(b) The commissioner of the revenue is authorized to permit the payment in advance of the tax levied and imposed by this article by the method of placing imprints of the stamps upon original packages by the use of meter machines, in lieu of the method of paying such tax by the purchase and affixing of gummed stamps, and to prescribe and enforce the necessary regulations setting forth the method to be employed and the conditions to be observed in the use of such meter machines.

(Ord. No. 25,496, §§ 3, 8, 5-26-70)

In the event the printing by an authorized meter machine is used in lieu of gummed stamps, there shall be allowed a discount of six (6) percent of the denominational or face value of the imprints of such stamps so printed by the meter machine to cover the costs incurred in printing such imprints.

(Ord. No. 25,496, § 6, 5-26-70)

Sec. 24-313. Duties of dealers and sellers with respect to stamps.

(a) Every local dealer in cigarettes is hereby required, and it shall be his duty, to purchase such stamps at the office of the city treasurer as shall be necessary to pay the tax levied and imposed by this article, and to affix or cause to be affixed a stamp or stamps of the monetary value prescribed by this article to each package of cigarettes prior to delivery or furnishing of such cigarettes to any seller. Nothing herein contained shall preclude any dealer from using a stamp meter machine in lieu of gummed stamps to effectuate the provisions of this article.

(b) Every seller is hereby required to examine each package of cigarettes prior to exposing the same for sale, for the purpose of ascertaining whether such package has the proper stamps affixed thereto or imprinted thereon, as provided by this article. If upon such examination unstamped or improperly stamped packages of cigarettes are discovered, the seller, where such cigarettes were obtained from a local dealer, shall immediately notify such dealer, and upon such notification, such dealer shall forthwith affix to or imprint upon such unstamped or improperly stamped packages the proper amount of stamps, or shall replace such packages with others to which stamps have been properly fixed or imprinted thereon.

(c) Should a seller obtain or acquire possession of, from any person other than a local dealer, any unstamped or improperly stamped cigarettes, such seller shall, forthwith, before selling or offering or exposing such cigarettes for sale in the city, purchase and affix or cause to be affixed to such packages of cigarettes the proper stamps or the markings of a meter machine covering the tax imposed by this article.

(d) In the event any seller shall elect to purchase and affix such stamps or imprints of a meter machine before offering such cigarettes for sale, any local dealer delivering and furnishing cigarettes to any such seller shall not be required to purchase and affix such stamps or imprints to such cigarettes so sold or furnished; provided, that any such local dealer shall, on the day following the day of such delivery and furnishing, file with the commissioner of the revenue a copy of the delivery memorandum showing the name and address of such seller and the quantity and type of cigarettes so delivered and furnished.

In the case of any authorized meter machine, should any imprints of such machine theretofore paid for not be used, such person shall, upon furnishing the commissioner of the revenue with a similar affidavit, be entitled to a refund of the denominational or face amount thereof, less six (6) percent of the denominational or face amount of imprints of the machine not so used.

(b) Any and all refunds for unused and mutilated stamps and for nonuse of imprints of such stamps by meter machines provided for under this section are hereby authorized to be made on vouchers approved by the commissioner of the revenue and, when made, the same shall be charged against the sums collected for the sale of the stamps and for the use of such imprints.

Sec. 24-317. Seizure and sale of untaxed cigarettes—Generally.

Whenever the commissioner of the revenue or [his/]her designee shall discover any cigarettes which are subject to the tax imposed by this article and upon which the tax has not been paid or upon which stamps have not been affixed or evidence of such tax payment is not shown thereon by the printed markings of an authorized meter machine, as in this article required, the commissioner of the revenue is hereby authorized and empowered to forthwith seize and take possession of such cigarettes, which shall thereupon be deemed to be forfeited to the city, and [he/]she may, after providing notice of such seizure to the known holders of property interests in such property, sell such forfeited cigarettes. No credit from such sale shall be allowed toward any tax or penalties and interest owed, nor shall such seizure and sale be deemed to relieve any person from any fine or other penalty provided for the violation of the provisions of this article. All monies collected under the provisions of this section shall be paid to the city treasurer.
(Ord. No. 25,496, § 10, 5-26-70; Ord. No. 29,854, § 1, 3-13-79; Ord. No. 39,410, § 1, 12-15-98)

Sec. 24-318. Same—Cigarettes in transit, etc.

(a) Cigarettes found in quantities of more than six (6) cartons within the city shall be conclusively presumed for sale or use within the city and may be seized and confiscated by the commissioner of the revenue if:

(1) Such cigarettes are in transit, and are not accompanied by a bill of lading or other document indicating the true name and address of the consignor or seller and of the consignee or purchaser, and the brands and quantity of cigarettes so transported, or are in transit and accompanied by a bill of lading or other document which is false or fraudulent, in whole or in part; or

(2) Such cigarettes are in transit and are accompanied by a bill of lading or other document indicating:

a. A consignee or purchaser in another state or the District of Columbia who is not authorized by the law of such other jurisdiction to receive or possess such cigarettes on which the taxes imposed by such other jurisdiction have not been paid, unless the tax of the state or district of destination has been paid and the said cigarettes bear the tax stamps of that state or District; or

b. A consignee or purchaser in the Commonwealth of Virginia, but outside the city, who does not possess a Virginia sales and use tax certificate, a Virginia retail tobacco license and, where applicable, both a business license and retail tobacco license issued by the local jurisdiction of destination; or

(3) Such cigarettes are not in transit and the tax imposed by this article has not been paid, nor have approved arrangements for payment been made, provided that this subparagraph shall not apply to cigarettes in the possession of distributors or public warehouses which have filed notice and appropriate proof with the commissioner of the revenue that those cigarettes are temporarily within the city and will be sent to consignees or purchasers outside the city in the normal course of business.

(b) Cigarettes seized and confiscated under this section shall be deemed to be forfeited to the city as contraband property, and the commissioner of the revenue may thereafter sell such forfeited cigarettes in the same manner as provided for the sale of cigarettes as set forth in section 24-317 of this article.

(Ord. No. 29,854, § 2, 3-13-79)

Sec. 24-319. Seizure, sealing and sale of certain cigarette vending machines.

(a) Whenever the commissioner of the revenue shall discover any coin-operated vending machine in which cigarettes are found, stored or possessed bearing a counterfeit or bogus stamp or impression or any unstamped cigarettes, or any cigarettes upon which the tax imposed by this article has not been paid, the commissioner of the revenue is hereby authorized and empowered to forthwith seize and take possession of such vending machine as contraband property, which shall thereupon be deemed to be forfeited to the city. When any such vending machine is found containing such cigarettes, it shall be presumed that such cigarettes were intended for distribution, sale or use therefrom. In lieu of immediate seizure and

confiscation, the commissioner of the revenue may cause such vending machine to be sealed in order to prevent continued illegal sale or removal of any cigarettes. It shall be unlawful for any person to move or operate a vending machine so sealed by the commissioner of the revenue, or to remove the seal therefrom. Such seal may be removed and the vending machine declared eligible for operation only by the commissioner of the revenue, who may allow such vending machine to remain sealed until other civil and criminal penalties are imposed or waived. Nothing herein shall prevent the commissioner of the revenue from seizing and confiscating a vending machine at any time after it is sealed.

(b) Within a reasonable time after the seizure and confiscation, or sealing, of a vending machine as provided in this section, the commissioner of the revenue shall send notice thereof to any known holder of a property interest in such vending machine. Such notice shall be sent by registered mail to the last known address of such holder, and shall advise such holder of his right to submit to the commissioner of the revenue, at any time prior to a date specified in such notice, which shall not be less than ten (10) days from the date of mailing of the notice, evidence establishing that the cigarettes contained in such vending machine were not intended for distribution, sale or use, or that such holder was unaware that such cigarettes were contained in such vending machine. If such evidence is established to the satisfaction of the commissioner of the revenue, then the vending machine shall be relieved from forfeiture and restored to such holder, or the seal shall be removed and the vending machine declared eligible for operation. If such evidence is not established, or if no evidence is submitted prior to the date specified in such notice, the commissioner of the revenue may, at any time thereafter, sell such forfeited vending machine in the same manner as provided for the sale of cigarettes, as set forth in section 24-317.
(Ord. No. 29,854, § 2, 3-13-79)

Sec. 24-320. Seizure and disposition of counterfeit stamps or impression devices.

He is hereby further authorized and empowered to examine books, records, invoices, papers and any and all cigarettes in and upon any premises where the same are placed, stored, sold, offered for sale or displayed for sale by a seller.
(Ord. No. 25,496, § 14, 5-26-70)

Sec. 24-323. Violations of article—Generally.

(a) Any person violating any of the provisions of this article shall be guilty of a Class 1 misdemeanor. Conviction and punishment for such violation shall not relieve any person from the payment of any tax imposed by this article. In addition, any person who shall perform any fraudulent act or fail to perform any act for the purpose of evading the payment of any tax imposed by this article shall be required to pay a penalty in the amount of fifty (50) percent, and interest not to

exceed three quarters (.75) of one percent per month, upon any tax found to be overdue and unpaid.

(b) Each violation of, or noncompliance with, any of the provisions of this article shall be and constitute a separate offense.

(Ord. No. 25,496, § 11, 5-26-70)

Sec. 24-325. Same—Possession, by seller, of unstamped cigarettes deemed evidence of violation.

The actual length of any combination of vehicles coupled together including any load thereon shall not exceed a total of sixty (60) feet. No tolerance shall be allowed that exceeds twelve (12) inches.

The director of public works, however, when good cause is shown, may issue a special permit for combinations either in excess of sixty (60) feet, including any load thereon, or where the object or objects to be carried cannot be moved otherwise. Such permits may also be issued by the director when the total number of otherwise overdimensional loads of modular housing of no more than two (2) units may be reduced by permitting the use of an overlength trailer not exceeding fifty-four (54) feet.

No overall length restrictions, however, shall be imposed on any tractor truck semitrailer combinations drawing one trailer or any tractor truck semitrailer combinations when operated on any interstate or on any federal-aid primary highway as designated by the Commonwealth Transportation Board. No individual semitrailer or trailer being drawn in a tractor truck semitrailer or trailer combination, however, shall exceed twenty-eight and one-half (28.5) feet in length, and no semitrailer being operated in a tractor truck semitrailer combination shall exceed forty-eight (48) feet in length, except when semitrailers have an axle spacing of not more than thirty-seven (37) feet between the rear axle of the tractor truck and the front axle of the semitrailer, such semitrailer shall be allowed not more than fifty-three (53) feet in length.

The length limitations on semitrailers and trailers in the foregoing provisions of this section shall be exclusive of safety and energy conservation de-

Such combinations shall not be denied reasonable access to terminals, facilities for food, fuel, repairs and rest, except as designated, based on safety considerations, by the director of public works. Household goods carriers and any tractor truck semitrailer combination in which the semitrailer has a length of no more than twenty-eight and one-half (28.5) feet which operates generally as part of a tractor truck semitrailer combination shall not be denied reasonable access to points of loading and unloading, except as designated, based on safety considerations, by the director of public works.

(b) Passenger buses longer than thirty-five (35) feet, but not longer than forty (40) feet, may be operated on the streets of the City of Norfolk when authorized pursuant to Section 46.2-1300 of the Code of Virginia, 1950, as amended. Passenger buses may exceed the forty (40) feet limitation when such excess length is caused by the projection of a front or rear safety bumper or both. Such safety bumper shall not cause the length of the bus to exceed the maximum legal limit by more than one foot in the front and one foot in the rear. "Safety bumper" means any device which may be fitted on an existing bumper or which replaces the bumper and is so constructed, treated, or manufactured to absorb energy upon impact.

(c) In an emergency as provided in Section 46.21149 of the Code of Virginia, 1950, as amended, the towing of disabled vehicles which cannot be separated for safety, physical, or mechanical reasons and which exceed length limitations established in Article 16 (Section 46.2-1112 et seq.) of Chapter 46 of the Code of Virginia, 1950, as amended, shall be permissible for the purpose of towing any such vehicle to the nearest facility which can make the necessary repairs but not more than fifty (50) miles from the point such vehicle was disabled.

This limitation also shall not apply to a combination of vehicles coupled together by a saddle mount device used to transport motor vehicles in a drive-away service when not more than two (2) saddle mounts are used. Vehicles coupled together by not more than three (3) saddle mounts shall not exceed sixty-five (65) feet when operated on any interstate highway or any federal-aid primary highway as designated by the Commonwealth Transportation Board.

Such combinations shall have reasonable access to terminals and facilities for food, fuel, repairs, and rest as designed by the Commonwealth Transportation Board. Such use shall be in conformity with safety regulations adopted by the Superintendent of State Police.

In an emergency as provided in Section 46.21149 of the Code of Virginia, 1950, as amended, the towing of disabled vehicles which cannot be separated for safety, physical, or mechanical reasons and which exceed length limits established in Article 16 (Section 46.2-1112 et seq.) of Chapter 46 of the Code of Virginia, 1950, as amended, shall be permissible for the purpose of towing any such vehicle to the nearest facility which can make the necessary repairs but not more than fifty (50) miles from the point such vehicle was disabled.

Sec. 25-130. Exceptions to section 25-129.

The provisions of section 25-129 shall not apply to a vehicle designed for towing disabled vehicles, when towing such vehicle in an emergency in such manner that a part of the combined weight of the two (2) vehicles rests upon an axle or axles of the towing vehicle, provided the towed and towing vehicles each are within the weight limits prescribed in section 25-129. The provisions of this section shall not be construed to permit the violation of any lawfully established load limit on any bridge. For the purpose of this section, "emergency" shall include towing disabled inoperative vehicles to places designated by owners.

(c) Signs stating the carrying capacity shall be erected and maintained near each end of the bridge or culvert on the approaches to such bridge or culvert. Whenever the weight capacity of any structure on the street is reduced below the weight limit permitted on the street of which it is a part, a sign indicating that there is a restricted struc-

ture must be placed in advance of the last alternate route on the street upon which there is a restricted structure.

Sec. 25-132. Special permits for oversize and overweight vehicles—Generally.

(a) The director of public works of the city may, in his discretion, upon application in writing and good cause being shown therefor, issue a special permit in writing authorizing the applicant to operate or move a vehicle, a mobile home, a utility building or mobile crane upon the highways and streets of the city of a size or weight exceeding the maximum specified in this article. The director may, in his discretion, issue an annual permit for oversized and overweight three (3) or more axle vehicles, mobile homes, utility buildings and mobile cranes. Every such permit may designate the route to be traversed and contain any other restrictions or conditions deemed necessary by the director of public works. Upon the issuance of such a permit, the city shall charge and the applicant shall pay to the city a fee as follows:

(1) A single-trip permit fee per vehicle, mobile home, utility building or mobile crane of ninety dollars ($90.00).

(2) An annual permit fee (unlimited trips per vehicle, mobile home or utility building) for oversized and overweight three (3) or more axle vehicles, mobile homes or utility buildings shall be three hundred fifteen dollars ($315.00) per vehicle, mobile home or utility building. The annual permit fee for mobile cranes shall be as follows: the fee shall be three hundred fifteen dollars ($315.00) per crane; provided, however, that such fees shall not be applicable to the city, state, United States of America, or any department, division bureau or agency thereof.

(b) Special permits to operate or move a vehicle upon the streets of the city of a weight exceeding the maximum specified in this article shall be granted without costs where the vehicle is hauling or carrying containerized cargo in a sealed, seagoing container bound to or from a state seaport and has been or will be transported by marine shipment provided the single axle weight does not exceed twenty thousand (20,000) pounds, the tandem axle weight does not exceed thirty-four thousand (34,000) pounds and the gross weight does not exceed seventy-eight thousand (78,000) pounds; and provided the contents of such seagoing container are not changed from the time it is loaded by the consignor or his agents to the time it is delivered to the consignee or his agents. It is further determined and declared that cargo moving in vehicles conforming to specifications shown in this subsection but exceeding axle and gross weight limitations shown in this subsection shall be considered irreducible and eligible for permits under regulations of the state highway and transportation commission.

(c) However, the director of public works, upon application in writing made by the owner or operator of three-axle trucks hauling road construction materials and having a gross weight not exceeding forty-three thousand nine hundred (43,900) pounds, a single axle weight not exceeding twenty thousand (20,000) pounds, and a tandem axle weight not exceeding thirty-four thousand (34,000) pounds, shall issue to such owner or operator, without cost, a permit in writing authorizing the operation of such vehicles upon the streets of the city. No such permit shall designate the route to be traversed nor contain restrictions or conditions not applicable to other vehicles in their general use of the streets.

(d) Further, the director of public works, upon application in writing made by the owner or operator of three-axle vehicles used exclusively for the mixing of concrete in transit or at a project site or for transporting necessary components to produce concrete immediately upon arrival at the project site, and having a gross weight not exceeding sixty thousand (60,000) pounds, a single axle weight not exceeding twenty thousand (20,000) pounds, and a tandem axle weight not exceeding forty thousand (40,000) pounds, shall issue to such owner or operator, without cost, a permit in writing authorizing the operation of such vehicles upon the streets of the city. No such permit shall be issued authorizing the operation of the vehicles enumerated in this subsection for a distance of more than twenty-five (25) miles from a batching plant; however, the said permit shall not designate the route to be traversed nor contain restrictions or conditions not applicable to other vehicles in their general use of the highways. Each vehicle, when loaded according to the provisions of a permit issued under this section, shall be operated at a reduced speed. The reduced speed limit is to be ten (10) miles per hour slower than the legal speed limit in fifty-five (55), forty-five (45) and thirty-five (35) miles per hour speed limit zones.

(e) However, the director of public works, upon application in writing made by the owners or operators of motor vehicles not exceeding the axle and gross weight limitations as set forth in section 25-129 shall issue, without cost, a permit authorizing the operation of such motor vehicles on the streets of the city, to transport items arriving at a state port by ship from overseas points of origin and consigned to an assembly plant in this state, on motor vehicles that do not exceed the height limitation set forth in section 25-123 by more than one and one-half (1½) feet and not exceeding the length limitation as set forth in section 25-124 by more than three (3) feet. The director of public works may designate the routes such permittees must use from the port to the assembly plant.

(f) Every such permit shall be carried in the vehicle to which it refers and shall be open to inspection by any officers.

(g) Vehicles possessing a valid Virginia Department of Transportation Oversize Load Hauling Permit which are traveling north or south on Northampton Boulevard (Va. State Rt. 13) between I-64 and City of Norfolk/Virginia Beach City boundary line shall not be required to obtain a City of Norfolk overweight permit pursuant to Section 25-132 provided that the height of the vehicle is no greater than fourteen (14) feet three (3) inches and that the vehicle travel route is limited to on and off movements from I-64 via Northampton Boulevard to the Norfolk/Virginia Beach City boundary line. City of Norfolk permits shall be required when vehicles exceed the above conditions.

(i) It shall be unlawful for any person to violate any provisions of this section, the terms and conditions of any special permit issued hereunder, or any terms and conditions of *The City of Norfolk Moving and Hauling Permit Manual.* "Person" is defined as any individual, employee, operator, firm, owner, sole proprietorship, partnership, corporation, unincorporated association, governmental body, municipal corporation, executor, administrator, trustee, guardian, agent, or other legal entity. A violation of this section shall constitute a Class 1 misdemeanor.

(a) In addition to the permits provided for in section 25-132, the director of public works, upon application in writing made by the owner or operator of a three-axle vehicle used for hauling farm produce grown in this state and having a gross weight not exceeding fifty thousand (50,000) pounds, a single axle weight not exceeding twenty thousand (20,000) pounds, and a tandem axle weight not exceeding thirty-six thousand (36,000) pounds, or any four-axle combination hauling state-grown produce, a tandem axle weight of thirty-six thousand (36,000) pounds and otherwise in conformity with the provisions of section 25-129, shall issue to such owner or operator, without cost, a permit in writing authorizing the operation of such vehicle upon the streets. No such permit shall designate the route to be traversed nor contain restrictions or conditions not applicable to other vehicles in their general use of the streets.

(b) Every such permit shall be carried in the vehicle to which it refers and shall be open to inspection by any officer and it shall be a misdemeanor for any person to violate any of the terms or conditions of such special permit.

Sec. 25-133. Same—Restrictions as to travel on federal-aid highway.

Notwithstanding the provisions of section 25-132, any permit heretofore or hereafter issued by the director of public works pursuant to such section may be restricted so as to prevent travel on any federal-aid highway, if the continuation of travel on such highway would result in a loss of federal-aid funds. Before any such permit is so restricted, notice in writing must be given to the permittee.

State law reference—Similar provisions, Code of Virginia, § 46.1-343.2.

Sec. 25-134. Weighing vehicles; unloading excess load.

(a) Any officer authorized to enforce the law under this article, having reason to believe that the weight of a vehicle and load is unlawful, is authorized to weigh the same. If the place where the vehicle is stopped is ten (10) miles or less from a permanent weighing station, the officer may, and upon demand of the driver shall, require the vehicle to proceed to such station; if the distance to the nearest permanent weighing station is more than ten (10) miles, such vehicle may be weighed by loadometers. Any operator who fails or refuses to drive his vehicle to such permanent weighing station or upon such scales or loadometers upon the request and direction of the officer so to do shall be guilty of a misdemeanor and upon conviction thereof shall be fined not less than ten dollars ($10.00) nor more than one hundred dollars ($100.00), which penalty shall be in addition to any other penalties prescribed for exceeding the maximum weight permitted or for any other violation. Should the officer find that the weight of any vehicle and its load is greater than that permitted by this article or that the weight of the load carried in or on such vehicle is greater than that which the vehicle is licensed to carry under the provisions of this article, he may require the driver to unload, at the nearest place where the property unloaded may be stored or transferred to another vehicle, such portion of the load as may be necessary to decrease the gross weight of the vehicle to the maximum therefor permitted by this article. Any property so unloaded shall be stored or cared for by the owner or operator of the overweight vehicle at the risk of such owner or operator. If the driver of an overloaded vehicle is convicted, forfeits bail or purchases an increased license as a result of such weighing, the court in addition to all other penalties shall assess and collect a weighing fee of two dollars ($2.00) from the owner or operator of the vehicle and shall forward such fee to the city treasurer.

(b) In any court or legal proceedings in which any question arises as to the calibration or accuracy of any such scales at permanent weighing stations or loadometers, a certificate, executed and signed under oath by the inspector calibrating or testing such device as to its accuracy as well as to the accuracy of the test weights used in such test, and stating the time of such test, type of test and results of testing, shall be admissible when attested by one such inspector who executed and signed it as evidence of the facts therein stated and the results of such testing.
(Ord. No. 30,729, § 1, 7-29-80)

State law reference—Similar provisions, Code of Virginia, § 46.1-347.

Sec. 25-134.1. Liquidated damages for violation of weight limits; forfeiture of vehicle and cargo.

(a) Upon conviction of any person for violation of any weight limit as provided in this article, the court shall assess liquidated damages. The amount of those damages for each pound of excess weight over the prescribed axle weight limits shall be one cent ($0.01) per pound for an excess weight which does not exceed four thousand (4,000) pounds, ten cents ($0.10) per pound for an excess between four thousand one (4,001) pounds and eight thousand (8,000) pounds, twenty cents ($0.20) per pound for an excess between eight thousand one (8,001) pounds and twelve thousand (12,000) pounds, thirty cents ($0.30) per pound for an excess more than twelve thousand one (12,001) pounds. For each pound of excess weight over the prescribed gross weight limit provided in section 25-129, the amount of those damages shall be one cent ($0.01) per pound for an excess which does not exceed four thousand (4,000) pounds, five cents ($0.05) per pound for an excess between four thousand one (4,001) and eight thousand (8,000) pounds, ten cents ($0.10) per pound for an excess between eight thousand one (8,001) and twelve thousand (12,000) pounds, fifteen cents ($0.15) per pound for an excess more than twelve thousand one (12,001) pounds.

If a person has no prior violation under the motor vehicle weight laws, and the excess weight does not exceed two thousand five hundred (2,500) pounds, the general district court may waive the liquidated damages against such person. Such assessment shall be entered by the court as a judgment for the city, the entry of which shall constitute a lien upon the overweight vehicle. Such sums shall be paid to the city treasurer or collected by the city attorney and forwarded to the city treasurer and allocated to the fund appropriated for the construction and maintenance of city streets.

If the gross weight of the vehicle exceeds lawful limits by at least twenty-five (25) percent but no more than fifty (50) percent, the amount of the liquidated damages shall be two (2) times the amount provided for in the foregoing provisions of this section; if the gross weight of the vehicle exceeds lawful limits by more than fifty (50) percent, the amount of the liquidated damages shall be three (3) times the amount provided for in the foregoing provisions of this section. The provisions of this subsection shall not apply to pickup or panel trucks.

(b) Any officer authorized to make arrests and weigh vehicles under the provisions of this article may for a period of twenty-four (24) hours without a court order and thereafter upon a written order of the court either before or after conviction hold the vehicle involved in the overweight violation, provided the same is not registered with the division of motor vehicles, until the amount assessed, if after conviction or subject to be assessed, if before conviction, together with the cost of holding or storing of the vehicle, be paid, or until a bond by or on behalf of the offending person is given for payment as the court may direct of the amount assessed or to be assessed with surety approved by the court or its clerk.

(c) In the event the amount so assessed is not paid or no bond is given as provided hereinabove, the vehicle in the overweight violation shall be stored in a place of security, as may be designated by the owner or operator of the vehicle. If no place is designated, the officer making the arrest shall designate the place of storage. The owner or operator shall be afforded the right of unload-

ing and removing the cargo from such vehicle. The risk and cost of such storage shall be borne by the owner or operator of such vehicle.

(d) If within sixty (60) days from the time of the conviction for the overweight violation, the offending party does not pay the assessment imposed by this section, together with the cost of storing such vehicle and cargo, if the cargo is not

removed as herein provided, the vehicle and cargo shall be forfeited to the city and sold to satisfy the assessment and cost of storage.

(e) Upon receipt of a copy of the judgment entered for such assessment and notification of the failure of such person to pay the amount assessed, together with the payment of cost of holding such vehicle under this section, the police department of the city may thereafter deny the offending person the right to operate a motor vehicle or vehicles upon the streets of the city until such assessment has been paid.

(f) The charges hereinabove specified shall be in addition to any other liability which may be legally fixed against such owner or operator for damage to a highway or bridge attributable to such weight violation.

ARTICLE IV. OPERATION OF VEHICLES GENERALLY*

Sec. 25-151. Age of operator.

No person under the age of sixteen (16) years shall operate any motor vehicle on the streets and alleys of the city; provided, however, that the provisions of this section shall not apply to any person under the age of sixteen (16) years driving upon the streets and alleys of the city with a temporary instruction permit in his immediate possession issued by the commissioner and while he complies with the terms and conditions thereof.
(Code 1958, § 29-13)

State law reference—Age requirements for driver's license, Code of Virginia, §§ 46.2-334, 46.2-335.

Sec. 25-152. Driving while license or privilege to drive suspended or revoked.

(a) Except as provided in Code of Virginia, §§ 46.2-304 and 46.2-357, no resident or nonresident (i) whose driver's license, learner's permit, or privilege to drive a motor vehicle has been suspended or revoked or (ii) who has been directed not to drive by any court or by the commissioner, or (iii) who has been forbidden, as prescribed by operation of any statute of the commonwealth or a substantially similar ordinance of any county, city or town, to operate a motor vehicle in the commonwealth shall thereafter drive any motor vehicle or any self-propelled machinery or equipment on any highway in this city until the period of such suspension or revocation has terminated or the privilege has been reinstated or a restricted license is issued pursuant to subsection (e). A clerk's notice of suspension of license for failure to pay fines and costs given in accordance with Code of Virginia, § 46.2-395 shall be sufficient notice for the purpose of maintaining a conviction under this section. For the purposes of this section, the phrase "motor vehicle or any self-propelled machinery or equipment" shall not include mopeds.

(b) A violation of subsection (a) is a class 1 misdemeanor. A third or subsequent offense occurring within a ten-year period shall include a mandatory minimum term of confinement in jail of ten (10) days. However, the court shall not be required to impose a minimum, mandatory term of confinement in any case where a motor vehicle is operated in violation of this section in a situation of apparent extreme emergency which requires such operation to save life or limb.

(c) Upon a violation of subsection (a), the court shall suspend the person's license, permit, or privilege to drive for the same period for which it had been previously suspended or revoked when the person violated this section. In the event the person has violated subsection (a) by driving during a period of suspension or revocation which was not for a definite period of time, the court shall suspend the person's license, permit or privilege to drive for an additional period not to exceed ninety (90) days, to commence upon the expiration of the previous suspension or revocation or to commence immediately if the previous suspension or revocation has expired.

(d) In addition to any other penalty provided by this section, any motor vehicle administratively impounded or immobilized under the provisions of Code of Virginia, § 46.2-301.1, may, in

the discretion of the court, be impounded or immobilized for an additional period of up to ninety (90) days upon conviction of an offender for driving while his driver's license, learner's permit or privilege to drive a motor vehicle has been suspended or revoked for (i) a violation of sections 25-251, 25-258, or Code of Virginia, §§ 18.2-266, 18.2-272 or 46.2-341.24, or a substantially similar ordinance or law in any other jurisdiction or (ii) driving after adjudication as an habitual offender, where such adjudication was based in whole or in part on an alcohol-related offense, or where such person's license has been administratively suspended under the provisions of Code of Virginia, § 46.2-391.2. However, if, at the time of the violation, the offender was driving a motor vehicle owned by another person, the court shall have no jurisdiction over such motor vehicle but may order the impoundment or immobilization of a motor vehicle owned solely by the offender at the time of arrest. All costs of impoundment or immobilization, including removal or storage expenses, shall be paid by the offender prior to the release of his motor vehicle.

(e) Any person who is otherwise eligible for a restricted license may petition each court that suspended his license pursuant to subsection (c) for authorization for a restricted license, provided that the period of time for which the license was suspended by the court pursuant to subsection (c), if measured from the date of conviction, has expired, even though the suspension itself has not expired. A court may, for good cause shown, authorize the department of motor vehicles to issue a restricted license for any of the purposes set forth in subsection (e) of section 25-257.1 or subsection E of Code of Virginia, § 18.2-271.1. No restricted license shall be issued unless each court that issued a suspension of the person's license pursuant to subsection (c) authorizes the department to issue a restricted license. Any restricted license issued pursuant to this subsection shall be in effect until the expiration of any and all suspensions issued pursuant to subsection (c), except that it shall automatically terminate upon the expiration, cancellation, suspension, or revocation of the person's license or privilege to drive for any other cause. No restricted license issued pursuant to this subsection shall permit a person to operate a commercial motor vehicle as defined in the Commercial Driver's License Act (Code of Virginia, § 46.2-341.1 et seq.). The court shall forward to the commissioner a copy of its authorization entered pursuant to this subsection, which shall specifically enumerate the restrictions imposed and contain such information regarding the person to whom such a license is issued as is reasonably necessary to identify the person. The court shall also provide a copy of its authorization to the person, who may not operate a motor vehicle until receipt from the commissioner of a restricted license. A copy of the restricted license issued by the commissioner shall be carried at all times while operating a motor vehicle.

(f) Any person who operates a motor vehicle or any self-propelled machinery or equipment in violation of the terms of a restricted license issued pursuant to subsection (e) or subsection E of Code of Virginia, § 18.2-271.1, is not guilty of a violation of this section but is guilty of a violation of section 25-258 or Code of Virginia, § 18.2-272.

(2) Any vehicle proceeding at less than the normal speed of traffic at the time and place and under the conditions existing shall be driven in the lane nearest the right-hand edge or curb of the highway, when such lane is available for travel, except when overtaking and passing another vehicle or in preparation for a left turn or as permitted in subsection (5) of this section.

(3) A vehicle shall be driven as nearly as is practicable entirely within a single lane and shall not be moved from such lane until the driver has ascertained that such movement can be made with safety.

(4) Upon a highway which is divided into three (3) lanes, a vehicle shall not be driven in the center lane except when overtaking and passing another vehicle or in preparation for a left turn, or unless such center lane is, at the time, allocated exclusively to traffic moving in the direction the vehicle is proceeding and is signposted or marked to give notice of such allocation; provided that, official traffic-control devices may be erected directing specified traffic to use a designated lane or designating those lanes to be used by traffic moving in a particular direction, regardless of the center of the roadway, and drivers of vehicles shall obey the directions of every such device.

(5) Whenever the city has designated right-hand lanes for slow-moving traffic and when such lanes are signposted or marked to give notice of such designation, a vehicle may be driven in any lane allocated to traffic moving in the direction such vehicle is proceeding, but when traveling within such inside lanes, vehicles shall be driven at approximately the speed authorized in such lanes and speed shall not unnecessarily be decreased so as to block, hinder or retard traffic.

(6) Wherever a highway is marked with double traffic lanes consisting of a solid line immediately adjacent to a broken line, no vehicle shall be driven to the left of such line if the solid line is on the right of the broken line, except that it shall be lawful to make a left turn for the purpose of entering or leaving a public, private or commercial road or entrance.

(7) Wherever a highway is marked with double traffic lines consisting of two (2) immediately adjacent solid lines, no vehicle shall be driven to the left of such lines, except that it shall be lawful to make a left turn for the purpose of entering or leaving a public, private or commercial road or entrance.

It shall be unlawful for any person to drive a vehicle upon any street so divided with such division upon the right of operator of the vehicle. Two-way traffic on either side of such streets shall not be permitted.

(2) The driver of a vehicle shall not drive to the left side of the center line of a highway in overtaking and passing another vehicle proceeding in the same direction, unless such left side is clearly visible and is free of oncoming traffic for a sufficient distance ahead to permit such overtaking and passing to be made in safety.

(3) No person operating a truck or tractor and trailer shall pass or attempt to pass any truck or tractor and trailer going in the same direction on an upgrade hill, if such passing will impede the passage of following traffic.

(2) A prosecution or proceeding under section 46.2-859 of the Code of Virginia, 1950, as amended, shall be a bar to a prosecution or proceeding under this section for the same act, and a prosecution or proceeding under this section shall be a bar to a prosecution or proceeding under section 46.2-859 of the Code of Virginia, 1950, as amended, for the same act.

(3) In any prosecution for which a summons charging a violation of this section was issued within ten (10) days of the alleged violation, proof that the motor vehicle described in the summons was operated in violation of this section, together with proof that the defendant was at the time of such violation the registered owner of the vehicle, as required by chapter 6 of title 46.2 of the Code of Virginia, 1950, as amended, shall give rise to a rebuttable presumption that such registered owner of the vehicle was the person who operated the vehicle at the place where, and for the time during which, such violation occurred.

(b) Upon a street or highway with unobstructed pavement not occupied by parked vehicles of sufficient width for two (2) or more lines of moving vehicles in each direction;

(c) Upon a one-way street, or upon any roadway on which traffic is restricted to one direction of movement, where the roadway is free from obstructions and of sufficient width for two (2) or more lines of moving vehicles.

(2) The driver of a vehicle may overtake and pass another vehicle upon the right only under conditions permitting such movement in safety. In no event shall such movement be made by driving off the pavement or main-travelled portion of the roadway.

(1) *Right turn:* Both the approach for a right turn and a right turn shall be made as close as practicable to the right-hand curb or edge of the roadway.

(2) *Left turns on two-way roadways:* At any intersection where traffic is permitted to move in both directions on each roadway entering the intersection, an approach for a left turn shall be made in that portion of the right half of the roadway nearest the center line thereof and by passing to the right of such center line where it enters the intersection and, after entering the intersection, the left turn shall be made so as to leave the intersection to the right of the center line of the roadway being entered. Wherever practicable, the left turn shall be made in that portion of the intersection to the left of the center of the intersection.

(3) *Left turns on other than two-way roadways:* At any intersection where traffic is restricted to one direction on one or more of the roadways, and at any crossover from one roadway of a

divided highway to another roadway thereof on which traffic moves in the opposite direction, the driver of a vehicle intending to turn left at any such intersection or crossover shall approach the intersection or crossover in the extreme left-hand lane lawfully available to traffic moving in the direction of travel of such vehicle and, after entering the intersection or crossover, the left turn shall be made so as to leave the intersection or crossover, as nearly as practicable, in the left-hand lane lawfully available to traffic moving in such direction upon the roadway being entered.

(2) The signal required by this section shall be given by means of the hand and arm or by some mechanical or electrical device approved by the superintendent, in the manner herein specified. Whenever the signal is given by means of the hand and arm, the driver shall indicate his intention to start, stop, turn or partly turn by extending the hand and arm from and beyond the left side of the vehicle, in the manner following:

(a) For a left turn or to pull to the left, the arm shall be extended in a horizontal position straight from and level with the shoulder.

(b) For a right turn or to pull to the right, the arm shall be extended upward.

(c) For slowing down or to stop, the arm shall be extended downward.

Wherever the lawful speed is more than thirty-five (35) miles per hour, such signals shall be given continuously for a distance of at least one hundred (100) feet, and in all other cases at least fifty (50) feet, before slowing down, stopping, turning, partly turning or materially altering the course of the vehicle.

(4) Drivers having once given a hand, electrical or mechanical device signal must continue the course thus indicated, unless they alter the original signal and take care that drivers of vehicles and pedestrians have seen and are aware of the change.

(5) Drivers receiving a signal from another driver shall keep their vehicles under complete control and shall be able to avoid an accident resulting from a misunderstanding of such signal.

(7) Police or sheriff department personnel operating motor vehicles to enforce laws governing motor vehicle parking.

