billed by the Water Works within or without the city limits.

DIVISION K. FIRE PROTECTION SERVICE

Sec. 401-117. Fire Protection Services for Private Premises.

A quarterly or monthly charge shall be made for each fire service branch serving private premises based on the size of the branch at the main, as provided for by Section 401-78.

A fire service branch from the main shall not be used for other than fire fighting purposes, except when a dual service has been approved by the superintendent.

Where a fire service branch has outlets such as fire hydrants or hose outlets, and

was installed prior to the regulations requiring detector check meters, the superintendent shall seal each outlet. The seal shall not be broken except when necessary for fire fighting.

It shall be the responsibility of the owners of the property served, or their agents, to obtain permission from the superintendent in advance of using water from a fire protection service for any purpose, including fire drills and pressure testing of a fire protection system. The superintendent, upon granting permission to use water from a fire protection service, shall arrange to have an inspector visit the premises for the purpose of resealing outlets, reading detector check meter, and estimating the amount of water used, to be billed by the department.

The superintendent may order a fire service branch metered and converted to a domestic account to be billed at the monthly or quarterly rates for general consumers provided for by Sections 401-76 and 401-77 for any of the following reasons:

(a) Use of water for other than fire fighting purposes. Flushing of debris, clean up or flushing of spillage, watering of dumps and other dry areas shall not be considered as fire fighting purposes.

(b) Failure to repair a leak or leaks on the fire service branch or fire protection system.

(c) Use of water to control or extinguish self-made fires.

(d) Unauthorized breaking of a seal or seals on outlets of a fire protection system.

(e) Registration on a detector check meter indicating unauthorized use of water.

Cross reference—Penalty, § 401-999.

Sec. 401-118. Combination of Services.

The director of the water works may authorize the installation of a common line to be used to carry water for all purposes where the water works is able to provide metering devices which will satisfy the demands for both fire protection and domestic, commercial or industrial requirements.

Where such installation is made, the charges for combined water sewage service, and fire protection, shall be the same as for water supply service alone.

(Sec. 401-118; ordained by Ord. No. 290-1965, eff. Aug. 7, 1965; reordained as C.M.C. 401-118, eff. Jan. 1, 1972; a. Ord. 313-1991, eff. Aug. 7, 1991)

DIVISION L. CROSS-CONNECTION CONTROL AND WATER QUALITY PROTECTION

Sec. 401-125. Backflow Protection.

If, in the judgment of the water works superintendent, the integrity of the public water system is, or can be, endangered by backflow from an actual or a potential cross-connection within the plumbing system of a water consumer, the superintendent may order the installation of an approved backflow prevention method or device consisting of either an air-gap, double sanitary check valve assembly, vacuum breaker, reduced pressure principle backflow preventer or any combination thereof at the water service connection to the premises.

The water consumer shall install the designated device or method at the consumer's own expense, and failure, refusal or inability to install the device or method

immediately shall constitute a ground for discontinuing water service to the premises until such device or method has been installed and approved by the superintendent.

The use of the approved backflow preventer at the water service connection does not in any way affect or eliminate the need for individual fixture devices or air-gaps as required by the Ohio Building Code.

All necessary permits shall be obtained from the political subdivision having jurisdiction.

(Sec. 401-125; ordained by Ord. No. 321-1971; eff. Oct. 9, 1971; reordained as C.M.C. 401-125, eff. Jan. 1, 1972)

Sec. 401-126. Notification, Payment of Fees for Containment and Isolation Backflow Preventers; Consequences of Failure.

The Cincinnati Water Works shall issue notices to the customer or the owner, the agent or the person in charge of the premises wherein a containment or isolation backflow device is located of the need to perform an annual containment and/or isolation device backflow test. The Cincinnati Water Works may charge a fee for said notice. Failure to have the containment or isolation backflow test done, or failure to provide results to the Cincinnati Water Works will result in the immediate termination of water service. The failure to pay the required fees or charge may result in the Cincinnati Water Works terminating water service. The termination of water service for failure to pay required fees or charges shall comport with those sections of this chapter and Cincinnati Water Works rules and regulations regarding termination of service for non-payment of a billing statement.

(Sec. 401-126; ordained by Ord. No. 431-1993, eff. Jan. 7, 1994; repealed and reordained by Ord. No. 372-1996, eff. Nov. 20, 1996)

DIVISION M. LEAD SERVICE LINE REPLACEMENT PROGRAM*

Sec. 401-127. Legislative Findings Related to Lead Service Lines.

(a) City Council of the City of Cincinnati hereby determines that the public health and safety is endangered by the ingestion of drinking water that contains lead.

(b) The use of a Lead Service Line to deliver drinking water from a water main to a residence, business, school, or other building or structure, increases the risk of lead content in the water.

(c) The continued use of Lead Service Lines for an indefinite period of time, without a systematic plan for replacing those lead lines, should therefore be considered a threat to the health and safety of the residents, occupants, and visitors to the City.

(d) Repair or replacement of only part of a Lead Service Line, leaving some but not all of the Lead Service Line in service, poses a higher risk of releasing lead into the drinking water on the property being served than when the whole existing Lead Service Line is left undisturbed, and this risk should be reduced to the extent practically possible.

(e) City Council finds that the complete replacement of Lead Service Lines is essential to protect the public safety and health. Council has determined to adopt a sanitary regulation, as authorized under Ohio Revised Code § 729.06, to eliminate the public health risk caused by the use of Lead Service Lines.

(f) Council also finds that the public, particularly tenants, should have the right to know before signing a lease whether the

*__Note—__See editor's note at Division N.

residence, business, or other location which the tenant intends to rent is served by a Lead Service Line.
(Ordained by Ord. No. 185-2017, § 4, eff. July 28, 2017)

Sec. 401-128. Lead Service Lines Prohibited.

(a) The Director shall not approve the installation of any new service line or the replacement of any existing service line with pipe that is not Lead-Free.

(b) Existing Lead Service Lines shall be prohibited as of the effective date of this ordinance.

(c) There shall be a grace period for owners of property containing Lead Service Lines before any enforcement action is taken. The Department will not take action until the owner is provided written notice of the need to replace the Lead Service Line with a minimum of thirty days to take corrective action.

(d) All Lead Service Lines shall be replaced with Lead-Free pipe that complies with the Rules and Regulations.
(Ordained by Ord. No. 185-2017, § 4, eff. July 28, 2017)

Sec. 401-129. Lead Service Line Replacement Responsibilities of Owner and Department.

(a) The Department shall be responsible for replacement of the portion of a Lead Service Line between the service connection and the private property line, which shall be referred to herein as the "public" portion of a Lead Service Line.

(b) The property owner shall be responsible for the cost of replacement of the portion of a Lead Service Line on the private property, which shall be referred to herein as the "private" portion of a Lead Service Line.

(c) The division of responsibilities between the Department and a property owner in this section shall apply only to replacement of Lead Service Lines. Repair and replacement of service branches in all other circumstances shall be governed by Sections 401-38 and 401-39 of this chapter.
(Ordained by Ord. No. 185-2017, § 4, eff. July 28, 2017)

Sec. 401-130. Repair of Private Lead Service Lines.

(a) An owner who has a leaking private Lead Service Line shall:

(1) Cause a certified person to temporarily repair the leaking private Lead Service Line within the time for repair provided in the notice from the Department; and

(2) Cause the private Lead Service Line to be replaced with a new Lead-Free Service Line or allow the Department to replace the private Lead Service Line, in accordance with this chapter, within the time for replacement provided in the notice from the Department.

(b) All materials and work shall be in compliance with this chapter and with any applicable Rules and Regulations of the Department or other applicable requirements in the Cincinnati Municipal Code.
(Ordained by Ord. No. 185-2017, § 4, eff. July 28, 2017)

Sec. 401-131. Disturbance of Private Lead Service Lines.

(a) When an owner causes disturbance to the private Lead Service Line or the meter setting, including, without limitation, through renovation, demolition and rebuild, or other construction work, the owner shall:

(1) Cause a certified person to replace the private Lead Service Line with a

new Lead-Free Service Line within the time provided in a written notice from the Department; and

(2) Contact the Department so that: (i) replacement of the private Lead Service Line can be inspected to ensure that it conforms to the Department's Rules and Regulations, and (ii) if the public Service Line is lead, the Department may coordinate replacement of the public Lead Service Line in conjunction with the owner's replacement of the private Lead Service Line.

(b) All materials and work shall be in compliance with this chapter and with any applicable Rules and Regulations of the Department or other applicable requirements in the Cincinnati Municipal Code.
(Ordained by Ord. No. 185-2017, § 4, eff. July 28, 2017)

Sec. 401-132. Authorizing Lead Service Line Replacement Program.

(a) The Department is authorized to expend funds for the costs of replacing Lead Service Lines through the systematic program authorized under this chapter.

(b) As a part of the Lead Service Line replacement program, the Department is authorized to replace private Lead Service Lines in the City in order to reduce the risk of releasing lead into drinking water.

(c) When the Department replaces a private Lead Service Line as part of the Lead Service Line replacement program, the property owner's cost responsibility will be communicated to the property owner prior to the work and will be made clear in the Department's contract for the work.

(d) The replacement program may include replacement of Lead Service Lines in conjunction with water main replacement, targeted neighborhood replacement of Lead Service Lines without water main replacement, or replacement of individual Lead Service Lines.

(e) The Department shall have discretion to prioritize replacement of Lead Service Lines based on public health risk and economic considerations, including the ability to prioritize replacement of Lead Service Lines that provide water to any school, child care provider, or other business or activity frequented by children.
(Ordained by Ord. No. 185-2017, § 4, eff. July 28, 2017)

Sec. 401-133. Procedure for Requiring Private Lead Service Line Replacement.

(a) When the Department intends to replace a Lead Service Line as part of the Lead Service Line replacement program, the Department shall serve written notice upon the owner of the parcel(s) of real property in which the Lead Service Line is situated advising that the private Lead Service Lines must be replaced.

(1) The written notice shall be served in the same manner as a service of summons in civil cases: by certified mail addressed to the owner's last known address or tax mailing address, or as otherwise provided in Ohio Revised Code § 729.06.

(2) The notice shall provide the owner no less than thirty days from the date of service to cause the private Lead Service Line to be replaced by a certified person as defined in Section 401-127 of this chapter.

(3) The notice shall state that if the private Lead Service Line is not replaced within the allotted time in

the notice, the Department may: (i) complete the work; (ii) bill the construction costs of the work to the owner; and (iii) certify any amounts unpaid as assessments against the property as provided in this chapter.

(b) Upon receiving notice as specified in this section, an owner may request verification by the Department of whether a service line is in fact a Lead Service Line and/or may request verification of the cost calculation of the Lead Service Line. The notice shall include a website and phone number by which an owner may contact the Department to verify either of these issues of fact.

(c) If the owner chooses to replace the private portion of the Lead Service Line prior to the allotted time in the Department's notice, the owner shall:

(1) Do so at his or her own expense; and

(2) Ensure that the replacement is performed by a certified person as defined in Section 401-41, "Only Certified Persons to Install Service Branch from Property Line to and Including Meter," and in accordance with Section 401-134, "Inspection and Certification of Lead Service Line Replacement," and all other applicable requirements of this chapter and the Department's Rules and Regulations.

(d) If the private Lead Service Line replacement has not been completed by the end of the allotted time indicated in the Department's notice as defined in this section, the Department is authorized to complete the work.
(Ordained by Ord. No. 185-2017, § 4, eff. July 28, 2017; Emer. Ord. No. 319-2017, § 1, eff. Dec. 6, 2017)

Sec. 401-134. Inspection and Certification of Lead Service Line Replacement.

(a) When the property owner causes a Lead Service Line to be replaced, the owner and the certified person performing the replacement shall be responsible to ensure each of the following:

(1) The work is performed by a certified person as defined in Section 401-41, "Only Certified Persons to Install Service Branch from Property Line to and Including Meter";

(2) The replacement service line replaces the entire private portion of the prior service line with Lead-Free pipe;

(3) The Department is informed of timing of the work and provided access for inspection of the replacement service line; and

(4) The work and the replacement service line comply with all of the Department's technical and functional specifications and requirements in the Rules and Regulations.

(b) The new service line shall not be used and water service shall not be restored until a departmental inspector inspects and approves it.
(Ordained by Ord. No. 185-2017, § 4, eff. July 28, 2017)

Sec. 401-135. Assessment to Recover Cost of Lead Service Line Replacement.

(a) When the Department has incurred costs for replacement of the private Lead Service Line, the Department shall send a final bill to the owner of the property served by the replaced service line.

(b) The bill shall clearly state the following:

(1) The amount owed to the Department for the cost of replacing the private Lead Service Line;

(2) The owner's options to pay the bill or have any unpaid amount assessed to the real property tax bill semi-annually over either five or ten years;

(3) Department contact information for payment and verification of amount; and

(4) Procedures for appealing the amount of the bill.

(c) Prior to the date indicated on the bill, the owner may: (i) pay the amount owed directly to the Department, in part or in full, and/or (ii) notify the Department if the owner desires unpaid amounts to be assessed to the property over five years or ten years.

(d) Any unpaid amount shall be assessed against the property. If the owner does not select the number of years of the assessment term on the form provided by the Department, the assessment shall occur over ten years.

(e) If the owner disputes the amount owed, he or she should contact the Department no later than twenty-one days after the date of the bill specified in paragraph (b) of this section to verify that the amount is correct. The Department shall respond with a written decision to such a request for verification of the amount owed.

(f) If the owner does not agree with the Department's decision specified in paragraph (e), the owner has the right to appeal the amount demanded before a neutral decision-maker at the Office of Administrative Hearings ("OAH"). The owner must file such appeal by filing a written notice of appeal with OAH within ten days of receiving the Department's decision as specified in paragraph (e) of this section.

(g) Following determination of the final amount owed, either after the owner does not timely appeal the billed amount or after OAH has issued a decision on the owner's appeal, the Department shall certify any unpaid balance of such amount in an affidavit to the City Treasurer. The affidavit shall include the following information:

(1) the unpaid balance;

(2) the tax years over which the amount shall be collected;

(3) the amounts to be assessed each in semi-annual assessment;

(4) the date(s) the costs were incurred;

(5) the address and parcel number(s) of the property served by the replaced service line; and

(6) the name of the property owner of record at the time the costs were incurred.

(h) The City Manager shall thereafter submit an ordinance for Council approval with the amount(s) owed by owners to the Department for the cost of Lead Service Line replacement, and Council shall approve the assessment of such costs against the relevant properties in accordance with the Department's affidavit.

(i) After approval of the assessment by ordinance, the Clerk of Council shall certify the assessment to the Hamilton County Auditor stating the amounts and number of years of payment to be placed as a charge on the tax list and duplicate of the relevant property. The costs shall be a lien upon such real estate from and after the date the costs were incurred and collected as other taxes

and returned to the City of Cincinnati in accordance with Ohio Revised Code §§ 729.06, 727.30, 727.301, 727.33, and 727.331.

(j) All proceeds from assessments pursuant to this section and the Lead Service Line replacement program under this chapter shall be placed into the appropriate departmental account for the private Lead Service Line replacement program to repay the cost of the private Lead Service Line replacements.

Sec. 402-23. Operating and Fuel Fees.

Any person having a permit issued on or after January 1, 1989, under Section 402-22 shall pay as an operating fee to the City of Cincinnati the sum of one percent of gross revenue received from operations, excepting such revenue as may be derived from the carrying of United States mail, passengers or cargo on scheduled air routes, the sale of airplanes, the sale of gasoline, and excepting revenue received for storage of aircraft in city-owned hangars. Where an operator provides more than one type of service, licensed under Section 402-22, the minimum operating fee shall be $500.00 per year. No refund of permit fees shall be made to any operator.

Every operator shall submit to the director a sworn statement from a certified public accountant showing the gross revenue for the six-month periods, January to June, inclusive, and July to December, inclusive. If the statement is not sworn to by a certified public accountant, the city shall have authority to conduct, at the operator's expense, an audit of the operator's records relating to gross revenue. Such statements shall be submitted and payment made no later than 45 days after the end of each period. If an operator fails to present a sworn statement and payment within 45 days after the end of each period, the city shall have authority to conduct an audit, at the operator's expense, of the operator's records relating to gross revenue.

As a measure of the use of the airport, every person, firm or corporation receiving or storing gasoline or jet engine fuel at Lunken Airport or Blue Ash Airport shall furnish to the director accurate monthly statements of all gasoline and jet engine fuel received. Such persons shall also provide accurate monthly statements of such gasoline and jet engine fuel sold or used. Such statements shall be submitted to the director on or before the 10th day of each month. At the time that the statement is submitted to the director, such persons shall pay the fee of 12 cents per gallon on gasoline or jet engine fuel sold or used except for gasoline or jet engine fuel purchased from fuel retailers holding a permit from the city.

However, in recognition of the broad scope of aeronautical services provided to the general public at the airports by retailers to the public of fuel under permit of the city (fixed base operators), which services are critical to the vitality of the airports and are required by the city as a condition of a fuel sale permit, such operators shall be permitted to retain a minimum of six cents and up to a maximum of eight cents per gallon of the fee imposed above on gasoline or jet engine fuel that they sell or use; and provided, however, the above fee shall not be applicable to gasoline and jet

engine fuel sold to any air carrier operating under a certificate of public convenience and necessity issued under the Federal Aviation Act of 1958, as amended, when such carrier shall have entered into a contract with the City of Cincinnati for the use of Lunken Airport or Blue Ash Airport. The amount of this retainer shall be reviewed and adjusted annually, if necessary, by the director of Transportation and Engineering based upon the city's need for efficient delivery of fuel services at the airport. The city shall give at least 30 days advanced notice to fixed base operators holding retail fuel permits of any adjustment in the amount of the retainer. The city shall have the right at any time to audit the fuel record of anyone dispensing fuel in order to determine the accuracy of the monthly statements. During such audits, the city may initially examine the fuel records for at least the three years immediately preceding the date of the audit. If the initial examination of the fuel records indicates a need for more extensive examination, the city may examine the fuel records for a period preceding the date of the audit it deems necessary for resolution of the problems it discovers.

For late payment of any operating fee or fuel fee, there shall be a penalty of ten percent of the fee.

Every wholesale supplier of gasoline or jet engine fuel to any tenant at the airports not possessing a retail fuel permit from the city shall furnish on or before the 10th day of each month copies of all receipts for deliveries of fuel to airport tenants, showing amount delivered, or alternatively a report of all fuel delivered, showing amount delivered to each tenant; this reporting shall be a condition of the privilege of doing business on the airports. Records shall be retained for three years.

Sec. 405-22. Registration of Public Pay Telephones.

DEFINITIONS. As used in Sections 405-22, 405-23, 405-24, and 405-25 of the Cincinnati Municipal Code the following phrases have the following meanings:

"Public Pay Telephone" means any self-service, coin-operated or credit card-operated telephone within the city of Cincinnati which is available for the use by the general public, whether on publicly owned or private property, is located outside, is free standing, attached to a wall, or on a pedestal, or is outside and in a booth or sheltered by a kiosk.

(a) No person shall install or operate a public pay telephone unless said phone is properly permitted by the city of Cincinnati. The owner of the telephone shall obtain a permit authorizing the installation and continued use of the phone from the director of public works. Business operators, property owners maintaining a public pay telephone, phone vendors, and recognized community groups may communicate to the department of safety any use or abuse of a public pay telephone which may constitute a nuisance as defined herein. Upon notification, the department of safety shall take appropriate action to abate the nuisance.

1. With the passage of this ordinance all existing legally installed public pay telephones shall require a permit which shall be issued by the director of public

works. The cost incurred for the issuance of these permits shall be absorbed by the City. The City shall issue one permit to each owner based on a list of existing, legally installed pay phones provided to the City. Should the list contain a phone not legally installed, the owner shall be charged three times the initial permit fee in effect when the discrepancy is discovered. The owner of any public pay telephone installed after the passage of this ordinance shall pay the fees as required herein.

The permits issued pursuant to this section shall have no expiration; they are, however, subject to removal pursuant to section 405-23.

2. Prior to issuing a public pay telephone permit, the director of public works shall cause notice of the application to be sent to the affected recognized community council. The director shall provide the community council thirty (30) days to express its views on the application.

3. The initial permit fee for public pay telephones shall be $125.00.

Subsequent to January 1, 1996, the city manager may adjust initial permit fees based upon costs. The applicant must obtain a street opening permit if the phone, or its appurtenances, cut or drill into the public right-of-way. Notwithstanding anything else in this chapter there will be no telephone permit fee for a public pay telephone installed at the request of the City of Cincinnati. If more than forty-five (45) days elapse between the time of the filing of an application and the decision of the City to grant or deny the application, then the City shall waive the permit fee. The forty-five (45) day requirement shall be stayed if a recognized community group or neighborhood business association files an appeal pursuant to Section 405-24.

4. All permit fees received pursuant to Section 405-22 of the Cincinnati Municipal Code shall be deposited into the general fund.

(b) To obtain a permit for a public pay telephone, the owner of the telephone shall submit a registration form to the director of public works containing the following information:

(1) The name, address, and telephone number of the owner;

(2) The name, address, and telephone number of an individual on whom the city may serve any order required by Chapter 405 of the Cincinnati Municipal Code.

(3) The location of each public pay telephone and the dimensions of any outdoor telephone enclosure for which the registration is being made;

(4) A description of the services provided to users of the public pay telephone, including any special telephone service features;

(5) A certification that the proposed public pay telephone or telephones will be in compliance with all relevant Ohio Public Utility Commission regulations.

(c) One registration form may be submitted to include any number of public pay telephones and shall be signed by the owner.

(d) The owner shall promptly notify the director of public works, in writing, of any change in the information required by division (b) of this section.

(e) Upon receipt of the information filed pursuant to division (b) of this section, with the concurrence of the safety director who shall consider potential nuisance and criminal activity, and payment of the required fee to the director of public works, the director shall provide written verification to the owner that the public pay telephones identified on the form have been registered with the city.

(Ordained by Ord. No. 274-1995, eff. Sept. 1, 1995)

Sec. 405-23. Public Nuisance, Removal of Public Pay Telephones.

(a) Upon request of any member of council, recognized neighborhood community council, neighborhood business association, or upon receipt of a citizen complaint concerning any public pay telephone, the director of safety, or the director's designee, shall conduct an investigation to determine whether the installation, maintenance, or use of the public pay telephone constitutes a public nuisance.

Upon a determination by the director of safety that a particular public pay telephone, which has been registered pursuant to Section 405-22, constitutes a public nuisance, the director shall order that the telephone be either removed or that special service features be installed to abate the nuisance. Upon a determination by the safety director that a public pay telephone is a nuisance, the safety director shall immediately notify the director of public works.

(b) A particular public pay telephone shall constitute a public nuisance when the director of safety, or the director's designee, determines that one or more of the following conditions exist:

(1) The public pay telephone has been used in the commission of illegal or criminal activity.

(2) The existence of the public pay telephone has resulted in the congregation of persons who have made loud noises or other disturbances which have disrupted persons residing near the telephone, or disrupted business enterprises located near the telephone, or have interfered with ingress to or egress from a building or parking lot.

(3) The existence of the public pay telephone has resulted in the congregation of persons who have interfered with pedestrian or vehicular traffic in the public right-of-way near the telephone.

(4) Usage of the public pay telephone between the hours of 11:00 P.M. and 8:00 A.M. is significantly and repeatedly above normal usage for similarly situated public pay telephones during the same hours so as to indicate that the telephone is being used in the commission of illegal or criminal activity. Pursuant to this subsection the owner or operator of any public pay telephone shall keep and provide the safety director with the hourly usage of any public pay telephone upon request.

(5) The public pay telephone has been used to abuse the 911 system.

(6) The owner of the public pay telephone has failed to keep the phone and its appurtenances clean, free of graffiti, and in good repair.

(c) Upon a determination by the safety director that a public pay telephone is a nuisance and should be removed, the director of public works shall immediately notify the permit holder of the telephone in writing by certified mail to the address listed on the permit. Subject to Section 405-24, the owner shall remove the public pay telephone within five (5) working days of the notice from the director of public works to remove the telephone issued pursuant to division (a) of Section 405-22, and shall restore the property as ordered by the director of public works.

(d) Subject to Section 405-24, the owner shall limit the phone service to outgoing calls only and/or install any other special telephone service features within five (5) working days of the notice from the director of public works to install such special telephone services. Should the special telephone service feature which the director orders to be placed on the public pay telephone require the approval of the Ohio Public Utility Commission, then the owner will immediately apply to the commission for said approval.

(e) Subject to Section 405-24, if the total number of public pay telephones in an area must be reduced in order to abate a public nuisance declared by the director of safety pursuant to division (a) of this section, the determination as to the order in which an outdoor public pay telephone or telephones must be removed shall be based upon the total period of time that a telephone has been registered with the city pursuant to Section 405-22, with the telephone with the shortest registration period being removed first.

(f) Any public pay telephone which is not removed within five (5) working days of an order to remove the telephone, or any public pay telephone which is not serviced within five (5) working days of an order to install special services, pursuant to this section, shall be subject to immediate removal by the city at the owner's expense. The owner shall reimburse the city for the cost of removing and storing the telephone before the telephone may be reclaimed by the owner. Such costs shall also include the cost of removing any installation ancillary to the public pay telephone and the cost of restoring the property as ordered by the director of public works.

(g) If the safety director determines, over the objection of a recognized community council or neighborhood business association that a public pay telephone may be installed, needs a modification, or may remain in place the director of public works shall immediately notify the recognized community group or neighborhood business association of the decision of the safety director.

(h) The city manager is authorized to establish additional regulations regarding the placement of outdoor public pay telephones and additional criteria for the safety director's use in determining when a public telephone constitutes a nuisance.

The solicitor, or the solicitor's designee, shall commence to hear the merits of an appeal within thirty (30) days of the filing of an appeal. The solicitor, or the solicitor's designee, shall render a decision within ten (10) days of the date of the hearing, which decision may affirm, disaffirm, or grant ex-

If the solicitor, or the solicitor's designee, affirms a determination of the safety director, the owner shall have three (3) working days to remove or make the service changes to the public pay telephone in question. If the owner fails to correct the violations within that time, the public pay telephone may be removed by the director of public works at the owner's cost. Such costs shall include the cost of removing and storing the telephone, the cost of removing any installation ancillary to the telephone, and the cost of restoring the property to its original condition.

In cases of vessels moored under contracts with the recreation commission the wharfmaster shall exercise discretion and not require movement unless under emergency conditions. In order to effectually carry out the provisions of this chapter, and prevent and suppress all riots, disturbances and disorderly conduct at the river, the wharfmaster and subordinate officers are hereby vested with the powers and authority of police officers.

Such rates shall be applicable to the portion of the waterfront occupied by the vessel or wharfboat and necessary for the proper mooring thereof. The wharfmaster may approve mooring plans which provide for lines to extend along the landing outside of the assigned mooring space provided such lines do not hinder vehicular movement. The superintendent of recreation shall recommend to the recreation commission a schedule of rates to be charged for the use of the public landing.

(b) In addition to the charge per lineal foot, the wharfmaster shall charge for the use of facilities such as electricity, water, and any other accommodations available according to the schedule of rates established by the recreation commission, which shall be not less than the cost to the city of supplying such accommodations.

(c) The superintendent shall recommend to the recreation commission a schedule of rates to be charged for each and every vessel or wharfboat moored directly or indirectly to the river termini streets. Vessels using the river termini streets under specific contracts with the recreation commission will not be subject to the rate schedule if other rates are specified in the contract.

(d) The superintendent with the approval of the recreation commission may contract for use of specific portions of the public landing and/or termini of streets for periods up to five years at rates and terms in keeping with

the nature of the use thereof. Where the peculiar location on the public landing is advantageous to the conduct of commercial enterprises offering a public service or accommodation not involving river transportation such as floating restaurants, showboats, museums, or other similar enterprises the contract may provide for the city to be paid a percentage of the gross income in addition to any other charge. Such contracts may be renewable according to the terms of the contract.

In exercising control of the activities on the public landing the wharfmaster shall at all times be authorized to restrict the use of the landing when in the judgment of the wharfmaster the mooring or other use of the public landing is not in the general public interest because of such circumstances as high water, fire or explosion hazard, objectionable odors, or the mooring of vessels not providing a public accommodation for periods in excess of 24 hours. All vessels using the public landing or the river termini of streets must be prepared for the eventuality of the hazards normal to the river such as ice, driftwood, flood waters, and swift current. At any time that the streets are closed due to high water or other emergency conditions, vessels or wharfboats must be prepared to be self-sufficient in coping with the natural hazards of river conditions.

(Sec. 411-11; ordained by Ord. No. 41-1969, eff. Feb. 28, 1969; renumbered to C.M.C. 411-13, eff. Jan. 1, 1972)

(Sec. 411-13; ordained by Ord. No. 41-1969, eff. Feb. 28, 1969; renumbered to C.M.C. 411-15, eff. Jan. 1, 1972)

(Sec. 411-15; ordained by Ord. No. 41-1969, eff. Feb. 28, 1969; renumbered to C.M.C. 411-17, eff. Jan. 1, 1972; a. Ord. No. 181-1973, eff. Apr. 25, 1973)

Sec. 413-16. Bicycle Parking.

A. *Purpose.* The requirements for bicycle parking are established for the purpose of ensuring secure, weather-protected facilities to accommodate short and long-term bicycle parking and to encourage the use of bicycles for travel as an alternative to the use of motorized vehicles.

B. *Applicability.* Bicycle parking facilities shall be provided in every new parking garage, and for every expansion of an existing parking garage when the expansion includes the provision of sixty (60) or more additional motor vehicle parking spaces.

C. *Duties of Garage Owners.* Whether a garage is public or private, the owner of the garage shall be responsible for fulfilling the requirements of this Section.

D. *Time of Compliance.* Required bicycle parking spaces shall be provided prior to the issuance of a new license or the renewal of an existing license if an expansion requiring the addition of bicycle parking has been completed.

E. *Number of Bicycle Parking Spaces.* Bicycle parking spaces shall be provided at a rate of one (1) bicycle parking space for every twenty (20) motor vehicle parking spaces provided. In the case of a garage providing bicycle parking spaces based on an expansion, the number of bicycle parking spaces required shall be calculated based on the number of additional motor vehicle spaces created by the expansion.

1. *Maximum.* No parking garage shall be required to provide more than twenty-four (24) bicycle parking spaces.

2. *Fractional Spaces.* When the units of measurement determining the number of required parking spaces result in requirement of a fractional space, any fraction up to and including one-half is rounded down to the nearest whole number and fractions of over one-half are rounded up to the next whole number.

F. *Location of Bicycle Parking Spaces.*

1. Bicycle parking shall be located no lower than the first complete, contiguous parking level below grade, and no higher than the first complete, contiguous parking level above grade. There shall be no stairs on the access route to bicycle parking areas.

2. Bicycle parking spaces shall be located inside the garage in an area that is protected from inclement weather.

3. Bicycle parking spaces shall be equipped with one of the following: a bicycle locker; a securely anchored floor, wall, or ceiling rack; or a similar system for securing the bicycle.

4. Bicycle parking shall be located in a highly visible area to minimize theft and vandalism.

5. Bicycle parking spaces shall be separated from motor vehicle parking spaces and lanes of traffic by a physical barrier (such as a curb or bollard).

6. An aisle or other space at least 5 feet wide shall be provided behind all required bicycle parking to allow room for bicycle maneuvering.

G. *Standards for Bicycle Racks.* Where required bicycle parking is provided by racks, the racks must meet the following standards:

1. The bicycle frame and one wheel can be locked to the rack with a high security, U-shaped shackle lock and cable lock if both wheels are left on the bicycle. Bicycle racks that support the wheel but not the frame of the bike may not be used to fulfill a bicycle parking requirement.
2. A bicycle six feet long can be securely held with its frame supported so that the bicycle cannot be pushed or fall in a manner that will damage the wheels or components.
3. The rack must be securely anchored.

The Department of Transportation and Engineering maintains a handbook of racks and siting guidelines that meet the standards of this Section.

H. *Size of Bicycle Parking Spaces.* An area of at least two feet in width by six feet in length shall be provided for each bicycle space. However, the area for each bicycle space may be reduced upon application to the Superintendent of Parking to certify that the proposed layout adequately accommodates the specified number of bicycles.

I. *Duration of Bicycle Parking.* Garages offering automobile parking on an hourly basis shall offer bicycle parking on the same basis. Garages offering automobile parking on a weekly or longer basis shall provide bicycle parking on the same basis.

J. *Fees for Bicycle Parking.* This Section shall not interfere with the rights of garage owners to charge rent or other fees for bicycle parking.

K. *Enforcement.* Section 413-16 shall be enforced by the Superintendent of Parking. Upon complaint, the Superintendent of Parking shall investigate. If the Superintendent of Parking concludes that a violation exists, he or she shall provide written notice to the garage owner of the violation and allowing 30 days to cure the violation. The written notice shall state the grounds for the Superintendent of Parking's conclusion that a violation exists and shall afford the garage owner opportunity to appeal such determination in writing to the Superintendent of Parking.

1. Where a violation of this Section occurs, if such violation has not been cured within the allotted 30 day period, the Superintendent of Parking shall add the name and address of such garage and the name of the garage owner to a list of garages currently in violation of this Section. Upon request, the Parking Superintendent shall provide a copy of this list to members of the public.
2. Violation of this Section is cause for revocation, suspension or refusal to issue or renew a license, in accordance with Section 413-43.

L. *Ingress and Egress.* Bicyclists may be required to walk their bicycles inside the garage.

M. *Notice of Bicycle Parking.* A sign shall be provided at each point of bicycle entry to the parking garage, mounted with its center between four and six feet above the ground, directly visible and unobstructed from the street. The entry sign shall match exactly the designated sign on file with the Department of Transportation & Engineering.

N. *Patron Access Requirements.* A parking facility must allow bicycle parkers access to bicycle parking spaces to the same extent the facility allows automobile parkers access

to automobile parking spaces. If a parking facility offers automobile parking exclusively to employees or patrons of a certain business, or to residents of a particular dwelling, the facility can similarly limit bicycle parking to such employees, patrons or residents. (Ordained by Ord. No. 065-2010, § 1, eff. April 17, 2010)

Sec. 413-17. Walls or Fences Surrounding Parking Lot.

Any person operating a parking lot business adjacent to sidewalk or streets shall keep the parking area enclosed with an approved fence, wall, curbing, wheelblock, or other barrier along streets and sidewalks upon which parking places adjoin so that motor vehicles cannot be removed from such place except at the regular established entrances and exits.

The fence, wall, curbing, wheelblock, or barrier shall be constructed in accordance with applicable city ordinances and shall be placed so as to prevent any part of the parked car from overhanging the property line of the lot and to protect adjoining buildings from damage.

Each licensee shall keep the sidewalks surrounding the parking place free from dirt, ice, sleet, snow and debris.
(Sec. 413-17; ordained by Ord. No. 297-1962, eff. Aug. 1, 1962; reordained as C.M.C. 413-17, eff. Jan. 1, 1972)

Sec. 413-19. Posting of Signs.

Each parking garage or parking lot shall post in a prominent location at each entrance, signs of a permanent nature and clearly legible at all times, with all lettering a minimum of five inches high. Signs shall comply with city of Cincinnati ordinances and regulations of the director. The director may approve a sign location other than at the entrance. Signs shall bear the following information:

(a) The trade name of the business, and the full name and address and telephone number of the operator.

(b) The hours and days of operation and whether there are different rates on certain days or times of the day.

(c) A schedule of rates and charges by the hour and the day in effect for the parking of cars and bicycles. No customer shall be charged any rate different from the rate posted at the time customer entered the parking garage or parking lot. If more than one rate is charged for the parking of a motor vehicle, the letters and figures designating each such rate shall be of the same size. Any outdoor parking lot which has the rates and charges posted on a sign, shall post the sign not less than eight feet above the sidewalk level, and such sign shall not bear any advertising or other matter than the substance required by this chapter.

(d) The number of the license issued under the provisions of this chapter for the particular parking garage or parking lot.

