The purpose of this article is to provide for the efficient, effective, and just resolution of claims arising out of offenses committed by holders of beer permits issued pursuant to the provisions of this chapter, through the creation of the position of a beer board hearing officer and rules of procedure by which to govern hearings before said officer.
(Ord. No. 14167(2), § 1, 11-5-24)

There shall be created the office of beer board hearing officer (hereinafter referred to as "hearing officer") for the purpose of the judicial administration of hearings to adjudicate issues relating to the suspension or revocation of beer permits and/or the issuance of fines pursuant to this chapter. Any provisions of this chapter which provide for the suspension or revocation of any beer permit, for the imposition of fines or other disciplinary action resulting from improper conduct of a business which holds a beer permit and which authorize the beer board to take such disciplinary action shall be construed to authorize the beer board to take such action by and through a properly qualified hearing officer duly appointed pursuant to the provisions of this part.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-192. Selection of hearing officer.

The Mayor shall establish a list of no more than five (5) hearing officers to conduct hearings pursuant to this article. All such hearing officers shall be persons licensed to practice law in the State of Tennessee and shall have experience in the area of litigation. Hearing officers shall be appointed for two-year terms, and appointments may be renewed by Mayor and confirmed by City Council. A hearing officer may resign at any time by providing written notice to the

Regulatory Unit and the City Attorney's office at least thirty (30) days prior to the date of resignation. In the event a hearing officer resigns, the Mayor shall, within thirty (30) days, appoint a new hearing officer to fill the vacancy.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-195. Clerk of beer board.

The Regulatory unit Admin Support Specialist, other support staff, or designee shall serve as clerk of the beer board. The duties of the clerk of the beer board shall include:

(1) The preparation of an application form for Hearing Officers;

(2) Receipt and maintenance of all records or files pertaining to any cases arising under this Article;

(3) Coordination of places and times for hearings pursuant to this article;

(4) Provide appropriate published notice to the public of the time and place for hearings to be conducted pursuant to this part; and

(5) Any other duties which may assist in the just, efficient, and effective enforcement of this Article.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-196. Procedure.

Proceedings pursuant to this section may be initiated in the following manner:

(1) The Regulatory Unit shall review citations issued by the Police Department for Beer Code violations;

(2) Following the receipt of the citations, the clerk of the beer board shall refer the matter to the next scheduled hearing officer for further proceedings consistent with this division. A copy of the citation also shall be forwarded by the clerk to each member of the beer board.

(3) All hearings conducted by a hearing officer pursuant to this part shall be open to the public. No fewer than five (5) days in advance of the initial hearing, the clerk of the beer board shall cause to be published in a newspaper of daily general distribution within the city, notice of the time of the hearing and the location where it is to be held.

At the same time, permittees also shall transmit a duplicate copy of the written answer to the city law department.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-198. Default.

Failure of the permittee to file a written answer with the clerk of the beer board within the fifteen (15) day period shall constitute default. Upon default, the hearing officer shall be authorized to take any action the officer would be authorized to take upon a finding of noncompliance. Before a default judgment may be entered revoking or suspending a permit, there shall be evidence in the record establishing that the permit holder was served with notice as provided herein.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-199. Scheduling of hearing.

The clerk of the beer board and the duly selected hearing officer, in cooperation with the City Attorney's Office and the permittee or the permittee's representative, if known, shall set the time for the hearing, said time to be within sixty (60) days but not less than thirty (30) days after the receipt of notice by the permittee.

Upon the selection of a date for the hearing, it shall be the responsibility of the clerk of the beer board to forward a written notice of hearing to all parties. This notice shall contain the time, date, and place of hearing. The notice also shall contain notification to the permittee of the right to be represented by counsel.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-200. Conduct of hearing.

The burden shall be on the city to show by a preponderance of the evidence that the permittee is guilty of a noncompliance offense. If all evidence examined by the hearing officer leads the hearing officer to conclude that it is more likely than not that the permittee is guilty of a noncompliance offense, such proof shall constitute cause thereby justifying suspension, revocation, a monetary penalty, or such other sanctions as the hearing officer deems appropriate, consistent with the provisions of this chapter. The hearing officer will make findings of fact and recommendations for sanctions to the beer board.

Neither the Tennessee Rules of Evidence nor the Tennessee Rules of Civil Procedure shall be applicable to these hearings but the hearing officer is instructed to make every effort to conduct the hearing so as to provide a fair hearing and reasonable due process to both parties.

The hearing officer is empowered to exercise such reasonable discretion intended to result in the fair, expedient, and economical resolution of all cases brought pursuant to this article. The scope of that discretion includes, but is not limited to, the authority to amend the answer and citation, to grant or deny continuances and establish the length of time for such continuances, to grant rehearings, and to modify or rescind any recommendation.

The hearing officer shall render a decision at the conclusion of the hearing or within twenty-four (24) hours thereof.

A written report, stating the basis for the decision, shall be issued by the hearing officer within fifteen (15) days of the actual hearing date. Said report shall state the hearing officer's rationale, conclusions, and decision. The original of the report shall be filed with the clerk of the beer board with copies provided to the parties or counsel of record for the parties and to the chairperson of the beer board.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-201. Pre-hearing conference.

The written report shall be presented to the beer board at the next scheduled meeting after being received by the Regulatory Unit. At that meeting, the beer board shall vote to affirm or reject the findings of the Hearing Officer. If the board rejects the findings of the Hearing Officer, the board must state their rationale on the record and impose alternate sanctions or dismissal of the citation.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-202. Subpoenas.

At least ten (10) working days prior to the date of the hearing, all parties shall provide the clerk of the beer board with a list of the individuals they wish to have subpoenaed to appear at the hearing. The clerk

of the beer board has the discretion to determine whether any subpoenas not timely requested under this provision shall issue. It shall not be a basis for requesting a continuance that a witness subject to a subpoena requested in an untimely manner failed to appear at the hearing.

The subpoena request list must be typed and include the name, address, and phone number (business and home, if possible) of the individuals to be subpoenaed. If a subpoena duces tecum is requested, the nature of the documents or information sought by the party requesting the subpoena duces tecum must be set out on the subpoena request list.

The subpoenas may be served by a police officer of the city or by any officer authorized to serve subpoenas in state court. It shall be the responsibility of the requesting party to ensure that service is proper and complete.

A copy of any transcript prepared shall be retained permanently by the clerk of the beer board.

The clerk of the beer board shall not be required to obtain a transcript of any proceeding until the clerk has received a copy of a petition for judicial review of the matter in question.

Upon receipt of a copy of a petition for judicial review, it shall be the responsibility of the clerk of the beer board to have prepared a transcript of the proceedings. The clerk of the beer board shall send the original or a certified copy of the entire record of the proceeding under review to the reviewing court pursuant to Tennessee state law; unless a longer period of time is granted by the court.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-204. Appeals.

A final decision of the beer board may be appealed pursuant to T.C.A. § 57-5-108.
(Ord. No. 14167(2), § 1, 11-5-24)

Sec. 5-205. Fines utilized to pay hearing expenses.

The funds derived from fines assessed against holders of beer permits shall be placed in a separate fund which shall be utilized: (1) to defray the costs and expenses associated with providing hearings pursuant to this part (such costs and expenses shall include, but not be limited to, equipment and supplies utilized by the clerk of the beer board with respect to such hearings regardless of whether such equipment and supplies are utilized for other purposes in addition to beer board uses); and (2) to the extent that the monies in this separate fund exceed fifty thousand dollars ($50,000.00), the excess may be designated to fund one-time projects related to underage drinking and/or alcohol abuse, upon approval of such projects by city council.

Sec. 7-2. Definitions.

For the purposes of this chapter, the following words and phrases shall have the meanings respectively ascribed to them by this section:

Abandon: Forsake, desert or absolutely give up an animal previously under the custody or possession of a person without having secured another owner or custodian or by failing to provide one (1) or more of the elements of adequate care for a period of twenty-four (24) or more consecutive hours.

Adequate care: The reasonable practice of good animal husbandry, handling, production, management, confinement, feeding, watering, protection, shelter, transportation, treatment and, when necessary, euthanasia, appropriate for the age, species, condition, size and type of the animal and the provision of veterinary care when needed to prevent suffering, disease, or the impairment of health. "*Adequate care*" includes adequate feed, adequate water, adequate exercise, adequate shelter, adequate space and adequate veterinary care, as those terms are defined in this article.

Adequate exercise: The opportunity for the animal to move sufficiently to maintain normal muscle tone and mass for the age, species, condition and size of the animal.

Adequate feed: The provision of and access to food that is (i) of sufficient quantity and nutritive value to maintain each animal in good health; (ii) accessible to each animal without duress or competition; (iii) prepared so as to permit ease of consumption for the age, species, condition, size and type of each animal; (iv) provided in a clean and sanitary manner; (v) placed so as to minimize contamination by excrement and pests; and (vi) provided at suitable intervals for the species, age, and condition of the animal, but at least once daily, except as prescribed by a veterinarian or as dictated by naturally occurring states of hibernation or fasting normal for the species.

Adequate shelter: The provision of and access to shelter that (i) is suitable for the species, age, condition, size, and type of each animal; (ii) provides adequate space for each animal; (iii) is safe and protects each animal from injury, rain, sleet, snow, hail, direct sunlight, the adverse effects of heat or cold, physical suffering, and impairment of health; (iv) is properly lighted; (v) is properly cleaned; (vi) enables each animal to be clean and dry, except when detrimental to the species; and (vii) for dogs and cats, provides a solid surface, resting platform, pad, floor mat, or similar device that is large enough for the animal to lie on in a normal manner and can be maintained in a sanitary manner. A shelter whose wire, grid, or slat floors sag under the animal's weight, permit the animal's feet to pass through the openings, or otherwise do not protect the animal's feet or toes from injury is not adequate shelter.

With respect to outdoor facilities for dogs or cats, "*adequate shelter*" means the provision of one (1) or more shelter structures that are accessible to each animal in each outdoor facility and that are large enough to allow each animal in the shelter structure to sit, stand, and lie in a normal manner and to turn about freely. In addition to the shelter structures, one (1) or more separate outside areas of shade must be provided, large enough to contain all the animals at one (1) time and protect them from the direct rays of the sun. Shelters in outdoor facilities for dogs or cats must (i) contain a roof, four sides, and a floor; (ii) provide the dogs and cats with adequate protection and shelter from the cold and heat, provided that no animal may be maintained in any outdoor location where the ambient temperature is under thirty-five degrees (35°) Fahrenheit or higher than one hundred degrees (100°) Fahrenheit or any indoor location where the ambient temperature is under forty-five degrees (45°) Fahrenheit or exceeds eighty-five degrees (85°) Fahrenheit; (ii) be provided with a wind break and rain break at the entrance; and (iii) contain clean, dry bedding material, with additional clean, dry bedding provided in any unheated shelter when the outside temperature is thirty-five degrees (35°) Fahrenheit or lower.

Building surfaces in contact with animals in outdoor housing facilities must be impervious to moisture. Metal barrels, cars, refrigerators or freezers, and the like must not be used as shelter structures. The floors of outdoor housing facilities may be of compacted earth, absorbent bedding, sand, gravel, or grass, and must be replaced if there are any prevalent odors, diseases, insects, pests, or vermin. All surfaces must be maintained on a regular basis. Surfaces of outdoor housing facilities including houses, dens, etc. that cannot be readily cleaned and sanitized must be replaced when worn or soiled.

Adequate space: Sufficient space to allow each animal (i) to easily stand, sit, lie, turn about and make all other normal body movement in a comfortable, normal position for the animal and (ii) to interact safely with other animals in the enclosure. Outside runs must be a least ten (10) feet long and thirty-six (36) inches wide for dogs weighing up to forty-five (45) pounds, and at least ten (10) feet long and forty-eight (45) inches wide for dogs weighing forty-five (45) pounds or more. When an animal is tethered, "*adequate space*" means a tether that permits the above actions and is (i) appropriate to the age and size of the animal; (ii) attached to the animal by a properly fitted collar, halter, or harness configured so as to protect the animal from injury and to prevent the animal or tether from becoming entangled with other objects or animals or from extending over an object or edge that could result in the strangulation or injury of the animal; and (iii) at least three (3) times the length of the animal, as measured from the tip of the nose to the base of the tail, except when

the animal is being walked on a leash or is attached by a tether to a lead line. When freedom of movement would endanger the animal, temporarily and appropriately restricting movement of the animal according to accepted veterinary standards for the species is considered provision of adequate space, provided, however, that no animal shall be tethered for more than a reasonable period.

Adequate veterinary care: Provision of medical care to alleviate suffering, prevent disease transmission and maintain health as well as provision of available care to prevent diseases through accepted practice by the American Veterinary Medical Association for the age, species, condition, size, and type of each animal.

Adequate water: The provision of and access to clean, fresh, potable water of a drinkable temperature which is provided in a suitable manner, in sufficient volume, and at suitable intervals, but at least once every eight (8) hours, to maintain normal hydration for the age, species, condition, size, and type of each animal, except as prescribed by a veterinarian or as dictated by naturally occurring states of hibernation or fasting normal for the species. Such water shall be provided in clean, durable receptacles that are accessible to each animal and placed so as to minimize contamination of the water by excrement or pests. Alternatively, provision of an alternate source of hydration consistent with generally accepted husbandry practices may be provided.

Following the first two (2) inoculations, booster inoculations will be due at either one (1) year or three (3) year intervals in accordance with the approved duration of immunity of the specific vaccine used and the species inoculated. The required due date for reinoculation shall be placed on the certificate by the veterinarian administering the vaccine. During such confinement, the dog or cat shall be under the observation and supervision of the Health Director or his designee. After the termination of the observation period, said animal shall be released or, if the animal is determined by a veterinarian or the Health Director or his designee to have rabies, it shall be humanely destroyed according to instructions from the Health Director. The Health Director may order the Animal Center to destroy such dog or cat at any time during the period of observation if evidence is such as to convince the Health Director that the dog or cat has rabies. The owner of such dog or cat shall be liable for board fees in the amount of ten dollars ($10.00) per day if such dog or cat is confined at the Animal Center. Such costs as well as all veterinary costs and/or other costs incurred as a result of the impound shall be the responsibility of the owner and shall be required to be paid in full whether the animal is reclaimed, relinquished to the Animal Center, or ordered by the Health Director to be destroyed.

Sec. 7-46. Unlawful use of an animal.

Any animal that is used in the commission or furtherance of any criminal activity shall be subject to seizure by an Animal Services Officer or law enforcement officer and processed in accordance with the provisions of this article or any other applicable law.

Secs. 7-47—7-54. Reserved.

ARTICLE IV. BARKING DOGS

Sec. 7-55. Definition.

(a) As used in this article, "barking dog" means any dog which, by causing frequent or long, continued noise for an extended period of time, disturbs the comfort or repose of any person in a residence, hotel, motel or hospital or creates any other noise that a reasonable person would find distressing or disruptive, regardless whether the dog is physically situated in or upon private property. An "extended period of time" means that in a twenty-four (24) hour period, the dog either:

(1) Barks incessantly for fifteen (15) minutes or more; or

(2) Barks intermittently for thirty (30) minutes or more.

(b) A dog shall not be deemed a "barking dog" for purposes of this chapter if, at any time the dog is barking, a person is trespassing or threatening to trespass upon private property in or upon which the dog is situated, or when the dog is being teased or provoked or is responding to an emergency.

Sec. 7-56. Barking dogs generally.

(a) It shall be unlawful for a barking dog, as defined by this article, to exist in the City.

(b) For purposes of this article, a violation occurs when:

(1) A person allows a barking dog violation to exist, whether through willful action, failure to act, or failure to exercise proper control over a barking dog;

(2) A person whose agent, employee, or independent contractor allows a barking dog violation to exist, whether through willful action, failure to act, or failure to exercise proper control over a barking dog; or

(3) A person who is the owner of, or a person who is a lessee or sub-lessee with the current right of possession of, real property allows a barking dog violation to exist in or upon said property.

(c) For purposes of this section, there may be more than one (1) person responsible for a barking dog violation.

Sec. 7-57. Citation for barking dog.

(a) Animal Services Officers or law enforcement officers have the authority to issue a citation to any person responsible for a barking dog violation if probable cause exists based upon the officer's investigation.

(b) For the first violation, the person responsible for a barking dog shall be given a ten (10) day warning period within which to correct the problem before a citation for a barking dog is issued.

(c) Each day a barking dog violation exists shall be a separate violation, with the person responsible for the barking dog violation subject to a separate citation and fine for each such violation. A barking dog citation may include a violation for one (1) or more days on which a violation exists and for violation of one (1) or more Code sections.

Secs. 7-58—7-62. Reserved.

ARTICLE V. POTENTIALLY DANGEROUS AND DANGEROUS DOGS*

Sec. 7-63. Findings.

(a) Dangerous dogs have become a serious and widespread threat to the safety and welfare of citizens and companion animals of this City. In recent years, dogs have assaulted without provocation and seriously injured numerous individuals, particularly children, and have killed other animals. Many of those attacks have occurred in public places.

(b) Such attacks are often attributable to the failure of owners to confine and properly control dangerous and potentially dangerous dogs.

(c) Issues related to dangerous and potentially dangerous dogs necessitate the citywide regulation and control of such dogs.

Sec. 7-64. Citation, hearing, designation, and imposition of conditions for Potentially Dangerous Dog or Dangerous Dog; no change of ownership pending hearing.

(a) If an Animal Services Officer or a law enforcement officer has investigated and determined that there is probable cause to believe that a dog is potentially dangerous or dangerous, a citation shall be issued for the owner to appear in City Court for the purpose of determining whether the dog in question should be designated as a Potentially Dangerous Dog or Dangerous Dog. Except by agreement of the dog's owner and counsel for the City, a hearing shall be held not less than five (5) nor more than fifteen (15) days after service of the citation upon the owner or keeper of the dog.

(b) The Court may designate a dog as a "Potentially Dangerous Dog" if the Court finds, by a preponderance of the evidence, that the dog:

(1) Has, without provocation, chased or approached a person in either a menacing fashion or an apparent attitude of attack while the dog was off the property of its owner;

(2) Has attempted to attack or has attacked a person or domestic animal while on or off the property of its owner;

(3) Has, while off the property of its owner, engaged in any behavior when unprovoked that reasonably would have required a person to take defensive action to prevent bodily injury;

(4) Has, without provocation, bitten a person or a domestic animal causing an injury while on or off the property of its owner; or

(5) Has engaged in other comparable conduct.

***Note—**Formerly Article VIII. (Ord. No. 12343, 1-26-10)

(c) The Court may designate a dog as a "Dangerous Dog" if the Court finds, by a preponderance of the evidence, that the dog:

(1) Has, without provocation, chased or approached a person in either a menacing fashion or an apparent attitude of attack on two (2) or more occasions within the prior eighteen (18) month period while the dog was off the property of its owner;

(2) Has attacked or attempted to attack a person or domestic animal on two (2) or more occasions within the prior eighteen (18) month period while the dog was on or off the property of its owner;

(3) Has, without provocation, bitten a person or a domestic animal causing a severe injury while on or off the property of its owner;

(4) Has been owned, possessed, kept, used or trained in violation of Tennessee Code Annotated § 39-14-203;

(5) Is currently designated a Potentially Dangerous Dog but has not been kept in compliance with the restrictions that a court of competent jurisdiction has placed on the owner of the dog, and such dog has engaged in the conduct described in subsections (b) and (c) of this section that could result in a Potentially Dangerous Dog or Dangerous Dog designation; or

(6) Has engaged in other comparable conduct.

(d) No dog may be declared potentially dangerous or dangerous if:

(1) At the time of the injury or damage, the victim of the injury or damage was (i) committing a willful trespass or other tort upon premises occupied by the owner or keeper of the dog; (ii) teasing, tormenting, abusing or assaulting the dog; or (iii) committing or attempting to commit a crime;

(2) The dog was protecting or defending a person within the immediate vicinity of the dog from an unjustified attack;

(3) Injury or damage was sustained by a domestic animal that, at the time of the injury or damage, was tormenting, abusing or assaulting the dog;

(4) Injury or damage was sustained by a domestic animal while the dog was working as a hunting dog, herding dog or predator control dog on the property of, or under the control of, its owner or keeper, and the damage or injury was appropriate to the work of the dog; or

(5) Injury to a person or domestic animal occurs while the dog is being used by a law enforcement officer to carry out the officer's official duties.

(e) Upon designating a dog as a Potentially Dangerous Dog or a Dangerous Dog, the City Court is authorized to impose on the owner of such dog the restrictions set forth in this article and to impose such additional restrictions on said owner as are appropriate under the circumstances of the case. The Court shall reduce such restrictions to writing and provide a copy to the owner.

(f) It shall be unlawful for any person who is subject to any such restrictions to fail to comply with such restrictions.

(g) It shall be unlawful for any person who has been served with a citation to appear in City Court for the purpose of determining whether such person's dog should be designated as a Potentially Dangerous Dog or Dangerous Dog to transfer ownership of such dog until after the City Court has issued a ruling on such a citation.

(h) It shall be unlawful for any person whose dog has been designated as a Potentially Dangerous Dog or Dangerous Dog to transfer ownership of such dog to another person without (i) having advised such other person that the dog has been designated as a Potentially Dangerous Dog or Dangerous Dog and (ii) having advised such other person in writing of the restrictions that have been placed upon such dog.

Sec. 7-65. Notice of designation.