(d) Any person who violates this section shall be subject to a civil penalty of twenty-five dollars ($25.00), to be paid into the state treasury and credited to the Literary Fund. No assignment of points shall be made under the Virginia Driver Improvement Act (Code of Virginia, § 46.2-489 et seq., as amended) and no court costs shall be assessed for violations of this section.

(e) A violation of this section shall not constitute negligence, be considered in mitigation of damages of whatever nature, be admissible in evidence or be the subject of comment by counsel in any action for the recovery of damages arising out of the operation, ownership or

maintenance of a motor vehicle, nor shall anything in this section change any existing law, rule or procedure pertaining to any such civil action.

(f) A violation of this section may be charged on the uniform traffic summons form.

(g) No citation for a violation of this section shall be issued unless the officer issuing such citation has cause to stop or arrest the driver of such motor vehicle for the violation of some other provision of this Code relating to the operation, ownership or maintenance of a motor vehicle or any criminal statute.
(Ord. No. 34,595, § 1, 7-14-87; Ord. No. 35,132, § 1, 6-28-88)

Sec. 25-179. Blocking intersections and pedestrian crosswalks.

No operator of a vehicle shall enter into an intersection or a marked crosswalk unless there is sufficient space beyond such intersection or crosswalk in the direction in which such vehicle is proceeding to accommodate the vehicle without obstructing the passage of other vehicles or pedestrians, notwithstanding any traffic control signal or device indication to proceed. A violation of this section shall constitute a traffic infraction subject to a fine of two hundred fifty dollars ($250.00).
(Ord. No. 49,748, § 1, 9-24-24)

Sec. 25-180. Seizure and disposition of all-terrain vehicles and off-road motorcycles.

(a) Any unlawfully operated all-terrain vehicle or off-road motorcycle operated on a highway or sidewalk within the City of Norfolk may be seized and impounded under the direction of a police officer or other person authorized to enforce the provisions of this article (a person other than a police officer means one authorized under the law). The person seizing the all-terrain vehicle or off-road motorcycle pursuant to this section shall immediately make a written report thereof to the police department and to the person in charge of the impound location setting forth the date, time, and place of, and the reason for, such seizure, and a description of the vehicle including the serial or vehicle identification number if one exists.

(b) Notwithstanding any provision to the contrary, upon final adjudication finding the unlawful operation of the motor vehicle on a highway or sidewalk within the City of Norfolk, an all-terrain vehicle or off-road motorcycle seized under the authority granted by this section may be disposed of by the city through lawful means including destruction or sale at public auction.

(c) Prior to disposal of the vehicle, the city shall make a reasonable effort to determine if the vehicle was reported as stolen at the time of seizure. Such efforts may include checking (i) the police department's own records, and (ii) the records of a nationally recognized crime database. If the city determines that the vehicle had been reported as stolen at the time of seizure, a notice of seizure will be sent to the identified owner provided the owner was not also the driver of the vehicle at the time of seizure. The notice of seizure shall be sent by registered or certified mail, return receipt requested. The notice shall describe the vehicle, including if available the year, make, model, and serial or vehicle identification number, and set forth the location where the vehicle is being held. The notice shall inform the owner of their right to redeem the vehicle subject to proof of ownership and payment of costs of towing and impoundment, and notify the owner that unredeemed vehicles may be disposed of by the city within a time certain identified in the notice of seizure.

(d) For the purposes of this section, the following definitions apply. The terms *"all-terrain vehicle"* and *"off-road motorcycle"* shall have the meaning set forth within Virginia Code § 46.2-100. The terms *"motor vehicle"* or *"vehicle"* shall mean all-terrain vehicles and off-road motorcycles.

ARTICLE V. SIGNS, SIGNALS AND MARKINGS GENERALLY*

Sec. 25-191. Required obedience.

The driver of a motor vehicle, trailer or semitrailer shall obey and comply with the requirements of road signs, signals, markings or lights erected upon the authority of the state highway commission or the city authorities, and the failure of such driver to so comply shall constitute a traffic infraction.

(Code 1958, § 29-25; Ord. No. 31,771, § 1, 6-15-82; Ord. No. 42,720, § 1, 6-26-07)

State law reference—Similar provisions, Code of Virginia, § 46.2.830.

Sec. 25-192. Signals by lights or semaphores—Legend.

Signals by lights or semaphores shall be as follows:

(1) Red indicates that traffic then moving shall stop and remain stopped as long as the red signal is shown, except in the direction indicated by a lighted green arrow; provided, however, that, except where a sign is placed prohibiting turns on red, vehicular traffic facing a steady red signal may, after coming to a full stop, cautiously enter the intersection to make a right turn, or to make a left turn, if such left turn is made from a highway which allows for traffic in but one direction into another highway which allows for traffic in but one direction and after making such left turn the turning traffic will be going in that direction. Such turning traffic shall yield the right-of-way to pedestrians lawfully within an adjacent crosswalk and to other traffic using the intersection.

(2) Green indicates the traffic shall then move in the direction of the signal and remain in motion as long as the green signal is given, except that such traffic shall yield to other vehicles and pedestrians lawfully within the intersection.

(3) Amber indicates that a change is about to be made in the direction of the moving traffic. When the amber signal is shown, traffic which has not already entered the intersection, including the crosswalks, shall stop, if it is not reasonably safe to continue, but that traffic which has already entered the intersection shall continue to move until the intersection has been entirely cleared. The amber signal is a warning that the red signal is imminent.

(4) The use of a flashing red light indicates that traffic shall stop before entering an intersection, and the use of a flashing amber light indicates that traffic may proceed through the intersection or past such signal with reasonable care under the circumstances.

(Code 1958, § 29-24)

Cross reference—Right turn on red signal prohibited at certain intersections, § 25-649.

State law reference—Similar provisions, Code of Virginia, §§ 46.2-833—46.2-836.

Sec. 25-193. Same—Precedence of signals given by police officers or school crossing guards.

Officers of the law and uniformed school crossing guards may assume control of traffic otherwise controlled by lights or semaphores and, in such event, signals by such officers and uniformed crossing guards shall take precedence over such lights or semaphores.

(Code 1958, § 29-24)

State law reference—Similar provisions, Code of Virginia, §§ 46.2-833—46.2-836.

Sec. 25-195. Unauthorized signs, signals, etc.

(1) No unauthorized person shall erect or maintain upon any street or highway any warning or direction sign, marker, signal or light in imitation of any official sign, marker, signal or light erected under the provisions of this chapter, and no person shall erect or maintain upon any street or highway any traffic or highway sign or signal bearing thereon any commercial advertising. Nothing in this section shall be construed to prohibit the erection or maintenance of signs, markers or signals bearing thereon the name of an organization authorized to erect the same by the state highway commission or the city council.

(2) This section shall not be construed to prohibit the erection, by contractors or public utility companies, of temporary signs approved by the state highway department warning motorists that work is in progress upon the street or highway or adjacent thereto.
(Code 1958, § 29-26)

State law reference—Similar provisions, Code of Virginia, § 46.2-831.

Sec. 25-196. Traffic light signal photo-monitoring systems.

(a) The city manager is hereby authorized to establish a traffic signal enforcement program and to impose monetary liability on the operator of a motor vehicle for failure to comply with traffic light signals in accordance with the provisions of Code of Virginia, § 15.2-968.1. The city manager shall cause the installation and operation of traffic light signal photo-monitoring systems at no more than one intersection for every ten thousand (10,000) residents within the city at any one time.

(b) The operator of a vehicle shall be liable for a monetary penalty imposed pursuant to this section if such vehicle is found, as evidenced by information obtained from a traffic light signal violation monitoring system, to have failed to comply with a traffic light signal within the city.

(c) Proof of a violation of this section shall be evidenced by information obtained from a traffic light signal violation monitoring system authorized pursuant to this section. A certificate, sworn to or affirmed by a law-enforcement officer employed by the city authorized to impose penalties pursuant to this section, or a facsimile thereof, based upon inspection of photographs, microphotographs, videotape, or other recorded images produced by a traffic light signal violation monitoring system, shall be prima facie evidence of the facts contained therein. Any photographs, microphotographs, videotape, or other recorded images evidencing such a violation shall be available for inspection in any proceeding to adjudicate the

liability for such violation pursuant to this section adopted pursuant to Code of Virginia § 15.2-968.1.

(d) In the prosecution for a violation of this section as provided in this section, prima facie evidence that the vehicle described in the summons issued pursuant to this section was operated in violation of this section, together with proof that the defendant was at the time of such violation the owner, lessee, or renter of the vehicle, shall constitute in evidence a rebuttable presumption that such owner, lessee, or renter of the vehicle was the person who committed the violation. Such presumption shall be rebutted if the owner, lessee, or renter of the vehicle:

(1) Files an affidavit by regular mail with the clerk of the Norfolk General District Court that he was not the operator of the vehicle at the time of the alleged violation; or

(2) Testifies in open court under oath that he was not the operator of the vehicle at the time of the alleged violation.

Such presumption shall also be rebutted if a certified copy of a police report, showing that the vehicle had been reported to the police as stolen prior to the time of the alleged violation of this section, is presented, prior to the return date established on the summons issued pursuant to this section, to the court adjudicating the alleged violation.

(e) For purposes of this section, "owner" means the registered owner of such vehicle on record with the Department of Motor Vehicles. For purposes of this section, "traffic light signal violation monitoring system" means a vehicle sensor installed to work in conjunction with a traffic light that automatically produces two (2) or more photographs, two (2) or more microphotographs, video, or other recorded images of each vehicle at the time it is used or operated in violation of Code of Virginia, §§ 46.2-833, 46.2-835 and 46.2-836, or a substantially similar ordinance or law in any other jurisdiction. For each such vehicle, at least one recorded image shall be of the vehicle before it has illegally entered the intersection, and at least one recorded image shall be of the same vehicle after it has illegally entered that intersection.

(f) Imposition of a penalty pursuant to this section shall not be deemed a conviction as an operator and shall not be made part of the operating record of the person upon whom such liability is imposed, nor shall it be used for insurance purposes in the provision of motor vehicle insurance coverage. No monetary penalty imposed under this section shall exceed the maximum permitted by Code of Virginia § 15.2-968.1 at the time of conviction hereunder, nor shall it include court costs.

(g) A summons for a violation of this section may be executed pursuant to the provisions of Code of Virginia, § 19.2-76.2. Notwithstanding the provisions of Code of Virginia, § 19.2-76, a summons for a violation of this section may be executed by mailing by first class mail a copy thereof to the owner, lessee, or renter of the vehicle. In the case of a vehicle owner, the copy shall be mailed to the address contained in the records of the Department of Motor Vehicles; in the case of a vehicle lessee or renter, the copy shall be mailed to the address contained in the records of the lessor or renter. In addition to the summons, every such mailing shall include a notice of the following:

(1) The summoned person's ability to rebut the presumption that he was the operator of the vehicle at the time of the alleged violation through the filing of an affidavit as provided in subsection (d);

(2) Instructions for filing such affidavit, including the address to which the affidavit is to be sent.

If the summoned person fails to appear on the date of return set out in the summons mailed pursuant to this section, the summons shall be executed pursuant to the provisions of Code of Virginia, § 19.2-76.3. No proceedings for contempt or arrest of a person summoned by mailing shall be instituted for failure to appear on the return date of the summons. Any summons executed for a violation of this section shall provide to the person summoned at least thirty (30) business days from the mailing of the summons to inspect information collected by a traffic light signal violation monitoring system in connection with the violation.

(h) Information collected by a traffic light signal violation monitoring system installed and operated pursuant to subsection (a) shall be limited exclusively to that information that is necessary for the enforcement of traffic light violations. On behalf of the city, a private entity that operates a traffic light signal violation monitoring system may enter into an agreement with the Department of Motor Vehicles, in accordance with the provisions of Code of Virginia, § 46.2-208(B)(21), to obtain vehicle owner information regarding the registered owners of vehicles that fail to comply with a traffic light signal. Information provided to the operator of a traffic light signal violation monitoring system shall be protected in a database with security comparable to that of the Department of Motor Vehicles' system, and used only for enforcement against individuals who violate the provisions of this section. Notwithstanding any other provision of law, all photographs, microphotographs, electronic images, or other personal information collected by a traffic light signal violation monitoring system shall be used exclusively for enforcing traffic light violations and shall not:

(1) Be open to the public;

(2) Be sold or used for sales, solicitation or marketing purposes;

(3) Be disclosed to any other entity except as may be necessary for the enforcement of a traffic light violation or to a vehicle owner or operator as part of a challenge to the violation; or

(4) Be used in a court in a pending action or proceeding unless the action or proceeding relates to a violation of Code of Virginia, §§ 46.2-833, 46.2-835, 46.2-836, or a substantially similar ordinance or law in any other jurisdiction, or requested upon order from a court of competent jurisdiction.

Information collected under this section pertaining to a specific violation shall be purged and not retained later than sixty (60) days after the collection of any civil penalties. If a locality does not execute a summons for a violation of this section within ten (10) business days, all information collected pertaining to that suspected violation shall be purged within two (2) business days. Any locality operating a traffic light signal violation monitoring system shall annually certify compliance with this section and make all records pertaining to such system available for inspection and audit by the Commissioner of Highways or the Commissioner of the Department of Motor Vehicles or his designee. Any person who discloses personal information in violation of the provisions of this subsection shall be subject to a civil penalty of one thousand dollars ($1,000.00) per disclosure. Any unauthorized use or disclosure of such personal information shall be grounds for termination of the agreement between the Department of Motor Vehicles and the private entity.

(i) A private entity may enter into an agreement with the city to be compensated for providing the traffic light signal violation monitoring system or equipment, and all related support services, to include consulting, operations and administration. However, only a law-enforcement officer employed by the city may swear to or affirm the certificate required by subsection (c). The city shall not enter into an agreement for compensation based on the number of violations or monetary penalties imposed.

(j) When selecting potential intersections for the traffic light signal violation monitoring system, the city manager shall consider factors such as:

(1) The accident rate for the intersection;

(2) The rate of red light violations occurring at the intersection (number of violations per number of vehicles);

(3) The difficulty experienced by law-enforcement officers in patrol cars or on foot in apprehending violators; and

(4) The ability of law-enforcement officers to apprehend violators safely within a reasonable distance from the violation.

The city manager may consider the risk to pedestrians as a factor as well. The city manager shall submit a list of intersections to the Virginia Department of Transportation for final approval.

(k) Before the implementation of a traffic light signal violation monitoring system at an intersection, the city manager shall complete an engineering safety analysis that addresses signal timing and other location-specific safety features. The length of the yellow phase shall be established based on the recommended methodology of the Institute of Transportation Engineers. All traffic light signal violation monitoring systems shall provide a minimum 0.5-second grace period between the time the signal turns red and the time the first violation is recorded. If recommended by the engineering safety analysis, the city shall make reasonable location-specific safety improvements, including signs and pavement markings.

(l) The city manager shall cause the evaluation of the traffic light signal violation monitoring system on a monthly basis to ensure all cameras and traffic signals are functioning properly. Evaluation results shall be made available to the public.

(m) The city manager shall cause the placement of conspicuous signs within five hundred (500) feet of the intersection approach at which a traffic light signal violation monitoring system is used to enforce traffic light signals. There shall be a rebuttable presumption that such signs were in place at the time of the commission of the traffic light signal violation.

(n) Prior to or coincident with the implementation or expansion of a traffic light signal violation monitoring system, the city manager shall cause the implementation of a public awareness program, advising the public that the city is implementing or expanding a traffic light signal violation monitoring system.

(o) Notwithstanding any other provision of this section, if a vehicle depicted in images recorded by a traffic light signal photo-monitoring system is owned, leased, or rented by a county, city, or town, then the city may access and use the recorded images and associated information for employee disciplinary purposes.

The zone shall extend between portable signs, tilt-over signs or fixed blinking signs placed in and along the street bearing the words "school" or "school crossing." Such words shall indicate that school children are present in the vicinity.

(2) Any signs erected under this section shall be placed not more than six hundred (600) feet from the limits of the school property or crossing

in the vicinity of the school, which is used by children going to and from school; provided, that "school crossing" signs may be placed in any location where an engineering and traffic investigation establishes a need therefor and the state department highways and transportation or the city council has approved the crossing for such signs.

(3) Portable signs provided for in this section shall be furnished by the city. It shall be the duty of the principal or chief administrative officer of each school or some responsible person designated by the school board, preferably not a classroom teacher, to place such portable signs in the street or highway at a point not more than six hundred (600) feet from the limits of the school property and remove such signs when their presence is no longer required by this subsection.

(4) Portable, tilt-over or fixed blinking signs provided for in this section shall be placed in a position plainly visible to vehicular traffic approaching from either direction, but shall not be placed so as to obstruct the roadway. Such signs or signals shall be in position, or be turned on, for thirty (30) minutes preceding regular school hours and for thirty (30) minutes thereafter and during such other times as the presence of children on such school property or going to and from school reasonably required a special warning to motorists.

Sec. 25-227. Same—On bridges.

(1) Except as otherwise provided, it shall be unlawful for any person to drive any vehicle upon any bridge open to the use of the public for purposes of vehicular travel in the city at a speed which is greater than that which can be maintained thereon with safety to such structure, which maximum speed for each such bridge shall be determined by the director of public works, and shall be displayed on suitable signs at the ends of each such bridge.

(2) It shall be unlawful for any person to drive any vehicle which, together with the load thereon, shall be in excess of seven (7) tons over any bridge with wooden decking in the city at a speed greater than ten (10) miles per hour.
(Code 1958, §§ 29-34, 29-35)

Sec. 25-228. Reduction of speed limit on streets under repair or where men working.

(1) The director of public works is hereby authorized to reduce, for a temporary period not to exceed sixty (60) days, the speed limit on any portion of any street or highway in the city on which men are working or where the street or highway is under construction or repair. The speed limit shall not be reduced to less than fifteen (15) miles per hour.

(2) Signs shall be posted at the termini of any such area clearly indicating the speed limit within such area. After the posting of such signs, it shall be unlawful for any person to drive any vehicle within such area in excess of the posted speed limit.
(Code 1958, § 29-35.1)

Sec. 25-229. Minimum speed limits.

(1) It shall be unlawful for any person to drive a motor vehicle at such slow speed as to impede the normal movement of traffic, except when reduced speed is necessary in safe operation or in compliance with the law.

(2) Whenever the city council determines on the basis of an engineering and traffic investigation that slow speed on a part of any street or highway consistently impedes the normal and reasonable movement of traffic, the city council may determine and declare a minimum speed limit, to be set forth on signs posted on such street or highway, below which no person shall drive a vehicle, except when necessary for safe operation or in compliance with the law; provided, that such minimum speed limit shall not apply to a school bus carrying children.
(Code 1958, § 29-32)

State law reference—Similar provisions, Code of Virginia, § 46.1-193(2).

Sec. 25-230. Necessity for speed limit signs.

No person shall be convicted of a violation of an ordinance enacted by the city council pursuant to the provisions of Code of Virginia, § 46.1-180, decreasing the speed limit established in section 25-224, when such person has exceeded the speed limit in an area where the speed limit has been decreased, unless such area is clearly indicated by a conspicuous marker at the termini of such area.
(Code 1958, § 29-33)

State law reference—Similar provisions, Code of Virginia, § 46.1-194. See also, § 46.1-180.

Sec. 25-231. Exemptions from speed limits.

(1) The speed limitations set forth in this chapter shall not apply to vehicles when operated with due regard for safety under the direction of the police in the chase or apprehension of violators of the law, or of persons charged with or suspected of any such violations, or in response to emergency calls, or in testing the accuracy of speedometers on police vehicles, or in testing the accuracy of the radio microwaves or other electrical devices specified in section 25-232, nor to fire department vehicles when traveling in response to a fire alarm or pulmotor call, nor to municipal ambulances when traveling in emergencies.

(2) The exemptions granted by this section to a moving vehicle shall apply only when the operator of such vehicle displays a flashing, linking or alternating red light and sounds a siren, bell, exhaust whistle or air horn designed to give automatically intermittent signals, as may be reasonably necessary, and only when there is in force and effect for such vehicle standard automobile liability insurance covering injury or death to any one person in the sum of at least one hundred thousand dollars ($100,000.00) in any one accident and, subject to the limit for one person, to a limit of three hundred thousand dollars ($300,000.00) because of bodily injury to or death of two (2) or more persons in any one accident, and to a limit of ten thousand dollars ($10,000.00) because of injury to or destruction of property of others in any one accident.

(3) The exemptions granted by this section shall not protect the operator of any such vehicle from criminal prosecution for conduct constituting reckless disregard of the safety of persons and property. Nothing in this section shall be construed to release the operator of any such vehicle from civil liability for failure to use reasonable care in such operation.
(Code 1958, § 29-37)

State law reference—Similar provisions, Code of Virginia, § 46.1-199.

Sec. 25-232. Checking on speed with various devices; certificate as to accuracy of device; arrest without warrant.

(a) The speed of any motor vehicle may be checked by the use of radio microwaves or other electrical devices. The results of such checks shall be accepted as prima facie evidence of the speed of such motor vehicle in any court or legal proceeding where the speed of the motor vehicle is at issue.

(b) In any court or legal proceeding in which any question arises about the calibration or accuracy of any radio microwave or other electrical device used to check the speed of any motor vehicle, a certificate, executed and signed by the officer or officers calibrating or testing such device for its accuracy, and stating the time of such test, type of test and results of testing, when such certificate is accompanied by a certificate, or true copy thereof, showing the calibration or accuracy of the speedometer of any vehicle employed in calibrating or testing such device, and when and by whom such speedometer calibration was made, shall be admissible when attested by one such officer who executed and signed it as evidence of the facts therein stated and results of such testing. No calibration or testing of such device shall be valid for longer than six (6) months.

(c) The driver of any such motor vehicle may be arrested without a warrant under this section, provided the arresting officer is in uniform or displays his badge of authority; provided that such officer has observed the registration of the speed of such motor vehicle by the radio microwaves or other electrical device, or has

received a radio message from the officer who observed the speed of the motor vehicle registered by the radio microwaves or other electrical device; provided, in case of an arrest based on such a message, that such radio message has been dispatched immediately after the speed of the motor vehicle was registered and has furnished the license number or other positive identification of the vehicle and the registered speed to the arresting officer.

(d) The division of purchases and supply, pursuant to section 2.1-446 of the Code of Virginia, 1950, as amended, shall determine the proper equipment or electrical devices and training necessary in the operation of such equipment and devices used to measure the speed of motor vehicles and shall advise the City of Norfolk law enforcement officials of the same. The chief of police shall ensure that all such equipment, devices, and training necessary in the use of such equipment and devices meet or exceeds the standards established by the division. This provision shall apply only to equipment and devices purchased on or after July 1, 1986.

State law reference—Similar provisions and authority of city to use electrical devices to measure speed, Code of Virginia, § 46.2-882.

Sec. 25-233. Photo speed monitoring devices in highway work zones and school crossing zones.

(a) For the purposes of this section:

"Highway work zone" has the same meaning ascribed to it in Code of Virginia § 46.2-878.1.

"Photo speed monitoring device" means equipment that uses radar or LIDAR-based speed detection and produces one or more photographs, microphotographs, videotapes, or other recorded images of vehicles.

"School crossing zone" has the same meaning ascribed to it in Code of Virginia § 46.2-873.

(b) As authorized by the city manager, the Norfolk Police Department may place and operate photo speed monitoring devices within the boundaries of the city in school crossing zones for the purposes of recording violations of Code of Virginia § 46.2-873 and in highway work zones for the purposes of recording violations of Code of Virginia § 46.2-878.1.

(1) The operator of a vehicle shall be liable for a monetary civil penalty imposed pursuant to this section if such vehicle is found, as evidenced by information obtained from a photo speed monitoring device, to be traveling at speeds of at least ten (10) miles per hour above the posted school crossing zone or highway work zone speed limit within such school crossing zone or highway work zone. Such civil penalty shall be one hundred dollars ($100.00), and any prosecution shall be instituted and conducted in the same manner as prosecution for traffic infractions. Civil penalties collected under this section resulting from a summons issued by a local law-enforcement officer shall be paid to the locality in which such violation occurred. Civil penalties collected under this section resulting from a summons issued by a law-enforcement officer employed by the department of state police shall be paid into the literary fund.

(2) If a photo speed monitoring device is used, proof of a violation of Code of Virginia § 46.2-873 or 46.2-878.1 shall be evidenced by information obtained from such device. A certificate, or a facsimile thereof, sworn to or affirmed by a law-enforcement officer, based upon inspection of photographs, microphotographs, videotapes, or other recorded images produced by a photo speed monitoring device, shall be prima facie evidence of the facts contained therein. Any photographs, microphotographs, videotapes, or other recorded images evidencing such a violation shall be available for inspection in any proceeding to

adjudicate the liability for such violation of Code of Virginia § 46.2-873 or 46.2-878.1.

(3) In the prosecution for a violation of Code of Virginia § 46.2-873 or 46.2-878.1 in which a summons was issued by mail, prima facie evidence that the vehicle described in the summons issued pursuant to this section was operated in violation of Code of Virginia § 46.2-873 or 46.2-878.1, together with proof that the defendant was at the time of such violation the owner, lessee, or renter of the vehicle, shall constitute in evidence a rebuttable presumption that such owner, lessee, or renter of the vehicle was the person who committed the violation. Such presumption shall be rebutted if the owner, lessee, or renter of the vehicle:

i. Files an affidavit by regular mail with the Clerk of the Norfolk General District Court that he was not the operator of the vehicle at the time of the alleged violation and provides the name and address of the person who was operating the vehicle at the time of the alleged violation; or

ii. Testifies in open court under oath that he was not the operator of the vehicle at the time of the alleged violation and provides the name and address of the person who was operating the vehicle at the time of the alleged violation.

Such presumption shall also be rebutted if a certified copy of a police report, showing that the vehicle had been reported to the police as stolen prior to the time of the alleged violation of Code of Virginia § 46.2-873 or 46.2-878.1, is presented, prior to the return date established on the summons issued pursuant to this section, to the court adjudicating the alleged violation.

(4) Imposition of a penalty pursuant to this section by mailing a summons shall not be deemed a conviction as an operator and shall not be made part of the operating record of the person upon whom such liability is imposed, nor shall it be used for insurance purposes in the provision of motor vehicle insurance coverage. However, if a law-enforcement officer uses a photo speed monitoring device to record a violation of Code of Virginia § 46.2-873 or 46.2-878.1 and personally issues a summons at the time of the violation, the conviction that results shall be made a part of such driver's driving record and used for insurance purposes in the provision of motor vehicle insurance coverage.

(5) A summons for a violation of Code of Virginia § 46.2-873 or 46.2-878.1 issued by mail pursuant to this section may be executed pursuant to Code of Virginia § 19.2-76.2. Notwithstanding the provisions of Code of Virginia § 19.2-76, a summons issued by mail pursuant to this section may be executed by mailing by first-class mail a copy thereof to the owner, lessee, or renter of the vehicle. In the case of a vehicle owner, the copy shall be mailed to the address contained in the records of or accessible to the department of motor vehicles. In the case of a vehicle lessee or renter, the copy shall be mailed to the address contained in the records of the lessor or renter. Every such mailing shall include, in addition to the summons, a notice of:

i. The summoned person's ability to rebut the presumption that he was the operator of the vehicle at the time of the alleged violation through the filing of an affidavit as provided in subdivision (3) above, and

ii. Instructions for filing such affidavit, including the address to which the affidavit is to be sent.

If the summoned person fails to appear on the date of return set out in the summons mailed pursuant to this section, the summons shall be executed in the manner set out in Code of Virginia § 19.2-76.3. No proceedings for contempt or arrest of a person summoned by mail-

ing shall be instituted for failure to appear on the return date of the summons. If the summons is issued to an owner, lessee, or renter of a vehicle with a registration outside the commonwealth and such person fails to appear on the date of return set out in the summons mailed pursuant to this section, the summons will be eligible for all legal collections activities. Any summons executed for a violation of Code of Virginia § 46.2-873 or 46.2-878.1 issued pursuant to this section shall provide to the person summoned at least thirty (30) days from the mailing of the summons to inspect information collected by a photo speed monitoring device in connection with the violation. If the law-enforcement agency that was operating the photo speed monitoring device does not execute a summons for a violation of Code of Virginia § 46.2-873 or 46.2-878.1 issued pursuant to this section within thirty (30) days from the date of the violation, all information collected pertaining to that suspected violation shall be purged within sixty (60) days from the date of the violation.

(6) A private vendor may enter into an agreement with the Norfolk Police Department through the City of Norfolk to be compensated for providing a photo speed monitoring device and all related support services, including consulting, operations, and administration. However, only a law-enforcement officer may swear to or affirm the certificate required by this subsection. Any such agreement for compensation shall be based on the value of the goods and services provided, not on the number of violations paid or monetary penalties imposed. Any private vendor contracting with the City of Norfolk pursuant to this section may enter into an agreement with the department of motor vehicles, in accordance with the provisions of subdivision B 31 of Code of Virginia § 46.2-208, to obtain vehicle owner information regarding the registered owners of vehicles that committed a violation of Code of Virginia § 46.2-873 or 46.2-878.1. Any such information provided to such private vendor shall be protected in a database.

(7) Information collected by a photo speed monitoring device operated pursuant to this section shall be limited exclusively to that information that is necessary for the enforcement of school crossing zone and highway work zone speeding violations. Information provided to the operator of a photo speed monitoring device shall be protected in a database and used only for enforcement against individuals who violate the provisions of this section or Code of Virginia § 46.2-873 or 46.2-878.1. Notwithstanding any other provision of law, all photographs, microphotographs, videotapes, or other recorded images collected by a photo speed monitoring device shall be used exclusively for enforcing school crossing zone and highway work zone speed limits and shall not be:

i. Open to the public;

ii. Sold or used for sales, solicitation, or marketing purposes;

iii. Disclosed to any other entity except as may be necessary for the enforcement of school crossing zone and highway work zone speed limits or to a vehicle owner or operator as part of a challenge to the violation; or

iv. Used in a court in a pending action or proceeding unless the action or proceeding relates to a violation of this section or Code of Virginia § 46.2-873 or 46.2-878.1, or such information is requested upon order from a court of competent jurisdiction.

Information collected under this section pertaining to a specific violation shall be purged and not retained later than sixty (60) days after the collection of any civil penalties. While using photo speed monitoring devices, the Norfolk Police Department shall annually certify compli-

ance with this section and Code of Virginia § 46.2-882.1 and make all records pertaining to such system available for inspection and audit by the commissioner of highways or the commissioner of the department of motor vehicles or his designee. Any person who discloses personal information in violation of the provisions of this subdivision shall be subject to a civil penalty of one thousand dollars ($1,000.00) per disclosure.

(8) A conspicuous sign shall be placed within one thousand (1,000) feet of any school crossing zone or highway work zone at which a photo speed monitoring device is used, indicating the use of the device. There shall be a rebuttable presumption that such sign was in place at the time of the commission of the speed limit violation.

(9) While the Norfolk Police Department places and operates a photo speed monitoring device pursuant to the provisions of this section shall report to the department of state police, in a format to be determined by the department of state police, by January 15 of each year on the number of traffic violations prosecuted, the number of successful prosecutions, and the total amount of monetary civil penalties collected.

(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-251.1. Persons under age twenty-one driving after illegally consuming alcohol; penalty.

(a) It shall be unlawful for any person under the age of twenty-one (21) to operate any motor vehicle after illegally consuming alcohol. Any such person with a blood-alcohol concentration of 0.02 percent or more by weight by volume or 0.02 grams or more per two hundred ten (210) liters of breath but less than 0.08 by weight by volume or less than 0.08 grams per two hundred ten (210) liters of breath as indicated by a chemical test administered as provided in this article shall be in violation of this section.

(b) A violation of this section shall be punishable by forfeiture of such person's license to operate a motor vehicle for a period of six (6) months from the date of conviction and by a fine of not more than five hundred dollars ($500.00). The penalties and license forfeiture provisions set forth in Code of Virginia, § 16.1-278.9, and sections 25-255 and 25-257 shall not apply to a violation of this section. (Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-252. Preliminary analysis of breath to determine alcoholic content of blood.

(a) Any person who is suspected of a violation of section 25-251, 25-251.1 or 25-258 shall be entitled, if such equipment is available, to have his breath analyzed to determine the probable alcoholic content of his blood. The person shall also be entitled, upon request, to observe the process of analysis and to see the blood-alcohol reading on the equipment used to perform the breath test. His breath may be analyzed by any police officer of the commonwealth, or of any county, city or town, or by any member of a sheriff's department in the normal discharge of his duties.

(b) The department of forensic science shall determine the proper method and equipment to be used in analyzing breath samples taken pursuant to this section and shall advise the respective police and sheriff's departments of the same.

(c) Any person who has been stopped by a police officer of the commonwealth, or of any county, city or town, or by any member of a sheriff's department and is suspected by such officer to be guilty of an offense listed in subsection (a), shall have the right to refuse to permit his breath to be so analyzed, and his failure to permit such analysis shall not be evidence in any prosecution for an offense listed in subsection (a).

(d) Whenever the breath sample analysis indicates that alcohol is present in the person's blood, the officer may charge the person with a violation of an offense listed in subsection (a). The person so charged shall then be subject to the provisions of sections 25-253 through 25-253.10.

(e) The results of the breath analysis shall not be admitted into evidence in any prosecution for an offense listed in subsection (a), the purpose of this section being to permit a preliminary analysis of the alcoholic content of the blood of a person suspected of having committed an offense listed in subsection (a).

(f) Police officers or members of any sheriff's department shall, upon stopping any person suspected of having committed an offense listed in subsection (a), advise the person of his rights under the provisions of this section.

(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.1. Implied consent to postarrest testing to determine drug or alcohol content of blood.

(a) Any person, whether licensed by Virginia or not, who operates a motor vehicle upon a highway, as defined in Code of Virginia, § 46.2-100, in this commonwealth, shall be deemed thereby, as a condition of such operation, to have consented to have samples of his blood, breath, or both blood and breath taken for a chemical test to determine the alcohol, drug, or both alcohol and drug content of his blood, if he is arrested for violation of section 25-251, 25-251.1 or 25-258 within three (3) hours of the alleged offense.

(b) Any person so arrested for a violation of clause (i) or (ii) of section 25-251 or both, section 25-251.1 or 25-258 of this article shall submit to a breath test. If the breath test is unavailable or the person is physically unable to submit to the breath test, a blood test shall be given. The accused shall, prior to administration of the test, be advised by the person administering the test that he has the right to observe the process of analysis and to see the blood-alcohol reading on the equipment used to perform the breath test. If the equipment automatically produces a written printout of the breath test result, the printout, or a copy, shall be given to the accused.

(c) A person, after having been arrested for a violation of clause (iii), (iv), or (v) of section 25-251, 25-251.1 or 25-258, may be required to submit to a blood test to determine the drug or both drug and alcohol content of his blood. When a person, after having been arrested for a violation of subsection 25-251(i) or (ii) or both, submits to a breath test in accordance with subsection (b) or refuses to take or is incapable of taking such a breath test, he may be required to submit to tests to determine the drug or both drug and alcohol content of his blood if the law enforcement officer has reasonable cause to believe the person was driving under the influence of any drug or combination of drugs, or the combined influence of alcohol and drugs.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.2. Refusal of tests; penalties; procedures.

(a) It shall be unlawful for a person who is arrested for a violation of section 25-251, 25-251.1 or 25-258 to unreasonably refuse to have samples of his blood or breath or both blood and breath taken for chemical tests to determine the alcohol or drug content of his blood as required by section 25-253.1 and any person who so unreasonably refuses is guilty of a violation of this section.

(b) When a person is arrested for a violation of section 25-251, 25-251.1 or 25-258 and such person refuses to permit blood or breath or both blood and breath samples to be taken for testing as required by section 25-253.1, the arresting officer shall advise the person, from a form provided by the Office of the Executive Secretary of the Supreme Court, that

(i) A person who operates a motor vehicle upon a highway in the commonwealth is deemed thereby, as a condition of such operation, to have consented to have samples of his blood and breath taken for chemical tests to determine the alcohol or drug content of his blood,

(ii) A finding of unreasonable refusal to consent may be admitted as evidence at a criminal trial,

(iii) The unreasonable refusal to do so constitutes grounds for the revocation of the privilege of operating a motor vehicle upon the highways of the commonwealth,

(iv) The criminal penalty for unreasonable refusal within ten (10) years of a prior conviction for driving while intoxicated or unreasonable refusal is a class 2 misdemeanor, and

(v) The criminal penalty for unreasonable refusal within ten (10) years of any two (2) prior convictions for driving while intoxicated or unreasonable refusal is a class 1 misdemeanor.

The form from which the arresting officer shall advise the person arrested shall contain a brief statement of the law requiring the taking of blood or breath samples, a statement that a finding of unreasonable refusal to consent may be admitted as evidence at a criminal trial, and the penalties for refusal. The Office of the Executive Secretary of the Supreme Court shall make the form available on the internet and the form shall be considered an official publication of the commonwealth for the purposes of Code of Virginia, § 8.01-388.

(c) The arresting officer shall, under oath before the magistrate, execute the form and certify:

(i) That the defendant has refused to permit blood or breath or both blood and breath samples to be taken for testing;

(ii) That the officer has read the portion of the form described in subsection (b) to the arrested person;

(iii) That the arrested person, after having had the portion of the form described in subsection (b) read to him, has refused to permit such sample or samples to be taken; and

(iv) How many, if any, violations of this section, section 25-251, or any offense described in subsection 25-255(d), the arrested person has been convicted of within the last ten (10) years.