(e) In the case of a parking lot, if the operator provides a transfer station for cars left during the unattended hours, the sign shall designate the name and address and telephone number of the transfer station.

(f) Each parking garage and parking lot shall post an international parking symbol in a prominent location at each entrance.

Sec. 502-19.1. Automated Traffic Enforcement System.

(a) General.

(1) The City of Cincinnati hereby adopts an automated traffic enforcement system for the purpose of using photographic equipment to record visual images of vehicles entering intersections in violation of § 502-19(c) and/or operating a vehicle in excess of the limits set forth in § 506-8 and using said images as the basis for issuing tickets to the owners of such vehicles within thirty (30) days of the infraction.

(2) The Department of Transportation and Engineering and the Cincinnati Police Department shall be responsible for implementing the automated traffic enforcement system for both traffic signal and speed enforcement. These departments are hereby

empowered to designate the intersections and streets to be monitored by automated traffic enforcement systems; to install, operate and maintain automated traffic enforcement systems at such designated locations; and to take any and all other measures necessary for the implementation of the system. The Police Department shall maintain a list, available to the public, of locations so monitored.

(3) The Police Department is further empowered to contract with governmental or nongovernmental entities for services necessary for the implementation of this system. Such contracts shall be subject to the provisions of Chapter 321 of this code. No entity with whom the Police Department contracts shall be paid in a manner dependent upon the number of tickets issued under this Section.

(4) The intersections chosen for automated traffic enforcement under this section must display a yellow traffic-control signal for a time that complies with the Ohio Department of Transportation's Manual of Uniform Traffic Control Devices.

(5) The street locations chosen for automated traffic enforcement under this section must display a speed limit sign in compliance with the Ohio Department of Transportation's Manual of Uniform Traffic Control Devices §§ 2B.11 and 2B.15 and the Ohio Revised Code § 4511.21.

(b) Notice Requirements.

(1) For at least fourteen (14) consecutive days prior to the installation of an automated traffic enforcement system at an intersection or street location, the Police Department or its designee must publish notice in a local newspaper of general circulation that the intersection or street location will be subject to automated traffic enforcement. Said notice must specify the date on which automated traffic enforcement will begin.

(2) Prior to the date on which automated traffic enforcement begins at an intersection or street location, the Police Department or its designee shall erect a sign in a conspicuous location that provides notice that an automated traffic enforcement system is being used to monitor traffic.

(3) For the first thirty (30) days that an automated traffic enforcement system is in operation at a given intersection or street location, no tickets may be issued on the basis of the images produced by that system. Warnings may be issued during that thirty-day period.

(c) Offense.

(1) An officer employed by the Cincinnati Police Department shall examine the image recorded by the automated traffic enforcement system to determine whether an infraction of § 502-19(c) or § 506-8 has occurred. If the image recorded by the automated traffic enforcement system shows an infraction of § 502-19(c) or § 506-8, contains a notation of the date and time of the alleged violation, and shows the letter and numbers on the vehicle's license plate, as well as the state in which the license plate was issued, the officer may use any lawful means to identify the vehicle's owner.

(2) The fact that a person is registered as the owner of a vehicle with the vehicle registration office of the state that issued the license plate displayed

on the vehicle shall be prima facie evidence that said person was operating the vehicle at the time of an infraction recorded by an automated traffic enforcement system.

(3) Within thirty (30) days of the infraction and upon identification of the registered owner of the vehicle, an officer may issue and send by first-class United States mail a ticket charging the owner with an infraction of § 502-19(c). Said ticket must state the

date on which the ticket was issued; the date, time and location of the infraction; the time in which a response must be made; and the manner in which the ticket may be appealed. In addition, a copy of the image(s) that served as a basis for the ticket must accompany the ticket.

(4) A person who receives such a ticket shall be required to respond to it by paying the penalty as directed on the ticket within twenty-one (21) days of its issue date, or by submitting proof of his non-liability as set forth in subsection (c)(5) within twenty-one (21) days of its issue date, or by submitting, to the address listed on the ticket, requests a hearing as set forth in subsection (d) within twenty-one (21) days of its issue date.

(5) Notwithstanding subsection (b)(2), the owner of the vehicle shall not be liable for a penalty under this section if:

(i) At the time of the infraction, the vehicle was in the custody of someone other than its owner pursuant to a written lease or rental agreement and the owner submits, to the address listed on the ticket, either a copy of the lease or rental agreement along with the name and address of the lessee or renter.

(ii) At the time of the infraction, the vehicle or the license plate depicted in the image which served as the basis for the ticket was stolen and the owner submits, to the address listed on the ticket, a copy of the police report stating the vehicle or license plate had been reported stolen at the time.

(6) Nothing in subsection (c)(5) shall be construed as limiting the liability of an operator of a vehicle for any violation of § 502-19(c) or § 506-8.

(d) Appeal.

(1) A person who received a ticket pursuant to this Section may appeal the ticket by making a written request for a hearing to the address listed on the ticket. Said request shall be accompanied by a monetary deposit in an amount equal to the amount of the civil penalty stated on the ticket.

(2) Within ten (10) days of the receipt of the request for a hearing and the monetary deposit referred to in subsection (d)(1), a hearing shall be held by a hearing officer appointed by the Cincinnati Police Department or its designee. The hearing officer shall determine whether a preponderance of evidence establishes that a violation occurred and that the person who received the ticket is liable for the penalty set forth in subsection (e).

(3) A certified copy of the ticket alleging a violation of § 502-19(c) or § 506-8, along with a copy of the image that served as a basis for the ticket, shall be prima facie evidence of the facts contained therein and shall be admissible in a proceeding alleging a violation under this ordinance.

(4) In considering whether the person is liable, the hearing officer may consider any of the following as an affirmative defense of a violation:

(i) That the ticket was issued and sent by first-class mail more than thirty (30) days after the date of the infraction recorded by the automated traffic enforcement system.

(ii) That the driver of the vehicle passed through the intersection or had increased speed in order to yield the right of way to an emergency vehicle, in accordance

with Ohio Revised Code § 4511.45, or to a funeral procession, in accordance with Ohio Revised Code § 4511.451.

(iii) That either the vehicle or license plate depicted on the image which served as the basis for the ticket was stolen before the violation occurred and was not in possession of the owner at the time of the violation, if the owner submits proof that a police report about the stolen vehicle or license plate was filed prior to, or within forty-eight (48) hours after, the violation.

(iv) That this section is unenforceable because the automated traffic enforcement system was not operating properly, or the automated traffic enforcement system was not in a proper position, or that the image that served as the basis for the ticket is not legible enough to show the letters and numbers or the state that issued the license plate on the vehicle.

(v) That the driver of the vehicle entered the intersection as part of a funeral procession or at the direction of a police officer.

(vi) Substantial and convincing evidence that the owner or person named in the ticket was not operating the vehicle at the time of the violation. To satisfy the evidentiary burden under this subsection, the owner or person named in the ticket shall provide the hearing officer with substantial and convincing evidence of the identity of the person who was operating the vehicle at the time of the violation, including, at a minimum, the operator's name and current address.

(5) The hearing officer shall notify the Police Chief or the Police Chief's designee, as well as the person named on the ticket, of the decision within three (3) days of the hearing. In addition, should the hearing officer conclude that a preponderance of evidence demonstrates that someone other than the person named in the ticket was operating the vehicle at the time of the violation, the hearing officer shall forward to the Cincinnati Police Department all evidence provided to him as to the operator's identity.

(6) Within five (5) business days of receiving the evidence referred to in subsection (c)(5), the Cincinnati Police Department or its designee may issue a ticket to the person whom the evidence indicates was operating the vehicle at the time of the violation.

(e) Penalties.

(1) Unless the operator of a vehicle which is in violation of § 502-19(c) received a citation from a police officer at the time the violation occurred, the operator shall be subject to a civil penalty of $100.00 if the vehicle is recorded by an automated traffic enforcement system.

(2) Unless the operator of a vehicle that is in violation of § 506-8 received a citation from a police officer at the time of the violation occurred, the operator shall be subject to a civil penalty of $100.00 if the vehicle is recorded by an automated traffic enforcement system.

(3) A violation for which a civil penalty is imposed under this Section shall not be considered a moving violation for

the purpose of assessing points under Ohio Revised Code § 4507.021 and shall not be reported to the Bureau of Motor Vehicles of any state.

(4) The failure to respond to a ticket in a timely fashion as set forth in subsection (b)(4) shall constitute a waiver of the right to contest liability for the violation under subsection (c). Said failure shall result in an additional penalty of $100.00.

(5) If the penalties set forth in this subsection remain unpaid for more than thirty (30) days after the date on which the ticket was issued, the penalties shall be collected, together with any interest and penalties thereon, by civil suit or other appropriate means of collection.

(Ordained by Ord. No. 261-2004, eff. Sept. 3, 2004)

Sec. 502-20. Obstructed or Defaced Signs.

No provision of the traffic code requiring signs shall be enforceable against an alleged violator if, at the time and place of the alleged violation, the sign required is not in proper position and sufficiently clear to be recognized by an ordinarily observant person. The provisions of any section which does not state that signs are required shall be effective without them.

This shall not be deemed to prohibit the erection upon private property adjacent to highways of signs giving useful directional information and of a type that cannot be mistaken for traffic-control devices.

Every such prohibited sign, signal, marking or device is hereby declared to be a public nuisance and the city manager or person designated by the city manager is empowered to remove the same or cause it to be removed.

Whenever a street is closed or the normal movement of traffic over a street is altered by the city manager pursuant to this section, the city manager shall cause appropriate traffic signs to be erected indicating that the street is closed or the normal movement of traffic has been altered.

"Snow emergency routes" are hereby defined as through streets, or portions of through streets, designated by official signs on one or both sides thereof, installed by order of the city manager or person designated by the city manager.

Nothing herein shall be construed to relieve a driver from the duty to decrease speed when approaching and crossing an intersection, when approaching and going around a curve, when approaching a hillcrest, when traveling upon any narrow or winding roadway, or when special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions or to avoid colliding with any person, vehicle or other conveyance on or entering a highway. Other streets or highways, or portions thereof, with a continuous length of more than one mile between the limits of such street or highway or portion thereof, at the entrances to which vehicular traffic from the majority of intersecting streets or highways is controlled by "stop" or "yield" signs or traffic control signals are hereby designated as through highways. For the purposes of this section the limits of such street or highway or portion thereof shall be the city limit line, the physical terminus of the street or highway, or any point on such street or highway at which vehicular traffic thereon is required by regulatory signs to stop or yield to traffic on the intersecting street.

The city manager or person designated by the city manager need not erect stop signs at intersections so constructed as to permit traffic to safely enter a through highway without coming to a stop. Signs shall be erected at such intersections indicating that the operator of a vehicle shall yield the right of way to or merge with all traffic proceeding on the through highway.

The city manager or person designated by the city manager may designate additional through highways and shall erect stop signs on all streets and highways intersecting such through highways, or may designate any intersection as a stop intersection and shall erect like signs at one or more entrances to such intersection.

Every said sign shall bear the word "Stop" in letters not less than six inches in height. Every stop sign shall be located as near as practicable at the property line of the highway at the entrance to which the stop must be made, or at the nearest line of the crosswalk thereat, or, if none, at the nearest line of the roadway.

Every operator of a vehicle shall stop at such sign or at a clearly marked stop line before entering an intersection except when directed to proceed by a police officer or a traffic control signal.
(C.O. 506-34; a. Ord. No. 130-1960, eff. May 6, 1960; a. Ord. No. 47-1971, eff. Feb. 10,

Sec. 506-35. Entering Through Highway or Stop Intersection.

Except when directed to proceed by a law enforcement officer, every driver of a vehicle approaching a stop sign shall stop at a clearly marked stop line, but if none, before entering the crosswalk on the near side of the intersection, or, if none, then at the point nearest the intersecting roadway where the driver has a view of approaching traffic on the intersecting roadway before entering it. After having topped, the driver shall yield the right of way to any vehicle in the intersection or approaching on another roadway so closely as to constitute an immediate hazard during the time the driver is moving across or within the intersection or junction of roadways.

The driver of a vehicle approaching a yield sign shall slow down to a speed reasonable for the existing conditions and, if required for safety to stop, shall stop at a clearly marked stop sign, but if none, before entering the crosswalk on the near side of the intersection or, if none, then at the point nearest the intersecting roadway where the driver has a view of approaching traffic on the intersecting roadway before entering it. After slowing or stopping, the driver shall yield the right of way to any vehicle in the intersection or approaching on another roadway so closely as to constitute an immediate hazard during the time the driver is moving across or within the intersection or junction of roadways. Whenever a driver is involved in a collision with a vehicle in the intersection or junction of roadways, after driving past a yield sign without stopping, the collision shall be prima facie evidence of the driver's failure to yield the right of way.

This section does not apply to abandoned tracks, spur tracks, side tracks, and industrial tracks when the public utilities commission

of Ohio has authorized and approved the crossing of such tracks without making the stop required in this section.

Whoever violates any provision of this section shall be fined not more than $50 for the first offense; for the second offense such person shall be fined not more than $100 or imprisoned not more than 30 days, or both.

The driver of a vehicle emerging from an alley, building, private road, or driveway within a business or residence district shall stop the vehicle immediately prior to driving onto a sidewalk or onto the sidewalk area extending across the alley, building entrance, road and driveway, or in the event there is no sidewalk area, shall stop at the point nearest to the street to be entered where the driver has a view of approaching traffic thereon.

(a) Circular green alone or "go". All traffic facing the signal except as provided under Sections 506-62, 506-84 and 506-85 may proceed straight through or turn right or left unless a sign at such place prohibits either such turn. But such traffic shall yield the right of way to vehicles lawfully within the intersection and to pedestrians within a crosswalk at the time such signal is exhibited.

(b) Circular yellow alone or "caution" when shown following the green or "go" signal. All traffic facing the signal is warned that the red or "stop" signal will be exhibited immediately thereafter, and that pedestrians proceeding in accordance with traffic control signals shall have the right of way.

(c) Circular red alone or "stop":

(1) All traffic facing the signal shall stop before entering the intersection and shall remain standing until authorized to proceed by a traffic control device except as provided in paragraph (c)(2) of this section.

(2) Unless a sign is in place prohibiting a right turn, all traffic facing this signal may cautiously enter the intersection to make a right turn after stopping as required by paragraph (c)(1) of this section. Such traffic shall yield the right of way to pedestrians lawfully within an adjacent crosswalk and to other traffic lawfully using the intersection.

(d) Green arrow signal or a traffic control device authorizing turn with red or

(j) In the event an official traffic control signal is erected and maintained at a place other than an intersection, the provisions of this section shall be applicable except as to those provisions which by their nature can have no application. Any stop required shall be made at a sign or marking on the pavement indicating where the stop shall be made, but in the absence of any such line or marking the stop shall be made at the signal.

A fee of 50 cents shall be charged for each application to cover the cost of inspection and supervision.

(g) 55 miles per hour on freeways with paved shoulder.

It shall be prima facie unlawful for any person to exceed any of the speed limitations in this section or in other sections of the traffic code. In every charge of violation of this section, the affidavit and warrant shall specify the time, place and speed at which the defendant is alleged to have driven, also the speed, if any, which this section declares shall be prima facie lawful at the time and place of such alleged violation; except that in affidavits where a person is alleged to have driven at a greater speed than will permit the person to bring a semi-trailer to a stop within the assured clear distance ahead, the affidavit and warrant need not specify the speed at which the defendant is alleged to have driven.

Nothing herein shall be construed to relieve a driver from the duty to decrease speed when approaching and crossing an intersection, when approaching and going around a curve, when approaching a hillcrest, when traveling upon any narrow or winding roadway, or when special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions or to avoid colliding with any person, vehicle or other conveyance on or entering a highway.

The city manager or person designated by the city manager shall be authorized to adjust the metered parking fee.

(C.O. 509-1; reordained as C.M.C. 509-1, eff. Jan. 1, 1972; a. Ord. No. 412-1978, eff. Nov. 3, 1978; Emer. Ord. No. 058-2013, § 6, eff. March 6, 2013; a. Ord. No. 185-2015, § 2, eff. July 17, 2015; Emer. Ord. No. 255-2015, § 1, eff. July 1, 2015)

Editor's note—The amendment to § 509-1 made by Ord. No. 185-2015, § 2, was adopted on June 17, 2015, with an effective date of July 17, 2015. Subsequent Ord. No. 255-2015, § 2, adopted July 1, 2015, changed said amendment to an emergency measure, making it effective immediately upon adoption.

Sec. 509-2. Types of Parking Meters.

The city manager may use various devices, technologies, and systems to meter parking on city streets and right-of-way including the following:

(a) Single-space parking meters shall be of either the penny, nickel, dime, quarter, or combination type and shall be so designed and constructed as to display a signal showing lawful parking following the deposit therein of a prescribed coin of the United States of America during the period of time for parking provided for the denomination of coin so deposited, which in no event shall exceed the parking limits now or hereafter provided for the part of the street upon which such single-spaced meter is placed. Each single-spaced meter shall bear a sign or legend setting forth the denomination or denominations of coins which can be deposited therein, and the parking time secured thereby, which sign or legend may be in lieu of any other sign pertaining to the parking of vehicles in the adjacent parts of the street. Each such single-spaced meter shall also be designed and constructed so that upon the expiration of the parking time provided for the denomination of coin deposited it will indicate by automatic operation of a visual signal that the lawful parking period has expired.

(b) Multi-space meters shall be any device installed for the acceptance of parking fees for more than one parking space. Multi-space meters shall require either the conspicuous display of a receipt inside a vehicle where it can be clearly seen from outside the vehicle or the entering of the proper parking space number or entering of license plate information in which the vehicle is parked in conjunction with paying the parking fee. Multi-space meters may accept one or more of the following payment options: coins, tokens, cash, credit cards, debit cards, or other stored value cards.

(c) Parking payment applications, including mobile payment systems, smart phone applications, and all other similar types of technologies.

(C.O. 509-2; reordained as C.M.C. 509-2, eff. Jan. 1, 1972; Emer. Ord. No. 283-2006, § 1, eff. 9-27-06; a. Ord. No. 10-2026, § 1, eff. Jan. 14, 2026)

Sec. 509-4. Metered Spaces.

(a) The city manager may cause lines or marks to be placed on the curb or on the street, about or alongside of each single-space parking meter to designate the parking space for which such single-space meter is to be used, and each vehicle parking alongside of or next to any single-space parking meter shall park within the lines or markings so established. It shall be unlawful to park any vehicle across any such line or mark or to park such vehicle in such way that the same shall not be within the area so designated by such lines or markings, unless such vehicle be too large to be confined in one such space. In the absence of lines or markings, the single-space parking meter posts shall indicate the limits of one or two car parking spaces, and there shall be no parking further than five (5) feet from the nearest meter regulating parking in such space, whether or not such space is occupied by a parked vehicle.

(b) The city manager may cause lines or marks to be placed on the curb or on the street in close proximity to a multi-space parking meter to designate the parking spaces for which such multi-space meter regulates, and each vehicle parking in a space regulated by any multi-space parking meter shall park within the lines or markings so established. It shall be unlawful to park any vehicle across any such line or mark or to park such vehicle in such way that the same shall not be within the area so designated by such lines or markings, unless such vehicle is too large to be confined in one such space. In the absence of lines or markings, signs shall indicate the limits of one or two car parking spaces, and there shall be no parking further than five (5) feet from the nearest sign indicating parking in such space, whether or not such space is occupied by a parked vehicle.

Cross reference—Penalty, §§ 512-1, 512-7.

Sec. 509-5. Parking in Metered Spaces or Spaces Requiring Payment.

(a) Spaces controlled by meters. Whenever a vehicle is parked in a space which requires payment for parking during hours of limited parking, the owner or driver of the vehicle shall, upon entering the vehicle in the parking space, immediately pay the required fee by any method accepted by such space or the meter. Such owner or driver may use the unexpired time displayed on the meter from its previous use without making an additional payment. Any unexpired time displayed on the meter will not be added to any time purchased for that meter using pay-by-phone technology.

(b) When a vehicle is too large to be confined in a single space, the owner or driver of the vehicle shall make payment for the number of parking spaces the vehicle fully or partially occupies.

(c) If a vehicle remains parked either fully or partially in any parking space beyond the limit fixed for the amount of the payment accepted by such space or meter, such vehicle shall be considered as parked overtime.

(d) If any equipment, system, or technology for paying for parking is out of order or unable to accept payment, the owner or driver of the vehicle shall use other equipment that is nearby to pay for the parking space or spaces used or shall pay for the space or spaces used through another available system or technology.

(C.O. 509-5; reordained as C.M.C. 509-5, eff. Jan. 1, 1972; Emer. Ord. No. 283-2006, § 3, eff. 9-27-06; Emer. Ord. No. 058-2013, § 6,

Sec. 509-7. Unmetered Parking.

No person during hours of limited parking shall permit a vehicle to remain parked in a designated parking space in violation of section 509-5 or while the parking meter for the space indicates that the car is illegally parked or if the vehicle does not conspicuously display a valid, unexpired receipt, whether the indication is the result of the failure to pay the required fee by any method accepted by such meter and operate the lever or other actuating device of the meter, or the result of the automatic operation of the meter following the expiration of the authorized parking time subsequent to the payment of the required fee by any method accepted by such meter at the time the vehicle was parked.

The fact that a vehicle is parked in a metered parking space during hours of limited parking either with (i) the meter time signal showing no permitted parking or (ii) without conspicuously displaying a valid unexpired receipt or (iii) not showing as paid via a valid payment method, shall be prima facie evidence that the vehicle has been parked at such space longer than the lawfully permitted parking period.

Sec. 509-8. Repeat Metering.

No person shall deposit or cause to be deposited in a parking meter a payment for the purpose of obtaining an extension of indicated parking time beyond the maximum limit of time prescribed for parking a vehicle in the designated space alongside of or next to a single-space parking meter or a vehicle parked in a space controlled by a multi-space parking meter; provided, however, that the provisions of this section shall not be operative on municipally owned off-street parking facilities.

ASSEMBLAGES AND PARADES

Sec. 510-1. Legislative Finding.
Sec. 510-2. Parades.
Sec. 510-3. Special Parades Requiring Permits.
Sec. 510-4. Breaking Procession.
Sec. 510-5. Parking on Parade Route.
Sec. 510-7. Demonstrations on or Near Highway.
Sec. 510-8. Pedestrian Assemblies.
Sec. 510-9. Obstruction of Pedestrians or Vehicles.

Sec. 510-1. Legislative Finding.

It is determined by council that the right of all citizens to make reasonable use of the streets and sidewalks must be preserved to the greatest extent possible.

It is further found that certain areas of the city suffer from serious traffic congestion, both vehicular and pedestrian, and that in order to assure essential movement of persons and vehicles and to protect the rights of all members of the public, traffic laws and regulations have been enacted and must be enforced uniformly.

It is further found that the "congested district" as defined in this code is such an area and that during rush hours other areas of the city also suffer from extreme traffic congestion, requiring the strict enforcement of traffic laws and regulations in order to protect the rights of all persons to move upon the city streets.

It is further found that various groups, associations and organizations desirous of holding public parades, marches and processions, wish to be exempted from complying with the laws and regulations relating to traffic controls, including but not limited to one-way street patterns, traffic lights, traffic signals and signs, and various standard rules for the operation of persons and motor vehicles.

It is further found that such organizations, groups or associations often desire the restriction of parking along all or part of the proposed parade route and often desire police escorts to assure clear passage for the parade.

It is further found that it is the policy of council to permit waiver of enforcement of traffic laws and regulations relating to vehicular and pedestrian traffic in certain instances and under certain conditions where such a waiver or variance in normal procedures would not unreasonably obstruct or interfere with free ingress and egress to and from public and private property or to and from various areas of the city and will not present an unreasonable hazard to the public.

It is further found that the planning for, scheduling of personnel for, and the carrying out of all the necessary preparations for parades, marches and processions in regard to which requests are made for waiver or variance of laws or regulations relating to pedestrian or vehicular traffic, restriction of parking on the parade route, change of traffic patterns, or provision of police escorts, require advance notice to the City of Cincinnati and require the expenditure of public funds.

It is further found that unless adequate advance preparation is made and adequate personnel are provided, it is both unsafe and impractical for parades, marches or processions to move in or about the City of Cincinnati unless in strict compliance with all laws and regulations relating to the movement of pedestrian and vehicular traffic.
(Sec. 510-1; ordained by Ord. No. 152-1970, eff. June 26, 1970; reordained as C.M.C. 510-1, eff. Jan. 1, 1972)

Sec. 510-2. Parades.

All parades, marches and processions, except funeral processions operating in accordance with the provisions of law relating especially to them, and all persons participating in such parades, marches and processions, shall obey all laws and regulations relating to pedestrian and vehicular traffic and shall not obstruct or unreasonably interfere with the rights of the public to use and enjoy the streets, sidewalks and public ways of the City of Cincinnati, and the rights of the public and owners of adjacent property to

access to and from the streets and sidewalks of the City of Cincinnati to and from abutting or adjacent property.
(C.O. 510-1; a. Ord. No. 152-1970, eff. June 26, 1970; renumbered to C.M.C. 510-2, eff. Jan. 1, 1972)

Cross reference—Penalty, §§ 512-1, 512-7.

Sec. 510-3. Special Parades Requiring Permits.

Notwithstanding the provisions of Section 510-2, the city manager, or person designated by the city manager, may grant permission to a group, association or organization holding or sponsoring a parade, march or procession to do so without strict compliance with specified provisions of the laws and regulations relating to vehicular and pedestrian traffic, and may restrict parking along a proposed route of a parade, march or procession and provide police escorts therefor upon the following terms and conditions:

(a) The group, organization or association sponsoring a parade, march or procession shall apply in writing at least 30 calendar days in advance of the date of the parade, march or procession for a permit to hold a parade at variance with the laws and regulations relating to pedestrian and vehicular traffic.

The city manager or person designated by the city manager shall, in appropriate cases, have the authority to waive the time period within which the application for a parade permit must be made.

(b) Application for such permit shall be on forms provided by the city manager or person designated by the city manager, and shall state:

(1) The name and address of the sponsoring group, association or organization.

(2) The names and addresses and telephone numbers of officers of the organization or persons authorized to speak for and on behalf of such organization and to represent the organization in all matters pertaining to the parade permit.

(3) The date, time and proposed route of the parade.

(4) The nature of the parade; i.e., whether it will consist of or include:

a. Pedestrians,

b. Vehicles,

c. Animals,

d. A combination of any of the above, and

e. The approximate size or length of the parade.

(5) Those traffic laws or regulations which the group, association or organization holding or sponsoring the parade wish to be waived in regard to it.

(6) Whether or not it is desirous that parking be restricted along the parade route or any part of the parade route.

(7) Whether or not a police escort is desired.

(8) The application for the proposed parade shall include a non refundable $100.00 fee if it is estimated that fewer than 3,000 people will be in attendance, or a $500.00 fee if it is estimated that over 3,000 people will be in attendance.

(c) In reviewing the application for a parade permit, the city manager or person designated by the city manager shall determine the number of police officers reasonably necessary to con-

trol traffic in the area of the requested parade. In making this determination, the city manager or person designated by the city manager shall consider such factors as the time, date, route, length, number of participants and vehicles contained in the application for the parade permit. The city manager or person designated by the city manager shall inform the applicant for the parade permit of the number and cost of police officers and vehicles which he determines to be necessary to control the traffic for the requested parade. The cost to the applicant for each police officer shall be the current standard hourly special duty rate. The cost for each police vehicle shall be the standard hourly rental rate prescribed by the Cincinnati Police Department. The applicant for a parade permit shall deposit one-half of the amount of money designated by the city manager or person designated by the city manager as necessary for police traffic control and police vehicles with the Cincinnati Police Department within five business days of the issuance of the permit, or within five business days prior to the parade, whichever date is earlier, unless the deposit requirement is waived by the city manager. The Cincinnati Police Department will invoice the applicant for a parade permit for the remaining one-half of all such costs, and the applicant shall promptly pay the invoice.

(d) In reviewing the application for a parade permit, the city manager or person designated by the city manager shall determine if personnel from the Cincinnati Fire Department are necessary to the safe conduct and operation of the parade. In making that determination, the city manager or person designated by the city manager shall consider the time, date, route and length of the parade; the likelihood of fires or explosions during the parade or the need for emergency and medical services; the nature and purpose of the parade; the anticipated attendance at the parade by both participants and observers; the number, type, and speed of vehicles in the parade; and the ability of the Cincinnati Fire Department to respond to a call for services from a location outside the parade route.

If the city manager or person designated by the city manager determines that Cincinnati Fire Department personnel are necessary to the safe conduct and operation of the parade, then the applicant for the parade permit shall be informed of the necessary number and cost of Cincinnati Fire Department personnel. The cost to the applicant of the Cincinnati Fire Department personnel shall be the current standard hourly special duty rate for such personnel. The cost for each Cincinnati Fire Department vehicle shall be a standard hourly rate prescribed by the fire chief. The applicant for a parade permit shall deposit one-half of the amount of money designated by the city manager or person designated by the city manager as necessary for fire department personnel and vehicles with the Cincinnati Fire Department within five business days of the issuance of the permit, or within five business days prior to the parade, whichever date is earlier, unless the deposit requirement is waived by the city manager. The Cincinnati Fire Department will invoice the applicant for a parade permit for the remaining one-half of all such costs, and the applicant shall promptly pay the invoice.

(e) Before issuing a permit, the city manager or person designated by the city manager shall determine that:

(1) Waiver of laws or regulations relating to the movement of pedestrian or vehicular traffic for the proposed parade will not present an unreasonable hazard to the safety of the public.

(2) The waiver of enforcement of laws and regulations relating to vehicular and pedestrian traffic along the route of the suggested parade will not substantially and unreasonably increase traffic congestion in the congested area or in any other area of the city during rush hours.

(3) That there will be available sufficient city manpower to provide for the reasonably safe movement of the parade and other traffic, the safety of the public, and the restriction of parking along the parade route or police escorts when requested or when determined to be necessary for the safety of the public by the city manager or person designated by the city manager.

(4) That the parade will not unreasonably interfere with access to public or private property adjacent to the streets and sidewalks to the proposed parade route.

(f) If the parade, march or procession involves the use of motor vehicles or animals, the organization, group or association sponsoring or holding the parade shall obtain liability insurance and file a copy of the policy with the City of Cincinnati, which policy shall:

(1) List the sponsoring group, association or organization and the City of Cincinnati as a named insured; and

(2) Provide liability coverage against all hazards arising from the holding of the parade for personal injuries and property damage in the amount of $500,000.

(g) A parade permit will not be granted to any applicant whose stated intended purpose is to communicate any obscenity, defamation, "fighting words," or words creating a "clear and present danger."

The City of Cincinnati will promptly seek judicial review of any intended denial or revocation of a parade permit based upon the obscenity, defamation, "fighting words," or "clear and present danger" prohibitions contained in this section. Unless a court issues an order within ten business days of the city's petition declaring that the permit may be lawfully denied or revoked, the parade permit will be granted.

(h) After the application is filed, the city manager or person designated by the city manager shall act upon an application for a special parade permit within ten business days, or within five business days prior to the proposed parade, whichever date is earlier.

If the city manager or person designated by the city manager finds that the determinations required by paragraph (e) above cannot be made without changes in the proposed route, time, or waiver of laws or regulations relating to movement of pedestrian or vehicular traffic as requested in the application, or the restriction of parking along the proposed route, the city manager or person designated by the city manager shall suggest in writing alternate times, routes, or procedures or conditions which would meet the

requirements of paragraph (e) above. Such suggestions shall be noted upon the application for the special parade permit. The terms of such suggestions shall be communicated by the city manager or the person designated by the city manager to the permit applicant either by personal delivery or certified mail within ten business days after the application is filed, or within five business days prior to the proposed parade, whichever date is earlier.

If these suggestions are accepted in writing by the permit applicant within three business days after the date the city manager or person designated by the city manager personally notifies the applicant of the suggestions or mails the suggestions to the applicant, the city manager or person designated by the city manager shall proceed as though such changes were originally part of the application. The permit applicant's acceptance of the suggestions shall be noted upon the application.

(i) Any applicant shall have the right to appeal the denial of a permit to the office of administrative hearings by filing a written notice of appeal with the city manager within five business days of the denial of the permit. The city manager shall transmit the notice of appeal and all documents related to the permit application to the office of administrative hearings within 24 hours of the filing of the appeal. The office of administrative hearings shall conduct a hearing and issue a decision in sufficient time to allow the applicant to conduct the parade if the appeal is granted, but in no event shall the hearing be held more than five business days after the appeal is filed.

(j) A permit may be revoked at any time by the city manager or person designated by the city manager for the same reasons as those provided for denial of a permit. Notice of the revocation of a permit shall be given immediately to the applicant as provided in Section 510-3(g), and appeal of the revocation of the permit may be taken in the same manner and time as provided in Section 510-3(h), except the requirement that the appeal shall be heard before the date of the parade will not apply.

(k) In the absence of special circumstances, the following parade route in the congested district shall be deemed to comply with the requirements of this section insofar as presenting the least hazard to the safety of the public and the least interference with normal use and movement upon the streets in that area, and shall be followed by any group proposing to hold a parade in the congested area, unless the city manager or person designated by the city manager finds that exceptional circumstances exist, which shall be stated in writing upon the application, which warrant the use of an alternate route:

From the intersection of Butler and Sentinel Street, travel south on Sentinel Street to Fifth Street, thence west on Fifth Street to Vine Street, thence north on Vine Street to the intersection of Vine Street and Central Parkway, where the parade shall end.

(l) No person participating in a parade, march or procession under this section shall distribute handbills, free samples, give autographs or other such items to spectators along the designated parade route nor commit any

other act which would encourage spectators to move into the designated parade route during the course of any such parade.

At its discretion, the appropriate committee of council may hold a public hearing when considering such a resolution.

To determine whether an area shall be designated a residential parking permit area, the traffic engineer will conduct, upon a petition by a majority of the households in such area, an engineering study prior to submitting a resolution to city council to establish the designation or withdraw an existing designation. The operator of a rented or leased vehicle whose act or omission resulted in an alleged parking infraction shall not be considered an agent of the owner if the owner is engaged in the business of renting or leasing vehicles pursuant to a written rental or lease agreement and if the owner follows the procedures set forth in Section 515-8 hereof.

Any owner of a vehicle who pays any fine, penalty, fee and cost imposed for a parking infraction pursuant to this Chapter may recover the amount paid from the operator of the vehicle whose act or omission resulted in the parking infraction.

Sec. 515-5. Answer; Procedures.

(a) A person who is personally or constructively served with a parking ticket charging the commission of a parking infraction may answer the charge by appearing personally before the Parking Violations Bureau, by mail, or electronically if authorized and as instructed on the Parking Violations Bureau website. An answer shall be made within fourteen days from the date of the infraction and shall be in one of the following forms:

(1) An admission that the person committed the parking infraction, by payment of any fine arising out of the parking infraction;

(2) An admission that the person committed the parking infraction, with an explanation of the circumstances surrounding the parking infraction;

(3) A denial that the person committed the parking infraction and a request for a hearing relative to the infraction. If the person desires the presence of the law enforcement officer or parking enforcement officer who issued the parking ticket at the hearing, the person must request that presence in the answer.

(b) (1) A person who admits that he or she committed a parking infraction shall, and a person who admits that he or she committed a parking infraction with explanation may, when making their answer, pay the fine arising out of the infraction admitted to the Parking Violations Bureau.

(2) A person who admits that they committed a parking infraction with explanation shall submit evidence to the Parking Violations Bureau that explains the circumstances surrounding the parking infraction. The evidence may be submitted in person

or, to avoid the necessity of personal appearance, may be sent as affidavits and other documentary evidence, by mail, or electronically if authorized and as instructed on the Parking Violations Bureau website. The Parking Violations Bureau, when it receives an answer admitting that a person committed a parking infraction with explanation, shall promptly determine whether the explanation mitigates the fact that the person committed the parking infraction and notify the person in writing of its determination.