Within ten (10) working days after a hearing conducted pursuant to this article, the owner or keeper of the dog, if absent from the hearing, shall be notified by the City Court in writing, by first-class mail, postage prepaid, of the decision of the Court and of any requirements and/or restrictions imposed upon that person. If a dog is declared to be a Potentially Dangerous Dog or a Dangerous Dog, the owner or keeper shall comply with all restrictions imposed by this article and by the City Court.

Sec. 7-66. Impoundment and disposition of Potentially Dangerous Dog or Dangerous Dog.

(a) If upon investigation an Animal Services Officer or law enforcement officer determines that probable cause exists to believe that a dog poses an immediate threat to public safety, then the Animal Services Officer or law enforcement officer may immediately seize and impound the dog pending a hearing to be held pursuant to this article. At the time of the impoundment or as soon as practicable thereafter, the officer shall serve upon the owner or custodian of the dog a notice stating the time and location that a hearing will be held to determine whether to declare the dog potentially dangerous or dangerous.

(b) An Animal Services Officer or law enforcement officer may impound any Potentially Dangerous Dog or Dangerous Dog if the officer has reasonable cause to believe that any of the requirements or restrictions upon such dog are not being followed and that such failure to follow the requirements or restrictions would likely result in a threat to public safety. The owner or custodian of such Potentially Dangerous Dog or Dangerous Dog shall surrender the dog to an Animal Services Officer or law enforcement officer upon demand, and the officer shall promptly serve a citation upon the owner of such dog for violation of the provisions of this chapter and notify the owner of a hearing date before a City Court judge to contest the charges.

(c) No dog that has been designated by the Court as a Potentially Dangerous Dog or Dangerous Dog may be released by the Animal Center until the owner has paid to the Animal Center all fees and costs that are normally charged to an owner prior to redemption of an animal. If the owner fails to pay such fees and costs and to take possession of the dog within ten (10) days of the owner's receipt of notice of the dog's designation as a Potentially Dangerous Dog or Dangerous Dog, the dog shall be deemed to have been abandoned and may be disposed of by the Animal Center. Euthanasia or surrender to the Animal Center of such a dog does not free the owner of responsibility for all costs incurred up to and including the date of the euthanasia or surrender.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-67. Possession unlawful without proper restraint; failure to comply with restrictions.

(a) It shall be unlawful for a person to have custody of, own, or possess a Potentially Dangerous Dog or a Dangerous Dog that is not properly restrained.

(b) It shall be unlawful for a person to have custody of, own, or possess a Potentially Dangerous Dog or a Dangerous Dog unless such person is in full compliance with all restrictions placed upon such person by the Court that has designated such dog as a Potentially Dangerous Dog or a Dangerous Dog.

Sec. 7-68. Requirements and restrictions on Potentially Dangerous Dogs.

(a) Once a City Court judge designates a dog as a Potentially Dangerous Dog, the judge may impose any or all of the following restrictions upon the owner or custodian of the dog:

(1) The dog must be kept indoors or confined on the owner's or keeper's property by a fence (other than an electronic fence) capable of confining the dog or by a proper enclosure;

(2) The owner must allow inspection of the dog and its enclosure by the Animal Center and must produce, upon demand, proof of compliance with all Court-imposed requirements and restrictions;

(3) The dog shall wear a collar and/or tag that visually identifies the dog as being potentially dangerous (purchased through the Animal Center, as set forth in Section 7-18(c));

(4) The owner and dog must attend and complete a course on commonly accepted dog obedience methods approved by the Animal Center;

(5) The owner and dog must attend and successfully complete an American Kennel Club Canine Good Citizen course and test within a time specified by the Court;

(6) The dog must be spayed or neutered at the owner's expense; and

(7) An identification microchip must be implanted in the dog, with the serial number of the microchip supplied to the Animal Center.

(8) Any other requirement or restriction that the Court deems necessary.

(b) The cost of all requirements and restrictions must be paid by the owner.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-69. Requirements and restrictions on Dangerous Dogs.

(a) Once a City Court judge designates a dog as a Dangerous Dog, the judge may impose any or all of the following restrictions upon the owner or custodian of the dog:

(1) The dog must be kept in a proper enclosure if the dog is maintained unattended out-of-doors. Such proper enclosure must be enclosed within an outer fence, and the outer perimeter of the proper enclosure must be no less than five (5) feet from the outer fence;

(2) The owner must allow inspection of the dog and its enclosure by the Animal Center and must produce, upon demand, proof of compliance with all Court-imposed requirements and restrictions;

(3) The dog shall wear a collar and/or tag that visually identifies the dog as being dangerous (purchased through the Animal Center, as set forth in Section 7-18(c));

(4) The owner and dog must attend and complete a training class and/or behavior modification course approved by the Animal Center that is designed to teach the owner how to deal with, correct, manage and/or alter the problem behavior;

(5) A sign having reflective letters and backing, with letters measuring at least one and one-half (1.5) inches in width and one and one-half (1.5) inches in height and reading "Beware of Dangerous Dog" shall be posted in a conspicuous place at all entrances to the premises on or within which such dog is kept. The cost of such signs, available exclusively from the Animal Center, shall be included in the annual fee for a Dangerous Dog;

(6) A Dangerous Dog shall not be permitted to leave the premises of the owner unless such dog is properly restrained and humanely muzzled for protection of persons and other animals;

(7) A Dangerous Dog may never, even with the owner present, be allowed to be unrestrained on property that allows the dog direct access to the public;

(8) The owner of a Dangerous Dog shall not permit the dog to be chained, tethered or otherwise tied to any inanimate object such as a tree, post or building, inside or outside of its own separate enclosure;

(9) The dog shall be photographed by the Animal Center for future identification purposes;

(10) The dog must be spayed or neutered at the owner's expense;

(11) An identification microchip must be implanted in the dog, with the serial number of the microchip supplied to the Animal Center;

(12) The owner of the dog or owner of the premises on which the dog is kept shall be required to obtain and maintain liability insurance in the amount of one hundred thousand dollars ($100,000.00) and to furnish a certificate of insurance to the Animal Center;

(13) The owner of the dog shall maintain and update annually a record with the Animal Center that contains:

(i) Contact information for the dog's owner(s) or agent, emergency contact persons, veterinarian, and landlord and/or property owner;

(ii) Information about property/liability insurance;

(iii) The dog's inoculation records and license numbers;

(iv) A photo of the animal; and

(v) Any other information deemed necessary by the Animal Center.

(14) Samples preserved for possible DNA identification must be delivered to the Animal Center;

(15) The owner shall notify the Animal Center in writing of the location of the dog's residence, temporary or permanent, and shall notify the Animal Center in writing in advance of plans to move the dog to another residence within the City or outside the City and/or to transfer ownership of the dog; and

(16) Any other requirement or restriction that the Court deems necessary.

(b) The cost of all requirements and restrictions must be paid by the owner.

(c) The designation of Dangerous Dog and the requirements and restrictions imposed on such dog remain in effect for the life of the dog. A Dangerous Dog designation shall not be removed.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-70. Removal of designation of Potentially Dangerous Dog.

If there are no additional instances of the behavior described in Section 7-59(b) within eighteen (18) months of the date of designation as a Potentially Dangerous Dog, the dog shall automatically be removed from the list of Potentially Dangerous Dogs. The dog may be, but is not required to be, removed from the list of Potentially Dangerous Dogs prior to the expiration of the eighteen (18) month period if: (i) the owner or keeper of the dog demonstrates to the Animal Center, and the Animal Center confirms, that changes in circumstances or measures taken by the owner or keeper, such as training of the dog or confinement, have mitigated the risk to public safety; and (ii) the owner or the Animal Center petitions the City Court to remove such designation, and the Court agrees to do so.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-71. Change of ownership, custody or location of dog; death of dog.

(a) The owner or custodian of a Potentially Dangerous Dog or Dangerous Dog who moves or sells the dog, or otherwise transfers the ownership, custody or location of the dog, shall, at least fifteen (15) days prior to the actual transfer or removal of the dog, notify the Animal Center in writing of the name, address and telephone number of the proposed new owner or custodian, the proposed new location of the dog, and the name and description of the dog.

(b) In addition to the requirements in subsection (a) above, the owner or custodian shall notify any new owner or custodian of a Potentially Dangerous Dog or Dangerous Dog in writing regarding the details of the dog's record and the requirements and restrictions imposed by the Court. The transferring owner or

custodian shall also provide the Animal Center with a copy of the notification given to the new owner or custodian and proof that the new owner or custodian received the notification and agreed to accept and abide by the requirements and restrictions placed on the dog.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-72. Escape, death of Potentially Dangerous Dog or Dangerous Dog.

(a) If a Potentially Dangerous Dog or Dangerous Dog escapes, the owner or custodian shall immediately notify the Animal Center and make every reasonable effort to recapture the escaped dog to prevent injury and/or death to humans or domestic animals.

(b) If a Potentially Dangerous Dog or Dangerous Dog dies, the owner or custodian shall notify the Animal Center no later than twenty-four (24) hours thereafter and, upon request from the Animal Center, shall produce the animal for verification or evidence of the dog's death that is satisfactory to the Animal Center.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-73. Dogs designated outside City as potentially dangerous or dangerous.

(a) The owner of a dog designated as a Potentially Dangerous Dog, a Dangerous Dog, or any similar designation is subject to the restrictions set forth in this chapter while said dog is located within the city limits of Chattanooga.

(b) The following persons must notify the Animal Center when relocating a dog to Chattanooga, even on a temporary basis:

(1) The owner of a Potentially Dangerous Dog or Dangerous Dog that has been designated as such by another lawful body other than the City of Chattanooga; and

(2) The owner of a dog that has had special restrictions placed on it by any humane society or governmental entity or agency other than the City of Chattanooga based upon the behavior of the dog.

(c) No such designation as a Potentially Dangerous Dog or Dangerous Dog or any similar such designation shall be recognized by the City of Chattanooga if such designation is based solely on the breed of the dog.

ARTICLE VI. IMPOUNDMENT, REDEMPTION AND DISPOSITION OF ANIMALS

Sec. 7-80. Impoundment, destruction of violating animals authorized.

(a) The Animal Center is authorized to seize and impound any animal found running at large and/or in violation of this chapter.

(b) If, in the attempt to seize an animal, it becomes impossible to do so with the hands, any Animal Services Officer or law enforcement officer, being convinced that seizure of the animal is necessary to public welfare by reason of its viciousness or infection with rabies, may, at his or her discretion, tranquilize the animal, or a law enforcement officer may dispose of the animal by shooting it. If any animal so impounded is found to be neonatal, suffering in pain, sick, injured, contagious, carrying a zoonotic disease or vicious, the animal may be immediately destroyed in a humane manner as provided in Section 7-80.

(c) The animal's owner shall be responsible for all expenses incurred during the animal's impoundment. (Ord. No. 12880, § 1, 11-18-14)

Sec. 7-81. Seizure of at-large animals upon return to property.

(a) An Animal Services Officer or law enforcement officer may, upon viewing an animal at large, return the animal to its owner's property or impound such animal for safe keeping if, in the opinion of the officer:

(1) There is no way to ensure the animal's confinement to the property if the officer were to leave it there to await the owner's return;

(2) It could present a danger to the public, traffic or other animals if left until the owner returns; or

(3) The animal is not considered to be under control at the time of impoundment.

(b) This section does not authorize the entry into any building or enclosure on the property, nor the removal, without a search warrant or the tenant's or property owner's written permission, of any animal from any building or enclosure on the property.

Sec. 7-82. Notification of impoundment.

(a) Upon impounding an animal, the Animal Center or its designee shall give notice of such seizure by one (1) of the following methods:

(1) By delivering a notice of impoundment to a person believed to be residing at the property where the animal is believed to reside within twenty-four (24) hours of the time the animal was seized;

(2) By posting a copy of the notice of impoundment on the front door or entrance of the animal owner's property or in a place on the owner's property that is visible from the public right-of-way or at the property location at which an Animal Services Officer reasonably believes the animal may reside; or

(3) By letter sent by certified mail via the United States Postal Service to the address of the owner, if known, within two (2) days after the seizure of such animal.

(b) The notice or letter shall inform the owner of the conditions whereby the animal may be redeemed, including, if applicable, the court date for contesting the impoundment. Notice shall not be required for animals that have been abandoned or relinquished by their owner.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-83. Redemption of impounded animals by owner; fees.

(a) The owner of any animal confined in the Animal Center may, before the expiration of the legal holding period, redeem the animal upon payment of the assessed fees and production of proof of ownership, as described herein, unless said owner has been directed to appear in City Court for a violation involving said animal.

(b) If allowed to reclaim an impounded animal, the owner of a dog or cat impounded for the first time may claim and redeem it upon payment of the license fee required by this chapter and an impound fee of twenty dollars ($20.00) plus board for each day the dog or cat has been kept at the Animal Center at the rate of ten dollars ($10.00) per day. Each subsequent time said dog or cat is impounded, the impound fee shall be fifty dollars ($50.00) in addition to the board of ten dollars ($10.00) per day and the license fee, if applicable. All veterinary costs and other costs incurred as a result of impound shall be the responsibility of the owner and shall be required to be paid in full whether the animal is reclaimed or relinquished to the Animal Center.

(c) If allowed to reclaim impounded livestock, the owner of said livestock may claim and redeem such animal by paying the Animal Center an impound fee of fifty dollars ($50.00) and board for each day at the rate of ten dollars ($10.00) per day plus the cost of transporting the animal to the shelter. Such costs, as well as all veterinary costs and other costs incurred as a result of the impound, shall be the responsibility of the owner and shall be required to be paid in full whether the animal is reclaimed or relinquished to the Animal Center.

(d) To redeem or adopt an animal, a person must be at least eighteen (18) years of age, provide photo identification, and provide a recent utility bill or other proof of legitimate residency.

(e) If the owner of an impounded animal is not allowed to reclaim the animal before a court hearing, said owner shall be entitled to a hearing before the City Court within fourteen (14) days of the impoundment of the animal to contest the impoundment.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-84. Disposition of unclaimed dogs or cats.

(a) Any dog or cat with a current tag, registered microchip, or other identification that has been impounded shall be kept for a period of ten (10) days after certified notice is mailed to the owner, and if not redeemed within such period, may be humanely destroyed or otherwise disposed of as provided by law.

(b) Any dog or cat without a current tag, registered microchip, or other identification that has been impounded shall be kept for a period of five (5) days and, if not claimed or redeemed within such period, shall be humanely destroyed or otherwise disposed of as provided by law.

(c) Litters of puppies or kittens estimated to be less than six (6) months of age, as determined by the emergence of adult canine teeth, without an actively nursing mother shall have no required holding period for disposition. For this section, a "litter" shall be considered two (2) or more animals of apparently the same age and breed/mix.

(d) All dogs and cats that are so unsocialized as to pose a threat to the safety and welfare of the Animal Center employees or the public shall be expeditiously and humanely euthanized.

(e) The Animal Center shall not be required to shelter or care for any feral, wild or exotic animals.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-85. Requirements for redeeming or adopting animals.

(a) No person shall adopt a dog or cat from a releasing agency, including the Animal Center or private organization operating a shelter from which animals are adopted or reclaimed, unless the dog or cat has first been spayed or neutered.

(b) The releasing agency may require the new owner to pay a fee for the spaying or neutering of the animal. The provisions of this section shall not apply to persons selling or giving away animals from a residence, business or retail pet facility.

(c) Except for dogs and cats for which the owner can provide proof of inoculation, all dogs and cats redeemed from the Animal Center shall be inoculated against rabies prior to redemption, provided that if the dog or cat is less than three (3) months old, a deposit of not less than ten dollars ($10.00) shall be collected from the person redeeming the animal, which shall be refunded upon presentation of proof of rabies inoculation within fifteen (15) days of the animal reaching four (4) months of age. In the alternative, a person

adopting a dog or cat may prepay the cost of such inoculation at the Animal Center; such person must obtain the inoculation within fifteen (15) days of the adoption of such dog or cat if the animal is over three (3) months of age or within fifteen (15) days of the dog or cat reaching three (3) months of age.
(Ord. No. 12880, § 1, 11-18-14)

State law reference—T.C.A. § 44-17-502.

Sec. 7-86. Keeping stray animals; failure to surrender stray animal.

It shall be unlawful for any person in the City to knowingly and intentionally harbor or keep in possession by confinement or otherwise any animal that does not belong to such person without permission of the owner. Any person within twenty-four (24) hours from the time such animal came into his or her possession must surrender the animal to the Animal Center. Upon receiving said animal, an Animal Services Officer shall take such animal and place it in the Animal Center for a required legal stray hold period of five (5) days. If such animal is not reclaimed after five (5) days, the person who possessed and surrendered the animal may apply through normal process and fees to become the adoptive owner of the animal. The expense of sheltering fees, license fee and rabies inoculation must be assumed by the owner if the animal is reclaimed prior to the end of the five (5) days. No person harboring such an animal shall refuse to relinquish such animal to its legal owner prior to the expiration of said five (5) days.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-87. Immediate placement for adoption or destruction of animal surrendered by owner.

An animal surrendered by its owner to the Animal Center may be immediately placed for adoption or humanely destroyed in the discretion of the Director or the Director's designee when the owner:

(a) Affirmatively represents by affidavit that he or she is in fact the legal owner of said animal;

(b) Agrees to hold the Animal Center and its officials and employees harmless from any liability, claims, or damages that may be sustained by reason of the adoption or destruction of said animal; and

(c) Transfers ownership of said animal to the Animal Center.
(Ord. No. 12880, § 1, 11-18-14)

Sec. 7-88. Destruction of dangerous, diseased or injured animals.

(a) It shall be the duty of the Director to order the humane destruction of any animal lawfully in the custody of the Animal Center if it is deemed more humane to euthanize such animal than to hold it for the required holding period if it is diseased, significantly injured, suffering, neonatal, feral, highly aggressive, or so unsocialized as to cause a danger to the Animal Center employees or the public, and due to such condition is an improbable candidate for adoption. Such determination shall be made by the Director, a licensed veterinarian or two (2) reputable, experienced employees in the animal welfare field by viewing the animal and giving written certification of the animal's condition. The Director may order euthanasia of the animal either by written authorization or by verbal authorization followed by written confirmation.

(b) If the determination is made under subsection (a) to euthanize the animal, and the animal's owner can be identified, such as through a registered microchip, tattoo or collar with identification, a reasonable attempt shall be made to notify the owner before the animal is euthanized, provided, however, that if the animal is in critical condition and the owner cannot be reached within a reasonable time, the animal may be euthanized for humane reasons.

(c) If the determination is made under subsection (a) to euthanize the animal, and the animal has no detectable identification, the animal may be euthanized immediately. In no event shall the disposition of the animal be delayed beyond forty-eight (48) hours after it is determined that said animal should, for humane reasons, be destroyed by humane euthanasia.

ARTICLE VII. TRAPPING ANIMALS*

Sec. 7-96. Definition.

As used in this article, "trapping" means taking, killing or capturing wildlife by the use of any trap, snare, deadfall or other device commonly used to capture wildlife, and the shooting or killing of wildlife lawfully trapped, and includes all lesser acts such as placing, setting or staking such traps, snares, deadfalls or other devices, whether or not such acts result in the taking of wildlife, and every attempt to take and every act of assistance to any other person in taking or attempting to take wildlife with traps, snares, deadfalls or other devices.

State law reference—T.C.A. §§ 70-4-120, 70-4-113.

Sec. 7-97. Poisoning or trapping animals.

It shall be unlawful to trap animals within the City unless a humane trap is used and the animal is humanely destroyed or relocated as is allowed by this chapter. This shall not be deemed to apply to setting traps for vermin in any house or other building or to apply to any licensed trapper removing nuisance or destructive wildlife. It shall be unlawful for any person to poison or trap any animal or to aid, abet or assist in the poisoning or trapping of any animal or the putting out or placing of poison or a trap at any place outside of buildings within the City where companion animals may secure or encounter the poison or trap; provided, however, that in instances where any animal by reason of damage to property, danger to life, or threat to public health becomes a nuisance, a live, humane trapping method may be used. This provision shall not be construed to prohibit or conflict with the trapping of wildlife in accordance with State law.

Sec. 7-98. Exception.

This article shall not apply to animal traps set by the Animal Center pursuant to Section 7-7.

Any person violating the provisions of this chapter may be subject to a civil penalty or fine of up to fifty dollars ($50.00) for each violation.

Sec. 7-143. Severability.

If any provision of this chapter or the application thereof to any person or circumstance is held invalid, that invalidity shall not affect other provisions or applications of the chapter which can be given effect without the invalid provision or application, and to this end the provisions of this chapter are severable.

Nothing in this chapter shall affect the authority of any law enforcement officer to respond appropriately to any situation in which there is an imminent threat by an animal to the safety of any person. This chapter shall not prohibit the seizure or impoundment of dogs as evidence, as provided for under any other provision of law, nor shall any other laws, whether local or state, be affected by this chapter.

Sec. 7-145. Urban chickens.

(a) *Purpose.* The purpose of this provision is to provide standards for the keeping of urban chickens. It is intended to enable city residents to keep a small number of female chickens (hereinafter "laying hens") on a noncommercial basis while limiting the potential adverse impacts on the surrounding neighborhood. The city recognizes that adverse neighborhood impacts may result from the keeping of urban chickens as a result of noise, odor, unsanitary animal living conditions, unsanitary waste storage and removal, the attraction of predators, rodents, insects, parasites, and non-confined animals leaving the owner's property. This section is intended to create standards and requirements on a trial basis to determine that urban chickens do not adversely impact the neighborhood surrounding the property on which urban chickens are kept.