Such sworn certification shall constitute probable cause for the magistrate to issue a warrant or summons charging the person with unreasonable refusal. The magistrate shall attach the executed and sworn advisement form to the warrant or summons. The warrant or summons for a first offense under this section shall be executed in the same manner as a criminal warrant or summons. If the person arrested has been taken to a medical facility for treatment or evaluation of his medical condition, the arresting officer may read the advisement form to the person at the medical facility, and issue, on the premises of the medical facility, a summons for a violation of this section in lieu of securing a warrant or summons from the magistrate. The magistrate or arresting officer, as the case may be, shall forward the executed advisement form and warrant or summons to the appropriate court.

(d) A first violation of this section is a civil offense and subsequent violations are criminal offenses. For a first offense the court shall sus-

pend the defendant's privilege to drive for a period of one year. This suspension period is in addition to the suspension period provided under Code of Virginia, § 46.2-391.2.

If a person is found to have violated this section and within ten (10) years prior to the date of the refusal he was found guilty of any of the following: a violation of this section, or a violation of section 25-251, or a violation of any offense listed in subsection 25-255(d), arising out of separate occurrences or incidents, he is guilty of a class 2 misdemeanor and the court shall suspend the defendant's privilege to drive for a period of three (3) years. This suspension period is in addition to the suspension period provided under Code of Virginia, § 46.2-391.2.

If a person is found guilty of a violation of this section and within ten (10) years prior to the date of the refusal he was found guilty of any two (2) of the following: a violation of this section, or section 25-251, or a violation of any offense listed in subsection 25-255(d), he is guilty of a class 1 misdemeanor and the court shall suspend the defendant's privilege to drive for a period of three (3) years. This suspension period is in addition to the suspension period provided under Code of Virginia, § 46.2-391.2.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.3. Trial and appeal for refusal.

(a) Venue for the trial of the warrant or summons shall lie in the court of the county or city in which the offense of driving under the influence of intoxicants or other offense listed in subsection 25-253.2(a) is to be tried.

(b) The procedure for appeal and trial of a first offense of section 25-253.2 shall be the same as provided by law for misdemeanors; if requested by either party on appeal to the circuit court, trial by jury shall be as provided in Code of Virginia, title 19.2, chapter 15, article 4, (§ 19.2-260 et seq.), and the city shall be required to prove its case beyond a reasonable doubt.

(c) If the defendant pleads guilty to a violation of section 25-251, 25-251.1 or 25-258, the court may dismiss the warrant or summons.

The court shall dispose of the defendant's license in accordance with the provisions of Code of Virginia, § 46.2-398; however, the defendant's license shall not be returned during any period of suspension imposed under Code of Virginia, § 46.2-391.2.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.4. Qualifications and liability of persons authorized to take blood sample; procedure for taking samples.

For purposes of this article, only a physician, registered nurse, licensed practical nurse, phlebotomist, graduate laboratory technician or a technician or nurse designated by order of a circuit court acting upon the recommendation of a licensed physician, using soap and water, polyvinylpyrrolidone iodine, pvp iodine, povidone iodine or benzalkonium chloride to cleanse the part of the body from which the blood is taken and using instruments sterilized by the accepted steam sterilizer or some other sterilizer which will not affect the accuracy of the test, or using chemically clean sterile disposable syringes, shall withdraw blood for the purpose of determining its alcohol or drug or both alcohol and drug content. It is a class 3 misdemeanor to reuse single-use-only needles or syringes. No civil liability shall attach to any person authorized to withdraw blood as a result of the act of withdrawing blood as provided in this section from any person submitting thereto, provided the blood was withdrawn according to recognized medical procedures. However, the person shall not be relieved from liability for negligence in the withdrawing of any blood sample.

No person arrested for a violation of section 25-251, 25-251.1 or 25-258 shall be required to execute in favor of any person or corporation a waiver or release of liability in connection with the withdrawal of blood and as a condition precedent to the withdrawal of blood as provided for in this section.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.5. Transmission of blood samples.

The blood sample withdrawn pursuant to section 25-253.4 shall be placed in vials provided or

approved by the department of forensic science. The vials shall be sealed by the person taking the sample or at his direction. The person who seals the vials shall complete the prenumbered certificate of blood withdrawal forms and attach one form to each vial. The completed withdrawal certificate for each vial shall show the name of the accused, the name of the person taking the blood sample, the date and time the blood sample was taken and information identifying the arresting or accompanying officer. The vials shall be placed in a container provided by the department, and the container shall be sealed to prevent tampering with the vials. The arresting or accompanying officer shall take possession of the container as soon as the vials are placed in the container and sealed, and shall promptly transport or mail the container to the department.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.6. Transmission of blood test samples; use as evidence.

(a) Upon receipt of a blood sample forwarded to the department for analysis pursuant to section 25-253.5, the department shall have it examined for its alcohol or drug or both alcohol and drug content and the director shall execute a certificate of analysis indicating the name of the accused; the date, time and by whom the blood sample was received and examined; a statement that the seal on the vial had not been broken or otherwise tampered with; a statement that the container and vial were provided or approved by the department and that the vial was one to which the completed withdrawal certificate was attached; and a statement of the sample's alcohol or drug or both alcohol and drug content. The director shall remove the withdrawal certificate from the vial, attach it to the certificate of analysis and state in the certificate of analysis that it was so removed and attached. The certificate of analysis with the withdrawal certificate shall be returned to the clerk of the court in which the charge will be heard.

(b) After completion of the analysis, the department shall preserve the remainder of the blood until ninety (90) days have lapsed from the date the blood was drawn. During this ninety-day period, the accused may, by motion filed before the court in which the charge will be heard, with notice to the department, request an order directing the department to transmit the remainder of the blood sample to an independent laboratory retained by the accused for analysis. The department shall destroy the remainder of the blood sample if no notice of a motion to transmit the remaining blood sample is received during the ninety-day period.

(c) When a blood sample taken in accordance with the provisions of sections 25-253.1 through 25.253.5 is forwarded for analysis to the department, a report of the test results shall be filed in that office. Upon proper identification of the certificate of withdrawal, the certificate of analysis, with the withdrawal certificate attached, shall, when attested by the director, be admissible in any court as evidence of the facts therein stated and of the results of such analysis:

(i) In any criminal proceeding, provided the requirements of Code of Virginia, § 19.2-187.1A, have been satisfied and the accused has not objected to the admission of the certificate pursuant to Code of Virginia, § 19.2-187.1B, or

(ii) In any civil proceeding.

On motion of the accused, the report of analysis prepared for the remaining blood sample shall be admissible in evidence provided the report is duly attested by a person performing such analysis and the independent laboratory that performed the analysis is accredited or certified to conduct forensic blood alcohol/drug testing by one or more of the following bodies: American Society of Crime Laboratory Directors/Laboratory Accreditation Board (ASCLD/LAB); College of American Pathologists (CAP); United States Department of Health and Human Services Substance Abuse and Mental Health Services Administration (SAMHSA); or American Board of Forensic Toxicology (ABFT).

Upon request of the person whose blood was analyzed, the test results shall be made available to him.

The director may delegate or assign these duties to an employee of the department.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.7. Fees.

Payment for withdrawing blood shall not exceed twenty-five dollars ($25.00), which shall be paid out of the appropriation for criminal charges. If the person whose blood sample was withdrawn is subsequently convicted for a violation of section 25-251, 25-251.2 or 25-258, or is placed under the purview of a probational, educational, or rehabilitational program as set forth in section 25-257.1, the amount charged by the person withdrawing the sample shall be taxed as part of the costs of the criminal case and shall be paid into the general fund of the state treasury.

If the person whose blood sample was withdrawn is subsequently convicted for violation of section 25-251, 25-251.1 or 25-258, a fee of twenty-five dollars ($25.00) for testing the first blood sample by the department shall be taxed as part of the costs of the criminal case and shall be paid into the general fund of the state treasury.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.8. Assurance of breath test validity; use of breath test results as evidence.

(a) To be capable of being considered valid as evidence in a prosecution under section 25-251, 25-251.1, or 25-258, chemical analysis of a person's breath shall be performed by an individual possessing a valid license to conduct such tests, with a type of equipment and in accordance with methods approved by the department.

(b) The department shall establish a training program for all individuals who are to administer the breath tests. Upon a person's successful completion of the training program, the department may license him to conduct breath test analyses. Such license shall identify the specific types of breath test equipment upon which the individual has successfully completed training. Any individual conducting a breath test under the provisions of section 25-253.1 shall issue a certificate which will indicate that the test was conducted in accordance with the department's specifications, the name of the accused, that prior to administration of the test the accused was advised of his right to observe the process and see the blood alcohol reading on the equipment used to perform the breath test, the date and time the sample was taken from the accused, the sample's alcohol content, and the name of the person who examined the sample. This certificate, when attested by the individual conducting the breath test on equipment maintained by the department, shall be admissible in any court as evidence of the facts therein stated and of the results of such analysis:

(i) In any criminal proceeding, provided that the requirements of Code of Virginia, § 19.2-187.1A, have been satisfied and the accused has not objected to the admission of the certificate pursuant to Code of Virginia, § 19.2-187.1B, or

(ii) In any civil proceeding.

Any such certificate of analysis purporting to be signed by a person authorized by the department shall be admissible in evidence without proof of seal or signature of the person whose name is signed to it. A copy of the certificate shall be promptly delivered to the accused. Copies of department records relating to any breath test conducted pursuant to this section shall be admissible provided such copies are authenticated as true copies either by the custodian thereof or by the person to whom the custodian reports.

The officer making the arrest, or anyone with him at the time of the arrest, or anyone participating in the arrest of the accused, if otherwise qualified to conduct such test as provided by this section, may administer the breath test and analyze the results.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.9. Evidence of violation of driving under the influence offenses.

(a) In any trial for a violation of section 25-251, 25-251.1, or 25-258, the admission of the blood or breath test results shall not limit the introduction of any other relevant evidence bearing upon any question at issue before the court, and the court shall, regardless of the result of any blood or breath tests, consider other relevant admissible evidence of the condition of the accused. If the test results indicate the presence of any drug other than alcohol, the test results shall be admissible, except in a prosecution under clause (v) of section

25-251, only if other competent evidence has been presented to relate the presence of the drug or drugs to the impairment of the accused's ability to drive or operate any motor vehicle, engine or train safely.

(b) The failure of an accused to permit a blood or breath sample to be taken to determine the alcohol or drug content of his blood is not evidence and shall not be subject to comment by the city at the trial of the case, except in rebuttal or pursuant to subsection (c); nor shall the fact that a blood or breath test had been offered the accused be evidence or the subject of comment by the city, except in rebuttal or pursuant to subsection (c).

(c) Evidence of a finding against the defendant under section 25-253.2 for his unreasonable refusal to permit a blood or breath sample to be taken to determine the alcohol or drug content of his blood shall be admissible into evidence, upon the motion of the city or the defendant, for the sole purpose of explaining the absence at trial of a chemical test of such sample. When admitted pursuant to this subsection such evidence shall not be considered evidence of the accused's guilt.

(d) The court or jury trying the case involving a violation of clause (ii), (iii) or (iv) of section 25-251 or 25-251.1 shall determine the innocence or guilt of the defendant from all the evidence concerning his condition at the time of the alleged offense.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-253.10. Substantial compliance.

The steps set forth in sections 25-253 through 25-253.8 relating to taking, handling, identifying, and disposing of blood or breath samples are procedural and not substantive. Substantial compliance shall be sufficient. Failure to comply with any steps or portions thereof shall not of itself be grounds for finding the defendant not guilty, but shall go to the weight of the evidence and shall be considered with all the evidence in the case; however, the defendant shall have the right to introduce evidence on his own behalf to show noncompliance with the aforesaid procedures or any part thereof, and that as a result his rights were prejudiced.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-254. Presumptions from alcohol or drug content of blood.

(a) In any prosecution for a violation of section 25-251, the amount of alcohol or drugs in the blood of the accused at the time of the alleged offense as indicated by a chemical analysis of a sample of the accused's blood or breath to determine the alcohol or drug content of his blood in accordance with the provisions of sections 25-253 through 25-253.10 shall give rise to the following rebuttable presumptions:

(1) If there was at that time 0.05 percent or less by weight by volume of alcohol in the accused's blood or 0.05 grams or less per two hundred ten (210) liters of the accused's breath, it shall be presumed that the accused was not under the influence of alcohol intoxicants at the time of the alleged offense;

(2) If there was at that time in excess of 0.05 percent but less than 0.08 percent by weight by volume of alcohol in the accused's blood or 0.05 grams but less than 0.08 grams per two hundred ten (210) liters of the accused's breath, such facts shall not give rise to any presumption that the accused was or was not under the influence of alcohol intoxicants at the time of the alleged offense, but such facts may be considered with other competent evidence in determining the guilt or innocence of the accused;

(3) If there was at that time 0.08 percent or more by weight by volume of alcohol in the accused's blood or 0.08 grams or more per two hundred ten (210) liters of the accused's breath, it shall be presumed that the accused was under the influence of alcohol intoxicants at the time of the alleged offense; or

(4) If there was at that time an amount of the following substances at a level that is equal to or greater than: (a) 0.02 milligrams of cocaine per liter of blood, (b) 0.1 milligrams of methamphetamine per liter of blood, (c) 0.01 milligrams of phencyclidine per liter of blood, or (d) 0.1 milligrams of 3,4-methylenedioxymethamphet-

amine per liter of blood, it shall be presumed that the accused was under the influence of drugs at the time of the alleged offense to a degree which impairs his ability to drive or operate any motor vehicle, engine or train safely.

(b) The provisions of this section shall not apply to and shall not affect any prosecution for a violation of Code of Virginia, § 46.2-341.24.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-255. Penalty for driving while intoxicated; subsequent offense; prior conviction.

(a) Except as otherwise provided herein, any person violating any provision of section 25-251 shall be guilty of a class 1 misdemeanor with a mandatory minimum fine of two hundred fifty dollars ($250.00). If the person's blood alcohol level as indicated by the chemical test administered as provided in this article or by any other scientifically reliable chemical test performed on whole blood under circumstances reliably establishing the identity of the person who is the source of the blood and the accuracy of the results (i) was at least 0.15, but not more than 0.20, he shall be confined in jail for an additional mandatory minimum period of five (5) days or, (ii) if the level was more than 0.20, for an additional mandatory minimum period of ten (10) days.

(b) (1) Any person convicted of a second offense committed within less than five (5) years after a prior offense under section 25-251 shall upon conviction of the second offense be punished by a mandatory minimum fine of five hundred dollars ($500.00) and by confinement in jail for not less than one month nor more than one year. Twenty (20) days of such confinement shall be a mandatory minimum sentence.

(2) Any person convicted of a second offense committed within a period of five (5) to ten (10) years of a prior offense under section 25-251 shall upon conviction of the second offense be punished by a mandatory minimum fine of five hundred dollars ($500.00) and by confinement in jail for not less than one month. Ten (10) days of such confinement shall be a mandatory minimum sentence.

(3) Upon conviction of a second offense within ten (10) years of a prior offense, if the person's blood alcohol level as indicated by the chemical test administered as provided in this article or by any other scientifically reliable chemical test performed on whole blood under circumstances reliably establishing the identity of the person who is the source of the blood and the accuracy of the results (i) was at least 0.15, but not more than 0.20, he shall be confined in jail for an additional mandatory minimum period of ten (10) days or, (ii) if the level was more than 0.20, for an additional mandatory minimum period of twenty (20) days. In addition, such person shall be fined a mandatory minimum fine of five hundred dollars ($500.00).

(c) In addition to the penalty otherwise authorized by this section or Code of Virginia, § 16.1-278.9, any person convicted of a violation of section 25-251 committed while transporting a person seventeen (17) years of age or younger shall be:

(i) Fined an additional minimum of five hundred dollars ($500.00) and not more than one thousand dollars ($1,000.00); and

(ii) Sentenced to a mandatory minimum period of confinement of five (5) days.

(d) For the purpose of determining the number of offenses committed by, and the punishment appropriate for, a person under this section, an adult conviction of any person, or finding of guilty in the case of a juvenile, under the following shall be considered a conviction of section 25-251:

(i) The provisions of Code of Virginia, § 18.2-36.1, or the substantially similar laws of any other state or of the United States,

(ii) The provisions of Code of Virginia, §§ sections 18.2-51.4, 18.2-266; Code of Virginia, former § 18.1-54 (formerly § 18-75); the ordinance of any county, city or town in this commonwealth or the laws of any

other state or of the United States substantially similar to the provisions of Code of Virginia, § 18.2-51.4 or 18.2-266, or

(iii) The provisions of Code of Virginia, § 46.2-341.24A, or the substantially similar laws of any other state or of the United States.

(e) Mandatory minimum punishments imposed pursuant to this section shall be cumulative, and mandatory minimum terms of confinement shall be served consecutively. However, in no case shall punishment imposed hereunder exceed the applicable statutory maximum class 1 misdemeanor term of confinement or fine upon conviction of a first or second offense.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-255.1. Reimbursement of expenses incurred in responding to DUI incidents.

(a) A person convicted of any of the following provisions shall, at the time of sentencing or in a separate civil action, be liable to the city for restitution of reasonable expenses incurred by the city for responding law enforcement, firefighting, rescue and emergency services, including those incurred by the sheriff's office of the city, when providing an appropriate emergency response to any accident or incident related to such violation. Further, a person convicted of violating any of the following provisions shall, at the time of sentencing or in a separate civil action, be liable to the city for restitution of reasonable expenses incurred by the city when issuing any related arrest warrant or summons, including expenses incurred by the sheriff's office of the city:

(1) The provisions of Code of Virginia §§ 18.2-36.1, 18.2-51.4, 18.2-266, 18.2-266.1, 29.1-738, 29.1-738.02 or 46.2-341.24 or a similar city ordinance, when such operation of a motor vehicle, engine, train or watercraft while so impaired is the proximate cause of the accident or incident;

(2) The provisions of Code of Virginia, title 46.2, chapter 8, article 7, (§ 46.2-852 et seq.), relating to reckless driving, or a similar city ordinance, when such reckless driving is the proximate cause of the accident or incident;

(3) The provisions of Code of Virginia, title 46.2, chapter 3, article 1 (§ 46.2-300 et seq.), as amended, relating to driving without a license or driving with a suspended or revoked license, or a similar city ordinance; and

(4) The provisions of Code of Virginia § 46.2-894, as amended, relating to improperly leaving the scene of an accident, or a similar city ordinance.

(b) Personal liability under this section for reasonable expenses of an appropriate emergency response pursuant to subsection (a) shall not exceed one thousand dollars ($1,000.00) in the aggregate for a particular accident, arrest or incident occurring in such city. In determining "reasonable expenses", the city may bill a flat fee of two hundred fifty dollars ($250.00) or a minute-by-minute accounting of the actual costs incurred. As used in this section "appropriate emergency responses" includes all costs of providing law enforcement, firefighting, rescue, and emergency medical services. The court may order as restitution the reasonable expenses incurred by the locality for responding law enforcement, firefighting, rescue and emergency medical services. The provisions of this section shall not preempt or limit any remedy available to the city to recover the reasonable expenses to an emergency response to an accident or incident not involving impaired driving, operation of a vehicle or other conduct as set forth herein.

(c) The fire and police departments shall compile a report of the reasonable expenses of the appropriate emergency response for each accident or incident and forward that information to the city attorney's office.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-256. Ignition interlock systems; penalty.

(a) For purposes of this section, and Code of Virginia, § 18.2-270.2:

Commission means the Commission on VASAP.

Department means the department of motor vehicles.

Ignition interlock system means a device that:

(i) Connects a motor vehicle ignition system to an analyzer that measures a driver's blood alcohol content;

(ii) Prevents a motor vehicle ignition from starting if a driver's blood alcohol content exceeds 0.02 percent; and

(iii) Is equipped with the ability to perform a rolling retest and to electronically log the blood alcohol content during ignition, attempted ignition and rolling retest.

Rolling retest means a test of the vehicle operator's blood alcohol content required at random intervals during operation of the vehicle, which triggers the sounding of the horn and flashing of lights if:

(i) The test indicates that the operator has a blood alcohol content which exceeds 0.02 percent; or

(ii) The operator fails to take the test.

(b) In addition to any penalty provided by law for a conviction under section 25-251; Code of Virginia, § 18.2-51.4 or § 18.2-266; or a substantially similar ordinance of any county, city or town, any court of proper jurisdiction:

(i) May, for a first offense;

(ii) Shall, for a second or subsequent offense; and

(iii) Shall, for an offense where an offender's blood alcohol content equals or exceeds 0.15 percent, as a condition of a restricted license or as a condition of license restoration under subsection 25-257.1(c), Code of Virginia, § 18.2-271.1C; or Code of Virginia, § 46.2-391; prohibit an offender from operating a motor vehicle that is not equipped with a functioning, certified ignition interlock system for any period of time not to exceed the period of license suspension and restriction, not less than six (6) consecutive months without alcohol-related violations of the interlock requirements, and shall require that such a system be installed on each motor vehicle, as defined in Code of Virginia § 46.2-100 owned by or registered to the offender, in whole or in part, for such period of time.

Such condition shall be in addition to any purposes for which a restricted license may be issued pursuant to Code of Virginia, § 18.2-271.1. The court may order the installation of an ignition interlock system to commence immediately upon conviction. A fee of twenty dollars ($20.00) to cover court and administrative costs related to the ignition interlock system shall be paid by any such offender to the clerk of the court. The court shall require the offender to install an electronic log device with the ignition interlock system on a vehicle designated by the court to measure the blood alcohol content at each attempted ignition and random rolling retest during operation of the vehicle. The offender shall be enrolled in and supervised by an alcohol safety action program pursuant to section 25-257.1 or Code of Virginia § 18.2-271.1, and to conditions established by regulation under Code of Virginia, § 18.2-270.2 by the commission during the period for which the court has ordered installation of the ignition interlock system. The offender shall be further required to provide to such program, at least quarterly during the period of court ordered ignition interlock installation, a printout from such electronic log indicating the offender's blood alcohol content during such ignitions, attempted ignitions, and rolling retests, and showing attempts to circumvent or tamper with the equipment.

(c) In any case in which the court requires the installation of an ignition interlock system, the court shall direct the offender not to operate any motor vehicle which is not equipped with such a system for the period of time that installation is ordered. The clerk of the court shall file with the department of motor vehicles a copy of the order, which shall become a part of the offender's operator's license record maintained by the department. The department shall issue to the offender for the installation period required by the court, a restricted license which shall appropriately set forth the restrictions required by the court under this subsection and any other restrictions imposed upon the offender's driving privilege, and shall also set forth any exception granted by the court under subsection (f).

(d) The offender shall be ordered to provide the appropriate ASAP program, within thirty (30) days of the effective date of the order of court, proof of the installation of the ignition interlock system. The program shall require the offender to have the system monitored and calibrated for proper operation at least every thirty (30) days by an entity approved by the commission under the provisions of Code of Virginia, § 18.2-270.2, and to demonstrate proof thereof. The offender shall pay the cost of leasing or buying and monitoring and maintaining the ignition interlock system. Absent good cause shown, the court may revoke the offender's driving privilege for failing to:

(i) Timely install such system; or

(ii) Have the system properly monitored and calibrated.

(e) No person shall start or attempt to start a motor vehicle equipped with an ignition interlock system for the purpose of providing an operable motor vehicle to a person who is prohibited under this section from operating a motor vehicle that is not equipped with an ignition interlock system. No person shall tamper with, or in any way attempt to circumvent the operation of, an ignition interlock system that has been installed in the motor vehicle of a person under this section. Except as authorized in subsection (g), no person shall knowingly furnish a motor vehicle not equipped with a functioning ignition interlock system to any person prohibited under subsection (b) from operating any motor vehicle which is not equipped with such system. A violation of this subsection shall be punishable as a class 1 misdemeanor.

(f) Any person prohibited from operating a motor vehicle under subsection (b) may, solely in the course of his employment, operate a motor vehicle which is owned or provided by his employer without installation of an ignition interlock system, if the court expressly permits such operation as a condition of a restricted license at the request of the employer, but such person may not operate a school bus, school vehicle, or a commercial motor vehicle as defined in Code of Virginia, § 46.2-341.1. This subsection shall not apply if such employer is an entity wholly or partially owned or controlled by the person otherwise prohibited from operating a vehicle without an ignition interlock system.

(g) The commission shall promulgate such regulations and forms as are necessary to implement the procedures outlined in this section.
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-257. Forfeiture of driver's license for driving while intoxicated.

(a) Except as provided in section 25-257.1 or Code of Virginia, § 18.2-271.1, the judgment of conviction if for a first offense under Code of Virginia, § 18.2-266, or for a similar offense under any county, city, or town ordinance, or for a first offense under Code of Virginia, § 46.2-341.24A, shall of itself operate to deprive the person so convicted of the privilege to drive or operate any motor vehicle, engine or train in the commonwealth for a period of one year from the date of such judgment. This suspension period shall be in addition to the suspension period provided under Code of Virginia, § 46.2-391.2.

(b) If a person:

(i) Is tried on a process alleging a second offense of violating section 25-251, Code of Virginia, § 18.2-266; or Code of Virginia § 46.2-341.24A; or any substantially similar local ordinance, or law of any other jurisdiction, within ten (10) years of a first offense for which the person was convicted, or found guilty in the case of a juvenile, under section 25-251, Code of Virginia, § 18.2-266; or Code of Virginia, or § 46.2-341.24A; or any valid local ordinance or any law of any other jurisdiction substantially similar to Code of Virginia, § 18.2-266; or Code of Virginia § 46.2-341.24A; and

(ii) Is convicted thereof,

such conviction shall of itself operate to deprive the person so convicted of the privilege to drive or operate any motor vehicle, engine or train in the commonwealth for a period of three (3) years from the date of the judgment of conviction and such person shall have his license revoked as provided in Code of Virginia, § 46.2-391A. The court trying

such case shall order the surrender of the person's driver's license, to be disposed of in accordance with Code of Virginia, § 46.2-398, and shall notify such person that his license has been revoked for a period of three (3) years and that the penalty for violating that revocation is as set out in Code of Virginia, § 46.2-391. This suspension period shall be in addition to the suspension period provided under Code of Virginia, § 46.2-391.2. Any period of license suspension or revocation imposed pursuant to this section, in any case, shall run consecutively with any period of suspension for failure to permit a blood or breath sample to be taken as required by sections 25-253 through 25-253.10, or Code of Virginia, §§ 18.2-268.1 through 18.2-268.12; or Code of Virginia, §§ 46.2-341.26:1 through 46.2-341.26:11.

(c) If a person:

(i) Is tried on a process alleging a third or subsequent offense of violating section 25-251; Code of Virginia, § 18.2-266; or Code of Virginia, § 46.2-341.24A; or any substantially similar local ordinance, or law of any other jurisdiction, within ten (10) years of two (2) other offenses for which the person was convicted, or found not innocent in the case of a juvenile, under Code of Virginia, § 18.2-266; or Code of Virginia, § 46.2-341.24A; or any valid local ordinance or any law of any other jurisdiction substantially similar to Code of Virginia, § 18.2-266; or Code of Virginia, § 46.2-341.24A; and

(ii) Is convicted thereof,

such conviction shall of itself operate to deprive the person so convicted of the privilege to drive or operate any motor vehicle, engine or train in the commonwealth and such person shall not be eligible for participation in a program pursuant to Code of Virginia, § 18.2-271.1; or a similar ordinance, and shall, upon such conviction, have his license revoked as provided in Code of Virginia, § 46.2-391B. The court trying such case shall order the surrender of the person's driver's license, to be disposed of in accordance with Code of Virginia, § 46.2-398, and shall notify such person that his license has been revoked indefinitely and that the penalty for violating that revocation is as set out in Code of Virginia, § 46.2-391.

(d) Notwithstanding any other provision of this section, the period of license revocation or suspension shall not begin to expire until the person convicted has surrendered his license to the court or to the department of motor vehicles.

(e) The provisions of this section shall not apply to, and shall have no effect upon, any disqualification from operating a commercial motor vehicle imposed under the provisions of the Commercial Driver's License Act (Code of Virginia, § 46.2-341.1 et seq.).
(Ord. No. 44,066, § 1, 12-7-10)

Sec. 25-257.1. Probation, education and rehabilitation of person charged or convicted; person convicted under law of another state.

(a) Any person convicted of a first or second offense of section 25-251(i), (ii), (iii) or (iv); or provisions of Code of Virginia, § 46.2-341.24A; shall be required by court order, as a condition of probation or otherwise, to enter into and successfully complete an alcohol safety action program in the judicial district in which such charge is brought or in any other judicial district upon such terms and conditions as the court may set forth. However, upon motion of a person convicted of any such offense following an assessment of the person conducted by an alcohol safety action program, the court, for good cause, may decline to order participation in such a program if the assessment by the alcohol safety action program indicates that intervention is not appropriate for such person. In no event shall such persons be permitted to enter any such program which is not certified as meeting minimum standards and criteria established by the Commission on the Virginia Alcohol Safety Action Program (VASAP) pursuant to subsection (h) and to Code of Virginia, § 18.2-271.2. However, any person charged with a violation of a first or second offense of section 25-251(i), (ii), (iii) or (iv), or provisions of Code of Virginia, § 46.2-351.24A; may, at any time prior to trial, enter into an alcohol safety action

program in the judicial district in which such charge is brought or in any other judicial district.

(b) The court shall require the person entering such program under the provisions of this section to pay a fee of no less than two hundred fifty dollars ($250.00) but no more than three hundred dollars ($300.00). A reasonable portion of such fee, as may be determined by the Commission on VASAP, but not to exceed ten (10) percent, shall be forwarded monthly to be deposited with the state treasurer for expenditure by the Commission on VASAP, and the balance shall be held in a separate fund for local administration of driver alcohol rehabilitation programs. Upon a positive finding that the defendant is indigent, the court may reduce or waive the fee. In addition to the costs of the proceeding, fees as may reasonably be required of defendants referred for intervention under any such program may be charged.

(c) Upon conviction of a violation of section 25-251, Code of Virginia, § 18.2-266, or any ordinance of a county, city or town similar to the provisions thereof, or Code of Virginia, § 46.2-341.24A; the court shall impose the sentence authorized by section 25-255, Code of Virginia, § 18.2-270; or Code of Virginia, § 46.2-341.28; and the license revocation as authorized by section 25-257 and Code of Virginia, § 18.2-271. In addition, if the conviction was for a second offense committed within less than ten (10) years after a first such offense, the court shall order that restoration of the person's license to drive be conditioned upon the installation of an ignition interlock system on each motor vehicle, as defined in Code of Virginia, § 46.2-100, owned by or registered to the person, in whole or in part, for a period of six (6) months beginning at the end of the three-year license revocation, unless such a system has already been installed for six (6) months prior to that time pursuant to a restricted license order under subsection (e). Upon a finding that a person so convicted is required to participate in the program described herein, the court shall enter the conviction on the warrant, and shall note that the person so convicted has been referred to such program. The court may then proceed to issue an order in accordance with subsection (e), if the court finds that the person so convicted is eligible for a restricted license. If the court finds good cause for a person not to participate in such program or subsequently that such person has violated, without good cause, any of the conditions set forth by the court in entering the program, the court shall dispose of the case as if no program had been entered, in which event the revocation provisions of Code of Virginia, §§ 46.2-389, and 46.2-391, subsection A, shall be applicable to the conviction. The court shall, upon final disposition of the case, send a copy of its order to the Commissioner of the Department of Motor Vehicles. If such order provides for the issuance of a restricted license, the Commissioner of the Department of Motor Vehicles, upon receipt thereof, shall issue a restricted license. Appeals from any such disposition shall be allowed as provided by law. The time within which an appeal may be taken shall be calculated from the date of the final disposition of the case or any motion for rehearing, whichever is later.

(d) Any person who has been convicted in another state of the violation of a law of such state substantially similar to the provisions of Code of Virginia, § 18.2-266; or Code of Virginia, § 46.2-341.24A; and whose privilege to operate a motor vehicle in this commonwealth is subject to revocation under the provisions of Code of Virginia, §§ 46.2-389 and 46.2-391A, may petition the general district court of the county or city in which he resides that he be given probation and assigned to a program as provided in subsection (a) and that, upon entry into such program, he be issued an order in accordance with subsection (e). If the court finds that such person would have qualified therefor if he had been convicted in this commonwealth of a violation of Code of Virginia, §§ 18.2-266 or 46.2-341.24A, the court may grant the petition and may issue an order in accordance with subsection (e) as to the period of license suspension or revocation imposed pursuant to Code of Virginia, §§ 46.2-389 or 46.2-391A. Such order shall be conditioned upon the successful completion of a program by the petitioner. If the court subsequently finds that such person has violated any of the conditions set forth by the court, the court shall dispose of the case as if no program had been entered and shall notify the commissioner, who shall revoke the person's license in accordance with the provisions of Code of

Virginia, §§ 46.2-389 or 46.2-391A. A copy of the order granting the petition or subsequently revoking or suspending such person's license to operate a motor vehicle shall be forthwith sent to the Commissioner of the Department of Motor Vehicles.

No period of license suspension or revocation shall be imposed pursuant to this subsection which, when considered together with any period of license suspension or revocation previously imposed for the same offense in any state, results in such person's license being suspended for a period in excess of the maximum periods specified in this subsection.

(e) Except as otherwise provided herein, whenever a person enters a certified program pursuant to this section, and such person's license to operate a motor vehicle, engine or train in the commonwealth has been suspended or revoked, the court may, in its discretion and for good cause shown, provide that such person be issued a restricted permit to operate a motor vehicle for any of the following purposes:

(i) Travel to and from his place of employment;

(ii) Travel to and from an alcohol rehabilitation or safety action program;

(iii) Travel during the hours of such person's employment if the operation of a motor vehicle is a necessary incident of such employment;

(iv) Travel to and from school if such person is a student, upon proper written verification to the court that such person is enrolled in a continuing program of education;

(v) Travel for health care services, including medically necessary transportation of an elderly parent or, as designated by the court, any person residing in the person's household with a serious medical problem upon written verification of need by a licensed health professional;

(vi) Travel necessary to transport a minor child under the care of such person to and from school, day care, and facilities housing medical service providers;

(vii) Travel to and from court-ordered visitation with a child of such person;

(viii) Travel to a screening, evaluation and education program entered pursuant to Code of Virginia, § section 18.2-251 or § 18.2-258.1H; or

(ix) Travel to and from court appearances in which he is a subpoenaed witness or a party and appointments with his probation officer and to and from any programs required by the court or as a condition of probation;

(x) Travel to and from a place of religious worship one day per week at a specified time and place; or

(xi) Travel to and from appointments approved by the division of child support enforcement of the department of social services as a requirement of participation in a court-ordered intensive case monitoring program for child support for which the participant maintains written proof of the appointment, including written proof of the date and time of the appointment, on his person.

No restricted license issued pursuant to this subsection shall permit any person to operate a commercial motor vehicle as defined in the Virginia Commercial Driver's License Act (Code of Virginia, § 46.2-341.1, et seq.). The court shall order the surrender of such person's license to operate a motor vehicle to be disposed of in accordance with the provisions of Code of Virginia, § 46.2-398, and shall forward to the Commissioner of the Department of Motor Vehicles a copy of its order entered pursuant to this subsection, which shall specifically enumerate the restrictions imposed and contain such information regarding the person to whom such a permit is issued as is reasonably necessary to identify such person. The court shall also provide a copy of its order to the person so convicted who may operate a motor vehicle on the order until receipt from the

Commissioner of the Department of Motor Vehicles of a restricted license, if the order provides for a restricted license for that time period. A copy of such order and, after receipt thereof, the restricted license shall be carried at all times while operating a motor vehicle. Any person who operates a motor vehicle in violation of any restrictions imposed pursuant to this section shall be guilty of a violation of section 25-258 or Code of Virginia, § 18.2-272. Such restricted license shall be conditioned upon enrollment within fifteen (15) days in, and successful completion of, a program as described in subsection (a). No restricted license shall be issued during the first four (4) months of a revocation imposed pursuant to section 25-257; Code of Virginia, § 18.2-271B; or Code of Virginia, § 46.2-391; for a second offense of the type described therein committed within ten (10) years of a first such offense. No restricted license shall be issued during the first year of a revocation imposed pursuant to section 25-257, Code of Virginia, § 18.2-271B; or Code of Virginia, § 46.2-391A; for a second offense of the type described therein committed within five (5) years of a first such offense. No restricted license shall be issued during any revocation period imposed pursuant to section 25-257; Code of Virginia, § 18.2-271C; or Code of Virginia, § 46.2-391B; or subsection (c). Notwithstanding the provisions of Code of Virginia, § 46.2-411, the fee charged pursuant to Code of Virginia, § 46.2-411, for reinstatement of the driver's license of any person whose privilege or license has been suspended or revoked as a result of a violation of Code of Virginia, § 18.2-266 or § 46.2-341.24A; or of any ordinance of a county, city or town, or of any federal law or the laws of any other state similar to the provisions of Code of Virginia, § 18.2-266; or Code of Virginia, § 46.2-341.24A; shall be one hundred five dollars ($105.00). Forty dollars ($40.00) of such reinstatement fee shall be retained by the Department of Motor Vehicles as provided in Code of Virginia, § 46.2-411; forty dollars ($40.00) shall be transferred to the Commission on VASAP, and twenty-five dollars ($25.00) shall be transferred to the Commonwealth Neurotrauma Initiative Trust Fund.