(i) If the Parking Violations Bureau determines that the explanation mitigates the fact that the person committed the parking infraction, the Parking Violations Bureau shall eliminate or reduce the amount of the fine arising out of the parking infraction. If the fine is eliminated or reduced and the person has previously paid the fine, the amount paid in excess of the revised fine shall be returned to the person; if the fine is eliminated or reduced and the person has not previously paid the fine, the person shall pay only the amount of the revised fine.

(ii) If the Parking Violations Bureau determines that the explanation does not mitigate the fact that the person committed the parking infraction, the person owes the entire amount of the fine arising out of the parking infraction, and if the person has not previously paid the fine, the person shall pay the entire amount of the fine. If the person admits that he or she committed a parking infraction with explanation and the person fails to pay the amount of the fine due within ten days after receiving notice of the Parking Violations Bureau's determination, unless the amount due has been previously paid, the Parking Violations Bureau's determination and the amount of the fine due shall be considered a judgment and shall be treated as if it were a judgment rendered subsequent to a hearing held pursuant to subsection (b) of Section 515-7 of this chapter.

(3) A person who denies that he or she committed a parking infraction shall be granted a hearing concerning the infraction. A person who denies that he or she committed a parking infraction may request that the hearing be conducted outside of the person's presence and that the hearing officer should consider only the materials submitted by the person by mail or in electronic format. The Parking Violations Bureau shall set a date for the hearing and notify the person, in writing, of the date, time, and place of the hearing, or shall assign a hearing officer to hold the hearing outside of the presence of the person if the person has so requested. The hearing shall be conducted by a hearing officer of the Parking Violations Bureau in accordance with Section 515-7 hereof.

(c) (1) If a person who is personally or constructively served with a parking ticket charging the commission of a parking infraction fails to timely answer the charge, as provided in subsection (a) of this Section, the Parking Violations Bureau shall issue the proper notifications of infraction

(d) The issuance of a parking ticket, the filing of or failure to file an answer by a person personally or constructively served with the ticket, the substance of an answer, the payment of any fine, penalty, fee, and cost, and any other relevant information shall be entered in the records of the Parking Violations Bureau.

Sec. 515-6. Failure to answer.

(a) When a person is personally or constructively served with a parking ticket charging the commission of a parking infraction in accordance with Section 515-4 hereof and the person fails to answer the charge within the time specified in Section 515-5 hereof, the Parking Violations Bureau shall send notification of infractions as follows:

(1) If the person who fails to answer was the operator of the vehicle involved in the parking infraction at the time of the commission of the parking infraction and was personally served with the parking ticket, a notification of infraction shall be sent to that person, and additionally if such person is not the owner of the vehicle, as determined from the records of the Bureau of Motor Vehicles, a notification of infraction also shall be sent to the owner at his most recent address appearing in such records;

(2) If the person who fails to answer was the owner of the vehicle and was constructively served with the parking ticket, a notification of infraction shall be sent to the owner at his most recent address appearing in the records of the Bureau of Motor Vehicles.

(b) A notification of infraction shall be sent within twelve months after the expiration of the time specified in Section 515-5 hereof for the making of an answer, shall be sent by first class mail, and shall contain all of the following:

(2) An identification of the amount of the fine, penalties, fees, and costs arising out of the parking infraction that are due;

(3) A warning that the person must answer the parking infraction charged in the ticket within thirty (30) days or a default civil judgment in the amount of the fine, penalties, fees, and costs due may be entered against the person;

(4) A description of the allowable answers that may be made and notification

that the person will be afforded a hearing before the Parking Violations Bureau if he denies in his answer that he committed the parking infraction;

(5) An identification of the manners in which and the entity to which an answer may be made;

(6) A warning that if the person fails to appear at a requested hearing, a default civil judgment in the amount of the fine, penalties, fees, and costs due may be entered against the person.

(c) A person who receives a notification of infraction pursuant to this Section may answer the parking infraction with which he is charged that is identified in the notification of infraction in any of the manners provided in Division (a) of Section 515-5 hereof for answers to parking infractions charged in a parking ticket. An answer under this Section shall be made within thirty (30) days after the day on which the notification of infraction was mailed, and shall be in one of the forms specified in Divisions (a)(1), (2), and (3) of Section 515-5 hereof for answers to parking infractions charged in a parking ticket, except that if the answer includes payment of the fine arising out of the parking infraction any penalty, fee, or cost arising out of such infraction also shall be paid. The answer shall be governed by the provisions of Division (b) of Section 515-5 hereof for answers relative to parking infractions charged in a parking ticket, except that any determination of the amount to be paid under an answer admitting the commission of the parking infraction with explanation also shall consider any penalty, fee, or cost arising out of such infraction.

If a person who is issued a notification of infraction pursuant to Section 4521.07 of the Ohio Revised Code and Division (c) of this Section, fails to timely answer, the failure to answer shall be considered an admission that the person committed the parking infraction, and a default civil judgment, in the amount of the fine, penalties, fees, and costs due may be entered against the person. Failure to answer the parking infraction within thirty (30) days after the date on which the notification of infraction was mailed may result in the imposition of additional penalties, fees, or costs.

Sec. 515-7. Hearing Procedure.

(a) If a person who is personally or constructively served with a parking ticket charging the commission of a parking infraction or who receives a notification of infraction, when answering the charge denies committing the infraction, the Parking Violations Bureau shall conduct a hearing to determine if the person committed the parking infraction. Each hearing shall be conducted by a hearing officer of the Parking Violations Bureau. Each hearing shall be conducted in such manner as the hearing officer considers appropriate. Rules regarding the admissibility of evidence shall not be strictly applied in the hearing, but all testimony shall be under oath. Parking Violations Bureau hearing procedures are governed by this chapter. Hearing officers are not required to comply with the procedural obligations placed on city hearing examiners under Sections 113-7 through 113-15 of the Cincinnati Municipal Code.

(1) At the hearing, the City of Cincinnati, whether the Cincinnati Police Department or the Parking Division or any successor City office that issues non-criminal parking citations, has the burden of proving by a preponderance of the evidence that the person

for whom the hearing is being conducted committed the parking infraction.

(2) If the person, in his or her answer, denies committing the parking infraction and requests the presence at the hearing of the law enforcement officer or parking enforcement officer who issued the parking ticket, the officer shall be required to attend the hearing unless the hearing officer determines that the officer's presence is not required. If the officer's presence at the hearing has been requested and the officer is unable to attend the hearing on the day and at the time scheduled, the hearing officer may grant a reasonable continuance.

(3) The person for whom the hearing is being conducted may present any relevant evidence and testimony at the hearing. The person does not have to attend the hearing if he submits documentary evidence to the hearing officer prior to the day of the hearing.

(b) The City shall submit the original parking ticket that was personally or constructively served on the person or a true copy of that ticket, and information from the Bureau of Motor Vehicles that identifies the owner of the vehicle. The ticket and the information in proper form is prima facie evidence that the registered owner of the vehicle was the person who committed the parking infraction. The City may present additional evidence and testimony at the hearing. The City does not have to be represented at the hearing by an attorney.

(c) In accordance with Ohio Revised Code Section 4521.08(B):

(1) If a person for whom a hearing is to be conducted under subsection (a) of this section appears at the scheduled hearing or submits evidence in accordance with that subsection, the hearing officer shall consider all evidence and testimony presented and shall determine whether the City has established, by a preponderance of the evidence, that the person committed the parking infraction. If the hearing officer determines that the person committed the infraction, an order indicating the determination as a judgment against the person and requiring the person to pay the appropriate fine and any additional penalties, fees, and costs shall be entered in the records of the Parking Violations Bureau.

(2) If a person for whom a hearing is to be conducted under subsection (a) of this section fails to appear at the scheduled hearing and fails to submit evidence in accordance with that subsection, the hearing officer shall, if he or she determines from any evidence and testimony presented at the hearing by a preponderance of the evidence that the person committed the parking infraction, enter a default judgment against the person and require the person to pay the appropriate fine and any additional penalties, fees, and costs. A default judgment entered under this subsection shall be entered in the records of the Parking Violations Bureau.

(3) If a person who is sent a notification of infraction pursuant to Section 515-6 of this chapter does not timely answer, as provided in subsection (c) of that section, the hearing officer of the Parking Violations Bureau shall, if he or she determines from any evidence and testimony presented by the City, by a preponderance of the evidence, that the person committed

the parking infraction, enter a default judgment against the person and require the person to pay the appropriate fine and any additional penalties, fees, and costs. A default judgment entered under this subsection shall be entered in the records of the Parking Violations Bureau.

(4) If the hearing officer does not determine, by a preponderance of the evidence, that a person in any of the classes described in subsection (c)(1), (2), or (3) of this Section committed the parking infraction, the hearing officer shall enter judgment against the City, shall dismiss the charge of the parking infraction against the person, and shall enter the judgment and dismissal in the records of the Parking Violations Bureau.

(5) A default judgment entered under this section may be vacated by the hearing officer who entered it if all of the following apply:

(A) The person against whom the default judgment was entered files a motion with the Parking Violations Bureau within one year of the date of entry of the judgment;

(B) The motion sets forth a sufficient defense to the parking infraction out of which the judgment arose;

(C) The motion sets forth excusable neglect as to the person's failure to attend the hearing or answer the notification of infraction.

(d) In accordance with Ohio Revised Code Section 4521.08(C), payment of any judgment or default judgment entered against a person pursuant to this section shall be made to the Violations Clerk of the Parking Violations Bureau within ten days of the date of entry. All money paid in satisfaction of a judgment or default judgment shall be disbursed by the Violations Clerk to the Treasurer of the City of Cincinnati, and the Violations Clerk shall enter the fact of payment of the money in the records of the Parking Violations Bureau. If payment is not made within this time period, the judgment or default judgment may be filed with the Office of the Clerk of Court of Hamilton County, Civil Division, and when so filed, shall have the same force and effect as a money judgment in a civil action rendered in the Court.

(i) Judgments and default judgment filed with the Hamilton County Municipal Court, Office of the Clerk of Court, Civil Division, shall be maintained in a separate index and judgment roll from other judgments rendered in that Court. Computer printouts, microfilm, microdot, microfiche, or other similar data recording techniques may be utilized to record such judgments.

(ii) When a judgment or default judgment is filed with the Court, execution may be levied, and such other measures may be taken for its collection as are authorized for the collection of an unpaid money judgment in a civil action rendered in that Court. The Municipal Court may assess costs against the judgment debtor, in an amount not exceeding ten dollars ($10.00) for each parking infraction, to be paid upon satisfaction of the judgment.

(e) In accordance with Ohio Revised Code Section 4521.08(D) any person against whom a judgment or default judgment is entered pursuant to this section, or the City if judgment is entered against the City pursuant to this section, may appeal the judgment or default judgment to the Hamilton County

Municipal Court by filing notices of appeal with the Parking Violations Bureau and the Municipal Court within fifteen days of the date of entry of the judgment and by the payment of such reasonable costs as the Court requires. Upon the filing of an appeal, the Court shall schedule a hearing date and notify the parties of the date, time, and place of the hearing. The hearing shall be held by the Court in accordance with the rules of the Court. Service of a notice of appeal under this subsection by a person stays enforcement and collection of the judgment or default judgment from which appeal is taken by the person. Notwithstanding any other provision of law, the judgment on appeal to the Municipal Court is final, and no other appeal of the judgment of the Parking Violations Bureau and no appeal of the judgment of the Municipal Court may be taken.

(f) A default judgment entered pursuant to this section may be filed with the Municipal Court, Office of the Clerk of Court, Civil Division, under subsection (d) of this section at any time within three years after the date of issuance of the parking ticket charging the parking infraction out of which the judgment arose. This subsection applies to any ticket issued for an offense that would be a parking infraction on or after September 16, 1992, if the ticket was issued within three years prior to September 16, 1992 and a warrant has not been issued and served on the operator or owner of the vehicle involved in the offense.

Sec. 515-8. Nonliability of owner.

(a) An owner of a vehicle is not jointly liable with an operator of the vehicle whose act or omission resulted in a parking infraction for the parking infraction or any fine, penalty, fee, or cost arising out of the parking infraction under this Chapter if either of the following apply:

(1) The owner answers the charge of the parking infraction under Sections 515-5 or 515-6 hereof, the answer denies that he committed the infraction and requests a hearing concerning the infraction, the owner additionally asserts and provides reasonable evidence at that time to prove that the vehicle, at the time of the commission of the parking infraction, was being used by the operator without the owner's express or implied consent, and the Parking Violations Bureau determines that the vehicle was being used without the owner's express or implied consent at that time. If the Parking Violations Bureau does not so determine, it shall conduct the hearing concerning the infraction according to Section 515-7 hereof.

(2) The owner answers the charge of the parking infraction under Sections 515-5 or 515-6 hereof, the answer denies that he committed the parking infraction, the owner additionally submits evidence at that time that proves that, at the time of the alleged commission of the infraction, the owner was engaged in the business of renting or leasing vehicles under written rental or lease agreements, and the owner additionally submits evidence that proves that, at the time of the alleged commission of the parking infraction, the vehicle in question was in the care, custody, or control of a person other than the owner pursuant to a written rental or lease agreement. If the owner does not so prove, the Parking Violations Bureau shall conduct a hearing relative to the infraction according to Section 515-7 hereof.

(3) The owner, at a hearing concerning the parking infraction conducted in accordance with Section 515-7 hereof, proves that the vehicle, at the time of the parking infraction, was being used by the operator without the owner's express or implied consent or proves the facts described in Division (a)(2) of this Section.

(b) An owner of a vehicle who is engaged in the business of renting or leasing vehicles under written rental or lease agreements, but who does not satisfy the additional requirements of Division (a)(2) of this Section is not liable for any penalties arising out of a parking infraction involving the vehicle if at the time of the commission of the parking infraction, the vehicle was in the care, custody, or control of a person other than the owner pursuant to a written rental or lease agreement, and if the owner answers the charge of the parking infraction by denying that he committed the parking infraction or by paying the fine arising out of the parking infraction within thirty (30) days after actual receipt of the parking ticket charging the infraction or, if the owner did not receive the parking ticket, within thirty (30) days after receipt of notification of infraction.

Proof that the vehicle was in the care, custody, or control of a person other than the owner pursuant to a written rental or lease agreement at the time of the alleged parking infraction shall be established by sending a true copy of the rental or lease agreement or an affidavit to that effect to the Parking Violations Bureau within thirty (30) days after the date of receipt by the owner of the parking ticket charging the infraction or, if the owner did not receive the parking ticket, within thirty (30) days after receipt of the notification of infraction. The submission of a true copy of a written rental or lease agreement or affidavit shall be prima facie evidence that a vehicle was in the care, custody, or control of a person other than the owner. In addition, any information required by Division (a)(2) of this Section may be provided on magnetic tape or another computer readable media in a format acceptable to the City of Cincinnati or the Violations Clerk.

Impoundment pursuant to this section is permitted without regard to whether the vehicle, at the time of impoundment, is legally parked. The owner of a vehicle impounded pursuant to this Chapter shall be liable for impoundment fees and storage charges as provided by Section 513-7 of this Code.

(b) A vehicle impounded under paragraphs (a) or (c) of this section shall be released to the owner, or person lawfully authorized by the owner to claim the vehicle, if the owner or person lawfully authorized by the owner does both of the following:

(1) presents a valid certificate of title to the vehicle to the Cincinnati Police Department; and

(2) either:

(A) pays all outstanding judgments or default judgments issued by the Parking Violations Bureau; or

(B) posts a bond equal to the amount of fines, penalties, fees, and costs. In no case, however, shall the

owner of a vehicle impounded pursuant to this Chapter be required to post a bond in excess of one thousand dollars ($1,000) to obtain release of the vehicle.

(c) Notwithstanding paragraphs (a) and (b) of this section, a vehicle parked, stopped, or standing on a public street or highway in commission of a parking infraction is subject to impoundment.

(d) A vehicle involved in three or more parking infractions in which judgments or default judgments have been entered into the records of the Parking Violations Bureau is subject to immobilization. A vehicle may be immobilized by law enforcement officers or parking enforcement officers of the City of Cincinnati or parking enforcement officers acting pursuant to any contract with the city or vehicle immobilization services agreement with the City. Immobilization pursuant to this section is permitted without regard to whether the vehicle, at the time of immobilization, is legally parked.

Sec. 602-1. Permitting Unclean Habitations.

No person, firm or corporation shall lease, let, permit the occupancy of, permit the continuation of the occupancy of or continue the occupancy of any structure or building or any portion thereof, used for human habitation, unless such structure or building or portion thereof be free from unclean and unsanitary conditions, as defined in the subsequent sections of this chapter, and unless the provisions of the subsequent sections are complied with.

(C.O. 602-1; reordained as C.M.C. 602-1, eff. Jan. 1, 1972)

Cross reference—Penalty, § 602-99.

Sec. 602-3. Structures Deemed Unsanitary.

Any structure or building or any portion thereof used for human habitation shall be deemed to be in an unclean and unsanitary condition by reason of any portion of such building being infected with a communicable disease, or by reason of the absence thereon of toilet facilities as required by law or ordinance, or by reason of the known presence of sewer gas therein or thereon.

Any structure or building or any portion thereof used for human habitation shall be deemed to be in an unclean and unsanitary condition when unfit for human habitation or in a condition dangerous or harmful to the lives or health of the occupants by reason of the inhabited portion of the house being damp or wet or by reason of such lack of repair, or by reason of such accumulation of dirt, filth, litter, refuse or other offensive or dangerous substances or liquids, or by reason of such defects in or lack of repair of or improper use of the drainage, plumbing or ventilation, or by reason of the existence on the premises of such a nuisance or other condition as is likely to cause sickness among the occupants.

Sec. 602-5. Declaring Building a Public Nuisance.

Any structure or building or any portion thereof used for human habitation which is in an unclean or unsanitary condition is hereby declared to constitute a public nuisance.

(C.O. 602-4; renumbered to C.M.C. 602-5, eff. Jan. 1, 1972)

Sec. 602-7. Vacation of Unsanitary Premises.

Whenever the board of health ascertains from examination or reports of its inspectors or sanitary officers or otherwise that a public nuisance exists, as defined in Sections 602-3 and 602-5, in or upon any structure or building, or portion thereof, and is of the opinion that such nuisance is capable of being abated without immediate vacation of the premises or such portion thereof, and serves notice upon the owner of such house, or his lessee or agent, or the person in possession, charge or control thereof, directing them to abate such nuisance and remove the unclean or unsanitary conditions within such reasonable time as may be fixed by said board and specified in said notice, it shall then be the duty of such owner, agent or person to abate such nuisance within such time.

Whenever such abatement does not take place within such time, or whenever in the opinion of the board such abatement is impossible or impracticable without an immediate vacation of the house or portion thereof, and the board serves notice upon the owner, lessee, agent, or person in possession, charge or control thereof to vacate or cause the vacation of such house or portion thereof designated in the notice, then it shall be the duty of such owner, lessee, agent or person to vacate or cause the vacation of such house or portion thereof within 20 days from the date

of the service of such notice, or within a shorter time (not less than 24 hours in any case) as may be specified in the notice.

Whenever, either in addition to or without the service of notices on said owner, lessee, agent or person in possession, charge or control, the board is of the opinion that such nuisance can be abated by a tenant or other occupant of such house or portion thereof, and such notices, either for abatement of the nuisance or of vacation of the premises, are served upon such tenant or other occupant, then it shall be the duty of such tenant or other occupant to comply with the terms of such notices and to abate the nuisance or vacate the premises accordingly.

After any such notice or order of vacation it shall be unlawful to occupy or permit the occupancy of such premises or portion thereof until such nuisance shall have been completely abated and such building or portion thereof shall have been rendered clean and sanitary in accordance with the terms of said notices of the board of health.

When there is no owner, agent, lessee or person in charge, possession or control who is a resident of or can be served in the city of Cincinnati, then personal service outside of the city on any such owner, agent, lessee or person in charge, possession or control by anyone delegated by the board of health to make such service, or by registered letter, or if the address of the owner, lessee, agent or person in possession, charge or control is unknown, or service is not secured by registered letter after effort to do so, by notice by publication once a week for two consecutive weeks in any newspaper of general circulation in Cincinnati, or posting or attaching to or on the outside of the structure or building of a copy of the notice or order consecutively for two weeks, shall have the same effect as service within the city.

Cross reference—Penalty, § 602-99.

Sec. 602-9. Building Code Violations, Powers of Officers.

When the unsanitary condition of any such building or part thereof is, in the opinion of the board of health, due to the violation of any of the provisions of Title XI of this code and the ordinances and sections amendatory thereof and supplementary thereto, and the board shall certify such fact to the director of buildings and inspections, it shall thereupon be the duty of the director to proceed, in accordance with the provisions of Title XI, to enforce the provisions thus violated; and thereupon, in addition to the powers of the director and the methods of enforcement provided in Title XI, the director may issue and serve, publish or post an order or notice of vacation upon like terms and conditions and of like purport as is provided in Section 602-7 for orders of vacation issued by the board of health; and it shall be the duty of the person, firm or corporation thus notified to comply with the terms of such notice and to vacate or cause the vacation of the building or portion thereof until the provisions of Title XI have been complied with.

Without any certification from the board of health, the director of buildings and inspections may enforce the provisions of Title XI, and all sections amendatory and supplementary thereto, by issuing and serving, publishing or posting notices or orders of abatement and vacation upon like terms and conditions and of like purport as is provided in Section 602-7 for notice and orders of abatement and vacation issued by the board of health; and it shall be the duty of the persons, firm or corporation thus notified to comply with such notices and orders. All such notices and orders of the director shall be subject to appeal as provided in the. administrative code.
(C.O. 602-8; renumbered to C.M.C. 602-9, eff. Jan. 1, 1972)

Sec. 602-11. Vacation and Abatement Hearings.

When the notice or order of vacation follows a notice or order of abatement, as provided in Sections 602-7 and 602-13, such notice or order of vacation shall not be enforced, as provided in this chapter, unless such notice or order of abatement specifies a time when the person so notified or ordered may appear before the board or officer issuing the notice or order of abatement to show cause why such order or notice of vacation should not be issued, and unless the board or a majority thereof or officer is present at its office at the time so specified; such time to be not less than 24 hours after the service of the notice or order.

When the notice or order of vacation is issued as provided in Section 602-7, without a previous notice or order of abatement, such notice or order of vacation shall not be enforced as provided in this chapter unless it specifies a time, not less than five days after the service thereof, when the person so notified or ordered may appear before the board issuing such notice or order to show cause why it should not be enforced, and the board or a majority thereof is present at its office at the time so specified; provided that when, in the opinion of at least four-fifths of the members of the board, an emergency exists which requires, for the protection of the health of occupants, the vacation of the building or portion thereof without a delay of five days, then no such fixing of a time for hearing shall be required.
(C.O. 602-10; renumbered to C.M.C. 602-11, eff. Jan. 1, 1972)

When the notice or order of vacation has not been complied with, and the board of health or director of buildings and inspections certifies such fact, together with a copy of the order or notice, to the chief of the police division of the city, it shall then be the duty of the chief and the members of the police division to enforce such notice or order of vacation and to cause the premises to be vacated, in accordance with the terms of such notice or order.
(C.O. 602-12; renumbered to C.M.C. 602-15, eff. Jan. 1, 1972)

Whenever the board of health or the director of buildings and inspections certifies to the city solicitor any failure to comply with any such order or notice of vacation, with the request that the city solicitor institute civil proceedings for the enforcement thereof, the city solicitor is hereby authorized to and shall institute any and all proceedings, either legal or equitable, that may be appropriate or necessary for the enforcement of such order or notice and the abatement of the nuisance against which such order or notice was directed; such suits or proceedings to be brought in the name of the city of Cincinnati, and no such suits or proceedings shall be held to exclude any criminal or penal proceedings which may be authorized by this chapter or any of the laws or ordinances in force in this city, or to exempt anyone violating this or such laws or ordinances from any penalty which may be incurred.
(C.O. 602-14; renumbered to C.M.C. 602-17, eff. Jan. 1, 1972)

Within five business days of receipt of such appeal, or at a mutually agreed time, the city manager or a city hearing officer shall conduct a hearing regarding the reasons for the permit denial or revocation and the basis of the protest.

At the hearing, the sole issue to be decided is whether the application meets the requirements of this chapter and the city manager's rules and regulations for the use of Fountain Square. Nothing in this chapter shall apply to the use of city streets by duly authorized public utility corporations for the furnishing of utility services to consumers in the City of Cincinnati in accordance with regulations established by ordinance. Revocable street privileges may only be granted for the purposes set forth in this chapter and in Chapter 723 "Street and Sidewalks, Use Regulations."
(C.O. 745-1; renumbered to C.M.C. 718-3, eff. Jan. 1, 1972; a. Ord. No. 363-2009, § 3, eff. Jan. 16, 2010)

Sec. 718-7. Standard Conditions of Revocable Street Privilege Approval.

(a) Any revocable street privilege issued pursuant to this chapter or Chapter 723, "Streets and Sidewalks, Use Regulations," shall automatically be subject to the following conditions, in addition to any other conditions imposed by the Cincinnati Municipal Code, provided that the city manager or his or her designee may waive one or more conditions upon the determination that it will not negatively impact public health, safety, or welfare, unreasonably interfere with the use and function of city streets, or pose an undue threat to the fiscal interests of the city:

1. *Expenses*. All costs and expenses associated with the use of the revocable street privilege and the construction, maintenance, modification, use, operation, repair, removal, and abandonment of all building encroachments, fixtures, equipment, personalty, or other improvements associated with the revocable street privilege shall be the sole responsibility of the holder. The city shall have no responsibility for any costs or expenses associated with the use of the revocable street privilege and the construction, maintenance, modification, use, operation, repair, removal, and abandonment of any building encroachments, fixtures, equipment, personalty, or other improvements associated with the revocable street privilege.

2. *Maintenance of Building Encroachment*. The holder shall maintain all building encroachments, fixtures, equipment, personalty, or other improvements associated with the revocable street privilege in a good, clean, and safe condition and repair and in accordance with applicable city standards, which may be established by the city manager or his or her designee in his or her sole discretion.

3. *City's Right to Enter the Area*. The holder acknowledges that the city and its authorized representatives have the unlimited right to enter upon the revocable street privilege area at any time for any purpose, including without limitation to inspect the area and any building encroachments, fixtures, equipment, personalty, or other improvements located in the area, provided that the city shall have no duty to inspect.

4. *Rights of Utility Companies*. The revocable street privilege granted to a holder is subject and subordinate to the rights of any and all utility companies that may now or hereafter have utility lines and other utility installations located in, under, over, or within the vicinity of the revocable street privilege area.

5. *Insurance; Bond*. For so long as the revocable street privilege remains in effect, the holder shall maintain a policy of general liability insurance for the revocable street privilege area and any building encroachments, fixtures, equipment, personalty, or other improvements located in the area in an amount that, unless a specific amount is otherwise provided by the code, corresponds to the prevailing rate for similar property used for a similar purpose as determined by the city manager or his or her designee in his or her sole discretion.

   The city shall be named as an additional insured. The holder shall furnish a certificate of insurance to the city evidencing such insurance

prior to commencing use of the revocable street privilege area or the construction of any building encroachments or improvements in the area. The holder shall furnish a new certificate of insurance annually by the anniversary of the date of the issuance of the revocable street privilege upon the request of the city.

In addition, whenever, in the opinion of the city manager, the construction or maintenance of building encroachments, fixtures, equipment, personalty, or other improvements associated with the revocable street privilege presents the possibility of substantial damage or loss to the city, to other property owners, or to members of the public, the city manager shall be authorized to require a reasonable bond to protect against such damage or loss.

6. *Waiver of Claims for Damage*. The city shall have no responsibility or liability for loss or damage related to the use of the revocable street privilege, the construction, maintenance, operation, repair, removal, or abandonment of building encroachments, fixtures, equipment, personalty, or other improvements associated with the revocable street privilege, or the loss, theft, or damage of equipment, fixtures, or personalty that may at any time be placed within the revocable street privilege area.

7. *Indemnification*. The holder shall indemnify, defend, and save the city, its officials, employees, agents, contractors, guests, and invitees harmless from and against any and all claims, liens, demands, obligations, actions, proceedings, causes of action, losses, damages, settlements, costs, charges, professional fees, and other expenses and liabilities of every kind and character (including without limitation attorney fees) arising out of, or related to, the use, maintenance, or abandonment of the revocable street privilege, the construction, maintenance, use, operation, repair, removal, or abandonment of building encroachments, fixtures, equipment, personalty, or other improvements associated with the revocable street privilege, or the loss, theft, or damage of equipment, fixtures, or personalty that may at any time be placed within the revocable street privilege area.

8. *Personal to Holder*. Each revocable street privilege is personal to its holder and cannot be transferred. If a holder sells or transfers any interest in the privileged premises associated with the street privilege, the revocable street privilege shall automatically terminate and all applicable termination provisions in this chapter shall apply.

9. *Use for Advertising Purposes Prohibited*. Unless expressly authorized by the code, no structure placed upon any sidewalk, city street, alley or way pursuant to a revocable street privilege shall be used for advertising purposes.

10. *Revocation or Modification*. Each revocable street privilege shall be subject to revocation or modification by the city manager or his or her designee at any time and for any reason. Except for instances in which a different time is specified by the code, the revocation or modification of a revocable street privilege shall be effective 30 days after notice of the revocation or modification is served on the holder; provided, however, that the revocation or modification of a

revocable street privilege on the basis of public health or safety concerns shall be immediately effective.

11. *Notice.* Notice from the city or any of its authorized officers, employees, agents of the provisions of this section shall be valid if served on the holder or on any local agent of the holder either personally, by mail addressed to the last known place of residence, or by publication in the manner required for ordinances of the City of Cincinnati.

12. *Restoration and Required Changes*. Upon the revocation or modification of a revocable street privilege, the holder shall take immediate steps to remove or modify all building encroachments, improvements, equipment, fixtures, and personal property from or in the revocable street privilege area and shall repair and restore any and all public improvements within the area to their original condition as they existed immediately prior to the issuance of the revocable street privilege, unless otherwise authorized by the city manager or his or her designee. All repairs, modifications, and restorations shall be subject to the supervision and approval of the city manager or his or her designee.

13. *Failure to Restore or Modify*. In case of a holder's failure to remove or modify all building encroachments, fixtures, equipment, personalty, and other improvements from the revocable street privilege area, or to repair and restore any and all public improvements within the area within a reasonable time, the city manager shall be authorized to make the necessary removal, modify, repair, and restoration, and to charge the expense thereof to the holder; provided, however, in the case of underground pipes, equipment, or construction that may be effectively sealed without interfering with the use and maintenance of public streets, the city manager may authorize the sealing of the pipes, equipment, or construction in lieu of their removal and, upon their sealing, all pipes, equipment, or construction shall become the property of the city. In the case of modifications required by a privately owned public utility company, the city manager shall authorize such company to make the change and the holder shall be liable for the reasonable cost thereof.

(b) In addition to the conditions contained herein, the city manager or his or her designee may impose additional conditions that shall automatically apply to revocable street privileges issued pursuant to this chapter or Chapter 723, "Streets and Sidewalks, Use Regulations," to the extent necessary to carry out the intent and purpose of the code section authorizing the revocable street privilege, to ensure the public health, safety, and welfare, to maintain the use and function of public streets, or to protect the fiscal interests of the city.

Sec. 719-1. Purpose and Goals.

The purpose of this chapter is to establish general procedures and standards, consistent with all applicable federal and state laws, for the siting, construction, installation, collocation, modification, operation, and removal of wireless communications facilities in the right of way. The goals of this chapter are to:

(a) Provide standards for the siting, construction, installation, collocation, modification, operation, and removal of wireless communications facilities in the city's right of way and for payment of fees and charges to be uniformly applied to all applicants and owners of wireless communications facilities or support structures for such facilities.

(b) Establish basic criteria for applications to site wireless communications facilities in the right of way and authorize the director of the department of transportation and engineering to develop, publish, and from time to time amend applications and other associated materials to provide clear guidance to applicants.

(c) Ensure that wireless communications facilities will conform to all applicable health and safety regulations and will blend into their environment to the greatest extent possible.

(d) Enhance the ability of wireless communications carriers to deploy wireless infrastructure in the city quickly, effectively, and efficiently so that residents, businesses, and visitors benefit from ubiquitous and robust wireless service availability. Promote the rapid deployment of small cell infrastructure and related capital investment in the city by ensuring that the city grants or denies consent to install, operate, modify, or replace wireless communications facilities in a timely manner.

(e) Preserve the character of the city's neighborhoods and historic districts. Protect the integrity of the residential areas and historic assets and ensure that access to and occupancy or use of public ways in such districts is technologically and aesthetically appropriate.

(f) Comply with, and not conflict with or preempt, all applicable state and federal laws, including without limitation Section 101(a) and Section 704 of the Telecommunications Act, Pub. L. 104-104, 101 Stats. 56, 70 (Feb. 8, 1996) (codified as 47 U.S.C. §§ 253(a), 332(c)(7)), as may be amended or superseded, and Section 6409(a) of the Middle Class Tax Relief and Job Creation Act, Pub. L. 112-96, 126 Stat. 156 (Feb. 22, 2012) (codified as 47 U.S.C. § 1455(a)), as may be amended or superseded, and all Federal Communications Commission ("FCC") rules and regulations to interpret and implement applicable federal statutes.

(Ordained by Emer. Ord. No. 308-2016, § 1, eff. Sept. 28, 2016; a. Emer. Ord. No. 335-2021, §§ 1, 2, eff. Aug. 4, 2021)

Sec. 719-3-S2. Small Cell Facility.

"Small Cell Facility" means transmission equipment or a wireless facility that meets both of the following requirements:

(a) Each antenna is located inside an enclosure of not more than six cubic feet in volume or, in the case of an antenna that has exposed elements, the antenna and all of its exposed elements could fit within an enclosure of not more than six cubic feet in volume; and

(b) All other wireless equipment associated with the facility is cumulatively not more than twenty-eight cubic feet in volume. The calculation of equipment volume shall not include electric meters, concealment elements, telecommunications demarcation boxes, grounding equipment, power transfer switches, cut-off switches, and vertical cable runs for the connection of power and other services.

(c) The term includes a micro wireless facility as defined in O.R.C. Section 4929.01(H).

(Ordained by Emer. Ord. No. 335-2021, §§ 1, 2, eff. Aug. 4, 2021)

Sec. 719-3-S3. Substantial Change.

"Substantial Change" means the same as defined by the FCC in 47 C.F.R. § 1.6100, as may be amended, and as applicable to facilities in the public right-of-way, which defines that term as a collocation or modification that:

(a) Increases the overall height more than 10% or 10 feet (whichever is greater);

(b) Increases the width more than 6 feet from the edge of the wireless tower or base station;

(c) Involves the installation of any new equipment cabinets on the ground when there are no existing ground-mounted equipment cabinets;

(d) Involves the installation of any new ground-mounted equipment cabinets that are ten percent (10%) larger in height or volume than any existing ground-mounted equipment cabinets;

(e) Involves excavation or deployment of equipment outside the area in proximity to the structure and other transmission equipment already deployed on the ground;

(f) Would defeat the existing concealment elements of the support structure as determined by the department; or

(g) Violates a prior condition of approval, provided however that the collocation need not comply with any prior condition of approval related to height, width, equipment cabinets or excavation that is inconsistent with the thresholds for a substantial change.

Note: For clarity, the definition in this chapter includes only the definition of a substantial change as it applies to facilities in the public right-of-way. The thresholds for a substantial change outlined above are disjunctive. The failure to meet any one or more of the applicable thresholds means that a substantial change would occur. The thresholds for height increases are cumulative limits. For sites with horizontally separated deployments, the cumulative limit is measured from the originally permitted support structure without regard to any increases in size due to wireless equipment not included in the original design. For sites with vertically separated deployments, the cumulative limit is measured from the permitted site dimensions as they existed on February 22, 2012, the date that Congress passed Section 6409(a) of the Middle Class Tax Relief and Job Creation Act.

