c. Compliance with all provisions of Title 7, Chapter 26, of the N.J.A.C., where applicable.

d. No accumulation on the property of any junk or other objectionable materials except in designated trash receptacles.

e. All materials or waste which might create a pollutant, a hazard, or be attractive to rodents or insects shall be stored indoors and/or be enclosed in appropriate containers to eliminate such pollutant potential, hazard or attraction.

C. Noise. All applications shall comply with the provisions of N.J.A.C. 7:29.

D. Vibration. In any zone, vibrations discernible without instruments at the measuring location shall not be permitted.

E. Glare. No single standard for glare is promulgated in this Chapter due to the impracticality of establishing such standards. It is the intent of these performance standards to ensure that both direct and indirect glare, to the extent possible, are eliminated or that activities producing such glare are carried on within a structure. Necessary glare-producing devices such as roadway and walkway lighting shall be designed, constructed and maintained in such a manner as not to be a nuisance to surrounding uses.

F. Temperature Change. Any use or process shall not produce a temperature change greater than three degrees Celsius at the measuring location.

G. Fire and Explosive Hazards. If it appears that any proposed use, structure, process or resulting product or material may constitute a fire or explosion hazard, the Board shall require the applicant to supply proof of:

1. Approval of the use, structure, process or resulting product or material from the State Department of Labor indicating that adequate safeguards against fire and explosion have been taken or installed.

[The next page is 34693]

H. Electricity. Electricity and electronic equipment shall be shielded so there is no interference with any radio or television reception at the lot line or beyond or in the case of multi-family dwellings, beyond the operator's dwelling unit, as a result of the operation of such equipment.

§ 345-62. Residential design standards. [Added 10-13-2022 by Ord. No. 22-084]

A. The design and layout of buildings and parking areas shall provide an aesthetically pleasing appearance and efficient arrangement compatible with the character of surrounding development. To the greatest extent possible, new residential development in existing neighborhoods shall be integrated with the housing units in the adjacent area. New development in existing neighborhoods shall incorporate distinctive architectural characteristics of surrounding development, such as window and door detailing, decoration, material, roof style and pitch, height and porches.

B. All additions, alterations and accessory buildings shall be compatible with the principal structure, and shall share a common architectural theme.

C. Building proportions shall be compatible with the predominant proportional relationship along a street. Mass, scale, height, orientation, porches, entries and parking shall be consistent with the neighborhood.

D. Roof line design shall be consistent with the existing block or neighborhood patterns where appropriate. Roof design shall be an integral part of the overall building design.

E. Rooftop, outdoor living spaces such as decks and gardens shall be integrated into the building architecture. Stepbacks, parapets or other features shall be used to provide privacy and screening.

F. Monotonous uninterrupted expanses of walls shall be avoided. Façade articulations such as recesses, projections, columns, openings, ornamentation, decorative materials and colors shall be used to add texture and detail.

G. Materials and colors shall be compatible with the neighborhood character, streetscape and adjacent structures.

H. Building entries, windows and other openings shall be compatible in location, scale and pattern to other structures on the street.

I. Stilted buildings are prohibited.

J. Where garages must be located facing streets, they shall whenever feasible be minimized by placement at a lower elevation than the street or recessed within the building façade and framed by balconies, porches, trellises or other architectural elements. Garage doors shall not dominate the front façade.

K. Mechanical equipment, whether mounted on the roof, within the building, or on the ground shall be screened from view. All screening devices shall be compatible with the material, architecture and color of the adjacent structures. Electrical transformers shall be underground or housed within the building.

L. Window and door security grates shall be as inconspicuous and as complementary to the front façade facing a street as possible and shall not be permitted above the first floor or parlor floor of any façades facing the street. No security or decorative grates shall be permitted to enclose porches.

M. Fire escapes shall be constructed only against the side or rear wall of a building and shall be located and/or screened so as not to detract from the appearance of such buildings.

N. Cellar apartments are not permitted.

O. Trash containers and outdoor storage areas shall be screened from public streets, pedestrian areas and neighboring properties. The screen shall be designed to be compatible with the architectural character of the development and shall be constructed of durable materials.

P. Recycling Facilities for New Multi-Family Housing Developments. There shall be included in any new multi-family housing development that requires site plan approval an indoor or outdoor recycling area for the collection and storage of residentially generated recyclable materials. The dimensions of the recycling area shall be sufficient to accommodate recycling bins or containers which are of adequate size and number and which are consistent with anticipated usage and with current methods of collection in the area in which the project is located. The recycling area shall be conveniently located for the disposition of source-separated recyclable materials by residents of the multi-family housing development, preferably near, but clearly separated from, a refuse dumpster. The recycling area shall be well lit and shall be safely and easily accessible by recycling personnel and vehicles. Collection vehicles shall be able to access the recycling area without interference from parked cars or other obstacles. Reasonable measures shall be taken to protect the recycling area, and the bins or containers placed therein, against theft of recyclable materials, bins or containers. Any bins or containers which are used for the collection of recyclable paper or cardboard and which are located in an outdoor recycling area shall be equipped with a lid, or otherwise covered, so as to keep the paper or cardboard dry. Signs clearly identifying the recycling area and the materials accepted therein shall be posted adjacent to all points of access to the recycling area. Individual bins or containers shall be equipped with signs indicating the materials to be placed therein. Landscaping and/or fencing shall be provided around any outdoor recycling area and shall be developed in an aesthetically pleasing manner.

Q. Conversions of first floor commercial uses to a dwelling unit:

1. The design features of the storefront architecture shall be preserved to the maximum degree possible.

2. Storefront display windows shall be maintained. Residential privacy may be achieved by shades and curtains, blinds and the use of translucent glass such as sandblasted or etched glass, patterned glass and privacy glass.

3. If the existing storefront incorporates a second tier of windows behind the storefront glass this second layer of glass may be clear or obscured.

4. Solid bulkheads shall not exceed two-fifths of the first floor height.

5. Original bulkhead designs should be preserved to maintain the historic character of the street. Original materials to be maintained included wood, cast iron, cast aluminum, pigmented structural glass, terra cotta, porcelain enamel, ceramic tile, decorative brick, marble and granite.

6. For security, the use of retractable security grilles and solid wooden doors is preferred to external grilles.

7. If shielding of sunlight is a concern, awnings may be mounted above or below the transom.

8. Recommended replacement windows for the transom area include hopper, sliding and awning windows.

9. Recommended replacement windows for the display area include fixed glass and casement windows.

10. Recessed entries shall be maintained and "outer" doors shall not be added.

R. All sidewalks shall be tinted Scofield charcoal grey or equivalent.

S. Both primary and secondary front façades shall be designed with quality materials and details, such as masonry.

T. Front yard regulations for landscaping and fencing shall apply to both primary and secondary front façades.

U. Bird Friendly Design Standards. **[Added 3-11-2026 by Ord. No. 26-014]**

1. Applicability.

a. These standards shall apply to new construction, rehabilitation, and additions that require site plan approval.

b. These standards are encouraged for new construction, rehabilitation, and additions that do not require site plan approval except when bird hazard installations are proposed. In the instance that bird hazard installations are proposed, 345-62 2.a.ii. shall apply.

c. These standards shall be waived for new construction, rehabilitation, and additions in which 100% of dwelling units are designated as deed-restricted affordable units.

2. Building materials.

a. Bird friendly materials shall be utilized on the following:

i. On all building facades, and any associated openings, from ground level up to 85 feet above grade.

1. Materials other than bird friendly materials shall not exceed an aggregate of ten square feet within any ten feet by ten feet square area of exterior wall area below 85 feet above grade.

2. Where transparency of windows is required from ground level up to 85 feet, materials with a maximum Threat Factor less than or equal to 30 can be utilized.

ii. On all bird hazard installations.

1. Bird hazard installations is defined in 345-6 and include but are not limited to awnings, railings, noise barriers, wind barriers, skyways or skywalks, pedestrian bridges, all floors of building connectors, atriums, outside corners where a bird can see in one side of the building and out the other within 30 feet of the corner, all interior corners within 30 feet of the corner, glazing adjacent to courtyards, and any portion of a building façade adjacent to a green roof or landscape element up to 24 feet above the surface of the green roof.

3. Reference and guidance.

a. It is encouraged to use one or more of the following sources for guidance:

i. American Bird Conservancy https://abcbirds.org/

1. American Bird Conservancy's Downloadable Resources including the American Bird Conservancy's Prescriptive Rating Criteria https://abcbirds.org/glass-collisions/resources/

2. American Bird Conservancy's Product & Solutions Database https://abcbirds.org/glass-collisions/products-database/

§ 345-63. Non-residential design standards. [Added 10-13-2022 by Ord. No. 22-084]

A. The height and scale of new development shall be compatible with the surrounding development.

B. In retail structures, storefront windows shall cover a minimum of 60 percent of the ground floor façade area. On corner lots, the secondary storefront façade shall be consistent with the alignment, location and amount of glazing of the primary storefront window façade.

C. Blank walls shall be avoided at the ground floor level. Façade articulations such as windows, trellises, recesses, projections, ornamentations, color, arcades, changes of material, landscaping and other features shall be used to lessen the impact of blank walls.

D. Stilted buildings are prohibited.

E. Trash containers and outdoor storage areas shall be screened from public streets, pedestrian areas and neighboring properties. The screen shall be designed to be compatible with the architectural character of the development and shall be constructed of durable materials.

F. The primary access to the building shall be from the front. If necessary, the rear of the building shall be enhanced where appropriate to improve public access from parking lots and service alleys.

G. In developments requiring loading areas, service and loading areas shall be separated from main circulation and parking areas and away from public streets.

H. Clearly defined, highly visible entrances shall be provided through the use of features such as canopies, awnings, arches, decorative doors and integral planters.

I. Store window security grates shall be of open mesh design except the lowest one foot may be of solid construction.

J. Fire escapes shall be constructed only against side or rear walls of the building.

K. Rooftop/mechanical equipment shall be screened with visual barriers from adjacent properties, public roadways, parks and other public areas. The architectural design of buildings shall incorporate design features that screen, contain and conceal all heating, ventilation and air conditioning units. All screening devices shall be compatible with the architecture and color of the principal structures.

L. Electrical transformers shall be underground or housed within the building.

M. Recycling and solid waste disposal areas shall be enclosed. These enclosures shall be screened with landscaping where feasible. Locations shall be conveniently accessible for trash collection and maintenance and shall not block access drives during loading operations.

N. Sight Triangles. On a corner lot in any district, sight triangles shall be required in which no grading. planting or structure shall be erected or maintained more than three feet above the street centerline or lower than 12 feet above the street centerline except that intersections controlled by a traffic signal and intersections having either a stop sign or flashing light or where the structure is set back at least 12 feet from the curbline shall not require a sight triangle. Traffic control devices, street name poles and utility poles shall be exempt.

O. All sidewalks shall be tinted Scofield charcoal grey or equivalent.

P. Both primary and secondary front façades shall be designed with quality materials and details, such as masonry.

Q. Front yard regulations for landscaping and fencing shall apply to both primary and secondary front façades.

R. Bird friendly design standards. **[Added 3-11-2026 by Ord. No. 26-014]**

1. Applicability.

a. These standards shall apply to new construction, rehabilitation, and additions that require site plan approval.

b. These standards are encouraged for new construction, rehabilitation, and additions that do not require site plan approval except when bird hazard installations are proposed. In the instance that bird hazard installations are proposed, 345-62 2.a.ii. shall apply.

c. These standards shall be waived for new construction, rehabilitation, and additions in which 100% of dwelling units are designated as deed-restricted affordable units.

2. Building materials.

a. Bird friendly materials shall be utilized on the following:

i. On all building facades, and any associated openings, from ground level up to 85 feet above grade.

1. Materials other than bird friendly materials shall not exceed an aggregate of ten square feet within any ten-foot by ten-foot square area of exterior wall area below 85 feet above grade.

2. Where transparency of windows is required from ground level up to 85 feet, materials with a maximum Threat Factor less than or equal to 30 can be utilized.

ii. On all bird hazard installations.

1. Bird hazard installations is defined in 345-6 and include but are not limited to awnings, railings, noise barriers, wind barriers, skyways or skywalks, pedestrian bridges, all floors of building connectors, atriums, outside corners where a bird can see in one side of the building and out the other within 30 feet of the corner, all interior corners within 30 feet of the corner, glazing adjacent to courtyards, and any portion of a building façade adjacent to a green roof or landscape element up to 24 feet above the surface of the green roof.

§ 345-64. Public or private common open spaces design standards. [Added 10-13-2022 by Ord. No. 22-084]

A. All open space shall incorporate several elements such as lawn, landscaping including shrubbery and trees, attractive paving materials, street furniture, decorative lighting, low walls, fountains and other architectural and artistic amenities so as to produce and provide a pleasant environment at all levels and to complement the surrounding buildings.

B. Adequate lighting shall be provided to promote a sense of security in the open space.

C. Open spaces shall be so located as to provide for maximum usability and to create a harmonious relationship between buildings.

§ 345-65. Buffers. [Added 10-13-2022 by Ord. No. 22-084]

A. Zoning Standards. Any parking, loading, outside equipment and storage area that adjoins a street open space or residential use shall have a landscaped buffer area along all applicable property lines, except in those instances where a building intervenes and where it impedes safe vehicular and pedestrian traffic.

B. Design Standards.

1. No activity, storage of materials or parking of vehicles shall be permitted in the buffer area except access driveways, directional signs, and permitted signs.

2. Any buffer area shall be at least three feet in depth and planted and maintained with massed evergreens, deciduous trees and shrubs of such species and sizes which will produce within two growing seasons a living screen at least four feet in height and of such density so as to obscure throughout the full course of the year the glare of automobile headlights emanating from the premises. All plantings shall be in accordance with 345-66.B. The screen plantings shall be placed so that at maturity they will not protrude across any street or property line and so that a clear sight triangle shall be maintained at off street intersections and at all points where private accessways intersect public streets.

3. Where spatial restrictions or traffic safety concerns do not provide sufficient width for screen planting, a four-foot high decorative fence or brick wall or any combination of plantings and walls or decorative fences may be provided.

§ 345-66. Landscaping. [Added 10-13-2022 by Ord. No. 22-084]

A. General Standards.

1. All areas not occupied by buildings or structures shall be appropriately landscaped in addition to required City trees as defined in Chapter 321 and buffer areas (see maximum lot coverage requirement in each zone).

   a. Street trees shall be required for all development in accordance with the standards found under Section 345-66.C except where it can be demonstrated to the Municipal Forester that it is not possible to plant trees for one of the following reasons: (1) constraints such as utility lines; (2) danger to public health safety or property; (3) the project location will not allow for the healthy growth of a street tree.

   b. If replacement of removed City trees as defined in Chapter 321 or planting of new City trees is determined not to be practical at a given location by the Municipal Forester, the applicant will be required to make a monetary contribution to the City for each tree equivalent to the replacement cost per tree, as determined annually by the Division of Parks and Forestry.

2. Front yard landscaping.

   a. At least 60 percent of the area between the building line and street line on residential lots shall be landscaped, provided, however, that for new construction in the R-1 District, or for construction of three-family detached housing in the R-3 District, which includes either a front garage and driveway, or driveway access through the front yard to a side or rear yard parking area, or rear yard garage in lieu of a front yard garage access, a minimum of 30 percent of the area shall be landscaped.

   b. In the event of removal of front yard landscaping existing at the time of the adoption of this ordinance for rehabilitation, or required repair/replacement, or for any other purpose, restoration of the originally landscaped area is required in accordance with percentage requirements of subsection A.2.a of this section.

3. Surface parking lots, principal or accessory. All surface parking lots must adhere to the requirements of Chapter 345-65. In outdoor parking lots with ten or more spaces not less than five percent of the parking area shall be suitably landscaped and maintained with trees. At least one shade tree is required to be planted for every ten parking spaces. Planting methods and materials for shade trees shall be according to current Jersey City Forestry Standards, published by the Division of Parks & Forestry. The landscaping shall be disbursed throughout the parking area bounded by the limits of curbing or from the outside perimeter of the paved parking area.

B. Design Standards for On-Site Landscaping.

1. Landscaping for all uses shall define entrances to buildings and parking lots, define the edges of various land uses, provide transition between neighboring properties and provide screening for loading and equipment areas to the maximum extent feasible.

2. All plant materials shall be suitable for the site, free of disease and insects, and shall conform to the American Standard for Nursery Stock (ASNS) of the American Nursery and Landscape Association for the quality and installation of that plant.

3. Plants listed on any Jersey City or state government list of invasive or prohibited species shall not be installed and shall not be counted towards meeting any landscaping requirement.

4. In all areas where landscaping is required, a minimum of 75 percent of the surface area shall be covered by living plants, rather than mulch, bark, gravel, or other non-living material.

5. The use of synthetic vegetation (plastic plants, etc.) shall not be used to meet any of the required landscaping or buffering standards.

6. In the Highway Commercial and Community Automotive zones, at least one-half of the required landscaping shall be located along the street right-of-way.

7. Landscaping shall be in scale with adjacent structures and be of appropriate size at maturity to accomplish its intended purpose.

8. Foundation plantings are recommended to soften the edge between the parking lot and the structure.

9. The use of non-invasive vines and climbing plants on buildings and the perimeter of garden walls is encouraged.

10. Plants in containers shall be used for enhancement of sidewalk shops, plazas and courtyards.

11. Landscaping shall not obstruct visibility for vehicular and pedestrian traffic at all 90-degree angle intersections of public rights-of-way and private driveways.

12. All plantings shall be with species with proven resistance in an urban environment.

13. Use of shade trees is encouraged to minimize the temperature and purify the City's air and water.

14. Rain gardens and/or other practices that mimic natural hydrology and increase effective perviousness are encouraged.

15. Green roofs and green walls are encouraged citywide. Such features shall be exempt from roof coverage and lot line setback requirements of subsections 345-60.D and H.

C. Design Standards for Street Trees.

1. Street trees shall be required for all development projects (including all new construction and all rehabilitation projects subject to site plan review. Project developers shall provide one street tree, either new or existing, for every 25 feet of street frontage.

2. Tree removals and plantings for development projects shall follow the requirements of Chapter 321.

3. All new City trees shall be selected from the most current Recommended Street Tree List of the Jersey City Forestry Standards, as published and undated by the Division of Parks and Forestry and shall receive site and species approval from the Division of Parks & Forestry.

4. Planting methods and materials and tree-pit specifications shall be according to current Jersey City Forestry Standards, as published by the Division of Parks & Forestry.

5. With regard to maintenance, the provisions of Section 345-75 shall apply.

§ 345-66. Green area ratio (GAR) standards. [Added 10-13-2022 by Ord. No. 22-084]

A. Purpose.

1. Green area ratio (GAR) requirements are green infrastructure and resilient design requirements. These requirements are calculated as a green area ratio (GAR) as explained below.

2. The purpose of GAR is to integrate sustainable landscape elements into site design to address environmental concerns citywide.

3. Any zone or Redevelopment Plan which includes a GAR requirement in the bulk standards of the district is subject to the requirements below. Any non-compliance with the standards below necessitates a "c" variance or deviation.

B. Applicability.

1. GAR requirements apply to major and minor site plan applications in addition to projects requiring a variance.

2. Any lot which falls only partially within a zone/redevelopment area subject to GAR requirements shall fully comply with the GAR standards.

3. Any lot which falls within multiple zones, redevelopment areas, or subzones, such as a consequence of a split zoned site or an overlay, shall comply with the GAR standards set forth for the

more restrictive zone/redevelopment area (that is, the zone or area with the higher required ratio), unless less than ten percent of the lot area is within the more restrictive zone/redevelopment area, in which case the secondary zone/redevelopment area requirements shall apply.

4. GAR elements proposed within municipally designated historic districts and landmarks shall be reviewed by the Historic Preservation Commission for appropriateness and compliance with the Secretary of Interior Standards for Historic Properties.

5. Zones: A required level of GAR compliance is established by zone. Zones in the following table require GAR as follows:

Zone/Redevelopment Area	Required ratio
F overlay, subdistrict F-VE	0.50
F overlay, subdistrict F-AE	0.25

C. Exemptions.

1. Applications for signage, wireless communication antennas, or wireless telecommunication towers are exempt from requirements in this subsection.

2. Non-compliance with the required GAR ratio shall result in a "c" variance.

D. Ratio Reductions.

1. Jersey City locally-designated historic districts and landmarks and historic buildings included in State and National Registers of Historic Places, shall be eligible for reduced GAR ratio requirements. Upon submission of a certified letter from a licensed architect or engineer attesting to the fact that the building cannot structurally maintain the weight of either an intensive or extensive green roof, the required GAR shall be reduced by one-half of that which is otherwise required in the zone/redevelopment area in which the property is located.

E. Landscaping Multipliers. Each of the following landscaping and stormwater management elements contribute to a development's overall GAR score. Increased square footage of any element results in a higher calculated score.

To maximize a GAR score, landscape elements may be "layered" in order to qualify for multiple elements in a single feature. For example, a landscaping bed may have 24-inch soils (0.6 multiplier), native ground covers (0.2 multiplier plus 0.1 multiplier bonus), plants two feet at maturity (0.3 multiplier), and new tree canopy 2.6-inch diameter (0.5 multiplier). Each of these elements are eligible for GAR points, to work cumulatively for higher points totals.

1. Multipliers table.

GAR Elements	Multiplier
Landscaped areas with a soil depth of less than 24" (b, c)	0.3
Landscaped areas with a soil depth of 24" or more (b, c)	0.6
Ground covers, or other plants less than 2' tall at maturity (a, b, c)	0.2
Plants, not including grasses, at least 2' tall at maturity (a, b. c)	0.3
Tree canopy for all trees, 2.5" to 6" in diameter (a, c)	0.5

GAR Elements	Multiplier
Tree canopy for new trees 6.1" to 12" in diameter (a, c)	0.6
Tree canopy for new trees 12.1" in diameter and above (a, c)	0.7
Tree canopy for preservation of existing trees 18" to 24" in diameter (c)	0.7
Tree canopy for preservation of existing trees 24" diameter or larger (c)	0.8
Vegetated walls, plantings on a vertical element (b, c)	0.6
Extensive green roof over at least 2" but less than 8" of growth medium (b, c)	0.7
Intensive green roof over at least 8" of growth medium (b, c)	0.8
Permeable/porous/pervious paving or a deck atop at least 6" and less than 2' of soil or gravel	0.4
Permeable/Porous/Pervious paving or a deck atop at least 2' of soil or gravel	0.5
Enhanced tree growth systems (see definitions)	0.4
Bioretention facilities (see definitions)	0.4
Retention or detention tanks (in cubic feet)	0.3
WaterSense certified fixtures (check if all fixtures in kitchen and bath comply)	0.3
Water features (fountains, pools, etc.) using at least 50 percent recycled water, harvested water, and/or gray water*	0.2
Bonuses - the following ratio increases may be applied to above categories	
Native plant species (see § 345-66.1.E.1.a) below) - Items marked with "a"	0.1
Landscaping in food cultivation (see § 345-66.1.E.1.c) below) - Items marked with "b"	0.1
Harvested stormwater irrigation (see definitions) or graywater irrigation system, using at least 50 percent recycled water, harvested water, and/or graywater* - Items marked with "c"	0.2
*Water features must be filled a minimum of 6 months/year **Permeable/porous/pervious paving credits may not exceed 1/3 of the total GAR score	

a. Native plants are determined as listed by The Native Plant Society of New Jersey, specific to Hudson County (see http://www.npsnj.org/pages/nativeplants____Plant_Lists.html). Additional plants not listed but determined to be native shall be considered subject to the written certification of a Licensed Landscape Architect.

b. Additional guidance for appropriate plants (plants for wet locations, shady locations, etc.) can be found in the Rain Garden Manual of New Jersey (see https://issuu.com/rutgerswater).

c. Landscaping in food cultivation shall be subject to Section 345-60.V.1, Agriculture.

d. Street trees within the public right-of-way adjacent to the subject site may be included in the calculations.

e. For trees, caliper measurement of the trunk shall be taken six inches above the ground up to and including four-inch caliper size. If the caliper at six inches above the ground exceeds four inches, the caliper should be measured at 12 inches above the ground.

f. Clump-form and multi-stem trees, above a specified height, may be measured by caliper according to the most recent American Standard for Nursery Stock. The appropriate standard for measurement is one-half the total calipers for the three largest trunks. Shrub-form trees are measured by height only.

g. Height measurement shall be taken from ground level for field grown stock and from the soil line for container grown stock, which should be at or near the top of the root flare.

2. Equivalency table. Certain elements such as trees and individual plantings cannot be calculated by area. As such, the following table provides an area equivalency for these elements.

GAR Landscape Elements	Equivalent Square Footage
Groundcovers, or other plants less than 2 feet tall at maturity	Square footage at maturity
Plants, not including grasses, at least 2 feet tall at maturity*	9
Tree canopy for trees 2.5-6 inches in diameter	50
Tree canopy for trees 6-12 inches in diameter	250
Tree canopy for trees 12-18 inches in diameter	600
Tree canopy for trees 18-24 inches in diameter	1,300
Tree canopy for trees larger than 24 inches in diameter	2,000
*"Plants" include perennials, shrubs, and trees less than 2.5" caliper; calculation is per plant	

F. Compliance.

1. If the proposed project contains ten or more residential units, 20 or more new parking spaces, or 12,000 or more gross square feet of commercial or industrial space, whichever comes first, landscape areas must be designed by a licensed Landscape Architect or engineer. Smaller projects not meeting any of the thresholds above must be designed by a qualified landscape professional (such as licensed landscape architects, certified professional horticulturalists, and certified landscape designers).

2. A certificate of occupancy shall not be issued until a calculated compliance chart, signed by a landscape architect (or qualified landscape professional as permitted in F.1 above) licensed in the State of New Jersey, is provided, or affirming conformance to the GAR regulations and approved plans.

3. Additionally, a maintenance plan shall be provided by plan preparers to both the City and the property owner. This maintenance plan serves as guidance for the property owner to ensure all GAR-related features are maintained by the owner, and informs all property owners in perpetuity that they are obliged to maintain the GAR score at or above the minimum level set in the regulations and/or approval.

4. Should the GAR score fall below the minimum required, a violation may be issued by the Zoning Officer.

5. Compliance formula (calculations worksheet is available).

a. Determine the total lot area.

b. Calculate the area of each proposed landscape element (may need to refer to the equivalency table.)

c. Multiply the area of each landscape element by its assigned multiplier to provide a weighted square footage.

d. Add the weighted square footages of all landscape elements.

e. Divide the sum by the total lot area of the site to provide the project's GAR score.

§ 345-67. Fences and walls. [Added 10-13-2022 by Ord. No. 22-084]

A. Zoning Standards.

1. Location and height standards.

a. Residential districts maximum height.

i. Front yard. Four feet except for parking areas of six spaces or more developed in accordance with the ordinance, then the maximum height shall be six feet;

ii. Side yard. Six feet maximum height;

iii. Rear yard. Eight feet maximum height.

b. Commercial districts maximum height.

i. Front yard. Four feet except for parking areas of six spaces or more developed in accordance with the ordinance, then the maximum height shall be six feet;

ii. Side yard. Six feet maximum height;

iii. Rear yard. Eight feet maximum height.

c. Industrial districts maximum height.

i. All yards. 12 feet.

d. Corner lots. Fences on corners shall maintain clear lines of sight for vehicular traffic and shall be subject to the requirements of sight triangles. On corner lots, the fencing shall have matching fence heights on both frontages.