(b) *Number and type of chickens allowed in all residential zones.*

1) Only female chickens (hereinafter "laying hens") are allowed. No roosters shall be allowed to be kept in any zone other than an A-1 agricultural zone. There is no restriction on urban chicken breeds of the species gallus domesticus. However, it shall be unlawful for any person to keep ducks, geese or other fowl and poultry, other than laying hens which are allowed subject to the limitations of this section;

2) Up to eight (8) laying hens are allowed on any single family residential lot or other residential zones with designated rear yards for dwellings. Up to twenty (20) laying hens per acre are allowed within the A-1 Agricultural Zone subject to the provisions of this Ordinance. In the case of multifamily residential zones, without individually owned rear yards, the maximum number of laying hens allowed for all residential units is ten (10) per complex to be maintained on common property;

3) Chicken enclosures shall only be kept as an accessory use to a residence and subject to the distance setbacks for other accessory structures from adjoining properties. Enclosures shall not be permitted on vacant lots;

4) For the purposes of this section, juvenile chicks shall be counted against the limits of the number of permitted laying hens in subsection (b)(1) hereinabove; and

5) Incubation and hatching of chicks shall not be permitted in any zone other than an A-1 agricultural zone.

(c) *Noncommercial use only.* Laying hens shall be kept for personal use only; no person shall sell eggs or engage in chicken breeding or fertilizer production for commercial purposes pursuant to this ordinance. No laying hens shall be used or trained for the purpose of fighting for amusement, sport, or financial gain.

(d) *Fenced enclosures and henhouses.*

1) Laying hens must be kept in a fenced enclosure in the rear yard at all times. The fenced enclosure must be either: (i) covered or (ii) at least forty-two (42) inches high, in which case, all hens must be wing-clipped to prevent escape. Laying hens shall be secured within the henhouse during non-daylight hours;

2) In addition to the fenced enclosure, laying hens shall be provided with a covered, predator-resistant henhouse;

3) A minimum of two (2) square feet per hen shall be provided for henhouses and six (6) square feet per bird for fenced enclosures;

4) Fenced enclosures and henhouses must be properly ventilated, clean, dry, and odor-free, kept in a neat and sanitary condition at all times, in a manner that will not disturb the use or enjoyment of neighboring properties due to noise, odor or other adverse impact;

5) The henhouse and fenced enclosure must provide adequate ventilation and adequate sun and shade, and must be constructed in a manner to resist access by rodents, wild birds, and predators, including dogs and cats;

6) Henhouses shall be enclosed on all sides and shall have a roof and doors. Access doors must be able to be shut and locked at night. Opening windows and vents must be covered with predator- and bird resistant wire of less than one (1) inch openings;

7) The henhouse shall be well-maintained and there shall be no outside slaughtering of any laying hens in the City;

8) Henhouses shall be located in compliance with the setback restrictions for accessory structures in the City of Chattanooga Zoning Regulations;

9) Neither the henhouse nor the fenced enclosure may be located less than five (5) feet from any abutting property line and must be at least fifty (50) feet from any stream or running surface water;

10) Any laying hens must be kept in a secure enclosure at all times;

11) Henhouses and enclosures shall not be permitted in front or side yards;

12) The materials used in making the enclosure shall be uniform for each element of the structure within the city such that the walls are made of the same materials, the roof has the same shingles or other covering, and any windows or openings are constructed using the same materials. The use of scrap, waste board, sheet metal, or similar materials to construct the enclosure is prohibited. Enclosures shall be maintained in good, neat, and serviceable condition;

13) There shall be no more than one such enclosure per lot and no such enclosure shall exceed eight feet in height measured from the highest point on the roof to ground level; and

14) Mobile henhouses and enclosures shall be permitted so long as they meet all other requirements of the ordinance and are only moved within the setback requirements in the rear yard.

(e) *Food storage and removal.* All stored food for the laying hens must be kept either indoors or in a weather-resistant container designed to prevent access by animals. Uneaten food shall be removed daily.

(f) *Waste storage and removal.* Provision must be made for the storage and removal of chicken manure. All manure for composting or fertilizing shall be contained in a well-aerated garden compost pile setback from adjoining properties. All other manure not used for composting or fertilizing shall be removed. In addition, the henhouse and surrounding area of any enclosure must be kept free from trash and accumulated droppings.

(g) *All other rules of this code apply.* In addition to the standards set forth in this ordinance, all individuals keeping urban chickens must follow all other applicable rules for the keeping of animals included in this chapter subject to inspection by Land Development officers.

(h) *Private Property Restrictions.* No property owner or occupant shall be entitled to keep laying hens as otherwise provided for herein in contravention of any established private subdivision restrictive covenants and/or Homeowner Association limitations applicable to the property.

(i) *Penalty.* In addition to any other enforcement action which the city may take, violation of any provision of this section shall be a civil penalty which may be imposed by an Administrative Hearing Officer. Each day that a violation continues will be treated as a separate offense.

(j) *Enforcement.* Enforcement of this ordinance shall be administered through the City's contracted Animal Services provider. This ordinance may also be enforced by the Land Development Office as needed. Violations and civil penalties shall be enforced through the Administrative Hearing Officer. This ordinance shall be reviewed on an annual date on or before one (1) year after it takes effect to determine whether this ordinance has not adversely impacted neighborhoods surrounding the property on which urban chickens are kept.

(k) *Severability.* In the event that any portion of this section shall be declared by any competent court to be invalid for any reason, such decision shall not be deemed to affect the validity of any other portion of this section.

(c) Obligations that may reasonably be construed as being imposed against either the owner of or person responsible for a pet dog or the owner(s), agent(s) and/or employee(s) of the restaurant may be enforced against the owner of or person responsible for the pet dog or the owner(s), agent(s) and/or employee(s) responsible for the violation or both.

(d) A violation of this Article by the holder of the Permit may result in a hearing before the Animal Control Board and, upon proof by a preponderance of the evidence, the suspension or revocation of the Dogs in Outdoor Dining Areas Permit. In addition, a violation of this Chapter may result in a citation to City Court and, upon conviction, a fine not to exceed fifty dollars ($50.00) for each offense.

ARTICLE I. GENERAL*

Sec. 8-1. Short title.

This article shall be known, and may be cited as the "Airport Zoning Ordinance of the City of Chattanooga."
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-2. Definitions.

As used in this article, unless the context otherwise requires:

Airport means the Chattanooga Metropolitan Airport.

Airport Hazard means any structure, or tree, or use of land which obstructs the air space for the flight of aircraft in landing or taking off at the airport, or is otherwise hazardous to such landing or taking off of aircraft.

Airport Use District means that portion of property including the Direct Airport Property and the property located in the areas immediately surrounding the Direct Airport Property, which is indicated as the "Airport Use District" on the "Airport Use District" Map.

AOD Map means the Map, maintained by the City, included on the Hamilton County Geographical Information System (GIS) website, and attached as Appendix A to this Chapter 8. The City shall have the authority to update the AOD Map on the GIS website from time to time to reflect changes to the AOD based on FAA Regulations.

Airport Use District Map means the Map, maintained by the City and attached as Appendix B to this Chapter 8, showing the Airport Use District and the Direct Airport Property as of the date of adoption of this revised Chapter 8.

Authority means the Chattanooga Metropolitan Airport Authority.

Authority Designee means the person designated by the Mayor to handle all matters related to a metropolitan authority or property impacting the operation of a metropolitan authority, as further described in Section 8-9.

Direct Airport Property means the real property owned by the Authority and contiguous to the Airport as of the date of adoption of this revised Chapter 8, and shown on the Airport Use District Map.

FAA means the Federal Aviation Administration.

FAA Aviation Overlay District or AOD means that portion of the area indicated as the "FAA Aviation Overlay District" on the AOD Map, which is located within the jurisdictional limits of the City of Chattanooga.

FAA Regulation or Regulations, as applicable, means any regulation or other binding requirement of the FAA.

***Cross reference—**Zoning regulations generally, Ch. 38.

Person means any individual, firm, partnership, corporation, company, association, joint stock association or body politic, and includes any trustee, receiver, assignee, or other similar representative thereof.

Structure means any object constructed or installed by man, including, but without limitation, building, towers, smoke-stacks and overhead transmission lines.

Tree means any object of natural growth.

Zoning Ordinance means Chapter 38 of the City Code.
(Ord. No. 13218, § 1, 9-19-17)

Cross reference—Definitions and rules of construction generally, § 1-2.

Sec. 8-3. Applicability.

(a) *General.* Properties subject to the provisions of this Chapter 8 shall be referenced on the AOD Map and Airport Use District Map.

(b) *Construction with Zoning Ordinance.* This Chapter 8 is intended to govern the properties within the AOD that fall within the jurisdictional limits of the City for purposes of addressing certain requirements unique to properties in the AOD. Only to the extent this Chapter 8 does not address certain requirements or procedures, the requirements or procedures of the underlying base zone, as described in the Zoning Ordinance, shall apply; however to the extent there is a conflict between this Chapter and the Zoning Ordinance as to any properties that lie within the AOD, the provisions of this Chapter shall prevail. In the event of a discrepancy about the applicability of other portions of the City Code, the Authority Designee shall determine the appropriate application of the Code.

(c) *Purpose.* The aviation industry is unique among transportation industries, and therefore regulation of real property used for aviation purposes is unique, because the aviation industry's operations are almost wholly within federal, rather than state or local, jurisdiction. For this reason, many items related to use of real property, which are normally regulated by the City Code, are preempted by federal law when the real property in question is an airport or land adjacent to an airport, which may impact the safety of aviation operations at the airport. Therefore, this Chapter 8 (i) provides certain regulation of property that is not preempted by federal law, and (ii) makes property owners' compliance with applicable federal law a condition of the City's issuance of certain approvals or permits.

(d) *No Conflict with FAA Regulation or Other Federal Law.* Nothing in this Chapter 8 shall be deemed to in any manner waive or modify the requirements of any FAA Regulation or other federal law. Where the application of any requirement set forth in this Chapter 8 to a particular scenario would result in non-compliance with an FAA Regulation or other federal law, the City shall grant a variance from such requirement in accordance with section 8-11.
(Ord. No. 13218, § 1, 9-19-17)

ARTICLE II. OVERLAY ZONES

Sec. 8-4. Identification of zones.

(a) *FAA Aviation Overlay District and AOD Map.* The land lying within the AOD is governed by certain federal requirements implemented by the FAA. The AOD Map designates the land within the AOD. This Chapter 8 does not add any City regulation to the AOD, but notes the FAA Regulations applicable to such land.

(b) *Airport use district and airport use district map.* The Airport Use District is identified on the Airport Use District Map. The Airport Use District provides an overlay zone, applicable only to the Authority's use of land, as described in section 8-6. The Airport Use District is a portion of property within the AOD.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-5. Height limits.

FAA Regulations may restrict the height of all structures and trees within the AOD. All property owners must comply with the FAA Regulations, and the City shall have no authority to grant permits or otherwise approve structures if the same are restricted by the FAA. Within the AOD, the maximum permitted height of structures shall be as prescribed by this Chapter 8, or the applicable standard of the base zone district or land use, whichever is less.

No structure may be erected within the AOD that will exceed thirty-five feet (35') in height from ground level at the site, unless the property owner or developer first obtains a special permit from the Board of Appeals for Variances and Special Permits in accordance with this section 8-5 and section 8-12.

Any proposed structures within the AOD that would exceed thirty-five feet (35') in height from ground level at the site requires submission of a Notice of Proposed Construction or Alteration, via FAA Form 7460-1 (as such form may be in the future amended or altered by the FAA) ("FAA 7460"). Property owners may determine whether such notice is required, using the "Notice Criteria Tool" on the FAA website.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-6. Uses permitted by right within the airport use district.

(a) *Airport uses allowed.* Except as provided in subsection (b), below, the Authority may, by right, use any Authority-owned property located within the Airport Use District for any use related to operation of the Airport, such as terminal operations, maintenance or storage of aircraft, parking, other facilities used for aeronautical activities, or office space related to any of the same ("Airport Use"); provided, however, that the property on which the Airport Use exists must be contiguous to the Direct Airport Property. Properties owned by a Person other than the Authority, and properties owned by the Authority but not used for an Airport Use, shall be used in accordance with the base zone of the property, as described in the Zoning Ordinance.

(b) *Limitations on airport uses within airport use district.* Within the Airport Use District, there shall be a setback of five hundred feet (500'), measured from the edge of the roadway along Airport Road and Lee Highway toward the interior of the property (the "Airport Structure Setback"). Within the Airport Structure Setback, there shall be erected no structures intended for Airport Use (provided that parking lots and other improvements that do not constitute "structures" are permitted).
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-7. Use restrictions.

(a) *General use restrictions.* Notwithstanding any other provisions of this Chapter 8, no use may be made of land within the AOD in such a manner as to create electrical interference with radio communication between the airport and aircraft, create smoke, fumes, make it difficult for flyers to distinguish between airport lights and other lights, result in glare in the eyes of flyers using the airport, impairing visibility in the vicinity of the airport, or otherwise constitute a hazard to air navigation or endanger the landing, taking-off or maneuvering of aircraft.

(b) *Restrictions based on FAA Guidance.* Notwithstanding any other provisions of this Chapter 8, no use may be made of land within the AOD, which use is prohibited by, or the restriction of which is recommended by, the FAA in Title 14 of the Code of Federal Regulations or an Advisory Circular issued by the FAA.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-8. Setbacks.

Any property within the AOD that is used for an Airport Use and that abuts property used for residential purposes shall have a setback of at least twenty-five (25) feet on all lot lines abutting the residential property.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-9. Metropolitan authority designee.

From time to time, as he or she determines necessary, the Mayor, with the advice of the City Attorney's office, shall designate a City staff person to be the City representative for all municipal authorities, created by statute (for example, the Airport Authority and the Hospital Authority) (the "Authority Designee"). The Authority Designee shall be the representative of the City for all matters related to property owned by or affecting the operation of authorized business on property owned by a municipal authority. The Authority Designee shall work with the Land Development Office to uniformly apply the requirements of this Chapter 8 to properties within the AOD. The Authority Designee shall also have the authority to create, and delegate power and responsibilities to, a committee to assist the Authority Designee with its responsibilities under this Chapter 8.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-10. Non-conforming uses.

(a) *Regulations not retroactive.* The regulation prescribed in this Chapter 8 shall not be construed to require the removal, lowering, or other change or alteration of any structure or tree which did not conform to the regulations as of the effective date of Ordinance No. _____, or otherwise interfere with the continuance of any Non-conforming Use. Nothing herein contained shall require any change in the construction, alteration, or intended use of any structure the construction or alteration of which was begun prior to the effective date of Ordinance No. _____, and which was diligently prosecuted and completed within two (2) years thereof.

(b) *Nonconforming uses abandoned.* Whenever the Chief Building Official determines that a nonconforming tree or structure has been (i) abandoned or not used for more than one hundred (100) days, or (ii) more than eighty (80) destroyed, deteriorated, or decayed, no permit shall be granted that would allow such structure or tree to exceed the applicable height limit or otherwise deviate from the regulations of this Chapter.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-11. Variances to chapter 8.

(a) *Variances.* Any person desiring to use property within the AOD, not in accordance with the regulations prescribed in this Chapter 8, may apply for a variance therefrom from the Board of Appeals for Variances and Special Permits in accordance with the procedure prescribed in Article VIII of the Zoning Ordinance. Notwithstanding the generality of the foregoing, the City is not authorized to grant a variance to the height requirements set forth in this Chapter 8 and determined by FAA Regulations, nor is the City authorized to grant a variance from any other requirement of federal law.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-12. Special permits.

(a) *Future uses.* No structure or tree shall be erected, altered, planted or otherwise established above a height of thirty-five feet (35') in the AOD unless a permit therefor shall have been applied for and granted. Each such application shall indicate the purpose for which the permit is desired, with sufficient particularity to permit it to be determined whether the resulting use, structure, or tree would conform to the regulations herein prescribed. If such determination is in the affirmative, the permit applied for shall be granted. The application for permit shall be accompanied by a determination from the FAA, in response to the property owner's submission of an FAA 7460, as described in section 8-5, as to the effect of the proposal on the operation of air navigation facilities and the safe, efficient use of navigable airspace. The City will grant permits for structures or trees in accordance with the height and other requirements or conditions approved by the FAA.

(b) *Existing uses.* Before any existing use, structure or tree within the AOD may be replaced, substantially altered, repaired, rebuilt, or allowed to grow higher, a special permit must be secured from the Board of Appeals for Variances and Special Permits authorizing such replacement, change, growth or repair, as described in subsection (a) above.

(c) *Procedure for permitting.* Any person seeking a permit in accordance with this Chapter 8 shall submit an application for permit to the Land Development Office for approval or denial. The Land Development Office shall then approve or deny the application in accordance with its standard procedures and the requirements of this Chapter 8.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-13. Hazard marking and lighting.

Any permit granted under section 8-12 may, if the Authority deems advisable, based on FAA notice or requirements, to effectuate the purposes of this article, and reasonable in the circumstances, be so conditioned as to require the owner of the structure or tree in question to permit the Authority, at its own expense, to install, operate and maintain thereon such markers and lights as may be necessary to indicate to flyers the presence of a Hazard to Air Navigation.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-14. Appeals; board authority.

(a) Any person aggrieved, or taxpayer affected by any decision of the Land Development Office or Board of Variances and Special Permits made in their administration of this article, who believes that a decision of the building official or Board of was an improper application of this Chapter 8, may appeal such decision to a Court of appropriate jurisdiction.

(b) All appeals taken under this section must be taken within thirty (30) days after the issuance of the denial or other decision, by filing with the Court of appropriate jurisdiction a notice of appeal, specifying the grounds for the appeal. The building official or Board of Variances and Special Permits shall forthwith transmit to the Court of appropriate jurisdiction all the papers constituting the record upon which the action appealed from was taken.
(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-15. Penalties.

Each violation of this article or of any regulation, order or ruling promulgated hereunder shall be punishable by a fine of no more than fifty dollars ($50.00).
(Ord. No. 13218, § 1, 9-19-17)

ARTICLE III. DEVELOPMENT ON THE DIRECT AIRPORT PROPERTY

Sec. 8-16. Landscaping.

The requirements of this Chapter 8 expressly supersede the requirements of the Zoning Ordinance that relate to landscaping, specifically including section 38-591 et. seq. No permit or other approval to the Authority for a project within the Direct Airport Property shall be denied on the basis of landscaping requirements set forth in the Zoning Ordinance, and the following requirements shall be the only landscaping requirements applicable to the Direct Airport Property.

(a) *Purpose.* Landscaping creates a unique safety and security hazard for airports; in many cases, it also creates a violation of FAA Regulations and Department of Homeland Security ("DHS") regulations applicable to the Authority and the Direct Airport Property. Additionally, when considering proposed developments, the Authority and the City must take into account whether proposed requirements, such as landscaping, will increase wildlife hazards, as land-use practices that attract or sustain hazardous wildlife populations on or near airports can significantly increase safety and security hazards. Therefore, the landscaping requirements set forth below in this section 8-16 are intended to (i) meet the intent and purpose of the landscaping requirements reflected in the Zoning Ordinance, and (ii) protect the public health, safety and welfare, while also omitting any requirements that potentially create a safety or security hazard, or are preempted by federal law.

(b) *Applicability.* The requirements of this section shall apply to the landscaped areas surrounding any new development on the Direct Airport Property. The requirements of this section shall apply only to real property owned by the Authority, and all other property owners within the AOD shall refer to the landscaping requirements set forth in the Zoning Ordinance.

(c) *Landscape plan submittal.* Proposed developments, subject to the provisions of this section, shall file for a land disturbing permit and submit a landscape site plan to the Building Inspections Office. This plan may be incorporated into a parking/paving plan, provided the scale is not less than one (1) inch equals forty (40) feet. The following elements shall be shown on the landscape site plan:

(i) Zoning of site and adjoining properties;

(ii) Existing and proposed contours at five (5) feet intervals or less;

(iii) Boundary lines and lot dimensions;

(iv) Date, graphic scale, north arrow, titles and name of owner, and the phone number of the person or firm responsible for the landscape plan;

(v) Location of all proposed structures and storage areas;

(vi) Drainage features and one-hundred (100) year floodplain, if applicable;

(vii) Parking lot layout including parking stalls, bays, and driving lanes;

(viii) Existing and proposed utility lines, and easements; and

(ix) All paved surfaces and curbs;

(x) Existing trees or natural areas to be retained (if any); and

(xi) The location of all required landscaped areas (Street Yard, Landscaped Peninsulas, Landscaped Islands, and Screening Buffers).

(d) *Plant installation plan.* Prior to receiving a Certificate of Occupancy, a Plant Installation Plan prepared by a registered landscape architect or architect shall be submitted and approved containing the following information:

Location, installation size, quantity, and scientific and common names of landscaping to be installed.

The applicant has the option of submitting both the Landscape Plan and Plant Installation Plan at the same time.

(e) *Hardships.* Where any hardship for compliance under this section 8-16 exists, the Authority may apply for a variance from the requirement of this section 8-16 in accordance with the procedure described in section 8-11.