Sec. 719-5. Applications.

(a) *Requirement*. Anyone making an eligible facilities request or seeking consent to site, install, construct, modify, repair, or collocate a wireless communications facility in the right of way shall first duly file a written application with the city's department of transportation and engineering, in accordance with the requirements in this section and the application requirements set forth in the design guidelines as modified from time to time by the director of the department of transportation and engineering by the authority granted in Section 719-11(c) of this chapter.

(b) *Single facility per application.* A single application shall propose the siting, installation, construction, modification, repair, or collocation of no more than one existing eligible support structure or wireless support structure, installation on a potential support structure, or construction of a new tower or base station. Applications and eligible facilities requests may be consolidated as permitted by O.R.C. Section 4939.0312 but without any reduction in applicable fees.

(c) *Owner information.* Applications shall include the name of the person who owns or will own the wireless communications facility, wireless facility, wireless support

structure, base station, tower, or potential support structure for an eligible facilities request or for which consent is requested. A permit or record of consent issued by the city shall include the name of the person who owns or will own the facility or structure.

(d) *Recovery of additional costs incurred in processing application*. The department of transportation and engineering is authorized to charge the applicant for recovery of additional reasonable costs incurred in its analysis, evaluation, and response to an application for an eligible facilities or request for consent under this chapter if the actual costs of review exceed the application fee. Nothing in the reasonableness limitation on additional costs shall be construed to bar or limit the city's authority to incur costs it deems necessary or appropriate in connection with the application. Additional costs may include unforeseen city staff review costs and the costs of third-party technical experts hired to assist with review application. No city work permits or ROW wireless occupancy permits shall issue until and unless the applicant pays the nonrefundable application fees and such additional costs as are authorized to be recovered under this paragraph.

1. *Authorization to retain independent consultants*. The director of the department of transportation and engineering may, in his or her discretion, and at any time in the review process, select and retain an independent consultant with expertise in telecommunications satisfactory to the department of transportation and engineering in connection with any permit application. In the event that the department of transportation and engineering decides to retain an independent consultant for technical review, it shall send written notice to the applicant including a nonbinding estimate of the cost for such review. The applicant shall have five business days from the date of mailing of notice to elect to withdraw the application without any liability for any costs or expenses in connection with the independent technical review.
2. *Scope*. The department of transportation and engineering may request independent consultant review on any issue that involves specialized or expert knowledge in connection with the permit application. Technical review issues may include, but are not limited to:
   i. Application completeness or accuracy;
   ii. Planned compliance with applicable RF exposure standards;
   iii. Whether and where a significant gap exists or may exist, and whether such a gap relates to service coverage or service capacity;
   iv. The applicability, reliability, and/or sufficiency of analyses or methodologies used by the applicant to reach conclusions about any issue within this scope; and
   v. Any other issue that requires expert or specialized knowledge identified by the department of transportation and engineering.
3. *No permit until payment*. The applicant must pay for the cost of consultant technical review and for the technical consultant's testimony in any hearing as requested by the department of transportation and engineering. No permit shall issue to an applicant where that applicant has not timely paid any fee required

under the Municipal Code or if the applicant owes payment on outstanding invoices for costs recoverable by the City under this Chapter 719.

4. *Application Fees.* The nonrefundable fee charged by the city for an application for consent or an eligible facilities request shall not exceed two hundred and fifty dollars per each small cell facility covered by the application. This limit shall be increased by ten percent, rounded to the nearest five dollars, every five years commencing July 1, 2021. During each five-year period, the adjustment may be applied incrementally or as a single adjustment as determined by the department of transportation and engineering. For Type I applications, the department of transportation and engineering may, in its discretion, allow for multiple locations from a single applicant to be listed under a single application. Additionally, providers shall pay all fees as required for work permits and ROW occupancy permits.

(Ordained by Emer. Ord. No. 308-2016, § 1, eff. Sept. 28, 2016; a. Emer. Ord. No. 335-2021, §§ 1, 2, eff. Aug. 4, 2021)

Sec. 719-7. Categories of Applications; Review Timelines.

In accordance with FCC regulations, the department of transportation and engineering shall classify every application to locate a wireless communications facility in the right of way as one of the following four types:

(a) A Type I application is for a minor modification that:

1. Involves collocation, removal, or replacement of transmission equipment or a wireless facility, including a small cell facility, on an existing wireless support structure, tower, or base station and does not substantially change the physical dimensions of the existing wireless support structure, tower, or base station.

2. *60-day period for review*. The city shall approve a Type I application within sixty days, upon confirming that the requested modification constitutes an eligible facilities request and does not constitute a substantial change under 47 CFR § 1.6100. The period for review may be tolled in accordance with 47 CFR § 1.6100.

(b) A Type II application is for a modification that:

1. Involves collocation, removal, or replacement of transmission equipment or a wireless facility, including a small cell facility, on an existing wireless support structure, tower, or base station and substantially changes the physical dimensions of the existing wireless support structure, tower, or base station or does not qualify for approval pursuant to 47 U.S.C. § 1455(a) for any lawful reason.

2. *90-day period for review*. The city shall review and approve or deny a Type II application within ninety days, in accordance with O.R.C. Section 4939.031.

(c) A Type III application is one that proposes:

1. Siting new transmission equipment or a new wireless facility, including a small cell facility, on an existing wireless support

structure in the right of way that does not already support transmission equipment or a wireless facility.

2. *90-day period for review*. The city shall review and approve or deny a Type III application within ninety days, in accordance with O.R.C. Section 4939.031.

(d) A Type IV application is one that proposes:

1. Siting new transmission equipment or a new wireless facility, including a small cell facility, on a new wireless support structure, tower, base station, utility pole, decorative pole, or potential support structure in the right of way.

2. *120-day period for review*. The city shall review and approve or deny a Type IV application within one hundred twenty days, in accordance with O.R.C. Section 4939.031.

The timelines for review of Type II, Type III, and Type IV applications established in this section may be tolled under certain circumstances, in accordance with O.R.C. Section 4939.036.

When the timelines for review contained herein conflict with the timelines for review mandated by the Ohio Revised Code, the United States Code, the Code of Federal Regulation, or other applicable state or federal laws, rules, or regulations, the conflict shall be resolved by giving precedence to the federal timeline or, in the absence of a federal timeline, the state timeline.
(Ordained by Emer. Ord. No. 308-2016, § 1, eff. Sept. 28, 2016; a. Emer. Ord. No. 335-2021, §§ 1, 2, eff. Aug. 4, 2021)

Sec. 719-9. Application Review and Wireless Facility Right-of-Way Occupancy Permit.

(a) *General standard of review for wireless communications facilities*. All wireless communications facilities in the right of way shall conform to the provisions of this chapter and to the design guidelines as modified from time to time by the director of the department of transportation and engineering. The department of transportation shall review and consider each application according to the application classifications, review processes, and deployment standards described in the design guidelines.

(b) *Notice to residents*. Within 10 days of filing a Type III or Type IV application, the applicant shall provide the department of transportation and engineering with proof of notice to the owners of all real property located within 100 feet of the site of the proposed wireless communications facility or as further provided in the design guidelines. Separate notice including a list of impacted streets shall be sent to the corresponding community council(s) and a copy provided to the department of transportation and engineering. The intent of the notices is to allow persons who live or work nearest the site the opportunity to ask questions and educate themselves and to apprise the department of transportation and engineering of conditions that may not be readily apparent from otherwise available information. The notices shall inform interested persons of the opportunity to file written comments to be submitted to the department of transportation and engineering, which comments should address whether the application conforms to the provisions of this chapter. The applicant shall provide the department with proof that the notices required under this section has been given, including a mailing list for all recipients and a copy of the mailed notices. Notwithstand-

ing the above, the department of transportation and engineering may, at its discretion, require additional public notice if it determines such notice is in the best interests of the public. Notice shall not be required for Type I or Type II applications.

(c) *Written decision.* Within five working days after the department of transportation and engineering renders a decision on an application, it shall send written notice to the applicant. Any denial shall include the reasons for the denial and information regarding the process for an administrative appeal under Section 719-9.

(d) *Approval.* Approval of an application shall include the following permissions:

1. *Permit to construct*. A work permit to construct the approved wireless communications facility, subject to any conditions established by the department of transportation and engineering to carry out the purposes and intent of this chapter and the Cincinnati Municipal Code.
2. *Wireless facility right-of-way occupancy permit*. A wireless right-of-way occupancy permit granting the applicant permission to occupy the right of way at the proposed site and subject to (a) the standard conditions required by Section 719-10 and (b) any additional conditions required by the director of the department of transportation and engineering to carry out the purposes and intent of this chapter and the Cincinnati Municipal Code. The wireless ROW permit shall not convey title, equitable or legal, in the right of way.

(e) *Restrictions on Wireless ROW Permits*. A wireless ROW permit may be transferred upon notification to the city and acceptance by the transferee to allow the transferee to site wireless facilities in the same location on the same supporting structure as the transferor. Such a transfer may be made only to a wireless service provider who possesses a current wireless ROW permit from the city for siting wireless facilities elsewhere in the right of way.

(f) *Denial.* The city reserves the right to deny an application if any one of the following conditions exist:

1. The applicant has not demonstrated that its application conforms to the provisions of this chapter and the Cincinnati Municipal Code, including the design guidelines established pursuant to this chapter;
2. The applicant is not authorized to conduct business in the State of Ohio;
3. For any Type I application, the applicant has failed to show that the project qualifies for approval as an eligible facilities request, pursuant to 47 U.S.C. § 1455(a) and the related FCC regulations at 47 C.F.R. § 1.6100 et seq.;
4. For any Type II, Type III, or Type IV application, the applicant has failed within the prior three years to comply or is presently not in full compliance with the requirements of this chapter with regard to another wireless communications facility that is not the subject of the application in question;
5. The applicant is in default of its obligation to pay to the city fees imposed by this chapter;
6. The design or location does not comply with the relevant standards promulgated by the American Association of State Highway and Transportation Officials (AASHTO) and utilized by the department of transportation of engineering for construction in the right of way;

7. The design or location does not comply with current or proposed Americans with Disabilities Act Accessibility Guidelines (ADAAG) promulgated by the United State Access Board.

(g) *Multiple requests for same or nearby location.* If multiple requests are received by the city to install two or more wireless facilities or wireless support structures that would violate applicable spacing requirements under the design guidelines, or to collocate two or more wireless facilities on the same wireless support structure, the city may resolve conflicting requests through whatever reasonable and nondiscriminatory manner the city deems appropriate.

(h) *Appeal of denial on the merits.* Upon denial of an application for failure to meet the requirements of this chapter, the applicant may appeal the decision to the director of the department of transportation and engineering for reconsideration. The appeal must be in writing and delivered to the director no later than 5:00 p.m. (EST) on the tenth business day after issuance of written notification by the city of denial of the permit. An appeal must provide a detailed explanation, in writing, of the reasons the applicant contends the proposed wireless facility satisfies the requirements of Chapter 719 (including if the application qualifies for a limited exemption for personal wireless service facilities under Section 719-9(h)). The appeal should include all relevant supporting documentation. The director shall review the written appeal together with other evidence in the record and grant the permit if the director determines that, based on substantial evidence in the application record, the permit complies with the requirements of Chapter 719. The director shall issue a written decision within ten business days of the filing of the appeal. Failure by applicant to appeal and request reconsideration under this section shall constitute a failure to exhaust administrative remedies for purposes of any subsequent appeal in a court of law.

(i) *Limited exemption for personal wireless service facilities.* Federal law prohibits a permit denial when it would effectively prohibit the provision of personal wireless services. Due to wide variation among wireless facilities and technical service objectives, and due to changed circumstances over time, a limited exemption for proposals in which strict compliance with this chapter would effectively prohibit personal wireless services serves the public interest. Circumstances in which an effective prohibition may occur are extremely difficult to discern, and specified findings to guide the analysis promotes clarity and the city's legitimate interest in well-planned wireless facilities deployment. Therefore, in the event that any applicant asserts that strict compliance with any provision in this chapter, as applied to a specific proposed wireless communications facility, would effectively prohibit the provision of personal wireless services, the director of the department of transportation and engineering may grant a limited, one-time exemption from strict compliance, subject to the following provisions:

1. *Required findings*. The director of the department of transportation and engineering shall not grant any exemption unless the applicant provides each of the following:

   i. Evidence that the proposed wireless facility qualifies as a "personal wireless services facility" as defined in 47 U.S.C. § 332(c)(7)(C)(ii);

   ii. A clearly defined and reasonable technical service objective and a clearly defined potential site search area; and

iii. A meaningful comparative analysis that includes the factual reasons why (1) any alternative location(s) or design(s) suggested by the city or otherwise identified in the administrative record are not technically feasible and (2) the proposed location and design deviation is the least noncompliant location and design necessary to reasonably achieve the applicant's technical service objective.

2. *Scope of exemption*. The director of the department of transportation and engineering shall limit the exemption to the extent to which the applicant demonstrates such exemption is necessary to reasonably achieve its reasonable technical service objectives. The department of transportation and engineering may adopt conditions of approval specific to a permit issued as a limited exemption pursuant to this section, as reasonably necessary to promote the purposes in this chapter and protect the public health, safety, and welfare.

(Ordained by Emer. Ord. No. 308-2016, § 1, eff. Sept. 28, 2016; a. Emer. Ord. No. 335-2021, §§ 1, 2, eff. Aug. 4, 2021)

Sec. 719-10. Standard Conditions of Permit Approval.

(a) *Standard conditions of approval.* Permission to site wireless communications facilities in the right of way shall be conditioned on compliance with the standard conditions of approval provided in this Section 719-10. The department of transportation and engineering may add or modify conditions of approval as necessary or appropriate to protect and promote the public health, safety, and welfare.

(b) *Wireless ROW Permit duration; term*. For Type II, Type III, and Type IV permits, the wireless ROW permit will automatically expire ten years from the issuance date, except when federal or state law authorizes the city to issue a permit with a shorter term. Any request for a permit renewal shall be reviewed as request for a new permit subject to all applicable procedures and standards in effect at the time the request is received. An operator may remove a wireless communications facility at any time subject to applicable work permit and city requirements.

(c) *Standard conditions of approval for Type I permits*. Any Type I permit approved or deemed granted by the operation of law shall be automatically subject to the following conditions of approval:

1. *Duration for Type I approvals*. The city's grant or grant by operation of law of a Type I eligible facilities request constitutes a federally mandated modification to the underlying permit or approval of the subject wireless support structure, tower, and/or base station. The city's grant or grant by operation of law of a Type I eligible facilities request will not extend the permit term for any underlying permit or other regulatory approval, and its term shall be coterminous with the underlying permit or other regulatory approval for the subject wireless support structure, tower, and/or base station.

2. *Accelerated permit terms due to invalidation*. In the event that any court of competent jurisdiction invalidates any portion of 47 U.S.C. § 1455(a) or any FCC rule that interprets 47 U.S.C. § 1455(a) such that federal law would not mandate approval of any Type I permit, such permit shall automatically expire one

year from the effective date of the judicial order, unless the decision specifically does not authorize accelerated termination of previously approved Type I permits. A permittee shall not be required to remove its improvements approved under the invalidated Type I permit if it submits an application for a Type II, Type III, or Type IV permit for those improvements before the one-year period ends. The director of the department of transportation and engineering, at his or her discretion, may extend beyond one-year the time in which a permittee may apply for a Type II, Type III, or Type IV permit for an invalidated Type I permit.

3. *No waiver of standing*. The city's grant or grant by operation of law of a Type I permit does not waive, and shall not be construed to waive, any standing by the city to challenge 47 U.S.C. § 1455(a), any FCC rules that interpret 47 U.S.C. § 1455(a), or any particular Type I eligible facilities request.

(d) *Standard conditions of approval for all wireless ROW permit.* All applications for all four types of wireless ROW permits shall be subject to the following standard conditions of approval by operation of law:

1. *Compliance with all applicable laws*. Permittee shall at all times maintain compliance with all applicable federal, state, and local laws, regulations, ordinances, or other rules.

2. *Inspections; emergencies*. The city or its designee may inspect a wireless communications facility in the right of way upon reasonable notice to the permittee. The permittee shall cooperate with all inspections. The city reserves the right to support, repair, disable, or remove any elements of the facility in emergencies or when the facility threatens imminent harm to persons or property.

3. *Contact information for responsible parties*. Permittee shall at all times maintain accurate contact information for all parties responsible for the facility, which shall include a phone number, street mailing address, and email address for at least one natural person and emergency contact information. All such contact information for responsible parties shall be provided to the department of transportation and engineering promptly upon request.

4. *Indemnities*. To the fullest extent permitted by law, all permittees, operators, and, if applicable, non-government owners of a wireless communications facility shall defend, indemnify, and hold harmless the city and its agents, officers, officials, and employees from:

   i. Any and all damages, liabilities, injuries, losses, costs, and expenses arising out of any claims, demands, lawsuits, writs of mandamus, or other actions or proceedings brought against the city to challenge, attack, seek to modify, set aside, void, or annul the city's approval of the applicable wireless ROW permit; and

   ii. Any and all damages, liabilities, injuries, losses, costs, and expenses and any claims, demands, lawsuits, or other actions or proceedings of any kind, whether for personal injury, death, or property damage, arising out of or in connection with the activities or performance of

the permittee or its agents, employees, licensees, contractors, subcontractors, or independent contractors.

iii. In the event the city becomes aware of any such actions or claims, the city shall promptly notify the permittee and shall reasonably cooperate in the defense. It is expressly agreed that the city shall have the right to approve, which approval shall not be unreasonably withheld, the legal counsel providing the city's defense, and the permittee (as applicable) shall reimburse city for any costs and expenses directly and necessarily incurred by the city in the course of the defense.

5. *Interference with public safety radio services*. In the event that the city has reason to believe that permittee's radio communications operations are causing interference with the city's radio communications operations, then the permittee shall, at its cost, immediately cooperate with the city to either rule out permittee as the interference source or eliminate the interference. Cooperation with the city may include, but shall not be limited to, temporarily switching the transmission equipment on and off for testing.

6. *Adverse impacts on adjacent properties*. Permittee shall undertake all reasonable efforts to avoid undue adverse impacts to adjacent properties and/or uses that may arise from the construction, operation, maintenance, modification, or removal of the facility.

7. *General maintenance*. The site and the facility, including, but not limited to, all landscaping, fencing, and related transmission equipment, must be maintained in a neat and clean manner and in accordance with all approved plans and conditions of approval.

8. *Good condition required*. Wireless communications facilities shall at all times be kept and maintained in good condition, order, and repair by qualified maintenance and construction personnel, so that the same shall not menace or endanger the life or property of any person. In the event any damages occur to a non-city-owned wireless support structure, tower, or base station, the wireless support structure, tower or base station shall be repaired within 20 days.

9. *Graffiti abatement*. Permittee shall remove any graffiti on the wireless facility at permittee's sole expense in a timely manner.

10. *RF exposure compliance*. All facilities must comply with all standards and regulations of the FCC and any other state or federal government agency with the authority to regulate RF exposure standards.

11. *Relocation for public improvement projects*. Permittee shall remove and relocate the permitted wireless communications facility at permittee's sole expense to accommodate construction of a public improvement project by the city as required under Chapter 722 of the Cincinnati Municipal Code.

12. *Removal if discontinued use.* In the event that the use of a wireless communications facility is discontinued or abandoned, the owner shall provide written notice to the city of its intent to discontinue use or abandon, and the date when the use shall be

discontinued or is abandoned. If a wireless communications facility is not removed within ninety (90) days of discontinued use, or is determined abandoned by the city, the city may remove it at the owner's expense irrespective of the notice requirement under this section.

13. *Taxes and assessments*. To the extent taxes or other assessments are imposed by taxing authorities on the use of city property as a result of an applicant's use or occupation of the right of way, the applicant shall be responsible for payment of such taxes, payable annually unless otherwise required by the taxing authority.

14. *Completion within 180 days*. The collocation of a wireless facility or the construction of a new wireless support structure, tower, or base station for which a permit is granted shall be completed within one hundred eighty days after issuance of the permit. The city and the operator may agree in writing to extend this period if a delay is caused by make-ready work for a city-owned wireless support structure or decorative pole or by the lack of commercial power or backhaul availability at the site, provided that the operator has made a timely request within sixty days after the issuance of the permit for commercial power or backhaul services and the additional time to complete installation does not exceed three hundred sixty days after issuance of the permit. If the colocation or construction is not accomplished with the designated time period without a prior extension having been granted by the city, the permit shall be void.

Sec. 719-11. Design Standards and Siting Preferences.

(a) *General design principles*. Every Type II, Type III, and Type IV wireless communications facilities must conform to the following design principles:

1. The proposed wireless communications facility, its support structure, equipment, and all associated improvements, shall be designed and sited in a manner that is sympathetic to the particular architectural character of the buildings and compatible with the streetscape in the vicinity of the proposed project site;

2. Design elements of the proposed wireless communications facility, its support structure, equipment, and all associated improvements, shall be sensitively selected to reflect the detailing and materials associated with the buildings and streetscape in the vicinity of the proposed project site;

3. The proposed wireless communications facility, its support structure, equipment, and all associated improvements, shall be designed and sited in a manner that does not adversely impact right-of-way circulation, accessibility, or obstruct existing or planned-future uses of the right-of-way; and

4. When sited in a Historic District, the proposed wireless communications facility shall be designed or concealed to mitigate adverse impacts on the historic environment based upon reasonable, technically feasible, and nondiscriminatory design criteria. No design or concealment criteria so imposed shall have the effect of prohibiting any operator's technology, nor may any such measures be

considered a part of a small cell facility for purposes of the size restrictions in the definition of small cell facility.

5. The proposed wireless communications facility shall comply with all applicable design, construction and location provisions in the design guidelines.

(b) *Design guidelines*. The department of transportation and engineering shall promulgate additional detailed design guidelines for the design and installation of wireless communications facilities in the right of way, which the department shall consider in reviewing an application. The design guidelines will accord with this section but will provide greater detail, description, and examples of acceptable wireless facilities including visual depictions. In addition, the design guidelines shall provide administrative and procedural guidance to applicants such as, for example, a list of minimum application requirements. The provisions in this section shall not limit or prohibit the department's discretion to promulgate and make publicly available other information, materials or requirements in addition to, and separate from, the design guidelines.

1. The design guidelines shall be reviewed and approved by the city planning commission before being finalized. The director of the department of transportation and engineering shall have authority to update or supplement the design guidelines to address relevant changes in law, technology, or administrative processes. Any revisions to the design guidelines that would materially modify the physical design requirements for wireless communications facilities to make them more obtrusive or materially modify the standard and minor review locations for wireless facilities shall be presented to the city planning commission for review and recommendation at a duly noticed hearing prior to adoption by the director. The notice shall be transmitted, at minimum, to all community councils and any person holding a wireless ROW permit under Chapter 719 or having an active permit application for the same. In the event of any conflict between the design guidelines and the standards articulated in this chapter of the Cincinnati Municipal Code, the language of this chapter takes precedence over the language of the design guidelines.

2. For revisions to the design guidelines required to be presented to the city planning commission under Section 719-11(b)(1), the city shall provide notice of the proposed revisions to all community councils and any person who holds a permit under this Chapter 719, and shall provide reasonable time (not less than 14 days) for those persons to review and comment on the proposed modifications.

(c) *Alternate location*. The city may propose an alternate location to the proposed location of a new wireless communications facility that is within one hundred feet of the proposed location or within a distance that is equivalent to the width of the public way in or on which the new wireless communications facility is proposed, whichever is greater, which the operator shall use if it has the right to use the alternate location on reasonable terms and conditions and the alternate location does not impose technical limits or additional costs.

Sec. 719-13. Recovery of Costs; Use of Revenue.

All costs recovered under this chapter shall be used to reimburse the department of transportation and engineering for its costs incurred in responding to applications and monitoring installation and maintenance of wireless communications facilities in the right of way pursuant to this chapter.
(Ordained by Emer. Ord. No. 308-2016, § 1, eff. Sept. 28, 2016)

Sec. 719-15. Safety Requirements.

Nothing in this chapter precludes the city from applying its generally applicable health, safety, and welfare regulations to an eligible facilities request or when granting consent for a wireless communications facility, a wireless facility, including a small cell facility, a wireless support structure, a tower, or a base station. These standards include, but are not limited to, the following specific requirements:

(a) *Prevention of failures and accidents*. Any person who owns a wireless communications facility sited in the right of way shall at all times employ ordinary and reasonable care and install and maintain in use nothing less than the best available technology for preventing failures and accidents which are likely to cause damage, injury, or nuisance to the public.

(b) *Compliance with fire safety and FCC regulations*. Wireless communications facilities, wires, cables, fixtures, and other equipment shall be installed and maintained in substantial compliance with the requirements of the National Electric Code, all FCC, state, and local regulations, and in such manner that will not interfere with the use of other property.

(c) *Surety bond or equivalent financial tool for cost of removal.* All owners must procure and provide to the city a bond or an equivalent financial mechanism in an amount determined by the department of transportation and engineering, to ensure compliance with all provisions of this section and to cover costs of damage to public property caused by the wireless communications facility. The bond or equivalent financial method must specifically cover the cost of removal of each wireless communications facility which the owner installs in the right of way in case the city has to remove or pay for removal of the wireless facility. Two acceptable alternatives to a bond include a funds set-aside and a letter of credit.

(d) *Relocation or adjustment for safety purpose*. If requested by the city, in order to accomplish construction and maintenance activities directly related to improvements for the health, safety, and welfare of the public, an operator shall relocate or adjust its facilities within the public way at no cost to the city, as long as such request similarly binds all users in or on such public way. Such relocation or adjustment shall be completed in accordance with local law.

(Ordained by Emer. Ord. No. 308-2016, § 1, eff. Sept. 28, 2016; a. Emer. Ord. No. 335-2021, §§ 1, 2, eff. Aug. 4, 2021)

Sec. 719-17. Nonconforming Wireless Communications Facilities.

(a) Any wireless communications facility sited in the right of way that is legally in existence on the date of the adoption of this chapter but that does not comply with the requirements of this chapter shall be permit-

ted to remain in the right of way but shall be considered a nonconforming wireless communications facility.

(b) As of the effective date of the ordinance establishing this chapter, the owner of the nonconforming facility and the facility itself are subject to the standard conditions found in Section 719-10 and the maintenance requirements found in Section 719-15 of this Chapter.

(c) If a nonconforming wireless communications facility is hereafter damaged or destroyed beyond repair, any replacement facility must be designed in accordance with all provisions of this chapter of the Cincinnati Municipal Code and the design guidelines.

(d) The provisions in this section shall not be applied to prohibit or deny any collocation or modification pursuant to a Type I application or eligible facilities request, as required by FCC regulations.
(Ordained by Emer. Ord. No. 308-2016, § 1, eff. Sept. 28, 2016; a. Emer. Ord. No. 335-2021, §§ 1, 2, eff. Aug. 4, 2021)

Sec. 719-19. Severability.

The provisions of any part of this chapter are severable. If any provision or subsection, or the application of any provision or subsection to any person or circumstances, is held invalid, the remaining provisions, subsection, and applications of such ordinance to other persons or circumstances shall not be made invalid as well. It is declared to be the intent of this section that the remaining provisions would have been adopted had such invalid provisions not been included in this chapter when originally adopted by Council.
(Ordained by Emer. Ord. No. 308-2016, § 1, eff. Sept. 28, 2016)

Sec. 719-99. Penalties.

(a) Any person who shall erect, construct, reconstruct, alter, repair, convert, attach, or maintain any wireless communications facility in violation of any of the terms of this chapter, or who, being the owner or agent of the owner of any lot, tract, or parcel of land, shall suffer or permit another to erect, construct, reconstruct, alter, repair, convert, attach, or maintain any such facility, shall be deemed to have violated the provisions hereof and commits a Class D Civil Offense as defined by § 1501-9(a) of the Cincinnati Municipal Code each day during the period such violation continues.

(b) If any wireless communications facility is erected, constructed, reconstructed, altered, repaired, converted, attached, or maintained in violation of this chapter or of any regulations made pursuant hereto, the proper officer of the city, in addition to other remedies, may institute in the name of the city any appropriate action or proceeding, whether by legal process or otherwise, to prevent such unlawful erection, construction, reconstruction, alteration, repair, conversion, maintenance, attachment, or use, to restrain, correct, or abate such violation, to prevent the use of such facility, and/or to prevent any illegal act, conduct, business, or use in or about such facility.

(c) The department of transportation and engineering is authorized to make requests and to issue orders regarding wireless communications facilities in the right of way for the purpose of public safety and compliance with this chapter of the Cincinnati Municipal Code. The department of transportation and engineering is also authorized to conduct visual and external inspections of wireless communications facilities and support structures in the right of way at any time and shall make efforts to coordinate with

the provider responsible for a wireless communications facility for any internal inspection of the relevant equipment.
(Ordained by Emer. Ord. No. 308-2016, § 1, eff. Sept. 28, 2016; a. Emer. Ord. No. 335-2021, §§ 1, 2, eff. Aug. 4, 2021)

Sec. 720. Scope.

The purpose of the stormwater management code contained in this chapter is to provide for effective management and financing of a stormwater system within the city; to provide mechanism for mitigating the damaging effects of uncontrolled and unplanned stormwater runoff; to improve the public health, safety and welfare by providing for the safe and efficient capture and conveyance of stormwater runoff and the correction of stormwater problems; to authorize the establishment and implementation of a master plan for storm drainage, including design, coordination construction, management, operation, maintenance, inspection and enforcement; to establish reasonable storm drainage service charges based on each property's contribution of stormwater runoff to the system and use and benefit of services and facilities; and to encourage and facilitate urban water resources management techniques, including detention of stormwater runoff, minimization of the need to construct storm sewers, and the enhancement of the environment.

In order to accomplish such purpose a storm drainage service charge shall be made on each lot or parcel in the city. Each property's contribution to runoff shall be the primary consideration in setting the service charge. Secondary consideration shall be given to specific or unusual service requirements of some properties, and special and general benefits accruing to or from properties as a result of providing their own stormwater management facilities.

The city's storm drainage service charges shall be fair and reasonable and bear a substantial relationship to the cost of providing service and facilities. Similar properties shall pay similar stormwater service charges. Charges shall reflect the area of each property and its intensity of development, since these factors bear directly on the peak rate of stormwater runoff. Rate studies shall be conducted periodically.

Stormwater costs shall be spread throughout the city, except where activities or facilities are clearly unusual and in excess of the normal level of service city-wide.

Charges for residential properties of two or less dwelling units shall reflect the relatively uniform effect that residential development has on runoff. Large residential lots generally have a lower overall intensity of development than small residential lots because a lesser percentage of large lots is covered with hard surfaced area. The effect of large residential properties on stormwater runoff is lowered by less imperviousness. Multi-family residential properties having three or more dwelling units and properties in land uses other than residential shall pay in proportion to residential properties of two or less dwelling units. Both relative area and intensity of development of other land uses shall be considered in setting rates.

An appeal and service charge adjustment process shall be employed to review stormwater charges when unusual circumstances exist which alter runoff characteristics or when either service or benefit varies from a normal condition or is of greater significance than contribution to runoff.

Sec. 720-29. Permits and Plan Review.

It shall be unlawful for any person or organization to construct, enlarge, alter, repair, relocate, or demolish a storm sewer, natural watercourse, or other drainage facility, without first filing an application and obtaining a proper permit. Permits for minor repairs, as defined in the rules and regulations, shall not be required.

Permits are required and may be granted by the utility division for the following improvement categories:

(1) Connection into the public stormwater system, except unimproved creeks or streams.

(2) Improvements which are or will become public facilities.

(3) Improvements within dedicated but unimproved street rights-of-way.

(4) Improvements which require retention or detention facilities.

Plans for all improvements made within the city that require stormwater facilities or changes or alterations to existing stormwater facilities must be submitted to the deputy director of stormwater management utility for review and approval. Plans and applications may be submitted directly to the utility division or through the building permit process. All improvements must conform to the provisions of this chapter or rules or regulations promulgated hereunder and the master plan. The deputy director of stormwater management utility shall have 30 days after the date of application to review each plan submitted. Plans that are not approved may be resubmitted. Plans that are not approved may be resubmitted after revisions are made. No permit shall be issued until a plan is approved or the need for a permit is waived by the deputy director of stormwater management utility.

Every improvement shall be provided with a stormwater system capable of handling stormwaters flowing onto the improvement site from other areas as well as stormwater from the site itself. The drainage system shall be designed to discharge into a watercourse, drainage channel, or other existing stormwater facility. These designs shall conform to the guidelines listed below and the specifications prescribed in the rules and regulations.

For developed lots and where new structures, additions, or changes are to be made, adequate surface grading shall be extended or runoff shall be collected in inlets and then connected to sewers or drains. This grading, and the drains where necessary, shall be shown on the building permit plan. The plan shall then be reviewed by the deputy director of stormwater management utility.

Where plans are being developed, all areas shall be graded and drained to prevent the standing of stormwater, except lakes, lagoons, or retention reservoirs approved by the utility division. Where necessary, drainage channels or sewers shall be provided to convey the water to an existing watercourse or outlet. The method and means of drainage, including the handling of both paved and unpaved areas, shall be subject to approval by the deputy director of stormwater management utility.

Facilities shall be provided to drain all street intersections, and to care for roof downspouts and drains from yards and driveway aprons. Where foundation drains are installed, the foundation drains must discharge to the surface water drainage system directly or through a sump pump installation.

Except for existing combined sewers, the stormwater drainage system shall not be combined with any part of the sanitary sewer system, nor shall sanitary waste water be discharged thereto.

Connection into a storm sewer shall be performed only by sewer tappers who meet the following requirements:

(1) They are licensed by the city or greater Cincinnati water works; and

(2) They have posted a bond with the city in the amount of $5,000.

(Ordained by Ord. No. 281-1985, eff. July 19, 1985; Emer. Ord. No. 156-2016, § 3, eff. June 15, 2016; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-31. Application for Permit.

An application shall be made by the owner of the property involved, or an authorized agent employed in connection with the proposed work.

The application shall be prepared in writing on printed forms prescribed by the deputy director of stormwater management utility and shall contain the full names and addresses of the owner, applicant, and contractor; the street and house number of the building or structure; a brief description of the proposed work; the estimated cost thereof; a statement on behalf of the owner that the proposed work will be in accordance with this Code and all laws and ordinances applying to the premises; and such other information as may be required by the deputy director of stormwater management utility.

Except for minor repairs as defined in the rules and regulations promulgated hereunder, all applications for permits shall be accompanied by three sets of plans and two sets of specifications. Plans and specifications shall be prepared in accordance with the deputy director of stormwater management utility's requirements as outlined in the rules and regulations. In addition to the plans and specifications, the applicant shall provide any statements, calculations, drawings and other supporting data regarding the manner in which stormwater runoff from the project site on the proposed development area will be controlled.

(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-33. Permits Issued.

The deputy director of stormwater management utility shall examine the applications as described in the plan review process. The proposed stormwater drainage system must be designed so as to fit into the existing or planned stormwater drainage system as prepared by the deputy director of stormwater management utility. The design, materials, and construction of all parts of the drainage system shall satisfy the requirements of the utility division and, when

involving highways and freeways, the requirements of the department of transportation of the state of Ohio.

If the examination reveals no objections to the proposed plan and it appears that the proposed work will be in compliance with the master plan, codes, laws, and ordinances applicable thereto and the proposed construction or work will be in conformance with this chapter, such application shall be approved and a permit issued, as soon as practicable, for the proposed work. If the examination reveals otherwise, such application shall be rejected and the findings shall be communicated in writing to the applicant.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-35. Permit Limitations.

A permit shall expire when no work is started within 180 days from the date of issuance; provided however, that one renewal, which shall be valid from 180 days commencing upon expiration of the original permit, shall be granted upon written application made prior to the expiration of the original permit and payment of the fee prescribed in Section 720-37.