2. Chain link fences shall not be permitted in the front yard.

3. Vacant lots shall be exempt from the standards listed above. Vacant lots shall be permitted to have six-foot high chain link fence along the front and side yard and eight feet along the rear yard. All chain link fencing is to be removed upon development of the property.

4. Barbed wire/razor wire fencing is prohibited.

B. Design Standards.

1. Fences and walls shall complement the architectural character of the principal building.

2. A finished side of all fences shall face "out" from the property. All structural supporting members of the fence must face the interior portion of the lot and no portion of any at-grade fence may extend beyond or across the property line.

3. For fences on roof deck, a finished side of all fences shall face "out" from the area which it is enclosing.

4. Fence height shall be measured from finished grade. Up to an additional ten percent of height may be added to the maximum permitted fence height in order to accommodate lots with irregular grade.

5. All fences shall be consistent in appearance. Posts are to be separated by equal distances and constructed of fencing material conforming to a definite pattern in size.

6. All gates within any given type of fence shall be of the same material, design, type, height and color as the fence (e.g., a chain link gate may not be attached to a tubular metal fence).

7. No fence shall permanently preclude access to abutting properties for maintenance of the abutting properties. Gates or openings shall be required to be placed in locations where adjoining property owners may require access to the rear of their properties.

8. Gates shall not swing outward into the public right-of-way.

9. Where chain link is permitted in industrial zones, one-inch non climbable vinyl clad fencing shall be used.

10. Wooden board-on-board fencing is recommended for screening and privacy in the rear and side yards, but may not be located between the building line and street line.

11. Solid or perforated, corrugated, or flat sheet metal is prohibited for use as fencing material.

12. Single ply, vinyl slats which are inserted diagonally are prohibited as screening material for fences.

13. Mechanical gates with overhead bars are prohibited.

14. Decorative front yard fences defining a front yard private space shall be provided if the predominant character of the block contains such fencing. The front yard fence must line up with the predominant fence line on the street. No encroachment beyond the predominant fence line shall be permitted.

15. Fences shall only be permitted within the public right-of-way provided such fences are consistent with the established fence line on the street. No fencing shall be permitted in the right-of-way solely for purposes of providing for off-street parking. Such fences must comply with the design standards outlined below.

16. If the fence application is part of any application in front of either Board, the reviewing Board shall review and approve or deny. If the threshold for Board review is not met, the City Planning staff shall review the application and report its findings to the Office of the Construction Code Official, whereupon a construction permit may be issued.

    a. All proposed fences in the public right-of-way must be either wrought iron, mild steel, tubular steel or aluminum, or a combination of brick columns and steel/iron fences. Fences shall be painted and maintained with a dark color to reduce visibility of rust.

    b. Height Restrictions. The height of bars and columns of fences constructed in the public right-of-way shall not exceed 48 inches, as measured from finished grade to the top of the bars or columns.

    c. Size and spacing material.

        i. Minimum width of vertical bars—one-half (½) inch.

        ii. Maximum spacing of bars—four inches.

    d. Freestanding gates. All freestanding gates must swing into the fenced area, not into the public right-of-way.

    e. No fence in a right-of-way shall disturb any existing sidewalk.

    f. The right-of-way inside the fence shall be landscaped.

§ 345-68. Signs. [Added 10-13-2022 by Ord. No. 22-084; 10-25-2023 by Ord. No. 23-103]

A. Exempt Signs.

1. Any public notice or warning required by a valid and applicable federal, state, county or local law, regulation or ordinance.

2. Any sign which is inside a building, not attached to a window or door, and is not readable from a distance of more than three feet beyond the lot line of the lot or parcel nearest to where such sign is located.

3. Holiday lights and decorations with no commercial message.

4. Any sign describing the history of the building with tablets, cornerstones or similar, plaques embedded on the façade below four feet.

5. Traffic control signs on private property, which meet Department of Transportation standards, and which contain no commercial message of any sort.

6. Flags of the United States, New Jersey, the City of Jersey City and flags of foreign nations.

7. Signs or banners advertising public or quasi-public events that are posted with the permission of the City Council or of any person to whom the City Council has delegated this authority according to guidelines set by City Council.

8. Pump mounted fuel price information signs subject to the following:

   a. Only one fuel price informational sign shall be permitted per fuel pump.

   b. Fuel price informational signs shall be limited in size to an area of 216 square inches in accordance with State and Federal regulations.

   c. Each fuel price informational sign shall be affixed directly and firmly to a fuel pump and shall be stationary.

   d. Nothing herein shall be construed to prohibit the advertisement of fuel prices on any other sign meeting the requirements of this section.

9. U.S. Postal Regulation mailboxes.

10. Political signs. Such signs may be displayed for a period of not more than 30 days before the election and not more than three days after the election.

B. Zoning Standards.

1. Individual sign area measurement.

   a. The area of a sign face (which is also the sign area of a wall sign or other sign with only one face) shall be computed by means of the smallest square, circle, rectangle, triangle, or combination thereof that will encompass the extreme limits of the writing, graphic, illustration, picture, symbol or other display, together with any material or color forming an integral part of the background of the sign. For purposes of calculating sign area, any illuminated border including those which may frame a window shall be included in the sign area calculation and used to differentiate the sign from the backdrop or structure against which it is placed. This does not include any supporting framework, bracing or decorative fence or wall when such fence or wall otherwise meets zoning regulations and is clearly incidental to the sign itself.

   b. No sign shall have more than two display faces. The sign area for a sign with two display faces shall be computed by adding together the area of all the sign's faces which are visible from any one point. When a sign has two display faces such that both faces cannot be viewed from any one point at the same time, the sign's area shall be computed by the measurement of the larger of the two faces.

2. In cases where sign standards are not established, standards from the most similar zone and use shall apply.

3. Glazed area. Any glazing in doorways shall be considered part of the glazed area. For purposes of calculating window signs, a window shall be considered the glazed area. Signs which are required by county, state, or federal agencies are exempt from calculation of permanent signage.

4. Measurement of height. The height of a freestanding sign shall be computed as the distance from the base of the sign at normal grade to the top of the highest attached component of the sign. Normal grade shall be considered to be the lower of existing grade prior to construction or the newly established grade after construction, exclusive or any filing, berming, mounding or excavation solely.

5. The following signs are prohibited:

   a. No billboards or other off-site advertising signs shall be erected, used or maintained within the City of Jersey City except in the NC-3 Neighborhood Commercial District 3.

   b. No signs shall be placed on fences, walls, utility poles, trees, railway or road bridges, bridge supports or abutments, retaining walls, parking meters or water towers unless approved by the City Council.

   c. No roof signs, also known as "sky signs" shall be allowed except in the NC-3.

   d. No signs above the second floor of any building other than hotels.

   e. No sign shall be placed on an accessory building.

   f. No sign shall be lighted by means of a varied illuminated light, nor shall any sign be in whole or in any part moving, mobile, revolving and/or electrically or mechanically activated except in the NC-3 Neighborhood Commercial District 3. Signs displaying the time and/or temperature shall be permitted in non residential districts.

   g. No sign shall be allowed with the optical illusion of movement by means of a design which presents a pattern capable of reverse perspective, giving the illusion of motion or changing copy except in the NC-3.

   h. No signs shall be allowed that are placed on or affixed to vehicles and/or trailers which are parked on a public right-of-way, public property or private property so as to be visible from a public right-of-way where the apparent purpose is to advertise a product, service or activity or direct people to a business or activity. This is not intended, however, to prohibit signs placed on or affixed to vehicles, buses or trailers where the sign is incidental to the primary use of the vehicle or trailer.

   i. No sign shall be allowed to obstruct any window or door opening used as a means of egress, interferes with an opening required for legal ventilation, or is attached to or obstructs any standpipe, fire escape or fire hydrant.

   j. No sign shall be allowed which obstructs the view of vehicle operators or pedestrians entering a public roadway from any parking area, service drive, public driveway, alley or other thoroughfare.

   k. No building sign shall be greater than four feet from the building face.

6. The following signs and the standards and conditions that govern such signs are set forth in the sign matrix. All other signs are expressly prohibited.

C. Design Standards.

1. Signs shall be in harmony and consistent with the architecture of the building and relate to the features of the building in terms of location, scale, color, lettering, materials, texture and depth. Signs shall not be dominant but shall be proportionate and shall complement the building, existing signs and surroundings.

2. There shall be consistent sign design throughout a particular project. The design elements include style of lettering, construction materials, size and illumination.

3. Building signs shall not obscure, conflict with or cover any architectural element and must be aligned with major building elements such as windows, trim and structure lines.

4. No sign shall extend or project above the highest elevation of the wall to which it is attached or above the lowest part of the roofline of the building, whichever is less.

5. Illuminated signs.

a. Internally illuminated signs shall only be permitted in the HC, and C/A zones.

b. Signs lit by external sources (i.e. gooseneck lights) shall be allowed but shall be located in such a manner so as to avoid any glare on adjacent property. Sources of sign illumination shall be completely shielded from the view of vehicular traffic using the road or roads abutting the lot on which the sign is located.

c. External lights used for the illumination of any sign on a mounted building, whether or not such light fixtures are attached to or separate from the building, shall not extend above the highest elevation of the front wall of the building or more than 18 feet above the street level of the premises, whichever is less.

6. Signs and sign structures of all types shall be located to allow a clear, unobstructed line of sight for 300 feet from the stop line of any intersection of streets and/or driveways. No sign shall project into a sight triangle below the second story floor level or the height of a traffic signal or traffic directional sign in the intersection, whichever is higher.

D. Nonconforming Signs.

1. No nonconforming sign may be enlarged or altered in a way which would increase its nonconformity. Existing nonconforming permanent signs may continue to exist; however, when the sign is modified either in shape, size, illumination or structure, the sign shall be altered to conform to the provisions of this section.

2. Should any nonconforming sign be damaged by any means to an extent of more than 50 percent of its replacement cost at time of damage, it shall not be reconstructed except in conformity with the provisions of this section.

E. Sign Matrix, Sign Standards by Zone and/or Use.

Zone and/or Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
R-1, RH-1, RH-2						Design standards in § 345-68 shall apply
Residential	Nameplate only	1	1	N/A	N/A	Nameplate must be attached to the dwelling
Houses of worship, schools, governmental uses, Civic	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	
Mortuaries	Freestanding (monument only) or building	20	1	4	½ of the required front yard setback	
Assisted living, Adult Day Care	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	
Senior housing	Building only	20	1	N/A	N/A	
Nursing homes	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	
For all other uses - RC-1 signage standards shall apply						
R-2	Multi-Unit Attached Housing					Design standards in § 345-68 shall apply
Townhouses	Nameplate only	1	1	N/A	N/A	Nameplate must be attached to the dwelling

Zone and/or Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Commercial	Primary façade (building only)	20 sq. ft. or 5% of the ground floor area of that portion of the primary façade applicable to the commercial use, whichever is smaller	1			Must be attached to the building
On corner lots	Secondary façade (building only)	½ the allowable rear for primary façade	1	N/A		On corner lots, the length of any building sign on the secondary façade shall not exceed ½ the width of the primary façade or 12½ feet, whichever is smaller
Houses of worship, schools, governmental uses	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	
Mortuaries	Freestanding (monument only) or building	20	1	4	½ of the required front yard setback	
Assisted living	Freestanding (monument only) or building	24	1	4		

Zone and/or Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Senior housing	Building only	20	1	N/A	N/A	
Nursing homes	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	
For all other uses - RC-1 signage standards shall apply						
R-3	Multi-Unit Mid-Rise					Design standards in § 345-68 shall apply
Residential and Townhouse	Building only	12	1	N/A	N/A	
Houses of worship, schools, governmental uses	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	
Ground floor office uses	Building only	10	1	N/A		
Mortuaries	Freestanding (monument only) or building	20	1	4	½ of the required front yard setback	
Assisted living	Freestanding (monument only)	24	1	4	½ of the required front yard setback	
Senior housing	Building only	20	1	N/A	N/A	
Nursing homes	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	

Zone and/or Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
For all other uses - RC-1 signage standards shall apply						
R-4	Multi-Unit High-Rise					Design standards in § 345-68 shall apply
Townhouses	Nameplate only	1	1	N/A	N/A	Nameplate must be attached to the dwelling
Mid-rise apartments	Building only	12	1	N/A	N/A	
High-rise apartments	Building only	12	1	N/A	N/A	
Houses of worship, schools, governmental uses	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	
Mortuaries	Freestanding (monument only) or building	20	1	4	½ of the required front yard setback	
Assisted living	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	
Senior Housing	Building only	20	1	N/A	N/A	
Nursing Homes	Freestanding (monument only) or building	24	1	4	½ of the required front yard setback	

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Commercial	Primary façade (building only)	20 sq. ft. or 5% of the ground floor area of that portion of the primary façade applicable to the commercial use, whichever is smaller	1			
On corner lots	Secondary façade (building only)	½ the width for primary façade	1			On corner lots, the length of any building sign on the secondary façade shall not exceed ½ the width of the primary façade
RC-1	Residential Commercial - 1					Design standards in § 345-68 shall apply
Commercial and office uses	Ground floor	1 sf for each linear foot of frontage	1 per frontage for corner lots			Must be attached to the building

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Commercial and office uses—Con'td.	Projecting/ blade signs	8 sq. ft.	1 per frontage			May project a maximum of 4 ft. from the building. Minimum distance between the ground and bottom of the sign is 8 feet; must be hung by brackets at right angles to the façade
	Window	No more than 25% of total glazed area of a storefront or of any individual window signage shall be calculated into the maximum building signage area		N/A		
RC-2	Residential Commercial - 2					Design standards in § 345-68 shall apply
Commercial and office uses	Ground floor	1 sf for each linear foot of frontage	1 per frontage for corner lots			Must be attached to the building

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Commercial and office uses —Cont'd.	Projecting/ blade signs	8 sq. ft.	1 per use			May project a maximum of 4 ft. from the building. Minimum distance between the ground and bottom of the sign is 8 feet; must be hung by brackets at right angles to the façade
	Window	No more than 25% of total glazed area of a storefront or of any individual window signage shall be calculated into the maximum building signage area		N/A		
RC-3	Residential Commercial - 3					Design standards in § 345-68 shall apply
Commercial and offices uses	Ground floor	1 sf for each linear foot of frontage	1 per frontage for corner lots			Must be attached to the building

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Commercial and office uses —Cont'd.	Projecting/ blade signs	8 sq. ft.	1 per use			May project a maximum of 4 ft. from the building. Minimum distance between the ground and bottom of the sign is 8 feet; must be hung by brackets at right angles to the façade
	Window	No more than 25% of total glazed area of a storefront or of any individual window signage shall be calculated into the maximum building signage area		N/A		
NC	Neighborhood Commercial					Design Standards in § 345-68 shall apply

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Commercial and Office Uses	Ground floor	20 sq. ft. or 5% of the ground floor area of that portion of the primary façade applicable to the commercial use, whichever is smaller	1 per frontage for corner lots			
	2nd to 5th floor where there are commercial or office tenants on that floor	10 sq. ft.	1 per floor; 1 per frontage for corner lots			Signage shall not be internally lit nor shall any signs be lit by external sources
	Projecting only	8 sq. ft.	1 per commercial tenant			May project a maximum of 4 ft. from the building. Minimum distance between the ground and bottom of the sign is 8 feet; must be hung by brackets at right angles to the façade

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Commercial and office uses —Cont'd.	Window	No more than 25% of total glazed area of a storefront or of any individual window signage shall be calculated into the maximum building signage area		N/A		
	Canopies, marquees, and awnings	Signage shall be calculated into the maximum building signage area	N/A	N/A		
Theatres, museums, governmental uses, parking garages and lots	Building only	24	1	N/A	N/A	
Colleges and universities	Building only	10	1	N/A	N/A

	Canopies, marquees, and awnings	Signage shall be calculated into the maximum building signage area	N/A	N/A	N/A	
	Secondary façade or corner lots (building only)	½ the width of the primary façade	1			On corner lots, the length of any building sign on the secondary façade shall not exceed ½ the width of the primary façade
Residential apartments	Building only	12	1	N/A	N/A	
Billboards						See § 345-46.

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
HC	Highway Commercial					Design standards in § 345-68 shall apply
Permitted uses except service stations	Building (per tenant or store)	10% of the wall to which its attached Side or rear entrance - ½ the area of the primary sign area	1 per primary entrance; 1 per frontage; 1 per side or rear entrance	25% of the height of the wall		
	Freestanding (which only identifies name of center area and/or key tenants	150	1 per multi-user center	25	½ of the required front yard setback	Letter height: 12 inches
	Window	10% of total glazed area of a storefront of any individual window	N/A	N/A	N/A	
Service station	Freestanding	80	1 per frontage	18	10	
	Building	50	1	not to exceed height of roof line	N/A	
	Canopy (including logo)	5 per frontage	1 per frontage	N/A	N/A	
C/A	Commercial/Automotive					Design standards in § 345-68 shall apply

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Service station	Free standing	80	1 per frontage	18	10	
	Building	50	1	not to exceed height of roof line	N/A	
	Canopy (including logo)	5 per frontage	1 per frontage	N/A	N/A	
Permitted uses except service stations	Freestanding	80	1	15	½ of the required front yard setback	
	Building (per tenant)	10% of the wall to which it is attached. Side or rear entrance - ½ the area of the primary sign area	1 per primary entrance; 1 per frontage; 1 per side or rear entrance	Maximum 25% of the height of the wall		
	Window	10% of total glazed area of a storefront or any individual window				
I	Industrial					Design standards in § 345-68 shall apply

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Permitted uses	Building	10% of area of the 1st story of the wall to which it is attached or 200 sq. ft, whichever is less				
	Building on corner lot	300 sq. ft. with no more than 200 sq. ft. facing any one street	3 per frontage			
	Freestanding (Monument only)	80	1	6	½ of the required front yard setback	
PI	Port Industrial					Design standards in § 345-68 shall apply

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Permitted uses	Building	10% of area of the 1st story of the wall to which it is attached or 200 sq. ft, whichever is less	3 per frontage			
	Building on corner lot	300 sq. ft. with no more than 200 sq. ft. facing any one street	3 per frontage			
	Freestanding (Monument only)	80 sq. ft.	1	6	½ of the required front yard setback	
U	University					Design standards in § 345-68 shall apply
Permitted uses	Building	10% of area of the 1st story of the wall to which it is attached or 200 sq. ft, whichever is less	1 per building	N/A		
	Freestanding (if building has a minimum of 10 feet setback) Monument only	50 sq. ft.	1	5	½ of the required front yard setback	

Zone and/or Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
M	Medical					Design standards in § 345-68 shall apply
Permitted uses	Building	10% of area of the 1st story of the wall to which it is attached or a maximum of 50 sq. ft.	1 per building	N/A		
	Freestanding (if building has a minimum of 10 feet setback) Monument only	50 sq. ft.	1	5	½ of the required front yard setback	
G	Government					Design standards in § 345-68 shall apply
Permitted uses	Freestanding (Monument only)	24	1	4	5	
P/OS	Parks/Open Space					Design standards in § 345-68 shall apply
Permitted uses	Freestanding	20	1 per entrance	5		
WPD	Waterfront Planned Development					Design standards in § 345-68 shall apply

Zone and/or Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Townhouses	Nameplate only	1	1	N/A	N/A	Nameplate must be attached to the building
Multi-unit mid-rise apartments	Building only	12	1	N/A	N/A	
Retail, office, marinas, and theatres	Primary façade (building only)	300 sq. ft. or 8% of the first story of that portion of the façade applicable to the non-residential use, whichever is smaller	1 per use			
	Window	No more than 25% of total glazed area of a storefront				
	Secondary façade (building only)	½ the area of the primary façade sign	1 per use			
C	Cemetery					Design standards in § 345-68 shall apply
Permitted uses	Freestanding	20	1 per entrance	6		
H	Historic District					Design standards in § 345-68 shall apply

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Townhouses	Nameplate only	1	1	N/A	N/A	Nameplates must be attached to the building
Schools, houses of worship, governmental uses	Freestanding (monument only) or	20	1	4	½ of required front yard setback	No backlit signage on freestanding or building signage
	Building	20, sum of all signage	2	N/A	N/A	
Bed and breakfast inns	Building	4	1	N/A	N/A	
Commercial	Building (primary façade)	1 sf for each linear foot of frontage	1	N/A	N/A	
	Building (secondary façade)	to match the size of historic sign as documented by site or photograph evidence. If no historic sign, 0.5 sf for each linear foot of secondary storefront	N/A	N/A	N/A	

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Commercial—Cont'd.	Window		N/A	N/A	N/A	Must be metal paint, etched glass, or other treatment approved by HPO for CoNE or HPC for COA
	Projecting Sign	8	1 per façade	N/A	N/A	May project a maximum of 4 ft. from the building. Minimum distance between grade and the bottom of the sign shall be 8 feet; must be hung by brackets
Destination Tourism						Design standards in § 345-68 shall apply

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Permitted uses except service stations	Building (per tenant or store)	10% of the wall to which it is attached. Side or rear entrance - ½ the area of the primary sign area	1 per primary entrance; 1 per frontage; 1 per side or rear entrance	maximum 25% of the height of the wall		
	Freestanding (which only identifies name of center and/or key tenants)	150	1	25	½ of required front yard setback	Minimum letter height: 12 inches
	Window	10% of total glazed area of a storefront or of any individual window				
Service station	Freestanding	80	1 per frontage	18	10	
	Building	50	1	not to exceed height of roof line		
	Canopy (including logo)	5	1 per frontage			
Real Estate Signs						Design standards in § 345-68 shall apply

Use	Type of Signage by District	Max. Area (sq. feet)	Max. Number	Max. Height of Sign from Grade (feet)	Min. Setbacks of Freestanding Signs (feet)	Notes
Residential	Building only	6	1			The lowest portion of the sign shall be no higher than 10 feet above ground level
Non-residential	Freestanding	40 sq. ft. or 3% of the side of the building upon which it is located, whichever is less	1 per frontage			Shall not exceed maximum height of district
	Building	40 sq. ft. or 3% of the side of the building upon which it is located, whichever is less	1 per frontage			Shall not exceed maximum height of district

§ 345-69. Lighting. [Added 10-13-2022 by Ord. No. 22-084]

A. Zoning Standards. The maximum height of freestanding lights shall not exceed the height of the principal building or 25 feet whichever is less.

B. Design Standards.

1. The style of the light and the light standard shall be consistent with the architectural style of the principal building.

2. Lighting shall be adequate but not overly bright. All building entrances shall be well-illuminated.

3. All lighting shall be shielded to confine the illumination spread within the site boundaries.

4. Freestanding lights shall be so located and protected to avoid being damaged by vehicles.

5. All lights shall be shielded to restrict the maximum apex angle of the cone of illumination to 75 degrees from vertical.

6. The following intensity and foot candies shall be maintained:

    a. A minimum average of one foot candle and shall not exceed a maximum average of two foot candles throughout a parking lot.

    b. Maximum at property lines: One-half foot candles.

    c. Sidewalks: A minimum of one foot candle entire length.

7. All wiring shall be laid underground and the lighting fixtures shall be so arranged that the direct source of light is not visible from any adjacent residential area. Glare from light bulbs shall be eliminated through use of diffusers or the equivalent.

§ 345-70. Off-street parking and loading and bicycle parking. [Added 10-13-2022 by Ord. No. 22-084]

A. Automobile Zoning Standards. **[Amended 10-25-2023 by Ord. No. 23-103]**

1. Off-street parking shall not be located between the building and the street.

2. Parking lots are subject to landscaping regulations in § 345-66.

3. Where parking structures front on a public right-of-way, the structure shall be "faced" with commercial or mixed uses on the ground floor.

4. Stilted buildings are prohibited.

5. All off-street parking lots, except those of one- and two-family residences, shall be provided with curbing of poured-in-place concrete, so that vehicles cannot be driven onto required landscaped areas, buffer zones, interior roadways, internal walkways and street rights-of-way so that each parking lot has controlled entrances and exits and proper drainage control. Curbing of poured-in-place concrete shall be located to prevent any part of the vehicle from overhanging the street right-of-way, property line, interior roadways or internal walkways. Vehicular access to street from the parking lot shall be limited to driveways.

6. All parking spaces except those permitted for one- and two-family housing shall be located with access to each space from an aisle.

7. Parking for houses of worship shall meet the standards of their zone. For all houses of worship, one seat shall equal 24 inches of pew/bench space. Houses of worship that do not have seats shall be calculated at a rate of ten square feet of prayer space equaling one seat.

8. Off-street loading facilities shall be located so that no vehicle being loaded or unloaded, maneuvering into a loading space or waiting to be parked into a loading space shall interfere with any traffic flow on a street, sidewalk, parking space, aisle, fire lane, driveway, railroad track or turning area nor shall they occupy any part of required lawn or buffer areas.

9. No parking space shall be less than 18 feet long and eight and one-half feet wide, with the following exceptions:

    a. Valet parking lots, where approved by the Planning Board or the Zoning Board of Adjustment, may have reduced stall and aisle sizes. The project applicant is responsible for demonstrating to the Board that the lot can function and accommodate vehicles as proposed.

b. Compact car spaces, where approved by the Planning Board or the Zoning Board of Adjustment, shall not be less than 16 feet long and eight feet wide. Aisles providing access to parking spaces shall have the following minimum distances. Where the angle of parking is different on both sides of the aisle, the larger aisle width shall prevail.

Angle of Parking Space (degrees)	For Parking Spaces 8—8.5 Wide 1-Way Aisle (feet)	For Parking Spaces 8—8.5 Wide 2-Way Aisle (feet)	For Parking Spaces 9—9.5 Wide 1-Way Aisle (feet)	For Parking Spaces 9—9.5 Wide 2-Way Aisle (feet)
Aisle				
90	24	24	22	22
60	20	22	18	20
45	18	20	15	18
30	15	18	12	18
Parallel	12	18	12	18

10. The number and design of off-street parking and loading spaces shall adhere to the following:

a. Where more than one use is on a lot, the total number of spaces shall be the sum of the component requirements.

b. All loading spaces shall have 15 feet of vertical clearance.