(f) *Street yard requirements.*

(i) Intent. The intent of this section is to add quality and definition to the street by planting Approved Plants within a landscaped area along the edges of any right-of-way.

(ii) Dimensions.

1) Except for points of access, a street yard shall be provided where the proposed development site adjoins the public street right-of-way. Alleys are exempt from this requirement.

2) The street yard shall have a minimum depth of eight (8) feet as measured from the edge of the public right-of-way towards the interior of the property. The yard shall consist of sod grass or other natural living ground cover material. No impervious surfaces are permitted in the street yard area.

(iii) Plantings. Street yard areas shall be densely planted with plant material that constitutes an Approved Plant for full-coverage within three (3) years from the date of planting.

(iv) Existing Plants. Existing Approved Plants along the street right-of-way frontage can be substituted for the street yard requirements subject to the following:

1) Existing Approved Plants to be set aside shall have a minimum depth of twenty-five (25) feet as measured from the public street right-of-way;

2) No impervious surfaces are permitted within the protected Approved Plants area except for approved access points to the site; and

3) No cutting/filling activities or storage of materials/equipment are permitted within the Approved Plants area.

(v) Exemptions/Special Situations.

1) Properties adjoining rights-of-way that encroach into established parking areas more than twenty (20) feet have the following street yard options:

a) Plant Approved Plants within the right-of-way provided written permission is obtained from the owner of the public right-of-way;

b) If permission cannot be obtained to plant in the right-of-way, no street yard will be required.

2) Existing plantings within the right-of-way (not including the center median or opposite side of the street) and approved by the City Urban Forester can be used to meet the street yard requirements.

3) Stormwater facilities may be located within the street yard subject to the following conditions:

a) No riprap, crushed stone, concrete, or other impervious materials are exposed; and

b) Approved Plants and other living organic materials can be planted along the stormwater facility.

4) With the written approval of the right-of-way owner, portions of the public right-of-way may be used to meet the street yard requirements.

5) No trees shall be located within the sight triangle as defined by the Zoning Ordinance.

(g) *Parking lot requirements.*

(i) Intent. The intent of this section is to break up the expanse of asphalt, and to reduce the glare from parked cars and loading docks.

(ii) Design Criteria.

1) No parking space can be more than sixty (60) feet from an Approved Plant.

2) A landscaped island or peninsula shall border ends of interior parking bays that contain a minimum of ten (10) contiguous parking spaces.

3) A landscaped peninsula shall border ends of perimeter bays.

a) Dimensions/Planting Criteria.

i) Landscaped islands and peninsulas used to meet the landscaping requirements shall have a minimum width of eight (8) feet and a minimum landscaped area of two hundred (200) square feet.

ii) Landscaped islands and peninsulas used to meet the landscaping requirements shall be planted with at least one (1) Approved Plant.

iii) All landscaped islands and peninsulas shall be bordered by a curb or a wheel stop.

(h) *Screening requirements.*

(i) Intent. To provide transition between the Airport and other property uses outside of the Direct Airport Property, screening and buffering (as described in this section 8-16) will be required. The purpose of the screen is to provide a year-round visual obstruction without obstructing the view of the Airport security fence, providing an object that could be used to scale the fence, or otherwise creating safety or security hazards to the Airport or violating any federal law. The buffer provides transition between the airport uses on Direct Airport Property and adjacent land uses outside of the Direct Airport Property by requiring a landscape yard of a minimum specified depth along the shared property line.

(ii) Procedure. Refer to the matrix below to determine any screening requirements for the proposed development, depending on each adjoining property. If a screen is required, a capital letter will indicate the type of screen to be applied. A description of the screen type is provided herein.

SCREEN MATRIX

Adjoining Use	*Screening Requirement*
Manufacturing/Warehousing	None
Commercial	None
Office	None

Adjoining Use	*Screening Requirement*
Residential (High or Low Density)	B

1) Screening Type B: Provide a twenty (20) feet deep (as measured towards the interior of the property) landscape yard along the shared property line, planted with Approved Plants.

2) Plantings: Landscape yard areas shall be densely planted with plant material that constitutes an Approved Plant for full-coverage within three (3) years from the date of planting.

(i) *Plant installation specifications.*

(i) Intent. All landscaping material shall be installed in a professional manner, according to accepted planting procedures specified in the American Standard for Nursery Stock manual, available from the City Forester, and in accordance with the FAA Regulations and requirements and guidelines of the DHS.

(ii) Approved Plants. All planting and screening requirements may be met with Approved Plants, as defined in this section 8-16.

(j) *Utility easement policy.*

(i) Any planting used to meet the requirements of this section 8-16 shall not be located within proposed or existing utility easements unless written permission has been obtained from the holder of the utility easement.

(ii) If written permission is not granted, the following options shall be considered in order of priority:

1) Priority #1: Plant the Approved Plant as close to the easement as possible.

2) Priority #2: For highly visible areas (street yards, parking lots in front) plant the Approved Plant in the same general area where it can be seen from the street or parking lot.

(iii) Utility easements can be used to meet the landscape yard requirements. The applicant is responsible for identifying existing and proposed utility easements within the property on the landscape site plan.

(k) *Maintenance.*

(i) The Authority shall be responsible for the maintenance of all landscaping provided. All landscaped areas must present a healthy, neat and orderly appearance and shall be kept free from refuse and weeds. Any dead or diseased plant material shall be replaced by the Authority with new plantings that meet the requirements of this section 8-16.

(l) *Certificate of occupancy/bonding.*

(i) If the landscaping has not been installed and inspected for proper installation prior to receiving a Certificate of Occupancy, a Certificate of Occupancy may be granted provided the following conditions are met:

1) The Authority posts a performance bond or irrevocable letter of credit with the City Treasurer;

2) The amount of the bond or letter of credit shall be based on material and installation costs of the uninstalled landscape material, including a ten percent (10%) contingency cost, as shown on the submitted landscape plan;

3) The costs of the landscaping shall be certified by a licensed contractor or determined using a general formula established by the landscape site reviewer (option of applicant).

a) After receiving the Certificate of Occupancy, the remaining landscape material shall be installed within six (6) months. The bond or letter of credit shall be called if the required landscaping has not been installed by the end of the six (6) month period and the funds applied to complete the landscaping work.

(m) *Appeals.*

(i) Any person aggrieved by the administration, interpretation, or enforcement of this section 8-16 may appeal to the Board of Zoning Appeals within sixty (60) days of the decision. Decisions of the Board of Appeals may be appealed to a court of competent jurisdiction.

(ii) Should any court of competent jurisdiction find any portion of this section 8-16 unlawful or unconstitutional, such finding shall not affect this section 8-16 as a whole or any portion of it not found invalid.

(n) *Definitions.*

(i) Approved Plant — plants that may be planted or installed to comply with the requirements of this section 8-16 are those that (a) meet the wildlife hazard management requirements of Title 14 CFR Part 139 (as may be amended from time to time), (b) are under four feet (4') in height, and (c) specifically excluding trees and plants prohibited by the Tennessee Invasive Plant Council. Approved Plants also must not be a wildlife attractant or hazard to aviation in this geographic area, and must be drought tolerant and require minimal maintenance, as required in an aviation environment.

(ii) Impervious Surfaces — includes concrete, asphalt, brick, metal, or any other material constructed or erected on landscaped or natural buffer areas that impede the percolation of water into the ground.

(iii) Interior Parking Bays — all parking bays that do not qualify as a perimeter bay.

(iv) Landscape Area/Landscaped Yard — an area to be planted with trees, grass, shrubs, or other natural living ground cover material. No impervious surfaces are permitted in these areas.

(v) Landscaped Island — a landscaped area defined by a curb and surrounded by paving on all sides.

(vi) Landscaped Peninsula — a landscaped area defined by a curb and surrounded by paving on three (3) sides.

(vii) Landscaped Median — a landscaped area bordering two (2) adjoining parking bays.

(viii) Natural Buffer — an area of land set aside for preservation in its natural vegetative state. No removal of plants is permitted with the exception of poisonous or non-native plant species. In addition, no fill/cutting activities or storage of materials is permitted in these areas. No impervious surfaces are permitted.

(ix) Parking Space/Parking Bay — includes spaces and areas for all vehicles except tractor trailers.

(x) Perimeter Bay — all parking bays that are adjacent to the perimeter of a development.

(xi) Street Yard — a designated landscaped area where private property abuts the public street right-of-way for the planting of grass, trees, and shrubs.

(Ord. No. 13218, § 1, 9-19-17)

Sec. 8-17. Stormwater requirements.

When construction on the Direct Airport Property necessitates a Stormwater Maintenance Agreement, the City shall accept a revised Stormwater Maintenance Agreement, as necessary for the Authority to comply with FAA Regulations and other federal law. In connection with the Stormwater Maintenance Agreement, the City shall accept the Authority's long term maintenance plan, as approved by the Tennessee Department of Environment and Conservation ("TDEC"), as the Authority's Long Term Maintenance Plan for purposes of the Stormwater Maintenance Agreement between the Authority and the City. The City acknowledges that any maintenance plan and other documentation, which TDEC has approved and that has not expired or otherwise become inapplicable, shall be sufficient to satisfy any City requirements for the same type of document.

Such drawings and specifications shall contain information, in the form of notes or otherwise, as to the quality of

materials, where quality is essential to conformity with the technical codes. Such information shall be specific, and the technical codes shall not be cited as a whole or in part, nor shall the term "legal" or its equivalent be used as a substitute for specific information. All information, drawings, specifications and accompanying data shall bear the name and signature of the person responsible for the design.

107.2.6 Additional data. The building official may require details, computations, stress diagrams, and other data necessary to describe the construction or installation and the basis of calculations. All drawings, specifications and accompanying data required by the building official to be prepared by an architect or engineer shall be affixed with their official seal.

3. Buildings and structures 5,000 sq ft (465 m 2) or more in area.

For all other buildings and structures, the submittal shall bear the certification of the applicant that some specific state law exception permits its preparation by a person not so registered.

Exception: Group R3 buildings, regardless of size, shall require neither a registered architect or engineer, unless construction method or material type is such that the building official deems a design professional necessary for a structurally stable building.

107.2.9 Structural and fire resistance integrity. Plans for all buildings shall indicate how required structural and fire resistance integrity will be maintained where a penetration of a required fire resistant wall, floor or partition will be made for electrical, gas, mechanical, plumbing and communication conduits, pipes, and systems. Such plans shall also indicate in sufficient detail how the fire integrity will be maintained where required fire resistant floors intersect the exterior walls and where joints occur in required fire resistant construction assemblies.

107.2.10 Affidavits. The building official may accept a sworn affidavit from a registered architect or engineer stating that the plans submitted conform to the technical codes. For buildings and structures, the affidavit shall state that the plans conform to the laws as to egress, type of construction and general arrangement and, if accompanied by drawings, show the structural design and that the plans and design conform to the requirements of the technical codes as to strength, stresses, strains, loads and stability. The building official may without any examination or inspection accept such affidavit, provided the architect or engineer who made such affidavit agrees to submit to the building official copies of inspection reports as inspections are performed and upon completion of the structure, electrical, gas, mechanical, or plumbing systems a certification that the structure, electrical, gas, mechanical or plumbing system has been erected in accordance with the requirements of the technical codes. Where the building official relies upon such affidavit, the architect or engineer shall assume full responsibility for the compliance with all provisions of the technical codes and other pertinent laws or ordinances. Affidavits will only be accepted by the Building Official where emergency or extraordinary circumstances are established. If violations of this Code are found, the Building Inspector may issue a stop work order on the new location that the building has been moved to until such violations on the property from which the building was moved have been completed by the permittee.

(5) In the event, after an inspection by the building inspector, it is determined that the building, after removal and renovation, will meet the applicable Building Code standards and will not cause blight or dilapidation of the area into which such building is moved, the building inspector may issue a permit for such removal and relocation; provided, the application shall first be approved by the City Traffic Engineer, who shall fix the time such building is to be moved and the route over which such movement is to be made. Any determination of blight or dilapidation shall be made in consideration of the standards set out in T.C.A. § 13-20-201. No building shall be moved over any street, other than the one approved, within the hours fixed by the City Traffic Engineer.

In the event that all exterior renovations are not completed at the new location within 120 days or any reasonable extension by the Building Official, the owner shall be cited to City Court for noncompliance with this section and each day of continuing violation shall constitute a separate offense.

(9) The application for the moving permit shall be accompanied by an application for a building permit, accompanied by complete plans and specifications showing the changes or conditions of said house, building, or structure as the same is proposed to be when moving, and all contemplated improvements, signed by the owner or the owner's agent.

(a) No manufactured home may be installed on any lot in the City of Chattanooga unless it complies with all provisions of the National Manufactured Home Construction and Safety Standards Act of 1974 (42 U.S.C. Section 5401, *et seq.*); the Uniform Standards Code for Manufactured Homes and Recreational Vehicles as set forth at T.C.A. Section 68-126-201, *et seq.*; the Tennessee

Modular Building Act, at T.C.A. Section 68-126-301; the Tennessee Manufactured Home Anchoring Act at T.C.A. Section 68-126-401; and the minimum housing standards set forth at Chattanooga City Code, Section 21-1, *et seq.*

(b) For purposes of this code, a "manufactured home" shall be defined as a structure, transportable in one (1) or more sections, which is eight (8) body feet (two and four-tenths (2.4) meters) or more in width and is thirty-two (32) body feet (nine and seventy-five-hundredths (9.75) meters) or more in length and which is built on a permanent chassis, and designed to be used as a dwelling with or without permanent foundation, and connected to the required utilities, and includes plumbing, heating, air conditioning, and electrical systems contained therein.

(c) All manufactured home units are required to bear the label or seal of compliance with Federal Manufactured Home Construction and Safety Standards issued by an agency approved by the Secretary of the Department of Housing and Urban Development and a certificate, seal or other evidence of compliance with State uniform standards for manufactured homes required by T.C.A. Section 68-126-207.

(d) All manufactured homes are required to have diagonal ties to restrict the unit from being pushed from its piers. These diagonal ties are required to be installed to restrict overturning. Additional over-the-top tie downs to restrict overturning may also be required by some manufactured home installation instructions.

(1) Piers or load-bearing supports or devices shall be designed and constructed to evenly distribute the loads. Piers shall be securely attached to the frame of the manufactured home or shall extend at least six (6) inches (one hundred fifty-two (152) millimeters) from the centerline of the frame member. Manufactured load-bearing supports or devices shall be listed or approved for the use intended, or piers shall be constructed as follows:

(i) Except for corner piers, piers less than forty (40) inches (one thousand sixteen (1,016) millimeters) high shall be constructed of masonry units, placed with cores or cells vertically. Piers shall be installed with their long dimensions perpendicular to the main (I-beam) frame member for supports and shall have a minimum cross-sectional area of one hundred nineteen (119) square inches (0.077 m squared). Piers shall be capped with a minimum two (2) inch (fifty-one (51) millimeters) solid masonry unit or concrete cap, or equivalent.

(ii) Piers between forty (40) and eighty (80) inches (one thousand sixteen (1,016) and two thousand thirty-two (2,032) millimeters) high and all corner piers over twenty-four (24) inches (six hundred ten (610) millimeters) shall be at least sixteen (16) by sixteen (16) inches (four hundred six (406) by four hundred six (406) millimeters) consisting of interlocking masonry units and shall be fully capped with a minimum four (4) inch (one hundred two (102) millimeters) solid masonry unit or equivalent.

(iii) Piers over eighty (80) inches (two thousand thirty-two (2,032) millimeters) high shall be constructed in accordance with the provisions of paragraph (ii) above, provided the piers shall be filled solid with grout and reinforced with four (4) continuous No. 5 bars. One (1) bar shall be placed in each corner cell of hollow masonry unit piers, or in each corner of the grouted space of piers constructed of solid masonry units.

(iv) Cast-in-place concrete piers meeting the same size and height limitations of paragraphs (i), (ii) and (iii) above may be substituted for piers constructed of masonry units.

(v) All piers shall be constructed on footings of solid concrete not less than sixteen (16) inches wide by eight (8) inches in thickness (sixteen (16) inches by eight (8) inches) and continuous between all piers installed perpendicular to the main (I-beam) frame members.

(e) Piers shall be located in accordance with the manufactured home installation instructions. If the manufactured home installation instructions are not available for a used home, piers for single section homes are to be placed under each longitudinal main frame member not to exceed eight (8) feet (two thousand four hundred thirty-eight (2,438) millimeters) on-center for homes that are not over fourteen (14) feet (four thousand two hundred sixty-seven (4,267) millimeters) wide or less and six (6) feet (one thousand eight hundred twenty-nine (1,829) millimeters) on-center for homes that are not over fourteen (14) feet (four thousand two hundred sixty-seven (4,267) millimeters) wide. Piers for multi-section homes are to be placed under each longitudinal main frame member not to exceed six (6) feet (one thousand eight hundred twenty-nine (1,829) millimeters) on-center spacing. For used multi-section homes, piers are to be placed under the center marriage line within one (1) foot at each end, under ridge beam support columns, and under both side of openings at the marriage line greater than twelve (12) feet (three thousand six hundred fifty-seven (3,657) millimeters). For all homes, exterior doors shall have piers directly under both sides of the door openings. Where practical for all homes, end piers shall be placed within one (1) foot (three hundred five (305) millimeters) of the ends of the main frame. When the location and spacing of wheels and axles or other structural members of home frames or undercarriages prevent spacing of piers on eight (8) or six (6) feet (two thousand four hundred thirty-eight (2,438) or one thousand eight hundred twenty-nine (1,829) millimeters) centers, the spacing shall be as near eight (8) or six (6) feet (two thousand four hundred thirty-eight (2,438) or one thousand eight hundred twenty-nine (1,829) millimeters) maximum spacing as practicable in the area of the obstruction. Piers shall be placed under other concentrated loads such as porch posts, bay window overhangs, and masonry-faced fireplaces on floor overhangs. Units that exceed sixteen (16) feet (four thousand eight hundred seventy-seven (4,877) millimeters) in width shall have perimeter piers under the sidewalls every six (6) feet (one thousand eight hundred twenty-nine (1,829) millimeters) and at each intersection of a perimeter joist and a transverse joist or shall be under a four (4) by four (4) inch (one hundred two (102) by one hundred two (102) millimeters) brace that supports at least two (2) floor joists.

(f) The City of Chattanooga further adopts by reference all manufactured home tie-down standards set forth in the currently adopted edition of the Building Code except where such provisions are contrary to the express language of this ordinance. Such provisions are incorporated by reference and shall be inspected by the Building Inspector.

(g) All manufactured homes installed after the effective date of this ordinance shall be required to have masonry skirting covering all open space between the ground and the exterior wall on the perimeter of the manufactured home, not less than six (6) inches wide or in such other width as may be required by the Standard Building Code based upon the heights and widths of the masonry skirting. All masonry skirting shall be constructed on footings of poured in place concrete not less than sixteen (16) inches wide by four (4) inches in thickness (sixteen (16) inches by x four (4) inches) or as otherwise required by the Standard Building Code based upon the height and width of the masonry skirting.

(h) All manufactured homes shall further be required to be situated on any lot so that the front entrance to the manufactured home faces a City street. The owner or installer of a manufactured home shall be required to designate the front entrance to the Building Official before any installation may be approved.

(i) All manufactured homes shall further be required to have a minimum landing at every entrance of at least four (4) feet by four (4) feet, with a covered porch over the front entrance. All landings shall be constructed and approved by the Building Official in accordance with all standards set forth in the 1999 Standard Building Code (as amended). The covered porch over the front entrance shall be constructed with a roof line of at least the same pitch as the remainder of the manufactured home.

Such advertisement, and payment for same, shall be the responsibility of the applicant. The sale of the property shall be entirely at the discretion of the owner.

(d) *Hearing and Determination.*

(1) Administrative Review. Staff approval may be provided for work that meets the design guidelines and is not one (1) of the following: New construction of primary structures, outbuildings, or garages; additions, demolition; parking lots.

(e) *Standards for Review.* In considering an application for a COA, the CHZC shall be guided by the following general standards in addition to any district specific design guidelines in this ordinance.

(1) The distinguishable original qualities or character of a building, structure or site shall not be destroyed. The removal or alteration of any historic material or distinctive architectural feature shall be avoided when possible.

(2) All buildings, structures and sites shall be recognized as products of their own time. Alterations that have no historical basis and that seek to create an earlier appearance shall be discouraged.

(3) Changes that may have taken place in the course of time are evidence of the history and development of a building, structure or site and its environment. These changes may have acquired significance in their own right, and this significance shall be recognized and respected.

(4) Distinctive stylistic features or examples of skilled craftsmanship that characterize a building, structure or site shall be treated with sensitivity.

(5) Deteriorated architectural features shall be repaired rather than replaced, whenever possible. In the event replacement is necessary, the new material should match the material being replaced in composition, design, color, texture and other visual qualities. Repair or replacement of missing architectural features should be based on accurate duplication of features, substantiated by historical, physical, or pictorial evidence, rather than on conjectural designs or the availability of different architectural elements from other buildings or structures.

(6) The surface cleaning of structures shall be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic building materials shall not be undertaken.

(7) Every reasonable effort shall be made to protect and preserve archaeological resources affected by, or adjacent to, any project.

(8) Contemporary design for alterations and additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant historical, architectural or cultural material, and such design is compatible with the size, scale, color, material and character of the property, neighborhood or environment.