A permit shall be revoked when work is discontinued for a period of one year or when, in the opinion of the deputy director of stormwater management utility, the completion of the work has been unduly delayed. No revoked permit may be revived until the plans and uncompleted work are made to comply with all the requirements of all laws, codes, regulations, and ordinances then in effect.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-37. Permit and Inspection Fees.

A permit fee and an inspection fee shall be paid as detailed herein for all stormwater facilities to be constructed. The fees shall be determined by the deputy director of stormwater management utility in accordance with the guidelines set herein.

Permit fees for connections into the public stormwater system except unimproved creeks and streams shall be $40.

Inspection fees and plan review fees for other permits required by Section 720-29 as set forth in the rules and regulations, shall be based on an hourly rate reasonably related to the cost to the city. The owner is responsible for all plan review and inspection fees. A deposit shall be required to provide for inspection fees.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-39. Posting of Permit.

The permit shall be posted in a conspicuous location at the project site if possible. If not, the owner or contractor shall retain the permit and have it readily available upon request by the utility division.

The owner or contractor shall preserve the permit until completion of the work. Upon application by the owner or contractor, the deputy director of stormwater management utility shall issue a duplicate permit to replace one destroyed by vandals or one which is accidentally destroyed.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-41. Revocation of Permit.

The deputy director of stormwater management utility may revoke the permit or stop work for any of the following reasons:

(1) Whenever there is a violation of any provision of this chapter, any ordinance of the city, or statute of the state relating to the project;

(2) Whenever the continuance of any work becomes dangerous to life or property;

(3) Whenever there is a violation of any condition on which the issuance of the permit was based;

(4) Whenever any false statement or misrepresentation has been made upon the application, plans, or specifications on which the issuance of the permit or approval was based.

(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-43. Inspection and Surveillance.

The deputy director of stormwater management utility shall inspect permit premises and enforce all laws relating to construction, alteration, repair, removal, demolition, equipment, use, location, and maintenance of the drainage facilities except as may be otherwise provided for. The deputy director of stormwater management utility shall, when the interests of the city so require, make investigations in connection with matters referred to in the code and render written reports on the same. For the purpose of enforcing compliance with the law, the deputy director of stormwater management utility shall issue such notices or orders as may be necessary.

The deputy director of stormwater management utility shall keep careful and comprehensive records of applications permits, inspections, reports rendered, notices, orders issued, and approvals. All such records shall be open for public inspection.

(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

(5) Discharges of non-backwash water from private residential swimming pools, provided the swimming pool water is dechlorinated by resting the water for at least 48 hours following the addition of chlorine or the chlorine level is below 0.1 milligrams per liter, and provided that the pH of any non-backwash swimming pool water discharged to the stormwater system shall not be less than 6.5 or greater than 8.5 at the time of the discharge.

720-44.2. Notification of Illicit Discharge: A person responsible for an illicit discharge shall notify the utility division immediately of such illicit discharge. This notification shall be followed, within 15 days of the date of occurrence, by a detailed written statement from the person responsible describing the causes of the discharge and the measures being taken to reduce, eliminate and prevent future occurrences of illicit discharges. The detailed written statement must be retained by the person responsible for three years from the date of the illicit discharge if the illicit discharge originated from a commercial or industrial establishment.

720-44.3. Illicit Connections: No pipe, ditch, drain, conveyance, device, outlet or accessory shall be connected directly or indirectly to the stormwater system that will discharge any pollutant or water containing any pollutant other than stormwater into the stormwater system. No illicit connection shall be constructed, used, operated, maintained or otherwise continued in existence.

(Ordained by Ord. No. 056-2012, § 15, eff. March 29, 2012; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-45. Notice of Violations.

When the deputy director of stormwater management utility finds the drainage facility, or the construction thereof, is contrary to the approved plans, or presents an unsafe or dangerous condition in connection with the provisions of this Code or of any law or ordinance relating to the same subject matter, or finds an illicit discharge or illicit connection, the deputy director of stormwater management utility shall give written notice to the owner of the premises. In addition to specifying a reasonable time in which to conform to the plans or the code, the notice shall:

1. State where and in what respect the work does not conform to the approved plans, or state the defective condition and law violated; or
2. State the nature of the illicit discharge and law violated; or
3. State the illicit connection and law violated.

In every instance, a revocation notice of the permit shall be in writing and shall be served upon the owner, agent, or the person having charge of the work. A revocation notice shall also be posted alongside the permit. After the notice is received or posted, it shall be unlawful for any person to proceed with any operation for which such permit was issued. No part of the fees for such permit shall be returned.

Notice, as required by this provision, is to be served on the owner, agent, contractor or

other person responsible for the work or violation related to this chapter, by personal delivery or by certified mail addressed to the last-known place of residence or place of business.

Sec. 720-47. Right of Entry for Survey and Examination.

After presenting proper credentials and securing permission, the employees of the utility division or its agents, including contractors and their employees, consultants and their employees, may enter upon lands within the city to make surveys and examinations to accomplish the necessary preliminary findings to establish a master plan and for detailed analysis to prepare final plans and specifications for the proposed improvements.

Where improvements are made that require periodic maintenance or inspection upon the lands by the utility division, the owner of such lands shall grant the city a perpetual easement and right of entry around and access to any stormwater channel or facility, including storm sewers.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-48. Right of Entry for Enforcement.

The employees of the utility division or its agents may enter upon lands at any reasonable time in the performance of their duties in the enforcement of Chapter 720, except that no such employee shall enter a building until the employee has identified himself or herself and secured permission from the owner, occupant or other person in control of the building to enter the building. Permission to enter from the owner, occupant, or other person in control of the building shall not be required if the employee is entering the building in the execution of a search warrant issued by a judge or magistrate authorizing entry and inspection, in accordance with law and utility division policy.

Before entering upon a premises or while on a premises in the performance of enforcement of Chapter 720, an employee of the utility division or its agent shall show his or her department credentials upon request by the owner or occupants of the premises involved or by the contractor performing work on the premises.
(Ordained by Ord. No. 056-2012, § 17, eff. March 29, 2012)

Sec. 720-49. Funding.

Funding for the stormwater utility division activities shall include, but not be limited to:

(1) Storm drainage service charge.

(2) Permit and inspection fees.

(3) Direct charges. This charge will be collected from owners and developers for the cost of designing and constructing stormwater facilities and administrative costs and related expenses where the utility designs and/or constructs or contracts for the construction of such facilities.

(4) Direct assessment. This change will be collected from owners in localized areas that desire stormwater drainage facilities not considered a part of the regional development or where an improvement is desired ahead of the priority status.

(5) Other income obtained from federal, state, local, and private grants, or revolving funds.

(Ordained by Ord. No. 281-1985. eff. July 19, 1985)

Sec. 720-51. Stormwater Fund.

All revenues generated by or on behalf of the utility division, including storm drainage service charges, permit and inspection fees, and direct charges and interest earnings on those revenues, shall be deposited in a stormwater fund and used exclusively for utility division purposes.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-53. Storm Drainage Service Charge.

A storm drainage service charge is imposed on each lot and parcel of land within the city, and the owner thereof, excepting only streets, boulevards, alleys, viaducts, sidewalks, curbing, street crossings, grade separations, and other public ways and easements, and highway structures and appurtenances belonging to the city.

(1) Undeveloped land shall be exempted from stormwater service charges.

(2) Road and freeway rights-of-way shall be exempted from the storm drainage service charge because they function as part of the stormwater collection and conveyance system. Railroads and other rights-of-way will be charged as described herein.

(3) Properties that have existing stormwater detention facilities, or those planning such facilities, may have their storm drainage service charges reduced as determined by the deputy director of stormwater management utility, in accordance with generally accepted engineering standards and practices to more accurately reflect the contribution to runoff from the property and the level of service provided to such property. The detention facilities must be in accord with the hydrologic, hydraulic, and structural design requirements of the rules and regulations. Facilities of a temporary nature will not be allowed a decrease in their charges.

(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-55. Classification of Property.

There shall be three classifications of property for determination of the storm drainage charge:

(1) Class A: One- and Two-Family Residential Properties Having a Land Area 10,000 Square Feet or Less. Typically, these types of property comprise about 7,500 square feet total, area range number (ARN 4) and an intensity of development factor (IDF) of 0.25, which constitutes an equivalent runoff unit (ERU) of 1.00. A flat rate or value of 1.00 ERU shall be applied to all one- and two-family residential property having a land area 10,000 square feet or less.

(2) Class B: One- and Two-Family Residential Properties Having a Land Area 10,001 Square Feet or Larger. Typically, these types of property comprise about 13,000 square feet total, area range number (ARN 7) and an intensity of development factor (IDF) of 0.20 which constitutes an equivalent runoff unit (ERU) of 1.40. A flat rate or value of 1.40 ERU shall be applied to all one- and two-family residential property having a land area 10,001 square feet or larger.

(3) Class C: Multi-Family (3 Families and More) Residential Property and Nonresidential Property. The gross area, total square footage, of each Class C property will be determined by any one or more means defined in Section 720-1-T. Such property sizes

shall be grouped in 2,000 square foot ranges and assigned an area range number (ARN).

(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-57. Land Use Intensity of Development Factors.

Ten land uses are identified and recognized for purposes of this chapter, each of which has an assigned intensity of development factor (IDF). The land use of each Class C property shall be assigned based on the records of the county recorder or auditor, the city, or through field examination or photogrammetric analysis.

Land Use	IDF
Commercial	0.85
Industrial	0.75

(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-59. Monthly Charge per Equivalent Runoff Unit (ERU).

The monthly charge per equivalent runoff unit (ERU) shall be $5.75 per month through, June 30, 2019. Thereafter, the monthly charge per ERU shall be as follows:

- $5.75 per month from January 1, 2019 through June 30, 2019;
- $6.90 per month from July 1, 2019 through December 31, 2019;
- $8.28 per month starting January 1, 2020 through December 31, 2020;
- $8.78 per month starting January 1, 2021 through December 31, 2021;
- $9.04 per month starting January 1, 2022 and for every month thereafter until the monthly rate is further modified.

Ord. No. 0218-2019, eff. July 1, 2019)

Sec. 720-61. Rates.

The deputy director of stormwater management utility is directed to prepare a list of all lots and parcels within the city and the area thereof, and assign a classification as set forth in Section 720-55 to each. All properties included in Class C shall be assigned an area range number (ARN) and intensity of development factor (IDF). The deputy director of stormwater management utility shall report any applications of the provisions of Sections 720-53 through 720-57, which the deputy director of stormwater management utility considers unjust or inequitable, and the matter shall be resolved in accordance with the provisions of Section 720-65.

The rates for the three classes of property set forth in Section 720-55 shall be as follows:

(1) *Class A:* The monthly storm drainage service charge for Class A lots and parcels as defined in Section 720-55 shall be calculated as follows:

Flat rate of 1.00 ERU times the monthly charge for ERU shall be applied to each Class A property.

This calculation may be phrased as follows:

1.00 × ($) charge per ERU = ($) Monthly Storm Drainage Service Charge, Class A.

(2) *Class B:* The monthly storm drainage service charge for Class B lots and parcels as defined in Section 720-55 shall be calculated as follows:

Flat rate of 1.40 ERU times the monthly charge for ERU shall be applied to each Class B property.

This calculation may be phrased as follows:

1.40 × ($) charge per ERU = ($) Monthly Storm Drainage Service Charge, Class B.

(3) *Class C:* The monthly storm drainage service charge for each lot and parcel within Class C described in Sections 720-55 and 720-57 shall be calculated as follows:

Multiply the area range number (ARN) of each lot or parcel times the intensity of development factor (IDF) of each lot or parcel, which equals the equivalent runoff units (ERU). Multiply this figure times the monthly charge per equivalent runoff unit. This calculation may be phrased as follows:

ARN × IDF = ERU.

ERU × ($) charge per ERU = ($) Monthly Storm Drainage Service Charge, Class C.

(Ordained by Ord. No. 281-1985, eff. July 19, 1985; Emer. Ord. No. 068-2018, § 3, eff. April 4, 2018; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-63. Collection of Storm Drainage Service Charge.

The storm drainage service charge shall be paid by the owner of each lot or parcel that is subject to this charge monthly or quarterly as determined by the director.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985; Ordained by Ord. No. 056-2012, § 18, eff. March 29, 2012)

Sec. 720-65. Adjustment of Charge, Appeal.

Persons who consider the charges applicable to their lot or parcel to be unjust or inequitable may apply to the utility engineer for adjustment thereof, stating in writing the grounds of the complaint. The utility engineer shall cause appropriate investigation thereof and report the findings and recommendations to the city manager or the city manager's designee for review. The city manager or the city manager's designee shall consider the complaint and the report and recommendation of the utility engineer, and determine whether an adjustment of the charges for any such lot or parcel is necessary to provide for the just and equitable application of the storm drainage service charge, and adjust such charge if appropriate.

Notice and substance of the appeal shall be sent to the utility division within 15 days after receipt of the charge. The utility engineer shall have 30 days to investigate the matter. The city manager or the city manager's designee shall timely review and rule upon the appeal.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-67. Delinquent Charges.

All charges not paid within 30 days after receipt of billing or under appeal shall be considered delinquent.

All charges in arrears and delinquent hereunder shall (1) be subject to an interest charge at the statutory rate, (2) be subject to a rebilling charge covering administrative costs in accordance with the regulations established under C.M.C. 720-23 and (3) constitute a lien upon the real property affected from the date charges are incurred. Charges which remain unpaid for a period of 60 days may be reported to council for assessment against the real property. In the alternative, council may direct the city solicitor to file suit and collect unpaid charges
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-69. Notice to Correct Drainage.

Whenever the deputy director of stormwater management utility shall find that a tract of land is inadequately drained, or that there is an obstruction to a culvert, covered drain, or other natural or man-made watercourse that interferes with water naturally flowing therein or that such culvert, drain, or watercourse is of insufficient capacity to reasonably accommodate the flow of water, as required by this chapter, the deputy director of stormwater management utility or a person designated by the deputy director of stormwater management utility shall notify the owner or person having possession, charge, or management of such land to remove the obstruction or provide the necessary drainage. Such notice shall be served on such persons by personal delivery, by mail at the last-known place of residence, or by posting on the premises.

The owner must comply with the deputy director of stormwater management utility's orders within the time specified and not to exceed 30 days. Failure to comply with such order shall constitute an unlawful act. Each additional period of 10 days thereafter during which the owner fails to carry out the order of the deputy director of stormwater management utility, or a designee, shall constitute a separate offense.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-71. Emergencies and Abatement.

In case of an emergency, the deputy director of stormwater management utility may direct that action be taken immediately to correct the condition or abate the activity to protect the public health, safety, and welfare. The utility division may perform the required work and charge the owner the abatement costs.

In any case where a condition described in Section 720-69 exists for more than 30 days after service of notice, council may by resolution direct the owner to fill or drain such land, remove any obstruction and, if necessary, enlarge the culverts, drains, or watercourse to meet the requirements of this chapter.

After service of a copy of such resolution or after publication in a paper of general circulation in the city for two consecutive weeks, the owner, or agent or attorney, shall comply with the directions of the resolution within the time therein specified. When the resolution is submitted to the appropriate council committee, the owner shall be afforded notice and an opportunity to be heard prior to passage of the resolution In the event an owner fails or refuses to comply with council's resolution, the utility division may perform the required work and charge the owner the abatement costs. Such costs shall constitute a lien on the real property from the time of the adoption of the resolution which may be enforced by suit in the court of common pleas.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-73. Abatement Costs.

The deputy director of stormwater management utility shall account for all costs associated with an emergency or abatement, including, but not limited to, administration, notification, inspection, serving of papers or documents, legal counsel, force account labor, enforcement, operational services, and outside contracted services. These costs shall be added to the owner's storm drainage service charge.

This section shall not be construed to relieve the owner of any penalties prescribed by other sections of this chapter.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-75. Appeals and Variances.

Except as provided in Section 720-65 of this chapter, any person who has a bona fide controversy with the utility engineer as to the interpretation or application of a provision of this chapter or related laws or ordinances pertaining to stormwater management and subject to the administration of the utility engineer may apply in writing to the utility engineer for a written interpretation or ruling, setting forth in his application the requirements of Section 720-77.

When the utility engineer has rendered a written interpretation or ruling, or has issued a written order to make repairs, maintenance, or alterations, the complainant shall be allowed 30 days from the date of the receipt of the same, within which to file with the utility engineer an appeal to the board of appeals.

The appeal shall be based on one of the following grounds:

(1) The interpretation, ruling, or order is erroneous or constitutes an erroneous application of the particular provisions of the drainage code or other related laws or ordinances pertaining to stormwater management and finance, or is otherwise contrary to law;

(2) A variance is necessary and feasible whereby the board of appeals shall make the following findings:

a. Good and sufficient cause based on an unreasonable burden or hardship has been proven.

b. The granting of the variance would not result in any increase in quantity or velocity of flow, degradation of water quality, or negative impacts upon adjoining or downstream properties, nor upon the stormwater system.

c. The degree of variance is the minimum necessary to afford relief from the unreasonable burden or hardship imposed by the drainage code or standards, specifications, requirements, regulations, and procedures adopted pursuant to this code.

d. The variance may be granted without defeating the public health, safety, and welfare purposes and intent of the drainage code or related laws or ordinances pertaining to stormwater management and finance.

(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-77. Contents of Petition.

The complainant shall set forth in the petition for appeal, the interpretation, ruling, or order appealed from, and the provisions of the drainage code or related laws or ordinances, and shall state wherein the interpretation, ruling, or order is erroneous. If the appeal is based on a request for

variance, the petition shall point out the provision or provisions from which the variance is sought and how the request satisfies the requirements of Section 720-75(2).
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-79. Filing Fee.

No appeal petition shall be accepted for filing unless the complainant, at the time of filing, pays a fee of $50 to partially compensate the city for the direct and indirect expenditures, costs, and extra work occasioned by the filing and prosecution of the appeal. Such filing fee shall be in addition to the payment of the permits and inspection fees and any or other fee which thereafter may occur, and no portion of such filing fee shall be refunded whatever the outcome of the appeal.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-81. Board of Appeals.

A board consisting of the director of greater Cincinnati water works, the division supervisor of the stormwater management utility, and the city solicitor, or representatives appointed by them, shall serve as the board of appeals to hear and determine any appeal filed under Section 720-75.

The board of appeals shall have full authority to affirm, modify, reverse, or set aside the interpretation, ruling, or order appealed from or to grant a variance; and its decision shall be final.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985; a. Ord. No. 152-1997, eff. June 20, 1997; Emer. Ord. No. 156-2016, § 3, eff. June 15, 2016)

Sec. 720-83. Emergency Situations.

Nothing in this section shall be construed to prevent immediate action by the director in emergency situations.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-85. Flooding, Liability.

Floods from stormwater runoff may occasionally occur which exceed the capacity of storm drainage facilities construed, operated, or maintained by funds made available under this chapter. This chapter does not imply that property subject to the fees and charges established herein will always be free from stormwater flooding or flood damage, or that stormwater systems capable of handling all storm events can be cost effectively constructed, operated, or maintained. Nor shall this chapter create a liability on the part of, or cause of action against, the city or any officer or employee thereof for any flood damage that may result from such storms or the runoff thereof. Nor does this chapter purport to reduce the need or the necessity for obtaining flood insurance.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-87. Severability.

If any section, subsection, sentence, clause or portion of this chapter is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct, and independent provisions; and such holding shall not affect the validity of the remaining portions.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-99. Penalties.

Except as provided in Section 720-99-A, any person, being the owner, agent, or having

control of the premises, who violates any of the provisions of this chapter, or fails to conform to any of the provisions thereof, or fails to obey any order of the deputy director of stormwater management utility or his duly authorized agent, shall be guilty of a misdemeanor of the first degree. Each and every day on which such person continues to violate the provisions of this chapter after having once been notified of such violation shall constitute a separate offense.
(Ordained by Ord. No. 81-1985, eff. July 19, 1985; a. Emer. Ord. No. 359-2024, § 1, eff. Oct. 30, 2024)

Sec. 720-99-A. Violation of Section.

(1) Whoever violates Sections 720-29 and 720-31 by failing to file an application for minor repairs shall first be given a warning by the utility and thereafter shall be guilty in accordance with section 720-99-A(2).

(2) Whoever violates Section 720-39 or fails to obey a warning under Section 720-99-A(1) shall be guilty of a minor misdemeanor on a first offense and a misdemeanor of the fourth degree on each subsequent offense. Each day and every day on which such person continues to violate the provisions of this code after having once been notified of such violation shall constitute a separate offense. Any fine hereunder shall be mandatory.
(Ordained by Ord. No. 281-1985, eff. July 19, 1985)

Sec. 720-99-B. Accessories.

Any person, being the owner, agent, or having control of the premises, architect, engineer, contractor, builder, subcontractor, foreman, mechanic, employee, or other person who shall violate or assist in the violation of this chapter, or of any certificate, order, or permit issued hereunder, shall be guilty of a misdemeanor of the fourth degree on each offense.

Sec. 721-11. Limitation on Issuance of Building Permits.

After the adoption of a mapped street line pursuant to Section 721-7 and within the period of time fixed in the adopting ordinance, the director of buildings and inspections shall not, unless specifically authorized by council, issue a permit for:

(a) The rehabilitation, extension or erection of any building or structure or part thereof on land within the

mapped street lines, if the reasonable cost of the rehabilitation, extension or erection is in excess of $3,000 or 5 percent of the tax value of the land and buildings comprising the real estate on which the structure is to be erected, whichever is the greater amount; or

(b) The erection of a structure on land within the mapped street line if the structure consists of an addition to a building which is not situated on land within the mapped street lines; or

(c) The erection of a structure on land not within the mapped street lines if the structure consists of an addition to a building within the mapped street line and the reasonable cost of the addition is in excess of $3,000 or 5 percent of the tax value of the land and building comprising the real estate on which the addition is to be erected, whichever is the greater amount.

Provided further, that during the final year of the period fixed for a mapped street line no building permit shall be issued unless specifically authorized by council, for the repair, rehabilitation, extension, or erection of a structure within the lines of the mapped street line or for an addition to a building within the mapped street lines irrespective of the cost thereof.

The director of buildings and inspections shall refer applications for building permits which come within the purview of the preceding paragraph to the city manager. The city manager shall transmit each application to council, together with a report containing an estimate of the cost of the proposed construction; the present market value of the land and structures comprising the real estate on which the proposed construction is to be done; if the permit is for an addition to a building not located within the mapped street lines, a statement as to whether the erection of such addition might, in the event the city acquires the property, require the city to pay for the entire building, under the provisions of the manifest injury statute; and a recommendation relative to the advisability of immediately purchasing the property.

Within 30 days of the receipt of the application and the report of the city manager, council shall determine whether the immediate acquisition of such property within the mapped street lines is in the best interests of the public. In the event council determines that the immediate acquisition of such property is in the best interests of the public, it shall direct the city manager to take the necessary steps to acquire such property. If council determines that the immediate acquisition of such property is not in the best interests of the public, it shall direct the issuance of a building permit in accordance with applicable law.
(C.O. 701-6; renumbered to C.M.C. 721-11, eff. Jan. 1, 1972)

Sec. 721-13. Acquisition of Property Prior to Payment Therefor.

When council has authorized a street improvement requiring the acquisition and use of unimproved private property and the city has been unable to negotiate the purchase of such property, the city manager shall, if the public convenience and welfare requires the construction of such street improvement at the earliest possible date, submit to council a report identifying the street improvement involved and the unimproved property needed, but not yet acquired, and recommending that the city should proceed with the construction of such street improvement over and across such unimproved property without first paying to the owner or owners thereof compensation therefor.

Upon receipt of the report by council, it shall be referred to the public works committee of council. The public works committee shall fix a date for a hearing before the committee on the question of proceeding with the construction of the street improvement over and across the unimproved property without first paying to the owners thereof compensation therefor, and notice of the hearing shall be given at least 10 days prior to the date of hearing to the owners of such property by certified mail, or by leaving the notice at the owner's last known address. Failure of delivery of such notice shall not affect the validity of the proceedings. At the hearing any owner or owners of unimproved property to be taken prior to the payment of compensation therefor may be heard, either personally or through an authorized representative.

After the hearing the public works committee shall submit its recommendation to council. Thereafter, if upon consideration of the matter council, by motion, determines that the city should proceed with the construction of the street improvement involved over and across such unimproved property without first paying to the owner or owners thereof compensation therefor, then the city manager is authorized to and shall proceed with the construction of the improvement over and across such unimproved property without first paying to the owner or owners thereof compensation therefor.

In all such cases, except those in which there is dispute between the city and private persons with respect to whether the unimproved property is owned by the city or such private persons, the city solicitor shall, prior to the letting of the contract for the construction of the street improvement, make application to the Court of Common Pleas for impaneling a jury, pursuant to Chapter 719 of the Revised Code of Ohio, to inquire into the compensation to be paid by the city for the unimproved property to be so taken. Interest shall be paid by the city on the value of each piece of such property so taken from the date of the taking to the date of the payment for the property.

As used in this section, the following terms shall have the meaning ascribed to them herein:

(a) "Street improvement" shall mean construction, reconstruction, repair, widening, making or improving or any combination thereof, of any public street.

(b) "Unimproved property" shall mean any land upon which no building or part of a building is physically located regardless of whether such land is a part of a lot or parcel of land on which a building or buildings are located.

(Sec. 701-7; ordained by Ord. No. 388-1958, eff. Nov. 5, 1958; a. Ord. No. 65-1964, eff. Feb. 26, 1964; renumbered to C.M.C. 721-13, eff. Jan. 1, 1972)

The director of buildings and inspections and other officers of the city may abate or remove or prevent the continuance or occupancy of any unlawfully erected building, structure or part thereof in the manner provided in the case of buildings erected without a building permit. The city solicitor shall be authorized to bring appropriate proceedings to enjoin the erection of any such building, structure or part.

Sec. 721-19. Grades of Streets.

The grades of all streets, landings and other places having or to have curbs shall be established on the top or upper surface of their curbs; and in all cases where the grade is the same on both sides of the street, the ordinance shall so declare; and in all cases where the grade of the curb on one side differs from the grade of the curb on the other side, a grade shall be established for each curb, both to be embodied in the same ordinance.
(C.O. 701-13; renumbered to C.M.C. 721-19, eff. Jan. 1, 1972)

Sec. 721-21. Roadway and Sidewalk Widths.

Where the roadway lines of a street have not been definitely marked by curbing, or have not been otherwise specially established by council, the parts allotted to roadway and sidewalk shall be determined as herein provided. The sidewalk spaces on each side shall be equal to each other. The city manager shall classify streets or parts of streets as major, secondary or minor, in accordance with traffic requirements. Roadway widths of such classes shall be as follows:

(C.O. 701-14; renumbered to C.M.C. 721-21, eff. Jan. 1, 1972)

Sec. 721-23. Undedicated Streets, Improvements Forbidden.

No department or division of the city, nor any officer or employee, shall grade, pave, curb, repair, clean or light any street, or lay any water main, sewer or connection for a water main or sewer or other service connection in any street, or authorize such water

main, sewer or connection to be laid therein, or authorize or make any other improvement therein, unless:

(a) Such street is an established street, duly accepted or opened as a public street or way, or having otherwise received the legal status of a public street or way prior to January 1, 1927; or

(b) Such street corresponds in location and extent with a street shown on a recorded plat approved by the city planning commission; or

(c) The location and extent of such street has received the approval of the city planning commission, or, in case of disapproval by the city planning commission, has been approved by a two-thirds vote of council in accordance with the charter.

Notwithstanding the foregoing, the city manager or the city manager's designee may expend funds to repair undedicated streets that are so unsafe, poorly maintained, or otherwise hazardous that they present a serious and substantial threat to city vehicles or the delivery of medical, fire, police, or sanitation services that are necessary in the interests of public health, safety, and general welfare. For purposes of this section, an undedicated street includes ways which are privately owned and set apart for use by motor vehicle traffic.
(C.O. 701-15; renumbered to C.M.C. 721-23, eff. Jan. 1, 1972; a. Ord. No. 391-2024, § 1, eff. Nov. 20, 2024)

Sec. 721-25. Sale of Land on Private or Undedicated Streets.

The owner, or any agent of the owner, of any lot of land abutting on a street or way not lawfully accepted or established as a public street or way, who sells or contracts for the sale of such lot, shall, prior to the execution of such sale or contract of sale, furnish the intending purchaser with a signed statement as to whether or not the location of such street or way has been approved by the city planning commission.

Cross reference—Penalty, § 721-999-A.

Sec. 721-27. Street Openings; Application for Permit.

Permits for making openings in city streets shall be issued only by the director and only for some duly authorized purpose. Applications for street opening permits shall be made on forms provided by the department. The application shall give the size and location of the proposed opening and shall state the kind of paving where the cut is to be made. The permit shall be issued only after ample security has been given the city to insure the proper restoration and subsequent maintenance of the street pavement disturbed. Such security shall be furnished in one of three ways to the satisfaction of the city as follows:

(a) A cash deposit may be made with each application sufficient to cover the cost of restoration; or

(b) A general deposit may be made, to be replenished from time to time and to constitute a running account against which permits may be issued; provided that no permit shall be issued when the net unincumbered balance in the account becomes less than the estimated cost of the requisite restoration; or

(c) A bond to the satisfaction of the city.

Nothing in this section relieves owners of abutting property of their duty and liability under Section 721-147.

In the case of city contracts involving the cutting of street pavements, permits may be issued without cash deposit, but in such cases sufficient money to pay for the necessary street restoration shall be withheld from the contract moneys owing to the contractor until such street restoration is completed by the contractor to the satisfaction of the director of public works, or until such contractor has paid to the city the requisite amount for the street restoration.
(C.O. 701-19; renumbered to C.M.C. 721-27, eff. Jan. 1, 1972); a. 46-1991, eff. Mar. 8, 1991)

Sec. 721-29. Street Openings by City, County or State Departments.

When any city department or division shall require the installation of underground conduits or structures, it may obtain the necessary street opening permits without making any cash deposit. The department or division shall be charged, however, for the necessary street restoration work, and the amount of the charge shall be paid out of the appropriations for the respective department or division. In special cases, the city manager may direct the performance of the street restoration work to be done by the department of public works without charging the department or division for whose purposes the work is done.

No cash deposit shall be required from the county of Hamilton or the state of Ohio for street opening permits. Where, in any such case, the work done inures greatly to the benefit of the City of Cincinnati, the street restoration may, with the approval of the city manager, be made at the cost of the city.
(C.O. 701-20; renumbered to C.M.C. 721-29, eff. Jan. 1, 1972)

Sec. 721-31. Openings by Public Utility Corporations.

Where a public utility corporation is authorized by a special agreement with the city to do its own restoration work in connection with the opening of streets for maintenance and construction work, the required deposit shall be sufficient to cover inspection costs. If, however, in any case the restoration is to be made by the city, the deposit shall be increased accordingly. Any such public utility corporation shall be permitted to maintain with the city treasurer a general deposit account to be replenished from time to time, against which permits may be issued. No permit shall be issued when the net unincumbered balance is less than the amount necessary to cover the estimated city costs for inspection and restoration.
(C.O. 701-21; renumbered to C.M.C. 721-31, eff. Jan. 1, 1972)

Sec. 721-33. Restoration of Pavement.

Where openings have been or are to be made in a street, the director shall provide for the restoration of the street pavement in one of the following ways:

(a) The entire work of restoration, including both paving surface and paving base, may be performed directly by the department after the permittee has completed the back fill.

(b) The paving surface may be installed by the department after the permittee has made the back fill and installed the pavement base.

(c) The work may be done either completely as in (a), or as to paving surface only, as in (b), by a city contractor thereunto duly authorized by a contract with the city.

(d) The entire work of restoration may be done by the permittee.

In all cases, the entire work shall be carried out under the direction and to the

satisfaction of the director, and in accordance with the rules, regulations and specifications approved by the city manager.
(C.O. 701-22; renumbered to C.M.C. 721-33, eff. Jan. 1, 1972)

Sec. 721-35. Rules and Schedules.

A complete set of rules and regulations shall be prepared by the director and approved by the city manager, describing in detail the procedure to be observed in obtaining permits and precautions to be taken in acting under the permits when issued. Specifications shall also be similarly prepared describing the manner in which restoration work shall be done. The rules and regulations shall contain a schedule of prices to be charged for various size openings in various kinds of paving, due regard being had to the kind of service to be rendered by the department in connection with the restoration work. The city manager shall have the right to change the rules, regulations and specifications and to revise the schedule or prices whenever the interests of the city require such change or revision.

The city engineer may issue permits for nighttime construction between the hours of 11:00 p.m. and 7:00 a.m. the following day, where the applicant demonstrates it is in the interest of public safety that operations be conducted during those hours.
(C.O. 701-23; renumbered to C.M.C. 721-34, eff. Jan. 1, 1972; a. Ord. No. 271-1987, eff. July 31, 1987)

Sec. 721-37. Street Restoration Fund.

All moneys received as deposits or payments under the provisions of Sections 721-27 to 721-45, inclusive, shall be paid to the city treasurer and credited to a fund to be known as the "street restoration fund." The department shall have the right to draw vouchers from time to time against the fund for the labor, material, services, use of tools and equipment, payment of contractors, and supervision furnished by the department in restoring the pavements disturbed and supervising such restoration. The department shall also, on demand, after restoration has been completed, prepare vouchers in favor of depositors for balances due such depositors after the charges of the department for its services in connection with the restoration work have been paid.
(C.O. 701-24; renumbered to C.M.C. 721-37, eff. Jan. 1, 1972)

Sec. 721-39. Notices to Property Owners.

Prior to the paving, repair or resurfacing of any street, the director shall, under the direction of the city manager, cause notices to be sent to all abutting property owners requiring them to install any needed water or sewer service branches. Notice shall also be sent to all public utility corporations and city departments to install all necessary mains, conduits, service branches and structures. Property owners, public utility corporations and city departments shall be allowed the necessary and legal time required for the aforesaid installations before the new pavement is laid. Thereafter, during the period of three years from the final completion and acceptance of the new pavement, no permit for making an opening in such pavement shall be issued by the department except by express authority in each case from the city manager, and the city manager shall exercise this special authority only for reasons of public necessity or of undue private hardship where the necessity for the opening rises from causes over which the applicant has no control. Lack of foresight in not installing service connections prior to the laying of a new pavement shall not be considered an adequate reason for abrogation of the three year restriction. In all cases where a street opening permit shall be issued during the restriction period, an

additional suitable charge in excess of the schedule rate shall be imposed on the basis of 2 percent per month of the unelapsed period, in no event less than 10 percent.
(C.O. 701-25; renumbered to C.M.C. 721-39, eff. Jan. 1, 1972)

Sec. 721-41. Street Opening Without Permit Unlawful.

No person, firm or corporation shall make an opening in any street, or disturb in any way, the surface or subsurface of any street or sidewalk, without having first received a permit therefor from the department. Where, because of a leak in a water or gas main, a break in an electric duct, a broken rail, or other serious accident, the public safety requires immediate action, the work may be proceeded without previous permit, but the permit shall be obtained as soon after the accident as possible.
(C.O. 701-26; renumbered to C.M.C. 721-41, eff. Jan. 1, 1972)

Cross reference—Penalty, § 721-999-B.

Sec. 721-43. Excavations Near Street.

In all cases in which the construction, repair or alteration of any building or other structure will require an excavation within three feet of the curb line of any street, permits must be obtained from the department before the excavating is commenced. Such permits shall be similar to those issued for street openings, and applications therefor must be accompanied by deposits based on the estimated cost of restoring the street in case of settlement, using the schedule of prices fixed for street openings.

In cases where the edge of the excavation is more than three feet from the curb line, the city manager shall, at the first indication of any settlement in the street surface or curbing, require the builder to obtain a street opening permit from the department and shall have the right to suspend or cancel the building permit until the street opening permit has been issued.