11. Minimum standards for number of off-street loading spaces.

Land Use	At which First Berth is Required (square feet)	At Which Second Berth is Required (square feet) 3 more spaces be calculated at multiples
Manufacturing, processing, assembly, marinas	5,000	40,000
Warehouse, auto/truck sales	5,000	40,000
Storage, shipping	10,000	25,000
Schools	10,000	100,000
Hospitals	10,000	100,000
Terminals and transportation centers	5,000	40,000
Auditoriums	10,000	40,000
Funeral homes/mortuaries	10,000	100,000
Retail	10,000	20,000
Service establishments	10,000	40,000
Indoor recreation	10,000	100,000
Restaurants/ nightclubs	10,000	25,000

Land Use	At which First Berth is Required (square feet)	At Which Second Berth is Required (square feet) 3 more spaces be calculated at multiples
Office building, financial institution and research	10,000	100,000
Hotel/Motel	10,000	100,000

12. Minimum dimensional standards for off-street loading.

A. Overall Length of Berth (feet)	B. Berth Width (feet)	C. Apron Length (feet)	D. Deck Approach (A and C) (feet)
40	10	46	86
	12	43	83
	14	39	79
45	10	52	97
	12	49	94
	14	46	91
50	10	60	110
	12	57	107
	14	54	104
55	10	65	120
	12	62	117
	14	58	113
60	10	72	132
	12	63	123

B. Automobile Parking Design Standards.

1. Curb cuts shall be limited to the minimum number necessary.
2. Parking shall not be the dominant visual element of the site.
3. Parking which is visible from the street or other areas exposed to public view shall be screened and softened by landscaping, low screen walls or a combination of elements.
4. Broad expanses of paving shall be broken up with landscaping.
5. The use of common or shared driveways which provide access to more than one site is encouraged.
6. Parking structures shall be designed to be compatible with the architectural style, building scale, mass, building materials and colors of the principal building and adjacent area. The scale and mass of the parking structure shall be mitigated through wall offsets, arched openings and other distinctive design elements.
7. Cars parked within parking structures and on open top levels shall be screened as much as possible with architectural elements and landscaping.

8. Surface and curbing. All parking and loading areas and access drives shall be paved as outlined below, or the equivalent, and approved as part of the site plan approval. All parking areas regardless of size and location shall be suitably drained and maintained.

9. The provisions of non-residential parking and loading spaces shall include adequate driveway and necessary turning areas for handling the vehicle for which provision is made. Parking and loading spaces shall be designed to permit each motor vehicle to proceed to and from the parking and loading space provided for it without requiring the moving of any other motor vehicle.

C. Bicycle Parking Zoning Standards.

1. The standards below shall apply to all zones, including all redevelopment plans, citywide, and standards shall supersede any standards listed in redevelopment plans.

2. Bicycle parking facilities shall be required, in accordance with the use schedule below, for any new principal structure, addition or enlargement of an existing principal structure in excess of ten percent of the gross floor area (gfa), or for any change in use of an existing structure.

3. Bicycle parking spaces are required as follows:

Use Category	**Required**	
	Outdoor Spaces	**Indoor Spaces**
All residential uses in buildings with 5 or more units		0.5 space per unit
Retail, service, and restaurants 6,000 sf to 20,000 sf	4 spaces per 6,000 sf gfa	
Retail, service, and restaurants greater than 20,000 sf	4 spaces per 15,000 sf gfa	
	80%	20%
Municipal/cultural facilities/community facilities	1 space per 2,000 sf gfa	
	80%	20%
Houses of worship, theaters, and assembly spaces	1 per 20 seats or equivalent	
Office (all types)	1 per 25,000 sf gfa	1 per 10,000 sf gfa
Daycare and elementary school	1.5 spaces per classroom	
Middle and high school	4 per classroom	
College and university	1 space per 10 students or employees, combined	
Hospitals/medical centers	1 per 20,000 sf gfa	1 per 50,000 sf gfa
Manufacturing/production, warehouse	1 per 50,000 sf gfa	
Parking garage or lot	5% of auto parking	
Parks	1 per 5,000 sf	

4. Location and design of facilities.

a. Non-residential bike parking for certain uses must be provided both indoors and outdoors, as indicated in the use schedule above. Indoor parking may include bike lockers or sheds.

b. Requirements for indoor bicycle parking.

1.) Any required indoor bicycle parking/storage room must be located in a convenient and accessible location to a public sidewalk with no more than four vertical steps between the bicycle room and the sidewalk. Ramps and elevators may be utilized to provide access to bike storage not located at the first floor level.

c. Requirements for outdoor bicycle parking

1.) All required outdoor bicycle parking must be convenient and accessible to a main building entrance and street access without climbing stairs.

2.) Bicycle parking shall be sited in a highly visible location, such as within view of passers-by, retail activity, office windows, an attendant or other personnel to discourage theft and vandalism.

3.) Bicycle parking shall be located so as not to block the pedestrian path on a sidewalk or within a site. A minimum of six feet of unobstructed passage is required on public sidewalks.

4.) Parked bicycles are to be oriented parallel to the street and on the curb-side of the sidewalk. In plaza areas, bike parking location(s) and orientation shall be determined by the planning board.

5.) Where a minimum of six feet of unobstructed passage cannot be provided on the sidewalk, then the property shall be exempt from outdoor bicycle parking requirements.

6.) Bicycle parking facilities within an automobile parking area shall be separated by a physical barrier (i.e., bollards, reflective wands, curbs, wheel stops, poles, etc.) to protect bicycles from damage by cars.

7.) Bike racks must be securely attached to concrete footings and made to withstand severe weather and permanent exposure to the elements. Bike racks must permit the bicycle frame and one wheel to be locked to the rack with a high security, U-shaped lock.

8.) All bike racks shall be located at least 24 inches in all directions from a wall, door, landscaping, or other obstruction that would render use of the racks difficult or impractical.

d. Requirements for all bicycle parking.

1.) An aisle or space that is at least five feet wide shall be provided for bicycles and riders to enter and leave the facility.

2.) Site plans shall show the proposed location of bike parking/storage facilities on the site and on the building floor plan design. A construction detail of the bike rack or facilities shall be provided.

§ 345-71. Historic design standards. [Added 10-13-2022 by Ord. No. 22-084]

A. General standards below are considered inclusive and shall be considered in conjunction with the applicable provisions of any subsection of this section.

1. Every reasonable effort shall be made to provide a compatible use for a property that requires minimal alteration of the building structure or site and its environment or to use a property for its originally intended purpose.

2. The distinguishing original qualities or character of a building, structure or site and its environment shall not be destroyed. The removal or alteration of any historic material or distinctive architectural features should be avoided when possible.

3. All buildings, structures and sites shall be recognized as products of their own time. Alterations which have no historical basis and which seek to create an earlier appearance shall be discouraged.

4. Changes, which may have taken place in the course of time, are evidence of the history and development of a building, structure or site and its environment. These changes may have acquired significance in their own right, and this significance shall be recognized and respected.

5. Distinctive stylistic features or examples of skilled craftsmanship which characterize a building, structure or site shall be treated with sensitivity.

6. Deteriorated architectural features shall be repaired rather than replaced wherever possible. In the event that replacement is necessary, the new material shall match the material being replaced in composition, design, color, texture and other visual qualities. Repair or replacement of missing architectural features shall be based on accurate duplications of features substantiated by historical, physical or pictorial evidence rather than on conjectural design or the availability of different architectural elements from other buildings or structures.

7. The surface cleaning shall be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic building materials shall not be undertaken.

8. Every reasonable effort shall be made to protect and preserve archaeological resources affected by or adjacent to any acquisition, protection, stabilization, preservation, rehabilitation, restoration or reconstruction project.

9. When the replacements are made, exterior architectural elements, such as but not limited to windows, doors, and siding, shall be replaced with a style and finish of the period of significance of the building. Use of original materials is preferred.

B. Standards for Protection.

1. Before applying protective measures, which are generally of a temporary nature and imply future historic preservation work, an analysis of the actual or anticipated threats to the property shall be made.

2. Protection shall safeguard the physical condition or environment of a property or archaeological site from further deterioration or damage caused by weather or other natural, animal or human intrusions.

3. If any historic material or architectural features are removed, they shall be properly recorded and, if possible, stored for future study or reuse.

C. Standards for Stabilization.

1. Stabilization shall reestablish the structural stability of a property through the reinforcement of load-bearing members or by arresting material deterioration leading to structural failure. Stabilization shall also reestablish weather resistant conditions for a property.

2. Stabilization shall be accomplished in such a manner that it detracts as little as possible from the property's appearance. When reinforcement is required to reestablish structural stability, such work shall be concealed wherever possible so as not to intrude upon or detract from the aesthetic and historical quality of the property, except where concealment would result in the alteration or destruction of historically significant material or spaces.

D. Standards for Preservation.

1. Preservation shall maintain the existing form, integrity and materials of a building, structure or site. Substantial reconstruction or restoration of lost features generally are not included in a preservation undertaking.

2. Preservation shall include techniques of arresting or retarding the deterioration of a property through a program of ongoing maintenance.

E. Standards for Rehabilitation.

1. Contemporary design for alterations and additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant historic, architectural or cultural material and such design is compatible with the size, scale, color, material and character of the property, neighborhood or environment.

2. Wherever possible, new additions or alterations to structures shall be done in such a manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the structure would be unimpaired.

F. Standards for Restoration.

1. Every reasonable effort shall be made to use a property for its originally intended purpose or to provide a compatible use that will require minimum alteration to the property and its environment.

2. Reinforcement required for structural stability or the installation of protective or code-required mechanical systems shall be concealed whenever possible so as not to intrude or detract from the property's aesthetic and historical qualities, except where concealment would result in the alteration or destruction of historically significant materials or spaces.

3. When archeological resources must be disturbed by restoration work, recovery of archeological material shall be undertaken in conformance with current professional practices.

G. Standards for Reconstruction.

1. Reconstruction of a part or all of a property shall be undertaken only when such work is essential to reproduce a significant missing feature in a historic district or site, and when a contemporary design solution is not acceptable.

2. Reconstruction of all or part of a historic property shall be appropriate when the reconstruction is essential for understanding and interpreting the value of a historic district or when no other building, structure, object or landscape feature with the same associative value has survived and sufficient historical documentation exists to ensure an accurate reproduction of the original.

3. The reproduction of missing elements accomplished with new materials shall duplicate the composition, design, color, texture and other visual qualities of the missing element. Reconstruction of missing architectural features shall be based upon accurate duplication of original features, substantiated by historical, physical or pictorial evidence rather than upon conjectural designs or the availability of different architectural features from other buildings.

4. Reconstruction of a building or structure on an original site shall be preceded by a thorough archaeological investigation to locate and identify all subsurface features and artifacts.

5. Reconstruction shall include measures to preserve any remaining original fabric, including foundations, subsurface and ancillary elements. The reconstruction of missing elements and features shall be done in such a manner that the essential form and integrity of the original surviving features are unimpaired.

H. Standards for New Construction.

1. In considering whether to approve or disapprove an application for a permit for new construction in an historic district, the Commission shall be guided by standards of the Secretary of the Interior and the following compatibility standards.

2. New construction need not replicate historic older buildings or structures, but may reflect contemporary design standards so long as the design and construction is compatible with surrounding historic structures. Building height, width, mass and proportion affect the degree of compatibility between the old and the new.

a. Site and setting. A developer intending to utilize a historic resource as a part of a development must consider the context of the resource's original site by honoring the original historic intention of said resource and integrating it respectfully into the new development. Design elements shall have compatible rhythm and repetition with an emphasis on historically compatible materials and colors.

b. Building height. Height shall be visually compatible with adjacent buildings. The apparent physical size, scale and height shall relate to existing resources.

c. Openings on frontal façades. The width and height of windows, doors and entries must harmonize in scale and proportion with the width and height of windows, doors and entries of buildings and structures of historic significance in the surrounding environment.

d. Relationship of unbroken planes to voids (i.e., punctured planes) in front façades. The relationship of unbroken planes (i.e., walls) to voids (i.e., windows and doors) on the façade of a building or structure shall be aesthetically harmonious with that of buildings and structures of historic significance in the surrounding environment.

e. Relationship of vacant land to buildings/structures. The relationship of a building or structure to the vacant land between an adjacent building or structure shall not violate the existing paradigmatic spatial relationship of historically significant structures to the vacant land between said structures and adjoining buildings. The building mass in large architectural projects can be varied in form by using setbacks to create open spaces and landscaping when desirable to provide harmonious visual transitions between new construction and the adjacent historic properties.

f. Relationship of exterior projections to the street. The relationship of exterior projections to the street in new construction shall be aesthetically harmonious with the relationship of exterior projections to the street in the surrounding existing buildings of historic significance.

g. Relationship of major exterior building materials. The major exterior building materials on the façade of a building or on a structure shall reflect the predominant major building materials existent on the façades of historically significant buildings and on structures in the surrounding environment.

h. Roof forms. The roof form and slope of a building or structure is a major element in the visual image of the building. Therefore, designers must take care to honor paradigmatically in new construction the existing historic roof forms and slopes so as not to violate the aesthetic harmony of the whole.

i. Continuity in visual imagery of appurtenances. Appurtenances of a building or structure such as walls, fences and landscaping shall honor the relationship of appurtenances to buildings of historic significance in the surrounding environment.

j. Scale of buildings. The scale of buildings and structures shall be in scale with the buildings and structures of historic significance.

k. Signage. Signs which are out of keeping with the character of the environment in question shall not be used. Excessive size and inappropriate placement on buildings results in visual clutter and shall be designed to relate harmoniously to exterior building materials and colors. A good sign shall express a simple clear message with wording kept to a minimum.

l. Site planning. The site planning of landscaping, parking facilities, utility and service areas, walkways and appurtenances must reflect the site planning of landscaping, parking facilities, utility and service areas, walkways and landscape features reticulate to buildings or structures of historic significance.

m. Accessory garage design. All garage façades shall be in character with the immediate surrounding historic properties and must be compatible with the significant historic features and characteristics of the façades and streetscape of the immediate block front on which the proposed structure is located as well as the block front directly across the street.

n. Off-street parking. All required off-street parking shall be enclosed, and the enclosure shall be in character with the design of the immediate surrounding historic structures as outlined in this chapter. Such parking shall be designed so as to be at least 50 percent below grade and covered and shall be located entirely under the building where feasible, but, if located within the rear yard area, at least 50 percent of the entire yard area, including the garage rooftop area, shall consist of landscaping which may be a combination of grass, groundcover and shrubs, and the remaining area shall be covered with decorative brick or concrete payers, or comparable, durable materials.

I. Relocation of a Landmark or Building, Object or Structure Located in a Historic District. In considering whether to recommend, approve or disapprove an application for a permit to relocate a building, object or structure designated a historic landmark or located in a historic district, the Commission shall be guided by the following considerations:

1. The historic character and aesthetic interest the building, structure or object contributes to its present setting.

2. Whether there are definite plans for the area to be vacated and what the effect of those plans on the character of the surrounding area will be.

3. Whether the building, structure or object can be moved without significant damage to its physical integrity.

4. Whether the proposed relocation area is compatible with the historical and architectural character of the building, object or structure.

J. Demolition.

1. The following shall be considered in regard to an application to demolish an individual landmark building, structure, site or object or any building, structure, site or object contained within a historic district:

a. Its historic, architectural and aesthetic significance.

b. Its use.

c. Its importance to the city and the extent to which its historic or architectural value is such that its removal would be detrimental to the public interest.

d. The extent to which it is of such old, unusual or uncommon design, craftsmanship, texture or material that it could not be reproduced or could be reproduced only with great difficulty.

e. The probable impact of its removal upon the ambience of the historic district.

f. The structural soundness and integrity of the building so as to comply with the requirements of the state uniform code.

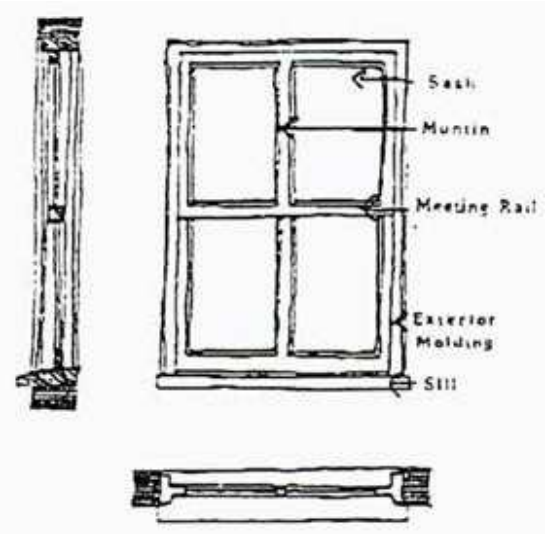
g. The effect on the remaining portion of the building, structure, site, object or landscape feature in cases of partial demolition.

2. In the event that the structure is unsafe or unsound so as to impose a danger to health or safety, the power and authority of the City of Jersey City to demolish the structure, as otherwise provided by law, shall not be impaired or altered in any way by the provisions of this chapter. The city shall be exempt from making an application to the Commission but shall notify the Commission prior to the demolition.

3. If an application to demolish is denied, the applicant shall follow the appeal process detailed herein for denial of certificates of appropriateness.

K. Other Guidelines. The commission shall utilize locally generated guidelines or historic preservation aids in addition to the Secretary of Interior's Standards.

L. Additional Regulations for Alterations and Additions to Buildings and New Construction.



1. Windows.

a. Repair. Deteriorated windows can often be repaired and made sound and fully operational. A certificate of no effect is required to undertake ordinary repairs including:

i. Replacing or rebuilding any parts of a window such as the sill and portions of the sash and frames using the same material and with the same configuration, shape and dimension.

ii. Scraping, priming and repainting of window sash and/or frame.

iii. Consolidating wood members with cellulose wood fillers or chemical materials. Change in shape, size or configuration require a certificate of appropriateness.

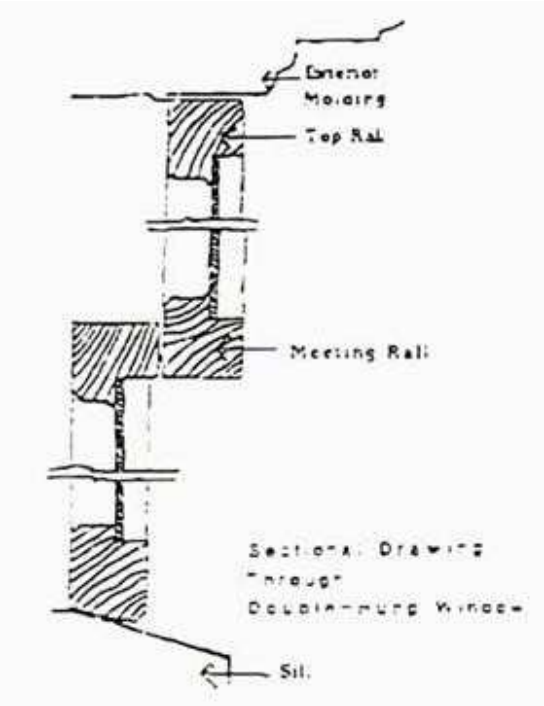
b. Replacement.

i. If historic windows have deteriorated to a point precluding repair, rehabilitation or restoration, based on documentation submitted by the applicant, or a field inspection by the Historic Preservation Officer, replacement windows may be approved under a certificate of no effect if they match the historic windows in terms of configuration, operation, details, material and finish. Variations in details will be permitted if such variations do not significantly affect the visual characteristics of the historic window, including the shadow effect of muntins and sash on the glazing. In evaluating "significant" effect, other factors to be considered shall be the age of the building and its architectural quality, as well as the extent of reduction in the total glazed area of the proposed sash compared to the existing sash. For narrow wood windows (less than 15 inches wide), the reduction shall be limited to ten percent; for wood windows, 15 inches or wider, the reduction shall be limited to six percent; for metal double-hung windows (of any size), the reduction shall be limited to ten percent.

ii. In buildings less than 30 years old, the replacement windows need not match the historic window in terms of materials. The finish, however, must match the finish of the original windows. On secondary façades, windows which are visible from a public thoroughfare need only match the historic windows in terms of configuration and finish.

iii. Proposals for replacement windows which do not meet these conditions will require a certificate of appropriateness.

c. Storm windows. The installation of exterior storm windows will be granted a certificate of no effect providing they meet the following conditions:



i. Exterior storm windows shall fit tightly within window openings without the need for a subframe or panning around the perimeter.

ii. The color of the frames of the storm windows shall match the color of the primary window frame.

iii. Glazing shall be clear.

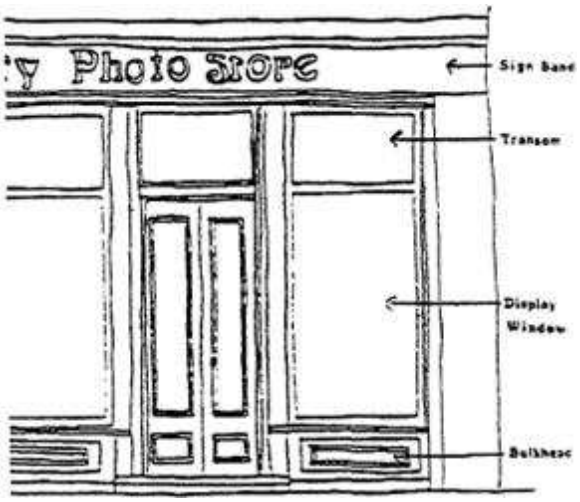
iv. The storm sash shall be set as far back from the plane of the exterior wall surface as is practicable.

v. Muntins shall not be permitted.

vi. Meeting rails may be used only in conjunction with double-hung windows and shall be placed in the same relative location as in the primary sash.

d. Supporting documentation. Applications for replacement windows must include photographs and dimensioned drawings of the existing condition of the windows. In addition, manufacturer's catalogue cuts or full or half-scale drawings of the proposed windows with comparative dimensions, details of construction and configuration and color and finish samples are required. Proposals for a change in material shall include a material sample.

2. Storefronts.



a. Repair.

i. Every effort should be made to retain and repair historic storefronts as well as significant surviving fragments of historic storefronts. While a non-original historic storefront may differ in style from the original building, it reflects the shifts in popular taste and documents the changes over time within an historic district and should be treated with sensitivity.

ii. A certificate of no effect is required for ordinary repairs to existing storefronts, both historic and non-historic. This would include replacing deteriorated, damaged or missing features with matching components and painting or refinishing.

iii. Changes in design or configuration of an historic storefront requires a certificate of appropriateness.

b. Replacement.

i. If replacement of a storefront is necessary, the design of the new storefront should reproduce the historic storefront in terms of its configuration, materials, placement, proportions and extent of glazed area. The design of the replacement store front may be based on surviving historic storefronts elsewhere on the building or another identical building, or on documentary evidence such as original architectural drawings or old photographs.

ii. In cases where the historic storefront has been replaced and there is no extant historic storefront elsewhere on the building, nor on another identical building, and no documentary evidence can be found, a contemporary design is permissible and should meet the following criteria:

(A) It fits entirely within the existing storefront opening(s);

(B) It incorporates any architecturally and/or historically significant surviving fragments of an historic storefront;

(C) It is compatible with the original materials and colors of the upper floors; and

(D) It includes traditional storefront elements (i.e. transoms, glass display windows, low bulkheads, recessed entrance, signband) which are appropriate to the age and style of the building.

iii. All applications for new storefronts require a certificate of appropriateness.

c. Signage. In accordance with other provisions in this chapter (See 345-68 and 345-71.M).

d. Awnings. Awnings are permitted on storefronts and should meet the following conditions: The awning is a retractable type with a sloped profile (exception may be made for buildings less than 30 years old and non-historic storefronts);

i. The metal frame is covered with canvas fabric in an historically appropriate color and pattern to the building and the historic district;

ii. Lettering on the awning is limited to the skirt; however, logos may be printed on the sloped portion of the awning;

iii. The awning frame is attached to the building in such a way that it does not destroy or cause irreversible damage to significant architectural features;

iv. The awning fits within the storefront opening and has the same shape as the opening.

e. Security gates.

i. Security gates should be installed in the interior of all storefronts and should be of the open-link variety. If new storefronts are to be installed, or in cases where the historic storefront had external security gates, the gate tracks should be recessed into the glazing reveal and the gate housing should be flush with the plane of the storefront, and should be contained within a plenum space above the storefront or behind a transom panel or signage panel. The gate housing, tracks or mechanical boxes should not protrude from the plane of the storefront or be apparent. Exterior scissor-type gates are also acceptable.

ii. Applications for open link interior security gates require a certificate of no effect. Applications for all other security gates require a certificate of appropriateness.

f. Supporting documentation. Applications for replacement storefronts must include photographs of the existing storefront, to scale drawings of the proposed storefront, signage, awning and/or security gates (elevation, sections and full or half-scale details), and materials and color samples.

3. Additions.

a. Rear yard additions.

i. A certificate of no effect will be granted for applications for rear yard additions which meet the following criteria:

(A) The proposed addition is not visible from a public thoroughfare or right-of-way.

(B) The addition will not extend to the rear lot line, nor substantially eliminate the presence of a rear yard.

(C) Other rear yard incursions exist within the block.

(D) The proposed work complies with the Historic Zoning District regulations and will not require a variance.

(E) The rear addition does not rise to the full height of the building.

(F) The existing rear façade will not be removed from the entire width of the building. Instead, existing openings will be modified to provide access into the addition. (This approach retains original building fabric and reduces structural intervention.)

ii. Applications for rear yard additions which do not meet the criteria will most likely require a certificate of appropriateness. For proposed additions which will be visible from a public thoroughfare or right-of-way, the Commission will consider the effect of the addition on any significant architectural features on the building's rear façade, and the scale and architectural character of the addition's façade in relation to the building's front façade.

b. Rooftop additions. A certificate of no effect will be granted for applications for rooftop additions which meet the following criteria:

i. The addition consists of mechanical equipment, egress or mechanical bulkheads or utilitarian skylights only; or the addition consists of living space and complies with the Historic Zoning regulations.

ii. The roof of the subject building is not a significant feature of its design.

iii. The addition is not visible from a public thoroughfare or right-of-way.

iv. If the building possesses a significant roof silhouette, the addition does not interrupt the roof or skyline.

v. The materials of the addition are in the nature of utilitarian rooftop accretions and are in keeping with the existing roofscape.

vi. The addition does not adversely affect the significant ensemble of buildings by creating a distracting element in an otherwise uniform roofscape.

vi. The addition does not adversely affect the significant ensemble of buildings by creating a distracting element in an otherwise uniform roofscape.

vii. Applications for rooftop additions which do not meet the above criteria will most likely require a certificate of appropriateness.

c. Supporting documentation. Applications for rear yard or rooftop additions must include photographs of the existing buildings (including rear façade for rear additions), individually and in the context of the neighborhood, to-scale floor plans, elevations and sections of the building and addition, to-scale sight line drawings for rooftop additions, a site plan of the entire block for rear yard additions, full or half scale details of windows, doors and decorative trim, materials and color samples.

4. Restoration.

a. A certificate of no effect will be granted for applications for the restoration of a building or building façade features (such as stoops, cornices, window and door openings and enframements) to their historic appearance when the following criteria are met:

i. The restoration would not cause the removal of non-original historic building fabric (i.e., Victorian Period features on an early 19th Century structure).

ii. The restoration is based on documentation such as:

(A) Physical evidence on the building;

(B) Original drawings;

(C) Old photographs;

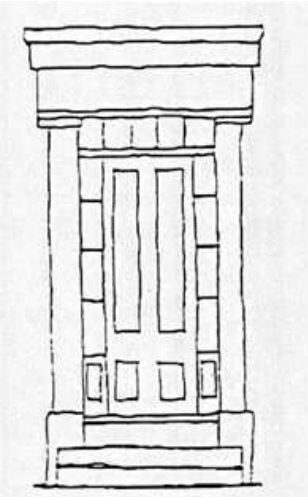
(D) An identical building.

iii. The restored features match the texture, color, profiles, details and dimensions of the original feature.