(f) *Approval or Denial.* Following proper review of sufficient data, including a public hearing, the Commission shall approve or deny the COA within thirty (30) days. The COA may be issued with modification by CHZC. Written notice of the approval or denial of the application for a COA shall be provided to the applicant and to the Building Inspection Division if a building or demolition permit is needed. The CHZC shall state in the written notice any required modifications to the application, and conditions to which the certificate is subject, or reasons for the denial of the application.

The applicant may resubmit an amended application for a COA which takes into consideration the recommendations of the CHZC. The applicant may also apply for a CEH if they feel the decision of the CHZC has denied them a reasonable economic return or use of the property.
(Ord. No. 9112, § 1, 1-24-89; Ord. No. 9250, § 5; 10-10-89; Ord. No. 9544, §§ 6, 7, 4-30-91; Ord. No. 12656, § 1, 10-9-12)

Sec. 10-16. Certificate of Economic Hardship.

(a) *Application for CEH.* Application for a CEH shall be made on a form available from the City of Chattanooga's PWLDO. The following information shall be submitted with an application for CEH:

(1) A statement detailing the condition(s) leading to economic hardship. The application should discuss the circumstances under which denial of a COA has led or will lead to deprivation of reasonable use, or economic return of the property. The standards which the Commission shall go by to determine economic hardship include the following:

a. That by reason of the exceptional deterioration of the structures or by reason of the particular economics of the proposed project, the strict application of the district specific design guidelines would result in peculiar and practical difficulties or undue economic hardships upon the owner to develop the property in accordance with the district specific design guidelines.

b. That the relief of the peculiar hardships would not establish substantial detriment to the public good or substantially impair the intent and purpose of the Historic Zoning Ordinance.

c. That the peculiar hardship would apply to the particular land or building regardless of the owner.

d. That the peculiar hardship is not created as the result of an act upon the part of the applicant.

(2) Estimate of the cost of the proposed construction, alteration, demolition; removal and an estimate of any additional cost that would be incurred to comply with the recommendations of the Commission for modifications necessary for the issuance of a COA.

(3) Estimated market value from a licensed real estate appraiser or the County Tax Assessor of the property in its current condition; after completion of the proposed construction, alteration, demolition, or removal; after any changes recommended by the Commission; and, in the case of a proposed demolition, after renovation of the existing property for continued use.

(4) In the case of a proposed demolition, an estimate from an architect, developer, real estate consultant, appraiser, or other real estate professional experienced in rehabilitation of historic structures as to the structural soundness of the structure and the economic feasibility of rehabilitation or reuse of the existing structure on the property.

(5) If the property is income-producing, the annual gross income from the property for the previous two (2) years; itemized operating and maintenance expenses for the previous two (2) years; and depreciation deduction and annual cash flow before and after debt service, if any, during the same period.

(6) All appraisals obtained within the previous two (2) years by the owner or applicant in connection with the purchase, financing, or ownership of the property.

(7) Any listing of the property for sale or rent, price asked and offers received, if any, within the previous two (2) years.

(8) Real estate taxes for the previous two (2) years.

(9) Form of ownership or operation of the property, whether sole proprietorship, for-profit or not-for-profit corporations, limited partnership, joint venture, or other.

(b) *Hearing and Determination.*

(1) The Commission shall review the application for CEH and schedule a public hearing in the same manner it would for a COA. Any person may testify at the hearing concerning the economic hardship of the property. Furthermore, the CHZC may solicit expert testimony or require that the applicant or the applicant's agent make additional submissions concerning the reasonable use or economic return of the property.

(2) Following proper review by the Commission and prior to the close of the public hearing, the CHZC shall issue or deny the CEH. Written notice of the approval or denial of the application for a CEH shall be provided to the applicant and to the Building Inspection Division if a building permit is needed. The CHZC shall state in written notice, all specific guidelines, requirements, and conditions to which the certificate is subject, or reasons for the denial of the application. The applicant may resubmit an amended application or reapply for a CEH that takes into consideration the recommendations of the CHZC.

ARTICLE IV. COMMERCIAL PROPERTY ASSESSED CLEAN ENERGY AND RESILIENCY (C-PACER) PROGRAM

Sec. 10-50. Establishment.

There is hereby established within the boundaries of the City of Chattanooga (the "City") a Commercial Property Assessed Clean Energy and Resiliency ("C-PACER") program (the "Program") in accordance with Tenn. Code Ann. §§ 68-205-101 (the "C-PACER Act"). The City finds that financing of qualified projects through special assessments is a valid public purpose. The City finds that it is convenient and advantageous to establish the Program, at no net cost to the City, in order to finance Qualified Projects (as hereinafter defined), repaid by voluntary annual assessment installment payments on the property benefited by such Qualified Projects, and that the Program is in the public interest, providing for the safety, health, and environmental public benefit, and provides for economic development of the community. Therefore, the City of Chattanooga intends to authorize direct financing between property owners and capital providers as the means of financing qualified projects. It also intends to authorize special assessments, entered into voluntarily by a property owner with the City of Chattanooga by means of written assessment contract, as a means to repay the financing for qualified projects available to property

owners. Thus, the Program shall allow financing for the full range of Qualified Improvements on all Eligible Properties, as authorized by the C-PACER Act, and shall abide by and operate according to the C-PACER Act.

3. The Program Administrator shall review the Program Application according to the Application Checklist solely to determine whether (i) it is complete, (ii) proposes a "Qualified Improvement," (iii) contains no errors on its face, and (iv) that all information is provided in the substance and form required by the Application Checklist. 8. The Capital Provider shall record (1) the Assessment Agreement, (2) the Notice of Assessment Interest and C-PACER Lien, and (3) Notice of Assignment of Assessment and C-PACER lien to the Capital Provider with the Hamilton County Register of Deeds.

9. For a Property Owner and Capital Provider whose Program Application is denied by the Program Administrator, either party, or both, may request an adjudicative proceeding before the City's adjudicative body, consistent with the City's rules and subject to the applicable provisions of Tennessee's Administrative Procedures Act, Tenn. 2. Collection of Assessment Installments and enforcement of C-PACER Liens due to delinquent Assessment Installments shall be enforced in the same manner that a deed of trust is enforced by the Capital Provider.

3. City of Chattanooga funds are prohibited from being utilized to fund or repay loans related to C-PACER financing. C-PACER loans would be secured with government lien against the property and would run with the land until the loan is paid in full. The lien would have the same priority status as a lien for property taxes and cannot be accelerated or eliminated by foreclosure of a property tax lien.
(Ord. No. 13972, § 1, 4-18-23)

Sec. 10-59. Fees.

The Program Administrator is authorized to collect an application fee. The amount of the fee shall be determined by the Program Administrator. Pursuant to the Program Guidebook, the Program Administrator shall establish an approved application servicing fee that makes the costs of the C-PACER program cost-neutral to the City and Program Administrator provided, however that the fees application plus the servicing fee for any Assessment may not exceed 1% of the applicable C-PACER Financing and shall not in any case exceed $50,000. The approved application servicing fee shall be collected at the close of a C-PACER financing transaction.
(Ord. No. 13972, § 1, 4-18-23; Ord. No. 14065, § 3, 12-5-23)

Sec. 10-60. Enactment.

The provisions of this article are hereby declared to be severable and if any section, phrase, or provision shall for any reason be declared by a court of competent jurisdiction to be invalid or unenforceable, such

declaration shall not affect the validity or enforceability of the remainder of the sections, phrases and provisions hereof. In the event and to the extent of a conflict between this article and the C-PACER Act, the C-PACER Act shall govern.
(Ord. No. 13972, § 1, 4-18-23)

Sec. 10-61. No liability.

Except for a right of action to enforce the terms of this article, this article does not confer any right of action nor property interest upon any party to a C-PACER transaction against the City, Industrial Development Board of the City of Chattanooga, Tennessee or other related boards, or the Program Administrator, and, so long as the City, Industrial Development Board of the City of Chattanooga, Tennessee or other related boards, or the Program Administrator complies in good faith with the terms of the C-PACER Act and this article, the City, Industrial Development Board of the City of Chattanooga, Tennessee or other related boards, or the Program Administrator shall incur no liability for enacting this Program, nor shall the City, Industrial Development Board of the City of Chattanooga, Tennessee, or other related boards, its governing body, executives, or employees, or the Program Administrator be personally liable as a result of exercising any rights or responsibilities granted under this article.

of all taxes for conducting the type of business for which the auction is being conducted, the mayor shall issue a permit for such period as shall be shown necessary to dispose of the property described, but in no event for a longer period than thirty (30) days from the date of issuance.

(1) For any auctioneer to knowingly or negligently misrepresent the quality or value of any article at any auction sale.

(2) For any auctioneer to make any false representation or statement as to the ownership, character or circumstances of the owner or pretended owner of such property for the purpose of inducing the sale thereof.

(3) For any auctioneer or person conducting the sale or owning the property to be sold to falsely advertise, state or represent that such goods, wares and merchandise are in whole or in part a bankrupt or insolvent stock, damaged goods or goods saved from fire or to make any false statement, representation or advertisement as to the purchase, history or character of such goods, wares or merchandise.

Except as provided herein, it shall be unlawful for any person in the city who does not have scales certified by the sealer of weights and measures to haul coal or coke over any street in the city for the purpose of delivery in the city unless the same has been weighed on the public scales of the city or on scales designated by the city as soon as the vehicles used for transporting such coal or coke could be driven to such scales after entering the corporate limits. Interstate shipments of coal or coke shall not be required to be so weighed if such coal or coke has been weighed on scales certified by an incorporated town or city of the state from which such coal or coke was transported and the certificate furnished by such town or city showing that it has been weighed on such certified scales accompanies such shipment; provided that, the sealer of weights and measures or his deputies, and police officers, either on complaint of an interested citizen or at their own discretion, may require such interstate or intrastate shipments to be weighed, as provided in section 11-138 of this Code.
(Code 1986, § 11-133)

Sec. 11-134. Local dealers to have scales.

Every solid fuel dealer located in the city shall have at each of his yards a scale of at least five (5) tons' capacity, conforming to this Code and other ordinances of the city and laws of the state relating to weights and measures.

The requirement as to the kind and size of fuel shall be satisfied by stating the trade name, if there is a trade name of such fuel generally known to the trade, and if not, the seam from which the coal is mined may be stated. Such ticket shall bear the name or initials of the weigher for the delivering dealer or distributor, or, in case of delivery by a dealer or distributor from a point originating beyond the corporate limits of the city, who does not have scales certified as provided in section 11-135 of this Code, a ticket or weigh bill shall accompany each load as provided herein, and shall

(Code 1986, § 11-136)

Sec. 11-137. Delivery ticket to be produced on demand; verification of weight of load.

When any person has sold, or agreed to deliver coal or coke in the city, if while such coal or coke is being delivered the sealer of weights and measures or his deputy or any police officer, either on complaint by an interested citizen or at his own discretion, demands the production of the bill of lading or delivery ticket accompanying the load, the agent or employee in charge of such vehicle shall immediately produce, exhibit and allow inspection of such bill of lading or delivery ticket. When any such officer of the city demands that the weight of coal or coke being delivered as shown on such bill of lading or delivery ticket be verified, the delivering party or his agent or employee in control of such load shall convey the same immediately to the public scales where gross weight may be obtained thereon, and on delivery of such load the vehicle be returned direct to the public scales and the tare weight of such conveyance ascertained by the net weight man on duty who shall then determine the net weight of the coal or coke so delivered; provided that, the transporting agent in charge of such conveyance shall be permitted to communicate with his principal if he so desires and the principal's presence shall be permitted at the weighing of the load and the conveyance on the public scales when verification of weights are made if the principal so desires; and provided further, that there shall be no charge for use of the public scales for verification of weights as provided in this section.

Such fee shall be paid to the city finance officer, who shall issue a receipt therefor and a certificate giving the name of the owner, the make of the vehicle and the license number thereof. Such certificate shall at all times be carried in the cab of such vehicle or on the person in charge of such vehicle when the same is using the streets of the city.

ARTICLE XIV. ADULT-ORIENTED ESTABLISHMENTS*

Sec. 11-421. Findings and purpose.

(a) The city council of the City of Chattanooga, Tennessee, finds:

(1) That homogeneous and heterogeneous masturbatory acts and other sexual acts, including oral sex acts, are being done in adult-oriented establishments in the City of Chattanooga.

(2) That offering and providing such space, areas, and rooms where such activities may take place creates conditions that generate prostitution and other crimes.

(3) That several days and nights of the week such adult-oriented establishments, particularly adult book stores containing mini-motion picture facilities, are overcrowded and contain more persons than such structures can safely accommodate resulting in a definite fire hazard since in the event of fire such persons would not be able to safely leave all the cubicles, booths and rooms of such establishments.

(4) That male prostitutes, particularly teenage males, frequent said establishments for the purpose of providing, within the premises of such establishments, sex-for-hire.

(5) That the continued unregulated operation of adult-oriented establishments would be detrimental to the general welfare, health, and safety of the citizens of the City of Chattanooga.

(b) It is the purpose of this article to promote and secure the general welfare, health, and safety of the citizens of the City of Chattanooga.
(Code 1986, § 11-421; Ord. No. 9654, § 2, 1-6-92)

(c) The special assessment shall be used to supplement and not to pay for the same level of services provided by the City or County government within the Downtown CBID. (Ord. No. 13487, § 1, 7-30-19)

Sec. 11-531. Estimated costs and rate of levy; special assessment procedure.

(a) The estimated cost of the initially proposed improvements, service projects and other permitted uses of special assessment revenues is One Million and No/100 Dollars ($1,000,000.00).

(b) A special assessment shall be collected from all real property within the Downtown CBID in accordance with this Section exclusively for the Downtown CBID, and not for the general tax coffers of the City or County. Notwithstanding the foregoing, or anything contained herein to the contrary, all property owned directly by the City and County or non-profit organizations under T.C.A. § 67-5-212 determined to be exempt by the CBID Board shall be exempt from the special assessment in accordance with Tennessee Code Annotated Section 7-84-523. This Downtown CBID will utilize the special assessments which distinguish between (i) Commercial Property and (ii) Residential Condominiums. Commercial Property shall be assessed under the following formula: $0.09 per square foot of the greater of (i) lot square footage or (ii) building square footage PLUS $4.95 per linear foot of Lot Frontage on roadways as these values are listed on the Hamilton County Geographic Information Systems and by the Hamilton County Assessor's Office.

The formula for a Commercial Property is thus: $0.09 (A) + $4.95 (B) = Total BID Assessment.

In the first year of the BID, the estimated annual assessments for properties will be as follows:

Total Commercial Property Rate	$0.09 per square foot of the greater of lot or building square footage PLUS $4.95 per linear foot of Lot Frontage on roadways
Residential Condominium (Flat Rate; per unit)	$150.00

(c) "Frontage" refers to parcel frontage on all adjoining roadways. All parcel sides that front a street which is serviced by the Downtown CBID are covered, including those located along the exterior boundaries of the Downtown CBID.

(d) The Downtown BID assessment for a Commercial Property in a mixed-use building shall be calculated by multiplying $0.09 by the greater of lot or building square footage. The lot square footage for Commercial Property in a mixed-use building shall be calculated by multiplying the total lot square footage by a fraction, the numerator of which shall be the Commercial Property Owner's share of the building square footage, and the denominator which shall be the total building square footage. This will be added to the Owner's Frontage calculation, which shall be calculated by multiplying $4.95 by the Owner's share of the Frontage. The Owner's share of the Frontage is calculated by multiplying the total Frontage by a fraction, the numerator of which shall be the Commercial Property Owner's building square footage, and the denominator of which shall be the total building square footage. In the event only one Commercial Property Owner borders a roadway in a mixed-use building, that Commercial Property Owner shall be responsible for all Frontage along such roadway.

The formula for a Commercial Property in a mixed-use building is thus:

$0.09 (greater of Owner's share of lot or building square footage) + $4.95 (Owner's share of Frontage) = BID Property Assessment for Commercial Properties in mixed-use buildings.

(e) Parking garages shall be assessed based on Frontage and lot size, rather than building size. In the event a parcel is improved by a building and a parking garage, the square footage of the parking garage shall be deducted from the square footage of the building for the purposes of the building's special assessment.

(f) Non-profit organizations that own real property located within the Downtown CBID may seek reductions and/or waivers of the special assessment on a case-by-case basis each year provided that: (i) the Owner is an institutional nonprofit organization registered under Section 501(c)(3) of the US Internal Revenue Code, (ii) the property is exempt from property taxes as a religious, charitable, scientific, or educational institution under T.C.A. § 67-5-212, and (iii) the Owner demonstrates substantial financial and/or economic hardship to the CBID Board, as determined by the CBID Board in its sole discretion. The CBID Board has determined under this subsection that Saint Paul's Episcopal Church at 305 W. 7th Street and Second Presbyterian Church at 700 Pine Street are permanently approved for this exemption and waiver of the special assessment.

(g) The CBID Board may determine annual adjustments in the special assessment rates at its sole discretion consistent with increases in program services and costs; however, in no event shall annual assessments increase by more than five percent (5%) per annum. A change in the rate of levy of such special assessment may be initiated only by a resolution from the CBID Board. Special assessments shall be imposed and collected annually as set forth hereinabove. Changes in the rate or additions to the rate of the special assessment, upon approval by the CBID Board, may be made only on an annual basis and through a public hearing before the City Council in accordance with T.C.A. § 7-84-522(f).

(h) Beginning in 2019, special assessments shall be levied against all real property within the Downtown CBID pursuant to a special assessment roll of all Owners within the District as shown in the records of the Assessor of Property for the City Government of Chattanooga and Hamilton County.

(i) Notice of the special assessment for the District shall be issued simultaneously with tax notices for regular Hamilton County and City of Chattanooga real property taxes, and revenues from the special assessment shall be collected by the City Treasurer to the extent the Treasurer is empowered by this ordinance to collect this assessment. All collections of assessments by any government official other than the City Treasurer shall be reviewed and approved by subsequent amendments to this article. The authority of the City Treasurer to collect the assessment will be reviewed in one (1) year for continuance. Additionally, the City will collect no less than a two (2%) percent fee for collections. Also, the City will take zero (0%) percent enforcement actions against non-fee payers.

(j) All CBID Board meetings during the term of this article shall comply with the Open Meeting requirements of Tennessee Code Annotated Section 8-44-107.

(k) The CBID shall be subject to audits pursuant to Ordinance Section 2-510 or other applicable ordinances of the City of Chattanooga every year during the term of this article before the annual City budget is approved.
(Ord. No. 13487, § 1, 7-30-19; Ord. No. 13498, § 1, 9-10-19; Ord. No. 13893, § 1, 9-6-22)

Sec. 11-532. Annual budget.

The CBID Board shall annually submit to the City Council a financial report and a written report of its activities for the preceding year together with a proposed budget for the next year. The annual budget shall include a projection of revenues from the special assessment and a projection of expenditures for projects, services and activities of the CBID Board and shall be reviewed and approved by the City Council, or if not approved shall be returned to the CBID Board for revision and resubmission until the City Council shall approve the annual budget.
(Ord. No. 13487, § 1, 7-30-19)

Sec. 11-533. PILOT.

During the term of a payment in lieu of ad valorem taxes (PILOT) or tax increment financing (TIF) agreement for real property in the Downtown CBID, the CBID Board may, by resolution, abate the special assessment such that the assessment is based on the assessed value prior to redevelopment of the real property. At the request of the Mayor, the CBID Board shall place the assessment abatement on its agenda and shall consider the assessment abatement at its next regularly scheduled meeting. Failure of the CBID Board to make a decision on the assessment abatement within thirty (30) days of the abatement first appearing on the CBID Board's agenda shall constitute an approval. After the CBID Board makes its decision, any review shall be provided by a court of competent jurisdiction pursuant to T.C.A. § 27-8-101 et seq., T.C.A. § 27-9-101 et seq., or T.C.A. § 29-14-101, et seq.
(Ord. No. 13487, § 1, 7-30-19)

Sec. 11-534. Term.

(a) On the fifth (5th) anniversary of the formation of the Downtown CBID, the CBID Board will complete formal evaluation to determine whether the services and assessment methods are consistent with the needs of the District. Pursuant to T.C.A. § 7-84-529, the Downtown CBID may be dissolved upon written petition of the Owners holding seventy-five percent (75%) of the assessed value and fifty percent (50%) of the Owners of record.

(b) On the tenth (10th) anniversary of the formation of the Downtown CBID the CBID Board will determine if the Downtown CBID should continue in existence or pursue dissolution in accordance with T.C.A. § 7-84-529.

(3) The designee shall be a full-time employee of the license holder and hold a valid city plant electrician's license or a plant master electrician's license or, for a period not to exceed six (6) months, a temporary journeyman's license issued in accordance with other sections in this article.

In the absence of a qualified full-time employee, an outside class I electrical contractor may be named as a designee, but all work must be done by employees of the contractor who are properly licensed in accordance with other sections of this article.

(4) If the designee should terminate his employment with the license holder, such firm shall immediately provide the name of a replacement, who meets the qualifications in paragraph (2) above, to the board of electrical examiners. If no licensed person is available, an individual having a minimum of five (5) years' experience as an electrician or who is a graduate electrical engineer or equivalent may serve temporarily in this position until he has the opportunity to take the examination at its next offering.