If the city engineer is satisfied that a proposed opening in a city retaining wall can be made without danger to the highway and other property, the city engineer shall issue a permit incorporating the special conditions and restrictions and cause a deposit to be made as a guarantee of satisfactory completion of all work and/or satisfactory restoration.
(C.O. 701-74; renumbered to C.M.C. 721-121, eff. Jan. 1, 1972; a. Ord. No. 171-1978, eff. May 3, 1978)

Such flagpole sockets shall be not less than 12 inches from the curb line and not less than 25 feet apart unless an obstruction or other difficulty renders the restrictions impracticable. Installation of such flagpole sockets, and their use after installation, shall be under the direction and subject to the approval of the city engineer. The city engineer is authorized to prepare rules and regulations governing such installation and use. No permit fee shall be charged for permission to install or use such flagpole sockets. Any permit may be revoked by the city engineer, in whole or in part, at any time.

Sec. 721-129. Driveways Across Sidewalks.

The construction, reconstruction, and repair of driveways across sidewalks shall be subject to Sections 721-131 to 721-145, inclusive. If access to a driveway is continuously blocked, or use of the driveway is discontinued, the owner of the real property which is or was served by that driveway shall remove any apron in the public right-of-way, and restore the curb and grass strip.
(C.O. 701-79; renumbered to C.M.C. 721-129, eff. Jan. 1, 1972; a. Ord. No. 406-1999, eff. Nov. 12, 1999)

(C.O. 701-80; renumbered to C.M.C. 721-131, eff. Jan. 1, 1972)

Sec. 721-132. Driveway and Location.

Motor vehicle access from a public road to private property must be via a driveway constructed in accordance with this Chapter, and at a location approved by the city engineer.
(C.O. 721-132; ordained by Ord. No. 406-1999, eff. Nov. 12, 1999)

Sec. 721-133. Construction.

The construction or reconstruction of a driveway from an improved roadway to private property shall be concrete in accordance with prevailing City specifications. The construction or reconstruction of a driveway from an unimproved roadway to private property shall be concrete or asphalt in accordance with prevailing City specifications. All commercial driveways shall be adequate to carry the loads to which they are subjected, but no driveway shall be less

than seven inches thick. For construction of new driveways, three sets of detailed plans, of the proposed construction or reconstruction, may be required showing lot lines, street curb lines, street inlets, or public utility structures which may be affected by, or which are immediately adjacent to, the proposed driveway, and such other information as may be necessary, all of which shall be subject to the approval of the city engineer.
(C.O. 701-81; renumbered to C.M.C. 721-133, eff. Jan. 1, 1972; a. Ord. No. 406-1999, eff. Nov. 12, 1999)

Sec. 721-134. Surfacing.

Portions of all driveways or parking areas shall be paved so that every vehicle exiting any driveway or parking area shall travel at least 25 feet over a hard surface immediately before exiting to any public street. Portions between the roadway and the property line shall be constructed in accordance with Section 721-133. Any portion extending onto private property shall be constructed or reconstructed with concrete, asphaltic concrete, brick or pavers, adequate to carry the loads to which it will be subjected. This section shall not apply to driveways and parking areas serving single-family and two-family dwellings.
(Ordained by Ord. No. 388-1990, eff. Sept. 26, 1990)

Sec. 721-135. Width.

Driveway entrances shall have a width of not less than 12 feet nor more than 35 feet measured at the curb line. The width of driveways at the property line shall not be greater than the width at the curb line. Multiple driveway entrances will be permitted where necessary and with the approval of the city engineer, but not to exceed a width of 35 feet measured at the curb line for each multiple driveway entrance; provided, however, that such multiple driveway entrances shall be separated by pedestrian safety islands which shall be in whole units of car parking spaces, as follows: 28 feet, 48 feet, 68 feet, or any additional number of 20 foot spaces. In no case can more than 60 percent of the property frontage be used for driveway purposes.
(C.O. 701-82; renumbered to C.M.C. 721-135, eff. Jan. 1, 1972)

Sec. 721-137. Depth.

Driveways across sidewalks shall have a depth on the abutting private property adequate to permit a vehicle to completely clear the sidewalk right of way so that no part of the vehicle shall remain on or project over such right of way. Where such driveway enters a building, the garage provisions of Title XI of the Cincinnati Municipal Code will apply. Where such driveway enters a parking lot, provisions must be made for cars to turn around and head out.
(C.O. 701-83; renumbered to C.M.C. 721-137, eff. Jan. 1, 1972)

Sec. 721-139. Barriers at Street Property Line.

Where driveways serve other than residence property, driving thereover in the sidewalk area shall be confined to a width measured at the property line not greater than the width at the curb line, by the construction of suitable curbs or barriers, the curbs or barriers to be constructed of concrete, wooden timbers or other suitable materials firmly set or anchored in the ground. The curb or barrier shall extend at least seven inches above the surface of the ground or paved area. In cases where the private property is used for parking vehicles in a position other than parallel to the street property line, these curbs or barriers shall be located or constructed as to prevent any part of the parked vehicles from extending

over the sidewalk area. The location, specifications and termini shall be subject to the approval of the city engineer.
(C.O. 701-84; renumbered to C.M.C. 721-139, eff. Jan. 1, 1972)

Sec. 721-141. Layout.

Driveways near street intersections where the angle between the street lines is 40 degrees or less, shall be constructed so that the end of the curb cut nearest the intersection is not closer than two feet from a point at right angles to the street line at the point of street line intersection, and where the angle between the streets is 80 degrees shall not be closer than four feet. For angles between 40 degrees and 80 degrees the distance shall vary proportionately. The four foot distance shall be maintained for angles up to 100 degrees, and for angles of 140 degrees or more shall not be less than 14 feet. For angles between 100 degrees and 140 degrees, the distance shall vary proportionately.

Where residential driveways are serving interior lots, the curb cut shall not extend beyond a line drawn at right angles to the street line at the corner of the lot.

Where driveways, other than residential driveways, are serving interior lots, the curb cut shall not extend beyond a line drawn at right angles to the street line at the corner of the lot, and the line of the driveway shall be no closer than five feet to such line drawn at right angles to the street line at the corner of the lot at a point five back of the curb line. From this point to the property line the driveway will not be less than five feet from the line drawn at right angles to the street line at the corner of the lot. Driveways may be constructed at an angle not less than 60 degrees with the curb line.

No driveway entrance shall interfere with municipal facilities such as street-lighting poles, traffic signal standards, signs, catch basins, hydrants, crosswalks, public transit loading platforms, public transit stops, utility poles, fire alarm supports, underground pipes or ducts or other necessary street structures. The length and location of each curb cut and lowered curb shall be subject to the approval of the city engineer. The applicant for a driveway permit must make arrangements with the proper authority for the adjustment or relocation of the facility affected before a driveway permit will be issued, which arrangements must include provisions for the payment of the cost of adjusting or relocating such facilities if applicable. In no case will it be permissible for a curb cut to be located closer than five feet to any such facility and, more specifically, no part of the facility shall project within the space between the curb cut and a line drawn at right angles to the curb five feet from the curb cut as measured along the curb.

Filling stations, industrial or business buildings requiring direct entrances for two or more lanes of traffic shall have their driveway layouts approved by the city engineer before receiving their building permits.

Where the owner of any premises, existing or proposed building or structure contemplates constructing or reconstructing a driveway at the same time as constructing or making alterations to a building or structure, or any other time, such owner shall have the driveway layout approved by the city engineer before constructing the driveway and before a building permit is issued.
(C.O. 701-86; renumbered to C.M.C. 721-141, eff. Jan. 1, 1972; a. Ord. No. 110-2014, § 9, eff. June 29, 2014)

Sec. 721-143. Grade.

(a) Residential driveway. Where the property to be served by the proposed construction or reconstruction of a driveway

abuts on a street on which the curb is of the vertical face type and the walkway is located with its outside edge not less than three feet from the curb line, the driveway shall ramp from the grade at the edge of the walkway to a grade not less than one and three quarters inches above the gutter grade. Across the walkway and for at least one foot farther towards the street property line, the grade of the driveway shall coincide with the cross grade of the walkway. On improved streets where there are no walkways, the standard walkway grade shall be carried to the street property line. On streets having no curbs or walkways, the traveled roadway shall be considered the established grade and the slope of the driveway from the roadway to the street property line shall rise at the rate of one-half inch per foot.

Where the outside edge of the walkway is less than three feet from the curb line, the grade of the driveway shall attain the sidewalk grade in not to exceed such distance. In special cases of narrow walkways laid contiguous to the back of the curb, the length of the ramp to gutter shall be decreased to permit not less than a three foot walking space. In case of full width sidewalks, the cross grade of the walkway shall be maintained to the street property line.

(b) Non-residential driveway. The above provisions for residential driveways shall apply except that in all cases the cross grade of the walkway shall be maintained to the street property line.
(C.O. 701-86; renumbered to C.M.C. 721-143, eff. Jan. 1, 1972)

Sec. 721-145. Modifications.

If at any time it is found that the driveway provisions set forth in the preceding sections are impracticable for a particular case, the city engineer shall be authorized to modify the strict application of the sections so as to provide for the safety and convenience of the public and to avoid undue hardship on the owner, in harmony with the purpose of the sections.

An owner who is dissatisfied with the modifications authorized by the city engineer, may appeal as provided in Section 721-155.
(C.O. 701-87; renumbered to C.M.C. 721-145, eff. Jan. 1, 1972; a. Ord. 388-1990, eff. Sept. 26, 1990)

Sec. 721-146. Owner of Abutting Property to Maintain Sidewalk Encroachment.

(A) The owner or owners of land adjacent to a sidewalk encroachment are jointly and severally responsible for causing the sidewalk encroachment to be kept safe and in repair.

(B) If the city manager determines that a sidewalk encroachment is an immediate safety hazard he may cause the abatement of the hazard by any reasonable means. In the case of such an emergency the city manager may enter the adjacent property and building to effectuate repairs. In such cases notice required by Section 721-149 is waived.

(C) For purposes of enforcement, each day of nonconformance with Section 721-146 is a separate offense.
(Ordained by Ord. No. 351-1997, eff. Oct. 8, 1997)

Sec. 721-147. Owners of Abutting Property to Maintain Sidewalk.

Where land abuts on a street where there is a paved sidewalk and/or a paved sidewalk with an integral curb, the owner or owners of such land shall be jointly and severally responsible for causing the sidewalk and any curb which is integral with the sidewalk to be kept in repair and free from nuisance.

Said owners are responsible for any damage caused by said repair to the gutters adjacent to their property.

For residential property, the owner of a parcel abutting two or more public streets shall be responsible for repair of paved walks on only one frontage, that frontage being determined as follows:

(a) the parcel frontage containing the driveway; or

(b) where either both or neither parcel frontage contains a driveway, the parcel frontage upon which the street address is based; or

(c) if neither subsection (a) or (b) apply, as determined by the city engineer based upon typical frontages for other parcels in the subdivision.

For purposes of this subsection residential property is defined as property serving as one, two, or three family dwellings.

Notwithstanding anything else in this section, abutting property owners are responsible for the maintenance of each driveway. This responsibility includes driveway aprons, driveways across paved walks, and curbs integral with driveway. Abutting property owners are responsible for maintaining all sidewalk encroachments and for keeping the sidewalk space on all parcel frontages free from nuisance.

In repairing any paved sidewalk, sidewalk area, curbing integral with the sidewalk or restoring gutters, the abutting property owner(s), unless directed by the city engineer or exempted by the Sidewalk Board of Appeals pursuant to Sections 721-155 through 721-159, shall use the same materials, including surface materials, that compose the existing sidewalk at the time of repair.

Sec. 721-148. Owners of Abutting Property to Maintain Area Between Property Line and Curb or Presumable Curb.

Where land abuts a street, the owner or owners of such land shall be jointly and severally responsible for causing the area between the curb, or presumable curb, and the property line to be kept in good order, free from nuisance, weeds, and litter. In addition said owners shall:

(a) Keep the line of sight to all traffic signals open and visible to the operators of vehicles for a minimum distance of 150 feet; maintain a clear line of sight of street name signs, traffic control signs and devices.

(b) Maintain a minimum overhead clearance of eight feet over the sidewalk space.

(c) Maintain a minimum overhead clearance of fourteen feet above the adjacent roadway.

(d) Keep privately owned trees, growing under a utility wire in the public right of way, at a height less than the utility wire.

The city manager, or his designee, shall notify the owner, or owners, of the property of conditions which may violate this section. Such notice shall provide for a fifteen day period within which the owner or owners may eliminate the conditions. Notice sent to the tax mailing address is deemed sufficient notice. If the situation is not remedied within fifteen days of actual notice, or the mailing of the notice, the city manager or his designee may remedy the situation. In such

event the owner or owners shall be jointly and severally responsible for the city's direct and indirect costs.

As used in this section the phrase "presumable curb" means the point at which the paved area of a street, with no curb, ends.
(Ordained by Ord. No. 9-1995, eff. Feb. 1, 1995; a. Ord. No. 406-1999, eff. Nov. 12, 1999)

Sec. 721-149. Notice to Repair.

Whenever the city manager shall find that any paved walk, driveway, or integral curbing should be constructed or that any sidewalk space (including paved walk, driveways, and the grass strip), integral curbing, or sidewalk encroachment is not in repair, not free from nuisance, or is not safe, the owner of the abutting property shall be notified, in writing, to have the necessary construction, reconstruction or repairs made; provided that, if as a part of a street improvement the city has to replace or repair the sidewalk or curbing at one time, the city may make the repair or replacement after notice to the owner of the abutting property.

Such notice shall be served on the owner or owners or the agent in charge of the property in the manner provided by law for the service of summons in civil actions, or by certified mail addressed to such owner or owners or agent at the last known address or at the address to which tax bills are sent, or by a combination of the foregoing methods. The return of the person serving the notice or a certified copy thereof, or a returned receipt for notice forwarded by certified mail accepted by the addressee or anyone purporting to act for the addressee shall be prima facie evidence of the service of notice under this section.

For the purpose of such service, any person charged with the collection of rents or the payment of taxes on the property or having general control of it in any way, shall be considered the agent of the owner.

If it appears by the return of service or the return of the certified mail notice provided for in Section 721-149 that one or more of the owners cannot be found, such owners shall be served by publication of the notice once in either The City Bulletin or in a newspaper of general circulation in the City of Cincinnati.
(C.O. 701-90; a. Ord. No. 236-1962, eff. June 20, 1962; renumbered to C.M.C. 721-151, eff. Jan. 1, 1972)

Sec. 721-153. Contents of Notice.

The notice provided for in Sections 721-149 and 721-151 shall identify the property and give the location of the sidewalk encroachment or sidewalk and the period of time allowed the property owner to have the work done by private contract. Such time shall be reasonable, but shall not be less than 30 days from the date of service of notice or the mailing of the certified mail notice provided for in Section 721-149. In the case of a street improvement requiring replacement or repair of the sidewalk by the city, the notice shall give the time the work will be done and the amount owing to the city from the property owner. The property owner shall not, in the case of a street improvement, have the option of having the work done by private contract.
(C.O. 701-91; a. Ord. No. 236-1962, eff. June 20, 1962; renumbered to C.M.C. 721-

Sec. 721-155. Right of Appeal.

A board, to be known as the sidewalk board of appeals, shall hear and determine any protests filed by property owners or their agents as to sidewalks, curb, or gutter construction, reconstruction or repair, the surfacing of driveways and parking lots, or appeals from owners dissatisfied with any modification authorized by the city engineer under Section 721-145.

The sidewalk board of appeals shall consist of five members. Two members shall be appointed by the city manager for a period of three years, or until a successor is appointed. These members must be residents of the City of Cincinnati, own real property within the city, and may not be employees of the city. The remaining three members shall be the director of transportation and engineering, the city engineer, the director of public services, or their respective designees. The city solicitor shall serve as the legal advisor to the sidewalk board of appeals.

Sec. 721-157. Protests Filed Prior to Work.

If protests are filed prior to the doing of the work called for by the notice from the city manager, the board of appeals shall have authority to modify, alter or revoke any such notice, as to the amount or type of work required, or the time in which it must be completed, consistent with the city ordinances and the specifications regarding sidewalk, curbing and gutter construction, reconstruction, or repair. The board shall also have the authority to waive strict compliance with such requirements where such compliance would cause undue hardship, provided such waiver will not cause or continue a public nuisance or an unsafe condition.
(C.O. 701-93; renumbered to C.M.C. 721-157, eff. Jan. 1, 1972)

Sec. 721-159. Protests Filed after Work is Completed.

If protests are filed after the work provided for in the notice to the property owner has been completed, the board's authority shall be limited to determining that the amount of the bill is correct and is charged against the right property, and that the work done was in accordance with the notice to the property owner. If the board shall find that an amount has been incorrectly charged against the property, but the work has been completed for which the city contractor is entitled to payment, it may order such payment made from the funds provided for the payment of the city's portion of sidewalk work.

The property owner's right to file a protest under this section shall cease 180 days following the date of the first tax bill containing a sidewalk assessment for the protested work.
(C.O. 701-94; renumbered to C.M.C. 721-159, eff. Jan. 1, 1972; a. Ord. No. 406-1999, eff. Nov. 12, 1999)

(C.O. 701-95; renumbered to C.M.C. 721-161, eff. Jan. 1, 1972; a. Ord. No. 351-1997, eff. Oct. 8, 1997)

Sec. 721-163. Construction, Reconstruction or Repairing to be Done at Expense of Property Owner.

If a sidewalk, curb or gutter is not constructed, or if a defective sidewalk, sidewalk encroachment, curb or gutter is not reconstructed, repaired or freed from nuisance within the period of time permitted by the notice to the owner of the abutting property, the city manager shall cause the work to be done by contract, as provided in Section 721-69, or by city forces, or both, and the entire cost shall be charged against such property.

(C.O. 701-96; renumbered to C.M.C. 721-163, eff. Jan. 1, 1972; a. Ord. No. 351-1997, eff. Oct. 8, 1997)

Sec. 721-165. Emergencies.

In case of emergency, the city manager is authorized to have temporary repairs made, or to barricade and red-light the area, or otherwise provide for the public safety. The cost of all such emergency repair and protection shall be charged against the abutting property and shall be collected as provided in Sections 721-167 and 721-169. In such emergencies, the notice required under § 721-149 is waived.

(C.O. 701-97; renumbered to C.M.C. 721-165, eff. Jan. 1, 1972; a. Ord. No. 406-1999, eff. Nov. 12, 1999)

Such costs shall include:

(a) All construction costs, including all costs of temporary repairs, barricading and red-lighting in emergency cases;

(b) All permit fees;

(c) A charge for administrative costs of 15 percent of the construction costs, provided that, if the construction was performed by the city as part of a street improvement under Section 721-149 or 721-153, there shall be no charge for administrative costs.

Noncompliance with construction coordination requirements shall be grounds for denial of a construction permit; and

(iii) Upon written notice, and at the direction of the director, promptly remove or rearrange facilities as necessary for public safety; and

(iv) Perform all work, construction, maintenance or removal of facilities within the right of way, including tree trimming, in accordance with good engineering, construction and arboricultural practice including any appropriate state building codes, safety codes and law and use best efforts to repair and replace any street, curb or other portion of the right of way, or facilities located therein, to a condition to be determined by the director to be adequate under current standards and not less than materially equivalent to its condition prior to such work and to do so in a manner which minimizes any inconvenience to the public, the city and other providers, all in accordance with all applicable provisions of this chapter and the Cincinnati municipal code; and

(v) Construct, install, operate and maintain its facilities and system in a manner consistent with all applicable laws, ordinances, construction standards and governmental requirements including, but not limited to, the national electric safety code, national electric code and applicable FCC or other federal, state and/or local regulations; and

(vi) Comply with CMC Section 743-19, "Protection of Public Trees," which prohibits providers from performing work within 15 feet of a public tree without first obtaining a permit for such work from the urban forestry division of the Cincinnati parks' department; and

(vii) Warrant that all worker facilities, conditions and procedures that are used during construction, installation, operation and maintenance of the provider's facilities within the right of way shall comply with all applicable standards of the federal occupational safety and health administration; and

(viii) Use its best efforts to cooperate with the city in any emergencies involving the right of way; and

(ix) Weather permitting, remove all graffiti within 30 calendar days of notice. Provider shall remove any and all graffiti on any of the provider's facilities located within the city right-of-way. Should the provider fail to do so, the city may take action to remove the graffiti and bill the provider for the cost thereof; and

(x) Field identify its facilities in the right of way in accordance with the requirements set forth in the Ohio revised code and the Cincinnati municipal code, including, but not limited to, CMC Section 722-5(a); and

(xi) When applicable, obtain a separate streetcar power-down or shutdown permit pursuant to CMC Section 723-79. Permittee shall have valid authorization from the streetcar transit system when required for work occurring within, or in proximity to, the right of way of a streetcar route.

Sec. 722-4. Location and Relocation of Provider Facilities.

(a) *Location of Facilities.*

(i) The placement of new facilities and replacement of old facilities, either above ground or underground, shall be completed in conformity with applicable laws, including, but not

limited to, the Cincinnati municipal code, the city street restoration book, and applicable city regulations.

(ii) The director shall have the right to dictate the location, including both horizontal and vertical placement, of a new or relocated facility that is placed within the right-of-way.

(iii) The director shall have the power to prohibit or limit the placement of new or additional facilities within the right-of-way if the right of way is full. In making such decisions, the director shall strive to the extent possible to accommodate all existing and potential users of the right-of-way, but shall be guided primarily by considerations of the public health, safety and welfare, the condition of the right of way, the time of year with respect to essential utilities, the protection of existing facilities in the right of way, future city, county, and state plans for public

improvements, development projects which have been determined to be in the public interest, and nondiscriminatory and competitively neutral treatment among providers.

(iv) Any new or relocated facility that is located in a designated underground district shall be located underground.

(b) *Least Disruptive Technology.* All construction or maintenance of facilities shall be accomplished in the manner resulting in the least amount of damage and disruption of the right of way. Specifically, every permittee when performing underground construction, if required by the director shall utilize trenchless technology, including, but not limited to, horizontal drilling, directional boring, and microtunneling. When the above methods are used the permittee shall perform potholing to locate existing utilities prior to starting the work. In addition, the director or the director's designee may require all cable, wire or fiber optic cable installed in the subsurface right of way pursuant to this chapter to be installed in conduit, and if so required, no cable, wire or fiber optic cable may be installed pursuant to this chapter using "direct bury" techniques.

(c) *Relocation of Facilities.*

(i) A provider shall, at its own expense, temporarily or permanently remove, relocate, change or alter the position of any facilities in the right-of-way whenever the director shall have determined that such removal, relocation, change or alteration is reasonably necessary for any one of the following reasons:

(A) the need to construct, repair, maintain, improve or use the right of way or public property;

(B) the construction, reconstruction, repair, maintenance or installation of any public improvement in or on the right of way; or

(C) the public health, safety, and welfare requires it.

(ii) No provider shall, without reasonable compensation, be required by the city to:

(A) relocate, change, support, hold, or alter the position of any facility for the benefit of a third party unless that party is performing services in the right of way on behalf of the city or installing facilities that will be owned by the city;

(B) relocate, change, support, hold, or alter the position of any facility for the benefit of a municipal utility providing the same service as and competing for customers with any provider in the city right-of-way;

(C) relocate, change, support, hold, or alter the position of any facility for a municipal water or sewer utility performing maintenance and upkeep of existing facilities in the public right-of-way; or

(D) relocate, change, support, hold, or alter the position of any facility for a non-transportation related aesthetic improvement.

(iii) If a provider disputes a director determination of provider responsibility for relocation costs under Section 722-4(c), provider shall nonetheless coordinate and perform the relocation work in accordance with Section 722-5(a) pending resolution of the cost dispute in the appropriate legal forum.

(iv) Notwithstanding the foregoing, a provider who has facilities in the right of

way subject to a vacation or narrowing that is not required for the purposes of the city, shall have a permanent easement in such vacated portion or excess portion in conformity with O.R.C. § 723.04.1.

(Ordained by Emer. Ord. No. 349-2012, § 1, eff. Sept. 26, 2012; Emer. Ord. No. 042-2014, § 17, eff. March 19, 2014)

Sec. 722-5. Utility Coordination and General Construction Obligations.

The following utility coordination and general construction obligations serve to promote the safe, efficient, and fair management of provider access to limited space within the public right-of-way. A provider shall comply with the following requirements as a condition for receiving permits to work in the public right-of-way.

(a) *Utility Coordination for Public Improvement Projects*. For public improvement projects in the public right-of-way, providers shall comply with specific coordination and relocation procedures set forth below in addition to other requirements of the Cincinnati Municipal Code. A provider that fails to comply with CMC Section 722-5(a) may be subject to civil penalties and reimbursement claims for delay costs as set forth in CMC Section 722-7.

(i) *Step 1 - Identification and field marking*. Providers shall field identify and provide written records of their facilities in the right-of-way within 30 days of being notified by the director that such identification is necessary for the city to begin planning for the construction, paving, maintenance, repair, relocation, or other alteration of any street or area in the public right-of-way. Providers shall comply with the following requirements for field identification of facilities:

(A) Each provider shall field identify all its facilities within the project area in a manner that is clearly legible from the ground, consistent with industry best practices, and in compliance with city and state rules and regulations;

(B) If standard field identification methods would potentially create a safety problem or violate any safety code, then permittee shall request approval from the director for alternative methods of marking facilities; and

(C) Providers shall supply the department plans and records of all recorded and verified utilities within the project limits.

(ii) *Step 2 - Verification and relocation.* The city shall include facility identification information provided in Step 1, above, in the preliminary construction drawings, which will be transmitted to providers together with preliminary roadway alignment drawings. Upon receiving preliminary construction drawings from the city, provider shall respond to the department as follows:

(A) Provider shall review the preliminary construction drawings and reply within 30 days to confirm the locations of the facilities shown on the drawings or correct the drawings to accurately show the location of provider's facilities;

(B) Provider shall identify any conflicts with provider facilities and the proposed improvement work, identify the scope of relocation work necessary to remedy the conflict(s), and identify any other work proposed by the provider within the project limits;

(C) Provide the city with a description of the proposed work as identified in 722-5(a)(ii)(B) and an estimated time frame needed for the completion of provider's project-related work; and

(D) The city will use the scope and estimated time as provided in 722-5 (a)(ii)(C) to develop a project schedule. Provider shall be given a reasonable time prior to construction to permanently or temporarily move its facilities or, alternatively, if project conditions allow, the city and provider may agree to coordinate relocation with construction contractor to whom the contract for a public improvement is awarded. If the time frame requested by provider is not reasonable and conflicts with the city's project schedule, then provider shall take reasonable steps to revise its time frame to fit within the project schedule. Once agreed to by the provider and the city the project schedule will be incorporated into the project bid documents as stated in 722-5(a)(iii).

(iii) *Step 3 - Final Drawings and Schedule*. The department will utilize the information obtained from providers in Steps 1 and 2, above, to create final construction plans and a schedule for utility work for the public improvement project. The final plans and schedule will be transmitted to each affected provider for final review and verification. If provider does not respond to the city within 14 days of receipt of final plans and schedule, provider shall be deemed to have concurred and verified the contents of the construction plans and schedules. The city shall rely upon provider-verified plans and schedules for contractor procurement (e.g., in a 4A note to contractor) and construction purposes.

(iv) *Step 4 - Utility Coordination with Contractor during Construction*. Prior to the start of construction of the public improvement, the city shall notify providers of known utilities within the limits of the construction area of the name of the contractor and the schedule for the proposed work. Each affected provider shall coordinate with the city's contractor when requested to locate utilities and perform needed relocation work. In the event of a conflict with an unidentified or mislocated utility during construction, the affected provider shall be promptly notified of the conflict. Upon notification, the provider shall take steps to resolve the utility conflict and to complete the removal or relocation within a reasonable time specified by the director or director's designee. If provider fails

to act diligently to remove or relocate the obstructing facilities, the director may employ the necessary labor, tools, and equipment to remedy provider noncompliance, including removal or relocation of such facilities. The city shall have no liability for any damage caused by such action and provider shall be liable to the city for all reasonable costs incurred by the city in such action.

(v) *Failure to Comply with CMC Section 722-5.* If provider does not comply with the requirements of CMC Section 722-5, then the director may issue a notice of civil offense and civil fine and issue administrative orders as provided in CMC Section 722-7 to bring about compliance. As provided in CMC Section 722-7, a provider may be required to reimburse the city for delay costs and/or costs of remedial work incurred by the city.

(b) *Construction Schedule for Utility Work, Generally.* All work by a provider within the public right-of-way shall be performed within a reasonable amount of time and shall be diligently pursued by the permittee, irrespective of the public or non-public character of the work. With the exceptions of public improvement project work subject to Section 722-5(a) and emergency work subject to CMC Section 722-6(c), permittee shall submit a written construction schedule to the city not less than five working days prior to commencing work in the right of way and shall notify the city not less than one working day prior to excavation in the right of way.

(c) *General Permittee Obligations.*

(i) Obtaining a construction permit does not relieve permittee of its duty to obtain all other necessary permits, licenses, and authority and to pay all fees required by any other city, county, state or federal laws.

(ii) Permittee shall comply with Ohio Utility Protection Service requirements.

(iii) Permittee shall perform all work in conformance with all applicable laws and standards, and is responsible for all work done in the right-of-way pursuant to its permit, regardless of who performs the work.

(iv) No right-of-way obstruction or excavation may be performed when seasonally prohibited or when conditions are unreasonable for such work, except in the case of an emergency as outlined in Section 722-6(c).

(v) Permittee shall not obstruct a right-of-way so that the natural free and clear passage of water through the gutters or other waterways shall be interfered with.

(vi) Private vehicles other than necessary construction vehicles may not be parked within or adjacent to a permit area. The loading or unloading of trucks adjacent to a permit area is prohibited unless specifically authorized by the permit.

(Ordained by Emer. Ord. No. 042-2014, § 17, eff. March 19, 2014)

Sec. 722-6. Enforcement of Permit Obligation.

(a) *Mandatory Denial of Permit.* Except in the case of an emergency, no construction permit or minor maintenance permit will be granted:

(i) To any person who has not yet made an application; or

(ii) If, in the discretion of the director, the issuance of a permit for the particular date and/or time would cause a conflict or interfere with an exhibition, celebration, festival, or any other event. The director, in exercising this discretion, shall be guided by the safety and convenience of ordinary travel of the public over the right of way, and by considerations relating to the public health, safety and welfare.

(b) *Permissive Denial of Permit.* The director may deny a permit in order to protect the public health, safety and welfare, to prevent interference with the safety and convenience of public travel over the right of way, or when necessary to protect the right of way and its users.

(i) The director, in his or her discretion, may consider one or more of the following factors:

(A) The extent to which right-of-way space where the permit is sought is available; and/or

(B) The competing demands for the particular space in the right of way; and/or

(C) The availability of other locations in the right of way or in other rights of way for the proposed facilities; and/or

(D) The applicability of this chapter or other regulations of the right-of-way that affect location of facilities in the right of way; and/or

(E) The degree of compliance of provider with the terms and conditions of its permits, this chapter, and other applicable ordinances and regulations; and/or

(F) The degree of disruption to surrounding communities and businesses that will result from the use of that part of the right of way; and/or

(G) The condition and age of the right of way, and whether and when it is scheduled for total or partial re-construction; and/or

(H) The balancing of the costs of disruption to the public and damage to the right-of-way, against the benefits to that part of the public served by the expansion into additional parts of the right-of-way; and/or

(I) Whether such applicant or its agent has failed within the past three years to comply, or is presently not in full compliance with, the requirements of this chapter or, if applicable, any other law.

(c) *Work Done Without a Permit in Emergency Situations.*

(i) Each provider shall, as soon as is practicable, immediately notify the director of any event regarding its facilities which it considers to be an emergency. The provider may proceed to take whatever actions are necessary in order to respond to the emergency. Within one working day, unless otherwise extended by the director, after the occurrence or discovery of the emergency (whichever is later), the provider shall apply for the necessary permits, pay the fees associated therewith and fulfill the rest of the requirements necessary to bring itself into

compliance with this chapter for any and all actions taken in response to the emergency. In the event that the city becomes aware of an emergency regarding a provider's facilities, the city shall use best efforts to contact the provider or the system representative of each provider affected, or potentially affected, by the emergency. In any event, the city may take whatever action it deems necessary in order to respond to the emergency, the cost of which shall be borne by the provider whose facilities caused the emergency. Nothing in this section shall alter any emergency permitting requirements applicable to work occurring along a streetcar public way.

(ii) Except in the case of an emergency, any provider who constructs in, on, above, within, over, below or through a right-of-way without a valid permit must subsequently obtain a permit, pay double the normal fee for said permit, pay triple all the other fees required by the Cincinnati municipal code, deposit with the city the fees necessary to correct any damage to the right-of-way and comply with all of the requirements of this chapter, including payment of any additional fines or penalties applicable under the code.

(d) *Revocation of Permits.*

(i) Permittees hold permits issued pursuant to this code as a privilege and not as a right. The city reserves its right, as provided herein, to revoke any permit, without refunding any fees, in the event of a substantial breach of the terms and conditions of any law, or any provision or condition of the permit. A substantial breach by permittee shall include, but shall not be limited to, the following:

(A) The violation of any provision or condition of the permit; or

(B) An evasion or attempt to evade any provision or condition of the permit, or the perpetration or attempt to perpetrate any fraud or deceit upon the city or its citizens; or

(C) Any material misrepresentation of fact in the application for a permit; or

(D) The failure to maintain the required construction or removal bonds and/or insurance; or

(E) The failure to complete the construction in a timely manner.

(ii) If the director determines that the permittee has committed a substantial breach of a term or condition of any law or any condition of the permit, the director and engineering shall serve a written demand upon the permittee to remedy such violation. The demand shall state that continued violations may be cause for revocation of the permit. Upon a substantial breach, as stated above, the director may place additional or revised conditions on the permit.

(iii) By the close of the next working day following receipt of notification of the breach, permittee shall contact the director with a plan, acceptable to the director, for its correction. Permittee's failure to so contact the director, or the permittee's failure to submit an acceptable plan, or permittee's failure to reasonably implement the approved plan, shall be cause for immediate revocation of the permit.

(iv) If a permittee commits a second substantial default as outlined above, permittee's permit may be automatically revoked and the permittee may not be

allowed further permits for up to and including one full year, except for emergency repairs.

(v) If a permit is revoked, the permittee shall also reimburse the city for the city's reasonable costs, including restoration costs and the costs of collection and reasonable attorneys' fees incurred in connection with such revocation.

(Ordained by Emer. Ord. No. 349-2012, § 1, eff. Sept. 26, 2012; Emer. Ord. No. 042-2014, § 19, eff. March 19, 2014)

Sec. 722-7. Administrative Orders.

In addition to or in lieu of any other remedies provided by law, if a person violates any of the provisions of this chapter, or fails to take the corrective action set out in a notice provided for in CMC Section 722-5(a) by the date provided in the notice, the director, or the director's designee, may issue an administrative order or orders containing any of the following measures:

(a) Notice of violation and remedial action related to the violation, including an order requiring provider to submit a remedial action plan to the city to bring about compliance with this chapter;

(b) Issuance of a Notice of Civil Offense and Civil Fine against the permittee for committing a Class D civil offense;

(c) An order that provider reimburse delay costs incurred by the city as a result of provider failure to comply with CMC Section 722-5. Upon incurring delay costs, the director may order provider to reimburse the city for such costs if the following conditions are met:

(i) The director or director's designee gave notice of the public improvement project to provider consistently with CMC Section 722-5(a)(i)—(iv);

(ii) For delay caused by conflicts with provider's facilities occurring after the start of construction, the city and/or contractor notified provider of potential liability for delay costs promptly after discovering the conflict;

(iii) For delay caused by provider's failure to meet the final schedule developed pursuant to 722-5(a), the city and/or contractor notified provider of potential liability for delay costs promptly after discovering that provider would not meet the required schedule;

(iv) Provider shall not be responsible for reimbursement of any portion of delay costs that were caused solely by matters outside of provider's control. Provider ignorance of the location of its own facilities (vertical and horizontal location) is no defense against responsibility for reimbursement of delay costs.