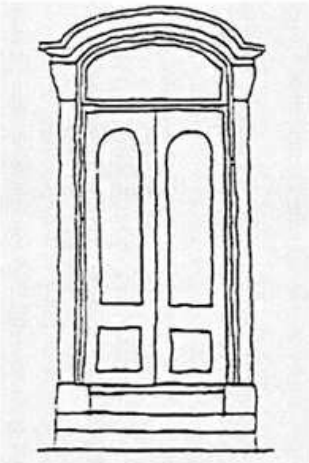
iv. Restoration work which does not conform to the above criteria will require a certificate of appropriateness.

v. Supporting documentation for restoration work shall include photographs of the existing conditions, documentation upon which the restoration is based, and the materials and methods proposed by the contractor in the form of specifications, a contract, or a letter.

5. Exterior doors (primary façades).



Greek Revival Style Entrance



Italianate Style Entrance

a. Repair. Repair of historic doors including stripping, refinishing, replacing deteriorated parts-in-kind, replacing hardware matching the original, and replacing glazing in-kind, requires a certificate of no effect.

b. Replacement. Historic doors may not be removed, unless beyond repair. A certificate of no effect will be granted for replacing deteriorated historic doors or non-historic doors with new doors which match the historic doors. A certificate of appropriateness will be required for the following:

i. New doors which do not match the historic doors;

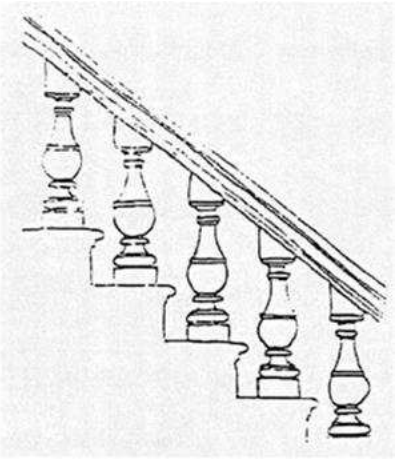
ii. Enlarging or reducing the existing door opening;

iii. Replacement doors of a different configuration than the historic doors;

iv. Alterations to historic doors which significantly affect their appearance.

c. Supporting documentation. Applications for replacement doors must include photographs of the building and the existing door showing deterioration, documentation of the historic doors if available, to scale drawings of the proposed doors within the opening (elevations and sections), and a finish sample.

6. Ironwork.



a. Fences and railings. A certificate of no effect will be granted for the following:

i. Ordinary repairs to existing fence and railings.

ii. Replacement of missing, non-historic or severely deteriorated historic fences and railings providing that the new ironwork matches the historic ironwork based on documentation such as historic photographs, extant examples on identical buildings, or remnants of the historic ironwork.

iii. A certificate of appropriateness is required for the following:

(A) Replacement ironwork which does not match the historic fence and/or railing.

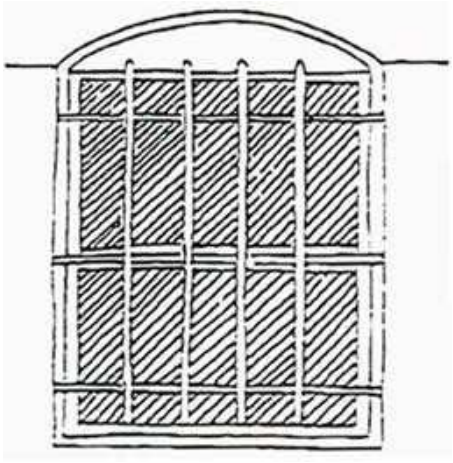
(B) The installation of a fence or railing in a location which historically had no ironwork.

(C) Alterations to or removal of historic fences and railings.

(D) In instances where historic fences and/or railings have been removed or replaced and no documentation of the historic ironwork is available, the Commission recommends either a design which is stylistically compatible with the building or a simple contem-

porary design which is not intrusive to the special architectural and historic character of the building and the streetscape. Both alternatives require a certificate of appropriateness.

b. Window and door security gates.



i. A certificate of no effect will be granted for the installation of exterior window and/or door security gates providing they are existing features of the building and the proposed gates do not detract from the historic and architectural character of the building.

ii. A certificate of appropriateness will be required for the installation of window and/or door security gates if none exist. The proposed gates should meet the following criteria:

(A) A simple design.

(B) Conform to the shape of the opening.

(C) Be mounted within the opening.

(D) Have no frame (window gate).

iii. Exterior window gates are not permitted above the first floor on the front façade, which shall not be construed to mean the parlor floor (see definition of parlor floor). Window gates which accommodate air conditioner units should have simple boxes or holes rather than more elaborate curved protrusions, unless the latter is appropriate to the building's architectural character.

c. Supporting documentation. Applications for new ironwork must include photographs of the building, both present and historic, dimensioned drawings of the proposed ironwork (elevation and full or half-scale section), a site plan showing extent of ironwork (only for installations proposed in locations where no ironwork presently exists).

7. Residential awnings.

a. Awning installation on residential buildings require a certificate of appropriateness and should meet the following criteria:

   i. The awnings are retractable;

   ii. The metal frame is covered with canvas fabric in an historically appropriate color and pattern for the building and the historic district;

   iii. The awnings fit within the window and/or door openings and have the same shape as the openings;

   iv. The awning frames are attached to the building in such a way that they do not destroy or cause irreversible damage to significant architectural features.

b. Supporting documentation for applications for residential awnings must include present and historic photographs of the building, to scale drawings (elevation and section) of the installation, and a material and color sample.

8. Commercial awnings.

   a. The installation of a commercial awning requires a certificate of appropriateness and should meet the following criteria:

      i. The metal frame is covered with canvas fabric in an historically appropriate color and pattern for the building and the historic district.

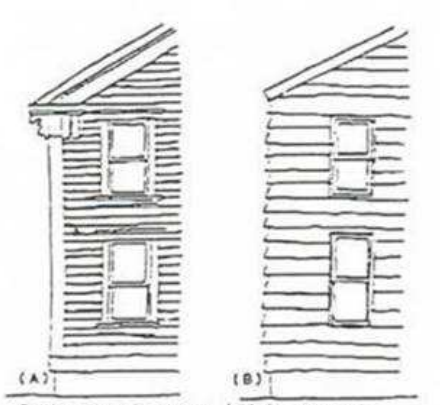
      ii. The awning frames are attached to the building in such a way that they do not destroy, conceal from view, or cause irreversible damage to significant architectural features.

      iii. The awning is an appropriate size for storefront.

      iv. The awning lettering should be limited to the name of the business and address. A brief description of the business may be acceptable.

b. Supporting documentation for applications for commercial awnings must include present and historic photographs of the building, to scale drawings of the installation including lettering and a material and color sample.

9. Imitation cladding.



Siding installations: (A) is properly designed and installed, (B) is not

a. Vinyl and aluminum siding. The Commission discourages the use of vinyl or aluminum siding on historic buildings. These materials are not permitted on masonry buildings. On buildings which have existing vinyl or aluminum siding, individual units may be replaced with matching materials if necessary following the issuance of a certificate of no effect. On buildings with wood clapboard siding and/or shingles, the Commission encourages retention of the historic material or replacement with matching materials.

b. If an applicant chooses to apply for aluminum or vinyl siding, a certificate of appropriateness is required.

c. Imitation facing. The Commission discourages the application of imitation stone or brick facings. On buildings which have existing imitation stone and brick facings, ordinary repairs and repainting may be performed following the issuance of a certificate of no effect. One exception is a refacing of a severely deteriorated brownstone façade with a cementitious mix tinted to match the color of brownstone. Such work will be granted a certificate of no effect providing it meets the following criteria:

i. The existing brownstone surface is exfoliating, damaged or otherwise unsound (as documented in photographs).

ii. The proposal calls for the replication of the original texture, color profiles and details.

iii. The proposed calls for damaged stone to be cut back to sound stone and the new surface to be keyed into the sound stone and built up in successive layers using a cementitious mix with the top layer tinted and finished to match the original brownstone texture and color. In some cases, a sample patch may be requested for inspection and approval by the Historic Preservation Officer.

iv. The use of wire lath is prohibited.

10. New window openings.

a. A certificate of no effect will be granted for new window openings when the following criteria are met.

i. The proposed window openings are located on a secondary façade.

ii. The new window openings and sash retain the same shape, dimensions and configuration as the building's existing windows.

iii. The new lintels and sills match the design, color, and texture of other window openings on the façade.

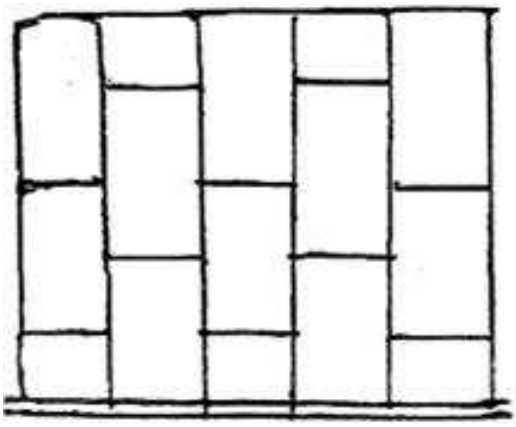
iv. The location of the new openings are consistent with the existing pattern of bays.

v. The new openings do not detract from any significant historic architectural features on the building.

vi. Proposed new window openings which do not meet all of the above criteria will require a certificate of appropriateness.

b. Supporting documentation for applications for new window openings must include photographs of primary and secondary façades and a to scale elevation of the façade(s) indicating the proposed new openings.

11. Sidewalk repair and replacement.



a. Repairs of less than 50 percent of existing sidewalk.

i. For repairs, the replacement units should be of like material and color to match the existing sidewalk. Intact blue stone paving must not be removed and discarded. Intact blue

stone which has moved due to the thrust of tree roots or the freeze and thaw cycle and that presents a safety hazard to pedestrians, should be carefully removed and reset in sand, quarry, dust or dirt.

b. Replacement of more than 50 percent. In the case of stone paving such as blue stone, the replacement units should be of the same material, shape, and size as the existing stone paving.

i. When the previous material is concrete, then blue stone or colored concrete must be used. Colored concrete after curing should be Scofield charcoal gray or equivalent. The texture of the concrete should be made smooth with a wood float in order to create a texture more like blue stone. The sidewalk should cure without fine finishing and lines should be scored without edging. Corners (intersections) need to meet ADA standards and sloped areas (re: driveways or ramps) should have a light broom finish for traction.

c. Not acceptable. New sidewalks of white or natural concrete of more than 50 percent, irregular "patio" styles and varying colors with great contrast are not acceptable. Patio styles that are historically appropriate or create the appearance of blue stone are acceptable, but subject to approval by the historic preservation officer.

d. Curbs. Existing stone curbing should not be removed in sidewalk repair, with the exception of new handicapped curb cuts at street corners. If new curbing is required, replacing concrete curbs or at handicapped cuts, they should be poured concrete and meeting city standards for dimensions. The color should be French gray. Matching the color mixture of the sidewalks.

e. Supporting documentation for applications for sidewalk repair and/or replacement must include photographic documentation of existing conditions and a dimensioned sketch of the proposed paving pattern.

M. Signs.

1. All signs shall reflect the historic character of the area of the proposed sign placement and will respect the size, scale and mass of the façade, building height and rhythms and sizes of windows and door openings.

2. No signs shall be back-lighted.

3. Projecting signs shall be permitted in accordance with Section 345-68.

4. All signs within the historic district require a certificate of appropriateness, except that applications for unlit interior window signage only shall require a certificate of no effect.

§ 345-72. Design standards: Recommended and not recommended. [Added 10-13-2022 by Ord. No. 22-084]

A. One- and two-family/Multi-Family Attached.

1. Residential recommended.

a. Attractive mature streetscape;

b. Scale, orientation, and style consistent with adjacent development;

c. On-street parking;

d. Street trees small but detailed front yard.

2. Residential not recommended.

a. Fenced front yard resembles an "auto compound" and creates a commercial atmosphere;

b. Excessive curb cut width and expansive concrete areas;

c. No clear sense of unit entries;

d. No street trees or landscaping.

3. Residential not recommended.

a. Building mass dominates because of lack of offsets and poor relationship between window size and façade area;

b. Continuous drop curb limits on street parking;

c. Proximity of overhead doors to road limits visibility and requires maneuvering in the right-of-way;

d. Lack of street trees and landscaping;

e. Garage doors dominate façade.

4. Residential not recommended.

a. Lack of architectural detail;

b. Lack of interest at street level;

c. Incompatible siding materials;

d. Poor integration between architecture and streetscape;

e. No landscaping or street trees.

B. Multi-Family Residential—Mid-Rise/High-Rise.

1. Residential recommended.

a. Maintain consistent heights/setbacks;

b. Consistent architectural theme;

c. Subtle variation of color and detail;

d. Pattern of windows/doors is consistent;

e. No visible off street parking;

f. Street trees and foundation plantings.

2. High-rise residential recommended.

a. Building oriented to streetscape;

b. No excessive setbacks;

c. Parking is not a dominant visual element;

d. Architecturally interesting structure with "human" scale lower level;

e. Enhanced streetscape with materials compatible with structure;

f. Appropriate landscape treatment;

g. Good transition between public and private uses.

3. Residential not recommended.

a. "Tower in the park" is discouraged;

b. Massive structures in a sea of surface parking;

c. No mans land creates excessive distances between buildings;

d. Slab buildings devoid of architectural interest;

e. Lack of landscaping further compounds bleak character.

C. Fencing.

1. Fencing lot recommended.

a. High quality materials;

b. Architectural details;

c. Color, materials and landscaping softens impact;

d. Area inside fencing is partially screened by plantings, green buffer in front of fence.

2. Fencing not recommended.

a. No landscaping or buffer;

b. Harsh, unsoftened elements, stark white wall, high chainlink fencing topped with knife wire.

D. Streetscape.

1. Streetscape recommended.

a. Unified design theme;

b. Attention to details;

c. Consistent setbacks of retail display windows and recessed entries;

d. Cornice signage;

e. Fabric awnings of consistent design.

2. Streetscape not recommended.

a. Lack of pedestrian amenities such as landscaping and street furniture;

b. Solid metal security gates over retail windows;

c. Disjointed signage-various styles, sizes, and sign heights oriented to vehicles;

d. Nondescript street lighting.

E. Public Space.

1. Public spaces recommended.

a. Comprehensive amenity plan;

b. Ample seating;

c. Seasonal shading with full canopy provides weather protection for seating area;

d. Intimate, socially intensive space.

2. Public spaces not recommended.

a. Expansive, paved unusable area;

b. Lack of visual interest (public art, fountain, or planting beds, etc.);

c. No seating;

d. Little or no landscaping;

e. Discourages use of space for social interaction.

F. Commercial.

1. Corner commercial recommended.

a. Building wraps corner and reflects building design;

b. Storefront visible from two façades;

c. Scale is pedestrian;

d. Signage is pedestrian oriented;

e. Architectural details provide interest.

2. Corner commercial recommended.

a. Architectural features are enhanced by design treatment;

b. Windows on two façades wrapping corner;

c. Fabric awnings;

d. Pedestrian scale and signage.

3. Corner commercial not recommended.

a. Visual clutter;

b. Excessive window coverage;

c. Nonconforming advertising banner;

d. Obscures original architectural details of building.

4. Commercial recommended.

a. First floor use integrated with streetscape;

b. Room for first floor retail to provide vitality to pedestrian realm.

5. Commercial not recommended.

a. Setback from street destroys pedestrian realm — parking should be in back of building or on street;

b. Lack of roof treatment makes building "float";

c. Lack of connection to surrounding buildings;

d. Parking area not landscaped;

e. Exposed trash area.

G. Drive Thru Commercial.

1. Drive thru recommended.

a. Drive thru area screened from street;

b. Foundation plantings part of comprehensive landscape and screening plan.

2. Drive thru recommended.

a. Service area extension of building architecture;

b. Fencing and landscaping coordinated to provide transition from parking area to pedestrian area;

c. Signage integrated into architecture.

3. Drive thru not recommended.

a. Drive thru area not integrated into architectural design;

b. No landscaping of parking area; no screening or decorative fencing;

c. Building "floats" in a sea of parking;

d. Pedestrian access not integrated into streetscape.

4. Drive thru not recommended.

a. No landscaping to complement architecture;

b. Lack of architectural detail, large blank walls;

c. No street trees or parking lot screening;

d. No provisions for internal pedestrian circulation.

H. Parking.

1. Parking recommended.

a. Seamless integration of parking use and streetscape;

b. Street trees soften impact of lighting on surrounding buildings.

2. Parking recommended.

    a. Street trees provide second buffer so pedestrian environment is greened on both sides.

3. Parking not recommended.

    a. Parking in front of building creates a pedestrian hostile environment with no visible pedestrian access;

    b. Lack of landscaping creates harsh, barren appearance and no buffer between parking area and pedestrian environment;

    c. Signage on fence and freestanding area geared to vehicular traffic and not oriented to pedestrian neighborhood/commercial district where it is located.

4. Parking garages recommended.

    a. Design masks use — garages outwardly resemble an office building;

    b. Minimal curb cuts encourage pedestrian flow;

    c. Garages should make provisions for first floor retail shops when built to sidewalk;

    d. Landscaping and trees buffer use from pedestrian and residential environment.

5. Parking garages not recommended.

    a. Large blank wall destroys vitality of pedestrian realm;

    b. First floor retail or office uses above should surround and mask garage when built to front lot line on commercially zoned streets.

I. Industrial.

1. Industrial recommended.

    a. Internal use screened through high end materials like decorative fencing and landscaping;

    b. High decorative, spiked fence provides security without being visually detracting;

    c. Use of uniform, decorative lighting fixtures create attractive streetscape along narrow sidewalk.

2. Industrial recommended.

    a. Comprehensive design of parking, signage, security and landscaping creates an inviting entrance;

    b. Use of landscape island at vehicular entrance to separate traffic flow provides attractive traffic calming element;

c. Deciduous landscaping partially screens industrial building from building view.

J. Neighborhood Commercial.

1. Neighborhood commercial recommended.

a. On street parking, no curb cuts to interrupt pedestrian flow;

b. Mixed-use;

c. Large display windows on first floor;

d. Limited window signage, uniform signband in scale with storefront;

e. Uniform standardized signage coordinated with architecture;

f. Vestibule provides transition from public to private space.

2. Neighborhood commercial recommended.

a. No curb cuts, on street parking provides a wall to shield pedestrians from traffic;

b. Awnings unify separate buildings to create a smooth transition between buildings;

c. Uniform colors and signband also create unity of appearance;

d. Limited window signage allows pedestrian to see in;

e. Scale of signage conforms to scale of storefront architecture.

3. Neighborhood commercial recommended.

a. Coordination of streetscape elements furniture, bike racks, paper boxes;

b. On street parking, no curb cuts interrupting pedestrian flow.

4. Neighborhood commercial recommended.

a. "Open door" achieved through big window allows interior activity to mix with sidewalk to create a vibrant streetscape;

b. Outdoor dining provision adds to dynamic sidewalk.

5. Neighborhood commercial not recommended.

a. Excessive signage gives "low-rent" appearance;

b. Lack of connection to streetscape through use of opaque materials;

c. Uninviting for pedestrians—cannot see activity in window openings;

d. Colors and materials incompatible with above architecture.

K. Utilities.

1. Utilities recommended.

a. Machinery set back from public view;

b. Architectural fencing provides screening and works in conjunction with landscaping to form buffer;

c. Use of brick enclosure creates uniform and harmonious architectural/color/material scheme.

2. Utilities not recommended.

a. Interior workings on public display;

b. Machinery too close to public space;

c. No space for landscape buffering and screening;

d. Chain link fence does not provide screening and adds to industrial appearance;

e. No street trees.

L. Highway Commercial.

1. Highway commercial not recommended.

a. Commercial appearance needs to be softened through architectural details like fencing, walls and landscaping.

2. Highway commercial not recommended.

a. Multiple signs and banners create visual confusion and degrade the area;

b. Lack of landscaping to soften lights and noise.

3. Highway commercial not recommended.

a. Overuse of site allows business to borrow public realm for display and storage;

b. No definition between end of business and sidewalk through low walls or landscaping.

4. Highway commercial not recommended.

a. Large open parking areas destroy neighborhood vitality;

b. Frequent curb cuts make for a dangerous pedestrian experience.

M. Conversions.

1. Conversion recommended.
    a. Respect for architectural context;
    b. Mixed use with first floor retail and office/housing on upper floors.
2. Conversion not recommended.
    a. Blank walls;
    b. No architectural detail;
    c. No screening of mechanical equipment and meters;
    d. No fenestration.
3. Conversion not recommended.
    a. Removal of original windows destroys first floor vitality and historic features;
    b. Material mismatch removes architectural context.
4. Conversion not recommended.
    a. Functional mismatch of building materials;
    b. Breaks continuous building wall by not respecting established window and door pattern.

§ 345-73. Alcoholic beverages and tobacco product advertisements. [Added 10-13-2022 by Ord. No. 22-084]

No person may place any form of advertising that advertises alcoholic beverages or tobacco products on any billboard, on any front, rear, side or rooftop of any building, or on any free standing billboard or signboard within 1,000 feet of an elementary or secondary school, or where otherwise prohibited by law.

ARTICLE VI
Stormwater Control

[Added 4-11-2007 by Ord. No. 07-056]

§ 345-74. Stormwater control. [Amended 8-8-2007 by Ord. No. 07-133; 5-20-2009 by Ord. No. 09-052; 2-10-2021 by Ord. No. 21-005]

§ 1. Scope and purpose:

A. Policy statement. As Jersey City is developed, additional Impervious Surfaces are added throughout the Municipality. These Impervious Surfaces disrupt the natural flow of the watershed, resulting in increased amounts of Stormwater Runoff during precipitation events. Stormwater Runoff collects

Pollutants as it flows over parking lots, roadways, rooftops, and other paved or hardened surfaces, through Stormwater conveyances, and into our rivers. In addition to conveying Pollutants into our waterbodies, increased Stormwater Runoff also leads to Erosion and flooding downstream.

Further, Jersey City's Stormwater infrastructure is mainly comprised of Combined Sewer Systems ("CSS"). CSS carry Stormwater and wastewater in the same pipes to treatment facilities. The volume of runoff produced during storm events routinely overwhelms the capacity of these systems, resulting in combined sewer overflow ("CSO") events, which discharge untreated sewage and polluted Stormwater directly to nearby waterbodies.

Low Impact Development or "LID" (also referred to as "Green Infrastructure") practices restore or mimic natural conditions, allowing rainwater to infiltrate the Soil, evapotranspirate into the air, or be captured for re-use. These practices deal with the Stormwater at its source rather than after it has been channeled downstream. LID techniques can be implemented at Site, neighborhood, or regional scales and include both nonstructural practices such as Site planning and design, and structural Best Management Practices ("BMPs"). Nonstructural BMPs include the implementation of Green Infrastructure such as Porous Pavement, green roofs, parks, roadside plantings, and rain barrels (GI BMPs).

GI BMPs and Low Impact Development (LID) should be utilized to meet the goal of maintaining natural hydrology to reduce Stormwater Runoff volume, reduce Erosion, encourage Infiltration and groundwater Recharge where feasible, and reduce pollution. GI BMPs and LID should be developed based upon physical Site conditions and the origin, nature and the anticipated quantity, or amount, of potential Pollutants. Multiple Stormwater management BMPs may be necessary to achieve the established performance standards for water quality, quantity, and groundwater Recharge. By capturing rainwater and runoff, GI BMPs can lessen the impact on Jersey City's CSS, and reduce or eliminate the number of CSO events. LID practices also result in additional benefits for Jersey City, including providing open space and beautifying neighborhoods, cooling and cleansing the air, reducing asthma and heat-related illnesses, raising property values, and saving on heating and cooling energy costs.

B. Purpose. It is the purpose of this section to establish minimum Stormwater management requirements and controls for "Major Development" and "Minor Development" as defined in Section 2 of this section. The environmental objectives of these requirements are to reduce pollution from municipal Separate Sewer Systems, direct discharges to surface waters, and CSO events; to reduce flooding and streambank Erosion; and promote rainwater harvesting for re-use on-site. Under this framework, structural BMPs will be integrated with nonstructural Stormwater management strategies and proper inspection and maintenance plans. Low Impact Development-based strategies will include consideration of both environmentally sensitive Site design and source controls that prevent Pollutants from being placed on-site or from being exposed to Stormwater. Source control plans will be developed based upon physical Site conditions and the origin, nature, and the anticipated quantity of potential Pollutants. It is the intent of the City of Jersey City to fully integrate these Stormwater management objectives into its zoning codes and land use plans.

C. Applicability.

1. This section shall apply to all Major and Minor Developments as defined in Section 2.

   a. Where Development that adds, replaces, or disturbs, alone or in combination, 1,000 or more square feet of Impervious Surface results in an alteration to more than 50 percent of regulated Impervious Surface and/or Regulated Motor Vehicle Surface of a previously existing Development, the entire existing Development shall meet the requirements of this article.

2. No Major or Minor Development shall be deemed in compliance with this section unless a legally authorized body or official of the City of Jersey City has issued written findings, based on a technical review by a legally authorized and qualified employee, agent, or official of the City of Jersey City, that such Development complies with the requirements of this section. Such technical review shall include written findings regarding each requirement of this section and shall not rely upon the findings of any other government entity as to the Development's compliance with any other legal requirements.

3. This section shall also be applicable to all Major or Minor Developments undertaken by the City of Jersey City or any other governmental body.

D. Compatibility with other permit and ordinance requirements. Development approvals issued pursuant to this section are to be considered an integral part of Development approvals and do not relieve the applicant of the responsibility to secure required permits or approvals for activities regulated by any other applicable code, rule, act, or ordinance. In their interpretation and application, the provisions of this section shall be held to be the minimum requirements for the promotion of the public health, safety, and general welfare.

This section is not intended to interfere with, abrogate, or annul any other ordinances, rule or regulation, statute, or other provision of law except that, where any provision of this section imposes restrictions different from those imposed by any other ordinance, rule or regulation, or other provision of law, the more restrictive provisions or higher standards shall control.

[The next page is 34788.1]

§ 2. Definitions:

For the purpose of this section, the following terms, phrases, words and their derivations shall have the meanings stated herein unless their use in the text of this chapter clearly demonstrates a different meaning. When not inconsistent with the context, words used in the present tense include the future, words used in the plural number include the singular number, and words used in the singular number include the plural number. The word "shall" is always mandatory and not merely directory. The definitions below are the same as or based on the corresponding definitions in the Stormwater Management Rules at N.J.A.C. 7:8-1.2.

BEST MANAGEMENT PRACTICE or BMP means structural or nonstructural Stormwater management strategies prescribed by the New Jersey Department of Environmental Protection in the New Jersey Stormwater Best Management Practices Manual.