(5) A plant electrical license shall entitle its holder to maintain, repair, replace, relocate and alter existing electrical circuits and to install new circuits within existing buildings with the exception that a license holder with a plant electrician as the designee will be limited to the installation of new circuits of sixty (60) amps or less capacity within existing buildings. If the designee holds a plant master electrician's license, employees of the manufacturing firm also may make electrical installations in excess of sixty (60) amps capacity on existing buildings and on new buildings, additions and new structures.

(6) Electrical permits are not required for work within existing buildings. Permits shall be obtained for electrical work in or on new buildings, additions and structures and inspections made in accordance with other sections in this chapter. It will be the responsibility of the designee to call for inspections at the rough-in and final stages on work for which permits are obtained. Inspections may be made at other times for cause.

Sec. 16-174. Increased disability benefits from causes not resulting from performance of duties.

Notwithstanding the provisions of Chattanooga City Code, Part I, Section 13.74(a), the following benefits are provided in lieu thereof:

(a) Any member with not less than three (3) years nor more than ten (10) years of active service in the Fire and Police Department who shall become disabled from causes arising outside of the course of his or her employment with the Fire or Police Department shall so long as they remain disabled be paid a monthly sum equal to thirty percent (30%) of the average base salary of such member, but not to exceed the maximum salary in the salary range and step of sergeant in the Police Department classification as set forth in the classification of positions in the Police Department during the three (3) years of the member's service which yield the highest average; plus two percent (2%) of said defined average base salary for each year of active service in the Fire and Police Department over ten (10) years, but not to exceed sixty percent (60%) of the above defined average base salary. Payment under this section shall commence after the member's sick days, annual leave days or personal leave days have been exhausted.

Any member with less than three (3) years of service, who shall become disabled from causes arising outside of the course of his or her employment with the Fire and Police Department, shall be refunded his or her contributions under the provisions of Section 13.77. In the event of death of any member with less than three (3) years of service, the ten thousand dollars ($10,000.00) death benefit shall be paid to his or her beneficiary and his or her contributions shall be refunded to his or her estate.

A member will not be eligible for disability benefits nor their spouse eligible for periodic death benefits under this section if disability or death is a result of any of the following:

(1) Excessive and habitual use by the plan member of drugs, intoxicating liquors and narcotics unless such member is actively and continuously undergoing treatment at an approved clinic or treatment center for drug addicts and alcoholics.

(2) Injury or disease sustained by the plan member while willfully and illegally participating in acts of violence, riots, civil insurrections, or while committing an unlawful act.

(3) Injury or disease sustained by the plan member while serving in any Armed Forces or as the result of warfare.

(4) Injury or disease sustained by the plan member after his employment has been terminated.

(5) Intentional, self-inflicted injury.

If a member is not qualified for benefits under this Section, he or she may receive a refund of his or her contributions. In the event of the death of a member, when the death is a direct result of any of the above stipulations, his or her contributions shall be refunded to his or her estate.

Before approving any disability retirement request, the Board may request proof of disability or the verification by one (1) or more competent physicians selected by the Board that the member has become disabled in accordance with the Pension Fund provisions. The Board may further require continued medical examinations of the disabled member from time to time and at its discretion. No member shall be given disability benefits under this Section if the Board finds that said disability can probably be successfully corrected by competent medical treatment, and said member fails or refuses to be so treated.

The term "disabled" or "disability" in this Section shall mean a medically determinable impairment which in the opinion of the Board prevents such member from meeting the normal and reasonable demands of his or her regularly assigned job or any other job in City government which the City may offer said member for which he or she is reasonably qualified by experience, training, or education.

(b) (1) If any member with less than ten (10) years of active service dies before retirement from any cause not growing out of and not in consequence of his or her duty in the Fire and Police Department, there shall be paid to their beneficiary the death benefit of ten thousand dollars ($10,000.00) and to the surviving spouse a benefit equal to Option D, Section 13.82 or the sum of $300.00 per month until death, whichever is greater, subject to the conditions of Section "(a)" of this Section. If a member dies after retirement under this Section, the ten thousand dollars ($10,000.00) benefit shall be paid to their beneficiary, and to the surviving spouse that benefit selected by the member under Section 13.82 of this Fund.

(2) If a member has more than ten (10) years of active service but less than the time required for a Service Retirement Pension and dies before retirement from any cause not growing out of and not in consequence of his or her duty in the Fire and Police Department, there shall be paid to their beneficiary a death benefit of ten thousand dollars ($10,000.00) and to the surviving spouse the benefit which said spouse would have been entitled to receive under Option D, Section 13.82 of this Fund, subject to the conditions of Section "(a)" of this Section. If a member dies after retirement under this Section, the ten thousand dollars ($10,000.00) death benefit will be paid to their beneficiary, and to the surviving spouse that benefit selected by the member under Section 13.82 of this Fund.

(3) If any member dies before retirement and has reached the conditions for a Service Retirement Pension, there shall be paid to said member's beneficiary a death benefit of ten thousand dollars ($10,000.00), and if said member was an employee on November 3, 1992, the sum of three hundred dollars ($300.00) per month shall be paid to the surviving spouse until death or remarriage if said member has not designated the spouse as a beneficiary under one (1) of the options listed in Section 13.82. If there is no election, the surviving spouse shall receive the benefit paid under Option D, Section 13.82.

If a member who is employed after November 3, 1992, shall die before retirement and has reached the conditions for a Service Retirement Pension, there shall be paid to the beneficiary of said member a death benefit of ten thousand dollars ($10,000.00) and the benefits elected under Section 13.82.

(c) If there is no surviving spouse or if the surviving spouse becomes disqualified, then the dependent's minor child or children, shall each receive $100.00 per month during their minority, provided that the total amount payable to all of such children shall not exceed the maximum pension. If such deceased member is not survived by spouse or minor children, but is survived by two (2) parents solely dependent upon said member, each parent, so long as he or she has not other means of support, shall receive one-half (½) of the benefits to which a surviving spouse would receive under this Section. If there is only one (1) parent dependent upon such member for support, such parent shall be paid the same benefits which a surviving spouse would receive under this Section.

2) Non-residential service locations, properties, or parcels maintaining a commercial container of any type or size shall not maintain a City garbage container and are not eligible for refuse collection services.

f) Only refuse placed inside the issued City garbage containers shall be collected.

g) It shall be the duty of the property owner where garbage is created or accumulated to replace at their expense any lost, stolen, vandalized, burned, or defaced City garbage containers. This includes any person who subsequently comes into possession of a location or property which had previously been issued a garbage container. City garbage containers damaged during the collection process will be repaired or replaced by the City.

h) City garbage containers may be replaced or leased to eligible properties for a fee of seventy-five dollars ($75.00). All City garbage containers are and remain the property of the City of Chattanooga even if a fee has been paid to the City for the use of such container.
(Code 1986, § 18-31; Ord. No. 10421, § 3, 5-28-96; Ord. No. 12260, § 3, 6-16-09; Ord. No. 12687, § 3, 2-5-13; Ord. No. 13385, § 1, 10-16-18)

Sec. 18-32. Residential; storage and requirements.

Lids or covers of such containers shall be kept tightly closed and watertight at all times other than when garbage is being deposited therein or removed therefrom. Containers having ragged or sharp edges or other defects must be promptly repaired or replaced.

(b) *Fifty-five (55) gallon drums prohibited.* Fifty-five (55) gallon drums are specifically prohibited from use as containers for garbage or other refuse.

(c) *Leaves, etc.* Small amounts of leaves, less than two (2) feet wide by two (2) feet long by one (1) foot tall including grass clippings and other rubbish, shall be stored in approved containers or plastic bags with the plastic bags placed inside an approved container on the curbside for collection.

(d) *Removal after emptying.* After the garbage, brush, limbs or other refuse has been emptied out of a receptacle by the department of public works, streets and airports, the person owning such receptacle shall remove same from the street or sidewalk at once.

(e) *Bag garbage.* To eliminate odor and insects, reduce spillage and litter, and discourage animals from getting into garbage containers, all residential waste should be placed in plastic or paper bags which must be tightly secured. Collection crews will not pick up spills resulting from loose garbage.
(Code 1986, § 18-32; Ord. No. 12260, § 4, 6-16-09; Ord. No. 13385, § 1, 10-16-18)

Sec. 18-33. Location.

(a) It shall be incumbent upon tenants, lessees, occupants or owners of premises to provide a safe and convenient entrance to and through the premises for the purpose of collecting garbage. A container for refuse and garbage which is to be collected shall be placed at a convenient and accessible point in the yard within five (5) feet of a driveway accessible to a collection vehicle or within five (5) feet of a street in such a position as not to intrude upon the traveled portion of the street or alley. Containers shall be placed where collectors may pick up and empty same without attack from animals in the possession of the occupant. The Director may by regulations provide further for the location of containers. (For example, the Director may provide for special locations for those persons who are aged or handicapped in such a manner as would otherwise create an unusual hardship.) City garbage collectors shall not enter houses, garages or stores for the collection of garbage or rubbish. Garbage and refuse shall not be stored in close proximity to other personal effects which are not desired to be collected, but shall be reasonably separated in order that the collector can clearly distinguish between what is to be collected and what is not to be collected. Personal effects stored or placed within ten (10) feet of a container shall be *prima facie* presumed to be garbage or refuse. This section is not to be construed as requiring all users to place containers in a location for "curbside pick-up." Further, this section does not require those persons who own home compactor units to place the bags in which the compacted garbage has been deposited inside the garbage container so long as the aforementioned bags are constructed in such a sturdy fashion as to prevent its being ripped open by animals and its contents scattered. All material shall be placed for pick-up on the day scheduled for pick-up in the particular area. No material shall be placed for pick-up before the day scheduled.

(b) Special containers for the mechanical pick-up system shall be placed in a location suitable for mechanical pick-up. Generally, this shall be within two (2) feet of the curb or edge of pavement, at least three (3) feet from obstructions such as mail boxes, fences, utility poles, and other garbage containers, and at least twenty (20) feet from any vehicle parked along the street. The Director or his designee may designate specific locations for such containers when reasonably necessary to facilitate mechanical pick-up.
(Code 1986, § 18-33; Ord. No. 10421, § 4, 5-28-96; Ord. No. 12260, §§ 1, 5, 6-16-09Ord. No. 13385, § 1, 10-16-18)

Sec. 18-34. Disturbing.

No unauthorized person shall uncover, rifle, pilfer, dig into, turn over, or in any other manner disturb or use any refuse container belonging to another. This section shall not be construed to prohibit the use of public anti-litter cans for the deposit of refuse commonly recognized as litter.

(c) *Locked doors*. All means of egress doors shall be readily openable from the side from which egress is to be made without the need for keys, special knowledge or effort, except where the door hardware conforms to that permitted by the Building Code.

(d) *Emergency escape openings*. Required emergency escape and rescue openings shall be operational from the inside of the room without the use of keys or tools. Bars, grilles, grates or similar devices are permitted to be placed over emergency escape and rescue openings provided the minimum net clear opening size complies with the Building Code that was in effect at the time of construction and such devices shall be releasable or removable from the inside without the use of a key, tool or force greater than that which is required for normal operation of the escape and rescue opening.
(Ord. No. 13442, § 1, 3-12-19)

(2) In each room used for sleeping purposes.

(3) In each story within a dwelling unit, including basements and cellars but not including crawl spaces and uninhabitable attics. In dwellings or dwelling units with split levels and without an intervening door between the adjacent levels, a smoke alarm installed on the upper level shall suffice for the adjacent lower level provided that the lower level is less than one (1) full story below the upper level.

(d) *Power source*. Single-station smoke alarms shall receive their primary power from the structure wiring provided that such wiring is served from a commercial source and shall be equipped with a battery backup. Smoke alarms shall emit a signal when the batteries are low. Wiring shall be permanent and without a disconnecting switch other than as required for overcurrent protection.

Exception: Smoke alarms are permitted to be solely battery operated in structures where no construction is taking place, structures that are not served from a commercial power source and in existing areas of structures undergoing alterations or repairs that do not result in the removal of interior wall or ceiling finishes exposing the structure, unless there is an attic, crawl space or basement available which could provide access for structure wiring without the removal of interior finishes.

(e) *Interconnection*. Where more than one (1) smoke alarm is required to be installed within a dwelling, the smoke alarms shall be interconnected in such a manner that the activation of one (1) alarm will activate all of the alarms in the individual unit. Exceptions: The following exceptions shall apply to this requirement:

(1) Interconnection is not required in Structures which are not undergoing alterations, repairs or construction of any kind.

Sec. 21-233. Communications by administrative hearing officer and parties.

(a) Unless required for the disposition of ex parte matters specifically authorized by statute, an administrative hearing officer presiding over a contested case proceeding may not communicate, directly or indirectly, regarding any issue in the proceeding, while the proceeding is pending, with any person without notice and opportunity for all parties to participate in the communication.

(b) Notwithstanding Subsection (a), an administrative hearing officer may communicate with municipal employees or officials regarding a matter pending before the administrative body or may receive aid from staff assistants, members of the staff of the city attorney or a licensed attorney, if such persons do not receive ex parte communications of a type that the administrative hearing officer would be prohibited from receiving, and do not furnish, augment, diminish or modify the evidence in the record.

(c) Unless required for the disposition of ex parte matters specifically authorized by statute, no party to a contested case, and no other person may communicate, directly or indirectly, in connection with any issue in that proceeding, while the proceeding is pending, with any person serving as an administrative hearing officer without notice and opportunity for all parties to participate in the communication.

(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-235. Prehearing conferences and orders.

(a) (1) In any action set for hearing, the Administrative Hearing Officer, upon the Administrative Hearing Officer's own motion, or upon motion of one (1) of the parties or such party's qualified representatives, may direct the parties or the attorneys for the parties, or both, to appear before the Administrative Hearing Officer for a conference to consider:

(i) The simplification of issues;

(ii) The possibility of obtaining admissions of fact and of documents that will avoid unnecessary proof;

(iii) The limitation of the number of witnesses; and

(iv) Such other matters as may aid in the disposition of the action.

(2) The Administrative Hearing Officer shall make an order that recites the action taken at the conference, and the agreements made by the parties as to any of the matters considered, and that limits the issues for hearing to those not disposed of by admissions or agreements of the parties. Such order when entered controls the subsequent course of the action, unless modified at the hearing to prevent manifest injustice.

(b) Upon reasonable notice to all parties, the Administrative Hearing Officer may convene a hearing or convert a prehearing conference to a hearing, to be conducted by the Administrative Hearing Officer sitting alone, to consider argument or evidence, or both, on any question of law.

(c) In the discretion of the Administrative Hearing Officer, all or part of the prehearing conference may be conducted by telephone, television or other electronic means, if each participant in the conference has an opportunity to participate in, to hear, and, if technically feasible, to see the entire proceeding while it is taking place.

(d) If a prehearing conference is not held, the Administrative Hearing Officer may issue a prehearing order, based on the pleadings, to regulate the conduct of the proceedings.
(Ord. No. 13442, § 1, 3-12-19)

(5) Licensed architect; or

(6) Licensed engineer.

(c) The City may also contract with the Administrative Procedures Division of the Office of the Tennessee Secretary of State to employ an administrative law judge on a temporary basis to serve as an administrative hearing officer. MTAS shall issue a certificate of participation to each person whose attendance is satisfactory.

(b) Each person actively serving as an administrative hearing officer shall complete six (6) hours of continuing education every calendar year. (Ord. No. 13442, § 1, 3-12-19)

Sec. 21-238. Citations for violations; written notice.

(a) Upon the issuance of a citation for a violation of a building or property maintenance code referenced in this article, the issuing officer shall provide written notice of:

(1) A short and plain statement of the matters asserted. If the issuing officer is unable to state the matters in detail at the time the citation is served, the initial notice may be limited to a statement of the issues involved and the ordinance violations alleged. Thereafter, upon timely, written application a more definite and detailed statement shall be furnished ten (10) business days prior to the time set for the hearing;

(2) A short and plain description of the administrative hearing process including references to state and local statutory authority;

(3) Contact information for the Office of the Administrative Hearing Officer; and

(4) Time frame in which the administrative hearing officer will review the citation and determine the fine and remedial period, if any.

(b) Citations issued for a violation of a building or property maintenance code referenced in this article shall be signed by the alleged violator at the time of issuance. If an alleged violator refuses to sign, the issuing officer shall note the refusal and attest to the alleged violator's receipt of the citation. An alleged violator's signature on a citation is not admission of guilt.

(c) Citations issued upon absentee property owners may be served via certified mail sent to the last known address of the recorded owner of the property.

(d) Citations issued for a violation of a building or property maintenance code referenced in this article shall be transmitted to an administrative hearing officer within two (2) business days of issuance.
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-239. Review of citation; levy of fines.

(a) Upon receipt of a citation issued pursuant to this Article, an administrative hearing officer shall, within seven (7) business days of receipt, review the appropriateness of an alleged violation. Upon determining that a violation does exist, the administrative hearing officer has the authority to levy a fine upon the alleged violator in accordance with this section. Any fine levied by an administrative hearing officer must be reasonable based upon the totality of the circumstances.

(1) For violations occurring upon residential property, an administrative hearing officer has the authority to levy a fine upon the violator not to exceed five hundred dollars ($500.00) per violation. For purposes of this part, "residential property" means a single family dwelling principally used as the property owner's primary residence and the real property upon which it sits.

(2) For violations occurring upon nonresidential property, an administrative hearing officer has the authority to levy a fine upon the violator not to exceed five hundred dollars ($500.00) per violation per day. For purposes of this part, "nonresidential property" means all real property, structures, buildings and dwellings that are not residential property.

(b) If a fine is levied pursuant to Subsection (a), the administrative hearing officer shall set a reasonable period of time to allow the alleged violator to remedy the violation alleged in the citation before the fine is imposed. The remedial period shall be no less than ten (10) nor greater than one hundred twenty (120) calendar days, except where failure to remedy the alleged violation in less than ten (10) calendar days would pose an imminent threat to the health, safety or welfare of persons or property in the adjacent area.

(c) Upon the levy of a fine pursuant to Subsection (a), the administrative hearing officer shall within seven (7) business days provide via certified mail notice to the alleged violator of:

(1) The fine and remedial period established pursuant to Subsections (a) and (b);

(2) A statement of the time, place, nature of the hearing, and the right to be represented by counsel; and

(3) A statement of the legal authority and jurisdiction under which the hearing is to be held, including a reference to the particular sections of the statutes and rules involved.

(d) The date of the hearing shall be no less than thirty (30) calendar days following the issuance of the citation. To confirm the hearing, the alleged violator must make a written request for the hearing to the administrative hearing officer within seven (7) business days of receipt of the notice required in Subsection (c).

(e) If an alleged violator demonstrates to the issuing officer's satisfaction that the allegations contained in the citation have been remedied to the issuing officer's satisfaction, the fine levied pursuant to Subsection (a) shall not be imposed or if already imposed cease; and the hearing date, if the hearing has not yet occurred, shall be cancelled.
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-240. Party in default.

(a) If a party fails to attend or participate in a prehearing conference, hearing or other stage of a contested case, the Administrative Hearing Officer may hold the party in default and either adjourn the proceedings or conduct them without the participation of that party, having due regard for the interest of justice and the orderly and prompt conduct of the proceedings.

(b) If the proceedings are conducted without the participation of the party in default, the Administrative Hearing Officer shall include in the final order a written notice of default and a written statement of the grounds for the default.
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-241. Petitions for intervention.

(a) The Administrative Hearing Officer shall grant one (1) or more petitions for intervention if:

(1) The petition is submitted in writing to the Administrative Hearing Officer, with copies mailed to all parties named in the notice of the hearing, at least seven (7) business days before the hearing;

(2) The petition states facts demonstrating that the petitioner's legal rights, duties, privileges, immunities or other legal interest may be determined in the proceeding or that the petitioner qualifies as an intervenor under any provision of law; and

(3) The Administrative Hearing Officer determines that the interests of justice and the orderly and prompt conduct of the proceedings shall not be impaired by allowing the intervention.

(b) If a petitioner qualifies for intervention, the Administrative Hearing Officer may impose conditions upon the intervenor's participation in the proceedings, either at the time that intervention is granted or at any subsequent time. Conditions may include:

(1) Limiting the intervenor's participation to designated issues in which the intervenor has a particular interest demonstrated by the petition;

(2) Limiting the intervenor's participation so as to promote the orderly and prompt conduct of the proceedings; and

(3) Requiring two (2) or more intervenors to combine their participation in the proceedings.

(c) The Administrative Hearing Officer, at least twenty-four (24) hours before the hearing, shall render an order granting or denying each pending petition for intervention, specifying any conditions, and briefly stating the reasons for the order. The Administrative Hearing Officer may modify the order at any time, stating the reasons for the modification. The Administrative Hearing Officer shall promptly give notice of an order granting, denying or modifying intervention to the petitioner for intervention and to all parties.
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-242. Regulating course of proceedings; full disclosure; hearing open to public.

(a) The Administrative Hearing Officer shall regulate the course of the proceedings, in conformity with the prehearing order, if any.

(b) To the extent necessary for full disclosure of all relevant facts and issues, the Administrative Hearing Officer shall afford to all parties the opportunity to respond, present evidence and argument, conduct cross-examination, and submit rebuttal evidence, except as restricted by a limited grant of intervention or by the prehearing order.

(c) In the discretion of the Administrative Hearing Officer and by agreement of the parties, all or part of the hearing may be conducted by telephone, television or other electronic means, if each participant in the hearing has an opportunity to participate in, to hear, and, if technically feasible, to see the entire proceedings while taking place.