(d) An order that provider reimburse the city for costs of relocation work performed by the director or director's agent pursuant to CMC Section 722-5(a)(iv). Upon incurring costs under CMC Section 722-5(a)(iv), the director may order provider to reimburse the city for such costs if the following conditions are met:

(i) The director provided notice of the public improvement project to provider consistently with CMC Section 722-5(a)(i)-(iv);

(ii) The city and/or contractor notified provider of the facility conflict and gave provider a reason-

able amount of time to commence the relocation work prior to city remedial action; and

(iii) Prior to initiating city relocation work, the director notified provider in writing that failure to commence and diligently pursue the required relocation work as required by the director would result in the city taking steps to relocate provider's facilities in order to remedy provider's noncompliance with CMC Section 722-5(a)(iv).

(Ordained by Emer. Ord. No. 042-2014, § 24, eff. March 19, 2014)

Sec. 722-8. Notice of Violation, Remedial Action and Civil Fine.

Upon issuance of an administrative order for a notice of violation or a civil fine provided in CMC Section 722-7, the director shall serve upon the provider a written notice in accordance with CMC Section 1501-13.

A person served with a written notice pursuant to this section may answer the charge in accordance with Section 1501-15, including an offer of proof of correction, if applicable, in accordance with Section 1501-19 within seven days of receipt of the notice by the person being charged.

For purposes of denying a civil violation of this chapter, or offering proof of correction, the procedures contained in Section 1501-13 to Section 1501-31 shall apply to the person being charged.

(Ordained by Emer. Ord. No. 042-2014, § 25, eff. March 19, 2014)

Sec. 722-9. General Provisions.

(a) *Non-Exclusive Remedy.* The remedies provided in this chapter are not exclusive or in lieu of other rights and remedies that the city may have under the Cincinnati municipal code, or at law, or in equity. The city is hereby authorized at any time to seek legal and equitable relief for actual or threatened injury to the public right of way, including damages to the right of way, whether caused by a violation of any of the provisions of this chapter or other provisions of this code.

(b) *Severability.* If any section, subsection, sentence, clause, phrase, or portion of this chapter is for any reason held invalid or unconstitutional by any court or administrative agency of competent jurisdiction, such portion shall be deemed a separate, distinct, and independent provision and such holding shall not affect the validity of the remaining portions thereof. If a regulatory body or a court of competent jurisdiction should determine by a final, non-appealable order that any permit, right or any portions of this section are illegal or unenforceable, then any such permit or right granted or deemed to exist hereunder shall be considered as a revocable permit with a mutual right in either party to terminate without cause upon giving 60 days' written notice to the other. The requirements and conditions of such a revocable permit shall be the same requirements and conditions as set forth in the permit or right, respectively, except for conditions relating to the term of the permit and the right of termination. If a permit or right shall be considered a revocable permit as provided herein, the permittee must acknowledge the authority of the city to issue such revocable permit and the power to revoke it.

(c) *Reservation of Regulatory and Police Powers.* The city, by the granting of a permit pursuant to this chapter, does not surrender or to any extent lose, waive, impair, or lessen the lawful powers and rights, which it has now or may be hereafter vested in the city under the constitution and laws of the United States, state of Ohio and under the charter of the city of Cincinnati to regulate the use of the right of way. The permittee by its accep-

tance of a permit for work in the right of way, is deemed to acknowledge that all lawful powers and rights, regulatory power, or police power, or otherwise as now are or the same as may be from time to time vested in or reserved to the city, shall be in full force and effect and subject to the exercise thereof by the city at any time. A permittee or provider is deemed to acknowledge that its rights are subject to the regulatory and police powers of the city to adopt and enforce general ordinances necessary to the safety and welfare of the public and is deemed to agree to comply with all applicable general laws and ordinances enacted by the city pursuant to such powers.

(d) *Method of Service.* Any notice or order of the director or city manager shall be deemed to be properly served if a copy thereof is:

(i) Delivered personally; or

(ii) Successfully transmitted via facsimile transmission to the last known fax number of the person to be served; or

(iii) Left at the usual place of business of the person to whom it is to be served upon and with someone who is 18 years of age or older; or

(iv) Sent by certified, preposted U.S. mail to the last known address; or

(v) If the notice is attempted to be served by certified, preposted U.S. mail and then returned showing that the letter was not delivered, or the certified letter is not returned within 14 days after the date of mailing, then notice may be sent by regular, preposted, first-class U.S.; or

(vi) If the notice is attempted to be served by regular, first class U.S. mail, postage prepaid, and the letter is then returned showing that the letter was not delivered, or is not returned within 14 days after the date of mailing, then notice shall be posted in a conspicuous place in or about the structure, building, premises or property affected by such notice.

(e) *Applies to All Providers.* This chapter shall apply to all providers and all permittees unless expressly exempted.

(f) *Police Powers and Charter Authority.* All persons' rights are subject to the police powers of the city to adopt and enforce ordinances necessary to the health, safety and welfare of the public. All persons shall comply with all applicable laws enacted by the city pursuant to its police powers. In particular, all persons shall comply with city zoning and other land use requirements pertaining to the placement and specifications of facilities. In addition, all persons' rights under this chapter shall be subject to the city's home rule charter authority over the use of the public right-of-way.

(g) *Compliance.* No person shall be relieved of its obligation to comply with any of the provisions of this chapter by reason of any failure of the city to enforce prompt compliance.

(h) *Choice of Law and Forum.* This chapter and the terms and conditions of any permit or enforcement action under this chapter shall be construed and enforced in accordance with the substantive laws of the City of Cincinnati, State of Ohio, and United States, in that order. As a condition of the grant of any permit all disputes shall be resolved in a court of competent jurisdiction in Hamilton County, Ohio.

(i) *Force Majeure.* In the event any person's performance of any of the terms, conditions or obligations required by this chapter is prevented by a cause or event not within such person's control, such inability to perform shall be deemed excused and no penalties or sanctions shall be imposed as a

result thereof. For the purpose of this section, causes or events not within the control of a provider shall include, without limitation, acts of God, strikes, sabotage, riots or civil disturbances, failure or loss of, explosions, acts of public enemies, and natural disasters such as floods, earthquakes, landslides, and fires.

(j) *No Warranty.* The city makes no representation or warranty regarding its right to authorize the construction of facilities on any particular right of way. The burden and responsibility for making such determination shall be upon the person installing facilities in the right of way.

(k) *City Standards.* As part of city-required standards wherever the right of way is under construction, if deemed advisable and practicable by the director, the city may install all such facilities deemed necessary to accommodate future provider needs. Any such installed facilities shall be city property and may be conveyed to any person under such terms and conditions as are deemed advisable by the city manager.

The pylon connection and foundation shall be designed by a professional engineer and meet the general design standards set forth in the current version of the department of transportation and engineering's ("DOTE") street restoration manual.

   iii. Parking sign pylons shall include the universal green "P" symbol for parking and the words "Public Parking." No advertising may be displayed upon any pylon; however, the name of the parking operator may be displayed on the pylon with letters no more than 5" in height.

2. Parking sign pylons shall be located subject to the following restrictions, in addition to generally applicable specifications and requirements set forth in the department of transportation and engineering's street restoration manual:

   i. Must be more than two feet and less than six feet from the driveway entrance of the parking lot or garage served by the parking sign pylon.

   ii. The face of the sign must be more than two feet from the face of the curb and centered within the collector strip as much as possible.

   iii. Must be located so that the continuous and unobstructed width of sidewalk available for pedestrian travel in the area of the parking sign pylon is no less than four feet. In downtown, neighborhood business districts, and any other high use area identified by the department of transportation and engineering, the parking sign pylon must be located so that the continuous and unobstructed width of sidewalk for pedestrian travel in the area of the parking sign pylon is not less than six feet.

   iv. Must not obstruct access to buses at bus stops, fire escapes, sidewalk access doors, traffic or street lighting equipment, utility valve boxes, fire hydrants, parking meters or other utility equipment.

   v. Must not obstruct permanent building signage or building display windows, unless prior permission from the affected

property owner has been obtained prior to installation of parking sign pylon.

vi. Must be located in a way that does not obstruct curb control signage or traffic signal equipment, including pedestrian crosswalk signs.

vii. The installation of electric or low voltage wiring feeding the sign is generally discouraged, and no illumination of signage is allowed in a historic district without first obtaining historic conservation board authorization under Chapter 1435 of the Cincinnati Municipal Code. Parking sign pylons having electric or low voltage wiring and that otherwise meet Cincinnati Municipal Code requirements must comply with the national electric code and be inspected by an approved independent inspection agency. An applicant for a revocable street privilege for an electric or low voltage sign must comply with DOTE requirements for participation in the Ohio Utility Protection Service to ensure the safe marking of locations of any underground wiring, cables, or conduit associated with the parking sign pylon in connection with future work in the public right-of-way.

3. A person desiring to place a parking sign pylon in the public right-of-way must secure a revocable street privilege under this chapter and related provisions of the Cincinnati Municipal Code. An applicant for a revocable street privilege under this section 723-15 must submit an application on a form to be provided by the director of the department of transportation and engineering that, at a minimum, provides the following:

i. Identify the name of the applicant;

ii. Identify the requested location for the parking sign pylon;

iii. Identify the name and address of the person authorized to receive notices about the proposed parking sign pylon pursuant to Chapter 718 of the Cincinnati Municipal Code;

v. Include a non-refundable application fee as set forth in section 723-6 of this chapter.

4. Revocable street privileges for parking sign pylons shall not expire, but shall be revocable as set forth in Chapter 718 of the Cincinnati Municipal Code.

5. Holders of revocable street privileges for parking sign pylon must maintain liability insurance in an amount not less than $1,000,000.00 at all times while the revocable street privilege is in effect. The City of Cincinnati shall be named as an additional insured. Proof of insurance must be provided to the City upon request. Failure to provide proof of insurance may result in the revocation of the revocable street privilege.

In the event of revocation not caused by any act or omission of the vendor, the city shall make good faith efforts to accommodate the vendor by identifying an alternative vending location, or, if no alternative locations are available, the city will refund a prorated amount of the annual fee for the vending revocable street privilege based on the number of months of the year that the vendor had the vending revocable street privilege.

The city manager or his or her designee shall designate temporary locations for sidewalk vending on an as-needed basis. The location of such temporary sites shall be at the sole discretion of the city manager or his or her designee.

Sec. 723-27. Access Ramps.

(a) Eligibility for Revocable Street Privilege. The city manager or his or her designee is authorized to grant revocable street privileges for the placement of access ramps in the public right-of-way subject to the following limitations:

1. Access ramps proposed in the public right-of-way related to new construction are not eligible for revocable street privileges or easements for access ramps under this Chapter.
2. For access ramps proposed in the public right-of-way in connection with a building rehabilitation project, a revocable street privilege or an easement may be granted for an access ramp if the applicant demonstrates that it is structurally impracticable to remove barriers to entry for persons with mobility impairments without encroaching upon the right of way. The director of the department of buildings and inspections shall determine structural impracticability in a manner consistent with

applicable building code provisions and determine, in consultation with the department of transportation and engineering, whether an access ramp can be constructed consistently with the requirements of this chapter.

3. The City in its sole discretion may determine whether an access ramp requested to be installed in the public right-of-way is in the public interest taking into account the public safety, convenience, and welfare. Each revocable street privilege authorized under this section 723-27 is subject to the general requirements for revocable street privileges set forth in chapters 718 and 723 of the municipal code and applicable city regulations and guidance concerning construction and occupancy of the public right-of-way.

(b) Siting and Design Requirements. In addition to other requirements applicable to access ramps under Section 723-13, access ramps must comply with the following requirements intended to ensure that access ramps do not adversely affect the public safety, convenience, and welfare. Access ramps permitted under this chapter must be located and designed:

1. In a way that the continuous and unobstructed width of sidewalk available for pedestrian travel in the area of the access ramp is no less than five feet. In downtown, neighborhood business districts, and any other high use area identified by the department of transportation and engineering, the access ramp must be located so that the continuous and unobstructed width of sidewalk for pedestrian travel ("Clear Zone") in the area of the access ramp is not less than six feet. Notwithstanding the above, the director of the department of transportation and engineering may approve a reduced Clear Zone not to be less than four feet in width on streets having historically narrow sidewalks.

2. In a way that does not substantially impede access to public transit at transit stops, fire escapes, sidewalk access doors, traffic or street lighting equipment, utility valve boxes or other utility equipment.

3. In a way that complies with Title XI regulations for building encroachments if applicable per section 718-5.

(c) Persons desiring to secure a revocable street privilege for placement of an access ramp within the public right-of-way shall submit an application on a form to be provided by the city manager or his or her designee and pay an application fee as set forth in section 723-6.

(d) Revocable street privileges for access ramps shall not expire, but shall be revocable as set forth in Chapter 718 of the Cincinnati Municipal Code, except the City shall not revoke permission for an access ramp that has been required as a condition of a building permit unless it first consults with the Department of Buildings and Inspections to address any building code compliance issues arising in connection with the revocation.

(e) If an easement or revocable street privilege granted under this section is terminated or revoked by the City, the property owner is solely responsible for his or her costs arising out of such termination or revocation, including, but not limited to, costs of removal of the access ramp and restoration of the right of way.

(f) Holders of revocable street privileges for access ramps shall maintain liability insurance in an amount not less than $1,000,000 at all times while the revocable street privilege is in effect. The City of

Cincinnati shall be named as an additional insured. Proof of insurance shall be provided to the City upon request. Failure to provide proof of insurance may result in the revocation of the revocable street privilege.

(a) The placement and design of signs and banners must be consistent with design guidelines issued by the director of the department of transportation and engineering, which guidelines shall be established with review and approval by the city planning commission. The department of transportation and engineering shall administer the design guidelines and may modify them in consultation with the director of the planning department as needed for the safe and orderly management of the public right-of-way.

(b) The city manager or his or her designee, in consultation with the city solicitor's office, shall confirm that a proposed sign or banner promotes the city's role as host or sponsor to the civic event, conventions, or other special event. The city's relationship to the event may be formal or informal and can be expressed, for example and without limitation, by stating "Cincinnati Welcomes…," "Sponsored by the city of Cincinnati," or by prominent placement of the city logo on the sign or banner.

(c) The city administration shall have control over the content, design, fabrication, and installation of any sign or banner located in the public right-of-way pursuant to this ordinance. The city may accept in-kind donations or reimbursement for materials and services relating to signs and banners, but in-kind services must be performed with direction by the city administration.

In the event of damage or excessive duration of service interruption of city equipment caused by the permittee or his contractor or subcontractor, or failure to complete the work

The land use or redevelopment restrictions directly applicable to any land previously conveyed by the city may not be amended, modified, or changed

in a manner that would adversely affect the use of such land without the consent of the property owner thereto.

Sec. 727-1. Legislative Finding.

It is hereby found and determined that blighted properties exist in the city of Cincinnati, and the existing state of these properties endangers the health, safety, and welfare of the citizens of the city of Cincinnati. The existence of these properties depletes property values in and throughout the surrounding areas, diminishes already limited municipal resources, impairs the safety and security of neighborhoods and impedes economic development. The purpose of this chapter is to eliminate blighted properties within the city of Cincinnati and to return the properties to productive use. The elimination of blighted properties is necessary for the common good and is demanded by the public welfare. The designation of individual properties as blighted and the authority to eliminate that blight is a public use and purpose for which public money may be spent and private property acquired by purchase or through the exercise of the power of eminent domain as authorized by this Chapter and Chapter 163 of the Ohio Revised Code.
(Ordained by Emer. Ord. No. 044-2011, § 1, eff. Feb. 16, 2011)

Sec. 727-3. Definitions.

Sec. 727-3-B. Blight Abatement Plan.

"Blight abatement plan" shall mean a plan adopted by council with the following elements:

(1) A determination that the property is a blighted property, the specific criteria supporting the determination, and a finding that the blighted property in its existing state poses a threat to the public health, safety or welfare.

(2) A determination that it is necessary to acquire the property in order to eliminate blight, prevent recurrence of blight and further the purposes of this chapter.

(3) A plan for property acquisition, authorizing the city manager to:

(a) Acquire the property by purchase; or

(b) Acquire the property by eminent domain, pursuant to Ohio Revised Code chapter 163.

(4) The specific method of blight remediation. The council shall determine which of the following is appropriate:

(a) Demolition of the structure or improvement;

(b) Rehabilitation of the structure or improvement;

(c) Any other proposal that will remediate the blight by addressing the specific criteria identified by council that supports the determination that the property is a blighted property.

(5) A statement of intent regarding property disposition.

(Ordained by Emer. Ord. No. 044-2011, § 1, eff. Feb. 16, 2011)

Sec. 727-3-B2. Blighted Property.

"Blighted property" shall mean any property, that, in its existing state, endangers the public's health, safety, or welfare because a structure or condition upon the property vio-

lates minimum health or safety standards. To be deemed "blighted" a property must meet at least two of the following criteria:

(1) Within the prior year, a structure or a portion of a structure upon the property has been ordered vacated, kept vacant, or deemed dangerous or unsafe pursuant to Cincinnati Municipal Code ("CMC") Chapters 1101 and 1117;

(2) The criminal activity upon the property is so substantial that the council has declared it a high crime property. In order for the council to declare a property a "high-crime property" the council must conduct a public hearing as set forth in § 727-15.

(3) The property is chronically out of compliance with the requirements of CMC Chapters 714, 1101, 1117 or 1119, based on the number of violations contained within the notice(s) of violation issued pursuant to those chapters in the two preceding years. A property shall be deemed "chronically out of compliance" if the city's chief building official determines that the number of violations ordered corrected in the two preceding years was ten or more and, of those violations, at least ten were not addressed within the timeframe set forth in the notice(s) of violation.

(4) The property is certified delinquent on the property's tax duplicate;

(5) The property has outstanding health or fire code violations pursuant to CMC Chapter 602 or CMC §§ 1201-21 or 1201-33 and those violations have not been corrected within the time frame set forth in the notice(s) of violation; or

(6) Within the prior two years, the property has been the subject of a failed blight remediation proposal.

(Ordained by Emer. Ord. No. 044-2011, § 1, eff. Feb. 16, 2011)

Sec. 727-3-B3. Blight Remediation Proposal.

"Blight remediation proposal" shall be a plan submitted by the owner of record within 30 days of the notification as set forth in § 727-9. In order to be deemed sufficient, the plan must provide a means by which the owner of record will remediate the identified blight, specifically addressing each of the criteria identified in the preliminary designation report. The plan must accomplish blight remediation within 6 months of the timely submission of the blight remediation proposal.

(Ordained by Emer. Ord. No. 044-2011, § 1, eff. Feb. 16, 2011)

Sec. 727-3-F. Failed Blight Remediation Proposal.

If within two years following the initial submission of the blight remediation proposal it is determined by the council that any one of the criteria identified by the preliminary designation report has recurred on the property, the proposal shall be deemed a "failed blight remediation proposal." Further, if the blight remediation proposal fails to remediate the conditions identified in the preliminary designation report within six months, it shall be deemed a failed blight remediation proposal. A failed blight remediation proposal shall prevent consideration of any subsequent blight remediation proposal from the same owner of record.

(Ordained by Emer. Ord. No. 044-2011, § 1, eff. Feb. 16, 2011)

Sec. 727-3-O. Owner of Record.

"Owner of record" shall mean the person, persons or entity holding title to property where that interest is recorded as a deed in the Hamilton County Recorder's office.

(Ordained by Emer. Ord. No. 044-2011, § 1, eff. Feb. 16, 2011)

Sec. 727-3-P. Preliminary Designation Report.

"Preliminary designation report" shall mean a report drafted by the city manager or his designee, upon a request of a majority of the members of the council, analyzing whether a particular property is "blighted property." The report shall contain the specific criteria, if any, that support a finding that the property is "blighted property" and the basis for the city manager's determination. The report shall include all supporting documents and any other information upon which the city manager relies to form his opinion. If the council has not yet determined that the property is a "high-crime property" and the city manager determines that the property may be eligible for designation as a "high-crime property," the city manager must request that council conduct the hearing as set forth in § 727-15 prior to the completion of the preliminary designation report.
(Ordained by Emer. Ord. No. 044-2011, § 1, eff. Feb. 16, 2011)

Sec. 727-5. Notice.

For purposes of this chapter, all notice to the owner of record shall be by certified mail. Where the certified mail is returned unclaimed, notice shall be sent by regular mail and shall be posted upon the property. If the property is vacant, the city manager or clerk of council shall employ any other additional reasonable steps in order to provide notice to the owner of record. Notice to lienholders shall be by regular mail. Notice to all other persons or entities shall be by regular or electronic mail.
(Ordained by Emer. Ord. No. 044-2011, § 1, eff. Feb. 16, 2011)

Sec. 727-7. Preliminary Designation of Property as Blighted.

(2) Inform the owner of record that within 30 days from the date the notice is issued, the owner must respond in writing with a blight remediation proposal to address and remediate the specific conditions identified in the preliminary designation report. The council shall determine whether the blight remediation proposal is sufficient.

(3) Inform the owner of record that upon a failure to respond within the 30-day period, the city manager shall inform the council that the property is eligible to be declared blighted property pursuant to the procedures set forth in §§ 727-11 and 727-13 below.

For each such property, the city manager shall provide to the council a preliminary blight abatement plan.

Upon receipt of a preliminary blight abatement plan from the city manager, council shall set a date for a public hearing to determine whether the property is a blighted property. If the property is determined to be a blighted property, council shall adopt a blight abatement plan.

At least 14 days prior to the date set for the public hearing, the clerk of council shall notify the owner of record, all lienholders whose interest is recorded in the Hamilton County Recorder's office, and tenants of the time and place of the hearing. The notification shall also inform the owner of record, all lienholders whose interest is recorded in the Hamilton County Recorder's office, and tenants of their right to appear at the hearing to show cause why the property should not be declared blighted property, why the property in its existing state does not pose a threat to the public health, safety or welfare or why the property should not be acquired for the purpose of eliminating blight and preventing recurrence of blight. Notice of the hearing shall be provided to the owner of record at his last known address, to all lienholders whose interest is recorded in the Hamilton County Recorder's office, to tenants, or to any other known interested party. Notice shall also be provided to all abutting and adjacent property owners, as well as the community council for the area in which the property is located.

At the hearing, the city manager or his designee shall present evidence to the council, including the preliminary designation report. The preliminary designation report shall be prima facie evidence that the property is a blighted property.

(3) Whether or not it is necessary to acquire the property in order to eliminate blight, prevent recurrence of blight and further the purposes of this chapter.

Should council determine that the property is a blighted property that, in its existing state, poses a threat to the public health, safety or welfare but that it is not necessary to acquire the property in order to eliminate blight, prevent recurrence of blight and further the purposes of this chapter, it may direct the city manager to take other appropriate action.
(Ordained by Emer. Ord. No. 044-2011, § 1, eff. Feb. 16, 2011)

The arrest and offense reports shall be broken down by Part I and Part II crimes. The report shall also contain an evaluation by the chief of the Cincinnati Police Department as to whether a particular and consistent problem exists at the property, such that it should be declared a "high-crime property." Upon receipt of the report, a public hearing shall be set to consider the report. The owner of record shall be notified by the clerk of council at least 14 days in advance of the hearing; the notice shall contain a copy of the report. Any owner of a vehicle who permits or employs another person to use the vehicle and who knows or should have known through due diligence that the vehicle will be used for the purpose described in this division violates this subsection. Each individual act of dumping or disposal of waste by use of a vehicle on any public or private property constitutes a separate violation under this subsection regardless of whether the acts occur on the same day and at the same or multiple locations.

(c) A violation of subsection 729-30(b) is a Class E Civil Offense as defined by CMC subsection 1501-11(b) or a misdemeanor of the first degree. A person who violates subsection 729-30(b) may be liable for the civil fine specified in § 1501-99 for a Class E Civil Offense.

Sec. 729-31. Impoundment of Motor Vehicles Used to Facilitate Illegal Dumping.

(a) A police officer may impound and cause to be towed any motor vehicle when the officer has probable cause to believe that the motor vehicle was used to facilitate a violation of subsection 729-30(b).

(b) Upon impounding the motor vehicle for violation of subsection 729-30(b), the police officer shall provide by hand delivery to any owner or person in control of the motor vehicle present at the time of impoundment the following:

(1) notice that the motor vehicle is impounded;

(2) notice of a civil offense and civil fine in accordance with Section 1501-13;

(3) the location of the city impound lot: and

(4) the right to post a cash bond pursuant to subsection 729-31(d)(1).

If the motor vehicle owner is not present to receive such notice, the police officer or agent of the city police department shall provide notice to all owner(s) of the motor vehicle at addresses set forth in the motor vehicle registration within three business

days of the date of impoundment. The notice shall include the information specified in subsections (b)(1) through (b)(4) above.

(c) The owner of the impounded motor vehicle may admit the violation of subsection 729-30(b) by paying the civil fine for the underlying Class E Civil Offense as specified in Section 1501-99, together with all towing and storage costs in accordance with Section 513-7. The motor vehicle shall be released to the owner when all civil fines and towing and storage costs are paid.

(d) A person served with notice of a violation of subsection 729-30(b) and/or impoundment pursuant to Section 729-31(a) may answer the charge in accordance with Section 1501-15 and may request a hearing before a hearing examiner in accordance with Section 1501-17.

(1) The owner may secure release of the motor vehicle prior to the hearing by posting a cash bond equal to the amount of the civil fine specified in Section 1501-99 for a Class E Civil Offense, together with all towing and storage costs in accordance with Section 513-7.

(2) At the hearing, the city shall have the burden to show by a preponderance of the evidence that the motor vehicle was used in the commission of a violation of Section 729-30(b). It shall be an affirmative defense to this charge if the motor vehicle owner is able to establish, by a preponderance of the evidence, that the motor vehicle was stolen at the time of the commission of the offense. For purposes of this chapter, "stolen" shall mean the trespassory taking and carrying away of the tangible personal property of another with the intent to permanently deprive the other of the property.

(3) The hearing examiner shall issue a written decision determining whether a violation of Section 729-30(b) occurred and whether the motor vehicle was subject to impoundment pursuant to Section 729-31. If a violation is found, then the hearing examiner shall enter an order finding the person charged liable to the city for the fine specified in Section 1501-99 for the violation of Section 729-30(b), plus any and all accumulated towing and storage costs in accordance with Section 513-7.

(4) The motor vehicle shall be returned to the owner along with any posted cash bond, costs, or fees if the hearing examiner finds any of the following:

(i) That the city did not meet its burden of proof as set forth in this subsection;

(ii) That one of the exceptions of Section 729-31(e) applies; or

(iii) That the motor vehicle was stolen at the time it was impounded.

(e) No motor vehicle shall be impounded or towed pursuant to this section under either of the following circumstances:

(1) The motor vehicle was operating as a common carrier at the time it was subject to impoundment; or

(2) The motor vehicle is a rental vehicle from an automobile rental or leasing agency for a term of no more than thirty consecutive calendar days.

(f) The impounding of any motor vehicle authorized by Section 729-31 is in addition to any civil fines authorized by Section 729-30.

Sec. 730-5. General Provisions.

(a) It is unlawful for any person to commence or engage in the business of providing commercial waste collection service within the city without first obtaining a franchise and entering into a franchise agreement with the city. No person may obtain a license, permit, permission, or other approval from

the city in furtherance of providing commercial waste collection service within the city without first obtaining a franchise and entering into a franchise agreement with the city. In addition, all persons providing services to the City of Cincinnati or a public school district that would be classified as a commercial waste collection service but for the provisions of Sec. 730-1-C3 must first obtain a franchise and enter into a franchise agreement with the city before providing such services.

(b) A franchise shall be awarded to a person only if that person completes an application for franchise or request for services and the person's application or request for services submittal is selected as one of the most advantageous to the city under Sec. 730-7 and the criteria specified in the application or request for services.

(c) Each franchisee shall comply with all laws of the city of Cincinnati, the state of Ohio, and the federal government. Each franchisee shall obtain and maintain all applicable licenses and permits required by federal, state, and local laws, rules, regulations, and orders of regulatory bodies.

(d) A franchisee shall not be relieved of its obligation to comply with all requirements of this chapter and the franchise agreement by failure of the city to enforce compliance with such requirements.

(e) The city reserves its right to grant franchises and similar rights to more than one (1) person.

(f) Each franchisee shall totally enclose or securely cover any commercial waste that the franchisee is transporting within the city. Each franchisee shall immediately clean up any commercial waste that the franchisee spills on public or private property in the city.

(g) A franchisee providing commercial waste collection services is not and shall not be deemed to be an agent or employee of the city. A franchisee shall be solely responsible for any losses or damages of any kind arising from its performance or nonperformance under its franchise. A franchisee shall indemnify, defend, and hold the city harmless against any and all claims and suits brought against the city resulting from the franchisee's performance or nonperformance under the franchise agreement.

(h) All of the commercial waste collected by franchisees in the city shall be delivered to a licensed municipal solid waste landfill facility, licensed sanitary landfill facility, licensed solid waste transfer facility, or a licensed construction and demolition debris facility. Recyclable material shall be delivered to a legitimate recycling facility.

(i) The execution of the franchise agreement and the issuance of a franchise and the renewal thereof is at the sole discretion of the city manager and shall not be construed as creating any vested rights in the franchisee. Each franchise is revocable in accordance with the terms of this chapter and the terms of the franchise agreement.

(j) A franchise may not be assigned or transferred to another person.

(k) A franchise authorizes a franchisee to provide commercial waste collection services in the city of Cincinnati.

Chapter 739

CENTRAL RIVERFRONT

Sec. 739-1. Definition of Central Riverfront.
Sec. 739-3. Use of the Central Riverfront.
Sec. 739-5. Prohibited Uses of the Central Riverfront.
Sec. 739-7. Prohibited Containers, Penalties.

Sec. 739-1. Definition of Central Riverfront.

For the purposes of this chapter, the central riverfront shall be defined to include the areas commonly known as the public landing, marina, Serpentine Wall and upper walkway, Cincinnatus Concourse, Sawyer Point, Yeatman's Cove Park and Eden Park Waterfront.
(C.M.C. 739-1; ordained by Ord. No. 254-1978, eff. June 28, 1979)

Sec. 739-3. Use of the Central Riverfront.

The use of the central riverfront shall be preserved primarily for the peaceful and orderly enjoyment of the facilities, appurtenances and landscaping by the general public.

The operating agencies for the central riverfront shall be the Cincinnati public recreation commission and the board of park commissioners for areas under their respective jurisdictions.

Any special use of the central riverfront by a person, group of persons or organization shall not be permitted except in accordance with the terms of a permit issued by the wharfmaster with the approval of the appropriate agency or agencies.

Special use shall include, but not be limited to, public meetings, music concerts, parades and races. All affected city departments including, but not limited to, the park board, the recreation commission, public utilities, public works and safety shall be notified by the wharfmaster before the permit is issued. The city of Cincinnati need not obtain a permit for use of the central riverfront, but must coordinate the use thereof through the wharfmaster.

The following shall be a stipulation of all permits granted:

(a) Groups, organizations or associations applying for a permit shall pay in advance the estimated reasonable costs of cleaning the central riverfront after the use and shall agree in writing to be responsible for repairing damage to the area, its appurtenances, facilities and landscaping which in any way arise out of the proposed use of the central riverfront.

(b) Any person issued a permit to use the central riverfront under the authorization of this section shall have possession of the permit during such activity and show it upon request.

This chapter shall provide the rules and regulations governing the use of the entire central riverfront to provide for the safety and protection of persons using the area pursuant to application for permit, the general public using the area and all public ways adjacent thereto, and the protection of the central riverfront itself, including all appurtenances, facilities and landscaping.

Any permit issued pursuant to these rules may require the posting of bond or insurance policy and the hiring of off-duty Cincinnati police and/or park police officers to protect the public and the city of Cincinnati from any loss, injury or damage that may arise from such use. The wharfmaster shall supply forms to be used by groups, associations and organizations making application for the use of central riverfront in accordance with the provisions of this section.

Rules included herein combine applicable, existing rules and regulations of the board of park commissioners and the public recreation commission and shall prevail over such existing rules and regulations in the event of conflict. Non-conflicting park board or recre-

ation commission rules and regulations shall continue to have full force and effect in the appropriate areas of the central riverfront.

Any violation of this section shall be deemed to be a minor misdemeanor for the first offense, and for a second or subsequent offense, a misdemeanor of the fourth degree. (C.M.C. 739-3; ordained by Ord. No. 254-1978, eff. June 28, 1978)

(6) No person shall sell or expose or offer anything for sale on the central riverfront except the appropriate operating agency's duly authorized concessionaire or concessionaires of any person, group of persons or organization using the central riverfront pursuant to a valid permit issued in accordance with Section 739-3 of the Cincinnati Municipal Code and then only during the hours designated in such permit and when such concessionaire has all the required permits to engage in such sales.

(11) No person may ride a bicycle or other such conveyance on central riverfront property in any manner that will endanger the safety of others, create confusion or interfere with the regular activities on this area or damage the property.

(12) No person shall operate, fly, launch, drive or use any motor-propelled vehicle or flying apparatus or other vehicle (except motor vehicles may be driven on roadways designed for that purpose and boats may be launched at areas so designated, subject to any separate regulation thereof) on the central riverfront including but not limited to airplanes, balloons, gliders, hang gliders, boats, airplanes, snowmobiles, go-carts, rockets, powered model planes, motorbikes, motorcycles or automobiles except with the written permission of the appropriate operating agency and except within such areas as designated by the appropriate operating agency and except in compliance with any reasonable safety regulation set by the appropriate operating agency and made a condition of any consent. No one shall park any vehicle on central riverfront property except in areas provided for this purpose, and then only in designated lanes, except with the written permission of the appropriate operating agency. City employees in the course of carrying out their duties may operate motor-powered vehicles on central riverfront property.

(13) No person shall move or alter the arrangement of any chain, cable, post or barrier of any kind when placed on central riverfront property for the purpose of regulating the use of such property.

(14) No person, except with the written permission of the appropriate operating agency, shall take, carry away, remove, dig, cut, disturb, molest, destroy, mar or damage any solid or

Nor shall any person, except with written permission of the appropriate operating agency, take, carry away, remove, disassemble, destroy, mar, deface, mark or damage or attach anything to any central riverfront equipment, building or structure on the central riverfront.

(15) No person, except with the written permission of the appropriate operating agency, shall display or distribute any leaflet, banner, flag, target, sign or device for commercial or fundraising purposes, or make any speech or harangue on central riverfront property or on any sidewalk bounding such property in such a manner as to materially interfere with the rights of others to enjoy the central riverfront or that could result in danger or injury to persons or property.

(16) No person shall enter any of the fountain areas in violation of posted signs.

(17) No person shall dive or jump from the Serpentine Wall into the river.

Sec. 759-1. Legislative Findings.

It is hereby found and determined by the council of the City of Cincinnati that persons who use vehicles or permit another to use a vehicle to facilitate the commission or attempted commission of crimes involving evading a police officer, sexual activity for hire or the possession, delivery, transportation, purchase, or sale of illegal drugs pose a significant threat to the safety of citizens and the quality of life in Cincinnati's neighborhoods and are a detriment to the public's health, welfare and safety.

The council also finds and determines that the impoundment of vehicles used in the commission or attempted commission of crimes involving evading a police officer, sexual activity for hire or the possession, delivery, transportation, purchase, or sale of illegal drugs will temporarily remove such vehicles from the streets of the city and reduce the potential for further illicit use. Removal of the resources and instrumentalities of persons who commit or attempt to commit such crimes will have a deterrent effect on this type of criminal behavior, thus contributing to council's efforts to improve citizens' safety and the quality of life in Cincinnati's neighborhoods.

Sec. 765-11. Required Terms and Conditions.

As part of a special event permit, the sponsor of the event shall agree in writing and the permit shall contain the following terms and conditions:

(a) The sponsor of the event shall have a representative present at all times during the event who shall be responsible for ensuring compliance with all applicable ordinances and regulations and for accepting all notices of violations and closure orders.