(f) The court shall have jurisdiction over any person entering such program under any provision of this section until such time as the case has been disposed of by either successful completion of the program, or revocation due to ineligibility or violation of a condition or conditions imposed by the court, whichever shall first occur. Revocation proceedings shall be commenced by notice to show cause why the court should not revoke the privilege afforded by this section. Such notice shall be made by first class mail to the last known address of such person, and shall direct such person to appear before the court in response thereto on a date contained in such notice, which shall not be less than ten (10) days from the date of mailing of the notice. Failure to appear in response to such notice shall of itself be grounds for revocation of such privilege. Notice of revocation under this subsection shall be sent forthwith to the Commissioner of the Department of Motor Vehicles.

(g) For the purposes of this section, any court which has convicted a person of a violation of section 25-251; Code of Virginia, § 18.2-266 or § 46.2-341.24A; or any ordinance of a county, city or town similar to the provisions of Code of Virginia, § 18.2-266, shall have continuing jurisdiction over such person during any period of license revocation related to that conviction, for the limited purposes of:

(i) Referring such person to a certified alcohol safety action program,

(ii) Providing for a restricted permit for such person in accordance with the provisions of subsection (e), and

(iii) Imposing terms, conditions and limitations for actions taken pursuant to clauses (i) and (ii), whether or not it took either such action at the time of the conviction.

This continuing jurisdiction is subject to the limitations of subsection (e) that provide that no restricted license shall be issued during a revocation imposed pursuant to Code of Virginia, § 18.2-271C; or Code of Virginia, § 46.2-391B; or during the first four (4) months or first year, whichever is applicable, of the revocation imposed pursuant to Code of Virginia, § 18.2-271B; or Code of Virginia, § 46.2-391A. The provisions of this subsection shall apply to a person convicted of a violation of Code of Virginia, § 18.2-266A; of Code of Virginia, § 46.2-341.24; or any ordinance of a county, city or

town similar to the provisions of Code of Virginia, § 18.2-266, on, after and at any time prior to July 1, 2003.

(h) The state treasurer, the Commission on VASAP or the city is authorized to accept any gifts or bequests of money or property, and any grant, loan, service, payment or property from any source, including the federal government, for the purpose of driver alcohol education. Any such gifts, bequests, grants, loans or payments shall be deposited in the separate fund provided in subsection (b).

(i) The Commission on VASAP, or any county, city, town, or any combination thereof may establish and, if established, shall operate, in accordance with the standards and criteria required by this subsection, alcohol safety action programs in connection with highway safety. Each such program shall operate under the direction of a local independent policy board chosen in accordance with procedures approved and promulgated by the Commission on VASAP. Local sitting or retired district court judges who regularly hear or heard cases involving driving under the influence and are familiar with their local alcohol safety action programs may serve on such boards. The Commission on VASAP shall establish minimum standards and criteria for the implementation and operation of such programs and shall establish procedures to certify all such programs to ensure that they meet the minimum standards and criteria stipulated by the commission. The commission shall also establish criteria for the administration of such programs for public information activities, for accounting procedures, for the auditing requirements of such programs and for the allocation of funds. Funds paid to the commonwealth hereunder shall be utilized in the discretion of the Commission on VASAP to offset the costs of state programs and local programs run in conjunction with any county, city or town and costs incurred by the commission. The commission shall submit an annual report as to actions taken at the close of each calendar year to the governor and the general assembly.

(j) Notwithstanding any other provisions of this section or of Code of Virginia, § 18.2-271, as amended, nothing in this section shall permit the court to suspend, reduce, limit, or otherwise modify any disqualification from operating a commercial motor vehicle imposed under the provisions of the Virginia Commercial Driver's License Act (Code of Virginia, § 46.2-341.1 et seq., as amended). (Ord. No. 44,066, § 1, 12-7-10)

(ii) By section 25-257, Code of Virginia, § 18.2-271 or 46.2-391.2,

Nothing in this section or sections 25-251, 25-255, 25-257, or Code of Virginia, § 18.2-266, 18.2-270 or 18.2-271, shall be construed as conflicting with or repealing any ordinance or resolution of any city, town or county which restricts still further the right of such persons to drive or operate any such vehicle or conveyance.

(b) Regardless of compliance with any other restrictions on his privilege to drive or operate a motor vehicle, it shall be a violation of this section for any person whose privilege to drive or operate a motor vehicle has been restricted, suspended or revoked because of a violation of Code of Virginia, § 18.2-36.1, 18.2-51.4, 18.2-266, 18.2-268.3, 46.2-341.24, or a similar ordinance or law of another

Sec. 25-286.1. Designation of parking permit areas.

(a) *Establishment.* The city manager is hereby authorized to designate, by written order or regulation, roads, streets and other areas within the city in which the parking of vehicles may be restricted, in whole or in part, during certain specified times, to holders of valid parking permits issued pursuant to this section. The city manager shall consider the institution of a parking permit system upon petition by the residents of a given area as provided herein. The authority granted herein shall be in addition to, and may be exercised in conjunction with, any other authority the city manager may have to regulate the times and conditions of motor vehicle parking.

(b) *Standards.* The designation of a parking permit area shall take into account, among other things:

(1) The effect on the safety of residents of the area under consideration from intensive use by nonresidents for parking of vehicles.

(2) The need of the residents of the area to obtain adequate on-street parking adjacent to or close by their places of residence.

(3) The difficulty or inability of residents of the area to secure adequate on-street parking adjacent to or close by their places of residence because of widespread use of available parking spaces in that area by nonresident transient motorists.

(4) The impact of major public facilities and programs on the health, safety and welfare of the residents of the area and any unreasonable burdens placed on those residents in securing adequate on-street parking and gaining access to their places of residence by virtue of such facilities and programs.

(5) The likelihood of alleviating, by use of a parking permit system, any problem of nonavailability of residential parking spaces.

(6) The desire of the residents in the area for the institution of a parking permit system and the willingness of those residents to bear the administrative costs incidental to the issuance of permits authorized by this section.

(7) The fact that the residents of a contemplated parking permit area have contributed to the cost of construction and/or improvement of streets and roads in such area either by the direct assessment of costs or indirectly to the extent such costs are reflected in purchase or rental prices paid by those residents.

(8) The need for some parking spaces to be available in the area under consideration for use by visitors and the general public.

(9) Such other factors as the city manager shall deem relevant.

(c) *Initiation of petition:*

(1) Residents within a particular district or a distinct portion of a district in which residential uses are permitted may petition the city manager for the establishment of an on-street permit parking district. Such petitions shall be on forms prepared and promulgated by the director of the department of public works. Petitions shall be submitted to the director of public works who shall determine their sufficiency. Any insufficient petition shall be remanded to the individual submitting it, with instructions for correction of deficiencies. A petition found sufficient shall be forwarded to the city manager for further action as set forth in paragraphs (d) through (f).

(2) No petition shall be deemed sufficient unless the same be signed by representa-

tives of seventy-five (75) percent of the households within the proposed parking district.

(d) *Action on petition.* When a petition has been found to be sufficient by the director of public works, it shall be referred to the city manager for authorization of necessary traffic engineering studies.

(e) *Public hearing:*

(1) Following the completion of such studies and in order to determine whether a particular area or location should be designated as a parking permit area, the city manager or his designee shall conduct, prior to the designation of parking permit area, or prior to the withdrawal of such designation once it is established, a public hearing at which time any interested person shall be entitled to appear and be heard. Such hearing shall be held only after due notice has been published in a newspaper of general circulation throughout the city. The notice shall clearly state the purpose of the hearing, and the exact location and boundaries of the parking permit area under consideration.

(2) Within forty-five (45) days following the close of the public hearing, the city manager shall decide, based on the record of that hearing and the studies authorized by him, whether or not to designate the area under consideration as a parking permit area or to remove the designation in the case of an established parking permit area. The time for decision by the city manager may be extended for an additional period of thirty (30) days.

(f) *Designation of parking permit area:*

(1) Following the designation of a parking permit area by the city manager, he shall cause to be posted parking signs in the area, indicating the times, locations and conditions under which parking shall be by permit only.

(2) The issuance of parking decals shall be by the division of parking facilities as provided in paragraph (g).

(g) *Issuance of decals; proration:*

(1) A fee of ten dollars ($10.00) per annum shall be charged for the issuance of each parking decal for use on vehicles registered to bona fide residents of the district in a restricted parking district of the city. The fees collected will be used by the city to defray the cost of enforcement of this section and rules, regulations, and orders promulgated by the city manager. Parking decals shall be issued on an annual basis by the division of parking facilities for the period commencing at 12:01 a.m., June 1 and expiring at midnight May 31 of the following year.

(2) The issuance of parking permits shall be by the division of parking facilities as provided in paragraph (h).

(3) Each household qualified pursuant to this section to purchase an annual parking decal shall be issued one complimentary visitor's pass for the use of visitors of such purchaser while residing or visiting on a temporary basis in the home or dwelling place of such purchaser. Such passes shall be subject to any rules and regulations established covering their use.

(4) Additional temporary parking passes shall be issued to be valid for a period not exceeding one calendar month to accommodate unusual visiting requirements for a fee of two dollars ($2.00) each to holders of annual passes.

(5) Decals, temporary and visitors passes are not transferable. If a resident trades a vehicle, he shall carefully scrape the decal from the bumper and return it with his permit form to the division of parking facilities for issuance of a new sticker at no cost. Abuse of these regulations may be grounds for revocation of parking pass privileges by the city.

(6) The annual decal shall be displayed on the left rear bumper of the vehicle. Visitor and temporary parking passes shall be displayed from the rear view mirror of the

vehicle and shall be prominently displayed to be visible from the front of the vehicle.

(7) Decals that have been lost, stolen or destroyed may be reissued for a charge of one dollar ($1.00).

(h) *Enforcement:*

(1) Enforcement of parking regulations shall not be effective until thirty (30) days after signs delineating the parking restrictions have been posted. Emergency and service vehicles when on a call or delivery shall be exempt. Purchase of a parking decal or display of one will not guarantee the holder of a parking place nor exempt a vehicle operator from any City Code regulation governing parking on city streets.

(2) Construction and utility vehicles performing work on streets in the district as well as boat, house and utility trailers shall be exempt from these regulations.

(i) *Violations and penalties.* It shall be unlawful to park any vehicle or use any parking permit in a manner contrary to the provisions established by the city manager pursuant to this section and any person parked in violation of any regulation or sign in any district shall be punished as provided in section 25-295, and any motor vehicle so parked may be towed by or at the direction of the department of police.

(j) *Amendments.* The city manager is hereby authorized to amend district parking regulations from time to time.

Sec. 25-656.2. Trucks of four axles or more prohibited on certain streets; exceptions.

(a) *Definitions.* For the purposes of this section the following words and phrases shall have the meaning ascribed to them here, unless the context clearly indicates otherwise.

National network means the Dwight D. Eisenhower System of Interstate and Defense Highways and other qualifying federal-aid primary system highways designated by the Secretary of Transportation of the United States pursuant to federal law. It is one component of the national highway system, and it includes all interstates as well as those local, noninterstate federal-aid highways to be found, listed by state, in appendix A to 23 CFR pt. 658 of the U.S. Code of Federal Regulations, as amended. A list of local noninterstate national highway system highways included in the national network, as it pertains to the city is on file with and available from the department of public works.

National highway system means those highway routes and connections to transportation facilities depicted on the map submitted by the Secretary of Transportation of the United States to the Congress of the United States with the report entitled "Pulling Together: The National Highway System and

its Connections to Major Intermodal Terminals" and dated May 24, 1996, as subsequently modified pursuant to federal law. The national highway system includes the interstate system, other urban and rural principal arterial routes, the strategic highway network necessary to the strategic defense of the United States in both peacetime and wartime, and major strategic highway connectors between the strategic highway network and other highways, and other components as listed in 23 USC section 103 of the United States Code, as amended (national highway system components thereof). A list of local national highway system highways, in addition to those included in the national network, as it pertains to the city, is on file with and available from the department of public works.

Terminal means either an intermodal transportation facility where property is moved from one means of transportation to another for further transport or a trucking terminal where property is moved from large tractor truck and trailer combinations for travel on the national network to smaller combinations, such as tractor trucks with trailers of twenty-eight (28) feet or less in length and one hundred two (102) inches or less in width.

Tractor truck means every motor vehicle designed and used primarily for drawing other vehicles, and not so constructed as to carry a load, other than a part of the load and weight of the vehicle attached thereto.

Trailer means every vehicle, without motored power, designed for carrying property wholly on its own structure and for being drawn by a motor vehicle (such as a tractor truck).

Truck means every motor vehicle of four (4) axles or more designed or used either to transport property on its own structure independent of any other vehicle or on an attached trailer (a tractor truck). The term "truck" as used in this section does not refer to vehicles designed and used for transporting people.

Vehicle means every device in, upon or by which property is or may be transported or drawn upon a highway, except devices moved by human power or used exclusively upon stationary rails or tracks, and except any vehicle as may be included within the term "bicycle", as defined elsewhere within the Norfolk City Code.

(b) *Generally.* The city manager is hereby authorized and directed to erect and maintain, at proper places on the streets designated in the following subsections, appropriate signs or markers indicating that driving or operating a truck is restricted in the manner indicated on the designated portions of such streets. When such signs or markers are in place, it shall be unlawful for any person to drive or operate any such truck on the streets designated in this section between the designated points unless his purpose for doing so falls under one of the exceptions listed below.

(c) *Trucks prohibited on certain streets.* Trucks shall not be driven or operated on the following streets between the designated points and at the times indicated unless for a purpose authorized in the "exceptions" subsection of this section. If no time is indicated, the prohibition is effective at all times.

(d) *Exceptions.*

(1) *Exceptions generally applicable.*

(B) *National network.* For all trucks, access between the national network and points within one road-mile of entrances and exits of the national network in the prohibited area. The one road-mile route shall be measured using the most reasonable and most practicable route available. Representatives of the trucking industry are encouraged to contact the director of public works for prior approval of particular routes under this exception. However, this exception is not conditioned upon prior approval.

(2) *Exceptions by permit.*

Copies of permits issued under this subsection shall be kept on file in the offices of the permit official and, for enforcement purposes, the department of police. Permits may be suspended or revoked for cause or if a change of circumstances removes the need for the permit. All permits applied for and issued under this subsection shall be valid for one year, shall require payment of a fee of three hundred fifteen dollars ($315.00), and shall be subject to such further requirements as are listed in the subsections below.

(B) *Terminal access for certain trucks.* For carriers of household goods and tractor trucks with one attached trailer of twenty-eight (28) feet or less in length and one hundred two (102) inches or less in width traveling upon the national network, if they would otherwise be prohibited access under this section, for access by a specific route from the national network to a specific terminal off the national network, when carrying a currently valid copy of a city permit granting permission to do so. Response to all such requests shall be expedited and denials shall be based upon safety considerations tied to the characteristics of the trucks for which such access is sought in relation to the characteristics of the local highways the requested route will pass through.

(C) *Business necessity through-routes.* For all trucks, for travel by a specific route through the city, if they would otherwise be prohibited from such travel by this section, where a reasonable business necessity for a regular, specific through-route on the streets restricted in this section, during the days and times, if any, they are restricted, is shown, when carrying a currently valid copy of a city permit granting permission to do so. Response to all such requests for permits shall be expedited and denials shall be based upon balancing the business need of the party requesting the permit against safety considerations tied to the characteristics of the trucks for which such access is sought and congestion considerations in relation to the characteristics of the local highways the requested route will pass through.

(3) *Exceptions for emergencies.* Nothing in this section or this subsection shall abrogate or restrict the existing right of

the city manager and the public safety departments of the city to make blanket exceptions to traffic prohibitions in emergency conditions, such as natural or manmade disasters.

(f) *Severability.* Severability is intended throughout and within the provisions of this section. If any provision, including inter alia any subsection, part, phrase or term, is for any reason held invalid, either on its face or in application to any particular person or circumstance, the remainder of this section shall continue in full force and effect, and its application to other persons or circumstances shall not be affected.

(g) *Penalty.* A violation of section 25-656.2(c)(4) is a traffic offense subject to a fine in the amount of five hundred dollars ($500.00). Any other violation of this section is a traffic offense subject to a fine in the amount of two hundred fifty dollars ($250.00).

Sec. 26-1. Declaration of policy.

At certain levels, noise can be detrimental to health, welfare, safety, and quality of life. It is therefore in the public interest and the policy of the city to prohibit unnecessary, excessive, and annoying noise from all sources subject to its police power, to the extent such action is not inconsistent with the First Amendment rights of the people. Nothing contained in this article should be construed to authorize or direct any action which would result in any substantial increase in noise levels from any noise source in the city. Such noise is a nuisance, and all powers of the city regarding the abatement of nuisances apply to noise disturbances.
(Ord. No. 48,923, § 1, 9-13-22)

Sec. 26-2. Definitions.

As used in this chapter, the following words, terms, and phrases have the meanings ascribed to them in this section, unless the context clearly indicates a different meaning:

Ambient noise. The all-encompassing noise associated with a given environment, being usually a composite of sounds from many sources near and far. Ambient noise levels are established by taking a series of observations on the adversely affected property.

Audio players. Any device capable or producing or reproducing sound, including but not limited to mobile phones, hardware or software digital audio players, computers, televisions, radios, compact disc players, cassette players, record players, and audio systems in a motor vehicle.

Decibel (dB). A unit for measuring the volume of sound, equal to twenty (20) times the logarithm to the base ten (10) of the ratio of the pressure of the sound measured to the reference pressure, which is twenty (20) micropascals (twenty (20) micronewtons per square meter). The sound pressure level in decibels as measured on a sound level meter using the A-weighting network. The level so read is designated dB(A).

Dwelling unit. One (1) or more rooms connected together and constituting a single housekeeping unit, with independent cooking (including range), bathroom (including bathtub, shower, or both), and sleeping facilities, designed, or used for occupancy by a single family or housekeeping unit, and separate from any other dwelling units or rooms in the same building. Recreational vehicles are not dwelling units.

Emergency. Any occurrence or set of circumstances involving actual or imminent physical trauma or property damage which demands immediate action.

Emergency and public safety work. Any work performed for the purpose of preventing or alleviating the physical trauma or property damage threatened or caused by an emergency or work performed by public and private service companies constructing, inspecting, and repairing utilities, repairing and maintaining roads, bridges, and highways, providing snow removal, and the operation of public safety and emergency vehicles.

Enclosed dwelling unit. A dwelling unit with doors and windows closed.

Impulsive sound. Sound of short duration usually less than one second, with an abrupt onset and rapid decay.

Motor vehicle. Every vehicle defined as a motor vehicle by § 46.2-100 of Code of Virginia (1950), as amended, and for the purposes of this chapter, the definition also includes autocycles, golf carts, motor scooters, minibikes, and mopeds.

Muffler. A device for abating the sound of escaping gases of an internal combustion engine.

Noise. Any sound which disturbs humans, or which causes or tends to cause an adverse psychological or physiological effect on humans.

Noise source. Any equipment, facility, motor vehicle, conduct, activity, or operation whether human, animal, mechanical, electronic, or other; and whether continuous, intermittent, or sporadic; and whether stationary or ambulatory in nature, which produces or results in plainly audible and discernible noise.

Plainly audible and discernable. Sound that can be heard by the human ear and is sufficiently distinct so that its source can be clearly

identified by a person using their unaided hearing faculties, unless that aid is a functioning medical hearing aid device. Specific words or phrases do not need to be discernible for sound to be plainly audible. The detection of rhythmic bass tones or reverberations is sufficient to be considered a plainly audible and discernable sound.

Sound. An oscillation in pressure, particle displacement, particle velocity or other physical parameter, in a medium with internal forces that cause compression and rarefaction of that medium. The description of sound may include any characteristics of such sound, including duration, intensity, and frequency.

Sound level. The weighted sound pressure level obtained using a sound level meter and frequency weighting network, such as A, B, or C, as specified in the American National Standards Institute specifications for sound level meters. If the frequency weighting employed is not indicated, the A weighting will apply.

Sound level meter. An instrument which includes a microphone, amplifier, RMS detector, integrator or time averager, output meter, and any applicable weighting network used to measure sound pressure levels.
(Ord. No. 48,923, § 1, 9-13-22)

Sec. 26-3. Enforcement.

(a) The Norfolk Police Department and any other law enforcement agency with concurrent jurisdiction within the City of Norfolk may enforce the provisions of this article and may be assisted by other city departments as directed by the city manager, or by the Virginia Department of Health.

(b) Each and every person operating, permitting, or controlling a source of noise is guilty of any violation caused by that source. If the person operating, permitting, or controlling the noise source cannot be identified, or the noise source is a business entity or premises; each and every owner, tenant, resident, or manager physically present on the property where the noise source is located is rebuttably presumed to be in violation of this chapter.

(c) For purposes of the measurements set forth below in this chapter, if the source of the sound is not visible, then the measurement should be taken from the exterior wall of the building, structure, or other enclosure in which the source of the sound is located.

(d) Nothing in this section should be construed to abridge, limit, or otherwise impair the right of any person or entity to claim, in a separate, private action, damages or other relief on account of injuries to persons or property, and to maintain any action or other appropriate proceedings.

(e) Nothing in this article is meant to prevent enforcement efforts to obtain voluntary compliance through warning, conference, or any other appropriate means.
(Ord. No. 48,923, § 1, 9-13-22)

Sec. 26-4. Violations and penalties.

(a) Unless otherwise specified, a violation of any provision of this chapter is a class 3 misdemeanor, punishable by a fine of up to five hundred dollars ($500.00).

(b) As an additional remedy, the operation or maintenance of any device, instrument, vehicle, or machinery in violation of any provision of this chapter, which operation or maintenance endangers the comfort, repose, health, or peace of residents in the area, is declared to be a public nuisance and may be subject to abatement summarily by a restraining order or injunction issued by a court of competent jurisdiction, or any other power to abate a nuisance held by the city.
(Ord. No. 48,923, § 1, 9-13-22)

(4) Vehicle horns, signaling devices, and similar devices. Sounding or permitting the sounding of any horn, whistle, signaling device, or similar device on any automobile, motorcycle, or other vehicle on any right-of-way or in any public space continuously or intermittently for more than ten (10) consecutive seconds, except when the sounding of any such device is intended as a danger warning.

(5) Yelling, shouting, etc. Yelling, shouting, whistling, or singing between the hours of 10:00 p.m. and 7:00 a.m. in such a manner as to permit sound to plainly audible (i) inside the confines of another person's enclosed dwelling unit; or (ii) at fifty (50) or more feet from the source of the sound, unless exempt under section 26-5.

(b) *Immediate threats to health and welfare.*

(1) An enforcement officer may order an immediate halt to any sound which exposes any person to sound levels more than those shown below as Table I, "Impulsive Sound Levels."

(2) Notwithstanding section 26-4, any violation of this subsection (b) is a Class 1 misdemeanor.

TABLE I:
IMPULSIVE SOUND LEVELS WHICH POSE AN IMMEDIATE THREAT TO HEALTH AND WELFARE
Measured from at least 50 feet from the noise source

Sound Level Limit (dB)A	*Number of Repetitions per 24-Hour Period*
140	1
135	10
125	100

(c) *Offenses requiring scientific measurement of sound levels.* Any noise not listed as an exemption or prohibited act in this subsection, that exceeds the maximum sound pressure level in Table II below is a violation of this chapter. Where the ambient noise level exceeds the maximum sound pressure levels, the noise complained of is permitted to exceed the ambient level by ten (10) decibels but no more.

(1) Scientific measurement procedures.

a. The decibel level of any noise regulated this subsection must be measured by the use of a sound level meter at least fifty (50) feet from the noise source. Such measurement is *prima facie* evidence of the level of noise at issue in any court or legal proceeding to enforce the provisions of this section.

b. The accuracy of the sound level meter must be tested by a calibrator in accordance with the device manufacturer's instructions. Any sworn report of the results of any test of the calibrator for the accuracy of a sound level meter is admissible in court in any criminal or civil proceeding, as evidence of the facts stated.

(Ord. No. 37,920, § 1, 3-14-95; Ord. No. 38,509, § 1, 8-27-96)

Sec. 27-42. Graffiti declared a nuisance.

The existence of graffiti within the city limits of the City of Norfolk, Virginia, as defined below, is declared by this council to be obnoxious and a public and private nuisance and must be quickly abated to avoid the detrimental impact of such graffiti on the city and its residents, and to prevent the further spread of such graffiti.
(Ord. No. 37,920, § 1, 3-14-95; Ord. No. 38,509, § 1, 8-27-96)

Sec. 27-43. Definitions.

Failure to comply with a notice to abate the graffiti shall be a class 2 misdemeanor.

(b) Proof of mailing, delivery, or posting of the notice shall be sufficient evidence of such notice.

(d) Notwithstanding the above, the owner of the property where the graffiti is located may execute a "consent to abate" form, which allows the city to immediately undertake the abatement and bill the property owner for all costs of abatement. In addition, a reward in an amount not to exceed five hundred dollars ($500.00) is authorized to be paid to any person, not charged with graffiti offenses, who provides information leading to conviction of any person for applying graffiti in violation of this article.

An administrative fee shall be assessed in each case as permitted by Code of Virginia, § 58.1-3958. The expense of abatement and the administrative fee shall be chargeable against such person.

(c) Notwithstanding the above, in the event the chief of property maintenance or designee determines that the graffiti is located on property owned by the city or located on property in a city-owned right-of-way, the notice requirement herein shall be dispensed with.

(d) The notice of violation and the notice of abatement specified in this section can be combined in one document and issued as provided in this article.

(e) The expense of the abatement and the administrative fee shall constitute a lien on real property of the owner ranking in parity with liens for unpaid real estate taxes and shall be reported to the city treasurer who shall record the lien in the lien book maintained for such purposes and collect the lien in the same manner in which city taxes levied upon real estate are authorized to be collected.

(f) Abatement by the city shall be exclusive of and in addition to any criminal penalty that may be imposed.

Sec. 27-49. Community service provisions.

(a) Upon finding of guilt in any case tried before the court without a jury, in the event the violation constitutes a first offense which results in property damage, defacement, or loss, the court, without entering a judgment of guilty, upon motion of the defendant, may defer further proceedings and place the defendant on probation pending completion of a plan of community service work. If the defendant fails or refuses to complete the community service as ordered by the court, the court may make final disposition of the case and proceed as otherwise provided. If the community service work is completed as the court prescribes, the court may discharge the defendant and dismiss the proceedings against him. Discharge and dismissal under this section shall be without adjudication of guilt and is a conviction only for the purpose of applying this section in subsequent proceedings.

(b) The community service, to the extent feasible, shall include the repair, restoration or replacement of any damage or defacement to property within the city and may include cleanup, beautification, landscaping or other appropriate community service within the locality. The city's clean community coordinator shall supervise the performance of any community service work required and to report thereon to the court imposing such requirement. At or before the time of sentencing under this section, the court shall receive and consider any plan for making restitution or performing community service submitted by the defendant. The court shall also receive and consider the recommendations of the supervisor of community service in the city concerning the plan.

(c) Notwithstanding any other provision of law, no person convicted of a violation of this section shall be placed on probation or have his sentence suspended unless such person shall make restitution for such property damage or defacement.

(f) If no one appears and files an answer on or before the return date specified in the order to show cause, the court, upon being satisfied that the book is obscene, shall order the clerk of court to enter judgment that the book is obscene, but the court, in its discretion, may except from its judgment a restricted category of persons to whom the book is not obscene.

(g) If an appearance is entered and an answer filed, the court shall order the proceeding set on the calendar for a prompt hearing. The court shall conduct the hearing in accordance with the rules of civil procedure applicable to the trial of cases by the court without a jury. At the hearing, the court shall receive evidence, including the testimony of experts, if such evidence be offered, pertaining to:

(i) If it finds the book not obscene, the court shall order the clerk of court to enter judgment accordingly. If it finds the book obscene, the court shall order the clerk of court to enter judgment that the book is obscene; but the court, at its discretion, may except from its judgment a restricted category of persons to whom the book is not obscene.

(j) While a temporary restraining order made pursuant to subsection (d) of this section is in effect, or after the entry of a judgment pursuant to subsection (f), or after the entry of judgment pursuant to subsection (i), any person who publishes, sells, rents, lends, transports within this city or commercially distributes or exhibits the book, or has the book in his possession with intent to publish, sell, rent, lend, transport within this city or commercially distribute or exhibit the book, is presumed to have knowledge that the book is obscene under the provisions of this article.

(k) Any party to the proceeding, including the petitioner, may appeal from the judgment of the court to the Supreme Court of Virginia, as otherwise provided by law.

(l) It is expressly provided that the petition and proceeding authorized under this section, relating to books alleged to be obscene, shall be intended only to establish scienter in cases where the establishment of such scienter is thought to be useful or desirable by the petitioner; and the provisions of this section shall in nowise be construed to be a necessary prerequisite to the filing of criminal charges under this article. (2) *Expressive activity* means any activity protected under the First Amendment other than a parade or public assembly, addressed below, including, but not limited to, leafleting.

(3) *Parade* means any march, demonstration, procession or motorcade consisting of persons, animals, or vehicles, or a combination thereof, upon any traditional public forum within the city that interferes with or is likely to interfere with the normal flow or regulation of pedestrian or vehicular traffic within said forum.

(4) *Public assembly* means any meeting, demonstration, picket line, rally or gathering of any kind that occupies any traditional public forum within the city and interferes with or is likely to interfere with the normal flow or regulation of pedestrian or vehicular traffic or with the customary public usage of said forum.

(5) *Spontaneous event* means an unplanned coming together of persons, animals or vehicles in a parade or public assembly in a traditional public forum which was not contemplated beforehand by any participant therein, and which is caused by or in response to unforeseen circumstances or events.

(6) *Traditional public forum* means, pursuant to the public forum doctrine under the First Amendment, as created and revised by the courts, those government-owned spaces open to the public generally, such as many streets, sidewalks and parks, that have by long tradition and government fiat been devoted to parades, public assemblies and expressive activities generally.

(c) *Permit required.*

(1) It shall be unlawful for any person to conduct or participate in a parade, public assembly or expressive activity in any traditional public forum of the city without a written permit issued in accordance with the provisions of this section.

(2) The provisions of this section shall not apply to the following when occurring in a traditional public forum:

(A) Spontaneous events;

(B) Recreational activities, including jogging or walking, that do not require closing public streets or other public streets or other public rights-of-way;

(C) Funeral processions;

(D) Students going to and from school classes or participating in educational activities, provided that such conduct is under the immediate direction and supervision of the proper school authorities;

(E) The United States Army, Navy, Air Force and Coast Guard, the military forces of the state, and the employees of the city when acting within the scope of their employment; or

(F) A governmental agency or agencies acting within the scope of its functions.

(G) A parade, public assembly or expressive activity conducted in some traditional public forum other than a street and involving less than thirty (30) people.

(3) Permits may be granted if they are requested by individuals or organizations who desire to have a permit, even though the permit is not required under this section.

(d) *Application.*

(1) A written application for a permit shall be filed as follows:

(A) When a parade, public assembly or expressive activity will require the blocking or temporary closure of all or any part of one or more major streets of the city, or one or more streets in the downtown area, and the detouring of motor vehicle traffic, and will require the presence of significantly more police officers than are normally assigned to the area for traffic control, traffic diversion and/or the maintenance of order, a written application for the permit shall be filed with the city manager or her designee at least thirty (30) days prior to the occurrence, and shall include the information described under subsection (d)(1)(C) below. The reasons for this time requirement are that additional time is needed by city officials to coordinate with all involved departments; to determine previously scheduled uses of the areas or streets; to determine the need and arrange for traffic control signages and devices; to notify residents and businesses; to arrange for the rescheduling and/or recall of police officers; and to alter existing parking regulations.

(B) For all parades, public assemblies or expressive activities other than those described in subsection (d)(1)(A) above, a written application for the permit shall be filed with the city manager or her designee at least five (5) days, excluding Saturdays, Sundays and legal holidays, prior to the occurrence, and shall include the information described in subsection (d)(1)(C) below.

(C) Written applications shall include all of the following information:

(i) The name, address and telephone number of the person requesting the permit;

(ii) The name and address of the organization or group the applicant is representing;

(iii) The name, address and telephone number of a person who will act as the leader or chairman of the group at the site, and who will be responsible for the conduct of the group;

(iv) The type of event planned, including a description of the activities planned during the event;

(v) The date and time (start and ending) of the event;

(vi) If the event is a public assembly or expressive activity, the specific location or locations of it;

(vii) If the event is a parade, the specific assembly and dispersal locations, the specific route, and the plans, if any, for assembly and dispersal;

(viii) The approximate number of people, animals and vehicles that will constitute the event, and a description of any animals or vehicles involved;

(ix) A statement as to whether the event will occupy all or only a portion of the width of the streets or sidewalks or other public rights-of-way proposed to be traversed or used;

(x) A description of any recording equipment, sound-amplification equipment, banners, signs, or other attention-getting devices to be used in connection with the event; and

(xi) A statement, if applicable, that the applicant claims an exemption from the service fee and insurance requirements of subsection (e) below, and such other information as the city manager or her designee may deem reasonably necessary in order to properly provide for traffic control, street and property maintenance, administrative arrangements, police and fire protection, and for the protection of public health, safety and welfare.

(e) *Fees and insurance.*

(1) All applicants shall pay a nonrefundable fee of ten dollars ($10.00) to cover the administrative costs of processing the permit request upon submission of their application.

(2) If the application is pursuant to subsection (d)(1)(A) above, and the application is not exempt from these fees pursuant to subsection (e)(4) below, the applicant, prior to the issuance of a permit, shall:

(A) Pay the charges for all services to be provided the applicant in accordance with a schedule of service costs established by regulations of the city manager; and

(B) Procure and maintain in full force and effect during the term of the permit a policy of insurance covering general liability and property damage in an amount commensurate with the risk as determined by the city manager or her designee, which policy shall include the city, its boards, officers, agents and employees as additional insureds.

(3) No application shall be considered complete until all required fees are paid.

(4) Applicants may request an exemption from the service fees and insurance requirements of this section for noncommercial parades, public assemblies and expressive activities subject to the protection of the First Amendment. Within ten (10) days, excluding Saturdays, Sundays and legal holidays, after receiving a permit request claiming an exemption from the service fees and insurance requirements pursuant to this subsection, the city manager or her designee shall notify the applicant if his claim of exemption is denied. The city manager or her designee shall grant or deny a claim of exemption under this section with the advice and consent of the city attorney.

(f) *Issuance or denial of permit.*

(1) The city manager or her designee, upon receipt of an application, shall promptly circulate it to the chief of police, the fire chief, the director of neighborhood and leisure services if the proposed location is a park, and the director of public works, or their designees, and to any other city departments with relevant responsibilities.

(2) The city manager or her designee shall issue the permit within twenty-one (21) days after receipt of the completed application for a parade, public assembly or expressive activity described in subsection (d)(1)(A) above, and within three (3) days after receipt of an application for a parade, public assembly or expressive activity described in subsection (d)(1)(B) above, if it is determined that the proposed parade, public assembly or expressive activity will not endanger the public health, welfare or safety, based upon its meeting all of the following requirements:

(A) The time, duration, route and size of the event will not unreasonably interrupt the safe and orderly movement of vehicular or pedestrian traffic;

(B) The time, duration, route and size of the event will not require the diversion of so great a number of police and fire personnel to properly police the line of movement in the areas contiguous thereto so as to impair the normal protection of the remainder of the city;

(C) The applicant has, where appropriate, designated monitors sufficient to control the orderly conduct of the event in conformity with such permit;

(D) The conduct of the event will not unduly interfere with the proper fire and police protection of, or ambulance service to, the remainder of the city, or unreasonably disrupt other public services and protection normally provided to the city;

(E) The event will not interfere with another event for which a permit has been granted;

(F) The event proposed will not violate, and will conform with all applicable regulations and laws governing the activities of the proposed event; and

(G) The applicant has, unless exempted, met all requirements concerning fees and insurance.

(3) The city manager or her designee shall not issue the permit if any information supplied by the applicant is false or intentionally misleading.

(4) The city manager or her designee shall have the authority to and shall make reasonable efforts to consider an application hereunder which is not filed within the applicable deadlines before the proposed date of the parade, public assembly or expressive activity. The city manager or her designee shall waive the deadline if, after due consideration of the date, time, place and nature of the event, the anticipated number of participants and the city services required in connection with the event, and where good cause is otherwise shown, the city manager or her designee determines that the waiver of the permit application deadline will not present an undue hazard to public safety.

(5) If the city manager or her designee denies an application, she shall promptly attempt to call and will promptly mail to the applicant a notice of her action, stating the reasons for her denial of the permit.

(6) If two (2) or more applications are submitted requesting a permit under this section for a parade, public assembly or expressive activity to be used at the same date, time and place, the application first filed shall be granted if it meets the requirements of this section.

(7) Nothing in this section shall permit the city manager or her designee to deny a permit based upon political, social or religious grounds or reasons or based upon the content of the views expressed. Denial of a permit on such grounds is prohibited.

(8) The issuance of a permit under this section shall not excuse the applicant from any other license or permit requirements that may be otherwise necessary for the proposed event, such as business licenses and health permits.

(g) *Alternative permit.* The city manager or her designee shall have the authority to modify the route, time and place of a parade, public assembly or expressive activity to facilitate crowd control in the interest of relieving congestion and promoting public safety, provided that the applicant's rights under the First Amendment are not denied thereby. The city manager or her designee may temporarily close any street in the city affected by a parade when in her judgment the public safety so requires.

(h) *Notice to various officials.* Immediately upon the issuance of a permit under this section, the city manager or her designee shall send a copy thereof to the following:

(1) The chief of police;

(2) The fire chief;

(3) The director of public works; and

(4) The director of neighborhood and leisure services if the location is a park.