BIORETENTION means a BMP that consists of a bed filled with Soil, gravel, or other material and planted with suitable non-invasive (preferably native) vegetation. Stormwater Runoff entering a Bioretention system is filtered through the planting bed before being either conveyed downstream by an underdrain system or infiltrated into the existing subsoil below the planting bed.

CAFRA means the Coastal Area Facility Review Act, N.J.S.A. 13:19-1 et seq.

CAFRA CENTERS, CORES OR NODES means those areas within boundaries accepted by the New Jersey Department of Environmental Protection pursuant to N.J.A.C. 7:8E-5B.

CAFRA PLANNING MAP means the geographic depiction of the boundaries for Coastal Planning Areas, CAFRA Centers, CAFRA Cores and CAFRA Nodes pursuant to N.J.A.C. 7:7E-5B.3. The CAFRA Planning Map is available on the Department's Geographic Information System (GIS).

COMBINED SEWER SYSTEM means a system that consists of a single conduit that collects and transports domestic sewage and industrial wastewater, along with Stormwater Runoff.

COMMUNITY BASIN means an Infiltration basin, sand filter designed to infiltrate, standard constructed Wetland, or wet pond, established in accordance with N.J.A.C. 7:8-4.2(c)14, that is designed and constructed in accordance with the New Jersey Stormwater Best Management Practices Manual, or an alternate design, approved in accordance with N.J.A.C. 7:8-5.2(g), for an Infiltration basin, sand filter designed to infiltrate, standard constructed Wetland, or wet pond and that complies with the requirements of this chapter.

COMPACTION means the increase in Soil bulk density due to construction, Development, or other causes.

CONTRIBUTORY DRAINAGE AREA means the area from which Stormwater Runoff drains to a Stormwater Management Measure, not including the area of the Stormwater Management Measure itself.

CORE means a pedestrian-oriented area of commercial and civic uses serving the surrounding Municipality, generally including housing and access to public transportation.

COUNTY REVIEW AGENCY means an agency designated by the County Board of Chosen Freeholders to review municipal Stormwater management plans and implementing ordinance(s). The county Review Agency may either be:

1. A county planning agency; or

2. A county water resource association created under N.J.S.A. 58:16A-55.5, if the ordinance or resolution delegates authority to approve, conditionally approve, or disapprove municipal Stormwater management plans and implementing ordinances.

DEPARTMENT means the New Jersey Department of Environmental Protection.

DESIGNATED CENTER means a State Development and Redevelopment Plan Center as designated by the State Planning Commission such as urban, regional, town, village, or hamlet.

DESIGN ENGINEER means a Person professionally qualified and duly licensed in New Jersey to perform engineering services that may include, but not necessarily be limited to, Development of project requirements, creation and Development of project design and preparation of drawings and specifications.

DEVELOPMENT means the division of a parcel of land into two or more parcels, the construction, reconstruction, conversion, structural alteration, relocation or enlargement of any building or structure, any mining excavation or landfill, any clearing, grading, or excavation or any other activity that results in land Disturbance, and/or any use or change in the use of any building or other structure, or land or extension of use of land, by any Person, for which permission is required under the Municipal Land Use Law, N.J.S.A. 40:55D-1 et seq.

DISTURBANCE means the placement or replacement of Impervious Surfaces or Motor Vehicle surface, or exposure and/or movement of Soil or bedrock or clearing, cutting, or removing of vegetation. Milling and repaving is not considered Disturbance for the purposes of this definition.

DRAINAGE AREA means a geographic area within which Stormwater, Sediments, or dissolved materials drain to a particular receiving waterbody or to a particular point along a receiving waterbody.

ENVIRONMENTALLY CONSTRAINED AREAS means the following areas where the physical alteration of the land is in some way restricted, either through regulation, easement, deed restriction or ownership such as: Wetlands, floodplains, threatened and endangered species Sites or designated habitats, and parks and preserves. Habitats of endangered or threatened species are identified using the Department's Landscape Project as approved by the Department's Endangered and Nongame Species Program.

ENVIRONMENTALLY CRITICAL AREA means an area or feature which is of significant environmental value, including but not limited to: stream corridors; natural heritage priority Sites; habitat of endangered or threatened species; large areas of contiguous open space or upland forest; steep slopes; and well head protection and groundwater Recharge areas. Habitats of endangered or threatened species are identified using the Department's Landscape Project as approved by the Department's Endangered and Nongame Species Program.

EMPOWERMENT NEIGHBORHOOD means a neighborhood designated by the Urban Coordinating Council "in consultation and conjunction with" the New Jersey Redevelopment Authority pursuant to N.J.S.A. 55:19-69.

EROSION means the detachment and movement of Soil or rock fragments by water, wind, ice or gravity.

GREEN INFRASTRUCTURE means a Stormwater management method that manages Stormwater close to its source by: (1) treating Stormwater Runoff through Infiltration into subsoil; (2) treating Stormwater Runoff through filtration by vegetation or Soil; or (3) storing Stormwater Runoff for reuse.

GREEN STREET means a street or right-of-way that includes a variety of elements such as street trees, Permeable Pavements, Bioretention, and swales designed to reduce the amount of Stormwater Runoff and Pollutants transported to a separate storm sewer system or a Combined Sewer System.

HUC 14 or HYDROLOGIC UNIT CODE 14 means an area within which water drains to a particular receiving surface water body, also known as a subwatershed, which is identified by a 14-digit hydrologic boundary designation, delineated within New Jersey by the United States Geological Survey.

IMPERVIOUS SURFACE means a surface that has been covered with a layer of material so that it is highly resistant to Infiltration by water.

INFILTRATION is the process by which water seeps into the Soil from precipitation.

LOW IMPACT DEVELOPMENT (LID) means the implementation of Stormwater management and Site design methods primarily vegetation and Soil to manage Stormwater and reduce Stormwater Runoff.

MAJOR DEVELOPMENT means an individual "Development" as well as multiple Developments that individually or collectively result in:

1. The Disturbance of 10,000 or more square feet of land;

2. The creation or replacement of 5,000 or more square feet of "regulated Impervious Surface;"

3. The creation or replacement of 5,000 or more square feet of "Regulated Motor Vehicle Surface; or

4. A combination of 2 and 3 above that totals an area of 5,000 or more square feet. The same surface shall not be counted twice when determining if the combination area equals 5,000 or more square feet.

MINOR DEVELOPMENT means an individual "Development" as well as multiple Developments that individually or collectively result in:

1. The Disturbance of 5,000 or more square feet, but less than 10,000 square feet of land;

2. The creation of 1,000 or more square feet, but less than 5,000 square feet of "regulated Impervious Surface;"

3. The creation of 1,000 or more square feet, but less than 5,000 square feet of "Regulated Motor Vehicle Surface;" or

4. A combination of 2 and 3 above that totals an area of at least 1,000 square feet, but less than 5,000 square feet or more square feet. The same surface shall not be counted twice when determining if the combination area equals 5,000 or more square feet.

"Minor Development" includes all Developments that are part of a common plan of Development or sale (for example, phased residential Development) that collectively or individually meet any one or more of paragraphs 1, 2, 3, or 4 above. Projects undertaken by any government agency that otherwise meet the definition of "Major Development" but which do not require approval under the Municipal Land Use Law, N.J.S.A. 40:55D-l et seq., are also considered "Major Development." Projects that do not require Land Use Board approval are exempt from Minor Development requirements.

MOTOR VEHICLE means land vehicles propelled other than by muscular power, such as automobiles, motorcycles, autocycles, and low speed vehicles. For the purposes of this definition, Motor Vehicles do not include farm equipment, snowmobiles, all-terrain vehicles, motorized wheelchairs, go-carts, gas buggies, golf carts, ski-slope grooming machines, or vehicles that run only on rails or tracks.

MOTOR VEHICLE SURFACE means any pervious or Impervious Surface that is intended to be used by Motor Vehicles and/or aircraft, and is directly exposed to precipitation including, but not limited to, driveways, parking areas, parking garages, roads, racetracks, and runways.

MUNICIPALITY means the City of Jersey City.

NEW JERSEY STORMWATER BEST MANAGEMENT PRACTICES (BMP) MANUAL or BMP MANUAL means the manual maintained by the Department providing, in part, design specifications, removal rates, calculation methods, and Soil testing procedures approved by the Department as being capable of contributing to the achievement of the Stormwater management standards specified in this chapter. The BMP Manual is periodically amended by the Department as necessary to provide design specifications on additional Best Management Practices and new information on already included practices reflecting the best available current information regarding the particular practice and the Department's determination as to the ability of that Best Management Practice to contribute to compliance with the standards contained in this chapter. Alternative Stormwater Management Measures, removal rates, or calculation methods may be utilized, subject to any limitations specified in this chapter, provided the Design Engineer demonstrates to the Municipality, in accordance with Section 4.E of this section and N.J.A.C. 7:8-5.2(g), that the proposed measure and its design will contribute to achievement of the design and performance standards established by this chapter.

NODE means an area designated by the State Planning Commission concentrating facilities and activities which are not organized in a compact form.

NUTRIENT means a chemical element or compound, such as nitrogen or phosphorus, which is essential to and promotes the development of organisms.

PERVIOUS PAVEMENT mean a pavement system that allows water to infiltrate through the pavement into an underground stone reservoir to provide temporary storage before infiltrating the Soil. "Pervious Pavement" includes pervious asphalt, pervious concrete, and interlocking pavers.

PERMEABLE PAVEMENT means a pavement system with surface voids constructed over a bed of crush stone or sand that allows water to infiltrate the Soil.

POROUS PAVEMENT means porous asphalt or concrete surface placed over a runoff storage bed of broken stone and un-compacted subgrade Soils.

PERSON means any individual, corporation, company, partnership, firm, association, or political subdivision of this state subject to municipal jurisdiction pursuant to the Municipal Land Use Law, N.J.S.A. 40:55D-l et seq. "Person" shall also include the City of Jersey City.

POLLUTANT means any dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, refuse, oil, grease, sewage sludge, munitions, chemical wastes, biological materials, medical wastes, radioactive substance (except those regulated under the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 et seq.), thermal waste, wrecked or discarded equipment, rock, sand, cellar dirt, industrial, municipal, agricultural, and construction waste or runoff, or other residue discharged directly or indirectly to the land, ground waters or surface Waters of the State, or to a domestic treatment works. "Pollutant" includes both hazardous and nonhazardous Pollutants.

RECHARGE means the amount of water from precipitation that infiltrates into the ground and is not evapotranspired.

REGULATED IMPERVIOUS SURFACE means any of the following, alone or in combination: (1) a net increase of Impervious Surface; (2) the total area of Impervious Surface collected by a new Stormwater conveyance system/Combined Sewer System (for the purpose of this definition, a "new Stormwater conveyance system" is a Stormwater conveyance system that is constructed where one did not exist immediately prior to its construction or an existing system for which a new discharge location is created); (3) the total area of Impervious Surface proposed to be newly collected by an existing Stormwater conveyance system/Combined Sewer System; and/or (4) the total area of Impervious Surface collected by an existing Stormwater conveyance system/Combined Sewer System where the capacity of that system is increased.

REGULATED MOTOR VEHICLE SURFACE means any of the following, alone or in combination: (1) the total area of Motor Vehicle surface that is currently receiving water; (2) a net increase in Motor Vehicle surface; and/or the total area of Motor Vehicle surface that is currently receiving water quality treatment either by vegetation or Soil, by an existing Stormwater Management Measure, or by treatment at a wastewater treatment plant, where the water quality treatment will be modified or removed.

REVIEW AGENCY means the Jersey City Municipal Utilities Authority (JCMUA).

SEDIMENT means solid material, mineral or organic, that is in suspension, is being transported, or has been moved from its Site of origin by air, water or gravity as a product of Erosion.

SEPARATE SEWER SYSTEM means a system in which the sanitary and storm sewer systems are not interconnected. In this system, the sanitary sewer system is tributary to a wastewater treatment facility, and the storm sewer system discharges directly to the receiving waters.

SITE means the lot or lots upon which a Major Development is to occur or has occurred.

SOIL means all unconsolidated mineral and organic material of any origin.

SOURCE CONTROL MEASURE means any Stormwater management practice designed to reduce and/or slow the flow of Stormwater into a Combined Sewer System or Separate Sewer System, including, and not limited to, LID or BMP.

SOURCE MATERIAL means any material(s) or machinery, located at an industrial facility, that is directly or indirectly related to process, manufacturing or other industrial activities, which could be a source of Pollutants in any industrial Stormwater discharge to groundwater. Source Materials include, but are not limited to, raw materials; intermediate products; final products; waste materials; by-products; industrial machinery and fuels, and lubricants, solvents, and detergents that are related to process, manufacturing, or other industrial activities that are exposed to Stormwater.

STATE DEVELOPMENT AND REDEVELOPMENT PLAN METROPOLITAN PLANNING AREA (PAI) means an area delineated on the State Plan Policy Map and adopted by the State Planning Commission that is intended to be the focus for much of the state's future redevelopment and revitalization efforts.

STATE PLAN POLICY MAP is defined as the geographic application of the State Development and Redevelopment Plan's goals and statewide policies, and the official map of these goals and policies.

STORMWATER means water resulting from precipitation (including rain and snow) that runs off the land's surface, is transmitted to the subsurface, or is captured by separate storm sewers or other sewage or drainage facilities, or conveyed by snow removal equipment.

STORMWATER MANAGEMENT BASIN means an excavation or embankment and related areas designed to retain Stormwater Runoff. A Stormwater Management Basin may either be normally dry (that is, a detention basin or Infiltration basin), retain water in a permanent pool (a retention basin), or be planted mainly with Wetland vegetation (most constructed Stormwater Wetlands).

STORMWATER MANAGEMENT BMP means an excavation or embankment and related areas designed to retain Stormwater Runoff. A Stormwater management BMP may either be normally dry (that is, a detention basin or Infiltration system), retain water in a permanent pool (a retention basin), or be planted mainly with Wetland vegetation (most constructed Stormwater Wetlands).

STORMWATER MANAGEMENT MEASURE means any practice, technology, process, program, or other method intended to control or reduce Stormwater Runoff and associated Pollutants, or to induce or control the Infiltration or groundwater Recharge of Stormwater or to eliminate illicit or illegal non-Stormwater discharges into Stormwater conveyances.

STORMWATER MANAGEMENT PLANNING AGENCY means a public body authorized by legislation to prepare Stormwater management plans.

STORMWATER MANAGEMENT PLANNING AREA means the geographic area for which a Stormwater Management Planning Agency is authorized to prepare Stormwater management plans, or a specific portion of that area identified in a Stormwater management plan prepared by that agency.

STORMWATER RUNOFF means water flow on the surface of the ground or in storm sewers, resulting from precipitation.

TIDAL FLOOD HAZARD AREA means a flood hazard area in which the flood elevation resulting from the two-, ten-, or 100-year storm, as applicable, is governed by tidal flooding from the Atlantic Ocean. Flooding in a tidal Flood Hazard Area may be contributed to, or influenced by, Stormwater Runoff from inland areas, but the depth of flooding generated by the tidal rise and fall of the Atlantic Ocean is greater than flooding from any fluvial sources. In some situations, depending upon the extent of the storm surge from a particular storm event, a flood hazard area may be tidal in the 100-year storm, but fluvial in more frequent storm events.

URBAN COORDINATING COUNCIL EMPOWERMENT NEIGHBORHOOD means a neighborhood given priority access to state resources through the New Jersey Redevelopment Authority.

URBAN ENTERPRISE ZONE means a zone designated by the New Jersey Enterprise Zone Authority pursuant to the New Jersey Urban Enterprise Zones Act, N.J.S.A. 52:27H-60 et seq.

URBAN REDEVELOPMENT AREA is defined as previously developed portions of areas:

1. Delineated on the State Plan Policy Map (SPPM) as the Metropolitan Planning Area (PAI), Designated Centers, Cores or Nodes;

2. Designated as CAFRA Centers, Cores or Nodes;

3. Designated as Urban Enterprise Zones; and

4. Designated as Urban Coordinating Council Empowerment Neighborhoods.

VEGETATIVE SOURCE CONTROL MEASURE means a Source Control Measure that relies on living vegetative systems to reduce and/or slow the flow of Stormwater into a Combined Sewer System or Separate Sewer System.

WATER CONTROL STRUCTURE means a structure within, or adjacent to, a water, which intentionally or coincidentally alters the hydraulic capacity, the flood elevation resulting from the two-, ten-, or 100-year storm, flood hazard area limit, and/or floodway limit of the water. Examples of a Water Control Structure may include a bridge, culvert, dam, embankment, ford (if above grade), retaining wall, and weir.

WATERS OF THE STATE means the ocean and its estuaries, all springs, streams, Wetlands, and bodies of surface or ground water, whether natural or artificial, within the boundaries of the State of New Jersey or subject to its jurisdiction.

WETLANDS or WETLAND means an area that is inundated or saturated by surface water or ground water at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated Soil conditions, commonly known as hydrophytic vegetation.

§ 3. Design and performance standards for Stormwater Management Measures:

A. Stormwater Management Measures for Major and Minor Development shall be designed to provide Erosion control, groundwater Recharge, Stormwater Runoff quantity control, and Stormwater Runoff quality treatment as follows:

1. The minimum standards for Erosion control are those established under the Soil and Sediment Control Act, N.J.S.A. 4:24-39 et seq., and implementing rules at N.J.A.C. 2:90.

2. The minimum standards for groundwater Recharge, Stormwater quality, and Stormwater Runoff quantity shall be met by incorporating Green Infrastructure.

B. Unless otherwise indicated, the standards in this section apply only to new Major and Minor Development as defined herein and are intended to minimize the impact of Stormwater Runoff on water quality and water quantity in receiving water bodies and achieve additional environmental benefits, including maintaining groundwater Recharge. The standards do not apply to new Major Development to the extent that alternative design and performance standards are applicable under a regional Stormwater management plan or Water Quality Management Plan adopted in accordance with Department rules.

§ 4. Stormwater management requirements for Major Development:

A. As stated above, Stormwater Management Measures for Major Development shall be designed to provide Erosion control, groundwater Recharge, Stormwater Runoff quantity control, and Stormwater Runoff quality treatment as follows:

1. The minimum design and performance standards for Erosion control are those established under the Soil Erosion and Sediment Control Act, N.J.S.A. 4:24-39 et seq., and implementing rules at N.J.A.C. 2:90 and 16:25A.

2. The minimum design and performance standards for groundwater Recharge, Stormwater Runoff quality, and Stormwater Runoff quantity at N.J.A.C. 7:8-5.4, 5.5, and 5.6 shall be met by incorporating Green Infrastructure in accordance with N.J.A.C. 7:8-5.3.

B. Each Development to this section shall incorporate a maintenance plan for the Stormwater Management Measures incorporated into the design of a Major Development in accordance with Section 15 of this section.

C. Stormwater Management Measures shall avoid adverse impacts of concentrated flow on habitat for threatened and endangered species as documented in the Department's Landscape Project or Natural Heritage Database established under N.J.S.A. 13:16-15.147 through 15.150, particularly Helonias bullata (swamp pink) and/or Clemmys muhlnebergi (bog turtle).

D. The following linear Development projects are exempt from the Stormwater retention, groundwater Recharge, Stormwater Runoff quantity, and Stormwater Runoff quality requirements of Sections 7, 8, 9, and 10 of this article:

1. The construction of an underground utility line provided that the disturbed areas are revegetated upon completion with priority given for use of native plant species;

2. The construction of an aboveground utility line provided that the existing conditions are improved or are maintained to the maximum extent practicable; and

3. The construction of a public pedestrian access, such as a sidewalk or trail with a maximum width of 14 feet, provided that the access is made of permeable, porous, or perviable material.

E. A waiver from strict compliance from the groundwater Recharge, Stormwater Runoff quantity, and Stormwater Runoff quality requirements of Sections 7, 8, and 9 herein may be granted for the enlargement of an existing public roadway or railroad; or the construction or enlargement of a public pedestrian access, provided that the following conditions are met:

1. The applicant demonstrates that there is a public need for the project that cannot be accomplished by any other means;

2. The applicant demonstrates through an alternatives analysis, in writing, that through the use of Stormwater Management Measures, the option selected complies with the requirements of Sections 7, 8, and 9 of this article to the maximum extent practicable. For road or highway projects, the applicant shall, at minimum, follow USEPA guidance regarding managing Wet Weather with Green Infrastructure; Green Streets (December 2008 EPA-833-F-08-009);

3. The applicant demonstrates that, in order to meet the requirements of Sections 7, 8, and 9, existing structures currently in use, such as homes and buildings, would need to be condemned; and

4. The applicant demonstrates that it does not own or have other rights to areas, including the potential to obtain through condemnation lands not falling under Section 3.D.3 above within the upstream Drainage Area of the receiving stream, that would provide additional opportunities to mitigate the requirements of Sections 7, 8, and 9 herein that were not achievable on-site.

F. The tables below summarize the ability of Stormwater Best Management Practices identified and described in the New Jersey Stormwater Best Management Practices Manual to satisfy the Green Infrastructure, groundwater Recharge, Stormwater Runoff quality, and Stormwater Runoff quantity standards specified in this article. When designed in accordance with the New Jersey Stormwater Best Management Practices Manual and this chapter, the Stormwater Management Measures listed in Tables 4-1,4-2, and 4-3 shall be presumed to be capable of providing Stormwater controls for the design and performance standards as outlined in the tables below. Upon amendment of the New Jersey Stormwater Best Management Practices Manual to reflect additions or deletions of BMPs meeting these standards, or changes in the presumed performance of BMPs designed in accordance with the New Jersey Stormwater BMP Manual, the Department shall publish in the New Jersey Register a notice of administrative change revising the applicable table.

G. The most current version of the BMP Manual can be found on the Department's website at: https://njStormwater.org/bmp____manual2.htm.

H. Where the BMP tables in the NJ Stormwater Management Rule are different due to updates or amendments with the tables in this section the BMP Tables in the Stormwater Management rule at N.J.A.C. 7:8-5.2(f) shall take precedence.

Table 4-1
Green Infrastructure BMPs for Groundwater Recharge, Stormwater Runoff Quality, and/or Stormwater Runoff Quantity

Best Management Practice	Stormwater Runoff Quality TSS Removal Rate (percent)	Stormwater Runoff Quantity	Groundwater Recharge	Minimum Separation from Seasonal High Water Table (feet)
Cistern	0	Yes	No	—
Dry well[a]	0	No	Yes	2
Grass swale	50 or less	No	No	2[e] 1[f]
Green roof	0	Yes	No	—
Manufactured treatment device[a][g]	50 or 80	No	No	Dependent upon the device
Pervious paving system[a]	80	Yes	Yes[b] No[c]	2[b] 1[c]
Small-scale bioretention system[a]	80 or 90	Yes	Yes[b] No[c]	2[b] 1[c]
Small-scale infiltration basin[a]	80	Yes	Yes	2
Small-scale sand filter[a][b]	80	Yes	Yes	2
Vegetative filter strip	60—80	No	No	—
Notes corresponding to annotations (a) through (g) are found after Table 4-3				

Table 4-2
Green Infrastructure BMPs for Stormwater Runoff Quantity (or for Groundwater Recharge and/or Stormwater Runoff Quality with a Waiver of Variance from N.J.A.C. 7:8-5.3

Best Management Practice	Stormwater Runoff Quality TSS Removal Rate (percent)	Stormwater Runoff Quantity	Groundwater Recharge	Minimum Separation from Seasonal High Water Table (feet)
Bioretention system	80 or 90	Yes	Yes[b] No[c]	2[b] 1[c]
Infiltration basin	80	Yes	Yes	2
Sand filter[b]	80	Yes	Yes	2
Standard constructed wetland	90	Yes	No	N/A
Wet pond[d]	50—90	Yes	No	N/A
Notes corresponding to annotations (a) through (g) are found after Table 4-3				

Table 4-3
BMPs for Groundwater Recharge, Stormwater Runoff Quality, and/or Stormwater Runoff Quantity only with a Waiver or Variance from N.J.A.C 7:8-5.3

Best Management Practice	Stormwater Runoff Quality TSS Removal Rate (percent)	Stormwater Runoff Quantity	Groundwater Recharge	Minimum Separation from Seasonal High Water Table (feet)
Blue roof	0	Yes	No	N/A
Extended detention basin	40—60	Yes	No	1
Manufactured treatment device[h]	50 or 80	No	No	Dependent upon the device
Sand filter[c]	80	Yes	No	1
Subsurface gravel wetland	90	No	No	1
Wet pond	50—90	Yes	No	N/A

Notes to Tables 4-1, 4-2, and 4-3:

[a] Subject to the applicable Contributory Drainage Area limitation specified at Subsection 5.B;

[b] Designed to infiltrate into the subsoil;

[c] Designed with underdrains;

[d] Designed to maintain at least a ten-foot wide area of native vegetation along at least 50 percent of the shoreline and to include a Stormwater Runoff retention component designed to capture Stormwater Runoff for beneficial reuse, such as irrigation;

[e] Designed with a slope of less than two percent;

[f] Designed with a slope of equal to or greater than two percent;

[g] Manufactured treatment devices that meet the definition of Green Infrastructure as defined in Section 2 herein;

[h] Manufactured treatment devices that do not meet the definition of Green Infrastructure as defined in Section 2 herein.

I. An alternative Stormwater Management Measure, alternative removal rate, and/or alternative method to calculate the removal rate may be used if the Design Engineer demonstrates the capability of the proposed alternative Stormwater Management Measure and/or the validity of the alternative rate or method to the Review Agency. A copy of any approved alternative Stormwater Management Measure, alternative removal rate, and/or alternative method to calculate the removal rate shall be provided to the Department at: Division of Water Quality, New Jersey Department of Environmental Protection, Mail Code 401-02B, PO Box 420, Trenton, New Jersey 08625-0420. Alternative Stormwater Management Measures may be used to satisfy the requirements at Section 5 of this article only if the measures meet the definition of Green Infrastructure as defined in Section 2 herein. Alternative

Stormwater Management Measures that function in a similar manner to a BMP listed at Section 5.B are subject to the Contributory Drainage Area limitation specified at Section 5.B for that similarly functioning BMP. Alternative Stormwater Management Measures approved in accordance with this subsection that do not function in a similar manner to any BMP listed at Section 5.B shall have a Contributory Drainage Area less than or equal to 2.5 acres, except for alternative Stormwater Management Measures that function similarly to cisterns, grass swales, green roofs, standard constructed Wetlands, vegetative filter strips, and wet ponds, which are not subject to a Contributory Drainage Area limitation. Alternative measures that function similarly to standard constructed Wetlands or wet ponds shall not be used for compliance with the Stormwater Runoff quality standard unless a variance in accordance with N.J.A.C. 7:8 or a waiver from strict compliance in accordance with Section 4.D above is granted.

J. Whenever the Stormwater management design includes one or more BMPs that will infiltrate Stormwater into subsoil, the Design Engineer shall assess the hydraulic impact on the groundwater table and design the Site, so as to avoid adverse hydraulic impacts. Potential adverse hydraulic impacts include, but are not limited to, exacerbating a naturally or seasonally high water table, so as to cause surficial ponding, flooding of basements, or interference with the proper operation of subsurface sewage disposal systems or other subsurface structures within the zone of influence of the groundwater mound, or interference with the proper functioning of the Stormwater Management Measure itself.