(b) The special event shall not take place unless the sponsor has supplied the city with a certificate of insurance that meets the special-events insurance requirements established by the city manager.

(1) The special-events insurance requirements established by the city manager shall set forth the types and limits of insurance required for special events, including for recurring special events, which shall be the minimum necessary to protect the city and its employees from liability for injury and property damage claims associated with or foreseeably resulting from the sponsor's use of city property and services, taking into account the size and duration of the event, the number of participants involved, and the nature of the property, facilities, and services used. Any requirements that the city manager establishes pursuant to this section, which shall be made available to the public and published on the city's website, shall take effect thirty days after their initial publication.

(2) Each insurance policy required by this subsection shall include a provision to the effect that it shall not be subject to cancellation, reduction in the amounts of its liabilities, or other material changes until notice thereof has been received in writing by the office of risk management and the city manager not less than sixty days prior to such action.

(3) Each sponsor shall maintain the insurance required by this subsection in full force and effect for the duration of the permit period. Failure of the sponsor of the event to maintain such insurance during the periods indicated above shall result in automatic expiration of the permit. For the purposes of this subsection, the permit shall include the time required for construction and removal of all materials and equipment provided for the conduct of the special event until the public way has been cleared and restored as provided in subsection (f).

(4) Each insurance policy required by this subsection shall list the city as an additional insured and shall provide a waiver of subrogation in favor of the city.

(5) The city manager is authorized to waive an insurance requirement upon a written finding that

the event does not present a substantial liability or property damage risk for the city or its employees, or that the minimum insurance requirement would unduly burden the sponsor's expressive activity protected by the United States and Ohio constitutions. To qualify for a waiver, the sponsor must agree to redesign or reschedule the event to mitigate specific risks, hazards, or dangers to public health and safety that the city manager identifies as being reasonably foreseeable consequences of the event.

(c) Except where otherwise prohibited by law, the sponsor of the event shall indemnify and hold harmless the city of Cincinnati, its officials, employees, subcontractors, agents, and assignees from any and all losses, damages, injuries, claims, demands, and expenses arising out of the operation of the special event or the condition, maintenance, and use of public property.

(d) During the presentation of the special event, the sponsor of the event shall at its own cost keep the public way clean and free from paper, debris, or refuse, and upon termination of the permit by lapse of time or otherwise, the sponsor of the event shall remove all materials and equipment and clean the street. If the public way has been damaged, the city shall repair and restore it to the condition it was in prior to the special event and bill the sponsor of the event for the city's actual cost to repair.

(e) Whenever a permit requires the closure of a street, a clear path of not less than twelve feet must be maintained at all times to provide for the passage of emergency vehicles.

(f) The sponsor of the event shall be responsible for ensuring that each vendor participating in the event obtains the proper licenses. In the event that an unlicensed or improperly licensed vendor is found at the event, the sponsor of the event shall be fined pursuant to section 765-99 for each unlicensed or improperly licensed vendor. This shall be in addition to any fines or penalties which may be issued to the individual vendor. The sponsor shall promptly remove the unlicensed or improperly licensed vendor from the event area.

(g) The sponsor of the event shall be responsible for ensuring that no person during the event shall, unless specifically authorized by the Cincinnati Police Department, possess or bring to the event area any poles, sticks, or clubs made of any rigid material or any other instrument, device, or thing that is capable of inflicting serious physical harm, that is designed or specifically adapted for use as a weapon, or that is possessed, carried, or used as a weapon, except to support a sign or banner, provided that such wooden stick is not more than two inches in width or three-quarters of an inch in diameter, one-quarter inch in thickness, and forty inches in length, and where such wooden stick is blunt on both ends.

This subsection shall apply without limitations to any poles, sticks or other devices attached to or otherwise used to support or elevate signs, banners or other displays of any kind not associated with or approved by the city of Cincinnati. This section does

not apply to law enforcement officers or to canes, crutches, or other similar devices used by persons who are visually or physically impaired.

(h) The sponsor of the event shall be responsible for ensuring that no person during the event shall take any animal to the event area, unless such animal is being or will be used by law enforcement officials engaged in the performance of their duties, or unless such animal is used as a guide for a disabled individual or such animal is part of the event and is listed on the application.

(Ordained by Ord. No. 449-2012, § 1, eff. Dec. 28, 2012; a. Ord. No. 116-2014, § 12, eff. July 1, 2014; a. Ord. No. 289-2023, § 1, eff. August 2, 2023)

Sec. 765-13. Denial of an Application.

(a) If the city manager denies the application, he shall provide written notice of his determination stating the specific reasons, facts, and conclusions that are the basis for his denial of the permit. The specific reasons, facts, and conclusions must be supported by one or more factors listed in CMC § 765-9(b). Additionally, any denial shall be consistent with a sponsor's constitutional rights contained in the First, Fifth, and Fourteenth Amendments to the United States Constitution, and Sections Three and Eleven of Article One of the Ohio Constitution.

(b) A sponsor may appeal a denial of an application through the process outlined in CMC § 765-17.

(Ordained by Ord. No. 449-2012, § 1, eff. Dec. 28, 2012)

Sec. 765-15. Revocation of a Special Event Permit.

(a) The city manager may at any time revoke a special event permit if the operation of the event is in violation of this Code, the permit, or any other applicable law, or if such revocation is necessary to preserve the health, safety, or welfare of the public. Written notice of the revocation with the reasons therefor shall be mailed to or served upon the sponsor of the event at the time of revocation. Unless the permit will expire by its own terms before a hearing can be reasonably scheduled, no such revocation will take effect until the sponsor of the event has been given notice and an opportunity to be heard in accordance with rules and regulations issued by the city manager.

When necessary to prevent an immediate threat to the health, safety, or welfare of the public, the city manager shall order the sponsor of the event to cease operation of the special event pending the outcome of the hearing. For any violation of the special event permit or the rules and regulations promulgated under this section which endangers the health or safety of the public, no new special event permits shall be issued to the sponsor of the event for the remainder of the year and for the following calendar year. Additionally, any revocation shall be consistent with a sponsor's constitutional rights contained in the First, Fifth, and Fourteenth Amendments to the United States Constitution, and Sections Three and Eleven of Article One of the Ohio Constitution.

(b) A sponsor may appeal a revocation of a special event permit through the process outlined in CMC § 765-17.

(Ordained by Ord. No. 449-2012, § 1, eff. Dec. 28, 2012)

Sec. 765-17. Appeals.

Any sponsor shall have the right to appeal the denial of an application or the revocation of a special permit to the office of administrative hearings by filing a written notice of appeal with the city manager within five business days of the denial or revocation. The city manager shall transmit the

notice of appeal and all documents related to the permit application to the office of administrative hearings within two business days of the filing of the appeal. The office of administrative hearings shall conduct a hearing and issue a decision in sufficient time to allow the sponsor to conduct the event if the appeal is granted, but in no event shall the hearing be held more than five business days after the office of administrative hearings receives the appeal from the city manager.
(Ordained by Ord. No. 449-2012, § 1, eff. Dec. 28, 2012)

(2) No greater than three (3) feet in width.

(3) No greater than nine (9) square feet in surface area.

This prohibition does not apply to canes, crutches, or any other similar device used by persons who are visually or physically impaired or to law enforcement officers or other city employees acting within the scope of their duties. Any wooden stick or pole used to support a sign or banner is subject to the following limitations:

(1) Must be blunt on both ends.

(i) If rectangular, two (2) inches by one-quarter (¼) of an inch in width, or

Sec. 807-11. Administrative Fees for Multiple False Alarms.

Alarm users shall be responsible for multiple false alarms sent by alarm systems on premises under their control.

The city manager shall impose on alarm users an administrative fee, based on costs of administration and police response to false alarms, as follows:

(1) *Enhanced Call Verification*. An Alarm Business shall not notify or alert the City's Emergency Communications Center that an Alarm System has been activated unless the Alarm Business completes the procedure for enhanced call verification.

For purposes of this Chapter, "enhanced call verification" shall mean a monitoring procedure requiring that a minimum of two calls be made in an attempt to contact the alarm user prior to requesting a dispatch from the City's Emergency Communications Center. The two calls must be made to different phone numbers provided by the Alarm User.

(2) *Excessive False Alarms*. No alarm user, having been sent each of the written notices for the third through tenth false alarms, as provided in Section 807-11, shall permit a false alarm to occur during the same calendar year. This section shall be construed to impose strict liability for all false alarms occurring after the notices in Section 807-11 have been sent.

(3) *Suspension of Response and Revocation of Registration*. When an Alarm User or Alarm Business has $500 or more in delinquent fees outstanding, the City shall terminate the registration of the Alarm User or Alarm Business and any further requests for a police or fire response to the activation of an Alarm System shall be suspended.

(4) *Reinstatement of Registration*. If the person pays all delinquent fees that remain outstanding, a person may request that the City reinstate a registration revoked under C.M.C. 807-13(3).

(5) *Enforcement of Provisions*. All remedies shall be cumulative, and the use of one or more remedies by the city shall not bar the use of any other remedy for the purpose of enforcing the provisions of this chapter. The amount of any penalty shall be deemed a debt to the city. An action may be commenced in the name of the city in any court of competent jurisdiction for the amount of any delinquency or penalty. All penalties shall be deemed delinquent 30 days after they are due and payable.

Sec. 807-15. Appeals.

(1) Any alarm user may appeal determination by the city manager that an alarm activation is a false alarm within 30 days after notification is sent by the city that a false alarm has been recorded against the alarm system. Appeal procedures shall be set forth in rules and regulations established by the city manager.

(2) Any appeal must be made in writing and directed to the False Alarm Reduction Unit Commander. A written notification of determination will be sent within thirty (30) days of receipt of appeal. No change in the False Alarm status may be made without going through the written appeal process.

(3) An administrative fee of $25 will be charged for the appeal process. The fee must be received with the written appeal request. The fee will be refunded if the appeal is upheld.

(4) If unsatisfied by the determination issued by the False Alarm Reduction Unit Commander, the Alarm User may request that an Administrative Hearing be conducted by a hearing examiner outside of the Police Department. There will be no additional fee for this process. The hearing examiner will issue a written determination.

(a) Any person wishing to obtain a franchise to engage in the business of providing e-scooter rental or sharing services within the city shall submit an application to the city manager in compliance with the process established for awarding franchises.

(b) Where appropriate, the city manager may choose to conduct a request for services pursuant to Cincinnati Municipal Code Section 321-1-R6 to solicit qualified franchisees in lieu of an application process.

(c) An applicant for a franchise shall provide the city with satisfactory evidence demonstrating that:

(1) The applicant has the experience, personnel, equipment, and other resources to provide e-scooter rental or sharing services in the city and the management of such; and

(2) The applicant has the capacity and willingness to comply with all local, state, and federal laws, and all rules and regulations of the city for the rental, sharing, and operation of rental e-scooters.

(d) Applicants for a new franchise and applicants for the renewal of an existing franchise shall provide information requested by the city manager and other relevant information. The application and supporting materials shall be submitted under oath. At a minimum, the application shall include the following information:

(4) A complete record of all felony convictions, and all misdemeanor convictions within the last five (5) years, involving the applicant's e-scooter rental and sharing services. If the applicant is not an individual, the applicant also shall provide the complete record of such convictions for any person who is an officer, majority shareholder, or partner in the applicant, and any person having a controlling interest in the applicant;

(6) The types of e-scooters or other vehicles which the applicant has in its inventory and their capabilities, including any e-scooters that are adapted to expand access for people with physical limitations;

(7) Evidence demonstrating the applicant's capacity to satisfy the requirements imposed on franchisees pursuant to Sec. 811-07;

(8) A list of the e-scooters, vehicles, equipment, and containers that will be used by the applicant to provide e-scooter rental or sharing services. At a minimum, the list shall identify the make, model, and year of each e-scooter or vehicle. The city manager may inspect any of the e-scooters, vehicles, equipment, and containers identified by the applicant and thereby determine whether the applicant possesses the e-scooters, vehicles, equipment, and containers that are capable of providing safe and efficient e-scooter rental and sharing services in compliance with this chapter; and

(9) A chart identifying the maximum rates that the applicant charges customers for various types of e-scooter rental or sharing services.

(e) When applicable, each applicant shall submit a nonrefundable application fee to the city in the amount established by the city manager. The application fee is due and payable when the application is submitted. This fee shall not apply to responses to a request for services.

(f) New applications must be submitted to the city manager at least sixty (60) days before the applicant wishes to begin providing e-scooter rental or sharing services. Renewal applications must be submitted to the city manager at least thirty (30) days before the applicant's existing franchise expires.

This includes successfully responding to the request for services or completing the application and the city rating the person's proposal or application as most advantageous.

(h) The city manager retains the sole discretion to approve or deny an application. Among others, an applica-

(1) The applicant has not submitted a complete application with all of the required supporting documents or paid the application fee;

(2) The applicant has submitted false or materially misleading statements in the application;

(3) The applicant or a partner, director, or officer of the applicant has been convicted of a felony within the past five (5) years, or has been convicted of a misdemeanor within the past three (3) years, involving provision of scooter rental or sharing services;

(4) The applicant has failed to satisfy one or more of the requirements of this chapter or the Cincinnati Municipal Code;

(5) Any reason that would justify the suspension or revocation of a franchise, as described in Sec. 811-11; and

(6) The addition of further franchises would exceed either the total number of allowable e-scooters in the city or the number of franchises determined by the city manager to be needed by the city.
(Ordained by Emer. Ord. No. 455-2021, § 1, eff. Dec. 8, 2021)

Sec. 811-7. Requirement to Execute a Franchise Agreement with the City; Payment of Franchise Fees.

(a) Each applicant awarded a franchise for e-scooter rental or sharing services shall execute a franchise agreement, including all required attachments, in the form prescribed by the city manager or his or her designee.

(b) All franchise agreements shall impose an affirmative obligation on each franchisee to cause all persons operating or using its e-scooters within the city to be insured under a policy of insurance against loss from liability imposed by law for damages arising out of the e-scooters' use and operation, which policy shall be issued by an insurance carrier licensed to do business in the state of Ohio and acceptable to the city, and which policy shall provide coverage of no less than the following specified limits:

(1) Ten thousand dollars because of bodily injury to or death of one person in any one accident.

(c) In connection with the execution of a franchise agreement, each franchisee shall submit the required franchise fees and documentation to the city, including, but not limited to, the following:

(1) An annual fee of two thousand five hundred dollars ($2,500) for the administrative costs of oversight of the franchise, which fee shall be due and payable on the commencement date of the franchise and on each anniversary of the commencement date during the term of the franchise agreement.

(2) Monthly franchise fees as compensation for the rights and benefits granted by the franchise, including, but not limited to, the right to operate an e-scooter rental or sharing business in the city. The franchise fee shall be equal to twenty-five cents ($0.25) per trip or activation of an e-scooter (which shall equal the total number of trips or activations of an e-scooter within a calendar month multiplied by $0.25) for each e-scooter maintained by the franchisee within the city. A trip shall mean anytime a person activates or uses the e-scooter and pays a fee for such use. The franchisee shall submit its monthly franchise fee pay-

ments to the city no later than five business days after the end of each month.

(3) A statement of the franchisee's total number of trips in the city that accompanies each monthly franchisee fee payment, which statement shall be submitted on a form prescribed by the city manager or his or her designee. The statement shall include the number of e-scooters deployed or available in the city and the amount of trips and fees per day for each e-scooter. Statements and remittances shall be accepted as timely if postmarked within five days after the end of the month; if the fifth day falls upon a Saturday, Sunday, or federal or state holiday, statements and remittances shall be accepted as timely if postmarked on the next business day. Payments not received by the due date shall be assessed (1) an administrative fee to reimburse the city for the reasonable administrative costs associated with collecting such monies; and (2) interest for each day of delinquency at the rate of eighteen (18) percent per annum or the maximum allowed by law, whichever is less, for each day of delinquency, until the total unpaid amount due and owing is paid in full. The administrative fee shall be equal to six (6) percent of the amount owed by the franchisee to the city or fifteen dollars ($15.00), whichever is greater.

(4) An annual report concerning the franchisee's total trips for the year. This annual report shall be examined by an independent reviewer, who shall confirm that the franchisee's computations concerning trips and franchise fees were performed in accordance with the requirements of this chapter. The report of the reviewer shall state that its examination of the franchisee's records was performed in accordance with professional standards. Each franchisee shall notify the city of the date its fiscal year ends. Each franchisee shall file the auditor's report with the city within one hundred twenty (120) days after the end of the franchisee's fiscal year. Franchisee shall be solely responsible for retaining the independent auditor and paying for his or her services.

(5) A certificate evidencing insurance coverage for the following types of insurance coverage and specified limits of coverage is in effect for the same term as the franchise agreement, and naming the city as an additional insured (except with regard to the workers compensation and employers liability insurances), issued by an insurance company licensed to do business in the state of Ohio, acceptable to the city, and as required and set forth in greater specificity in the franchise agreement:

(a) Comprehensive general liability insurance with a limit of a one million dollar ($1,000,000) per occurrence and a two million dollar ($2,000,000) general aggregate. This policy must include the following coverages: premises and operations liability, independent contractors, products and completed operations, personal injury, contractual liability, and fire damage;

(b) Automotive liability insurance coverage providing a combined single limit of not less than one million dollars ($1,000,000) per occurrence. This policy must include the following coverages:

bodily injury and property damage including premises and operations;

(c) Workers compensation insurance shall be provided for all of franchisee's employees as required under Ohio law; and

(d) Employer's liability insurance providing a single limit of not less than one million dollars ($1,000,000), bodily injury by each accident, and providing a single limit of not less than one million dollars ($1,000,000), bodily injury disease per each employee, and providing a single limit of not less than one million dollars ($1,000,000) bodily injury by disease policy limit.

(6) A bond in the amount of twenty percent (20%) of the franchisee's gross revenues for the quarter immediately preceding the execution date of the franchise agreement. For franchisees who did not hold a franchise in the quarter immediately preceding the execution date of the franchise agreement, the bond shall be in the amount of fifty thousand dollars ($50,000). The bond shall conform with the requirements of CMC Chapter 304.

(7) Documentation acceptable to the city demonstrating the franchisee's compliance with the requirements of Sec. 811-07(b), which documentation shall be made available at any time upon the city's request.

(d) All amounts paid by the franchisee shall be subject to confirmation and recomputation by the city. An acceptance of payment shall not be construed as an accord that the amount paid is the correct amount, nor shall acceptance of payment be construed as a release of any claim the city may have for further or additional sums payable.

(e) Billing methods that have the effect of reducing or avoiding the payment of franchise fees are prohibited and will be cause for termination of the franchise. Any person who uses false, misleading, or fraudulent billing methods for the purpose of reducing or avoiding the payment of franchise fees may be subject to the penalties provided by this chapter.

(f) Payment of the franchise fee shall not exempt the franchisee from the payment of any other fee, tax, or charge on the business, occupation, property, or income of the franchisee that may be imposed by the city, the county, the state, or the federal government.

(g) The franchisee shall notify the city in writing by registered or certified mail thirty (30) days in advance of any cancellation, intent not to renew, or any other changes in the insurance coverage required by this section. Sec. 826-3. Deceptive or Unfair Acts or Practices Prohibited.

No supplier shall with knowledge commit a deceptive or unfair act or practice in connection with a consumer transaction. Such deceptive act or practice by a supplier violates this section whether it occurs before, during or after the transaction.

Without limiting the scope of the foregoing, an act or practice of a supplier in representing any of the following is deceptive or unfair:

(a) That the subject of a consumer transaction has sponsorship, approval, performance characteristics, accessories, uses, or benefits it does not have;

(b) That the subject of a consumer transaction is of a particular standard, quality, grade, style, prescription, or model, if it is not;

(c) That the subject of a consumer transaction is new, or unused, if it is not;

(d) That the subject of a consumer transaction is available to the consumer for a reason that does not exist;

(e) That the subject of a consumer transaction has been supplied in accordance with a previous representation, if it has not, except that the act of a supplier in furnishing similar merchandise of equal or greater value as a good faith substitute does not violate this section.

(f) That the subject of a consumer transaction will be supplied in greater quantity, weight, or volume than it contains or is made up of, or than the supplier will deliver, does deliver or intends to deliver.

(g) That replacement or repair is needed, if it is not;

(h) That a specific price advantage exists, if it does not;

(i) That the supplier has a sponsorship, approval, or affiliation he does not have;

(j) That a consumer transaction involves or does not involve a warranty, a disclaimer of warranties, particular warranty terms, or other rights, remedies, or obligations if the representation is false;

(k) That goods or services will be supplied at an estimated price given to the consumer to induce the transaction when in fact the actual charges exceed the estimate by more than 10 percent, unless prior approval to exceed the estimate is given to the supplier by the consumer;

(l) That periodic payments for consumer goods may be easily made by a consumer when the supplier sets high payments in order to promote a default;

(m) That advertised goods and services are available when the supplier did not sell them as advertised;

(n) That advertised goods and services are available when the supplier did not intend to supply for a reasonably expectable public demand unless the advertisement disclosed a limitation of quantity.

(o) That a consumer will receive a rebate, discount, or other benefit as an inducement for entering into a consumer transaction in return for giving the supplier the names of prospective consumers, or otherwise helping the supplier to enter into consumer transactions, if earning the benefit is contingent upon an event occurring after the consumer enters into the transaction;

(p) That a salesman, representative or agent has authority to negotiate the final terms of a transaction with the consumer when no such authority exists;

(q) That the consumer transaction confers or involves rights, remedies or obligations that it does not have or involve or which are prohibited by law.

(C.M.C. 826-3; ordained by Ord. No. 196-1975, eff. Apr. 30, 1975)

Sec. 826-5. Unconscionable Acts or Practices Prohibited.

No supplier shall commit an unconscionable act or practice in connection with a consumer transaction. Such an unconscionable act or practice by a supplier violates this section whether it occurs before, during or after the transaction.

In determining whether an act or practice is unconscionable, the following circumstances shall be taken into consideration:

(a) Whether the supplier has knowingly taken advantage of the inability of the

consumer reasonably to protect such consumer's interests because of physical or mental infirmities, ignorance, illiteracy, or inability to understand the language of an agreement;

(b) Whether the supplier knew at the time the consumer transaction was entered into that the price was substantially in excess of the price at which similar property or services were readily obtainable in similar consumer transactions by like consumers;

(c) Whether the supplier knew at the time the consumer transaction was entered into of the inability of the consumer to receive a substantial benefit from the subject of the consumer transaction;

(d) Whether the supplier knew at the time the consumer transaction was entered into that there was no reasonable probability of payment of the obligation in full by the consumer;

(e) Whether the supplier required the consumer to enter into a consumer transaction on terms the supplier knew were substantially one-sided in favor of the supplier;

(f) Whether the supplier knowingly made a misleading statement of opinion on which the consumer was likely to rely to his detriment.

Sec. 826-9. Rules and Regulations.

(a) The chief of the consumer protection office, under the supervision and direction of the city manager or person designated by the city manager and after having held a public hearing affording interested persons an opportunity to be heard and with the approval of city council, may adopt, amend, or repeal substantive rules and regulations defining with reasonable specificity acts or practices which violate Sections 826-3 and 826-5 of this chapter. Such rules and regulations and amendments thereto and alterations thereof shall become effective after three successive publications in The City Bulletin.

(b) Prior to the adoption, amendment or alteration of any rule or regulation, the chief of the consumer protection office shall give at least 14 days' notice of intended action by publication in The City Bulletin setting forth the date, time and place of a public hearing and the contents of the proposed rules and regulations to be acted upon.

Sec. 826-11. Hearing Before and Orders by the Chief of the Consumer Protection Office.

(a) Whenever the chief of the consumer protection office or person designated by such chief has reasonable cause to believe that a violation of this chapter exists or has occurred, written notice thereof may be served

upon the alleged violator, and by conference and consultation the chief may endeavor to mediate and arbitrate consumer complaints and persuade the violator to provide written assurance of voluntary compliance with this chapter. Such assurance of voluntary compliance shall not be considered as evidence of a violation of this chapter.

(b) If the alleged violator denies responsibility for acts complained of, and the chief of the consumer protection office or the designee is not able to obtain written assurance of voluntary compliance, or the written assurance of voluntary compliance is violated, the chief of the consumer protection office may conduct a hearing to determine whether a violation of this chapter exists. Notice of the hearing shall be served on the supplier in question at least 15 days prior to the hearing.

(c) The chief of the consumer protection office shall have the power to promulgate rules and regulations for the conduct of hearings under this article subject to approval by city council. In the conduct of the hearing authorized by this section, the chief of the consumer protection office shall have the power to subpoena witnesses, adduce evidence, and require the production of relevant material, and to conduct an orderly proceeding. The privilege of cross-examination shall be accorded all interested parties or their counsel.

(d) After due consideration of the evidence adduced at the hearing, or upon the default in answer or appearance of the respondent, the chief of the consumer protection office shall make such determinations and shall issue a cease and desist order as a final order if the chief of the consumer office finds that one or more violations of this chapter exist, which violations will be specifically stated in the order. The chief of the consumer protection office shall make and enter findings from the record and conclusions thereof which support the decision.

(e) The chief of the consumer protection office may grant a stay of the order for 10 days following the final decision pending the perfection of an appeal by the respondent pursuant to the Ohio Revised Code, Section 2506.01 et seq.

(f) The chief of the consumer protection office shall transmit a copy of the decision and findings by personal service or certified mail to the applicant and to other parties of record in the case requesting copies of the written decision.

Subsequent failure to comply with the terms of the cease and desist order is prima facie evidence of a violation of this chapter.

Sec. 827-5. Form of Agreement; Statement of Buyer's Rights; Disclosures.
Sec. 827-7. Restoration of Down Payment.
Sec. 827-9. Duty of Buyer; No Compensation for Services Prior to Cancellation.
Sec. 827-11. Telephone Solicitation Sales.

Sec. 827-17. Unconstitutionality; Severability.
Sec. 827-99. Penalties.

Sec. 827-1. Home Solicitation Sale Defined.

"Home solicitation sale" shall mean a consumer credit sale of goods or services in which the seller or a person acting for the seller engages in a personal solicitation of the sale at a residence of the buyer and the buyer's agreement or offer to purchase is there given to the seller or a person acting for the seller. It does not include a sale made pursuant to a pre-existing charge account, or a sale made pursuant to prior negotiations between the parties at a business establishment at a fixed location where goods or services are offered or exhibited for sale. "Personal solicitation" shall be deemed to include solicitation by telephone call to the buyer's residence.

(C.M.C. 827-1; ordained by Ord. No. 351-1972, eff. Aug. 5, 1972)

Not analogous to former C.M.C. 827-1; r. Ord. No. 163-1972, eff. May 19, 1972.

Sec. 827-3. Right to Cancel.

(a) Except as provided in subsection (e) in addition to any right otherwise to revoke an offer, the buyer has the right to cancel a home solicitation sale until midnight of the third business day after the day on which the buyer signs an agreement or offer to purchase which complies with this part.

(b) Cancellation occurs when the buyer gives written notice of cancellation to the seller at the address stated in the agreement or offer to purchase.

(c) Notice of cancellation, if given by mail, is given when it is deposited in a mailbox properly addressed and postage prepaid.

(d) Notice of cancellation given by the buyer need not take a particular form and is sufficient if it indicates by any form of written expression the intention of the buyer not to be bound by the home solicitation sale. Retention by the buyer of a copy of the written notice and notation of the date of mailing thereon should be prima facie evidence of cancellation.

(e) The buyer may not cancel a home solicitation sale if the buyer requests the seller to provide goods or services without delay because of an emergency, and

(1) the seller in good faith makes a substantial beginning of performance of the contract before the buyer gives notice of cancellation, and

(2) in the case of goods, the goods cannot be returned to the seller in substantially as good condition as when received by the buyer.

(f) If a home solicitation sale is also subject to any other right to rescind certain transactions, the buyer may proceed either under those rights or under the provisions of this chapter.

(C.M.C. 827-3; ordained by Ord. No. 351-1972, eff. Aug. 5, 1972)

Not analogous to former C.M.C. 827-3; r. Ord. No. 163-1972, eff. May 19, 1972.

Sec. 827-5. Form of Agreement; Statement of Buyer's Rights; Disclosures.

(a) In a home solicitation sale, unless the buyer requests the seller to provide goods or services without delay in an emergency, the seller must present to the buyer and obtain buyer's signature to a written agreement or offer to purchase which designates as the date of the transaction the date on which the buyer actually signs and contains a statement of the buyer's rights which complies with subsection (b).

(b) The statement must:

(1) appear under the conspicuous caption: "BUYER'S RIGHT TO CANCEL," and

(2) read as follows: "If this agreement was solicited at your residence and you do not want the goods or services, you may cancel this agreement by mailing a notice to the seller. The notice must say that you do not want the good or services and must be mailed before midnight of the third business day after you sign this agreement. This notice must be mailed to:

_____

(insert name and mailing address of seller)"

(C.M.C. 827-5; ordained by Ord. No. 351-1972, eff. Aug. 5. 1972)

Sec. 827-7. Restoration of Down Payment.

(a) Except as provided in this section, within 10 days after a home solicitation sale has been cancelled or an offer to purchase has been revoked the seller must tender to the buyer any payments made by the buyer and any note or other evidence of indebtedness.

(b) If the down payment includes goods traded in, the goods must be tendered in substantially as good condition as when received by the seller. If the seller fails to tender the goods as provided by this section, the buyer must elect to recover an amount equal to the trade-in allowance stated in the agreement.

(c) Until the seller has complied with the obligations imposed by this section the buyer may retain possession of goods delivered by the seller and has a lien on the goods in buyer's possession or control for any recovery to which buyer is entitled.

(d) In all events after cancellation or revocation of an offer to purchase buyer shall not be liable for any finance or any other charges and any security interest given by or on behalf of the buyer shall become void.

(C.M.C. 827-7; ordained by Ord. No. 351-1972, eff. Aug. 5, 1972)

Sec. 827-9. Duty of Buyer; No Compensation for Services Prior to Cancellation.

(a) Except as provided by the provisions on retention of goods by the buyer (subsection (c) of Section 827-7), within a reasonable time after a home solicitation sale has been cancelled or an offer to purchase revoked, the buyer upon demand must tender to the seller any goods delivered by the seller pursuant to the sale but buyer is not obligated to tender at any place other than buyer's residence. If the seller fails to demand possession of goods within a reasonable time after cancellation or revocation, the goods become the property of the buyer without obligation to pay for them. For the purpose of this section, 20 days is presumed to be a reasonable time.

(b) The buyer has a duty to take reasonable care of the goods in buyer's possession before cancellation or revocation and for a reasonable time thereafter, during which time the goods are otherwise at the seller's risk.

(c) If the seller has performed any services pursuant to a home solicitation sale prior to its cancellation, the seller is entitled to no compensation except the cancellation fee provided in this part.

(C.M.C. 827-9; ordained by Ord No. 351-1972, eff. Aug. 5, 1972)

Sec. 827-11. Telephone Solicitation Sales.

Any sale or contract of sale which results from a telephone solicitation made by or on behalf of the seller or by the buyer in response to advertising by or on behalf of the seller shall not be valid unless the advertisement or telephone solicitation gives notice to the buyer of the right to cancel the sale after receipt or inspection of the goods.

Provided, however, nothing in this section shall be interpreted in any way as limiting or affecting the rights of a buyer under any other provision of this chapter, but it shall be

deemed as granting additional protection to the buyer. Nor shall this section be interpreted as limited by any provision of any other section of this chapter.

Sales in which goods are delivered "collect" shall not deprive the buyer of the right to cancel the sale as provided in this chapter and recover the price paid.
(C.M.C. 827-11; ordained by Ord. No. 361-1972, eff Aug. 5, 1972)

Sec. 827-13. Referral Sales.

With respect to a consumer sale, credit sale, sales contract or lease the seller or lessor may not give or offer to give a rebate or discount or otherwise pay or offer to pay value to the buyer or lessee as an inducement for a sale or lease in consideration of giving to the seller or lessor the names of prospective purchasers or lessees, or otherwise aiding the seller or lessor in making a sale or lease to another person, if the earning of the rebate, discount or other value is contingent upon the occurrence of an event subsequent to the time the buyer or lessee agrees to buy or lease.

If a buyer or lessee is inducted by a violation of this section to enter into a consumer sale, credit sale, sales contract or lease, the agreement is unenforceable by the seller or lessor and the buyer or lessee, at their option, may rescind the agreement or retain the goods delivered and the benefit of any services performed, without any obligation to pay for them.
(C.M.C. 827-13; ordained by Ord. No. 351-1972, eff. Aug. 5, 1972)

Sec. 827-15. Purpose and Interpretation.

The purpose of this chapter is to grant aid and assistance to consumers in the city of Cincinnati in regard to sales, contracts, and transactions involving consumer goods and services and the provisions thereof shall be so interpreted as to carry out that purpose. In case of question involving interpretation of the provisions of this chapter, to the fullest extent possible such question shall be resolved so as to benefit the buyer or consumer.
(C.M.C. 827-15; ordained by Ord. No. 351-1972, eff. Aug. 5, 1972)

Sec. 827-17. Unconstitutionality; Severability.

Should any section of this chapter or any part of any section be declared to be unconstitutional or invalid, such decision shall not affect the validity of other sections or any part thereof not so declared unconstitutional or invalid, and the remainder of this chapter shall remain in full force and effect as though the portion declared unconstitutional or invalid did not exist.
(C.M.C. 827-17; ordained by Ord. No. 351-1972, eff. Aug. 5, 1972)

DEALERS IN AUTOMOBILES

Sec. 831-1. Dealers in Used Automobiles; License Fees.
Sec. 831-3. Repealed.
Sec. 831-5. Record of Identifying Marks.
Sec. 831-99. Penalties.

Sec. 831-1. Dealers in Used Automobiles; License Fees.

No person, firm or corporation, located either completely or partially in the city of Cincinnati, shall engage in the business of buying, selling or taking in trade operable used automobiles without first having obtained a license as a used automobile dealer, as hereinafter provided. For the purpose of this chapter the term "used automobile dealer" shall mean any person, firm or corporation exclusively engaged in the business of buying, selling or taking in trade operable automobiles, which were previously owned by another person, firm or corporation, for resale in operable condition by the dealer to another person, firm or corporation in substantially the same form as when originally received by the dealer.

Except as otherwise provided, the city treasurer shall, on request, issue to any reputable person, firm or corporation, a license to engage in the business of buying and selling used automobiles upon payment of a license fee for the calendar year in the sum of $150.00 for each place at which such business is conducted. Before an original license is issued under this chapter, the person seeking the license shall make application therefor with the city treasurer, and the applicant shall attach to the application an accurate plot plan of the area, showing the actual shape and dimensions of the lot or area to be used in the sale of used automobiles. The city treasurer shall not issue a license to any person, firm or corporation for any location which in the treasurer's opinion is being operated or maintained as a motor vehicle salvage lot or junk yard. The city treasurer's opinion in this matter shall be based upon a visual inspection of the premises by a designated city employee, a review of the sale records of the applicant at the given location, and the definition of junk yard and motor vehicle salvage lot as set forth in Section 846-1 and 843-1 of the code. Any person, firm or corporation operating a used automobile dealership within the fenced portion of any junk yard or motor vehicle salvage lot shall not be required to obtain a license as a used automobile dealer.

No original license application shall be acted upon by the city treasurer until the application has been approved by the city engineer and the director of buildings and inspections, showing that the applicant has complied with all city ordinances and rules regarding zoning, drains, signs, driveways and barrier curbs.

Approval by the city engineer and the director of buildings and inspections will not be necessary for the renewal of a license. However, the city treasurer shall be empowered to suspend or revoke any license when it is shown that the licensee has not complied with all city ordinances and rules regarding zoning, drains, signs, driveways and barrier curbs, and the city treasurer shall also be empowered to suspend or revoke an existing license when in the treasurer's opinion the location at which the license is granted is being used as a motor vehicle salvage lot or junk yard, without the proper fence having been erected according to the provisions of Sections 846-7 and 843-7 of the code.