(d) The hearing shall be open to public observation pursuant to Tennessee Code Annotated, Title 8, Chapter 44, unless otherwise provided by state or federal law. To the extent that a hearing is conducted by telephone, television or other electronic means, the availability of public observation shall be satisfied by giving members of the public an opportunity, at reasonable times, to hear the tape recording and to inspect any transcript produced, if any.
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-243. Evidence and affidavits; notice.

(a) In administrative hearings:

(1) The Administrative Hearing Officer shall admit and give probative effect to evidence admissible in a court, and when necessary to ascertain facts not reasonably susceptible to proof under the rules of court, evidence not admissible thereunder may be admitted if it is of a type commonly relied upon by reasonably prudent persons in the conduct of their affairs. The Administrative Hearing Officer shall give effect to the rules of privilege recognized by law and to statutes protecting the confidentiality of certain records, and shall exclude evidence which in his or her judgment is irrelevant, immaterial or unduly repetitious;

(2) At any time not less than ten (10) business days prior to a hearing or a continued hearing, any party shall deliver to the opposing party a copy of any affidavit such party proposes to introduce in evidence, together with a notice in the form provided in Subsection (b). Unless the opposing party, within seven (7) business days after delivery, delivers to the proponent a request to cross-examine an affiant, the opposing party's right to cross-examination of such affiant is waived and the affidavit, if introduced in evidence, shall be given the same effect as if the affiant had testified orally. If an opportunity to cross-examine an affiant is not afforded after a proper request is made as provided in this Subsection, the affidavit shall not be admitted into evidence. "Delivery," for purposes of this Section, means actual receipt;

(3) The Administrative Hearing Officer may admit affidavits not submitted in accordance with this Section where necessary to prevent injustice;

(4) Documentary evidence otherwise admissible may be received in the form of copies or excerpts, or by incorporation by reference to material already on file with the City. Upon request, parties shall be given an opportunity to compare the copy with the original, if reasonably available; and

(5) (i) Official notice may be taken of:

(A) Any fact that could be judicially noticed in the courts of this state;

(B) The record of other proceedings before the agency; or

(C) Technical or scientific matters within the Administrative Hearing Officer's specialized knowledge; and

(ii) Parties must be notified before or during the hearing, or before the issuance of any final order that is based in whole or in part on facts or material noticed, of the specific facts or material noticed and the source thereof, including any staff memoranda and data, and be afforded an opportunity to contest and rebut the facts or material so noticed.

(b) The notice referred to in Subsection (a) shall contain the following information and be substantially in the following form:

The accompanying affidavit of _____ (here insert name of affiant) will be introduced as evidence at the hearing in _____ (here insert title of proceeding). _____ (here insert name of affiant) will not be called to testify orally and you will not be entitled to question such affiant unless you notify _____ (here insert name of the proponent or the proponent's attorney) at _____ (here insert address) that you wish to cross-examine such affiant. To be effective, your request must be mailed or delivered to _____ (here insert name of proponent or the proponent's attorney) on or before _____ (here insert a date seven (7) business days after the date of mailing or delivering the affidavit to the opposing party).
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-244. Rendering of final order; findings of fact; submission of proposed findings.

(a) An Administrative Hearing Officer shall render a final order in all cases brought before said officer.

(b) A final order shall include conclusions of law, the policy reasons therefor, and findings of fact for all aspects of the order, including the remedy prescribed. Findings of fact, if set forth in language that is no more than mere repetition or paraphrase of the relevant provision of law, shall be accompanied by a concise and explicit statement of the underlying facts of record to support the findings. The final order must also include a statement of the available procedures and time limits for seeking reconsideration or other administrative relief and the time limits for seeking judicial review of the final order.

(c) Findings of fact shall be based exclusively upon the evidence of record in the adjudicative proceeding and on matters officially noticed in that proceeding. The Administrative Hearing Officer's experience, technical competence and specialized knowledge may be utilized in the evaluation of evidence.

(d) If an individual serving or designated to serve as an Administrative Hearing Officer becomes unavailable, for any reason, before rendition of the final order, a qualified substitute shall be appointed. The substitute shall use any existing record and may conduct any further proceedings as is appropriate in the interest of justice.

(e) The Administrative Hearing Officer may allow the parties a designated amount of time after conclusion of the hearing for the submission of proposed findings.

(f) A final order rendered pursuant to Subsection (a) shall be rendered in writing within seven (7) business days after conclusion of the hearing or after submission of proposed findings unless such period is waived or extended with the written consent of all parties or for good cause shown.

(g) The Administrative Hearing Officer shall cause copies of the final order under Subsection (a) to be delivered to each party.
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-245. Final order effective date.

(a) All final orders shall state when the order is entered and effective.

(b) A party may not be required to comply with a final order unless the final order has been mailed to the last known address of the party or unless the party has actual knowledge of the final order.
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-246. Collection of fines, judgments and debts.

The City may collect a fine levied pursuant to this Article by any legal means available to a municipality to collect any other fine, judgment or debt.
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-247. Judicial review of final order.

(a) A person who is aggrieved by a final decision in a contested case is entitled to judicial review as provided in T.C.A. § 6-54-1017, which shall be the only available method of judicial review.

(b) Proceedings for judicial review of a final order are instituted by filing a petition for review in the chancery court for Hamilton County. Such petition must be filed within sixty (60) calendar days after the entry of the final order that is the subject of the review.

(c) The filing of the petition for review does not itself stay enforcement of the final order. The reviewing court may order a stay on appropriate terms, but if it is shown to the satisfaction of the reviewing court, in a hearing that shall be held within ten (10) business days of a request for hearing by either party, that any party or the public at large may suffer injury by reason of the granting of a stay, then no stay shall be granted until a good and sufficient bond, in an amount fixed and approved by the court, shall be given by the petitioner conditioned to indemnify the other persons who might be so injured and if no bond amount is sufficient, the stay shall be denied.

(d) Within forty-five (45) calendar days after service of the petition, or within further time allowed by the court, the Administrative Hearing Officer shall transmit to the reviewing court the original or a certified copy of the entire record of the proceeding under review. By stipulation of all the parties of the review proceedings, the record may be shortened. A party unreasonably refusing to stipulate to limit the record may be taxed by the court for the additional cost. The court may require or permit subsequent corrections or additions to the record.

(e) If, before the date set for hearing, application is made to the court for leave to present additional evidence, and it is shown to the satisfaction of the court that the additional evidence is material and that there were good reasons for failure to present it in the administrative proceeding, the court may order that the additional evidence be taken before the Administrative Hearing Officer upon conditions determined by the court. The Administrative Hearing Officer may modify its findings and decision by reason of the additional evidence and shall file that evidence and any modifications, new findings or decisions with the reviewing court.

(f) The procedure ordinarily followed in the reviewing court will be followed in the review of contested cases decided by the Administrative Hearing Officer, except as otherwise provided in this article. The Administrative Hearing Officer that issued the decision to be reviewed is not required to file a responsive pleading.

(g) The review shall be conducted by the court without a jury and shall be confined to the record. In cases of alleged irregularities in procedure before the Administrative Hearing Officer, not shown in the record, proof thereon may be taken in the court.

(h) The court may affirm the decision of the Administrative Hearing Officer or remand the case for further proceedings. The court may reverse or modify the decision if the rights of the petitioner have been prejudiced because the administrative findings, inferences, conclusions or decisions are:

(1) In violation of constitutional or statutory provisions;

(2) In excess of the statutory authority of the Administrative Hearing Officer;

(3) Made upon unlawful procedure;

(4) Arbitrary or capricious or characterized by abuse of discretion or clearly unwarranted exercise of discretion; or

(5) Unsupported by evidence that is both substantial and material in the light of the entire record. In determining the substantiality of evidence, the court shall take into account whatever in the record fairly detracts from its weight, but the court shall not substitute its judgment for that of the Administrative Hearing Officer as to the weight of the evidence on questions of fact.

(i) No administrative hearing decision pursuant to a hearing shall be reversed, remanded or modified by the reviewing court unless for errors that affect the merits of such decision.

(j) The reviewing court shall reduce its findings of fact and conclusions of law to writing and make them parts of the record.
(Ord. No. 13442, § 1, 3-12-19)

Sec. 21-248. Appeal to court of appeals.

(a) An aggrieved party may obtain a review of any final judgment of the chancery court by appeal to the court of appeals of Tennessee.

(b) The record certified to the chancery court and the record in the chancery court shall constitute the record in an appeal. Evidence taken in court pursuant to Title 24 shall become a part of the record.

(c) The procedure on appeal shall be governed by the Tennessee Rules of Appellate Procedure.
(Ord. No. 13442, § 1, 3-12-19)

This subsection shall not apply to funeral processions or school buses.

(b) Athletic events, such as runs, bike races, and walks, which are conducted within the city streets;

Upon receipt of the requested information set forth in section 24-103, the Transportation Department shall review, modify and approve the traffic control plan with the goal of keeping necessary traffic arteries open during peak traffic hours and so as not to overload streets reasonably usable as detour routes. The Transportation Department shall further regulate any back-out parking and through-street parking in connection with such special events. The Transportation Department shall have the authority to resolve multiple requests for special events on the same dates on a first-come first-serve basis and there shall be no more than three (3) special events requiring temporary street closures which may be allowed by the Transportation Department within the City of Chattanooga on any given day. In the event that multiple events are requested, the Transportation Department shall have the authority to grant alternative dates within a reasonable time period for utilization of city streets at appropriate times in the interest of public safety. Applicants for a special events permit for major events, such as multi-day festivals, parades, runs, bike races, or other events requiring multiple street closures and/or significant traffic re-routings, shall pay a processing fee of one hundred dollars ($100.00). Determination of whether an event is a small or major event shall be made by the Transportation Department. The applicant shall further provide sufficient proof that at least fifty (50) people shall participate in any special event before any temporary closure or partial closure of a city street shall be authorized by the Transportation Department.

Sec. 24-105. Issuance of special events permit.

The completion of all of the above requested information by the Transportation Department and the payment of the minimum usage fee shall result in the issuance of a special events permit to the applicant subject to any specific changes in the time, location or beginning and ending points of the special event, within ten (10) days after such application is received by the Transportation Department. In the event that there is a denial or change of this special events permit, which shall only be for public safety reasons, the Transportation Department shall state the reason for denial or change in writing to the applicant within such time period. If no agreement is reached with any applicant, the city attorney shall then institute suit for declaratory judgment in the Chancery Court of Hamilton County, Tennessee within five (5) days of the date of any such denial or change and shall seek an immediate hearing to determine whether such permit may be properly denied or changed based upon the public safety concerns of the Transportation Department.

(2) *Left turns on two-way roadways.* At any intersection where traffic is permitted to move in both directions on each roadway entering the intersection, an approach for a left turn shall be made in that portion of the right half of the roadway nearest the center line thereof and bypassing to the right of such center line where it enters the intersection and after entering the intersection the left turn shall be made so as to leave the intersection to the right of the center line of the roadway being entered. Whenever practicable, the left turn shall be made in that portion of the intersection to the left of the center of the intersection.

(3) *Left turns on other than two-way roadways.* At any intersection where traffic is restricted to one (1) direction on one (1) or more of the roadways, the driver of a vehicle intending to turn left at any such intersection shall approach the intersection in the extreme left-hand lane lawfully available to traffic moving in the direction of travel of such vehicle and after entering the intersection the left turn shall be made so as to leave the intersection, as nearly as practicable, in the left-hand lane lawfully available to traffic moving in such direction upon the roadway being entered.

(b) The signal herein required shall be given by means of the hand and arm or by some mechanical or electrical device approved by the department of safety, in the manner herein specified. Whenever the signal is given by means of the hand and arm, the driver shall indicate his intention to start, stop, turn or partly turn by extending the hand and arm and beyond the left side of the vehicle, in the following manner:

(1) For left turns or to pull to the left, the arm shall be extended in a horizontal position straight from and level with the shoulder.

(2) For a right turn or pull to the right, the arm shall be extended upward.

(3) For slowing down or to stop, the arm shall be extended downward.

(c) Such signals shall be given continuously for a distance of at least fifty (50) feet before stopping, turning, partly turning or materially altering the course of the vehicle.

(d) Drivers having once given a hand, electrical or mechanical device signal must continue the course thus indicated, unless they alter the original signal and take care that drivers of vehicles and pedestrians have seen and are aware of the change.

(e) Drivers receiving a signal from another driver shall keep their vehicles under complete control and shall be able to avoid an accident resulting from a misunderstanding of such signal.

(f) Drivers of vehicles standing or stopped at the curb or edge of the roadway, before moving such vehicles, shall give signals of their intention to move into traffic, as hereinbefore provided, before turning in the direction the vehicle shall proceed from the curb.

(a) The Manual on Uniform Traffic Control Devices, 2009 Edition, is hereby adopted as an official standard for all streets and public ways of the City. Such Manual is adopted by reference pursuant to the provisions of sections 6-54-501 through 6-54-507, *Tennessee Code Annotated.* One (1) copy of such Manual

on Uniform Traffic Control Devices is now on file and has been on file in the office of the clerk of the city council for more than fifteen (15) days, subject to public inspection. Such Manual on Uniform Traffic Control Devices shall be cumulative to and in addition to the provisions of this chapter.

(b) If any section, sentence, clause or paragraph of said manual should be held to be invalid by a court of competent jurisdiction, such holding shall not affect the remaining provisions of said manual.

(c) The violation of any provision of this chapter, or the doing of any act or thing prohibited by such manual, or the failure to do or perform any act required by the provisions of such manual, shall constitute a misdemeanor, punishable as provided in section 1-8 of this Code.

Sec. 24-262. Transportation Department to determine and establish.

The Transportation Department is authorized to determine the location and character of traffic control signs, signals and devices when and as required under this Code and other traffic ordinances of this city to make effective the provisions of such Code and ordinances, and may determine and establish such additional traffic-control devices as it may deem necessary to regulate traffic under this Code and other traffic ordinances of this city or under state law or to guide or warn traffic.

Cross reference—Transportation Department, generally, § 24-96 et seq.

Sec. 24-263. Obedience required.

The driver of any vehicle shall obey the instructions of any official traffic-control device applicable thereto placed in accordance with this Code and other traffic ordinances of this city, unless otherwise directed by a police officer, subject to the exceptions granted the driver of an authorized emergency vehicle in this chapter.

State law reference—Similar provisions, T.C.A., § 55-8-109(a).

Sec. 24-264. Devices to be in place before certain regulations enforced.

No provisions of this chapter for which signs are required shall be enforced against an alleged violator if at the time and place of the alleged violation an official sign is not in proper position and sufficiently legible to be seen by an ordinarily observant person; provided, however, that any alleged violator may nevertheless be guilty of reckless driving or in violation of some other section of this chapter which does not state that signs are required. Whenever a particular section does not state that signs are required, such section shall be effective even though no signs are erected or in place.

State law reference—Similar provisions, T.C.A., § 55-8-109(b).

Sec. 24-265. Traffic-control signal legend.

Whenever traffic is controlled by traffic-control signals exhibiting the words "Go", "Caution" or "Stop" or exhibiting different colored lights successively one (1) at a time or with arrows, the following colors only shall be used and such terms and lights shall indicate and apply to drivers of vehicles and pedestrians as follows:

(1) *Green alone or "Go."*

a. Vehicular traffic facing the signal may proceed straight through or turn right or left unless a sign at such place prohibits either such turn. But vehicular traffic, including vehicles turning right or left, shall yield the right-of-way to other vehicles and to pedestrians lawfully within the intersection or an adjacent crosswalk at the time such signal is exhibited.

b. Pedestrians facing the signal may proceed across the roadway within any marked or unmarked crosswalk.

(2) *Yellow alone or "Caution" when shown following the green or "Go" signal.*

a. Vehicular traffic facing the signal is thereby warned that the red or "Stop" signal will be exhibited immediately thereafter and such vehicular traffic shall not enter or cross the intersection when the red or "Stop" signal is exhibited.

b. Pedestrians facing such signal are thereby advised that there is insufficient time to cross the roadway, and any pedestrian then starting to cross shall yield the right-of-way to all vehicles.

(3) *Red alone or "Stop."*

a. Vehicular traffic facing the signal shall stop before entering the crosswalk on the near side of the intersection or, if none, then before entering the intersection and shall remain standing until green or "Go" is shown alone; provided, however, that, a right turn on a red signal shall be permitted at all intersections within the city, provided that the prospective turning car comes to a full and complete stop before turning and that the turning car yields the right-of-way to pedestrians and cross traffic traveling in accordance with their traffic signal. However, said turn will not endanger other traffic lawfully using such intersection. A right turn on red shall be permitted at all intersections except those clearly marked by a "No Turns On Red" sign, which may be erected by the city government at intersections which they decide require no right turns on red in the interest of traffic safety.

b. No pedestrian facing such signal shall enter the roadway unless he can do so safely and without interfering with any vehicular traffic.

c. A left turn on a red or stop signal may be permitted at all intersections within the city where a one-way street intersects with another one-way street moving in the same direction into which the left turn would be made from the original one-way street. Before making such a turn, the prospective turning car shall come to a full and complete stop and shall yield right-of-way to pedestrians and cross traffic traveling in accordance with the traffic signal so as not to endanger traffic lawfully using the intersection. The city government may erect signs permitting such turns at any applicable intersection where it believes such turns would be safe. Unless such signs are erected, left turns on red are prohibited.

(4) *Red with green arrow.*

a. Vehicular traffic facing such signal may cautiously enter the intersection only to make the movement indicated by such arrow but shall yield the right-of-way to pedestrians lawfully within a crosswalk and to other traffic lawfully using the intersection.

b. No pedestrian facing such signal shall enter the roadway unless he can do so safely and without interfering with any vehicular traffic.

(5) *Other than at intersections.* In the event an official traffic-control signal is erected and maintained at a place other than an intersection, the provisions of this section shall be applicable except as to those provisions which by their nature can have no application.

(6) *Place for stop.* Any stop required shall be made at a sign or marking on the pavement indicating where the stop shall be made, but in the absence of any such sign or marking the stop shall be made at the signal.

(Code 1986, § 24-265)

State law reference—Similar provisions, T.C.A., § 55-8-110.

Sec. 24-266. Pedestrian control signals.

Whenever special pedestrian-control signals exhibiting the words "Walk" or "Wait" or "Don't Walk" are in place, such signals shall indicate as follows:

(1) *Walk.* Pedestrians facing such signal may proceed across the roadway in the direction of the signal and shall be given the right-of-way by the drivers of all vehicles.

(2) *Wait or Don't Walk.* No pedestrian shall start to cross the roadway in the direction of such signal, but any pedestrian who has partially completed his crossing on the walk signal shall proceed to a sidewalk or safety zone while the wait signal is showing.

(Code 1986, § 24-266)

State law reference—Similar provisions, T.C.A., § 55-8-111.

Sec. 24-267. Flashing signals.

(a) Whenever an illuminated flashing red or yellow signal is used in a traffic sign or signal it shall require obedience by vehicular traffic as follows:

(1) *Flashing red (stop signal).* When a red lens is illuminated with rapid intermittent flashes, and such light is clearly visible for a sufficient distance ahead to permit such stopping, drivers of vehicles shall stop before entering the nearest crosswalk at an intersection or at a limit line when marked, or, if none, then before entering the intersection, and the right to proceed shall be subject to the rules applicable after making a stop at a stop sign.

(2) *Flashing yellow (caution signal).* When a yellow lens is illuminated with rapid intermittent flashes, drivers of vehicles may proceed through the intersection or past such signal only with caution.

(b) This section shall not apply at railroad grade crossings. Conduct of drivers of vehicles approaching railroad grade crossing shall be governed by the rules as set forth in section 24-358 of this Code.

(Code 1986, § 24-267)

Sec. 24-268. Display of unauthorized devices.

(a) No person shall place, maintain or display upon or in view of any public right-of-way any unauthorized sign, signal, flag, marking or device which purports to be or is an imitation of or resembles an official traffic-control device or which hides from view or interferes with the effectiveness of any official traffic-control device or any railroad sign or signal. In the area bordered on the north by the north bank of the Tennessee River, on the west by Highway 27, on the south by Fourth Street and on the east by Georgia Avenue, no person shall place, maintain, use or display upon any public right-of-way, including sidewalks, any unauthorized sign, signal, flag, whistle, marking or device which impedes the normal flow of traffic or results in any impediment to the normal flow of traffic on the public streets. This subsection shall not apply to newspaper vending machines.

(b) No person shall place or maintain nor shall any public authority permit upon any highway any traffic sign or signal bearing thereon any commercial advertising.

(c) This section shall not be deemed to prohibit the erection upon private property adjacent to highways of signs giving useful directional information and of a type that cannot be mistaken for official signs.

(d) Every such prohibited sign, signal or marking is hereby declared to be a public nuisance and the authority having jurisdiction over the highway is hereby empowered to remove the same or cause it to be removed without notice.

(Code 1986, § 24-268; Ord. No. 10407, § 1, 4-30-96)

(b) Where such traffic lanes have been marked, it shall be unlawful for the operator of any vehicle to fail or refuse to keep such vehicle within the boundaries of any such lane, except when lawfully passing another vehicle or preparatory to making a lawful turning movement.