(i) *Compliance with directions and standards.* Every person to whom a permit is issued under these sections [this section] shall comply with all permit terms and conditions and with all applicable regulations and laws. The parade, public assembly or expressive activity chairman or other person heading or leading the event shall carry the permit upon his person during the conduct of the event, and show the permit when requested to do so.

(j) *Revocation of permit.* The city manager or her designee shall have the authority to revoke any permit issued pursuant to this section if any information supplied by the applicant is discovered to be false or intentionally misleading, or if any term, condition, restriction or limitation of the permit has been substantially violated, or if there is any continued violation of the terms, conditions, restrictions or limitations of the permit after the applicant or anyone acting in concert with him is notified of a violation of the permit by an appropriate law enforcement official.

(k) *Public conduct during events.*

(1) *Interference.* No person shall unreasonably hamper, obstruct, impede or interfere with any parade, public assembly or expressive activity or with any person, vehicle or animal participating or used in such an event.

(2) *Driving through parades.* No driver of a vehicle shall drive between the vehicles, persons or animals comprising a parade except when otherwise directed by a police officer. This shall not apply to authorized emergency vehicles.

(3) *Parking on parade route or the area of a public assembly or expressive activity.* The city manager or her designee shall have the authority, when reasonably necessary, to prohibit or restrict the parking of vehicles along the public streets or public rights-of-way constituting a part of the route of a parade or an area in which a public assembly or expressive activity will occur. The city manager or her designee, shall post signs to such effect, and it shall be unlawful for any person to park or leave unattended any vehicle in violation thereof. No person shall be liable for parking on a street unposted in violation of this section.

(l) *Parades in street; relocation of parades from the street to the sidewalk.*

(1) Parades consisting of twenty-five (25) or fewer people and no vehicles shall be confined to the sidewalks and shall not enter the street except for the purpose of crossing from one sidewalk to another.

(2) Parades for which a permit to parade in the street has been issued shall be

converted to sidewalk parades on the order of the police officer in charge at the scene if, at the time designated for the start of the parade in the permit, the officer in charge determines:

(A) There are no vehicles prepared to participate in the parade; and

(B) There are twenty-five (25) or fewer people prepared to participate in the parade.

(3) Every person to whom a parade permit is issued and all participants therein shall obey the instructions converting a street parade to a sidewalk parade of the police officer in charge at the scene as though those were the terms and conditions of the original written permit.

(m) *Nonpublic forums.* Parades, public assemblies and expressive activities are prohibited in nonpublic forums because they are not compatible with the purpose, facts and circumstances of such properties. However, by special written permit the city manager or her designee may allow such an event in a nonpublic forum when under all the facts and circumstances it is determined that the specific event and the specific nonpublic forum are not incompatible. Decisions concerning requests for access to nonpublic forums by special written permit shall be made only with the advice and consent of the city attorney to ensure any denials or restrictions are viewpoint neutral and otherwise consistent with the public forum doctrine under the First Amendment of the United States Constitution, as created and revised by the courts.

(n) *Severability.* If any portion of this section is for any reason held to be invalid by a court of competent jurisdiction, such decision shall not affect the remaining portions of this section, and such invalid provisions or portions thereof shall be severable.

(o) *Penalty.* Any person violating any of the provisions of this section shall be guilty of a Class 3 misdemeanor.

Sec. 29-68. Permit required for private property special event held on a non-recurring basis.

(a) *Purpose.* Pursuant to the authority granted to the city by the Code of Virginia and its Charter, this section is adopted in order to ensure that certain special events that are open to the public on property that may not regularly be used to host assembly functions shall only be held when it is determined that the assembly function can be conducted without endangering the health or safety of the public, impairing the levy of appropriate taxes or fees, or interfering with relevant land use limitations.

(b) *Definitions.* The following term when used in this section shall, for the purpose of this section, have the meaning ascribed to it herein except in those instances when the context clearly indicates a different meaning:

Extended special event means any celebration, competition, performance, exposition, gathering, or other activity expected to involve more than one thousand (1,000) people extending longer than twenty-four (24) hours during which many private property special events are expected to occur in relation to or as a result of such event and declared by resolution of the city council.

Private property special event means any event held on private property but which is open to the public and which (i) is expected to draw more than twenty-five (25) attendees, (ii) involves either the provision of entertainment or the sale or service of alcoholic beverages to the public, and (iii) is held on property which is not otherwise approved to allow the activities associated with the event under the applicable provisions of the zoning ordinance.

(c) *Permit required.* It shall be unlawful for any person to host a private property special event without a written permit issued in accordance with the provisions of this section. Any person violating this provision shall be guilty of a class 3 misdemeanor.

(d) *Limitation on number of permits.* The maximum number of permits that may be issued during any calendar year for a private property special event at any one location is established based on location as follows.

(1) For any portion of property outside of a building and not covered by any permanent structure, tent, canopy, or other shelter located in a D-W (Downtown - Waterfront), D-BC (Downtown - Business Center), D-MU (Downtown - Mixed-Use), D-AD (Downtown - Arts and Design), or D-FM (Downtown - Fort Norfolk) zoning district, as defined in the Norfolk Zoning Ordinance and shown on the official zoning map, the maximum number of permits is twelve (12).

(2) For any property or portion of property not described in subsection (1), above, the maximum number of permits is four (4).

(e) *Additional permit for extended special event.* In addition to the maximum number of permits allowed under subsection (d), above, a permit may also be issued for a private property special event during an extended special event, subject to the following requirements and restrictions:

(1) The city council has adopted a resolution declaring an extended special event setting forth all of the following:

(A) The starting date and time and ending date and time of the event.

(B) The geographical area or areas of the city designed to be eligible for permits allowing private property special events.

(C) The fee schedule required as part of the application for each permit to allow a private property special event.

(D) The earliest time and the latest time that a permit for a private property special event may be issued.

(2) No permit for a private property special event issued as part of an extended special event can authorize the use of any property or building in a manner that is prohibited by the applicable provisions of the Uniform Statewide Building Code or the city's Fire Prevention Code.

(f) *Conflict with a special exception or conditional use permit.* No permit for a private property special event shall be issued at a property that is described in a special exception or conditional use permit authorizing the sale of alcoholic beverages, the provision of live entertainment, or both except when the property is included in the geographical area identified by the city council in the resolution declaring an extended special event and only during the time period set forth in the resolution.

(g) *Permit process.*

(1) *Application.* The application for a private property special event permit shall be submitted to the department of city planning at least fifteen (15) days prior to the date scheduled for the commencement of the event. The application shall be signed by the owner of the property, or the owner's authorized representative, and the city manager may establish other reasonable requirements for the submission of a permit application in order to ensure that information sufficient to perform the permit review is provided.

(2) *Late applications.* Any application filed later than fifteen (15) days but at least one (1) day prior to the date scheduled for the commencement of the event may be accepted at the discretion of the department of city planning and may be subject to an additional fee, as authorized below.

(3) *Review.* The application shall be reviewed by the police department, department of fire-rescue, and the department of city planning. Additional agencies, including but not limited to the department of public works, the department of health, and the office of the commissioner of the revenue, may be requested to review the application whenever the nature of the event indicates such review is necessary to promote the purposes of this permit process, set forth above.

(4) *Conditions and issuance.* Within seven (7) calendar days after receipt of the application, each department involved in reviewing the permit shall submit to the department of city planning its response regarding issuance of the permit as well as any recommended conditions to be placed on the permit for the purpose of promoting or protecting public health, safety or welfare. The permit for a private property special event may be issued when it is determined that the event, conducted in accordance with the representations made in the application and in compliance with any conditions

placed on the permit, can be held without endangering the health or safety of the public, impairing the levy of appropriate taxes or fees, or interfering with relevant land use limitations.

(h) *Fees.* Except for permits issued for private property special events hosted during an extended special event, the city manager may establish a schedule of reasonable fees that each applicant for a private property special event permit is required to pay at the time of submission in order to cover the costs associated with maintaining and administering this permit process. The fees may vary depending on the expected number of attendees of the event and an additional fee may be charged for any late application that is accepted in order to cover excess costs associated with expediting the review of the application.

(i) *Authority to terminate events.* Whenever an authorized private property special event is conducted in a manner that does not comply with the permit or any condition placed on the permit and the event presents an imminent danger of serious injury to persons or property, any law enforcement officer is authorized to revoke the permit and order that the event shall be terminated immediately. The availability of this remedy shall be in addition to all other remedies or enforcement actions permitted by law.
(Ord. No. 45,753, § 1, 10-28-14; Ord. No. 49,943, § 1, 4-29-25)

Sec. 29-68.1. Filming activities in streets, parks and other public places.

(a) No person, firm or corporation shall engage in any filming activity in or upon any street, way, highway, road, parkway or other public property; or parcel unless the city manager has granted a permit for such filming, provided that a permit shall not be required for news coverage of contemporaneous events or documentaries not for profit.

(b) A written application for a permit pursuant to this section, on a form prescribed by the city manager, shall be filed with the city manager or his designee no less than fourteen (14) days prior to the date on which filming is desired to begin. The permit processing period may be shortened by the city manager or his designee when the filming period is to be of limited duration and/or the filming is to limited in scope.

(c) The permit application form shall include the following information:

(1) The name, address and telephone number of the applicant, and if the applicant is a corporation, the state of its incorporation, the name and address of its registered agent, and the address of its registered office.

(2) The inclusive dates and hours of each desired period of filming.

(3) The specific location, described with particularity, of each place at which filming is desired.

(5) Copies of portions of the shooting script and location schedules and/or other written materials describing the particular scenes to be filmed at specified locations designated in the permit application.

(6) Detailed descriptions of all stunts, chase scenes, special effects, etc., intended to be staged, with the specific location, date and hour desired.

(d) The permit application must be accompanied by a processing fee of one hundred dollars ($100.00), provided, however that the fee shall not be required for student or non-profit filming activities, and that the fee will be fifty dollars ($50.00) for applicants whose principal place of business is in the city.

(e) No permit shall be issued for filming activities at a particular location if the following conditions exist:

(1) When the filming activities will substantially interrupt the safe and

orderly movement of traffic contiguous to the filming site, or in or through the public place used for desired filming activities, and public traffic needs cannot be accommodated reasonably by temporary re-routing; and/or

(2) When its size or the nature of the filming activities will require the diversion of so great a number of police officers and/or other personnel of the city to properly police the film site or provide other services that normal required police or city obligations are impaired; and/or

(3) When the concentration of persons and vehicles at the filming site and surrounding areas will unduly interfere with proper fire and police protection of, or ambulance service to, locations contiguous to such areas.

(4) When the filming will interfere with the movement of firefighting equipment en route to a fire.

(f) No permit shall be issued authorizing filming unless the applicant satisfies the following conditions:

(1) Provision of sufficient insurance coverages and/or bonds to protect the city from loss or damage, of a type and with policy limits to be determined in accordance with regulations promulgated by the city manager. Liability insurance coverages required shall include the city as an additional named insured.

A permittee, by accepting a permit and commencing filming activities allowed by it, shall be deemed to have accepted the provisions of this section and of regulations promulgated by the city manager, and this section and such regulations shall be attached to every permit and be a part thereof.

The applicant shall deposit with the director of public works the sum of one hundred dollars ($100.00) for processing the application and in addition thereto a sum sufficient to cover the cost of city personnel, equipment and material which is utilized in connection with conducting the block party or street fair.

(b) The city manager shall grant the permit unless he is of the opinion that such block party or street fair on the streets or other public places in the city will unreasonably interfere with the public use thereof or will tend to disturb or imperil the public safety or the public peace, in which case he shall deny the permit. The city manager may temporarily close any street in the city affected by a block party or street fair when in his judgment the public safety so requires.

(c) Any person violating any of the provisions of this section shall be guilty of a Class 3 misdemeanor.

(a) *Sales.* It shall be unlawful for any person who is not employed by the City of Norfolk to solicit sales in that portion of any building, owned or leased by the city, which is used by the city as a work place.

(b) *Charitable contributions.* It shall be unlawful for any person who is not either employed by the City of Norfolk or affiliated with the United Way Campaign to solicit charitable contributions in that portion of any building, owned or leased by the city, which is used by the city as a work place.

(c) *Violation; penalty.* Any person convicted of violating this section shall be guilty of a misdemeanor and subject to a fine of not more than fifty dollars ($50.00).

(d) *Definitions.* As used in this section:

(1) The term "sales" shall mean any sales solicitation of retail items to individuals for their personal use that requires individuals to buy, or commit to buying, a product at the time of the solicitation, or that requires individuals to hear or read a sales presentation.

(Ord. No. 36,663, § 1, 11-19-91)

Sec. 29-70.1. Small performances in parks and on sidewalks.

(a) *Intention of council.* The Norfolk City Council finds that performers in the parks and on the sidewalks of the City of Norfolk (city) will

provide a public amenity that will enhance the character of the city. Moreover, the council recognizes that public parks and sidewalks are traditional public forums as defined by the United States Supreme Court and therefore such performances are protected by the First Amendment of the United States Constitution. Consequently, the city shall not regulate such performances except for the protection of the public health, safety, and welfare, and then only to the extent consistent with the First Amendment of the United States Constitution. The phrase "health, safety and welfare" includes, but is not limited to, the interests of residents, of the owners of lawful, code-compliant businesses and their customers, and of members of the public generally in the peaceful use and enjoyment of their homes, businesses and the public places within the city.

(b) *Definitions.* The following terms shall have the meanings set out herein, unless the context in which they occur clearly indicates otherwise:

Perform, performing or *performance* means acting, singing, playing musical instruments, pantomime, mime, magic, dancing and artistry generally, done pursuant to this ordinance, whether done for free or in exchange for individual donations from bystanders.

Performer(s) means an individual or small group performing on sidewalks or within the parks of the city, pursuant to this section.

Small performance(s) means a performance involving less than thirty (30) performers; thirty (30) or more requires a permit to assemble in a park or on the sidewalks under other sections of this Code, such as 29-67.1 (Parades, public assemblies and expressive activities; permits).

Street(s) means that portion of a highway, designed or ordinarily used for vehicular travel, including gutters and medians but excluding sidewalks and/or shoulders bordering gutters.

(c) *Small performance restrictions—Generally.* Performer(s) shall not:

(1) Perform In the streets without a permit issued pursuant to other sections of this Code, such as section 29-67.1 (Parades, public assemblies and expressive activities; permits).

(2) Perform within ten (10) feet of any bus stop, rail transit platform or track that is part of the public transportation system, which includes, but is not limited to, the project popularly known as "light rail".

(3) Perform within ten (10) feet of any street corner or a marked pedestrian crosswalk.

(4) Perform so close to the outer edge of any entrance or exit of any residence or business, including, but not limited to, doors, vestibules, driveways, outdoor dining areas or emergency exits, so as to interfere with entrance to or exit from the residence or the business during the hours that such business is open to the public.

(5) Use any weapon, tool or other object or prop in a performance that by its nature may cause serious bodily harm. Examples of such objects include, but are not limited to, firearms, knives, spears and chain saws.

(6) Engage in any activity in a performance, regardless of the nature of any object or prop, that might cause serious bodily harm to any person. An example of such an activity includes, but is not limited to, the use of fire in a performance.

(7) Use in connection with a performance any generator, wet cell battery with removable fill caps, or any other power source that poses a fire or public safety hazard.

(8) Litter a performance site. Performers must clean up their litter, if any, after the conclusion of a performance.

(9) Being a minor under the age of eighteen (18), perform unless accompanied at all times by a responsible adult eighteen (18) years of age or older, or perform under circumstances that would violate the city's juvenile curfew ordinance or any other laws regulating juveniles, including, but not limited to, the truancy laws.

(10) Perform with more instruments, props, equipment, or other items than one performer can reasonably transport or remove at one time.

(11) Leave instruments, props, equipment, or other items unattended during a performance. Performers must promptly remove such items after a performance.

(11.5) Perform between the hours of 11:59 p.m. and 7:00 a.m. the next day on Friday or Saturday evening and between the hours of 11:00 p.m. and 7:00 a.m. the next day on any other day of the week so as to generate an audible and discernable sound at a distance of one hundred (100) feet or more. For purposes of this subsection the phrase "audible and discernable" means that the sound can be heard by the human ear and is sufficiently distinct for its source to be clearly identified.

(12) Perform in violation of chapter 26 of the City Code, which restricts noise levels within the city. These restrictions include, but are not limited to, those of City Code section 26-10, setting maximum sound pressure levels based on time of day and the category of the area (e.g., "noise sensitive zone" or "residential"), and subsection 26-8(b), allowing only parties with special permission by ordinance or other lawful grant of authority from the city, such as a permit, to exceed the levels set by section 26-10 for specified periods of time on city property categorized as for "park and recreational use."

(13) Perform or otherwise behave in violation of any laws regulating the possession or use of animals, including but not limited to, such provisions of the Norfolk City Code as chapter 6.1 (concerning Animal Control and Welfare); [sections] 6.1-7 (Keeping certain animals within city); 6.1-50 (Licensing of certain animals required); 25.2-32 (Dogs and animals in parks generally); and 25.2-83 (Dogs and animals in Town Point Park).

(14) Perform or otherwise behave in violation of the law. This Code section is not an exception to other restrictions under the law which may apply to a performer or a performance depending on all the facts and circumstances of a particular performance. These restrictions include, but are not limited to, those Code sections referenced elsewhere within this section and the following laws: trespassing (Norfolk City Code section 29-48); obstructing free passage of others (Code of Virginia, § 18.2-404); assault and battery (Norfolk City Code section 29-8); begging (Norfolk City Code section 42-16); disorderly conduct (Norfolk City Code section 29-10); Riot and unlawful assembly (Code of Virginia, § 18.2-404 et seq.); charitable soliciting (Norfolk City Code section 40-15 et seq. and Code of Virginia, § 57-48 et seq.); parade and assembly (Norfolk City Code section 29-67.1); neighborhood and leisure services—park and special event requirements generally (Norfolk City Code section 25.1-1 et seq.); licenses and taxation (Norfolk City Code section 24-1 et seq.); public health regulations (Norfolk City Code section 2-478 et seq.); fire-rescue (Norfolk City Code section 17.1-1 et seq.); public nudity (Norfolk City Code section 28-12); and obscenity (Norfolk City Code section 28.1 et seq.).

(d) *Small performance restrictions—Time, place and manner.* In enforcing these restrictions, law enforcement officers shall bear in mind that the city's parks and sidewalks are traditional public forums within which all citizens have free speech and expression rights protected by the First Amendment, but that no citizen may exercise a "heckler's veto" on the speech or expression of another, and that those holding advance permits to exercise their rights within a specific traditional public forum should be given precedence, within the limits of the Constitution, over those without permits. This does not mean that the issuance of a permit converts a traditional public forum into private property or that those without permits may simply be banned from parks and sidewalks

during periods those spaces are under permit. Consequently, law officers shall enforce the following restrictions pursuant to the U.S. Supreme Court's doctrine allowing for time, place and manner restrictions of First Amendment activities in public parks and sidewalks based on circumstances at the scene, adhering to the following principles.

Law enforcement officers shall not consider the content of the speech or expression at issue, and shall take action against speakers only as necessary to ensure public order and safety, the free flow of pedestrian and vehicular traffic and to prevent interference with the message of a lawful permit holder by those without permits (that is, all restrictions imposed by officers at the scene shall be narrowly tailored to advance a substantial governmental interest). In taking such actions against speakers, law enforcement officers shall leave open ample alternative avenues of expression, such as nearby areas of the park or sidewalks. Finally, in disputes between two or more speakers, all without permits, law enforcement officers shall give precedence, within the limits of the Constitution, to the free speech and expression rights of the first speaker on the scene.

Performers shall not:

(1) Perform or otherwise behave so as to cause a performer(s) and/or the performer(s) equipment to block or obstruct the free and safe movement of pedestrians. Law enforcement officers may, if a sufficient crowd gathers to observe a performance such that the passage of the public through a public area is blocked or obstructed, disburse [disperse] that portion of the crowd that is blocking or obstructing the passage of the public. If a performer(s) cannot conduct a performance in a specific location without blocking or obstructing the passage of the public, law enforcement officers may cause the performer(s) to leave the immediate location, but shall not prevent the performer(s) from occupying another lawful location in compliance with this section.

(2) Perform or otherwise behave so as to prevent or obstruct the public's participation in and enjoyment of another performer(s) already established in the area; of another person already established in the area and exercising his or her First Amendment rights, although not by performing; or of an event or some portion thereof that is open to the public and occurring pursuant to permit. Law enforcement officers may, should this occur, require a performer(s) to take action so as to alleviate the situation. Such action includes, but is not limited to, law enforcement officers moving the performer(s) a reasonable distance from their immediate location or requiring the performer(s) to lower the volume of voice or instruments.

(3) Perform or otherwise behave so as to interfere with a resident's lawful use and enjoyment of his property. Officers shall only enforce this provision upon a complaint from the resident of the property, and shall apply the time, place and manner principles set out above.

(4) Perform or otherwise behave so as to interfere with a business owner's or operator's lawful use and administration of a business. Officers shall only enforce this provision upon a complaint from the owner, manager or other person in charge of the business, and shall apply the time, place and manner principles set out above.

(e) *Severability.* If any portion of this section of the Code is for any reason held to be invalid by a Court of competent jurisdiction, such decision shall not affect the remaining portions of this section, and such invalid provisions or portions thereof shall be severable.

(f) *Penalty.* Any person violating this section shall be guilty of a Class 3 misdemeanor.

(a) Whenever the commission has recommended a comprehensive plan or part thereof for the city and such plan has been approved and adopted by the council, the plan shall control the general or approximate location, character and extent of each feature shown on the plan. Thereafter, unless such feature is already shown on the adopted master plan or part thereof, or is deemed so under subsection (d) of this section, no street, park or other public area, public building or public structure, public utility facility or public service corporation facility, other than a railroad facility, whether publicly or privately owned, shall be constructed, established or authorized, unless and until the general location or approximate location, character and extent thereof has been submitted to and approved by the commission as being substantially in accord with the adopted comprehensive plan or part thereof. In the case of approval, the owner or owners or their agents may appeal the decision of the planning commission to the council, within ten (10) days after the decision of the commission. The appeal shall be by written petition to the council setting forth the reasons for the appeal. A majority vote of the council shall overrule the commission.

(c) Widening, narrowing, extension, enlargement, vacation or change of use of streets or public areas shall likewise be submitted for approval, but paving, repair, reconstruction, improvement, drainage or similar work and normal service extensions of public utilities or public service corporations shall not require approval, unless involving a change in location or extent of a street or public area.

(d) Any public area, facility or use, as set forth in subsection (a) of this section, which is identified within, but not the entire subject of, a submission under either section 15.2-2258 of the Code of Virginia for subdivision or section 15.2-

2286 of such code for development, or both, may be deemed a feature already shown on the adopted master plan, and, therefore, excepted from the requirement for submittal to and approval by the commission or the council under this section; provided, that the council has, by ordinance or resolution, defined standards governing the construction, establishment or authorization of such public area, facility or use or has approved it through acceptance of a proffer made pursuant to section 15.2-2303 of the Code of Virginia.

The person applying for the permit required in this section shall state on a permit application form provided by the city the following: name, address of the commercial or residential premises in or for which the alarm system will be installed, telephone number of the alarm system user, the type of alarm system (local or monitored), name of the alarm company operator selling or leasing the new or existing alarm system equipment or services and the names, addresses and telephone numbers of at least two (2) other persons who can be reached at any time, day or night, and who are authorized to respond to an alarm signal and who can open and represent the premises in which the system is installed for reporting and investigative purposes. It shall be the responsibility of the alarm system user to notify the city in writing of any subsequent changes in the information provided on the permit application.

Upon approval by the chief of police of the permit application, the permit shall be issued to the alarm system user.

(b) The information contained in the alarm system permit application required by this section and other information received by the chief of police or the coordinator of emergency services through correspondence or communications with an alarm system user or an alarm company operator shall be securely maintained and restricted to inspection only by the certain officers or city employees specifically assigned the responsibility for handling any processing alarm system user permits in the course of official duties. The release of any information contained in the alarm system permit application or related communications or correspondence to another person for any unlawful purpose shall constitute a class 2 misdemeanor.

(c) Any alarm system user who operates or allows an alarm system to be operated without first obtaining a permit as required by this section, or who, after having a permit revoked, operates or allows the system to be operated, shall be in violation of this article, and subject to fine, as provided by section 33-105. The owner of the alarm system to whom the alarm system user permit is issued shall be the person held in violation.
(Ord. No. 36,288, § 1, 12-11-90)

Sec. 33-97. Duties of alarm system users.

(a) Alarm system users shall instruct employees, tenants or others who may have occasion to activate an alarm that alarm systems are to be activated only in emergency situations to summon an immediate police response and shall instruct as to the operation of the alarm system, including setting, activation, deactivation and resetting of the alarm. All instructions pertaining to alarm systems and procedures shall be in written form, suitable for distribution and shall be available for inspection by representatives of the police

department. The alarm system user shall be responsible for maintaining the alarm system in proper working order.

(b) An alarm system user or person authorized and capable of deactivating the alarm, who allows an alarm to continue to emit an audible signal for thirty (30) minutes after notification of the alarm commencing to emit such signal shall be guilty of a class 4 misdemeanor.
(Ord. No. 36,288, § 1, 12-11-90)

Sec. 33-98. Deliberate false alarms.

Any person who intentionally or deliberately and without just cause activates an alarm system in a nonemergency situation shall be deemed guilty of a class 2 misdemeanor. Nothing herein contained shall apply to the periodic testing of alarms after prior coordination with and approval of the coordinator of emergency services. Testing the alarm system without such prior coordination and approval is unlawful.
(Ord. No. 36,288, § 1, 12-11-90)

Sec. 33-99. Service fees for false alarms.

Notwithstanding the penalties provided for in section 33-98, the following provisions shall also apply to false alarms:

(a) Schedule of fees. The third false alarm originating from any premises and to which police are dispatched or respond within six (6) consecutive months will result in a service fee being imposed by the city upon the alarm system user which fee must be paid within thirty (30) days after billing. The service fee shall be twenty-five dollars ($25.00) for the third false alarm and forty-five dollars ($45.00) for the fourth false alarm and each subsequent false alarm. Fees shall be collected pursuant to section 33-100.

(b) The city will notify an alarm system user upon occurrence of the fifth false alarm within a six-month period that the user's alarm system must be inspected by a registered alarm company operator to identify any problems or defects with the alarm system. The choice of alarm company operator and cost of the inspection are the responsibility of the alarm system user. The alarm company operator shall provide a copy of a report of inspection to the chief of police. The report shall outline the problems or defects found and the actions taken or needed to correct such problems or defects. If no problems or defects are noted, the report will certify the system as operable. If the system is certified as operable, it will be presumed that the false alarm(s) occurred through alarm system user error. The user must then be retrained and/or provide an alarm operator's training program for its employees, tenants and all others having access to the system. A report of this training must be filed by the alarm system user with the chief of police.
(Ord. No. 36,288, § 1, 12-11-90)

Sec. 33-100. Payment of fees; revocation of permit for failure to pay fees.

(a) The city shall on the last day of each month certify to the city treasurer the name of the alarm system user, the address from which false alarms subject to penalty emanated and the amount due the city. The city shall cause billing to be sent and shall in turn notify the city attorney when any account is more than thirty (30) days in arrears.

(b) All service fees assessed against the alarm system user shall be due and owing to the city treasurer. In the event legal action is necessary to collect the service fees, the alarm system user shall be required to pay the service fees and any and all legal fees, attorney's fees and court costs required to collect such monies.

(c) The failure of a permit holder to pay any outstanding service fees and/or expenses of collection shall constitute grounds for the revocation of the alarm system users permit by the chief of police. The continued operation of an alarm system after notification that the permit has been revoked shall constitute a class 4 misdemeanor, and each day of continued operation of the alarm system shall constitute a separate offense.

(d) An alarm system user permit that has been revoked pursuant to subsection (c) of this section may be reinstated by the chief of police upon payment of all outstanding service fees and expenses of collection plus a reinstatement fee of one hundred dollars ($100.00).

It shall be the responsibility of the alarm company operator to notify the city in writing of any subsequent changes in the information provided on the application for registration.

(b) Registration applications shall be accompanied by a nonrefundable fee of thirty dollars ($30.00) to cover the costs of processing the application and investigating the applicant. The registration must be renewed annually thereafter at an annual fee of twenty dollars ($20.00).

(b) Every alarm company operator that installs, monitors, alters, services or repairs an alarm system after the effective date of this article shall certify on the permit required in section 33-96 that the alarm system user has been instructed in the proper use and operation of the alarm system.
(Ord. No. 36,288, § 1, 12-11-90)

ARTICLE I. IN GENERAL

Sec. 33.1-1. Purpose.

To the end that the city obtain high-quality goods and services at reasonable cost, that all procurement procedures be conducted in a fair and impartial manner with avoidance of any impropriety or appearance of impropriety, that all qualified vendors have access to public business and that no bidder or offeror be arbitrarily or capriciously excluded, it is the purpose and intent of this chapter that competition be sought to the maximum feasible degree, that procurement procedures involve openness and administrative efficiency, that the rules governing contract awards be made clear in advance of the competition, that specifications reflect the procurement needs of the city rather than being drawn to favor a particular vendor, and that the city and vendor freely exchange information concerning what is sought to be procured and what is offered. The city may consider best value concepts when procuring goods and nonprofessional services, but not construction or professional services. The criteria, factors, and basis for consideration of best value and the process for the consideration of best value shall be as stated in the procurement solicitation.
(Ord. No. 33,095, § 1, 9-11-84; Ord. No. 43,223, § 1, 9-9-08)

Sec. 33.1-2. Application.

This chapter applies to all contracts for the procurement of goods, services, and construction entered into by the city with nongovernmental sources, to include city procurement that may or may not result in monetary consideration for either party. This chapter shall apply whether the consideration is monetary or nonmonetary and regardless of whether the city, the contractor, or some third party is providing the consideration.
(Ord. No. 33,095, § 1, 9-11-84; Ord. No. 43,223, § 1, 9-9-08)

Sec. 33.1-3. Rules and regulations.

The city manager shall establish rules and regulations to implement the provisions of this chapter which shall be amended from time to time as deemed necessary. Such rules and regulations shall be consistent with the objectives set forth in this chapter and approved as to form and correctness by the city attorney. Public notice of such amendments shall be given by posting in a designated public area for a minimum of ten (10) days before such amendments take effect.
(Ord. No. 33,095, § 1, 9-11-84)

Sec. 33.1-4. Cooperative procurement.

(1) The city may enter into a cooperative procurement agreement with any public body; provided, that if the city is the procuring agency, the procurement shall comply with the policies and procedures set forth within this chapter and the rules and regulations promulgated to implement this chapter; and if the city is not the procuring agency, then the procurement will comply with the policies and procedures of the other public body, provided that such compliance is consistent with the intent of this chapter.

Except for contracts for architectural and engineering services, the city may purchase from another public body's contract even if it did not participate in the request for proposals or invitation to bid, if the request for proposals or invitation to bid specified that the procurement was being conducted on behalf of other public bodies.

(2) The city may enter into a cooperative procurement agreement with any nonprofit entity if the entity was formed and is maintained for the purpose of advancing the public interest; provided, that if the city is the procuring agency, the procurement shall comply with the policies and procedures set forth within this chapter and the rules and regulations promulgated to implement this chapter; and if the city is not the procuring agency, the procurement is based upon an open competitive process and is fiscally advantageous to the public.

(3) As authorized by the United States Congress and consistent with applicable federal regulations, and provided the terms of the contract permit such purchases, the city may purchase goods and nonprofessional services from a U.S.

General Services Administration contract or a contract awarded by any other agency of the U.S. government.
(Ord. No. 33,095, § 1, 9-11-84; Ord. No. 38,335, § 1, 4-23-96; Ord. No. 43,413, § 1, 4-21-09)

Sec. 33.1-5. Procurement involving federal or state funding.

(1) When the procurement involves the expenditure of federal assistance or contract funds, the procurement shall be conducted in accordance with any applicable mandatory federal law and regulation in addition to those which are consistent herein. Nothing in this chapter shall prevent the city from complying with the terms and conditions of any grant, gift, or bequest which are otherwise consistent with law.

(2) No contract for the construction of any building or for an addition to or improvement of an existing building by the city for which state funds of not more than thirty thousand dollars ($30,000.00) in the aggregate or for the sum of all phases of a contract or project either by appropriation, grant-in-aid or loan, are used or are to be used for all or part of the cost of construction shall be let except after competitive sealed bidding or after competitive sealed proposals. The procedure for the advertising for bids or for proposals and for letting of the contract shall conform to section 33.1-36.
(Ord. No. 33,095, § 1, 9-11-84; Ord. No. 43,223, § 1, 9-9-08)

Sec. 33.1-6. Certain contracts prohibited.

Except in the event of an emergency affecting the public health, safety, or welfare, no public contract shall be awarded on the basis of cost plus a percentage of cost. A policy or contract of insurance or prepaid coverage having a premium computed on the basis of claims paid or incurred, plus the insurance carrier's administrative costs and retention stated in whole or part as a percentage of such claims, shall not be prohibited by this provision.
(Ord. No. 33,095, § 1, 9-11-84)

Sec. 33.1-7. Certain contracts excepted.

Contracts for legal services and police undercover activities may be entered into without competitive procedures required by this chapter. Contracts associated with litigation or regulatory proceedings, such as contracts for expert witnesses or related goods or services, may also be entered into without the competitive procedures required in this chapter.
(Ord. No. 33,095, § 1, 9-11-84)

Sec. 33.1-7.5. Goods or personal services to individual recipients of public assistance excepted.

Any procurement on behalf of public assistance programs as defined in section 63.1-87, Code of Virginia, or the fuel assistance program may be made without competitive sealed bids or proposals or competitive negotiations if the procurement is made for an individual recipient. Contracts for the bulk procurement of goods or services for the use of recipients shall not be exempted from the requirements of section 33.1-2.
(Ord. No. 33,354, § 1, 3-19-85)

Sec. 33.1-8. Certain contracts with the handicapped excepted.

The city may enter into contracts without competition for the purchase of goods or services (i) which are performed or produced by persons, or in schools or workshops, under the supervision of the Virginia Department for the Visually Handicapped; or (ii) which are performed or produced by nonprofit sheltered workshops or other nonprofit organizations which offer transitional or supported employment services serving the handicapped.

(2) Cost estimates relating to a proposed procurement transaction shall not be open to public inspection.

(3) Upon request any bidder shall be afforded the opportunity to inspect bid records after the opening of all bids. Bids records shall be open to public inspection only after award of the contract. Any inspection of procurement records under this section shall be subject to reasonable restrictions to ensure the security and integrity of the record.

(4) Upon request any offeror of a proposal shall be afforded the opportunity to inspect proposal records within a reasonable time after the evaluation and negotiations of proposals are complete but prior to award, except in the event that the public body decides not to accept any of the proposals and to reopen the contract. Otherwise, proposal records shall be open to public inspection only after award of the contract.

(5) Trade secrets or proprietary information submitted by a bidder, offeror or contractor in connection with a procurement shall not be subject to public disclosure under the Virginia Freedom of Information Act; however, the bidder, offeror or contractor must invoke the protections of this section prior to or upon submission of the data or other materials, and must identify the specific area or scope of data or other materials to be protected and state the reasons why protection is necessary. In determining the terms for sale or disposal and the sufficiency and practicability of opportunity for competition in cases, the purchasing agent shall take into account the salvage practices of private insurance carriers, and shall not be limited to the usual means of disposing of surplus property.
(Ord. No. 33,095, § 1, 9-11-84)

Secs. 33.1-31—33.1-35. Reserved.

ARTICLE IV. SOURCE SELECTION AND CONTRACT FORMATION

Sec. 33.1-36. Competitive sealed bidding.

(1) *Conditions for use.* All contracts of the city shall be awarded by competitive sealed bidding except as otherwise provided in this article.

(2) *Invitation for bids.* An invitation for bids shall be issued and shall include specifications and contractual terms and conditions applicable to the procurement.

(3) *Public notice.* Public notice of the invitation for bids shall be given a minimum of ten (10) days prior to the date set for opening of bids by posting in a designated public area, or by publication in a newspaper of general circulation, or both. The public notice shall state the place, date, and time of bid opening.

(4) *Bid opening.* Bids shall be opened publicly at the time and place designated in the invitation for bids. The amount of each bid, and such other relevant information as the procuring agent deems appropriate, together with the name of each bidder shall be recorded; and the record and each bid, with the exception of proprietary information, shall be open to public inspection, after award of the contract.

(5) *Bid acceptance and bid evaluation.* Bids shall be accepted without alteration or correction, except as authorized in this chapter. Bids shall be evaluated based on the requirements set

forth in the invitation for bids. Those criteria that will affect the bid price and be considered in evaluation for award shall be objectively measurable, such as discounts, transportation costs, and total or life cycle costs. The invitation for bids shall set forth the evaluation criteria to be used, such as inspection, testing, quality, workmanship, maintenance requirements, delivery, and suitability for a particular purpose.

(6) *Award.* The contract shall be awarded by written notice to the lowest responsible and responsive bidder whose bid meets the requirements and criteria set forth in the invitation for bids. In the event that a responsive bid from the lowest responsible bidder exceeds available funds as determined by the director of finance, the procuring agent may negotiate the amount of the bid with the apparent low bidder to obtain a contract price within available funds.
(Ord. No. 33,095, § 1, 9-11-84)

Sec. 33.1-37. Competitive sealed proposals.