K. Design standards for Stormwater Management Measures are as follows:

1. Stormwater Management Measures shall be designed to take into account the existing Site conditions, including, but not limited to, Environmentally Critical Areas; Wetlands; flood-prone areas; slopes; depth to seasonal high water table; Soil type, permeability, and texture; Drainage Area and drainage patterns; and the presence of solution-prone carbonate rocks (limestone);

2. Stormwater Management Measures shall be designed to minimize maintenance, facilitate maintenance and repairs, and ensure proper functioning. Trash racks shall be installed at the intake to the outlet structure, as appropriate, and shall have parallel bars with one-inch spacing between the bars to the elevation of the water quality design storm. For elevations higher than the water quality design storm, the parallel bars at the outlet structure shall be spaced no greater than one-third the width of the diameter of the orifice or one-third the width of the weir, with a minimum spacing between bars of one inch and a maximum spacing between bars of six inches. In addition, the design of trash racks must comply with the requirements of Subsection 13.B;

3. Stormwater Management Measures shall be designed, constructed, and installed to be strong, durable, and corrosion resistant. Measures that are consistent with the relevant portions of the Residential Site Improvement Standards at N.J.A.C. 5:21-7.3, 7.4, and 7.5 shall be deemed to meet this requirement;

4. Stormwater Management Basins shall be designed to meet the minimum safety standards for Stormwater Management Basins at Section 13; and

5. The size of the orifice at the intake to the outlet from the Stormwater Management Basin shall be a minimum of 2½ inches in diameter.

L. Manufactured treatment devices may be used to meet the requirements of this subchapter under the circumstances described in Section 5.D, provided the Pollutant removal rates are verified by the New Jersey Corporation for Advanced Technology and certified by the Department.

M. Any application for a new agricultural Development that meets the definition of Major Development as defined in Section 2 herein shall be submitted to the Soil Conservation District for review and approval in accordance with the requirements at Sections 7 and 9 and any applicable Soil Conservation District guidelines for Stormwater Runoff quantity and Erosion control. For purposes of this section, "agricultural Development" means land uses normally associated with the production of food, fiber, and livestock for sale. Such uses do not include the Development of land for the processing or sale of food and the manufacture of agriculturally related products.

N. If there is more than one Drainage Area, the groundwater Recharge, Stormwater Runoff quality, and Stormwater Runoff quantity standards at Sections 7, 8, and 9 shall be met in each Drainage Area, unless the runoff from the Drainage Areas converge on-site and no adverse environmental impact would occur as a result of compliance with any one or more of the individual standards being determined utilizing a weighted average of the results achieved for that individual standard across the affected Drainage Areas.

O. Any Stormwater Management Measure authorized pursuant to this article shall be reflected in a deed notice recorded in the Office of the County Clerk or the registrar of deeds and mortgages of the county in which the Development, project, project Site, or mitigation area containing the Stormwater Management Measure is located. A form of deed notice shall be submitted to the reviewing agency for approval prior to filing. The deed notice shall contain a description of the Stormwater Management Measure(s) used to meet the Green Infrastructure, Stormwater retention, groundwater Recharge, Stormwater Runoff quality, and Stormwater Runoff quantity standards at Sections 5, 6, 7, 8, 9, and 10 and shall identify the location of the Stormwater Management Measure(s) in NAD 1983 State Plane New Jersey FIPS 2900 US Feet or Latitude and Longitude in decimal degrees. The deed notice shall also reference the maintenance plan required to be recorded upon the deed pursuant to Section 15.B.5 Prior to the commencement of construction, proof that the above required deed notice has been filed shall be submitted to the Review Agency. Proof that the required information has been recorded on the deed shall be in the form of either a copy of the complete recorded document or a receipt from the clerk or other proof of recordation provided by the recording office. However, if the initial proof provided to the Review Agency is not a copy of the complete recorded document, a copy of the complete recorded document shall be provided to the Review Agency within 180 calendar days of the authorization granted by the Review Agency.

P. A Stormwater Management Measure approved under article may be altered or replaced with the approval of the applicable Review Agency, if the Review Agency determines that the proposed alteration or replacement meets the design and performance standards pursuant to this article and provides the same level of Stormwater management as the previously approved Stormwater Management Measure that is being altered or replaced. If an alteration or replacement is approved, a revised deed notice shall be submitted to the reviewing agency for approval and subsequently recorded with the appropriate Office of the County Clerk or the registrar of deeds and mortgages and shall contain a description and location of the Stormwater Management Measure, as well as reference to the

maintenance plan, in accordance with 4.M above. Prior to the commencement of construction, proof that the above required deed notice has been filed shall be submitted to the Review Agency in accordance with 4.M above.

§ 5. Green Infrastructure:

A. This section specifies the types of Green Infrastructure BMPs that may be used to satisfy the groundwater Recharge, Stormwater Runoff quality, and Stormwater Runoff quantity standards.

B. To satisfy the groundwater Recharge and Stormwater Runoff quality standards at Sections 7 and 8, the Design Engineer shall utilize Green Infrastructure BMPs identified in Table 4-1 and/or an alternative Stormwater Management Measure approved in accordance with Subsection 4.H. The following Green Infrastructure BMPs are subject to the following maximum Contributory Drainage Area limitations:

Best Management Practice	Maximum Contributory Drainage Area
Dry well	1 acre
Manufactured treatment device	2.5 acres
Pervious Pavement systems	Area of additional inflow cannot exceed three times the area occupied by the BMP
Small-scale Bioretention systems	2.5 acres
Small-scale Infiltration basin	2.5 acres
Small-scale sand filter	2.5 acres

C. To satisfy the Stormwater Runoff quantity standards at Section 9, the Design Engineer shall utilize BMPs from Table 4-1 or from Table 4-2 and/or an alternative Stormwater Management Measure approved in accordance with Subsection 4.H.

D. If a variance in accordance with N.J.A.C. 7:8-4.6 or a waiver from strict compliance in accordance with Subsection 4.D is granted from the requirements of this section, then BMPs from Table 4-1, 4-2, or 4-3, and/or an alternative Stormwater Management Measure approved in accordance with Subsection 4.H may be used to meet the groundwater Recharge, Stormwater Runoff quality, and Stormwater Runoff quantity standards at Sections 7, 8, and 9.

E. For separate or combined storm sewer improvement projects, such as sewer separation, undertaken by a government agency or sewerage authority, the requirements of this section shall only apply to areas owned in fee simple by the government agency or sewerage authority, and areas within a right-of-way or easement held or controlled by the government agency or sewerage authority; the entity shall not be required to obtain additional property or property rights to fully satisfy the requirements of this section. Regardless of the amount of area of a separate or combined storm sewer improvement project subject to the Green Infrastructure requirements of this section, each project shall fully comply with the applicable groundwater Recharge, Stormwater Runoff quality control, and Stormwater Runoff quantity standards at Sections 7, 8, and 9 unless the project is granted a waiver from strict compliance in accordance with Subsection 4.D.

§ 6. Stormwater retention standard for Minor Development:

A. This section contains minimum design and performance standards for Stormwater retention for Minor Development:

For each square foot of Impervious Surface, 0.6 gallons of Stormwater shall be retained on-site using Green Infrastructure practices listed in Section 5 or other methods as identified by references included in Section 11 of this section.

§ 7. Groundwater Recharge standards for Major Development:

A. This subsection contains minimum design and performance standards for groundwater Recharge for Major Development.

B. The minimum design and performance standards for groundwater Recharge are as follows:

1. The Design Engineer shall, using the assumptions and factors for Stormwater Runoff and groundwater Recharge calculations at Section 10 of this article, use whichever of the following demonstration approaches that yields a larger Infiltration volume:

a. Demonstrate through hydrologic and hydraulic analysis that the Site and its Stormwater Management Measures maintain 100 percent of the average annual pre-construction groundwater Recharge volume for the Site; or

b. Demonstrate through hydrologic and hydraulic analysis that the increase of Stormwater Runoff volume from pre-construction to post-construction for the two-year storm is infiltrated.

C. This groundwater Recharge requirement does not apply to projects within the "Urban Redevelopment Area," or to projects subject to (D) below.

D. The following types of Stormwater shall not be Recharged:

1. Stormwater from areas of high Pollutant loading. High Pollutant loading areas are areas in industrial and commercial Developments where solvents and/or petroleum products are loaded/unloaded, stored, or applied, areas where pesticides are loaded/unloaded or stored; areas where hazardous materials are expected to be present in greater than "reportable quantities" as defined by the United States Environmental Protection Agency (EPA) at 40 CFR 302.4; areas where Recharge would be inconsistent with Department approved remedial action work plan or landfill closure plan and areas with high risks for spills of toxic materials, such as gas stations and vehicle maintenance facilities; and

2. Industrial Stormwater exposed to Source Material. "Source Material" means any material(s) or machinery, located at an industrial facility, that is directly or indirectly related to process, manufacturing or other industrial activities, which could be a source of Pollutants in any industrial Stormwater discharge to groundwater. Source Materials include, but are not limited to,

raw materials; intermediate products; final products; waste materials; by-products; industrial machinery and fuels, and lubricants, solvents, and detergents that are related to process, manufacturing, or other industrial activities that are exposed to Stormwater.

§ 8. Stormwater Runoff quality standards for Major Development:

A. This subsection contains minimum design and performance standards for Stormwater Runoff quality for Major Development. Stormwater Runoff quality standards are applicable when the Major Development results in the Disturbance of one acre or more of land.

B. Stormwater quality management measures shall be designed to reduce the post-construction load of total suspended solids (TSS) in Stormwater Runoff by generated from the water quality design storm as follows:

1. Eighty percent TSS removal of the anticipated load, expressed as an annual average shall be achieved for the Stormwater Runoff from the net increase of Motor Vehicle surface.

2. If the surface is considered Regulated Motor Vehicle Surface because the water quality treatment for an area of Motor Vehicle surface that is currently receiving water quality treatment either by vegetation or Soil, by an existing Stormwater Management Measure, or by treatment at a wastewater treatment plant is to be modified or removed, the project shall maintain or increase the existing TSS removal of the anticipated load expressed as an annual average.

C. The requirement to reduce TSS does not apply to any Stormwater Runoff in a discharge regulated under a numeric effluent limitation for TSS imposed under the New Jersey Pollution Discharge Elimination System (NJPDES) rules, N.J.A.C. 7:14A, or in a discharge specifically exempt under a NJPDES permit from this requirement. Every Major Development, including that discharged into a Combined Sewer System, shall comply with (b) above, unless the Major Development is itself subject to a NJDPES permit with a numeric effluent limitation for TSS or the NJDPES permit to which the Major Development is subject exempts the development from a numeric effluent limitation for TSS.

D. The water quality design storm is 1.25 inches of rainfall in two hours. Water quality calculations shall take into account the distribution of rain from the water quality design storm, as reflected in Table 8-1. The calculation of the volume of runoff may take into account the implementation of Stormwater Management Measures.

Table 8-1
Water Quality Design Storm Distribution

Time (minutes)	Cumulative Rainfall (inches)	Time (minutes)	Cumulative Rainfall (inches)	Time (minutes)	Cumulative Rainfall (inches)
1	0.00166	41	0.1728	81	1.0906
2	0.00332	42	0.1796	82	1.0972
3	0.00498	43	0.1864	83	1.1038
4	0.00664	44	0.1932	84	1.1104
5	0.00830	45	0.2000	85	1.1170
6	0.00996	46	0.2117	86	1.1236

Time (minutes)	Cumulative Rainfall (inches)	Time (minutes)	Cumulative Rainfall (inches)	Time (minutes)	Cumulative Rainfall (inches)

40	0.16600	80	1.0840	120	1.2500

E. If more than one BMP in series is necessary to achieve the required 80 percent TSS reduction for a Site, the applicant shall utilize the following formula to calculate TSS reduction:

$$R = A + B - (A \times B)/100$$

Where

R = total TSS percent load removal from application of both BMPs, and

A = the TSS percent removal rate applicable to the first BMP

B = the TSS percent removal rate applicable to the second BMP

F. Stormwater Management Measures shall also be designed to reduce, to the maximum extent feasible, the post-construction Nutrient load (nitrogen and phosphorous) of the anticipated load from the developed Site in Stormwater Runoff generated from the water quality design storm. In achieving reduction of Nutrients to the maximum extent feasible, the design of the Site shall include Green Infrastructure BMPs that optimize Nutrient removal while still achieving the performance standards in Section 4.

G. In accordance with the definition of FWI at N.J.A.C. 7:9B-1.4, Stormwater Management Measures shall be designed to prevent any increase in Stormwater Runoff to waters classified as FWI.

H. The Flood Hazard Area Control Act Rules at N.J.A.C. 7:13-4.1(c)1 establish 300-foot riparian zones along Category One waters, as designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, and certain upstream tributaries to Category One waters. A Person shall not undertake a Major Development that is located within or discharges into a 300-foot riparian zone without prior authorization from the Department under N.J.A.C. 7:13.

I. Pursuant to the Flood Hazard Area Control Act Rules at N.J.A.C. 7:13-11.2(j)4, runoff from the water quality design storm that is discharged within a 300-foot riparian zone shall be treated in accordance with this section to reduce the post-construction load of total suspended solids by 95 percent of the anticipated load from the developed Site, expressed as an annual average.

J. This section does not apply to the construction of one individual single-family dwelling, provided that is not part of a larger Development or subdivision that has received preliminary or final Site plan approval prior to December 3, 2018, and that the Motor Vehicle surfaces are made of permeable material(s) such as gravel, dirt, and/or shells.

§ 9. Stormwater Runoff quantity standards for Major Development:

A. This section contains the minimum design and performance standards to control Stormwater Runoff quantity impacts of Major Development.

B. In order to control Stormwater Runoff quantity impacts, the Design Engineer shall, using the assumptions and factors for Stormwater Runoff calculations at Section 10, complete one of the following:

1. Demonstrate through hydrologic and hydraulic analysis that for Stormwater leaving the Site, post-construction runoff hydrographs for the two-, ten-, and 100-year storm events do not exceed, at any point in time, the pre-construction runoff hydrographs for the same storm events;

2. Demonstrate through hydrologic and hydraulic analysis that there is no increase, as compared to the pre-construction condition, in the peak runoff rates of Stormwater leaving the Site for the two-, ten-, and 100-year storm events and that the increased volume or change in timing of Stormwater Runoff will not increase flood damage at or downstream of the Site. This analysis shall include the analysis of impacts of existing land uses and projected land uses assuming full Development under existing zoning and land use ordinances in the Drainage Area;

3. Design Stormwater Management Measures so that the post-construction peak runoff rates for the two-, ten-, and 100-year storm events are 50, 75, and 80 percent, respectively, of the

pre-construction peak runoff rates. The percentages apply only to the post-construction Stormwater Runoff that is attributable to the portion of the Site on which the proposed Development or project is to be constructed; or

4. In tidal Flood Hazard Areas, Stormwater Runoff quantity analysis, in accordance with (b)1, 2, and 3 above, is required unless the Design Engineer demonstrates through hydrologic and hydraulic analysis that the increased volume, change in timing, or increased rate of the Stormwater Runoff, or any combination of the three will not result in additional flood damage below the point of discharge of the Major Development. No analysis is required if the Stormwater is discharged directly into any ocean, bay, inlet, or the reach of any watercourse between its confluence with an ocean, bay, or inlet and downstream of the first Water Control Structure.

C. The Stormwater Runoff quantity standards shall be applies at the Site's boundary to each abutting lot, roadway, watercourse, or receiving storm sewer system.

§ 10. Calculation of Stormwater Runoff, Stormwater retention, and groundwater Recharge for Major Development:

A. Stormwater Runoff shall be calculated in accordance with the following:

1. The Design Engineer shall calculate runoff using one of the following methods:

a. The USDA Natural Resources Conservation Service (NRCS) methodology, including the NRCS Runoff Equation and Dimensionless Unit Hydrograph, as described Chapters 7, 9, 10, 15, and 16, Part 630, of the Hydrology National Engineering Handbook, incorporated herein by reference, as amended and supplemented. This methodology is additionally described in Technical Release 55 — Urban Hydrology for Small Watersheds (TR-55), dated June 1986, incorporated herein by reference, as amended and supplemented. Information regarding the methodology is available from the Natural Resources Conservation Service website at: https://www.nrcs.usda.gov/lnternet/FSE____DOCUMENTS/stelprdbl044171.pdf or at United States Department of Agriculture Natural Resources Conservation Service, 220 Davison Avenue, Somerset, New Jersey 08873; or

b. The Rational Method for peak flow and the Modified Rational Method for hydrograph computations. The rational and modified rational methods are described in "Appendix A-9 Modified Rational Method" in the Standards for Soil Erosion and Sediment Control in New Jersey, July 1999, as amended and supplemented. This document is available from the State Soil Conservation Committee or any of the Soil Conservation Districts listed at N.J.A.C. 2:90-1.3(a)4. The location, address, and telephone number for each Soil Conservation District is available from the State Soil Conservation Committee, PO Box 330, Trenton, NJ 08625. The document is also available at http://www.nj.gov/agriculture/divisions/anr/pdf/2014NJSoilErosionControlStan dardsComplete.pdf.

2. For the purpose of calculating runoff coefficients and groundwater Recharge, there is a presumption that the pre-construction condition of a Site or portion thereof is a wooded land use with good hydrologic condition. The term "runoff coefficient" applies to both the NRCS methodology at Subsection 10.A.1.a and the Rational and Modified Rational Methods at Section 10.A.1.b. A

runoff coefficient or a groundwater Recharge land cover for an existing undeveloped land condition may be used on all or a portion of the Site if the Design Engineer verifies that the hydrologic condition has existed on the Site or portion of the Site for at least five years without interruption prior to the time of application. If more than one undeveloped land cover type has existed on the Site during the five years immediately prior to the time of application, the land cover with the lowest runoff potential shall be used for the computations. In addition, there is the presumption that the Site is in good hydrologic condition (if the land use type is pasture, lawn, or park), with good cover (if the land use type is woods), or with good hydrologic condition and conservation treatment (if the land use type is cultivation).

3. In computing pre-construction Stormwater Runoff, the Design Engineer shall account for all significant land features and structures, such as ponds, Wetlands, depressions, hedgerows, or culverts, that may reduce pre-construction Stormwater Runoff rates and volumes.

4. In computing Stormwater Runoff from all design storms, the Design Engineer shall consider the relative Stormwater Runoff rates and/or volumes of pervious and Impervious Surfaces separately to accurately compute the rates and volume of Stormwater Runoff from the Site. To calculate runoff from unconnected impervious cover, urban impervious area modifications as described in the NRCS Technical Release 55—Urban Hydrology for Small Watersheds and other methods may be employed.

5. If the invert of the outlet structure of a Stormwater Management Measure is below the flood hazard design flood elevation as defined at N.J.A.C. 7:13, the Design Engineer shall take into account the effects of tailwater in the design of structural Stormwater Management Measures.

B. Groundwater Recharge may be calculated in accordance with the following:

1. The New Jersey Geological Survey Report GSR-32 A Method for Evaluating Groundwater-Recharge Areas in New Jersey, incorporated herein by reference as amended and supplemented. Information regarding the methodology is available from the New Jersey Stormwater Best Management Practices Manual; at the New Jersey Geological and Water Survey website at http://www.nj.gov/dep/njgs; or at New Jersey Geological and Water Survey, 29 Arctic Parkway, PO Box 420 Mail Code 29-01, Trenton, NJ 08625-0420

§ 11. Sources for technical guidance:

A. Technical guidance for Stormwater Management Measures can be found in the documents listed below, which are available to download from the Department's website at: http://www.nj.gov/dep/Stormwater/bmp manual2.htm.

B. Guidelines for Stormwater Management Measures are contained in the New Jersey Stormwater Best Management Practices Manual, as amended and supplemented. Information is provided on Stormwater Management Measures such as, but not limited to, those listed in Table 4-1, Table 4-2, and Table 4-3.

C. Additional technical guidance for Stormwater Management Measures can be obtained from the Department's website at http://www.nj.gov/dep/Stormwater/maintenance_guidance.htm and the U.S. Environmental protection Agency's Green Infrastructure resource page at http://water.epa.gov/infrastructure/greeninfrastructure/index.cfm.

D. Submissions required for review by the Department should be mailed to: The Division of Water Quality, New Jersey Department of Environmental Protection, Mail Code 401-02B, PO Box 420, Trenton, New Jersey 08625-0420.

§ 12. Solids and floatable materials controls standards:

A. Site design features identified under Subsection 4.F above, or alternative designs in accordance with Section 4 above, to prevent discharge of trash and debris from drainage systems shall comply with the following standard to control passage of solid and floatable materials through storm drain inlets. For purposes of this paragraph, "solid and floatable materials" means Sediment, debris, trash, and other floating, suspended, or settleable solids. For exemptions to this standard see Subsection 12.A.2 below.

1. Design engineers shall use one of the following grates whenever they use a grate in pavement or another ground surface to collect Stormwater from that surface into a storm drain or surface water body under that grate:

   a. The New Jersey Department of Transportation (NJDOT) bicycle safe grate, which is described in Chapter 2.4 of the NJDOT Bicycle Compatible Roadways and Bikeways Planning and Design Guidelines; or

   b. A different grate, if each individual clear space in that grate has an area of no more than seven square inches, or is no greater than 0.5 inches across the smallest dimension.

      Examples of grates subject to this standard include grates in grate inlets, the grate portion (non-curb-opening portion) of combination inlets, grates on storm sewer manholes, ditch grates, trench grates, and grates of spacer bars in slotted drains. Examples of ground surfaces include surfaces of roads (including bridges), driveways, parking areas, bikeways, plazas, sidewalks, lawns, fields, open channels, and Stormwater system floors used to collect Stormwater from the surface into a storm drain or surface water body.

   c. For curb-opening inlets, including curb-opening inlets in combination inlets, the clear space in that curb opening, or each individual clear space if the curb opening has two or more clear spaces, shall have an area of no more than seven square inches, or be no greater than two inches across the smallest dimension.

2. The standard in A.1 above does not apply:

   a. Where each individual clear space in the curb opening in existing curb-opening inlet does not have an area of more than nine square inches;

   b. Where the Municipality agrees that the standards would cause inadequate hydraulic performance that could not practicably be overcome by using additional or larger storm drain inlets;

   c. Where flows from the water quality design storm as specified in N.J.A.C. 7:8 are conveyed through any device (e.g., end of pipe netting facility, manufactured treatment device, or a catch basin hood) that is designed, at a minimum, to prevent delivery of all solid and floatable materials that could not pass through one of the following:

      i. A rectangular space 4.625 inches long and 1.5 inches wide (this option does not apply for outfall netting facilities); or

ii. A bar screen having a bar spacing of 0.5 inches.

3. Note that these exemptions do not authorize any infringement of requirements in the Residential Site Improvement Standards for bicycle safe grates in new residential Development (N.J.A.C. 5:21-4.18(b)2 and 7.4(b)l).

4. Where flows are conveyed through a trash rack that has parallel bars with one-inch spacing between the bars, to the elevation of the Water Quality Design Storm as specified in N.J.A.C. 7:8; or

5. Where the New Jersey Department of Environmental Protection determines, pursuant to the New Jersey Register of Historic Places Rules at N.J.A.C. 7:4-7.2(c), that action to meet this standard is an undertaking that constitutes an encroachment or will damage or destroy the New Jersey Register listed historic property.

§ 13. Safety standards for Stormwater Management Basins:

A. This section sets forth requirements to protect public safety through the proper design and operation of Stormwater Management Basins. This section applies to any new Stormwater Management Basin. In the event of any conflict between this section and the Jersey City Stormwater Management Plan, the stricter provision shall apply.

B. Requirements for Trash Racks, Overflow Grates and Escape Provisions. A trash rack is a device designed to catch trash and debris and prevent the clogging of outlet structures. Trash racks shall be installed at the intake to the outlet from the Stormwater Management Basin to ensure proper functioning of the basin outlets in accordance with the following:

1. The trash rack shall have parallel bars, with no greater than six inch spacing between the bars.

2. The trash rack shall be designed so as not to adversely affect the hydraulic performance of the outlet pipe or structure.

3. The average velocity of flow through a clean trash rack is not to exceed 2.5 feet per second under the full range of stage and discharge. Velocity is to be computed on the basis of the net area of opening through the rack.

4. The trash rack shall be constructed and installed to be rigid, durable, and corrosion resistant, and shall be designed to withstand a perpendicular live loading of 300 pounds per square foot.

C. An overflow grate is designed to prevent obstruction of the overflow structure. If an outlet structure has an overflow grate, such grate shall meet the following requirements:

1. The overflow grate shall be secured to the outlet structure but removable for emergencies and maintenance.

2. The overflow grate spacing shall be no less than two inches across the smallest dimension.

3. The overflow grate shall be constructed and installed to be rigid, durable, and corrosion resistant, and shall be designed to withstand a perpendicular live loading of 300 pounds per square foot.

D. Stormwater Management Basins shall include escape provisions as follows:

1. If a Stormwater Management Basin has an outlet structure, escape provisions shall be incorporated in or on the structure. With the prior approval of the reviewing agency identified in Subsection 13.C below, a free-standing outlet structure may be exempted from this requirement.

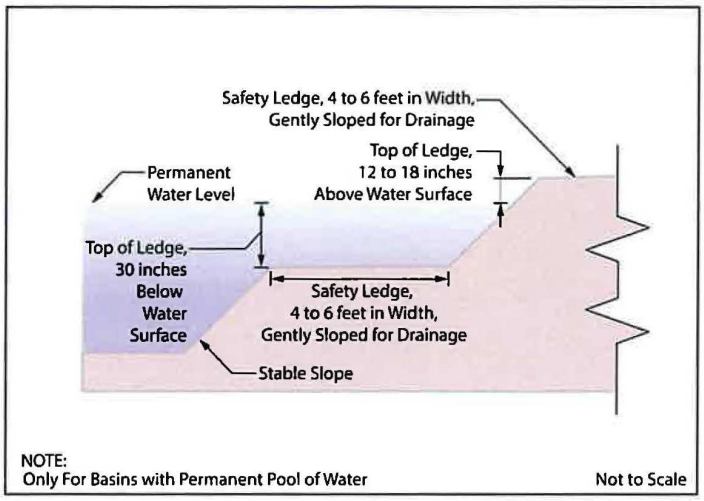
2. Safety ledges shall be constructed on the slopes of all new Stormwater Management Basins having a permanent pool of water deeper than 2.5 feet. Such safety ledges shall be comprised of two steps. Each step shall be four to six feet in width. One step shall be located approximately 2.5 feet below the permanent water surface, and the second step shall be located one to 1.5 feet above the permanent water surface. See Subsection 13.D for an illustration of safety ledges in a Stormwater Management Basin.

3. In new Stormwater Management Basins, the maximum interior slope for an earthen dam, embankment, or berm shall not be steeper than three horizontal to one vertical.

E. Variance or exemption from safety standards.

1. A variance or exemption from the safety standards for Stormwater Management Basins may be granted only upon a written finding by the appropriate reviewing agency that the variance or exemption will not constitute a threat to public safety.