(c) Where traffic cones have been placed on any marked traffic lane or whenever such cones are placed upon any highway, street or roadway, it shall be unlawful for the driver of any vehicle to pass over or cross such lane or line of cones, to drive against, run over or strike such cones or fail or refuse to keep such vehicle within the boundaries of any such lane or line of cones.

Cross reference—Transportation Department generally, § 24-96 et seq.

Sec. 24-271. Restriction on operation of trucks with three (3) or more axles.

(a) The Transportation Department is hereby authorized to direct the posting of official traffic control devices on any street, alley, or other public way or portion thereof to prohibit through traffic of trucks with three (3) or more axles to restrict such traffic on residential streets or upon any street which an inadequate base or foundation to withstand heavy truck traffic. Nothing herein shall be deemed to prohibit the operation of trucks with three (3) or more axles on such streets with the sole purpose of making a single pick-up or delivery which would entail traveling over the restricted portion of the street without unreasonable interference with the efficient movement of traffic. If the efficient movement of traffic is hindered by a truck with three (3) or more axles on any posted street, the operator and owner of such vehicle shall be cited to the City Court.

(b) For truck operations which would require multiple trips on any restricted street, the truck operator shall make application with the CDOT for a permit to use the restricted street. The operator shall be required to post a bond with the city to cover the costs to repair any damage to the road foundations, surfaces, or structures which the CDOT determines may result from truck operations.

(b) Pursuant to Section 15-116 of the Uniform Vehicle Code, which is expressly adopted by reference, no person shall install or maintain in any area of private property used by the public any sign, signal, marking or other device intended to regulate, warn, or guide traffic unless it conforms with the Manual on Uniform Traffic Control Devices, 2009 Edition, and/or the most recent edition of the Manual on Uniform Traffic Control Devices for Streets and Highways and other standards issued or endorsed by the Federal Highway Administration or the National Association of City Transportation Officials.

(c) Provisions of the Uniform Vehicle Code, adopted pursuant to Subsection (a), shall have the force and effect of law.

(ii) The Parking Authority shall have delivered written notice to the owner of such vehicle at the last indicated address in records maintained by appropriate state authorities, or by notification of proposed impoundment in a letter placed on the windshield of the car proposed for immobilization or impoundment;

a court of competent jurisdiction. A vehicle may be released to the owner or other person entitled to possession only upon proof of ownership or right to possession. Sec. 24-338. Hearing to challenge validity of impoundment.

The hearing shall be conducted within ten (10) business days of the date of the request, unless the owner or other person entitled to possession waives the limitation or the Parking Authority shows good cause for such delay. The Parking Authority shall retain possession of the vehicle pending the hearing, unless the owner or other person claiming right of possession posts a bond in an amount equal to the civil penalties and fees accrued as of the date of the hearing request. If the owner or person claiming possession of the vehicle is unable to pay the amount of the bond, the hearing shall be held within seventy-two (72) hours of the date the request for hearing is received, unless such person requests or agrees to a continuance.

(b) No less than five (5) days prior to the date set for the hearing, the Parking Authority shall notify the person requesting the hearing of the date, time and place of the hearing. In the case of a hearing required to be held within seventy-two (72) hours of the date of the request as provided in this section, the person requesting the hearing shall be informed at the time of his request, or as soon thereafter as practicable, of the date, time and place of the hearing.

(c) Any person who refuses or, except for good cause, fails to appear at the time and place set for the hearing shall be deemed to have conceded on his and the owner's behalf the validity of the impoundment.

(d) At the hearing, after consideration of the evidence, the Chattanooga Parking Citation Enforcement Hearing Board shall determine whether the impoundment was valid and reasonable. Where it has not been established that the impoundment was justified, an order releasing the vehicle shall be entered. All fines and fees paid or amounts posted as bond because of the impoundment of the vehicle shall be returned. Where it has been established that the impoundment was justified, the board shall uphold the impoundment and condition the release of the vehicle upon payment of all civil penalties and fees accruing thereto. If bond has been posted as security for release of the vehicle, said bond shall be forfeited to the Parking Authority. Any fines or fees in excess of the amount of the bond posted shall be ordered to be paid by the owner of the vehicle to the Parking Authority. The Chattanooga Parking Citation Enforcement Hearing Board shall furnish the owner or person appearing on the owner's behalf with a copy of its order.

(e) The Chattanooga Parking Citation Enforcement Hearing Board may consider a parking citation and any other written report made under oath by the issuing officer in lieu of the officer's personal appearance at the hearing.

If the court finds that the impoundment was not justified, the Parking Authority shall release the vehicle, and if applicable, return all civil penalties and fees paid as a result of the impoundment.
(Ord. No. 12626, § 4, 7-10-12)

Sec. 24-340. Unclaimed vehicles to be deemed abandoned.

ARTICLE I. IN GENERAL

Sec. 25-1. Obstruction of streets and street corners.

It shall be unlawful for persons to congregate upon any of the streets or street corners in the city so as to obstruct traffic. The officers of the police department shall disperse all such gatherings on the streets and keep the streets open.
(Code 1986, § 25-1)

Sec. 25-2. Curfew established—Exceptions—Duties of apprehending authority.

(a) It is unlawful for any minor between seventeen (17) and eighteen (18) years of age to remain in or upon any public street, highway, park, vacant lot, establishment or other public place within the county during the following time frames:

(1) Monday through Thursday between the hours of eleven o'clock p.m. (11:00 p.m.) to six o'clock a.m. (6:00 a.m.); and

(2) Friday through Sunday between the hours of twelve o'clock (12:00) midnight to six o'clock a.m. (6:00 a.m.).

(b) It is unlawful for any minor sixteen (16) years of age and under to remain in or upon any public street, highway, park, vacant lot, establishment or other public place within the county during the following time frames:

(1) Monday through Thursday between the hours of ten o'clock p.m. (10:00 p.m.) to six o'clock a.m. (6:00 a.m.); and

(2) Friday through Sunday between the hours of eleven o'clock p.m. (11:00 p.m.) to six o'clock a.m. (6:00 a.m.).

(c) It is unlawful for a parent or guardian of a minor to knowingly permit or by inefficient control to allow the minor to be or remain upon any street or establishment under circumstances not constituting an exception to, or otherwise beyond the scope of subsections (a) and (b). The term "knowingly" includes knowledge that a parent or guardian should reasonably be expected to have concerning the whereabouts of a minor in that parent's legal custody. The term "knowingly" is intended to continue to keep neglectful or careless parents up to a reasonable community standard of parental responsibility through an objective test. It is not a defense that a parent was completely indifferent to the activities or conduct or whereabouts of the minor child.

(d) (1) The following are valid exceptions to the operation of the curfew:

(A) At any time, if a minor is accompanied by the minor's parent or guardian;

(B) When accompanied by an adult authorized by a parent or guardian of the minor to take the parent or guardian's place in accompanying the minor for a designated period of time and purpose within a specified area;

(C) Until the hour of twelve-thirty a.m. (12:30 a.m.), if the minor is on an errand as directed by the minor's parent;

(D) While engaged in a lawful employment activity, or while going directly to or returning directly from the minor's home and place of lawful employment. This exception shall also apply if the minor is in a public place during the curfew hours in the course of the minor's lawful employment. To come within this exception, the minor must be carrying written evidence of employment that is issued by the employer;

(E) Until the hour of twelve-thirty a.m. (12:30 a.m.) if the minor is on the property of or the sidewalk directly adjacent to the place where the minor resides or the place immediately adjacent to the place where the minor resides, if the owner of the adjacent building does not communicate an objection to the minor and the law enforcement officer;

(F) When returning home by a direct route from (and within thirty (30) minutes of the termination of) a school activity or an activity of a religious or other voluntary association, or a place of public entertainment, such as a movie, play or sporting event. This exception does not apply beyond one o'clock a.m. (1:00 a.m.);

(G) In the case of reasonable necessity, but only after the minor's parent has communicated to law enforcement personnel the facts establishing the reasonable necessity relating to specified streets at a designated time for a described purpose including place or origin and destination. A copy of the communication, or the record of the communication, an appropriate notation of the time it was received and of the names and addresses of the parent or guardian and minor constitute evidence of qualification under this exception;

(H) When exercising First Amendment rights protected by the United States Constitution, such as the free exercise of religion, freedom of speech and the right of assembly. A minor shall show evidence of the good faith of the exercise and provide notice to the city officials by first delivering to the appropriate law enforcement authority a written communication, signed by the minor, with the minor's home address and telephone number, addressed to the mayor of the county specifying when, where and in what manner the minor will be on the streets at night during hours when the curfew is still otherwise applicable to the minor in the exercise of a First Amendment right specified in the communication; and

(I) When a minor is, with parental consent, in a motor vehicle engaged in good faith interstate travel.

(2) Each of the exceptions contained in subdivision (d)(1), and the limitations are severable.

(e) When any child is in violation of this section, the apprehending officer shall act in one (1) of the following ways:

(1) In the case of a first violation, and if in the opinion of the officer the action would be effective, take the child to the child's home and warn and counsel the parents or guardians;

(2) Take the minor into custody and transport the minor to a designated curfew center;

(3) Issue a summons to the child or parents or guardians to appear at the juvenile court; or

(4) Bring the child into the custody of the juvenile court for disposition.

(f) (1) A minor violating this section shall commit an unruly act disposition of which shall be governed pursuant to Title 37 by the Hamilton County Juvenile Court.

(2) Any parent, guardian, or other person having the care, custody and control of a minor violating this section commits a violation of this ordinance which may be heard by the Chattanooga City Court and the parent, guardian, or other such person who is above the age of majority shall be fined no more than fifty dollars ($50.00) for each offense by the City Court Judge. Each violation of this section shall constitute a separate offense.

ARTICLE I. IN GENERAL

Sec. 31-1. General provisions.

(a) The purpose of this article is to establish uniform requirements for the disposal of wastewater and to regulate wastewater discharged into the City of Chattanooga's (hereinafter "city") sewer system. This article establishes conditions for connection to the sanitary sewer system and requires a permit. Certain acts which may be detrimental to the sewer system are prohibited, and the article provides measures for enforcement of its provisions and abatement of violations thereof.

(b) The director (hereinafter "director") shall exercise administrative management, control and jurisdiction over sanitary and storm sewers, sewage treatment and disposal facilities, mains and drainage, including their location, design, construction, operation, maintenance, repair and rehabilitation.

(c) The Wastewater Regulations and Appeals Board (hereinafter "board"), established pursuant to Section 31-57, shall hold hearings upon appeals from orders or actions of the director as may be provided under any provision of this chapter.
(Ord. No. 9409, § 1, 6-5-90; Ord. No. 12962, § 4, 6-16-15)

Sec. 31-2. Connection with city sanitary sewer required.

(a) *Sewer connection required.* Every building having plumbing fixtures installed and intended for human habitation, occupancy, or use on premises abutting a street, alley, or easement in which segment there is a sanitary sewer which is within one hundred (100) feet of the property line of the parcel containing the building shall be considered as being served by the city's sanitary sewer system.

All new buildings hereafter constructed which may be served by the city's sewer system shall not be occupied until the connection has been made. The owner or occupant of each lot or parcel of land which is now served or which may hereafter be served by the city's sewer system shall cease to use any other method for the disposal of sewage except as approved for direct discharge by the Tennessee Department of Health and Environment or by discharge to a properly functioning and approved septic tank. Septic tanks shall not be used where sewers are available. The director shall make any decision as to the availability of sewers. Notwithstanding the above exceptions, all premises served by the city sanitary sewer are subject to sewer user charges as described in Article II of this chapter.

(b) *Unconnected sewer service lines a nuisance where connection is available.* Except for discharge to a properly functioning septic tank system approved by the Chattanooga-Hamilton County Health Department or discharges permitted by a national discharge elimination system permit (hereinafter "NPDES") issued by the State of Tennessee Department of Health and Environment, the discharge of sewage into places other than the city's sewer system is declared a nuisance. All permanently moored boats, floating houses or floating restaurants which are not intended to be used as a means of transportation, are likewise required to discharge sanitary sewage into the city sewer system. If the owner of any property which requires a sewer connection fails or refuses to connect to the city's system, a notice shall be given to the Public Officer of the Department of Neighborhood Services and Community Development for such action as may be proper under Chapter 21 of this code. The director may take such other action to abate the nuisance as may be warranted under the circumstances.

(c) *Insufficient capacity, connection moratorium.* In those parts of the city sewer system where there is no additional capacity, and a sewer moratorium has been established pursuant to orders of the Tennessee Department of Health and Environment, no new or additional sewer connections shall be permitted.

Permits issued prior to the date of the moratorium may be completed. No new plumbing permits shall be issued for new buildings in a moratorium area after the effective date of the moratorium. A moratorium shall continue in effect until the capacity restriction has been corrected.
(Ord. No. 9409, § 1, 6-5-90; Ord No. 11345, § 12, 11-12-02; Ord. No. 12962, § 4, 6-16-15)

Sec. 31-3. Adequate and minimum fixtures, water heaters.

(a) *Minimum number of fixtures.* A dwelling shall have at least one (1) commode, one (1) bathtub or shower, one (1) lavatory, one (1) kitchen-type sink, and an adequate source of hot water for each family unit to meet minimum basic requirements for health, sanitation and personal hygiene. All other buildings, structures, or premises intended for human occupancy or use shall be provided with adequate sanitary facilities as may be required by any other law or regulation, but not less than one (1) commode and one (1) hand-washing lavatory.

(b) *Adequate water for disposal of waste required.* It shall be unlawful for any person in possession of premises into which a pipe or other connection with the city sanitary sewers and drains have been laid to permit the same to remain without adequate fixtures attached to allow a sufficient quantity of water to be so applied as properly to carry off all waste matter and keep the same unobstructed.

(c) *Water heaters.* Water heating facilities shall be accessible for emergency maintenance without entering any individual apartment or living unit, except that water heaters may be located within an apartment or living unit when supplying hot water to that unit only.
(Ord. No. 9409, § 1, 6-5-90)

Sec. 31-4. Installation, maintenance, repair of sewer service lines; charge; exception.

(a) *Definition.* A "standard sanitary sewer service line" is a four (4) inch or six (6) inch pipe extending from the sewer main or trunk location in a street, alley, or easement to the property served by the main or trunk.

(b) *Installation of sewer service lines.* Four (4) inch building sewers shall be laid on a grade of at least one percent (1.0%). Larger building sewers shall be laid on a grade that will produce a velocity when flowing full of at least two (2) feet per second. Slope and alignment of all building sewers shall be neat and regular.

Building sewers shall be constructed only of Schedule 40 solid core polyvinylchloride ("PVC") pipe with solvent-welded or rubber compression joints of approved type or such other materials of equal or superior quality as may be approved by the director. Under no circumstances shall cement mortar joints be used. Each connection to the sewer system must be made at a wye, or service line stubbed out, or in the absence of any other provision, by means of a saddle of a type approved by the city, attached to the sewer. No connection may be made by breaking into an existing sewer and inserting the service line.

Where a sanitary service line crosses from private property onto the public right-of-way, a bi-directional cleanout must be provided at the property owner's expense.

The building sewer may be brought into the building below the basement floor when gravity flow from the building to the sewer is at a grade of one percent (1.0%) or more if possible. In cases where basement or floor levels are lower than the ground elevation at the point of connection to the sewer, adequate precautions through the installation of check valves or other backflow prevention devices, to protect against flooding shall be provided by the owner. In all buildings in which any building drain is too low to permit gravity flow to the sewer, wastes carried by such building drain shall be lifted by an approved means and discharged into the city sewer. All costs associated with such lifting devices shall be the responsibility of the property owner.

(c) *Standard Sewer Stubouts.* Hereafter, as a part of sanitary sewer projects in the city, the city shall install, or cause to be installed, standard sanitary sewer service lines from mains or trunks located in a street, alley, or easement to the property line of each lot or residence on the street being sewered. In the case of sewers being constructed in undeveloped subdivisions located within a designated sewer project, the standard sanitary sewer service lines may be constructed to each lot as shown on the plat of the subdivision by the developer as filed in the Register's Office of Hamilton County, Tennessee. Sewer service lines may not be constructed by the city in a street where the property is unsubdivided and undeveloped. A fee shall be charged upon connection to the sewer line as provided in paragraph (d) of this section.

(d) *Fee.* There shall be no fee charged for connection to four (4) inch sewer service lateral lines. There is hereby levied and imposed a sewer service line charge of eight hundred dollars ($800.00) for every six (6) inch or larger sanitary sewer service line installed where a lateral sewer connection has been provided for use by the applicant. The service line charge shall be paid by property owners at the time that application is made to the city for permission to tie onto the sanitary sewer service line. The collection of such payments shall be the responsibility of the Development Review and Permitting Division of the Department of Public Works. This eight hundred dollar ($800.00) charge shall be in addition to any required fee for a plumbing permit, street cuts, or other fees; provided that, such sewer service line charge shall not apply if the lateral sewer connection was constructed by and the cost of same borne by the developer of a subdivision incidental to the construction of a collector sewer system for the subdivision or there has been no lateral sewer connection provided; and the applicant shall be required to show that he is entitled to this exception.

(e) *Title and maintenance.* All rights, title, and interest in the sanitary sewer service line installed by the City pursuant to paragraph (c) of this section are conveyed to the property owner upon connection to said line. Thereafter, all repairs and maintenance of the sanitary sewer service line for all sanitary sewer service lines on private property shall be the responsibility of either the property owner, user of the sewer, or the developer, as the owner, and user and developer shall agree by separate contract between themselves. Sanitary sewer service lines of four (4) inches or smaller within the right-of-way of a dedicated and accepted public street shall be the responsibility of the City. Blockages of these lines caused by root balls, grease clogs, or other obstructions that can be removed by cleaning are the responsibility of the property owner, user, or developer. City responsibility shall only cover repair or replacement of the structural pipes, fittings, and connection to the sewer main, including proper backfill and repair of any pavement or other surface features within the ROW, excluding private landscaping which shall be the property owner's responsibility.

In the event a property owner encounters a problem with a sanitary sewer service line that they believe is the responsibility of the City as described in the preceding paragraph, property owners are required to:

1. Have a bi-directional sewer cleanout installed at the City right-of-way line if one does not already exist; and
2. Have a licensed plumber attempt to clear any blockage in the line before contacting the City; and
3. Have a licensed plumber survey the service line using a camera to verify that required sewer maintenance is within the area of City responsibility; and
4. All video footage shall be recorded and submitted to the City detailing the approximate location needing repair within the righty-of-way.

(f) *Location of sewer stubout.* The plumbing contractor is responsible for locating the sewer stubout. City personnel will provide whatever information is available for this purpose. If no "wye" or "tee" exists within three (3) feet of either side of the location shown in the city's records, then a tap will be provided by the city when the sewer main is uncovered. If a manhole needed for locating a service line has been lost, then the city shall be responsible for locating the manhole.

(g) *Taps on city sewers.* All taps directly made unto the city's sewer lines shall be made by city sewer maintenance personnel. The request for the tap shall be made by the plumbing inspector. The plumbing contractor shall excavate to the city's sewer and expose the pipe in preparation for the tap. Only one (1) service line shall be allowed to be installed in a trench. New taps shall be made using a "wye" type connection.

(h) *Manhole required.* A new manhole will be required whenever a sewer service line larger than six (6) inches is needed to tie unto the city's sewer. The plumbing contractor shall excavate to the city's sewer and sufficiently expose the pipe for installation of a manhole. The city's sewer maintenance personnel shall install the manhole after a request is made by the plumbing inspector. The cost of the manhole, including labor and materials, shall be charged to the owner after construction is completed.

(i) *Maintenance of sewer service lines.* All repairs and maintenance of the sanitary sewer service line shall be the responsibility of the property owner or user of the sewer, excepting those portions of four (4) inch or smaller service lines that are eligible for the City's Sewer Lateral Maintenance program. Correction of excessive inflow or infiltration in sanitary service lines shall remain the responsibility of the property owner when the excessive inflow or infiltration occurs on private property. The city shall be responsible for the maintenance of collector lines and interceptor lines only up to the point where the owner's sewer service line connects to the city's lines.

(j) *Exceptions for state highways and railroads.* When the installation of sanitary sewer service lines is required for sewers constructed in highways or streets owned by the State of Tennessee for which boring rather than open cutting is required by regulation of the State of Tennessee, installation shall be at the expense of the property owner, and the provisions of paragraph (c) shall not be applicable, and the developer shall construct sanitary sewer service line at the developer's expense. Maintenance of sanitary sewer service lines within state or railroad rights-of-way shall be the responsibility of the City. Installation of sanitary sewer service lines in state highways or streets must additionally be approved by the Tennessee Department of Transportation and, in railroad rights-of-way, by the railroad.
(Ord. No. 9409, § 1, 6-5-90; Ord. No. 11175, § 32, 9-11-01; Ord. No. 12962, § 4, 6-16-15; Ord. No. 13091, § 1, 10-11-22; Ord. No. 13925, § 1, 12-6-22)

Sec. 31-5. Service lines to enter sanitary sewers at junction; exception.

No service lines shall enter a sanitary sewer at any point except where a junction has been made and left therefor, unless by special permission of the director, which authority he may delegate to the chief plumbing inspector. In all cases where such permission is given, the work shall be done under the inspection of the chief plumbing inspector and at the risk and expense of the party making the connection.
(Ord. No. 9409, § 1, 1-6-92; Ord. No. 12962, § 4, 6-16-15)

Sec. 31-6. Permit required to make connection.