(1) *Conditions for use.* When the purchasing agent determines it to be the most advantageous method of procurement, competitive sealed proposals method may be used as the method of procurement unless competitive negotiation is required.

(2) *Request for proposals.* Proposals shall be solicited by a request for proposals which shall state the objective of the procurement and specify the factors which will be used in evaluating the proposals, including any qualifications which will be required.

(3) *Public notice.* Public notice of the request for proposals shall be given a minimum of ten (10) days prior to the date set for receipt of proposals by a means that can be expected to provide reasonable notice to the maximum number of prospective offerors that can be practically anticipated to submit proposals in response to the particular request. Where substantial changes in public policy are involved in such a proposal, there shall be more extensive advertising to help ensure notice to prospective bidders and the public. In addition, proposals may be solicited directly from potential contractors. The public notice shall state the deadline and the location for receipt of proposals.

(4) *Receipt of proposals.* No proposals shall be handled so as to permit disclosure of the contents of any proposal to competing offerors during the process of evaluation. The name of each offeror, the number of modifications received, if any, and a description sufficient to identify such proposals and modifications shall be recorded. The record shall be open for public inspection after award of the contract.

(5) *Discussion with responsible offerors and revisions to proposals.* As provided in the request for proposals, discussions may be conducted with responsible offerors who submit proposals for the purpose of clarification to assure full understanding of and conformance to the solicitation requirements. Such offerors shall be accorded fair and equal treatment with respect to any opportunity for discussion and revision of proposals and such revisions may be permitted after submissions and prior to award for the purpose of obtaining best and final offers. In conducting discussions, there shall be no disclosure of any information derived from proposals submitted by competing offerors.

(6) *Award.* Award shall be made to the responsible offeror whose proposal is determined in writing to be the most advantageous to the city taking into consideration price and the evaluation factors set forth in the request for proposals. The contract file shall contain the basis on which the award is made.
(Ord. No. 33,095, § 1, 9-11-84; Ord. No. 34,572, § 1, 6-30-87; Ord. No. 35,591, § 1, 6-20-89; Ord. No. 47,667, § 5, 6-11-19)

Sec. 33.1-38. Competitive negotiation.

(1) *Conditions for use.* When professional services are the subject of the procurement, a contract shall be entered into by use of the competitive negotiation method.

(2) *Request for proposals.* Written requests for proposals shall be issued indicating in general terms that which is sought to be procured, specifying the factors which will be used in

evaluating the proposals and containing or incorporating by reference the other applicable contractual terms and conditions, including any unique capabilities or qualifications which will be required of the contractor. The request for proposals shall not, however, request that offerors furnish estimates of hours of work or cost for services.

(3) *Public notice.* Public notice of the request for proposals shall be given a minimum of ten (10) days prior to the date set for receipt of proposals by a means that can be expected to provide reasonable notice to the maximum number of prospective offerors that can be practically anticipated to submit proposals in response to the particular request. Where substantial changes in public policy are involved in such a proposal, there shall be more extensive advertising to help ensure notice to prospective offerors and the public. In addition, proposals may be solicited directly from potential contractors. The public notice shall state the deadline and the location for receipt of proposals.

(4) *Procedure.* The city shall engage in individual discussions with two (2) or more offerors deemed fully qualified, responsible and suitable on the basis of initial responses and with emphasis on professional competence, to provide the required services. Repetitive informal interviews shall be permissible. Such offerors shall be encouraged to elaborate on their qualifications and performance data or staff expertise pertinent to the proposed project, as well as alternative concepts. At the discussion stage, the city may discuss nonbinding estimates of total project costs, including, but not limited to, life-cycle costing, and where appropriate, nonbinding estimates of price for services. Proprietary information from competing offerors shall not be disclosed to the public or to competitors. At the conclusion of discussions, outlined in this paragraph above, on the basis of evaluation factors published in the request for proposals and all information developed in the selection process to this point, the city shall select in the order of preference two (2) or more offerors whose professional qualifications and proposed services are deemed most meritorious. Negotiations shall then be conducted, beginning with the offeror ranked first. If a contract satisfactory and advantageous to the city can be negotiated at a price considered fair and reasonable, the award shall be made to that offeror. Otherwise, negotiations with the offeror ranked first shall be formally terminated and negotiations conducted with the offeror ranked second, and so on until such a contract can be negotiated at a fair and reasonable price. Should the city determine in writing and in its sole discretion that only one offeror is fully qualified, or that one offeror is clearly more highly qualified and suitable than the others under consideration, a contract may be negotiated and awarded to that offeror.

A contract for architectural or professional engineering services relating to construction projects may be negotiated by the city, for multiple projects provided (i) the projects require similar experience and expertise, (ii) the nature of the projects is clearly identified in the request for proposals, and (iii) the contract term is limited to one year or when the cumulative total project fees reach the maximum cost authorized in this paragraph, whichever occurs first. Such contract may be renewable for four additional one-year terms at the option of the city. Under such contract, (a) the fair and reasonable prices, as negotiated, shall be used in determining the cost of each project performed, (b) the sum of all projects performed in one contract term shall not exceed eight million dollars ($8,000,000.00); and (c) the project fee of any single project shall not exceed one million five hundred thousand dollars ($1,500,000.00). Any unused amounts from the first contract term shall not be carried forward to the additional term. Competitive negotiations for such contracts may result in awards to more than one offeror provided (1) the request for proposals so states and (2) the city has established procedures for distributing multiple projects among the selected contractors during the contract term.

Multiphase professional-services contracts satisfactory and advantageous to the city for environmental, location, design and inspection work regarding construction of infrastructure projects may be negotiated and awarded based on qualifications at a fair and reasonable price for the first phase only, when completion of the

earlier phases is necessary to provide information critical to the negotiation of a fair and reasonable price for succeeding phases. Prior to the procurement of any such contract, the city shall state the anticipated intended total scope of the project and determine in writing that the nature of the work is such that the best interests of the city require awarding the contract.
(Ord. No. 33,095, § 1, 9-11-84; Ord. No. 34,462, § 1, 5-12-87; Ord. No. 35,591, § 1, 6-20-89; Ord. No. 43,223, § 1, 9-9-08; Ord. No. 48,194, § 1, 10-27-20)

Sec. 33.1-39. Small purchases.

Any procurement for goods and services other than professional services not exceeding two hundred thousand dollars ($200,000.00) and any procurement for professional services not exceeding eighty thousand dollars ($80,000.00) may be made in accordance with small purchase procedures which shall be specified in the rules and regulations promulgated to implement this provision; provided, however, that contract requirements shall not be artificially divided so as to constitute a small purchase under this provision; provided also that any procurement of goods or services under five thousand dollars ($5,000.00) may be made directly under the decentralized purchasing system. To the extent practicable, no less than three (3) businesses shall be solicited. Names of businesses solicited for procurement under this section shall be recorded with dates and amounts and such entries shall be maintained as public records. For the purchase of goods in an amount not exceeding two hundred thousand dollars ($200,000.00) or the procurement of services in an amount not exceeding fifty thousand dollars ($50,000.00), the purchasing agent may issue a purchase order using a form prepared by the city attorney, without following the requirements set forth in section 2-7 of the City Code.
(Ord. No. 33,095, § 1, 9-11-84; Ord. No. 34,649, § 1, 7-28-87; Ord. No. 36,829, § 1, 5-19-92; Ord. No. 38,628, § 1, 1-28-97; Ord. No. 39,344, § 1, 10-20-98; Ord. No. 43,413, § 1, 4-21-09; Ord. No. 46,808, § 1, 4-11-17; Ord. No. 47,667, § 6, 6-11-19; Ord. No. 48,194, § 1, 10-27-20)

Sec. 33.1-40. Sole source procurement.

Upon a determination in writing that there is only one source practicably available for that which is to be procured, a contract may be negotiated and awarded to that source. Any sole source procurement which otherwise would have required competitive sealed bidding, competitive sealed proposals, or competitive negotiations shall be reported to the city council on a monthly basis.
(Ord. No. 33,095, § 1, 9-11-84)

Sec. 33.1-41. Emergency procurement.

In the event of a threat to public health, welfare, or safety, a contract may be awarded without competitive sealed bidding, competitive sealed proposals or competitive negotiation. Such procurement, however, shall be made with such competition as is practicable under the circumstances. In addition to regular reports of emergency public works according to Charter section 81, any emergency procurement which would have required competitive sealed bidding, competitive sealed proposals or competitive negotiation under nonemergency conditions shall be reported to the city council on a monthly basis.
(Ord. No. 33,095, § 1, 9-11-84)

Sec. 33.1-42. Correction or withdrawal of bids or proposals; cancellation of awards.

(1) *Construction.* A bidder for a public construction contract, other than a contract for construction or maintenance of public highways, may withdraw his bid from consideration if the price was substantially lower than others due solely to a mistake therein, provided the bid was submitted in good faith, the mistake was a clerical mistake as opposed to a judgment mistake, and the mistake was actually due to an unintentional arithmetic error or an unintentional omission of a quantity of work, labor, or material made directly in the compilation of a bid, which unintentional arithmetic error or unintentional omission can be clearly shown by objective

evidence drawn from inspection of original work papers, documents, and materials used in the preparation of the bid sought to be withdrawn.

If a bid contains both clerical and judgment mistakes, a bidder may withdraw his bid from consideration if the price bid would have been substantially lower than the other bids due solely to the clerical mistake, that was an unintentional arithmetic error or an unintentional omission of a quantity of work, labor or material made directly in the compilation of a bid that shall be clearly shown by objective evidence drawn from inspection of original work papers, documents and materials used in the preparation of the bid sought to be withdrawn.

Within two (2) business days after the conclusion of the opening procedure, the bidder shall give notice in writing to the agent responsible for the procurement of his claim of right to withdraw his bid. Such mistake shall be proved only from the original work papers, documents, and materials delivered as required herein.

(2) *Other.* A bidder or offeror on contracts other than construction contracts may withdraw a bid or proposal according to procedures established by the rules and regulations promulgated by the city manager.

(3) *Bidders or offerors owning other bidders or offerors.* No bid or proposal may be withdrawn under this section when the result would be the awarding of the contract on another bid or proposal of the same bidder or offeror or of another bidder or offeror in which the ownership of the withdrawing bidder or offeror is more than five (5) percent.

(4) *Lowest remaining bid.* If a bid is withdrawn under the authority of this section, the lowest remaining bid shall be deemed to be low.

(5) *Withdrawal precludes subcontracting.* No bidder or offeror who is permitted to withdraw shall, for compensation, supply any material or labor to or perform any subcontract or other work agreement for the person or firm to whom the contract is awarded or otherwise benefit, directly or indirectly, from the performance of the project for which the withdrawn bid or proposal was submitted.

(6) *Denial.* If the withdrawal is denied, the bidder or offeror shall be notified in writing of the denial and the reasons therefor.
(Ord. No. 33,095, § 1, 9-11-84; Ord. No. 43,223, § 1, 9-9-08)

Sec. 33.1-43. Cancellation of invitations for bids or requests for proposals; waiver of informalities; rejection of bids or proposals; determination of responsibility.

Any invitation for bids, request for proposals, or other solicitation may be canceled, or any or all bids or proposals may be rejected in whole or in part, when it is in the best interest of the city. The right to waive informalities in bids or proposals submitted is reserved to the city. The right to determine responsibility of all bidders or offerors is reserved to the city.
(Ord. No. 33,095, § 1, 9-11-84)

Sec. 33.1-44. Prequalification and bidders' list.

(1) Prospective contractors may be prequalified for particular types of supplies, services, insurance or construction, and consideration of bids or proposals limited to prequalified contractors. Any prequalification procedure shall be established in writing and sufficiently in advance of its implementation to allow potential contractors a fair opportunity to complete the process.

(2) Any prequalification of prospective contractors for construction by the city shall be pursuant to a prequalification process for construction projects adopted by the city. The process shall be consistent with the provisions of this section.

The application form used in such process shall set forth the criteria upon which the qualifications of prospective contractors will be evaluated. The application form shall request of prospective contractors only such information as is appropriate for an objective evaluation of all prospective contractors pursuant to such criteria. The form shall allow the prospective contractor seeking prequalification to request, by checking the appropriate box, that all information voluntarily submitted by the contractor pursu-

ant to this subsection shall be considered a trade secret or proprietary information subject to the provisions of subsection 33.1-9(5).

In all instances in which the city requires prequalification of potential contractors for construction projects, advance notice shall be given of the deadline for the submission of prequalification applications. The deadline for submission shall be sufficiently in advance of the date set for the submission of bids for such construction so as to allow the procedures set forth in this subsection to be accomplished.

At least thirty (30) days prior to the date established for submission of bids or proposals under the procurement of the contract for which the prequalification applies, the city shall advise in writing each contractor who submitted an application whether that contractor has been prequalified. In the event that a contractor is denied prequalification, the written notification to the contractor shall state the reasons for the denial of prequalification and the factual basis of such reasons.

A decision by the city denying prequalification under the provisions of this subsection shall be final and conclusive unless the contractor appeals the decision as provided in section 33.1-101.

(3) The city may deny prequalification to any contractor only if the city finds one of the following:

(a) The contractor does not have sufficient financial ability to perform the contract that would result from such procurement. If a bond is required to ensure performance of a contract, evidence that the contractor can acquire a surety bond from a corporation included on the United States Treasury list of acceptable surety corporations in the amount and type required by the city shall be sufficient to establish the financial ability of the contractor to perform the contract resulting from such procurement;

(b) The contractor does not have appropriate experience to perform the construction project in question;

(c) The contractor or any officer, director or owner thereof has had judgments entered against him within the past ten (10) years for the breach of contracts for governmental or nongovernmental construction, including, but not limited to, design-build or construction management;

(d) The contractor has been in substantial noncompliance with the terms and conditions of prior construction contracts with the city without good cause. If the city has not contracted with a contractor in any prior construction contracts, the city may deny prequalification if the contractor has been in substantial noncompliance with the terms and conditions of comparable construction contracts with another public body without good cause. The city may not utilize this provision to deny prequalification unless the facts underlying such substantial noncompliance were documented in writing in the prior construction project file and such information relating thereto given to the contractor at that time, with the opportunity to respond;

(e) The contractor or any officer, director, owner, project manager, procurement manager or chief financial official thereof has been convicted within the past ten (10) years of a crime related to governmental or nongovernmental construction or contracting, including, but not limited to, a violation of:

(i) Article 6 ([Code of Virginia,] § 2.2-4367 et seq.) of this chapter;

(ii) The Virginia Governmental Frauds Act (Code of Virginia, § 18.2-498.1 et seq.);

(iii) Chapter 4.2 (Code of Virginia, § 59.1-68.6 et seq.) of title 59.1; or

(iv) Any substantially similar law of the United States or another state;

(f) The contractor or any officer, director or owner thereof is currently debarred pursuant to an established debarment procedure

from bidding or contracting by any, agency of another state or agency of the federal government; and

(i) Submit a bid or proposal for that procurement or any portion thereof; or

(ii) Disclose to any bidder or offeror information concerning the procurement that is not available to the public. However, the city may permit such person to submit a bid or proposal for that procurement or any portion thereof if the city determines that the exclusion of the person would limit the number of potential qualified bidders or offerors in a manner contrary to the best interests of the city.

(Ord. No. 43,223, § 2, 9-9-08)

Sec. 33.1-92.2. Certification of compliance required; penalty for false statements

(a) Any bidder who, despite being the apparent low bidder, is determined not to be a responsible bidder for a particular contract shall be notified in writing. Such notice shall state the basis for the determination, which shall be final

unless the bidder appeals the decision within ten days by instituting legal action as provided in section 33.1-106 of the Code.

(b) If, upon appeal, it is determined that the decision of the city was arbitrary or capricious, and the award of the contract in question has not been made, the sole relief shall be a finding that the bidder is a responsible bidder for the contract in question. (c) A bidder contesting a determination that he is not a responsible bidder for a particular contract shall proceed under this section, and may not protest the award or proposed award under section 33.1-104 of the Code.

ARTICLE IX. PUBLIC-PRIVATE PARTNERSHIPS*

Sec. 33.1-110. Purpose.

(a) *Purpose and definitions.* This article enacts the guidelines that the City of Norfolk, Virginia, ("city") shall follow in implementing the Public-Private Education Facilities and Infrastructure Act of 2002, § 56-575.1 et seq. of the Code of Virginia, 1950, as amended (PPEA). Pursuant to the PPEA, this article allows the city to create public-private partnerships for the development of projects for public use if the city determines that there is a need for a project and that private involvement may provide the project in a timely and cost-effective fashion. In order for a project to come under the PPEA, it must meet the definition of a "qualifying project" as defined within the PPEA. Individually negotiated interim and comprehensive agreements will define the respective rights and obligations of the city and the private party in any project approved pursuant to this article.

The terms used in this article shall have the meanings ascribed to them by the PPEA at § 56-575.1 of the Code of Virginia, 1950, as amended, or by section 33.1-20 of the Code of the City of Norfolk, 1979, as amended, unless the context clearly indicates a different meaning. "Business days" means Monday through Friday excluding city holidays. "Calendar days" means any day of the week including holidays.
(Ord. No. 45,063, § 1, 4-9-13)

Sec. 33.1-111. General provisions.

(a) *Proposal submission.*

(1) A proposal may be either solicited by the city ("solicited proposal") or delivered to the city by a private entity on an unsolicited basis ("unsolicited proposal"). Offeror's shall follow a two-part proposal submission process consisting of an initial conceptual phase and then a detailed phase. The conceptual phase of the proposal shall contain specified information on the offeror's qualifications and experience, project characteristics, project financing, anticipated public support or opposition, or both, project benefit and compatibility and any other matters the city requests. The detailed phase of a proposal shall contain specified deliverables. Any proposal submitted pursuant to this policy shall be clearly identified as a PPEA proposal.

(2) Any unsolicited proposal shall be submitted to the city by delivering six (6) complete copies, together with the required initial review fee as provided below, to the city manager or his designee. The city manager shall establish a committee to review and evaluate all solicited or unsolicited proposals and make recommendations to the city council concerning them. The city may require any proposal to be clarified in any manner, including but not limited to, requiring the submission of additional documentation, responses to specific written questions and interviews with the offeror and any potential project participants.

(3) In addition to describing the project, conceptual proposals should provide a description of the proposer's capabilities to complete the proposed qualifying project and the benefits to be derived from the qualifying project. Conceptual proposals should also include a scope of work and a financial plan for the project, which must contain enough detail to allow an analysis by the city of the financial feasibility of the proposed project. The cost analysis of a proposal should not be linked solely to the financing plan, as the city may determine to finance the project through other available means. The specific requirements for any solicited proposal shall be identified in the city's request for proposals ("RFP").

(b) *Affected jurisdictions.*

(1) Any private entity requesting approval from or submitting a conceptual or de-

*__Editor's note—__Ord. No. 45,063, § 1, adopted April 9, 2013, amended Art. IX in its entirety to read as herein set out. Former Art. IX, §§ 33.1-110—33.1-117, pertained to similar subject matter, and derived from Ord. No. 42,265, § 1, adopted May 9, 2006.

tailed proposal to the city must provide any other affected jurisdictions with a copy of the proposal by certified mail, express delivery or hand-delivery within five (5) business days of its submission of the proposal to the city. Such affected jurisdiction shall have sixty (60) calendar days from the date of receipt to submit written comments to the city indicating whether the proposed qualifying project is compatible with the (a) city's comprehensive plan, (b) city's infrastructure development plans or (c) city's capital improvements, city's budget or other government spending plan. The city will consider comments received within the deadline; however, no negative inference will be drawn from the absence of comment by an affected jurisdiction. Still, the city may begin or continue its evaluation of any such proposal during the 60-day period for receipt of comments from affected jurisdictions.

(2) The city may engage the services of qualified professionals, including but not limited to, an architect, professional engineer or certified public accountant not otherwise employed by the city, to provide independent analysis.

(c) *Freedom of Information Act.*

(1) General applicability of disclosure provisions. Proposal documents submitted by private entities are generally subject to the Virginia Freedom of Information Act ("FOIA") except that subdivision 11 of § 2.2-3705.6 of the Code of Virginia, 1950, as amended, exempts certain documents from public disclosure. FOIA exemptions, however, are discretionary, and the city may elect to release some or all of the proposal documents except to the extent the documents are:

a. Trade secrets of the private entity as defined in the Uniform Trade Secrets Act § 59.1-336 et seq. of the Code of Virginia, 1950, as amended.

b. Financial records of the private entity that are not generally available to the public through regulatory disclosure or otherwise, including but not limited to, balance sheets and financial statements; or

c. Other information submitted by a private entity, where, if the record or document were made public prior to the execution of an interim or comprehensive agreement, the financial interest or bargaining position of the public or the private entity would be adversely affected.

Additionally, the city shall comply with the provisions of any court order compelling access or protecting from disclosure any proposal documents submitted by private entities.

(2) Protection from mandatory disclosure for certain documents submitted by a private entity.

a. Any confidential and proprietary information provided to the city pursuant to this article shall be subject to disclosure under FOIA except as provided by § 56-575.4 G of the Code of Virginia, 1950, as amended.

b. Before documents of a private entity may be withheld from disclosure, the private entity shall first make a written request for their withholding to the city. The private entity shall submit the request at the same time the documents are submitted and designate with specificity the documents for which the protection is being sought. The private entity shall also provide in its submission a clear statement of the reasons for invoking the protection with reference to one or more of the three classes of records listed in this article. A private entity may request and receive a determination from the city as to the anticipated scope of protection before submitting a proposal.

c. Upon the receipt of a written request for protection of documents, the city will determine, with the advice of

the city attorney, whether the documents contain (i) trade secrets, (ii) financial records, or (iii) other information that would adversely affect the financial interest or bargaining position of the city or the private entity in accordance with this article. The city attorney shall make a written determination of the nature and scope of the protection to be afforded by the city. If the written determination provides less protection than requested by the private entity, the private entity will be accorded a reasonable opportunity to clarify and justify its request and re-submit it. If thereafter the city attorney's final determination is to afford less protection than requested, the private entity will be given a chance to withdraw its proposal. Nothing shall prohibit further negotiations of the documents to be accorded protection from release, although what may be protected must be limited to the categories of records identified within this article.

d. Once the city attorney has made a final written determination, the protected documents shall continue to be protected from disclosure while in the possession of the city or any affected local jurisdiction. Any documents afforded such protection shall continue to be protected from disclosure when in the possession of the city or any affected jurisdiction to which such documents are provided.

e. If a private entity fails to designate trade secrets, financial records, or other confidential or proprietary information for protection from disclosure, such information, records or documents shall be subject to disclosure under FOIA.

(3) Protection from mandatory disclosure for certain documents produced by the city. The council may withhold from disclosure memoranda, staff evaluations, or other records prepared by the city, its staff, outside advisors, or consultants exclusively for the evaluation and negotiation of proposals: (a) if such records were made public prior to or after the execution of an interim or a comprehensive agreement, the financial interest or bargaining position of the council would be adversely affected, and (b) the basis for the determination required in clause (a) is documented in writing by the city.

Cost estimates relating to a proposed procurement transaction prepared by or for the city shall not be open to public inspection.

(4) The city may not withhold from public access:

a. Procurement records other than those subject to the written determination of the city;

b. Information concerning the terms and conditions of any interim or comprehensive agreement, service contract, lease, partnership, or any agreement of any kind entered into by the city and the private entity;

c. Information concerning the terms and conditions of any financing arrangement that involves the use of any public funds; or

d. Information concerning the performance of any private entity developing or operating a qualifying project.

However, to the extent that access to any procurement record or other document or information is compelled or protected by a court order, the city must comply with such order.

(d) *Use of public funds.* Virginia constitutional and statutory requirements as they apply to appropriation and expenditure of public funds apply to any interim or comprehensive agreement entered into under the PPEA and pursuant to this article. Accordingly, the processes and procedural requirements associated with the expenditure or

obligation of public funds shall be incorporated into planning for any project done pursuant to this article.

(e) *Applicability of other laws.* Nothing in this article shall affect the duty of the city to comply with all other applicable laws not in conflict with this article. The applicability of the Virginia Public Procurement Act (the "VPPA"), § 2.2-4300 et seq. of the Code of Virginia, 1950, as amended, is as set forth in the PPEA.
(Ord. No. 45,063, § 1, 4-9-13)

Sec. 33.1-112. Solicited proposals.

(a) The city may issue a request for proposals (RFP) inviting proposals from private entities to develop or operate qualifying projects pursuant to this article. The city will use a two-part proposal process consisting of an initial conceptual phase and a detailed phase. In such solicitations the city will set forth in the RFP the format and supporting information that the city requires to be submitted, consistent with the provisions of the PPEA and this article. The city may also establish suggested timelines for the review and selection of solicited proposals. The city reserves the right, at any time, to cancel any solicitation or to reject any solicited PPEA proposal, in the city's sole discretion. Furthermore, the city reserves the right to solicit proposals under this article after receiving an unsolicited proposal; in the event the city so elects, the provisions applying to soliciting proposals shall govern.

(b) The RFP will specify any information and documents required by the city as well as the factors the city will use in evaluating any submitted proposals. The RFP will be posted in such public areas as are normally used for posting of the city notices, including but not limited to the city's website. Notices will also be published in a newspaper of general circulation in the city and the Hampton Roads area, advertised in Virginia Business Opportunities and posted on the commonwealth's electronic procurement website. In addition, solicited proposals will be posted pursuant to this article. The RFP will also contain or incorporate by reference other applicable terms and conditions, including any unique capabilities or qualifications that will be required of private entities submitting proposals. Pre-proposal conferences will be held as deemed appropriate by the city. Any proposal not submitted in response to a RFP issued pursuant to this article shall be an unsolicited proposal.
(Ord. No. 45,063, § 1, 4-9-13)

Sec. 33.1-113. Unsolicited proposals.

The city may, pursuant to the PPEA and this article, publicize its needs and encourage interested parties to submit unsolicited proposals. When a proposal is received without the prior issuance of an official RFP, the proposal is an unsolicited proposal. The city will establish timelines for the review and selection of unsolicited proposals. Unsolicited proposals shall be submitted to the city manager or his/her designee.

(a) *Decision to accept and consider unsolicited proposal; notice.*

(1) The city reserves the right to reject any unsolicited proposals at any time, in its sole discretion.

(2) Upon receipt of any unsolicited proposal or group of proposals and payment of the required fee, the city will initially determine whether to accept the unsolicited proposal for the purpose of publication and conceptual-phase consideration, as described below. If the city determines not to accept an unsolicited proposal, it will return the proposal, together with any fees not expended in initially considering the proposal and accompanying documentation, to the private entity.

(3) If the city chooses to accept an unsolicited proposal for publication and conceptual-phase consideration, it will give public notice in accordance with the PPEA and this article and specify a period of time not less than forty-five (45) days during which it will receive competing unsolicited proposals pursuant to § 56-575.4 of the Code of Virginia, 1950, as amended and this article. The city will publish notice during this period in one or

more newspapers or periodicals of general circulation within the city and the Hampton Roads area to notify other parties that may be interested in submitting competing unsolicited proposals. In addition, the notice will be advertised in Virginia Business Opportunities and on the Commonwealth's electronic procurement website. The notice shall state that the city (a) has received an unsolicited proposal under the PPEA, (b) intends to evaluate the proposal, (c) may negotiate an interim or comprehensive agreement with the proposer based on the proposal, and (d) will receive for simultaneous consideration any competing unsolicited proposals that comply with the PPEA and this article. The notice will also summarize the proposed qualifying project, and identify its proposed locations.

(4) To ensure that sufficient information is available upon which to base the development of a serious competing unsolicited proposal, representatives of the city familiar with the initial unsolicited proposal and this article will be available to respond to inquiries and meet with private entities that are considering the submission of competing unsolicited proposals. The city will conduct an analysis of the information pertaining to the unsolicited proposal included in the notice to ensure that such information sufficiently encourages competing unsolicited proposals. The city will also establish criteria, including but not limited to, key decision points and approvals, to ensure proper consideration of the extent of competition from available private entities prior to selection. Copies of the unsolicited proposals will be available upon request, subject to the provisions of FOIA and § 56-575.4 G of the Code of Virginia, 1950, as amended.

(5) Before the city posts notice and proceeds, the initial proposer shall pay the balance due, if any, of the required review fee.

(b) *Proposal posting requirements.*

(1) Conceptual proposals, whether solicited or unsolicited, shall be posted by the city within ten (10) business days after acceptance of such proposals in the following manner:

a. The city will post the proposal or a summary thereof on its website and by publication, in a newspaper of general circulation in the city and the Hampton Roads area. The city may also post the proposal on the department of general service's web-based electronic procurement program commonly known as "eVA," in the discretion of the city.

b. The posting will include, either (i) a copy of the proposal, except for items afforded protection pursuant to this article, or (ii) a summary of the proposal and the location(s) where copies of it are available for public inspection. At least one copy of the proposal(s) shall be made available for public inspection.

(2) Nothing within this article shall be construed to prohibit the posting of any conceptual proposals by additional means deemed appropriate by the city so as to provide maximum notice to the public of the opportunity to inspect any proposals.

(3) Trade secrets, financial records, or other records of the private entity excluded from disclosure under the provisions of subdivision 11 of § 2.2-3705.6 of the Code of Virginia, 1950, as amended, or this article need not be posted, except as otherwise agreed to by the city and the private entity. The city will impose reasonable re-

strictions upon the inspection of any procurement transaction records to ensure the security and integrity of the records.

(c) *Proposal review fee.*

(1) The city will charge a fee to any private entity to cover the costs of processing, reviewing, and evaluating any unsolicited proposal or competing unsolicited proposal submitted, including the costs of attorneys, outside consultants, and financial advisors. Except as otherwise provided in the RFP of a solicited proposal, no fee will be charged to process, review or evaluate solicited proposals.

(2) For unsolicited proposals and competing unsolicited proposals, the city shall impose review fees based on the reasonably anticipated costs to the city in accordance with the following schedule:

a. The payment of an initial fee must accompany the submission of an unsolicited proposal to the city before it will proceed with its initial review. This fee shall be one thousand dollars ($1,000.00).

b. The city will impose additional fees throughout the processing, review and evaluation of the unsolicited proposal if and as the city reasonably anticipates incurring costs in excess of the initial fee. The city will notify the private entity of such additional fees as and when it anticipates incurring such costs, and the city's further continuance of the review process will be conditioned upon prompt payment of any additional fees required.

(d) *Review by the city at the conceptual stage.*

(1) Only unsolicited proposals fully complying with the requirements of this article and the PPEA that contain sufficient information for a meaningful evaluation and that are provided in the required format will be considered by the city for publication and further review at the conceptual stage.

(2) The city will determine in writing before commencing the conceptual stage of review whether it will proceed using (a) standard procurement procedures consistent with the VPPA and its procurement ordinance, or (b) procedures under this article. However, the city may proceed to the conceptual phase under this article only if it first makes a written determination with the advice of the city attorney that doing so is likely to be advantageous to the city and the public based upon either: the probable scope, complexity or priority of need; the risk sharing, including but not limited to, guaranteed cost or completion guarantees, added value or debt, or equity investments proposed by the private entity; or the increase in funding, dedicated revenue or other economic benefit that would otherwise not be available.

(3) After reviewing the original unsolicited proposal and any competing proposals submitted during the notice period, the city will determine either: (a) not to proceed further with any proposal; (b) to proceed to the detailed phase of review with the original proposal; (c) to proceed to the detailed phase with a competing proposal; (d) to proceed to the detailed phase with multiple proposals; or (e) to request modifications or amendments to any proposals and postpone the final decision under this subsection. The decision to proceed to the detailed phase on a conceptual proposal shall not commit the city to going forward with the proposal, and the city reserves the right, at its sole discretion, to reject

a proposal after entering the detailed phase of its review. If the city proceeds with more than one proposal into the detailed stage, the city may, as its sole discretion, choose to reimburse the unsuccessful proposer for costs incurred in the detailed phase of review, and charge such costs to the successful proposer in the interim or comprehensive agreement.

(4) Discussions between the city and any private entity about the need for infrastructure improvements shall not limit the ability of the city to choose to use standard procurement procedures to meet its infrastructure needs. The city retains the right to reject any proposal at any time prior to the city's approval of and the city's execution of an interim or comprehensive agreement.

(Ord. No. 45,063, § 1, 4-9-13)

Sec. 33.1-114. Proposal preparation and submission.

d. Identify all anticipated risk factors and methods for dealing with them.

e. Identify any local, city, state, or federal resources that the proposer contemplates requesting for the project. Describe the total commitment, if any, expected from government sources (and identify each source), and the timing of any anticipated commitment. Such disclosure shall include any direct or indirect guarantees or pledges of the city's credit or revenue.

f. Identify the amounts and the terms and conditions for any revenue sources.

(13) Other requirements of the PPEA or other applicable law; and

(14) Such other terms and conditions as the city may deem appropriate.

Sec. 36.1-2. Factors for establishing residential rental dwelling unit inspection districts.

This chapter may be referred to as the "rental inspection ordinance."
(Ord. No. 42,921, § 1, 12-4-07)

(b) Failure of an owner of a residential rental dwelling unit subject to a residential rental inspection to comply with the above-written notification requirement in subsection (a) will result in a civil penalty of fifty dollars ($50.00) for every thirty-day period of failure to give notice. However, there shall be no penalty for the failure of an owner of a residential rental dwelling unit to comply with the written notification provision, unless and until the codes compliance office pro-

vides personal or written notice to the property owner. For purposes of this section, notice sent by regular first class mail to the last known address of the owner as shown on the current real estate tax assessment books or current real estate tax assessment records shall be deemed to comply with this requirement.

(c) Within thirty (30) days of giving the notification required under subsection (a), the owner of the residential rental dwelling unit shall contact the codes compliance office and arrange for an initial inspection.

Upon the establishment of a rental inspection district, the codes compliance office may, in conjunction with the written notifications as provided in section 36.1-4, proceed to inspect dwelling units in the designated residential rental dwelling unit inspection district to determine if a dwelling unit is being used as residential rental property and to determine compliance with the provisions of the building code that affect the safe, decent and sanitary living conditions for the tenants of such property.
(Ord. No. 42,921, § 1, 12-4-07)

Sec. 36.1-6. Provisions for initial and periodic inspections of multiple-family complex.

However, in no event shall the codes compliance office charge a fee authorized by this chapter for the inspection of more than ten dwelling units. If the codes compliance office determines upon inspection of the sampling of dwelling units that there are violations of the building code that affect the safe, decent and sanitary living conditions for the tenants of such multiple family complex, the codes compliance office may inspect as many dwelling units as necessary to enforce the building code. In the latter case, the fee shall be based upon a charge per dwelling unit inspected.

In the event that a violation of the building code

affecting the safe, decent and sanitary living conditions is found to exist, an exemption will not be granted. The owner shall be provided with a written notice listing all violations and the period of time required to bring the property into compliance. A residential rental dwelling unit shall be subject to periodic inspections until such time as a periodic inspection reveals no violations of the building code and an exemption is granted.

(b) The codes compliance office may perform a periodic inspection subsequent to a sale of the residential rental dwelling unit.

(c) If a residential rental dwelling unit was issued a certificate of occupancy prior to July 1, 2005, the codes compliance office shall grant an exemption for a minimum period of four years from the date of the issuance of the certificate of occupancy.

(Ord. No. 42,921, § 1, 12-4-07)

Sec. 36.1-14. Violations.

Except as otherwise provided in this chapter, the penalty for a violation of this chapter shall be as set forth in Code of Virginia, § 36-106, as amended.

Sec. 37-2. Definitions.

Generally. As used in this chapter, certain words and phrases shall have the meanings ascribed to them by this section, unless a different meaning is plainly required by the context, the provisions of this chapter, or other applicable law. These terms are defined as follows:

(2) *Accumulated contributions* means the sum of all the amounts credited to a member's individual account in the annuity savings account, together with regular interest thereon, as provided in subsections (a) and (b) of section 37-103.

(3) *Actuarial equivalent* means a benefit of equal value when computed at regular interest on the basis of the tables last adopted by the board.

(4) *Annuity* means annual retirement payments derived from the accumulated contributions of a member and payable to him for life, with the proviso that if he dies before he has received, in payments of annuity, the amount of his accumulated contributions at retirement, the balance of such amount shall be paid to such person, if any, as he shall have nominated by written designation duly acknowledged and filed with the board, otherwise to his estate.

(5) *Annuity reserve* means the present value of all payments to be made on account of annuity or benefit in lieu of an annuity, computed at regular interest on the basis of the tables last adopted by the board.

(6) *Average final compensation* means the average annual earnable compensation of a member for the three (3) years of creditable service during which his earnable compensation was highest or, if he has had less than three (3) years of creditable service, then his average annual earnable compensation during his total years of creditable service for persons who became members of the system on or before June 30, 2018.

Average final compensation means the average earnable compensation of a member for the sixty (60) consecutive months of creditable service during which his earnable compensation was highest or, if he has had less than sixty (60) months of creditable service, then his average earnable compensation during his total creditable service, for persons who became members of the system on or after July 1, 2018.

(a) *New employees in the offices of clerk of the circuit court and commonwealth's attorney and certain other officers.* Notwithstanding any other provision of this chapter, on and after July 31, 1980, no employees of the offices of the clerk of the circuit court or commonwealth's attorney, nor any new commissioner of the revenue, city treasurer, city sheriff, judge of a general district court or commonwealth's attorney shall be members of the employees retirement system of the city, unless such person was an employee in the offices of the clerk of the circuit court or commonwealth's attorney, or was the commissioner of the revenue, city treasurer, city sheriff, general district court judge or commonwealth's attorney and a member of the retirement system on July 31, 1980. ARTICLE III. CREDITABLE SERVICE

Sec. 37-41. What constitutes.