F. Illustration of safety ledges in a new Stormwater Management Basin.



§ 14. Requirements for a Site Development Stormwater plan:

A. Submission of Site Development Stormwater plan.

1. Whenever an applicant seeks municipal approval of a Development subject to this section, the applicant shall submit all of the required components of the submittal for the Site Development

Stormwater plan at Subsection 14.C below and any additional components as specified in the City's Stormwater management plan latest revisions as part of the submission of the applicant's application for subdivision or Site plan approval.

2. The applicant shall demonstrate that the project meets the standards set forth in this section.

3. The applicant shall submit five copies of the materials listed in the submittal for Site Development Stormwater plans in accordance with Section 14.C of this article.

B. Site Development Stormwater plan approval. The applicant's Site Development plan shall be reviewed as a part of the subdivision or Site plan review process by the municipal board or official from which municipal approval is sought. That municipal board or official shall consult with the engineers of the JCMUA and be guided by them to determine if all the submittal requirements have been satisfied and to determine if the project meets the standards set forth in this section. Municipal approval may not be issued unless the requirements of this section are met. Approval of other local, state, and/or other permits (also known as "prior approvals") is not a substitute for local approval of a project's Site Development Stormwater plan.

C. Submittal requirements for Major Development. The following information shall be required:

1. Topographic base map. The reviewing engineer may require upstream tributary drainage system information as necessary. It is recommended that the topographic base map of the Site be submitted which extends a minimum of 200 feet beyond the limits of the proposed Development, at a scale of one inch equals 200 feet or greater, showing two foot contour intervals. The map as appropriate may indicate the following: existing surface water drainage, shorelines, steep slopes, Soils, erodible Soils, perennial or intermittent streams that drain into or upstream of the Category One waters, Wetlands and flood plains along with their appropriate buffer strips, marshlands and other Wetlands, pervious or vegetative surfaces, existing man-made structures, roads, bearing and distances of property lines, and significant natural and manmade features not otherwise shown.

2. Environmental Site analysis. A written and graphic description of the natural and manmade features of the Site and its environs. This description should include a discussion of Soil conditions, slopes, Wetlands, waterways and vegetation on the Site. Particular attention should be given to unique, unusual, or environmentally sensitive features and to those that provide particular opportunities or constraints for Development.

3. Project description and Site plan(s). A map (or maps) at the scale of the topographical base map indicating the location of existing and proposed buildings, roads, parking areas, utilities, structural facilities for Stormwater management and Sediment control, and other permanent structures. The map(s) shall also clearly show areas where alterations occur in the natural terrain and cover, including lawns and other landscaping, and seasonal high ground water elevations. A written description of the Site plan and justification of proposed changes in natural conditions may also be provided.

4. Land use planning and Source Control Plan. This plan shall provide a demonstration of how the goals and standards of Sections 4 through 10 are being met. The focus of this plan shall be to

describe how the Site is being developed to meet the objective of controlling groundwater Recharge, Stormwater quality and Stormwater quantity problems at the source by land management and source controls whenever possible.

5. Stormwater management facilities map. The following information, illustrated on a map of the same scale as the topographic base map, shall be included:

   a. Total area to be paved or built upon, proposed surface contours, land area to be occupied by the Stormwater management facilities and the type of vegetation thereon, and details of the proposed plan to control and dispose of Stormwater.

   b. Details of all Stormwater management facility designs, during and after construction, including discharge provisions, discharge capacity for each outlet at different levels of detention and emergency spillway provisions with maximum discharge capacity of each spillway.

6. Calculations.

   a. Comprehensive hydrologic and hydraulic design calculations for the predevelopment and post-development conditions for the design storms specified in Section 4 of this section.

   b. When the proposed Stormwater management control measures (e.g., Infiltration basins) depends on the hydrologic properties of Soils, then a Soils report shall be submitted. The Soils report shall be based on on-site boring logs or Soil pit profiles. The number and location of required Soil borings or Soil pits shall be determined based on what is needed to determine the suitability and distribution of Soils present at the location of the control measure.

7. Maintenance and repair plan. The design and planning of the Stormwater management facility shall meet the maintenance requirements of Section 15.

8. Waiver from submission requirements. The conditions for a waiver from submission requirements are defined in the Municipal Land Use Law, N.J.S.A. 40:55D-10.3. The municipal official or board reviewing an application under this section may, in consultation with the Municipality's review engineer, waive submission of any of the requirements in Subsection 14.C.1 through 14.C.6 of this section when it can be demonstrated that the information requested is impossible to obtain or it would create a hardship on the applicant to obtain and its absence will not materially affect the review process.

D. Submittal requirements for Minor Development.

1. Applicants seeking municipal approval of Minor Developments shall submit the information described in Subsections 14.C.3, 14.C.4, 14.C.5, and 14.C.7. Applicants shall also submit calculations demonstrating compliance with the retention standard in Section 6.

2. The conditions for a waiver from submission requirements are defined in the municipal Land Use Law, N.J.S.A. 40:55D-10.3.

§ 15. Maintenance and repair:

A. Applicability.

1. Projects subject to review as in Sections 3 and 4 of this section shall also comply with the requirements of this section.

B. General maintenance.

1. The Design Engineer shall prepare a maintenance plan for the Stormwater Management Measures incorporated into the design of a Major Development.

2. The maintenance plan shall contain specific preventative maintenance tasks and schedules; cost estimates, including estimated cost of Sediment, debris, or trash removal; and the name, address, and telephone number of the Person or Persons responsible for preventative and corrective maintenance (including replacement). Maintenance guidelines for Stormwater Management Measures are available in the New Jersey Stormwater Best Management Practices Manual. If the maintenance plan identifies a Person other than the developer (for example, a public agency or homeowners' association) as having the responsibility for maintenance, the plan shall include documentation of such Person's agreement to assume this responsibility, or of the developer's obligation to dedicate a Stormwater management facility to such Person under an applicable ordinance or regulation.

3. The maintenance plan shall specifically provide a municipal right of access, which may include Stormwater easements or covenants. The maintenance access shall be provided by the property owner(s) for access regarding facility inspections and maintenance, as required. Easements and covenants shall be recorded prior to issuance of any permit or approval.

4. Responsibility for maintenance shall not be assigned or transferred to the owner or tenant of an individual property in a residential Development or project, unless such owner or tenant owns or leases the entire residential Development or project.

5. If the Person responsible for maintenance identified under Subsection 15.B.2 above is not a public agency, the maintenance plan and any future revisions shall be recorded upon the deed of record for each property on which the maintenance described in the maintenance plan must be undertaken.

6. Preventative and corrective maintenance shall be performed to maintain the function of the Stormwater Management Measure, including repairs to or replacement of the structure; removal of Sediment, debris, or trash; restoration of eroded areas; snow and ice removal; fence repair or replacement; restoration of vegetation; and repair or replacement of non-vegetated linings.

C. The Person responsible for maintenance identified under Subsection 15.B.2 above shall perform all the following requirements:

1. Maintain a detailed log of all preventative and corrective maintenance for the structural Stormwater Management Measures incorporated into the design of the Development, including a record of all inspections and copies of all maintenance-related work orders;

2. Evaluate the effectiveness of the maintenance plan at least once per year and adjust the plan and the deed as needed; and

3. Retain and make available, upon request by any public entity with administrative, health, environmental, or safety authority over the Site, the maintenance plan and the required documentation.

D. On or before February 1 of each year, the Person responsible for maintenance identified under Subsection 15.B above shall submit to the City of Jersey City and the Review Agency a certification of compliance during the prior year with the requirements of Subsection 15.B, which shall include a summary of inspection and maintenance activities and any proposed changes to the maintenance plan.

E. The requirements of Subsections 15.B.4 and 15.B.5 do not apply to Stormwater management facilities that are dedicated to and accepted by the Municipality or another governmental agency subject to all applicable municipal Stormwater general permit conditions, as issued by the Department.

F. In the event that the Stormwater management facility becomes a danger to public safety or public health, or if it is in need of maintenance or repair, the Municipality shall so notify the responsible Person in writing. Upon receipt of that notice, the responsible Person shall have 14 days to effect maintenance and repair of the facility in a manner that is approved by the Chief Engineer of the JCMUA or his designee. The Municipality, in its discretion, may extend the time allowed for effecting maintenance and repair for good cause. If the responsible Person falls or refuses to perform such maintenance and repair, the Municipality or County may immediately proceed to do so and shall bill the cost thereof to the responsible Person. Nonpayment of such bill may result in a lien on the property.

G. The Review Agency (JCMUA) has the authority to institute a permit system to enforce the maintenance and repair requirements in this section.

H. Nothing in this section shall preclude the Municipality in which the Major Development is located from requiring the posting of a performance or maintenance guarantee in accordance with N.J.S.A. 40:55D-53.

§ 16. Penalties:

A. Any Person who erects, constructs, alters, repairs, converts, maintains, or uses any building, structure or land in violation of this section shall be subject to the following penalties:

B. Any Person, firm or corporation who violates, disobeys, omits, neglects, or refuses to comply with or who resists the enforcement of any of the provisions of this chapter or any order, decision or determination by the Jersey City Municipal Utilities Authority or the City of Jersey City and who refuses to abate said violation within 14 days after written notice has been served upon them shall, for each and every violation, be punishable as provided in Chapter 1, General Provisions. Each day that such violation continues after such notice shall be considered a separate and specific violation of this chapter without the service of an additional notice. The Jersey City Municipal Utilities Authority may also withhold water meters to ensure compliance with this section.

§ 17. Severability:

If the provisions of any section, subsection, paragraph, subdivision, or clause of this section shall be judged invalid by a court of competent jurisdiction, such order of judgment shall not affect or invalidate the remainder of any section, subsection, paragraph, subdivision, or clause of this section.

§ 18. Effective date:

This section shall take effect immediately upon the approval by the County Review Agency, or 60 days from the receipt of the ordinance by the County Review Agency if the County Review Agency should fail to act.

ARTICLE VII

Performance and Maintenance Guarantees

§ 345-75. Installation of improvements or guarantees.

A. Performance Guarantees Required.

1. Prior to the granting of final approval of a subdivision or site plan, the applicant shall have installed or shall have furnished performance guarantees for the ultimate installation of the improvements that were shown on the approved preliminary plan, required as a condition of preliminary approval, or, in the case of subdivisions only, required by the provisions of the "Map Filing Law."

2. Improvements for which performance guarantees may be required include without limitation: streets, grading, pavement, gutters, curbs, sidewalks, street lighting, shade trees, surveyor's monuments, water mains, culverts, storm sewers, sanitary sewers or other means of sewage disposal, drainage structures, erosion control and sedimentation control devices, public improvements of open space, and, in the case of site plans only, landscaping and other on-site improvements.

3. The applicant shall file with the City Clerk a performance guarantee in favor of the City of Jersey City insuring the installation of all uncompleted improvements on or before an agreed upon date. The cost of installation of the required improvements shall be estimated by the City Engineer pursuant to N.J.S.A. 40:55D-53, and the amount of the performance guarantee shall be of an amount equal to one hundred twenty percent (120%) of this estimated cost. Ten percent (10%) of the performance guarantee must be in the form of cash.

4. The form and sufficiency of the guarantee shall be subject to approval of the City Attorney. Performance guarantees shall be expressly conditioned upon the developer's full compliance with all City ordinances and regulations governing the installation of improvements and utilities and faithful performance of the terms of any developer's agreement with the City.

5. The time allowed for installation of the improvements for which the performance guarantee has been provided may be extended by the City Council by resolution. As a condition or as part of any such extension, the amount of any performance guarantee shall be increased or reduced, as the case may be, to an amount equal to one hundred twenty percent (120%) of the cost of the installation as determined by the City Engineer pursuant to N.J.S.A. 40:55D-53 as of the time of the passage of the resolution.

6. If the required improvements are not completed or corrected in accordance with the performance guarantee, the obligor and surety, if any, shall be liable thereon to the City for the reasonable cost of the improvements not completed or corrected, and the City may either prior to or after the receipt of the proceeds thereof complete such improvements. Such completion or correction of improvements shall be subject to the public bidding requirements of the "Local Public Contracts Law."

7. Upon substantial completion of all required street improvements (except the top course) and appurtenant utility improvements, and the connection of same to the public system, the obligor may notify the City Council in writing, by certified mail addressed in care of the City Clerk, that the City Engineer prepare, in accordance with the itemized cost estimate prepared by the City Engineer and appended to the performance guarantee, a list of all uncompleted or unsatisfactory completed improvements. If such a request is made, the obligor shall send a copy of the request to the City Engineer. The request shall indicate which improvements have been completed and which improvements remain uncompleted in the judgment of the obligor. Thereupon the City engineer shall inspect all improvements covered by obligor's request and shall file a detailed list and report, in writing, with the City Council, and shall simultaneously send a copy thereof to the obligor not later than forty-five (45) days after receipt of the obligor's request.

8. The list prepared by the City Engineer shall state, in detail, with respect to each improvement determined to be incomplete or unsatisfactory, the nature and extent of the incompleteness of each incomplete improvement or the nature and extent of, and remedy for, the unsatisfactory state of each completed improvement determined to be unsatisfactory. The report prepared by the City Engineer shall identify each improvement determined to be complete and satisfactory together with a recommendation as to the amount or reduction to be made in the performance guarantee relating to the completed and satisfactory improvement, in accordance with the itemized cost estimate prepared by the City Engineer and appended to the performance guarantee.

9. The City Council, by resolution, shall either approve the improvements determined to be complete and satisfactory by the City Engineer, or reject any or all of these improvements upon the establishment in the resolution of cause for rejection, and shall approve and authorize the amount of reduction to be made in the performance guarantee relating to the improvements accepted, in accordance with the itemized cost estimate prepared by the City Engineer and appended to the performance guarantee. This resolution shall be adopted not later than forty-five (45) days after receipt of the list

and report prepared by the City Engineer. Upon adoption of the resolution by the City Council, the obligor shall be released from all liability pursuant to its performance guarantee, with respect to those approved improvements, except for that portion adequately sufficient to secure completion or correction of the improvements not yet approved; provided that thirty percent (30%) of the amount of the total performance guarantee posted may be retained to ensure completion and acceptability of all improvements.

10. For the purpose of releasing the obligor from liability pursuant to its performance guarantee, the amount of the performance guarantee attributable to each approved improvement shall be reduced by the total amount of each such improvement, in accordance with the itemized cost estimate prepared by the City Engineer and appended to the performance guarantee, including any contingency factor applied to the cost of installation. If the sum of the approved improvements would exceed seventy percent (70%) of the total amount of the performance guarantee, then the City may retain thirty percent (30%) of the amount of the total performance guarantee to ensure completion and acceptability of all improvements, as provided above.

11. If the City Engineer fails to send or provide the list and report as requested by the obligor pursuant to subsection (G) of this section within forty-five (45) days from receipt of the request, the obligor may apply to the court in a summary manner for an order compelling the City Engineer to provide the list and report within a stated time and the cost of applying to the court, including reasonable attorney's fees, may be awarded to the prevailing party.

12. If the City Council fails to approve or reject the improvements determined by the City Engineer to be complete and satisfactory or reduce the performance guarantee for the complete and satisfactory improvements within forty-five (45) days from the receipt of the City Engineer's list and report, the obligor may apply to the court in a summary manner for an order compelling, within a stated time, approval of the complete and satisfactory improvements and approval of a reduction in the performance guarantee for the approvable complete and satisfactory improvements in accordance with the itemized cost estimate prepared by the City Engineer and appended to the performance guarantee; and the cost of applying to the court, including reasonable attorneys fees, may be awarded to the prevailing party.

13. In the event that the obligor has made a cash deposit with the City as part of the performance guarantee, then any partial reduction granted in the performance guarantee pursuant to this subsection shall be applied to the cash deposit in the same proportion as the original cash deposit bears to the full amount of the performance guarantee.

14. If any portion of the required improvements are rejected, the City Council may require the obligor to complete or correct such improvements and, upon completion or correction, the same procedure of notification, as set forth in this section shall be followed.

15. Nothing herein, however, shall be construed to limit the right of the obligor to contest by legal proceedings any determination of the City Council or the City Engineer.

16. In the event that final approval is by stages or sections of development, the provisions of this section shall be applied by stage or section.

17. To the extent that any of the improvements have been dedicated to the City on the subdivision plat or site plan, the City Council shall be deemed upon the release of any performance guarantee required, to accept dedication for public use of streets or roads and any other improvements made thereon according to site plans and subdivisions plats approved by the Board, provided that such improvements have been inspected and have received final approval by the City Engineer.

B. Maintenance Guarantees Required.

1. Upon completion and acceptance by the City Council of the required improvements or a portion of such improvements, the developer may be required to post a maintenance guarantee with the City Council for a period not to exceed two years after final acceptance of the improvement, in an amount not to exceed fifteen percent (15%) of the cost of the improvement, as determined by the City Engineer pursuant to N.J.S.A 40:55D-53.

2. The form and sufficiency of the maintenance guarantee shall be approved by the City Attorney. The maintenance guarantee for an improvement shall be posted upon final release by the City Council of the performance guarantee for that improvement and shall be expressly conditioned upon the maintenance by the developer of such improvement for a period of two years, and particularly shall guarantee the remedy of any defects in such improvement which occur during that period.

3. Maintenance of Landscaped Areas. All landscaped areas must be properly maintained. In the event that an applicant shall at any time after the issuance of a certificate of occupancy fail to maintain any landscaped areas, the Zoning Official shall serve written notice setting forth any failure to maintain said landscaped area in a reasonable condition, and said notice shall include a demand that such deficiencies be cured within four weeks thereof and shall state the date and place of any hearing thereon which may be held. If the deficiencies set forth in the original notice or in any modification thereof are not cured within said four weeks or any extension thereof the Zoning Official, in order to preserve the taxable value of the surrounding property and to prevent the landscaped areas from becoming a public nuisance, shall revoke the zoning permit issued to said premises until such time as the deficiencies are cured.

4. In the event that other governmental agencies or public utilities automatically will own the utilities to be installed or the improvements are covered by a performance or maintenance guarantee to another governmental agency, no performance or maintenance guarantee, as the case may be, shall be required by the City for such utilities or improvements.

5. Appeal Procedure for Disputed Guarantee Amounts. The cost of the installation of improvements shall be estimated by the City Engineer based on documented construction costs for public improvements prevailing in the general area of the City. The developer may appeal the City Engineer's estimate to the county construction board of appeals.

C. Acceptance of Guarantee. The City Council shall accept a performance guarantee or maintenance guarantee which is an irrevocable letter of credit if it:

1. Constitutes an unconditional payment obligation of the issuer running solely to the City for an express initial period of time in the amount determined pursuant to subsection (A) of this section;

2. Is issued by a banking or savings institution authorized to do and doing business in this State;

3. Is for a period of time at least one year; and

4. Permits the City to draw upon the letter of credit if the obligor fails to furnish another letter of credit which complies with the provisions of this section thirty (30) days or more in advance of the expiration date of the letter of credit or such longer period in advance thereof as is stated in the letter of credit.

ARTICLE VIII
Enforcement, Violations and Penalties

§ 345-76. Enforcement.

A. Zoning Officer. It shall be the duty of the Zoning Officer and his or her staff to administer and enforce this chapter. No structure shall be erected without a building permit and no structure or lot shall use or have its use changed so as to be in violation of this chapter, In no case shall a building permit be issued for the construction or alteration of any structure nor shall a certificate of occupancy be issued for a new occupant with a new use, or new use by the present occupant, until the proposed construction or alteration or use conforms to the provisions of this chapter. It shall be the duty of the Zoning Officer to cause any structures, plans or premises to be inspected or examined and order the owner in writing that any condition be remedied which is found to exist in violation of any provisions of this chapter. It shall be the duty of the Zoning Officer to keep a record of all applications and all permits which are either issued or denied, with notations of any conditions involved, which data shall form a part of the City public records.

B. Building Permits. Applications for building permits shall be submitted in a form required by the Building Code of Jersey City and with sufficient data to confirm conformance with all applicable portions of this chapter. Building permit applications shall also be accompanied by an approved site plan as required by this chapter prior to the granting of a building permit.

C. Certificate of Occupancy.

1. It shall be unlawful to use or permit the use of any structure or part thereof, hereafter erected, enlarged, moved or changed to another use, wholly or in part, or occupied by a new use until a certificate of occupancy shall have been issued by the Construction Code Official. No certificate of occupancy shall be issued for any new building or part thereof until all streets, drainage, parking, loading, water, sewer and other items shown on a site plan or subdivision are properly completed and functioning. Such certificate shall show that such structure or part of a structure and the proposed use thereof conform to the requirements of this chapter and all approvals granted pursuant thereto,

the Uniform Construction Code, all other applicable City ordinances, regulations and directives and all applicable county, state and federal laws and regulations. It shall be the duty of the Construction Code Official to fully issue a certificate of occupancy only when he or she has received written confirmation from the Zoning Officer that the structure or part of a structure and the proposed use thereof conform to this chapter; and when he or she is satisfied that the structure conforms to all other applicable codes and ordinances of the city.

2. Should the zoning officer decline to approve a structure based on the provisions of this chapter, his or her reasons for doing so shall be so stated on two copies of this application and one copy returned to the applicant.

3. Revocation. On the serving of notice of any violation of any of the provisions or requirements of this chapter with respect to any structure or use thereof, or of land, as provided below, the certificate of occupancy for such use shall thereupon, without further action, be null and void, and a new certificate of occupancy shall be required for any further use of such structure or land.

D. Historic Preservation. All permit applications affecting historic districts, landmarks, buildings, structures, objects, sites or landscape features shall promptly be referred to the Zoning Officer and Historic Preservation Officer for review and appropriate action prior to permit issuance.

E. Certificates of Non-Conformity. The prospective purchaser, prospective mortgagee, or any other person interested in any land upon which a nonconforming use or structure exists may apply in writing for the issuance of a certificate certifying that the use or structure existed before the adoption of the ordinance which rendered the use or structure nonconforming. The applicant shall have the burden of proof. Application pursuant hereto may be made to the administrative officer within one year of the adoption of the ordinance which rendered the use or structure nonconforming or at any time to the board of adjustment.

F. Plan Review and Determination. The real or prospective owner and/or developer of any land may apply in writing for the issuance of a plan review and determination certifying that submitted plans comply with the provisions of this chapter, redevelopment plan or deviation/variance therefrom duty authorized. **[Added 11-10-2015 by Ord. No. 15-147]**

G. Zoning Determination. The real or prospective owner and/or developer of any land may apply in writing for the issuance of a zoning determination letter signed by the zoning officer, which acknowledges that such use, structure or building complies with the provisions of this chapter, redevelopment plan or deviation/variance therefrom duly authorized. **[Added 11-10-2015 by Ord. No. 15-147]**

H. Pre-existing Curbcut Determination. The real owner, prospective purchaser, prospective mortgagee, or any other person interested in any land may apply in writing for the issuance of a pre-existing curbcut determination certifying that a curbcut exists legally before the adoption of the ordinance which rendered the curbcut nonconforming or a deviation/variance therefrom was duly authorized. The applicant shall have the burden of proof. **[Added 11-10-2015 by Ord. No. 15-147]**

I. Fees. The Zoning Officer and Division of Zoning Enforcement may establish fees to cover adminis-

trative costs for the issuance of permits, determinations, certificates and authorizations. **[Added 11-10-2015 by Ord. No. 15-147]**

J. The Department of Public Safety may supplement enforcement of only those sections of this chapter that are concurrently within the jurisdiction of the Municipal Court. **[Added 9-23-2020 by Ord. No. 20-074]**

§ 345-77. Violations and penalties.

A. Any person, firm or corporation who violates, disobeys, omits, neglects or refuses to comply with or who resists the enforcement of any of the provisions of this chapter or any order, decision or determination by the Board of Adjustment and who refuses to abate said violation within ~~fourteen (14)~~ twenty-one (21) days after written notice has been served upon them by registered mail or by personal service shall, for each and every violation, be punishable as provided in Chapter 1, General Provisions. Each and every day that such violation continues after such notice shall be considered a separate and specific violation of this chapter without the service of an additional notice. If any person shall undertake any activity vis-à-vis an individual landmark or landmark building, structure, object, site, or landmark feature within a historic district, without first having obtained a certificate of appropriateness or a certificate of no effect, such person shall be deemed in violation of this Article. Fines not paid within the time period set by law shall convert to a tax lien placed against the property and shall be recorded with the Jersey City Property Tax Office and the Hudson County Register of Deeds and Mortgages. **[Amended 4-25-2007 by Ord. No. 07-063]**

B. In case any building or structure is erected, constructed, reconstructed, altered, moved, repaired, converted, maintained or used or any land is used in violation of or contrary to the provisions of this chapter or any order, decision or determination by the Board of Adjustment, the city may institute any appropriate action or proceeding in City, county or state court to prevent such unlawful erection, construction, reconstruction, alteration, repair, conversion, maintenance or use; to restrain, correct or abate such violation; to prevent the occupancy of said building structure or land; or to prevent any illegal act, conduct, business or use in or about such premises.

C. Any citizen of the city may notify the Construction Official in writing of conditions in violation of this chapter. An appeal may be made to the governing body in writing and thereafter to the courts.

APPENDIX

Chapter A350

COUNCIL RULES OF ORDER*

§ A350-1. Rules of procedure of Council.
§ A350-2. Rule I: Governing rules.
§ A350-3. Rule II: Regular meetings of Council.
§ A350-4. Rule III: Caucus.
§ A350-5. Rule IV: Special meetings.
§ A350-6. Rule V: Agenda - Consent agenda.
§ A350-7. Rule VI: Presiding officers; president; temporary president pro tem; duties.
§ A350-8. Rule VI.i: Maintaining order.
§ A350-9. Rule VII: Parliamentarian; City Clerk.
§ A350-10. Rule VIII: Corporation Counsel.
§ A350-11. Rule IX: Call to order.
§ A350-12. Rule X: Roll call.
§ A350-13. Rule XI: Quorum.
§ A350-14. Rule XII: Order of business.
§ A350-15. Rule XIII: Reading of minutes.
§ A350-16. Rule XIV: Rules of debate.
§ A350-17. Rule XV: Voting.
§ A350-18. Rule XVI: Addressing Council.
§ A350-19. Rule XVII: Manner of addressing Council.
§ A350-20. Rule XVIII: Decorum.
§ A350-21. Rule XIX: Enforcement of decorum.
§ A350-22. Rule XX: Council rail; persons authorized.
§ A350-23. Rule XXI: Special committees.
§ A350-24. Rule XXII: Ordinances; resolutions; motions; number of votes; veto; emergency ordinance.
§ A350-25. Rule XXIII: Nominations.
§ A350-26. Rule XXIV: Reports, filing.
§ A350-27. Rule XXV: Adjournment.
§ A350-28. Rule XXVI: Ordinances, certification of passage.
§ A350-29. Rule XXVII: Minutes of Council meetings.

§ A350-1. Rules of procedure of Council.

The following rules of procedure in §§ A350-2 through A350-28 shall govern the conduct of the meetings of the Municipal Council of the City of Jersey City, New Jersey.

§ A350-2. Rule I: Governing rules.