Creditable service at retirement on which the retirement allowance of a member shall be based shall consist of their membership service credit, and also, if the member has a prior service certificate which is in full force and effect, the amount of the service certified on their prior service certificate. In addition to the foregoing, and notwithstanding any applicable cap on the creditable service or retirement allowance of the member set forth in section 37-61(c) or (d), each member shall receive as creditable service one hundred (100) percent of the accumulated unused sick leave at the time of their retirement; provided, however, that in the case of firefighters, each shall receive, as creditable service, one hundred (100) percent of forty-six (46) percent of the unused sick leave accumulated prior to July 1, 1985, and one hundred (100) percent of unused sick leave accumulated on and after July 1, 1985, at the time of retirement. Except for firefighters the foregoing percentages shall be computed on a twenty-two (22) work-day month.
(Code 1958, § 40-4; Ord. No. 31,807, § 1, 6-29-82; Ord. No. 33,566, § 4, 7-16-85; Ord. No. 34,519, § 1, 6-2-87; Ord. No. 34,538, § 1, 6-16-87; Ord. No. 48,436, § 5, 7-13-21)

Sec. 37-42. Membership service.

Each member shall receive membership service credit for all service rendered while a member of the system since he became a member, or since he last became a member in the event of a break in his membership.
(Code 1958, § 40-4)

Sec. 37-43. Prior service.

(a) Each employee in service on January 1, 1942, who becomes a member within one year thereafter, shall file a detailed statement of all service as an employee rendered by him prior to such date for which he claims credit, and of such other facts as the board may require for the proper operation of the system. The board shall fix and determine, by appropriate rules and regulations, how much service in any year is equivalent to a year of service, but in no case shall more than one year of service be creditable for all service in one calendar year, nor shall the board allow credit as service for any period of more than one month's duration during which the employee was absent without pay.

(b) The board shall verify, as soon as practicable after the filing of such statement of service, the service therein claimed, and shall issue prior service certificates certifying to each member the number of years of prior service with which he is credited; provided, that in no event shall prior service credit be allowed in excess of the maximum number of years of such credit determined pursuant to the provisions of this chapter in effect as of January 1, 1942; provided, further, that for the purpose of determining such maximum prior service credit, his retirement allowance on account of membership service shall be computed as

exactly one-seventieth of his average final compensation, multiplied by the number of years from January 1, 1942, to the attainment of his normal service retirement age.

(c) As long as membership continues, a prior service certificate shall be final and conclusive for retirement purposes as to such prior service credit; provided, however, that any member may, within one year after the date of issuance or modification of such certificate, request the board to modify or correct his prior service certificate.

(d) When membership ceases, a prior service certificate shall become void, and should the employee again become a member, he shall enter the system as an employee not entitled to prior service credit.

(e) Any current full-time employee who had a period or periods of full-time employment with the city under a program which did not include creditable service in the city's retirement system shall be permitted, upon being credited with five (5) years of creditable service or upon attaining his normal service retirement age to purchase membership service credit for such period or periods of employment.

Any full-time employee who had a period or periods of active duty service in the armed forces of the United States, not recognized as creditable service under section 37-44, shall be permitted, upon being credited with five (5) years of creditable service or upon attaining his normal service retirement age as defined in section 37-61(a), to purchase membership service credit for such period or periods of service in the armed forces to a maximum of four (4) years of credit.

Such membership-service credit shall be purchased in accordance with rules and procedures adopted by the board that may include authorizing such service purchase on a pretax basis in accordance with section 414(h)(2) of the Internal Revenue Code, as amended. The purchased service credit amount that must be contributed by the member is the amount determined using actuarial factors and methods adopted from time to time by the board that is equal to the cost to the system of crediting to the member the years of membership service credit to be credited under this section. Any member electing to purchase such credit through payroll deduction shall enter into an annual irrevocable salary reduction agreement with the system and the city by which the elected purchased service credit amount shall be withheld from the compensation otherwise payable to the member by the city and contributed to the system. Such contributions, although designated as employee contributions, will be considered paid by the employer in lieu of contributions by the employee in order to be considered "picked up" by the employer for purposes of section 414(h)(2) of the Internal Revenue Code, as amended. The employee will not be given the option of choosing to receive the contributed amounts directly instead of having them paid by the employer to the employees' retirement system. If a member making contributions by salary reduction agreement terminates employment, dies or retires before all agreed contributions have been made, the lost service credited to the member shall be proportionately reduced. The purchased service credit amount that must be contributed by the member is the amount determined using actuarial factors and methods adopted from time to time by the board that is equal to the cost to the system of crediting to the member the years of membership service credit to be credited under this section.

In no event shall the combination of purchased service credit and creditable service exceed thirty-five (35) years in total for general employees nor exceed sixty-five (65) percent of average final compensation for police officers and firefighters.

(f) An employee of the city or a constitutional officer or an employee of a constitutional officer who during previous employment with the city or as a constitutional officer or as an employee of a constitutional officer was a member of the city's retirement system and earned at least five (5) years of creditable service prior to January 1, 1997, shall, upon re-employment as a city employee or as a constitutional officer or as an employee of a constitutional officer, be deemed to have vested in the city's retirement system.
(Code 1958, § 40-4; Ord. No. 40,381, § 2, 6-19-01; Ord. No. 41,441, § 1, 6-8-04; Ord. No. 42,606, § 1, 3-20-07)

Sec. 37-44. Military service.

(a) Any employee who, while in the active service of the city, entered in any way, or was called to active duty in, the armed forces of the United States at any time after January 1, 1940, and prior to January 1, 1942, and was serving in such armed forces on January 1, 1942, who becomes an employee and a member of the system after January 1, 1942, shall be entitled to credit for prior service for the service rendered by him as such employee prior to his entering, or being called to active duty in, said armed forces; provided, he becomes such employee and a member of the system within six (6) months after his discharge or release from activity duty in said armed forces. Notwithstanding any provision of this chapter to the contrary, contributions, benefits and service credits with respect to qualified military service will be as provided in accordance with section 414(u) of the Internal Revenue Code and other applicable laws and as amended. In no event shall the time period for returning to the service of the city be less than ninety (90) days following discharge from active duty in the armed forces or after release from hospitalization continuing after discharge.

(b) To the extent required by section 401(a)(37) of the Internal Revenue Code of 1986, as amended, for purposes of determining vesting in a service allowance and entitlement to death benefits under this chapter, in the event a member ceases to be in the active service of the city in order to perform qualified military service and dies on or after January 1, 2007, while performing qualified military service, the member's death shall be considered to have occurred while he was in the active service of the city so that his beneficiaries are entitled to any additional benefits provided under this chapter (other than benefit accruals relating to the period of qualified military service unless otherwise expressly provided), including, without limitation, any additional or enhanced vesting or death benefits which would have been paid had the member resumed active service with the city and then terminated employment on account of death.
(Code 1958, § 40-4; Ord. No. 39,711, § 2, 8-24-99; Ord. No. 44,614, § 1, 3-27-12)

Sec. 37-45. Restoration of creditable service upon re-enrollment after service terminated.

(a) Subject to the following requirements, a member whose service with the city was terminated for any reason other than retirement under the provisions of this chapter shall be re-enrolled as a member upon their re-enrollment as an employee. After being credited with five (5) years of creditable service in the system or upon attaining his normal service retirement age as defined in subsection 37-61(a), the creditable service of such member, as of the date of his last termination of service, shall be restored to him; provided, that if he did not have five (5) or more years of creditable service at the time of said termination, only the creditable service rendered during his continuous employment with the city immediately prior to such termination shall be restored to him; and further provided that, if he elected to withdraw his contributions with interest thereon, no creditable service shall be restored to him unless he repays, in a lump sum not later than the date of his retirement, subject to such conditions as the board may prescribe, the amount withdrawn as contributions. If such contributions are repaid no later than the last day of the calendar month coincident with or next following the expiration of three (3) months from September 30, 1975, or the date of his re-enrollment, whichever is later, such contributions shall be paid to the member in accordance with the provisions of this chapter.

(b) The provisions of this section shall not apply to former members hired or rehired on or after January 1, 2022.
(Code 1958, § 40-14; Ord. No. 38,388, § 1, 5-21-96; Ord. No. 44,001, § 2, 10-5-10; Ord. No. 48,436, § 6, 7-13-21)

Sec. 37-46. Portability of service between the system, certain political subdivisions of the commonwealth and the Virginia Retirement System.

(a) The system shall endeavor to enter into agreements (portability agreements) with the Virginia Retirement System and any political

subdivisions of the commonwealth which has a defined benefit plan that is not supplemental to the Virginia Retirement System ("independent plan") permitting vested members to purchase service credit in each other's systems (portability).

(b) The portability agreements shall be in accordance with Code of Virginia §§ 51.1-801.1 and 51.1-143.1, and before the system enters into any such portability agreements, it shall be approved as to form and correctness by the city attorney, be approved for contents by the city manager, and approved by city council.

(c) In the implementation of this section, the city manager shall have the authority and responsibility to render such assistance as the system requires.

(d) During the period of January 1, 2022 through December 31, 2022, members may elect to become members of the Virginia Retirement System. Members who elect to join VRS during this period may elect to convert one hundred (100) percent of their creditable service to service credit in the Virginia Retirement System on such terms and conditions as the Virginia Retirement System may prescribe.
(Ord. No. 38,900, § 1, 9-23-97; Ord. No. 48,436, § 7, 7-13-21)

Sec. 37-47. Purchase of service.

(a) A member who, prior to participating in the system, was a vested member of the Virginia Retirement System or of a public retirement system sponsored by a political subdivision of the commonwealth with which the system has entered into a portability agreement in accordance with the provisions of section 37-46 providing for the transfer of assets from such other system to the system and who has elected to have assets transferred from such other system to the system and who as a result of the transfer has received additional years of creditable service under the system, may elect within the eighteen-month period after being credited with five (5) years of creditable service in the system or upon attaining his normal service retirement age as defined in subsection 37-61(a), to contribute to the system all or a portion of the member's purchased service credit amount to a maximum of four (4) years of credit. A member who makes such election is referred to herein as an electing member. The purchased service credit amount is the amount determined using actuarial factors adopted from time to time by the board that is equal to the cost to the member the difference between the years of creditable service earned by the member in the Virginia Retirement System or such other public retirement system and the years of creditable service credited to the member under the system as a result of the asset transfer from such other system with such service being referred to herein as lost service. A member who contributes all or a portion of the purchased service credit amount in accordance with paragraph (b) shall have such lost service recognized by the system as creditable service. In no event shall the combination of purchased service credit and creditable service exceed thirty-five (35) years in total for general employees nor exceed sixty-five (65) percent of average final compensation for policemen, firemen and paramedic employees.

(b) An electing member who elects to contribute less than the full amount of the purchased service credit amount will receive the same portion of lost services as his elected contribution bears to the full purchased service credit amount. An electing member shall contribute his elected purchased service credit amount either (i) by making a single-sum contribution to the system that is an "eligible rollover distribution" within the meaning of section 402 of the Internal Revenue Code, as amended, or (ii) by entering into a salary reduction agreement with the system and the city in accordance with section 414(h)(2) of the Internal Revenue Code, as amended. Any member electing to purchase such credit through payroll deduction shall enter into an annual irrevocable salary reduction agreement with the system and the city by which the elected purchased service credit amount plus regular interest shall be withheld from the compensation otherwise payable to the member by the city and contributed to the system. Such contributions, although designated as employee contributions, will be considered paid by the employer in lieu of contributions by the employee

in order to be considered "picked up" by the employer for purposes of section 414(h)(2) of the Internal Revenue Code, as amended. The employee will not be given the option of choosing to receive the contributed amounts directly instead of having them paid by the employer to the employees' retirement system. Such salary reduction agreement shall provide for minimum payments of not less than fifty dollars ($50.00) per payroll period. If a member making contributions by a salary reduction agreement terminates employment, dies or retires before all agreed contributions have been made, the lost service credited to the member shall be proportionately reduced.

(c) The board shall adopt for the system such rules and procedures as it deems appropriate to provide for the administration of this section.

For persons who became members of the system on or after July 1, 2018, the normal service retirement age shall be the retirement age as defined under the Social Security Act (42 U.S.C § 416 et seq. and as amended) with at least five (5) years of creditable service or the age at which the sum of creditable service years and age equals ninety (90) for general employees and the normal service retirement age shall be sixty (60) years with at least five (5) years of creditable service or age fifty (50) years with twenty-five (25) years of creditable service having been completed, whichever occurs first, for policemen, firemen and paramedic employees (for the purpose of this section 37-61, paramedic employee shall mean any member of the division of paramedical services of the department of fire and paramedical services whose primary and usual duties routinely involve the rendering of emergency medical care).

Any member in service who has attained his normal service retirement age shall be retired by the board on a normal service retirement allowance, upon his written application setting forth at what time, not less than thirty (30) nor more than ninety (90) days next following the execution and filing thereof, he desires to be retired, notwithstanding that during such period of notification he may have separated from service.

(b) Any member in service who has attained age sixty-five 65), if he is a policeman or fireman, shall be retired forthwith by the board on a service retirement allowance. The provisions of this section shall not apply to the chief of police as defined at Charter section 60 and City Code section 33-22 or to the chief of fire rescue as defined at Charter section 62 and City Code section 17.1-2.

The normal service retirement allowance of a general employee who became a member of the system subsequent to June 30, 1980, shall consist of a pension equal to 1.75 percent of his average final compensation, multiplied by the number of years of creditable service up to a maximum of thirty-five (35) years of creditable service (i.e., thirty-five (35) years serves as a cap on the amount of normal service retirement allowance).

(d) The normal service retirement allowance of a policeman, fireman or paramedic employee shall consist of a pension equal to 2.5 percent of his average final compensation multiplied by the number of years of creditable service up to a maximum of sixty-five (65) percent of average final compensation.

(f) The board may, on its own motion, pay a retirement benefit to a former member not in service, if such member was otherwise entitled to a retirement benefit at the time he separated from service and was not in a disciplinary status or under suspension at that time. Such benefit to be effective on the first of the month following the member's removal from the payroll.

(g)—(k) Reserved.

(l) On or after January 1, 1997, permanent part-time employees shall be members of the system. Upon the completion of five (5) years of creditable service as defined by this paragraph, such members shall be entitled to benefits of the system based on creditable service earned and compensation in proportion to which their annual hours bear to the compensation of full-time employees.

(1) Creditable service for permanent part-time employees shall be a fraction of one year of service, the numerator of which is the number of hours scheduled for the permanent part-time employees for the year and the denominator of which is the number of hours scheduled for a full-time employee for the year. Creditable service earned by permanent part-time employees shall be calculated in this manner on an annual basis or at the time they cease to be a member of the system to determine whether the employee has earned five (5) years of creditable service necessary to receive a benefit upon retirement.

Earnable compensation for each full calendar year of permanent part-time employment shall be the annualized base compensation of the permanent part-time employee determined by multiplying such employee's rate of pay by the number of hours scheduled for a full-time employee for the year. Average final compensation for permanent part-time employees shall be determined in the manner set forth in Section 37-2.

(2) Any employee who transfers from full-time to permanent part-time status; transfers from permanent part-time to full-time status; or retires while in permanent part-time status, shall receive membership service as determined in paragraph (1) for any period of permanent part-time employment.

(3) All other provisions of this chapter applicable to general employees who became members on or after January 1, 1997, and not inconsistent with this subparagraph (1), shall apply to permanent part-time employees who became members of the system on or after January 1, 1997.

(m) Any member serving on the council of the City of Norfolk on July 1, 1995, but not serving on July 1, 2001, shall maintain the normal service retirement allowance for their creditable service which was in effect at the time of their retirement from the council of the City of Norfolk.

(n) For persons serving on the council of the City of Norfolk who became members of the system on or before June 30, 2018, the normal service retirement age shall be fifty-five (55) years with at least five (5) years of creditable service or the age at which twenty-five (25) years of creditable service has been completed, whichever occurs first. For persons serving on the council of the City of Norfolk who became members of the system on or after July 1, 2018, the normal service retirement age shall be sixty

(60) years with at least five (5) years of creditable service or age fifty (50) years with twenty-five (25) years of creditable service having been completed, whichever occurs first.

Any member serving on the council of the City of Norfolk on or after July 1, 2001, shall have a normal service retirement allowance of 2.5 percent of his average final compensation multiplied by the number of his years of creditable service up to a number of years of creditable service which would allow his normal retirement allowance to equal up to sixty-five (65) percent of his average final compensation.

(o) Members of the employees' retirement system of the city who have fifteen (15) years of creditable service with the city are eligible upon retirement to elect to participate in the health care insurance benefit plans available to employees of the city until such time as the member reaches the age defined as the normal age of eligibility for Medicare pursuant to 42 U.S. Code § 1395c, as amended. In addition, and notwithstanding the above, the following members shall also be eligible for the benefit regardless of the length of their creditable service: (1) council members serving on or after April 30, 2010; (2) city officers appointed to their positions pursuant to the Charter; (3) employees in the department of law who are city attorneys; and (4) city employees identified as executive in the annual compensation plan ordinance and its attachments.

Within thirty (30) days of the member's retirement; or, within thirty (30) days of a qualifying event whereby the member is no longer enrolled as a dependent beneficiary of a health care insurance benefit available to employees of the city or an affiliated agency who participates in the city's health care insurance plan; the member shall elect to enroll in the health care insurance benefit plan by communicating their election to the department of human resources. The member shall be responsible for payment of the full premium cost of the plan less any supplement authorized by the city council in its annual budget or other ordinance. Once enrolled, the member shall remain eligible to participate in the health care insurance plan until such time as the member disenrolls or reaches the age defined as the normal age of eligibility for Medicare pursuant to 42 U.S. Code § 1395c.

(p) Notwithstanding any ordinance to the contrary, the city attorney shall have a normal service retirement allowance consisting of a pension equal to 2.5% of his average final compensation multiplied by the number of years of creditable service as city attorney from May 1, 1997 to his retirement ("city attorney years") plus unused sick leave, plus 1.75% of his average final compensation multiplied by the number of years from November 4, 1984 to April 30, 1997 (the "assistant city attorney years"), which when added to the city attorney years causes the total to equal 35 (the assistant city attorney years reduced so that when added to the city attorney years the total equals thirty-five (35)). Any unused sick leave will be subject to the 2.5% multiplier and added to the thirty-five (35) years of creditable service. Pursuant to section 143 of the Norfolk City Charter, as amended, this retirement benefit cannot be reduced to the extent it has accrued.

Sec. 37-62. Early service retirement allowance.

(a) Any member in service who has not reached his normal service retirement age, but who is within five (5) years of reaching such age or who has not completed the years of creditable service for normal service retirement, but is within five (5) years of completing such service, shall be retired by the board on an early service retirement allowance, upon his written application setting forth at what time, not less than thirty

(30) nor more than ninety (90) days next following the execution and filing thereof, he desires to be retired, notwithstanding that during such period of notification he may have separated from service.

(b) The early service retirement allowance shall consist of a deferred pension, commencing on the first day of the calendar month coincident with or next following the date on which the member would have attained his normal service retirement age or would have completed the years of creditable service required for normal service retirement if he had continued in service, equal to the amount computed as a normal service retirement allowance on the basis of his average final compensation and creditable service at the time of his retirement; provided, that at the time of retirement the member may elect to receive, in lieu of such deferred pension, an early service retirement allowance commencing on his early retirement date in a reduced amount, which shall be equal to the deferred pension reduced by one-quarter (0.25) of one percent of itself for general employees and one-half (0.5) of one percent of itself for policemen, firemen and paramedics for each month that the date of commencement of the pension payments precedes the date on which the deferred pension would otherwise have been payable.

(c) Members of the retirement system who (i) are appointed city manager, city attorney, city auditor, city clerk or city assessor pursuant to section 11 of the City Charter; (ii) are involuntarily separated from service; and (iii) have fifteen (15) or more years of creditable service or are fifty (50) years of age at the date of separation may retire and receive their retirement allowance without meeting the requirements of subsection 37-62(a) or 37-74(c) and without the reduction in retirement allowance required by subsection 37-62 (b).

For purposes of this subsection, "involuntary separation" means any dismissal, requested resignation, or failure to obtain reappointment.

Severability is intended throughout and within all the provisions of this subsection. If any provision (including *inter alia,* any word, phrase, sentence or paragraph), and/or the application thereof to any person or circumstance, is judicially declared invalid, then: (i) any provision declared invalid in its application to one person or circumstance shall remain valid in its application to all others; and (ii) any other provision, and/or its application to any person or circumstance, shall remain valid.

Sec. 37-63. Retirement allowance of beneficiaries elected to office covered by section 37-22.

Except for persons who are beneficiaries of the system on April 25, 1968, no beneficiary elected to any office covered by section 37-22 shall be entitled to his retirement allowance, except in the following manner:

(1) Should any such beneficiary elect, pursuant to section 37-22, to again become a member of the retirement system, then the provisions of section 37-75 shall apply.

(2) Should any such beneficiary elect not again to become a member of the retirement system, then all retirement allowances shall be suspended during the time he serves in office, pursuant to his election, and no retirement allowance shall be again paid until the termination of his term of office.

Upon the termination of his office his retirement allowance shall again be continued and the payment recomputed on the basis of his age at the time of the termination of his office. No creditable service shall be allowed while not a member of the retirement system during the time while he is in office and the contributions and earned interest of such person at the time of the suspension of his retirement allowance shall be paid to the annuity savings fund and interest credited thereon at the same rate as for active members.
(Code 1958, § 40-42.1; Ord. No. 44,001, § 3, 10-5-10)

Sec. 37-64. Ordinary disability retirement allowance.

(a) Upon the application of a member in service or of the head of his department, any member who has had five (5) or more years of

creditable service may be retired by the board on an ordinary disability retirement allowance, not less than thirty (30) nor more than ninety (90) days next following the execution and filing of such application; provided, that the medical board, after a medical examination of such member, shall certify that he is mentally or physically totally incapacitated for the further performance of duty, that such incapacity is likely to be permanent and that such member should be retired.

(b) The ordinary disability retirement allowance shall be equal to the normal service retirement allowance; if the member has attained his normal service retirement age; otherwise it shall be computed in accordance with subsection (c) of this section.

(c) The ordinary disability retirement allowance shall consist of a pension equal to the amount computed as a normal service retirement allowance for such member on the basis of his average final compensation and creditable service at the time of his retirement; provided, however, that if such amount is less than twenty-five (25) percent of the member's average final compensation, the pension shall be increased to the lesser of the following amounts:

(1) Twenty-five (25) percent of his average final compensation; or

(2) The amount which would have been payable to the member as a normal service retirement allowance on retirement at his normal service retirement age, if he had continued in service until such age without change in his average final compensation.

(Code 1958, § 40-10)

Sec. 37-65. Accidental disability retirement allowance—Generally.

(a) Upon the application of a member in service or of the head of his department, any member who has been totally and permanently incapacitated for duty as the natural and proximate result of an accident, the cause of which is compensable under the Virginia Workers' Compensation Act, occurring while in the actual performance of duty at some definite time and place, without willful negligence on his part, may be retired by the board on an accidental disability retirement allowance, and not an ordinary disability retirement allowance, not less than thirty (30) nor more than ninety (90) days next following the execution and filing of such application; provided that such application is filed within six (6) years from the definite time of such accident and that the medical board, after a medical examination of such member, shall certify that he is mentally or physically totally incapacitated for the further performance of duty, that such incapacity is likely to be permanent and that he should be retired. Notwithstanding the foregoing, in the event the board, in its discretion, determines that manifest injustice would result from an application of the six-year limitations period for application under this section, or from the requirement in this section that the member be in service at the time of application, and that there is evidence satisfactory to the board that a qualifying disability was the natural and proximate result of an accident compensable under the Virginia Workers' Compensation Act occurring at some definite time and place, it shall have the authority to waive such limitations period and the requirement that the member be in service at the time of application.

(b) The accidental disability retirement allowance shall consist of a pension which shall be equal of sixty-six and two-thirds (66⅔) percent of the member's average final compensation.

(Ord. No. 39,721, § 1, 9-14-99)

Sec. 37-66. Same—Presumptions and physical examinations for firemen, policemen, sheriff and deputy sheriffs.

(a) For the purposes of section 37-65, on or after July l, 1973, any condition or impairment of health of a fireman caused by respiratory disease, hypertension or heart disease, or on or after July l, 1974, for a policeman, and on or after July l, 1976, for the sheriff and a deputy sheriff, any condition or impairment of health caused by hypertension or heart disease resulting in disability shall be presumed to have been suffered in the line of duty, unless the contrary be shown

by competent evidence. Prior to making any claim based upon such presumption for retirement on account of such disability, such fireman, policeman, sheriff or deputy sheriff shall have been found free from hypertension, heart disease or respiratory disease as above set forth, as the case may be, by a physical examination which shall include such appropriate laboratory and other diagnostic studies as the council may prescribe, and which shall have been conducted by a physician whose qualifications shall have been prescribed by the council. Any fireman, policeman, sheriff or deputy sheriff claiming that his disability was suffered in the line of duty shall, if requested by the council or its authorized representative, submit himself to a physical examination by any physician designated by the council, which examination may include such tests or studies as may reasonably be prescribed by the physician so designated. A fireman, policeman, sheriff or deputy sheriff shall have the right to present at such examination, at his own expense, any qualified physician he may designate.

(b) All firemen employed by the city on July l, 1973, who have been in service for more than one year as of that date, and all policemen employed by the city on July l, 1974, who have been in service for more than one year as of that date, shall, for the purposes of the pre-physical required by subsection (a) of this section, be deemed to have taken the necessary physical examination and found to be free from hypertension, heart disease or respiratory disease, as the case may be.

(c) The director of public health or his designee, who shall be a duly qualified physician, shall give to all probationary firemen and policemen and to all firemen employed after July l, 1973, and policemen employed after July 1, 1974, and to the sheriff and deputy sheriffs employed on July 1, 1976, and all employed subsequent thereto, a general physical examination with the appropriate blood, urine and X-ray tests, together with blood pressure tests, and an electrocardiogram, followed by a Masters test and such other respiratory function tests as he shall deem appropriate. He shall keep a permanent record of such tests and the results thereof, as well as a record of all subsequent tests.

(Code 1958, §§ 40-11, 40-11.1; Ord. No. 30,226, § 1, 12-11-79)

Sec. 37-67. Reexamination of and reduction of benefits for beneficiaries retired on account of disability.

(a) Once each year during the first five (5) years following the retirement of a member of an ordinary or accidental disability retirement allowance, and once in every three (3) year period thereafter, the board may, and upon his application shall, require any disability beneficiary to undergo a medical examination, if he has not yet attained his normal service retirement age, such examination to be made at the place of residence of such beneficiary or some other place mutually agreed upon. Should any disability beneficiary refuse to submit to such medical examination, his retirement allowance may be discontinued by the board until his withdrawal of such refusal, and should his refusal continue for one year, all his rights in and to his pension may be revoked by the board.

(b) Should the board of trustees determine that a disability beneficiary, who has not attained his normal service retirement age, is engaged in a gainful employment, or should the medical board certify to the board of trustees that a disability beneficiary is able to engage in a gainful employment, paying more than the difference between his retirement allowance, including any supplements, and the highest rate in the pay range effective January first of the current year for the position he occupied at retirement, or if no such position is now included in the compensation plan, then a comparable range as identified by the personnel department, the board of trustees may reduce his retirement allowance, including any supplements, to an amount which, together with the amount earnable by him, shall equal the amount established on January first of the year being considered. The reduction will be made in the year following the year in which the earnings excess occurs. Should the retiree's earning capacity later change, the amount of his benefit may be increased or decreased in accordance with the provisions of this chapter.

(c) The board of trustees is hereby authorized to require retired disability beneficiaries to file such reports with the executive secretary of the

system as it feels are in the best interest of the system and necessary to carry out the provisions of this section. The board may discontinue benefits to any retiree who fails or refuses to provide such reports as are requested, and may continue to do so until such information is received.
(Code 1958, § 40-15)

Sec. 37-68. Optional allowances.

(a) For persons who became members of the system before July 1, 2016, until the first payment on account of his retirement allowance becomes normally due, any member may elect to convert the pension otherwise payable to him into a modified pension of equivalent actuarial value in accordance with one of the optional forms named below; provided, that if the contingent annuitant selected is other than the member's spouse, the value of the pension payable to the member under the option shall be more than one-half (½) of the present value of the benefits payable under the option to the member and his contingent annuitant; and further provided, that should the member die within thirty (30) days after retirement, his optional election shall not be effective, he shall be considered to be a member in service at the time of his death and the only benefit payable on his account shall be the ordinary death benefit provided in section 37-70, reduced by any retirement allowance payments received by him prior to his death:

Option A: A reduced pension payable during the life of the retired member, with the provision that, upon his death, the reduced pension shall be continued throughout the life of and paid to the contingent annuitant nominated by him by written designation duly acknowledged and filed with the board at the time of his retirement; or

Option B: A reduced pension payable during the life of the retired member, with the provision that, upon his death, one-half of the reduced pension shall be continued throughout the life of, and paid to, the contingent annuitant nominated by him by written designation duly acknowledged and filed with the board at the time of his retirement; or

Option C: A reduced pension payable during the life of the retired member, with the provision that, upon his death, some other benefit shall be payable; provided, that the benefit shall be approved by the board.

Option D: A reduced pension as set forth under paragraph (b) below.

(b) For persons who became members of the system on or after July 1, 2016, until the first payment on account of his retirement allowance becomes normally due, any member may elect to convert the pension otherwise payable to him into a reduced pension payable during the life of the retired member, with the provision that, upon his death, one-half (½) of the reduced pension shall be continued throughout the life of, and paid to, the contingent annuitant nominated by him by written designation duly acknowledged and filed with the board at the time of his retirement.

After the first payment on account of his retirement allowance becomes normally due, any member who has elected a modified benefit pursuant to paragraph (b) of this section may petition the board of trustees to revoke or amend his election of a modified benefit. Upon the receipt of proofs, satisfactory to the board, of one of the following qualifying occurrences, the board may grant the requested revocation or amendment as set forth below:

(1) Upon the receipt of proofs, satisfactory to the board, of the death of the contingent annuitant.

(2) Where the contingent annuitant is the member's spouse, upon the receipt of proofs, satisfactory to the board, that the member and contingent annuitant have divorced with less than twenty (20) years of marriage.

(3) Where the contingent annuitant is the member's spouse and the member and spouse have divorced after having been married for more than twenty (20) years at the time of the petition, upon the receipt of proofs, satisfactory to the board, of a qualified domestic relations order, other judicial order, or other writing signed

and notarized by the spouse in which the spouse consents to revocation or modification of the member's contingent annuitant election.

A member may only file one (1) petition to the board for amendment of his modified benefit election pursuant to paragraphs (b)(1)—(3) during his lifetime.

Upon receipt of notification by the secretary of the board that the member's petition has been granted pursuant to paragraphs (b)(1)—(3), the member may thereafter file with the secretary notice by written designation of a new contingent annuitant nominated by him.

(c) Notwithstanding any optional election in effect in accordance with this section, the annuity shall be payable, without modification, in accordance with subsection (b)(4) of section 37-2. (Code 1958, § 40-17; Ord. No. 48,266, § 1, 12-22-20)

Sec. 37-69. Increase of retirement allowance for service in armed forces.

From and after May l, 1974, the retirement allowance of any beneficiary shall be increased to grant creditable service for his period of service in the armed forces, as provided in section 37-44; provided, he submits evidence satisfactory to the board regarding his service in such armed forces.

The pension shall be recomputed in accordance with the benefit formula in effect at the time of the member's retirement, based on the increased number of years of his creditable service. (Code 1958, § 40-17.1)

Sec. 37-70. Ordinary death benefit.

Upon the receipt of proofs, satisfactory to the board, of the death of a member which was not the result of an accident in the actual performance of duty, as defined in section 37-71, there shall be paid to such person, if any, as he shall have nominated by written designation duly acknowledged and filed with the board, otherwise to his estate:

(1) Any contribution made prior to October 5, 2010, and if the deceased member was not vested, mandatory contributions made after October 5, 2010, prior to vesting, together with such interest thereon, not less than one-half of accumulated regular interest, as the board shall allow; and,

(2) If he was in service at the time of his death and had one or more years of creditable service, a lump sum benefit equal to fifty (50) percent of his earnable compensation during the year immediately preceding his death; provided that if the member dies on or after July 1, 1974, after attaining his normal service retirement eligibility, and if the person nominated was his spouse, the spouse may elect to receive, in lieu of such lump sum benefit, a monthly benefit equal to one-half of the normal service retirement allowance that would have been payable to the member had he retired on the date of his death. Such allowance shall be payable to the surviving spouse of the deceased member until said spouse's death or remarriage; provided, that if such death or remarriage occurs before the youngest unmarried child of the deceased member has attained age eighteen (18), then such allowance shall be continued to his unmarried children, if any, under such age, divided in such manner as the board in its discretion shall determine, until all of these children die, marry or attain age eighteen (18), whichever occurs first; further provided, that in the case of a surviving spouse who is receiving a monthly allowance pursuant to this paragraph on or before June 30, 1978, the allowance shall continue to be paid after said spouse's remarriage, and no further payments shall be made after said spouse's death. The surviving spouse s benefit shall accrue from the first day of the month following the death of the member in active service. The provisions

of this paragraph, as it pertains to the lump sum benefit, shall not be applicable to any employee who becomes a member of the system on or after July 1, 1979, until such person has attained five (5) or more years of creditable service in such system.

(3) Should any member with five (5) or more years of service, or any member who has attained normal service retirement eligibility, die, and if the designated beneficiary was his or her spouse, the spouse may elect to receive, in lieu of such lump sum benefit, a monthly benefit equal to one-half of the normal service retirement allowance that would have been payable to the member had he or she vested his or her benefit immediately prior to death, such monthly benefit to commence at the same time as the vested benefit would have been paid to such member. The time, manner, and eligibility for said payment shall be the same as set forth in paragraph (2) above.

(4) Should any member with five (5) or more years of service, or any member who has attained early service retirement eligibility die, and if the designated beneficiary was his or her spouse, the spouse may elect to receive, in lieu of such lump sum benefit, a monthly benefit equal to one-half of the early service retirement allowance that would have been payable to the member had he or she vested his or her benefit immediately prior to death, such monthly benefit to commence at the same time as the vested benefit would have been paid to such member. The early service retirement allowance for purposes of this ordinary death benefit shall consist of an early service retirement allowance commencing on the first day of the month following the member's death in a reduced amount, which shall be equal to the deferred pension reduced by one-quarter of one percent of itself for general employees and one-half of one percent of itself for policemen, firemen and paramedics for each month that the date of commencement of the pension payments precedes the date on which the deferred pension would otherwise have been payable.

(Code 1958, § 40-12; Ord. No. 29,806, § 1, 1-30-79; Ord. No. 31,440, § 1, 11-24-81; Ord. No. 40,724, § 1, 5-21-02; Ord. No. 44,001, § 4, 10-5-10)

Sec. 37-71. Accidental death benefit.

(a) If, upon receipt of proof, satisfactory to the board, of the death of a member in service indicating that such death was the natural and proximate result of an accident occurring while the member was in the actual performance of duty and that death occurred within six (6) years from the time of such accident, the board shall decide that death was the result of an accident in the actual performance of duty occurring at some definite time and place, and not caused by willful negligence on the part of the member, there shall be paid, in lieu of any benefits otherwise payable under section 37-70:

(1) The deceased member's contributions made prior to October 5, 2010, and if not vested prior to death, the mandatory contributions made on or after October 5, 2010, prior to vesting, together with such interest thereon, not less than one-half of accumulated regular interest thereon, as the board shall allow, to such person, if any, as he shall have nominated by written designation, duly acknowledged and filed with the board, otherwise to his estate.

(2) A pension, of one-half of his average final compensation, to his surviving spouse, if any, to continue until his death or remarriage; or if there is no spouse surviving or the spouse dies or remarries before the youngest child of the deceased member has attained age eighteen (18), then to his children under such age, if he leaves children, divided in such manner as the board, in its discretion, shall determine, to continue as a joint and survivorship pension for the benefit of the children under such age until all of those children die or attain such age; or if he leaves no

spouse or children under the age of eighteen (18) years living at his death, then to his dependent parents, living at his death, divided in such manner as the board, in its discretion, shall determine, to continue for life; provided, that if he leaves no such beneficiary living at his death, the amount which otherwise would have been paid as an ordinary death benefit, pursuant to section 37-70, shall be paid.

(b) On and after July 1, 1973, the death of any fireman caused by respiratory disease, hypertension or heart disease shall be presumed to have been suffered in the line of duty, unless the contrary be shown by competent evidence. Prior to making any claim, based upon such presumption, for accidental death benefits on account of such death, such fireman shall have been found free from hypertension, heart disease or respiratory disease, by a physical examination, which shall include such appropriate laboratory and other diagnostic studies as the council may prescribe and which shall have been conducted by a physician whose qualification shall have been prescribed by the council. The provisions of subsections (b) and (c) of section 37-66 shall apply *mutatis mutandis* to the provisions of this subsection.

(c) On and after July l, 1975, the death of any policeman caused by hypertension or heart disease shall be presumed to have been suffered in the line of duty, unless the contrary be shown by competent evidence. Prior to making any claim based upon such presumption for accidental death benefits on account of such death, such policeman shall have been found free from hypertension or heart disease by physical examination which shall include such appropriate laboratory and other diagnostic studies as the council may prescribe and which shall have been conducted by a physician whose qualifications shall have been prescribed by the council. The provisions of subsections (b) and (c) of section 37-66 shall apply *mutatis mutandis* to the provisions of this subsection.

(d) On or after July 1, 1976, the death of any sheriff or deputy sheriff caused by hypertension or heart disease shall be presumed to have been suffered in the line of duty unless the contrary be shown by competent evidence. Prior to making any claim based upon such presumption for accidental death benefits on account of such death, such sheriff or deputy sheriff shall have been found free from hypertension or heart disease by physical examination which shall include such appropriate laboratory and other diagnostic studies as the council may prescribe and which shall have been conducted by a physician whose qualifications shall have been prescribed by the council.
(Code 1958, § 40-13; Ord. No. 44,001, § 5, 10-5-10)

Sec. 37-72. Death benefits after retirement.

(a) Upon receipt of proof, satisfactory to the board, of the death on or after January 1, 1965, of a person who became a member of the system before July 1, 2016 and who had retired under the system; or a spouse receiving an accidental death benefit pursuant to section 37-71, and provided that such deceased retired member or Spouse had received or was, at the time of death, eligible to receive his or her first monthly retirement allowance check, a single lump sum death benefit, equal to one-half (½) of the average final compensation on which the retirement allowance of such retired member or spouse was based, shall be paid to the surviving spouse; or, if there is no surviving spouse, then to a surviving unmarried child or children under age eighteen (18) at the date of death, or to a surviving unmarried child or children over age eighteen (18), if the medical board shall certify that such unmarried child or children are physically or mentally unable to make a living. The lump sum death benefit provided for in this subsection shall not be applicable to any employee who becomes a member of the system on or after July 1, 1979, unless such person has attained five (5) or more years of creditable service in the system; to any employee who became a member of the system on or after July 1, 2016; or to any employee who became a member of the system before July 1, 2016 and who elects a modified pension pursuant to paragraph (b) of section 37-68.

(b) In the case of a retired member who dies on or after July 1, 1974 and has not elected a reduced pension under section 37-68, the surviving spouse may elect to receive, in lieu of the single lump sum death benefit provided in subsection (a) above, if applicable, a monthly benefit equal to one-half (1½) of the retirement allowance payable monthly to the deceased retired member at the time of his death; provided, in the case of a member who retires on or after July 1, 1974, the member had not made an optional election under section 37-68 which was in full force and effect. Such allowance shall be payable to the surviving spouse of the deceased retired member until said spouse's death or re-marriage; provided, that if such death or remarriage occurs before the youngest unmarried child of the deceased member has attained age eighteen (18), then such allowance shall be continued to his unmarried children under such age, divided in such manner as the board, in its discretion, shall determine, until all of these children die, marry or attain age eighteen (18), whichever occurs first. In the case of a surviving spouse who is receiving a monthly allowance pursuant to this subsection on or before June 30, 1978, the allowance shall continue to be paid after said spouse's remarriage, and no further payments shall be made after said spouse's death. The surviving spouse's benefit shall accrue from the date the retired member received his last and final retirement allowance payment.
(Code 1958, § 40-13.1; Ord. No. 29,806, 2, 1-30-79; Ord. No. 48,266, § 1, 12-22-20)

Sec. 37-73. Fixing time for benefits.

Notwithstanding any other provision of this chapter, on and after January 1, 1974, the benefits accruing to a member or his surviving spouse under normal service retirement, ordinary disability retirement or accidental disability retirement, shall be fixed as of the date the board acts upon such application for such retirement. For all other purposes, the date of retirement shall be that set by the board, when acting upon such member's application. Nothing herein shall affect the date on which the first benefit check is now paid. In no event shall a member's benefit commence (or otherwise be paid) later than the first day of April immediately following the calendar year in which the member attains age seventy and one-half (70½) or retires, whichever is later. All benefits (including death benefits) shall be paid in accordance with Section 401(a)(9) of the Internal Revenue Code of the United States of America and regulations of the United States Department of the Treasury issued thereunder, and as amended.
(Code 1958, § 40-13.2; Ord. No. 39,711, § 4, 8-24-99)

Sec. 37-74. Disposition of contributions upon retirement from or termination of service.

(a) A member who retires on or after July 1, 1972, under the provisions of sections 37-61, 37-62, 37-64 or 37-65 or subsection (c), shall be paid, at such time as the board approves, his contributions, if any made prior to October 5, 2010, together with such interest thereon, not less than one-half of accumulated interest thereon, as the board shall allow; provided, however, that such member may elect, prior to the commencement of his retirement allowance, to receive, in lieu of his contributions with interest thereon, an annuity which shall be the actuarial equivalent of his accumulated contributions at the time of retirement.

(b) Should a member cease to be an employee for any reason other than death or retirement under the provisions of this chapter, he shall, if he so demands, be paid, at such time as the board approves, his contributions, if any made prior to October 5, 2010, in whole or in part, together with such interest thereon, not less than one-half of accumulated interest thereon, as the board shall allow. If he elects, at the time of his termination of service, pursuant to subsections (c) and (d), to leave his contributions in the system, the amount of his contributions made prior to October 5, 2010, with interest thereon shall be refunded, in lieu of any other benefits from the system, upon his request made prior to the attainment of his normal service retirement age or upon his death prior thereto.

(c) A member with five (5) or more years of creditable service at the time he ceases to be an employee for any reason other than retirement

or death shall be entitled to apply for retirement on the first day of the calendar month coincident with or next following the date on which the member would have attained his normal service retirement age if he had continued in service, at which time he shall commence to receive a retirement allowance determined as a normal service retirement allowance on the basis of his creditable service and average final compensation at the time of termination of service and in accordance with the provisions of this chapter in effect at the time of his termination; provided, however, that no retirement allowance shall be payable to him pursuant to this subsection if he elects, in lieu thereof, to receive a refund of his contributions made prior to July 1, 1972, with interest thereon, pursuant to subsection (b) of this section. An employee who becomes a member on or after December 13,2011, must meet the vesting requirement as set forth in this subsection (c) in order to be eligible to retire.

(d) A member with less than ten (10) years of creditable service who, on July 1, 1988, is separated from the service of the city to become an employee of the Lake Taylor City Hospital Authority, shall be entitled to apply for retirement on the first day of the calendar month coincident with or next following the date on which the member attains either (i) age sixty (60) if he became a participant before July 1, 1980, or (ii) age sixty-five (65) if he became a participant on or after July 1, 1980, at which time he shall commence to receive a retirement allowance determined as a normal service retirement allowance on the basis of his creditable service and average final compensation as of June 30, 1988, and in accordance with the provisions of this chapter in effect on June 30, 1988.

(e) Benefits forfeited by any member for any reason shall not be applied to increase the benefits any employee would otherwise receive under the system.

(f) Notwithstanding anything to the contrary in this chapter, but subject to any de minimis or other exceptions or limitations provided for under

section 401(a)(31) of the Internal Revenue Code of 1986, as amended, (the "Code") any prospective recipient (whether a member, a surviving spouse, a current or former spouse) who is an alternate payee under a qualified domestic relations order or any other person eligible to make a rollover of a distribution from the system which constitutes an "eligible rollover distribution" (to the extent otherwise includible in the recipient's gross income) may direct the system to pay the distribution directly to an "eligible retirement plan". For purposes hereof, the following terms have the meanings assigned to them in section 401(a)(31) of the Code and, to the extent not inconsistent therewith, shall have the following meanings:

(i) The term "eligible retirement plan" means a defined contribution plan which is either an individual retirement account described in section 408(a) of the Code, an individual retirement annuity described in section 408(b) of the Code (other than an endowment contract), an annuity plan described in Section 403(a) of the Code or a qualified trust described in section 401(a) of the Code that accepts the prospective recipient's eligible rollover distribution. For distributions made before January 1, 2002, for eligible rollover distribution payable to a member's surviving spouse, an "eligible retirement plan" means only an individual retirement account or individual retirement annuity. Effective for distributions made after December 31, 2001, an eligible retirement plan shall also mean an annuity contract described in section 403(b) of the Code and an eligible plan under section 457(b) of the Code which is maintained by a state, political subdivision of a state or any agency or instrumentality of a state or political subdivision of a state and which agrees to account separately for amounts transferred into such plan from this plan. Effective for distributions made after December 31, 2001, the definition of eligible retirement plan applicable to a participant shall also apply for a distribution to a participant's surviving spouse and to a participant's spouse or former spouse who is the alternate payee under a domestic relations order accepted by the system. Effective for distributions made after December 31, 2007, an "eligible retirement plan" includes an individual retirement plan described in Section 408A of the Code (sometimes referred to as a Roth IRA) provided that for tax years beginning before January 1, 2010, the recipient does not have modified adjusted gross income in excess of one hundred thousand dollars ($100,000.00) and is not married filing a separate return, both as determined under section 408A(c)(3)(B) of the Code. For distributions made in plan years beginning on or after January 1, 2010, in the case of an eligible rollover distribution payable to a nonspouse designated beneficiary within the meaning of section 401(a)(9)(E) of the Code an "eligible retirement plan" means only an "inherited IRA".

(ii) The term "eligible rollover distribution" means any distribution other than:

(A) A distribution which is one of a series of substantially equal periodic payments (not less frequently than annually) made either for the life (or life expectancy) of the recipient or the joint lives (or joint life expectancies) of the recipient and his beneficiary who is an individual or for a specified period of ten (10) or more years;

(B) A distribution to the extent it is required under the minimum distribution requirement of section 401(a)(9) of the Code; or

(C) Any other amount which is not considered an eligible rollover distribution for purposes of section 402(c)(4) of the Code with respect to the plan.

(iii) The term "inherited IRA" means an individual retirement account described in section 408(a) of the Code, an individual retirement annuity described in section 408(b) of the Code (other than an endowment contract) or, for plan years beginning in or after 2010, an individual retirement plan described in section 408A of the

Code (sometimes referred to as a Roth IRA) established for the purpose of receiving the distribution where the individual retirement account or annuity or Roth IRA is treated as an inherited individual retirement account or annuity within the meaning of section 408(d)(3)(C) or, as applicable, section 409A(d)(3)(B) of the Code.

(g) A member who was a Norfolk Community Services Board ("NCSB") employee on June 30, 2012 and who becomes a city employee on July 1, 2012 ("former NCSB employee") shall have his period of employment at NCSB counted toward the five-year service requirement for vesting under City Code section 37-74(c) as if such period of employment constituted service while a member of the system under City Code section 37-42. In no event shall this subsection (g) be construed as including service at NCSB as creditable service in the city's retirement plan under City Code section 37-41 for any purpose other than vesting under City Code section 37-74(c), with a former NCSB employee only receiving creditable service in the city's retirement system for service as a Norfolk city employee or as provided in City Code sections 37-43, 37-44, 37-46 or 37-47.

Any such direction shall be filed with the system in such form and at such time as the system may require and shall adequately specify the eligible retirement plan to which the payment shall be made. The system shall make payment as directed only if the proposed transferee plan will accept the payment. Any such plan-to-plan transfer shall be considered a distribution option under this plan and shall be subject to all the usual distribution rules of the system (including, but not limited to, the requirement of an advance explanation of the option). The system is authorized in its discretion, applied on a uniform and non-discriminatory basis, to apply any discretionary de minimis or other discretionary exceptions or limitations provided for under section 401(a)31) of the Code in effecting or declining to effect plan-to-plan transfers hereunder. Within a reasonable time (generally not more than ninety (90) nor less than thirty (30) days) before the benefit payment date of a prospective recipient of an eligible rollover distribution from the plan, the system shall provide the prospective recipient with a written explanation of the rollover and tax rules required by section 402(f) of the Code. In the event of a mandatory distribution greater than one thousand dollars ($1,000.00), if the member does not elect to have such distribution paid directly to an eligible retirement plan specified by the member in a direct rollover or to receive the distribution directly in accordance with this section, then the member will pay the distribution in a direct rollover to an individual retirement plan designated by the system administrator. The system will select the individual retirement plan in accordance with the safe harbor provisions established under Code of Virginia § 51.1-803.C. and such provisions shall be interpreted and administered in accordance therewith. This mandatory rollover requirement does not apply to a lump sum payment made to a surviving spouse or former spouse who is an alternate payee under a domestic relations order accepted by the system. (Code 1958, § 40-14; Ord. No. 35,119, §§ 1, 2, 6-21-88; Ord. No. 38,387, § 1, 5-21-96; Ord. No. 39,711, § 5, 8-24-99; Ord. No. 40,628, § 4, 3-5-02; Ord. No. 44,001, § 6, 10-5-10; Ord. Sec. 37-75. Restoration of beneficiaries to membership.

(a) Should a disability beneficiary under normal service retirement age be restored to or be in service at a compensation equal to or greater than his average final compensation at retirement, or should any other beneficiary be restored to service prior to his normal service retirement age, his retirement allowance shall cease, and he shall again become a member of the system. An amount equal to the actuarial reserve held for the annuity provided by his own contribution made prior to October 5, 2010, shall be credited to him as accumulated contributions. Anything in this chapter to the contrary notwithstanding, any prior service certificate on the basis of which his service was computed at the time of his retirement shall be restored to full force and effect and he shall be credited with all service as a member standing to his credit at the time of his retirement; provided, however, that upon his subsequent retirement, the pension part of his retirement allowance shall

be reduced by the actuarial equivalent of any pension payments previously paid to him for reasons other than disability retirement; and further provided, that his retirement allowance, upon subsequent retirement, shall not be less than the sum of his previous retirement allowance, plus the amount computed on the basis of his creditable service and earnable compensation for the period after his restoration.

(b) Should any beneficiary be restored to service with the city in an employment position other than as a retiree part-time employee pursuant to section 2.1-26.5 of the Norfolk City Code, 1979, as amended, on or after his early or normal service retirement age , the pension part of his retirement allowance shall be discontinued during the period of restoration, but in the event of his death during such period, any payments under an optional benefit, if one has been elected and has become effective, shall commence. If he elects to become a member of the system at the time of his restoration, he shall be considered a new member with respect to service rendered subsequent to his restoration.

(c) If a former employee who is entitled to a deferred retirement allowance, commencing after he attains his normal service retirement age, returns to service as an employee of the city before such allowance has become payable, he shall again become a member of the system upon his return, and his retirement allowance payable on subsequent retirement shall be computed in accordance with the provisions of this chapter in effect at such time on the basis of service standing to his credit at the time of his termination and service credited to him after his return.

Sec. 37-76. Waiver of annuity portion of retirement allowance.

(a) Any person entitled to a retirement allowance may, by a waiver signed by such person and filed with the board at a regular meeting of the board, decline to accept all or any part of the annuity portion of such retirement allowance. Such waiver may be revoked at any time by a written revocation filed with the board at a regular meeting of the board, but no payment of the waived annuity, or part thereof, shall be made covering the period during which such waiver was in effect.

(b) Any such waiver or revocation of waiver shall become effective on the first day of the month following the date of the meeting of the board at which such waiver or revocation of waiver is filed.

Sec. 37-77. Offset of workers' compensation benefits.

Any amounts which may be paid or payable under the provisions of any workers' compensation or similar law to any member or beneficiary, or to the dependents of any member or beneficiary, on account of any disability or death arising out of and in the course of employment with the city shall be offset against, and payable in lieu of, any benefits payable out of funds provided by the city under the provisions of this chapter; provided, however, that no such offset shall be made against the normal service or early service retirement allowance of a member whose workers' compensation or similar benefit is not paid to such member because of a voluntary relinquishment, suspension or other termination thereof due to the member's failure, refusal or desire not to accept vocational rehabilitation or selective employment.
(Code 1958, § 40-19; Ord. No. 34,369, § 1, 3-10-87; Ord. No. 35,195, § 1, 8-16-88)

Sec. 37-78. Adjustment of benefits in case of error.

Should any change of error in the records of the system result in any member or beneficiary receiving from the system more or less than he would have been entitled to receive had the records been correct, the board shall have the power to correct such error; and, as far as practicable, to adjust the payments in such a manner that the actuarial equivalent of the benefit to which such member or beneficiary was correctly entitled shall be paid.
(Code 1958, § 40-35)

Sec. 37-79. Retirement extra opportunity program.

Notwithstanding any other provisions of this chapter, the system shall provide certain members with the opportunity to elect participation in a voluntary retirement opportunity program, the provisions of such program are stated below:

Notwithstanding the preceding sentence, the board may delay the effective date of retirement and the beginning of the retirement allowance to any date up to April 1, 1989, for those eligible members whose services are deemed essential for the proper operation of the city, by the city manager and such delay is agreed to by the eligible member.

(d) If an eligible member who has fulfilled the requirements for normal service retirement elects to retire under the provisions of this section, the amount of his normal service retirement allowance shall be calculated under the provisions of section 37-61 except that:

(1) Three (3) additional years of creditable service shall be added to such member's creditable service; and

(2) Average final compensation shall be the annual earnable compensation during the twelve (12) consecutive months of creditable service during which the eligible member's earnable compensation was the highest.

(e) If an eligible member who has fulfilled the requirements for an early service retirement but who has not fulfilled the requirements for a normal service retirement elects to retire under the provisions of this section the amount of his early retirement allowance shall be calculated under the provisions of sections 37-61 and 37-62 except that:

(2) Average final compensation shall be the amount of annual earnable compensation during the twelve (12) consecutive months of creditable service during which the eligible member's earnable compensation was the highest.

The amounts of the pre-1994 supplements shall be equal to the amounts of retirement supplements paid in fiscal year 1993-1994 by the city from its general fund. The intent of this section is to not change the amounts of supplements made from the general fund prior to June, 1994, but to continue their payment from the system. The additional supplement shall be calculated by multiplying one percent by the recipient's total benefit (base pension plus previous supplements, plus monthly adjustment). The right to receive this additional supplement shall hereby vest in the eligible recipients and their beneficiaries. Notwithstanding any provision to the contrary, the additional supplement shall be subject to the same terms and conditions as for the payment of the pension.

Notwithstanding any provision to the contrary, the additional supplement shall be subject to the same terms and conditions as for the payment of the pension.

(8) Beginning on July 1, 2012, an additional supplement of two percent (2.0%) shall

be payable by the system to those retirees and their beneficiaries who are receiving city retirement payments as of June 30, 2011. The additional supplement shall be calculated by multiplying two percent (2.0%) by the recipient's total benefit (base pension plus previous supplements plus monthly adjustment). Sec. 37-82. Retirement opportunity program for 1996.

Notwithstanding any other provisions of this chapter, the system shall provide certain members with the opportunity to elect participation in a voluntary retirement opportunity program, the provisions of such program are stated below:

(1) Members of the system who are eligible to participate in the retirement opportunity program shall be those employees who are active employees on June 5, 1996, and who have met or will meet the requirements for a normal service retirement allowance under section 37-61 on or before December 31, 1996.

(2) During the election period, eligible members will have the opportunity to elect to retire under the provisions of this section. The election period will begin on June 5, 1996, and continue through July 12, 1996. An election by an eligible member to retire under this section shall be irrevocable.

(3) If an eligible member elects to retire under this section, the member may designate as a date of retirement the first day of any month between July 1996 and January 1997. Notwithstanding the preceding sentence, the board may delay the effective date of retirement and the beginning of the retirement allowance to any date up to April 1, 1997, for those eligible members whose services are deemed essential for the proper operation of the city, by the city manager or by the appointing authority in the case of members appointed by other persons and such delay is agreed to by the eligible member.

(4) If an eligible member who has fulfilled the requirements for normal service retirement elects to retire under the provisions of this section, the amount of his normal service retirement allowance shall be calculated under the provisions of section 37-61 except that:

a. Four (4) additional years of creditable service shall be added to such member's creditable service; unless

b. Such member elects, in lieu thereof, to receive a one-time payment from

the city (not the retirement system) equal to forty (40) percent of his/her salary in effect on the date of retirement.

(5) Notwithstanding any provision to the contrary, including, but not limited to, subsections (b) and (c) of this section, any employee who is an elected official on June 4, 1996, and is eligible to participate as provided in subsection (a) of this section shall receive the additional creditable service granted under subsection (d) of this section so long as the elected official retires on or before the expiration of the term being served as of June 4, 1996. Notwithstanding section 37-4 of this chapter or any other provisions to the contrary, the provisions of this subsection (5) are not revocable by the city council and shall require no further action on behalf of the eligible employee in order to be deemed to have accepted and relied upon the terms of this subsection (5) of this section.

Additional creditable service granted under subsection (4) of this section shall not be considered in determining the normal service retirement age of such member.
(Ord. No. 38,408, § 1, 6-4-96; Ord. No. 38,501, § 1, 7-30-96)

Sec. 37-82.1. Retirement enhancement program for policemen and firemen.

Notwithstanding any other provision of this chapter, the system shall provide certain members with the opportunity to elect participation in a voluntary retirement enhancement program, with the provisions of such program as stated below:

(a) Members of the system who are eligible to participate in the retirement enhancement program shall be those policemen and firemen who are members in service on May 1, 2005, and who have met the requirements for a normal service allowance under section 37-61 due to years of membership service as defined in section 37-42 and expressly excluding creditable service for unused sick leave.

(b) Only during the election period from May 1 through June 15, 2005, will eligible members have the opportunity to elect to retire under the provisions of this section. An election by an eligible member to retire under this section shall be irrevocable.

(c) If an eligible member elects to retire under this section, his retirement allowance will begin on either July 1, August 1, or September 1, 2005, as requested by the member. Notwithstanding the previous sentence and any provision to the contrary, the city manager may require that certain employees delay their retirement in order to be eligible for this retirement enhancement program. Retirement may be delayed for those members whose services are deemed essential for the proper operation of the city by the city manager. In the event of such a determination the city manager shall notify the board and the employee. Should the city manager elect to require any employee to delay his retirement pursuant to this subsection, the provisions restricting the accumulation of annual leave found in chapter 2 of the Norfolk City Code, 1979, as amended, shall not apply. Upon their eventual retirement, employees who are delayed in their retirement by the city manager pursuant to this section past September 30, 2005, shall receive compensation in the form of pay for their annual leave accrued as of September 30, 2005. Such employees shall begin to accrue new annual leave beginning October 1, 2005, and shall continue to accrue it in the fashion dictated by chapter 2 of the Norfolk City Code, 1979, as amended, until such time as the city manager permits them to retire. However, notwithstanding any other ordinance or regulation to the contrary, the payment of annual leave accumulated by such employees after

September 30, 2005, upon their eventual retirement, shall be in the form of leave alone. They shall take all such accumulated leave prior to the actual date of their retirement.

(d) If an eligible member who has fulfilled the requirements for normal service retirement due to years of membership service elects to retire under the provisions of this section, the amount of his normal service retirement allowance shall consist of a pension equal to the percentage provided below multiplied by his average final compensation.

(e) While unused sick leave will not be counted towards eligibility to participate in the enhancement provided by this section, upon qualification, unused sick leave shall count towards creditable service in accordance with section 37-41.

(f) The normal service allowance percentage based upon time of creditable service is as listed in the table below:

For partial years of service, the percentage shall be prorated; for example, if an employee has twenty-five (25) years and six (6) months of creditable service, his normal service allowance percentage would be sixty-nine (69) percent.

(g) The sixty-five-percent limitation (the cap) provided in section 37-61 does not apply to the normal service allowance percentages provided under this section 37-82.1 enhancement program.

(Ord. No. 41,813, § 1, 4-26-05; Ord. No. 41,974, § 1, 8-16-05)

Sec. 37-83. Limit on retirement allowances and benefits.

Sec. 37-84. Deferred retirement option program.

(a) *Eligibility.* Effective January 1, 2023, the Deferred Retirement Option Program ("DROP") is hereby expanded to include all eligible members of the Norfolk Employees' Retirement System (NERS or the system), including any police officer or firefighter member and general employee classifications. Members of the system in active service who have met normal service retirement age may elect to participate in the Deferred Retirement Option Program ("DROP"). In order to participate in the DROP, the police officer, firefighter, or general member must submit a written application to the retirement office not less than thirty (30) days nor more than ninety (90) days before they desire to be retired under the DROP.

(b) *Effects of participation.* Upon approval by the board of the police officer, firefighter, or general member's ("DROP participant") application to participate in the DROP, the DROP participant will be considered to be a retired member for all purposes related to the NERS. Participation in the DROP is irrevocable. No retirement allowance will be paid directly to the DROP participant during the duration of participation in the DROP ("DROP period"), however, seventy percent (70%) of the DROP participant's monthly retirement allowance shall be paid to a DROP account.

(c) *Duration.* Effective October 1, 2022, the DROP period shall not exceed five (5) years from the date upon which the member enters DROP. For members who are policemen or firemen and who enter DROP on or after attaining sixty (60) years of age, the DROP period shall terminate upon the member attaining age sixty-five (65) in accordance with Section 37-61(b). Members who entered DROP prior to January 1, 2023 and whose DROP period has not expired may extend their DROP period to the lesser of five (5) years from their original date of entry into DROP or their attaining sixty-five (65) years of age. Nothing herein shall be construed to extend the mandatory service retirement age set forth in Section 37-61(b) of this chapter.

(d) *Termination.* At the end of a DROP participant's DROP period, (1) the DROP participant's employment with the city shall terminate, (2) the DROP participant's accrued DROP account balance shall be paid either as a lump sum distribution to the DROP participant or the DROP participant may direct the System to pay the DROP account balance to an eligible retirement plan as such term is defined in City Code section 37-74(f)(i), and (3) the DROP participant shall be considered to be a normal service retired member for all purposes related to employment with the city. In the event the DROP participant's employment is terminated prior to the end of the maximum DROP period, the DROP participant's accrued DROP account balance shall be paid either as a lump sum to the DROP participant or the DROP participant may direct the System to pay the DROP account balance to an eligible retirement plan as such term is defined in City Code section 37- 74(f)(i). In the event of a DROP participant's death during the DROP period, City Code section 37-72 shall apply to the payment of death benefits. In the event of a DROP participant's death during the DROP period, the DROP participant's accrued DROP account balance shall be paid to his estate.

(e) *Accidental disability.* If a DROP participant is retired on an accidental disability retirement allowance during the DROP period, at the DROP participant's election, the DROP participant will receive either:

(1) The accidental disability retirement benefit as if the DROP participant had never participated in the DROP, forfeiting the DROP participant's accrued DROP account balance or

(2) The normal service retirement allowance (calculated with years of creditable service up to the commencement of the DROP participant's DROP participation date) in addition to the DROP participant's accrued DROP account balance.

Sec. 37-103. Annuity savings account: members' contributions.

(a) The annuity savings account shall be the account in which shall be accumulated the contributions deducted prior to October 5, 2010, from the compensation of members to provide for their annuities. Except as provided in section 37-103.1, no contributions shall be deducted after June 30, 1970, from the compensation of policemen and firemen, and after June 30, 1972, from the compensation of other members.

(b) Contributions deposited by members in the annuity savings account prior to July 1, 1972, to purchase an annuity shall continue to be held in such account. In addition, any member may, subject to approval of the board and such conditions as the board may prescribe, deposit therein after such date, additional amounts by periodic or

other payments; provided, that the total of a member's voluntary contributions does not exceed ten (10) percent of his compensation earned as an employee since he became a member.

(c) Interest at such rates as may be set from time to time by the board shall be allowed on contributions held in the annuity savings account, and benefits payable from such contributions shall be determined on the basis of the interest rate and tables last adopted by the board.

(d) A member who retires on or after July 1, 1972, shall be paid, at such time as the board approves, his contributions made prior to October 5, 2010, together with such interest thereon as the board shall allow; provided, that he may elect, prior to the commencement of his retirement allowance, to receive, in lieu of the contributions with interest thereon, an annuity which shall be the actuarial equivalent of his accumulated contributions.

Upon the retirement of a member who elects to receive an annuity, in lieu of his post-October 5, 2010 contributions with interest thereon, as provided in subsection (d) of this section, his accumulated contributions shall be transferred from the annuity savings account to the pension accumulation account.
(Code 1958, § 40-21; Ord. No. 44,001, § 8, 10-5-10)

Sec. 37-103.1. Members' mandatory contributions.

(a) A person who becomes a member on or after October 5, 2010, shall be required to pay member contributions on a salary reduction basis in accordance with section 414(h) of the Internal Revenue Code, as amended, in the amount of five percent (5%) of earnable compensation. A member with a break in service who returns after October 5, 2010 shall be required to make the aforesaid five percent (5%) contribution through salary reduction. For the purpose of this contribution, for the city manager, earnable compensation shall not include direct employer contributions to his/her retirement savings plan and car allowances.

Beginning on January 8, 2015, all members hired prior to October 5, 2010, shall be required to pay member contributions on a salary reduction basis in accordance with section 414(h) of the Internal Revenue Code, as amended, in the amount of five percent (5%) of earnable compensation, with the exception of city council members initially elected prior to October 5, 2010 who shall not be required to pay the member contribution. For the purpose of this contribution, for the city attorney, earnable compensation shall not include Section 457 deferred compensation payments and car allowances.

(b) Each member shall contribute five percent (5%) of his earnable compensation for each pay period during which he receives compensation to the maximum number of years of creditable service as provided in section 37-61. The city shall deduct the contribution payable by the member. Every employee accepting employment with the city on or after October 5, 2010, shall be deemed to consent and agree to the deductions from his compensation required by this section and the use of the deductions as provided in this section.

Beginning on January 8, 2015, all members hired prior to October 5, 2010, shall be deemed to consent and agree to the deduction from their compensation as required by this section and the use of deductions as provided in this section, with the exception of city council members initially elected prior to October 5, 2010 who shall not be required to pay the member contribution.

(c) In determining the earnable compensation of a member in a payroll period, the city may consider the rate of compensation payable to the member on the date of entry or removal of his name from the payroll as having been received throughout the month if service for the month is

earnable compensation. If service for the month is not creditable, the city may consider any compensation payable during the month as not being earnable compensation.

(d) Except for any benefits provided by this chapter, payment of compensation minus the deduction shall be a full and complete discharge of all claims for service rendered by the member during the period covered by the payment.

(e) The board may adopt regulations consistent with this mandatory deduction which it deems necessary to facilitate the deduction or its management.

(f) Mandatory member contributions made on or after October 5, 2010, are not refundable after the member vests in the system. Nonvested members departing service who elect a refund and later return to service may have creditable service restored in accordance with section 37-45. Members who vest are not eligible to receive any refund of the mandatory member contribution. Upon vesting, the mandatory member contribution becomes an asset of the System to be used to pay benefits under the System.

(g) Mandatory member contributions made on or after October 5, 2010, shall be deposited, invested and accounted for as deemed appropriate by the board.

(h) Beginning on July 1, 2014, in the event of death or departure prior to retirement or vesting, mandatory member contributions made on or after October 5, 2010, shall be refunded with interest on the accumulated contributions of the member. Annual interest is limited to a maximum of four percent (4%) and a minimum of zero percent (0%). The board shall determine the interest rate. Interest shall accrue on any contribution beginning at the end of the fiscal year in which the contribution was made.

(i) In the event that the provisions of this section conflict with any others in this chapter, this section shall govern.

(j) Beginning on January 8, 2015, section 37-103.1 shall apply to a member who was a Norfolk Community Services Board employee on June 30, 2012 and became a city employee on July 1, 2012. (Ord. No. 44,001, § 1, 10-5-10; Ord. No. 44,720, § 1, 6-12-12; Ord. No. 45,563, § 22, 5-20-14, eff. 7-1-14)

Sec. 37-104. Pension accumulation account generally; city's contributions.

(a) The pension accumulation account shall be the account in which shall be accumulated all reserves for the payment of all pensions and other benefits not credited to the annuity savings account.

(b) All interest and dividends earned on the funds of the system shall be credited to the pension accumulation account.

(c) On account of each member, there shall be paid annually into the pension accumulation account a certain percentage of the earnable compensation of each member to be known as the "normal contribution" and a further contribution as determined under this section to be known as the "accrued liability contribution."

(d) At each annual valuation, the actuary shall (i) compute the amount of accrued liability of the system on account of members and beneficiaries using the projected unit credit actuarial cost method and (ii) compute the amount by which the assets held in the fund exceed the accrued liability or if the accrued liability exceeds the assets, the amount of the unfunded accrued liability. The actuary also shall determine the normal rate of contribution and the accrued liability contribution in accordance with the following paragraphs of this section.

(e) If the actuary determines that there is an unfunded accrued liability:

(1) The normal rate contribution shall be a percentage of the earnable compensation of all members determined using the projected unit credit actuarial cost method.

(2) The accrued liability contribution shall be an amount for interest and amortization of the unfunded accrued liability.

(f) If the actuary determines that there is no unfunded accrued liability:

(1) The normal rate of contribution shall be a percentage of the earnable compensation as computed under subsection (e)(1) above but reduced by an amount, expressed as a percentage of earnable compensation of all members, which if paid annually for

twenty (20) years would meet the interest and amortization of the difference between the assets held in the fund and the accrued liability.

(2) No accrued liability contribution shall be made by the city.

(g) The total amount payable by the city in each year to the pension accumulation account shall not be less than the sum of the normal contribution and regular interest on the unfunded accrued liability; provided, however, that the aggregate payment shall be sufficient, when combined with the assets of the system, to provide the benefits payable to members and beneficiaries during the year then current.
(Code 1958, §§ 40-22—40-24; Ord. No. 36,444, § 1, 5-21-91)

Sec. 37-105. Transfers from pension accumulation account to annuity savings account; definition and determination of "regular interest."

(a) Once each year, the board shall transfer from the pension accumulation account to the annuity savings account amounts sufficient to allow regular interest on the balances of the members' accounts in the annuity savings account.

(b) For the purposes of this chapter, "regular interest" shall mean interest at such percent rates, compounded annually, as shall be determined by the board from time to time. The board, from time to time, shall determine one rate of regular interest for use in all calculations of members' accumulated contributions made prior to October 5, 2010, and the annuities and other benefits provided thereby, with a rate of four (4) percent annually applicable from the effective date of the system until changed by the board, and shall determine a second rate of regular interest for use in all calculations of the liabilities of the system for pensions at a rate of three (3) percent, applicable from the effective date of the system until changed by the board.
(Code 1958, § 40-24; Ord. No. 44,001, § 9, 10-5-10)

Sec. 37-106. Payment of benefits from pension accumulation account—Generally.

All pensions to beneficiaries, and benefits in lieu thereof, and death benefits not payable from the annuity savings account as accumulated contributions of members shall be paid from the pension accumulation account. All annuities on account of retired members and benefits in lieu thereof, for which accumulated contributions have been transferred to the pension accumulation account, shall be paid from the pension accumulation account; provided, however, if such a retired member should be restored to membership, the reserve for the annuity payable to him from his accumulated contributions shall be transferred to the annuity savings account.
(Code 1958, § 40-25)

Sec. 37-107. Same—Pensions under former police and fire pension fund.

All pensions payable to or on account of former policemen and firemen under the provisions of the former police and fire pension fund and in force on December 31, 1941, shall, on and after January 1, 1942, be paid under this system from the pension accumulation account at the same rates theretofore paid during the year 1941 under the former police and fire pension fund. The residue of any appropriations or assets available on January 1, 1942, for the payment of pensions under such former police and fire pension fund shall be transferred and credited to the pension accumulation account, and any additional amounts required to continue such pensions shall be provided by an increase in the accrued liability contributions payable by the city to the pension accumulation account.
(Code 1958, § 40-31)

Sec. 37-108. Permitted use of system funds; accrued benefits and credits not forfeited upon termination of system.

All of the funds of the system shall be held for use in providing the benefits of the system and paying its expenses, provided, that except as otherwise herein provided, no part of the funds or

earnings derived from such funds shall be used for or diverted to purposes other than for the exclusive benefit of members, spouses, former members and beneficiaries under the system, prior to the satisfaction of all liabilities with respect to them. Upon termination of the system or upon the complete discontinuance of contributions having the effect of such a termination, the rights of all members to benefits accrued to the date of such termination or discontinuance, to the extent then funded, and the amounts, if any, credited to members' accounts shall be nonforfeitable.
(Code 1958, § 40-29; Ord. No. 36,846, § 1, 5-26-92)

Sec. 37-109. Custodian of assets; procedure for disbursements.

(a) The board shall designate one of its members, with an appropriate bond, or a bank or trust company, to be the custodian of the assets of the system. All payments from the funds of the system shall be made by the custodian only upon regular vouchers signed by two (2) persons designated by the board. A duly attested copy of a resolution of the board designating such persons and bearing upon its face specimen signatures of such persons shall be filed with the custodian as his authority for making payments upon such vouchers. No voucher shall be drawn, unless it shall have been previously authorized by resolution of the board.

(b) The board may provide that, in making monthly payments of authorized retirement allowances, the total amount thereof payable in any month may be withdrawn from the funds of the system by a voucher, signed as provided in subsection (a) of this section, payable to the retirement payroll account of the system. In such case, the secretary of the board shall place the total amount to the credit of such account in some bank to be designated by the board, and the same may be disbursed for the payment of the retirement allowances by checks payable to the respective beneficiaries and signed by the secretary of the board or by the facsimile signature of such secretary. In the event provision is made for the use of such facsimile signature, a proper bond, with corporate surety, shall be secured to protect the system.

(c) In addition to the above procedure, payment for various types of investments purchased for the system may be paid by debiting the bank account of the system in order to cover such purchases.

(g) Each applicant shall attest that the items for sale have not been included for sale in any other special sales permit as described in Code of Virginia, section 18.2-224, 1950, as amended, and that the total inventory shall be liquidated pursuant to the advertised sale, subject to the provisions of section 24-25.9(g).