Except as may be provided in the Charter, questions of order, the methods of organization and the conduct of business of the Municipal Council shall be governed by the rules of the House of Representatives of the United States in all cases to which they are applicable, and in which they are not inconsistent with the rules of the Council.

*History—Adopted by the Council of the City of Jersey City during codification; see Ch. 1, General Provisions, Art. II. Subsequent amendments noted where applicable.

§ A350-3. Rule II: Regular meetings of Council. [Amended 12-10-2025 by Ord. No. 25-127]

A. The Council shall hold its regular meetings each year during the months of January through December inclusive, except for the months of July, August, and December on the second and fourth Wednesdays of each month at 6:00 p.m. The Council may, if it chooses to, hold a caucus one-half hour prior to the regular meetings.

B. In the months of July, August, and December of each year, there shall be only one regular meeting for each of said months.

C. The aforesaid regular meeting shall be held at the time set forth herein or as near to the times set forth as practicable.

D. Whenever the day fixed for any such regular meeting falls upon a day designated by law as a legal holiday, or upon a day when more than four members of the governing body are attending a state or national conference or convention, such meeting shall be held at the same hour on the next succeeding day, not a holiday. Notwithstanding the foregoing, the Council, for good and sufficient reasons, may adjourn a regular scheduled Council meeting to another date and time in the month by setting a date and time for this rescheduled meeting at the previous regular meeting of the Council.

E. All regular and special meetings of the Council shall be held in the Council Chamber on the second floor of the City Hall of the city. The Council by a two-thirds vote of its members may at any preceding meeting move to dispense with the next following semimonthly meeting, but there shall at all times be at least one monthly regular meeting.

F. The Council may, by resolution duly adopted by at least five affirmative votes, designate a different place from the City Hall to hold any particular or special meeting. Upon the adoption of any such resolution, the City Clerk shall give due and timely notice to the public and to all city officials concerned of the time and place of the meeting as so designated in the resolution. Such notice shall be given in accordance with the Open Public Meetings Act, N.J.S.A. 10:4-6 et seq.

§ A350-4. Rule III: Caucus.

Premeeting caucuses. The Council shall hold premeeting caucuses on the Monday of the week in which a regular meeting of Council is held, or such other day as may be set by majority of the Council. The time of such premeeting caucus shall be fixed by the President. When the day fixed for any premeeting conference falls upon a day designed by law as a legal holiday, such meeting shall be held on a day to be scheduled by the President of the Council. All premeeting conferences shall be held in a room or place selected the Council. All such premeeting conferences (caucuses) shall be open to the public. In the event that said regular premeeting conference day is changed by a majority of the Council, the public shall be notified of any change at least forty-eight (48) hours prior to such preconference meeting.

§ A350-5. Rule IV: Special meetings.

A special meeting of the Council may be called by the President or by a majority of the members of the Council. Whenever a special meeting shall be called by the President of the Council, a notice in writing signed by the President shall be served on the Clerk, and whenever a special meeting shall be called by a

majority of the members of the Council, a notice in writing signed by such majority shall be served on the Clerk. The Clerk shall forthwith serve a written notice upon each member of the Council at his or her place of residence, stating the date and hour of the meeting and the purpose for which such meeting is called, and no other business shall thereat be transacted. The Clerk in his or her notice of a special meeting shall allow at least twenty-four (24) hours to elapse between the call of the meeting and the date and hour of the meeting. Whenever an emergency exists which requires immediate action by the Council, the Mayor may call a meeting by notifying the Clerk, or, in his or her absence, the President of the Council, who shall cause the Council to meet on short notice in special meeting for the purpose.

§ A350-6. Rule V: Agenda - Consent agenda. [Amended 3-24-2010 by Ord. No. 10-042; 5-12-2010 by Ord. No. 10-063; 12-19-2012 by Ord. No. 12-155]

A. Agenda. All reports, communications, ordinances, resolutions or other matters to be submitted to the Council by the administration or by Council Members must by 3:00 p.m. on Wednesday preceding each Council meeting be delivered to the Clerk, whereupon the Clerk shall immediately prepare a calendar of such matters together with such additional matters that he or she may have to present. He or she shall furnish a copy of the calendar to each member of the Council, the Mayor, the Business Administrator and the Corporation Counsel, prior to the Council meeting, and as far in advance of the meeting as time will permit. No item shall be added to an agenda unless it has been timely submitted in accordance with this rule. However, a late item may be added at a meeting and this rule suspended only for reasons of emergency, and by an affirmative vote of at least six Council Members in accordance with N.J.S.A. 40:69A-181(b). **[Amended 12-10-2025 by Ord. No. 25-127]**

B. All ordinances and resolutions which authorize the sale, conveyance or leasing of any interest in real property; or authorize the acquisition or grant of a license or easement in real property; or grant real estate tax exemptions or tax abatements; or authorize the settlement or termination of legal proceedings affecting real property; or authorize the construction, rehabilitation, repair or demolition of real property; or repeal or cancel any ordinance or resolution referred to in this subsection shall contain both the lot and block number and the street address of such real property.

C. All ordinances, resolutions, claims, contract documents and all other legal documents shall bear the stamp and signature of the corporation counsel approving the same pursuant to law prior to their consideration by the Council. No legal document shall be signed by the Mayor or administrative heads until the approval of the Corporation Counsel is appended thereto.

D. Consent agenda. Items of business which the Council at its premeeting conferences has determined to be routine and which do not require discussion shall be included under a single section of the calendar known as the "consent agenda." Such items may be adopted, approved or introduced, as the case may be, upon motion by a single roll call vote in accordance with the rules of procedure of the Council.

E. The consent agenda section of the calendar shall be preceded by an explanatory note substantially as follows:

"All matters listed under Subsection B and D, Consent agenda, are considered routine by the Municipal Council and will be enacted by one (1) motion in the form listed below. There will be no separate discussion of these items. If discussion is desired on any item and permitted by the Council, that item will be considered separately."

§ A350-7. Rule VI: Presiding officers; president; temporary president pro tem; duties.

A. Election and duties. The presiding officer of the Council shall be the President, who shall be elected at the organization meeting, and he or she shall preside at its meetings and perform such other duties as the Council may prescribe. In the absence of the President, a temporary President Pro Tem shall be selected by the Council for a period to be determined by the Council, and shall then preside over the Council. The President shall assume the chair of the presiding officer immediately after his or her election.

Editor's note—Please see § 3-4, Organization; president; President Pro Tem, for term.

B. The presiding officer shall preserve strict order and decorum at all regular and special meetings of the Council. He or she shall state every question coming before the Council and announce the decision of the Council on all matters coming before it. A majority vote of the members of the Council present shall govern except as specifically provided otherwise by law. The President shall sign all ordinances and resolutions adopted by the Council during his or her presence. In the event of the absence of the President, such ordinances and resolutions shall be signed by the temporary President Pro Tem. In the absence of the President Pro Tem, the temporary presiding officer shall sign such ordinances and resolutions adopted by the Council.

§ A350-8. Rule VI.i: Maintaining order. [Added 1-9-2013 by Ord. No. 12-160]

In addition to the Presiding Officer who is required to preserve strict order and decorum at all meetings under Rule A350-7, a police officer shall be assigned to attend at all council meetings and remain in attendance for thirty (30) minutes following its adjournment.

§ A350-9. Rule VII: Parliamentarian; City Clerk. [Amended 1-9-2013 by Ord. No. 12-160]

The Clerk, or his or her designee in his or her absence, shall act as Parliamentarian and shall advise and assist the presiding officer in matters concerning the rules of order and procedure of the Council.

Editor's note—Ord. No. 12-160, adopted January 9, 2013, amended the Code by adding a new § A350-8, and renumbering former §§ A350-8—A350-28 as new §§ A350-9—A350-29.

§ A350-10. Rule VIII: Corporation Counsel. [Amended 1-9-2013 by Ord. No. 12-160]

The Corporation Counsel or his or her First Assistant, or their designee, shall be available to the Council at all regular and special meetings. He or she, or his or her designee, shall draw ordinances or resolutions for any member of the Council when and as requested, pursuant to law.

Note—Former § A350-9. See editor's note, § A350-9.

§ A350-11. Rule IX: Call to order. [Amended 1-9-2013 by Ord. No. 12-160]

The President shall take the chair at the hour appointed for the meeting and shall immediately call the Council to order. If the President is absent and there is a quorum present, the Council shall elect a temporary President who shall preside until the President arrives. Upon the arrival of the President, the temporary President shall forthwith relinquish the chair upon the conclusion of the business immediately before the Council.

Note—Former § A350-10. See editor's note, § A350-9.

§ A350-12. Rule X: Roll call. [Amended 1-9-2013 by Ord. No. 12-160; 12-10-2025 by Ord. No. 25-127]

Before proceeding with the business of the Council, the Clerk or his or her designee shall call the roll of the members in alphabetical order by ward designation, then Council members at large in alphabetical order by name, then the Council President and the names of those present shall be entered in the minutes.

Note—Former § A350-11. See editor's note, § A350-9.

§ A350-13. Rule XI: Quorum. [Amended 1-9-2013 by Ord. No. 12-160]

A. A majority of the full membership of the Council shall constitute a quorum. No ordinance shall be adopted by the Council without the affirmative vote of a majority of the full membership thereof, and all other matters may be adopted by a majority of the members present, except as specifically provided otherwise by law.

B. Should no quorum attend within one hour after the hour appointed for the meeting of the Council, the President, or in his or her absence the Clerk or his or her designee, may thereupon adjourn the meeting until the next day, unless by unanimous agreement those members present select another hour or day. The names of the members present and their action at such meeting shall be recorded in the minutes by the Clerk.

Note—Former § A350-12. See editor's note, § A350-9.

§ A350-14. Rule XII: Order of business. [Amended 1-9-2013 by Ord. No. 12-160; 12-10-2025 by Ord. No. 25-127]

All regular and special meetings of the Council shall be open to the public. Promptly at the hour set forth for each meeting, the members of the Council and, subject to Rule V (§ A350-6), the Clerk shall take their regular stations in the Council Chamber, and the business of the Council shall be taken up for consideration and disposition in the following order, unless otherwise ordered by the Council.

A. Roll call.

B. Invocation.

C. Salute to the Flag.

D. Statement in Compliance with the Sunshine Law.

E. Reception Bid - Consent Agenda.

F. Ordinances - First reading.

G. Ordinances - Second reading.

H. Public Hearing on Special Improvement District assessment roll and budget.

I. Public Request for Hearing.

J. Petitions and Communications.

K. Officers' Communications.

L. Reports of Directors.

M. Claims.

N. Resolutions.

O. Tabled Agenda.

P. Adjournment.

Note—Former § A350-13. See editor's note, § A350-9.

§ A350-15. Rule XIII: Reading of minutes. [Amended 1-9-2013 by Ord. No. 12-160]

Unless a reading of all or a portion of the minutes of a previous Council meeting is requested by a majority of the Council, such minutes when signed by the President and the Clerk shall be considered approved without reading.

Note—Former § A350-14. See editor's note, § A350-9.

§ A350-16. Rule XIV: Rules of debate. [Amended 1-9-2013 by Ord. No. 12-160]

A. Question under consideration. When a question is presented and seconded it is under consideration, and no motion shall be received thereafter, except to adjourn, to lay on the table, to postpone or to amend, until the question is decided. These motions shall have preference in the order in which they are mentioned and the first two (2) shall be decided without debate. Oral amendments to a resolution may be adopted, but the Clerk shall, after the meeting and as soon as possible thereafter, reduce the amendment to writing, as the minutes reflect the oral amendment. If there is any doubt as to the proper wording and intent of the amendment, the Clerk shall confer with the Corporation Counsel for his or her approval. When the resolution as amended is reduced to writing, it shall be appended to and become a part of the original resolution.

B. As to the President. The President or such other member of the Council as may be temporarily presiding may move, second, debate and vote from the chair, subject only to such limitations of debate as are by these rules imposed upon all members; and he or she shall not be deprived of any of the rights and privileges of a Council member by reason of his or her being the presiding Chairperson.

C. Getting the floor; improper reference to be avoided. A member of the Council desiring to speak for any purpose whatsoever shall address the presiding officer and, upon recognition, shall confine himself or herself to the question under debate, avoiding all personalities and indecorous language (in which event a member may be silenced). A member may only speak to clear up a matter of fact or explain a material part of his or her speech, except that a member after moving a question may once again speak on the same subject.

D. Interruption. A member, once recognized, shall not be interrupted when speaking unless it shall be to call him or her to order or as herein otherwise provided. If a member while speaking shall be called to order, he or she shall cease speaking until the question of order shall be determined by the presiding officer, and, if in order, he or she shall be permitted to proceed. Any member may appeal to the

Council from the decision of the Chairperson upon a question of order, when without debate the Chairperson shall submit to the Council the question "Shall the decision of the chair be sustained," and the Council shall decide by a majority vote.

E. Privilege of closing debate. The Council member moving the adoption of an ordinance or resolution shall have the privilege of closing the debate, although he or she may have already spoken thereon at its moving.

F. Roll call. Upon any roll call there shall be no discussion or explanation given by any member voting, and he or she shall vote yes or no unless he or she shall first receive special permission from the Council to explain his or her vote. A member of the Council may abstain from voting on any matter. An abstention, for all purposes, shall not be counted either as an "aye" or "nay" vote. An abstention shall not be counted either as a vote for or a vote against the particular matter in which the abstention is given. The Council member abstaining from the vote shall be deemed to have taken a strict neutral position on the matter.

Note—Former § A350-15. See editor's note, § A350-9.

§ A350-17. Rule XV: Voting. [Amended 1-9-2013 by Ord. No. 12-160]

A. Voting shall be taken electronically, or in the absence of an electronic device by roll call. If not taken electronically, the vote upon every motion, resolution or ordinance shall be taken in the following order: **[Amended 12-10-2025 by Ord. No. 25-127]**

(1) Ward Council members in alphabetical order by ward designation.

(2) Council members at large in alphabetical order by name.

(3) The Council President.

B. The vote by yeas and nays shall be entered upon the minutes. Resolutions and ordinances shall be signed by the presiding officer at such meetings and by the Clerk before they are entered upon the minutes; the votes of the members of the Council shall be recorded on the original copies to be filed with the Clerk.

Note—Former § A350-16. See editor's note, § A350-9.

§ A350-18. Rule XVI: Addressing Council. [Amended 1-9-2013 by Ord. No. 12-160; 12-10-2025 by Ord. No. 25-127]

Any person may address the Council on any subject of interest during the Public Request for Hearing portion of each Council meeting. Anyone who wishes to address the Council during this portion of the meeting must register with the City Clerk no later than two hours (2) hours prior to the scheduled start of the Council meeting by providing their name, and telephone number to the City Clerk through the City's webpage.

Note—Former § A350-17. See editor's note, § A350-9.

§ A350-19. Rule XVII: Manner of addressing Council. [Amended 12-8-1993 by Ord. No. 93-958; 1-9-2013 by Ord. No. 12-160; 12-10-2025 by Ord. No. 25-127]

A. Recognition by presiding officer. No person shall begin addressing the Council without first being recognized by the Council President.

B. Each person addressing the Council shall step up to the microphone provided for use of the public, give his or her name in an audible tone of voice for the record, state the subject he or she wishes to discuss and state whom he or she is representing. All remarks shall be addressed to the Council President; no remarks shall be addressed to the other members of the Council without the permission of the Council President and the member to be addressed. No person other than members of the Council and the person having the floor shall be permitted to enter into any discussion, either directly or through a member of the Council, without the permission of the Council President. No question may be asked a Council member or a member of the city staff without the permission of the Council President.

C. Each person addressing the Council, whether during the public portion of the meeting or during the public hearing on second reading ordinances, shall limit his or her remarks to three minutes. After a person has spoken for three minutes, the Council President shall notify him or her that his or her time has expired, and the City Clerk shall call the name of the next person to address the Council. The Council shall relax this time limitation for Budget Hearings only. Those citizens wishing to address the Council on the adoption of the budget or any amendments to the budget, shall be permitted to speak for up to five minutes. The countdown timer shall not be stopped for any questions asked during the public hearing, unless the Council President gives the explicit direction to stop the time. The Council President and the Council may elect not to answer questions during the public hearing portion. **[Amended by 2-26-2020 by 20-018]**

D. Spokesperson for a group of persons. In order to expedite discussion and to avoid repetitious presentations, whenever any group of persons is to address the Council on the same subject, the Council President may request that a spokesperson be chosen by the group to address the Council; and, if additional matters are to be presented by any other member of this group, to limit the number of persons addressing the Council.

E. After motion. After a motion has been made to close the public hearing on any ordinance, no member of the public shall address the Council from the audience on the matter under consideration without first securing permission to do so by majority vote of the City Council.

Note—Former § A350-18. See editor's note, § A350-9.

§ A350-20. Rule XVIII: Decorum. [Amended 1-9-2013 by Ord. No. 12-160]

A. Council members. While the Council is in session, the members shall observe order and decorum. A Council member shall neither, by conversation or otherwise, delay or interrupt the proceedings of the Council nor disturb any member while speaking or refuse to obey the orders of the Council President. Members of the Council shall inform the Council President before leaving their seats during a Council meeting.

B. Employees. Members of the city staff shall observe the same rules of order and decorum which apply to the Council.

C. Persons addressing the Council. Any person making personal, slanderous or profane remarks or who willfully utters loud, threatening or abusive language or engages in any disorderly conduct which disrupts or disturbs the orderly conduct of any meeting shall be called to order by the Council President. If such conduct continues the Council President may, at his or her discretion, order such person barred from further audience before the Council during that meeting.

D. Members of the audience. No person in the audience shall engage in disorderly conduct such as hand clapping, stamping of feet, whistling, using profane language, shouting and other similar demonstrations which disturb the peace and order of the Council Meeting.

E. Videotaping, audiotaping and photographing. Any person may videotape, audiotape or photograph the proceedings of the Municipal Council. Such conduct should be unobtrusive so as not to interfere with the proceedings. The Council President or City Clerk may direct the activities of such persons to ensure an orderly meeting.

Note—Former § A350-19. See editor's note, § A350-9.

§ A350-21. Rule XIX: Enforcement of decorum. [Amended 1-9-2013 by Ord. No. 12-160]

A. Warning. All persons shall, at the request of the Council President, be silent. If after receiving a warning from the Council President a person persists in disturbing the meeting, the Council President may order him or her to leave the meeting. If he or she does not remove themselves, the Council President may order the Sergeant-at-Arms to remove them.

B. Removal. The Chief of Police, or such members of the Division of Police as the Council President may designate, shall be Sergeant-at-Arms at the Council meetings. He, she or they shall carry out all orders given by the Council President for the purpose of maintaining order and decorum at the Council meeting. On instruction of the Council President, the Sergeant-at-Arms shall remove from the meeting any person who disturbs the proceedings of the Council.

C. Resisting removal. Any person who resists removal by the Sergeant-at-Arms shall be charged with violating N.J.S.A. 2C:33-8, Disrupting meetings and processions.

Note—Former § A350-20. See editor's note, § A350-9.

§ A350-22. Rule XX: Council rail; persons authorized. [Amended 1-9-2013 by Ord. No. 12-160]

Persons authorized to be within the Council rail. No person, except City officers, shall be permitted within the rail in front of the Council or be permitted to disturb any Council member while on the dais, during any meeting, without express permission of the President of the Council. The Corporation Counsel and City Clerk, or their designees, may speak to any member of the Council on pertinent pending matters before the Council.

Note—Former § A350-21. See editor's note, § A350-9.

§ A350-23. Rule XXI: Special committees. [Amended 1-9-2013 by Ord. No. 12-160]

A. All special committees and the Chairmen thereof shall be appointed by the presiding officer of the Council or by a majority vote of the Municipal Council at a regular meeting.

B. A special committee shall consist ordinarily of no more than six (6) members of the Council, including the President, who shall be a member ex officio of all special committees. The President may, whenever he or she deems it necessary, appoint a special committee consisting of all or less of the members of the Council. A quorum of each special committee appointed shall consist of a majority of the members thereof.

C. Meetings of special committees shall not be held during Council meetings.

Note—Former § A350-22. See editor's note, § A350-9.

§ A350-24. Rule XXII: Ordinances; resolutions; motions; number of votes; veto; emergency ordinance. [Amended 1-9-2013 by Ord. No. 12-160; 12-10-2025 by Ord. No. 25-127]

A. Preparation of ordinances. The Corporation Counsel or his or her designee, when requested, shall prepare ordinances or resolutions which shall be delivered to the Clerk. A copy of the same shall be forthwith furnished to each member of the Council by the Clerk.

(1) Ordinances may be introduced and adopted by Title and shall be read in full by the Clerk or his or her designee before consideration by the Council on second and final reading, except as otherwise provided by law, including N.J.S.A. 40:49-2.

(2) Every ordinance after introduction and adoption on first reading shall be published in full together with a notice as required by law, and said publication shall be at least ten (10) days prior to the time fixed for further consideration for second and final passage. At the time and place so specified in such notice, all persons interested shall be given an opportunity to be heard thereon.

B. The agenda for each meeting shall be posted on the City's website on the Friday preceding each Council meeting. Ordinances and resolutions shall be posted on the City's website least 24 hours prior to consideration by the Council. Resolutions may be introduced and adopted by title only; resolutions which are so posted in accordance with this rule shall not be read in full by the Clerk for consideration by the Council, unless a member of the Council requests such a reading. Resolutions submitted as late items to the City Clerk within 24 hours of a Council Meeting shall be read in full prior to consideration by the Council, unless the President of the Council deems such reading unnecessary. Failure to comply with the provisions of this subsection shall not affect the validity of any resolution.

C. Prior approval by administrative heads of departments. All ordinances and resolutions before presentation to the Council by the Mayor or the Business Administrator shall have been reduced to writing. Every ordinance and resolution except those requested by members of the City Council shall bear the name and signature of the city official requesting it. Prior to presentation to the Corporation Counsel, they shall have first been referred for a report on the accuracy of facts to the Director of the Department under whose jurisdiction the ordinance or resolution would devolve. Said report shall be in writing where practicable. The Department Director shall forward his or her report together with a copy of the ordinance or resolution to the Legislative Review Committee of the Council for its review. Thereafter, but before introduction by the Council, the same shall be approved, pursuant to law, by the Corporation Council or his or her designee.

D. Introducing for passage or approval. Ordinances, resolutions or other matters requiring action by the Council shall only be introduced by a member of the Council. When a Council member introduces an ordinance or resolution, his or her name shall appear on the same. All ordinances require a majority of a quorum for introduction. All resolutions require a majority of a quorum for approval.

E. Effective Period. All ordinances shall take effect 20 days after final passage and approval by the Mayor. Two-thirds of the Council may, however, declare an emergency by written resolution to reduce this 20-day period, except the period for bond ordinances shall not be reduced.

F. Adoption. Ordinances, other than bond ordinances, shall require five affirmative votes for adoption. Bond ordinances shall require six affirmative votes for adoption, except as otherwise provided by law.

G. Veto by the Mayor. Ordinances vetoed by the Mayor shall require six affirmative votes of the Council to override the veto.

H. Preparation. Ordinances amending any existing ordinances shall contain, in brackets, the part repealed, and the new part to be inserted shall be underscored.

I. Emergency resolutions. Emergency resolutions for appropriations and resolutions for budgetary transfers shall require six affirmative votes for adoption.

Note—Former § A350-23. See editor's note, § A350-9.

§ A350-25. Rule XXIII: Nominations. [Amended 1-9-2013 by Ord. No. 12-160]

A. Upon the receipt from the Mayor of his or her nomination to any office or position, the same shall be read under communications by the Clerk, or his or her designee, and unless otherwise ordered shall be considered by the Council under ""Report of Directors." When taken up for action the President shall put the question on each nomination as follows: "Will the Council confirm the nomination?" On that motion, a vote shall be ordered, and, if a majority or more members vote to confirm, the President shall announce: "The nomination is confirmed." If less than a majority of the members vote to confirm, the President shall announce: "The nomination is rejected." **[Amended 12-10-2025 by Ord. No. 25-127]**

B. Action by confirmation or rejection upon a nomination made by the Mayor shall not be postponed or delayed longer than for one regular meeting.

C. Within 24 hours after confirmation or rejection of a nomination, the Clerk shall, in writing, notify the Mayor of that fact.

Note—Former § A350-24. See editor's note, § A350-9.

§ A350-26. Rule XXIV: Reports, filing. [Amended 1-9-2013 by Ord. No. 12-160]

Reports and resolutions to be filed with City Clerk. All reports and resolutions shall be filed with the City Clerk and entered in the minutes.

Note—Former § A350-25. See editor's note, § A350-9.

§ A350-27. Rule XXV: Adjournment. [Amended 1-9-2013 by Ord. No. 12-160]

A motion to adjourn shall always be in order and decided without debate.

Note—Former § A350-26. See editor's note, § A350-9.

§ A350-28. Rule XXVI: Ordinances, certification of passage. [Amended 1-9-2013 by Ord. No. 12-160]

Certification of passage of ordinances over Mayor's veto. Whenever an ordinance has been vetoed by the Mayor and is passed by the Council over such veto in the manner provided by law, the City Clerk shall append to such ordinances a certification in substantially the following form:

> "I hereby certify that the above ordinance adopted by the Council of the City of Jersey City on the _____ day of _____ was vetoed by the Mayor of the City; and was passed over the said veto on the _____ day of _____.
> Dated: _____ City Clerk _____

Note—Former § A350-27. See editor's note, § A350-9.

§ A350-29. Rule XXVII: Minutes of Council meetings. [Amended 1-9-2013 by Ord. No. 12-160]

The minutes of each meeting of the Council shall be signed by the officer presiding at such meeting and by the City Clerk.

Note—Former § A350-28. See editor's note, § A350-9.

Chapter A351

EXECUTIVE ORDERS AND ORDINANCES

Executive orders and related ordinances, as arranged by position, shall be as follows:

Title	Labor	Executive Order	Date	Ord. No.	Adoption Date
Accountant	15	1990-McC-60	12-19-1990		
Account Clerk P/T	3.35-15.00	1987-C-205	05-18-1988

TABLE OF DATELINES

The following table lists all right-hand pages included in the Code of the City of Jersey City, together with the current dateline which should appear in the lower right-hand corner of each page. An asterisk (*) indicates a page which has not been changed since the original printing of the Code and thus reflects no dateline. A check against this table will ensure that your Code is current and up-to-date.

DISPOSITION LIST

DISPOSITION LIST

The following is a chronological listing of legislation of the City of Jersey City adopted since the publication of the Code, indicating its inclusion in the Code or the reason for its exclusion. [Enabling legislation which is not general and permanent in nature is considered to be non-Code material (NCM).] Information regarding legislation which is not included in the Code nor on this list is available from the office of the City Clerk. The last legislation reviewed for the original publication of the Code was Ord. No. 94-88, adopted 9-28-1994. A complete listing, including disposition, of all legislation reviewed in conjunction with the original publication of the Code is on file in the office of the City Clerk.

Ordinance Number	Date of Adoption	Description	Disposition
93-958(Res.)	12-08-1993	Amending Chapter 2 (Administrative Code) Subarticle I Council Rules of the Jersey City Code	A350-18 B., C.
